Information on schedules of classes may be obtained by writing to: Ostrow School of Dentistry of USC, Office of Continuing Education, Room 201J, University Park, Los Angeles, CA 90089-0641, (213) 821-2127, FAX: (213) 740-3973, email cidental@usc.edu or refer to the school's Website at [www.uscdentalce.org](http://www.uscdentalce.org).

## Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

### DENTISTRY (DENT)

#### DENT 221 Introduction to Dentistry (1)

History and current role of dental science in the health services field; review of research; overview of dental procedures with laboratory experience and practice observation.

#### DENT 402 Formal Science-Writing (2)

A scientist-taught, lecture-workshop-tutorial format for developing skills in formal science-writing (e.g., abstracts, journal articles, grants). Not open to students in the School of Dentistry. *Prerequisite:* upper division standing in science and preprofessional majors.

#### DENT 412 Fundamentals of Craniofacial and Dental Technology (3, Sp)

Biomedical engineering and technology applied to oral health professions. Dental biomaterials, CAD-CAM, digital dental technology and tissue engineering applications to craniofacial diseases, disorders, and enhancements. Junior standing. (Duplicates credit in former BME 412.)

### ADVANCED DENTAL EDUCATION CONJOINT PROGRAM (ADNT)

#### ADNT 701 Research Methodologies in

**Dentistry (2)** Critical evaluation of the scientific principles in the development, execution, and interpretation of methodologies used in dentistry.

**ADNT 702 Physical Diagnosis (2)** Didactic and clinical experience in physical diagnosis relevant to practice of the dental specialties. Lecture, 1 hour; demonstration, 1 hour.

**ADNT 703abcdefhij Seminar: Combined Treatment Planning (2 each)** Interdisciplinary consideration of complex cases which involve several of the dental specialties.

#### ADNT 704abc Oral Biology (1-13 each)

Interdisciplinary consideration of contemporary biology of the cell, bone, teeth, periodontium, occlusion, dental pulp, pain and human growth and development.

**ADNT 706 Seminar: Diseases of Childhood**

**(2)** Intraoral hard and soft tissue pathologic conditions in children, common bacterial and viral diseases and their transmission in the pediatric dental environment. Seminar, 2 hours. Graded CR/NC.

**ADNT 707 Behavior of the Child Patient (2)**

Child and adolescent psychological growth and development: Human communication, needs, motivation, and learning. Critical analysis of patient management, team treatment, and practice administration. Lecture, 2 hours.

**ADNT 710 Internship: Dental Education**

**(1-5)** Practical experience teaching predoctoral students. Units and hours variable.

**ADVANCED EDUCATION IN GENERAL DENTISTRY (AEGD)****AEGD 701abc Advanced Comprehensive Oral Health Care (2-3-3)**

Comprehensive, multidisciplinary oral health care delivery concepts and methods for the general dentist. Registration limited to students in the AEGD certificate program, Year 1. Graded CR/NC.

**AEGD 702abc Review of Dental Literature (1-1-1)**

Comprehensive review of relevant dental literature pertaining to advanced comprehensive, multidisciplinary oral health care delivery for the general dentist. Registration limited to students in AEGD certificate program, Year 2. Graded CR/NC.

**AEGD 761abc Advanced Comprehensive Oral Health Care Delivery I (1-1-2)**

Clinical applications of comprehensive, multidisciplinary oral health care delivery concepts and techniques for the first year AEGD resident. Registration limited to students in AEGD certificate program, Year 1. Graded CR/NC.

**AEGD 762ab Hospital Oral Surgery and Anesthesia (1-1)**

Clinical applications of advanced oral surgery and maxillofacial prosthetics, pharmacology, and anesthesia in a hospital setting. Registration limited to students in AEGD certificate program, Year 1. Graded CR/NC.

**AEGD 764abc Advanced Comprehensive Oral Health Care Delivery II (2-2-2)**

Clinical applications of comprehensive, multidisciplinary oral health care delivery concepts and techniques for the second year AEGD resident. Registration limited to students in AEGD certificate program, Year 2. Graded CR/NC.

**ANATOMY (ANAT)****ANAT 321 Head and Neck Anatomy (2)**

Anatomy of the head and neck with lecture and laboratory demonstration for dental hygienists.

**ANAT 501 Functional Neuroanatomy-Neurophysiology (3)**

Structure and function of the human nervous system. Includes participation in neurology clinics at LAC+USC Medical Center.

**ANAT 521 Head and Neck Anatomy (2, Fa)**

Detailed morphology of the head and neck emphasizing considerations applicable to dentistry; morphology of the thorax; osteology of the skull.

**ANAT 522 Systemic Human Anatomy (3)**

Structure and function of the human body; organ systems and morphology of the abdomen and pelvis; axilla and arm; osteology of the skull.

**ANAT 523 Head and Neck Dissection (1)**

Laboratory experience in dissection of the structures of the human head and neck with emphasis on the osteology and morphology of the face.

**ANAT 701 Advanced Head and Neck Anatomy (1)**

Detailed study of structure and function of the orofacial region including recent research and advances in dentistry.

**ANAT 722 Advanced Head and Neck Anatomy Laboratory (1)**

Dissection of the head and neck with emphasis on the osteology and morphology of the face. *Prerequisite:* ANAT 701 enrollment.

**ANESTHESIA AND MEDICINE (AMED)****AMED 421 Seminar: Teaching Local Anesthesia (1)**

Techniques of teaching local anesthesia to dental hygiene students.

**AMED 502 Emergency Medicine (2)**

Recognition and management of life-threatening emergencies, including unconsciousness, altered consciousness, respiratory distress, convulsions, drug-related emergencies, and chest pain.

**AMED 523 Pharmacosedation II (1)**

Introduction to intravenous sedation; evaluation of patient, selection of technique and procedure; prevention of complications, recognition and management of complications; introduction to general anesthesia.

**AMED 524 Pain and Anxiety Control (2, Sp)**

Theory and techniques for pain control, anxiety includes: local anesthetics; drugs, adjunctive premedication, techniques in oral, rectal, intramuscular, inhalation sedation, prevention, management of complications. (Duplicates credit in the former AMED 521 and AMED 522.)

**AMED 605abcde Seminar: Intravenous Sedation (0-0-0-0-4)**

Review of the literature and a selection of case studies in intravenous sedation.

**AMED 606abcde Clinical Intravenous Sedation (0-0-0-0-3)**

Management of patients receiving intravenous sedation, including physical evaluation, patient monitoring, recognition and management of unconscious airway and emergency situations; IV sedation procedures.

**AMED 610 Physical Diagnosis/Cardiology (1)**

Participation in the Cardiac Clinic at LAC+USC Medical Center; experience in cardiac auscultation, abnormal breath sounds, use of cardiac drugs, and prosthetic valve management.

**AMED 613abcde Clinic: Intravenous Sedation (0-0-0-0-3)**

Clinical experience in intravenous sedation including physical evaluation, patient monitoring, and management of unconscious airway. *Prerequisite:* AMED 606e.

**AMED 750abc Physical Evaluation and Anesthesia (2-2-1)**

In-depth examination of physical evaluation, emergency medicine, basic life support, inhalation sedation, intravenous sedation, local anesthesia, and patient monitoring; includes clinical experience.

**BIOCHEMISTRY (DBIO)****DBIO 310 Oral Biochemistry (2, Fa)**

Biochemical insight into oral tissues and saliva — emphasizing anti-microbial protection (systemic and therapeutic) against demineralization and connective tissue destruction.

**DBIO 501 Biochemistry and Molecular Biology (2)**

Biochemical properties of carbohydrates, lipids, amino acids, proteins, and nucleic acids — emphasizing molecular structure-function interrelatedness, integrated metabolism, and molecular biology of the cell.

**CRANIOFACIAL BIOLOGY (CBY)**

**CBY 561 Molecular Genetics (4, Sp)** (Enroll in INTD 561)

**CBY 571 Biochemistry (4, Fa)** (Enroll in INTD 571)

**CBY 573 Molecular Embryology (4)** Principles of developmental biology; emphasis on molecular genetics and cell and molecular mechanisms of tissue interaction and morphodifferentiation.

**CBY 574 Statistical Methods in Bioexperimentation (3)** Experimental design and analysis as applied to all levels of biologic organization; hypothesis construction; probability; univariate and multivariate analysis; basic epidemiology.

**CBY 575 Biologic Basis of Oral-facial Disease (3, FaSpSm)** Cell and molecular biology of oral tissues in disease: emphasis on immunopathology. (Duplicates credit in former CBY 575*a*).

**CBY 576 Biochemical Aspects of Periodontal Disease (3, FaSpSm)** Cell and molecular biology of oral tissues in disease; emphasis on molecular oral pathology. (Duplicates credit in former CBY 575*b*).

**CBY 577L Principles of Teratology (4)** Environmental factors associated with human congenital malformations; emphasis on drug-induced birth defects; limited laboratory using avian and mammalian animal models.

**CBY 578 Pathological Conditions of the Craniofacial Complex (3, FaSpSm)** Acquired and inherited, systemic and local disease resulting in clinical craniofacial morbidity; cellular and molecular expression as related to etiology, diagnosis, treatment, and prognosis.

**CBY 579L Craniofacial Molecular Genetics (4)** Principles and methodologies of mammalian molecular genetics; laboratory exercises applied to pre- and postnatal craniofacial growth and development.

**CBY 580ab Seminars in Craniofacial Biology (2-2)** Seminars presented by recognized researchers in the various disciplines relating to craniofacial biology; selected readings in preparation for discussion. Graded CR/NC.

**CBY 582L Laboratory Methods (3)** Contemporary methods of laboratory analysis, including theoretical and practical exposure to procedures and equipment in the research laboratory.

**CBY 583 Craniofacial Clinical Genetics (4)** Principles of human genetics; clinically oriented normal and abnormal human embryology; diagnosis and natural history of human craniofacial birth defects; genetic counseling and bioethics.

**CBY 585 Systematic Research Writing (3, FaSpSm)** Enhancement of critical research thinking by fulfilling anticipated conceptual components of the journal article; perfection of writing skills by correcting inter- and intra-sentence flaws.

**CBY 586x Scientific Writing Practicum (3)** Development of writing skill while completing a discipline-required project (proposal, dissertation, journal article). Seminar and tutorial format. Not for graduate credit. *Prerequisite:* CBY 585 or DENT 402.

**CBY 587 Cell and Molecular Biology of Craniofacial Tissues (3)** Contemporary cell and molecular biology as applied to the development, structure, and function of craniofacial tissues.

**CBY 590 Directed Research (1-12)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**CBY 594abz Master's Thesis (2-2-0)** Credit on acceptance of thesis. Graded IP/CR/NC.

**CBY 599 Special Topics (2-4, max 8)** Seminars on craniofacial biology in subject areas of special interest to faculty and students.

**CBY 671 Epistemology and Ethos of Bioscience (2)** Classical and contemporary thought on knowledge acquisition, truth, and method as applied to bioscience; characteristic spirit, beliefs, and moral assumptions of bioscientists in modern history.

**CBY 672 Advances in Development and Differentiation (2)** Integration of recent advances in cell and molecular developmental biology into classical and emerging thematic frameworks.

**CBY 673 Biomineralization (2)** Fundamental principles and mechanisms of matrix mediated biomineralization in model systems from bacteria to humans.

**CBY 674 Advanced Oral Microbiology (2)** Cell and molecular aspects of microbiology as applied to oral infections: microbial physiology and genetics; oral microbial ecology; host resistance factors in oral infections.

**CBY 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**CBY 794abcdz Doctoral Dissertation (2-2-2-2-0)** Credit on acceptance of dissertation. Graded IP/CR/NC.

**COMMUNITY DENTISTRY (CMDT)**

**CMDT 501 Introduction to Community Dentistry Programs (1)** Lectures and practical field experiences introducing the role of the dentist in a variety of organized public health programs.

**CMDT 502ab Contemporary Dental Practice (2-2)** Economic, legal, and professional aspects of dental practice; alternative careers in dentistry.

**CMDT 507abc Ethical Issues in the Practice of Dentistry (0-0-1)** Examination of the major ethical issues in the current practice of dentistry; study of effective and proper methods of addressing the issues.

**CMDT 601 Mobile Clinic (1)** Clinic experience in provision of dental care for children of low income agricultural workers through use of mobile dental clinic on location.

**CMDT 603 Multiphasic Experiences in Extramural Dentistry (1)** Community responsibilities of dentists in a dynamic society. Practical experiences include consultations and visitations to private offices, group practices, hospitals, and neighborhood health clinics.

**CMDT 606 Business Principles in Dentistry (2)** Overview of basic business administration principles, including economics, accounting, marketing, finance, entrepreneurship, and strategic planning as relevant to the practice of dentistry.

**CMDT 607abc Sports Dentistry (0-0-2)** The role of the dentist in prevention, diagnosis, and treatment of sports related dental trauma; recognition and correct referral of sports injuries and medical problems; clinical treatment of athletes including exposure to cerebral concussion, hypothermia, heat stroke and Sudden Death Syndrome.

**CMDT 608abc Community Service (0-0-1)** Two one-hour seminars plus four separate days of field experience. Participate in health fairs, classroom screening, health education, career counseling, and other community projects.

**DENTAL HYGIENE (DHYG)**

**DHYG 311ab Fundamentals of Clinical Dental Hygiene Practice (3-3)** Principles and techniques of clinical dental hygiene with emphasis on preventive dentistry; laboratory and preclinical experience in techniques of complete oral prophylaxis services; and clinical application thereof.

**DHYG 314L Dental Morphology Laboratory (1)** Fundamentals of tooth morphology and characteristics of the deciduous and permanent dentition. Laboratory, 3 hours.

**DHYG 316 Patient Education in Preventive Dental Care (1)** Principles and methods for teaching and motivating patients to practice effective oral care.

**DHYG 318 Dental Specialties (2)** Procedures performed in selected dental specialty areas with emphasis on the role of the dental hygienist.

**DHYG 320 Preventive Dental Therapy (2, Sp)** Study of etiology, risk factors and preventive management of periodontal disease and dental caries. Setting up community and individual preventive oral health care programs.

**DHYG 401 Introduction to Advanced Dental Hygiene (2)** Principles and techniques of advanced dental hygiene with emphasis on advanced root instrumentation and dental hygiene treatment planning.

**DHYG 410abc Clinic: Dental Hygiene (2-7 each)** Application of advanced techniques with emphasis on increased proficiency in skills: principles of prevention; periodontal examination; root planing; soft tissue curettage; local anesthesia; inhalation sedation.

**DHYG 411ab Dental Literature Review (2-2)** Seminar-discussion and analysis of current dental literature in selected topics related to dental hygiene practice.

**DHYG 412 Preventive Dental Care Programs (1)** Methods for development and implementation of programs involved with the delivery of preventive dental care.

**DHYG 413ab Dental Hygiene Educational Concepts (2-2)** Educational concepts for development of dental hygiene curriculum, including teaching and learning strategies, curriculum design, course development and evaluation methods.

**DHYG 414ab Advanced Dental Hygiene (2-2)** Advanced dental hygiene techniques: treatment, referral and maintenance of the advanced periodontitis patient emphasizing treatment planning and patient management.

**DHYG 415ab Directed Clinical Teaching (2-2)** Experience in clinical teaching with supervision and evaluation of undergraduate dental hygiene and doctoral dental students engaging in patient care.

**DHYG 417 Issues in Dental Health Care Delivery (1)** Study of current trends in public health care delivery, manpower, finance mechanisms, and quality assurance.

**DHYG 422 Essentials of Dental Hygiene Practice (1)** A review of the moral, legal, and ethical responsibilities of the dental hygienist. Other topics: securing a position, dental economics, taxes, insurance, and human relationships in the dental office. Lecture, 1 hour.

**DHYG 424ab Research Methods (1-1)** Critical evaluation of scientific literature; techniques of writing and coordinating scientific information for research papers; techniques for preparation of scientific table clinics. Graded IP.

**DHYG 430 Seminar: Initial Periodontal Therapy (2)** Presentation of selected clinical cases with documentation of clinical findings, diagnosis, treatment planning, and therapy.

**DHYG 431 Seminar: Periodontal Treatment Planning (2)** Periodontal treatment planning; case presentations of uncomplicated periodontitis progressing to complex treatment involving multidisciplinary approach.

**DHYG 460abcd Clinic: Advanced Dental Hygiene (2-2-1-1)** Clinical experience in advanced dental hygiene; preventive and therapeutic skills with emphasis on advanced periodontal instrumentation and expanded functions for the registered dental hygienist.

**DHYG 516ab Community Oral Health (2, Fa; 2, Sp)** *a*: Introduction of core concepts, values, and methods of dental public health practice as it relates to the dental hygienist. *b*: Strategies for implementation and evaluation of community health programs.

**ORAL DIAGNOSIS AND RADIOLOGY (DIAG)**

**DIAG 415 Radiographic Techniques (1)** Clinical application of radiographic chairside and dark room techniques and quality control.

**DIAG 521 Principles of Oral Radiology (2)** Introduction to ionizing radiation and its use in the health professions; radiation biology, physics and hygiene; descriptive terms used in radiography, with illustrations; documentation.

**DIAG 522 Radiographic Techniques (1)** Clinical applications of radiographic chairside and darkroom techniques; quality control and evaluation of the radiograph.

**DIAG 523 Oral Maxillofacial Imaging (2, 5m)** Clinical application of intraoral and extraoral radiographic techniques; emphasis upon radiation physics, biology, safety, film and digital imaging and image interpretation.

**DIAG 615 Digital and Oral Maxillofacial Imaging (2-4, FaSp)** Introduction to computer based imaging in dentistry. Student will learn to use video cameras, scanners, intraoral sensors and advanced imaging technology. Open to dentistry and dental hygiene majors only. *Prerequisite*: DIAG 521, DIAG 522.

**DIAG 621 CAD/CAM in Dentistry (1)** Modern principles of dental Computer Assisted Design/Computer Assisted Manufacturing and will fabricate such restorations in the laboratory.

**DENTAL MATERIALS (DMAT)**

**DMAT 316L Dental Materials and Clinical Procedures (2)** Biomechanical principles, properties, and manipulation of dental materials; armamentarium for various dental procedures.

**DMAT 505 Dental Materials Update (1)** Biocompatibility of dental materials, restorative materials and techniques update, critical analysis of published literature. Includes specific laboratory testing research methodology and design of clinical trials.

**DMAT 521ab Dental Materials (2-2)** Properties, biomechanical function, manipulation, and clinical application of dental materials. Correlates restorative, biological, and materials sciences.

**DMAT 701 Advanced Biomaterials (2)** Fundamental principles of materials science and clinical dentistry relative to proper selection and manipulation of dental materials.

**DENTAL PROBLEM BASED LEARNING (DPBL)**

**DPBL 501abc Dental Problem Based Learning — Human Structure I (3-3-3, FaSp5m)** Problem based learning presentation of normal and abnormal structures including anatomy, cell biology, embryology, histology, pathology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. Acceptance to D.D.S. program required.

**DPBL 502abc Dental Problem Based Learning — Human Function I (8-8-8, FaSpSm)**

Problem based learning presentation of normal and abnormal function including biochemistry, endocrinology, genetics, immunology, microbiology, nutrition, pharmacology, physiology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. Acceptance to D.D.S. program required.

**DPBL 503abc Dental Problem Based Learning — Human Behavior I (2-2-2, FaSpSm)**

Problem based learning presentation of normal and abnormal behavior including communication, ethics, multiculturalism, patient management, phobias associated with treatment of patients with and without special needs. All material discussed with direct relationship to a well-characterized human clinical case. Acceptance to D.D.S. program required.

**DPBL 504abc Dental Problem Based Learning — Human Clinical Dentistry I (4-4-4, FaSpSm)**

Problem based learning approach to the delivery of dental health care. Didactic, preclinical and clinical principles of endodontics, geriatrics, oral diagnosis, oral pathology, oral radiology, oral surgery, orthodontics, pediatric dentistry, periodontics, prosthodontics and restorative dentistry will be presented with a direct relationship to a well-characterized human clinical case. Acceptance to D.D.S. program required.

**DPBL 511abc Dental Problem Based Learning — Human Structure II (2-2-2, FaSpSm)**

Problem based learning presentation of normal and abnormal structures including anatomy, cell biology, embryology, histology, pathology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 502c.

**DPBL 512abc Dental Problem Based Learning — Human Function II (5-5-5, FaSpSm)**

Problem based learning presentation of normal and abnormal function including biochemistry, endocrinology, genetics, immunology, microbiology, nutrition, pharmacology, physiology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 502c.

**DPBL 513abc Dental Problem Based Learning — Human Behavior II (3-3-2, FaSpSm)**

Problem based learning presentation of normal and abnormal behavior including communication, ethics, multiculturalism, patient management, phobias associated with treatment of patients with and without special needs. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 502c.

**DPBL 514abc Dental Problem Based Learning — Human Clinical Dentistry II (7-7-8, FaSpSm)**

Problem based learning approach to the delivery of dental health care. Didactic, preclinical and clinical principles of endodontics, geriatrics, oral diagnosis, oral pathology, oral radiology, oral surgery, orthodontics, pediatric dentistry, periodontics, prosthodontics and restorative dentistry will be presented with a direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 504c.

**DPBL 521abc Dental Problem Based Learning — Human Structure III (1-1-1, FaSpSm)**

Problem based learning presentation of normal and abnormal structures including anatomy, cell biology, embryology, histology, pathology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 511c.

**DPBL 522abc Dental Problem Based Learning — Human Function III (1-1-1, FaSpSm)**

Problem based learning presentation of normal and abnormal function including biochemistry, endocrinology, genetics, immunology, microbiology, nutrition, pharmacology, physiology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 512c.

**DPBL 523abc Dental Problem Based Learning — Human Behavior III (1-1-1, FaSpSm)**

Problem based learning presentation of normal and abnormal behavior including communication, ethics, multiculturalism, patient management, phobias associated with treatment of patients with and without special needs. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 502c.

**DPBL 524abc Dental Problem Based Learning — Human Clinical Dentistry III (14-14-14, FaSpSm)**

Problem based learning approach to the delivery of dental health care. Didactic, preclinical and clinical principles of endodontics, geriatrics, oral diagnosis, oral pathology, oral radiology, oral surgery, orthodontics, pediatric dentistry, periodontics, prosthodontics and restorative dentistry will be presented with a direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 502c.

**DPBL 531ab Dental Problem Based Learning — Human Structure IV (1-1, FaSp)**

Problem based learning presentation of normal and abnormal structures including anatomy, cell biology, embryology, histology, pathology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 502c.

**DPBL 532ab Dental Problem Based Learning — Human Function IV (1-1, FaSp)**

Problem based learning presentation of normal and abnormal function including biochemistry, endocrinology, genetics, immunology, microbiology, nutrition, pharmacology, physiology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 512c.

**DPBL 533ab Dental Problem Based Learning — Human Behavior IV (1-1, FaSp)**

Problem based learning presentation of normal and abnormal behavior including communication, ethics, multiculturalism, patient management, phobias associated with treatment of patients with and without special needs. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 523c.

**DPBL 534ab Dental Problem Based Learning — Human Clinical Dentistry IV (13-13, FaSp)**

Problem based learning approach to the delivery of dental health care. Didactic, preclinical and clinical principles of endodontics, geriatrics, oral diagnosis, oral pathology, oral radiology, oral surgery, orthodontics, pediatric dentistry, periodontics, prosthodontics and restorative dentistry will be presented with a direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 502c.

**ENDODONTICS (ENDO)**

**ENDO 501 Clinical Endodontics (1)** Diagnosis and treatment procedures for basic clinical endodontics, including management of endodontic emergencies; relationship of endodontics to the various dental disciplines.

**ENDO 502 Advanced Endodontics (1)**

Theoretical principles for the treatment of advanced endodontic cases; alternative methods of endodontic therapy; introduction to interspecialty cases.

**ENDO 521 Preclinical Endodontics (3)**

Theoretical principles of endodontic therapy related to pulpal and periapical disease; training in procedures of localizing, preparing, and filling the root canal of human teeth.

**ENDO 562abcd Clinic: Concentrated Early Endodontics (0-0-0-1)** Early clinical experience including assigned clinic demonstration block.

**ENDO 563ab Clinic: Endodontic Therapy (0-2)** Clinical experience emphasizing diagnosis, treatment planning, and endodontic patient management.

**ENDO 610 Clinical Advanced Endodontics**

**(2)** In-depth discussion of endodontic surgery, retreatment, and hemisection cases; includes clinical experience in advanced endodontic cases.

**ENDO 701abcd Seminar: Biological Basis of Endodontic Therapy (1-1-1-1)** Investigation of the theoretical and biological bases of clinical endodontic procedures.

**ENDO 702 Seminar: Advanced Clinical Endodontics (2)** Course designed to train students in the management of simple and complex endodontic cases.

**ENDO 703abcd Seminar: Review of Endodontic Literature (1-1-1-1)** Critical review and analysis of classical and current endodontic literature.

**ENDO 704ab Seminar: Surgical Endodontics (2-2)** Indications, principles, and techniques of surgical endodontics.

**ENDO 705ab Seminar: Endodontic Case Presentation (4-4)** Student presentation of cases for critique and analysis.

**ENDO 710 Seminar: Endodontic Practice Management (2)** Organizing, staffing, and evaluation of an endodontic practice. Modes and patterns of management including use of auxiliaries. Emphasis on endodontist-general practitioner relationship; legal aspects of dental practice. Seminar, 2 hours.

**ENDO 711 Alternatives in Endodontics (4)** Alternative endodontic techniques presented by guest clinicians. Emphasis on endodontics and its relationship with periodontal, restorative, and surgical disciplines.

**ENDO 761abcdef Clinic: Advanced Endodontics (1-9 each)** Advanced clinical experience emphasizing the diagnosis and management of complicated endodontic cases.

**ENDO 790 Directed Research: Endodontics (1-12)** Principles of planning, organizing, and executing a clinical or educational research project. Graded CR/NC.

**FIXED PROSTHODONTICS (FPRO)**

**FPRO 520 Preclinical Fixed Prosthodontics (ISP) (2)** Basic fundamentals of fixed prosthodontics; preparation for clinical procedures in posterior PFM's, posterior mandibular FPD's and in restoring endodontically treated teeth.

**FPRO 521 Preclinical Fixed Prosthodontics I (3)** Fundamentals and principles of posterior prosthodontic procedures, including diagnosis, biomechanic principles, and construction of fixed prosthodontic restorations.

**FPRO 522 Preclinical Fixed Prosthodontics II**

**(3)** Fundamentals of aesthetic restorations; fabrication of posterior and anterior porcelain-fused-to-metal restorations and anterior porcelain jacket crown; restoration of endodontically treated teeth.

**FPRO 561abcd Clinic: Fixed Prosthodontics I (0-0-0-3)** Clinical application of fixed prosthodontic principles in patient treatment.

**FPRO 562ab Clinic: Fixed Prosthodontics II (0-3)** Clinical application of fixed prosthodontic principles in patient treatment.

**FPRO 601 Advanced Fixed Prosthodontics (4)** Critical review and evaluation of the fixed prosthodontic literature; guided experience in the laboratory and clinical phases of fixed prosthodontic therapy.

**GERIATRIC AND SPECIAL PATIENT DENTISTRY (GSPD)**

**GSPD 504 Dental Treatment of the Geriatric and Special Patient (2)** Social, psychological, economic and health factors which influence dental care for the geriatric and special patient populations; specific considerations and modifications of conventional dental treatment.

**GSPD 562abc Clinic: Geriatric Dentistry (0-0-1)** Clinical experience in dental treatment of geriatric patients at an extramural site.

**GSPD 563abc Clinic: Special Patient Care (0-0-1)** Clinical experience in treatment of the physically, medically, or mentally disabled patient.

**GSPD 610 Clinical Gerontology (1)** Clinical application of principles of geriatric dentistry. Evaluation, treatment planning, and clinical care of elderly patients at residential and skilled-nursing care facilities.

**GSPD 612 Special Patient Care Clinic (1)** Clinical experience in the evaluation, diagnosis, treatment planning and management of oral problems in special needs patients.

**HISTOLOGY (DHIS)**

**DHIS 310 Basic Tissues and Histology and Embryology (2, Fa)** Histology of basic tissues, oral histology, orofacial embryology, orofacial clefts and functional correlates.

**DHIS 701 Advanced Oral Histology (2)** Microscopic anatomy, ultrastructure and histochemistry of developing and functional oral tissues; based on recent advanced in oral LM, TEM, and SEM histology.

**HUMAN BEHAVIOR (HBHV)**

**HBHV 310 Interactional Skills in Dental Hygiene (1)** Training in the application of behavioral and communication skills.

**HBHV 501 Behavioral Skills in Dentistry (1)** Introduction to key personal, interpersonal, and professional factors that shape the doctor-patient relationship; ways interactional skills influence the effectiveness, durability, and satisfaction of the doctor-patient relationship.

**HBHV 502 Interactional Skills (1)** Introduction to purpose, objectives, and principles of clinical interviewing.

**HBHV 504 Patient Education and Management (1)** Management of difficult patients; psychology and behavioral treatment of pain; patient education of treatment planning; smoking cessation program.

**HBHV 550 Communications in Clinical Dentistry (1)** Verbal and nonverbal communication in clinical dentistry; clinical experience in use of manual, verbal, and non-verbal communication skills during a traumatic injection procedure.

**HBHV 561abcde Clinic: Behavioral Dentistry (0-0-0-0-1)** Clinical application of behavioral dentistry principles. Data collection, case presentation, fear reduction (iatrosedation), and tobacco cessation.

**HBHV 601 Understanding Stress in Dental Practice (2)** Investigation of the approaches to understanding and managing stress, especially the stress issues in dentistry.

**INTERDISCIPLINARY — BASIC SCIENCES (INTB)**

**INTB 504 Human Craniofacial Development and Genetics (3)** Principles of human embryology and genetics; craniofacial developmental biology; molecular genetics, cytogenetics, clinical orofacial genetics, genetic counseling; bioethics.

**INTB 521 Basic and Medical Microbiology (2)** Fundamentals of microbial structure, growth and physiology; major bacterial, viral and fungal diseases, symptoms, course, control and treatment; emphasis on diseases related to dental management.

**INTB 601 Advances in Oral Biology (2)** Review of basics of scientific methodology; comparison between and indications for scientific studies and case reports; critical review of current dental literature.

**INTB 603 Systematic Approach to Scientific Writing (2)** Study of dental research publication and review of writing principles; focus on logical arrangement of information, avoidance of common writing flaws, attainment of syntactical fluency.

**INTB 604 Clinics in Craniofacial Malformations (2)** Diagnosis, treatment, and rehabilitation of craniofacial malformations; principles of health care of craniofacial malformation patients. Includes hospital clinical observation.

**INTB 650abcdef Dental Research Participation (1-6 each)** Assist in research in basic science, biomedical, or clinical dental areas. Experience in research strategy, design and methods using practical scientific problem solving.

**INTB 651abcd Experience in Dental Teaching (1-6 each)** Practical teaching experience in dental laboratory and clinic settings under faculty supervision. Includes instruction in effective methods.

**INTB 652 Externship (1-6)** Dental experience at an off-site location — not limited to clinical experience. Student participation must be approved by Associate Dean, Academic Affairs.

**INTB 690abcdef Directed Dental Research (1-12 each)** Dental clinical and/or basic science research under faculty guidance; proposal developed, research conducted, conclusion drawn, paper written. Units determined by extent of research. Graded CR/NC.

#### **INTERDISCIPLINARY — DEVELOPMENTAL DENTISTRY (INDD)**

**INDD 501 Applied Growth and Development (1)** Clinical relevance of chronological and biological assessment of maturation related primarily to diagnosis and prognosis.

**INDD 650abcdef Dental Research Participation (1-6 each)** Assist in research in basic science, biomedical, or clinical dental areas. Experience in research strategy, design and methods using practical scientific problem solving.

**INDD 651abcd Experience in Dental Teaching (1-6 each)** Practical teaching experience in dental laboratory and clinic settings under faculty supervision. Includes instruction in effective methods.

**INDD 652 Externship (1-6)** Dental experience at an off-site location — not limited to clinical experience. Student participation must be approved by Associate Dean for Student and Academic Life.

**INDD 690abcdef Directed Dental Research (1-12 each)** Dental clinical and/or basic science research under faculty guidance; proposal developed, research conducted, conclusion drawn, paper written. Units determined by extent of research. Graded CR/NC.

#### **INTERDISCIPLINARY — PRACTICE DYNAMICS (INTP)**

**INTP 501 Behavioral Strategies in Dentistry (2)** Improvement of time and stress management and effectiveness in working with others; establishment of goals in dentistry; effective presentation of ideas. For Advanced Standing Program for International Dentists.

**INTP 502ab Human Relations in Dental Practice (2-2)** Introduction to behavioral concepts related to pain, fear, sedation; interviewing, treatment planning; care of geriatric and handicapped patients; patient education; includes principles of clinical application.

**INTP 503ab Evaluation of Scientific Information in Clinical Practice (0-1)** Practical guidelines for critically appraising scientific information applicable to the clinical practice of dentistry. Seminars will complement lectures with examples.

**INTP 650 Dental Research Participation (1-6)** Assist in research in basic science, biomedical, or clinical dental areas. Experience in research strategy, design and methods using practical scientific problem solving.

**INTP 651 Experience in Dental Teaching (1-6)** Practical teaching experience in dental laboratory and clinic settings under faculty supervision. Includes instruction in effective methods.

**INTP 652 Externship (1-6)** Dental experience at an off-site location — not limited to clinical experience. Student participation must be approved by Associate Dean for Student and Academic Life.

**INTP 690 Directed Dental Research (1-12)** Dental clinical and/or basic science research under faculty guidance; proposal developed, research conducted, conclusion drawn, paper written. Units determined by extent of research. Graded CR/NC.

#### **INTERDISCIPLINARY — RESTORATIVE DENTISTRY (INTR)**

**INTR 503 Preclinical Diagnosis and Treatment Planning (2)** Interdisciplinary course focusing on diagnosis and treatment planning through didactic course work and workshops which will include data collection/assessment, diagnosis and treatment planning methodologies, and specialty considerations.

**INTR 524abcdef Clinical Practice (0-0-0-0-3, FaSpSm)** The clinical component of existing didactic courses in Practice Management and Human Behavior. Graded IP.

**INTR 550ab Introduction to Clinical Dentistry (0-1)** Clinical operatory preparation; asepsis and sterilization; preventive dentistry; introduction to physical evaluation, extra- and intra-oral examinations, treatment sequencing, dental specialty areas; includes clinical assisting.

**INTR 551abcde Clinical Diagnosis and Treatment Planning (0-0-0-0-1)** Large and small group seminars focusing on diagnosis and treatment planning involving multiple specialty case presentations; integrated therapy, contingency plans and case presentations will be included.

**INTR 553abcdef Clinic: Diagnosis and Treatment Planning (0-0-0-0-2)** Clinical experience in diagnostic procedures and treatment planning in care of dental patients. Includes student preparation of documentation of patient care and seminar.

**INTR 652 Externship (1-6)** Dental experience at an off-site location — not limited to clinical experience. Student participation must be approved by Associate Dean for Student and Academic Life.

**INTR 690abcdef Directed Dental Research (1-12 each)** Dental clinical and/or basic science research under faculty guidance; proposal developed, research conducted, conclusion drawn, paper written. Units determined by extent of research. Graded CR/NC.

#### **INTERDISCIPLINARY — SURGICAL SCIENCES (INTS)**

**INTS 651abcd Experience in Dental Teaching (1-3, max 6)** Practical teaching experience in dental laboratory and clinic settings under faculty supervision. Includes instruction in effective methods.

**INTS 652 Externship (1-6)** Dental experience at an off-site location — not limited to clinical experience. Student participation must be approved by Associate Dean for Student and Academic Life.

**INTS 690abcdef Directed Dental Research (1-12 each)** Dental clinical and/or basic science research under faculty guidance; proposal developed, research conducted, conclusion drawn, paper written. Units determined by extent of research. Graded CR/NC.

#### **INTERDISCIPLINARY — DIAGNOSTIC SCIENCES (INTX)**

**INTX 501abcdeh Integrated Basic and Applied Science I (1-1-2-2-2-1)** Principles of anatomy, histology, physiology, pathology applied to patient evaluation and management. Focuses on cell and connective tissue biology, neuromuscular, blood, endocrine and cardiovascular systems.

**INTX 502abcdef Integrated Basic and Applied Science II (1-1-2-3-1-2)** Principles of anatomy, histology, physiology, pathology applied to patient evaluation and management. Focuses on respiratory, genito-urinary, gastrointestinal, hepato-biliary systems, oral biology, nutrition and hospital dentistry.

**INTX 651abcd Experience in Dental Teaching (1-6 each)** Practical teaching experience in dental laboratory and clinic settings under faculty supervision. Includes instruction in effective methods.

**INTX 690abcdef Directed Dental Research (1-12 each)** Dental clinical and/or basic science research under faculty guidance; proposal developed, research conducted, conclusion drawn, paper written. Units determined by extent of research. Graded CR/NC.

#### **MICROBIOLOGY AND IMMUNOLOGY (MBIO)**

**MBIO 310 Principles of Microbiology and Immunology (2)** Fundamental concepts of microbiology and immunology. Bacterial, viral and fungal diseases are correlated with host responses; oral manifestations of infectious disease. Emphasis on sanitation and sterilization.

**MBIO 501 Immunology (2)** Fundamentals of immunology; basic immunopathology, especially concerning the oral cavity, including immunogenetics; hypersensitivities and inflammation; auto-immune diseases.

#### **OCCUSION (OCCL)**

**OCCL 310 Fundamentals of Dental Morphology (1)** Fundamentals of tooth form; carving of the permanent teeth.

**OCCL 502 Occlusion (1)** Principles of occlusion as related to clinical application of techniques and procedures to diagnose and treatment plan malfunctions of the stomatognathic system.

**OCCL 521ab Dental Morphology and Function (3-2)** Fundamentals of tooth form; principles of occlusion.

**OCCL 522 Occlusion Laboratory (1)** Laboratory experience in functional analysis and correction of occlusal disharmonies.

**OCCL 601 Advanced Concepts of Occlusion (1)** Historical perspective of occlusion; occlusal equilibration, effect of occlusal adjustment, instrumentation useful in occlusal therapy. Includes clinic and laboratory experience.

#### **OROFACIAL PAIN ORAL MEDICINE (OFPM)**

**OFPM 701 CPR, Blood and Airborne Infections and Common Emergencies for Dental Residents (1, Sm)** CPR training, review of common dental emergencies, and blood and airborne pathogens in dental patients.

**OFPM 702ab Soft Tissue Disease for Dental Residents (a: 1, Sm; b: 2, Fa)** Seminars on the various mucosal, cutaneous, gingival and salivary diseases and lesions in the oral and maxillofacial region.

**OFPM 703 Local Anesthesia, Minor Surgery and Biopsy Procedures for Dental Residents (1, Sm)** Seminars on local anesthesia methods and minor surgical procedures appropriate for the oral and maxillofacial region.

**OFPM 704 Bony Pathology, Radiology and Advanced Imaging for Dental Residents (1, Sm)** Review of the oral and maxillofacial region osseous and odontogenic pathologies and the various imaging methods used to examine this anatomic region.

**OFPM 705 Neurogenic Based Oral and Facial Pains for Dental Residents (2, Sp)** Seminars on the diagnostic and therapeutic procedures appropriate for chronic neurogenic based pain disorders that occur in the orofacial region.

**OFPM 706 TMD, Orthopedics, Rheumatology and Physical Therapy for Dental Residents (2, Fa)** Seminars on various topics relating to the diagnosis and management of Temporomandibular disorders.

**OFPM 707 Pharmacology Series for Dental Residents (2, Fa)** Seminars on common medications used in the practice of oral medicine and chronic orofacial pain.

**OFPM 708 Physical Evaluation and Laboratory Diagnostics for Dental Residents (2, Sm)** Seminars discussing physical evaluation and laboratory-based diagnostic procedures and methods appropriate for the diagnosis of oral medicine and chronic orofacial pain disordered patients.

**OFPM 709 Headaches for Dental Residents (2, Sm)** Seminars on the diagnosis, prevention and management (including pathophysiologic mechanisms) of episodic and chronic headache disorders.

**OFPM 710ab Knowledge Assessment for OFPOM Residents (1-1, Sm)** Assessment and feedback summarizing knowledge base acquired in online courses. Open only to master's students. *Recommended preparation:* OFPM 702b, OFPM 703, OFPM 704, OFPM 705, OFPM 706, OFPM 707, and OFPM 721.

**OFPM 721 Neurosciences for Dental Residents (2, Fa)** Seminars on the neurophysiologic and neuroanatomic bases of chronic orofacial pain disorders.

**OFPM 722 Internal Medicine and Systemic Disease for Dental Residents (2, Sp)** Seminars on common systemic diseases and the potential interactions with oral disease and treatment.

**OFPM 723 Systems Physiology, Motor Disorders and Sleep Apnea for Dental Residents (2, Fa)** Seminars on various topics relating to oral motor disorders and sleep disordered breathing (as it relates to the mandible and tongue.)

**OFPM 724 Psychological and Psychometric Assessment for Dental Residents (2, Sm)** Seminars on various topics relating to bio-behavioral diagnosis and, where appropriate, psychological management of patients with chronic illness in the orofacial region.

**OFPM 725 Epidemiology, Nutrition and Aging for Dental Residents (2, Sm)** Seminar on the epidemiology of oral disease and nutritional topics as related to the aging patient.

**OFPM 726 Immunology and Immunosuppression for Dental Residents (2, Fa)** Seminar course on immunology and immunosuppression as it relates to diseases in the oral and maxillofacial region.

**OFPM 727 Infectious Disease, Oral Microbiology and Virology for Dental Residents (2, Sm)** Seminar organized around infectious diseases in the oral, pharyngeal and nasal region.

**OFPM 728 Case Presentations by OFP-OM Residents (2, Sp)** Case presentations by Orofacial Pain/Oral Medicine residents in which each resident presents and defends the diagnostic and treatment methods selected for a particular case.

**OFPM 729abcd Capstone Project for OFPOM Residents (.5-.5-.5-.5, Fa)** In the first three trimesters (OFPM 729abc) students will present their progress towards the final trimester (OFPM 729d) goal of defending their capstone research reports. Graded IP/NC/CR, with full credit on acceptance of the capstone research report. Open only to master's students.

**OFPM 730abcde Case Portfolio Preparation by Online OFPOM Residents (.5-.5-.5-.5, Sm)** In the first four trimesters (OFPM 730abcd) students will present their progress towards the final trimester (OFPM 730e) goal of defending a portfolio of 18 clinical cases. Graded IP/NC/CR with full credit on acceptance of final case portfolio. Open only to master's students.

#### **ORAL MEDICINE ORAL DIAGNOSIS (OMOD)**

**OMOD 501 Emergency Dental Treatment (1)** Dental emergencies in a general dental practice; emphasis on diagnosis of pain, trauma, infections, abscesses, myofacial problems, pulpal considerations, restorative goals; interrelationship of these areas.

**OMOD 502 Chronic Orofacial Pain (2)** Current concepts of pain mechanisms; application to differential diagnosis, treatment, and management of chronic head, neck, and dental pain.

**OMOD 505 Oral Medicine (2)** Detection, recognition, assessment, management and treatment modification of medical conditions presented by dental patients.

**OMOD 506 Infection Control (1)** Infection control and clinical asepsis in the dental office; ethical and legal aspects; specific agents of disease; epidemiology.

**OMOD 551abcd Clinic: Physical Evaluation (0-0-0-1)** Obtaining medical history, performing modified physical exams and clinical laboratory tests, establishing physical status. Understanding rationale and indications for modifying dental therapy; clinic and seminar.

**OMOD 562abcd Clinic: Hospital Dentistry (0-0-0-1)** Clinical experience in dentistry for the medically compromised and physically handicapped patient in a hospital environment.

**OMOD 563abcdef Clinic: Emergency Dental Treatment (0-0-0-0-1)** Experience in management and treatment of emergency dental problems, including diagnosis of the pain cause, provision of appropriate therapy, and post operative instructions to the patient.

#### **OPERATIVE DENTISTRY (OPER)**

**OPER 520 Preclinical Operative Dentistry (ISP) (3)** Preparation for clinical work through study of fundamentals of cavity design and restoration of cavity preparations on extracted teeth mounted in a manikin.

**OPER 521ab Preclinical Operative Dentistry I (1-3)** Introduction to terminology, materials, and instruments used in operative dentistry; fundamentals of amalgam restoration; principles of cavity preparation; amalgam manipulation, condensation, and carving using extracted teeth.

**OPER 522 Preclinical Operative Dentistry II (3)** Fundamentals of cavity design; restoration of cavity preparations on extracted teeth mounted in the manikin.

**OPER 561abcd Clinic: Operative Dentistry I (0-0-0-6)** Clinical experience treating patients using all modalities of operative dentistry.

**OPER 562ab Clinic: Operative Dentistry II (0-6)** Clinical experience treating patients using all modalities of operative dentistry.

**OPER 620 Conservative Cast Gold Restorations (2)** Principles of cavity preparation, fabrication technique and finishing for conservative cast gold restorations; includes lab and clinic.

**OPER 701ab Seminar: Advanced Operative Dentistry I (2-2, Fa)** In-depth study of the biomechanics applied to cavity preparation according to material selection, bonding procedures, and protection of the pulp-dentin. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

**OPER 702abL Advanced Dental Morphology for Esthetic Restorations (a: 3, Sm; b: 3, Fa)** In-depth study of the dental morphology, dental optical properties, and laboratorial procedures for restorative replication of esthetic and morphological aspects found in the natural tooth. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

**OPER 705L Dental Photography (1, Fa)** Basic principles of dental photography and its use in clinical dentistry for shade selection, replication of dental esthetic components, and clinical case documentation. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

**OPER 710abcdeh Seminar: Advanced Operative Dentistry II (1-1-1-1-1-1, FaSpSm)** Advanced knowledge and scientific background of the principles of adhesion to dental structures and analysis of bonding effectiveness of different adhesive methods and bonding degradation. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

**OPER 720abcdeh Seminar: Advanced Operative Dentistry III (1-1-1-1-1-1, FaSpSm)** Advanced studies, technical, and scientific background of esthetic bonded direct restorations with in-depth analysis of mechanical, physical, and optical properties of resin composite restorations. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

**OPER 730abcd Seminar: Advanced Operative Dentistry IV (1-1-1-1, FaSpSm)** In-depth study, analysis, and treatment involved in the management of discolored and developmental defects of the teeth. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

**OPER 740abc Seminar: Advanced Operative Dentistry V (2-2-2, FaSpSm)** Cariology and proficiency of dental caries management using preventive methods and minimally invasive restorative techniques. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

**OPER 750abc Seminar: Advanced Operative Dentistry VI (2-2-2, FaSpSm)** Advanced studies of restorative techniques of severely damaged teeth, selection and use of different post systems, core build-up, and bonding to the root canal. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

**OPER 760abcdeh Seminar: Advanced Operative Dentistry VII (1-1-1-1-1-1, FaSpSm)** Proficiency in advanced esthetic indirect restorations for anterior and posterior teeth, including preparation designs, material selection, cementation and bonding procedures, and alternative resin-bonded fixed-partial dentures. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

**OPER 765abcd Seminar: Advanced Operative Dentistry VIII (1-1-1-1, FaSpSm)** Advanced studies of computer-generated restorations (CAD/CAM) and digital imaging in dentistry for anterior and posterior teeth. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

**OPER 770abcdefhL Scientific Investigation in Operative Dentistry (1-3, max 14, FaSpSm)** Enhancement of critical research thinking by development and experimentation of different scientific methodologies in operative dentistry, journal article writing and submission for publication. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

**OPER 780abcdef Treatment Planning in Operative Dentistry (2-2-2-2-2-2, FaSpSm)** Seminars led by students and invited guests to discuss, analyze and propose a treatment sequence for esthetic challenge clinical cases involving complex multidisciplinary treatment. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

**OPER 795abcdefghij Clinic: Advanced Operative Dentistry (1-3, max 14, FaSpSm)** Advanced clinical and laboratorial treatment of patients in need of complex multidisciplinary treatment, with special emphasis on esthetic and bonded restorations. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

#### **ORTHODONTICS (ORTH)**

**ORTH 501ab Seminar: Orthodontics (0-1)** Clinical use of cephalometrics and orthodontic prediction; removable orthodontic appliances and their design; case analysis; mixed dentition cases; adult tooth positioning; orthodontic banding; molar uprighting.

**ORTH 521 Preclinical Orthodontics (2)** Evaluation, prevention, and treatment of dento-facial malformations. Construction of basic appliances to treat orthodontic problems encountered by the general practitioner.

**ORTH 561abcdef Clinic: Orthodontic Therapy (0-0-0-0-0-2)** Diagnosis and limited treatment of orthodontic problems encountered in general practice. Diagnosis of complex orthodontic problems requiring treatment by a specialist. *Prerequisite:* ORTH 521 for *a*; *a* before *b*, etc.

**ORTH 674 Clinical and Molecular Bone Biology (2, Sp)** Explore the impact of the application of new molecular techniques to bone biology research on our understanding of osteoporosis, osteosarcoma, hypercalcaemia, etc. Open to advanced program students in dentistry only.

**ORTH 701ab Cephalometrics: Growth and Development (2-4; 2-4)** Principles and mechanics; measurement techniques; developmental morphology; analysis and diagnosis; treatment rationales; gross radiological anatomy and osteology; facial growth. Hours vary.

**ORTH 702 Seminar: Review of the Orthodontic Literature (5)** Two trimester Course Review of current orthodontic literature.

**ORTH 703abcdefhi Seminar: Advanced Orthodontics (2-8 each, FaSpSm)** Advanced diagnosis and treatment of complex orthodontic cases. Asymmetrical treatment. Hours vary.

**ORTH 704abc Seminar: Orthodontics in Theory and Practice (2-2-2)** Review of various approaches to orthodontic treatment; includes presentation of cases.

**ORTH 705abc Orthodontic Practice Management (2-2-2, FaSpSm)** Office management and patient relations in orthodontic practice.

**ORTH 706 Surgical Orthodontics (2)** Diagnosis, treatment, prognosis, and management of orthognathic problems. Lecture and demonstration, 2 hours.

**ORTH 707 Interdisciplinary Aesthetic Treatment (2, Sp)** Commonly encountered interdisciplinary aesthetic problems. Communication and teamwork between orthodontists and general dentists, as well as other specialists will be emphasized.

**ORTH 708 Information Technology in Orthodontic Practice (2, Fa)** Practical applications of information technology in contemporary orthodontics. Topics include office management systems, videocephalometrics, and video imaging in orthodontic practice.

**ORTH 709 Advanced Information Technology in Orthodontic Practice (2, Sm)** Follows ORTH 708 and is designed to provide background and up-to-date information on advanced technologies in orthodontic practice.

**ORTH 721 Biomechanics and Orthodontic Technic (8)** Primary orthodontic techniques and basic diagnostic procedures. Typodont treatment of malocclusion, record taking, retention appliances, and beginning biomechanics.

**ORTH 751abcdefhi Clinic: Advanced Orthodontics (1-10 each, FaSpSm)** Clinical orthodontics; clinical techniques, diagnostic procedures, and applied clinical therapy to selected cases of malocclusion with emphasis on therapy and supervised treatment.

**ORTH 791 Library Research (1-6)** Organized literature searching and compiling of published data for purposes of developing writing and investigative skills.

#### **PATHOLOGY (PTHL)**

**PTHL 312abc Medicine and Pathology (1-3-2, FaSpSm)** An integrated approach to clinical, gross and microscopic study of basic disease processes, systemic pathology, oral pathology, internal medicine, pathophysiology, physical evaluation and emergency medicine for significant organ systems. Clinical-pathologic correlation stressed. Evaluation, classification, and differential diagnosis of oral lesions; disease recognition and dental treatment modification.

**PTHL 501 Oral Pathology (4, Sm)** Clinical radiographic, gross and microscopic characteristics of mucosal, skin, fibroepithelial and salivary gland diseases; odontogenic tumors and cysts; benign and malignant neoplasms and iatrogenic conditions.

**PTHL 504ab Seminar: Oral Pathology (0-0)** Clinico-pathologic discussion of oral pathosis cases. A variety of "unknown" cases representing diagnostic problems are analyzed. Etiology, pathogenesis, clinical/radiographic features, therapy and prognosis are stressed.

**PTHL 601 Advanced Oral Pathology Seminar (2)** Detailed discussion and analysis of many cases representing a wide variety of oral pathologic conditions stressing differential diagnosis and clinical-pathologic correlations.

**PTHL 701 Clinicopathologic Conference (3-12)** Clinicopathologic correlation of diseases of the head and neck. Seminar, 1 hour. Presented at LAC+USC Medical Center.

#### **PEDIATRIC DENTISTRY (PEDO)**

**PEDO 310 Principles of Dentistry for Children (1)** Role of the dental hygienist in dental care for the child patient. Principles of pediatric dentistry as related to education of the child patient and the parent. Lecture, 1 hour.

**PEDO 501 Clinical Pediatric Dentistry (1)** Scientific principles underlying contemporary pediatric dentistry, including prevention of disease; dental anomalies; habits and other problems in occlusal development; behavior management; child abuse.

**PEDO 521 Preclinical Pediatric Dentistry (2)**

Principles and techniques of cavity preparations in primary teeth; pulpal therapy; stainless steel crowns; space maintenance; diagnosis, treatment planning.

**PEDO 551abc Clinic: Dentistry for Children I (0-0-2)**

Structured clinical experience in caring for the dental needs of the child patient. Includes special case seminars.

**PEDO 561abc Clinic: Dentistry for Children II (0-0-1)**

Dental treatment of the child patient; preventive and restorative dentistry; space maintenance and interceptive orthodontic procedures.

**PEDO 701ab Seminar: Advanced Pediatric Dentistry (8-15 each, FaSpSm)**

Discussions of literature related to pediatric dentistry. Biologic considerations in operative dentistry, odontogenesis, dental trauma, physiology of occlusion, pulpal biology. Graded CR/NC.

**PEDO 702ab Comprehensive Review of Pediatric Dentistry (5-7 each, FaSpSm)**

Critical analysis of current pediatric dentistry literature and case conferences related to the application of contemporary issues in dentistry for the complex child patient.

**PEDO 703abcde Interceptive Orthodontics (2-5 each)**

Recognition, evaluation, and treatment of developing orthodontic problems appropriate to the pediatric dentist; emphasis on diagnosis; laboratory experience included.

**PEDO 704ab Prevention in Pediatric Dentistry (2-2)**

Discussions and readings pertaining to the analysis and incorporation of the many components of prevention into the contemporary pediatric dentistry practice.

**PEDO 705 Pediatric Diseases (2)**

Discussion of medical conditions seen by the pediatric dentist in the hospital environment. Conditions include childhood cancer, HIV, heart disease, diabetes mellitus and blood dyscrasias. Graded CR/NC.

**PEDO 706 Dental Care for Pediatric Patients with Disabilities (2)**

Medical, dental, psychological, and social problems of children with developmental disabilities; effect of problems on delivery of pediatric dentistry. Graded CR/NC.

**PEDO 707 Seminar: Cleft Palate Rehabilitation (1-9)**

Three trimester course discussions and case conferences related to treatment of patients with oral and facial anomalies; includes interceptive and corrective orthodontics, preventive and restorative treatment, and selected oral surgery-prosthetic rehabilitative procedures. Seminar, 3 hours.

**PEDO 708 Practice Management (1, FaSpSm)**

Discussion of issues related to the contemporary practice of pediatric dentistry (seminars and office visitations). Topics include: purchasing a practice, associateships, hospital affiliations, practice administration and marketing, computers, jurisprudence and auxiliary utilization.

**PEDO 709 Conscious Sedation in Pediatric Dentistry (1, Sm)**

Seminar topics include: review of pharmacology and effectiveness of commonly used oral agents, methods of administration, regulatory guidelines, patient monitoring, management of sedation related emergencies.

**PEDO 721 Pediatric Physical Evaluation (2)**

Assessment of patient health status; evaluation and management of acute and chronic disease states which may be observed in the pediatric dental practice.

**PEDO 761abcde Clinic: Advanced Pediatric Dentistry (2-10 each, FaSpSm)**

Clinical application of advanced pediatric dentistry techniques in routine and special problem cases in the outpatient environment. Hours vary. Graded CR/NC.

**PEDO 771abcde Clinic: Hospital Pediatric Dentistry (2-15 each, FaSpSm)**

Treatment of the child patient in the hospital environment. Emphasis placed on treatment and management with physical, mental, or emotional disabilities.

**PEDO 772abcde Clinic: Interceptive Orthodontics (1-3 each)**

Clinical application and treatment procedures for tooth guidance, preventative and interceptive orthodontics.

**PEDO 773 Hospital Pediatric Clinics (2-4)**

Observation and participation in affiliated hospital clinics: anesthesiology, hematology, and genetic clinics; grand pediatric rounds and other conferences.

**PEDO 774 Clinical Genetics in Pediatric Dentistry (9)**

Genetic principles of oral, facial and cranial malformations; technique and theory of clinical genetics, differential diagnosis and treatment of disorders of the cranio-facial complex.

**PEDO 790ab Directed Research: Pediatric Dentistry (1-6 each)**

An examination and analysis of clinical and laboratory problems in dentistry for children leading to completion of an original research project. Graded CR/NC.

**PERIODONTICS (PERI)****PERI 310ab Introduction to Periodontal Diseases (1-1, FaSp)**

Introduction to periodontal disease; emphasis on identification of normal periodontium, distinguishing of gingival and periodontal diseases; includes data collection and classification of gingival and periodontal diseases.

**PERI 415 Basic Periodontal Therapy (1)**

Basic therapeutic modalities of periodontal treatment; general principles and methods of surgical periodontal treatment.

**PERI 502 Periodontal Diseases and Elements of Therapeutic Judgment (2)**

Periodontal pathologic processes; pathogenesis, classification and clinical features of gingivitis; periodontitis; other related diseases of periodontium including diagnosis and initial phases of treatment.

**PERI 504 Advanced Periodontics (1)**

Periodontics as related to endodontics, orthodontics, and restorative dentistry; bone induction, osseous grafting, splinting, management of furcation lesions; maintenance, recall, and referral.

**PERI 521 Periodontal Surgery (2)**

General principles and methods of surgical periodontal treatment; includes laboratory exercises.

**PERI 550ab Clinic: Introductory Periodontal Therapy (1-1)**

Laboratory and clinical development of periodontal therapy procedures; basic instrumentation principles.

**PERI 561abcd Clinic: Periodontal Therapy I (0-0-0-1)**

Supervised treatment of periodontal disease at all levels of complexity.

**PERI 562ab Clinic: Periodontal Therapy II (0-2)**

Supervised treatment of periodontal disease at all levels of complexity.

**PERI 602 Current Controversies in Periodontology (2)**

Examination of the major controversies in the field of periodontology; emphasis on the efficacy of current treatment modalities and future trends.

**PERI 603abc Advanced Periodontal Surgery (0-0-2)**

Surgical management of more complex osseous and muco-gingival defects.

**PERI 701ab Seminar: Review of Current Periodontal Literature (2-3)**

Review and critical evaluation of the current periodontal literature.

**PERI 702ab Seminar: Periodontal Treatment Procedures (2-2)**

Presentation of various techniques in current periodontal treatment.

**PERI 703ab Seminar: Periodontal Case Presentation (1-2)** Formalized presentation and discussion of clinical cases treated by advanced students.

**PERI 704abcdefhij Seminar: Periodontal Therapy (2 each)** Presentation and discussion of treatment of clinical cases involving soft tissue and osseous management; rationale for the therapy; surgical wound healing; dental implant surgery.

**PERI 708 Seminar: Clinical Basis of Periodontics (4)** Evaluation of the literature dealing with various types of therapy including the objectives of treatment.

**PERI 710 Clinical Periodontal Photography (1)** Demonstration of techniques used in intraoral photography for periodontal purposes, emphasis on proper clinical case documentation in seminar presentation and Specialty Board Certification.

**PERI 711 Occlusal Therapy in Periodontics (2)** Anatomy of the TMJ mandibular movements; occlusal anatomy and their interrelationships; methods of occlusal correction using anatomy and mandibular movements as a guide.

**PERI 713abcdefhij Treatment Planning in Periodontics (2 each)** Presentation of clinical findings, diagnoses, and plan of treatment of clinical cases by advanced students.

**PERI 715 Treatment of Special Care Patients (3)** Periodontal care and treatment of older population groups, handicapped patients, and other types of special patients, settings, and situations.

**PERI 716ab Seminar: Special Topics in Periodontal Disease (3-3)** Discussion of topics of immediate importance and controversy. Experts in the field are invited to participate as guest speakers.

**PERI 750 Advanced Periodontal Instrumentation (3)** Advanced root preparation techniques including design and manufacturing characteristics of various instruments, sharpening techniques, and root morphology as it relates to advanced instrumentation principles.

**PERI 752 Interdisciplinary Treatment: An Orthodontic Perspective (2)** Effective recognition, evaluation and understanding of the orthodontic treatment phase required in interdisciplinary treatment plans; includes laboratory and clinical experience; applicable to orthodontics, periodontology, prosthodontics.

**PERI 761abcdefhij Clinic: Advanced Periodontics (1-10 each)** Clinical experience in the treatment of patients with all types and degrees of involvement of periodontal disease. Includes placement of dental implants. Graded CR/NC.

**PERI 771ab Periodontal Therapy in the Hospital (1-1)** Role of the periodontist in hospital therapy. Treatment of complex cases in the hospital environment.

**PERI 790ab Directed Research: Periodontics (1-6 each)** Research in clinical and experimental periodontology. Graded CR/NC.

#### PHARMACOLOGY (DPHR)

**DPHR 410 Principles of Pharmacology (2)** Basic principles of drug action; application of drugs in the prevention and treatment of disease; harmful effects of drugs on biological systems. Lecture, 2 hours.

**DPHR 501 Pharmacology (3)** General principles of drug action: prescription writing; toxicology; pharmacology of drugs affecting cardiovascular, autonomic, endocrine, and central nervous systems; drug control of pain, anxiety, infection.

**DPHR 601 Clinical Drug Therapy in Dentistry (2)** Clinical pharmacology of drug therapy important to dental practice using case history disease signs and symptoms and attendant drug therapy.

**DPHR 701 Advanced Pharmacology (1)** Pharmacologic principles and practice of drug use to control anxiety, pain, and infection. Treatment of drug and medical emergencies as they relate to dental specialty practice.

#### RESTORATIVE DENTISTRY (REST)

**REST 314 Physiology of Occlusion for Hygienists (1)** Biology and function of the gnathostomatic system. Role of the hygienist in diagnosis and treatment of occlusal dysfunctions.

**REST 501 Preclinical Operative and Fixed Prosthodontics (Conjoint) (2)** Fundamental concepts of restoring an individual tooth with a cast restoration; principles of cavity preparation; casting fabrication and cementation.

**REST 503ab Clinical Restorative Dentistry (1-1)** Application of pre-clinical procedures in operative dentistry, fixed prosthodontics, removable prosthodontics, and dental materials.

**REST 504 Diagnosis and Treatment Planning (1)** Utilizing a restorative approach, enhance students' knowledge and ability to choose treatment best suited for existing dental conditions, patients' requests and their financial ability.

**REST 521 Preclinical Operative/Fixed Prosthodontics Laboratory (3)** Experience in cavity preparation; casting fabrication and cementation on extracted teeth and plastic dentiforms.

**REST 522 Aesthetics in Dentistry (1)** Definition and relationship of elements of aesthetics; application in patient motivation and care.

**REST 553ab Seminar: Review of Literature in Restorative Dentistry (2-2)** Critical evaluation of classical literature in restorative dentistry.

**REST 602ab Participation in Advanced Dental Care (0-3)** Participation in advanced dental treatment in Faculty Private Practice Clinic, techniques of difficult case presentation and efficiency in practice. Clinic and seminar.

**REST 701 Orientation to Advanced Prosthodontics (5)** Preclinical overview of materials, techniques, instrumentation, and treatment procedures necessary for providing advanced prosthodontic care in the clinical environment.

**REST 702abcdefhi Seminar: Treatment Planning (2 each)** Seminars led by students with case presentations of complex multidisciplinary treatment plans, completed therapy and staff conferences.

**REST 703abcdefh Seminar: Review of the Prosthodontic Literature — Fixed (1 each)** Weekly two hour seminars devoted to review of the historic, classic, and current literature in fixed prosthodontics.

**REST 704abcdefh Seminar: Review of the Prosthodontic Literature — Removable (1 each)** Weekly two hour seminars devoted to review of the historic, classic, and current literature in removable prosthodontics.

**REST 705 Advanced Fixed Prosthodontics Techniques (1)** Tooth preparation and advanced laboratory techniques necessary to implement full mouth rehabilitation.

**REST 706 Advanced Complete Denture Techniques (1)** Advanced laboratory and clinical skills for a specialty prosthodontic practice.

**REST 708ab Dental Ceramics, Color, and Aesthetics (2-2)** Theory of color and dental aesthetics; history and development of dental ceramics; design and techniques in fabrication of ceramo-metal restorations.

**REST 709ab Seminar: Removable Partial Dentures (1-2)** Diagnosis, treatment planning, and design of removable partial dentures using extracoronal and intracoronal retainers.

**REST 710abcd Implant Dentistry (1-1-1-1)** Implant modalities and types; basis for selection; techniques of placement and of supervision of prosthodontic restoration. Includes a review of classic implant literature.

**REST 712 Maxillofacial Prosthodontics (2)** Theory and techniques for fabrication of prostheses to correct maxillofacial deformities including cleft palate.

**REST 721ab Principles of Occlusion (2-2)** Application of current occlusal concepts in removable prosthodontics. Techniques of occlusal adjustment and additive waxing for development of occlusal morphology.

**REST 761abcdefghij Clinic: Advanced Prosthodontics (1-10 each)** Students treat patients with complex interdisciplinary problems. A minimum of five full mouth reconstructions and 10 sets of complete dentures will be completed.

**REST 781 Clinic: Maxillofacial Prosthetics (1-8)** Clinical experience in fabrication of prostheses to correct maxillofacial deformities.

**REST 782abcde Clinic: Implant Prosthodontics (1-10 each)** Clinical procedures in implants for prosthodontic rehabilitation.

**REST 790 Directed Research: Prosthodontics (1-12)** Opportunities for research in clinical and experimental prosthodontics. Graded CR/NC.

#### **REMOVABLE PROSTHODONTICS (RPRO)**

**RPRO 501 Preclinical Removable Complete Prosthodontics (1)** Fundamental theory for the fabrication of removable complete dentures.

**RPRO 502 Removable Complete Prosthodontics (1)** Complete denture treatment: phases, clinical procedures, philosophy, concept, rationale, and need.

**RPRO 503ab Preclinical Removable Prosthodontics and Implants (2-1)** Introduction to disciplines of removable complete and partial dentures and implants, including classification and progress of edentulism, support sources and principles, design, fabrication and evaluation.

**RPRO 510 Implant Dentistry (1)** Principles and use of implants in dentistry: includes history, biological basis, types, diagnosis and treatment planning, surgical and restorative procedures, and limitations.

**RPRO 511 Preclinical Removable Partial Prosthodontics I (1)** Partial denture diagnosis and treatment planning; basic principles of partial denture design, fabrication, and function.

**RPRO 512 Preclinical Removable Partial Prosthodontics II (1)** Partial denture design, fabrication, and function; repair; patient education.

**RPRO 513 Removable Partial Prosthodontics (1)** Clinical removable partial prosthodontic treatment including diagnosis, treatment planning and clinical techniques.

**RPRO 521 Preclinical Removable Complete Prosthodontics Laboratory (1)** Fundamental theory for the fabrication of removable complete dentures.

**RPRO 523ab Preclinical Removable Prosthodontics and Implants Laboratory (1-1)** Laboratory experience in the fabrication of removable complete and partial dentures and implants.

**RPRO 532 Preclinical Removable Partial Prosthodontics Laboratory II (1)** Laboratory experience in fabrication of removable partial dentures.

**RPRO 550 Removable Complete Prosthodontics Clinic I (1)** Clinical demonstration with supervised clinic experience in construction, repair, and evaluation of the removable complete denture.

**RPRO 561abcd Clinic: Removable Complete Prosthodontics I (0-0-0-2)** Diagnosis, treatment planning, and care of edentulous patients. Complex cases involving temporomandibular joint dysfunction, surgical and congenital defects; seminars on clinical treatment.

**RPRO 562ab Clinic: Removable Complete Prosthodontics II (0-3)** Diagnosis, treatment planning, and care of edentulous patients. Complex cases involving temporomandibular joint dysfunction, surgical and congenital defects; seminars on clinical treatment.

**RPRO 571abcdef Clinic: Removable Partial Prosthodontics (0-0-0-0-2)** Clinical experience in diagnosis, treatment planning, and laboratory procedures necessary for the treatment of the partially edentulous patient. Includes seminars related to clinical treatment.

**RPRO 602 Advanced Removable Prosthodontics (4)** Critical review and evaluation of the removable prosthodontic literature; guided experience in the laboratory and clinical phases of removable prosthodontic therapy. (Duplicates credit in 604abc.)

**RPRO 603 The Edentulous Patient — Conventional or Implant Prosthesis (1)** Effective management of the edentulous patient who is unable to adapt to a prosthesis; includes a review of implant dentistry with a hands-on session.

**RPRO 604abc Advanced Removable Prosthodontics (0-0-4)** Critical review and evaluation of the removable prosthodontic literature; guided experience in the laboratory and clinical phases of removable prosthodontic therapy. (Duplicates credit in 602.)

**RPRO 605 Prosthodontic Seminar: Removable Partial Prosthodontics (1)** Provides fourth year dental students with an advanced didactic foundation for treating the partially edentulous patient with a removable partial.

**RPRO 655abc Dental Implants (0-0-4)** Overview of surgical and prosthodontic implant treatment concepts and modalities; laboratory and clinic experience in fabrication and placement of implant retained prostheses.

#### **ORAL SURGERY (SURG)**

**SURG 501 Oral Surgery (2)** Introduction to surgical dentistry, armamentarium and procedures; exodontics; infection; post operative care; repair of bone and soft tissue; acute injury; cysts, sinuses, nerve injury, biopsy.

**SURG 562abc Clinic: Oral Surgery I (0-0-1)** Supervised clinical experience in health history, surgical evaluation, extraction of teeth, and minor oral surgery procedures. Includes special case seminars.

**SURG 563abc Clinic: Oral Surgery II (0-0-1)** Supervised clinical experience in health history, surgical evaluation, extraction of teeth, and minor oral surgery procedures. Includes special case seminars.

**SURG 564abcd Clinic: Hospital Oral Surgery (0-0-0-1)** Observation of inpatient and outpatient oral and maxillofacial surgery, participation in clinic care of patients with dento-alveolar pathology, introduction to management of medically compromised patient.

**SURG 611abc Oral and Maxillofacial Surgery (0-0-4)** More advanced instruction in oral and maxillofacial surgery and related diseases as appropriate to the practice of general dentistry; extensive clinical experience.

**SURG 701ab Seminar: Advanced Oral Surgery (2-2)** Problems in advanced oral surgery and hospital oral surgery including student presentations and critique of clinical cases.

**SURG 702ab Seminar: Review of the Oral Surgery Literature (2-2)** Critical analysis of recent oral surgery and other related literature.

**SURG 708ab Orthognathic Surgery (a: 2, Fa; b: 2, Sp)** Surgical planning and treatment of patients with skeletal deformities.

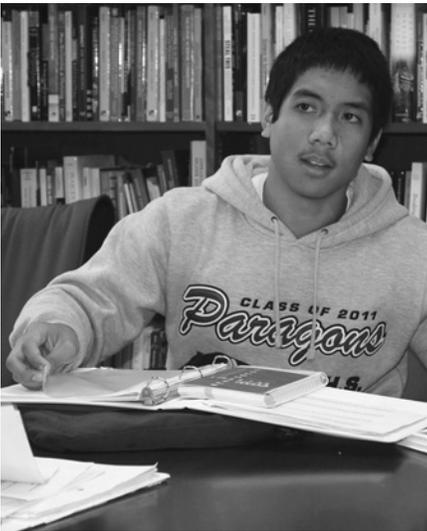

**SURG 721 Surgical Anatomy (2)** Intensive review of anatomy relevant to the practice of oral surgery. Includes dissections and animal surgery.

**SURG 761abcd Clinic: Advanced Oral Surgery (1-10 each)** Clinical evaluation and surgical treatment of dento-alveolar disease in out-patient clinic.

**SURG 763abcd Clinic: Advanced Hospital Oral Surgery and Anesthesia (1-10 each)** Surgical treatment of patients and service in medical anesthesia at the LAC+USC Medical Center.

---

# USC Rossier School of Education

*Richard Aqui and 90 other local high school seniors gained the good study habits, financial smarts and writing skills needed for college success through USC Rossier's four-week, tuition-free SummerTIME program. Through this and other outreach efforts, USC Rossier strengthens urban education locally, nationally and globally.*

**T**he USC Rossier School of Education is one of the world's premier centers for the study of urban education. The school is committed to preparing teachers, researchers, counselors, administrators and curricular specialists for leadership positions. The mission of the School of Education is to strengthen urban education locally, nationally and globally. Educators in urban areas face a unique set of challenges, including poverty, density, mobility and immigration; strained social conditions around housing, healthcare and crime; and cultural and linguistic diversity. Urban education takes place in many contexts including pre-kindergarten through high school, human services, higher education and workplace settings.

We seek to transform urban education by:

- Preparing and developing educational leaders who are change agents with a commitment to improving urban education and competencies to address the complex educational and social issues facing urban communities.
- Leading the search for innovative, efficacious and just solutions to the challenges in urban education by engaging in research on educational practices and policy.
- Creating mutually beneficial partnerships to rethink curriculum, improve educational environments and develop sound policy.

Our vision is to be a premier and distinctive School of Education, defined by innovative educational programs and scholarship that directly impact policy and practice in urban education.

The School of Education is committed to four academic themes that guide all academic, research and service efforts within our school and serve as a guide for meeting the school's mission. These themes are leadership, diversity, learning and accountability.

#### **Administration**

Karen Symms Gallagher, Ph.D., *Dean*

Dominic J. Brewer, Ph.D., *Vice Dean, Research*

Lawrence O. Picus, Ph.D., *Vice Dean, Faculty Affairs*

Melora Sundt, Ph.D., *Vice Dean, Academic Programs*

Blair Sillers, *Chief of Staff*

#### **Faculty**

*Emery Stoops and Joyce King-Stoops Dean's Chair in Education:* Karen Symms Gallagher, Ph.D.

*Richard T. Cooper and Mary Catherine Cooper Chair in Public School Administration:* Guilbert C. Hentschke, Ph.D.

*T. & I. Katzman/Ernst Chair in Educational Entrepreneurship:* David Dwyer, Ph.D.

*Irving R. and Virginia Archer Melbo Chair in Education:* Rudy Castruita, Ed.D.

*Clifford H. and Betty C. Allen Professor of Urban Leadership:* Dominic J. Brewer, Ph.D.

*Diane and MacDonald Becket Professor of Educational Policy:* Priscilla Wohlstetter, Ph.D.

*Stephen Crocker Professor of Education:* Robert Rueda, Ph.D.

*Leslie Wilbur and Norma Lash Wilbur-Evelyn Keiffer Professor of Higher Education:* William G. Tierney, Ph.D.

*University Professors:* Lloyd Armstrong, Jr., Ph.D.; William G. Tierney, Ph.D.

*Professors:* Ron Avi Astor, Ph.D. (*Social Work*); Estela Mara Bensimon, Ed.D.; Dominic J. Brewer, Ph.D.; Michael Diamond, Ph.D. (*Business, Social Work*); Guilbert C. Hentschke, Ph.D.; Harold F. O'Neil Jr., Ph.D.; Lawrence O. Picus, Ph.D.; Marleen Pugach, Ph.D.; Robert Rueda, Ph.D.; Gale Sinatra, Ph.D.; John B. Slaughter, Ph.D. (*Engineering*); Priscilla Wohlstetter, Ph.D.

*Associate Professors:* Patricia Burch, Ph.D.; Darnell Cole, Ph.D.; Alicia Dowd, Ph.D.; Robert G. Keim, Ed.D. (*Dentistry*); Adrianna Kezar, Ph.D.; Brendesha Tynes, Ph.D.

*Assistant Professors:* Lauren Anderson, Ph.D.; Mary Helen Immordino-Yang, Ph.D.; Tatiana Melguizo, Ph.D.; Morgan Polikoff, Ph.D.; Michelle Riconscente, Ph.D.; Jamy Stillman, Ph.D.; Katharine O. Strunk, Ph.D.

*Professors of Clinical Education:* Reynaldo R. Baca, Ph.D.; Rudy M. Castruita, Ed.D.; Rudy F. Crew, Ed.D.; Raymond John Gallagher, Ph.D.; Pedro Garcia, Ed.D.; Dennis Hocesvar, Ph.D., Michael Jackson, Ed.D. (*Student Affairs*); Sandra N. Kaplan, Ed.D.; Anthony B. Maddox, Ph.D.; Susan Metros, MFA (*Technology Enhanced Learning*); Margo Pensavalle, Ed.D.; Darlene Robles, Ph.D.; Sylvia Rousseau, Ed.D.; Julietta Shakhbagova, Ph.D.; Melora Sundt, Ph.D.

*Associate Professors of Clinical Education:* Mary Andres, Psy.D.; Ruth Gim Chung, Ph.D.; Ginger Clark, Ph.D.; Robert Filback, Ph.D.; Frederick W. Freking, Ph.D.; Michael Genzuk, Ph.D.; Alan G. Green, Ph.D.; Kimberly Hirabayashi, Ph.D.; William E. Maxwell, Ph.D.; Eugenia Mora-Flores, Ph.D.; Mark Power Robison, Ph.D.; Gary Scott, Ed.D.; Julie Slayton, Ph.D.; Kathy Stowe, Ed.D.; Denzil Suite, Ph.D. (*Student Affairs*); Tracy Poon Tambascia, Ed.D.; Patricia Tobey, Ph.D. (*Student Affairs*); Kristan M. Venegas, Ph.D.

*Assistant Professors of Clinical Education:* Shafiqah Ahmadi, J.D.; Paula Carbone, Ph.D.; Lynne Goldfarb, Ph.D.; Walton Green, M.S.; Angela Hasan, Ph.D.; Amy Johnson, Ed.D. (*Student Affairs*); Courtney Malloy, Ph.D.; Brandon Martinez, Ed.D.; Lynette Merriman, Ed.D. (*Student Affairs*); John Pascarella, Ph.D.; Helena Seli, Ph.D.; Maura Sullivan, Ph.D.; Kenneth Yates, Ed.D.

*Assistant (Teaching) Professors of Clinical Education:* Jenifer Crawford, Ph.D.; Kimberley Ferrario, Ph.D.; Brooke Howland, Ed.D.; Corinne E. Hyde, Ed.D.; Emmy Min, Ph.D.

*Research Professors:* David Dwyer, Ph.D.; Jerome Lucido, Ph.D.; Allen Munro, Ph.D.

*Research Associate Professor:* Gisele Ragusa, Ph.D.

*Research Assistant Professor:* Joanna Smith, Ph.D.

*Executive in Residence:* Michael Escalante, Ed.D.

*Lecturers:* Donna M. Brinton, M.A.; Priscilla Caraveo, M.A.; Deborah Detzel, M.A.; Katie FitzSimons, M.A.; Marge HECTOR, M.A.; Pamela Yamamoto Ireland, M.A.; Sonja Lovelace, M.A.; Stephen MacIsaac, M.A.; Kathleen O'Connor, M.A.; Heather Robertson, Ed.D.; Priscilla Taylor, M.A.

*Emeritus Professors:* Robert L. Baker, Ph.D.; Earl Carnes, Ph.D.; Myron H. Dembo, Ph.D.; Robert Ferris, Ed.D.; Mabel E. Hayes, Ph.D.; Edward J. Kazlauskas, Ph.D.; Frederick Knirk, Ed.D.; Steven Krashen, Ph.D.; Johanna K. Lemlech, Ed.D.; James Magary, Ph.D.; Merle Marks, Ed.D.; William G. Millington, Ed.D.; Leonard L. Murdy, Ed.D.; William F. O'Neill, Ph.D.; Donald E. Polkinghorne, Ph.D.; William M. Rideout, Jr., Ph.D.; Audrey J. Schwartz, Ed.D.; Robert A. Smith, Ph.D.; Eddie Williams, Ed.D.; Kathleen Wulf, Ph.D.

*Emeritus Professor of Clinical Education:* Stuart E. Gothold, Ed.D.

*Emeritus Professor of Clinical Psychology:* Rodney K. Goodyear, Ph.D.

#### **Degree Programs**

The Rossier School of Education offers the following degree programs: Master of Arts, Teaching; Master of Arts, Teaching, Teaching English to Speakers of Other Languages; Master of Education, Advanced Instruction; Master of Education, Educational Counseling; Master of Education, Postsecondary Administration and Student Affairs; Master of Education, School Counseling; Master of Marriage and Family Therapy; Doctor of Education/Master of Business Administration (Ed.D./MBA); Doctor of Education (Ed.D.); Global Executive (Ed.D.); and Doctor of Philosophy (Ph.D.) in Urban Education Policy.

The Rossier School of Education also offers the Ed.D. at the Hawaii, Orange County and Sacramento centers.

## Graduate Degrees

### Admission

Applicants for admission to graduate degree programs must have a bachelor's degree or its equivalent from an accredited institution. Admission to graduate programs in the Rossier School of Education is highly selective and competitive. A grade point average of 3.0 (A = 4.0) is usually expected as well as satisfactory scores on the Graduate Record Examinations (GRE) General Test and three letters of recommendation. For specific information on admission and application procedures, contact the Office of Admission and Recruitment, (213) 740-0224.

### Satisfactory Academic Progress

Students must maintain a grade point average of 3.0 (A = 4.0) or better to stay in good academic standing. Consistent with USC's overall policies for graduate students, factors other than satisfactory grades may also be taken into consideration in decisions regarding a student's continuation in a graduate degree program. These factors include satisfactory performance in fieldwork or credentialing requirements, or meeting program-defined professional standards, which are

communicated to students at the beginning of the program.

Students who do not earn or maintain a 3.0 (A = 4.0) grade point average in an academic term will be given an academic warning in the following term. Students may also be given an academic warning if they have not fulfilled non-GPA related requirements, as defined by their degree program. The academic warning provides notification that the student is subject to dismissal. A student who is not in good academic standing is subject to dismissal, and may be dismissed from a program whenever, in the judgment of the associate dean for academic programs and the program director of the program in question, it is unlikely that the student will successfully complete his or her program.

### Time Limit for Degree Completion

The time limit for completing a master's degree is five years. The time limit for completing a doctoral degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the doctorate, the time limit for completion is six years.

The time limit begins with the first course at USC applied toward a specified degree and ends the semester during which all requirements are met.

A primary consideration of the setting of time limits is the currency of the course work and research with respect to the date the degree is to be conferred. Equally important is the concern that the faculty members serving as advisers or committee members be available to the student for the duration of graduate studies at USC.

Occasionally a student finds it impossible to comply with prescribed time limits for completion of a degree. If a significant delay is likely to occur, the student must make arrangements in advance by petitioning for an extension of time. Such petitions will be considered when there is clear justification based on sound academic or critical personal reasons. An academic department may grant an extension of up to one year at a time for a maximum of two years.

## Master's Degrees

### Master of Arts in Teaching, Multiple Subject, Single Subject and Single Subject (Music Education)

The Master of Arts in Teaching is designed for individuals who wish to complete requirements for a California preliminary teaching credential or to strengthen their ability to facilitate learning for all students in a K-12 environment (non-credential). Three programs are available: Multiple Subject, Single Subject and Single Subject (Music Education).

#### Multiple Subject

The MAT Multiple Subject is designed for those interested in teaching at the elementary level. The non-credential option requires a minimum of 30 units; the credential option requires a minimum of 32 units.

#### Single Subject

The MAT Single Subject is designed for those interested in teaching at the secondary level. The emphasis offers specializations in English, science (biological sciences, chemistry, geoscience or physics), mathematics

and social science. The non-credential option requires a minimum of 30 units; the credential option requires a minimum of 32 units.

#### Single Subject (Music Education)

The MAT Single Subject (Music Education) offers two tracks: choral/general and instrumental. A minimum of 35 units is required.

The Multiple Subject and Single Subject emphases are available online.

CORE COURSES		UNITS
EDUC 501	Instruction for Teaching English as a New Language	3
EDUC 516	Framing the Social Context of High Needs Schools	3
EDUC 518	The Application of Theories of Learning to Classroom Practice	3
EDUC 519	Human Differences	3

*Additional course work for the Bilingual, Cross Cultural, Language and Academic Development (BCLAD) Credential:*

EDUC 558	Culture Learning in Schools: Latino	3
----------	-------------------------------------	---

MULTIPLE SUBJECT		UNITS
------------------	--	-------

EDUC 504	Foundations of Literacy Development and Instruction	2
EDUC 551	Teaching Physical Education	1
EDUC 554	Visual and Performing Arts in Elementary Subjects	2
EDUC 556	Integrating English Language Arts and Social Studies	5
EDUC 566	Teaching Mathematics and Science	4

*Credential Track*  
EDUC 568ab Guided Practice 3-3

*Non-Credential Track*  
EDUC 569ab Capstone Portfolio in Learning and Instruction 2-2

SINGLE SUBJECT	UNITS
EDUC 505 Integrating Literacy in Secondary Content Instruction	2
EDUC 506 New Media Literacies in High Needs Schools	2
Additional course work in the subject matter area to be approved by the subject area faculty lead	3

Select one of the following:

EDUC 502ab Teaching Science in Secondary Classrooms	3-4
EDUC 509ab Teaching Mathematics in Secondary Classrooms	3-4
EDUC 513ab Teaching English Language Arts in Secondary Classrooms	3-4
EDUC 541ab Teaching Social Studies in Secondary Classrooms	3-4

*Credential Track*  
EDUC 568ab Guided Practice 3-3

*Non-Credential Track*  
EDUC 569ab Capstone Portfolio in Learning and Instruction 2-2

SINGLE SUBJECT (MUSIC EDUCATION)	UNITS
EDUC 512 Reading and Writing Methods for Secondary Teaching	2
MUED 510 Leading a Music Program in a Public School Setting	2
MUED 515 Using Technology in the Classroom	2
MUED 540 Motivation and Discipline in the Music Classroom	2
MUED 549ab Directed Teaching: Public School Music	2-2

*Additional course work for Instrumental Track*  
MUED 522ab Teaching Public School Instrumental Music 3-2  
MUED 524 Teaching and Conducting Public School Instrumental Ensembles 4  
MUED 526 Teaching General/Choral Music for Instrumentalists 2

*Additional course work for Choral/General Track*  
MUED 532 Teaching General Music K-8 3  
MUED 534 Teaching and Conducting Public School Choral Ensembles 4

MUED 536 Teaching Instrumental Music for Vocalists 2  
MUED 547 Vocal Pedagogy in the Public School Classroom 2

### Master of Arts in Teaching, Teaching English to Speakers of Other Languages

The MAT, Teaching English to Speakers of Other Languages is designed to prepare aspiring English language teachers, domestic and international, to successfully provide instruction for children, youth or adults in the United States or abroad. This is a non-credential option. A minimum of 30 units is required. The program may be completed on campus or online.

REQUIRED COURSES	UNITS
EDUC 501 Instruction for Teaching English as a New Language	3
EDUC 505 Integrating Literacy in Secondary Content Instruction	2
EDUC 506 New Media Literacies for High Needs Schools	2
EDUC 510 Foundations of Learning for the TESOL Classroom	3
EDUC 516 Framing the Social Context of High Needs Schools, or	
EDUC 563 Teaching from a Comparative and International Perspective	3
EDUC 521 Assessment and Instruction for Diverse English Learners	3
EDUC 526ab Capstone in Teaching English Learners, or	
EDUC 540ab Practicum in Teaching English as a Second or Foreign Language	2-2
EDUC 561 Teaching English to Speakers of Other Languages Pedagogy I	3
EDUC 562 Teaching English to Speakers of Other Languages Pedagogy II	4
EDUC 571 Systems of the English Language	3

### Master of Education, Advanced Instruction

The Master of Education in Advanced Instruction provides current teachers with an in-depth exposure to pedagogy and teacher leadership development. The curriculum is designed to challenge experienced teachers to utilize technology in student-centered ways to improve learning outcomes, provide access to advanced interdisciplinary pedagogical practice, develop their capacity to initiate leadership with peers around improving instruction, and increase their understanding of successful instruction for learners with diverse needs.

Applicants to the program should have significant teaching experience. Public school teachers must hold a current teaching credential; private school teachers without a credential must be able to demonstrate at least three years of full-time teaching experience. Two letters of recommendation are required.

There are five areas of concentration in the advanced instruction program: (1) Teaching Science, Technology, Engineering, and Mathematics (STEM) in Elementary Schools to support teachers interested in fostering enthusiastic, confident and creative learning; (2) Differing Abilities, which focuses on understanding the range of learner needs in today's classroom; (3) Education Specialist Credential, for graduates of the Rossier MAT program seeking to add a Mild/Moderate Disabilities authorization; (4) Secondary Curriculum concentration provides Social Studies and English teachers with methods for integrating the arts, literacy and civics; and (5) Teaching Science, Technology, Engineering, and Mathematics (STEM) in Secondary Schools provides an opportunity for secondary teachers to engage in an advanced, interdisciplinary study of instruction in STEM.

### Degree Requirements

The advanced instruction program requires a minimum of 32 units including required core courses and completion of a concentration area.

REQUIRED CORE	UNITS
EDUC 506 New Media Literacies in High Needs Schools	2
EDUC 516 Framing the Social Context of High Needs Schools	3
EDUC 518 Application of Theories of Learning to Classroom Practice	3
EDUC 529 Political and Academic Issues Affecting Gifted Students	3
EDUC 550 Multimedia Literacy	3
EDUC 564 Teacher Leadership	2
EDUC 569ab Capstone Portfolio in Learning and Instruction	2-2
EDUC 573 Introduction to Special Education	3

### Concentration Areas

Students select a concentration area from one the following:

### TEACHING SCIENCE, TECHNOLOGY, ENGINEERING, AND MATHEMATICS (STEM)

IN ELEMENTARY SCHOOLS	UNITS
EDUC 581 STEM Education from a Project-Based Learning Approach	3

EDUC 584	Facilitating Creativity and Innovation in STEM Classrooms	3
EDUC 585	Action Research Project	3

**DIFFERING ABILITIES** **UNITS**

EDUC 530	Differentiated Curriculum and Pedagogy for Gifted Students	3
EDUC 575	Assessment and Curriculum for Students with Disabilities	3
EDUC 576	Establishing and Maintaining an Effective Classroom Ecology	3

**EDUCATION SPECIALIST CREDENTIAL** **UNITS**

EDUC 530	Differentiated Curriculum and Pedagogy for Gifted Students	3
EDUC 574	Collaboration, Families and Case Management	3
EDUC 575	Assessment and Curriculum for Students with Disabilities	3
EDUC 576	Establishing and Maintaining an Effective Classroom Ecology	3
EDUC 577	Guided Practice: Mild/Moderate Disabilities	3

**THE SECONDARY CURRICULUM** **UNITS**

EDUC 552	Literacies in the Content Area	3
EDUC 557	Civics Education	3
EDUC 578	Integrating the Arts into the Secondary Curriculum	3

**TEACHING SCIENCE, TECHNOLOGY, ENGINEERING, AND MATHEMATICS (STEM) IN SECONDARY SCHOOLS** **UNITS**

EDUC 555	STEM Education in Secondary Classrooms	3
EDUC 559	Discourse Analysis and Technology in STEM Classrooms	3
EDUC 580	Transforming STEM Education into Teaching Science	3

**Master of Education, Educational Counseling**

The Master of Education degree in Educational Counseling is designed for individuals seeking a career or advancement opportunities in postsecondary education as an academic or outreach counselor. The degree includes a theoretical and practical background in student affairs and counseling.

The program meets current requirements for postsecondary counseling positions in the California state system, particularly for those who wish to work in the public community college system. A minimum of 48 units is required.

**REQUIRED COURSES** **UNITS**

EDCO 503	Ethical and Legal Issues in Counseling	3
EDCO 541	Theories in Counseling	3
EDHP 500	Foundations of Higher, Adult, and Professional Education	3
EDHP 552	The Politics of Difference	3
EDHP 563	Student Affairs Work in College	3
EDHP 580	The Community College	3
EDHP 587	Fieldwork in Higher, Adult and Professional Education	3
EDHP 593ab	Master's Seminar, or	
EDHP 594ab	Master's Thesis	4
EDHP 687	Student Development in Higher Education	3
EDPT 502	Learning and Individual Differences	3
EDUC 500	The Counseling Process	3
EDUC 508	Creating Communities of Interest	2
EDUC 547	Career Development: Theory and Process	3
EDUC 570	Research Methods and Data Analysis for Counselors	3
EDUC 609	Academic Advising in Postsecondary Education	3
EDUC 637	Group Counseling: Theory and Process	3

**Master of Education, Postsecondary Administration and Student Affairs**

The Master of Education, Postsecondary Administration and Student Affairs provides current and prospective professionals working in various capacities within two-year, four-year and professional postsecondary institutions with the theoretical foundation and practical applications to excel in a variety of higher education administrative and students services positions (academic advising and support services). Students will have an opportunity to develop an area of proficiency such as student affairs, athletic administration or academic advising. A minimum of 41 units of graduate-level course work is required.

**REQUIRED COURSES** **UNITS**

EDHP 500	Foundations of Higher, Adult, and Professional Education	3
EDHP 551	Applied Educational Ethnography	3
EDHP 552	The Politics of Difference	3
EDHP 563	Student Affairs Work in College	3
EDHP 587	Fieldwork in Higher, Adult, and Professional Education	4
EDHP 594ab	Master's Thesis, or	2-2
EDUC 616	Higher Education Seminar	3

EDHP 657	Management of Student Services in Higher Education	3
EDHP 679	Legal Issues in the Administration of Higher Education	3
EDHP 687	Student Development in Higher Education	3
EDUC 508	Creating Communities of Interest	2
EDUC 570	Research Methods and Data Analysis for Counselors	3
Approved electives		9

**Master of Education, School Counseling**

The Master of Education, School Counseling is geared toward socially responsible individuals who are aware that many of the issues pupils confront have societal origins. Designed to prepare educators interested in becoming school counselors in grades pre-K through grade 12, successful candidates will obtain the Master of Education, School Counseling degree along with USC recommendation for the Pupil Personnel Services School Counseling Credential. Forty-nine units of course work, 100 clock hours in a practicum experience and 600 clock hours of supervised field experience are required.

**REQUIRED COURSES** **UNITS**

EDCO 503	Ethical and Legal Issues in Counseling	3
EDCO 505	Counseling and Collaborative Consultation in the School Setting	3
EDCO 541	Theories in Counseling	3
EDCO 574	School Counseling Practicum	2
EDCO 575	School Counseling Field Experience	4
EDUC 500	The Counseling Process	3
EDUC 508	Creating Communities of Interest	2
EDUC 511	Introduction to Counseling	3
EDUC 520	Counseling for College and Career Readiness I	2
EDUC 570	Research Methods and Data Analysis for Counselors	3
EDUC 600	Counseling for College and Career Readiness II	2
EDUC 607	Role of School Counselors in Student Learning and Motivation	3
EDUC 608	School Connectedness, Climate, and Classroom Management	2
EDUC 612	Application of Human Development Theory in School Counseling	3
EDUC 618	School Counseling Professional Portfolio	2

## Doctoral Degrees

The Rossier School of Education offers the Doctor of Philosophy in Urban Education Policy (Ph.D.) and the Doctor of Education (Ed.D.). Both doctoral programs place strong emphasis on the acquisition of inquiry skills and on the collaborative and interdisciplinary study of issues mutually engaging to both students and the Rossier School of Education faculty members. Both degrees emphasize the acquisition of appropriate research and inquiry skills, but the application of these skills is expected to differ. The Ed.D. student is trained to use educational inquiry skills to solve contemporary educational problems, while the Ph.D. student is trained to contribute to the general and theoretical knowledge about educational issues. The Ed.D. is administered by the Rossier School of Education; the Ph.D. is administered by the Graduate School.

Ph.D. students must *also* consult the Graduate School section of this catalogue for regulations and requirements pertaining to the degree.

### Doctor of Education (Ed.D.)

#### Preliminary Review

The Ed.D. preliminary review must be passed before the student has completed more than 21 units. Passing the preliminary review is prerequisite to continuing in the program.

#### Advisement Committee

The student selects a three-member advisement committee in consultation with the adviser upon applying to take the qualifying examination.

The committee chair must have a full-time appointment in the Rossier School of Education. One member of the committee may be a faculty member elsewhere or a full-time professional educator holding a doctorate and with strength in the area of the dissertation topic, if nominated by the committee chair and approved by the executive director of the Ed.D. program.

#### Areas of Concentration

There are four areas from which students must select a specialization: K-12 Leadership in Urban Education Settings, Educational Psychology, Higher Education/Community College Leadership and Teacher Education in Multicultural Societies.

#### Unit Requirement

The Ed.D. requires completion of 60 units of course work. A maximum of 4 dissertation units (794 Doctoral Dissertation) may be applied toward the degree. Students admitted with Advanced Standing complete a minimum of 43 units.

### Core Program

Ed.D. students are required to complete 12 units of core course work: EDUC 522 Challenges in Urban Education: Accountability, EDUC 523 Challenges in Urban Education: Diversity, EDUC 524 Challenges in Urban Education: Leadership, and EDUC 525 Challenges in Urban Education: Learning.

### Methods

All Ed.D. students must complete EDUC 532 Inquiry Methods I and EDUC 536 Inquiry Methods II for a total of 6 units.

### Research

Students must complete 6 units of research course work (EDUC 792 Critique of Research in Education and EDUC 790 Research).

### Electives

In consultation with assigned advisers, students select a minimum of 14 units of elective course work.

### Admission to Candidacy

Admission to candidacy is a formal action taken by the faculty of the Rossier School of Education. That action is based upon passing the qualifying examination.

### Doctoral Dissertation

A dissertation based upon original research is required. An acceptable dissertation must show technical mastery of a special field, capacity for independent research and scholarly ability. The student must be enrolled in 794 Doctoral Dissertation each fall and spring semester after admission to candidacy until the dissertation has been approved. A minimum of two semesters (4 units) is required. Enrollment in 794 prior to admission to candidacy is not permitted and such registration is invalid.

### Global Executive (Ed.D.)

The Global Executive Ed.D. curriculum is designed to enhance the professional experience of senior educational leaders and policy makers by:

- Increasing their understanding of global trends and the implications of those trends;
- Challenging them to use evidence and theory-based approaches in problem solving;
- Developing their capacity to effectively use complex data in decision making; and
- Providing access to key leaders and leading education scholars.

Classes are delivered in Los Angeles and in Hong Kong. The total units required for the degree is 60. A maximum of 4 project units (EDUC 764 Consulting Project) may be applied toward the degree. Students admitted with advanced standing complete a minimum of 50 units.

REQUIRED COURSES		UNITS
EDUC 619	Framing Educational Leadership in a Global Context	4
EDUC 620	Fundamentals of Creativity, Innovation, and Entrepreneurship	2
EDUC 623	Understanding Research That Informs Leadership	2
EDUC 624	Educational Organizations: Governance and Finance I	2
EDUC 626	Fostering Entrepreneurship in Educational Systems	2
EDUC 627	Education Performance Problems: Role of Learning	3
EDUC 628	Educational Organizations: Governance and Finance II	2
EDUC 629	Consulting Practicum Context Analysis	4
EDUC 631	Locating Educational Performance Problems	3
EDUC 723	Evaluating and Assessing Educational System Outcomes	3
EDUC 724	Creating Policy Alternatives for Educational Settings	3
EDUC 725	Analyzing Effectiveness of Educational Systems	3
EDUC 726	Making Choices: Deciding Among Policy Alternatives	4
EDUC 727	Implementing Policy in Educational Systems	3
EDUC 728	Global Trends: Emerging Ideas, Emerging Markets	3
EDUC 729	Assessing Policy Impact in Educational Settings	3
EDUC 764abcdz	Consulting Project	1-1-1-1-0
Additional course work to be approved by program faculty		10

### Doctor of Philosophy in Urban Education Policy (Ph.D.)

#### Program Requirements

The Ph.D. program requires a minimum of 63 units of course work, comprising the following elements: Core Block (16 units), Concentration Block (15 units), Research Block (15 units), Cognate Block (12 units) and Dissertation Proposal and Dissertation Block (5 units).

*Core Block*

The core represents the essential knowledge that serves as the groundwork for later course work and for other research and scholarly activities within the program and beyond with a particular focus on urban education. This work is completed in the first year of full-time study.

REQUIRED COURSES		UNITS
EDUC 630	Organization and Policy: Current Issues	4
EDUC 640	The Research University in the 21st Century	4
EDUC 642	Controversies in Learning and Instruction	4
EDUC 650	Globalization and the Nation-State: Theories of Change	4

*Concentration Block*

Courses in this block are linked to two of the four areas of concentrations available in the Rossier School of Education (higher education/community college leadership and leadership in urban education settings). Courses in this block permit students to consider applied problems in collaboration with advanced Ed.D. students.

*Research Block*

Courses in this block provide the basic tools to pursue systematic, programmatic, empirical investigation. It includes qualitative and quantitative elements with the understanding that complex educational problems require a variety of investigative approaches. Areas required include research design, analysis of variance/multiple regression, qualitative methods, and one elective in measurement, advanced qualitative or quantitative analysis, or a related area. Courses may be taken inside or outside the Rossier School of Education.

*Cognate Block*

This block is designed for students to pursue interdisciplinary approaches to educational issues, and may consist of courses inside or outside the Rossier School of Education. The specific courses are determined in conjunction with the adviser.

*Dissertation Block*

This block includes preparation for the qualifying examination and initial dissertation proposal. It is taken during the semester of the qualifying examination and EDUC 794ab Dissertation (minimum of 4 units taken after

a student passes the qualifying examination and has advanced to candidacy). The dissertation block is designed to prepare students for their dissertation research and continues through the writing and defense of the dissertation. The process involves intensive collaboration with the adviser and the guidance committee.

*Transfer of Course Work*

The maximum number of transfer credits that can be applied toward the degree is 20 units. The faculty of the student's degree program determines whether transfer credit is applicable toward a specific graduate degree.

*Faculty Adviser*

A designated faculty member provides the academic advisement for entering graduate students at the point of admission. A faculty member is appointed to serve as the adviser until an approved guidance committee is established.

*Screening Process*

When students have completed the core course work, the doctoral screening committee assesses their performance and makes a decision about their readiness to continue in the program. Students are notified of the results by the Ph.D. program chair. If the decision is to continue, a formal program of studies and a guidance committee is established.

*Guidance Committee*

The guidance committee is composed of at least five members. A minimum of three, including the chair, must be from the Rossier School; one must be a faculty member from outside the Rossier School. Normally, all members of the guidance committee are regular faculty with the rank of assistant professor or above in departments offering the Ph.D.

*Qualifying Examinations*

As a prerequisite to candidacy for the Ph.D., students must pass written and oral qualifying examinations. The written qualifying examination is designed to assess a student's readiness to undertake dissertation research and to assess the student's ability to critically analyze and synthesize theoretical and methodological knowledge. The oral portion consists, in part, of a teaching and research

portfolio. The teaching portfolio documents and reflects the student's development and productivity in thinking about course content and instructional delivery. The research portfolio documents and reflects the student's development and productivity in research and writing from the point of entry into the program.

*Admission to Candidacy*

Admission to candidacy is a formal action taken by the faculty that is based upon passing the qualifying examination and completing all Ph.D. course requirements (with the exception of 794 Doctoral Dissertation). Notification of admission or denial of admission to candidacy is by letter from the associate vice provost for graduate programs.

*Dissertation Committee*

After admission to candidacy and approval of the dissertation proposal, the Ph.D. guidance committee is known as the dissertation committee and is usually reduced to three members. The committee will include one faculty member from outside the Rossier School of Education and will be chaired by a tenure track faculty member.

*Doctoral Dissertation*

After the qualifying examination is passed, students must enroll in 794 Doctoral Dissertation each semester, except summer session, after admission to candidacy until all degree requirements have been completed. A minimum of two semesters (4 units) is required. A maximum of 4 dissertation units may be applied to satisfy the degree requirement. While enrolled in 794a, students will develop a dissertation proposal in collaboration with the adviser. The dissertation committee grants final approval for the proposal. Credit for 794a and permission to enroll in 794b will only be given after the dissertation proposal is approved. IRB (Human Subjects Institutional Review Board) approval is required for all dissertation studies.

## Credential Programs

A credential is a license issued by the California Commission on Teacher Credentialing (CCTC) to persons wishing to legally teach or perform certain other professional services in California's public schools. USC is one of several institutions authorized to recommend qualified persons to the CCTC for receipt of credentials.

There are two categories of credentials offered in the Rossier School: teaching and service. Requirements for these credentials may be obtained by calling the appropriate phone number listed below. *Credential requirements may change due to state law.* Students are advised to consult periodically with the Rossier School of Education for current credential requirements.

### Teaching Credentials

California has a two-tier credential structure. A five-year preliminary credential is the first credential issued after an individual meets basic credential requirements. A clear credential is issued when all credential requirements have been completed.

*Multiple Subject Teaching (MST)* authorizes the holder to teach in a self-contained classroom such as the classrooms in most elementary schools. A teacher authorized for multiple subject instruction may be assigned to teach in any self-contained classroom (preschool, grades K-12 or many subjects within a self-contained classroom). This classroom situation is generally found in preschool and elementary grades or in classes organized primarily for adults. In addition, the holder of a Multiple Subject Teaching Credential may serve in a core or team teaching setting.

*Single Subject Teaching (SST)* authorizes the holder to teach a specific subject(s) named on the credential in departmentalized classes such as those in most middle schools academic area. This classroom situation is generally found in middle and senior high schools. A teacher authorized for single subject instruction may be assigned to teach any subject on his or her authorized fields at any grade level: preschool, grades K-12 or in classes organized primarily for adults.

*Multiple and Single Subject Teaching with a Bilingual Emphasis in Spanish (BCLAD)* authorizes the holder with bilingual capabilities to teach to a bilingual student population.

Both credentials authorize instruction to English learners.

All teacher candidates must meet the following requirements in order to be recommended/endorsed for a teaching credential: successful evidence of completion and passing of the TPA (Teaching Performance Assessment) and verification of training in cardiopulmonary resuscitation (CPR) that covers infant, child and adult CPR skills.

Teacher certification rules and requirements vary greatly by state. Completion of a CCTC-approved program does not guarantee certification or licensure in another state. Prospective teacher candidates are strongly advised to learn about their state's requirements and to review the following accreditation statements:

#### *Indiana*

Accredited in Indiana by the Indiana Commission on Proprietary Education (CPE).

#### *Minnesota*

The University of Southern California is registered as a private institution with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Registration does not mean that credits earned at the institution can be transferred to all other institutions.

#### *Washington*

USC is authorized by the Washington Higher Education Coordinating Board (HECB) and meets the requirements and minimum educational standards established for degree-granting institutions under the Degree-Granting Institutions Act. This authorization is subject to periodic review and authorizes USC to advertise, recruit and offer a student teaching component for the following degree program: Master of Arts in Teaching. Authorization by the HECB does not carry with it an endorsement by the board of the institution or its programs. Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the HECB at P.O. Box 43430, Olympia, WA 98504-3430.

Prospective Washington state students are advised to contact the Office of the Superintendent of Public Instruction at (360) 725-6320 or profed@k12.wa.us to determine whether this education program is approved for teacher certification or endorsements in Washington state. In addition, teachers are advised to contact their individual school district as to whether this program may qualify for salary advancement.

#### *Missouri*

USC is approved by the Missouri Coordinating Board for Higher Education to deliver its online program to residents.

#### *Tennessee*

USC is authorized by the Tennessee Higher Education Commission. This authorization must be renewed each year and is based on an evaluation by minimum standards concerning quality of education, ethical business practices, health and safety, and fiscal responsibility.

If a complaint is not settled at the institutional level, the student may contact the Tennessee Higher Education Commission, Nashville, TN 37243-0830, (615) 741-5293. If the institution uses a mediation clause in its enrollment agreement, the catalogue must describe the steps required of the student and/or the institution to initiate the mediation process.

For inquiries, contact the MAT@USC office at (213) 743-2127.

#### **Services Credentials**

The *Administrative Services Credential* authorizes the holder to provide a variety of services in grades 12 and below, including preschool, and in classes organized primarily for adults. USC recommends candidates for the Clear Preliminary Administrative Services Credential. A prerequisite for admission to this program is admission to the Ed.D. program.

For inquiries, contact the Ed.D. Program Office, (213) 740-9323.

*The Pupil Personnel Services: School Counseling Credential* allows the holder to provide the following services:

- Techniques for facilitating individual growth and development to achieve academic success
- Human assessments
- Problem prevention and early intervention
- Consultation services
- Psychological education
- Coordination and development of school services
- Legal enablement and constraints
- Referral and utilization of services

USC recommends candidates for the School Counseling Credential that also authorizes the holder to perform the following duties:

- Develop, plan, implement and evaluate a school counseling and guidance program that includes academic, career, personal and social development.
- Advocate for the high academic achievement and social development of all students.
- Provide schoolwide prevention and intervention strategies and counseling services.

- Provide consultation, training and staff development to teachers and parents regarding students' needs.
- Supervise a district-approved advisory program as described in California Education Code, Section 40600.

For inquiries, contact the Master's Program Office, (213) 740-3255.

## Special Programs

### USC Language Academy

*Director:* Kate O'Connor

The USC Language Academy provides year-round English as a Second Language (ESL) instruction for academic and professional preparation. Students rapidly improve their English skills through non-credit intensive study, campus involvement, and cultural and educational activities.

Instruction is offered at six proficiency levels and is designed to help students succeed in university classrooms and in life. Distinctive benefits include individualized learning experiences, small class sizes, TOEFL test preparation, business English and more.

Students also explore life and culture in Los Angeles through weekly activities arranged by academy staff. The academy arranges student housing in university apartments or residence halls so that students may experience American university life in a comfortable, convenient and safe location and have opportunities to interact with USC students.

The USC Language Academy prepares international students for the next step in their academic or professional careers.

To learn more about programs, contact the USC Language Academy at (213) 740-0080, or email [langacad@usc.edu](mailto:langacad@usc.edu).

### Professional Development

*Director:* Colleen Dietz

The Office of Professional Development Programs offers a variety of non-degree and certificate programs for the education professional.

Certificate programs include: School Business Management Certificate, Professional Preparation for Reading, Training for the Teaching of the Twice Exceptional Student, and Differentiated Curriculum for Gifted and High-Ability Learners.

The Office of Professional Development Programs also offers annual institutes including:

- Summer Gifted Institute and Teacher Demonstration School: intended for teachers of gifted and high-ability learners
- School-wide Improvement Institute: designed to provide best practices from high-poverty, high-achieving schools
- Teaching for Learning: Connecting Brain and Cognitive Science with the Classroom: for teachers and administrators in K-12 and higher education who wish to make connections between cognitive research and the classroom
- Higher Education Leadership Institute: convenes a range of programs addressing contemporary issues in higher education for college and university senior executives

For further information, contact the Office of Professional Development Programs at (213) 743-1585 or email [rsocpdp@usc.edu](mailto:rsocpdp@usc.edu).

## Courses of Instruction

The terms listed are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

### EDUCATION (EDUC)

#### EDUC 200 Introduction to the Teaching Profession (2)

Gateway to the minor in the Teaching Profession and the major in Bachelor of Science in General Studies. Identification and discussion of current issues and trends in schools and the teaching profession. Introduction to the development of a professional portfolio.

#### EDUC 204L Sociological Foundations of Education (3, FaSp)

Introduction to the sociological foundations of education through focused study of schools, teacher-student relations, and classroom processes as they relate to social stratification.

#### EDUC 205L Child Development and Learning in Schools (3, FaSp)

Introduction to processes of development and learning in school aged children, with an emphasis on school contexts.

#### EDUC 392 Undergraduate Research Methods (2, Sp)

(Enroll in AMST 392)

#### EDUC 409 Foundations of Language Education (3, FaSp)

Overview of research and current theories in bilingual, second language, and foreign language instruction.

#### EDUC 410 The Teaching of Reading and Writing (4, FaSp)

Analysis of reading/writing processes; methods/materials for teaching literacy in elementary schools; issues in biliteracy and instruction; classroom observation/participation in small-group instruction. Admission to the major.

#### EDUC 413 Methods and Models of Instruction for Language Minority Students (2, FaSp)

Curriculum materials and teaching strategies for use in successfully teaching language minority students in both elementary and secondary schools.

#### EDUC 415 Content to Pedagogy: Mathematics in the Elementary School (2, FaSp)

Bridging college-level mathematics content and elementary school curricula to design developmentally appropriate mathematics instruction. *Concurrent enrollment:* EDUC 424a or EDUC 424b.

#### EDUC 416 Content to Pedagogy: Art in the Elementary School (2, Sp)

Transformation of content in art to curriculum in the elementary classroom. *Corequisite:* EDUC 424b.

#### EDUC 417 Content to Pedagogy: From Science Content to Science Curriculum (2, FaSp)

An overview of the goals and content of science instruction at the elementary level coupled with appropriate science curricular and pedagogical models. *Concurrent enrollment:* EDUC 424a or EDUC 424b.

#### EDUC 418 Content to Pedagogy: From Social Sciences to Social Studies (2, FaSp)

Content, concepts, methods, and values for integrating the social sciences in the social studies. *Concurrent enrollment:* EDUC 424a or EDUC 424b.

#### EDUC 419 Content to Pedagogy: P.E. for Elementary Students (2, Sp)

Transformation of content in Physical Education to curriculum in the elementary classroom. *Corequisite:* EDUC 424b.

#### EDUC 424ab Curriculum and Methods in Elementary Education (2-2, FaSp)

Curriculum materials and teaching procedures in the elementary school. *Prerequisite:* EDUC 410; *concurrent enrollment:* a: EDUC 425a; b: EDUC 425b.

#### EDUC 425ab Observation and Directed Teaching in Elementary Schools (3-3, FaSp)

Observation and experience in teaching under supervision in elementary schools (one semester at the kindergarten-primary level and one semester in the intermediate or upper grades). *Concurrent enrollment:* a: EDUC 424a; b: EDUC 424b.

#### EDUC 490x Directed Research (2-8, max 8, FaSpSm)

Individual research and readings. Not available for graduate credit.

#### EDUC 499 Special Topics (2-4, max 8, FaSp)

Seminar in selected topics in education. Specific topics to be determined at the time seminar is offered.

#### EDUC 500 The Counseling Process (3)

Theoretical foundations, models, values, and assumptions underlying psychological counseling; cross-cultural perspectives, ethical and legal considerations. (Duplicates credit in former EDCO 500.) *Concurrent enrollment:* EDUC 507.

#### EDUC 501 Instruction for Teaching English as a New Language (3, FaSpSm)

Teaching linguistically and culturally responsively to linguistic minority students. Topics include learning theories, sociocultural contexts of language development, and assessment of language and non-language competencies. (Duplicates credit in EDUC 543ab.) Open only to M.A.T. and M.A.T. (online) students.

#### EDUC 502ab Teaching Science in Secondary Classrooms (3-4, FaSpSm)

Strategies, methods, and materials for teaching science to all learners in secondary classrooms. b: (Duplicates credit in EDUC 539.) Open only to M.A.T. Single Subject and Single Subject (online) students.

#### EDUC 504 Foundations of Literacy Development and Instruction (2, FaSpSm)

Application of a balanced, integrated, interactive perspective to teaching reading in an elementary classroom. Foundational skills needed in the developmental phase of learning to read. Open only to M.A.T. Multiple Subject and Multiple Subject (online) students.

#### EDUC 505 Integrating Literacy in Secondary Content Instruction (2, FaSpSm)

Facilitation, mediation and intervention in the development of literacy and language integrated within the content areas. Connection between language and literacy to developing content knowledge. Open only to M.A.T. Single Subject, Single Subject (online), TESOL and TESOL (online) students.

#### EDUC 506 New Media Literacies in High Needs Schools (2, FaSpSm)

Instructional procedures and resources for encouraging secondary students' interests in communications, cultural studies, media production, and literacy education. Open only to M.A.T. Single Subject, Single Subject (online), TESOL and TESOL (online) students.

#### EDUC 507 Professional Identity, Law and Ethics for Counselors (3)

History of the field of counseling and professional identity development for counselors are addressed. Examination of current legal, ethical, and other professional issues in counseling. *Concurrent enrollment:* EDUC 500.

#### EDUC 508 Creating Communities of Interest (2, FaSpSm)

Framing the graduate experience for master's students. Establishing a professional foundation and philosophy as educators.

#### EDUC 509ab Teaching Mathematics in Secondary Classrooms (3-4, FaSpSm)

Strategies, methods, and materials for teaching mathematics to all learners in secondary classrooms. b: (Duplicates credit in EDUC 545.) Open only to M.A.T. Single Subject and Single Subject (online) students.

**EDUC 510 Foundations of Learning for the TESOL Classroom (3, FaSpSm)** Relationship of learning theories to second language learning and to student assessment, motivation, self-regulation, and classroom management in the TESOL classroom. Open only to M.A.T. TESOL and TESOL (online) students.

**EDUC 511 Introduction to Counseling (3, Fa)** The role of the school counselor. An overview of key elements in increasing access to and equity for primary and secondary education for all students.

**EDUC 512 Reading and Writing Methods for Secondary Teaching (2, Fa)** Analysis of reading/writing processes; methods for teaching literacy in grades 9-12; issues in biliteracy and instruction.

**EDUC 513ab Teaching English Language Arts in Secondary Classrooms (3-4, FaSpSm)** Strategies, methods, and materials for teaching English to all learners in secondary classrooms. *b*: (Duplicates credit in EDUC 535.) Open only to M.A.T. Single Subject and Single Subject (online) students.

**EDUC 514 School Counseling Seminar (3, Sp)** Current issues and problems in school counseling; emphasis is on K-12 learning and achievement.

**EDUC 515 Theories of Marriage and Family Therapy (3)** Major psychotherapeutic orientations relating to family systems, marital relationships, and communications theory applied to the family unit. (Duplicates credit in former EDCO 515.) *Prerequisite*: EDUC 500, EDUC 507, EDCO 541.

**EDUC 516 Framing the Social Context of High Needs Schools (3, FaSpSm)** Introduction to the Master of Arts in Teaching Program. Relationship between the actions of the teacher and student learning in the classroom and school context. (Duplicates credit in EDUC 517*ab*.) Open only to M.A.T. and M.A.T. (online) students.

**EDUC 517ab Understanding the Social Context of Urban Schools (2-2, FaSpSm)** Examination of critical issues in diverse contemporary classrooms (social class, language, race, ethnicity, and ability); includes practices in relation to schools and community. Open only to M.A.T. and M.A.T. (online) students.

**EDUC 518 Application of Theories of Learning to Classroom Practice (3, FaSpSm)** Learning theories and instructional practices for teaching. Procedures involved in curriculum development, planning, evaluation, and practical application. Open only to M.A.T. and M.A.T. (online) students.

**EDUC 519 Human Differences (3)** Equity and diversity in learning environments. Issues in teaching special populations. Beliefs about how people learn. Inclusive environment for special populations in the general classroom. Open only to M.A.T. and M.A.T. (online) students.

**EDUC 520 Counseling for College and Career Readiness I (2, Fa)** Theoretical foundations of individual and systemic characteristics that impact college and career choices. Consideration of economic, political, social, and policy issues.

**EDUC 521 Assessment and Instruction for Diverse English Learners (3, FaSpSm)** Assessment practices and strategies in English language instruction with special attention to learner differences (social, cultural, physical, intellectual) that influence academic performance. Open only to M.A.T. TESOL and TESOL (online) students.

**EDUC 522 Challenges in Urban Education: Accountability (3, Sp)** Issues related to accountability theory and practice in urban education settings. Open only to Ed.D. students.

**EDUC 523 Challenges in Urban Education: Diversity (3, Fa)** Diversity issues in urban educational settings. Open only to Ed.D. students.

**EDUC 524 Challenges in Urban Education: Leadership (3, Sp)** Theories, principles, and concepts of leadership in urban K-12 schools and institutions of higher education. Open only to Ed.D. students.

**EDUC 525 Challenges in Urban Education: Learning (3, Fa)** Theory and research in learning, motivation, and instruction for diverse educational settings. Open only to Ed.D. students.

**EDUC 526ab Capstone in Teaching English Learners (2-2, FaSpSm)** The culminating experience for in-service teachers in the Master of Arts in Teaching, Teaching English to Speakers of Other Languages Program. Open only to M.A.T. TESOL and TESOL (online) students. Graded CR/NC.

**EDUC 527 Assessment in the Language Classroom (2, Sm)** Introduces students to relevant research in language assessment, reviews concepts of reliability and validity and examines assessment practices in the classroom.

**EDUC 528 Course Proposal Project (2, Sm)** Using a framework of course development, students present a course proposal, linking the theoretical, methodological and practical principles gained from all course work in the program.

**EDUC 529 Political and Academic Issues Affecting Gifted Students (3, FaSpSm)** Examination of the political and academic issues affecting gifted and high-ability students. Psychosocial reasons contributing to achievement and underachievement. Institutional and personal factors inhibiting potential. Open only to M.A.T. students.

**EDUC 530 Differentiated Curriculum and Pedagogy for Gifted Students (3, FaSpSm)** Recognizing the talent and potential of gifted and high ability students. How gifted education can be generalized to affect the education of all students. Open only to M.A.T. students.

**EDUC 531 Student Disability Issues in Higher Education (3, Fa)** History of the disability movement; current research on the success of students with disabilities in higher education; legal and management issues.

**EDUC 532 Inquiry Methods I (3, Sp)** Logic and methods of quantitative data analysis in the examination of educational issues and the framing of solutions for them. Open only to Ed.D. students.

**EDUC 535 Teaching Secondary English and Language Arts (4, FaSpSm)** Instructional procedures, techniques, strategies, and resources for teaching English in secondary classrooms. Open only to M.A.T. students.

**EDUC 536 Inquiry Methods II (3, Sp)** Logic and methods of qualitative data analysis in the examination of educational issues and the framing of solutions for them. Open only to Ed.D. students. *Prerequisite*: EDUC 532.

**EDUC 539 Teaching Secondary Science (4, FaSpSm)** Instructional procedures, techniques, strategies, and resources for teaching science in secondary classrooms. Open only to M.A.T. students.

**EDUC 540ab Practicum in Teaching English as a Second or Foreign Language (2)** The culminating experience for beginning teachers in the Master of Arts in Teaching, Teaching English to Speakers of Other Languages Program. Open only to M.A.T. TESOL and TESOL (online) students. Graded CR/NC.

**EDUC 541ab Teaching Social Studies in Secondary Classrooms (3)** Strategies, methods, and materials for teaching social studies to all learners in secondary classrooms. *a*: (Duplicates credit in former EDUC 534.) *b*: (Duplicates credit in former EDUC 542*b*.) Open only to M.A.T. Single Subject and Single Subject (online) students.

**EDUC 542 Teaching Secondary Social Studies (4, FaSpSm)** Instructional procedures, techniques, strategies, and resources for teaching social studies in secondary classrooms. Open only to M.A.T. students.

**EDUC 543ab Methods in Teaching English as a New Language (1-1)** Teaching linguistically and culturally responsively to linguistic minority students. Topics include learning theories, sociocultural contexts of language development, and assessment of language and non-language competencies. Open only to M.A.T. students. (Duplicates credit in former EDUC 543.)

**EDUC 544 Measurement Procedures for Counselors (3)** Educational and psychological instruments; psychometric concepts and the rationale for the use of psychological instruments in the counseling relationship. (Duplicates credit in former EDCO 544.)

**EDUC 545 Teaching Secondary Mathematics (4, FaSpSm)** Instructional procedures, techniques, strategies, and resources for teaching mathematics in secondary classrooms. Open only to MAT students.

**EDUC 546 Psychopathology for Marriage and Family Therapy (3)** Theories of psychological impairment emphasizing diagnosis of child and family dysfunction. Practice in utilizing DSM-IV classification of case studies. (Duplicates credit in former EDCO 546.)

**EDUC 547 Career Development: Theory and Process (3)** Theories and process of career development; principles of career and leisure planning and counseling applicable throughout life. (Duplicates credit in former EDCO 548.)

**EDUC 550 Multimedia Literacy (3, FaSpSm)** Applying new technology in the classroom. Exploration of the use of multimedia tools to increase literacy. Examination of multiple forms of technology to facilitate learning. Open only to M.A.T. and Gifted Education Certificate students.

**EDUC 551 Teaching Physical Education (1, FaSpSm)** Instructional approaches for integrating physical education content across the elementary curriculum. Open only to M.A.T. students.

**EDUC 552 Literacies in the Content Area (3, FaSpSm)** Literacy and language within content areas. Developing reading, writing, speaking and listening skills for real audiences. Academic language.

**EDUC 553 Psychopharmacology and the Effects of Substance Abuse (3, Sp)** Focus on the effects of psychotropic medication, alcohol, and other substances on behavior. The professional and ethical issues for marriage and family therapists.

**EDUC 554 Visual and Performing Arts in Elementary Subjects (2, FaSpSm)** Instructional approaches for integrating visual and performance arts content across the elementary curriculum. Open only to M.A.T. students.

**EDUC 555 STEM Education in Secondary Classrooms (3, FaSpSm)** Developing innovative practices in designing inquiry-based lesson plans to facilitate integrating the STEM disciplines as a foundation for teaching.

**EDUC 556 Integrating English Language Arts and Social Studies (5, FaSpSm)** Strategies and methods for integrating English language arts in social studies classrooms. Reinforces the concept of social studies as a conduit to further student learning. (Duplicates credit in EDUC 567.) Open only to M.A.T. Multiple Subject and Multiple Subject (online) students.

**EDUC 557 Civics Education (3, FaSpSm)** Uses of pedagogical practices for increasing student engagement in the study of history and civics. Becoming critical thinkers, problem solvers, and effective citizens.

**EDUC 558 Culture Learning in Schools: Latino (3)** History, values, beliefs, and the demography of Spanish-speaking people; implications for the American classroom. Conducted in Spanish.

**EDUC 559 Discourse Analysis and Technology in STEM Classrooms (3, FaSpSm)** Using multiple assessment strategies and technology to assess mathematical and scientific thinking and performance.

**EDUC 560 Primary Language Instruction in a Bilingual Setting (3, Fa)** Bilingual programs, their goals, personnel, teaching methods, and materials.

**EDUC 561 Teaching English to Speakers of Other Languages Pedagogy I (3)** Overview of approaches in Teaching English to Speakers of Other Languages and methods for teaching reading, writing, listening, speaking, along with grammar, vocabulary, and pronunciation. Open only to M.A.T. TESOL and TESOL (online) students.

**EDUC 562 Teaching English to Speakers of Other Languages Pedagogy II (4)** Introduction to micro-components of effective teaching, including curriculum and lesson planning, lesson sequencing and delivery, and creating a classroom environment conducive to English language learning.

**EDUC 563 Teaching from a Comparative and International Perspective (3, FaSpSm)** Examines the social context of schooling from a comparative and international perspective, connections between cultural beliefs and societal values; issues of social stratification and marginalization.

**EDUC 564 Teacher Leadership (2, FaSpSm)** Strategies of leadership that lead from influencing learning in the classroom to influencing learning across an entire school. Becoming an instructional leader.

**EDUC 566 Teaching Mathematics and Science (4, FaSpSm)** Instructional approaches for integrating mathematics and science with other content areas in elementary and secondary classrooms. Open only to M.A.T. students.

**EDUC 567 English and Language Arts in Elementary Social Studies (4, FaSpSm)** Integrating English and language arts development with learning in elementary social studies classrooms. Factors affecting the teaching and learning of social studies and language arts. Open only to M.A.T. students.

**EDUC 568ab Guided Practice (3-3)** Supervised practicum in observation and teaching. Focus on planning, implementing, and assessing instruction for whole classes and individual students. Open only to M.A.T. students. Graded CR/NC. (Duplicates credit in former EDUC 568.)

**EDUC 569ab Capstone Portfolio in Learning and Instruction (2-2)** The culminating experience in the Master of Arts in Teaching Program for students in the non-credential track. Open only to M.A.T. students. (Duplicates credit in former EDUC 569.)

**EDUC 570 Research Methods and Data Analysis for Counselors (3)** Various research designs and their appropriateness for addressing different research questions. Threats to validity and other challenges in research. Basic statistical methods and their use. *Recommended preparation:* beginning statistics course.

**EDUC 571 Systems of the English Language (3)** Exploration of English language systems including words, sounds, sentence structure, and discourse and application of this knowledge to teaching English as second or foreign language.

**EDUC 572ab Teaching in an International and Intercultural Context (2-2, Fa)** Examines social context of education from an international and intercultural perspective, linkages between societal values, culture, and schooling, and implications for the role of teachers.

**EDUC 573 Introduction to Special Education (3, FaSpSm)** Effective and appropriate educational settings for students with disabilities. Legal and professional responsibilities. Components for an inclusive classroom.

**EDUC 574 Collaboration, Families and Case Management (3, FaSpSm)** Planning and implementing effective educational services for students receiving special education services. Potential interventions for family support. Coordination of services.

**EDUC 575 Assessment and Curriculum for Students with Disabilities (3, FaSpSm)** Developing effective educational interventions for students with disabilities. Formal and informal assessment. Curriculum strategies.

**EDUC 576 Establishing and Maintaining an Effective Classroom Ecology (3, FaSpSm)** Environmental and personal factors affecting student achievement. Intervention methodologies. Creating an effective learning environment.

**EDUC 577 Guided Practice: Mild/Moderate Disabilities (3, FaSpSm)** Supervised practicum in observation and teaching. Focus on planning, implementing, and assessing instruction for whole classes and individual students with mild/moderate disabilities.

**EDUC 578 Integrating the Arts into the Secondary Curriculum (3, FaSpSm)** Methods for integrating the arts into secondary classroom instruction. Critical and creative thinking, aesthetic education.

**EDUC 580 Transforming STEM Education into Teaching Science (3, FaSpSm)** The convergence of science, technology, engineering, and mathematics (STEM) as a foundation for teaching science.

**EDUC 581 STEM Education from a Project-Based Learning Approach (3, FaSpSm)** Model-based reasoning and inquiry as a means of integrating STEM disciplines.

**EDUC 583 Counseling through the Lifespan (3)** Developmental issues and life events from infancy to old age and their effect upon individuals, couples, and family relationships.

**EDUC 584 Facilitating Creativity and Innovation in STEM Classrooms (3, FaSpSm)** The role of creativity in STEM education. Theories and approaches to facilitating creative and innovative thinking.

**EDUC 585 Action Research Project (3, FaSpSm)** Design and implementation of a STEM-based project.

**EDUC 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**EDUC 593ab Master's Seminar (2-2)** An examination and analysis of research and literature in the student's area of focus. Graded IP/CR/NC. (Duplicates credit in former EDCO 593ab.)

**EDUC 594abz Master's Thesis (2-2-0)** Credit on acceptance of thesis. Graded IP/CR/NC.

**EDUC 599 Special Topics (1-4, max 9, FaSpSm)** Selected topics in various areas of education.

**EDUC 600 Counseling for College and Career Readiness II (2, Fa)** Planning and implementing theoretical foundations of college and career counseling. The application of contextually relevant strategies for assisting in college and career choices.

**EDUC 605 Framing Educational Leadership (1, Fa)** Critical analysis and creative expression applied to problems of practice. Supported and unsupported assertions. Evidence-based decision-making. The quality of evidence used to support arguments. Graded CR/NC. Open only to doctoral students.

**EDUC 606 International Studies Seminar (1, FaSpSm)** Analyzing educational challenges and opportunities in international and global contexts. Understanding the global context of international education and issues facing international and global urban education. Course includes an overseas trip. Open only to doctoral students. Graded CR/NC.

**EDUC 607 Role of School Counselors in Student Learning and Motivation (3, FaSpSm)** The process of identifying and assessing learning and motivational issues in schools, the application of research-based interventions, and the evaluation of effectiveness of these interventions.

**EDUC 608 School Connectedness, Climate, and Classroom Management (2, Fa)** Prevention, education, and training for achievement. Data collection for assessment and evaluation of school climate, crisis and classroom management conducive to learning and success.

**EDUC 609 Academic Advising in Postsecondary Education (3, Fa)** Contemporary issues in academic advising in postsecondary education. Examines and analyzes relevant theories, policies, and practices related to academic advising.

**EDUC 610 Higher Education Administration in China (3, Sm)** Examination of student affairs and higher education administration practices in the People's Republic of China. Course concludes with a trip to China.

**EDUC 611 Athletic Administration (3, Sp)** Analysis and discussion of critical issues in intercollegiate athletics. Student-athlete academic and social accountability; challenges of NCAA policies; commercialization, marketing, and fundraising in college athletics.

**EDUC 612 Application of Human Development Theory in School Counseling (3, FaSpSm)** A theoretical perspective of human development across the lifespan. Issues and challenges faced by school counselors.

**EDUC 613 Gender Issues in Athletic Administration (3, Sp)** Overview of Title IX and gender issues in institutions of higher education and implications for public schools.

**EDUC 614 Research and Assessment in Higher Education (3, Sm)** Theory and practice of outcomes assessment, program evaluation, and research design in postsecondary educational administration.

**EDUC 615 Ethics in Athletic Administration (3, Fa)** Ethical concerns in intercollegiate athletics. Review, analysis, and discussion of ethical and moral conduct in sports. Relevance of social justice to ethical behaviors.

**EDUC 616 Higher Education Seminar (3, FaSp)** Capstone seminar course focused on the future of student affairs and higher education.

**EDUC 617 The Student Athlete in Higher Education (3, Fa)** Examination of student athletes in higher education. Effective strategies for counseling and advising college student athletes; issues and challenges of athletic amateurism.

**EDUC 618 School Counseling Professional Portfolio (2, Fa)** Preparation of an electronic resource portfolio that addresses a field based practice. The culminating experience for the M.Ed., School Counseling program.

**EDUC 619 Framing Educational Leadership in a Global Context (4, Sm)** Globalization as a distinct phenomenon. Assessment of impact of globalization on educational systems and institutions. Open only to doctoral students.

**EDUC 620 Fundamentals of Creativity, Innovation, and Entrepreneurship (2, Sm)** The genesis and facilitation of creative ideas in educational practice. The transformation of creativity into innovation and entrepreneurship. Open only to doctoral students.

**EDUC 621 Measurement and Evaluation for School Counselors (3, Fa)** The use of formal and informal assessments to improve student achievement and well-being. Use of assessment data for intervention and evaluation.

**EDUC 623 Understanding Research That Informs Leadership (2, Fa)** Understanding, interpreting, and applying education research. Open only to doctoral students.

**EDUC 624 Educational Organizations: Governance and Finance I (2, Fa)** Overview of economic concepts of education. Linkages between economic growth, development, and education. Impact of globalization. Open only to doctoral students.

**EDUC 625ab Induction Plan and Assessment of Candidate Competence (1-1, FaSpSm)** The development of an individualized induction plan and assessment of competence for meeting requirements for the Clear Administrative Services Credential. (EDUC 625a duplicates credit in former EDUC 595; EDUC 625b duplicates credit in former EDUC 596.) Graded CR/NC.

**EDUC 626 Fostering Entrepreneurship in Educational Systems (2, Fa)** The role of entrepreneurship in education and conditions that support entrepreneurship within an educational organization. How social entrepreneurship partnerships improve educational outcomes. Open only to doctoral students.

**EDUC 627 Education Performance Problems: Role of Learning (3, Sp)** Contemporary perspectives on learning and motivation. Strategies and tools for identifying, diagnosing, and solving learning and motivational challenges and opportunities. Open only to doctoral students.

**EDUC 628 Educational Organizations: Governance and Finance II (2, Sp)** Diversification and differentiation of educational institutions globally. The finances of higher education. Open only to doctoral students. *Prerequisite:* EDUC 624.

**EDUC 629 Consulting Practicum Context Analysis (4, Sp)** Preparation, design, and analysis of an education-related problem. Open only to doctoral students.

**EDUC 630 Organizations and Policy: Current Issues (4, FaSp)** Study of contemporary issues in educational organizations, policy and change in K-12 and higher education with an explicit focus on the improvement of urban education. Open to students admitted to the Ph.D. only.

**EDUC 631 Locating Educational Performance Problems (3, Sp)** Development and implementation of strategies for locating, solving and evaluating solutions to performance problems in educational organizations. Open only to doctoral students.

**EDUC 633 Child and Elder Abuse and Domestic Violence (2)** A review of laws governing mandated reporting of child and elder abuse, the procedures involved, as well as etiology, effects, and treatment interventions.

**EDUC 634 Couples Counseling (3)** Examines relational development and change, strategies for intervention with couples, and selected issues in couples relationship functioning. *Prerequisite:* EDUC 500, EDUC 507, EDCO 541.

**EDUC 635 Psychotherapy with Children and Adolescents (3)** Training in unique diagnostic considerations in working with children and adolescents. Exposure to empirically supported treatment modalities for children and adolescents. (Duplicates credit in former EDCO 554.) *Prerequisite:* EDUC 500, EDUC 507, EDCO 541.

**EDUC 636 Perspectives on Human Sexuality (3)** The physiological-psychological and socio-cultural variables associated with sexual identity and sexual behavior with an emphasis upon sexual dysfunctions. (Duplicates credit in former EDCO 516.) *Prerequisite:* EDUC 507.

**EDUC 637 Group Counseling: Theory and Process (3)** Theory, research, and practice of group counseling. Includes laboratory experience. (Duplicates credit in former EDCO 542.) *Prerequisite:* EDUC 500, EDUC 507, EDCO 541.

**EDUC 638 Cross-Cultural Counseling: Research and Practice (3)** An examination of the cultural, socioeconomic, and language factors that may affect culturally differentiated populations; alternative cross-cultural counseling approaches. (Duplicates credit in former EDCO 551.)

**EDUC 640 The Research University in the 21st Century (4, FaSp)** An examination of the current transformation of the American research university with a focus on key issues that confront academics who work in research universities. Open to students admitted to the Ph.D. only.

**EDUC 642 Controversies in Learning and Instruction (4, FaSp)** An introduction to learning research and theory, issues in learning and educational psychology situated in the context of diverse, urban settings. Open to students admitted to the Ph.D. only.

**EDUC 644 Practicum in Counseling (3)** Supervised clinical work with clients, including adults, couples, children, and families. (Duplicates credit in former EDCO 560.) *Prerequisite:* EDUC 500, EDUC 507, EDUC 546, EDCO 541.

**EDUC 645ab Fieldwork in Counseling (3-3)** Supervised field experience in a clinical setting. Graded CR/NC. (Duplicates credit in former EDCO 561.) *Prerequisite:* EDUC 644.

**EDUC 646ab Marriage and Family Therapy Capstone: Leadership Project (1-1, FaSp)** An evidence-based leadership project, designed to enhance fieldwork site functioning. Includes needs assessment, literature review, project design, implementation, and evaluation.

**EDUC 650 Globalization and the Nation-State: Theories of Change (4, FaSp)** The impact of globalization on educational public policies and practices: an examination of technology, information and communications, and their influence on transnational and national politics. Open to students admitted to the Ph.D. only.

**EDUC 653 Advanced Qualitative Research (3, Sp)** Interactive seminar that explores the theoretical underpinnings and practicalities of interviews, portraiture, focus groups, life histories, and cultural biographies. *Recommended preparation:* introductory statistics.

**EDUC 689 Fiscal Support and Expenditure in Higher Education (3, Sp)** Analyses of private and public financial support and expenditure patterns; includes recent trends in state and federal legislation related to higher education.

**EDUC 700 Research and Practice in the Preparation of Teachers (3)** Research on the preparation of teachers for diverse populations. Measures of teacher quality and student achievement. Existing practices in teacher education from multiple perspectives.

**EDUC 701 Pedagogy in Teacher Education**

**(3)** A critical examination of pedagogical practices in teacher education. The design of pedagogical approaches and programs for diverse and underserved students in urban schools.

**EDUC 702 Curriculum, Teacher Preparation, and Student Learning**

**(3)** The process and role of curriculum in a variety of urban settings, teacher preparation, and professional growth. The philosophical and psychological foundations of curriculum development. Open to doctoral students only.

**EDUC 703 Examining Literacy Theories and Practice**

**(3)** Literacy theories as practiced in urban, teacher education and professional development settings using an inquiry approach to examine best practice. Open to doctoral students only.

**EDUC 704 Evaluation and Assessment in Teacher Education**

**(3, Fa)** Evaluation and assessment in the context of public schools, teacher preparation and professional growth in urban settings. Policy implications of data-based decision making and program implementation.

**EDUC 706 Proseminar in Higher Education**

**(3)** Critical issues in urban higher education from historical and philosophical perspectives.

**EDUC 707 Administration in Higher Education**

**(3, Fa)** Administrative issues in higher education. Academic leadership related to undergraduate and graduate education. Quality standards and assessment. How administrators create efficiency, effectiveness, performance, and change.

**EDUC 708 Advanced Student Development Theory**

**(3, Fa)** Examination of traditional and emergent student development theories.

**EDUC 709 Finance in Higher Education**

**(3)** Local, national, and global economic and policy environments and their effect on institutional policies and practices.

**EDUC 710 Assessment, Organizational Learning and Performance**

**(3)** The role of assessment in higher education. An analysis of the purpose and value of particular assessment approaches and instruments, in particular those addressing classroom learning and institutional effectiveness.

**EDUC 711 Social Factors Influencing Learning and Motivation**

**(3)** Social psychological principles and research techniques applied to educational problems; school environment, group behavior, teacher effectiveness, teacher-student interaction, behavioral change. Open to doctoral students only.

**EDUC 712 Issues in Human Motivation**

**(3)** Analysis of motivational principles; diagnosis and solutions to motivation gaps in learning environments; and motivation and efficacy theories and principles. Open to doctoral students only.

**EDUC 713 Issues in Lifespan Development**

**(3)** An examination of issues related to the development of diverse students and the development of environments that promote motivated behavior. Open to doctoral students only.

**EDUC 714 Measurement and Evaluation for Decision-Making**

**(3, Sm)** Collecting, analyzing, and using quantitative data to solve problems of practice and in evaluating educational institutions, programs, and policies. Open only to doctoral students.

**EDUC 715 Current Research in Learning**

**(3)** Current research in the application of learning theories, and the applicability of this research across a variety of contexts. Open to doctoral students only.

**EDUC 716 Instructional Leadership**

**(3, Sm)** Examines the role of instructional leaders in improving student performance; current issues in curriculum design and implementation; and effective instructional leadership approaches for school improvement. (Duplicates credit in former CTSE 688.) Open only to doctoral students.

**EDUC 717 Schooling as an Economic Enterprise**

**(3, Fa)** Applying economic theory to the study of education. Application of market theory to education, partnerships, allocation of resources, and the examination of educational enterprises. (Duplicates credit in former EDPA 615.) Open only to doctoral students.

**EDUC 718 Maximizing Human Resources in Education**

**(3, Sm)** Strategically understanding the management of human capital to ensure high student performance. How to attract and retain top quality teachers. (Duplicates credit in former EDPA 610.) Open only to doctoral students.

**EDUC 719 The Policies and Politics of Education Governance**

**(3, Fa)** Major issues facing educators in the 21st century. Emphasis on how educational policy can focus on incentives for schools to improve student learning. (Duplicates credit in former EDPA 613.) Open only to doctoral students.

**EDUC 720 Leadership for Principals**

**(3, Sm)** The role of the principal as an instructional leader with a focus on improving student achievement. (Duplicates credit in former EDPA 600.) Open only to doctoral students.

**EDUC 721 Leadership for Superintendents**

**(3, Sm)** The role of the superintendent in establishing a focus on student achievement and holding school sites accountable. How superintendents support student learning through leadership. (Duplicates credit in former EDPA 618.) Open only to doctoral students.

**EDUC 723 Evaluating and Assessing Educational System Outcomes**

**(3, Sm)** Evaluating impact. Examination of key assessment theories; planning and implementation of learning and program effectiveness. Open only to doctoral students.

**EDUC 724 Creating Policy Alternatives for Educational Settings**

**(3, Sm)** Effective policy-making and constructing alternatives. Open only to doctoral students.

**EDUC 725 Analyzing Effectiveness of Educational Systems**

**(3, Fa)** Organizational change and development in the context of educational settings. How change and reform occur. How to foster change and transformation. Open only to doctoral students.

**EDUC 726 Making Choices: Deciding Among Policy Alternatives**

**(4, Fa)** Models of decision making including cost-benefit analysis, risk-benefit analysis, and decision analysis. Ethical considerations and the political environment. Open only to doctoral students.

**EDUC 727 Implementing Policy in Educational Systems**

**(3, Sp)** Effective policy-making. Human and financial resources to support implementation. Targeting resources to support implementation to attain policy goals. Open only to doctoral students.

**EDUC 728 Global Trends: Emerging Ideas, Emerging Markets**

**(3, Sp)** Examination of a range of emerging markets in education. Global efforts of institutions of higher education to access new markets through collaborations and offshore endeavors. Open only to doctoral students.

**EDUC 729 Assessing Policy Impact in Educational Settings**

**(3, Sp)** Theory and practice of educational policy evaluation. Limits of rationality and the political forces that shape policy. Preparation of an evaluation design. Open only to doctoral students.

**EDUC 764abcdz Consulting Project**

**(1-1-1-0, FaSpSm)** Credit on acceptance of consulting project. Graded CR/NC. Open only to doctoral students. *Prerequisite:* EDUC 629.

**EDUC 790 Research (1-12, FaSpSm)**

Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**EDUC 791 Proposal for Doctoral Dissertation (1, FaSpSm)** Preparation of initial dissertation proposal. Graded CR/NC.

**EDUC 792 Critique of Research in Education (3, FaSp)** A survey and critical analysis of selected research and literature. Graded CR/NC. Open to students admitted to the Ed.D. only.

**EDUC 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSp)** Credit on acceptance of dissertation. Graded IP/CR/NC.

**EDUCATION COUNSELING (EDCO)****EDCO 030x The Process of Paraprofessional Counseling for Young Adults (2, Sp)**

Explores the theoretical processes involved in paraprofessional counseling with specific application to issues faced by young adults. Graded CR/NC.

**EDCO 324m Asian American Psychology (4, Sp)**

Psychological issues of Asian Americans such as cultural identity, intergenerational conflict, stereotypes, interracial dating and marriage, educational achievement, and mental health.

**EDCO 503 Ethical and Legal Issues in Counseling (3, Sp)**

Examination of current legal, ethical, and other professional issues in the practice of counseling and psychotherapy. *Prerequisite:* EDUC 500.

**EDCO 504 Behavior Management in the Classroom (3, Sp)**

Analysis of student behavior in school settings. Emphasis is on a problem-solving functional approach to behavioral changes.

**EDCO 505 Counseling and Collaborative Consultation in the School Setting (3, Sp)**

Theory and practice of collaborative consultations provided by school counselors and school psychologists to improve student achievement and the learning environment.

**EDCO 506 Development, Administration and Evaluation of Pupil Personnel Services (3, Fa)**

Develop skills in the evaluation and management of pupil personnel services programs in the public schools for comprehensive support of student learning and achievement.

**EDCO 541 Theories in Counseling (3, FaSp)**

Theory, research, and practice of psychological counseling. *Corequisite:* EDUC 500.

**EDCO 574 School Counseling Practicum (1-2, max 2, FaSpSm)**

Supervised practice in school counseling. Graded CR/NC. *Prerequisite:* EDCO 503, EDCO 541.

**EDCO 575 School Counseling Field Experience (1-4, max 4, FaSpSm)**

Supervised field experience in applying knowledge and skills within a K-12 school setting. Graded CR/NC. *Prerequisite:* EDCO 574.

**CURRICULUM, TEACHING AND SPECIAL EDUCATION (CTSE)****CTSE 593ab Master's Seminar (2-2, FaSpSm)**

An examination and analysis of research and literature from the student's area of focus. Required of all master's candidates who do not enroll in the Master's Thesis (594abz). Graded CR/NC.

**EDUCATIONAL POLICY, PLANNING AND ADMINISTRATION (EDPA)****EDPA 308 Politics and American Education (4, FaSp)**

Historical study of political, legislative, judicial decisions that have shaped American education; interaction of educators, courts, legislative bodies; emphasis on in-depth analysis of current issues.

**EDPA 612 Qualitative Methods in Educational Research (3, SpSm)**

Overview of the assumptions, methods and techniques of qualitative educational research; discussion and application of analytical tools derived from anthropology, sociology, history, and related social sciences.

**EDUCATIONAL PSYCHOLOGY AND TECHNOLOGY (EDPT)****EDPT 110 Motivation and Learning Strategies (4, FaSp)**

Applying research in cognitive psychology and motivation theory to improve students' learning in different academic disciplines.

**EDPT 310 Parental Influences on Children's Educational Development (4, FaSp)**

Basic principles and theories of child development and learning with emphasis on parent-child, parent-school, and child-school relationships.

**EDPT 502 Learning and Individual Differences (3, FaSpSm)**

Theory and research in learning, development, and individual differences, and social psychology related to education or training contexts.

**EDPT 520 Human Lifespan Development (3, FaSp)**

Fundamentals of human physical, motor, mental, social, and emotional development, spanning the prenatal period through late adulthood.

**EDPT 540 Introduction to Educational Measurement and Evaluation (3, FaSp)**

Survey of theories, concepts, and procedures for assessing intellectual and non-intellectual characteristics and for evaluating individual and program performances.

**EDPT 550 Statistical Inference (3, FaSpSm)**

Application of statistical techniques in education; emphasis on underlying principles and concepts coupled with selected inferential techniques using desk-top computer software.

**EDPT 570 Language and Cultural Diversity in Learning (3, Fa)**

Analysis of current research and theory regarding the influences of language and culture on learning and cognition, with a special focus on academic achievement and instructional transactions.

**EDPT 571 Instructional Design (3, FaSp)**

Formulation and design of effective instruction; emphasis on analysis of media characteristics and instrumentation requirements.

**EDPT 576 Technology in Contemporary Education and Training (3, FaSp)**

Development and scope of instructional technology and its role in modern educational and training systems; overview of instructional development; innovation and trends in the field.

**EDPT 642 Measurement Theory (3, Fa)**

Mathematical concepts and psychometric theory underlying test construction and interpretation; emphasis on current research in the area. *Prerequisite:* EDPT 652.

**EDPT 652 Multiple Regression (3, Sp)**

Multiple regression, factorial analysis of variance, path analysis. *Prerequisite:* introductory statistics.

**EDPT 654 Multivariate Statistical Techniques (3, FaSpSm)**

Multivariate statistical procedures in the analysis of behavioral inquiries; particular emphasis on multivariate analysis of variance. *Prerequisite:* EDPT 652.

**EDPT 655 Advanced Research Methods in Education (3, Sp)**

Focuses on principles of research design in education including literature synthesis, formulation of research problem and questions, selection of methodology and integration of research proposal. *Prerequisite:* EDPT 550.

## HIGHER AND POSTSECONDARY EDUCATION (EDHP)

**EDHP 500 Foundations of Higher, Adult, and Professional Education (3, Fa)** Contemporary issues in higher, adult, and professional education in the United States; analytic perspectives from various disciplines (history, philosophy, sociology); implications for policy and practice.

**EDHP 502 Administration of Higher, Adult, and Professional Education (3, Sp)** Policies and theories for governance and management. Relations between historical and contemporary organizational processes in postsecondary education. Critique and applications of current research.

**EDHP 503 Curriculum, Teaching, and Learning in Higher, Adult, and Professional Education (3, Sp)** Curriculum, teaching, and learning strategies for general, vocational, and professional education; planning for lifelong learning; theories, policies, and practices for higher, adult, and professional education.

**EDHP 551 Applied Educational Ethnography (3, Fa)** Research for improving leadership in higher, adult, and professional education. Ethnographically motivated field designs, observations, focused and unstructured interviews and unobtrusive techniques.

**EDHP 552 The Politics of Difference (3)** Explores strategies for restructuring institutions of higher education to improve student support and achievement among historically marginalized groups.

**EDHP 560 Feminist Theory (4, FaSpSm)** (Enroll in SWMS 560)

**EDHP 563 Student Affairs Work in College (3, Fa)** Principles, services, and organizational patterns of student affairs programs and services for two-year, four-year and professional higher education institutions.

**EDHP 565 Intervention Strategies in College Student Development (3, Sp)** Exploration of current campus issues such as violence, diversity and academic remediation, and their related intervention strategies (policy-based, programmatic, and counseling-based).

**EDHP 580 The Community College (3, SpSm)** The community college movement; history; aims; curriculum; types of administrative organization; teaching procedures; relation to lower and higher institutions; profiles of faculty and students; evaluation.

**EDHP 587 Fieldwork in Higher, Adult, and Professional Education (1-8, max 8, FaSpSm)** Structured participation in supervised teaching or administrative activities. Assignments matched with student's goals, training, experience. Graded CR/NC. *Recommended preparation:* EDHP 563, EDHP 565.

**EDHP 593ab Master's Seminar (2-2, FaSpSm)** An examination and analysis of research and literature in the student's area of focus. Required for all master's candidates who do not enroll in the Master's Thesis (594abz). Graded CR/NC.

**EDHP 594abz Master's Thesis (2-2-0, FaSpSm)** Required for all master's candidates who do not enroll in the Master's Seminar (593ab). Credit on acceptance of thesis. Graded IP/CR/NC.

**EDHP 657 Management of Student Services in Higher Education (3, Sp)** Delivery of student services and programs in higher education, organizational behavior, management systems, administrative procedures, and alternative leadership styles.

**EDHP 679 Legal Issues in the Administration of Higher Education (3, Sm)** Analysis of legal issues related to the administration of higher education; emphasis on relations with students, faculty, staff, alumni, and campus communities. *Prerequisite:* EDHP 500 or appropriate experience.

**EDHP 687 Student Development in Higher Education (3, Sp)** Theories of college student development and application of developmental models to program design, interventions, outreach, and research programs.

---

# USC Viterbi School of Engineering

*Bandit, a robot used to encourage social development in autistic children, is just one of the numerous innovative projects USC Viterbi had on display at the seventh annual international Robotics: Science and Systems Conference, where Maja Matarić, vice dean for research and Bandit's lead programmer, led a session on robot-human interaction.*

Courses in engineering were first offered at USC in the 1905-06 academic year in the basement of one of the oldest buildings on campus. Today, 174 full-time, tenure track faculty (and more than 300 total faculty) serve about 2,000 undergraduates and 4,000 graduate students, utilizing extensive and technically advanced laboratories, classrooms and live interactive high-speed Internet broadcast systems. Government and industry annually fund more than \$168 million worth of research.

USC Viterbi is innovative, elite and internationally recognized for creating new models of education, research and commercialization firmly rooted in real world needs. The school's first priorities are the education of outstanding students and the pursuit and publication of research.

As the school's faculty and students extend the frontiers of engineering knowledge through their research, they also apply engineering and technology to address societal challenges. The school stimulates and encourages qualities of scholarship, leadership and character that mark the true academic and professional engineer — to serve California, the nation and the world. At USC Viterbi, we call this the enabling power of Engineering+.

The school prepares students to translate invention to innovation and advances the continuing education of engineering and scientific personnel to provide professional engineering leadership to solve community, regional, national and global problems.

Viterbi undergraduate support programs complement and strengthen the academic experience, enhancing both depth and scope. The Klein Institute for Undergraduate Engineering Life fosters leadership, cross-disciplinary activity and globalization; the Freshman Academy exposes first-year students to current research; and the Engineering Writing Program (EWP) develops communication skills.

Viterbi graduate education is outstanding preparation for advanced research and professional careers. The Ph.D. program is built around fellowships, teaching assistantships and research appointments, and has produced a steady increase in doctoral degrees. The master's and professional programs are national and global leaders in advanced training for professional engineers.

**Administration**

Yannis C. Yortsos, Ph.D., *Dean*

John O'Brien, Ph.D., *Executive Vice Dean*

Herbert Schorr, Ph.D., *Vice Dean*

Maja Matarić, Ph.D., *Vice Dean*

James E. Moore II, Ph.D., *Vice Dean*

Timothy Pinkston, Ph.D., *Vice Dean*

S. Joe Qin, Ph.D., *Vice Dean*

Cauligi Raghavendra, Ph.D., *Vice Dean*

Linda Rock, M.A., *Vice Dean*

Kelly Goulis, M.S., *Senior Associate Dean*

Louise A. Yates, M.S., *Senior Associate Dean*

David Murphy, *Chief Financial Officer*

## Degrees and Requirements

The Viterbi School of Engineering offers the following undergraduate curricula leading to the Bachelor of Science in: Aerospace Engineering; Applied Mechanics; Astronautical Engineering; Biomedical Engineering; Chemical Engineering; Civil Engineering; Computer Engineering and Computer Science; Computer Science; Computer Science/Business Administration; Computer Science (Games); Electrical Engineering; Environmental Engineering; Industrial and Systems Engineering; Mechanical Engineering; and Physics/Computer Science.

Minor programs are offered in: Applied Computer Security; Astronautical Engineering; Computer and Digital Forensics; Computer Science; Construction Planning and Management; Craniofacial and Dental Technology; Engineering Management; Engineering Technology Commercialization; Enterprise Information Systems; Environmental Engineering; Innovation: The Digital Entrepreneur; Interactive Multimedia; Materials Science; Petroleum Engineering and Polymer Science; 3-D Animation; Video Game Design and Management; Video Game Programming; Web Technology and Applications.

Graduate curricula leading to the Master of Science in: Aerospace and Mechanical Engineering (Computational Fluid and Solid Mechanics); Aerospace and Mechanical Engineering (Dynamics and Control); Aerospace Engineering; Astronautical Engineering; Biomedical Engineering; Biomedical Engineering (Medical Imaging and Imaging Informatics); Chemical Engineering; Civil Engineering; Civil Engineering (Construction Engineering); Civil Engineering (Structural Engineering); Civil Engineering (Transportation Engineering); Civil Engineering (Transportation Systems); Civil Engineering (Water and Waste Management); Computer Engineering; Computer Science; Computer Science (Computer Networks); Computer

Science (Computer Security); Computer Science (Game Development); Computer Science (High Performance Computing and Simulations); Computer Science (Human Language Technology); Computer Science (Intelligent Robotics); Computer Science (Multimedia and Creative Technologies); Computer Science (Software Engineering); Electrical Engineering; Electrical Engineering (Computer Networks); Electrical Engineering (Electric Power); Electrical Engineering (Multimedia and Creative Technologies); Electrical Engineering (Telecommunications); Electrical Engineering (VLSI Design); Electrical Engineering (Wireless Health Technology); Engineering Management; Environmental Engineering; Financial Engineering; Green Technologies; Health Systems Management Engineering; Industrial and Systems Engineering; Manufacturing Engineering; Materials Engineering; Materials Science; Mechanical Engineering; Mechanical Engineering (Energy Conversion); Mechanical Engineering (Nuclear Power); Medical Device and Diagnostic Engineering; Operations Research Engineering; Petroleum Engineering; Petroleum Engineering (Smart Oilfield Technologies); Product Development Engineering; and Systems Architecting and Engineering.

Graduate curricula leading to the Master of Construction Management.

Graduate curricula leading to the Engineer degree in: Aerospace Engineering; Astronautical Engineering; Chemical Engineering; Civil Engineering; Electrical Engineering; Industrial and Systems Engineering; Materials Science; Mechanical Engineering; and Petroleum Engineering.

Through the Graduate School, graduate curricula leading to the Doctor of Philosophy in: Aerospace Engineering; Astronautical Engineering; Biomedical Engineering; Chemical Engineering; Civil Engineering; Computer Engineering; Computer Science; Electrical Engineering; Engineering (Environmental Engineering); Industrial and Systems Engineering; Materials Science; Mechanical Engineering; and Petroleum Engineering.

Graduate certificates in: Astronautical Engineering; Engineering Technology Commercialization; Health, Technology and Engineering; Health Systems Operations; Network Centric Systems; Smart Oilfield Technologies; Software Architecture; Systems Architecting and Engineering; and Transportation Systems.

### Undergraduate Program Accreditation

The Bachelor of Science degrees in aerospace engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering and computer science, electrical engineering, environmental engineering, industrial and systems engineering, and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET, [abet.org](http://abet.org). The Bachelor of Science degrees in computer engineering and computer science and in computer science are accredited by the Computing Accreditation Commission of ABET, [abet.org](http://abet.org).

## Undergraduate Degrees

### Change of Major to Engineering

USC undergraduate students who have not been admitted to the Viterbi School of Engineering may apply to add an engineering major with the approval of the Associate Dean for Admission for the Viterbi School. Students seeking approval to add an engineering major must complete required prerequisite courses and submit a Request

to Change Major to Engineering form to the Admission and Student Affairs Office in Ronald Tutor Hall 110. Approval is granted on the basis of academic performance at USC and in the required prerequisite courses in the Viterbi School within a specific number of semesters.

Non-engineering students may complete a maximum of four engineering courses. No further engineering courses may be taken unless admission has been approved.

### Common Requirements

Certain general requirements are common to all undergraduate curricula for Bachelor of Science degrees in Engineering. These are as follows:

#### Total Units

A minimum total of 128 acceptable units is required to earn the Bachelor of Science in Engineering. Exceptions are: biomedical engineering with an emphasis in electrical engineering, 133 units; biomedical engineering with an emphasis in mechanical engineering, 132 units; chemical engineering, 129 units; chemical engineering with an emphasis in biochemical engineering, 133 units; chemical engineering with an emphasis in environmental engineering, 132 units; chemical engineering with an emphasis in nanotechnology, 128 units; chemical engineering with an emphasis in petroleum engineering, 133 units; chemical engineering with an emphasis in polymer/materials science engineering, 133 units; civil engineering, 131 units; civil engineering with an emphasis in building science, 135-36 units; civil engineering with an emphasis in environmental engineering, 130 units; civil engineering with an emphasis in structural engineering, 131 units; computer science/business administration, 135 units; computer science (games), 128 units; electrical engineering, 131 units; environmental engineering, 131-134 units.

Not more than 4 units may be physical education activity courses, provided the department allows it in the program.

#### General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered

by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See pages 63 and 250 for more information. In addition, students pursuing a degree in computer science must meet the foreign language requirement described on page 252.

The provost has allowed an exception to the rules governing the general education program for students in the Viterbi School of Engineering, who may elect to satisfy the requirement for Category IV with a "wild card" course, which may be a second course in Categories I, II or VI, or with a score of 4 or 5 on the Advanced Placement U.S. History exam.

Students in the engineering "3-2" program are not required to satisfy general education requirements and the WRIT 140 or WRIT 130 requirement; these students are understood to have satisfied USC's general education requirements when they have satisfied the general education requirements and lower level writing requirement at their previous institution. All students must, however, complete the WRIT 340 requirement.

Students in aerospace, astronomical and mechanical engineering complete Social Issues and WRIT 130 in different semesters.

In all other respects, students in the Viterbi School of Engineering must satisfy the general education requirements as described on pages 63 and 250.

#### Mathematics (16 units minimum)

Sixteen units or more, including three semesters of calculus, are required.

#### Basic Sciences (12 units minimum)

Twelve units or more of biology, chemistry or physics are required.

#### Residence Requirement

All students must complete a minimum of 64 units at USC in order to receive a USC degree. In addition, the Viterbi School of Engineering requires that students complete all upper division units required for the major in residence.

For students in the Viterbi School of Engineering "3-2" Program, at least 48 units must be earned in courses taken at USC.

#### Scholarship Requirement in Major Subject

For graduation with a bachelor's degree, a grade point average of C (2.0) or higher is required in all upper division courses applied toward the major including any approved substitutes for these courses taken at USC. Additional scholarship requirements for the various majors are listed under the departmental headings.

#### Grade Point Requirement

A grade point average of at least 2.0 is required on all course work attempted at USC.

Transfer students must meet these averages, both on residence work attempted and on combined transferred and residence courses attempted.

**Probation/Disqualification**

A student whose overall GPA falls below 2.0 is placed on academic probation. Continued enrollment requires clearance from an academic review counselor.

Each semester, students on academic probation are required to receive academic advisement. Proof of advisement must be filed with the Academic Review Department before any registration requests will be processed. The only acceptable proof of advisement is an official academic review advisement record signed by the student's academic adviser and a representative from the Viterbi Admission and Student Affairs Division. Academic review advisement forms may be obtained from Tutor Hall of Engineering (RTH) 110 or John Hubbard Hall 113.

Students on probation are encouraged to utilize the academic services (advisement

and free tutoring) provided by the Viterbi Admission and Student Affairs Division.

Students on academic probation who do not raise their overall GPA to 2.0 after two semesters of enrollment (excluding summers) will be academically disqualified from the university. However, if a student earns a minimum semester GPA of 2.3 in the second or any subsequent probation semester but has not yet reached an overall 2.0 GPA, the student will not be disqualified and will be allowed to enroll an additional semester.

Petitions for readmission after academic disqualification are initiated by the student through the Academic Review Department. All grade issues (IN, MG, etc.) must be resolved prior to the submission of such a petition. Before petitioning for readmission, a student must complete a minimum of

12 semester units of transferable course work (applicable to USC degree requirements) with a minimum 3.0 GPA. University residency requirements will determine whether these units are accepted as transfer credit.

As readmission to the university is never guaranteed, any indication of strong academic performance beyond the 12 unit minimum would strengthen a readmission petition.

Students must petition for readmission by December 30 for the spring semester, by May 1 for the summer session and by August 15 for the fall semester. Late petitions will not be accepted. A non-refundable fee determined by the Academic Review Office must accompany all readmission petitions.

## Special Educational Opportunities

**Viterbi Admission and Student Affairs Division**

The Viterbi Admission and Student Affairs Division, located in Ronald Tutor Hall of Engineering (RTH) 110, begins to assist students as soon as they express an interest in engineering and continues working with them until, and in some cases after, they graduate.

The office is not only responsible for working with prospective students, but with continuing students as well. It directs special services and programs, provides a variety of support services, sponsors student organizations, is involved with student government and acts as a liaison with other university offices.

The Viterbi Admission and Student Affairs Division enables engineering students to have a successful experience at USC.

**Center for Engineering Diversity and Women in Engineering Program (WIE)**

The Center for Engineering Diversity (CED) provides a variety of services for historically underrepresented students in engineering (African-American, Hispanic and Native American students, including women). Prior to their first semester in Viterbi, freshmen can participate in a three-week summer residential program (Summer Research Institute).

Contact the Center for Engineering Diversity at (213) 740-1999 for more information.

**Klein Institute for Undergraduate Engineering Life**

The Klein Institute for Undergraduate Engineering Life (KIUEL) was established to provide Viterbi undergraduates with a variety of personal and professional activities designed to enhance undergraduate engineering student life experiences outside the classroom. KIUEL plans programs around leadership, service learning and globalization, and cross-disciplinary learning. Past KIUEL events have included the KIUEL Weekend for Leaders, the KIUEL Showcase and the Senior Design Expo. For more information, visit [viterbi.usc.edu/kiuel](http://viterbi.usc.edu/kiuel).

**Merit Research Program**

Every year, a select group of promising incoming freshmen are invited by faculty to work on projects in their research laboratories. These student researchers actively participate in the development of new technology throughout their undergraduate careers.

In addition to giving students excellent first-hand experience, this program can help offset the cost of education since each participant earns wages for his or her work. This renewable award is separate from other financial assistance offered by the university.

The student must apply for renewal of his or her award by March 1 of each year. Continuing students can use the same application form to apply for the award starting in their sophomore year.

**First Year Excellence**

The First Year Excellence (FYE) program helps first-year students develop strong connections to the university and the Viterbi school. FYE promotes academic exploration and success through its co-curricular programs, support services and resources during students' first year. Freshman academies, introductory courses and the Viterbi Spotlight Series help guide students as they explore engineering. Academic advisers work with all freshman students to ensure they are on track academically and to assist with acclimating to college life and USC. Free tutoring, grouped supplemental instruction sessions, workshops and seminars on time management and networking with faculty are available to students to assist them in accomplishing their goals.

**Viterbi Career Services**

The Viterbi School of Engineering provides extensive career services to all students. Students are encouraged to register with Viterbi Career Services their first year at USC. By doing so, they will be kept informed of all career-related events such as company information sessions, career preparation workshops, industry luncheons and career fairs. In addition, students are able to participate in the school's extensive on-campus interview program.

USC's Viterbi School of Engineering attracts employers not only from Southern California, but from across the country. A few of the many companies that have recently hired Co-ops, interns and permanent employees from the Viterbi school include: Accenture, Amgen, Alcon Laboratories, Inc., BAE Systems, Chevron Corporation, Cisco Systems, Inc., Clark Construction, Google, Hewlett-Packard Development Company, L.P., IBM, Intel, Jet Propulsion Laboratory, Kiewit Corporation, Lockheed Martin Corporation, Microsoft Corporation, Morley Builders, NASA, Northrop Grumman Corporation, Parsons Corporation, Raytheon, Stryker Corporation, Turner Construction Company, Walt Disney Imagineering and Yahoo.

#### *Cooperative Education*

By participating in the Co-op Program, students can earn degree credit and industry work experience before they graduate. Co-op improves students' understanding of the relationship between theory and practice, helps them fine tune their career goals and aids in the acquisition of important engineering skills. Students' work assignments are closely related to their specific degree program and are appropriate to their current academic level.

Participation in the program is open to all full-time undergraduate engineering majors. Students are eligible to apply for Co-op the second semester of their sophomore year. Though the sequence may vary, students typically have one summer work experience in addition to one semester immediately preceding or following one of the summer sessions. While on assignment, students enroll in a 1-2 unit course (ENGR 395) that aids in the integration of both on-campus and off-campus learning. With departmental approval, credit toward a degree may be earned upon completion of this course.

#### **3-2 Program**

For those students wishing greater depth and breadth in the liberal arts, the Viterbi School of Engineering has developed agreements with more than 20 liberal arts colleges nationwide in which a student attends a liberal arts institution for his or her first three years of college, pursuing pre-engineering courses in addition to a solid program in the liberal arts. At the end of the three years,

upon recommendation from the liberal arts college, the student enters the Viterbi School of Engineering as a junior and, in two years, completes the remaining requirements for a B.S. degree. After these five years are complete, the student will receive two degrees — a B.A. from the liberal arts college and a B.S. from USC.

#### **Engineering Overseas Programs**

Every summer the Viterbi School of Engineering sponsors a seven-week academic program in either Florence, London, Paris, Madrid, Rome or another location which provides students with the opportunity to enroll in engineering and humanities courses, as well as participate in a directed studies project. This program is open to all engineering majors.

#### **International Exchange Programs**

The Viterbi School of Engineering International Exchange Program gives undergraduate students the opportunity to broaden their exposure to the global context of engineering theory and practice by spending a semester or year abroad in a challenging academic environment at an international host institution. The International Exchange Program allows students to satisfy technical electives and/or approved degree requirements by attending approved partner institutions. This program is open to students entering their junior or senior year. Students apply at the Viterbi Student Affairs Office. Candidates must meet all admission requirements of both the Viterbi School of Engineering as well as those of the international host institution. Contact the Admission and Student Affairs Office for a complete list of international exchange partners.

#### **Honor Societies**

The Viterbi School of Engineering has established a variety of honor societies to recognize academic excellence, creativity and service. These are: Alpha Pi Mu (industrial and systems engineering), Chi Epsilon (civil engineering), Eta Kappa Nu (electrical engineering), Omega Chi Epsilon (chemical engineering), Omega Rho (industrial and systems engineering), Pi Tau Sigma (mechanical engineering), Sigma Gamma Tau (aerospace engineering), Tau Beta Pi (nationwide honor society), Upsilon Pi Epsilon (computer science).

#### **Minor in Engineering Technology Commercialization**

The undergraduate minor in engineering technology commercialization is interdisciplinary in nature, requiring courses from both the business and engineering schools and providing education in the economic, technological and management aspects of commercializing new engineering ideas. Business courses include those in technology entrepreneurship, case studies in new ventures and an elective in business plans. Engineering courses cover engineering economy and engineering law. There is also a dean's seminar jointly taught by the business and engineering schools. Elective courses in technologically specific areas of commercialization, such as biomedical devices, are also included.

This program is especially suited to engineering majors.

A minimum of 16 units is required for the minor. Courses required for a student's major that are listed below are not included in the unit total.

REQUIRED COURSES (15 UNITS)		UNITS
BAEP 452	Cases in Entrepreneurship	4
BUAD 301	Technical Entrepreneurship	3
CE 404	Business and Intellectual Property Law for Engineers	3
ENGR 493x	Dean's Seminar in Entrepreneurship	2
ISE 460	Engineering Economy	3
ELECTIVE COURSES (2-4 UNITS)		UNITS
BAEP 454	The Entrepreneurial Business Plan	4
BME 416	Development and Regulation of Medical Products	3
ISE 344	Engineering Team Management	3
ISE 440	Work, Technology, and Organization	3
ISE 490x	Directed Research	2-3

Directed research units can be in any department and supervised by any faculty but must be approved by the faculty chair of USC Stevens Institute for Innovation, a dean within the engineering school or a designate identified by an engineering dean to count toward this minor. This ensures that the directed research is relevant to technology commercialization.

## Graduate Degrees

### General Requirements

The Viterbi School of Engineering recommends candidates for the Master of Science degree in: aerospace engineering, astronautical engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering, computer science, electrical engineering, environmental engineering, financial engineering, green technologies, health systems management engineering, industrial and systems engineering, manufacturing engineering, materials engineering, materials science, mechanical engineering, medical device and diagnostic engineering, operations research engineering, petroleum engineering, product development engineering, and systems architecting and engineering. Several areas of emphasis and specialization are available within these disciplines.

All graduate work in the Viterbi School of Engineering is under the jurisdiction of the Viterbi School except the Doctor of Philosophy degree, which is under the jurisdiction of the USC Graduate School. All prospective graduate engineering students should apply to the USC Office of Graduate Admission.

#### Admission

Two classes of students are admitted to take courses for graduate credit: admitted and conditionally admitted students. These classifications are determined by the Office of Graduate Admission on the recommendations of the appropriate department in the Viterbi School of Engineering.

*Admitted Students* This is the status of a graduate student pursuing work leading toward an advanced degree. The student has been accepted into the degree program without any conditions.

*Conditionally Admitted* The chair of a major department in the Viterbi School of Engineering may recommend that a student be admitted under certain conditions. Conditional admission is granted when a student's admission records are incomplete or when deficiency courses must be taken but the student appears to be otherwise admissible. The conditions must be met before the completion of two semesters of enrollment or 12 units of course work, whichever comes first. If the conditions on admission are not met within the given time period,

the student may not be allowed to register for course work in subsequent semesters. When the conditions have been met, the academic department will remove the restrictions that have been placed on the student's registration.

#### Criteria

In order to qualify for admission, applicants are expected to present strong academic records and show superior accomplishment in their engineering courses. Admission decisions will be based on Graduate Record Examinations test scores and transcripts of previous school work. Individual departments may set higher admission standards than the Graduate School. In some departments letters of recommendation and a statement of purpose are required and should be sent directly to the department office. Doctor of Philosophy applicants who have published professional papers in their field may forward copies to the department, and they will be considered together with the other credentials submitted.

#### Procedure

Applicants to graduate programs must present credentials to the Office of Graduate Admission showing that they have completed an acceptable curriculum for the bachelor's degree if their degree objective is a Master of Science and an acceptable curriculum for a Master of Science degree if the degree objective is the Engineer degree or the Doctor of Philosophy. In some departments students with outstanding records will be admitted for the doctoral program without first receiving the Master of Science degree. If the previous degree is not in the field in which the student wishes to pursue graduate study, it may be necessary to make up undergraduate deficiencies in the area of the desired specialty. Applicants must take the Graduate Record Examinations. Satisfactory scores on the general test are required for admission to full graduate standing in most programs. Consult the department office for further information.

Once the application for admission has been sent, arrangements should be made immediately to have official transcripts of all previous undergraduate and graduate school work forwarded directly to the USC Office of Graduate Admission from the

schools attended. If the Graduate Record Examinations general and subject tests have been taken, the scores should be sent to the Office of Graduate Admission by arrangement with the Educational Testing Service. If the tests have not been taken, the applicant should register to take them on the earliest available date. The departments will review the application files and select for admission those students offering the greatest promise for completing graduate studies.

#### Progressive Degree Programs

The progressive degree program allows qualified undergraduate students the opportunity to complete an integrated program of study joining a bachelor's degree program and a master's degree program in the same or different departments. Applicants for a progressive degree program must have completed 64 units of course work applicable to their undergraduate degree since graduating from high school. (Credit by exam and course work taken prior to high school graduation are excluded). Applicants must submit their application prior to completion of 96 units of course work. Normally, the application is submitted in the fall semester of the third year of enrollment at USC. The application for admission to a progressive master's program must be accompanied by a departmentally approved course plan proposal and two letters of recommendation. All application materials can be obtained from the Viterbi Admission and Student Affairs Office (RTH 110, [viterbi.usc.edu/pdp](http://viterbi.usc.edu/pdp)).

Progressive degree program students must fulfill all the requirements for both the bachelor's degree and the master's degree. The total number of units for the master's degree, however, may be reduced by a maximum of one-third. A minimum of two-thirds of the units required for the master's degree must be at or above the 500 level. Students will be subject to undergraduate academic progress standards and policies while in undergraduate status and master's academic progress standards and policies while in graduate status. The degrees may be awarded separately, but the master's degree will not be awarded before the undergraduate degree. The time limit for completing a progressive degree program is 12 semesters. For more information, refer to page 87.

## General Requirements for the Master of Science

### *Residence Requirements*

The typical time required for earning a Master of Science degree is one and one-half academic years. Students entering the Viterbi School of Engineering with course or credit deficiencies require a correspondingly longer period. A candidate must complete the last four semester units of course work at USC. Up to four transferred units will be accepted from another engineering school upon verification by Degree Progress and with the approval of the major department.

### *Prerequisites*

Prerequisite is a bachelor's degree in engineering, allied fields or science. If the graduate field is different from the field of the bachelor's degree, there may be undergraduate deficiencies assigned by the major department, and these must be made up by taking and passing either the assigned courses or the final examination in these courses before proceeding with the graduate courses.

### *Deficiency Courses*

New students may be required to demonstrate satisfactory preparation for the graduate program with previously completed course work. In cases where preparation is not demonstrated, up to 9 units of deficiency course work may be required in addition to the normal degree requirements.

Credit for required deficiency courses may not be applied toward a graduate degree. A deficiency course within the same discipline taken after the higher level course has been passed will not be available for unit or grade point credit.

### *Placement Examinations*

Enrollment in certain 500- and 600-level courses in the disciplines of computer engineering and electrical engineering will require a student to either take and pass the corresponding 400-level prerequisite at USC, or pass a placement exam in the corresponding course.

Not all 400-level prerequisite courses taken instead of a placement exam are available for degree credit. No unit or grade point credit is given for placement exams. Please consult with an academic adviser or refer to the department Website at [ee.usc.edu](http://ee.usc.edu) for information on specific courses and placement exam details.

### *Grade Point Average Requirements*

A grade point average (GPA) of 3.0 (A = 4.0) is required for the master's degree in all engineering programs. The minimum GPA must be earned on all course work applied toward the master's degree and on all 400-level and above course work attempted at USC beyond the bachelor's degree. A minimum grade of C (2.0) is required in a course to receive graduate credit. Work graded C- or below is not acceptable for subject or unit credit toward any graduate degree. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average.

### *Course Selection*

There are two program options for the master's degree, one with a thesis and the other without. Courses are selected to fit the special needs of individual students, must form an integrated program leading to a definite objective and must be approved in advance by the department. Only courses numbered 400 and above may be applied for degree credit.

### *Program without Thesis*

The minimum requirement is 27 units; 18 of these units must be at the 500 level and at least 18 units must be in the major department and closely related departments. Specific requirements are listed under each department.

### *Program with Thesis*

The minimum requirement is 27 units; four of these units are to be thesis. At least 16 units, not including thesis, must be at the 500 level or higher, and at least 18 units must be in the major department. A total of not less than four nor more than eight units of 590 Directed Research and 594ab Master's Thesis must be included in the program. The minimum thesis requirement in 594a is two units; in 594b, two units.

### *Master's Thesis*

The thesis, when it is required, is regarded as an important part of the work of the candidate for a master's degree. It is not intended to be a piece of highly recondite research, but it must be a serious, considerable and publishable piece of work demonstrating the writer's power of original thought, thorough grasp of the subject matter and ability to present material in a scholarly manner and style.

The thesis presents the results of an investigation of an approved subject in the major department. It is supervised throughout by a thesis committee, appointed by the chair of the student's major department. The committee is usually composed of two members of the major department and one other member of the faculty.

The student will register in courses 594a and b respectively during the final two semesters of the master's program as determined by discussion with an adviser. (Concurrent registration for 594a and b during the same semester is permitted when a student's progress makes completion of all requirements likely within one semester.) If the thesis has not been completed within these two semesters, the candidate must register for 594z each semester until the thesis has been accepted but no additional unit credit will be earned.

A student readmitted to candidacy by petition to the graduate study committee must reregister for 594a and 594b. Final acceptance of the thesis is based upon the recommendation of all members of the thesis committee. For requirements concerning format of master's thesis see the Graduate School section of this catalogue.

Candidates who find it necessary to be excused from registration in 594a or 594b for a semester must formally report before the beginning of the semester to the Viterbi Office of Graduate and Professional Programs that they will be inactive during that semester and request a leave of absence. During a leave of absence a candidate will not be entitled to assistance from the thesis committee or to the use of university facilities. The granting of a leave of absence does not change the candidate's responsibility for meeting the time schedule for the completion of degree requirements. Leave will be granted only under exceptional circumstances.

### *Progress Toward the Degree*

Graduate students are expected to make regular progress toward their degrees as defined by the faculty of their respective departments and within the time limits allowed. Graduate students' progress and performance are reviewed each semester. Students making unsatisfactory progress receive a formal written warning and are placed on a semester of academic warning with specific conditions to be met for continuation in the program. Please refer to catalogue sections Academic Warning and Dismissal of Graduate Students, page 39; Grade Point Average Requirements, page 85; and the Website of the Office of Graduate and Professional Programs (GAPP) at [viterbi.usc.edu/gapp](http://viterbi.usc.edu/gapp).

### *Department Approval for Non-major Courses*

Prior departmental approval is required for non-major courses to be taken and applied toward a graduate degree. Students must consult with the faculty adviser for formal written permission to take courses outside the major department for degree credit.

A copy of the faculty adviser's written approval must be kept in the department file and retained by the student until graduation.

#### *Time Limit*

It is expected that work for a Master of Science in engineering will be completed within a maximum of five calendar years. An academic department may grant an extension of up to one year at a time for a maximum of two years. Courses taken more than seven years prior to the date upon which the degree is to be awarded cannot be included for the degree.

#### *Admission to Candidacy*

Application for admission to candidacy for the Master of Science is a separate step from admission to graduate standing. The requirements for admission to candidacy are: (1) the applicant must be admitted to regular graduate standing and must have removed all undergraduate deficiencies, and (2) the applicant must submit a complete program approved by the major department showing the course work, research and thesis (if required).

Application for graduation should be made at the beginning of the semester in which the requirements for the master's degree are to be completed. Students are strongly advised to file for graduation as soon as the registration process has been completed so that their names may appear in the printed Commencement program and so that any discrepancies in their records may be resolved. Late filing may delay conferral of the degree.

Application forms for graduation with the master's degree may be obtained from the student's academic department. This application should be returned to the student's academic department. Changes in the program after admission to candidacy are made by petition to the graduate study committee.

#### **Second Master's Degree**

A graduate student who already holds a master's degree from USC or another acceptable engineering school in a related field may apply a limited number of previously earned units toward the second master's degree.

The maximum number of units allowed for transfer is four. In all cases, permission of the chair of the major department is required. All credit, including the units from the first master's degree, must be earned within seven calendar years.

#### **General Requirements for the Master of Engineering Degree**

The Viterbi School does not currently offer degree programs with the Master of Engineering designation.

#### **General Requirements for the Engineer Degree**

The Engineer degree is awarded under the jurisdiction of the Viterbi School of Engineering. This degree is granted upon completion of a comprehensive curriculum beyond the general course requirements for the Master of Science and after successfully passing an engineer's qualifying examination. The required curriculum is intended to give students broad preparation in two areas of engineering, together with a minimum number of units in these areas to prepare them for the interdisciplinary nature of the many complex problems they will encounter in practice today. The degree is also intended to fulfill a growing need in industry for students with comprehensive advanced engineering training, but not necessarily with the research orientation developed by the Ph.D. student.

The Engineer degree is a terminal degree. Students who complete the Engineer degree will not be considered for admission to the Ph.D. program.

The Engineer degree is offered in aerospace engineering, astronautical engineering, chemical engineering, civil engineering, electrical engineering, environmental engineering, industrial and systems engineering, mechanical engineering, petroleum engineering and materials science.

#### *Prerequisites*

There are three basic prerequisites for the Engineer Degree Program: a Master of Science degree or completion of 27 units of acceptable course work, application for admission to the Viterbi School of Engineering and acceptance to the program by the appropriate department.

#### *Course Requirements*

The Engineer degree requires a minimum of 30 units of graduate course work beyond the Master of Science degree; up to 6 units at the 400 level may be counted at the discretion of the student's guidance committee if the committee finds them necessary for the student's program. The course work must form a balanced program of study leading to a definite concentration in two fields of engineering, a minimum of 12 units in one field, nine in another; nine units are elective and may be taken outside the Viterbi School of Engineering, but must be acceptable for graduate credit. The distribution of course work will be governed by the student's guidance committee and should be considered in conjunction with the course work done for the Master of Science degree. A candidate for the Engineer degree may substitute a project under the supervision of a faculty member for 6 units of course work. In order to have the project credited toward the degree, the student must register in 690 Directed Research during the course of the

project; total 690 Directed Research registration should be 6 units. A student wishing to work on a project must make arrangements with a member of the faculty to supervise and evaluate work, and obtain the approval of the committee chair prior to completing more than 15 units of course work. In many cases the project may be related to the candidate's work outside the university but must still be supervised by a faculty member. Distribution of the course work should take into account the nature of the project.

#### *Grade Point Average Requirement*

A minimum grade point average of 3.0 must be earned on all course work applied toward the Engineer degree. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree. A minimum grade of C (2.0) is required in a course to receive graduate credit. Work graded C- or below is not acceptable for subject or unit credit toward any graduate degree. Transfer units count as credit (CR) toward the Engineer degree and are not computed in the grade point average.

#### *Residence Requirements*

A candidate must complete the last four units of course work at USC. At least 26 units must be taken in residency at USC. A maximum of four transfer units not counted toward a previous degree may be allowed with adviser approval.

#### *Guidance Committee*

After being granted graduate standing the student must form a guidance committee. The committee is made up of three full-time faculty members who are specialists in the student's areas of concentration, with at least two from the major department. Forms for appointment of the committee are available from the student's academic department. The student is responsible for finding a faculty member from one area of concentration who will act as the chair of the guidance committee. The chair will assist in selection of the other members. Advisement of the student after formation of the committee will be by the committee chair.

#### *Qualifying Examination*

The student must satisfactorily complete an engineer's qualifying examination administered by his or her guidance committee. This examination will cover both areas of concentration and will consist of at least one written and one oral examination. This examination is normally taken during the last semester of course work toward the degree. Students who choose to take the examination in the semester following the completion of course requirements may do so up until the end of the third week of classes without registering. After that date they must register for GRSC 810 to maintain continuous enrollment in

the program. Results of the examination are reported to the Viterbi Office of Graduate and Professional Programs and forwarded to the Office of Academic Records and Registrar.

#### *Transfer Credits*

Up to four units of graduate course work may be transferred from an accredited institution to be applied toward the Engineer degree. Transfer work must have been done after receipt of the Master of Science degree and must be approved by the guidance committee.

#### *Reserving Course Credit*

A student who receives the Master of Science degree at USC may reserve a limited number of units taken prior to the receipt of the Master of Science degree for credit toward the Engineer degree. To reserve credit, the course must have been taken during the last semester as a Master of Science candidate, not used toward the Master of Science degree, be acceptable to the student's committee, and approved by petition to the graduate study committee of the Viterbi School of Engineering.

#### *Time Limit*

The student must complete all requirements within five calendar years.

#### *Admission to Candidacy*

After satisfactorily completing the qualifying examination, and no later than the beginning of the last semester of course work, the student must file for candidacy. This is a separate and distinct step which sets forth the entire academic program fulfilling the degree requirements and is used as a working basis for awarding the degree.

### **General Requirements for the Doctor of Philosophy**

This degree is granted under the jurisdiction of the USC Graduate School. Students should also refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School.

Thirteen Doctor of Philosophy (Ph.D.) programs are offered: aerospace engineering, astronautical engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering, computer science, electrical engineering, engineering (environmental engineering), industrial and systems engineering, materials science, mechanical engineering and petroleum engineering.

#### *Deficiency Courses*

New students may be required to demonstrate satisfactory preparation for the graduate program with previously completed course work. In cases where preparation is not

demonstrated, up to 9 units of deficiency course work may be required in addition to the normal degree requirements.

Credit for required deficiency courses may not be applied toward a graduate degree. A deficiency course within the same discipline taken after the higher level course has been passed will not be available for unit or grade point credit.

#### *Placement Examinations*

Enrollment in certain 500- and 600-level courses in the disciplines of computer engineering and electrical engineering will require a student to either take and pass the corresponding 400-level prerequisite at USC, or pass a placement exam in the corresponding course.

Not all 400-level prerequisite courses taken instead of a placement exam are available for degree credit. No unit or grade point credit is given for placement exams. Please consult with an academic adviser or refer to the department Website at [ee.usc.edu](http://ee.usc.edu) for information on specific courses and placement exam details.

#### *Foreign Language Requirements*

There is no foreign language requirement for engineering majors.

#### *Course Requirements*

Satisfactory completion of at least 60 units of approved graduate level course work with a cumulative grade point average of at least 3.0 is required of all Ph.D. students in engineering. A minimum grade of C (2.0) is required in a course to receive graduate credit. Work graded C- or below is not acceptable for subject or unit credit toward any graduate degree. Undergraduate prerequisites and graduate course work will be required in accordance with the regulations of the major department or program and the recommendations of the student's guidance committee. Transfer units are subject to approval by the Office of Degree Progress (for course work taken at institutions in the U.S.) or by the Office of Graduate Admission (for course work taken at institutions outside the United States) and by the guidance committee.

#### *Screening Procedure*

The original admission decision admitting a student to the Ph.D. program is based on the student's previous academic records, Graduate Record Examinations scores and other evidence of scholastic abilities indicating promise for completing graduate studies. It is also a prerequisite that all Ph.D. students successfully complete the screening procedures designated by the department. These usually consist of a written and an oral examination administered by the faculty. Students who fail

the screening procedure will be advised that they are not recommended to continue in the Ph.D. program and that any additional work may not be counted toward the degree.

#### *Guidance Committee*

The Ph.D. student's program of study is supervised by the guidance committee, which is formed immediately after passing the screening examination. The committee consists of five tenure-track faculty members, four from the major department and one from outside the department. Reporting the screening procedures and forming the guidance committee are accomplished by filing the appropriate forms obtainable from the Graduate School Website, [usc.edu/schools/GraduateSchool](http://usc.edu/schools/GraduateSchool).

#### *Qualifying Examinations*

The qualifying examinations are taken during the last semester of the second year of graduate study or, at the latest, in the fifth semester or equivalent. The Request to take the Qualifying Examinations must be filed in the semester prior to taking the examinations and at least 30 days before beginning the examinations. The examinations are intended to determine the extent of the student's knowledge in basic science and engineering areas as well as the ability to do original and scholarly research. The guidance committee decides the nature of the qualifying examinations (both oral and written portions) according to the policies applicable in each department.

The examinations may be scheduled at any time during the semester provided that all members of the committee are available to administer them. All portions of the examinations must be completed within 60 days. After passing the qualifying examinations the Ph.D. student is admitted to candidacy by the Dean of Graduate Studies and the dissertation committee is established. After this step students will normally engage in at least one year of full-time graduate study and research on campus.

#### *Doctoral Dissertation*

An acceptable dissertation based on original investigation and supervised directly by the dissertation committee is required. The dissertation must show mastery of a special field, capacity for independent research and a scholarly result. Candidates are expected to keep all members of the dissertation committee informed of their progress at all stages of the dissertation.

#### *Defense of the Dissertation*

After satisfactorily meeting all other requirements and after the research and writing of the dissertation are substantially complete, the Ph.D. candidate must pass a general final oral examination devoted to the major

field and to the topic of the dissertation. The examination will be conducted in such a manner as to determine to the satisfaction of the dissertation committee that the candidate has attained the stage of scholarly advancement and power of investigation demanded by the university for final recommendation to the doctorate. The faculty are invited to attend and to participate in the final oral examination. However, only the dissertation committee may vote. Unanimous approval of the committee is required for the student to upload the dissertation to the Graduate School.

#### *Departmental Requirements*

The requirements and regulations set forth in this portion of the catalogue are to be construed as the minimal requirements only as established by the Graduate School. In addition, students must meet all the requirements established by their department.

#### *Progress Toward the Degree*

Graduate students are expected to make regular progress toward their degrees as defined by the faculty of their respective departments

and within the time limits allowed. Graduate students' progress and performance are reviewed each semester. Students making unsatisfactory progress receive a formal written warning and are placed on a semester of academic warning with specific conditions to be met for continuation in the program. Please refer to catalogue sections Academic Warning and Dismissal of Graduate Students, page 39; Grade Point Average Requirements, page 85; and the Website of the Office of Graduate and Professional Programs (GAPP) at [viterbi.usc.edu/gapp](http://viterbi.usc.edu/gapp).

## Special Educational Opportunities

### **Distance Education Network**

Established in 1972, the USC Viterbi School of Engineering's Distance Education Network (DEN) is a pioneer in the distance learning arena, using cutting-edge technology to enable professional engineers to take USC engineering courses for graduate degree credit without coming to the campus. Today, over 1,300 DEN students, enrolled around the world, are pursuing over 45 degree programs – more choices than at any other research university. DEN breaks down geographical and scheduling barriers, allowing students to take classes anytime and anywhere. Remote DEN students receive support from administrative and technical staff and enjoy access to all things the Viterbi School has to offer.

The Viterbi School has made it possible for all on-campus students enrolled in the school's graduate courses to receive free access to the archived lectures of courses offered via DEN. This valuable study aid enables students to review lectures throughout the semester.

For more information, visit [viterbi.usc.edu/gapp](http://viterbi.usc.edu/gapp).

### **Graduate Certificate in Engineering Technology Commercialization**

The graduate certificate in engineering technology commercialization provides USC engineers with the knowledge, skill set and confidence to manage intellectual property and technology innovation and enables them to connect with colleagues in industry and venture capital to address real-world problems through technology transfer and commercialization. This certificate program provides an opportunity for graduate students to understand the process of evaluating the feasibility of their ideas and inventions and the confidence to commercialize their ideas. It also provides an opportunity for practicing engineers to obtain an academically rigorous foundation of technology commercialization which drives their company. The program is interdisciplinary in nature, requiring courses from both the business and engineering schools and providing education in the economic, technological and management aspects of commercializing new engineering ideas.

Applicants to this program are expected to have a degree in engineering or science from an accredited institution, an undergraduate GPA of at least 3.0 on a 4.0 scale, and a score

of at least 650 on the quantitative portion and 400 on the verbal portion of the GRE test.

A total of 12 units is required for the certificate.

REQUIRED CORE COURSES (6 UNITS)		UNITS
BAEP 551	Introduction to New Ventures	3
ISE 585	Strategic Management of Technology	3
ELECTIVE COURSES (6 UNITS)		UNITS
ISE 515	Engineering Project Management	3
ISE 517	Modern Enterprise Systems	3
ISE 527	Quality Management for Engineers	3
ISE 544	Management of Engineering Teams	3
ISE 555	Invention and Technology Development	3
ISE 565	Law and Finance for Engineering Innovation	3

## Engineering

The courses listed in the following section have been designed for specific groups of students for various purposes as indicated in the course descriptions. Certain courses have restrictions related to their applicability for degree credit. Students should consult the academic adviser in the major department for further information.

## Courses of Instruction

### ENGINEERING (ENGR)

**ENGR 100abcd Engineering Honors Colloquium (1-1-1-1)** Recent developments in a highly technological society with emphasis on selected topics. Enrollment limited to members of the Viterbi School of Engineering Honors Program. Graded CR/NC.

**ENGR 101 Introduction to Engineering (3, Fa)** Gateway to the majors and minors in engineering. Introduction to engineering disciplines. Historical and current trends in engineering; ethical and societal factors in engineering solutions. Hands-on design experiences; field trips; USC laboratory tours.

**ENGR 102 Engineering Freshman Academy (2, Fa)** Introduction to the profession of engineering. Ethical, political and societal consequences of engineering innovations and the impact of engineering on everyday life. Team project and guest lectures. Open to freshmen only. Graded CR/NC.

**ENGR 150L Engineering Science and Systems: From Humans to Robots (3, Fa)** Hands-on multidisciplinary engineering course that uses robotics as a theme to cover material from all areas of engineering. Laboratory; programming; team projects; end-of-semester exhibition. Open only to freshmen. *Recommended preparation:* Basic programming experience (e.g., C, C++, C#, Java, Python).

**ENGR 301 Technical Entrepreneurship (3)** (Enroll in BUAD 301)

**ENGR 305 Engineering Biology Matters (3, Fa)** Engineering students will learn biological phenomena in the context of engineering principles and explore biological mechanisms and processes as analogies for designing engineered systems. *Recommended preparation:* CHEM 105aL, MASC 110L.

**ENGR 345 Principles and Practices of Global Innovation (3, Sp)** Learner-centered, cross-cultural, technology-enabled approaches to principles and industrial practices leveraging cultural diversity to inspire innovations for competitive global markets. Requires an extended semester of 22 weeks, including 2-week overseas project in early summer.

**ENGR 395abcdx Cooperative Education Work Experience (1 or 2, max 5)** Supervised work experience in a professional environment related to a specific degree program, academic level, and career objective. Acceptance into Cooperative Education Program required. Graded IP/CR/NC. Degree credit by departmental approval.

**ENGR 400 Engineering Honors Project (1-3, max 12, FaSpSm)** Supervised interdisciplinary studies and projects. Enrollment limited to members of the Viterbi School of Engineering Honors Program. Graded CR/NC.

**ENGR 493x Dean's Seminar in Entrepreneurship (2, Sp)** Overview of starting and developing a new business. Discussions with successful business leaders and entrepreneurs. Not available for students admitted to the Entrepreneur Program. Open only to seniors or graduate students in business or engineering. Graded CR/NC. (Duplicates credit in former BUAD 493x.)

**ENGR 499 Special Topics (2-4, max 8)** Current developments in the field of engineering.

**ENGR 501x Engineering Writing and Communication for Master's Students (3, FaSp)** Academic and discipline-specific writing skills. Emphasis on structure of discourse and writing process. Presentation and oral communication skills also addressed. Graded CR/NC. Credit Restrictions: May be taken for degree credit only toward M.S. degrees in Industrial and Systems Engineering; Engineering Management; Manufacturing Engineering and Entrepreneurship; Operations Research Engineering; and the Master of Engineering in Environmental Quality Management.

**ENGR 502x Writing Skills for Engineering Ph.D. Students (3, FaSp)** Writing of engineering curriculum- and research-related projects for Ph.D. students. Focus is on conference papers, dissertations and proposals, journal articles, and other forms. Graded CR/NC. Not available for degree credit for the master's degree.

**ENGR 503x Oral Communication Skills for Engineering Ph.D. Students (3, FaSp)** Academic and professional presentation skills for Ph.D. students. Preparation for qualifying exams, conference paper presentations, and other forms of oral communication. Use of visual aids and poster displays included. Graded CR/NC. Not available for degree credit for the master's degree.

**ENGR 504x Fellowship Proposal Writing for Engineering Ph.D. Students (2, FaSp)** Preparation of essays and other materials for research fellowship applications. Graded CR/NC. Open only to Ph.D. engineering students. Not available for degree credit.

**ENGR 596 Internship in Engineering (1, max 3, FaSpSm)** Part-time or full-time, practical work experience in the student's field of study. The internship must be located at an off-campus facility. Students are individually supervised by faculty. May not be taken until the student has completed at least one semester of enrollment in the graduate program. Graduate standing in engineering. Graded CR/NC.

**ENGR 599 Special Topics (2-4, max 9)** Current developments in the field of engineering; topics to be selected each semester.

## Aerospace and Mechanical Engineering

**Aerospace Engineering Headquarters:**  
**Robert Glenn Rapp Engineering Research**

*Chair:* Geoffrey R. Spedding, Ph.D.\*

### Faculty

*Philip and Cayley MacDonald Early Career*  
*Chair:* Andrea Hodge, Ph.D.

*Northrop Chair in Engineering:* Hai Wang, Ph.D.

*Arthur B. Freeman Professor of Engineering:*  
 E. Phillip Muntz, Ph.D.\*\* (Radiology)

*Gordon S. Marshall Professor of Engineering*  
*Technology:* Roger Ghanem, Ph.D. (Civil and Environmental Engineering)

*Smith International Professor of Mechanical*  
*Engineering:* Tony Maxworthy, Ph.D.\*\*

*Zohrab A. Kaprielian Fellow in Engineering:*  
 Eva Kanso, Ph.D.

*Professors:* Charles Campbell, Ph.D.; Julian Domaradzki, Ph.D.\*\*; Marijan Dravinski, Ph.D.; Fokion Egofoopoulos, Ph.D.\*; Henryk Flashner, Ph.D.; Roger Ghanem, Ph.D. (Civil and Environmental Engineering); Yan Jin, Ph.D.; Michael E. Kassner, Ph.D. (Materials Science); Tony Maxworthy, Ph.D.\*\*; E. Phillip Muntz, Ph.D.\*\* (Radiology); Paul K. Newton, Ph.D.; Larry G. Redekopp, Ph.D.\*; Paul Ronney, Ph.D.; Satwinder S. Sadhal, Ph.D.; Geoffrey Spedding, Ph.D.\*; Firdaus E. Udawadia, Ph.D. (Civil and Environmental Engineering, Information and Operations Management, Systems Architecting Engineering and Mathematics); Hai Wang, Ph.D.; Bingen Yang, Ph.D.

*Associate Professors:* Eva Kanso, Ph.D.; Denis Phares, Ph.D.; Geoffrey R. Shiflett, Ph.D.\*

*Assistant Professors:* Veronica Eliasson, Ph.D.; Andrea Hodge, Ph.D.

*Associate Professor of Engineering Practice:*  
 M. Oussama Safadi, Ph.D.\*

*Research Associate Professor:* Adam Fincham, Ph.D.

*Research Associate:* Anita Penkova, Ph.D.

*Joint Appointments:* Daniel Erwin, Ph.D.\* (Aeronautics); Mike Gruntman, Ph.D. (Aeronautics); Petros Ioannou, Ph.D. (Electrical Engineering — Systems); Berok Khoshnevis, Ph.D. (Industrial and Systems Engineering); Joseph Kunc, Ph.D. (Aeronautics, Physics); Stephen C-Y Lu, Ph.D. (Industrial and Systems Engineering); Sami F. Masri, Ph.D. (Civil and Environmental Engineering); Steven Nutt, Ph.D. (Materials Science); Constantinos Sioutas, Ph.D. (Civil and Environmental Engineering); Costas Synolakis, Ph.D. (Civil and Environmental Engineering); Francisco Valero-Cuevas, Ph.D. (Biomedical Engineering)

*William E. Leonhard Professor of Engineering Emeritus:* Terence G. Langdon, Ph.D., D.Sc.\*\* (Materials Science and Geological Sciences)

*Emeritus Professors:* Ron Blackwelder, Ph.D.\*; Fred Browand, Ph.D.; Melvin Gerstein, Ph.D.; Clarke Howatt, M.S.; S. Lampert, Ph.D.; Robert Mannes, M.S., P.E.\*; Donald E. Shemansky, Ph.D.

\*Recipient of university-wide or school teaching award.

\*\*Recipient of university-wide or school research award.

*Mechanical Engineering Honor Society:* Pi Tau Sigma

*Aerospace Engineering Honor Society:* Sigma Gamma Tau

## Degree Requirements

### Educational Program Objectives

The undergraduate programs in Aerospace and Mechanical Engineering endeavor to prepare students to achieve the following objectives:

(1) Graduates will be professionals working in engineering or in related areas such as computer science, business, law, medicine or public service, at both large- and small-scale businesses.

(2) Graduates will engage in lifelong learning, such as continuing their education through graduate school or professional development courses.

(3) Graduates will make use of modern and cutting-edge tools, such as advanced computer software and state-of-the-art laboratory equipment.

(4) Graduates will be both competent technical innovators and industrial leaders.

(5) Graduates will incorporate societal, ethical and environmental considerations into technical decisions.

(6) Graduates will effectively communicate and work with persons and teams of diverse technical and non-technical backgrounds.

## Aerospace Engineering Degrees

### Bachelor of Science in Aerospace Engineering

The requirement for this degree is 130 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied towards the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees section, page 579.

COMPOSITION/WRITING REQUIREMENT		UNITS
WRIT 130	Analytical Writing	4
WRIT 340	Advanced Writing	3

GENERAL EDUCATION (SEE PAGE 63)		UNITS
General education <sup>+</sup>		20

----------	-------------------------------------	---

MAJOR ELECTIVES		UNITS
-----------------	--	-------

AME core electives**		3
Technical electives***		6

Total units:		130
--------------	--	-----

\*Satisfies GE Category III requirement.

\*\*Any upper division AME courses.

\*\*\*Technical electives consist of (1) any upper division course in engineering except CE 404, CE 412 and ISE 440, or (2) an upper division course in chemistry, physics or mathematics and MATH 225. No more than 3 units of 490 Directed Research course work can be used to satisfy the technical elective requirement.

<sup>+</sup>The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

### Minor in Engineering Technology Commercialization

See listing in the Special Educational Opportunities section, page 581.

### Master of Science in Aerospace Engineering

In addition to the general requirements listed in this catalogue, the department has identified requirements in the following areas of specialization: aerodynamics/fluid dynamics; aerospace controls; aerospace design; aerospace structures; computational fluid dynamics; hypersonics/kinetics of gases and plasmas; propulsion; and space science. Core requirements and elective requirements are defined for each area of specialization. Information on the current approved courses that comprise these core and elective requirements is available from the department.

### Master of Science, Aerospace and Mechanical Engineering (Computational Fluid and Solid Mechanics)

The program prepares students for professional careers in engineering companies that develop products using computational tools of fluid and solid mechanics. The program also provides the necessary background for pursuing higher degrees, Engineer and Ph.D., in aerospace and mechanical engineering with specializations in computational fluid mechanics, computational solid mechanics and computational heat transfer. The degree course work provides a necessary background in basic aerospace and mechanical engineering disciplines (solid mechanics, fluid mechanics, heat transfer), engineering mathematics and numerical methods. The capstone project courses, AME 535b and CE 551, provide practical examples using existing numerical programs to simulate structures, heat transfer and fluid flows as well as commercial mathematical packages for analyzing data.

Admission requirements follow the general admission rules for aerospace and mechanical engineering graduate programs. The program requires completion of a minimum of 27 units and a cumulative GPA of at least 3.0 for graduation. The program with thesis requires 28 units, four of which are thesis units.

REQUIRED CORE COURSES (24 UNITS)		UNITS
----------------------------------	--	-------

AME 404	Computational Solutions to Engineering Problems	3
AME 509	Applied Elasticity, or	
CE 507	Mechanics of Solids I	3
AME 525	Engineering Analysis	3
AME 526	Engineering Analytical Methods	3
AME 530a	Dynamics of Incompressible Fluids	3
AME 535a	Introduction to Computational Fluid Mechanics	3
AME 535b	Introduction to Computational Fluid Mechanics, or	
CE 551	Computer-Aided Engineering Project	3
CE 529a	Finite Element Analysis	3

Selected technical electives from the following list or other electives approved by a graduate adviser: 3 units.

TECHNICAL ELECTIVES		UNITS
AME 511	Compressible Gas Dynamics	3
AME 516	Convection Processes	3
AME 590	Directed Research	1-12
AME 599	Special Topics	2-4, max 9
ASTE 545	Computational Techniques in Rarefied Gas Dynamics	3
CE 529b	Finite Element Analysis	3
CE 541a	Dynamics of Structures	3
CE 542	Theory of Plates	3

One core class requirement may be waived at the discretion of a graduate adviser if a student documents that he or she completed or is enrolled in an equivalent course. The waived class must be replaced by a technical elective. Credit for one course of not more

than 4 units from another accredited institution may be approved by a graduate adviser. The Master's Thesis (4 units) may be substituted for a technical elective class (3 units).

#### Master of Science in Product Development Engineering

See the listing under Product Development Engineering, page 679.

#### Master of Science in Systems Architecting and Engineering

See the listing under Systems Architecting and Engineering, page 682.

#### Engineer in Aerospace Engineering

Requirements for the Engineer in aerospace engineering are the same as the general requirements. Three to 6 of the units required for the degree must be AME 690. Prior approval must be obtained from the guidance committee before registration in AME 690.

#### Doctor of Philosophy in Aerospace Engineering

The Doctor of Philosophy with a major in aerospace engineering is also offered. See general requirements for graduate degrees.

#### Graduate Certificate in Engineering Technology Commercialization

See listing in the Special Educational Opportunities section, page 586.

## Mechanical Engineering Degrees

The department offers a Bachelor of Science degree in Mechanical Engineering. Additionally, petroleum engineering exists as an emphasis within the mechanical engineering program. An area of emphasis appears in parenthesis after the primary major name on the transcript.

#### Bachelor of Science in Mechanical Engineering

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied towards the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees section, page 579.

AME 441aL	Senior Projects Laboratory	3
AME 443L	Control Systems Laboratory	3
AME 451	Linear Control Systems I	3

*Petroleum Engineering*

PTE 461	Formation Evaluation	3
PTE 463L	Introduction to Transport Processes in Porous Media	3
PTE 464L	Petroleum Reservoir Engineering	3
PTE 465L	Drilling Technology and Subsurface Methods	3
Total units:		128

\*Satisfies GE Category III requirement.

\*\*Any upper division course in AME.

<sup>+</sup>The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

**Minor in Music Recording**

A minor in music recording is offered through the Thornton School of Music to provide undergraduate students with the background necessary to enter the field of recording engineering and to familiarize them with the design needs of modern recording equipment. The minor is recommended to mechanical engineering majors with extensive musical training who would like to combine their technical and musical abilities while learning the engineering applications of physical and mathematical principles to the art of music recording. See the listing under the USC Thornton School of Music, page 817.

**Master of Science in Mechanical Engineering**

Requirements for the Master of Science in mechanical engineering are the same as set forth in the general requirements. Six of the required units must be in AME 525 and AME 526 or courses in engineering analysis approved in advance in writing by the Department of Mechanical Engineering.

The specific sequence of courses that constitutes an acceptable program must be approved in advance.

*Requirements for Graduation Without Thesis*, 27 units total with 3.0 GPA: AME 525 and AME 526 or approved mathematics (6); 500 level courses in major department (12); approved 400 or 500 level courses (9).

*With Thesis*, 27 units total with 3.0 GPA: AME 525 and AME 526 or approved mathematics (6); 500 or 600 level courses in major department (12) not including thesis; maximum AME 594ab — thesis (4); approved 400 or 500 level units (5) (a maximum total of 8 units combining AME 590 and AME 594ab).

*Recommended Programs of Study*

The program of study depends upon the student's interest and background. During the first semester at USC, students must consult with a departmental faculty adviser in the area of concentration and draw up a plan of study, which must be approved by the adviser. Besides the common requirements, listed below are several areas in mechanical engineering with specific courses identified as core and core electives. Groups of courses in other combinations and from other departments within the university may be approved if a particular coordinated interest can be demonstrated. In some instances students whose background is not in mechanical engineering may be required to take additional course work.

*Common Requirements*

Engineering Analysis (6 units): AME 525, AME 526

Engineering electives (3-6 units): Approved 400-, 500- or 600-level courses

*Engineering Design*

Core courses (9 units): AME 503, AME 505, AME 509

Core electives (6 units): Two courses from AME 404, AME 527, AME 541, ASTE 520, ASTE 523, CE 529, SAE 549

*Thermal and Fluid Sciences*

Core courses (12 units): Four courses from one of the selected areas:

*Combustion*: AME 436, AME 513, AME 514, AME 530a

*Fluid Dynamics*: AME 457, AME 511, AME 530a, AME 535a

*Heat Transfer*: AME 457, AME 515, AME 516, AME 517

Core electives (6 units): Take two courses from the following list, not duplicating the above selection: AME 436, AME 457, AME 511, AME 513, AME 514, AME 515, AME 516, AME 517, AME 530a, AME 533, AME 535a, AME 535b, AME 537

*Mechanics and Materials*

Core courses (12 units): AME 509, AME 559, AME 560, AME 584

Core elective (3 units): One of AME 542, AME 588, CE 529a

*Microelectromechanical Systems (MEMS)*

Core courses (12 units): AME 455, AME 537, BME 551, EE 607

Core elective (3 units): One of AME 535a, ASTE 501a, ASTE 545

*Dynamics and Control*

Students interested in this area may follow the M.S., Aerospace and Mechanical Engineering (Dynamics and Control) described below.

**Master of Science in Mechanical Engineering (Nuclear Power)**

The program offers the degree of Master of Science in mechanical engineering with specialization in nuclear power. It is structured so that students who have all the prerequisites can complete the entire program through distance education. It is intended for students with an undergraduate degree in engineering. However, students with a physics and/or chemistry background can be accommodated with the completion of certain prerequisites.

*Courses*

FUNDAMENTAL		UNITS
AME 525	Engineering Analysis	3
AME 526	Engineering Analytical Methods	3
CORE		
AME 534	Nuclear Thermal-Hydraulics	3
AME 581	Introduction to Nuclear Engineering	3
AME 582	Nuclear Reactor Physics	3
AME 583	Effects of Radiation on Health	3
CE 571	Nuclear Safety and Security: Human Performance and Safety Culture	3
ELECTIVES — CHOOSE 6 UNITS		
AME 457	Engineering Fluid Dynamics	3
AME 515	Advanced Problems in Heat Conduction	3

AME 516	Convection Processes	3
AME 517	Radiation Heat Transfer	3
AME 530a	Dynamics of Incompressible Fluids	3
AME 530b	Dynamics of Incompressible Fluids	3
AME 533	Multi-Phase Flows	3
AME 535a	Introduction to Computational Fluid Mechanics	3
AME 577	Survey of Energy and Power for a Sustainable Future	3
AME 578	Modern Alternative Energy Conversion Devices	3
CHE 502	Numerical Methods for Diffusive and Convective Transport	3
EE 526	Renewable Energy in Power Systems	3
ENE 516	Hazardous Waste Management	3
Total units:		27

**Master of Science in Mechanical Engineering (Energy Conversion)**

See Sustainable Infrastructure Systems, page 680.

**Master of Science in Aerospace and Mechanical Engineering (Dynamics and Control)**

The Master of Science with emphasis in dynamics and control educates and trains multidisciplinary professionals in the modeling, analysis, simulation and control of complex time-evolutionary systems. It is a program of study that encompasses advanced analytical dynamics, nonlinear dynamical systems, linear and nonlinear dynamics and vibrations, and linear and nonlinear control.

The program equips students to apply their knowledge to a variety of complex systems encountered in nature and society, especially those in civil, mechanical and aerospace engineering and applied mechanics.

Students will be given advisement in the first semester of their study. In addition to AME 525 and AME 526, students are required to take the following core courses: AME 521, AME 522, AME 524, AME 541, AME 552. Elective courses can be chosen in areas of specific interest to the student such as orbital dynamics, spacecraft control, aircraft dynamics and control, chaos and chaotic dynamics, random vibrations, computer control of mechanical systems and robotics. The program provides the graduate student with a broad, well-rounded, advanced education that can be applied to many specific, technologically advanced fields in which dynamics and control play a pivotal role.

**Master of Science in Aerospace and Mechanical Engineering (Computational Fluid and Solid Mechanics)**

See listing under Aerospace Engineering Degrees, page 589.

**Engineer in Mechanical Engineering**

Requirements for the Engineer in Mechanical Engineering degree are the same as set forth in the general requirements. Six of the units required for the degree must be AME 690. Prior approval must be obtained from the committee before registration in AME 690.

**Doctor of Philosophy in Mechanical Engineering**

The Doctor of Philosophy in mechanical engineering is also offered. See general requirements for graduate degrees.

## Courses of Instruction

**AEROSPACE AND MECHANICAL ENGINEERING (AME)**

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**AME 101L Introduction to Mechanical Engineering and Graphics (3, Fa)** Gateway to the bachelor of science degree in mechanical engineering. Introduction to mechanical engineering disciplines and practice; graphical communication and layout of machine parts; introduction to computer-aided drafting and drawing.

**AME 105 Introduction to Aerospace Engineering (4, Fa)** Gateway to the Aerospace Engineering major. Introduction to flight vehicle performance and propulsion. Elements of the physics of gases. Laboratory: computers and graphics; model rocket and glider test flights.

**AME 150L Introduction to Computational Methods (4, Sp)** Computer programming; organization of problems for computational solution; introduction to software for computation and graphics; applications to engineering problems. *Corequisite:* MATH 125.

**AME 201 Statics (3, FaSp)** Analysis of forces acting on particles and rigid bodies in static equilibrium; equivalent systems of forces; friction; centroids and moments of inertia; introduction to energy methods. *Prerequisite:* MATH 125; *recommended preparation:* AME 101, PHYS 151L.

**AME 204 Strength of Materials (3, FaSp)** Stress, strain and deflection of mechanical elements due to tension, shear, bending, or torsion; combined loads; energy methods, statically indeterminate structures; strength-based design. *Prerequisite:* AME 201 or CE 205.

**AME 222 Fundamentals of Audio Engineering (3, Fa)** (Enroll in EE 222)

**AME 231L Mechanical Behavior of Materials (3, Sp)** Material properties of metals, ceramics, and composites; stress-strain relationships; microstructural characteristics; fracture, fatigue, and creep; effects of processing. *Corequisite:* AME 204.

**AME 261 Basic Flight Mechanics (4, Sp)** Performance of flight vehicles; maximum speed, rate-of-climb, range, and endurance; basic stability and control, weight, and balance; computer exercises. *Recommended preparation:* AME 150L.

**AME 291 Undergraduate Design Projects I (1, max 4, FaSp)** Analysis, design, fabrication, and evaluation of devices intended for entry in local and national design competitions. Intended for lower division students or those with little prior project experience. Graded CR/NC.

**AME 301 Dynamics (3, FaSp)** 2-D and 3-D kinematics and dynamics of particles and rigid bodies; systems of particles and rigid bodies; coupled rigid bodies; introduction to vibrations. *Prerequisite:* AME 201 or CE 205; *recommended preparation:* PHYS 151L.

**AME 302 Dynamic Systems (3, Fa)** Modeling of lumped parameter elements and systems; free and forced response of first and second order systems; design oriented approach to dynamic systems. *Corequisite:* MATH 245; AME 309 or CE 309; AME 301 or CE 325.

**AME 303 Dynamics of Machinery (3, Sp)** Kinematics and dynamics of machines; balancing of rotating and reciprocating machinery; gyroscopic effects; critical speeds; energy variation in machinery; introduction to mechanism design. *Prerequisite:* AME 301 or CE 325.

**AME 305 Mechanical Design (3, Fa)** Design and analysis of mechanical elements including shafts, bearings, springs, screws, belts and gears; strength, fatigue and deflection considerations in machine design. *Prerequisite:* AME 204 or CE 225.

**AME 308 Computer-Aided Analysis for Aero-Mechanical Design (3, FaSp)** Introduction to the finite element method; practical application of computer analysis tools for structural Analysis and design. *Recommended preparation:* MATH 245.

**AME 309 Dynamics of Fluids (4, FaSp)** Fluid statics; conservation of mass, momentum, and energy in integral and differential form; applications. Laminar and turbulent pipe flow; compressible flow; potential flow over bodies. *Recommended preparation:* AME 310.

**AME 310 Engineering Thermodynamics I (3, FaSp)** Fundamental laws of thermodynamics applied to actual and perfect gases and vapors; energy concepts, processes, and applications. *Prerequisite:* MATH 226; *recommended preparation:* PHYS 151L, high-level programming language.

**AME 312 Engineering Thermodynamics II (3, Sp)** Application of thermodynamic principles to fluid flow, power cycles, and refrigeration. *Prerequisite:* AME 310; *recommended preparation:* high-level programming language.

**AME 331 Heat Transfer (3, Sp)** General principles underlying heat transfer by conduction, convection, and radiation; steady flow and transient flow. *Prerequisite:* AME 310; *corequisite:* AME 309 or CE 309.

**AME 341abL Mechoptronics Laboratory I and II (3-3, FaSp)** A coordinated laboratory and lecture sequence on aeromechanical instrumentation and device control stressing the symbiotic integration of mechanical, optical and electronic components. *Prerequisite:* PHYS 152L, MATH 126.

**AME 353 Aerospace Structures I (3, Irregular)** Shear and bending in symmetrical and unsymmetrical sections; torsion, column, and thin sheet analysis and design, including plastic failures and open section crippling.

**AME 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**AME 403 Stress Analysis (3, Sp)** Theories of failure, shear center, unsymmetrical bending, curved beams, torsion of non-circular sections; cylinders, rotating discs, thermal stresses, inelastic strains, energy methods. *Prerequisite:* AME 204.

**AME 404 Computational Solutions to Engineering Problems (3, Fa)** Mathematical aspects of the solutions to typical advanced mechanical engineering problems. Modeling, simulation, computational aspects, computer solutions, and computational tools. *Recommended preparation:* FORTRAN, MATLAB and Maple.

**AME 408 Computer-Aided Design of Mechanical Systems (3, FaSp)** Design of mechanical systems using advanced graphics techniques; computer-aided drafting, design optimization, elements of computer graphics, solids modeling; introduction to computer-aided manufacturing.

**AME 409 Senior Design Project (4, Sp)** Modeling, analysis, integration, layout and performance analysis of a mechanical system to meet specified design requirements. *Prerequisite:* senior standing.

**AME 410 Engineering Design Theory and Methodology (3, Fa)** Product planning and task clarification, voice of customers, quality function deployment, conceptual and embodiment design, axiomatic theory of design, product quality and manufacturability, design decision-making. Junior standing. *Recommended preparation:* AME 305.

**AME 412 Molecular Theory of Gases (3, Irregular)** Molecular structure; intermolecular potentials; molecular processes in gases; molecular interpretation of concepts of classical thermodynamics; radiative transport phenomena in gases. *Prerequisite:* AME 310.

**AME 420 Engineering Vibrations I (3, Fa)** Theory of free and forced vibrations with and without damping; systems of single and multiple degrees of freedom; iteration; methods; vibration isolation; instrumentation. *Prerequisite:* MATH 245.

**AME 423L Loudspeaker and Sound-System Design (3, Sp)** (Enroll in EE 423L)

**AME 428 Mechanics of Materials (3)** (Enroll in CE 428)

**AME 430 Thermal Systems Design (3, Fa)** Design methodology for thermal systems; boilers, condensers, air conditioning systems, power plants and other systems with thermal energy interaction. *Recommended preparation:* AME 312 and AME 331.

**AME 436 Energy and Propulsion (3, Fa)** Performance and analysis of reciprocating, jet, rocket engines, and hybrid systems. Characteristics of inlets, compressors, combustors, turbines, nozzles and engine systems. Energy and environmental problems. *Prerequisite:* AME 310; AME 309 or CE 309.

**AME 441abL Senior Projects Laboratory (3-3, FaSp)** Individual engineering projects designed and constructed to model and test a physical principle or system. *Prerequisite:* AME 341bL.

**AME 443 Control Systems Laboratory**

**(3, Sp)** Vibration measurement and analysis; simulation, design, and experimental verification of mechanical control systems; identification of system parameters, implementation of controllers, verification of closed-loop performance via experimentation and stimulation. (Duplicates credit in former AME 442*BL*.)  
*Prerequisite:* AME 420 or AME 451 or EE 482.

**AME 451 Linear Control Systems I (3, FaSp)**

Transform methods, block diagrams; transfer functions; stability; root-locus and frequency domain analysis and design; state space and multiloop systems. *Prerequisite:* MATH 245.

**AME 453 Engineering Dynamics (3, Sp)**

Principles of dynamics applied to mechanical and aerospace problems. Introduction to gyroscopic motion and rigid body dynamics. *Prerequisite:* MATH 245.

**AME 455 Introduction to MEMS (3, Sp)**

Introduction to micro-electro-opto-mechanical systems; scaling effects on material properties, fluid flows, dynamical behavior; fabrication methods; design considerations for MEMS sensors and actuators. *Recommended preparation:* AME 301, AME 309 and AME 310.

**AME 457 Engineering Fluid Dynamics (3, Fa)**

Laminar and turbulent boundary layer flow with and without heat transfer; boundary layer separation, stability, transition and control; introduction to compressible fluid flow. *Prerequisite:* AME 310; AME 309 or CE 309.

**AME 458 Theory of Structures II (3)** (Enroll in CE 458)

**AME 459 Flight Mechanics (3, Fa)** Applications of basic aerodynamics to aircraft and missile performance, power and thrust, stability and control, compressibility effects. *Recommended preparation:* AME 309.

**AME 460 Aerodynamic Theory (3)** Basic relations describing the inviscid flow field about bodies and wings moving at subsonic and supersonic speeds. *Prerequisite:* AME 309.

**AME 461 Formation Evaluation (3)** (Enroll in PTE 461)**AME 462 Economic, Risk and Formation Productivity Analysis (4)** (Enroll in PTE 462)**AME 463L Introduction to Transport Processing in Porous Media (3)** (Enroll in PTE 463L)**AME 464L Petroleum Reservoir Engineering (3)** (Enroll in PTE 464L)**AME 465L Drilling Technology and Sub-surface Methods (3)** (Enroll in PTE 465L)

**AME 466 High-Speed Aerodynamics (3)** Transonic and supersonic aerodynamics; application to high-speed airplanes. *Prerequisite:* AME 460.

**AME 477 Solar System Exploration (3, Irregular)** Overview of current knowledge of solar system heliosphere, with emphasis on atmospheric and magnetospheric structure, including experimental methods of observation. *Prerequisite:* MATH 245.

**AME 481 Aircraft Design (4, Sp)** Aircraft design and analysis, design requirements and specifications; integration of structure, propulsion, control system, and aerodynamic configuration; performance analysis and prediction. *Recommended preparation:* AME 309, AME 353.

**AME 490x Directed Research (2-8, max 8)** Individual research and readings. Not available for graduate credit.

**AME 491 Undergraduate Design Projects II (1, max 4, FaSp)** Analysis, design, fabrication, and evaluation of devices intended for entry in local and national design competitions. Intended for students with prior project experience. Upper division standing. Graded CR/NC.

**AME 499 Special Topics (2-4, max 8)** Course content to be selected each semester from recent developments in mechanical engineering and related fields.

**AME 503 Advanced Mechanical Design (3, Fa)** Specific problems and methods of analysis in mechanical systems design.

**AME 504 Metallurgical Design (3, Irregular)** Relationship between metallurgical and environmental factors and the behavior of materials. *Prerequisite:* AME 303.

**AME 505 Engineering Information Modeling (3, Sp)** Symbolic and object-oriented modeling, product and process modeling for design and manufacturing, information models for computer integrated and collaborative engineering, information modeling for life-cycle engineering.

**AME 507 Mechanics of Solids I (3)** (Enroll in CE 507)

**AME 509 Applied Elasticity (3, Sp)** Condensed treatment dealing with engineering applications of the principles of elasticity, using the theories of elasticity, elastic stability, and plates and shells. *Prerequisite:* AME 403.

**AME 510 Introduction to Continuum Mechanics (3, Irregular)** Theories of continuous media such as linear and nonlinear theories of elasticities, theories of ideal, compressible and viscous fluids. *Prerequisite:* AME 525, AME 526.

**AME 511 Compressible Gas Dynamics (3, Sp)** Thermodynamics, kinetic theory, compressible flow equations, shock and expansion waves, similarity, shock-expansion techniques and linearized flow applied to bodies, characteristics, theory of boundary layers.

**AME 513 Principles of Combustion (3, Fa)** Thermochemistry, equilibrium, chemical kinetics, flame temperature, flame velocity, flame stability, diffusion flames spray combustion, detonation. Equations of motion including reaction, heat transfer, and diffusion.

**AME 514 Applications of Combustion and Reacting Flows (3, Sp)** Advanced topics and modern developments in combustion and reacting flows including ignition and extinction, pollutant formation, microscale and microgravity combustion, turbulent combustion and hypersonic propulsion. *Recommended preparation:* AME 513.

**AME 515 Advanced Problems in Heat Conduction (3, Sp)** Review of analytical methods in heat conduction; moving boundaries melting and freezing; sources and sinks, anisotropic and composite media; numerical methods for steady and unsteady problems. *Recommended preparation:* AME 331, AME 526.

**AME 516 Convection Processes (3, Sp)** Analysis of isothermal and nonisothermal boundary layers. Exact and approximate solutions of laminar and turbulent flows. Variable-property and high-speed effects; dimensional analysis. *Prerequisite:* AME 457; *recommended preparation:* AME 526, AME 331.

**AME 517 Radiation Heat Transfer (3, Fa)** Radiation properties; black body radiation; shape factors of radiation network analogy and solar radiation. *Prerequisite:* AME 331; *corequisite:* AME 525 or AME 526.

**AME 521 Engineering Vibrations II (3, Fa)** Multi-degree of freedom systems; modal analysis. Rayleigh's quotient. Continuous systems; modal analysis. Beams, rods, membranes. Collocations, Galerkin, Rayleigh Ritz methods; finite elements. *Prerequisite:* AME 420.

**AME 522 Nonlinear Dynamical Systems, Vibrations, and Chaos (3, Fa)** Lagrange equations; nonlinear maps and differential equations; fixed points; periodic motion; qualitative/quantitative and local/global analysis; higher order systems; stability; bifurcations; chaos; fractals. *Recommended preparation:* AME 420, AME 524, AME 525.

**AME 523 Random Vibrations (3, Irregular)** Random processes, ergodic theory. Ito calculus. Linear systems under stationary and nonstationary excitations. Fokker-Planck equations. Failure analysis and first passage problems. *Prerequisite:* AME 420, basic probability (or MATH 407), AME 451 recommended.

**AME 524 Advanced Engineering Dynamics (3, Fa)** Principle of virtual work, constraints, Lagrange's equations, Gibbs-Appell equations, Gauss's Principle, Theory of Rotations, dynamics of rigid bodies, Hamiltonian mechanics, Hamilton-Jacobi equation. *Recommended preparation:* AME 521, AME 525.

**AME 525 Engineering Analysis (3, FaSpSm)** Typical engineering problems discussed on a physical basis. Vector analysis; functions of complex variables, infinite series, residues.

**AME 526 Engineering Analytical Methods (3, FaSpSm)** Typical engineering problems discussed on a physical basis. Fourier series; Fourier integrals; Laplace transform; partial differential equations; Bessel function.

**AME 527 Elements of Vehicle and Energy Systems Design (3, Irregular)** Design synthesis of aero/hydro/mechanical systems; techniques of design; conceptual thinking; problem definition, configurational development, analytic engineering approximation, oral briefings and group problem solving. Graduate standing.

**AME 528 Elements of Composite Structure Design (3, Irregular)** Compliance, strength, endurance properties of advanced composites are developed, including semi-monocoque structure, beams, plates, panels. Applications of theory to optimal design of components and systems. Graduate standing or departmental approval required.

**AME 529 Aircraft Structures Analysis (3, Sp)** The direct stiffness (finite element) method for analysis of semimonocoque structures; energy methods; elasticity, plates and shells, vibration, and stability; system identification.

**AME 530ab Dynamics of Incompressible Fluids (3-3, FaSp)** A unified discussion of low-speed fluid mechanics including exact solutions; approximation techniques for low and high Reynolds numbers; inviscid flows; surface waves; dynamic stability; turbulence.

**AME 532ab Flight Vehicle Stability and Control (3-3, FaSp)** Response of flight to linear, nonlinear, and randomly defined disturbances. Generation and measurement of error signals in navigational systems. Stability and control techniques. *Recommended preparation:* AME 459.

**AME 533 Multi-Phase Flows (3, Sp)** Physics of the interaction between phases, empirical and analytical methods of solution to relevant technological problems. *Prerequisite:* AME 457.

**AME 534 Nuclear Thermal-Hydraulics (3, Fa)** Thermal-fluid phenomena for nuclear power stations. Heat generation by nuclear reactions, conduction in fuel rods, and transport of generated heat by convection, boiling, and condensation. Open only to master's and doctoral students. *Prerequisite:* AME 457 or AME 530a; and AME 526 and AME 581; *recommended preparation:* undergraduate degree in engineering.

**AME 535ab Introduction to Computational Fluid Mechanics (3-3, FaSp)** *a:* Convergence, consistency, stability; finite difference, finite element, and spectral methods; direct and iterative procedures for steady problems; linear diffusion and advection problems; nonlinear advection problems. *Recommended preparation:* AME 525. *b:* Generalized curvilinear coordinates; grid generation; numerical techniques for transonic and supersonic inviscid flows; boundary layer flows; reduced Navier-Stokes equations; compressible and incompressible viscous flows. *Recommended preparation:* AME 511 or AME 530a, AME 535a.

**AME 537 Microfluidics (3, Fa)** Introduction to fluid dynamics in the microscale. Scaling parameters, dynamic, thermodynamic, electroosmotic and electrochemical forces. Flow in microdevices, external flow measurement and control, microvalves and micropumps. Limited to students with graduate standing. *Recommended preparation:* AME 309, MATH 445.

**AME 539 Multi-body Dynamics (3, Sp)** Kinematics and kinetics of rigid body motion, quaternions; elastic vibrations of continua; geometric and material nonlinearities; Galerkin methods; meshless finite elements; complex dynamical systems; computational methods.

**AME 541 Linear Control Systems II (3, Fa)** State space representation, linearization, solution of state equations; controllability and observability; state feedback, state observers; optimal control; output feedback. *Prerequisite:* AME 451.

**AME 542 Theory of Plates (3)** (Enroll in CE 542)

**AME 543 Stability of Structures (3)** (Enroll in CE 543)

**AME 544 Computer Control of Mechanical Systems (3, Sp)** Computer control as applied to machine tools, mechanical manipulators, and other mechanical machinery; discrete time controller design; microprocessor implementation of motion and force control servos. *Prerequisite:* AME 451.

**AME 545 Modeling and Control of Distributed Dynamic Systems (3, Sp)** Modeling and analysis of complex flexible mechanical systems; distributed transfer function synthesis; frequency-domain control methods; smart structure design; applications in vibration and noise control. *Prerequisite:* AME 521 and AME 541.

**AME 548 Analytical Methods in Robotics (3, Irregular)** Homogeneous transformations; formal description of robot manipulators; kinematic equations and their solution; differential relationships; dynamics; control; static forces; compliance. *Prerequisite:* EE 545; EE 482 or AME 451; knowledge of linear algebra.

**AME 549 Systems Architecting (3, FaSm)** (Enroll in SAE 549)

**AME 550ab Seminar in Aerospace and Mechanical Engineering (1-1, FaSp)** Recent developments and research in aerospace and mechanical engineering and related fields. Oral and written reports. Graded CR/NC. Open only to AME graduate students.

**AME 551 Mechanical Behavior of Engineering Materials (3)** (Enroll in MASC 551)

**AME 552 Nonlinear Control Systems (3, Sp)** Phase plane, describing functions, applications to mechanical and aerospace systems. Lyapunov direct and indirect methods, applications; Popov circle criteria applications. *Prerequisite:* AME 541.

**AME 553abL Digital Control Systems (3-1)** (Enroll in EE 543abL)

**AME 559 Creep (3, Fa)** Behavior of engineering materials at elevated temperatures; thermal stresses; creep mechanisms; interpretation of creep data; methods of predicting long-term strains.

**AME 560 Fatigue and Fracture (3, Sp)** Behavior of materials under cyclic and static fatigue; plastic instability; life-time predictions; brittle and ductile fracture; crack propagation and plastic blunting.

**AME 561 Dislocation Theory and Applications (3)** (Enroll in MASC 561)

**AME 567 Collaborative Engineering Principles and Practice (3, Sp)** (Enroll in ISE 567)

**AME 572L Experimental Engineering Projects (3)** Experimental methods appropriate to engineering research, emphasizing interdisciplinary investigations. Individual projects.

**AME 573: Aerosol Physics and Chemistry (3, Sp)** Examination of the fundamentals of aerosol formation and evolution, aerosol effects on health and climate, and the principles of aerosol measurement. Open only to master's and doctoral students.

**AME 575 Advanced Engineering Analysis (3, Fa)** Solution of engineering problems by methods of calculus variations, integral equations, asymptotic expansions. *Prerequisite:* CE 525*ab* or AME 525 and AME 526.

**AME 576 Advanced Engineering Analytical Methods (3, Sp)** Solution of engineering problems by methods of linear and nonlinear partial differential equations of first and second order; perturbations. *Prerequisite:* CE 525*ab* or AME 525 and AME 526.

**AME 577 Survey of Energy and Power for a Sustainable Future (3, Fa)** Power production includes conventional fossil fuels, synthetic fuels, hydroelectric, solar, wind, geothermal, biomass, and nuclear. The environmental consequences of various energy sources are discussed. Open only to graduate students and AME seniors. *Recommended preparation:* B.S. in Aerospace Engineering, Mechanical Engineering or Physics.

**AME 578 Modern Alternative Energy Conversion Devices (3, Sp)** Alternative energy/power conversion including fuel cells, photovoltaic, batteries, and biologically inspired energy processes; biomass conversion and utilization; Environmental implications of alternative energy processes. Open only to graduate students and AME seniors. *Recommended preparation:* B.S. in Aerospace Engineer, Mechanical Engineering or Physics.

**AME 579 Combustion Chemistry and Physics (3, Sp)** Thermodynamics of combustion processes. Reaction mechanisms of hydrocarbon combustion. Pollutant formation. Theories and application of thermochemical kinetics and reaction rate theories. Transport in reacting flows.

**AME 581 Introduction to Nuclear Engineering (3, Fa)** Review of basic nuclear physics, binding energy, reactor kinetics, thermal transport in reactor systems, radioactivity, shielding, reactor safety and health effects of radiation, risk assessment. Open only to graduate students. *Recommended preparation:* Undergraduate degree in engineering; AME 310, MATH 245, PHYS 153L.

**AME 582 Nuclear Reactor Physics (3, Sp)** Neutron-induced fission chain reactions, reactor criticality. Neutron transport and diffusion in nuclear reactors. Mathematical/computational foundation for diffusion theory and transport calculations for fission reactor design/analysis. Open only to master's and doctoral students. *Prerequisite:* AME 526 and AME 581; *recommended preparation:* undergraduate degree in engineering and PHYS 153L.

**AME 583 Effects of Radiation on Health (3, Sp)** Nuclear physics relevant to human health. Biological effects of radiation, quantification and measurement of different types of radiation affecting living tissue, radiation protection, nuclear accidents. Open only to master's and doctoral students. *Prerequisite:* AME 526 and AME 581; *recommended preparation:* undergraduate degree in engineering and PHYS 153L.

**AME 584 Fracture Mechanics and Mechanisms (3, Fa)** Failure modes, stress concentrations, complex stress analysis, linear elastic fracture mechanics, yielding fracture mechanics, experimental methods, environmental assisted fracture and fatigue. *Prerequisite:* AME 403.

**AME 587 Gas-Surface Processes (3, Irregular)** Examination of the basic physical chemistry of the interaction of photons and low density gas phase particles with solid-state materials. *Recommended preparation:* ASTE 535, AME 486.

**AME 588 Materials Selection (3, Sp)** Materials selection in relationship to design and fabrication, economic considerations, methodology of selection, performance parameter; case studies.

**AME 590 Directed Research (1-12)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**AME 594abz Master's Thesis (2-2-0)** Credit on acceptance of thesis. Graded IP/CR/NC.

**AME 599 Special Topics (2-4, max 9)** Course content will be selected each semester to reflect current trends and developments in the field of mechanical engineering.

**AME 620 Aero and Hydrodynamic Wave Theory (3)** Linear and nonlinear wave motion in fluids: group velocity, dispersion, wave action, wave patterns, evolution equations, solitons and solitary waves, resonance phenomena. *Recommended preparation:* AME 526 and CE 309.

**AME 621 Stability of Fluids (3)** Linear and nonlinear stability analysis applied to free shear layers, boundary layers and jets; Rayleigh-Benard convective instabilities and centrifugal instability of rotating flows. *Recommended preparation:* AME 530*b*.

**AME 623 Dynamics of Stratified and Rotating Flows (3)** Fluid motions in which density gradients and/or rotation are important, including internal wave motions with rotation, flow past obstacles, viscous effects, singular perturbations. *Recommended preparation:* AME 530*b*.

**AME 624 The Fluid Dynamics of Natural Phenomena (3)** Application of the basic concepts of rotating, stratified fluid motion to problems in meteorology, oceanography, geophysics and astrophysics.

**AME 626 Singular Perturbation Methods (3)** Asymptotic series, W.K.B. approximation, method of steepest descent, stationary phase; matched asymptotic expansions and method of multiple scales applied to ordinary and partial differential equations. *Recommended preparation:* AME 526.

**AME 630 Transition to Chaos in Dynamical Systems (3)** Bifurcation theory and universal routes to chaos in deterministic systems; application to maps and differential flows; characterization of strange attractors. *Recommended preparation:* AME 526.

**AME 640 Advanced Theory of Elasticity (3)** (Enroll in CE 640)

**AME 645 Uncertainty Modeling and Stochastic Organization (3)** (Enroll in CE 645)

**AME 647 Multiscale Methods in Mechanics (3)** (Enroll in CE 647)

**AME 651 Statistical Theories of Turbulence (3)** Stationary stochastic processes. Isotropic turbulence; governing equations for the velocity correlation and spectrum functions. Turbulent diffusion. Scalar fluctuations in a turbulent field. *Recommended preparation:* AME 530*b*.

**AME 652 Turbulent Shear Flows (3)** Free shear layers. Turbulent flows in pipes and channels. Turbulent boundary layers. Effects of compressibility. Sound radiation by turbulence. *Recommended preparation:* AME 530*b*.

**AME 690 Directed Research (1-4, max 8)**  
 Laboratory study of specific problems by candidates for the degree Engineer in Mechanical Engineering. Graded CR/NC.

**AME 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**AME 794abcdz Doctoral Dissertation (2-2-2-2-0)** Credit on acceptance of dissertation. Graded IP/CR/NC.

**AME 694abz Thesis (2-2-0)** Required for the degree Engineer in Aerospace Engineering. Credit on acceptance of thesis. Graded IP/CR/NC.

## Applied Mechanics

**Bachelor of Science in Applied Mechanics**  
 The requirement for this degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied towards the major, regardless of the department in which the courses are taken. This program is administered by the staff of the Departments of Aerospace and Mechanical Engineering and Civil Engineering. Students may register in either of these two departments and still qualify for this degree. See common requirements for undergraduate degrees section, page 569.

COMPOSITION/WRITING REQUIREMENTS		UNITS

### Faculty

IBM Chair in Engineering Management: F. Stan Settles, Ph.D

Professors: Daniel A. Erwin, Ph.D.\* (Aerospace Engineering); Mike Gruntman, Ph.D.

(Aerospace Engineering, Systems Architecting Engineering); Darrell L. Judge, Ph.D. (Physics and Astronomy); Joseph A. Kunc, Ph.D. (Physics and Astronomy, Aerospace Engineering, Systems Architecting Engineering)

Associate Professor: Joseph Wang, Ph.D.

Adjunct Professors: Robert Brodsky, Ph.D.; Gerald Hintz, Ph.D.; James Wertz, Ph.D.

Adjunct Associate Professor: Michael Kezirian, Ph.D.

Research Professor: Herbert Schorr, Ph.D. (Computer Science)

Research Associate Professor: Sergey Gimelshein, Ph.D.

\*Recipient of university-wide or school teaching award.

Aerospace Engineering Honor Society: Sigma Gamma Tau

## Degree Requirements

### Educational Program Objectives

The Bachelor of Science degree program in Aeronautical Engineering has the following objectives:

- (1) Graduates will apply technical skills in mathematics, science and engineering to solve complex problems of modern aeronautical engineering practice.
- (2) Graduates will use advanced tools and techniques of engineering, and will innovate to advance the state of the art when needed.
- (3) Graduates will design and build complex engineering systems according to specifications and subject to technical as well as economic constraints.
- (4) Graduates will communicate with skill as members and leaders of multidisciplinary teams.
- (5) Graduates will make engineering decisions using high professional and ethical standards, taking into account their global, environmental and societal context.
- (6) Graduates will learn continuously throughout their careers in order to adapt to new knowledge and discoveries and to meet future challenges.

### Bachelor of Science in Aeronautical Engineering

The Bachelor of Science in Aeronautical Engineering prepares students for engineering careers in the space industry, for research and development in industry and government centers and laboratories, and for graduate study. The program combines a core in the fundamentals of engineering, specialized work in aeronautics and space technology, and technical electives to broaden and/or deepen the course work.

The requirement for this degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied towards the major, regardless of the department in which the courses are taken. See also the common requirements for undergraduate engineering degrees section, page 569.

COMPOSITION/WRITING REQUIREMENTS		UNITS
WRIT 130	Analytical Writing	4

REQUIRED UPPER DIVISION COURSES		UNITS
AME 301	Dynamics	3
AME 308	Computer-Aided Analysis for Aero-Mechanical Design	3
AME 341abL	Mechoptronics Laboratory	3-3
AME 404	Computational Solutions to Engineering Problems	3
AME 441aL	Senior Projects Laboratory	3
AME 451	Linear Control Systems I	3
ASTE 301ab	Thermal and Statistical Systems	3-3
ASTE 330	Astronautics and Space Environment II	3
ASTE 421x	Space Mission Design	3
ASTE 470	Spacecraft Propulsion	3
ASTE 480	Spacecraft Dynamics	3
Elective	Technical elective**	12
Total units:		128

\*Satisfies GE Category III requirement.

\*\*Technical electives consist of (1) any upper division course in engineering except CE 404, CE 412 and ISE 440, or (2) an upper division course in chemistry, physics or mathematics and MATH 225. No more than 3 units of 490 course work can be used to satisfy the technical elective requirement.

†The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

### Minor in Astronautical Engineering

This program is for USC students who wish to work in the space industry and government space research and development centers and who are pursuing bachelor's degrees in science, mathematics or engineering with specializations other than in astronautical engineering.

The space industry employs a wide variety of engineers (electrical, mechanical, chemical, civil, etc.); scientists (physicists, astronomers, chemists); and mathematicians. These engineers participate in development of advanced space systems but they usually lack the understanding of basic fundamentals of astronautics and space systems. The minor in astronautical engineering will help overcome this deficiency and provide unique opportunities for USC engineering, science and mathematics students, by combining their basic education in their major field with the industry specific minor in astronautical engineering.

Required course work consists of a minimum of 18 units. Including prerequisites, the minor requires 38 units. Three courses, or 9 units, at the 400 level will be counted toward the minor degree. The course work is a balanced program of study providing the basic scientific fundamentals and engineering disciplines

critically important for contributing to development of complex space systems.

*Prerequisite courses:* MATH 125, MATH 126 and MATH 226; PHYS 151L and PHYS 152L.

REQUIRED COURSES		UNITS
ASTE 280	Astronautics and Space Environment I	3
ASTE 301a	Thermal and Statistical Systems I	3
ASTE 330	Astronautics and Space Environment II	3
ASTE 420	Spacecraft Design	3
ASTE 470	Spacecraft Propulsion	3
ASTE 480	Spacecraft Dynamics	3
Total minimum units:		18

### Master of Science in Astronautical Engineering

This degree is in the highly dynamic and technologically advanced area of astronautics and space technology. The program is designed for those with B.S. degrees in science and engineering who wish to work in the space sector of the defense/aerospace industry, government research and development centers, and laboratories and academia. The program is available through the USC Distance Education Network (DEN).

The general portion of the Graduate Record Examinations (GRE) and two letters of recommendation are required.

Required courses: 27 units

CORE REQUIREMENT (12 UNITS)		UNITS
ASTE 470	Spacecraft Propulsion	3
ASTE 520	Spacecraft System Design	3
ASTE 535	Space Environments and Spacecraft Interactions	3
ASTE 580	Orbital Mechanics I	3
CORE ELECTIVE REQUIREMENT (6 UNITS — CHOOSE TWO COURSES)		UNITS
ASTE 501ab	Physical Gas Dynamics	3-3
ASTE 523	Design of Low Cost Space Missions	3
ASTE 527	Space Studio Architecting	3
ASTE 552	Spacecraft Thermal Control	3
ASTE 553	Systems for Remote Sensing from Space	3
ASTE 554	Spacecraft Sensors	3
ASTE 556	Spacecraft Structural Dynamics	3
ASTE 570	Liquid Rocket Propulsion	3
ASTE 572	Advanced Spacecraft Propulsion	3
ASTE 581	Orbital Mechanics II	3
ASTE 583	Space Navigation: Principles and Practice	3
ASTE 584	Spacecraft Power Systems	3

ASTE 585	Spacecraft Attitude Control	3
ASTE 586	Spacecraft Attitude Dynamics	3

### TECHNICAL ELECTIVE REQUIREMENT (6 UNITS)

Two 3-unit courses. Students are advised to select these two elective courses from the list of core electives or from other courses in astronautical engineering or from other science and engineering graduate courses, as approved by the faculty adviser. No more than 3 units of directed research (ASTE 590) can be applied to the 27-unit requirement. New courses on emerging space technologies are often offered; consult the current semester's course offerings, particularly for ASTE 599 Special Topics.

### ENGINEERING MATHEMATICS REQUIREMENT

(CHOOSE ONE COURSE: 3 UNITS)		UNITS
AME 525	Engineering Analysis	3
AME 526	Engineering Analytical Methods	3
CE 529a	Finite Element Analysis	3
EE 517	Statistics for Engineers	3
PHYS 510	Methods of Theoretical Physics	3

At least 21 units must be at the 500 or 600 level.

### Areas of Concentration:

Students choose core elective and technical elective courses that best meet their educational objectives. Students can also concentrate their studies in the desired areas by selecting corresponding core elective courses. Presently, ASTE faculty suggest the following areas of concentration:

### SPACECRAFT PROPULSION

Choose two core electives from:

ASTE 501ab	Physical Gas Dynamics	3-3
ASTE 570	Liquid Rocket Propulsion	3
ASTE 572	Advanced Spacecraft Propulsion	3
ASTE 584	Spacecraft Power Systems	3

### SPACECRAFT DYNAMICS

Choose two core electives from:

ASTE 556	Spacecraft Structural Dynamics	3
ASTE 581	Orbital Mechanics II	3
ASTE 583	Space Navigation: Principles and Practice	3
ASTE 585	Spacecraft Attitude Control	3
ASTE 586	Spacecraft Attitude Dynamics	3

**SPACE SYSTEMS DESIGN**

Choose two core electives from:

ASTE 523	Design of Low Cost Space Missions	3
ASTE 527	Space Studio Architecting	3

(SAE 549 System Architecting I, 3 units, is also suggested as a technical elective for this area of concentration.)

**SPACECRAFT SYSTEMS**

Choose two core electives from:

ASTE 552	Spacecraft Thermal Control	3
ASTE 553	Systems for Remote Sensing from Space	3
ASTE 554	Spacecraft Sensors	3
ASTE 584	Spacecraft Power Systems	3

**SPACE APPLICATIONS**

ASTE 527	Space Studio Architecting	3
ASTE 553	Systems for Remote Sensing from Space	3
ASTE 554	Spacecraft Sensors	3

**Engineer in Astronautical Engineering**

The Engineer degree in Astronautical Engineering is in the highly dynamic and technologically advanced area of space technology. The program is designed for those with Master of Science degrees in science and engineering who want to prepare for work in the space industry, government research and development centers and national laboratories. The applicant may be required to take one to two upper division undergraduate courses. The Engineer degree in Astronautical Engineering is awarded in strict conformity with the general requirements for the USC Graduate School. See the general requirements for graduate degrees

on page 572. Each student wishing to undertake the Engineer program must first be admitted to the program and then take the screening examination. Further guidance concerning admission, screening exam and the full completion of courses, including those given outside the Astronautics and Space Technology division, can be obtained from the ASTE student adviser, program coordinators and faculty in each technical area.

**Doctor of Philosophy in Astronautical Engineering**

The Ph.D. in Astronautical Engineering is awarded in strict conformity with the general requirements of the USC Graduate School. See general requirements for graduate degrees on page 572. The degree requires a concentrated program of study, research and a dissertation. Each student wishing to undertake a doctoral program must first be admitted to the program and then take the screening examination. This examination will emphasize comprehension of fundamental material in the graduate course work. Further guidance concerning admission, the screening exam and the full completion of courses, including those given outside the Division of Astronautical Engineering, can be obtained from the ASTE student adviser and program coordinators.

**Certificate in Astronautical Engineering**

The Certificate in Astronautical Engineering is designed for practicing engineers and scientists who enter space-related fields and/or want to obtain training in specific space-related areas. Students enroll at USC as limited status students; they must apply and be admitted to the certificate program after completion of no more than 9 units of

required course work. The required course work consists of 12 units; students will choose four 3-unit courses from the following:

REQUIRED COURSES (CHOOSE FOUR)		UNITS
ASTE 501ab	Physical Gas Dynamics	3-3
ASTE 520	Spacecraft System Design	3
ASTE 523	Design of Low Cost Space Missions	3
ASTE 527	Space Studio Architecting	3
ASTE 535	Space Environments and Spacecraft Interactions	3
ASTE 552	Spacecraft Thermal Control	3
ASTE 553	Systems for Remote Sensing from Space	3
ASTE 556	Spacecraft Structural Dynamics	3
ASTE 572	Advanced Spacecraft Propulsion	3
ASTE 580	Orbital Mechanics I	3
ASTE 581	Orbital Mechanics II	3
ASTE 583	Space Navigation: Principles and Practice	3
ASTE 584	Spacecraft Power Systems	3
ASTE 585	Spacecraft Attitude Control	3
ASTE 586	Spacecraft Attitude Dynamics	3
ASTE 599	Special Topics	3

Most classes are available through the USC Distance Education Network (DEN).

Credit for classes may be applied toward the M.S., Engineer or Ph.D. in Astronautical Engineering, should the student decide later to pursue an advanced degree. In order to be admitted to the M.S. program, the student should maintain a B average or higher in courses for the certificate and must satisfy all normal admission requirements. All courses for the certificate must be taken at USC. It is anticipated that other classes on emerging space technologies will be added to the list of the offered classes in the future.

## Courses of Instruction

**ASTRONAUTICS AND SPACE TECHNOLOGY (ASTE)**

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**ASTE 101L Introduction to Astronautics (4, Fa)** Gateway to the Astronautical Engineering major. Introduction to space, space exploration and the space business. Elements of orbits, spacecraft systems, rocket propulsion, and communications. Laboratory: introduction to graphics, computation and simulation.

**ASTE 280 Astronautics and Space Environment I (3, Sp)** Solar system, two-body problem, orbits, Hohmann transfer, rocket equation, space environment and its effects on space systems, sun, solar wind, geomagnetic field, atmosphere, ionosphere, magnetosphere. (Duplicates credit in former AME 282.) *Prerequisite:* MATH 226, PHYS 152L.

**ASTE 291 Team Projects I (1, max 4, FaSp)** Participation in ASTE undergraduate student team projects. Intended for lower-division students or those with little prior project experience.

**ASTE 301ab Thermal and Statistical Systems (3-3, FaSp)** Thermodynamics and statistical mechanics; kinetics of atoms, molecules, and photons; compressible fluid dynamics. (Duplicates credit in former AME 311ab.) *Prerequisite:* MATH 245, PHYS 153L.

**ASTE 330 Astronautics and Space Environment II (3, Fa)** Basics of spacecraft dynamics, Euler's equation, introduction to space plasma physics, spacecraft in plasma, radiation effects on space systems, space instrumentation: detectors, analyzers, spectrometers. (Duplicates credit in former AME 382.) *Prerequisite:* ASTE 280, PHYS 153L.

**ASTE 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**ASTE 420 Spacecraft Design (3, Fa)** Spacecraft mission design, space environment, attitude determination and control, telecommunications, propulsion, structures and mechanisms, thermal control, power systems, launch systems and facilities. (Duplicates credit in former AME 482.) *Prerequisite:* junior or senior standing in engineering or physics.

**ASTE 421x Space Mission Design (3, Sp)** Space systems engineering process: requirements definition; trade studies; system integration; technical reviews; cost and schedule development; case studies; ethics. Capstone design experience. Open only to seniors. Not for graduate credit. *Prerequisite:* ASTE 330

**ASTE 445 Molecular Gas Dynamics (3)** Physical description of kinetic nature of gas flows; distribution function; introduction to the Boltzmann equation; free-molecule flow; surface and molecular reflection properties; Monte-Carlo flow calculations. (Duplicates credit in former AME 485.) *Recommended preparation:* AME 309 or ASTE 301b.

**ASTE 470 Spacecraft Propulsion (3)** Introduction to rocket engineering. Space missions and thrust requirements. Compressible gas dynamics. Propellant chemistry and thermodynamics. Liquid- and solid-fueled rockets. Nuclear and electric propulsion. (Duplicates credit in former AME 473.) *Prerequisite:* senior or graduate standing.

**ASTE 480 Spacecraft Dynamics (3)** Two-body motion, rigid-body motion, attitude dynamics and maneuvers, spacecraft stabilization: gravity gradient, reaction wheels, magnetic torques, thruster attitude control. (Duplicates credit in former AME 483.) *Prerequisite:* senior standing.

**ASTE 490x Directed Research (2-8, max 8, FaSpSm)** Individual research and readings. Not available for graduate credit.

**ASTE 491 Team Projects II (1, max 4, FaSp)** Participation in ASTE undergraduate student team projects. Intended for students with prior project experience.

**ASTE 499 Special Topics (2-4, max 8)** Course content to be selected each semester from current developments in astronautics, space technology, and related fields.

**ASTE 501ab Physical Gas Dynamics (3-3, FaSp)** *a:* Molecular structure; radiative processes; microscopic description of gas phenomena; translational, rotational, vibrational, and electronic freedom degrees; particle energy distributions; microscopic representation of thermodynamic functions. *Prerequisite:* graduate standing or departmental approval. *b:* Kinetic concepts in gas physics; thermal non-equilibrium; intermolecular potentials; transport of radiation and particles in high-temperature gas; dissociation and ionization equilibrium; energy relaxation. (Duplicates credit in former AME 520ab.) *Prerequisite:* ASTE 501a.

**ASTE 520 Spacecraft System Design (3)** System components; vehicle structure, propulsion systems, flight dynamics, thermal control, power systems, telecommunication. Interfaces and tradeoffs between these components. Testing, system reliability, and integration. (Duplicates credit in former AME 501.)

**ASTE 523 Design of Low Cost Space Missions (3, Sp)** Reviews all aspects of space mission design for practical approaches to reducing cost. Examines "LightSat" mission experience and potential applicability to large-scale missions. (Duplicates credit in former AME 506.) Graduate standing in engineering or science. *Recommended preparation:* ASTE 520 or some experience in space engineering.

**ASTE 527 Space Studio Architecting (3, Sp)** Programmatic/conceptual design synthesis/choice creation methods for complex space missions. Aerospace system engineering/Architecture tools to create innovative projects. Evaluated by faculty/industry/NASA experts. Graduate standing in engineering or science. (Duplicates credit in former AME 557.) *Recommended preparation:* ASTE 520 or experience in space industry.

**ASTE 535 Space Environments and Spacecraft Interactions (3)** Space environments and interactions with space systems. Vacuum, neutral and ionized species, plasma, radiation, micrometeoroids. Phenomena important for spacecraft operations. (Duplicates credit in former AME 585.)

**ASTE 541 Partially Ionized Plasmas (3)** Review of microscopic processes involving particles and radiation, and their impact on properties of high-temperature gases and plasmas in local thermal equilibrium and non-equilibrium. (Duplicates credit in former AME 586.)

**ASTE 545 Computational Techniques in Rarefied Gas Dynamics (3, Irregular)** Particle-based computational simulation methods for rarefied, high-speed flows. Molecular collision kinetics. Monte Carlo direct simulation and related techniques. (Duplicates credit in former AME 564.) *Recommended preparation:* ASTE 501a and skill in FORTRAN programming.

**ASTE 552 Spacecraft Thermal Control (3, Sp)** Spacecraft and orbit thermal environments; design, analysis, testing of spacecraft thermal control system and components; active and passive thermal control, spacecraft and launch vehicle interfaces. Graduate standing in engineering or science.

**ASTE 553 Systems for Remote Sensing from Space (3)** The operation, accuracy, resolution, figures of merit, and application of instruments which either produce images of ground scenes or probe the atmosphere as viewed primarily from space. (Duplicates credit in former AME 502.) Graduate standing in engineering or physics.

**ASTE 554 Spacecraft Sensors (3, Fa)** Spacecraft sensors from concept and design to building, testing, interfacing, integrating, and operations. Optical and infrared sensors, radiometers, radars, phased arrays, signal processing, noise reduction. Graduate standing in engineering or science. *Recommended preparation:* ASTE 520.

**ASTE 556 Spacecraft Structural Dynamics (3)** Applied analytical methods (vibrations of single and multi-degree of freedom systems, finite element modeling, spacecraft applications); requirements definition process; analytical cycles; and design verification. Graduate standing in engineering or science.

**ASTE 557 Spacecraft Structural Strength and Materials (3)** Spacecraft structural strength analysis and design concepts overview; spacecraft material selection; analysis of composite materials; finite element method; spacecraft configuration; structural testing; bolted joint design. Open only to master's, professional, and doctoral students.

**ASTE 570 Liquid Rocket Propulsion (3, Sp)** Liquid-propelled rocket propulsion systems. Capillary devices for gas-free liquid acquisition in zero gravity. Ground and in-orbit operations. Propellant life predictions and spacecraft end-of-life de-orbiting strategies. *Prerequisite:* ASTE 470.

**ASTE 572 Advanced Spacecraft Propulsion (3, Sp)** Nuclear, electric, sails, and far-term propulsion systems. Overviews of nozzles, heat transfer, electromagnetics, rarefied gases, and plasma physics. Analysis of electrothermal, electrostatic and electromagnetic thrusters. Graduate standing in engineering or science. (Duplicates credit in former AME 573.) *Recommended preparation:* ASTE 470.

**ASTE 580 Orbital Mechanics I (3)** Physical principles; two-body and central force motion; trajectory correction maneuvers; position and velocity in conic orbits; Lambert's problem; celestial mechanics; orbital perturbations. (Duplicates credit in former AME 580.)

**ASTE 581 Orbital Mechanics II (3, Fa)** Theory of perturbations of orbits; numerical methods in orbital mechanics; satellite dynamics; averaging methods; resonance; mission analysis. (Duplicates credit in former AME 581.) *Prerequisite:* ASTE 580.

**ASTE 583 Space Navigation: Principles and Practice (3, Sp)** Statistical orbit determination: (weighted) least squares, batch and sequential (Kalman) processing, illustrative examples; online ephemeris generation: potentially hazardous asteroids, comets, satellites; launch: vehicles, payloads, staging. Graduate standing in engineering or science. (Duplicates credit in former AME 558.) *Recommended preparation:* ASTE 580.

**ASTE 584 Spacecraft Power Systems (3, Sp)** Introduction to solar arrays, batteries, nuclear power sources, mechanical energy storage. Application theory of operation, practical considerations. Subsystem topologies and performance. Design optimization techniques. Graduate standing in engineering or science. (Duplicates credit in former AME 508.)

**ASTE 585 Spacecraft Attitude Control (3, SpSm)** Review of attitude dynamics, gravity gradient stabilization, attitude stabilization with a spin, attitude maneuvers, control using momentum exchange devices, momentum-biased stabilization, reaction thruster control. (Duplicates credit in former AME 582.) *Prerequisite:* AME 451 or EE 482; *recommended preparation:* a course in dynamics.

**ASTE 586 Spacecraft Attitude Dynamics (3)** Dynamics of systems of particles and rigid bodies; spacecraft attitude systems; attitude maneuvers (spin, precession, nutation, etc.); attitude stabilization and attitude determination; simulation methods. (Duplicates credit in former AME 583.)

**ASTE 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the division. Graded CR/NC.

**ASTE 594abz Master's Thesis (2-2-0, FaSpSm)** Credit on acceptance of thesis. Graded IP/CR/NC.

**ASTE 599 Special Topics (2-4, max 9)** Course content to be selected each semester from current developments in astronautics, space technology, and related fields.

**ASTE 690 Directed Research (1-4, max 8, FaSpSm)** Laboratory studies of specific problems by candidates for the degree Engineer in Astronautical Engineering. Graded CR/NC.

**ASTE 694abz Thesis (2-2-0, FaSpSm)** Required for the degree Engineer in Astronautical Engineering. Credit on acceptance of thesis. Graded IP/CR/NC.

**ASTE 790 Research (1-12, FaSpSm)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the division. Graded CR/NC.

**ASTE 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm)** Credit on acceptance of dissertation. Graded IP/CR/NC.

*Cornelius J. Pings Chair in Biomedical Sciences:* Mark Humayun, Ph.D. (*Ophthalmology*)

*Provost Associate Professor of Biomedical Engineering, Neurology, Biokinesiology, and Physical Therapy:* Terence D. Sanger, M.D., Ph.D. (*Ophthalmology*)

*Professors:* Michael O. Arbib, Ph.D. (*Computer Science, Neurobiology*); Theodore W. Berger, Ph.D. (*Neurobiology*); Roberta D. Brinton, Ph.D. (*Molecular Pharmacology and Toxicology*); Peter S. Conti, M.D., Ph.D. (*Radiology*); David Z. D'Argenio, Ph.D.\*; Norberto M. Grzywacz, Ph.D.; Mark S. Humayun, Ph.D. (*Ophthalmology*); Michael C.K. Khoo, Ph.D. (*Pediatrics*); Kwang Jin Kim, Ph.D. (*Medicine and Physiology*); Richard Leahy, Ph.D. (*Electrical Engineering and Radiology*); Gerald E. Loeb, M.D.; Anupam Madhukar, Ph.D. (*Chemical Engineering and Materials Science, Physics*); Vasilis Z. Marmarelis, Ph.D. (*Electrical Engineering*); Jill McNitt-Gray, Ph.D. (*Exercise Science*); Chrysostomos Nikias, Ph.D. (*Electrical Engineering*); K. Kirk Shung, Ph.D.; Armand R. Tanguay Jr., Ph.D.

(*Electrical Engineering, Materials Science*); Stanley M. Yamashiro, Ph.D. (*Electrical Engineering*)

*Associate Professors:* Robert H.-P. Chou, M.D., Ph.D. (*Physiology and Biophysics*); Daniel P. Holschneider, M.D. (*Psychiatry*); Tzung K. Hsiai, M.D., Ph.D.; Hossein Jadvar, M.D., Ph.D. (*Radiology*); Shuliang Jiao, Ph.D. (*Ophthalmology*); Zhong-Lin Lu, Ph.D. (*Psychology*); Jill McNitt-Gray, Ph.D. (*Exercise Science*); Bartlett W. Mel, Ph.D.; Ellis Meng, Ph.D. (*Electrical Engineering*); Krishna Nayak, Ph.D. (*Electrical Engineering*); Alapakkam P. Sampath, Ph.D. (*Physiology and Biophysics*); Terence D. Sanger, M.D., Ph.D. (*Neurology, Biokinesiology*); Stefan Schaal, Ph.D. (*Computer Science*); Nicolas Schweighofer, Ph.D. (*Biokinesiology*); Francisco Valero-Cuevas, Ph.D. (*Biokinesiology*); James D. Weiland, Ph.D. (*Ophthalmology*); Jesse T. Yen, Ph.D.

*Assistant Professors:* Andrea Armani, Ph.D. (*Chemical Engineering and Materials Science*); Tansu Celikel, Ph.D. (*Neurobiology*); Jason Kutch, Ph.D. (*Biokinesiology*); Noah Malmstadt, Ph.D. (*Chemical Engineering and Materials Science*); J. Andrew MacKay, Ph.D. (*Pharmacology and Pharmaceutical Sciences*); Pin Wang, Ph.D., (*Chemical Engineering and Materials Science*)

*Associate Professor of Engineering Practice:* Jean-Michel I. Maarek, Doc.Ing.

*Research Professors:* Daniel L. Farkas, Ph.D. (*Cedars-Sinai Medical Center*); Jonathan G. Lasch, Ph.D. (*AMI-USC*); Alfred E. Mann, M.S. (*AMI-USC*); Donald J. Marsh, M.D.; Robert V. Shannon, Ph.D. (*House Ear Institute*); Qifa Zhou, Ph.D.

*Research Associate Professors:* Qian-Jie Fu, Ph.D. (*House Ear Institute*); John J. Granacki, Ph.D. (*Electrical Engineering-Systems/ISI*); Dong Song, Ph.D.

*Research Assistant Professors:* Jonathan M. Cannata, Ph.D.; Rahman Davoodi, Ph.D.; Alireza Dibazar, Ph.D.; Arkadivsz Gertych, Ph.D. (*Cedars-Sinai Medical Center*); Jason Kutch, Ph.D.; Clara Lajonchere, Ph.D.; Rongsong Li, Ph.D.; Eun Jin Lee, Ph.D.

*Associate Professors of Research:* Stefan Bluml, Ph.D. (*Radiology*); Brent J. Liu, Ph.D. (*Radiology*); Tishya A.L. Wren, M.D., Ph.D. (*Orthopedics/Pediatrics Childrens Hospital and Radiology*)

*Assistant Professors of Research:* Stephan G. Erberich, Ph.D. (*Radiology*); Tracy C. Grikscheit, M.D. (*Surgery and Childrens Hospital*); Bo Han, Ph.D. (*Surgery*); Natasha Leporé, Ph.D. (*Radiology and Childrens Hospital*); Paraq Mallick, Ph.D. (*Medicine*); Rex A. Moats, Ph.D. (*Pathology, Radiology*); Greg T. Mogel, M.D. (*Radiology*); John C. Wood, Ph.D. (*Pediatric Cardiology, Childrens Hospital*)

*Adjunct Professor:* Joseph H. Schulman, Ph.D. (*Alfred E. Mann Foundation*)

*Adjunct Associate Professors:* Samuel Landsberger, Sc.D. (*Rancho Los Amigos*); Shirin Towfigh, M.D. (*Cedars Sinai*)

*Adjunct Assistant Professors:* Leonid Litvak, Ph.D. (*Advanced Bionics Corp.*); Philip Requejo, Ph.D. (*Rancho Los Amigos Medical Center and Kinesiology*)

*Emeritus Professors:* George A. Bekey, Ph.D. (*Electrical Engineering, Computer Science and Speech Science*); Edward K. Blum, Ph.D. (*Mathematics, Computer Science*); H. K. Huang, D.Sc. (*Radiology*)

\*Recipient of university-wide or school teaching award.

## Degree Requirements

### Educational Program Objectives

Graduates of our undergraduate program are expected to:

- engage in a professional career in the biomedical or other related industries, or enroll in advanced graduate studies including medical school;
- work in a technically competent manner to address challenges in engineering or their chosen professions, taking into consideration ethical and societal concerns;
- work in multidisciplinary teams and communicate effectively with other engineers and professionals;
- continue to develop their technical knowledge and professional skills, as evidenced by participation or leadership in relevant professional societies; continuing education; or attendance at relevant workshops, meetings or seminars.

### Bachelor of Science in Biomedical Engineering

The Department of Biomedical Engineering offers a Bachelor of Science degree in Biomedical Engineering. Additionally, there are three possible areas of emphasis within this biomedical engineering program major.

These are biochemical engineering, electrical engineering, and mechanical engineering. An area of emphasis appears in parenthesis after the primary major name on the transcript.

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied towards the major, regardless of the department in which the courses are taken.

See common requirements for undergraduate degrees, page 569.

Technical electives are to be selected from an approved list available in the department office.

#### **Minor in Craniofacial and Dental Technology**

For a complete listing, see the USC Ostrow School of Dentistry, page 529.

#### **Minor in Engineering Technology Commercialization**

See listing in the Special Educational Opportunities section, page 581.

#### **Master of Science in Biomedical Engineering**

The Master of Science in Biomedical Engineering is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. At least 28 approved units must be satisfactorily completed, of which at least 19 units must be at the 500 level or above. Four of these units may be thesis BME 594abz.

The master's degree program provides students with a broad background, linking physiology with engineering science, necessary for entering interdisciplinary careers in medical technology or pursuing further graduate studies in a related field.

REQUIRED COURSES	UNITS	REQUIRED COURSES	UNITS		
BME 501	Advanced Topics in Biomedical Systems	4	BME 501	Advanced Topics in Biomedical Systems, or	4
BME 502	Advanced Studies of the Nervous System	4	BME 502	Advanced Studies of the Nervous System	4
BME 511	Physiological Control Systems	3	BME 513	Signal and Systems Analysis	3
BME 513*	Signal and Systems Analysis	3	BME 650	Biomedical Measurement and Instrumentation	3
BME 533	Seminar in Bioengineering	1	MPTX 511	Introduction to Medical Product Regulation, or	
BME 594abz	Master's Thesis (2-2-0), or Technical Elective (4)	4	BME 416	Development and Regulation of Medical Products	3
Electives	Technical	9	MPTX 515	Quality Systems and Standards, or	
		28	ISE 527	Quality Management for Engineers	3
			ISE 545	Technology Development and Implementation	3
			Technical elective		3

\*Students who have taken an advanced undergraduate or master's level course in system and signal analysis may substitute BME 523 for BME 513 with departmental approval.

### Master of Science in Biomedical Engineering (Medical Imaging and Imaging Informatics)

Completion of the Master of Science in Biomedical Engineering (Medical Imaging and Imaging Informatics) requires that at least 29 approved units must be satisfactorily completed of which at least 19 units must be at the 500 level or above.

REQUIRED COURSES	UNITS	REQUIRED COURSES	UNITS		
BME 501	Advanced Topics in Biomedical Systems	4	BME 552	Neural Implant Engineering	3
BME 513	Signal and Systems Analysis	3	BME 620L	Applied Electrophysiology	4
BME 525	Advanced Biomedical Imaging	4			
BME 527	Integration of Medical Imaging Systems	3	<i>Regulation Track</i>		
BME 528	Medical Imaging Informatics	3	MPTX 513	Regulation of Medical Devices and Diagnostics	3
BME 535	Ultrasonic Imaging	3	RSCI 527	Medical Product Safety	3

Electives	Technical	6	<i>Medical Technology and Device Science Track</i>		
		29	BME 535	Ultrasonic Imaging	3
			BME 551	Introduction to Bio-MEMS and Nanotechnology	3
			BME 552	Neural Implant Engineering	3
			BME 620L	Applied Electrophysiology	4
			<i>Product Development Track</i>		
			ISE 515	Engineering Project Management	3
			ISE 555	Invention and Technology Development	3
					28
			<i>Technical Elective (one course)</i>		
			Applicable courses include: AME 503, BME 511, BME 535, BME 551, ISE 507, ISE 508, ISE 544, MPTX 517, RSCI 528 and courses listed in alternate tracks to that chosen. Other courses may be applicable; please see an adviser for approval.		

### Master of Science in Medical Device and Diagnostic Engineering

This program is designed to provide the knowledge and skills needed for the development of medical devices and diagnostic techniques, including aspects of medical product regulation and product development. The course of study requires successful completion of 28 units of course work and has been designed to be completed in three semesters of full-time study. Students in the program will complete a 19-unit core as well as selecting a 6-unit specialization (or "track") and one elective from a list provided by the department.

### Viterbi Integrated Master of Science Program (VIP) for the General Master of Science in Biomedical Engineering

The Viterbi Integrated Master of Science Program (VIP) will allow selected undergraduates from U.S. institutions partnered with the Viterbi School to complete a general Master of Science in Biomedical Engineering with a 6-unit reduction of the total 28 units required.

The VIP Master of Science in Biomedical Engineering is subject to the following requirements: (1) a total of at least 22 units is required; (2) all units must be taken in biomedical engineering; (3) all units must be taken at the 500 or 600 level; (4) minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in biomedical engineering. This average must also be achieved on all course work attempted at USC beyond the bachelor's degree.

The students will complete 400-level preparatory courses at their undergraduate institution before entering USC. The 400-level courses may be taken toward the undergraduate requirements. They must be acceptable equivalents to at least two of the USC courses listed below:

BME 402	Control and Communication in the Nervous System	3
BME 403	Physiological Systems	3
BME 404	Biomechanics	3
BME 405L	Senior Projects: Measurements and Instrumentation	4
BME 410	Introduction to Biomaterials and Tissue Engineering	3
BME 423	Statistical Methods in Biomedical Engineering	3
BME 425	Basics of Biomedical Imaging	3

After admission, students will complete the following courses (22 units) within three semesters:

BME 501	Advanced Topics in Biomedical Systems	4
BME 502	Advanced Studies of the Nervous System	4
BME 511	Physiological Control Systems	3
BME 513	Signal and Systems Analysis	3
BME 533	Seminar in Bioengineering	1
BME 594abz	Master's Thesis, or Technical Elective	2-2-0 4
Electives		3

Students applying to the VIP must be recommended by a faculty representative at a partner undergraduate institution; complete the regular graduate admission application (with exception of the GRE); and hold junior standing in biomedical engineering with a 3.5 GPA or better on major related course work.

### Doctor of Philosophy in Biomedical Engineering

The objective of the Doctor of Philosophy is to produce independent investigators who can make original scholarly contributions and apply advanced engineering concepts and techniques to the understanding and solution of biomedical problems. This program is intended to prepare the student for a career in academic research and teaching, or as an independent investigator in industrial or government laboratories.

The requirements listed are special to this department and must be read in conjunction with the general requirements of the Graduate School.

This program is designed to be normally completed in four years of full-time work beyond the Bachelor of Science degree (including summers). The first two years are devoted primarily to formal course work and the last two to research. In view of the flexible program, each student is assigned an adviser who will guide him or her in the selection of courses. By the end of the third semester of graduate study the student must have completed the Ph.D. screening examination. Subsequently, he or she is required to make a tentative major field selection (e.g., biomedical imaging, signal processing, neural engineering) and pass a qualifying examination. In accordance with the requirements of the Graduate School, at least 60 units of credit beyond the Bachelor of Science degree are required, with a minimum grade point average of 3.0. Students are required to take BME 533, the graduate biomedical engineering seminar course, for three semesters during their studies.

#### Requirements for Admission

Bachelor of Science degree in engineering or a natural science, and satisfactory scores on the Graduate Record Examinations. Undergraduate work should include a basic course in biology, physics, organic chemistry, biochemistry, differential equations and digital computation. Students lacking any of these will be required to make up the deficiency during the first two years of graduate work.

Students who have completed all requirements for the Master of Science degree offered in this department may apply for admission to the Ph.D. program. In this case, all courses taken in the M.S. program may be applied toward the requirements of the doctoral degree.

#### Screening Examination Process

By the end of the third semester of graduate study, all students must have completed the screening examination process to determine whether or not they will be allowed to continue in the Doctor of Philosophy program. Those who fail will be dropped from the program, although they may be permitted to complete the additional requirements necessary to obtain the Master of Science degree.

#### Guidance Committee

During the third semester, the student must make a tentative major field selection as described above and form a guidance committee. The latter administers the qualifying examination.

#### Qualifying Examination

The qualifying examination will normally be taken during the fourth semester of full-time academic study. The examination requires the preparation of a comprehensive written research proposal that presents a research question, critically reviews the pertinent literature and outlines the proposed experimental, analytical and computational procedures required to answer the question. The proposal must be defended in an oral examination.

#### Graduate Certificate in Engineering Technology Commercialization

See listing in the Special Educational Opportunities section, page 586.

#### Graduate Certificate in Health, Technology and Engineering (HTE@USC)

*Academic Director:* Terry Sanger, M.D., Ph.D., *Provost Associate Professor of Biomedical Engineering, Neurology, Biokinesiology, and Physical Therapy*

*Administrative Director:* George Tolomiczenko, Ph.D., *Assistant Professor, Neurology*

This program offers current second-year USC Ph.D. engineering students and first-year M.D. students an opportunity to learn about and gain experience in medical device and process innovation. Through project-based and interdisciplinary collaboration, students will augment their current programs with a set of courses and lab experiences linking medical and engineering research groups.

By applying design-informed approaches toward problem identification and solution prototyping, students will be involved in all the steps of medical device or process innovation from conception to commercialization. The program aims to create interdisciplinary, boundary-spanning, inventive entrepreneurs seeking early practical experience with device and method innovation in health care. Program participants will form bonds with a group of like-minded medical students and engineers who will be their mentors, colleagues and contacts as they advance in their careers.

The courses unique to the program include a seminar sequence (Topics in Health, Technology and Engineering), which must be taken during the first two years of involvement with the HTE@USC program, a case studies sequence taken during the second year and a research course to earn project-related credits:

COURSES		UNITS
BME 566abcd	Topics in Health, Technology and Engineering:	2-2-2-2
BME 567ab	Case Studies in Health, Technology and Engineering	2-2
BME 790	Research	12

Other required courses that are part of the M.D. curriculum (Ph.D. students enroll in INTD course versions of the same courses open only to HTE students on CR/NC basis):

INTD 621ab	Introduction to Clinical Medicine (ICM) for HTE	3-3
INTD 622L	Pre-clinical System Block for Health, Technology and Engineering	3-9

Candidates interested in applying should contact HTE@USC via email at hte@usc.edu.

## Courses of Instruction

### BIOMEDICAL ENGINEERING (BME)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**BME 101 Introduction to Biomedical Engineering (3, Fa)** Historical development and survey of major areas comprising biomedical engineering: theoretical neurobiology and systems physiology, biomedical instrumentation, artificial organ and prosthetic devices, biomedical computer applications.

**BME 201 Biomedical Engineering Practice (2, Fa)** Examination of the technical and practical challenges involved in the development of medical devices, including neural implants, in industry and the clinical setting. *Recommended preparation:* BME 101.

**BME 210 Biomedical Computer Simulation Methods (3, Sp)** Computational methods for simulation of circulatory, respiratory, pharmacokinetic, and neural models. Quadrature, differential equations, systems of linear equations, simulation languages, experimental statistics. *Prerequisite:* EE 150L; *corequisite:* MATH 245.

**BME 302L Medical Electronics (4, Sp)** Electronic design and measurements for medical applications. Use of integrated circuits, bio-potential measurements, static and dynamic calibration of physiological transducers. *Prerequisite:* EE 202L.

**BME 350 Biomedical Engineering Industrial Project (3, Sp)** Training in specific skills relevant to biomedical industry. Placement in summer internship following successful completion of the course. Junior standing. *Prerequisite:* BME 210.

**BME 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**BME 402 Control and Communication in the Nervous System (3, Sp)** An introduction to the structural and functional elements common to nervous systems, with emphasis on cellular dynamics, interneuronal communication, sensory and effector systems. *Prerequisite:* BISC 220L, BME 210, MATH 245.

**BME 403 Physiological Systems (3, Fa)** A thorough bioengineering treatment of the physiological properties of various mammalian organ systems: e.g., cardiovascular, respiratory, renal, and musculoskeletal. *Prerequisite:* BISC 220L, MATH 245; *corequisite:* EE 202L.

**BME 404 Biomechanics (3, Fa)** Mechanical properties of biological tissues and fluid transport in physiological systems: blood rheology; bioviscoelastic solids and fluids; gas flow and mixing; prosthesis design. *Prerequisite:* PHYS 151L; MATH 245; AME 201.

**BME 405L Senior Projects: Measurements and Instrumentation (4, FaSp)** Application of instrumentation and measurement techniques to biomedical engineering projects involving measurement, replacement or augmentation of biomedical systems. *Prerequisite:* BME 210, EE 202L.

**BME 410 Introduction to Biomaterials and Tissue Engineering (3, Fa)** Application of principles of physical chemistry, biochemistry, and materials engineering to biomedical problems, e.g., materials selection and design for implants and tissue replacement. *Prerequisite:* CHEM 322aL.

**BME 412 Craniofacial and Dental Technology (4)** (Enroll in DENT 412)

**BME 414 Rehabilitation Engineering (3, Sp)** An introduction to rehabilitation technology: limb and spinal orthoses; limb prostheses; functional electrical stimulation; sensory aids. *Recommended preparation:* AME 201.

**BME 416 Development and Regulation of Medical Products (3, Sp)** An introduction to the process of medical product development with emphasis on the regulations that govern the design, fabrication, and maintenance of medical products. Junior standing.

**BME 423 Statistical Methods in Biomedical Engineering (3, Fa)** Applications of parametric and non-parametric tests, analysis of variance, linear regression, time-series analysis, and autoregressive modeling, with biomedical applications to statistical analysis of biomedical data. *Prerequisite:* BME 210.

**BME 425 Basics of Biomedical Imaging (3, Fa)** Engineering, clinical applications and modern physics concepts underlying X-ray imaging, Computed Tomography (CT), nuclear medicine, positron emission tomography, Magnetic Resonance Imaging (MRI), ultrasound imaging. *Prerequisite:* PHYS 152L.

**BME 451 Fundamentals of Biomedical Microdevices (3, Fa)** Introduction to biomedical microdevices with emphasis on microtechnologies and biomedical microelectromechanical systems (bioMEMS). Principles for measurement of small-scale biological phenomena and clinical applications. *Prerequisite:* EE 202L; *recommended preparation:* basic biology and electronics.

**BME 452 Introduction to Biomimetic Neural Engineering (3, Fa)** Engineering principles, biology, technological challenges and state-of-the-art developments in the design of implantable biomimetic microelectronic devices that interface with the nervous system. *Prerequisite:* EE 202; *recommended preparation:* basic biology and electronics.

**BME 489 Biochemical Engineering (3, Sp)** (Enroll in CHE 489)

**BME 490x Directed Research (2-8, max 8)** Individual research and readings. Not available for graduate credit.

**BME 499 Special Topics (2-4, max 8)** Current trends and developments in the field of biomedical engineering.

**BME 501 Advanced Topics in Biomedical Systems (4, FaSp)** Advanced topics in selected biomedical systems: cardiopulmonary, neuromuscular, renal and endocrine.

**BME 502 Advanced Studies of the Nervous System (4, Fa)** Advanced topics on the structure and function of the nervous system examined from the viewpoint of computational systems science.

**BME 504 Neuromuscular Systems (3, Fa)** Introduces the fundamentals of mathematical, Newtonian, and robotic analysis applicable to multi-muscle biomechanical systems. Combines physiology with numerical simulations to understand and predict motor function. *Recommended preparation:* Matlab programming, fundamentals of mechanics, linear algebra.

**BME 505abL Laboratory Projects in Biomedical Engineering (4, FaSpSm)** Integration of biomedical science, engineering principles and state-of-the-art technology for the study of selected physiological systems in the laboratory setting. Laboratory. Graded CR/NC.

**BME 511 Physiological Control Systems (3, Fa)** Application of control theory to physiological systems; static analysis of closed-loop systems; time-domain analysis of linear control identification methods; nonlinear control. *Recommended preparation:* BME 513.

**BME 513 Signal and Systems Analysis (3, Sp)** Classification; representation; statistical analysis; orthogonal expansions; least-squares estimation; harmonic analysis; Fourier, Laplace, and Z transforms; the linear system; filtering; modeling and simulation; linear control theory.

**BME 523 Measurement and Processing of Biological Signals (3, Fa)** Acquisition, analysis, and display of biological data using digital computers; laboratory applications of digital signal processing and real time analysis.  
*Prerequisite:* BME 513.

**BME 525 Advanced Biomedical Imaging (4, Sp)** Advanced scientific and engineering principles of biomedical imaging including magnetic resonance, X-ray computed tomography, single photon and positron emission tomography, magnetoencephalography and electroencephalography.

**BME 527 Integration of Medical Imaging Systems (3, Fa)** Medical imaging quality, compression, data standards, workflow analysis and protocols, broadband networks, image security, fault tolerance, picture archive communication system (PACS), image database and backup.

**BME 528 Medical Imaging Informatics (3, Sp)** Picture archive communication system (PACS) design and implementation; clinical PACS-based imaging informatics; telemedicine/teleradiology; image content indexing, image data mining; grid computing in large-scale imaging informatics; image-assisted diagnosis, surgery and therapy.  
*Prerequisite:* BME 425 or BME 525, BME 527.

**BME 533 Seminar in Bioengineering (1, max 3, FaSp)** Graded CR/NC.

**BME 535 Ultrasonic Imaging (3, Sp)** All aspects of ultrasonic imaging including ultrasound and tissue interaction, ultrasonic transducers, instrumentation, imaging methods, clinical applications, bioeffects, safety, and recent developments in the field.

**BME 536 Ultrasonic Transducers (3, Fa)** Background and foundation covering the design, fabrication and testing of ultrasonic transducers and arrays. Design approaches, modeling tools will be discussed. Design project assigned.

**BME 551 Introduction to Bio-MEMS and Nanotechnology (3, Sp)** Principles and biomedical applications of micro-electromechanical systems (MEMS) and nanotechnology, including microfluidics, nanowire sensors, nanomotors, quantum dots, biofuel cells and molecular imaging. *Recommended preparation:* Basic biology and electronics.

**BME 552 Neural Implant Engineering (3, Sp)** Advanced studies of the basic neuroscience, engineering design requirements and technological issues associated with implantable neural prostheses, with particular emphasis on retinal and cortical function.

**BME 566abcd Topics in Health, Technology and Engineering (a: 2, Fa; b: 2, Sp; c: 2, Fa; d: 2, Sp)** Interdisciplinary approach to impart the skills, knowledge and familiarity with stages of collaborative projects related to medical device and methods innovation in health care settings. Open only to health, technology and engineering majors. *c: Concurrent enrollment:* BME 567a. *d: Concurrent enrollment:* BME 567b.

**BME 567ab Case Studies in Health, Technology and Engineering (a: 2, Fa; b: 2, Sp)** Learning from cases illustrating paths from health care problems to solutions. Faculty, students and invited guests will provide examples of both successful and unsuccessful innovation attempts. Open only to health, technology and engineering majors. *a: Concurrent enrollment:* BME 566c. *b: Concurrent enrollment:* BME 566d.

**BME 575L Computational Neuroengineering (3, Sp)** Introduction to computational modeling in neuroengineering, anchored in examples of brain function. Topics include transduction, synapses, spiking, networks, normalization, learning, Bayesian models, and Kalman filtering. *Prerequisite:* BME 502.

**BME 590 Directed Research (1-12)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**BME 594abz Master's Thesis (2-2-0)** Credit on acceptance of thesis. Graded IP/CR/NC.

**BME 599 Special Topics (2-4, max 9)** Current trends and developments in the field of biomedical engineering.

**BME 620L Applied Electrophysiology (4, Fa)** The theoretical basis and applied design principles for medical devices and instrumentation that interact with electrically excitable tissues of the body. *Prerequisite:* BME 502.

**BME 650 Biomedical Measurement and Instrumentation (3, Sp)** Design of measurement systems and biomedical instrumentation; architecture of electronic instruments used to measure physiological parameters, analysis of major process functions integrated in these instruments. Open to M.S., Medical Device and Diagnostic Engineering and biomedical engineering Ph.D. students only. *Recommended preparation:* BME 513.

**BME 670 Early Visual Processing (4, Fa)** Interdisciplinary topics in biological and artificial low-level visual processing. Retina, lateral geniculate nucleus; computer vision; neurophysiology, retinal prosthesis; molecular biology, phototransduction; edge detection; movement. Open to graduate students only. *Prerequisite:* NEUR 524 or BME 502 or CSCI 574.

**BME 671 Late Visual Processing (4, Sp)** Interdisciplinary topics in biological and artificial high-level visual processing. Visual cortex; computer vision; neurophysiology; psychophysics; MRI; computational models; orientation selectivity; stereopsis; motion; contours; object recognition. Open to graduate students only. *Prerequisite:* NEUR 524 or BME 502 or CSCI 574.

**BME 680 Modeling and Simulation of Physiological Systems (3, Irregular)** Mathematical theories and computation techniques for modeling physiological systems, with emphasis on cardiorespiratory, metabolic-endocrine, and neuronal functions.

**BME 790 Research (1-12)** Research applicable to the doctorate. Graded CR/NC.

**BME 794abcdz Doctoral Dissertation (2-2-2-2-0)** Credit on acceptance of dissertation. Graded IP/CR/NC.

## Chemical Engineering – Mork Family Department of Chemical Engineering and Materials Science

HEDCO Building 216  
(213) 740-2225  
FAX: (213) 740-8053  
Email: [chemsche@vsoe.usc.edu](mailto:chemsche@vsoe.usc.edu)  
[chems.usc.edu](http://chems.usc.edu)

*Chair:* Steven R. Nutt, Ph.D.

### Faculty

*Zohrab A. Kaprielian Dean's Chair in Engineering and Chester F. Dolley Chair in Petroleum Engineering:* Yannis C. Yortsos, Ph.D.

*Fluor Early Career Chair in Engineering:* Andrea M. Armani, Ph.D. (*Electrical Engineering, Chemistry*)

*M.C. Gill Chair in Composite Materials:* Steven R. Nutt, Ph.D. (*Aerospace and Mechanical Engineering*)

*Omar B. Milligan Chair in Petroleum Engineering:* Iraj Ershaghi, Ph.D., P.E.

*N.I.O.C. Chair in Petroleum Engineering:* Muhammad Sahimi, Ph.D.

*Robert E. Vrcian Chair in Energy Resources:* Theodore T. Tsotsis, Ph.D.

*Fluor Professor in Process Engineering:* S. Joe Qin, Ph.D. (*Electrical Engineering and Industrial and Systems Engineering*)

*Kenneth T. Norris Professor of Engineering:* Anupam Madhukar, Ph.D. (*Physics and Biomedical Engineering*)

*Judge Widney Professor of Chemical Engineering and Chemistry:* Ray R. Irani, Ph.D. (*Chemistry*)

*Professors:* Edward Crandall, Ph.D., M.D. (*Medicine*); P. Daniel Dapkus, Ph.D. (*Electrical Engineering*); Martin Gundersen, Ph.D. (*Electrical Engineering*); Rajiv K. Kalia, Ph.D. (*Physics and Computer Science*); Michael Kassner, Ph.D. (*Aerospace and Mechanical Engineering*); Terence G. Langdon, Ph.D., D.Sc. (*Aerospace and Mechanical Engineering and Earth Sciences*); Florian Mansfeld, Ph.D.; Aiichiro Nakano, Ph.D. (*Computer Science, Physics and Biomedical Engineering*); George Olah, Ph.D. (*Chemistry*); Richard Roberts, Ph.D. (*Chemistry*); Richard Stegemeier, M.S. Eng.; Armand R. Tanguay Jr., Ph.D. (*Electrical and Biomedical Engineering*); Mark E. Thompson, Ph.D. (*Chemistry*); Priya Vashishta, Ph.D. (*Physics, Computer Science and Biomedical Engineering*); Chongwu Zhou, Ph.D. (*Electrical Engineering*)

*Associate Professors:* Wenji Victor Chang, Ph.D.; Edward Goo, Ph.D.; Kristian Jessen, Ph.D.; C. Ted Lee Jr., Ph.D.\*; Katherine S. Shing, Ph.D.\*; Pin Wang, Ph.D.

*Assistant Professors:* Malancha Gupta, Ph.D.; Andrea Maria Hodge, Ph.D. (*Aerospace and Mechanical Engineering*); Behnam Jafarpour, Ph.D.; Noah Malmstadt, Ph.D.; Jongseung Yoon, Ph.D.

*Research Professors:* Fred Aminzadeh, Ph.D.; Peter Will, Ph.D. (*Astronautics, Space Technology and Industrial Systems*); Don Zhang, Ph.D. (*Civil and Environmental*)

*Emeritus Professors:* Elmer L. Dougherty, Ph.D.; Murray Gershenzon, Ph.D. (*Electrical Engineering*); Ronald Salovey, Ph.D.\*

\*Recipient of university-wide or school teaching award.

*Chemical Engineering Honor Society:* Omega Chi Epsilon

## Degree Requirements

### Educational Program Objectives

Chemical engineering is the only engineering discipline that makes extensive use of chemical transformations (reactions) in addition to physical transformations (refining, molding or machining) to achieve added value. Chemical engineers are employed in virtually all manufacturing industries, from the basic chemical, biochemical, materials, energy, food, pharmaceutical and microelectronics industries to the myriad consumer product industries. Our various curricula are designed to produce graduates who are broadly educated as well as highly adaptable.

Graduates of the Bachelor of Science in Chemical Engineering programs are prepared to achieve any of the following accomplishments:

- To obtain employment and succeed in organizations where physical, chemical or biochemical transformations are utilized to produce products and services that benefit society.
- To pursue graduate or professional education in a variety of related fields.
- To engage in continuous personal and professional development through lifelong learning.
- To assume leadership roles in their employment organization or community.

### Bachelor of Science in Chemical Engineering Degree

The Mork Family Department of Chemical Engineering offers a Bachelor of Science degree in Chemical Engineering. Additionally, there are five possible areas of emphasis within this chemical engineering program major. These are: biochemical engineering (133 units); environmental engineering (132 units); nanotechnology (128 units); petroleum engineering (133 units); and polymer/materials science (133 units). An area of emphasis appears in parentheses after the primary major name on the transcript.

Sample student schedules are located on the department Web page ([chems.usc.edu](http://chems.usc.edu)).

*Common Requirements for the B.S. Degree and All Areas of Emphasis (108 units)*

See also common requirements for undergraduate degrees section, page 569.

**COMPOSITION/WRITING COURSES** **UNITS**

WRIT 140*	Writing and Critical Reasoning	4
WRIT 340	Advanced Writing	3

**GENERAL EDUCATION (SEE PAGE 63)\*\*** **UNITS**

General education <sup>+</sup>		20
--------------------------------	--	----

**CHEMISTRY COURSES** **UNITS**

CHEM 105aL	General Chemistry, or	
CHEM 115aL	Advanced General Chemistry	4
CHEM 105bL	General Chemistry, or	
CHEM 115bL	Advanced General Chemistry	4
CHEM 300L	Analytical Chemistry	4
CHEM 322aL	Organic Chemistry	4
CHEM 430a	Physical Chemistry	4

**MATH COURSES** **UNITS**

MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 226	Calculus III	4
MATH 245	Mathematics of Physics and Engineering I	4

**PHYSICS COURSES** **UNITS**

PHYS 151***	Fundamentals of Physics I: Mechanics and Thermodynamics	4
PHYS 152	Fundamentals of Physics II: Electricity and Magnetism	4

**CHEMICAL ENGINEERING COURSES** **UNITS**

CHE 120	Introduction to Chemical Engineering	3
CHE 205	Numerical Methods in Chemical Engineering	3
CHE 330	Chemical Engineering Thermodynamics	3
CHE 350	Introduction to Separation Processes	3
CHE 442	Chemical Reactor Analysis	3
CHE 443	Viscous Flow	3
CHE 444abL	Chemical Engineering Laboratory	3-3
CHE 445	Heat Transfer in Chemical Engineering Processes	2
CHE 446	Mass Transfer in Chemical Engineering Processes	2
CHE 460L	Chemical Process Dynamics and Control	3

CHE 480	Chemical Process and Plant Design	3
CHE 485	Computer-Aided Chemical Process Design	3

\*GE Category VI is taken concurrently with WRIT 140.

\*\*Diversity course must double count as a GE course in calculating the total unit count for the degree.

\*\*\*Satisfies GE Category III requirement.

<sup>+</sup>The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

**Additional Requirements for Individual Degrees**

*Bachelor of Science in Chemical Engineering*

The requirement for the degree in the absence of an area of emphasis is 129 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied towards the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses:

**CHEMISTRY TECHNICAL ELECTIVE** **UNITS**

CHEM 322bL	Organic Chemistry, or	
CHEM 430b	Physical Chemistry	4

**CHEMICAL ENGINEERING COURSES** **UNITS**

CHE 405	Applications of Probability and Statistics for Chemical Engineers	3
CHE 476	Chemical Engineering Materials	3

*CHE Technical Elective*

An upper division CHE course 3

**ADDITIONAL ELECTIVES (8-9 UNITS)** **UNITS**

*Suggested Courses*

CE 205	Statics	2
EE 438L	Processing for Microelectronics	3
ISE 460	Engineering Economy, or	
BUAD 301	Technical Entrepreneurship	3

*Bachelor of Science in Chemical Engineering Emphasis in Biochemical Engineering*

The requirement for the degree with an emphasis in biochemical engineering is 133 units.\* A scholarship average of C (2.0) or higher is required for all upper division courses taken in chemical engineering, biomedical engineering and biological sciences.

In addition to the previously listed common requirements, students must also take the following courses:

**BIOLOGICAL SCIENCES COURSES** **UNITS**

BISC 300L	Introduction to Microbiology	4
BISC 320L	Molecular Biology	4
BISC 330L	Biochemistry	4

**BIO-ELECTIVES** **UNITS**

BISC 403	Advanced Molecular Biology, or approved bio-engineering elective**	3-4
BME 410	Introduction to Biomaterials and Tissue Engineering	3
CHE 489	Biochemical Engineering	3

**ENGINEERING ELECTIVE** **UNITS**

CHE 405	Applications of Probability and Statistics for Chemical Engineers, or	
ISE 460	Engineering Economy	3

\*Students in the biochemical engineering option must take a minimum of 48 engineering units total to graduate.

\*\*Student may combine a 3-unit approved bio-engineering elective with 1 unit of free elective.

*Bachelor of Science in Chemical Engineering Emphasis in Environmental Engineering*

The requirement for the degree with an emphasis in environmental engineering is 132 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied towards the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses:

**CHEMICAL ENGINEERING COURSES** **UNITS**

CHE 405	Applications of Probability and Statistics for Chemical Engineers	3
CHE 476	Chemical Engineering Materials	3
CHE 486	Design of Environmentally Benign Process Plants	3

**OTHER COURSES** **UNITS**

CE 453	Water Quality Control	3
CE 463L	Water Chemistry and Analysis	3
ISE 460	Engineering Economy, or	
BUAD 301	Technical Entrepreneurship	3
PTE 463L	Introduction to Transport Processes in Porous Media	3

*Air Pollution Elective*

ENE 428	Air Pollution Fundamentals, or	
ENE 429	Air Pollution Control	3

*Bachelor of Science in Chemical Engineering  
Emphasis in Nanotechnology*

The requirement for the degree with an emphasis in nanotechnology is 128 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied towards the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses:

CHEMISTRY COURSE		UNITS
CHEM 453	Advanced Inorganic Chemistry	4

**CHEMICAL ENGINEERING AND MATERIALS SCIENCE COURSES**

CHE 487	Nanotechnology and Nanoscale Engineering through Chemical Processes	3
CHE 491	Nanotechnology Research for Undergraduates (two semesters)	2-2
MASC 350L	Nanostructured Materials: Design, Synthesis, and Processing	3

**NANO TECHNICAL ELECTIVE**

EE 438L	Processing for Microelectronics, or	
CHE 489	Biochemical Engineering, or	
PTE 463L	Introduction to Transport Processes in Porous Media	3

**OTHER COURSE**

CHE 405	Applications of Probability and Statistics for Chemical Engineers or	
ISE 460	Engineering Economy, or	
BUAD 301	Technical Entrepreneurship	3

*Bachelor of Science in Chemical Engineering  
Emphasis in Petroleum Engineering*

The requirement for the degree with an emphasis in petroleum engineering is 133 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied towards the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses:

**CHEMISTRY COURSE**

CHEMISTRY COURSE		UNITS
CHEM 322bL	Organic Chemistry, or	
CHEM 430b	Physical Chemistry	4

**CHEMICAL ENGINEERING COURSES**

CHE 405	Applications of Probability and Statistics for Chemical Engineers	3
CHE 476	Chemical Engineering Materials	3

**PETROLEUM ENGINEERING COURSES**

PTE 461	Formation Evaluation	3
PTE 463L	Introduction to Transport Processes in Porous Media	3
PTE 464L	Petroleum Reservoir Engineering	3
PTE 465L	Drilling Technology and Subsurface Methods	3

**OTHER COURSE**

ISE 460	Engineering Economy, or	
BUAD 301	Technical Entrepreneurship	3

*Bachelor of Science in Chemical Engineering  
Emphasis in Polymer/Materials Science*

The requirement for the degree with an emphasis in polymer/materials science is 133 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied towards the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses:

**CHEMISTRY COURSES**

CHEM 322bL	Organic Chemistry, or	
CHEM 430b	Physical Chemistry	4

**OTHER CHEMICAL ENGINEERING/  
MATERIALS SCIENCE COURSES**

CHE 472	Polymer Science and Engineering	3
CHE 476	Chemical Engineering Materials, or	
MASC 310	Materials Behavior and Processing	3
MASC 350L	Nanostructured Materials: Design, Synthesis, and Processing	3

**POLYMER/MATERIALS ELECTIVES  
(CHOOSE THREE COURSES)**

BME 410	Introduction to Biomaterials and Tissue Engineering	3
CHE 474L	Polymer Science and Engineering Laboratory	3
CHE 475	Physical Properties of Polymers	3
CHE 477	Computer Assisted Polymer Engineering and Manufacturing	3
CHE 487	Nanotechnology and Nanoscale Engineering through Chemical Processes	3
EE 438L	Processing for Microelectronics	3
MASC 440	Materials and the Environment	3

**OTHER COURSE**

CHE 405	Applications of Probability and Statistics for Chemical Engineers, or	
ISE 460	Engineering Economy, or	
BUAD 301	Technical Entrepreneurship	3

**Minor in Engineering Technology  
Commercialization**

See listing in the Special Educational Opportunities section, page 586.

## Graduate Degrees

### Master of Science in Chemical Engineering

The Master of Science in chemical engineering is awarded in strict conformity with the general requirements of the USC Viterbi School of Engineering with the exception that the minimum unit requirement is 28. Registration in either CHE 550ab or CHE 590 is required.

### Engineer in Chemical Engineering

Requirements for the Engineer in chemical engineering are the same as set forth in the general requirements. See general requirements for graduate degrees. Only available to graduate students currently enrolled.

### Doctor of Philosophy

The Doctor of Philosophy (Ph.D.) degree in chemical engineering is awarded in conformity with the general requirements of the Graduate School. See general requirements for graduate degrees.

### Departmental Policies and Requirements

In addition to the general requirements for the Ph.D. described in this catalogue, candidates in chemical engineering are required to demonstrate proficiency in the following fields: thermodynamics, fluid flow, heat and mass transfer and chemical engineering kinetics. Registration in CHE 550ab is required of all students. More detailed statements of the departmental requirements may be found in a brochure available upon request from the Mork Family Department of Chemical Engineering and Materials Science office.

### Chemical Engineering Three-Two Plan

A special curriculum is available for obtaining a Bachelor of Science degree in chemical engineering and a Bachelor of Science or Bachelor of Arts degree in a letters, arts and sciences major in five years. For further information see departmental advisers.

Similar programs are available in cooperation with certain liberal arts colleges. Such programs are particularly suited for obtaining a Bachelor of Science in chemistry at the liberal arts college and a Bachelor of Science in chemical engineering at USC.

### Graduate Certificate in Engineering Technology Commercialization

See listing in the Special Educational Opportunities section, page 586.

## Courses of Instruction

### CHEMICAL ENGINEERING (CHE)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**CHE 120 Introduction to Chemical Engineering (3, Sp)** Problem-solving techniques in chemical engineering using graphics and computers. Mass and heat balances. *Corequisite:* MATH 125; CHEM 105aL or CHEM 115aL.

**CHE 205 Numerical Methods in Chemical Engineering (3, Sp)** Computational tools for solving numerical problems in Chemical Engineering. *Prerequisite:* MATH 125.

**CHE 330 Chemical Engineering Thermodynamics (3, Fa)** Elements of chemical engineering thermodynamics, including generalized correlations of properties of materials, phase behavior, physical and chemical equilibria. *Corequisite:* MATH 226.

**CHE 350 Introduction to Separation Processes (3, Sp)** Use of equilibrium phase relations and principles of material and energy balance for design, operation, and optimization of separation procedures such as distillation, absorption, etc. *Prerequisite:* CHEM 105bL or CHEM 115bL; *recommended preparation:* CHE 330.

**CHE 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**CHE 405 Applications of Probability and Statistics for Chemical Engineers (3, Fa)** Principles of probability and statistics, random variables and random functions. Application to chemical engineering problems, including process design, process safety, heterogeneous materials and processes. *Prerequisite:* MATH 245.

**CHE 410 Introduction to Biomaterials and Tissue Engineering (3, Fa)** (Enroll in BME 410)

**CHE 442 Chemical Reactor Analysis (3, Fa)** Basic concepts of chemical kinetics and chemical reactor design. *Prerequisite:* MATH 245.

**CHE 443 Viscous Flow (3, Sp)** Constitutive equations and rate laws, momentum equations and kinetic theory of Newtonian, Non-Newtonian and complex flows. Applications to chemical engineering systems. *Corequisite:* CHE 350, MATH 245.

**CHE 444abL Chemical Engineering Laboratory (3-3, FaSp)** Resolution of chemical engineering problems that require original planning, observations, and data interpretation. Written and oral reports. *Prerequisite:* CHE 330, CHE 350, CHE 442; *corequisite:* CHE 443.

**CHE 445 Heat Transfer in Chemical Engineering Processes (2)** Phenomenological rate laws, differential and macroscopic equations, and elementary kinetic theory of heat transfer processes with emphases on conduction and convection. (Duplicates credit in AME 331.) *Prerequisite:* CHE 443, MATH 245.

**CHE 446 Mass Transfer in Chemical Engineering Processes (2, Sp)** Molecular and continuum approaches to diffusion and convection in fluids and multicomponent mixtures; simultaneous mass, heat and momentum transfer; steady-state and time-dependent diffusion; Maxwell-Stefan equations. *Prerequisite:* MATH 245, CHE 443, CHE 445.

**CHE 460L Chemical Process Dynamics and Control (3, Sp)** Simulation, stability, and automatic control of chemical processes. Open and closed loop control schemes and introduction to optimal control theory. Computer implementation and laboratory application. *Prerequisite:* CHE 120; *corequisite:* MATH 245.

**CHE 461 Formation Evaluation (3)** (Enroll in PTE 461)

**CHE 462 Economic, Risk and Formation Productivity Analysis (4)** (Enroll in PTE 462)

**CHE 463L Introduction to Transport Processes in Porous Media (3)** (Enroll in PTE 463L)

**CHE 464L Petroleum Reservoir Engineering (3)** (Enroll in PTE 464L)

**CHE 465L Drilling Technology and Subsurface Methods (3)** (Enroll in PTE 465L)

**CHE 472 Polymer Science and Engineering (3, Sp)** The preparation, characterization, and properties of synthetic polymers. An interdisciplinary approach to polymers as materials. *Recommended preparation:* CHEM 322aL.

**CHE 474L Polymer Science and Engineering Laboratory (3, Sp)** Experimental methods for the preparation, characterization, and properties of synthetic polymers. *Recommended preparation:* CHE 472.

**CHE 475 Physical Properties of Polymers (3, Fa)** Theoretical methods and semi-empirical correlations for estimating mechanical, thermodynamic, transport, optical, and electrical properties of polymer solutions, melts, networks, glasses, polymer blends and semi-crystalline polymers. *Recommended preparation:* CHE 472 and CHEM 430a.

**CHE 476 Chemical Engineering Materials (3, Sp)** Chemical and physical properties of solid materials used by chemical engineers, including polymers, metals, and ceramics. Materials design for industrial applications. *Prerequisite:* CHEM 322aL.

**CHE 477 Computer Assisted Polymer Engineering and Manufacturing I (3, Sp)** Estimation of physical, mechanical, chemical and processing properties of thermal plastics. Major molding processes. Mold flow simulation and residual stresses analysis. Case studies. *Prerequisite:* junior class standing.

**CHE 480 Chemical Process and Plant Design (3, Sp)** Applications of unit operations, thermodynamics, kinetics, and economic balance; energy conservation in heat exchanger networks and in sequencing of separational devices. Safety aspects. *Prerequisite:* senior standing.

**CHE 485 Computer-Aided Chemical Process Design (3, Fa)** Use and optimization of modern computer software for chemical process design. *Prerequisite:* CHE 442, CHE 443.

**CHE 486 Design of Environmentally Benign Process Plants (3, Sp)** Chemical Process Plants interact with the environment as an integrated system. This course discusses design procedures to minimize unwanted effluents to air, water and solid wastes. *Coresquisite:* CHE 480 or CHE 485.

**CHE 487 Nanotechnology and Nanoscale Engineering through Chemical Processes (3)** Properties and processing of nanomaterials including polymeric, metallic, and ceramic nanoparticles, composites, colloids, and surfactant self-assembly for templated nanomaterial production. *Prerequisite:* CHEM 105aL or CHEM 115aL or MASC 110L.

**CHE 489 Biochemical Engineering (3, Sp)** Application of chemical engineering principles to biological and biochemical processes and materials. Design of biochemical reactors and of processes for separation and purification of biological products. *Prerequisite:* CHE 330, BISC 320L.

**CHE 490x Directed Research (2-8, max 8)** Individual research and readings. Not available for graduate credit.

**CHE 491 Nanotechnology Research for Undergraduates (2)** Independent research in nanotechnology. Research project selected by the student in close consultation with a research mentor. Graded CR/NC. *Prerequisite:* CHE 487.

**CHE 499 Special Topics (2-4, max 8)** Course content to be selected each semester from recent developments in chemical engineering and related fields.

**CHE 501 Modeling and Analysis of Chemical Engineering Systems (3, Fa)** Application of mathematics to problems in chemical engineering; mathematical modeling, differential and integral equations, linear systems analysis and stability, asymptotic and numerical methods. Graduate standing.

**CHE 502 Numerical Methods for Diffusive and Convective Transport (3, Sp)** Numerical solution of ordinary and partial differential equations describing fluid flow, diffusion with chemical reaction, and conduction in heterogeneous media. Graduate standing.

**CHE 510 Energy and Process Efficiency (3, Sp)** Management and engineering strategies utilized to improve energy efficiency. Open only to graduate students.

**CHE 513 Principles of Combustion (3)** (Enroll in AME 513)

**CHE 523 Principles of Electrochemical Engineering (3)** (Enroll in MASC 523)

**CHE 530 Thermodynamics for Chemical Engineers (3, Sp)** Application of thermodynamics to chemical engineering systems. *Recommended preparation:* CHE 330.

**CHE 531 Enhanced Oil Recovery (3)** (Enroll in PTE 531)

**CHE 532 Vapor-Liquid Equilibrium (3)** Thermodynamics of phase relations; prediction and correlation of phase behavior. *Prerequisite:* CHE 330.

**CHE 540 Viscous Flow (3)** Fluid mechanical problem of interest to chemical engineers involving laminar flows of incompressible fluids, viscous-dominated creeping flows, and motion of bubbles and drops. *Prerequisite:* CE 309 or AME 309 or CHE 443.

**CHE 541 Mass Transfer (3)** Fundamentals of mass transfer within a single phase and between phases; applications to separation processes. *Recommended preparation:* CHE 445.

**CHE 542 Chemical Engineering Kinetics (3, Sp)** Reaction kinetics applied to problems of engineering design and operation. *Recommended preparation:* CHE 442.

**CHE 544 Heat Transmission (3)** Principles of conduction, radiation, and convection of heat; application to chemical and related industries. *Recommended preparation:* CHE 330, CHE 445.

**CHE 550ab Seminars in Chemical Engineering (0-1, max 2, FaSp)** Seminars to cover recent developments in the field of chemical engineering given by invited speakers. Master's students must register for two semesters; Ph.D. students must register for four semesters. Graded IP/CR/NC. *Recommended preparation:* graduate standing.

**CHE 554 Principles of Tissue Engineering (3, Fa)** Advanced scientific and engineering principles of tissue engineering including stem cell biology, biomaterial scaffolds, protein-surface interaction, bioreactor, and selected bioartificial organs (e.g., kidney, bone, skin). *Recommended preparation:* CHE 476, CHE 489.

**CHE 560 Advanced Separation and Bioseparation Processes (3, Sp)** Experimental techniques for separation and bioseparation processes and theoretical and computational techniques for modeling them. Graduate standing.

**CHE 572 Advanced Topics in Polymer Kinetics and Rheology (3, Fa)** Kinetics of polymer synthesis reactions and rheology of polymer solutions. *Recommended preparation:* CHE 442, CHE 472.

**CHE 582 Fluid Flow and Transport Processes in Porous Media (3)** (Enroll in PTE 582)

**CHE 590 Directed Research (1-12)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**CHE 594abz Master's Thesis (2-2-0)** Credit on acceptance of thesis. Graded IP/CR/NC.

**CHE 596 Chemical Reactions in the Atmosphere (3)** (Enroll in ENE 596)

**CHE 599 Special Topics (2-4, max 9)** Course content will be selected each semester to reflect current trends and developments in the field of chemical engineering.

**CHE 611 Stochastic Modeling and Simulation (3)** (Enroll in CE 611)

**CHE 690 Directed Research (1-4, max 8, FaSpSm)** Laboratory study of specific problems by candidates for the degree Engineer in Chemical Engineering. Graded CR/NC.

**CHE 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**CHE 794abcdz Doctoral Dissertation (2-2-2-2-0)** Credit on acceptance of dissertation. Graded IP/CR/NC.

*Emeritus Professors:* Murray Gershenzon, Ph.D. (*Electrical Engineering*); Ronald Salovey, Ph.D.

\*Recipient of university-wide or school teaching award.

### Minor in Materials Science

A minor in materials science is open to all undergraduate students in engineering. This minor provides students with the background and skills necessary to understand and use advanced materials in different engineering applications. Students are required to complete a minimum of 16 units of course work consisting of both core requirements and elective courses. Students must include at least four upper division courses of either three or four units in the minor program.

Students must apply to the Viterbi School of Engineering for the minor, and departmental approval is required. The program is outlined as follows:

REQUIRED COURSES		UNITS
CE 225	Mechanics of Deformable Bodies	3
CHE 476	Chemical Engineering Materials, or	
CE 334L	Mechanical Behavior of Materials	3
MASC 310	Materials Behavior and Processing	3
MASC 440	Materials and the Environment	3
Adviser approved electives		(minimum) 4

ELECTIVES		UNITS
BME 410	Introduction to Biomaterials and Tissue Engineering	3
CE 334L	Mechanical Behavior of Materials	3
CE 428	Mechanics of Materials	3
CE 467L	Geotechnical Engineering	4
CHE 472	Polymer Science and Engineering	3
CHE 476	Chemical Engineering Materials	3
MASC 350	Nanostructured Materials: Design, Synthesis, and Processing	3
MASC 439	Principles of Semiconductor Processing	3

### Master of Science in Materials Science

In addition to the general requirements for the Master of Science degree, add the following required courses: CHE 501; EE 471; MASC 501, MASC 503, MASC 504, MASC 505 and MASC 561. The six remaining units for the degree may be electives chosen with departmental approval.

### Engineer in Materials Science

Requirements for the Engineer in materials science degree are the same as set forth in the general requirements for graduate degrees.

**Master of Science in Materials Engineering**

Students with an interest in the characterization, selection and processing of engineering materials, and in materials problems related to engineering design may work toward a Master of Science in materials engineering. This degree is awarded in conformity with the general requirements of the Viterbi School of Engineering. Students may elect to

work for this degree in either the Materials Science or Aerospace and Mechanical Engineering departments. The specific courses that constitute an acceptable program must be approved in advance by the administering department.

**Doctor of Philosophy in Materials Science**

The Doctor of Philosophy with a major in materials science is awarded in strict conformity with the general requirements of the USC Graduate School. It includes the course requirements for the Master of Science degree. See general requirements for graduate degrees.

## Courses of Instruction

**MATERIALS SCIENCE (MASC)**

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**MASC 110L Materials Science (4, FaSp)**

Chemical bonding and structure in crystalline, amorphous, and molecular solids; tendency and mechanisms for chemical change; homogeneous and heterogeneous equilibria. *Prerequisite:* high school chemistry.

**MASC 310 Materials Behavior and Processing (3)**

Principles of mechanical behavior and processing of materials. Relationships between mechanical properties, microstructure, and processing methods. Composites and nonmetallics included.

**MASC 334L Mechanical Behavior of Materials (3)**

(Enroll in CE 334L)

**MASC 350L Nanostructured Materials: Design, Synthesis, and Processing (3, Sp)**

Structure, properties, synthesis, processing and design of metallic, ceramic, polymeric, electronic, photonic, composite, nanophase and biomaterials; nanostructures, microfabrication and smart materials. *Prerequisite:* CHEM 105a or CHEM 115a or MASC 110L, PHYS 152.

**MASC 437 Fundamentals of Solid State (3)**

Atomic theory; wave mechanics; crystal structure; lattice vibrations; elasticity theory; free electron and tight bonding approximations. *Prerequisite:* MASC 110L or EE 338, PHYS 153L, and MATH 445.

**MASC 438L Processing for Microelectronics (3)**

(Enroll in EE 438L)

**MASC 439 Principles of Semiconductor Processing (3)**

Principles relevant to semiconductor processing are covered. Topics include bulk and epitaxial crystal growth, photolithography, evaporation, sputtering, etching, oxidation, alloying, and ion implantation. *Prerequisite:* MASC 110L, EE 338.

**MASC 440 Materials and the Environment (3, Sp)**

Interactions of metals, alloys and composite materials with liquid and gaseous corrosive environments; corrosion protection by alloying and application of inhibitors and metallic or organic coatings.

**MASC 471 Applied Quantum Mechanics for Engineers (3)**

(Enroll in EE 471)

**MASC 472 Polymer Science and Engineering (3)**

(Enroll in CHE 472)

**MASC 475 Physical Properties of Polymers (3)**

(Enroll in CHE 475)

**MASC 476 Chemical Engineering Materials (3)**

(Enroll in CHE 476)

**MASC 499 Special Topics (2-4, max 8)**

Course content will be selected each semester to reflect current trends and developments in the field of materials science.

**MASC 501 Solid State (3, Sp)**

Atomic structure, bonding in covalent, ionic and Van der Waals crystals, Brillouin zones, lattices, diffraction, electronic states, lattice vibrations, specific heat, electrical conductivity, and magnetism. *Prerequisite:* EE 471.

**MASC 502 Advanced Solid State (3, Fa)**

Semiconductors, dielectrics and metals, thermoelectric effects, magnetism, magnetic resonance and superconductivity. *Prerequisite:* MASC 501.

**MASC 503 Thermodynamics of Materials (3, Fa)**

Classical thermodynamics, chemical potential, pure phases and mixtures; interphase relationships; binary and ternary solutions; free energy and activity; galvanic cell, electrochemical potential and Pourbaix diagram.

**MASC 504 Diffusion and Phase Equilibria (3, Sp)**

Phase equilibria; phase diagrams; diffusion; planar defects; nucleation and growth; spinodal decomposition; phase transformation. *Prerequisite:* MASC 503.

**MASC 505 Crystals and Anisotropy (3, Fa)**

Stereographic projection; Laue back reflection method; crystal orientation; line and planar crystalline defects; tensors; susceptibility; permeability and permittivity; stress and strain; piezoelectricity; elasticity.

**MASC 506 Semiconductor Physics (3, Fa)**

(Enroll in EE 506)

**MASC 511 Materials Preparation (3)**

Principles and techniques of materials preparation; purification, crystal growth from liquid and vapor phases, sintering. *Prerequisite:* MASC 504.

**MASC 514L Processing of Advanced Semiconductor Devices (3, Fa)**

Statistical design of experiments, vapor deposition of thin film dielectrics, plasma etching, advanced lithography, in-situ sensors, process monitoring, quality control, assurance/reliability. *Prerequisite:* EE 504.

**MASC 523 Principles of Electrochemical Engineering (3)**

Electrochemical techniques; mass, charge, and heat transfer; electrochemical thermodynamics and electrode kinetics; electrochemical reactors; optimization; materials and corrosion; experimental modeling of industrial processes.

**MASC 524 Techniques and Mechanisms in Electrochemistry (3)**

Modern electrochemistry; in-situ techniques; in-situ probes of the near-electrode region; ex-situ emersion techniques; cyclic voltammetry, electrooxidation, electrochemical reduction, reactive film formation, enzyme electrochemistry.

**MASC 534 Materials Characterization (3, Fa)**

Characterization of solids by optical microscopy, electron microscopy, (TEM, SEM) and elemental and structural analysis (EPMA, ESCA, AES, SIMS, HEED, LEED, SED).

**MASC 535L Transmission Electron Microscopy (4)** Transmission electron microscopy and techniques. Specimen-electron beam interaction, electron diffraction and image formation. X-ray microanalysis. Laboratory involves hands-on training on the transmission electron microscope. (Duplicates credit in former MASC 536L.) *Recommended preparation:* MASC 505.

**MASC 539 Engineering Quantum Mechanics (3)** (Enroll in EE 539)

**MASC 548 Rheology of Liquids and Solids (3)** (Enroll in CHE 548)

**MASC 551 Mechanical Behavior of Engineering Materials (3, Sp)** Mechanical properties of materials; macroscopic mechanical behavior related to structure and microstructure of the material; elementary dislocation theory related to basic strengthening mechanisms; fatigue and fracture; nanomaterials. *Recommended preparation:* MASC 310.

**MASC 559 Creep (3)** (Enroll in AME 559)

**MASC 560 Fatigue and Fracture (3)** (Enroll in AME 560)

**MASC 561 Dislocation Theory and Applications (3, Sp)** Elasticity theory; types, sources, motion, interaction of dislocations; stress fields and strain energies; partial dislocations and stacking faults; principles of work-hardening.

**MASC 570 Introduction to Photovoltaic Solar Energy Conversion (3)** Introduction to the physical principles, implementation materials, devices, and manufacturing costs of solar cells and panels for photovoltaic conversion of solar radiation to electricity.

**MASC 575 Basics of Atomistic Simulation of Materials (3, Fa)** Building a parallel computer from components; molecular dynamics method; computation of structural, thermodynamics and transport properties; simulation projects. *Prerequisite:* Undergraduate course in thermodynamics or statistical physics; *recommended preparation:* Fortran, Unix/Linux.

**MASC 576 Molecular Dynamics Simulations of Materials and Processes (3, Sp)** Molecular dynamics method for atomistic simulations of materials and processes, simulations using parallel computing, correlation functions for structural and dynamical properties plus simulation project. *Prerequisite:* MASC 575.

**MASC 583 Materials Selection (3)** (Enroll in AME 588)

**MASC 584 Fracture Mechanics and Mechanisms (3)** (Enroll in AME 584)

**MASC 590 Directed Research (1-12)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MASC 594abz Master's Thesis (2-2-0)** For the master's degree. Credit on acceptance of thesis. Graded IP/CR/NC.

**MASC 598 Materials Science Seminar (1)** Seminar in Materials Science research. To be taken only once for graduate credit. Graded CR/NC.

**MASC 599 Special Topics (2-4, max 9)**

**MASC 601 Semiconductor Devices (3)** (Enroll in EE 601)

**MASC 606 Nonequilibrium Processes in Semiconductors (3, Sp)** (Enroll in EE 606)

**MASC 610 Molecular Beam Epitaxy (3)** Basic principles, ultra high vacuum, machine considerations, source purity and calibrations temperature measurements, surface morphology and chemistry, growth procedures, III-V, II-VI and silicon MBE. *Prerequisite:* MASC 501, MASC 503.

**MASC 690 Directed Research (1-4, max 8)** Laboratory study of specific problems by candidates for the degree Engineer in Materials Science. Graded CR/NC.

**MASC 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MASC 794abcdz Doctoral Dissertation (2-2-2-2-0)** Credit on acceptance of dissertation. Graded IP/CR/NC.

## Petroleum Engineering – Mork Family Department of Chemical Engineering and Materials Science

chems.usc.edu

*Chair:* Steven R. Nutt, Ph.D.

*Director:* Iraj Ershaghi, Ph.D., P.E.

### Faculty

*Zohrab A. Kaprielian Dean's Chair in Engineering and Chester F. Dolley Chair in Petroleum Engineering:* Yannis C. Yortsos, Ph.D.

*Omar B. Milligan Chair in Petroleum Engineering:* Iraj Ershaghi, Ph.D., P.E.

*William M. Keck Professor of Energy Resources:* Donald M. Paul, Ph.D.

*Associate Professor:* Kristian Jessen, Ph.D.

*Assistant Professor:* Behnam Jafarpour, Ph.D.

*Lecturers:* Stephen Cheung, Ph.D.; Donald Clarke, M.S.; Robert Ehrlich, Ph.D.; Donald G. Hill, Ph.D.; Bradford Pierce, M.S.; Andrei

Popa, Ph.D.; Ehsan Tajer, Ph.D.; Wenlong Xu, Ph.D.; Ke-Thia Yao, Ph.D.; Victor M. Ziegler, Ph.D.

*Research Professor:* Fred Aminzadeh, Ph.D.; Dongxiao Zhang, Ph.D.

*Emeritus Professor:* Elmer L. Dougherty, Ph.D.

*Petroleum Engineering Honor Society:* Pi Epsilon Tau

## Degree Requirements

### Bachelor of Science in Chemical Engineering

#### Emphasis in Petroleum Engineering

See the listing under Chemical Engineering, page 612.

### Bachelor of Science in Mechanical Engineering

#### Emphasis in Petroleum Engineering

See the listing under Aerospace and Mechanical Engineering, page 590.

### Minor in Petroleum Engineering

A minor in petroleum engineering consisting of 16 required units is available to undergraduate majors in various fields of engineering and applied science. Besides preparing for graduate study in petroleum engineering, the program will prepare students for careers in areas of national need such as the exploration, recovery and production of subterranean resources, and the underground disposal of hazardous wastes.

#### Prerequisite courses:

MATH 125, MATH 126, MATH 226, MATH 245, PHYS 151L and CHEM 105aL

REQUIRED COURSES		UNITS
PTE 461	Formation Evaluation	3
PTE 462	Economic, Risk and Formation Productivity Analysis	4
PTE 463L	Introduction to Transport Processes in Porous Media	3
PTE 464L	Petroleum Reservoir Engineering	3
PTE 465L	Drilling Technology and Subsurface Methods	3
		16

### Master of Science in Petroleum Engineering

The Master of Science in petroleum engineering is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. A student may be permitted to elect the program without thesis upon approval from the department.

### Master of Science in Petroleum Engineering (Smart Oilfield Technologies)

The Master of Science in petroleum engineering (smart oilfield technologies) is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. A student may be permitted to elect the program without thesis upon approval from the department. Course requirements are similar to the existing M.S. degree in petroleum engineering in terms of core requirements.

### Certificate in Smart Oilfield Technologies

The certificate in smart oilfield techniques is designed for practicing engineers and scientists who enter petroleum engineering related fields and/or who wish to obtain training in the specific smart oilfields area. The applicants may enroll at USC as limited status students. They must apply and be admitted to the program before they complete 9 units of the required course work. The certificate program is open to applicants with an undergraduate degree in engineering or sciences who meet the admission criteria as limited students. The required courses consist of the following 12 units:

REQUIRED COURSES		UNITS
PTE 586	Intelligent and Collaborative Oilfield Systems Characterization and Management	3

PTE 587	Smart Completions, Oilfield Sensors and Sensor Technology	3
PTE 588	Smart Oilfield Data Mining	3
PTE 589	Advanced Oilfield Operations with Remote Visualization and Control	3

These classes will be available through the USC Distance Education Network (DEN). The credit for classes may be applied toward the M.S. or Ph.D. in petroleum engineering should the student decide later to pursue an advanced degree. In order to be admitted to the M.S. program, the student should maintain a B average or higher in courses for the certificate program and must satisfy all normal admission requirements. All courses for the certificate must be taken at USC.

### Engineer in Petroleum Engineering

Requirements for the Engineer degree in petroleum engineering are the same as set forth in the general requirements. See general requirements for graduate degrees.

### Doctor of Philosophy

The Doctor of Philosophy with a major in petroleum engineering is also offered. See general requirements for graduate degrees.

## Courses of Instruction

### PETROLEUM ENGINEERING (PTE)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

#### PTE 202x Energy and Society (4, Irregular)

Study of the impact of the development, production, and global distribution of energy on societal, political, and economic behavior. Not available for major credit to engineering majors. *Prerequisite*: pass Math Skill Level.

**PTE 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**PTE 411x Introduction to Transport Processes in Porous Media (3, Fa)** Properties of porous rocks; capillary effect, single phase and multiphase flow through porous media; diffusion and dispersion, miscible displacement, heat transfer. Lecture, 3 hours. Not available for credit to Petroleum Engineering majors. *Prerequisite*: MATH 245, CHEM 105aL or CHEM 115aL, PHYS 151L, CE 309.

**PTE 412x Petroleum Reservoir Engineering (3, Fa)** Properties of reservoir fluids, volumetric and material balances for gas and oil reservoirs; reservoir modeling concepts. Lecture, 3 hours. Not available for credit to Petroleum Engineering majors.

#### PTE 461 Formation Evaluation (3, Fa)

Concepts of petroleum geology, interpretation of downhole surveys and measurements including well logs, MWD, mud logs and samples. *Corequisite*: PTE 463L.

**PTE 462 Economic, Risk and Formation Productivity Analysis (4, Sp)** Principle of economic evaluation, risk analysis, reserves estimation, decline curves, energy prices, and well transients for flow prediction.

*Prerequisite:* PTE 461.

**PTE 463L Introduction to Transport Processes in Porous Media (3, Fa)** Properties of porous rocks; capillarity effect, single-phase and multiphase flow through porous media; diffusion and dispersion, miscible displacement, heat transfer. Lecture, 3 hours; laboratory, 3 hours. *Prerequisite:* MATH 245, CHEM 105aL or CHEM 115aL, PHYS 151L.

**PTE 464L Petroleum Reservoir Engineering (3, Sp)** Properties of reservoir fluids, volumetric and material balances for gas and oil reservoirs; reservoir modeling concepts. Lecture, 3 hours; laboratory, 3 hours. *Prerequisite:* PTE 463L.

**PTE 465L Drilling Technology and Subsurface Methods (3, Fa)** Theory and practice in drilling technology; mechanical properties of reservoir rocks; well completion; acidizing and fracturing, oil production technology. Lecture, 3 hours; laboratory, 3 hours. *Prerequisite:* PTE 464L.

**PTE 466 Petroleum Geology (3, Sm)** Introductory topics of physical and historical geology will be focused on the components that relate to the formation of oil and gas accumulations.

**PTE 490x Directed Research (2-8, max 8)** Individual research and readings. Not available for graduate credit.

**PTE 499 Special Topics (2-4, max 8)** Course content to be selected each semester from recent developments in petroleum engineering and related fields.

**PTE 502 Advanced Reservoir Characterization (3, Irregular)** Sources of data for reservoir characterization; cross-disciplinary integration; geologic models; sequence stratigraphic, lithologic, well test and geophysical models; 4-D seismic; compartmentalized and fractured reservoirs; error and risk analysis. Graduate standing in PTE. *Prerequisite:* PTE 411x, PTE 461.

**PTE 507 Engineering and Economic Evaluation of Subsurface Reservoirs (3, Fa)** Studies, data and methods for estimating size of underground fluid deposits for predicting physical and economic behavior of designed flow schemes, and for quantifying uncertainty. *Prerequisite:* PTE 464L.

**PTE 508 Numerical Simulation of Subsurface Flow and Transport Processes (3, Sp)**

Formulation and solution of the equations describing the underground flow of fluids through porous media. Includes mass (contaminant) transport in single and multiphase flow. *Recommended preparation:* PTE 507.

**PTE 511 Advanced Phase Behavior of Petroleum Reservoir Fluids (3, Irregular)** From classical thermodynamics to engineering application; equations of state based calculations; PVT experiments; reservoir fluid characterization; PT-flash calculations and stability analysis; compositional grading; transport properties. Open only to graduate students. *Recommended preparation:* CHE 330, MATH 226.

**PTE 512 Gas Injection Processes – Analytical Solutions and Analysis (3, Fa)** Gas injection and enhanced oil/gas recovery; conservation equations; flow and phase behavior; displacement efficiency; dispersion; method of characteristics; development of multicontact miscibility in multicomponent systems. Open only to graduate students. *Recommended preparation:* CHE 330, MATH 226 and MATH 245 (or similar).

**PTE 514 Drilling Engineering (2, 2 years, Fa)** Rock mechanics; rotary drilling processes; bit selection; optimizing bit weight and rotational speed; well hydraulics and control; casing design and cementing; directional and offshore drilling.

**PTE 517 Testing of Wells and Aquifers (3, Sp)** Principles of well testing; down hole device; Aquifer tests; slug tests; DST; pressure transient modeling in homogeneous and heterogeneous systems; parameter estimation; computer aided techniques. *Prerequisite:* PTE 464L.

**PTE 531 Enhanced Oil Recovery (3, 2 years, Sm)** Survey of current enhanced oil recovery processes, including water-flooding, miscible displacement, and thermal oil recovery. *Prerequisite:* PTE 464L; *recommended preparation:* PTE 507.

**PTE 542 Carbonate Rocks (2, Irregular)** Classification; porosity development; source rocks; wettability; capillary pressure curves; compressibility; surface areas; relative permeabilities; various petrophysical properties; formation evaluation; overpressures; thin section analysis.

**PTE 545 Corrosion Control in Petroleum Production (2, Irregular)** Types of corrosion encountered in petroleum production; methods for practical control including use of inhibitors, coatings, and cathodic protection. *Prerequisite:* CHEM 430a.

**PTE 555 Well Completion, Stimulation, and Damage Control (3, Sm)** This course reviews current practices related to well completion methods, wellbore stimulation, and damage control. Formation damage prevention and stimulation methods are emphasized. *Prerequisite:* graduate standing.

**PTE 572 Geostatistics (3, Irregular)** Use of geostatistical methods for exploration and development of mineral and petroleum resources, application of semivariogram, kriging, cokriging, nonlinear and parametric estimation and conditional stimulation. Graduate standing. *Recommended preparation:* knowledge of statistics.

**PTE 578 Advanced Production Engineering (2, 2 years, Sp)** Principles of oil well and gas well production; design of artificial lift systems and surface operations; field problems of enhanced oil recovery operations.

**PTE 581 Environmental Technology in the Petroleum Industry (3, Irregular)** This course examines engineering and scientific principles necessary for understanding, assessing, and remediating environmental problems in the petroleum industry including drilling, production, transportation and refining operations. Graduate standing.

**PTE 582 Fluid Flow and Transport Processes in Porous Media (3, 2 years, Fa)** Principles of single and multiphase flow through porous media; mechanisms of immiscible and miscible displacement; momentum, heat and mass transport in porous media.

**PTE 586 Intelligent and Collaborative Oilfield Systems Characterization and Management (3, Fa)** Review of soft computing methods such as neural networks, fuzzy logic, problematic reasoning in reservoir characterization, dynamic reservoir modeling, oilfield data integration and analysis of uncertainty in prediction. Limited to students with graduate standing. *Recommended preparation:* prerequisites for non-majors.

**PTE 587 Smart Completions, Oilfield Sensors and Sensor Technology (3, Sp)** Intelligent Wellbore completion, technology of subsurface and surface sensors, deployment and data acquisition, telemonitoring and feedback, reliability of sensors, data transmission, systems networks. *Recommended preparation:* prerequisites for non-majors.

**PTE 588 Smart Oilfield Data Mining (3, Fa)** Methods for oilfield data mining, data preparation mining images, prediction and knowledge discovery, subset selection, pattern recognition. Limited to students with graduate standing. *Recommended preparation:* prerequisites for non-majors.

**PTE 589 Advanced Oilfield Operations with Remote Immersive Visualization and Control (3, Sp)** Immersive subsurface and surface environments, web based monitoring and feedback, visualizing risk, unattended operation. Limited to students with graduate standing. *Recommended preparation:* prerequisites for non-majors.

**PTE 590 Directed Research (1-12)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PTE 594abz Master's Thesis (2-2-0)** For the master's degree. Credit on acceptance of thesis. Graded IP/CR/NC.

**PTE 599 Special Topics (2-4, max 9)** Course content will be selected each semester to reflect current trends and developments in the field of petroleum engineering.

**PTE 611 Stochastic Modeling and Simulation (3)** (Enroll in CE 611)

**PTE 690 Directed Research (1-4, max 8, FaSpSm)** Laboratory study of specific problems for candidates for the degree engineer in petroleum engineering. Graded CR/NC.

**PTE 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PTE 794abcdz Doctoral Dissertation (2-2-2-2-0)** Credit on acceptance of dissertation. Graded IP/CR/NC.

*Associate Professor:* Erik A. Johnson, Ph.D. (*Associate Chair*)

*Assistant Professors:* Burcin Becerik-Gerber, D.Des.; Amy L. Rechenmacher, Ph.D.

*Adjunct Associate Professor:* Le Dam Hanh-Griffin, Ph.D.

*Adjunct Assistant Professor:* Navid Nastar, Ph.D.

*Research Professors:* Maria I. Todorovska, Ph.D.; Yan Xiao, Ph.D., P.E.; Dongxiao Zhang, Ph.D.

*Research Assistant Professors:* Jose C. Borrero, Ph.D.; John Caffrey, Ph.D.; Philip M. Fine, Ph.D.; Scott Fruin, Ph.D. (*Environmental Health, Keck School of Medicine*); John A. Kuprenas, D.Eng., P.E.; Andrea Polidori, Ph.D.

*Professors of Engineering Practice:* Gregg E. Brandow Jr., Ph.D., P.E.; Henry M. Koffman, P.E.

*Associate Professor of Engineering Practice:* Dana Sherman, Esq.

*Emeritus Professors:* Mihran S. Agbabian, Ph.D., P.E.; George V. Chilingar, Ph.D.; Joseph S. Devinny, Ph.D.; Geoffrey Martin, Ph.D.; Paul Seide, Ph.D.

\*Recipient of university-wide or school teaching award.

### Chi Epsilon Civil Engineering Honor Society

Chi Epsilon is dedicated to the purpose of maintaining and promoting the status of civil engineering as a profession. Chi Epsilon was organized to recognize the characteristics of the individual civil engineer deemed to be fundamental to the successful pursuit of an engineering career and to aid in the development of those characteristics in the civil engineering student. To contribute to the improvement of the profession, Chi Epsilon fosters the development and exercise of sound traits of character and technical ability among civil engineers.

Chi Epsilon is based on broad principles of scholarship, character, practicality and sociability. Civil engineering students who rank in the upper one-third of the junior or senior class are eligible for membership. These qualifications will make one eligible but not necessarily acceptable. Each member must be well skilled in all four of the basic principles.

## Degree Requirements

### Educational Program Objectives

The undergraduate programs in civil engineering have the following objectives:

#### (1) Professional Achievement

Graduates will be successful in their chosen field of engineering, compete effectively as problem-solvers in a world of technological change and become leaders in industry, academic or governmental institutions.

#### (2) Societal Impact

Graduates will make use of their knowledge of global and societal issues, environmental considerations and sustainability objectives to create a safe and healthy world.

#### (3) Organizational and Team-Building Skills

Graduates will use their organizational abilities, communication skills and strengths in collaborative teamwork to foster a productive and efficient work environment in the organizations with which they are associated.

#### (4) Professional Development

Graduates will uphold high ethical and professional standards, be active in professional engineering organizations, support the advancement of the practice of engineering and obtain professional licensure.

#### (5) Continuing Education

Graduates will engage in lifelong learning and be prepared to pursue graduate studies in engineering or other diverse fields such as business, law or medicine.

All curricula leading to a degree must be approved by the Astani Department of Civil and Environmental Engineering; please note this includes transfer credit and units for courses waived for subject credit only, which have been approved through the Degree Progress department.

### Bachelor of Science in Civil Engineering (131-132 Unit Program)

The department offers a Bachelor of Science degree in Civil Engineering. Additionally, there are three possible areas of emphases within this civil engineering program major. These are building science, environmental engineering and structural engineering. An area of emphasis appears in parentheses after the primary major name on the transcript.

#### Bachelor of Science in Civil Engineering

The requirement for the degree is 131-132 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied towards the major, regardless of the department in which the courses are taken. In addition, a minimum grade of C must be earned

in each of the following courses: CE 205, CE 225, CE 309 and CE 325. See also common requirements for undergraduate degrees section, page 569.

#### COMPOSITION/WRITING REQUIREMENT UNITS

WRIT 140*	Writing and Critical Reasoning	4
WRIT 340	Advanced Writing	3

#### GENERAL EDUCATION (SEE PAGE 63) UNITS

General education* +	20
----------------------	----

#### PRE-MAJOR REQUIREMENTS UNITS

##### Chemistry Requirement

CHEM 105aL	General Chemistry, or	
CHEM 115aL	Advanced General Chemistry	4

##### Math Requirement

MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 226	Calculus III	4
MATH 245	Mathematics of Physics and Engineering I	4

##### Physics Requirement

PHYS 151L**	Fundamentals of Physics I: Mechanics and Thermodynamics	4
PHYS 152L	Fundamentals of Physics II: Electricity and Magnetism	4

##### Other Requirements

GEOL 305Lx	Introduction to Engineering Geology, or	
BISC 220L	General Biology: Cell Biology and Physiology	4

#### MAJOR REQUIREMENTS UNITS

<i>Engineering</i>		
ENGR 102	Engineering Freshman Academy	2

##### Civil Engineering

CE 106	Design and Planning of Civil Engineering Systems, or	2
CE 110	Introduction to Environmental Engineering	3
CE 107	Introduction to Civil Engineering Graphics	3
CE 108	Introduction to Computer Methods in Civil Engineering	2
CE 205	Statics	2

CE 207L	Introduction to Design of Structural Systems	2
CE 225	Mechanics of Deformable Bodies	3
CE 309	Fluid Mechanics	3
CE 325	Dynamics	3
CE 334L	Mechanical Behavior of Materials	3
CE 358	Theory of Structures I	3
CE 402	Computer Methods in Engineering	3
CE 408	Risk Analysis in Civil Engineering	3
CE 451	Water Resources Engineering	3
CE 453	Water Quality Control	3
CE 456	Design of Steel Structures	3
CE 467L	Geotechnical Engineering	4
CE 471	Principles of Transportation Engineering	3

##### Capstone Courses

CE 473	Engineering Law, Finance, and Ethics	3
CE 480	Structural System Design, or	
CE 465	Water Supply and Sewage System Design	3

##### Courses from Other Engineering Departments

EE 202L	Linear Circuits, or	
EE 326L	Essentials of Electrical Engineering	4
		60-61

#### MAJOR ELECTIVES UNITS

Elective	Civil Engineering	6
Design Kernel***	Civil Engineering Design Kernel Course	6

Total units: 131-132

\*GE Category VI is taken concurrently with WRIT 140.

\*\*Satisfies GE Category III requirement.

\*\*\*Design kernel courses must be selected from the following list of design courses: CE 457, CE 465, CE 466, CE 476, CE 478, CE 482, CE 484 and CE 485.

+The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

### Tracks

In addition to the core courses, students are required to select one of the following tracks: General, Construction or Water Resources.

*General Track*

Choose one of the following: CE 480 as the capstone course and CE 482 as a required design kernel course; or CE 465 as the capstone course and CE 466 or CE 476 as a required design kernel course.

The civil engineering electives may be chosen freely.

*Construction Track*

Select CE 480 as the capstone course and CE 482 as a required design kernel course. Replace CE 453 with CE 412. CE 460 is a required elective. The other civil engineering elective must be chosen from the following list: CE 461, CE 462, CE 469 and CE 470.

*Water Resources Track*

Select CE 465 as the capstone course and select one of the following as a required design kernel course: CE 466 or CE 476. The civil engineering electives must be selected from the following list: CE 466, CE 476, CE 477 and CE 490.

All curricula leading to a degree must be approved by the Astani Department of Civil and Environmental Engineering; please note this includes transfer credit and units for courses waived for subject credit only, which have been approved through the Degree Progress department.

*Bachelor of Science in Civil Engineering  
Emphasis in Structural Engineering*

The requirement for the degree with an emphasis in structural engineering is 131-132 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied towards the major, regardless of the department in which the courses are taken. In addition, a minimum grade of C must be earned in each of the following courses: CE 205, CE 225, CE 309 and CE 325. See also common requirements for undergraduate degrees section, page 569.

**Minor in Environmental Engineering**

See listing on page 632.

**Minor in Construction Planning and Management**

This program covers the most current theories and practice of construction planning and management. The program provides a valuable adjunct credential to professional school students pursuing careers in business administration, public administration, architecture, environmental studies, and other areas; and a unique opportunity for professional focus to students in the USC Dornsife College of Letters, Arts and Sciences.

Construction activities are complex. In contemporary society, effective planning and management of these activities requires specialized knowledge of the technical, economic and policy environment. This program couples the knowledge of how construction activities are organized with a broader understanding of the urban system in which construction projects are embedded. With the exception of statistics, all of the required courses are within the Astani Department of Civil and Environmental Engineering and the USC Price School of Public Policy.

Any USC undergraduate who has completed the equivalent of two full-time semesters in good standing is eligible to pursue the minor program. This minor program is rigorous enough to serve as an introductory credential for students subsequently electing to pursue advanced studies in development, urban planning, construction management, architecture or allied fields.

*Courses required*

Seven courses consisting of at least 23 units are required for the minor.

*Statistics*

Students must complete an adviser approved course in statistics. Candidate courses include ECON 317, EE 364, ISE 220, MATH 208, PPD 303, PSYC 274, SOCI 314 and similar courses. The statistics course must be at least three units.

CORE COURSES	UNITS
CE 460	Construction Engineering 3
CE 461	General Construction Estimating 3
CE 462	Construction Methods and Equipment, or 3
CE 469	Sustainable Design and Construction, or 3
CE 470	Building Information Modeling and Integrated Practice 3

*Theme Requirement: Two courses, both from Theme 1 or Theme 2 or Theme 3*

*Theme 1*

PPD 358	Urban and Regional Economics 4
PPD 362	Real Estate Fundamentals for Planning and Development 4

*Theme 2*

FBE 400x	Introduction to Real Estate Finance and Development 4
FBE 466	Management of Real Estate Development: Feasibility Studies 4

*Theme 3*

PPD 357*	Government and Business 4
PPD 435	Analyzing Real Estate Markets for Planning and Development 4
	17

**ELECTIVES (SELECT ONE) UNITS**

CE 404	Business and Intellectual Property Law for Engineers 3
CE 412	Contracts and Specifications 3
PPD 437*	Advanced Finance and Investment for Planning and Development 4

\*Prerequisite required.

Advisement is provided by the Astani Department of Civil and Environmental Engineering. Students will normally complete statistics before enrolling in CE 461 but can be permitted to complete statistics as a corequisite subject to adviser approval. Students are advised to take CE 460 and CE 461 before taking CE 462. Students electing PPD 437 must have completed PPD 362.

**Minor in Engineering Technology Commercialization**

See listing under the Special Educational Opportunities section, page 586.

**Master of Science in Civil Engineering**

The Master of Science in civil engineering is awarded in strict conformity with the general requirements of the USC Viterbi School of Engineering. A student may receive the Master of Science in civil engineering with a special option by specializing in one of the following courses of study: construction engineering; structural engineering; and transportation engineering. Students specializing in the transportation option and completing a thesis must include in their program 4 units of CE 594ab.

A general Master of Science in civil engineering without special designation is also given. Students pursuing this program will choose between the following special options: general, earthquake engineering, structural mechanics, water resources or ocean and coastal engineering.

A student who wishes to pursue the Master of Science in civil engineering without special designation and who has an interest in public works may take a selected sequence of 12 units in the USC Price School of Public Policy. For further information, see the Public Administration Professional Sequence section in the USC Price School of Public Policy, page 903.

**Master of Science in Civil Engineering (Transportation Systems)**

See Sustainable Infrastructure Systems, page 680.

**Master of Science in Civil Engineering (Water and Waste Management)**

See Sustainable Infrastructure Systems, page 680.

**Master of Science in Environmental Engineering**

Students with a bachelor's degree in engineering or science may work toward the Master of Science in environmental engineering. Students with degrees in fields other than engineering or science may be admitted on the recommendation of a program adviser and program director. Selection of courses will be determined through consultation with a program adviser to provide a maximum of training in the student's area of interest in environmental problems.

**Master of Construction Management**

Students possessing a bachelor's degree and with sufficient training in capital management and statistics may pursue the Master of Construction Management. The purpose of the Master of Construction Management program is to educate and train multidisciplinary professionals to understand and execute the broad array of technical and non-technical activities associated with construction management. The program provides special attention to the function of the constructor in real estate development. The program is drawn from the M.S., Civil Engineering program in construction engineering and management, and from the Marshall School of Business.

Applicants to the program are expected to have completed undergraduate course work in engineering economy or business finance.

CORE CURRICULUM	UNITS
ARCH 511L	Seminar: Building Systems 4
CE 501	Functions of the Constructor 3
CE 502	Construction Accounting and Finance, or 3
ACCT 509	Concepts of Financial and Management Accounting, or 4
ISE 566	Financial Accounting Analysis for Engineering 3
CE 556	Project Controls – Budgeting and Estimating 3
CE 566	Project Controls – Planning and Scheduling 3

TRACK REQUIREMENT: TWO COURSES, BOTH FROM TRACK 1, TRACK 2, OR TRACK 3		UNITS
<i>Track 1: Finance Track</i>		
FBE 400x*	Introduction to Real Estate Finance and Development	4
FBE 489	Real Estate Capital Markets	4
FBE 570*	Advanced Topics in Real Estate Finance	3
FBE 589*	Mortgages and Mortgage-Backed Securities and Markets	3
FBE 591*	Real Estate Finance and Investment	3
<i>Track 2: Real Estate Development Track</i>		
FBE 466*	Management of Real Estate Development: Feasibility Studies	4
FBE 470*	Advanced Real Estate Analysis	4
FBE 565	Economics of Urban Land Use: Feasibility Studies	3
FBE 566	Real Estate Finance, Investments and Development	3
<i>Track 3: Architecture, Engineering and Construction (AEC) Technology Track</i>		
CE 470	Building Information Modeling and Integrated Practice	3
CE 469	Sustainable Design and Construction, or	
CE 570	Building Information Modeling for Collaborative Construction	3
Additional adviser approved technical and advanced electives		10-11
Total minimum units		33

\*Prerequisite required.

The minimum requirement for the Master of Construction Management degree is 33 units. At least three elective courses totaling at least 9 units are required for this degree. These may be taken from the USC Astani Department of Civil and Environmental Engineering, other engineering departments, the USC Price School of Public Policy, the USC School of Architecture, the USC Davis School of Gerontology, the USC Gould School of Law or the USC Marshall School of Business subject to adviser approval. Admission to some classes requires advanced prerequisites and is subject to availability and approval of the instructor.

### General Requirements

#### Residence and Course Load

The normal time required for earning the Master of Construction Management is three semesters, including one summer semester beginning in June and continuing through the spring semester ending in May. Students are expected to participate in extracurricular activities associated with the Master of Construction Management program, including the speaker series and field trips. A candidate must complete the last four semester units of course work at USC.

Students who wish to take a leave of absence for a semester or longer must request it from the chairman of the Astani Department in writing. Such leaves may be granted for up to one year.

#### Engineer in Civil Engineering

Requirements for the Engineer in civil engineering are the same as set forth in the general requirements.

#### Doctor of Philosophy in Civil Engineering and Doctor of Philosophy in Engineering (Environmental Engineering)

The Doctor of Philosophy with a major in civil engineering and the Doctor of Philosophy with a major in engineering (environmental engineering) are also offered. See general requirements for graduate degrees, page 572.

Areas of specialization for Doctor of Philosophy level students are: structural engineering, structural mechanics, earthquake engineering, coastal engineering, water resources engineering, construction engineering and management, soil mechanics and foundation engineering, hydrology, hydrodynamics and transportation.

#### Graduate Certificate in Engineering Technology Commercialization

See listing under the Special Educational Opportunities section, page 586.

#### Graduate Certificate in Transportation Systems

The graduate certificate in Transportation Systems is an interdisciplinary program administered by the USC Astani Department of Civil and Environmental Engineering. The certificate program allows students to specialize in transportation applications, while simultaneously receiving a degree in their home department. The certificate in transportation systems combines elements of transportation engineering with transportation policy, planning and project management. The program is especially appropriate for students intending to pursue careers as developers of transportation technologies, or as implementors of technologies within government agencies.

Students electing the certificate program apply to the USC Astani Department of Civil and Environmental Engineering. Course prerequisites for the program are:

- (1) one course in statistics or uncertainty, equivalent to ISE 225, PPD 404x or CE 408;
- (2) one course in engineering economy, equivalent to ISE 460;
- (3) one course in microeconomics, equivalent to ECON 203; and
- (4) one course in a contemporary high level programming language.

These prerequisites may be satisfied after enrollment in the certificate program by taking the indicated courses or their equivalent. Graduate students cannot receive credit for courses numbered below 400. Detailed admissions requirements are published by the USC Astani Department of Civil and Environmental Engineering.

The courses taken for the certificate may be applied later to the Master of Science in Civil Engineering, transportation option.

Qualified students holding a bachelor's degree also have the option of enrolling in the certificate program without receiving a separate graduate degree.

The curriculum consists of five graduate courses for a total of 17 units.

CERTIFICATE REQUIREMENTS		UNITS
CE 471	Principles of Transportation Engineering, or	
CE 519	Transportation Engineering	3
CE 583	Design of Transportation Facilities, or	
CE 585	Traffic Engineering and Control	3
ISE 515	Engineering Project Management	3
PPD 633	Urban Transportation Planning and Management	4
PPD 634	Institutional and Policy Issues in Transportation	4

## Courses of Instruction

### CIVIL ENGINEERING (CE)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**CE 106 Design and Planning of Civil Engineering Systems (2, Fa)** History of civil engineering; introduction to the synthesis and design of systems dependent upon civil engineering technology; the structuring, modeling, and simulation of such systems.

**CE 107 Introduction to Civil Engineering Graphics (3, Sp)** Graphic communication and drawing; use of instruments, lettering, dimensioning, and detailing of engineering drawing; free-hand sketching, drafting, and modeling.

**CE 108 Introduction to Computer Methods in Civil Engineering (2, Sp)** Computer programming, organization of problems for computational solution, flow charts, programming; numerical methods; analysis and solution of civil engineering problems.

**CE 110 Introduction to Environmental Engineering (3, Fa)** Basic concepts of environmental engineering. Air, water, and soil pollution control technologies; pollution prevention strategies. Design of simple water distribution and treatment systems.

**CE 205 Statics (2, FaSp)** Statics of particles and rigid bodies; equivalent force systems; distributed forces; applications to trusses, frames, machines, beams, and cables; friction; moments of inertia. *Prerequisite:* PHYS 151L.

**CE 207L Introduction to Design of Structural Systems (2, Sp)** Structural materials, components and systems; gravity and lateral forces; structural performance and failures; introduction to structural plans and analysis; computer applications, case studies, design project. *Prerequisite:* CE 107, CE 205; *corequisite:* CE 225.

**CE 210L Introduction to Environmental Engineering Microbiology (3, Fa)** Principles of environmental microbiology; waterborne pathogens; microorganisms and air pollution; microorganisms in soil; water pollution microbiology; biodegradation of hazardous chemicals; eutrophication. *Corequisite:* CHEM 105aL or CHEM 115aL; *recommended preparation:* CE 106 or CE 110.

**CE 225 Mechanics of Deformable Bodies (3, Sp)** Analysis of stress and strain; axial, flexural, and torsional behavior of slender bars; elastic deflections; combined stresses; introduction to elastic stability and energy methods. *Prerequisite:* CE 205.

**CE 309 Fluid Mechanics (3, Fa)** Fluid statics; relative velocity field; total acceleration; divergence theorem; conservation of mass, energy, and momentum applied to engineering problems in laminar and turbulent flow. *Prerequisite:* MATH 226; *corequisite:* CE 325.

**CE 325 Dynamics (3, Sp)** Elements of vector algebra; dynamics of particles, systems of particles and rigid bodies; kinematics; momentum relations, energy methods; vibrations; Euler's equations of motion. *Prerequisite:* CE 205.

**CE 334L Mechanical Behavior of Materials (3, Fa)** Measurement of stress and strain; tensile, impact, creep, and fatigue behavior; statistical methods, brittle fracture; properties of structural materials. *Prerequisite:* CE 225 or AME 204.

**CE 358 Theory of Structures I (3, Fa)** Deformations and deflections of elastic systems; statically indeterminate beams, arches, and frames; secondary stresses. *Prerequisite:* CE 225.

**CE 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**CE 402 Computer Methods in Engineering (3, Sp)** Fundamentals of analog and digital computers; simulation of nonlinear physical systems; numerical analysis and solution of engineering problems. *Prerequisite:* CE 108 and MATH 245.

**CE 404 Business and Intellectual Property Law for Engineers (3, Fa)** An examination of legal issues confronting the professional engineer. Topics include the legal system, contracts, risk management, forms of doing business, capital formation and intellectual property rights. Upper division standing.

**CE 408 Risk Analysis in Civil Engineering (3, Fa)** Realization of nondeterministic problems in civil engineering; quantitative analysis of structural and system reliability; optimal design and design with specified risk. *Prerequisite:* CE 225, MATH 226.

**CE 409abl Computer-Aided Design (3-3)** Applications of interactive computer graphics to design problems; automated drafting; 3-D graphic algorithms. Analysis of design process from information processing viewpoint. *Prerequisite:* CE 225.

**CE 412 Construction Law and the Property Development Process (3, Sp)** Legal aspects of property development and construction: land use, construction practices and specifications, architecture and engineering contracts, agency, subcontracting, professional registration, liability, insurance, liens, and bonds. *Recommended preparation:* CE 404 or a general business law course.

**CE 428 Mechanics of Materials (3)** Analysis of stress and deformation; equations of elasticity; bending of beams; elastic instability; torsion problems; introduction to plates and shells; elastic wave propagation; numerical methods. *Prerequisite:* CE 225.

**CE 443 Environmental Chemistry (3, Fa)** Chemistry of water, gas, liquid and solid wastes. Chemical principles applicable to environmental engineering. *Prerequisite:* CHEM 105bL or CHEM 115bL.

**CE 451 Water Resources Engineering (3, Sp)** Discussion of broad perspectives on control and utilization of water, quantitative hydrology, ground water, probability concept, economic study, hydraulic structures, multi-purpose water resources projects. *Prerequisite:* CE 309 or ENE 410.

**CE 453 Water Quality Control (3, Fa)** Water quality criteria and fundamental of acceptability. Natural purification of surface waters. Processes employed in the treatment of waste waters for disposal or re-use. *Prerequisite:* CHEM 105aL or CHEM 115aL; *corequisite:* CE 309 or ENE 410.

**CE 456 Design of Steel Structures (3, Fa)** Fundamentals of analysis and design of steel structures; structural elements; simple and eccentric connections; design project. *Prerequisite:* CE 207L, CE 225; *corequisite:* CE 358.

**CE 457 Reinforced Concrete Design (3, Sp)** Strength and deformation of reinforced concrete; beams in flexure and shear; bond and development of bars; deflections; columns; slabs; footings; introduction to prestressed concrete. *Prerequisite:* CE 207L, CE 225; *corequisite:* CE 358.

**CE 458 Theory of Structures II (3, Sp)** Matrix algebra; stiffness method; force method; computer analysis of planar structures. *Prerequisite:* CE 108 and CE 358 or AME 150L and AME 353.

**CE 459 Introduction to Structural Dynamics (3, Fa)** Response of single and multiple degree of freedom systems to dynamic excitation; structural modeling and approximate solutions; introduction to earthquake resistant design. *Corequisite:* CE 458.

**CE 460 Construction Engineering (3, FaSp)** Introduction to the construction processes; estimating and bidding, construction administration, planning and scheduling, equipment and methods, labor relations, cost control systems, and safety.

**CE 461 General Construction Estimating (3, Fa)** Theory of estimating. Quantity surveying; unit cost synthesis and analysis. Bid organization and preparation; competitive simulations and exercises.

**CE 462 Construction Methods and Equipment (3, Sp)** Current procedures in selected fields of construction; organization and planning; equipment economics; machinery.

**CE 463L Water Chemistry and Analysis (3, Sp)** Chemistry of water purification technology and water pollution control. Chemical processes in natural and engineering aquatic environments; physical/chemical and biological characterization of water and wastewater. *Prerequisite:* CE 453, CHEM 105b or CHEM 115bL.

**CE 464 Geotechnical Engineering (3)** Fundamentals of soil mechanics and foundation engineering; soil classification, seepage, stress-strain behavior, shear strength, consolidation, design of retaining structures and foundations, and slope stability.

**CE 465 Water Supply and Sewerage System Design (3, Sp)** Design of water supply systems, storm drains, sanitary sewers, and lift stations. *Prerequisite:* CE 453.

**CE 466 Design of Free-Surface Hydraulic Systems (3, Sp)** Hydrological and hydraulic design for uniform and non-uniform flows, channel transition, sedimentation controls, design discharge for tributary watersheds, flood routing, flood detention, computer aided design. *Prerequisite:* CE 309.

**CE 467L Geotechnical Engineering (4, Sp)** Fundamentals of geotechnical engineering; soil classification, seepage, stress-strain behavior, shear strength, consolidation, design of retaining structures and foundations, and slope stability. Soil testing. (Duplicates credit in CE 464.) *Prerequisite:* CE 225.

**CE 469 Sustainable Design and Construction (3, FaSp)** Leadership in Energy and Environmental Design (LEED); Green Building strategies; Carbon Footprinting; calculating the embodied energy of building materials; cyclical processes in design and construction.

**CE 470 Building Information Modeling and Integrated Practice (3, Fa)** Building Information Modeling, current BIM technologies; coordination of design and construction; information management throughout building lifecycle; project delivery systems and technologies for integrated practice.

**CE 471 Principles of Transportation Engineering (3, Fa)** Planning, design, construction, maintenance, and operation of facilities for air, water, rail, and highway transit systems. Junior or senior standing.

**CE 473 Engineering Law, Finance and Ethics (3, Fa)** An examination of the legal, financial and ethical issues regularly considered by all practicing engineers. Upper division standing.

**CE 476 Design of Pressurized Hydraulic Systems (3, Sp)** Application of hydraulic principles to the engineering design of hydraulic structure with pressurized flow, piping network, water hammer, surge suppression, pumps and turbines, manifold hydraulic design. *Prerequisite:* CE 309.

**CE 477 Civil Infrastructure Information Systems (3)** Information systems and their use in the planning, design, construction, and operation of civil infrastructure projects. Project management and knowledge management for infrastructure systems development. *Prerequisite:* CSCI 201, CE 402.

**CE 478 Timber and Masonry Design (3, Fa)** Characteristics and properties of wood; beams, columns, trusses, connectors, and diaphragms. Properties of masonry, working stress and strength design, seismic design requirements.

**CE 480 Structural Systems Design (3, Sp)** Evaluate, design and analyze buildings. Organize and perform calculations for vertical loads, wind loads, and seismic loads on building projects. *Prerequisite:* CE 456 or CE 457 or CE 478; CE 358, CE 467L, CE 473, CE 482.

**CE 482 Foundation Design (3, Fa)** Analysis and design principles of building foundations, including spread footings, piles, drilled shafts, sheetpile walls and retaining structures. *Prerequisite:* CE 467.

**CE 484 Water Treatment Design (3, Fa)** Predesign studies, precipitation softening, coagulation and flocculation, sedimentation, filtration, sludge handling, chlorination, chloramination, ozonation; plant hydraulics, flow measurement, pumps, instrumentation and control, tertiary treatment. *Prerequisite:* CE 451, CE 463L, CE 473.

**CE 485 Wastewater Treatment Design (3, Sp)** Process kinetics, mass balance, reactor design, pretreatment, clarification, chemical treatment, biological treatment (aerobic and anaerobic), disinfection, sludge treatment, nitrogen and phosphorus removal, carbon adsorption. *Prerequisite:* CE 451, CE 463L, CE 473.

**CE 490x Directed Research (2-8, max 8)** Individual research and readings. Not available for graduate credit.

**CE 495 Seminars in Civil Engineering (1, FaSp)** Information necessary for successful transition to engineering practice with emphasis on substantive engineering topics, employee rights and responsibilities, communication skills, ethic and lifelong learning. Graded CR/NC. Open only to upper division engineering majors.

**CE 499 Special Topics (2-4, max 8)** Course content to be selected each semester from recent developments in civil engineering and related fields.

**CE 501 Functions of the Constructor (3, Fa)** Systems, processes, and constraints governing the initiation, direction, engineering, and delivery of major construction projects. Professional construction management, responsibilities, and practice.

**CE 502 Construction Accounting and Finance (3, Fa)** Cost control, finance, and engineering economy for construction operations.

**CE 503 Microbiology for Environmental Engineers (3)** Basic microbiology of water, air, and soil. Application of microbiology to the practice of environmental pollution control.

**CE 504 Solid Waste Management (3)** Characterization, production, storage, collection, and transport of solid wastes; alternative disposal methods; design principles and environmental impact; management of radiological solid wastes.

**CE 506 Heavy Construction Estimating (3, Fa)** Methods engineering, work analysis and pricing for route construction. Grading, draining, paving, haul economy, plant-materials production, pipeline and bridge building.

**CE 507 Mechanics of Solids I (3, Fa)** Analysis of stress and strain; constitutive equations for elastic materials; plane stress and strain; torsion; introduction to plates and shells; energy methods.

**CE 508 Mechanics of Solids II (3)** Thermal stresses; introduction to elastic stability; yield criteria; constitutive equations for elastoplastic materials; elastoplastic stress analysis; viscoelasticity and creep. *Prerequisite:* CE 507 or CE 428.

**CE 509 Mechanics of Solids III (3)** Advanced topics in mechanics of solids; complex variable methods for plane problems; three-dimensional problems; introduction to fracture mechanics. *Prerequisite:* CE 507.

**CE 510 Groundwater Management (3)** Groundwater hydrology, aquifer testing technology, groundwater quality and contamination, geophysical method, well design and development, basin water balance, computer modeling, legal aspects, groundwater management system.

**CE 511 Flood Control Hydrology (3)** Flood frequency, storm characteristics, net rain; surface drainage, peak discharge, flood runoff.

**CE 513L Instrumental Methods for Environmental Analysis (3)** Advanced techniques in gas, water, liquid, and solid waste analysis; theoretical and experimental consideration of electrometric, photometric, manometric, and chromatographic techniques for measurements of environmental pollution. Lecture, 2 hours; laboratory, 3 hours. *Prerequisite:* CE 463L.

**CE 514ab Advanced Sanitary Engineering Design (3-3)** Design of water and waste treatment works. *Prerequisite:* CE 453.

**CE 515 Sustainable Infrastructure Systems (3)** Explores broad issues and mitigation measures involved in the analysis and design of complex, uncertain, interacting infrastructure systems needing to be resilient and sustainable.

**CE 516 Geohydrology (3)** Principles of groundwater motion; aquifer characteristics, prospecting, practical engineering problems, well design, maintenance and rehabilitation; hydrodynamic dispersion, field testing essentials and procedures, groundwater quality, artificial recharge.

**CE 517 Industrial and Hazardous Waste Treatment and Disposal (3, 2 years, Sm)** Physical, chemical, and biological treatment processes for industrial and hazardous wastes; pretreatment systems, biodegradation of toxic chemicals; groundwater and soil decontamination; biofilters for air decontamination. *Prerequisite:* CE 463L.

**CE 518 Carbon Capture and Sequestration (3)** The needs for carbon capture and sequestration (CCS) and systematic introduction to CCS technologies. Main topics include: introduction to global change, world energy consumption, greenhouse gases control, carbon capture and separation, and carbon sequestration.

**CE 519 Transportation Engineering (3)** Principles of analysis and planning. Characteristics of transportation systems. Urban and regional systems. Relationship between environment and transportation systems. Estimating the impact of decisions.

**CE 520ab Ocean and Coastal Engineering (3-3)** Linear and nonlinear wave theories with engineering applications; wind waves; wave spectra; wave interactions with marine structures; ship mooring, harbor resonance; sediment transport; diffusion processes. *Prerequisite:* a: CE 309 or ENE 410.

**CE 522 Groundwater Hydrologic Modeling (3)** Simulation of groundwater hydrologic processes through mathematical, analog, and physical models.

**CE 523 Process Kinetics and Dynamics in Environmental Engineering (3)** Concepts and application of processes that affect water quality in natural and engineered systems. Major processes include: flocculation, sedimentation, filtration, oxidation, adsorption and membrane processes. *Prerequisite:* CE 453 or CE 463L.

**CE 525ab Engineering Analysis (3-3)** Typical engineering problems discussed on a physical basis. Setup and solution of problems by means of the existing mathematical tools.

**CE 528 Seismic Analysis and Design of Reinforced Concrete Bridges (3, Sp)** Fundamental concepts, methods and current codes used in the analysis and design of reinforced concrete bridge structures. Experimental and earthquake observations of bridge performance. *Prerequisite:* CE 457; *recommended preparation:* CE 538.

**CE 529ab Finite Element Analysis (a: 3, Fa; b: 3, Sp)** Basic concepts; stiffness method; variational methods; displacement method; isoparametric formulation; plane stress and strain; plates and shells; dynamics; stability; nonlinear analysis, heat transfer; computer applications.

**CE 530 Nonlinear Mechanics (3)** Nonlinear problems in structural dynamics; elastic-plastic response; approximate methods of nonlinear analysis; stability theory; stability of periodic nonlinear oscillations; Liapounov's method; nonlinear buckling problems.

**CE 531 Soil Mechanics (3)** Soil formation; clay mineralogy; steady state seepage; mechanical coupling between interstitial water and soil skeleton; experimental soil behavior and its modeling with constitutive equations. *Prerequisite:* CE 464.

**CE 532 Principles of Foundation Engineering (3)** Fundamental methods in foundation engineering; plastic collapse, limit equilibrium, bearing capacity, slope stability; soil-structure interaction; application of numerical methods, finite differences and finite elements. *Prerequisite:* CE 464.

**CE 533 Geotechnical Earthquake Engineering (3)** Provides a design-oriented understanding of the "state-of-the-practice" of soil mechanics and foundation engineering aspects of earthquake engineering.

**CE 534 Design of Earth Structures (3)** Designed to provide a thorough understanding of the analytical and design principles underlying the construction of a broad range of earth structures.

**CE 535ab Earthquake Engineering (a: 3, Fa; b: 3, Sp)** Fundamentals of earthquake engineering; characteristics of earthquakes; seismicity; response of linear and nonlinear multidegree systems; basic concepts in earthquake-resistant design; foundation problems.

**CE 536 Structural Design for Dynamic Loads (3)** Earthquake resistant design criteria with application to steel reinforced concrete and timber structures. Design of blast resistant structures and structures subject to impact loads. *Prerequisite:* CE 459 or CE 541a.

**CE 537 Advanced Reinforced Concrete (3, Fa)** Behavior of reinforced concrete members in terms of strength and deformation; relationship between behavior and building code requirements.

**CE 538 Prestressed Concrete (3, Sp)** Fundamental principles of prestressing by pre- and post-tensioning; elastic and time dependent losses; stress analysis and design of prestressed and precast concrete structures.

**CE 539 Advanced Steel Structures (3, Sp)** Design of tubular members and plate girders; design for torsional and seismic loads; general flexural theory; introduction to plastic design; connections.

**CE 540 Limit Analysis of Structures (3)**

Plastic analysis and design of frames. Fundamental theorems of plastic analysis; general methods of plastic analysis, design requirements, minimum weight design theorems and applications, shakedown theorems.

**CE 541ab Dynamics of Structures (a: 3, Fa;**

**b: 3, Sp) a:** Forced vibrations of discrete MDOF systems; modal analysis; energy methods; analytical dynamics; vibration of continuous systems; wave propagation; computational techniques; application of commercial software tools. *b:* Continuous system responses; approximate methods; introduction to structural control; random vibration concepts; response of continuous systems to random excitation; nonlinear systems (geometric theory), (approximate methods). *Prerequisite:* CE 541a.

**CE 542 Theory of Plates (3)** Theory of plate bending; rectangular and circular plates; anisotropic plates; energy methods; numerical methods; large deformations; sandwich plates. *Prerequisite:* CE 428 or CE 507.

**CE 543 Stability of Structures (3)** Critical loads of columns, beams, thin-wall bars, plates, shells; stability of frames and trusses; effect of inelastic behavior of materials; effect of dynamic loading.

**CE 544 Theory of Shell Structures (3)** General bending theory of shells; membrane theory; shells of revolution; numerical methods; dynamic response. *Prerequisite:* CE 428 or CE 507.

**CE 545ab Advanced Finite Element Method in Structural and Continuum Mechanics (3-3) a:**

Finite elements in nonlinear mechanics, elasticity, plasticity, viscoelasticity; advanced finite element applications in fracture mechanics, heat transfer, fluid mechanics; computational implementation of finite element method. *Prerequisite:* CE 529a. *b:* Mathematical aspects of the finite element method; correctness of discretizations for elliptic, parabolic, and hyperbolic equations; accuracy and convergence considerations; stability of time dependent algorithms. *Prerequisite:* CE 545a.

**CE 546 Structural Mechanics of Composite Materials (3)** Applications and manufacturing of composites: anisotropic materials; laminated composite plates and shells; buckling and dynamics; strength and failure; interlaminar stresses; delamination; thermal properties; design considerations.

**CE 549 Building Design Project (3, Sp)** Integrated design project following design office procedures. A building will be designed in detail using the team approach. Capstone for M.Eng. in Structural Design. *Prerequisite:* CE 459 or CE 541a, CE 458 or CE 529a, CE 537; *corequisite:* CE 539.

**CE 550 Computer-Aided Engineering (3)**

Basic concepts of computer-aided engineering. Modeling; simulation; visualization; optimization; artificial intelligence; manufacturing; information management. Organization and management of computer-aided engineering projects.

**CE 551 Computer-Aided Engineering Project (3)**

Computer-aided engineering in a project environment. Responding to RFPs; conceptual design; preliminary analysis; overall and detailed analysis and design; trade-off studies; project management; project presentation.

**CE 552 Managing and Financing Public Engineering Works (3, FaSpSm)**

Tools for improving the efficiency and effectiveness of public engineering works, taking into account the political and policy context. Graduate standing. *Recommended preparation:* micro-economic theory.

**CE 553 Chemical and Biological Processes in Environmental Engineering (3)**

Chemistry of softening, coagulation, disinfection, oxidation, corrosion control, dry and wet combustion and ion exchange; aerobic and anaerobic processes and the ecology of liquid and solid waste treatment. *Prerequisite:* CE 453.

**CE 554 Risk and Reliability Analysis for Civil Infrastructure Systems (3, Sp)**

Elements of feasibility, reliability, and risk analysis of civil infrastructure systems, simulation, optimization, life-cycle cost, evaluation and decision making.

**CE 555 Underwater Structures (3)** Loads on underwater structures; stress analysis of typical structural elements; buckling problems; dynamic response. *Prerequisite:* CE 507.

**CE 556 Project Controls – Budgeting and Estimating (3, FaSp)**

Fundamental principles and practices of cost estimating, budgeting, and cost control of construction projects. Case studies and software exercises based on project data. (Duplicates credit in the former CE 556a.) Open only to graduate students in engineering, architecture, business, or urban and regional planning.

**CE 557 Advanced Building Estimating (3, Sp)**

Processes in compiling a bid for construction of non-residential building.

**CE 558 International Construction and Engineering (3, Sp)**

Business development and project management in international markets. Topics include marketing, planning, contracts and negotiations, procurement, logistics, personnel and financing. Construction operations in adverse environments. Graduate standing in engineering, architecture, business, or urban planning required.

**CE 559 Strategic Planning in Construction Engineering (3, Sp)**

Elements and techniques of strategic planning for construction engineering. Fundamentals of engineering as a service sector enterprise. Assessment of markets (including international issues), competitors, and technology. Aspects of overseas engineering business. Management of technology and the role of R&D. Emphasis on concepts. *Recommended preparation:* CE 502.

**CE 560 Simulation of Civil Infrastructure Systems Performance (3)**

Time/space and frequency/wave number domain analysis, spectral representation of wind, earthquake and other natural loads, FEM techniques for system response simulation.

**CE 561 Uncertainty Quantification (3)**

Methods of quantifying uncertainty in civil engineering and related fields. Basic uncertainty modeling; advanced topics such as reliability analysis, Bayesian updating, random processes, random fields.

**CE 562ab Hydromechanics (3-3)**

Analytical solution of civil engineering problems concerned with hydraulic flow; water hammer, free-surface flow, waves and seepage flow; application of theory to research and design.

**CE 563 Chemistry and Biology of Natural Waters (3)**

Chemical and biological limnology; cycles of carbon, nitrogen, phosphorous, sulfur, and other biologically-mediated chemical transformations; effect of pollution on biology and chemistry of natural waters. *Prerequisite:* CE 443 and CE 453.

**CE 564 Methods for Assessment and Protection of Environmental Quality (3)**

Natural ecosystems, technologies for control and remediation of air, water, and soil pollution; natural hazards and urban lifeline systems; Design For The Environment (DFE).

**CE 565 Wave Propagation in Solids (3)**

Elastic waves in infinite and semi-infinite regions; plates and bars; steady-state and transient scattering; dynamic stress concentration; viscoelastic and plastic bodies.

**CE 566 Project Controls – Planning and Scheduling (3, FaSp)** Fundamental principles and practices of planning, CPM scheduling, and resource management. Development of project schedules using CPM theory applied to current and emerging software applications. (Duplicates credit in the former CE 556b.) Open only to graduate students in engineering, architecture, business, or urban and regional planning. *Recommended preparation:* CE 556.

**CE 567 Smart Infrastructures (3)** Examination of smart infrastructures relating to energy, water, waste and transportation drawing from the fields of engineering, sustainability, communications, sociology, and psychology.

**CE 570 Building Information Modeling for Collaborative Construction (3, Sp)** Multi-disciplinary and geographically distributed virtual project teams used to simulate engineering and construction problems for projects selected in collaboration with industry partners. Open only to Master's and Doctoral students. *Prerequisite:* CE 470; *recommended preparation:* CE 556, CE 566.

**CE 571 Nuclear Safety and Security: Human Performance and Safety Culture (3)** Provides an overview of human-systems integration considerations, human performance and safety culture in the nuclear power operations.

**CE 572 Construction Labor Management (2)** Unionism in construction. Craft tradition, objectives, regulation, motivation, labor force economics, productivity, and technical change. Hiring systems, supervision of project labor operations, jurisdictional administration.

**CE 579 Introduction to Transportation Planning Law (3)** Federal and state statutory and regulatory requirements affecting California transportation systems, including transportation planning and funding law; and government contracting, environmental, and civil rights requirements.

**CE 580 Law and Finance for Engineering Innovation (3)** (Enroll in ISE 565)

**CE 581 Negotiation For Engineering Management (3, Sp)** (Enroll in ISE 581)

**CE 583 Design of Transportation Facilities (3)** Planning, design, staging, construction, test, and maintenance of the public works and facilities for land, water, and air transportation. *Prerequisite:* CE 519, CE 457.

**CE 585 Traffic Engineering and Control (3, Sp)** Conceptual engineering geometric design, installation, and calibration of vehicular storage and traffic controls; safe flow optimization of vehicles on various thoroughfares. *Recommended preparation:* CE 471.

**CE 586x Management for Engineers (4)** (Enroll in AME 589x)

**CE 587 Transportation Energy Analysis (3)** Energy consumption and socioeconomic impacts of past, present, and future transportation systems; analysis of alternatives between energy-intensive and low-cost transportation modes.

**CE 588 Railroad Engineering (3)** Railroad infrastructure including passenger and freight operations, track alignment (horizontal and vertical) design, basic components and terminology used in rail design and an understanding of this mode of transportation. *Recommended preparation:* CE 471.

**CE 589 Port Engineering: Planning and Operations (3, Fa)** Physical and operational characteristics of marine ports; impact analysis of modern logistics on port operation, planning and management; optimization and efficiency solutions for container terminals.

**CE 590 Directed Research (1-12)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**CE 594abz Master's Thesis (2-2-0)** Credit on acceptance of thesis. Graded IP/CR/NC.

**CE 599 Special Topics (2-4, max 9)** Course content will be selected each semester to reflect current trends and developments in the field of civil engineering.

**CE 611 Stochastic Modeling and Simulation (3)** Stochastic methods for modeling and simulating physical, chemical and biological processes. Topics include: Stochastic partial differential equations, Monte Carlo simulations, moment equation methods, stochastic expansions. Open only to graduate students.

**CE 633 Urban Transportation Planning and Management (4, 2 years, Fa)** (Enroll in PPD 633)

**CE 634 Institutional and Policy Issues in Transportation (4, Sp)** (Enroll in PPD 634)

**CE 640 Advanced Theory of Elasticity (3)** Curvilinear tensors; equations of nonlinear elasticity; elementary solutions; small deformations superimposed on large deformations; bifurcation of equilibrium states; nonlinear shell theory. *Prerequisite:* CE 507.

**CE 645 Uncertainty Modeling and Stochastic Optimization (3)** Introduction to the mathematical foundations, numerical algorithms, and computational tools necessary for solving problems of optimization under uncertainty. Open only to graduate students.

**CE 647 Multiscale Methods in Mechanics (3)** Behavior of man-made and natural materials at different scales; experimental methods to characterize behavior; governing equations, interscale coupling, information exchange; probabilistic representations; error analysis. Open only to master's, doctoral, and professional students. *Prerequisite:* AME 525 or AME 526 or CE 525b.

**CE 690 Directed Research (1-4, max 8)** Laboratory study of specific problems by candidates for the degree Engineer in Civil Engineering. Graded CR/NC.

**CE 692 Transportation and the Environment (4)** (Enroll in PPD 692)

**CE 694abz Thesis (2-2-0)** Required for the degree Engineer in Civil Engineering. Credit on acceptance of thesis. Graded IP/CR/NC.

**CE 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**CE 794abcdz Doctoral Dissertation (2-2-2-2-0)** Credit on acceptance of dissertation. Graded IP/CR/NC.

Director: Lucio Soibelman, Ph.D.

Associate Director: Massoud Pirbazari, Ph.D.

### Faculty

*Fred Champion Professor of Civil and Environmental Engineering:* Constantinos Sioutas, Sc.D.

*Professors:* Ronald C. Henry, Ph.D. (*Civil Engineering*); Jiin-Jen Lee, Ph.D., P.E. (*Civil Engineering*)\*; James Moffett, Ph.D. (*Marine Environmental Biology*); Massoud Pirbazari, Ph.D. (*Civil Engineering*); Lucio Soibelman, Ph.D. (*Civil Engineering*)

*Research Assistant Professor:* Scott Fruin, Ph.D. (*Environmental Health, Keck School of Medicine*)

*Emeritus Professors:* Joseph S. Devinny, Ph.D. (*Civil Engineering*); George V. Chilingar, Ph.D.

\*Recipient of university-wide or school teaching award.

## Degree Requirements

### Educational Program Objectives

Environmental engineers are the technical professionals who identify and mitigate environmental damage. Environmental engineers provide safe drinking water, treat and properly dispose of wastes, maintain air quality, control water pollution and remediate sites contaminated by spills of hazardous substances. They monitor the quality of the air, water and land and develop improved means to protect the environment.

The undergraduate programs in environmental engineering have the following objectives:

#### (1) Professional Achievement

Graduates will be successful in their chosen field of engineering, compete effectively as problem solvers in a world of technological change, and become leaders in industry, academic or governmental institutions.

#### (2) Societal Impact

Graduates will make use of their knowledge of global and societal issues, environmental considerations and sustainability objectives to create a safe and healthy world.

#### (3) Organizational and Team-Building Skills

Graduates will use their organizational abilities, communication skills and strengths in collaborative teamwork to foster a productive and efficient work environment in the organizations with which they are associated.

#### (4) Professional Development

Graduates will uphold high ethical and professional standards, be active in professional engineering organizations, support the advancement of the practice of engineering and obtain professional licensure.

### (5) Continuing Education

Graduates will engage in lifelong learning, and be prepared to pursue graduate studies in engineering or other diverse fields such as business, law or medicine.

### Bachelor of Science in Environmental Engineering

See listing on page 624, Civil Engineering.

### Minor in Environmental Engineering

A minor in environmental engineering provides students with a basic knowledge of our environment, potential causes for its deterioration, methods to prevent or mitigate environmental hazards, and the means to improve its quality at reasonable costs. Students will learn how to control water pollution, maintain air quality, treat and properly dispose of wastes, and remediate sites contaminated due to improper disposal of hazardous waste. This minor also enhances students' employment opportunities in the field of environmental engineering. The program provides the necessary infrastructure for the pursuit of graduate studies in environmental engineering.

The minor in environmental engineering is offered to undergraduates in various fields of engineering and natural sciences.

#### Prerequisite courses

CHEM 105aLbL or CHEM 115aLbL; MATH 125, MATH 126 and MATH 226, and PHYS 151L.

REQUIRED COURSES		UNITS
CE 443	Environmental Chemistry	3
CE 453	Water Quality Control	3

CE 463L	Water Chemistry and Analysis	3
ENE 201	Introduction to Applied Environmental Science and Engineering	4
ENE 410	Environmental Fluid Mechanics	3
ENE 428	Air Pollution Fundamentals, or	
ENE 429	Air Pollution Control	3
ENE 495	Seminars in Environmental Engineering	1
		minimum 20

### Bachelor of Science in Civil Engineering Emphasis in Environmental Engineering

See listing under Civil Engineering on page 623.

### Master of Science in Environmental Engineering

See listing under Civil Engineering on page 625.

### Engineer in Environmental Engineering

Requirements for the Engineer in Environmental Engineering are the same as set forth in the general requirements. See page 584.

### Ph.D. in Engineering (Environmental Engineering)

See listing under Civil Engineering on page 626.

### Sustainable Cities Graduate Certificate

See the listing in the USC Price School of Public Policy section on page 893.

## Courses of Instruction

### ENVIRONMENTAL ENGINEERING (ENE)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**ENE 201 Introduction to Applied Environmental Science and Engineering (4)** Gateway to B.S. in Civil Engineering (Environmental Engineering), B.S., Environmental Engineering, and Minor in Environmental Engineering. Fundamental concepts of environmental science and engineering. Pollution control and remediation for air, water and soil. Pollution remediation for developing countries.

**ENE 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**ENE 400 Environmental Engineering Principles (3, Sp)** Analysis of water, air, and land pollution, including hazardous waste and engineering of mitigation measures. Water and waste water treatment analysis. *Prerequisite:* CHEM 105bL or CHEM 115bL; MATH 226; PHYS 152L.

**ENE 410 Environmental Fluid Mechanics (3)** Equation of motion; continuity, momentum, energy principles; dimensional analysis, similitudes; groundwater flows; transports in conduits and channels; mixing, dispersion in environments; manifold diffusers; hydraulic transients. (Duplicates credit in CE 309 and AME 309.) *Prerequisite:* MATH 245.

**ENE 428 Air Pollution Fundamentals (3, Fa)** Air pollution effects on man, vegetation, materials; pollutant sampling and analysis; air quality standards and criteria; meteorological factors and dispersion modeling. *Prerequisite:* MATH 245, PHYS 151L, CHEM 105bL or CHEM 115bL; *recommended preparation:* ENE 400 or CHE 350.

**ENE 429 Air Pollution Control (3, Sp)** Emission surveys; engineering controls of aerosols and gaseous contaminants at emission sources, disposition of contaminants. Field trips. Senior standing. *Prerequisite:* ENE 428; CE 309 or ENE 410.

**ENE 443 Environmental Chemistry (3)** (Enroll in CE 443)

**ENE 453 Water Quality Control (3)** (Enroll in CE 453)

**ENE 463L Water Chemistry and Analysis (3)** (Enroll in CE 463L)

**ENE 465 Water Supply and Sewerage System Design (3)** (Enroll in CE 465)

**ENE 486 Design of Solid and Hazardous Waste Engineering Systems (3, Fa)** Engineering design of solid and hazardous waste facilities such as waste minimization, secured landfill, and hazardous waste treatment. *Prerequisite:* ENE 400.

**ENE 487 Environmental Biotechnology and Bioremediation (3)** Understanding and designing microbiological processes for environmental protection; learning how processes in environmental biotechnology work; emerging applications for bioremediation of hazardous chemicals in the environment. *Prerequisite:* CE 210L, BISC 320L.

**ENE 495 Seminars in Environmental Engineering (1, FaSp)** Hazardous waste management, biodegradation of environmental pollutants, groundwater problems, waste minimization, energy resources, and air pollution control.

**ENE 502 Environmental and Regulatory Compliance (3)** Federal and state environmental laws; environmental impact assessment techniques; permitting for industrial facility construction and operation. *Prerequisite:* graduate standing.

**ENE 503 Microbiology for Environmental Engineers (3)** (Enroll in CE 503)

**ENE 504 Solid Waste Management (3)** (Enroll in CE 504)

**ENE 505 Energy and the Environment (3, Fa)** Environmental effects of energy development using fossil and fissile fuels, geothermics, photosynthesis, and other sources. Relationship of elemental cycles to the life supporting systems.

**ENE 506 Ecology for Environmental Engineers (3, Fa)** The role of environmental engineering in maintaining stability of freshwater, marine, and terrestrial ecosystems; macroscopic plant and animal forms as indicators of water quality.

**ENE 510 Water Quality Management and Practice (3, Fa)** Surface and ground water quality and resources management; water pollution in aquatic environment; water/wastewater infrastructure systems and management.

**ENE 513L Instrumental Methods for Environmental Analysis (3)** (Enroll in CE 513L)

**ENE 514ab Advanced Sanitary Engineering Design (3-3)** (Enroll in CE 514ab)

**ENE 516 Hazardous Waste Management (3)** Standards and regulations for the management of hazardous waste: identification, transportation, monitoring, storage, treatment, and disposal practices.

**ENE 517 Industrial and Hazardous Waste Treatment and Disposal (3)** (Enroll in CE 517)

**ENE 518 Environmental Systems Engineering and Management (3)** Evaluating, implementing and managing effective environmental systems to prevent pollution, conserve energy and resources, reduce risks and achieve sustainability in business and industries.

**ENE 523 Process Kinetics and Dynamics in Environmental Engineering (3)** (Enroll in CE 523)

**ENE 526 Particulate Air Pollutants: Properties/Behavior/Measurement (3)** Gaseous and particulate air pollutants, their measurement and instrumentation methods, and their effects on the environment and human health; studies on toxicity and risk assessment of selected pollutants.

**ENE 535 Air Pollution Management: Exposure, Health Effects and Risk (3, Sp)** Pollutant sampling; occupational, community, and personal exposures; receptor modeling; data analysis; health effects of air pollutants.

**ENE 553 Chemical and Biological Processes in Environmental Engineering (3)** (Enroll in CE 553)

**ENE 560 Environmental Aspects of Oil and Gas Production (3)** Environmental aspects of drilling for and producing oil and gas, and the necessary safety practices. Attention is given to the urban areas.

**ENE 563 Chemistry and Biology of Natural Waters (3)** (Enroll in CE 563)

**ENE 580 Applied Environmental Engineering Biotechnology (3)** Fundamentals of bioremediation processes; bioremediation technologies for decontamination of air, water, and soil; global applications of bioremediation techniques.

**ENE 590 Directed Research (1-12)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**ENE 594abz Master's Thesis (2-2-0)** Credit on acceptance of thesis. Graded IP/CR/NC.

**ENE 596 Chemical Reactions in the Atmosphere (3, Fa)** Chemical reactions and scavenging processes important in urban air pollution. Effects of solar irradiation on vehicle exhaust gases, oxides of nitrogen and sulfur.

**ENE 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**ENE 794abcdz Doctoral Dissertation (2-2-2-0)** Credit on acceptance of dissertation. Graded IP/CR/NC.

## Computer Engineering

### Undergraduate Degree

#### Education Program Objectives

The undergraduate program in computer engineering and computer science has the following objectives:

- (1) Graduates will design and develop computer hardware that reflects the exigencies imposed by software design and development considerations.
- (2) Graduates will develop software that makes efficient use of current and developing hardware technologies.
- (3) Graduates will continue to develop the scientific and engineering skills and knowledge that will enable them to design and implement computer systems that effectively and efficiently integrate developing hardware and software technologies.
- (4) Graduates will be exposed to extensive work experiences in both the areas of computer engineering and computer science.
- (5) Most graduates will enter employment in their field.
- (6) Some graduates will undertake graduate education in computer engineering and/or computer science.
- (7) Graduates will engage in lifelong learning and understand contemporary developments in the field.
- (8) The reputations of the electrical engineering and computer science departments, which jointly sponsor the CECS program, for attracting quality students and producing quality graduates, will be continuously improved.

#### Bachelor of Science in Computer Engineering and Computer Science

Students attaining the Bachelor of Science degree in computer engineering and computer science would possess the scientific and engineering skills and knowledge that would enable them to design and implement computer systems that effectively and efficiently integrate developing hardware and software technologies. This degree is administered jointly by the Departments of Computer Science and Electrical Engineering.

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied towards the major, regardless of the department in which the courses are taken.

In addition, CECS majors must complete a minimum of 30 units of course work in humanities and social sciences.

COMPOSITION/WRITING REQUIREMENTS		UNITS

<b>Total units:</b>	<b>128</b>

\*GE Category VI is taken concurrently with WRIT 140.

\*\*Satisfies GE Category III requirement.

\*\*\*Any course in physics, biology or chemistry beyond the basic science requirement or in another scientific discipline. See adviser for list of approved courses.

+Engineering Economy/Business Elective (1 course)  
Applicable courses include: BUAD 301, BAEP 450x, ISE 460

++Technical Electives (4 courses)

Applicable courses include: CSCI 300, CSCI 351, CSCI 445, CSCI 459, CSCI 460, CSCI 464, CSCI 477ab, CSCI 480, CSCI 485, CSCI 486, CSCI 490x, CSCI 491ab, CSCI 499; EE 450, EE 459L, EE 465, EE 477L, EE 490x, EE 499; MATH 458. Students may also choose one adviser-approved course from the 300- and 400-level ITP offerings. Other courses may be applicable; please see an adviser for approval.

## Graduate Degrees

The graduate program in computer engineering, offered through the Department of Electrical Engineering, is designed to provide students with an intensive background in the analysis, structure, design and function of digital computers and information processing systems. In addition to giving each student a fundamental background in digital logic, computer architecture and operating systems, a wide variety of elective courses allows for study in the following specialized areas: artificial intelligence; computer architecture; computer networks; computer system performance; design automation; fault-tolerant computers; microprocessors; parallel processing; real-time systems; robotics; and VLSI design.

### Master of Science in Computer Engineering

The Master of Science in Computer Engineering is earned by completing an integrated program of at least 27 units of approved course work in computer engineering and computer science. No more than three courses (maximum 12 units) may be counted at the 400 level – at least 18 adviser-approved units must be taken at the 500 or 600 level.

All applicants must have taken the entrance requirement courses (or equivalent in other institutions) in order to be admitted to the program. Entrance requirement course credit cannot be applied toward the degree. A fundamental course may be waived by taking a placement exam. In case a placement exam is not offered, a fundamental course may be waived by a designated faculty member.

At least 18 units must be taken at the 500-level or above. At least 18 units must be taken in electrical engineering, 15 of which must be taken at USC. Units taken outside of electrical engineering or computer science must be approved in advance by a computer engineering adviser and must be substantive in content and related to the degree objective. Up to 3 units of Directed Research (EE 590) with a computer engineering faculty member may be applied toward the degree.

#### ENTRANCE REQUIREMENT COURSES

		UNITS
CSCI 455x	Introduction to Programming Systems Design	4
EE 357	Basic Organization of Computer Systems	3

Students must take or waive all four of the following fundamental courses (with the option of EE 450 or EE 465):

#### FUNDAMENTAL COURSES

		UNITS
CSCI 402x	Operating Systems	3
EE 450	Introduction to Computer Networks, or Probabilistic Methods in Computer Systems Modeling	3
EE 465		3
EE 457	Computer Systems Organization	3
EE 477L	MOS VLSI Circuit Design	4

Students must take at least two of the following core courses (with the option of EE 550 or EE 555):

#### CORE COURSES

		UNITS
EE 550	Design and Analysis of Computer Communication Networks, or Broadband Network Architectures	3
EE 555		3
EE 557	Computer Systems Architecture	3
EE 577a	VLSI System Design	3

Students must take at least 6 units from the following list of elective courses (cannot overlap with the core courses):

Computer Science: CSCI 545, CSCI 546, CSCI 547, CSCI 551, CSCI 555, CSCI 558L, CSCI 561, CSCI 565, CSCI 570, CSCI 584, CSCI 585, CSCI 595

Electrical Engineering: EE 532, EE 536ab, EE 549, EE 550, EE 552, EE 554, EE 555, EE 557, EE 558, EE 560, EE 577ab, EE 579, EE 630, EE 650, EE 652, EE 653, EE 657, EE 658, EE 659, EE 677, EE 680, EE 681

A minimum grade point average of 3.0 (A = 4.0) must be earned on all course work applied toward the master's degree in computer engineering. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree. Transfer units which count as credit (CR) toward the master's degree are not computed in the grade point average. All other Viterbi School of Engineering requirements for the Master of Science apply.

### Doctor of Philosophy in Computer Engineering

The requirements for the Doctor of Philosophy (Ph.D.) degree in computer engineering are in strict conformity with the requirements of the Graduate School. Program requirements for the Ph.D. in computer engineering are the same as those for the Ph.D. in electrical engineering except that the major field is computer engineering. See general requirements for graduate degrees.

Screening and qualifying examinations are administered by the computer engineering faculty. Students should contact the Electrical Engineering-Systems Department Office for further information.

#### COURSE REQUIREMENTS UNITS

The following course work must be completed; these courses can be included in the 60-unit course work requirement:

Take two courses from theory area and four courses from the other three areas (hardware, software and systems), including at least one course from each area to total six courses.

#### Theory Area Courses

CSCI 570	Analysis of Algorithms	3
EE 465	Probabilistic Methods in Computer Systems Modeling, or	
EE 549	Queuing Theory for Performance Modeling	3
EE 562a	Random Processes in Engineering	3
EE 565a	Information Theory	3
MATH 410	Fundamental Concepts of Modern Algebra, or	
MATH 425a	Fundamental Concepts of Analysis	4
MATH 432	Applied Combinatorics, or	
MATH 533	Combinatorial Analysis and Algebra	4

#### Hardware Area Courses

EE 536a	Mixed Signal Integrated Circuit Design	3
EE 552	Asynchronous VLSI Design	3
EE 557	Computer Systems Architecture	3

#### Software Area Courses

CSCI 565	Compiler Design, or	
CSCI 595	Advanced Compiler Design	4
CSCI 577a	Software Engineering	4
CSCI 585	Database Systems	3

#### Systems Area Courses

CSCI 551	Computer Communications	3
CSCI 555	Advanced Operating Systems	3
CSCI 561	Foundations of Artificial Intelligence	3
EE 543a	Digital Control Systems	3
EE 554	Real Time Computer Systems	3
EE 550	Design and Analysis of Computer Communication Networks, or	
EE 555	Broadband Network Architectures	3
EE 569	Introduction to Digital Image Processing	3

*Associate Professors:* Shahram Ghandeharizadeh, Ph.D.; Laurent Itti, Ph.D.; Stefan Schaal, Ph.D. *(Neuroscience Center)*

*Assistant Professors:* Jernej Barbic, Ph.D.; Shaddin Dughmi, Ph.D.; William GJ Halfond, Ph.D.; Ethan Katz-Bassett, Ph.D.; David Kempe, Ph.D.; Yan Liu, Ph.D.; Fei Sha, Ph.D.; Minlan Yu, Ph.D.

*Joint Professors:* Irving Biederman, Ph.D. *(Psychology)*; Edward Blum, Ph.D. *(Mathematics)*; Melvin Breuer, Ph.D. *(Electrical Engineering)*; Todd Brun, Ph.D.; Tim Ting Chen, Ph.D. *(Computational Molecular Biology)*; Kai Hwang, Ph.D. *(Electrical Engineering)*; Rajiv Kalia, Ph.D. *(Physics)*; Carl Kesselman, Ph.D. *(Industrial and Systems Engineering)*; Bhaskar Krishnamachari, Ph.D. *(Electrical Engineering)*; C-C Jay Kuo, Ph.D.

(*Signal and Image Processing*); Stephen Lu, Ph.D. (*Industrial and Systems Engineering*); Shri Narayanan, Ph.D. (*Electrical Engineering*); Fernando Ordonez, Ph.D. (*Industrial and Systems Engineering*); Viktor Prasanna, Ph.D. (*Electrical Engineering*); Konstantinos Psounis, Ph.D.; C.S. Raghavendra, Ph.D. (*Electrical Engineering*); Irving Reed, Ph.D. (*Electrical Engineering*); Boris Rozovsky, Ph.D. (*Mathematics*); Nicolas Schweighofer, Ph.D. (*Biokinesiology and Physical Therapy*); Francisco Valero-Cuevas (*Biomedical Engineering*); Priya Vashishta, Ph.D. (*Material Science, Physics*); Michael Waterman, Ph.D. (*Mathematics*); Richard Weinberg, Ph.D. (*Cinematic Arts*); John Wilson, Ph.D. (*Geography*)

*Adjunct Professors:* Michael Carey, Ph.D., Danny Cohen, Ph.D.; Rick Selby, Ph.D.; Sethu Vijayakumar, Ph.D.; Roger Zimmermann, Ph.D.

*Adjunct Associate Professors:* Steve Chien, Ph.D.; Mary Hall, Ph.D.; Larry Matthies, Ph.D.; Zhengyou Zhang, Ph.D.

*Adjunct Assistant Professors:* Aude Billard, Ph.D.; Alexander Egyed, Ph.D.; Andrew Howard, Ph.D.; Auke Ijspeert, Ph.D.; Steve Jacobs, Ph.D.; Marcelo Kallmann, Ph.D.; Sofus Macskassy, Ph.D.; Chris Mattmann, Ph.D.; Xin Wang, Ph.D.

*Research Professors:* Paul Debevec, Ph.D.; Yolanda Gil, Ph.D.; John Heidemann, Ph.D.; Randall Hill, Ph.D.; Jerry Hobbs, Ph.D.; Carl Kesselman, Ph.D.; Kevin Knight, Ph.D.; Craig Knoblock, Ph.D.; Herbert Schorr, Ph.D.; William Swartout, Ph.D.

*Research Associate Professors:* Ann L. Chervenak, Ph.D.; Ewa Deelman, Ph.D.; Andrew Gordon, Ph.D.; Jonathan Gratch, Ph.D.; Eduard Hovy, Ph.D.; Robert Lucas, Ph.D.; Daniel Marcu, Ph.D.; Stacey Marsella, Ph.D.; Robert Neches, Ph.D.; Clifford Neuman, Ph.D.; Wei-Min Shen, Ph.D.; Joseph Touch, Ph.D.

*Research Assistant Professors:* Jose Luis Ambite, Ph.D.; Yu-Han Chang, Ph.D.; David Chiang, Ph.D.; Young Cho, Ph.D.; Morteza Dehghani, Ph.D.; David DeVault, Ph.D.;

Pedro Diniz, Ph.D.; Alexandre Francois, Ph.D.; Aram Galstyan, Ph.D.; Abhijeet Ghosh, Ph.D.; Liang Huang, Ph.D.; Jihie Kim, Ph.D.; Zornitsa Kozareva, Ph.D.; Kristina Lerman, Ph.D.; Anton Leuski, Ph.D.; Rajiv Maheswaran, Ph.D.; Donald Metzler, Ph.D.; Jelena Mirkovic, Ph.D.; Louis-Philippe Morency, Ph.D.; Patrick Pantel, Ph.D.; Pieter Peers, Ph.D.; Pedro Szekely, Ph.D.; David Traum, Ph.D.; Wei Ye, Ph.D.; Suya You, Ph.D.

*Lecturers:* Claire Bono; William Cheng, Ph.D.; St. John Colon, MFA; Aaron Cote, Ph.D.; Michael Crowley, Ph.D. (*Senior Lecturer*); Scott Easley, B.A.; Massoud Ghyám-Khah, Ed.D.; Parag Havaldar, Ph.D.; Krishnamurthy Narayanaswamy, Ph.D.; Farid Parvini, Ph.D.; Saty Raghavachary, Ph.D.; Shawn Shamsian, Ph.D.; Sheila Tejada, Ph.D. (*Senior Lecturer*); David Wilczynski, Ph.D.; Michael Zyda, Ph.D. (*Professor of Engineering Practice*)

*Emeritus Professor:* George Bekey, Ph.D. (*Electrical Engineering, Biomedical Engineering*)

## Bachelor of Science

### Educational Program Objectives

#### (1) Technical Competence

Graduates have solved problems encountered in modern practice using the mathematics skills and knowledge about computer hardware and software learned at the university.

Graduates have worked on projects in which they were required to model, analyze, design and experimentally evaluate components or systems to achieve desired technical specifications subject to the reality of economic constraints.

#### (2) Professional Development

Graduates have followed a career path for which they have been trained either through suitable employment or graduate studies.

Graduates have adapted or extended their professional skills in order to compete effectively in a world of rapid technological change.

Graduates have moved into fields with strong information technology components, such as business, law, cinema and music, through graduate-level studies and the process of life-long learning.

#### (3) Citizenship in the Global Community

Graduates have shown the capabilities and communication skills necessary to function effectively either as individuals, members or leaders of multidisciplinary teams in a diverse global economy.

Graduates have shown an understanding of the importance of high ethical and professional standards as well as the significance of engineering decisions and solutions in a global, environmental and societal context.

### Bachelor of Science in Computer Science

The undergraduate program in computer science is an interdisciplinary program leading to the Bachelor of Science in computer science. The program is designed to provide both an academic and professional orientation.

General admission requirements for the undergraduate program are the same as those of the university and the USC Viterbi School of Engineering and include 3 to 5 units of mathematics and one unit of science (biology, chemistry or physics) together with satisfactory scores on the Scholastic Aptitude Test and Achievement Tests. The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied towards the

major, regardless of the department in which the courses are taken. Computer science is a department in the USC Viterbi School of Engineering; however, the Bachelor of Science degree with a major in computer science is awarded through the USC Dornsife College. Candidates must complete general education requirements; see pages 63 and 250.

\*GE Category VI is taken concurrently with WRIT 140.

\*\*WRIT 340 Advanced Writing (Communication for Engineers) is strongly recommended for CSCI majors.

\*\*\*Satisfies general education requirement.

\*\*\*\*Any course in physics, biology or chemistry beyond the basic science requirement or in another scientific discipline. See adviser for a list of approved electives.

+The university allows engineering students to replace GE Category IV with a second course in Categories I, II or VI.

*Foreign Language Requirement*

Three semesters of a single language and passing the skill level examination in that language or passing the skill level examination in a foreign language.

*Technical Electives (four courses)*

Applicable courses include: CSCI 300, CSCI 351, CSCI 445, CSCI 459, CSCI 460, CSCI 464, CSCI 480, CSCI 485, CSCI 490x, CSCI 499; EE 450, EE 454L, EE 459L, EE 465, EE 477L, EE 490x, EE 499; MATH 458. Other courses may be applicable; please see an adviser for approval.

*Engineering Economy/Business Elective (one course)*

Applicable courses include: BUAD 301, BAEP 450x, ISE 460

**Bachelor of Science in Computer Science (Games)**

The goal of the B.S. in Computer Science (Games) program is to graduate students with a solid grounding in computer science and a cross-disciplinary background in game development. Topics covered in the cross-disciplinary game development portion of the degree program include game production, visual design for games and interactives, computer animation, video game programming, game hardware architectures, game engine programming, serious game development, introductory and intermediate game design, and two semester-long final game projects. Students graduating from this program will be capable of engineering next-generation games and simulations and their technologies in the entertainment and serious game fields. Additionally, graduates from this program will be able to further their education in graduate programs in game development and computer science. This degree will be offered by the USC Dornsife College of Letters, Arts and Sciences.

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied towards the major, regardless of the department in which the courses are taken.

*Requirements for the B.S. in Computer Science (Games):***COMPUTER SCIENCE AND****COMPUTER ENGINEERING (36 UNITS) UNITS**

CSCI 101L Fundamentals of Computer Programming 3  
CSCI 102L Data Structures 3  
CSCI 200 Object-Oriented Programming 3  
CSCI 201L Principles of Software Development 3  
CSCI 271 Discrete Methods in Computer Science 3

CSCI 303 Design and Analysis of Algorithms 3  
CSCI 377 Introduction to Software Engineering 3  
CSCI 402x Operating Systems 3  
CSCI 460 Introduction to Artificial Intelligence 3  
CSCI 480 Computer Graphics 3  
EE 352L Computer Organization and Architecture 3  
EE 450 Introduction to Computer Networks 3

**GAME DEVELOPMENT (40 UNITS)****UNITS**

CSCI 180 Survey of Digital Games and Their Technologies 3  
CSCI 281 Pipelines for Games and Interactives 3  
CSCI 486 Serious Games Development 3  
CSCI 491abL Final Game Project 4-2  
CTAN 452 Introduction to 3-D Computer Animation 2  
CTIN 484L Intermediate Game Development 2  
CTIN 488 Game Design Workshop 4  
CTIN 489 Intermediate Game Design Workshop 2  
EE 452L Game Hardware Architectures 3  
ITP 280 Video Game Production 4  
ITP 380 Video Game Programming 4  
ITP 485 Programming Game Engines 4

**MATH (11-12 UNITS)****UNITS**

MATH 125 Calculus I 4  
MATH 126 Calculus II 4  
MATH 225 Linear Algebra and Linear Differential Equations, or 4  
EE 241 Applied Linear Algebra for Engineering 3

**SCIENCE (4 UNITS)****UNITS**

PHYS 151L\* Fundamentals of Physics I: Mechanics and Thermodynamics 4

**WRITING (7 UNITS)****UNITS**

WRIT 140 Writing and Critical Reasoning 4  
WRIT 340 Advanced Writing 3

**GENERAL EDUCATION (20 UNITS)\*\*****UNITS**

The major will comply with the university general education and diversity requirements.

\*General Education requirements total 24 units. However, PHYS 151L also satisfies the GE Category III requirement.

\*\*The foreign language requirement will be waived for students in this program.

**TECHNICAL ELECTIVES** **UNITS**

Choose a minimum of 6 units from the following:

CSCI 351	Programming and Multimedia on the World Wide Web	3
CSCI 477ab***	Design and Construction of Large Software Systems	2-2
CSCI 485	File and Database Management	3
CSCI 490x	Directed Research	2-8
CSCI 499	Special Topics	2-4
CTAN 330	Animation Fundamentals	2
CTAN 443L	3-D Animation and Character Design	2
CTIN 401L	Interface Design for Games	2
CTIN 403	Advanced Visual Design for Gamers	2
CTIN 404L	Usability Testing for Games	2
CTIN 405L	Design and Technology for Mobile Experiences	2
CTIN 406L	Sound Design for Games	2
CTIN 458	Business and Management of Games	2
CTIN 459L***	Game Industry Workshop	4
CTIN 462	Critical Theory and Analysis of Games	4
CTIN 463	Anatomy of a Game	4
CTIN 482	Designing Online Multiplayer Game Environments	2
CTIN 483	Introduction to Game Development	4
CTIN 492L	Experimental Game Topics	4, max 8
EE 320	Digital Media Basics for Multimedia	3
ENGR 395abc***	Cooperative Education Work Experience (students who take 3 units of Co-op may use it as one technical elective).	1 or 2, max 5
Total units required for degree:		128

Other courses may be eligible subject to adviser approval.

\*\*\*highly recommended

Note: Students are strongly encouraged to take at least 1 unit of internship

Note: Free elective units: (3-4 units)

Note: If a student chooses MATH 225 (4), then no units of free electives would be needed to complete the degree requirements. If EE 241 (3) is chosen, then the student would require 4 units of free electives.

**Bachelor of Science in Computer Science/  
Business Administration**

The combined Bachelor of Science degree program in computer science/business administration offers qualified students the opportunity to gain an educational foundation in both areas. Students must meet the admission requirements for both the Computer Science department in the Viterbi School of Engineering and the Marshall School of Business. The degree is administered by the Computer Science department.

Students should work with advisers in both the Marshall School and the Viterbi School in making appropriate course selections. The requirement for the degree is 135 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied toward the major, regardless of the department in which the courses are taken.

**ENGINEERING REQUIREMENTS** **UNITS**

CSCI 101L	Fundamentals of Computer Programming	3
CSCI 102L	Data Structures	3
CSCI 200	Object-Oriented Programming	3
CSCI 201L	Principles of Software Development	3
CSCI 271	Discrete Methods in Computer Science	3
CSCI 303	Design and Analysis of Algorithms	3
CSCI 351	Programming and Multimedia on the World Wide Web	3
CSCI 377	Introduction to Software Engineering	3
CSCI 460	Introduction to Artificial Intelligence, or	
CSCI 480	Computer Graphics, or	
CSCI 485	File and Database Management	3
CSCI 477ab	Design and Construction of Large Software Systems	2-2
CSCI technical electives (see department for approved list)		6
EE 101	Introduction to Digital Logic	3
EE 201L	Introduction to Digital Circuits	4
ENGR 102	Freshmen Academy Seminar	2
MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 225	Linear Algebra and Linear Differential Equations, or	4
EE 241	Applied Linear Algebra for Engineering	3
Basic science requirements I and II*		4-4
Total engineering units:		65-66

**BUSINESS REQUIREMENTS** **UNITS**

ACCT 410x	Accounting for Non-Business Majors	4
BUAD 302	Communication Strategy in Business	4
BUAD 304	Organizational Behavior	4
BUAD 306	Business Finance	4
BUAD 307	Marketing Fundamentals	4
BUAD 497	Strategic Management	4
Business Electives		
300- or 400-level ACCT, BAEP, non-required BUAD, BUCO, FBE, IOM, MKT or MOR		
ECON 351x	Microeconomics for Business	4
ECON 352x	Macroeconomics for Business	4
BUAD 310	Applied Business Statistics, or	4
EE 364	Introduction to Probability and Statistics for Electrical Engineering	3
Total business units		43-44
Total program units:		108-110

\*Basic science requirement: PHYS 151L and PHYS 152L or CHEM 105abL or BISC 120L and BISC 220L

**Physics/Computer Science Major Requirements for the Bachelor of Science**

This program is intended for students with dual interests in physics and computer science who wish to complete the essential courses for both majors within their normal four year career. See the Physics and Astronomy Department section, page 431, for course requirements.

**Bachelor of Science in Computer Engineering and Computer Science**

See the listing under Computer Engineering, page 634.

**Minor in Computer Science**

The computer science minor introduces the concepts, tools and techniques that are involved in the programming of computers. The minor prepares students to achieve mastery in several current programming languages. In addition, the student will learn about creating effective user interfaces and how to build applications that are available on the Internet.

REQUIRED COURSES		UNITS
<i>Lower division</i> (12 units)		
CSCI 101L	Fundamentals of Computer Programming	3
CSCI 102L	Data Structures	3
CSCI 200	Object-Oriented Programming	3
CSCI 201L	Principles of Software Development	3
ELECTIVES		UNITS
12 units selected from the following courses:		
CSCI 351	Programming and Multimedia on the World Wide Web	3
CSCI 377	Introduction to Software Engineering	3
CSCI 445	Introduction to Robotics	4
CSCI 460	Introduction to Artificial Intelligence	3

CSCI 477ab	Design and Construction of Large Software Systems	2-2
CSCI 480	Computer Graphics	3
CSCI 485	File and Database Management	3
CSCI 499	Special Topics	2-4
Total: 24 units		

Note: Students majoring in business may wish to take CSCI 477 and CSCI 485: These courses will prepare them to utilize computers in a corporate setting.

Note: Students majoring in fine arts or cinematic arts may wish to take CSCI 460 and CSCI 480: These courses will prepare them to apply computers to movies and online games.

Note: Students majoring in chemistry or physics may prefer to take CSCI 445 and CSCI 460: These courses will prepare them to create sophisticated software for scientific applications.

### Minor in Engineering Technology Commercialization

See listing under the Special Educational Opportunities section, page 586.

### Minor in 2-D Art for Games

This interdisciplinary minor integrates three major disciplines (fine arts, computer science and interactive media) to develop the 2-D visual skills necessary to conceptualize and illustrate images for games. For more information, see Roski School of Fine Arts, page 690.

### Minor in 3-D Art for Games

The focus of the 3-D Art for Games minor is a trans-disciplinary approach that incorporates the creative, technological and team-based communication skills necessary to develop 3-D art skills for video games. For more information, see Roski School of Fine Arts, page 690.

## Graduate Degrees

The requirements listed below are special to this department and must be read in conjunction with the general requirements of the USC Viterbi School of Engineering for master's degrees and the general requirements of the USC Graduate School for Ph.D. degrees, page 102. The graduate program in computer science provides intensive preparation in the basic concepts and techniques related to the design, programming and application of digital computers. Both the Master of Science and Doctor of Philosophy degrees are offered.

A Master of Science degree with specialization in software engineering is also offered. The program seeks to prepare students for an industrial leadership career in software engineering. It also serves as an introduction to this area for students who wish to pursue advanced studies and research leading to a Ph.D.

A Master of Science degree with specialization in intelligent robotics is also offered. This program seeks to prepare students for an industrial career in the development of computer systems for CAD/CAM (Computer-Aided Design and Manufacturing) and robotics. It also serves as an introduction to this area for students who wish to pursue advanced studies and research leading to a Ph.D. The emphasis is on the domain of mechanical, electromechanical and mechatronic products. (CAD for digital systems is covered by a separate program offered by the Electrical Engineering-Systems department.)

A Master of Science degree with a specialization in computer networks is offered. This specialization prepares students in the areas of computer communications, networks and distributed processing.

A Master of Science in computer science (multimedia and creative technologies) is also offered, see page 678.

A Master of Science in computer science (high performance computing and simulations) is also offered, see page 642.

### Admission and Prerequisites

Admission is determined by the Office of Admission and the Viterbi School of Engineering, in consultation with the Computer Science Department. The applicant is required to have a bachelor's degree or its equivalent from an accredited college or university; satisfactory scores on the verbal and quantitative portions of the aptitude test of the Graduate Record Examinations (one advanced test from computer science, mathematics or engineering is recommended); and a substantial background in computing constitutes a minimum requirement. Foreign students must earn a satisfactory score on the Test of English as a Foreign Language.

### Master of Science in Computer Science

#### *Requirements for Graduation without a Thesis*

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in computer science. This average must also be earned on all graduate courses completed at USC (400-level and above). Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average. The required courses are as follows: CSCI 570 and one course from each of the following two categories: *I.* CSCI 551, CSCI 555, CSCI 571, CSCI 577a, CSCI 585, EE 557; *II.* CSCI 545, CSCI 561, CSCI 564, CSCI 574, CSCI 580, CSCI 582. A maximum of 9 units may be taken at the 400 level from approved courses in either electrical engineering or computer science; the remaining units must be approved courses at the 500 or 600 level. CSCI 590 and ENGR 596 may be counted for a maximum of 6 units. Total units required for the degree is 27. No examination is required for the degree. Other requirements for the Master of Science in computer science are the same as set forth in the general requirements for Viterbi School of Engineering master's degrees.

**Thesis Option**

With the approval of a supervising professor, qualified students may be allowed to pursue a thesis option. Students pursuing the thesis option must satisfy all of the policies and course requirements for the master's degree with the following exceptions: A maximum of 6 units from approved courses may be taken at the 400 level in either electrical engineering or computer science; and CSCI 590 and ENGR 596 may be counted for a maximum of 2 units. In addition, these students must enroll in a minimum of two semesters of CSCI 594*abz* for a maximum of 4 units. Total units required for the degree is 27. The thesis must comply with all requirements set by the Graduate School. The thesis option is available to students pursuing degrees in the following programs: M.S. in computer science and M.S. in computer science with specializations in computer networks, software engineering, intelligent robotics, multimedia and creative technologies, computer security and high performance computing simulations.

**Master of Science in Computer Science (Game Development)**

The goal of the M.S. in Computer Science (Game Development) program is to graduate students with a core in computer science, an engineering-oriented game development core and a concentration in one of the key research directions in game development infrastructure, cognition and games, immersion and serious games. Infrastructure is researching and developing the software and hardware infrastructure necessary for the development of the future of interactive games and large-scale simulations; massively multiplayer online games (MMOGs) and simulation networks; game engines and tools; instant games; wireless and mobile games and infrastructures; and next generation consoles. Cognition and games is developing theories for modeling and simulating computer characters and story; developing methods for modeling, simulating and displaying human emotion; analyzing large-scale game play; and developing theories for infusing pedagogy with game play. Immersion is researching and developing the technologies to engage the mind of the game player via sensory stimulation; reading the human emotional state and providing that as an input to the game; and emotionally adaptive game software architectures. Serious games and simulations is developing a theory for the deployment of games and simulations for purposes of education and training, health, public policy and strategic communication; game evaluation; serious game development; and human performance engineering. Students graduating from this program will be capable of engineering next generation games and simulations and their required technologies immediately upon graduation in the entertainment and serious game fields. Additionally, graduates from this

program will be able to further their education in graduate programs in game development and computer science. The long-term goal with this M.S. degree is to establish research and development directions that create a science of games and an accompanying archival literature that improves game development for both serious and entertainment purposes.

CSCI (9 UNITS)		UNITS
CSCI 570	Analysis of Algorithms	3
CSCI 580	3-D Computer Graphics and Rendering	3
One of the following:		
CSCI 555	Advanced Operating Systems	3
CSCI 561	Foundations of Artificial Intelligence, or	
CSCI 573	Advanced Artificial Intelligence	3
CSCI 571	Web Technologies	3
CSCI 577a	Software Engineering	4

CTIN 488	Game Design Workshop	4
CSCI 522	Game Engine Development	4
EE 452	Game Hardware Architectures	3

PROJECT CLASSES (7 UNITS)		UNITS
CSCI 529ab	Advanced Game Projects	4-3

**ELECTIVES** UNITS  
Complete two courses from one of the following areas of concentration: Infrastructure; Cognition and Games; Immersion; Serious Games.

**Infrastructure**

CSCI 503	Parallel Programming	3
CSCI 520	Computer Animation and Simulation	3
CSCI 522	Game Engine Development	4
CSCI 523	Networked Games	3
CSCI 524	Networked Artificial Intelligence	3
CSCI 526	Advanced Mobile Devices and Game Consoles	3

**Cognition and Games**

CSCI 524	Networked Artificial Intelligence	3
CSCI 534	Affective Computing	3
CSCI 541	Artificial Intelligence Planning	3
CSCI 543	Software Multiagent Systems	3
CSCI 573	Advanced Artificial Intelligence	3

**Immersion**

CSCI 520	Computer Animation and Simulation	3
CSCI 523	Networked Games	3
CSCI 537	Immersive Environments	3
CSCI 538	Human Performance Engineering	3
CSCI 574	Computer Vision	3
CSCI 588	Specification and Design of User Interface Software	3
CTAN 502a	Experiments in Stereoscopic Imaging	2
CTIN 488	Intermediate Game Design Workshop	4
EE 619	Advanced Topics in Automatic Speech Recognition	3

**Serious Games**

CSCI 486	Serious Games Development	3
CSCI 520	Computer Animation and Simulation	3
CSCI 537	Immersive Environments	3
CSCI 538	Human Performance Engineering	3

Other courses may be eligible subject to adviser approval.

Total units: 33

**Master of Science in Computer Science (Computer Networks)**

Under the networks option students must satisfy the requirements for the Master of Science in Computer Science and the following courses must be included in the program: EE 450, CSCI 551, CSCI 555 and three of the following: CSCI 558; CSCI 599 or CSCI 694a or CSCI 694b; EE 549, EE 550 and EE 555. Total units required for the degree is 27. Students who can demonstrate that they have already taken these courses (or equivalent) may be waived out of the requirement by a memo from their faculty adviser. All courses must be approved by a faculty adviser. A list of suggested electives is available from the department office.

**Master of Science in Computer Science (Computer Security)**

Completion of this program satisfies all the requirements for the Master of Science in computer science.

REQUIRED COURSES		UNITS
CSCI 530	Security Systems	4
CSCI 531	Applied Cryptography	3
CSCI 551	Computer Communications	3
CSCI 555	Advanced Operating Systems	3
CSCI 570	Analysis of Algorithms	3
CSCI 577a	Software Engineering, or	4
CSCI 578	Software Architectures	3

At least one of the following courses:		
CSCI 545	Robotics	3
CSCI 561*	Foundations of Artificial Intelligence	3
CSCI 564	Brain Theory and Artificial Intelligence	3
CSCI 573*	Advanced Artificial Intelligence	3
CSCI 574	Computer Vision	3
CSCI 580	3-D Graphics and Rendering	3
CSCI 582	Geometric Modeling	3
At least two of the following courses:		
CSCI 556	Introduction to Cryptography	3
CSCI 558L	Internetworking and Distributed Systems Laboratory	3
CSCI 571	Web Technologies	3
CSCI 585	Database Systems	3
CSCI 599**	Special Topics	2-4, max 9
CSCI 694a	Topics in Computer Networks and Distributed Systems	3
Total Units:		28

\*CSCI 561 or CSCI 573 is recommended for this specialization. CSCI 573 may be used in place of CSCI 561 to satisfy the requirements for the general M.S. degree.

\*\*Topics must be pre-approved by an adviser. Course must be a minimum of 3 units.

### Master of Science in Computer Science (High Performance Computing and Simulations)

Students in the MSCS-HPCS program must satisfy the current core requirements for the Master of Science in computer science and the following elective courses must be included in the program:

REQUIRED CORE COURSE	UNITS	
CSCI 596*	Scientific Computing and Visualization	3

#### TECHNICAL ELECTIVE COURSES

Three of the following courses – students must take courses from both the computer science track and the computational science/engineering application track.

#### Computer Science Track

CSCI 503	Parallel Programming	3
CSCI 520	Computer Animation and Simulation	3
CSCI 551*	Computer Communications	3
CSCI 558L	Internetworking and Distributed Systems Laboratory	3

CSCI 580	3-D Graphics and Rendering	3
CSCI 583*	Computational Geometry	3
CSCI 595	Advanced Compiler Design	4
CSCI 653*	High Performance Computing and Simulations	3
EE 653	Advanced Topics in Microarchitecture	3
EE 657*	Parallel and Distributed Computing	3
EE 659*	Interconnection Networks	3
MATH 501	Numerical Analysis and Computing	3
<i>Computational Science/Engineering Application Track</i>		
AME 535a*	Introduction to Computational Fluid Dynamics, or	
AME 535b*	Introduction to Computational Fluid Dynamics	3
CE 529a*	Finite Element Analysis	3
CHE 502	Numerical Methods for Diffusive and Convective Transport	3
EE 553*	Computational Solution of Optimization Problems	3
MASC 575*	Basics of Atomistic Simulations of Materials	3
MATH 578a	Computational Molecular Biology	3
PHYS 516	Methods of Computational Physics	3
PTE 582*	Fluid Flow and Transport Processes in Porous Media	3
	Adviser approved remainder of elective units	6

\*Courses offered through the Distance Education Network (DEN).

### Master of Science in Computer Science (Human Language Technology)

Human Language Technology (HLT) – also known as Computational Linguistics and Natural Language Processing – focuses on the treatment of human languages by computer. This field has experienced unprecedented growth over the past few years, thanks to the Internet and the availability of text online. Since the early 1950s, the computational linguistics research community has developed theories and applications for a wide variety of language uses and languages. Theoretical interests overlap with appropriate areas in linguistics, philosophy, psychology and neuroscience; algorithmic issues pertain to machine learning, mathematics/statistics and information theory in signal processing.

Typical applications include Web search, machine translation, speech recognition, automated question answering, text summarization, information extraction (including opinions, facts), analysis and management of electronic bulletin boards and chat rooms, product development tracking, news tracking for intelligence gathering and international commerce, and information gathering for report generation.

To obtain a Master of Science in Computer Science with specialization in Human Language Technology, degree students must satisfy the requirements for the Master of Computer Science. At least 27 units must be completed with the following distribution requirements:

REQUIRED COURSES	UNITS	
CSCI 544	Natural Language Processing	3
CSCI 562	Empirical Methods in Natural Language Processing	3
CSCI 561*	Foundations of Artificial Intelligence, or	
CSCI 573	Advanced Artificial Intelligence	3
CSCI 570	Analysis of Algorithms	3
At least one of the following courses:		
CSCI 551	Computer Communications	3
CSCI 555	Advanced Operating Systems	3
CSCI 571	Web Technologies	3
CSCI 577a	Software Engineering	4
CSCI 585	Database Systems	3
EE 557	Computer Systems Architecture	3

\*CSCI 561 also satisfies the breadth requirements for the M.S., Computer Science.

#### COMPUTER SCIENCE ELECTIVES

It is recommended that the remaining units be satisfied from the following computer science electives:

CSCI 545	Robotics	3
CSCI 564	Brain Theory and Artificial Intelligence	3
CSCI 567	Machine Learning	3
CSCI 580	3-D Graphics and Rendering	3
CSCI 574	Computer Vision	3
CSCI 582	Geometric Modeling	3
CSCI 590	Directed Research (up to 6 units for non-thesis students only)	1-12
CSCI 599	Special Topics (subject to adviser review of the topic)	2-4, max 9

## NON-COMPUTER SCIENCE ELECTIVES

## UNITS

Students may take up to two courses from other departments for credit toward the degree. These courses must either be chosen from the following list, or (with permission from one of the M.S. program directors) appropriate courses from linguistics, mathematical statistics, electrical engineering, neuroscience, philosophy and psychology. Suggested courses include:

EE 519	Speech Recognition and Processing for Multimedia	3
EE 619	Advanced Topics in Automatic Speech Recognition	3
LING 530	Generative Syntax	3
MATH 505a	Applied Probability, or	
MATH 505b	Applied Probability	3
MATH 541a	Introduction to Mathematical Statistics, or	
MATH 541b	Introduction to Mathematical Statistics	3

### Master of Science in Computer Science (Multimedia and Creative Technologies)

See the listing under Multimedia and Creative Technologies, page 678.

### Master of Science in Computer Science (Software Engineering)

Students must satisfy all requirements for the Master of Science degree in Computer Science. In addition, they must take the following courses, CSCI 510, CSCI 577ab and CSCI 578, plus three of the following six courses: CSCI 503, CSCI 511, CSCI 555, CSCI 585, CSCI 588 and EE 557 (EE 557, CSCI 555, CSCI 577a, and CSCI 585 may be used to satisfy both the general master's degree requirements and the specialization requirements.) Students may also include research for an optional master's thesis in their programs.

### Master of Science in Computer Science (Intelligent Robotics)

Students must take CSCI 545 and three of the following courses: CSCI 445, CSCI 547, CSCI 584, and CSCI 593. Other requirements are the same as for the Master of Science degree in computer science, described above. (CSCI 561 and CSCI 545 may be used to help satisfy both the general master's requirements and the specialization requirements.) Students may include in their programs research for an optional master's thesis conducted in collaboration with industry.

### Graduate Certificate in Software Architecture

This certificate program will provide engineers with the skills required to face the increasingly complex future in architecting systems, systems of systems and software-intensive systems. Students will be exposed to the concepts, principles and state-of-the-art methods in software architectures. This program introduces principles and approaches for modeling systems using SysML; applies software engineering process models and management approaches to the design and architecture of large software systems; and guides the architect through every phase of the conception, implementation, deployment and finally retirement of software systems. It is expected that participants in the certificate program will have completed an undergraduate degree in computer science or a related field and will have several years of practical experience in software engineering and/or systems engineering. If students are later admitted to the Master of Science in Computer Science, the courses taken for the certificate may be applied to that program.

REQUIRED COURSES		UNITS
CSCI 568	Requirements Engineering	3
CSCI 578	Software Architectures	3
SAE 547	Model-Based Systems Architecting and Engineering	3
SAE 549	Systems Architecting	3
ELECTIVES (CHOOSE ONE)		UNITS
CSCI 510	Software Management and Economics	3
CSCI 530*	Security Systems	4
CSCI 555*	Advanced Operating Systems	3
CSCI 577a	Software Engineering	4
CSCI 577b	Software Engineering	4
CSCI 589**	Software Engineering for Embedded Systems	3
EE 557***	Computer Systems Architecture	3
SAE 541	Systems Engineering Theory and Practice	3
Total Units:		15

\*Prerequisite: CSCI 402

\*\*Prerequisite: CSCI 577a

\*\*\*Prerequisite: EE 457

### Doctor of Philosophy in Computer Science

The Doctor of Philosophy degree in computer science is awarded in strict conformity with the general requirements of the USC Graduate School.

Admission to the Ph.D. program in computer science is highly selective, based upon a superior academic record, prior training in computer science, letters of recommendation, a statement of purpose and Graduate Record Examinations scores. Applicants are expected to have completed the equivalent course work necessary to satisfy the general breadth requirements outlined in the Master's Admissions and Prerequisites section (see page 630). Particular attention is given to the applicant's potential to perform original research in an area of computer science. Since research potential is a key factor in the evaluation, new students are strongly urged to begin research with a computer science faculty member as soon as possible. See general requirements for graduate degrees.

#### Screening Procedure

When a student has completed 21 units or more of graduate level studies or no later than his or her fourth semester in computer science at USC, he or she must apply for screening. The screening evaluation takes place during the regular review of Ph.D. students; based upon the student's performance in course work, overall record, and research potential, the screening evaluation determines whether or not the student will be allowed to continue toward the Ph.D. A screening determination of "pass," "no pass" or "postpone" is made; in the latter case, the student must reapply for screening the subsequent semester(s) until a "pass" or "no pass" determination is made.

#### Guidance Committee

After passing the screening procedure, the student must select a dissertation adviser and form a guidance committee consisting of the dissertation adviser and at least four other faculty members. The committee must include a faculty member from another department who does not hold a joint appointment in computer science. All guidance committees must be approved by the department chair and the Graduate School.

#### Course Requirements

Each Ph.D. student is expected to demonstrate breadth of knowledge as well as depth in a chosen area of concentration. Hence, the required courses fall into two groups: (1) a common core, required of all doctoral students, and (2) additional required courses which depend on the student's area of concentration. The common core consists of five courses selected from the following five groups. Students must complete one class from each group: *Group 1*: EE 557 Computer Systems Architecture, CSCI 551 Computer Communications, CSCI 555 Advanced Operating Systems; *Group 2*: CSCI 577a Software Engineering, CSCI 571 Web Technologies, CSCI 585 Database Systems;

*Group 3:* CSCI 545 Robotics, CSCI 561 Foundation of Artificial Intelligence, CSCI 564 Brain Theory and Artificial Intelligence; *Group 4:* CSCI 574 Computer Vision, CSCI 580 Graphics and Rendering, CSCI 582 Geometric Modeling; *Group 5:* CSCI 670 Advanced Analysis of Algorithms, CSCI 581 Logic and its Applications, MATH 501 Numerical Analysis and Computation. A minimum GPA of 3.5 must be obtained in these five core courses.

In addition, all Ph.D. students must register for two semesters of CSCI 597 Seminar in Computer Science Research for a maximum of 2 units during their first year.

Ph.D. programs in computer science are grouped into the following specializations: Network and Systems (Interaction); Databases (Interaction); Software Engineering (Interaction); Robotics (Autonomy); Intelligent Agents and Organizations (Autonomy); Natural Language Processing (Autonomy); Graphics and Multimedia (Immersion); Vision (Immersion); Theory of Computation: Genomic, Molecular and Quantum Computation (Computation); Brain Theory and Neural Networks (Computation); High Performance Computing and Parallel Computation (Computation).

## Courses of Instruction

### COMPUTER SCIENCE (CSCI)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**CSCI 101L Fundamentals of Computer Programming (3, FaSp)** Introduction to the design of solutions to computer solvable problems. Algorithm design, solution implementation using a high-level programming language, program correctness and verification.

**CSCI 102L Data Structures (3, FaSp)** Linear lists, strings, arrays, and orthogonal lists; graphs, trees, binary trees, multilinked structures, sorting techniques; dynamic storage allocation; applications. *Prerequisite:* CSCI 101L.

**CSCI 106Lx Introduction to Computer Engineering/Computer Science (3, Fa)** (Enroll in EE 106Lx)

Each student must select a specialization as his or her area of concentration. Each specialization requires a minimum of three additional courses. Specific specialization requirements (which may change as the fields change) will be provided to the students by the department.

Required courses may be taken in any chronological order, with due attention to prerequisites, and may precede or follow the Screening Evaluation.

A total of 60 units, at least 40 at the 500 level or above, beyond the bachelor's degree is required (including the above required courses). A minimum grade point average of 3.5 must be maintained. Students with a Master of Science degree may transfer up to 27 units.

### Qualifying Examination

All doctoral students must pass a qualifying examination in computer science within four years before being admitted to candidacy. The qualifying examination tests the student's broad knowledge of computer science and deep insight into a chosen area of research.

**CSCI 110 Introduction to Digital Logic (3)** (Enroll in EE 101)

**CSCI 120L Introduction to Programming for Computer Scientists (3, FaSp)** Introduction to the field of Computer Science and Engineering: survey of major disciplines; foundations for using a high-level programming language to design solutions to computer solvable problems. Open only to: Computer Engineering and Computer Science, Computer Science, Computer Science (Games), Computer Science/Business Administration majors.

**CSCI 180 Survey of Digital Games and Their Technologies (3, Fa)** Historical, technical, and critical approach to the evolution of computer and video game architectures and game design, from its beginnings to the present day.

**CSCI 200L Object-Oriented Programming (3, FaSp)** The principles of object-oriented programming are examined using Java. Topics include graphics, graphical user interfaces and multi-threaded programming. (Duplicates credit in the former CSCI 105.) *Prerequisite:* CSCI 102.

Permission to take the qualifying examination must be obtained from the dean of graduate studies at least 60 days prior to its occurrence, and must be taken in the semester for which permission is granted. The guidance committee administers the qualifying examination and evaluates the student's performance. If the examination is failed, the guidance committee may recommend that the student repeat the examination 6-12 months later. The examination cannot be taken more than twice.

### Dissertation

An acceptable dissertation based upon original research is required. The dissertation must show mastery of some special field, must be an original contribution to that field and must be presented in scholarly form.

### Defense of the Dissertation

When all other requirements are satisfied, the candidate must pass a public final oral examination in defense of the dissertation.

### Graduate Certificate in Engineering Technology Commercialization

See listing in the Special Educational Opportunities section, page 586.

**CSCI 201L Principles of Software Development (3, FaSp)** The object-oriented paradigm for programming-in-the-large (using the C++); UNIX tools for software development; developing window-based applications under X-windows. *Prerequisite:* CSCI 200.

**CSCI 271 Discrete Methods in Computer Science (3, FaSp)** Propositional and first-order logic; general proof techniques, proofs by induction; applications to program verification; counting/discrete probability; graphs, trees, other discrete structures; Basic algorithms and complexity. *Prerequisite:* CSCI 102, MATH 125.

**CSCI 280 Video Game Production (4, FaSpSm)** (Enroll in ITP 280)

**CSCI 281 Pipelines for Games and Interactives (3, FaSp)** Explores the aesthetic development/technical implementation necessary to achieve unique, compelling, intuitive visual design in games. Students will develop group visual game design portfolios.

**CSCI 300 Introduction to Intelligent Agents Using Science Fiction (3, Fa)** Fundamental concepts of intelligent agents and multiagent interactions using science fiction short stories and movie clips; topics include decision theory, game theory, auctions, swarms, teamwork, emotions. *Prerequisite:* CSCI 101L.

**CSCI 303 Design and Analysis of Algorithms (3, FaSp)** Upper and lower bounds on sorting and order median. Deterministic and random computation, data structures, NP-completeness, cryptography, Turing machines and undecidability. *Prerequisite:* CSCI 102 and CSCI 271.

**CSCI 320 Digital Media Basics for Multimedia (3, FaSp)** (Enroll in EE 320)

**CSCI 351 Programming and Multimedia on the World Wide Web (3, Sp)** HTML programming for creating home pages, installation and modification of Web server, writing programs that offer enhanced services, manipulation of graphics, video and sound. *Prerequisite:* CSCI 102L.

**CSCI 352L Computer Organization and Architecture (3, Sp)** (Enroll in EE 352L)

**CSCI 357 Basic Organization of Computer Systems (3)** (Enroll in EE 357)

**CSCI 377 Introduction to Software Engineering (3)** Introduction of principles, methods, techniques and tools for multi-person construction of multi-version software systems. *Prerequisite:* CSCI 102.

**CSCI 380 Video Game Programming (4, FaSpSm)** (Enroll in ITP 380)

**CSCI 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**CSCI 402 Operating Systems (3, FaSpSm)** Basic issues in concurrency, deadlock control, synchronization scheduling, memory management, protection and access control, inter-process communication, and structured design. Laboratory experiences with Unix-like operating system. *Prerequisite:* CSCI 201L or CSCI 455x; EE 357 or EE 352L.

**CSCI 410x Translation of Programming Languages (3)** Concepts of assemblers, compilers, interpreters and their design; macro assemblers, Polish notation and translation techniques; operator precedence parsing, push down automata, code generation. Not available for graduate credit to computer science majors. *Prerequisite:* CSCI 201; *corequisite:* EE 357.

**CSCI 445 Introduction to Robotics (4, Fa)** Designing, building and programming mobile robots; sensors, effectors, basic control theory, control architectures, some advanced topics, illustrations of state-of-the-art. Teamwork; final project tested in a robot contest. Junior standing or higher. *Prerequisite:* CSCI 101L or C language programming.

**CSCI 450 Introduction to Computer Networks (3)** (Enroll in EE 450)

**CSCI 452L Game Hardware Architectures (3, Sp)** (Enroll in EE 452L)

**CSCI 454L Introduction to Systems Design Using Microprocessors (4)** (Enroll in EE 454L)

**CSCI 455x Introduction to Programming Systems Design (4, FaSp)** Intensive introduction to programming principles, discrete mathematics for computing, software design and software engineering concepts. Not available for credit to computer science majors, graduate or undergraduate. *Prerequisite:* departmental approval.

**CSCI 457 Computer Systems Organization (3)** (Enroll in EE 457)

**CSCI 458 Numerical Methods (4)** (Enroll in MATH 458)

**CSCI 459 Computer Systems and Applications Modeling Fundamentals (3, Sp)** Techniques and tools needed to construct/evaluate models of computer systems and applications. Analytical and simulation methods, capacity planning, performance/reliability evaluation, and decision-making. *Prerequisite:* MATH 225, CSCI 201.

**CSCI 460 Introduction to Artificial Intelligence (3, FaSp)** Concepts and algorithms underlying the understanding and construction of intelligent systems. Agents, problem solving, search, representation, reasoning, planning, communication, perception, robotics, neural networks. Junior standing. *Prerequisite:* CSCI 102L or CSCI 455x.

**CSCI 464 Foundations of Exotic Computation (3, Sp)** Introduction to new approaches to computation: quantum – inspired by quantum mechanics; neural – inspired by the study of the brain; and molecular – inspired by the genome. *Prerequisite:* MATH 225 or MATH 245 or EE 241.

**CSCI 465 Probabilistic Methods in Computer Systems Modeling (3)** (Enroll in EE 465)

**CSCI 477ab Design and Construction of Large Software Systems (2-2, FaSp)** Programming methodologies; intra-group and inter-group communication; software life-cycle; software economics. A large software project is a central aspect of the course. *Prerequisite:* CSCI 201, CSCI 377.

**CSCI 480 Computer Graphics (3, FaSp)** Hardware for interactive graphic systems; picture representations; data structures for graphics; picture processing techniques; languages for graphics; survey of applications such as animation and simulation. *Prerequisite:* CSCI 102.

**CSCI 485 File and Database Management (3, FaSp)** File input/output techniques, basic methods for file organization, file managers, principles of databases, conceptual data models, and query languages. *Prerequisite:* CSCI 201.

**CSCI 486 Serious Games Development (3, Fa)** Develop applications of interactive technology that extend beyond the traditional videogame market: education, health, training, policy exploration, analytics, visualization, simulation, the arts and therapy. *Prerequisite:* CTIN 488; *corequisite:* ITP 485.

**CSCI 487 Programming Game Engines (4, FaSp)** (Enroll in ITP 485)

**CSCI 490x Directed Research (2-8, max 8)** Individual research and readings. Not available for graduate credit.

**CSCI 491abL Final Game Project (4-2, FaSp)** *a:* Design, iterative prototyping, and development of a first playable level. *Prerequisite:* CSCI 486. *b:* Design, iterative stage 2 prototyping and development of a refined game.

**CSCI 495 Senior Project (3)** (Enroll in PHYS 495)

**CSCI 499 Special Topics (2-4, max 8)** Selected topics in computer science.

**CSCI 501 Numerical Analysis and Computation (3)** (Enroll in MATH 501)

**CSCI 502ab Numerical Analysis (3-3)** (Enroll in MATH 502ab)

**CSCI 503 Parallel Programming (3, Sp)** Exploration of parallel programming paradigms, parallel computing architectures, hands-on parallel programming assignments, contemporary and historical examples and their impact, context with parallel algorithms. *Recommended preparation:* CSCI 102 or CSCI 455; EE 452 or EE 457.

**CSCI 504ab Numerical Solutions of Ordinary and Partial Differential Equations (3)** (Enroll in MATH 504ab)

**CSCI 505ab Applied Probability (3-3)** (Enroll in MATH 505ab)

**CSCI 510 Software Management and Economics (3, Fa)** Theories of management and their application to software projects. Economic analysis of software products and processes. Software cost and schedule estimation, planning and control. *Prerequisite:* graduate standing.

**CSCI 511 Personal Software Process (PSP) and Project (3, Sp)** Individual analysis, planning, development and maintenance of a software product or development artifact, using the principles and practices of PSP. Analysis of project's lessons learned.

**CSCI 520 Computer Animation and Simulation (3, Sp)** Fundamental techniques of computer animation and simulation, knowledge and/or experience in the design, scripting, production and post-production stages of computer animation. *Prerequisite:* CSCI 480.

**CSCI 521 Optimization: Theory and Algorithms (3, Fa)** (Enroll in ISE 520)

**CSCI 522 Game Engine Development (4, Fa)** The principles of developing game engines targeted at modern PC and game console hardware.

**CSCI 523 Networked Games (3, Fa)** Design and implementation of networked games, from the origins of the supporting technologies in distributed systems, visual simulations, networked virtual environments, and shipped games. *Recommended preparation:* CSCI 480, CSCI 580 or an equivalent course in graphics.

**CSCI 524 Networked Artificial Intelligence (3, Sp)** Networked game communication architectures, protocol development, architecting networked game AI clients/services. Character following, knowledge representation and reasoning, dynamic play strategies, search, learning, and planning. *Recommended preparation:* CSCI 480, CSCI 580 or an equivalent course in graphics.

**CSCI 525 Advanced Game System Development (2, Sp)** Topics include: game engine/tool development, AI/autonomous character integration, game networking, performance measurement/enhancement, character animation systems, mobile devices, game consoles, next generation gameplay. *Prerequisite:* CSCI 522 or CSCI 523 or CSCI 524 or CSCI 526 or CSCI 529b; *recommended preparation:* significant participation in a prior game development effort.

**CSCI 526 Advanced Mobile Devices and Game Consoles (3, Sp)** Explore the complex engineering process required to design and build a real-time graphics engine to support physical realism on mobile devices. *Recommended preparation:* CSCI 480, CSCI 580 or an equivalent course in graphics.

**CSCI 529ab Advanced Game Projects (4-3, FaSp)** *a:* Team projects intended to address the multifaceted technical and creative challenges that are inherent to comprehensive game development. *Recommended preparation:* CSCI 522 or CTIN 488. *b:* This course provides students in various areas of game specialization the practice of design, iterative stage 2 prototyping and development of a refined game.

**CSCI 530 Security Systems (4, FaSp)** Protecting computer networks and systems using cryptography, authentication, authorization, intrusion detection and response. Includes lab to provide practical experience working with such systems. *Prerequisite:* CSCI 402.

**CSCI 531 Applied Cryptography (3, Fa)** Intensive overview of cryptography for practitioners, historical perspective on early systems, number theoretic foundations of modern day cryptosystems and basic cryptanalysis.

**CSCI 533 Combinatorial Analysis and Algebra (3)** (Enroll in MATH 533)

**CSCI 534 Affective Computing (3, Sp)** Overview of the theory of human emotion, techniques for recognizing and synthesizing emotional behavior, and design application. *Prerequisite:* CSCI 561.

**CSCI 536 Linear Programming and Extensions (3, Fa)** (Enroll in ISE 536)

**CSCI 537 Immersive Environments (3)** Design and implementation of immersive environments, from the origins of the supporting technologies in visual simulation, to interactive 3-D graphics and interfaces, and interactive games. *Prerequisite:* CSCI 580.

**CSCI 538 Human Performance Engineering (3)** Tools and techniques for addressing issues related to Human Performance Engineering (HPE) of computing systems. *Prerequisite:* CSCI 537.

**CSCI 541 Artificial Intelligence Planning (3, Irregular)** Foundations and techniques of automated planning, including representations of actions and plans, approaches to planning, controlling search, learning for planning, and interaction with the environment. *Prerequisite:* CSCI 561.

**CSCI 542 Neural Computation with Artificial Neural Networks (3, Sp)** Computation and adaptation in networks of interconnected distributed processing units; classical and statistical approaches to neural nets; state-of-the-art neural network research. *Recommended preparation:* basic statistics, linear algebra.

**CSCI 543 Software Multiagent Systems (3, Sp)** Investigate computational systems in which several software agents or software agents and humans interact.

**CSCI 544 Natural Language Processing (3, Sp)** Examination of the issues which enable computers to employ and understand natural language; knowledge representation, memory modeling, parsing, language analysis, story understanding, and generation. *Recommended preparation:* CSCI 562.

**CSCI 545 Robotics (3, Sp)** Fundamental skills for modeling and controlling of dynamic systems for robotic applications and graphics animations; control theory; kinematics; dynamics; sensor processing; real-time operating systems; robot labs. *Prerequisite:* C-programming, basic linear algebra, calculus.

**CSCI 546 Intelligent Embedded Systems (3, Sp)** Survey of techniques for the design of large-scale, distributed, networked, embedded systems. Examples include sensor/actuator networks, wearable computing, distributed robotics and smart spaces.

**CSCI 547 Sensing and Planning in Robotics (3, Fa)** Introduction to software methods in robotics including sensing, sensor fusion, estimation, fault tolerance, sensor planning, robot control architectures, planning and learning.

**CSCI 548 Information Integration on the Web (3, Sp)** Foundations and techniques in information integration as it applies to the Web, including view integration, wrapper learning, record linkage, and streaming dataflow execution. *Prerequisite:* CSCI 561, CSCI 585; *recommended preparation:* CSCI 571, CSCI 573.

**CSCI 549 Nanorobotics (3, Sp)** Introduction to nanotechnology. Nanorobotic systems: sensing; actuation and propulsion; control; communication; power; programming and coordination of robot swarms. Nanomanipulation and nanoassembly with atomic force microscopes. Graduate standing in science or engineering.

**CSCI 551 Computer Communications (3, FaSp)** Protocol design for computer communication networks, network routing, transport protocols, internetworking. *Prerequisite:* CSCI 402, EE 450 and C-language programming.

**CSCI 552 Asynchronous VLSI Design (3)**  
(Enroll in EE 552)

**CSCI 553 Computational Solution of Optimization Problems (3)** (Enroll in EE 553)

**CSCI 554 Real Time Computer Systems (3)**  
(Enroll in EE 554)

**CSCI 555 Advanced Operating Systems (3, FaSp)** Advanced issues in computer organization, naming, kernel design, protection mechanisms and security policies, reliable computing, data base OS, secure networks, systems specification, decentralized systems, real time systems. *Prerequisite:* CSCI 402.

**CSCI 556 Introduction to Cryptography (3, Sp)** Modern secret codes. Public key cryptosystems of Rivest-Shamir-Adelman, Diffie-Hellman and others. The underlying number theory and computational complexity theory. *Prerequisite:* CSCI 570 or CSCI 581.

**CSCI 557 Computer Systems Architecture (3)** (Enroll in EE 557)

**CSCI 558L Internetworking and Distributed Systems Laboratory (3, FaSp)** Students complete laboratory exercises in operating system and network management, distributed systems, TCP/IP, SNMP, NFS, DNS, etc. Term project required. *Prerequisite:* CSCI 402 and EE/CSCI 450; *recommended preparation:* CSCI 551 and CSCI 555.

**CSCI 559 Mathematical Pattern Recognition (3-3)** (Enroll in EE 559)

**CSCI 560L Advanced Microcomputer-Based Design (3)** (Enroll in EE 560L)

**CSCI 561 Foundations of Artificial Intelligence (3, FaSp)** Foundations of symbolic intelligent systems, search, logic, knowledge representation, planning, learning. *Recommended preparation:* good programming and algorithm analysis skills.

**CSCI 562 Empirical Methods in Natural Language Processing (3, 2 years, Fa)** Acquiring computer-tractable linguistic knowledge has always been a bottleneck in building natural language systems. We will examine statistical techniques for extracting knowledge automatically from online text. *Prerequisite:* CSCI 561.

**CSCI 564 Brain Theory and Artificial Intelligence (3, Fa)** Introduces neural modeling, distributed artificial intelligence and robotics approaches to vision, motor control and memory. *Prerequisite:* graduate standing.

**CSCI 565 Compiler Design (4, Sp)** Formal grammar; parsing methods and lexical analysis; code generation; local and global code optimization; and dynamic allocation. *Prerequisite:* CSCI 455x.

**CSCI 566 Neural Network Self-Organization (3, Sp)** Differential equations for network pattern formation. Dynamic link architecture. Simulation of brain organization processes (retinotopy, orientation columns) and face recognition by elastic matching. *Recommended preparation:* CSCI 564 and either MATH 225 or MATH 245.

**CSCI 567 Machine Learning (3, Fa)** Statistical methods for building intelligent and adaptive systems that improve performance from experiences; focus on theoretical understanding of these methods and their computational implications. *Recommended preparation:* Undergraduate level training or course work in linear algebra, multivariate calculus, basic probability and statistics; an undergraduate level course in Artificial Intelligence may be helpful but is not required.

**CSCI 568 Requirements Engineering (3, Fa)** Techniques for successful requirements analysis and requirements engineering (RE) of software-intensive systems. Systematic process of developing requirements through cooperative problem analysis, representation, and validation.

**CSCI 570 Analysis of Algorithms (3, FaSpSm)** Explores fundamental techniques such as recursion, Fourier transform ordering, dynamic programming for efficient algorithm construction. Examples include arithmetic, algebraic, graph, pattern matching, sorting, searching algorithms.

**CSCI 571 Web Technologies (3, FaSpSm)** Advanced study of programming languages with application to the Web. Languages for client-side and server-side processing. Examples taken from: HTML, Java, JavaScript, Perl, XML and others. *Recommended preparation:* knowledge of at least two programming languages.

**CSCI 572 Information Retrieval and Web Search Engines (3, Sp)** Examines key aspects of information retrieval as they apply to search engines; web crawling, indexing, querying and quality of results are studied. *Prerequisite:* CSCI 351, CSCI 485.

**CSCI 573 Probabilistic Reasoning (3, Fa)** Reasoning under uncertainty, statistical directed and undirected graphical models, temporal modeling, inference in graphical models, parameter learning, decisions under uncertainty. *Recommended preparation:* An undergraduate level course in probability theory.

**CSCI 574 Computer Vision (3, Fa)** Description and recognition of objects, shape analysis, edge and region segmentation, texture, knowledge based systems, image understanding. *Prerequisite:* CSCI 455x.

**CSCI 575 Wireless and Mobile Networks Design and Library (3)** (Enroll in EE 579)

**CSCI 576 Multimedia Systems Design (3, FaSp)** State-of-the-art technology for networked multimedia systems such as: system design, I/O technologies, data management, data compression, networking and telecommunications. Design of real-world multimedia solution. *Recommended preparation:* familiarity with C or C++.

**CSCI 577ab Software Engineering (4-4, FaSp)** *a:* Software life cycle processes; planning considerations for product definition, development, test, implementation, maintenance. Software requirements elicitation and architecture synthesis. Team project. *b:* Software development, test, implementation, and maintenance methods. CASE tools and software environments. Software product engineering, configuration management, quality engineering, documentation. Application via projects. *Prerequisite: a:* graduate standing; *b:* CSCI 577a.

**CSCI 578 Software Architectures (3, Sp)** Study of concepts, principles and scope of software system architectures, including architectural styles, languages, connectors, middleware, dynamism, analysis, testing and domain-specific approaches.

**CSCI 579ab Computational Molecular Biology (3-3, FaSp)** (Enroll in MATH 578ab)

**CSCI 580 3-D Graphics and Rendering (3, Fa)** The process of creating images from 3-D models. Includes transformations, shading, lighting, rasterization, texturing, and other topics.

**CSCI 581 Logic and its Applications (3)** Formal systems, first order logic, truth, completeness, compactness, Godel incompleteness, recursive functions, undecidability. Selected applications, e.g., theorem proving, artificial intelligence, program verification, databases, computational complexity. *Prerequisite:* CSCI 430 and MATH 470.

**CSCI 582 Geometric Modeling (3, Sp)** Mathematical models and computer representations for three-dimensional solids; underlying topics from set theory, geometry, and topology. Fundamental algorithms; applications to CAD/CAM and robotics. *Prerequisite:* EE 441 and CSCI 102 or equivalent knowledge of linear algebra and data structures.

**CSCI 583 Computational Geometry (3)**

Geometric algorithms from graphics, vision, geometric modeling, and optimization are studied in a unified way. Topics include proximity, motion planning, Voronoi diagrams, convex hulls. *Prerequisite:* CSCI 303.

**CSCI 584 Control and Learning in Mobile Robots and Multi-Robot Systems (3, Fa)**

Survey of robot control and learning methods from technical papers. Control architectures, adaptation, learning, cooperation, distributed vs. centralized approaches, cooperative and competitive systems. *Prerequisite:* CSCI 445 or CSCI 460 or CSCI 547 or CSCI 561.

**CSCI 585 Database Systems (3, FaSpSm)**

Database system architecture; conceptual database models; semantic, object-oriented, logic-based, and relational databases; user and program interfaces; database system implementation; integrity, security, concurrency and recovery. Open only to computer science graduate students.

**CSCI 586 Database Systems Interoperability (3, Sp)**

Federated and multi-database systems, database networking, conceptual and schematic diversity, information sharing and exchange, knowledge discovery, performance issues. *Prerequisite:* CSCI 585.

**CSCI 587 Geospatial Information Management (3, Fa)**

Techniques to efficiently store, manipulate, index and query geospatial information in support of real-world geographical and decision-making applications. *Prerequisite:* CSCI 485 or CSCI 585.

**CSCI 588 Specification and Design of User Interface Software (3, Fa)**

The design and implementation of user interface software. Study of issues relating to human/computer interaction. Visual design and real-time interfaces.

**CSCI 589 Software Engineering for Embedded Systems (3)**

Software engineering methods and techniques for embedded, resource constrained, and mobile environments. Applications to real-time operating systems and wireless networking systems. Class project. *Prerequisite:* CSCI 577a.

**CSCI 590 Directed Research (1-12)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**CSCI 591ab Applied Software Engineering (3-3, Sp)**

*a:* Engineering software systems: negotiating goals; defining life cycle and process; project planning; defining requirements, architecture and design; incorporating COTS; analyzing project artifacts. *b:* Engineering software systems: design, implement, test and maintain software product; management of quality, configuration and transition. Open to Software Engineering Certificate Program students only. (Duplicates credit in CSCI 577ab.) *Recommended preparation:* experience in software development.

**CSCI 592 Emerging Best Practices in Software Engineering (3, SpSm)**

Perspective and experiences with emerging best practices, including integrated maturity models, distributed and mobile software, RAD, agile methods, COTS, assessment and integration, portfolio and product line management. Open to Software Engineering Certificate Program students only. *Recommended preparation:* CSCI 510.

**CSCI 593 Autonomous Learning and Discovery Agents (3)**

Active systems, using their own actions, percepts, and mental constructions, abstract a model from an unfamiliar environment in order to accomplish their missions. *Prerequisite:* CSCI 573.

**CSCI 594abz Master's Thesis (2-2-0, FaSpSm)**

Credit on acceptance of thesis. Graded IP/CR/NC.

**CSCI 595 Advanced Compiler Design (4)**

Code generation, data-flow analysis, global optimization, register allocation, data dependency analysis, unimodular transformations, vectorization, parallelization, data and computation decomposition. *Prerequisite:* CSCI 565.

**CSCI 596 Scientific Computing and Visualization (3, Fa)**

Hands-on training on the basics of parallel computing and scientific visualization in the context of computer simulations in science and engineering. *Prerequisite:* CSCI 101L or CSCI 455x; CSCI 102L; MATH 458.

**CSCI 597 Seminar in Computer Science Research (1, max 2, FaSp)**

Introduction of Ph.D. students to a broad range of computer science research. Two semesters registration required. Open to Computer Science doctoral students only.

**CSCI 598 Mathematical Foundations for Computer-Aided Design of VLSI Circuits (3, Sp)** (Enroll in EE 581)

**CSCI 599 Special Topics (2-4, max 9)** Course content to be selected each semester from recent developments in computer science.

**CSCI 652 Low-Power Wireless Networks (3, Fa)** (Enroll in EE 652)

**CSCI 653 High Performance Computing and Simulations (3, Sp)** Advanced high-performance computer simulation techniques; multiscale deterministic and stochastic simulation algorithms on parallel and distributed computing platforms; immersive and interactive visualization of simulation data. *Prerequisite:* CSCI 596 or CSCI 580.

**CSCI 658 Diagnosis and Design of Reliable Digital Systems (3)** (Enroll in EE 658)

**CSCI 664 Neural Models for Visually Guided Behavior (3, max 9)**

Review of neural mechanisms of visuo-motor coordination, and methods for constructing models of these mechanisms. Topics include locomotion, cognitive maps, looking, reaching and grasping. *Prerequisite:* CSCI 564.

**CSCI 670 Advanced Analysis of Algorithms (3, FaSp)**

Fundamental techniques for design and analysis of algorithms. Topics include: dynamic programming; network flows; theory of NP-completeness; linear programming; approximation, randomized, and online algorithms; basic cryptography. *Prerequisite:* CSCI 570; *recommended preparation:* familiarity with algorithms and discrete mathematics.

**CSCI 671 Randomized Algorithms (3, Sp)**

Standard techniques in the design and analysis of randomized algorithms and random structures. Topics include tail bounds, Markov Chains, VC-dimension, probabilistic method. *Prerequisite:* CSCI 570 or CSCI 670; *recommended preparation:* basic background in probability.

**CSCI 672 Approximation Algorithms (3, Sp)**

Algorithmic techniques include combinatorial algorithms and rounding of linear and semi-definite programs. Applications include network design, graph cuts, covering problems, and approximation hardness. *Prerequisite:* CSCI 570 or CSCI 670; *recommended preparation:* basic background in probability and linear algebra.

**CSCI 673 Structure and Dynamics of Networked Information (3, Sp)**

Algorithms for analyzing network data and spreading information over networks. Focuses on broadly applicable mathematical tools and techniques, including spectral techniques, approximation algorithms and randomization. *Prerequisite:* CSCI 570 or CSCI 670; *recommended preparation:* basic background in probabilities, linear algebra.

**CSCI 674ab Advanced Topics in Computer Vision (3-3)** Selected topics from current active research areas including image segmentation, shape analysis and object recognition, inference of 3-D shape, motion analysis, knowledge-based system, neural nets. *Prerequisite:* CSCI 574.

**CSCI 675 Topics in Engineering Approaches to Music Cognition (3, max 6)** (Enroll in ISE 575)

**CSCI 685 Advanced Topics in Database Systems (3, Sp)** Advanced techniques in database management. Topics include optimization, cache management, data mining and knowledge discovery, decision support, spatial indexes, parallel and distributed systems, extendible storage. *Prerequisite:* CSCI 485 or CSCI 585.

**CSCI 694ab Topics in Computer Networks and Distributed Systems (3-3)** Current topics in network and distributed systems; verbal and written presentation skills, effective critiquing, and evaluation. *Prerequisite:* CSCI 551 or CSCI 555.

**CSCI 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**CSCI 794abcdz Doctoral Dissertation (2-2-2-2-0)** Credit on acceptance of dissertation. Graded IP/CR/NC.

*Co-Chairs:* Alexander A. Sawchuk, Ph.D.  
(*Systems*); Eun Sok Kim, Ph.D. (*Electrophysics*)

*Associate Chair (Systems):* Antonio Ortega, Ph.D.

*Associate Chair (Curriculum and Student Services):* Edward W. Maby, Ph.D.

### Faculty

*Presidential Chair:* Andrew J. Viterbi, Ph.D.

*Presidential Chair:* Simon Ramo, Ph.D.

*Kenneth C. Dahlberg Early Career Chair:* Rahul Jain, Ph.D.

*William M. Keck Chair in Engineering:* P. Daniel Dapkus, Ph.D.

*Robert G. and Mary G. Lane Early Career Chair:* Murali Annaram, Ph.D.

*Fred W. O'Green Chair in Engineering:* Leonard M. Silverman, Ph.D.

*Colleen and Roberto Padovani Early Career Chair in Electrical Engineering:* Alexandros G. Dimakis, Ph.D.

*George T. Pflieger Chair in Electrical Engineering:* Robert W. Hellwarth, Ph.D.

*Charles Lee Powell Chair in Electrical Engineering and Computer Science:* Melvin Breuer, Ph.D.

*Charles Lee Powell Chair in Engineering:* Viktor Prasanna, Ph.D.

*Steven and Kathryn Sample Chair in Engineering:* Alan E. Willner, Ph.D.

*Leonard Sikverman Chair:* Alexander A. Sawchuk, Ph.D.

*Andrew and Erna Viterbi Chair in Communications:* Solomon W. Golomb, Ph.D.

*WISE Junior Gabilan Chair:* Michelle Povinelli, Ph.D.

*Fred H. Cole Professor of Electrical Engineering:* Robert A. Scholtz, Ph.D.

*William M. Hogue Professor of Electrical Engineering:* William H. Steier, Ph.D.

*Stephen and Etta Varra Professor:* Sanjit Mitra, Ph.D.

*Viterbi Professor of Engineering:* Shrikanth Narayanan, Ph.D.

*Ming Hsieh Faculty Fellow in Electrical Engineering:* Seyed-Hossein Hashemi, Ph.D.

*Ming Hsieh Faculty Fellow in Electrical Engineering:* Bhaskar Krishnamachari, Ph.D.

*Professors:* Melvin Breuer, Ph.D.\* (*Computer Science*); Giuseppe Caire, Ph.D.; John Choma, Ph.D.\*; Keith M. Chugg, Ph.D.; P. Daniel Dapkus, Ph.D. (*Materials Science*); Michel Dubois, Ph.D.; Solomon W. Golomb, Ph.D. (*Mathematics*); Martin Gundersen, Ph.D. (*Materials Science, Physics*); Sandeep Gupta, Ph.D.; Robert W. Hellwarth, Ph.D. (*Physics*); Kai Hwang, Ph.D. (*Computer Science*); Petros Ioannou, Ph.D.; B. Keith Jenkins, Ph.D.; Edmond Jonckheere, Ph.D. (*Mathematics*); Eun Sok Kim, Ph.D.; Bart Kosko, Ph.D. (*Law*); Chung-Chieh Kuo, Ph.D. (*Computer Science*); Richard Leahy, Ph.D.\* (*Biomedical Engineering, Radiology*); Anthony F. J. Levi, Ph.D. (*Physics*); Daniel Lidar, Ph.D. (*Chemistry*); William C. Lindsey, Ph.D.; Jerry M. Mendel, Ph.D.; Sanjit Mitra, Ph.D.; Urbashi Mitra, Ph.D.; Mahta Moghaddam, Ph.D.; Andreas Molisch, Ph.D.; Shrikanth Narayanan, Ph.D. (*Computer Science, Linguistics, Psychology*); C. L. Max Nikias, Ph.D.; John O'Brien, Ph.D.; Antonio Ortega, Ph.D.; Alice C. Parker, Ph.D.\*; Massoud Pedram, Ph.D.; Timothy Pinkston, Ph.D.; Viktor Prasanna, Ph.D. (*Computer Science*); C. Raghavendra, Ph.D. (*Computer Science*); Simon Ramo, Ph.D.; Michael J. Safonov, Ph.D.; Steven B. Sample, Ph.D.; Alexander A. Sawchuk, Ph.D.\*; Robert A. Scholtz, Ph.D.; Leonard Silverman, Ph.D.; John Silvester, Ph.D.; John B. Slaughter, Ph.D. (*Education*); William H. Steier, Ph.D.; Armand R. Tanguay Jr., Ph.D. (*Biomedical Engineering, Materials Science*); Andrew J. Viterbi, Ph.D.; Alan E. Willner, Ph.D.\*; Zhen Zhang, Ph.D.; Chongwu Zhou, Ph.D.

*Associate Professors:* Murali Annaram, Ph.D.; Peter Beerel, Ph.D.; Todd Brun, Ph.D. (*Computer Science, Physics*); Stephen B. Cronin, Ph.D.; Hossein Hashemi, Ph.D.; Bhaskar Krishnamachari, Ph.D. (*Computer Science*); Christos Kyriakakis, Ph.D.; Krishna Nayak, Ph.D. (*Biomedical Engineering, Medicine*); Michael Neely, Ph.D.; Aluizio Prata Jr., Ph.D.\*; Konstantinos Psounis, Ph.D. (*Computer Science*); Wei Wu, Ph.D.

*Assistant Professors:* Michael Shuo-Wei Chen, Ph.D.; Alexandros G. Dimakis, Ph.D.; Rahul Jain, Ph.D. (*Industrial and Systems Engineering*); Michelle Povinelli, Ph.D.; Benjamin W. Reichardt, Ph.D.

*Adjunct Professors:* Dan Goebel, Ph.D.; Patric Muggli, Ph.D.; Mostafa Shiva, Ph.D.

*Adjunct Associate Professors:* Mohammed Beshir, Ph.D.; Serge Dubovitsky, Ph.D.; Edgar Satorius, Ph.D.; Ali A. Zahid, M.S.

*Research Professors:* Michael Fritze, Ph.D.; Preston Marshall, Ph.D.

*Research Associate Professors:* Jeffrey Draper, Ph.D.; John Granacki, Ph.D. (*Biomedical Engineering*); Chunqi Jiang, Ph.D.; Joseph Touch, Ph.D. (*Computer Science*); P. Thomas Vernier, Ph.D.

*Research Assistant Professors:* Panayiotis Georgiou, Ph.D.; Justin Haldar, Ph.D.; Anand Joshi, Ph.D.; Sungbok Lee, Ph.D.; Bindu Madhavan, Ph.D.

*Professors of Engineering Practice:* Edward W. Maby, Ph.D.; Gandhi Puvvada, M.S.; Monte Ung, Ph.D.

*Associate Professor of Engineering Practice:* Mark Redekopp, M.S.

*Senior Lecturer:* Douglas Burke, Ph.D.

*Lecturer:* Shahin Nazarian, Ph.D.

*Emeritus Professors:* Alvin Despain, Ph.D.; Hans H. Kuehl, Ph.D.\*; Irving S. Reed, Ph.D. (*Mathematics, Computer Science*); Charles L. Weber, Ph.D.; Lloyd Welch, Ph.D. (*Mathematics*)

*Emeritus Instructor:* Sidney A. Wielin, B.S.

#### Joint Faculty

*Joint Professors:* Michael Arbib, Ph.D. (*Computer Science, Neurobiology, Biomedical Engineering*); Stanley P. Azen, Ph.D. (*Preventive Medicine and Biomedical Engineering*); Jack Feinberg, Ph.D. (*Physics*); Leana Golubchik, Ph.D. (*Computer Science*); Ramesh Govindan, Ph.D. (*Computer Science*); Norberto Grzywacz, Ph.D. (*Biomedical Engineering*); Tomlinson Holman, B.S. (*Cinematic Arts*); Ellis Horowitz, Ph.D. (*Computer Science*); Vasilis Z. Marmarelis, Ph.D. (*Biomedical Engineering*); Gerard Medioni, Ph.D. (*Computer Science*); Ulrich Neumann, Ph.D. (*Computer Science*); Ramakant Nevatia, Ph.D. (*Computer Science*); Si-Zhao Qin, Ph.D. (*Chemical Engineering*); Aristides Requicha, Ph.D. (*Computer Science*); Cyrus

Shahabi, Ph.D. (*Computer Science*); Gaurav Sukhatme, Ph.D. (*Computer Science*); William G. Wagner, Ph.D. (*Physics*); Curt F. Wittig, Ph.D. (*Chemistry, Physics*); Stanley M. Yamashiro, Ph.D. (*Biomedical Engineering*)

*Joint Associate Professors:* Elaine Chew, Ph.D. (*Industrial and Systems Engineering*); Jia Grace Lu, Ph.D., (*Physics*); Ellis Meng (*Biomedical Engineering*)

*Joint Assistant Professors:* Andrea M. Armani, Ph.D. (*Chemical Engineering and Materials Science*); Benham Jafarpour, Ph.D. (*Chemical Engineering, Materials Science*); Jongseung Yoon, Ph.D. (*Chemical Engineering, Materials Science*)

*Joint Research Professor:* Fred Aminzadeh, Ph.D. (*Chemical Engineering, Materials Science*)

*Joint Research Assistant Professors:* Young Cho, Ph.D. (*Computer Science*); Houchun Harry Hu, Ph.D. (*Radiology*)

*Joint Emeritus Professors:* George A. Bekey, Ph.D. (*Computer Science, Biomedical Engineering*); Murray Gershenson, Ph.D.\* (*Materials Science*)

\*Recipient of university-wide or school teaching award.

*Electrical Engineering Honor Society:*  
Eta Kappa Nu

## Degree Requirements

### Educational Program Objectives

The electrical engineering program objectives are designed to promote technical competence, professional development, and citizenship in the global community.

#### Technical Competence

Graduates will apply their technical skills in mathematics, science and engineering to the solution of complex problems encountered in modern electrical engineering practice.

Graduates will model, analyze, design and experimentally evaluate components or systems that achieve desired technical specifications subject to the reality of economic constraints.

#### Professional Development

Graduates will compete effectively in a world of rapid technological change and assume leadership roles within industrial, entrepreneurial, academic or governmental

environments in the broad context of electrical engineering.

Some graduates who choose to redirect their careers will be employed in diverse fields such as healthcare, business, law, computer science, multimedia and music through graduate-level studies and the process of life-long learning.

#### Citizenship in the Global Community

Graduates will use their communication skills to function effectively both as individuals and as members of multidisciplinary and multicultural teams in a diverse global economy.

Graduates will engage in highly ethical and professional practices that account for the global, environmental and societal impact of engineering decisions.

### Bachelor of Science in Electrical Engineering

The requirement for the degree is 131 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied towards the major, regardless of the department in which the courses are taken. See also the common requirements for undergraduate degrees section, page 569.

COMPOSITION/WRITING REQUIREMENTS		UNITS
WRIT 140*	Writing and Critical Reasoning	4
WRIT 340	Advanced Writing	3
GENERAL EDUCATION (SEE PAGE 63)		UNITS
General education* +		20

PRE-MAJOR REQUIREMENTS		UNITS	MAJOR ELECTIVES		UNITS
<i>Math Requirement</i>			Electives	See requirements for graduation	37
MATH 125	Calculus I	4			
MATH 126	Calculus II	4			
MATH 226	Calculus III	4	Total units:		131
MATH 245	Mathematics of Physics and Engineering I	4			
MATH 445	Mathematics of Physics and Engineering II	4			
<i>Physics Requirement</i>					
PHYS 151L**	Fundamentals of Physics I: Mechanics and Thermodynamics	4			
PHYS 152L	Fundamentals of Physics II: Electricity and Magnetism	4			
PHYS 153L	Fundamentals of Physics III: Optics and Modern Physics	4			
<i>Chemistry Elective</i>					
CHEM 105aL	General Chemistry, or				
CHEM 115aL	Advanced General Chemistry, or				
MASC 110L	Materials Science	4			
MAJOR REQUIREMENTS		UNITS			
<i>Engineering</i>					
ENGR 102	Engineering Freshman Academy	2			
<i>Computer Science</i>					
EE 355x	Software Design for Engineers	3			
<i>Electrical Engineering</i>					
EE 101	Introduction to Digital Logic	3			
EE 105	Introduction to Electrical Engineering	3			
EE 150L	Engineering Computational Methods	3			
EE 202L	Linear Circuits	4			
EE 301L	Linear Systems	4			
EE 330	Electromagnetics I	3			
EE 364	Introduction to Probability and Statistics for Electrical Engineering and Computer Science, or				
EE 464	Probability Theory for Engineers	3			
<i>Industrial and Systems Engineering</i>					
ISE 460	Engineering Economy, or				
BUAD 301	Technical Entrepreneurship	3			
			<i>Advanced Electives</i>	Students must fulfill a minimum requirement of three 400-level elective courses in electrical engineering. Of these, one must be a capstone design course from the following list: EE 422x (3), EE 423Lx (3), EE 434Lx (4), EE 447Lx (4), EE 459Lx (3), EE 484x (3).	
			<i>Free Electives</i>	Free elective courses that complete the 37-unit elective requirement are to be chosen in consultation with the student's academic adviser. Students are encouraged to pursue minor options when satisfying this requirement.	
			<b>Bachelor of Science in Computer Engineering and Computer Science</b>	See the listing under Computer Engineering, page 634.	
			<b>Minor in Music Recording</b>	A minor in music recording is offered through the USC Thornton School of Music to provide undergraduate students with the background necessary to enter the field of recording engineering and to familiarize them with the design needs of modern recording equipment. The minor is recommended to electrical engineering majors with extensive musical training who would like to combine their technical and musical abilities while learning the engineering applications of physical and mathematical principles to the art of music recording. See the listing under the Thornton School of Music, page 817.	
			<b>Minor in Engineering Technology Commercialization</b>	See listing in the Special Educational Opportunities section, page 581.	

**Master of Science in Electrical Engineering**

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in electrical engineering. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree and through an accumulation of no more than 45 units. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average.

In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in electrical engineering is also subject to the following requirements: (1) a total of at least 27 units is required; (2) every non-EE course for graduate credit requires prior written adviser approval recorded each semester on a special request form in the student's department file; (3) no more than three courses (maximum 12 units) may be counted at the 400 level – at least 18 adviser-approved units must be taken at the 500 or 600 level; (4) at least 18 units must be taken in electrical engineering, those not in EE require written adviser approval and must be technical in nature; (5) to achieve a degree of breadth in their program, students are encouraged to take two technical courses outside their area of specialization but within EE; (6) at least 21 of the 27 units must be taken in the Viterbi School of Engineering; (7) units to be transferred (maximum four with adviser approval) must have been taken prior to taking classes at USC — interruption of residency is not allowed.

The aerospace controls option is available as an area of emphasis for MSEE students interested in learning to apply innovative control techniques to aerospace control problems. In addition to 18 approved units of electrical engineering courses, students in this option will take at least three of the following aerospace and mechanical engineering courses: AME 453 Engineering Dynamics (3); AME 531 Aerodynamics of Wings and Bodies (3); AME 532ab Flight Vehicle Stability and Control (3-3); AME 525 Engineering Analysis (3); AME 526 Engineering Analytical Methods (3); ASTE 580 Orbital Mechanics I (3).

**Master of Science in Electrical Engineering (Computer Networks)**

Under the computer networks option students must satisfy the M.S., Electrical Engineering requirements with the exception that only 15 units of EE are required. It is expected that each student in this program will take or have taken the equivalent of the following fundamental courses: CSCI 402x, EE 450, EE 457Lx, and EE 465. The following required courses must be included: CSCI 551, EE 549 or EE 550, and EE 555. Suggested elective courses include: CSCI 530, CSCI 555, CSCI 558L, CSCI 570, CSCI 694a, CSCI 694b, EE 532, EE 535, EE 554,

EE 557, EE 558, EE 579, EE 590, EE 599, EE 650, EE 652, EE 659. Any other course must be approved by a faculty adviser. No more than three courses (maximum 12 units) may be counted at the 400 level – at least 18 adviser-approved units must be taken at the 500 or 600 level. Total units required for the degree is 27.

#### Master of Science in Electrical Engineering (Electric Power)

See listing in the Sustainable Infrastructures Systems section, page 681.

#### Master of Science in Electrical Engineering (Multimedia and Creative Technologies)

See listing under Multimedia and Creative Technologies, page 678.

#### Master of Science in Systems Architecting and Engineering

See the listing under Systems Architecting and Engineering, page 682.

#### Master of Science in Electrical Engineering (Telecommunications)

See Sustainable Infrastructures Systems, page 681.

#### Master of Science in Electrical Engineering (VLSI Design)

The Master of Science in Electrical Engineering (VLSI design) is earned by successfully completing the normal requirements for the Master of Science in electrical engineering, with the following additional required courses: EE 536a; EE 577a; EE 577b or EE 536b; and EE 552. If a student chooses to take EE 536b *as well* as EE 577b, the student may *either* count EE 536b as one of the courses for Area 2 or EE 577b as one of the courses for Area 1 or Area 3. No more than three courses (maximum 12 units) may be counted at the 400 level – at least 18 adviser-approved units must be taken at the 500 or 600 level.

The students must also take two courses from one of the following areas and one course from a second area:

Area 1: CSCI 455x, EE 560, EE 577b (see above), EE 658, EE 680 and EE 681.

Area 2: EE 448L, EE 504L, EE 536b (see above), EE 537 and EE 630.

Area 3: CSCI 455x, CSCI 570, EE 557, EE 560, EE 577b (see above), EE 659 and EE 677.

With explicit approval of a faculty adviser, EE 599 Special Topics and/or 3 units of EE 590 Directed Research may be used to meet requirements for any of the approved areas.

The remaining courses must be technical electives approved by the adviser, and can include the following: EE 501, EE 502, EE 504L, EE 506, EE 540, EE 554, EE 560, EE 590, EE 601 and EE 677.

#### Master of Science in Electrical Engineering (Wireless Health Technology)

The Master of Science in Electrical Engineering (Wireless Health Technology) reflects a partnership between the Viterbi School of Engineering, the Keck School of Medicine, and other institutions engaged in health care research. The program of study features targeted engineering courses, a rigorous exposure to general medicine, and relevant internship practice (a total of 38 units).

REQUIRED COURSES (28 UNITS)		UNITS
EE 450	Introduction to Computer Networks	3
EE 535	Mobile Communications	3
EE 562a	Random Processes in Engineering	3
EE 579	Wireless and Mobile Networks Design and Laboratory	3
GM 530abc	Foundations of Medicine, Anatomy, Physiology, and Pathology	12
GM 597ab	Health Technology Internship	4
Take two electrical engineering electives from the following list (6 units):		
CSCI 545	Robotics	3
CSCI 561	Foundations of Artificial Intelligence	3
EE 519	Speech Recognition and Processing for Multimedia	3
EE 550	Design and Analysis of Computer Communication Networks	3
EE 559	Mathematical Pattern Recognition	3
EE 564	Communication Theory	3
EE 565a	Information Theory	3
EE 567	Communication Systems	3
Take one global health elective from the following list (4 units)		
GM 500	Basic Concepts in Global Health	4
GM 501	Critical Issues in Global Health	4
GM 502	Global Epidemiology of Diseases and Risk Factors	4
Total:		38 units

Students are expected to have a background in probability equivalent to EE 464 or EE 465; a background in linear algebra equivalent to EE 441; and experience with a programming language such as C or C++. Admitted students who do not meet

prerequisites by placement examination will be assigned courses to complete the deficiencies.

#### Master of Science in Financial Engineering

The objective of this program is the training of graduate students with engineering, applied mathematics or physics backgrounds in the application of mathematical and engineering tools to finance. Financial engineering is a multidisciplinary education program that involves the Viterbi School of Engineering, the Marshall School of Business and the Dornsife College of Letters, Arts and Sciences (Department of Economics). Financial engineering uses tools from finance and economics, engineering, applied mathematics and statistics to address problems such as derivative securities valuation, strategic planning and dynamic investment strategies, and risk management, which are of interest to investment and commercial banks, trading companies, hedge funds, insurance companies, corporate risk managers and regulatory agencies.

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in financial engineering. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average. In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in financial engineering is also subject to the following requirements: (1) a total of at least 27 units is required, 18 of which have to be from the Viterbi School of Engineering; (2) every plan of study requires prior written approval by the contact faculty of the program; (3) units to be transferred (maximum of four with adviser approval) must have been taken prior to taking classes at USC; interruption of residency is not allowed.

#### Curriculum

Students are expected to have a background in probability at the level of USC's EE 465 and linear algebra at the level of USC's EE 441. Admitted students who do not meet prerequisites by placement examination will be assigned courses to complete the deficiencies.

The degree requirements are minimum of 27 units (18 units have to be from the School of Engineering) which corresponds to nine, three-unit courses. Three of the courses are required and the other six are electives from a restricted list of courses:

REQUIRED		UNITS
GSBA 548	Corporate Finance	3
ISE 563	Financial Engineering	3
EE 512	Evolution Theory of Stochastic Processes	3

#### ELECTIVES (ADVISER APPROVED) UNITS

##### *Finance, Business, Economics Area:*

Two courses (6 units) from the following:

ECON 500	Microeconomic Analysis and Policy	4
ECON 501	Macroeconomic Analysis and Policy	4
ECON 613	Econometric and Financial Time Series I	4
FBE 529	Financial Analysis and Valuation	3
FBE 535	Applied Finance in Fixed Income Securities	3
FBE 543	Forecasting and Risk Analysis	3
FBE 554	Trading and Exchanges	3
FBE 555	Investment Analysis and Portfolio Management	3
FBE 559	Management of Financial Risk	3
FBE 589	Mortgages and Mortgage-Backed Securities and Markets	3
ISE 566	Financial Accounting Analysis for Engineering	3

##### *Optimization, Simulations, Stochastic Systems:*

Three courses (9 units) from the following:

CE 645	Uncertainty Modeling and Stochastic Optimization	3
CSCI 570	Analysis of Algorithms	3
EE 464	Probability Theory for Engineers	3
EE 465	Probabilistic Methods in Computer Systems Modeling	3
EE 517	Statistics for Engineers	3
EE 553*	Computational Solution of Optimization Problems	3
EE 556	Stochastic Systems and Finance	3
EE 562a	Random Processes in Engineering	3
ISE 520*	Optimization: Theory and Algorithms	3
ISE 536	Linear Programming and Extensions	3
ISE 538	Elements of Stochastic Processes	3
ISE 539	Stochastic Elements of Simulation	3

\*Students cannot receive credit for both ISE 520 and EE 553

##### *Systems and Control Area:*

One course (3 units) from the following:

AME 541*	Linear Control Systems II	3
EE 500	Neural and Fuzzy Systems	3
EE 585*	Linear System Theory	3
EE 587	Nonlinear and Adaptive Control	3
EE 588	Linear Quadratic Control	3

\*Students cannot receive credit for both EE 585 and AME 541

#### Viterbi Integrated Master of Science Program (VIP) for the General Master of Science in Electrical Engineering

The Viterbi Integrated Master of Science Program (VIP) allows selected undergraduates from U.S. institutions that are partnered with the Viterbi School to complete the Master of Science in Electrical Engineering with a 6-unit reduction of the total 27 units required.

The VIP Master of Science in Electrical Engineering is subject to the following requirements: (1) students must complete a total of at least 21 units; (2) at least 18 units must be completed at the 500 or 600 level; (3) at least 18 units must be taken in electrical engineering; (4) a minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in electrical engineering and all course work attempted at USC beyond the bachelor's degree. Students are encouraged to complete two technical courses outside their area of specialization but within EE to achieve a degree of breadth in their plan of study.

To be eligible for the VIP program, students must have completed the equivalent of at least two 400-level preparatory courses at their undergraduate institution from the list below prior to enrollment at USC. A designated department adviser for the USC VIP program must approve the course selections.

#### PREPARATORY COURSES UNITS

*Complete equivalent of at least two courses*

EE 401	Transform Theory for Engineers	3
EE 441	Applied Linear Algebra for Engineering	3
EE 448L	Communication Electronics	4
EE 450	Introduction to Computer Networks	3
EE 454L	Introduction to System Design Using Microprocessors	4
EE 457	Computer Systems Organization	3
EE 464	Probability Theory for Engineers	3
EE 465	Probabilistic Methods in Computer Systems Modeling	3

EE 470	Electromagnetics II	3
EE 477L	MOS VLSI Circuit Design	4
EE 482	Linear Control Systems	3
EE 483	Introduction to Digital Signal Processing	3
CSCI 402x	Operating Systems	3

Students applying to the VIP must be recommended by a faculty representative at a partner undergraduate institution; complete the regular graduate admission application (with exception of the GRE); and hold junior standing in electrical engineering with a 3.5 GPA or better on major related course work.

#### Second Master's Degree

A graduate student who already holds a master's degree from USC or another accredited engineering school may apply up to four units toward a second master's degree with the permission of the chair of the major department. All credit, including the transferred units, must be earned within seven calendar years.

#### Engineer in Electrical Engineering

Requirements for the Engineer in electrical engineering are the same as those listed under Engineer degree, except that both areas of concentration must be in electrical engineering.

#### Doctor of Philosophy in Electrical Engineering

The Doctor of Philosophy with a major in electrical engineering is awarded in strict conformity with the general requirements of the USC Graduate School. See general requirements for graduate degrees. Departmental requirements for this degree consist of a concentrated program of study and research and a dissertation. Each student wishing to undertake a doctoral program must first be admitted to the program and then take the screening examination. This examination will emphasize comprehension of fundamental material in one of the 13 specialized areas of electrical engineering listed below. Listed under each area are courses offered by the Department of Electrical Engineering which will provide basic background for the examination and partial preparation for the dissertation. Not all courses listed are required for preparation for the screening examination in any specific area. Consult a separately published guide, available from the department office, for more information concerning examination content and scheduling. Further guidance concerning the full completion of courses, including those given outside the department, which are recommended for preparation for the dissertation, can be obtained from the faculty in each technical area.

### Major Fields in Electrical Engineering — Electrophysics

Students may major in the following fields: Electromagnetics-EE 570ab, EE 571ab, EE 572ab, EE 573ab, EE 576, EE 578, EE 604; Plasma Science-EE 539, EE 570ab, EE 572ab; Power and Machinery-EE 510, EE 521, EE 524, EE 525; Quantum Electronics-EE 529, EE 530, EE 531, EE 539, EE 540; Solid State-EE 501, EE 502, EE 504L, EE 506, EE 507, EE 508, EE 537, EE 601, EE 604, EE 606, EE 607; Integrated Circuits-EE 471, EE 501, EE 504L, EE 506, EE 536ab, EE 537, EE 540, EE 569, EE 577, EE 585, EE 601, EE 604, EE 605, EE 606, EE 630; Optics-EE 529, EE 530, EE 531, EE 539, EE 540, EE 559, EE 566, EE 569, EE 589, EE 642, EE 669.

### Major Fields in Electrical Engineering — Systems

Students may major in the following fields: Biomedical Engineering and Biomathematics-EE 593; Communication Theory-EE 535, EE 550, EE 551, EE 562ab, EE 563, EE 564, EE 565ab, EE 566, EE 567, EE 568, EE 569, EE 583, EE 595, EE 664, EE 666, EE 667, EE 669; Computer Engineering-CSCI 561, EE 532, EE 545, EE 547, EE 548, EE 549, EE 550, EE 552, EE 553, EE 554, EE 555, EE 557, EE 560, EE 574, EE 577ab, EE 578, EE 579, EE 650, EE 653, EE 657, EE 658, EE 677, EE 680, EE 681 (see program listing for the Master of Science in Computer Engineering); Intelligent Systems-EE 559, CSCI 561, CSCI 574; Signal Processing-EE 500,

EE 517, EE 519, EE 522, EE 559, EE 562a, EE 566, EE 569, EE 583, EE 586L, EE 589, EE 591, EE 592, EE 596, EE 619, EE 669; Systems and Controls-EE 553, EE 563, EE 585, EE 586, EE 587, EE 588, EE 593.

### Graduate Certificate in Engineering Technology Commercialization

See listing in the Special Educational Opportunities section, page 586.

## Courses of Instruction

### ELECTRICAL ENGINEERING (EE)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**EE 101 Introduction to Digital Logic (3, FaSp)** Boolean algebra; number systems; Boolean function synthesis; binary arithmetic; codes; combinational logic devices; sequential circuits; state machine design and implementation.

**EE 105 Introduction to Electrical Engineering (3, Fa)** Gateway to the majors in Electrical Engineering. An overview of modern electrical engineering: communications, computers, circuits, components, controls, electromagnetics, microelectronics; principles of commercial products such as FAX, modem, copier, CD-ROM, ATM networks.

**EE 106L Introduction to Computer Engineering/Computer Science (2, Fa)** Examination of key disciplines of computing systems: architecture, operating systems, digital logic, VLSI, networks, AI, robotics, graphics, and algorithms. Includes hardware/software laboratory tours and exercises. Open only to B.S., Computer Engineering and Computer Science and B.S., Computer Science majors.

**EE 120L Introduction to Programming for Computer Scientists (3, FaSp)** (Enroll in CSCI 120L)

**EE 150L Engineering Computational Methods (3, Fa)** Algorithms and computational methods for efficient solution of engineering problems. Introduction to engineering software tools.

**EE 201L Introduction to Digital Circuits (4, FaSp)** Digital system design and implementation; synchronous design of datapath and control; schematic/Verilog-based design, simulation, and implementation in Field Programmable Gate Arrays; timing analysis; simple CPU design. *Prerequisite:* EE 101.

**EE 202L Linear Circuits (4, FaSpSm)** Lumped circuit elements; network equations; zero-input and zero-state responses; sinusoidal steady-state analysis; impedance; resonance; network functions; power concepts; transformers; Laplace transforms. *Prerequisite:* PHYS 152L; *corequisite:* MATH 245.

**EE 222 Fundamentals of Audio Engineering (3, Fa)** Introduction to basic audio engineering principles and techniques, with emphasis on practical sound-system analysis and design. Sound measurements, microphones, amplifiers, loudspeakers, and system integration.

**EE 241 Applied Linear Algebra for Engineering (3, FaSp)** Introduction to the theory of matrices, vector spaces, least-squares approximation and MATLAB. Applications to communications, control and signal processing. *Prerequisite:* MATH 126.

**EE 301L Linear Systems (4, FaSp)** Representation and analysis of linear time-invariant systems primarily for the continuous time case. Convolution, Fourier series and transform, Laplace transform, controls and communications applications. *Prerequisite:* EE 202L.

**EE 320 Digital Media Basics for Multimedia (3, FaSp)** Digital media basics for creating multimedia applications including analog and digital representation, media editing, interface construction, CD ROM and network delivery. *Corequisite:* ITP 210.

**EE 322 Introduction to Digital Audio (3, Fa)** Fundamentals of sound, acoustics and digital audio signal processing.

**EE 326Lx Essentials of Electrical Engineering (4)** Network analysis and theorems; transient analysis; transformers; semiconductor physics and circuits; power amplifiers, modulation and demodulation, and pulse, digital, and switching circuits. Introduction to instrumentation. Not available for credit to electrical engineering majors. *Prerequisite:* PHYS 152L, MATH 126.

**EE 328Lx Circuits and Electronics for Computer Engineers (3, Fa)** Introduction to the physical principles of governing analog circuits for data conversions and data communications. Elementary device behavior for digital systems. Not available for credit to electrical engineering majors. *Prerequisite:* PHYS 152L.

**EE 330 Electromagnetics I (3, FaSp)** Basic static and dynamic electromagnetic field theory and applications; electrostatics, magnetostatics, Maxwell's equations, energy flow, plane waves incident on planar boundaries, transmission lines. *Prerequisite:* EE 202L, MATH 445, PHYS 152L.

**EE 337L Engineering Nano-Systems (3, Sp)**

Methods to control and exploit the phenomena of nano-science, and the integration of nano-technology into systems. Development of fundamental concepts through a series of experimental modules. (Duplicates credit in former EE 238L.) *Prerequisite:* PHYS 152L.

**EE 338 Physical Electronics (3)**

Semiconductor device characteristics and applications. Physical models of electronic conduction in solids, p-n junctions, bipolar and field effect transistors and other solid-state devices. *Prerequisite:* EE 202L, PHYS 152L.

**EE 348L Electronic Circuits (4, FaSp)**

Basic analog and digital circuit design using Bipolar Junction Transistors, Field Effect Transistors and integrated circuits. *Corequisite:* EE 338.

**EE 351 Programming and Multimedia on the World Wide Web (3, Sp)**

(Enroll in CSCI 351)

**EE 352L Computer Organization and Architecture (3, Sp)**

Computer organization and architecture. Concepts include: computer evolution and performance, system busses, cache memory, internal and external memory, input/output, operating system support, computer arithmetic. *Prerequisite:* CSCI 102.

**EE 355x Software Design for Electrical Engineers (3)**

Object-oriented programming techniques, basic data structures, and elementary complexity analysis for the modeling, simulation, and solution of engineering problems. Not available for credit for CSCI, CSGM, CSBA, or CECS majors. (Duplicates credit in former CSCI 355x.) *Prerequisite:* EE 150.

**EE 357 Basic Organization of Computer Systems (3, FaSp)**

Organization and operation of the processor, memory and I/O of a minicomputer at the machine language level; assembly language programming; data representation and computer arithmetic. *Prerequisite:* EE 101, EE 201L, and a high level programming language.

**EE 364 Introduction to Probability and Statistics for Electrical Engineering and Computer Science (3, FaSp)**

Introduction to concepts of randomness and uncertainty: probability, random variables, statistics. Applications to digital communications, signal processing, automatic control, computer engineering and computer science. *Prerequisite:* MATH 225 or MATH 245.

**EE 370 Electromechanics (3)**

Ferromagnetism and transformers. Energy conversion in singly and multiply excited systems. Concepts in rotating machinery analysis. Direct energy conversion. *Prerequisite:* EE 330.

**EE 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**EE 401 Transform Theory for Engineers (3, Fa)**

Complex variables, Cauchy Riemann conditions, contour integration and residue theory; Fourier transform; Laplace transform; sampling theory. Discrete time filters, discrete and fast Fourier transform. *Prerequisite:* EE 301L and MATH 445.

**EE 415 Introduction to MEMS (3)**

(Enroll in AME 455)

**EE 422x Electromagnetic Systems Design (3, FaSp)**

Applied electromagnetics for large- and small-scale electromechanical systems. Comprehensive design project. Capstone design experience. Open only to seniors. Not available for graduate credit. *Prerequisite:* EE 330.

**EE 423Lx Loudspeaker and Sound-System Design (3, Sp)**

Project-based design of loudspeaker transducers, filters, and enclosures. Measurement of transfer functions, acoustical performance, distortion, Thiele-Small parameters, and power handling. Listening evaluations. Capstone design experience. Open only to seniors. Not available for graduate credit. *Prerequisite:* EE 301L or AME 302; PHYS 152L; *recommended preparation:* EE 330.

**EE 434Lx Digital Signal Processing Design Laboratory (4)**

Experiments and design project in digital signal processing (e.g., real-time DSP, acoustics, video) including: systems specification, preliminary analysis, trade-off studies, implementation, presentation. Capstone design experience. Open only to seniors. Not available for graduate credit. *Prerequisite:* EE 483; *recommended preparation:* EE 469.

**EE 436 Introduction to Condensed Matter Physics (4, Irregular, Sp)**

(Enroll in PHYS 440)

**EE 438L Processing for Microelectronics (3)**

Applications and electrical evaluation of selected processes used in electronic microfabrication. (Duplicates credit in former MASC 438L.) *Prerequisite:* EE 338.

**EE 439 Principles of Semiconductor Processing (3)**

(Enroll in MASC 439)

**EE 441 Applied Linear Algebra for Engineering (3, FaSpSm)**

Introduction to linear algebra and matrix theory and their underlying concepts. Applications to engineering problems. *Prerequisite:* MATH 445.

**EE 443 Introduction to Power Systems (3)**

Components of power systems. Analysis techniques in electrical power generation transmission and utilization. Environmental and economic considerations in system operations and planning. *Recommended preparation:* EE 370.

**EE 444 Power Systems Technology (3, Fa)**

Comprehensive assessment of the technical, environmental, and regulatory challenges that affect the future delivery and utilization of electric power. Case-study analysis. *Prerequisite:* EE 202L.

**EE 445 Introduction to Robotics (4)**

(Enroll in CSCI 445)

**EE 447Lx Mixed Signal Electronic Circuits (4)**

Application of solid-state electronic devices to the design of linear and mixed-signal systems. Laboratory experiments and projects involving the design of electronic hardware. Capstone design experience. Open only to seniors. Not available for graduate credit. *Prerequisite:* EE 348L.

**EE 448L Communication Electronics (4, FaSp)**

Analysis, design, and experimental evaluation of transistor-level communication circuits and micro-systems. Transmission lines, impedance matching, noise, distortion, tuned amplifiers, mixers, oscillators, phase-locked loops. *Prerequisite:* EE 348L.

**EE 450 Introduction to Computer Networks (3, FaSpSm)**

Network architectures; layered protocols, network service interface; local networks; long-haul networks; internal protocols; link protocols; addressing; routing; flow control; higher level protocols. *Prerequisite:* junior standing.

**EE 452L Game Hardware Architectures (3, Fa)**

Architectural principles underlying modern game console hardware design; introduction to the programming techniques, optimization strategies, and hardware insights to create powerful games. *Prerequisite:* EE 352L.

**EE 454L Introduction to System Design Using Microprocessors (4, FaSp)**

Operation and timing of 8/16/32-bit microprocessors; asynchronous and synchronous SRAM interface; burst and pipelined bus cycles, parallel and serial I/O, interrupt controller, DMA controller, bus protocols. *Prerequisite:* EE 201L and EE 357; *recommended preparation:* EE 457.

**EE 455x Introduction to Programming Systems Design (4)**

(Enroll in CSCI 455x)

**EE 457 Computer Systems Organization (3, FaSpSm)** Register Transfer level machine organization; performance; arithmetic; pipelined processors; exceptions, out-of-order and speculative execution, cache, virtual memory, multi-core multi-threaded processors, cache coherence. *Prerequisite:* EE 201 and EE 357.

**EE 459Lx Embedded Systems Design Laboratory (3, Sp)** Specification, design, implementation, testing and documentation of a digital system project using embedded processors, programmable logic; analog I/O interfaces and application specific hardware. Capstone design experience. Open only to seniors. Not available for graduate credit. *Prerequisite:* EE 454L.

**EE 460 Introduction to Artificial Intelligence (3)** (Enroll in CSCI 460)

**EE 464 Probability Theory for Engineers (3, FaSpSm)** Axiomatic foundations of probability, random variables, functions of several random variables, introduction to statistics, sequences of random variables. *Prerequisite:* EE 301L and MATH 445.

**EE 465 Probabilistic Methods in Computer Systems Modeling (3, FaSp)** Review of probability; random variables; stochastic processes; Markov chains; and simple queueing theory. Applications to program and algorithm analysis; computer systems performance and reliability modeling. *Prerequisite:* MATH 407 or EE 364.

**EE 467 Introduction to Communication Systems (3)** Analog and digital communication systems. (De)modulation and (de)multiplexing of AM/FM/PM, noise, digital data formats, error rates, and spectral analysis. Review of wireless, networking, and optical systems. *Prerequisite:* EE 301L

**EE 469 Introduction to Digital Media Engineering (3)** Fundamentals of digital media representation, for audio, images and video signals. Sampling; Fourier and z-transforms; FFT; filter design; image segmentation, image and video compression standards. *Prerequisite:* EE 301L; EE 364 or MATH 407.

**EE 470 Electromagnetics II (3)** Dynamic field theory and elementary solutions to Maxwell's equations. Introduction to propagation and radiation of electromagnetic fields. *Prerequisite:* EE 330.

**EE 471 Applied Quantum Mechanics for Engineers (3)** Introductory quantum mechanics and applications. Schrodinger equation, atomic and molecular processes, time-dependent perturbation theory. Applications to lasers, solid-state demos and gaseous devices. *Prerequisite:* EE 330 or graduate standing.

**EE 472 Introduction to Lasers and Laser Systems (3, Fa)** Electric dipole transitions; traveling wave and resonant amplifiers; laser pumping and rate equations; threshold, frequency, and power output of lasers; holography; laser communication systems. *Corequisite:* EE 470.

**EE 473L Lasers and Optics Laboratory (3, Sp)** Introductory design/research laboratory in lasers and optics, which typically includes fiber optics, photonics, electro-optics, optical sensors, optical communication, optical signal processing and computing. *Corequisite:* EE 470.

**EE 474 Introduction to Photonics (3, Sp)** Photonic system requirements; waveguide modes and dispersion; optical fiber modes, loss and dispersion; principles of operation of lasers, optical amplifiers, detectors and modulators; noise. *Prerequisite:* EE 330, EE 338.

**EE 475 Wireless Communication Technology (3, Fa)** Fundamentals of wireless communication from a device point of view. Lab experiments and design project. *Recommended preparation:* EE 241, EE 483

**EE 476 Chemical Engineering Materials (3, Sp)** (Enroll in CHE 476)

**EE 477L MOS VLSI Circuit Design (4, FaSp)** Analysis and design of digital MOS VLSI circuits including area, delay and power minimization. Laboratory assignments including design, layout, extraction, simulation and automatic synthesis. *Prerequisite:* EE 328Lx or EE 338.

**EE 478Lx Digital Electronic Circuit Design (4, Sp)** Design of digital electronic circuits. Laboratory experiments and an extensive term project using digital hardware. Capstone design experience. Open only to seniors. Not available for graduate credit. *Prerequisite:* EE 348L.

**EE 479 Analog and Non-Linear Integrated Circuit Design (3, Fa)** Analysis and design techniques for CMOS analog and non-linear integrated circuits. Frequency and noise characteristics of broadband amplifiers. Feedback, oscillators, and phase-locked loops. *Prerequisite:* EE 348L.

**EE 480 Introduction to Nanoscience and Nanotechnology (3, Fa)** Next-generation nanoscale materials and electronic devices: nanoscale fabrication and characterization, nanomaterials, nanoelectronics, and nanobio-technology. *Prerequisite:* EE 338.

**EE 481L Control Systems Laboratory (3, Sp)** (Enroll in AME 443L)

**EE 482 Linear Control Systems (3, FaSpSm)** Analysis of linear control systems; continuous and sampled-data systems, various stability criteria; frequency response and root locus compensation techniques. *Prerequisite:* EE 301L or graduate standing.

**EE 483 Introduction to Digital Signal Processing (3, FaSp)** Fundamentals of digital signal processing covering: discrete time linear systems, quantization, sampling, Z-transforms, Fourier transforms, FFTs and filter design. *Prerequisite:* EE 301L.

**EE 484x Communication System Design (3, Sp)** Design and analysis of analog and digital communication systems. System models, requirements, development, performance analysis and component selection techniques. Comprehensive system design project. Capstone design experience. Open only to seniors. Not available for graduate credit. *Prerequisite:* EE 364, EE 475; *recommended preparation:* EE 467.

**EE 485 Telecommunications Technology (3)** Technical development of the telecommunications industry and the accompanying regulatory environment. Case-study analysis. *Prerequisite:* EE 301L.

**EE 490x Directed Research (2-8, max 8)** Individual research and readings. Not available for graduate credit.

**EE 499 Special Topics (2-4, max 8)** Course content will be selected each semester from current developments in the field of electrical engineering.

**EE 500 Neural and Fuzzy Systems (3)** Neural networks and fuzzy systems, including: neuron structure and dynamics, unsupervised and supervised learning, network models and architectures, network stability and learning convergence. *Recommended preparation:* EE 464.

**EE 501 Solid State (3)** (Enroll in MASC 501)

**EE 502 Advanced Solid State (3)** (Enroll in MASC 502)

**EE 504L Solid-State Processing and Integrated Circuits Laboratory (3)** Laboratory oriented with lectures keyed to practical procedures and processes. Solid-state fabrication and analysis fundamentals; basic device construction techniques. *Prerequisite:* BSEE.

**EE 506 Semiconductor Physics (3)** Semiconductor bonds, crystallography, band structure assumptions, group theory, band structure results, k.p. method, quantum wells, wires and dots, superlattices, amorphous, organic semiconductors, defects, statistics, surfaces. *Prerequisite:* MASC 501.

**EE 509 Electromagnetics for Semiconductor Photonics (3)** Overview of electromagnetics needed to understand and design photonic devices. Includes discussion of waveguides and resonant cavities and an introduction to photonic crystals.

**EE 510 Symmetrical Components (3)** The theory of symmetrical components and their use in power system analysis; sequence impedances of system components; other transformations and applications.

**EE 512 Evolution Theory of Stochastic Processes (3)** Probability theory and stochastic processes, including renewal theory, Markov chains, Brownian motion, martingales, and stochastic calculus. Applications in communication networks, queuing theory, and financial systems. *Prerequisite:* EE 441 and EE 464 or EE 465.

**EE 513 Solid State Energy Devices (3)** Design and operation of solar photovoltaic energy converters, thermovoltaic energy converters, thermoelectric energy converters, and solid state light emitters; their roles in renewal and conservation of energy. *Recommended preparation:* EE 338.

**EE 515 High Voltage Technology (3)** High voltage engineering basic concepts; theoretical, design, and practical aspects of over-voltages, travelling-waves, insulation, and aging; breakdown mechanisms; insulation coordination.

**EE 517 Statistics for Engineers (3, Sp)** Presents statistics with engineering emphasis. Topics include confidence intervals, hypothesis testing, estimation, regression, nonparametric tests, analysis of variance, quality control, and experimental design. *Recommended preparation:* EE 464 or other probability course.

**EE 519 Speech Recognition and Processing for Multimedia (3, Fa)** Speech production, acoustics, perception, synthesis, compression, recognition, transmission. Coding for speech, music, and CD-quality. Feature extraction. Echo cancellation. Audio, visual synchronization. Multimedia, internet use. *Prerequisite:* EE 483.

**EE 520 Introduction to Quantum Information Processing (3, Sp)** Introduces the basics of quantum computation and quantum information theory: quantum bits and registers, unitary gates, algorithms, error correction, and quantum cryptography. *Recommended preparation:* EE 441, EE 464.

**EE 521 Power Systems Analysis and Design (3)** Power system planning, studies, and design; time-domain modeling and analysis of power-system networks; power flow, stability, fault, and economic dispatch analysis; symmetrical components. *Prerequisite:* EE 443.

**EE 522 Immersive Audio Signal Processing (3, Sp)** Fundamentals of digital audio signal processing, room acoustics, and psychoacoustics. Algorithms for real-time implementation of immersive audio systems for integrated media applications. *Prerequisite:* EE 301L; *recommended preparation:* EE 483.

**EE 524 Transients in Power Systems (3)** Overvoltages during faults, voltage recovery, arcing faults, restrikes, theory of switching surges. Systems grounding, traveling waves, lightning and surge protection, insulation coordination. *Prerequisite:* EE 443.

**EE 525 Power System Protection (3)** Theory of system and equipment protection, characteristics of relays, relay coordination, and system considerations. *Prerequisite:* EE 510.

**EE 526 Renewable Energy in Power Systems (3)** Renewable energy sources and their integration in electrical networks. Power-flow control from highly variable resources. Cost analysis and planning.

**EE 527 Net-Centric Power-System Control (3)** Control and stability of large-scale systems such as the electric power grid. Integration with information networks. *Corequisite:* EE 521; *recommended preparation:* EE 484 or equivalent.

**EE 528 Power Electronics (3)** Fundamentals of switched-mode power converters operating under steady-state and transient conditions. Feedback control systems. Magnetic circuit design.

**EE 529 Optics (3)** Basic graduate level optics including wave optics, foundations of geometric optics, optical elements, aberration theory, Hermite-Gaussian beams, multilayer structures, and matrix techniques. *Recommended preparation:* EE 470 or graduate standing.

**EE 530 Optical Materials, Instruments and Devices (3)** Anisotropic materials and devices; properties of metals; design and theory of selected optical instruments; properties of electrooptic, acoustooptic, and spatial light modulators; optical detectors. *Prerequisite:* EE 529.

**EE 531 Nonlinear Optics (3)** Theory of nonlinear optical susceptibility and application to self-focusing, harmonic generation, and parametric interactions. Raman and Brillouin scattering. Coherent spectroscopy. *Prerequisite:* EE 470.

**EE 532 Wireless Internet and Pervasive Computing (3, Fa)** Wireless Internet access technologies, 3G cellular systems, WAP and PKI protocols, mobile computing devices, network security for mobile E-commerce, software and middleware for pervasive, cluster, grid, and Internet computing. *Prerequisite:* EE 450; *recommended preparation:* EE 457.

**EE 534 Materials Characterization (3)** (Enroll in MASC 534)

**EE 535 Mobile Communications (3, Fa)** The mobile communication channel; techniques used to combat the channel; cellular communications; multiple-access techniques; example mobile communication systems. *Prerequisite:* EE 441, EE 567, EE 464 or EE 465; *recommended preparation:* EE 562a, EE 564.

**EE 536ab Mixed-Signal Integrated Circuit Design (3-3, FaSp) a:** MOSFET operation and models; voltage references and biasing; elementary amplifier configurations; design techniques for high-speed operational amplifiers, comparators and transconductors; compensation methods. *b:* Non-linear integrated circuits, data-converter architectures and implementations, comprehensive design project. *Prerequisite:* EE 479.

**EE 537 Modern Solid-State Devices (3, Fa)** Integrated-circuit technologies for mixed-signal communication and data systems. Constituent device models and their limitations. Contemporary research topics. *Prerequisite:* EE 338.

**EE 539 Engineering Quantum Mechanics (3, Fa)** Quantum mechanics for engineering majors who work with solid-state devices, quantum electronics, and photonics. Schrodinger equation, perturbation theory, electronic and optical processes.

**EE 540 Introduction to Quantum Electronics (3)** Fundamentals of light amplification; laser amplifiers and oscillators; atomic pumping; maser and laser systems; definitions of coherence; measurements in quantum electronics. *Prerequisite:* EE 470.

**EE 541 Radio Frequency Filter Design**

**(3, Fa)** Theory and realization of passive and transconductance-based active filters for radio frequency communications. Distributed and quasi-distributed passive filters. Circuit testing via scattering parameters. *Prerequisite:* EE 348.

**EE 543abl Digital Control Systems (a: 3, Fa; b: 1)**

*a:* Design, analysis, and implementation of digital control systems using microcomputers;  $Z$ -transform methods; frequency domain and state space approach; computational aspects; sampling and quantization. *Prerequisite:* EE 482. *b:* Modeling of real processes; design and implementation of digital control systems in the controls laboratory. (Lab is required for the *b* section only.) (Duplicates credit in former EE 485abL.) *Prerequisite:* EE 543a.

**EE 544 Radio Frequency Systems and Hardware (3, Sp)**

Elements of radio frequency communication systems: modulation/demodulation strategies, transmission-channel impairments, performance criteria, hardware (low-noise amplifiers, mixers, oscillators), digital back-end, contemporary case studies. *Prerequisite:* EE 301L, EE 348L, EE 364.

**EE 545 Robotics (3, FaSp)** (Enroll in CSCI 545)**EE 546 Intelligent Embedded Systems (3, Sp)** (Enroll in CSCI 546)**EE 547 Sensing and Planning in Robotics (3, Fa)** (Enroll in CSCI 547)**EE 548 Analytical Methods in Robotics (3)** (Enroll in AME 548)

**EE 549 Queueing Theory for Performance Modeling (3, Sp)** Review of Poisson and Markov processes; Markovian and non-Markovian queueing systems; networks of queues; priority queueing; applications of the theory to computer systems and communication networks. *Prerequisite:* EE 464 or EE 465.

**EE 550 Design and Analysis of Computer Communication Networks (3, Fa)** Applications of stochastic modeling and optimization techniques to communication network design and analysis. Data link control; performance models; multi-access channels; routing and flow control. *Prerequisite:* EE 450, EE 464 or EE 465; *recommended preparation:* EE 549.

**EE 551 Principles of Radar (3, Irregular)**

Signal propagation, reflections from targets; radar equation; detection of scintillating targets; resolution; ambiguity functions; clutter rejection; tracking radars. *Prerequisite:* EE 562a; *recommended preparation:* EE 470.

**EE 552 Asynchronous VLSI Design (3, FaSp)**

Asynchronous channels and architectures; implementation design styles; controller synthesis; hazards, and races; Petri-nets; performance analysis, and optimization; globally asynchronous locally synchronous design. Open only to graduate students. *Prerequisite:* EE 477.

**EE 553 Computational Solution of Optimization Problems (3, Sp)**

Computer algorithms for system optimization. Search techniques, gradient methods, parameter optimization in control systems. Optimization with constraints; linear and nonlinear programming. Random search techniques. *Prerequisite:* EE 441.

**EE 554 Real Time Computer Systems (3, Sp)**

Structure of real-time computer systems; analog signals and devices; scheduling, synchronization of multiprocessors; reliability, availability; serial/parallel computations; real-time operating systems and languages; design examples. *Prerequisite:* EE 457.

**EE 555 Broadband Network Architectures (3, FaSp)**

Broadband network architectures and services, technologies for high-speed access and core networks, optical infrastructure for layered network architectures, high performance switch and router architectures. *Prerequisite:* EE 450 and EE 464 or EE 465.

**EE 556 Stochastic Systems and Finance (3)**

Introductory probability; Markov chains; Martingales and stopping times; Brownian motion; Ito's calculus and formula; Black-Scholes formula; arbitrage pricing and risk neutral measures; options. *Prerequisite:* EE 441 and EE 464 or EE 465; *recommended preparation:* EE 562a or EE 562b or ISE 538.

**EE 557 Computer Systems Architecture (3, FaSp)**

Computer architecture from a design perspective: Pipelined processors, speculative execution, VLIW, vector processors, memory systems, interconnection networks, shared-memory and message-passing multiprocessors, chip multiprocessors. *Prerequisite:* EE 457.

**EE 558 Optical Fiber Communication Systems (3, FaSp)**

State-of-the-art optical fiber communication systems. Emphasis on optoelectronic-device and communication-systems issues necessary to provide high-speed and/or networked optical communications. *Recommended preparation:* EE 338; basic knowledge of optics, semiconductor, and communications concepts.

**EE 559 Mathematical Pattern Recognition (3, Sp)**

Distribution free classification, discriminant functions, training algorithms; statistical classification, parametric and non-parametric techniques, potential functions; non-supervised learning. *Prerequisite:* EE 464; *corequisite:* EE 441.

**EE 560 Digital System Design-Tools and Techniques (3, Sm)**

ASIC design, FPGAs, VHDL, verilog, test benches, simulation, synthesis, timing analysis, post-synthesis simulation, FIFOs, handshaking, memory interface, PCI bus protocol, CAD tools, design lab exercises. *Prerequisite:* EE 457, EE 454L; *recommended preparation:* familiarity with CAD tools.

**EE 561 Foundations of Artificial Intelligence (3-3, FaSp)** (Enroll in CSCI 561)**EE 562ab Random Processes in Engineering (a: 3, FaSpSm; b: 3, Irregular)**

*a:* Random vectors, sequences, and functions. Linear transformations, second moment theory, spectral densities, narrowband processes, Gaussian processes, correlation detection, linear minimum mean square error estimation. *Prerequisite:* EE 441, EE 464. *b:* Orthogonal or independent increment processes. Poisson processes. Nonlinear operations on random processes; power-law detectors. Markov chains and processes; the Fokker-Planck equation; level crossing problems. *Prerequisite:* EE 562a.

**EE 563 Estimation Theory (3, Fa)**

Parameter estimation and state estimation technique including: least squares, BLUE, maximum-likelihood, maximum a posteriori, Kalman-prediction, Kalman-filtering and Kalman smoothing and extended Kalman filtering. *Prerequisite:* EE 562a.

**EE 564 Communication Theory (3)**

Elementary statistical design theory with applications to the design of digital communications receivers and radar receivers; signal design in digital communications. *Prerequisite:* EE 441, EE 464; *corequisite:* EE 562a; *recommended preparation:* EE 401.

**EE 565ab Information Theory (a: 3, Fa; b: 3, Irregular)**

Information measures; asymptotic equipartition property; source coding theorem; noiseless coding; cryptography, channel coding theorem; rate distortion theory; Gaussian channels; multiple user source and channel theory. *Prerequisite:* EE 464 or EE 465.

**EE 566 Optical Information Processing (3, Fa)**

Coherent and incoherent optical transforming, imaging and two-dimensional information processing systems; optical image processing, spatial frequency response and filtering; optical and digital holography. *Recommended preparation:* EE 401.

**EE 567 Communication Systems (3, Fa)**

Analysis of communication systems operating from very low to optical frequencies. Comparison of modulation and detection methods. System components description. Optimum design of communication systems. *Corequisite:* EE 464 or EE 465; *recommended preparation:* EE 441.

**EE 568 Error Correcting Codes (3, Sp)**

Finite field theory; linear block codes, convolutional codes, algebraic codes; decoding methods; examples. *Prerequisite:* EE 441 and EE 464.

**EE 569 Introduction to Digital Image Processing (3, FaSp)**

Image sampling, 2-D image transform, image enhancement, geometric image modification, morphologic processing, edge detection, texture analysis, image filtering and restoration. Graduate standing. *Recommended preparation:* EE 401, EE 464.

**EE 570ab Advanced Electromagnetic Theory (3-3)**

Static and dynamic electromagnetic field theory; solution of scalar and vector boundary value problems; Kirchhoff radiation theory; geometrical optics and geometrical diffraction theory. *Prerequisite:* EE 470.

**EE 571ab Microwave Networks (3-3)**

*a:* Microwave network theory for transmission lines and waveguides, discontinuities, impedance transformers, resonators, multi-junction networks, periodic structures, non-reciprocal and active devices. *Prerequisite:* EE 470.

*b:* Parameter matrices, approximate design procedures for distributed networks from lumped networks, coupled lines, equivalent coupled-line circuits, Kuroda's identities, and capacitance matrix transformations. *Prerequisite:* EE 571a.

**EE 572ab Plasma Dynamics (3-3)**

Particle drifts, collision phenomena, Boltzmann and Vlasov equations, hydrodynamic equations, Coulomb interactions; waves in a cold and hot plasma, plasma oscillations, Landau damping, hydromagnetic waves.

**EE 573ab Antenna Analysis (3-3)** Analysis of idealized antenna models, including the dyadic Green's function, reciprocity, aperture radiation, methods of moments, geometrical and physical optics, reflectors, arrays. *Prerequisite:* EE 470.

**EE 574 Computer Vision (3, Fa)** (Enroll in CSCI 574)

**EE 577ab VLSI System Design (a: 3, FaSp; b: 3, FaSp)** *a:* Integrated circuit fabrication; circuit simulation; basic device physics; simple device layout; structured chip design; timing; project chip; MOS logic; system design silicon compilers. *Prerequisite:* EE 477; *b:* VLSI design project; chip level design issues: power and clock distribution, packaging, I/O; design techniques; testability; chip fabrication and test.

**EE 578 Reflector Antennas (3)** Introduction to the analytical and numerical techniques used in the analysis and design of modern reflector antenna systems, including physical optics, asymptotic techniques, shaping and feeds. *Prerequisite:* EE 470.

**EE 579 Wireless and Mobile Networks**

**Design and Laboratory (3, Sp)** Mobile ad hoc networks: ad hoc and geographic routing, resource discovery, medium access control, IP-mobility, mobility modeling, wired-wireless networks. Lab: wireless LAN measurement, mobile-IP, ad hoc routing. *Prerequisite:* CSCI 551 or EE 550 or EE 555; *recommended preparation:* programming, network simulation.

**EE 580 Optical Communications (3, Sp)**

Analysis and design of optical and fiber optical systems; direct detection, heterodyning, laser modulation formats; receiver analysis and fiber modeling; digital error probabilities. *Prerequisite:* EE 562a.

**EE 581 Mathematical Foundations for Computer-Aided Design of VLSI Circuits (3, Sp)**

Mathematical techniques employed in computer-aided-design systems, including: graph theory, algorithmic and heuristic techniques for combinatorial problems, data structures and modeling. *Corequisites:* EE 457, EE 477.

**EE 583 Adaptive Signal Processing (3, Sp)**

Weiner filtering, linear prediction, method of steepest descent, stochastic gradient algorithms, recursive least-squares (RLS), fast RLS, RLS with systolic arrays, QRD-least squares methods, blind deconvolution. *Prerequisite:* EE 483, EE 562a.

**EE 584 Chaotic Systems (3, Fa)**

Logistic map, chaotic bifurcation, strange attractors, and fractals. Conservative dynamical systems and measure preserving transformations. Ergodicity. Kolmogorov-Sinai entropy. Chaotic/stochastic realization. Chaos in feedback. *Prerequisite:* EE 562a.

**EE 585 Linear System Theory (3, FaSpSm)**

Analysis of linear dynamical systems by state-space techniques; controllability, observability, stability, passivity. Application of feedback control and network synthesis. *Prerequisite:* EE 441.

**EE 586L Advanced DSP Design Laboratory**

**(4)** Real-time adaptive signal processing design projects using special purpose DSP processors. Suitable project areas include acoustics, speech, arrays, image compression and biomedical signal processing. *Prerequisite:* EE 583 or EE 569.

**EE 587 Nonlinear and Adaptive Control**

**(3, Fa)** Nonlinear systems, Lyapunov Stability, Parameter Identification, direct and indirect adaptive control for linear and nonlinear systems. Design analysis, stability, robustness and applications. Backstepping, feedback linearization. *Prerequisite:* EE 482, EE 585.

**EE 588 Linear Quadratic Control (3, Sp)**

Linear systems with quadratic cost, Riccati equations, observers, Kalman-Bucy filters, separation principle, discrete linear optimal control systems. *Prerequisite:* EE 585; *recommended preparation:* EE 482, EE 562a.

**EE 589 Statistical Optics (3)**

Statistical methods in optical information processing. Interferometry, propagation, imaging with partially coherent light; statistics of randomly inhomogeneous media, photon counting, holography, photographic and optical detectors. *Prerequisite:* EE 566; *corequisite:* EE 562a.

**EE 590 Directed Research (1-12, FaSpSm)**

Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**EE 591 Magnetic Resonance Imaging and Reconstruction (3, Sp)**

Principles of magnetic resonance imaging. Spin physics, Fourier-based acquisition and reconstruction, generation of tissue contrast, fast imaging, artifact correction, advanced image reconstruction. *Prerequisite:* EE 483, familiarity with MATLAB; *recommended preparation:* EE 441, EE 464, BME 525.

**EE 592 Computational Methods for Biomedical Imaging (3, Sp)**

Analytic tomographic reconstruction from projections in 2-D and 3-D; algorithms for model based reconstruction; maximum likelihood and Bayesian methods; applications to CT, PET and MRI. *Prerequisite:* EE 483, EE 562a.

**EE 593 Multivariable Control (3, Fa)**

Feedback performance analysis; robustness and stability margins; sensitivity; disturbance attenuation; design tradeoffs; singular value, characteristic locus, and inverse Nyquist array design methods. *Prerequisite:* EE 482 and EE 585.

**EE 594abz Master's Thesis (2-2-0, FaSpSm)**

For the master's degree. Credit on acceptance of thesis. Graded IP/CR/NC.

**EE 595 Algebraic Coding Theory (3, Fa)**

Finite field theory; Reed Solomon codes; algebraic codes; algebraic decoding methods; examples. *Prerequisite:* EE 441, EE 464.

**EE 596 Wavelets (3, Fa)** The theory and application of wavelet decomposition of signals. Includes subband coding, image compression, multiresolution signal processing, filter banks, and time-frequency tilings.

*Prerequisite:* EE 441, EE 483; *recommended preparation:* EE 569, MATH 570a.

**EE 597 Wireless Networks (3, Fa)** Introduction to wireless networking technologies; fundamental architectural and design principles used at all protocol layers; optimization and performance evaluation using mathematical analysis and simulations. *Prerequisite:* EE 450, EE 464 or EE 465; *recommended preparation:* EE 467, familiarity with Matlab and C programming.

**EE 598 Electrical Engineering Research Seminar (1, max 2)** Introduction to research in electrical engineering. Topics vary by semester. May be repeated for up to one unit of credit for M.S. students, two units of credit for Ph.D. students. Open only to master's and doctoral students. Graded CR/NC.

**EE 599 Special Topics (2-4, max 9)** The course content will be selected each semester to reflect current trends and developments in the field of electrical engineering.

**EE 601 Semiconductor Devices (3)** Generalized device performance criteria. Charge storage, tunneling, transport and avalanche in majority, minority, and transferred carrier devices. Device interface phenomena. Noise; integration of devices. *Recommended preparation:* EE 472 or EE 537.

**EE 606 Nonequilibrium Processes in Semiconductors (3)** Non-equilibrium processes in modern semiconductor devices. Carriers lifetime and trapping; luminescence; hot carrier and high field effects.

**EE 607 Microelectromechanical Systems (3, FaSp)** Exploration of the technology methods and physical principles of MEMS, and survey various MEMS of current interest. *Prerequisite:* EE 504.

**EE 608L Microelectromechanical Systems Laboratory (3, Fa)** Lab fabrication and analysis of several MEMS applications, including diaphragm-based sensors and actuators, microfluidic components, and deformable mirror array.

**EE 612 Science and Practice of Nanotechnology (3, Fa)** In-depth discussions of important topics in nanotechnology, including both the implementation and the underlying theory. *Prerequisite:* EE 330 or EE 470.

**EE 619 Advanced Topics in Automatic Speech Recognition (3, Sp)** Advanced topics in automatic speech recognition, speaker recognition, spoken dialogue, conversational multimedia interfaces. *Recommended preparation:* EE 464, EE 519, CSCI 544.

**EE 632 Integrated Communication Systems (3)** Analysis and design of high-speed integrated communication systems at circuit and system levels. Emphasis on broadband wireless applications. Transceiver architectures, amplifiers, oscillators, frequency synthesizers. *Prerequisite:* EE 536a.

**EE 635 Advanced Wireless Communications (3)** Fundamentals of advanced wireless systems, including multi-antenna, cognitive, and cooperative systems as well as exploration of current standards in wireless networks in use today. *Prerequisite:* EE 535; *recommended preparation:* basic programming course.

**EE 642 Advanced Geometrical Optics (3)** First order design of optical systems; origin of aberrations and their effects on wave propagation and imaging based on geometrical and physical optics. *Prerequisite:* EE 529.

**EE 645 Uncertainty Modeling and Stochastic Optimization (3)** (Enroll in CE 645)

**EE 648 Network Economics and Games (3)** Economics of networks; game theory, mechanism design and auctions in networks; spectrum sharing mechanisms in communications; pricing of differentiated services; network security. *Prerequisite:* EE 450 and EE 464 or EE 465.

**EE 649 Stochastic Network Optimization (3, Sp)** Optimization of wireless and ad-hoc mobile networks; opportunistic scheduling, flow control; backpressure routing; queue stability; energy-delay and utility-delay trade-offs. *Prerequisite:* EE 464 or EE 465.

**EE 650 Advanced Topics in Computer Networks (3, Irregular)** Protocol modeling: flow and congestion control, dynamic routing, distributed implementation; broadcast communication media and multiple access protocols; local networks, satellite networks, terrestrial radio networks. *Prerequisite:* EE 450 or EE 465; *recommended preparation:* EE 550 or CSCI 551.

**EE 652 Low-Power Wireless Networks (3, Fa)** Implementation of low-power wireless protocols for medium access, scheduling, multi-hop routing, congestion control, localization, synchronization. IP stack for the Internet of Things. Wireless sensor network applications. *Prerequisite:* EE 450; *recommended preparation:* CSCI 402, strong programming skills, and experience with Linux.

**EE 653 Advanced Topics in Microarchitecture (3)** Current research topics related to microprocessor architecture. Dynamically/statically scheduled processors, multithreading, chip multiprocessors, systems on a chip. Power, performance, complexity, dependability issues. Impact of technology. *Prerequisite:* EE 557.

**EE 657 Parallel and Distributed Computing (3, FaSpSm)** Scalable multiprocessor systems and clusters, virtual machine, service oriented architecture, network-based computing, peer-to-peer, grid and cloud based storage and computing, case studies. *Prerequisite:* EE 457; *recommended preparation:* EE 450.

**EE 658 Diagnosis and Design of Reliable Digital Systems (3, Fa)** Fault models; test generation; fault simulation; self-checking and self-testing circuits; design for testability; fault tolerant design techniques; case studies. *Prerequisite:* graduate standing.

**EE 659 Interconnection Networks (3, Sp)** Theory, design and analysis of interconnection networks for multiprocessor systems. Study of direct and indirect topologies, deadlock-free routing, flow control, network interfaces, optical interconnects. *Prerequisite:* EE 557.

**EE 664 Advanced Topics in Communication Theory (3, Irregular)** Synchronization in digital communication systems, tracking loop theory, acquisition and tracking, carrier and suppressed carrier waveforms, other advanced topics in communication theory. *Prerequisite:* EE 564.

**EE 666 Data Communication (3, Irregular)** Receiver design for modulations and channels with memory. Iterative and adaptive detection and decoding algorithms. Application to fading, intersymbol interference, and interference limited channels. *Prerequisite:* EE 564; *recommended preparation:* EE 568, EE 563 or EE 583.

**EE 667 Array Signal Processing (3, Sp)** Beamforming principles, monopulse and conical-scan concepts, phased arrays, synthetic multiple beam arrays; signal processing techniques for synthetic aperture formation, adaptivity, and retro-directing. *Prerequisite:* EE 562a.

**EE 669 Multimedia Data Compression (3, Sp)** Lossless compression, audio/speech coding, vector quantization, fractal compression, JPEG and JPEG-2000, video compression techniques and MPEG standards, video transmission over wired and wireless networks. *Recommended preparation:* EE 464.

**EE 674ab Advanced Topics in Computer Vision (3-3, Irregular)** (Enroll in CSCI 674ab)

**EE 675 Topics in Engineering Approaches to Music Cognition (3, max 6)** (Enroll in ISE 575)

**EE 677 VLSI Architectures and Algorithms (3)** VLSI models; measures of area, volume and time; mapping algorithms; systolic arrays; area time tradeoffs; applications to signal and image processing problems. *Prerequisite:* EE 557.

**EE 680 Computer-Aided Design of Digital Systems I (3, Sp)** Synthesis; partitioning; placement; routing of digital circuits; integrated circuit design methods; simulation at the switch, gate, register transfer and system levels. *Prerequisite:* EE 581; *recommended preparation:* EE 577a.

**EE 681 Computer-Aided Design of Digital Systems II (3)** Theory and techniques for design and analysis of digital logic; specification, formal models; hardware-descriptive languages; formal verification, high level synthesis; logic synthesis. *Prerequisite:* EE 557, EE 680.

**EE 690 Directed Research (1-4, maximum number to be determined by the department, FaSpSm)** Laboratory study of specific problems by candidates for the degree Engineer in Electrical Engineering. Graded CR/NC.

**EE 691 Advanced Magnetic Resonance Imaging (3, Fa)** Advanced clinical and research applications, sparse sampling, RF pulse design, analysis of free precession sequences, NMR relaxation, in-vivo spectroscopy and other advanced topics. *Prerequisite:* EE 441, EE 562a, EE 591.

**EE 790 Research (1-12, FaSpSm)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**EE 794abcdz Doctoral Dissertation (2-2-2-0, FaSpSm)** Credit on acceptance of dissertation. Graded IP/CR/NC

## Green Technologies

Office of Graduate and Professional Programs  
Olin Hall of Engineering 106  
(213) 740-4488  
FAX: (213) 821-0851  
Email: masters@gapp.usc.edu

*Program Director:* Edward W. Maby, Ph.D.

### Master of Science in Green Technologies

Green Technologies is a highly interdisciplinary degree program that emphasizes green systems and the environment, energy technology and efficiency, and sustainability and society. The discipline seeks opportunities for alternative sourcing, conservation, efficiency and repurposing through an understanding of product life cycles from origins to recycling or inevitable disposal. Green technologists will design products, processes and complex infrastructure systems to promote sustainable attributes of importance to the environment and the global community.

The Green Technologies program requires a minimum of 27 units (typically nine courses). At least 18 units must be at the 500-level or above, and at least 18 units must be completed in the Viterbi School of Engineering.

These 18 units may reflect courses offered by other schools if cross-listed in a department in the Viterbi School. Students with B.S. degrees in engineering and science disciplines can be accepted into the program.

#### REQUIRED COURSES

#### UNITS

Students are required to take two courses in each of three topical areas:

#### *Green Systems and the Environment* (two courses)

CE 515	Sustainable Infrastructure Systems	3
ISE 576	Industrial Ecology: Technology-Environment Interaction	3

#### *Energy Technology and Efficiency* (two courses)

CHE 510	Energy and Process Efficiency	3
---------	-------------------------------	---

#### *Also take only one of the following:*

AME 577	Survey of Energy and Power for a Sustainable Future	3
EE 513	Solid State Energy Devices	3
EE 526	Renewable Energy in Power Systems	3
ENE 505	Energy and the Environment	3

#### *Sustainability and Society* (two courses)

CE 469	Sustainable Design and Construction	3
--------	-------------------------------------	---

#### *Also take one of the following:\**

ARCH 519	Sustainability in the Environment: Infrastructures, Urban Landscapes, and Buildings	3
CE 567	Smart Infrastructures	3
ENE 502	Environmental and Regulatory Compliance	3
GEOG 581	Concepts for Spatial Thinking	4
MOR 566	Sustainability and Competitive Advantage	3
POSC 546	Seminar in Environmental Policy	4
PPD 692	Transportation and the Environment	4
PPDE 632	Sustainable Cities	4

Electives (three courses) 9

Electives shall be chosen in consultation with an adviser to develop technical specialization in an area of interest to the student. This may include up to 3 units of directed research.

\*Additional courses from this list may be used to fulfill the elective requirement.

## Daniel J. Epstein Department of Industrial and Systems Engineering

Ethel Percy Andrus  
Gerontology Center 240  
(213) 740-4893  
FAX: (213) 740-1120  
Email: isedept@usc.edu  
usc.edu/dept/ise/

*Chair:* Julia L. Hagle, Ph.D.

*Program Director, Systems Architecting and Engineering:* Azad Madni, Ph.D.

*Associate Director, Systems Architecting and Engineering:* George Friedman, Ph.D.

### Faculty

*Daniel J. Epstein Chair in Industrial and Systems Engineering:* Sheldon M. Ross, Ph.D.

*Epstein Family Chair:* Dorit S. Hochbaum, Ph.D.

*IBM Chair in Engineering Management:* F. Stan Settles, Ph.D. (*Astronautical Engineering*)

*Gordon S. Marshall Early Career Chair in Engineering:* Qiang Huang, Ph.D.

*David Packard Chair in Manufacturing Engineering:* Stephen C-Y Lu, Ph.D. (*Aerospace and Mechanical Engineering, Computer Science*)

*Fluor Professor in Process Engineering:* S. Joe Qin, Ph.D. (*Chemical Engineering and Materials Science, Electrical Engineering/Systems*)

*TRW Professor of Software Engineering:* Barry Boehm, Ph.D. (*Computer Science*)

*Professors:* Maged Dessouky, Ph.D.\*; Randolph Hall, Ph.D.; Carl F. Kesselman, Ph.D. (*Computer Science*); Behrokh Khoshnevis, Ph.D. (*Civil and Environmental Engineering; Aerospace and Mechanical Engineering*); Azad Madni, Ph.D.; Najmedin Meshkati, Ph.D. (*Civil and Environmental Engineering*)\*; James E. Moore II, Ph.D. (*Civil and Environmental Engineering; Public Policy*); Suvrajeet Sen (*Electrical Engineering; Computer Science*); Milind Tambe, Ph.D. (*Computer Science*); Detlof von Winterfeldt (*Public Policy*)

*Associate Professors:* Elaine Chew, Ph.D. (*Electrical Engineering/Systems, Music*); Mansour Rahimi, Ph.D.

*Assistant Professors:* Yong Chen, Ph.D.; Qiang Huang, Ph.D.; Rahul Jain, Ph.D. (*Electrical Engineering/Systems*); Alejandro Toriello, Ph.D.; Shinyi Wu, Ph.D.

*Adjunct Professors:* Paul J. Kern; Michael Mann, Ph.D.

*Adjunct Associate Professors:* Daniel Harvey, Ph.D.; James Hines; Thomas McKendree, Ph.D.; Tasos Soukias, Ph.D.; Marilee Wheaton

*Research Professors:* Yigal Arens, Ph.D.; Wanda M. Austin, Ph.D.; Malcolm Currie, Ph.D.; Mohamed I. Dessouky, Ph.D.; Stephen C. Hora, Ph.D. (*Public Policy*)

*Research Associate Professor:* Fernando Ordoñez, Ph.D. (*Computer Science*)

*Research Assistant Professors:* Jo Ann Lane, Ph.D.; Greg Placencia, Ph.D.; Richard Waltz, Ph.D.

*Professor of the Practice of Industrial and Systems Engineering:* George Friedman, Ph.D.

*Associate Professor of the Practice of Engineering Management:* Dana Sherman, Esq. (*Civil and Environmental Engineering*)

*Associate Professor of the Practice of Industrial and Systems Engineering:* Geza Bottlik, Engineer, P.E.; Kurt Palmer, Ph.D.\*

*Senior Lecturers:* Nitin Kale, M.S. (*Information Technology Program*); Richard Vawter, M.S. (*Information Technology Program*)

*Emeritus Professors:* Clinton J. Ancker Jr., Ph.D., P.E.; Gerald A. Fleischer, Ph.D., P.E.; Homer H. Grant, M.S.; Ralph Keeney, Ph.D. (*Information and Operations Management*); Gerald Nadler, Ph.D., P.E.; Peter Will, Ph.D.

\*Recipient of university-wide or school teaching award.

### Honor Societies

#### Alpha Pi Mu

Alpha Pi Mu is the industrial engineering honor society. Qualifications for election are: juniors in the upper one-fifth of their class; seniors in the upper one-third of their class; master's degree students who have completed at least one-third of the courses required for their degree and rank among the top 10 students in all ISE master's degree programs; and doctoral students recommended by the department chair. The adviser is Kurt Palmer, Associate Professor of the Practice of Industrial and Systems Engineering, (213) 740-5960.

#### Omega Rho

Omega Rho is the operations research honor society to recognize academic excellence in operations research and encourage study of operations research, management science and closely associated disciplines. Election is by nomination only during the spring semester. The adviser is Alejandro Toriello, Professor, (213) 740-4891.

## Undergraduate Degree Requirements

### Undergraduate Education Program Mission

The mission of the Daniel J. Epstein Department of Industrial and Systems Engineering undergraduate programs is to:

(1) Provide students: the skills and knowledge to obtain employment and achieve leadership with the industrial and systems engineering profession or to proceed with

graduate education; the intellectual resources to continue life-long learning; and the knowledge of professional ethics and critical reasoning skills necessary for contributing to society.

(2) Provide employers of industrial and systems engineering professionals with candidates who are technically competent,

business aware, collaborative, able to communicate effectively, and ethically grounded.

(3) Maintain and enhance the reputation of the Epstein department within the engineering, business and academic communities.

**Undergraduate Education Program Objectives**

Graduates of the Bachelor of Science in Industrial and Systems Engineering programs are prepared to achieve any of the following accomplishments:

- (1) Obtain employment in an organization that values people who demonstrate both technical competence and business awareness.
- (2) Pursue graduate or professional education.
- (3) Assume a leadership role in their employment organization or community.
- (4) Utilize critical reasoning, collaboration and creativity to contribute to society.

**Undergraduate Education Program Outcomes**

Industrial and systems engineering provides an education that blends information technology, engineering and management, with a strong emphasis on people skills, problem-solving skills and communication skills. Our program prepares students for successful careers by teaching students to:

- (1) Describe the essential components and inter-connective relationships within complex systems.
- (2) Design and execute experiments and create mathematical, numerical, heuristic and other objective models.
- (3) Synthesize inventive and innovative solutions for creation and improvement of products, processes and systems.
- (4) Generate and validate solutions to a problem.
- (5) Work with others in a collaborative environment and contribute to the success of an organization.
- (6) Clearly articulate and communicate findings.
- (7) Understand contemporary developments in the field.
- (8) Describe the principles for managing and operating production systems within their area of emphasis.

For additional information, visit [usc.edu/dept/ise](http://usc.edu/dept/ise).

The Department of Industrial and Systems Engineering offers a Bachelor of Science degree in Industrial and Systems Engineering. Additionally, information systems engineering exists as an emphasis within this industrial and systems engineering program major. An area of emphasis appears in parentheses after the primary major name on the transcript.

**Bachelor of Science in Industrial and Systems Engineering**

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied towards the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees, page 569.

COMPOSITION/WRITING REQUIREMENT		UNITS

MAJOR ELECTIVES	UNITS
Approved engineering electives***	3
Free electives	7
<b>Total units:</b>	<b>128</b>

\*GE Category VI is taken concurrently with WRIT 140.

\*\*GE Category III is fulfilled by PHYS/CHEM requirement.

\*\*\*Students selecting EE 326 are only required to complete 2 units of approved engineering elective.

+The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

*Bachelor of Science in Industrial and Systems Engineering*

*Emphasis in Information Systems Engineering*  
The requirement for the degree with an emphasis in information systems engineering is 128 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied towards the major, regardless of the department in which the courses

are taken. Students must choose either the computer science track or the information and operations management track. See the common requirements for undergraduate degrees, page 569.

During the freshman year, students in either track enroll in a common set of required courses. By the sophomore year, students enroll in required and elective courses for one track or the other.

\*GE Category III is fulfilled by PHYS/CHEM requirement.

\*\*Electives in the CSCI/ITP/IOM or approved engineering electives lists are geared so that students can take courses in an area of interest. Courses not listed may be petitioned for approval through the department.

+The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

*Computer Science Electives:* CSCI 351, CSCI 377, CSCI 485, EE 450

*ITP/IOM Electives:* ITP 215Lx, ITP 320Lx, ITP 321x, ITP 325x, ITP 454x, ITP 457x, ITP 486, ITP 487, IOM 428

*Approved Engineering Electives:* Any of the courses listed below that are not specifically required in a student's program may be selected to satisfy the approved engineering elective requirement. Substitutions of a graduate level ISE course will be considered upon petition.

AME 341a, AME 341B, CE 408, CE 460, CE 471, ISE 331, ISE 426, ISE 470, ITP 482L.

#### Minor in Engineering Management

This minor is designed to provide students who have a sound foundation in mathematics and the sciences with tools and skills for managerial analysis and problem solving.

Science and technology are driving significant portions of American and global economies. Individuals, companies and governments are demanding products, services and systems, which grow more complicated every day. Suppliers are forced by competition to provide goods and services efficiently and economically.

Scientists and engineers are trained in scientific and technical subjects which form an excellent base for building complex, technical products, services and systems. But more and more, scientists and engineers are managing the financial, material and human resources required to turn abstract ideas into physical and virtual reality, often without any formal management training. This minor provides that training, a complement to any science or technology degree.

*Application Procedures*

Applicants must be upper division students in good standing and complete the Change/Addition of Major, Minor or Degree Objective form. The minor is not open to industrial and systems engineering majors.

PREREQUISITES		UNITS
ISE 220	Probability Concepts in Engineering (or equivalent)	3

**Minor in Engineering Technology Commercialization**

See listing in the Special Educational Opportunities section, page 586.

**Graduate Degree Requirements**

**Master of Digital Supply Chain Management**

This interdisciplinary program is offered jointly with the Department of Information and Operations Management in the Marshall School of Business. The program is available via distance education. See page 163 for program requirements.

**Engineering Management Program  
Ethel Percy Andrus  
Gerontology Center 240  
(213) 740-4893**

*Program Director:* Geza Bottlik, *Engineer, P.E.*

This program is designed primarily, but not exclusively, for graduate engineers whose career objectives lead to increasing technical management responsibilities. Students interested in the engineering management objectives may also want to consider the M.S., Industrial and Systems Engineering/MBA dual degree program.

*Master of Science in Engineering Management*

A total of 30 units is required for the degree. A minimum of 18 units must be taken in the Epstein Department of Industrial and Systems Engineering. A total of 21 units must be at the 500 level or above. The program is available via distance education.

Applicants to the program are expected to have a degree in engineering or the equivalent.

REQUIRED COURSES (6 UNITS)		UNITS
ISE 500	Engineering Management Decisions and Statistics	3
ISE 561	Economic Analysis of Engineering Projects	3

**AT LEAST ONE COURSE FROM THE ACCOUNTING AREA IS REQUIRED (3 UNITS)**

CE 502	Construction Accounting and Finance	3
ISE 566	Financial Accounting Analysis for Engineering	3

**AT LEAST TWO COURSES FROM THE ENGINEERING MANAGEMENT AREA ARE REQUIRED (6 UNITS)**

ISE 515	Engineering Project Management	3
ISE 544	Management of Engineering Teams	3
ISE 564	Performance Analysis	3
ISE 565	Law and Finance for Engineering Innovation	3

**AT LEAST ONE COURSE FROM THE QUANTITATIVE METHODS AREA IS REQUIRED (3 UNITS)**

ISE 513	Inventory Systems	3
ISE 514	Advanced Production Planning and Scheduling	3
ISE 525	Design of Experiments	3
ISE 527	Quality Management for Engineers	3
ISE 530	Introduction to Operations Research	3

*Electives (12 units):*

Four courses for at least 12 units chosen to form a coherent program with the consent of the adviser.

**Health Systems Management Engineering Program  
Ethel Percy Andrus Gerontology Center 240  
(213) 740-4893**

*Program Director:* Shinyi Wu, Ph.D.

This program is jointly sponsored by the Epstein Industrial and Systems Engineering Department and the USC Price School of Public Policy and administered by the

Epstein Industrial and Systems Engineering Department. This degree is designed for students with sufficiently quantitative bachelor's degrees in engineering, the sciences or applied social science who are interested in operations management and health care applications, and whose career objectives lead to increasing technical management responsibilities in large health care organizations, particularly hospitals. Students with less quantitative social science or other non-technical backgrounds interested in health administration objectives may also want to consider the Master of Health Administration program in the USC Price School of Public Policy.

*Master of Science in Health Systems Management Engineering*

At least 34 units are required for the degree. Some combinations of courses may require students to complete more than 34 units. Admitted students may count courses taken for completion of the Graduate Certificate in Health Systems Operations toward this degree. This program is available via distance education.

Applicants to the program are expected to have mathematical competence representative of that provided by an undergraduate degree in engineering; competence in basic descriptive and inferential statistics; competence in microeconomics; and competence in accounting at the level of PPD 516 Financial Accounting for Health Care Organizations, ACCT 509 Concepts of Financial and Management Accounting, or ISE 566 Financial Accounting Analysis for Engineering. Admitted students who do not meet the course work requirements will be assigned courses to complete the deficiencies.

**CORE (FOUR COURSES, 14 UNITS)**

		UNITS
ISE 507	Six-Sigma Quality Resources for Health Care	3
ISE 508	Health Care Operations Improvement	3
PPD 509	Problems and Issues in the Health Field	4
PPD 545	Human Behavior in Public Organizations	4

**ECONOMICS AND FINANCE****(SELECT TWO COURSES, AT LEAST 6 UNITS)**

		UNITS
ISE 561	Economic Analysis of Engineering Projects	3
ISE 562	Value and Decision Theory	3
ISE 563	Financial Engineering	3
PPD 510a	Financial Management of Health Services	4
PPD 514	Economic Concepts Applied to Health	4

**INFORMATION SYSTEMS****(SELECT ONE COURSE, AT LEAST 2 UNITS)**

		UNITS
BME 527	Integration of Medical Imaging Systems	3
BME 528	Medical Imaging Informatics	3
ISE 583	Enterprise Wide Information Systems	3
PM 538	Introduction to Biomedical Informatics	3
PPD 511	Health Information Systems	2

**MANAGEMENT (SELECT AT LEAST TWO COURSES, AT LEAST 6 UNITS)**

		UNITS
ISE 515	Engineering Project Management	3
ISE 544	Management of Engineering Teams	3
ISE 527	Quality Management for Engineers	3
ISE 564	Performance Analysis	3
PPD 513	Legal Issues in Health Care Delivery	2
PPD 517	Concepts and Practices in Managing Health Care Organizations	2

**QUANTITATIVE METHODS (SELECT TWO COURSES, AT LEAST 6 UNITS)**

		UNITS
Select one course, at least 3 units:		
ISE 530	Introduction to Operations Research	3
PPD 557	Modeling and Operations Research	4
Select one course, at least 3 units:		
ISE 525	Design of Experiments	3
ISE 562	Value and Decision Theory	3
ISE 570	Human Factors in Engineering	3

ISE 580	Advanced Concepts in Computer Simulation	3
PM 603	Structural Equation Modeling	4
PPD 558	Multivariate Statistical Analysis	4

Students may not simultaneously satisfy the Quantitative Methods and Economics and Finance requirements with only ISE 562 Value and Decision Theory. Two courses are needed.

**Master of Science in Industrial and Systems Engineering**

The Master of Science in industrial and systems engineering is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. This program enhances the technical capabilities of the industrial engineer. The program is available via distance education.

The M.S. program is for students who want to become technical leaders in the field of industrial and systems engineering. Applicants to the program are expected to have a bachelor's degree in an engineering discipline with undergraduate course work in computing, probability and statistics, and engineering economy. Admitted students who do not meet prerequisites will be assigned courses to complete the deficiencies.

A total of 30 units is required for the degree, of which at least 18 units must be completed in the Epstein Department of Industrial and Systems Engineering. Of the 30 units, 20 must be at the 500 level or above.

**REQUIRED COURSES**

		UNITS
ISE 514	Advanced Production Planning and Scheduling	3
ISE 515	Engineering Project Management	3

**ISE ELECTIVES (CHOOSE ONE FROM EACH GROUP)**

		UNITS
<i>Systems Design</i>		
ISE 510	Advanced Computational Design and Manufacturing	3
ISE 525	Design of Experiments	3
ISE 527	Quality Management for Engineers	3
ISE 576	Industrial Ecology: Technology-Environment Interaction	3
SAE 541	Systems Engineering Theory and Practice	3
SAE 549	Systems Architecting	3

*Production*

ISE 511L	Mechatronic Systems Engineering	3
ISE 513	Inventory Systems	3
ISE 517	Modern Enterprise Systems	3
SAE 551	Lean Operations	3

*Systems Performance*

ISE 544	Management of Engineering Teams	3
ISE 564	Performance Analysis	3
ISE 570	Human Factors in Engineering	3

*Information Systems*

ISE 580	Advanced Concepts in Computer Simulation	3
ISE 582	Web Technology for Industrial Engineering	3
ISE 583	Enterprise Wide Information Systems	3

*Quantitative Methods*

ISE 532	Network Flows	3
ISE 536	Linear Programming and Extensions	3
ISE 538	Elements of Stochastic Processes	3
ISE 563	Financial Engineering	3

Adviser approved electives	9
Total units:	30

**Operations Research Engineering Program**

**Ethel Percy Andrus  
Gerontology Center 240  
(213) 740-4891**

*Program Director:* Maged Dessouky, Ph.D.

*Master of Science in Operations Research Engineering*

The Master of Science in operations research engineering is conferred upon candidates who hold bachelor's degrees in engineering, mathematics, science or related fields who successfully complete an integrated program (with departmental approval in advance) of not less than 30 units. The program must include not less than 21 units of industrial and systems engineering courses related to operations research and 9 units of approved electives. Students will be required to make up deficiencies in mathematics and statistics. Additional courses or examinations may be required at the discretion of the department before full admission to the program. The General Test of the Graduate Record Examinations (GRE) is required. Additional information is available from the department. This program is available via distance education.

REQUIRED COURSES	UNITS
ISE 532 Network Flows	3
ISE 536 Linear Programming and Extensions	3
ISE 538 Elements of Stochastic Processes	3
ISE 580 Advanced Concepts in Computer Simulation	3
ISE 582 Web Technology for Industrial Engineering, or	
ISE 583 Enterprise Wide Information Systems	3
Select at least two of the following 10 courses:	6 units
CE 645 Uncertainty Modeling and Stochastic Optimization	3
ISE 513 Inventory Systems	3
ISE 514 Advanced Production Planning and Scheduling	3
ISE 520 Optimization: Theory and Algorithms	3
ISE 525 Design of Experiments	3
ISE 539 Stochastic Elements of Simulation	3
ISE 562 Value and Decision Theory	3
ISE 563 Financial Engineering	3
ISE 576 Industrial Ecology: Technology-Environment Interaction	3
SAE 541 Systems Engineering Theory and Practice	3
400- or 500-level computer science course, approved by faculty adviser	3
Two electives, approved by faculty adviser	6
	<u>30</u>

**Master of Science in Product Development Engineering**

This interdisciplinary program is offered jointly with the Department of Aerospace and Mechanical Engineering. The program is available via distance education. See the listing under Product Development Engineering, page 679.

**Master of Science in Systems Architecting and Engineering**

See the listing under Systems Architecting and Engineering, page 682. The program is available via distance education.

**Dual Degree Program (M.S., Industrial and Systems Engineering/MBA)**

The USC Marshall School of Business in conjunction with the Epstein Department of Industrial and Systems Engineering offers a program leading to the degree of Master of Business Administration/Master of Science in industrial and systems engineering.

This alternative requires 66 units for graduates of industrial and systems engineering undergraduate curricula and leads to both a Master of Science in industrial and systems engineering and the Master of Business Administration. The dual degree provides an education of great depth.

The total number of units required for the MBA program is 48 including all required courses in an MBA program and graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students may not count courses taken outside the Marshall School of Business toward the 48 units.

*Viterbi School of Engineering*

REQUIRED COURSES	(MINIMUM 18 UNITS)
ISE 514 Advanced Production Planning and Scheduling	3
ISE 515 Engineering Project Management	3

**Engineer in Industrial and Systems Engineering**

Requirements for the Engineer in industrial and systems engineering are the same as set forth in the general requirements.

**Doctor of Philosophy in Industrial and Systems Engineering**

The degree Doctor of Philosophy in industrial and systems engineering is also offered. See general requirements for graduate degrees.

**Graduate Certificates**

*Graduate Certificate in Engineering Technology Commercialization*

See listing in the Special Educational Opportunities section, page 586.

*Graduate Certificate in Health Systems Operations*

This 17-unit graduate certificate is jointly sponsored by the Epstein Industrial and Systems Engineering Department and the USC Price School of Public Policy (Master of Health Administration program), and administered by the Epstein ISE Department. This certificate is designed for students with bachelor's degrees in applied social science, engineering or the sciences, who are interested in operations management and health care applications. The courses taken for the certificate may be applied later to the Epstein ISE Department's Master of Science in Engineering Management degree, the USC Price School of Public Policy's Master of Health Administration degree or the jointly sponsored M.S. in Health Systems Management Engineering degree subject to approval of the appropriate academic unit. This program is available via distance education.

REQUIRED COURSES	UNITS
ISE 507 Six-Sigma Quality Resources for Health Care	3
ISE 508 Health Care Operations Improvement	3
PPD 509 Problems and Issues in the Health Field	4
PPD 513 Legal Issues in Health Care Delivery, and	2
PPD 517 Concepts and Practices in Managing Health Care Organizations, or	2
PPD 514 Economic Concepts Applied to Health	4
PPD 557 Modeling and Operations Research (4), or	
ISE 530 Introduction to Operations Research (3), or	
ISE 562 Value and Decision Theory (3)	3-4
	<u>17-18</u>

*Graduate Certificate in Network Centric Systems*

See listing under Systems Architecting and Engineering, page 683. The program is available via distance education.

*Graduate Certificate in Optimization and Supply Chain Management*

This abbreviated interdisciplinary program is offered jointly with the Department of Information and Operations Management in the Marshall School of Business. See page 164 for program requirements.

*Graduate Certificate in Systems Architecting and Engineering*

See listing under Systems Architecting and Engineering, page 683. The program is available via distance education.

*Graduate Certificate in Transportation Systems*

This abbreviated interdisciplinary program is offered jointly with the Astani Department of Civil and Environmental Engineering and the USC Price School of Public Policy. See listing under Civil Engineering, page 626.

*Graduate Certificate in System Safety and Security*

Applications for this program are not currently being accepted.

## Courses of Instruction

### INDUSTRIAL AND SYSTEMS ENGINEERING (ISE)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**ISE 105 Introduction to Industrial and Systems Engineering (2, FaSp)** A combination of plant tours, laboratory experiences, and lecture are used to introduce the philosophy, subject matter, aims, goals, and techniques of industrial and systems engineering.

**ISE 220 Probability Concepts in Engineering (3, Fa)** Techniques for handling uncertainties in engineering design: discrete and continuous random variables; expectations, probability distributions and transformations of random variables; limit theorems; approximations and applications. *Corequisite:* MATH 226.

**ISE 225 Engineering Statistics I (3, Sp)** Sampling distributions; parameter estimation, hypothesis testing; analysis of variance; regression; nonparametric statistics. *Prerequisite:* ISE 220.

**ISE 232L Manufacturing Processes (3, Fa)** Basic manufacturing processes including casting, machining, forming and welding; current trends in manufacturing processes including polymer, ceramic and composite material processing, and electronic device fabrication; introduction to numerical control and computer integrated manufacturing. *Recommended preparation:* MASC 110L or CHEM 105aL or CHEM 115aL.

**ISE 310L Production I: Facilities and Logistics (4, Sp)** Facilities layout and design; material handling and transportation; site selection and sourcing; supply chain management. *Prerequisite:* ISE 330; *corequisite:* ISE 460.

**ISE 330 Introduction to Operations Research: Deterministic Models (3, Fa)** Introduction to linear programming; transportation and assignment problems; dynamic programming; integer programming; nonlinear programming. *Prerequisite:* MATH 225.

**ISE 331 Introduction to Operations Research: Stochastic Models (3, Sp)** Stochastic processes; Markov chains; queuing theory and queuing decision models; probabilistic inventory models. *Prerequisite:* ISE 220; *recommended preparation:* ISE 330.

**ISE 344 Engineering Team Management (3)** Examine team formation and team dynamics including organizational behavior, group dynamics, psychology, and business management, all in the context of engineering development; decision-making and negotiation. Open only to juniors and seniors.

**ISE 370L Human Factors in Work Design (4, Fa)** Physiological systems and psychological characteristics; ergonomics; anthropometry; effects of the physical environment on humans; occupational safety and health; work methods. *Prerequisite:* ISE 225.

**ISE 382 Database Systems: Concepts, Design and Implementation (3, Sp)** Concepts in modeling data for industry applications. Designing and implementing robust databases. Querying databases to extract business intelligence; Global Enterprise Resource Planning with databases. *Prerequisite:* CSCI 101L.

**ISE 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**ISE 404 Business and Intellectual Property Law for Engineers (3)** (Enroll in CE 404)

**ISE 410 Production II: Planning and Scheduling (3, Fa)** Production planning, forecasting, scheduling, and inventory; computer integrated decision systems in analysis and control of production systems. *Corequisite:* ISE 330.

**ISE 415 Industrial Automation (3, Irregular)** Traditional (automobile) and modern (computer based) concepts in Industrial Automation. Computer control concepts (sensors, actuators), robotics, flexible manufacturing systems. *Prerequisite:* senior level status.

**ISE 422L Configuring Enterprise Resource Planning Systems (3, FaSp)** (Enroll in ITP 422L)

**ISE 426 Statistical Quality Control (3, Fa)** Quantitative aspects of statistical quality control (process control, acceptance sampling by attribute and by variable, rectifying inspection), quality assurance and the management of QC/QA functions. *Prerequisite:* ISE 225.

**ISE 435 Discrete Systems Simulation (3, Fa)** Model design to simulate discrete event systems with basic input and output analysis using high order languages, applied to industrial systems analysis and design problems. *Prerequisite:* ISE 220, CSCI 101L; *corequisite:* ISE 225.

**ISE 440 Work, Technology, and Organization (3, Sp)** Impact of technology on work and organizational design; effects of automation; design of improvement programs; information infrastructures; teams; individual behavioral outcomes. Upper division standing.

**ISE 455Lx Enterprise Information Portals (3, Sp)** (Enroll in ITP 455Lx)

**ISE 460 Engineering Economy (3, FaSpSm)** Utilizing principles of economic analysis for choice of engineering alternatives and engineering systems. Pre-tax and after-tax economy studies. Upper division standing.

**ISE 470 Human/Computer Interface Design (3, Sp)** Essentials of human factors and computer interface for the design, development, implementation, and evaluation of integrated media systems.

**ISE 482L Engineering Database Applications (3)** (Enroll in ITP 482L)

**ISE 487Lx Data Warehouses and Business Intelligence (3)** (Enroll in ITP 487)

**ISE 488x Managing Supply Chains with Advanced Planning and Optimization (3)** (Enroll in ITP 488x)

**ISE 490x Directed Research (2-8, max 8, FaSp)** Individual research and readings. Not available for graduate credit.

**ISE 495abx Senior Design Project (2-2 FaSp)**  
*a:* Preparation and development of the senior project proposal. Not available for graduate credit. Senior standing in industrial and systems engineering. *Corequisite:* ISE 225, ISE 310; ISE 382 or IOM 435. *b:* Group work on an industrial engineering design problem in an organization. Not available for graduate credit. Senior standing in industrial and systems engineering. *Corequisite:* ISE 370 or ISE 470; ISE 435.

**ISE 499 Special Topics (2-4, max 8)** Course content to be selected each semester from recent developments in industrial and systems engineering and related fields.

**ISE 500 Engineering Management Decisions and Statistics (3, FaSpSm)** Case-based decision and statistical analysis. Framing engineering management situations with statistical methods. Experiments, regression, ANOVA, hypothesis, factor analysis. Open only to fifth-year seniors and master's students.

**ISE 502 Construction Accounting and Finance (3)** (Enroll in CE 502)

**ISE 507 Six-Sigma Quality Resources for Health Care (3, Fa)** Comprehensive study of Six-Sigma and Lean metrics, methods, and systems with emphasis on their application to health care services.

**ISE 508 Health Care Operations Improvement (3, Sp)** Improving operations, patient flow, quality and processes. Students will become familiar with methods for implementing change in health care settings such as hospitals or clinics.

**ISE 510 Advanced Computational Design and Manufacturing (3)** Study advanced concepts behind computational representations, algorithms, and mathematical foundations, and their applications in computer-aided design and manufacturing. Develop hands-on computational skills in team projects. *Recommended preparation:* bachelor's degree in industrial engineering; programming experience, C++ preferred.

**ISE 511L Mechatronic Systems Engineering (3, Sp)** Use of mechanical, electrical, and computer engineering, math, and computer science to design of high performance and sophisticated products and processes and systems involving mechatronic. *Recommended preparation:* bachelor's degree in engineering or physical sciences, and preliminary knowledge of programming in C.

**ISE 512 Software Management and Economics (3, Fa)** (Enroll in CSCI 510)

**ISE 513 Inventory Systems (3, Sp)** Deterministic and stochastic demand systems with static/dynamic models. Practice in inventory management, computerized procedures, materials requirements planning, just-in-time production, Kanban systems.

**ISE 514 Advanced Production Planning and Scheduling (3, FaSm)** Advanced concepts in production planning and scheduling including resource allocation, lot sizing, flow shop and job shop scheduling, workforce scheduling and assembly line balancing. *Recommended preparation:* prior knowledge of operations research and probability theory.

**ISE 515 Engineering Project Management (3, FaSpSm)** Applying industrial and systems engineering skills to problems drawn from industry, while working in teams of 3-4 students. Teach project management skills and provide direct experience in managing and executing a group project.

**ISE 517 Modern Enterprise Systems (3, FaSp)** Study of various aspects of integrated manufacturing and service enterprises including management, design and production functions, interfaces and related resources and information systems. *Recommended preparation:* manufacturing processes, probability, statistics, computer programming.

**ISE 520 Optimization: Theory and Algorithms (3, Fa)** Conditions for optimality. Nonlinear programming algorithms for constrained and unconstrained problems. Special problems such as quadratic, separable, fractional, geometric programming. *Prerequisite:* MATH 225 or EE 441.

**ISE 525 Design of Experiments (3, FaSp)** Planning data collection to investigate relationships between product/process design choices (materials, temperatures, etc.) and performance, empirical modeling to predict performance, identification of the best design choices. *Recommended preparation:* ISE 225.

**ISE 527 Quality Management for Engineers (3, FaSp)** Principles of quality management, quality philosophies and frameworks, quality leadership and strategic planning, process management, and performance measurements.

**ISE 528 Advanced Statistical Aspects of Engineering Reliability (3)** Advanced statistical methods applied to reliability engineering. Experimental design analysis and interpretation of multifactor reliability problems.

**ISE 530 Introduction to Operations Research (3, Sp)** Linear programming, integer programming, transportation and assignment problems, networks, dynamic programming, Markovian models, and queueing. *Prerequisite:* MATH 225, ISE 220.

**ISE 532 Network Flows (3, Sp)** Tree, path, flow problems, formulation and solution techniques. Methods for minimal cost flows. Applications. *Prerequisite:* ISE 330 or ISE 536.

**ISE 536 Linear Programming and Extensions (3, Fa)** Linear programming models for resource allocation; simplex and revised simplex methods; duality; sensitivity; transportation problems; selected extensions to large scale, multiobjective, and special structured models. *Prerequisite:* MATH 225 or EE 441.

**ISE 538 Elements of Stochastic Processes (3, Sp)** Random variables, stochastic processes, birth-and-death processes, continuous and discrete time Markov chains with finite and infinite number of states, renewal phenomena, queueing systems.

**ISE 539 Stochastic Elements of Simulation (3, Sp)** Simulation techniques combined with probabilistic analysis for solving problems in inventory theory, queueing theory, financial engineering, decision analysis, and other fields having a stochastic element. *Corequisite:* ISE 538.

**ISE 543 Case Studies in Systems Engineering (3, FaSp)** (Enroll in SAE 543)

**ISE 544 Management of Engineering Teams (3, FaSp)** Design and management of engineering teams. Group decision-making, motivation, leadership, infrastructural requirements, performance measurement, team diversity, conflict, and integration.

**ISE 545 Technology Development and Implementation (3, Fa)** Principles and practices of technology development and implementation, with application to products and systems in manufacturing and services.

**ISE 549 Systems Architecting (3, FaSp)** (Enroll in SAE 549)

**ISE 554 Innovation and the Engineering Enterprise (3)** Examination of innovation in engineering enterprises including human behavior and human resources, organizational development, engineering management, business structures, financing the enterprise and intellectual property.

**ISE 555 Invention and Technology Development (3, Sp)** This project-oriented course elaborates on the process of engaging creative thought, tools and techniques for invention, and issues involved in bringing inventions to the production phase. Graded CR/NC.

**ISE 556 Stochastic Systems and Finance (3, Sp)** (Enroll in EE 556)

**ISE 560 Analysis of Algorithms (3, FaSp)** (Enroll in CSCI 570)

**ISE 561 Economic Analysis of Engineering Projects (3, FaSp)** Economic evaluations of engineering systems for both government and private industry; quantitative techniques for evaluating non-monetary consequences; formal treatment of risk and uncertainty. *Prerequisite:* ISE 460.

**ISE 562 Value and Decision Theory (3, Fa)** Decision making under risk conditions; utility theory; sufficient statistics; conjugate prior distributions; terminal and pre-posterior analysis; Bayesian statistics versus classical statistics.

**ISE 563 Financial Engineering (3, Sp)** Concepts underlying the economic analysis of engineering projects; applications to call and put options; utility theory and mathematical optimizations models; and simulation. *Recommended preparation:* ISE 220 or an equivalent course in probability.

**ISE 564 Performance Analysis (3)** Measurement systems for performance analysis. Determination of performance metrics, analytical models, case studies. Cross-industry comparisons, measures for manufacturing and service systems, information and knowledge workers.

**ISE 565 Law and Finance for Engineering Innovation (3)** Students will identify, formulate and resolve legal, financial and ethical issues affecting innovation in engineering organizations including legal structures, financing and intellectual property rights. Open only to graduate students.

**ISE 566 Financial Accounting Analysis for Engineering (3, Sp)** Identification, formulation, and solution of financial accounting problems in engineering enterprises. Legal context of financial decisions, process cost determination and allocation, financial reports, and reporting systems. Open only to graduate students.

**ISE 567 Collaborative Engineering Principles and Practice (3, Sp)** Scientific principles and industrial practices defining how a team of stakeholders should collaboratively work together to reach agreement on complex engineering tasks. Open only to graduate students in engineering.

**ISE 568 Machine Learning (3, Fa)** (Enroll in CSCI 567)

**ISE 570 Human Factors in Engineering (3, Fa)** Psychological and physiological characteristics of humans; how they limit engineering design of machines and human-machine systems.

**ISE 571 Human Factors Issues in Integrated Media Systems (3)** Psychological, cognitive, physical and social characteristics of human factors and how they affect information technology design, development and evaluation for integrated media systems.

**ISE 573 Work Physiology (3)** Survey of metabolic processes in the performance of physical work, study of individual and environmental factors affecting these processes.

**ISE 574 Probabilistic Reasoning (3, Fa)** (Enroll in CSCI 573)

**ISE 575 Topics in Engineering Approaches to Music Cognition (3, max 6)** Computational research in music cognition, including computational methods for music analysis, such as the abstracting and extracting of pitch and time structures. Computational research in expressive performance, the manipulation of parameters (e.g., tempo, loudness, articulation) to focus attention, facilitate parsing, and create emotional affect. Open to graduate engineering students only. *Recommended preparation:* programming experience (C++ or Java), basic signal processing and music theory.

**ISE 576 Industrial Ecology: Technology-Environment Interaction (3)** Concepts and methods to analyze the environmental impacts of industrial systems, including lifecycle assessment, material flow analysis, design for environment and sustainable consumption.

**ISE 580 Advanced Concepts in Computer Simulation (3, Sp)** Coverage of various stages of simulation processes using a project and case study oriented approach; an introduction to available simulation tools and modern simulation concepts. *Prerequisite:* ISE 220, ISE 435.

**ISE 581 Negotiation For Engineering Management (3, Sp)** Decision making techniques for the engineering manager including negotiation principles, contract negotiation, dispute resolution, auctions, bidding, voting and coalition formation.

**ISE 582 Web Technology for Industrial Engineering (3, Fa)** A fast-paced, project-based introduction to designing and implementing interactive Web applications. Emphasizes skills for building engineering and market research applications requiring information gathering, analysis, representation. *Prerequisite:* ISE 382.

**ISE 583 Enterprise Wide Information Systems (3, FaSp)** The role of enterprise resource planning systems (ERPs) in an organization and the task of implementing and managing the IS function.

**ISE 585 Strategic Management of Technology (3, FaSp)** Management skills and tools for technology intensive enterprises. Life cycle analysis of technology from planning through exploitation, obsolescence and renewal.

**ISE 587 Risk Analysis (4)** (Enroll in PPD 587)

**ISE 589 Port Engineering: Planning and Operations (3, Fa)** (Enroll in CE 589)

**ISE 590 Directed Research (1-12)** Research leading to the master's degree; maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**ISE 594abz Master's Thesis (2-2-0)** Credit on acceptance of thesis. Graded IP/CR/NC.

**ISE 599 Special Topics (2-4, max 9, Fa)** Course content will be selected each semester to reflect current trends and developments in the field of industrial and systems engineering.

**ISE 645 Uncertainty Modeling and Stochastic Optimization (3, Sp)** (Enroll in CE 645)

**ISE 651 Seminar in Industrial and Systems Engineering (1, max 4, FaSp)** Current research, guest speakers in the field; review papers; guidance in preparing research proposals and special projects. (Duplicates credit in the former ISE 650abc.) Open only to fifth-year seniors and master's students. Graded CR/NC.

**ISE 670 Advanced Analysis of Algorithms (3, Fa)** (Enroll in CSCI 670)

**ISE 671 Randomized Algorithms (3, Sp)**  
(Enroll in CSCI 671)

**ISE 690 Directed Research (1-4, max 8, FaSpSm)** Laboratory study of specific problems by candidates for the degree Engineer in Industrial and Systems Engineering. Graded CR/NC.

**ISE 790 Research (1-12, FaSpSm)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**ISE 794abcdz Doctoral Dissertation (2-2-2-2-0)** Credit on acceptance of dissertation. Graded IP/CR/NC.

## Information Technology Program

Olin Hall 412  
(213) 740-4542  
Email: [itp@usc.edu](mailto:itp@usc.edu)  
[itp.usc.edu](http://itp.usc.edu)

*Director:* Michael Crowley, Ph.D.

*Instructors:* Patrick Dent, M.S.; Joseph Greenfield, M.S.; Trina Gregory, B.A.; Nitin Kale, M.S.; Sanjay Madhav, B.S.; Tom Sloper, B.A.; Chi So, M.S.; Ashish Soni, M.S.; Richard Vawter, M.S.; Lance Winkel, MFA

All ITP courses are open to non-engineering majors. The “x” designation indicates that engineering students require prior departmental approval to count 100-level and above ITP courses for major credit.

### Minors

ITP minors are open to undergraduate students in all majors.

To apply for a minor, students should meet the regular admissions standards and have a declared USC major. Students will complete an application for the minor with the Viterbi School of Engineering. For specific information on admission and application procedures, contact the Information Technology Program at (213) 740-4542.

### Minor in 3-D Animation

The 3D animation minor is a cross-disciplinary program merging theoretical concepts and state of the art techniques to prepare students to apply 3D animation across a wide range of industry applications. The courses integrate three major disciplines – cinema, fine arts and information technology.

*Requirements for completion (five core courses plus minimum 9 units of electives)*

Minimum units: 22

CORE COURSES (13 UNITS)		UNITS
CTAN 330	Animation Fundamentals	2
CTAN 451	History of Animation	2
FADW 101	Introduction to Drawing	4
ITP 215Lx	3D Modeling, Animation, and Special Effects	2
ITP 414x	Seminar and 3D Portfolio Development	3
ELECTIVE COURSES (9 UNITS)		UNITS
ITP 305x	Advanced 3D Modeling, Animation, and Special Effects	3
ITP 315x	3D Character Animation	3
ITP 360x	3D Compositing and Visual Effects	3
ITP 470x	Information Technology Practicum	3-4
CTAN 452	Introduction to 3-D Computer Animation	2

### Minor in Applied Computer Security

The minor in applied computer security combines both theoretical concepts and technical skills to prepare students for a career in information security while incorporating their major field of work. Students will study various areas of computer security, including hacking, ethics, forensics, networking and security management. Electives are available depending on the students' academic and professional goals.

*Requirements for completion (five core courses plus one elective)*

Minimum units: 18

REQUIRED COURSES (14 UNITS)		UNITS
ITP 125Lx	From Hackers to CEOs: Introduction to Information Security	2
ITP 325x	Ethical Hacking and Systems Defense	3
ITP 357x	Enterprise Network Design	3
ITP 370x	Information Security Management	3
ITP 375x	Digital Forensics	3
ELECTIVE (4 UNITS)		UNITS
ITP 425x	Web Application Security	4
ITP 457	Network Security	4
ITP 475x	Advanced Digital Forensics	4

### Minor in Computer and Digital Forensics

The computer and digital forensics minor combines both theoretical concepts and practical skills to prepare students for a career as a digital forensics investigator. Students will study various areas of cyber-forensics, including forensic methodologies and processes, digital evidence-gathering and preservation, investigations and examinations, and court presentation. Electives are available depending on the students' academic and professional goals.

*Requirements for completion (three core courses plus minimum 12 units of electives)*

Minimum units: 21

REQUIRED COURSES (THREE COURSES, 9 UNITS)		UNITS
ITP 125Lx	From Hackers to CEOs: Introduction to Information Security	2
ITP 375x*	Digital Forensics	3
ITP 475x*	Advanced Digital Forensics	4

LAW AND POLICY ELECTIVE (CHOOSE ONE, 3-4 UNITS)		UNITS
LAW 200	Law and Society	4
CE 404	Business and Intellectual Property Law for Engineers	3
PPD 342	Crime and Public Policy	4
SOCI 353	Public Policy and Criminal Justice	4
FORENSIC ELECTIVES (CHOOSE TWO, 6 UNITS)		UNITS
ITP 445*	Macintosh, OSX and iOS Forensics	3
ITP 446*	Enterprise and Network Forensics	3
ITP 447*	Mobile Device Security and Forensics	3
ITP 448*	Electronic Discovery	3
ELECTIVE COURSE (CHOOSE ONE, 3-4 UNITS)		UNITS
CSCI 485*	File and Database Management	3
IR 304	Espionage and Intelligence	4
IR 381	Introduction to International Security	4
ISE 382*	Database Systems: Concepts, Design and Implementation	3
ITP 320x	Enterprise Wide Information Systems	3
PSYC 463*	Criminal Behavior	4
PSYC 465*	Introduction to Forensic Psychology	4

\*Prerequisite required

### Minor in Enterprise Information Systems

The 21st century has seen tremendous growth in global enterprises, which has required robust and integrated information systems to support streamlined business processes. These Enterprise Information Systems, also known as Enterprise Resource Planning (ERP) systems, have continued to mature and dominate the information systems of corporations. Most Fortune 500 companies have adopted ERP systems. This minor combines business process management and information technology to prepare students for technical careers as well as business consulting in the ERP domain. Students will study various areas of ERP implementation, configuration, business intelligence, security and supply chain management. Electives are available depending on the students' academic and professional goals.

*Requirements for completion (three core courses plus minimum 7 units of electives)*

Minimum units: 16

REQUIRED COURSES (9 UNITS)		UNITS
ITP 320x	Enterprise Wide Information Systems	3
ITP 422	Configuring Enterprise Resource Planning Systems	3
ITP 454x	Enterprise Resource Planning, Design, and Implementation	3
ELECTIVES (CHOOSE MINIMUM 7 UNITS OF WHICH MINIMUM 3 UNITS SHOULD HAVE ITP PREFIX)		UNITS
ACCT 371a	Introduction to Accounting Systems	2
ACCT 371b	Introduction to Accounting Systems	2
ACCT 410x	Foundations of Accounting	4
ACCT 478	Accounting Systems Design	4
ACCT 479	Accounting Systems Development	4
BUAD 311	Operations Management	4
IOM 431	Managing the Digital Revolution for Your Business	4
IOM 433	Business Information Systems Analysis and Design	4
IOM 435	Business Database Systems	4
ISE 382	Database Systems: Concepts, Design and Implementation	3
ITP 421x	Advanced Programming for Enterprise Information Systems	3
ITP 455Lx	Enterprise Information Portals	3
ITP 470x	Information Technology Practicum 1-4, max 8	8
ITP 486	Securing and Auditing Enterprise Resource Planning Systems	3
ITP 487	Data Warehouses and Business Intelligence	3
ITP 488x	Managing Supply Chains with Advanced Planning and Optimization	3
PPD 318	Financial Accounting in Public and Nonprofit Organizations	4

### Minor in Innovation: The Digital Entrepreneur

The Minor in Innovation: The Digital Entrepreneur is jointly sponsored by the Information Technology Program in the Viterbi School of Engineering and the Lloyd Greif Center for Entrepreneurial Studies in the Marshall School of Business. The minor is designed for students from a range of backgrounds who are interested in starting their own digital ventures, working for start-up companies, or pursuing traditional jobs with large corporations and consulting firms that may involve launching new digital business units. Students will learn all major elements of launching a digital venture including

ideation, feasibility analysis, high-tech product management, online customer acquisition, technology implementation, online business models and monetization. Students will work on launching a digital venture in a team-based environment in the capstone class.

The Information Technology Program in the Viterbi School of Engineering handles advising and admissions relating to the minor, consulting as needed with the Grief Center for Entrepreneurial Studies in the Marshall School of Business.

*Requirements for completion (six core courses plus minimum 6 units of electives)*

Minimum units: 26

REQUIRED COURSES (20 UNITS)		UNITS
BAEP 451	The Management of New Enterprises	4
BAEP 452*	Feasibility Analysis	4
ITP 466x	Building the High-Tech Startup	4
ITP 476x	Technologies for Interactive Marketing	4
ITP 496x**	The Digital Startup Launchpad Lab	2
(capstone course; corequisite: BAEP 496)		
BAEP 496**	The Digital Startup Launchpad	2
ELECTIVE COURSES (6 UNITS)		UNITS
BAEP 423	Management of Small Businesses	4
BAEP 460	Seminar in Entrepreneurship	2
BUAD 304	Leading Organizations	4
BUAD 307	Marketing Fundamentals	4
IOM 462	Managing a Small Business on the Internet	2
ITP 310Lx*	Design for User Experience	2
MKT 425*	Direct Response and Internet Marketing	4

\*Prerequisite required

\*\*ITP 496 and BAEP 496 must be taken in the same semester.

### Minor in Video Game Design and Management

The video game design minor integrates theoretical concepts and practical skills to prepare students for a career in interactive entertainment, specifically the video game industry. Through integration of two major disciplines (cinema and information technology), students will be exposed to a variety of design concepts related to creating video games including: level design, game-play control, user interface, multiplayer, game mechanics, and storytelling. As opposed to the video game programming minor where

students will be writing code and programming game engines, students in the video game design and management minor will apply design concepts to different game genres and use game design software tools to create a working demo of a video game during the course of the minor program.

*Requirements for completion (seven core courses)*  
Minimum units: 24

REQUIRED COURSES (24 UNITS)		UNITS
CTIN 483	Introduction to Game Development	4
CTIN 484L*	Intermediate Game Development	2
CTIN 488	Game Design Workshop	4
CTIN 489*	Intermediate Game Design Workshop	2
ITP 280	Video Game Production	4
ITP 391x	Designing and Producing Video Games	4
ITP 491x	Level Design and Development for Video Games	4

\*CTIN 483 and CTIN 488 are prerequisites; enrollment in CTIN 484L and CTIN 489 is concurrent.

**Minor in Video Game Programming**

The video game programming minor integrates the theoretical concepts and practical skills to prepare students for a career in interactive entertainment, specifically the video game industry. Through integration of two major disciplines (computer science and information technology), students will be exposed to a variety of programming concepts related to creating video games including: 3-D graphics, artificial intelligence, particle systems, rendering, collision detection, game algorithms, physics concepts, and math formulas. In contrast to the video game

design minor where the focus is applying design concepts and using software design tools, students in the video game programming minor will evaluate, write and debug code, in addition to creating a game engine during the course of the minor.

*Requirements for completion (five core courses plus 8 units of electives)*  
Minimum units: 26

CORE COURSES (18 UNITS)		
CSCI 101L	Fundamentals of Computer Programming	3
CSCI 102L	Data Structures	3
ITP 280	Video Game Production	4
ITP 380	Video Game Programming	4
ITP 485	Programming Game Engines	4
ELECTIVE COURSES (8 UNITS - 4 UNITS MUST BE ITP)		
CSCI 460	Introduction to Artificial Intelligence	3
CSCI 480	Computer Graphics	3
ITP 382	Mobile Game Programming	4
ITP 461*	Artificial Intelligence in Video Games	1
ITP 481**	Video Game Graphics	1
ITP 484	Multiplayer Game Programming	4

\*ITP 461 requires concurrent enrollment with CSCI 460.

\*\*ITP 481 requires concurrent enrollment with CSCI 480.

**Minor in Web Technologies and Applications**

The Web technologies and applications minor is designed to help students incorporate the Web in their major field of study by combining theoretical concepts and practical applications of Web technologies. Upon completion of the minor, students will be able to design, develop and apply major Web technologies and advancements. The broad areas of study will be publishing, programming, databases, and multimedia. An elective will be chosen depending on the students' academic and professional goals.

*Requirements for completion (five core courses plus one elective)*  
Minimum units: 18

CORE COURSES (15 UNITS)		UNITS
ITP 104x	Internet Publishing Technologies	2
ITP 300x	Database Web Development	3
ITP 301Lx	Interactive Web Development	4
ITP 310x	Design for User Experience	2
ITP 460x	Web Application Project	4
ELECTIVE (ONE COURSE)		UNITS
ITP 404x	Developing Web Services and Application Programming Interfaces	3
ITP 411x	Interactive Multimedia Production	3
ITP 470x	Information Technology Practicum	3
CSCI 455x	Introduction to Programming Systems Design	4

**Courses of Instruction**

**INFORMATION TECHNOLOGY PROGRAM (ITP)**

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

All ITP courses are open to non-engineering majors. The "x" designation indicates that engineering students require prior departmental approval to count 100-level and above ITP courses for major credit.

**ITP 031x Introduction to Microsoft Excel (1)** Spreadsheet applications on microcomputers using Microsoft Excel; fundamentals of problem solving and data analysis using a wide variety of spreadsheet features. Not available for degree credit. Graded CR/NC.

**ITP 050x Microsoft Power Point (1)** Overview of how to create professional and colorful screen presentations, overhead transparencies, outlines and 35 mm slides using a presentation graphics program. Not available for degree credit. Graded CR/NC.

**ITP 065x Microsoft Access (1)** Microsoft Access will allow students to learn how to plan, define, create, and modify a database in the Windows environment. Not available for degree credit. Graded CR/NC.

**ITP 090x Introduction to Adobe Photoshop (2, FaSp)** Basic concepts of colors; color calibration tools; scanning, importing and exporting images; painting, editing, fill, and type tools; using layers, masks, filters, and color correction. Not available for degree credit. Graded CR/NC.

**ITP 101x Introduction to Information Technology (4, FaSp)** Introduction to computer hardware, operating systems, networks, programming. Survey of application software in business and industry. Computer issues in the work place and society.

**ITP 104x Internet Publishing Technologies (2, FaSp)** Basic Internet publishing using HTML and other Web technologies. Concepts and theory of Web publishing and production. Introduction to page layout and design. Not available for major credit in electrical engineering or computer science.

**ITP 105x Introduction to Computer Technologies and Applications (2)** The course offers a primer in computer technologies and applications essential to academic and career success. Not available for major credit to engineering majors.

**ITP 109x Introduction to Java Programming (2, FaSp)** Introduction to object-oriented software design for business problems. Creation of console applications, windowed applications, and interactive Web applets. Not available for major credit in electrical engineering or computer science.

**ITP 110x Introduction to C Programming (2)** Fundamentals of C; a survey of C compilers; the role of C in developing Unix and other operating systems. *Prerequisite:* knowledge of a higher-level language.

**ITP 115 Programming in Python (3, FaSp)** Learn how to program using Python. With its high level data structures and clear syntax, Python is an ideal first language.

**ITP 125Lx From Hackers to CEOs: Introduction to Information Security (2, FaSp)** Introductory course in computer security. Fundamentals of information security management. Threats to information integrity. Ethical hacking concerns and practice. Policies and Procedures. Not available for major credit in Engineering.

**ITP 140 Mobile Application Technologies (2, FaSp)** Technologies, devices, operating systems, and tools of mobile applications, as well as the mobile industry. Students will use tools to create apps for different mobile devices.

**ITP 150x Introduction to Visual BASIC (2)** This course provides students with no previous programming experience with the basics for and creating their own interactive windows applications using visual programming techniques. *Prerequisite:* high school algebra.

**ITP 165x Introduction to C++ Programming (2)** Fundamentals of C++ syntax and semantics, including function prototypes, overloading, memory management, abstract data types, object creation, pointers to class members, and I/O streams. *Prerequisite:* any high-level programming language.

**ITP 168x Introduction to MATLAB (2)** Fundamentals of MATLAB: a high-performance numeric computation and visualization environment. Overview of linear algebra and matrix manipulation; using 2-D and 3-D plotting routines; programming in MATLAB; basic numerical analysis. *Recommended preparation:* MATH 118x or MATH 125.

**ITP 204x Fundamentals of Web Development (4)** Programming fundamentals necessary for Web development. Scripting languages, development tools and techniques for creating interactive, dynamic Web pages. *Prerequisite:* ITP 104x.

**ITP 209x Object Oriented Programming Using Java (3)** Basic object-oriented concepts and object-oriented analysis and design as they relate to Java technology. Object-oriented programming for developing applications with Java technology. *Prerequisite:* ITP 109x.

**ITP 210x Multimedia Applications for Windows (2)** Focuses on creating powerful presentations with affordable multimedia hardware and software; integrates sound, video and animation into windowing environment. *Prerequisite:* ITP 101x.

**ITP 211x Multimedia Authoring (2)** Introduction to interactive multimedia programming; integrated audio, graphics, video, and animation for interactive multimedia; object oriented programming, web, CD-ROM, and hybrid applications. *Recommended preparation:* programming experience.

**ITP 212x Digital Media Design and Management (3)** Design and composition as it applies to digital media, including web, CD, interactivity, and motion graphics. Media management, client relations, project and asset management.

**ITP 215Lx 3D Modeling, Animation, and Special Effects (2, FaSp)** Developing a 3D animation from modeling to rendering; Basics of surfacing, lighting, animation and modeling techniques. Advanced topics: compositing, particle systems, and character animation. Not available for major credit in engineering. *Recommended preparation:* knowledge of any 2D paint, drawing or CAD program.

**ITP 216x Web Animation and Interactivity (2, FaSp)** 2-D vector graphics for web and animation. Scripting techniques for interactivity. Action Script syntax, logic and control. *Recommended preparation:* basic computer knowledge.

**ITP 220Lx Digital Video Editing and Motion Graphics (2)** Techniques for digital, non-linear video editing and compositing. Special video effects, rendering and compression for multimedia, the Web, and broadcast. Not available for major credit for EE or CSCI majors. *Recommended preparation:* general PC-based computer proficiency.

**ITP 225x The UNIX System (2)** UNIX system concepts; the Shell command language; utilities, editors, file structure, and text formatters. C Shell, Bourne Shell, and the awk programming language. *Prerequisite:* ITP 101x.

**ITP 230x Video Game Quality Assurance (4, FaSp)** Survey game software development through quality assurance and in-depth analysis of the development cycle with a focus on bug testing systems and methodologies. Not available for major credit in electrical engineering.

**ITP 260x Internet Technologies (4)** Overview of emerging technologies on the Internet including multimedia components, networking, security tools, web-based databases, and wireless systems.

**ITP 280 Video Game Production (4, FaSp)** History of video games; overview of game genres; phases of video game development (concept, preproduction, production, post-production); roles of artists, programmers, designers, and producers.

**ITP 300x Database Web Development (3, Fa)** Fundamental theory and technologies for creating dynamic, database-driven Websites: Structured Query Language. *Prerequisite:* ITP 104x; *recommended preparation:* ITP 204x.

**ITP 301Lx Interactive Web Development (4, Sp)** Design, programming techniques for creating interactive, dynamic Web pages. Web development technologies and techniques include scripting fundamentals, Javascript, dynamic HTML, Actionscript, and Flash. Not available for major credit in engineering. *Prerequisite:* ITP 104x.

**ITP 304L Technologies for Building Online Political Campaigns (4)** Key technology components necessary in building a successful online political campaign. Fundamentals of implementing, marketing and managing an online political campaign.

**ITP 305x Advanced 3D Modeling, Animation, and Special Effects (3, Sp)** Advanced modeling, surfacing, and animation techniques as well as dynamics, scripting, and other advanced 3D automation procedures. Not available for major credit in engineering. *Prerequisite:* ARCH 207a or ITP 215Lx.

**ITP 309x Developing Enterprise Applications Using Java (3)** Java architecture and key logic for business components; Servlets, Server Pages and Enterprise Java Beans technologies, to design and construct secure and scalable n-tier applications.

**ITP 310Lx Design for User Experience (2, Fa)** Concepts, techniques, practices, workflows and tools for design from the perspective of user experience. Not available for major credit in engineering. *Prerequisite:* ITP 104x.

**ITP 315x 3D Character Animation (3)** Advanced exploration of the process of bringing 3D characters to life from concept to model, and through production to finished performance. Not available for major credit in electrical engineering. *Prerequisite:* ITP 215Lx.

**ITP 320x Enterprise Wide Information Systems (3, FaSp)** The role Information Systems play in an organization. Integration of Business Processes by using Enterprise Resource Planning Systems (ERP). Not available for major credit in engineering.

**ITP 321x Programming Enterprise Wide Information Systems (2)** Programming enterprise applications using ABAP/4. Topics include: ABAP/4 Development Workbench, Data Dictionary, Subroutines and Functions, database tables, data objects, and designing reports. *Prerequisite:* ITP 320Lx.

**ITP 325x Ethical Hacking and Systems Defense (3, FaSp)** Hacking from a defense perspective. Hacker ethics and laws. Penetration testing. Vulnerability assessment. Securing workstations, servers, and networks. Not available for major credit in engineering. *Prerequisite:* ITP 125Lx.

**ITP 330x Interactive 3-D Environments (3)** Introduces techniques to design and develop interactive, multi-user 3-D, 2-D, and textual environments, for business, personal communications, education, and gaming for the web and CD. *Prerequisite:* ITP 211x.

**ITP 342L Mobile Application Development (3)** Develop applications for mobile devices such as iPhones and iPads (iOS) and other smart phones (Android). Build a mobile application from start to finish. *Prerequisite:* ITP 140.

**ITP 345x Video Game Art and Animation (3)** Create art and modeling for video games. Model, texture, light, and animate a sequence to be used in a video game engine. *Prerequisite:* ITP 215Lx.

**ITP 357x Enterprise Network Design (3)** Network technologies. Strategies for managing thousands of systems. Routers and managed switches. Integrated operating systems (IOS). Windows and Linux networking. Subnets. Not available for major credit in engineering. *Prerequisite:* ITP 125Lx.

**ITP 360x 3D Compositing and Visual Effects (3)** Advanced techniques for 3D animation and visual effects development including 3D pre-visualization, match moving, dynamics, multi-pass rendering, and digital compositing. Not available for major credit in engineering. *Prerequisite:* ITP 215Lx.

**ITP 370x Information Security Management (3, Sp)** Management techniques for security projects. Security team management. Laws and regulations for information security. Disaster recovery. Security Audits. Not available for major credit in engineering. *Prerequisite:* ITP 125Lx.

**ITP 375x Digital Forensics (3, Fa)** Forensic science techniques. Digital evidence preservation and presentation. Processes and methodologies for digital analysis. Not available for major credit in engineering. *Prerequisite:* ITP 125Lx.

**ITP 377x Linux System Administration (3)** Installation, customization and administration of Linux in a networked environment. *Prerequisite:* ITP 225x.

**ITP 380 Video Game Programming (4, FaSp)** Underlying concepts and principles required for programming video games (topics include vectors, transformations, 3-D math, geometric primitives, matrices). *Prerequisite:* CSCI 102L or ITP 165x.

**ITP 382x Mobile Game Programming (4)** Programming methodologies for writing mobile game applications for handheld devices, including the following programming considerations for embedded systems: graphics, screen size, memory, programming interfaces. *Recommended preparation:* previous programming experience.

**ITP 383 Database Systems: Concepts, Design and Implementation (3, Sp)** (Enroll in ISE 382)

**ITP 385x IT Consulting and Professional Services (3)** Information Technology (IT) Consulting life cycle. Client relationships. Problem evaluation, solution development and implementation. Systems analysis and evaluation. Third party consulting. Not available for major credit in engineering. *Prerequisite:* ITP 101 or ITP 125.

**ITP 391x Designing and Producing Video Games (4)** Key elements for designing effective video games and the processes involved in early development; roles of producer and manager, marketing and sales, and considerations pertaining to licensing and franchises. *Prerequisite:* ITP 280.

**ITP 404x Developing Web Services and Application Programming Interfaces (3, Fa)** Programming and scripting necessary to use and develop Web services and Application Programming Interface (APIs). Not available for major credit in Engineering. *Prerequisite:* ITP 301Lx.

**ITP 411x Interactive Multimedia Production (3, FaSp)** Interactive multimedia title development cycle. Programming a time-based authoring tool; design, develop, and deliver a multimedia title on the Web and state-of-the-art storage media. *Prerequisite:* proficiency in object-oriented programming.

**ITP 414x Seminar and 3D Portfolio Development (3, Sp)** Advanced processes for developing 3D animation, showcasing skill sets, and qualifications for positions within the 3D animation industries; including demo reel, media, and website creation. Not available for major credit in engineering. *Prerequisite:* ITP 215Lx and ITP 305x or ITP 315x or ITP 360x.

**ITP 420x Structuring Data for the Web (3)** Building web applications focused on content in web documents; develop XML document using DTD, DOM, XSL; facilitate data interchange between Websites. *Prerequisite:* ITP 300x.

**ITP 421x Advanced Programming for Enterprise Information Systems (3)** Object Oriented Programming for Enterprise information systems. Working with classes, objects, database tables, SQL. Designing reports and Graphical user interfaces. Leveraging service oriented architecture. Not available for credit for engineering majors. *Prerequisite:* ITP 320x; *recommended preparation:* object oriented programming.

**ITP 422L Configuring Enterprise Resource Planning Systems (3)** Business process integration is the core advantage of using ERP systems. Analyze, configure, and test business processes for a company from the ground up. (Duplicates credit in former ITP 322.) *Prerequisite:* ITP 320Lx or ISE 583.

**ITP 425x Web Application Security (4)** Web application security techniques. eCommerce vulnerabilities. Online fraud. Solutions to spam and identity theft. Not available for major credit in Engineering. *Prerequisite:* CSCI 351 or ITP 301Lx or ITP 325x.

**ITP 440x Enterprise Data Management (3)** Advanced concepts in database management; design, customization, maintenance and management of a database in an enterprise environment. *Prerequisite:* IOM 435 or ITP 300.

**ITP 445 Macintosh, OSX, and iOS Forensics (3)** Digital forensics. Digital evidence. Apple. Mac. Macintosh. OSX. iOS. iPhone. iPad. *Prerequisite:* ITP 375x.

**ITP 446 Enterprise and Network Forensics (3, Fa)** Enterprise server analysis. Network device forensic analysis. SQL server. Microsoft servers. Linux servers. Exchange servers. LAMP servers. *Prerequisite:* ITP 375x; *recommended preparation:* ITP 357x.

**ITP 447 Mobile Device Security and Forensics (3, Sp)** Mobile device security. Mobile device forensics. Android. Blackberry. Windows phone. Symbian. *Prerequisite:* ITP 375x.

**ITP 448 Electronic Discovery (3, Sp)** Electronic Discovery. eDiscovery. Electronically stored information. Civil litigation and discovery. Electronic evidence. *Prerequisite:* ITP 375x and LAW 200.

**ITP 454x Enterprise Resource Planning, Design, and Implementation (3)** Process and requirements to implement an Enterprise Resource Planning System (ERP). Set up server, implement ERP system, then transfer and configure database for case company. Not for major credit for Electrical Engineering students. *Prerequisite:* ITP 320x.

**ITP 455Lx Enterprise Information Portals (3)** Enterprise Information Portals for various case companies will be explored. Student will design, install, configure and administer core functionalities of a basic portal solution. *Prerequisite:* ITP 320Lx.

**ITP 457 Network Security (4)** Network policy and mechanism, firewalls, malicious code; intrusion detection, prevention, response; cryptographic protocols for privacy; risks of misuse, cost of prevention, and societal issues. *Prerequisite:* ITP 357x.

**ITP 460x Web Application Project (4)** Skills to plan, analyze, build, and launch professional Websites for real clients. Includes project management, documentation, technology assessment, security, user interface and quality assurance. Not available for major credit in Engineering. Lecture: 3 hours; Lab: 3 hours. *Prerequisite:* ITP 301Lx.

**ITP 461x Artificial Intelligence in Video Games (1)** Concepts and programming techniques for building artificial intelligence into video games. Games AI topics include: finite state machines, pathfinding, A-Life and flocking, and genetics. *Prerequisite:* CSCI 102L; *corequisite:* CSCI 460.

**ITP 466 Building the High Tech Startup (4)** Teach students the basic technologies and processes involved in building web and mobile startups. Students will be introduced to the different aspects of building a web startup including online business models, Product management, Agile development processes, technology platforms and operations, customer development and online marketing.

**ITP 470x Information Technology Practicum (1-4, max 8, FaSpSm)** Independent technology project related to specific topics under the direction of a faculty member. Not available for graduate credit in engineering. *Recommended preparation:* appropriate 300-level course work to topic of study.

**ITP 475x Advanced Digital Forensics (4, Sp)** Advanced forensic techniques. Live image analysis. Network level forensic investigation. Server forensic techniques. Deposition and trial. Not available for major credit in Engineering. *Prerequisite:* ITP 375x.

**ITP 476 Technologies for Interactive Marketing (4)** Designed to introduce students to technologies, concepts and strategies in the emerging online advertising ecosystem. Through lectures, discussions, and projects, students learn strategies and tactics to drive traffic to a website. They learn how to analyze and measure the efficacy of their plans. Lastly, they will work with a real client and with a real budget to craft and execute an online marketing plan.

**ITP 480x Information Technology Internship (1-4, max 8)** Practical experience in applying information technology skills in real-world settings. Supervised internship at companies and start-ups. Balancing academic rigor with corporate challenges and deadlines. Not available for graduate credit. Graded CR/NC. *Recommended preparation:* knowledge of chosen function area.

**ITP 481x Video Game Graphics (1)** Practical approach to understanding the methods and programming techniques used in real-time graphics, data structures and algorithms in games, rendering techniques, and particle systems. *Prerequisite:* CSCI 102L; *corequisite:* CSCI 480.

**ITP 482L Engineering Database Applications (3)** Planning and implementation of engineering information systems that interface with a large database. Emphasis is placed on web-based data entry and retrieval. *Prerequisite:* ISE 382 or IOM 435.

**ITP 484x Multiplayer Game Programming (4)** Designing, building, and programming a fully functional multiplayer game with online or network capabilities, a platform-independent network library and back-end database. *Prerequisite:* CSCI 102L or ITP 165x.

**ITP 485 Programming Game Engines (4, FaSp)** Techniques for building the core components of a game engine; 2-D/3-D graphics, collision detection, artificial intelligence algorithms, shading, programming input devices. *Prerequisite:* CSCI 102L, ITP 380.

**ITP 486 Securing and Auditing Enterprise Resource Planning Systems (3)** Management and technical issues related to the security of ERP systems. Students will audit ERP systems and apply appropriate security controls. *Prerequisite:* ITP 320x.

**ITP 487 Data Warehouses and Business Intelligence (3)** Rigorous modeling process leading from data to decisions. Explores theory and practice of Data Warehouses. Deriving Business Intelligence for strategic enterprise management. *Prerequisite:* ITP 320x.

**ITP 488x Managing Supply Chains with Advanced Planning and Optimization (3)** Drivers and obstacles to the process of coordinating the flow of material/information along the logistics chain. Optimize the supply network, from raw materials to sales. Not available for major credit in engineering except toward undergraduate and graduate programs offered by the Epstein Department of Industrial and Systems Engineering. *Prerequisite:* ITP 320x.

**ITP 491x Level Design and Development for Video Games (4)** Theories and practices of defining, prototyping, testing, and refining a video game level, development of game level documents, and the tools for managing the development process. *Prerequisite:* ITP 391x.

**ITP 496 The Startup Launchpad Lab (2)** A real world, hands-on learning experience on what it's like to actually start a high-tech company. Students will work in teams to design, prototype and implement version 1.0 of a high tech web or mobile startup. *Prerequisite:* BAEP 451, BAEP 452, ITP 466 and ITP 476; *corequisite:* BAEP 496.

**ITP 499x Special Topics (2-4, max 8)**

Recent developments in computers and data processing.

**ITP 555 Functionality of Enterprise Resource Planning Systems (1)** The functionality of Enterprise Resource Planning Systems (ERPs); the methods of implementation and the integration of information throughout an organization are discussed and analyzed. *Concurrent enrollment:* ACCT 555; *recommended preparation:* ACCT 547.

## Manufacturing Engineering

Ethel Percy Andrus

*Program Director:* B. Khoshnevis, Ph.D.

**Master of Science in Manufacturing Engineering**

Manufacturing engineering at USC is a multi-disciplinary program that confers the degree of Master of Science and is designed to produce graduates capable of responding to the needs of modern, up-to-date manufacturing. These graduates should be able to design, install and operate complex manufacturing systems made up of people, materials, automated machines and information systems. The Departments of Computer Science, Electrical Engineering, Industrial and Systems Engineering, Materials Science, Mechanical Engineering, and Entrepreneurship participate in the Manufacturing Engineering Program.

Course work in the program will train students in traditional manufacturing engineering topics, such as materials selection and process design. Additional courses will include the more modern, system-level concepts of integrated product and process design, applications of modern information technology to design and manufacturing, hands-on laboratories using advanced manufacturing equipment and commercial software, and entrepreneurship.

*Curriculum*

A total of 30 units is required beyond the B.S. degree. A minimum of 21 units must be at the 500 level or above. A maximum of 6 units of electives may be taken from non-engineering departments. At least three courses must be taken in the student's selected area of specialization.

REQUIRED COURSES	UNITS
CSCI 585	Database Systems, or
ISE 510	Advanced Computational Design and Manufacturing
ISE 511L	Mechatronic Systems Engineering
ISE 517	Modern Enterprise Systems, or
ISE 576	Industrial Ecology: Technology-Environment Interaction
ISE 525	Design of Experiments, or
AME 525	Engineering Analysis
Approved electives*	
	30

\*A list of approved electives in specialization areas is available from the department. Departmental approval is required for courses not listed.

## Multimedia and Creative Technologies

**Minor in Interactive Multimedia**

A minor in interactive multimedia is open to undergraduate students in all majors. This minor provides students with the skills and knowledge necessary to apply and develop interactive multimedia tools within a variety of industries. Although this program is geared towards the non-technical student, computer literacy is a key component to being successful in this program.

Students must apply to the program through the Viterbi School of Engineering, and approval of the student's adviser will be required on the application form. Students are required to complete a minimum of 19 units of course work consisting of both core requirements and elective courses.

Successful completion of the interactive multimedia minor requires a minimum of a 2.0 GPA in the following courses.

CORE COURSES	UNITS
CTIN 309	Introduction to Interactive Media
EE 320x	Digital Media Basics for Multimedia
ITP 101x	Introduction to Information Technology, or
ITP 105x*	Introduction to Computer Technologies and Applications
	2

		<b>GRAPHICS AND VISION TRACK</b>		<b>UNITS</b>
ITP 210x	Multimedia Applications for Windows (corequisite to EE 320)	2	CSCI 480 Computer Graphics	3
JOUR 413	Introduction to Online Journalism	4	CSCI 520 Computer Animation and Simulation	3
Total core units:	13-15		CSCI 574 Computer Vision	3
			CSCI 580 3-D Graphics and Rendering	3
<i>Elective Courses:</i>	6-8 units		CSCI 582 Geometric Modeling	3
Students will choose two elective courses from the following list:			CSCI 674 Advanced Topics in Computer Vision	3
			EE 569 Introduction to Digital Image Processing	3
<i>Cinematic Arts</i>			<b>NETWORKS AND DATABASES TRACK</b>	
CTIN 483	Introduction to Game Development	4	CSCI 551 Computer Communications	3
CTIN 488	Game Design Workshop	4	CSCI 558L Internetworking and Distributed Systems Laboratory	3
<i>Engineering</i>			CSCI 585* Database Systems	3
EE 450	Introduction to Computer Networks	3	CSCI 586 Database Systems Interoperability	3
ITP 301Lx	Interactive Web Development, or	4	CSCI 694ab Topics in Computer Networks and Distributed Systems	3-3
CSCI 351*	Programming and Multimedia on the World Wide Web	3	EE 450 Introduction to Computer Networks	3
*Prerequisites waived if students are competent in programming.				
<i>Journalism</i>			<i>Suggested Core and Elective Courses</i>	
JOUR 417	Online Journalism Management	2	Since this specialization is systems oriented, it is recommended (but not required) that students select CSCI 555 Advanced Operating Systems and EE 557 Computer Systems Architecture as two of their three core courses. Additional electives may be taken from the two tracks or from the partial list of suggestions below.	
<i>Fine Arts (Multimedia Design)</i>			CSCI 561*	Foundations of Artificial Intelligence
FADN 302	Design II	4	CSCI 573	Advanced Artificial Intelligence
FAIN 310	Digital Photo Studio	4	CSCI 577ab*	Software Engineering
FAIN 315	Internet Studio: Online Experimentation and Expression	4	CSCI 583	Computational Geometry
FAIN 410	Advanced Digital Photo Studio	4	CSCI 588	Specification and Design of User Interface Software
FASC 436	Art and Technology	4	CSCI 590	Directed Research
Total units required for completion of minor: 19-23 units			EE 554	Real Time Computer Systems
Total units including all prerequisite courses: 26-36			ISE 571	Human Factor Issues in Integrated Media Systems
			ISE 575	Topics in Engineering Approaches to Music Cognition
			ITP 411x	Interactive Multimedia Production

**Master of Science in Computer Science (Multimedia and Creative Technologies)**  
Students may earn a specialization in multimedia and creative technologies by completing the general requirements for the Master of Science in computer science and the following additional courses:

Every student must complete CSCI 576 Multimedia Systems Design (3). Students must also complete at least two courses selected from one of the two specialization tracks: Graphics and Vision or Networks and Databases.

\*Also satisfies a core course requirement in the general requirements for the M.S. degree in Computer Science.

### Master of Science in Electrical Engineering (Multimedia and Creative Technologies)

Students may earn a specialization in multimedia and creative technologies by completing the general requirements for the Master of Science in Electrical Engineering and the following additional requirements:

(1) At most four units of electives can be taken outside of the Viterbi School of Engineering *with adviser approval*. Some examples are CTAN 452 Introduction to 3-D Computer Animation (2 units) and CTIN 483 Introduction to Game Development (4 units).

(2) Computer science courses that are cross-listed with EE can (but do not have to) count toward the 18 EE units. Up to nine units of other CSCI courses that either are or are not cross-listed can also be used. Multimedia and creative technologies draws heavily on concepts and techniques from computer science.

(3) Students must include the following three courses in their program

EE 483	Introduction to Digital Signal Processing	3
EE 519	Speech Recognition and Processing for Multimedia	3
EE 569	Introduction to Digital Image Processing	3

A course can be waived if a student can demonstrate equivalent knowledge of the material and if the course instructor will certify it.

(4) Students must include six courses from the following list of courses in their programs for a total of 18 units.

### Approved Courses for the Multimedia Specialization

<b>COURSES IN ELECTRICAL ENGINEERING</b>		<b>UNITS</b>
EE 450	Introduction to Computer Networks	3
EE 522	Immersive Audio Signal Processing	3
EE 555	Broadband Network Architectures	3
EE 577a	VLSI System Design	3
EE 586L	Advanced DSP Design Laboratory	4
EE 596	Wavelets	3
EE 619	Advanced Topics in Automatic Speech Recognition	3
EE 669	Multimedia Data Compression	3

COURSES IN COMPUTER SCIENCE		UNITS
CSCI 455x	Introduction to Programming Systems Design	4
CSCI 480	Computer Graphics	3
CSCI 485	File and Database Management	3
CSCI 551	Computer Communications	3
CSCI 571	Web Technologies	3
CSCI 574	Computer Vision	3
CSCI 576	Multimedia Systems Design	3
CSCI 580	3-D Graphics and Rendering	3
CSCI 582	Geometric Modeling	3
CSCI 585	Database Systems	3

COURSES FROM THE SCHOOL OF CINEMATIC ARTS		UNITS
CTAN 452	Introduction to 3-D Computer Animation	2, max 4
CTIN 483	Introduction to Game Development	4

COURSE IN INFORMATION TECHNOLOGY		UNITS
ITP 411x	Interactive Multimedia Production	3

(5) Students may replace courses in the above list with a combined maximum of multimedia-related EE 599 or CSCI 599 Special Topics courses in their programs. Every course requires prior approval from the faculty adviser, recorded each semester on the plan of study form.

(6) Students may include a maximum of 6 units of EE 590 Directed Research in their programs. Before registering for these units, the faculty adviser must approve a written description of the intended multimedia research project signed by the faculty member who will supervise the student.

(7) Students entering this program are expected to have already completed, either at USC or at another institution, formal course work equivalent to USC course EE 364 Introduction to Probability and Statistics for Electrical Engineering. If an approved course

has either EE 441 or EE 464 as a prerequisite, then the student must first take and pass the placement examination that is given each semester for either EE 441 or EE 464 before taking the approved course. Information about placement exams can be found at [ee.usc.edu](http://ee.usc.edu).

(8) Although not required, students should be proficient in C or C++ programming, at the level taught in CSCI 455x.

(9) Although not required, ITP 411x Integrated Multimedia Production (3 units) will provide the student with hands-on experience in using multimedia application tools. This will help the student prepare a portfolio, which is expected by the industry from students who major in a multimedia program.

## Product Development Engineering

Olin Hall of Engineering, 430

Email: [mspde@usc.edu](mailto:mspde@usc.edu)

*Program Director:* Stephen C-Y Lu, Ph.D.

### Master of Science in Product Development Engineering

The Master of Science in product development engineering (MS PDE) is an interdisciplinary graduate degree program at USC jointly offered by the Aerospace and Mechanical Engineering and the Daniel J. Epstein Industrial and Systems Engineering (ISE) departments. The Aerospace and Mechanical Engineering department manages this joint degree program. Students can enter this program in either the fall or spring semesters, and it is available to full-time and part-time students.

#### Admission

The program has the following admission requirements:

- A bachelor's degree in an area of engineering or science;
- An undergraduate cumulative GPA of 3.0 or above; and
- Satisfactory general GRE scores of at least 400 verbal, 650 quantitative and 550 analytical.

The MS PDE program requires a minimum of 27 units to complete. Although it is mainly a course work-based program, students can choose to complete the program with or without a thesis requirement. For the thesis option, 4 of the 27 units are to be thesis. At least 16 units, not including thesis, must be at the 500 level or higher, and at least 18 units must be from the AME and ISE departments. For the non-thesis option, 18 of the 27 units must be at the 500 level or higher from the AME and ISE departments, and/or closely related departments. As well, students can choose to take up to 6 units of directed research (e.g., AME 590 or ISE 590). Students must maintain a minimal cumulative GPA of 3.0 in USC course work to graduate.

The program's prerequisite is a minimum of one 400 level course in either engineering design or engineering economy. Admitted students who do not meet this prerequisite will be assigned appropriate USC course(s) to complete the deficiencies. Deficiency courses, if taken at the 400 level, may be counted toward 27 units as general electives with adviser approval.

Depending on the academic background and career interests of students, the program offers two areas of specialization, product development technology and product development systems. The product development technology specialization will prepare students for a career as future product development engineers, while the product development systems specialization will prepare students as future product development managers. Students entering this program must declare their choice of an area of specialization and follow the requirements of each area of specialization to graduate.

#### Curriculum

The required 27 units are grouped into four categories of courses for each area of specialization as follows:

REQUIRED COURSES (6 UNITS)		UNITS
AME 503	Advanced Mechanical Design	3
ISE 545	Technology Development and Implementation	3

PRODUCT DEVELOPMENT SYSTEMS REQUIRED COURSES (6 UNITS)		UNITS	PRODUCT DEVELOPMENT SYSTEMS TECHNICAL ELECTIVES (6 UNITS)		UNITS	PRODUCT DEVELOPMENT TECHNOLOGY REQUIRED COURSES (6 UNITS)		UNITS	PRODUCT DEVELOPMENT TECHNOLOGY TECHNICAL ELECTIVES (6 UNITS)		UNITS	GENERAL ELECTIVES (9 UNITS)		UNITS
ISE 515	Engineering Project Management	3	ISE 415	Industrial Automation	3	AME 505	Engineering Information Modeling	3	AME 408	Computer-Aided Design of Mechanical Systems	3	GENERAL ELECTIVES (9 UNITS)		
ISE 544	Management of Engineering Teams	3	ISE 460	Engineering Economy	3	AME 525	Engineering Analysis, or		AME 410	Engineering Design Theory and Methodology	3	Adviser-approved electives		
			ISE 470	Human/Computer Interface Design	3	AME 526	Engineering Analytical Methods	3	AME 481	Aircraft Design	3	(Must be upper-division 400- or 500-level courses; up to 4 units can be transferred from other institutions)		
			ISE 511L	Mechatronics Systems Engineering	3				AME 501	Spacecraft System Design	3	Total units required for degree		27
			ISE 517	Modern Enterprise Systems	3				AME 504	Metallurgical Design	3			
			ISE 525	Design of Experiments	3				AME 506	Design of Low Cost Space Missions	3			
			ISE 527	Quality Management for Engineers	3				AME 527	Elements of Vehicle and Energy Systems Design	3			
			ISE 528	Advanced Statistical Aspects of Engineering Reliability	3									
			ISE 555	Invention and Technology Development	3									
			ISE 561	Economic Analysis of Engineering Projects	3									
			ISE 567	Collaborative Engineering Principles and Practice	3									

## Sustainable Infrastructure Systems

The Sustainable Infrastructure Systems program prepares students for immediate and effective participation in the modern infrastructure workforce through a common core that includes smart-system design for sustainable infrastructures, the societal and regulatory context of infrastructure engineering decisions, and construction management. Five plans of study for the Master of Science degree allow for specialization based on background and interest.

### Master of Science in Civil Engineering (Transportation Systems)

REQUIRED COURSES	UNITS	
CE 471	Principles of Transportation Engineering	3
CE 501	Functions of the Constructor	3
CE 515	Sustainable Infrastructure Systems	3
CE 579	Introduction to Transportation Planning Law	3

PPD 633	Urban Transportation Planning and Management	4
<b>ELECTIVE COURSES (FOUR COURSES, OTHER ELECTIVES UPON APPROVAL*)</b>		
CE 583	Design of Transportation Facilities	3
CE 585	Traffic Engineering and Control	3
CE 589	Port Engineering: Planning and Operations	3
PPD 634	Institutional and Policy Issues in Transportation	4
PPD 692	Transportation and the Environment	4

\*Note: Students electing the Master of Science in Civil Engineering (Transportation Systems) degree option are expected to have a background in statistics and uncertainty equivalent to ISE 225 or CE 408, and engineering economy equivalent to ISE 460. Admitted students who do not meet these prerequisites can satisfy the requirements by taking appropriate, adviser-approved electives.

### Master of Science in Civil Engineering (Water and Waste Management)

REQUIRED COURSES	UNITS	
CE 451	Water Resources Engineering	3
CE 453	Water Quality Control	3
CE 476	Design of Pressurized Hydraulic Systems	3
CE 501	Functions of the Constructor	3
CE 515	Sustainable Infrastructure Systems	3

**ELECTIVE COURSES (FOUR COURSES,  
OTHER ELECTIVES WITH APPROVAL\*)**

		UNITS
CE 504	Solid Waste Management	3
CE 510	Groundwater Management	3
CE 511	Flood Control Hydrology	3
CE 516	Geohydrology	3
CE 520a	Ocean and Coastal Engineering	3

\*Note: Students electing the Master of Science in Civil Engineering (Water and Waste Management) degree option are expected to have a background in fluid mechanics equivalent to CE 309 or ENE 410. Admitted students who do not meet this prerequisite will be assigned a course to complete the deficiency.

**Master of Science in Electrical Engineering  
(Electric Power)**

REQUIRED COURSES		UNITS
CE 515	Sustainable Infrastructure Systems	3
CE 501	Functions of the Constructor	3
EE 443	Introduction to Power Systems	3
EE 444	Power Systems Technology	3
EE 521	Power Systems Analysis and Design	3

**ELECTIVE COURSES (FOUR COURSES,  
OTHER ELECTIVES WITH APPROVAL)**

		UNITS
EE 513	Solid State Energy Devices	3
EE 524	Transients in Power Systems	3
EE 525	Power System Protection	3
EE 526	Renewable Energy in Power Systems	3
EE 527	Net-Centric Power-System Control	3

**Master of Science in Electrical Engineering  
(Telecommunications)**

REQUIRED COURSES		UNITS
CE 501	Functions of the Constructor	3
CE 515	Sustainable Infrastructure Systems	3
EE 450	Introduction to Computer Networks	3
EE 475	Wireless Communication Technology	3
EE 485	Telecommunications Technology	3

**ELECTIVE COURSES (FOUR COURSES,  
OTHER ELECTIVES WITH APPROVAL\*)**

		UNITS
EE 544	Radio Frequency Systems and Hardware	3
EE 550	Design and Analysis of Computer Communication Networks	3
EE 555	Broadband Network Architectures	3
EE 558	Optical Fiber Communication Systems	3
EE 567	Communication Systems	3

\*Note: Students electing the Master of Science in Electrical Engineering (Telecommunications) degree option are expected to have a background in probability and statistics equivalent to EE 464 or EE 465, and linear algebra equivalent to EE 441. Admitted students who do not meet prerequisites by placement examination will be assigned courses to complete the deficiencies.

**Master of Science in Mechanical  
Engineering (Energy Conversion)**

REQUIRED COURSES		UNITS
AME 430	Thermal Systems Design	3
AME 577	Survey of Energy and Power for a Sustainable Future	3
AME 578	Modern Alternative Energy Conversion Devices	3
CE 501	Functions of the Constructor	3
CE 515	Sustainable Infrastructure Systems	3

**ELECTIVE COURSES (FOUR COURSES,  
OTHER ELECTIVES WITH APPROVAL\*)**

		UNITS
AME 513	Principles of Combustion	3
AME 514	Applications of Combustion and Reacting Flows	3
AME 579	Combustion Chemistry and Physics	3
AME 581	Introduction to Nuclear Engineering	3
ENE 505	Energy and the Environment	3

\*Students are encouraged to consider electives in other infrastructure programs.

Students with M.S. degrees in engineering or science disciplines can be accepted in these programs. Students must satisfy all other departmental degree requirements.

### Honor Societies

#### Omega Alpha Association

Omega Alpha Association is the systems engineering honor society. The adviser is Professor Stan Settles, (213) 740-0263.

## Degree Requirements

### Master of Science in Systems Architecting and Engineering

This program is recommended to graduate engineers and engineering managers responsible for the conception and implementation of complex systems. Emphasis is on the creative processes and methods by which complex systems are conceived, planned, designed, built, tested and certified. The architecture experience can be applied to defense, space, aircraft, communications, navigation, sensors, computer software, computer hardware, and other aerospace and commercial systems and activities.

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in systems architecting and engineering. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average.

In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in systems architecting and engineering is also subject to the following requirements:

(1) a total of at least 30 units is required, consisting of at least three units in the technical management area, three units in the general technical area, and 12 units in the technical specialization area;

(2) every plan of study requires prior written approval by the director of the systems architecting and engineering program recorded on the study plan in the student's file;

(3) no more than nine units at the 400 level may be counted toward the degree — the remaining units must be taken at the 500 or 600 level;

(4) at least 24 of the 30 units must be taken in the Viterbi School of Engineering;

(5) units to be transferred (maximum of four with adviser approval) must have been taken prior to taking classes at USC; interruption of residency is not allowed;

(6) no more than 6 units of Special Topics courses (499 or 599) may be counted for this degree;

(7) thesis and directed research registrations may be allowed to individual students only by special permission of the supervising faculty member and the program director;

(8) a bachelor's degree in an engineering field and a minimum of three years systems experience are recommended prior to taking Systems Architecting and Design Experience courses. This program is not recommended for recent bachelor's degree graduates.

REQUIRED COURSES	UNITS	
ISE 460	Engineering Economy, or	
ISE 561	Economic Analysis of Engineering Projects, or	
ISE 563	Financial Engineering, or	
SAE 560	Economic Considerations for Systems Engineering	3
SAE 541	Systems Engineering Theory and Practice	3
SAE 549	Systems Architecting	3
One design-related course approved by the director		3

**ELECTIVES** **UNITS**

Adviser-approved electives in technical management area	3
Adviser-approved electives in general technical area	3
Adviser-approved electives in technical specialization area	12

*Technical Management Area:* Take one course (3 units) from the following:

CE 556ab	Project Cost Estimating, Control, Planning and Scheduling	3-3
IOM 525*	Quality Improvement Methods	3
IOM 527*	Managerial Decision Analysis	3
IOM 537*	Global Businesses and Markets: Strategies Enabled by Technology	3
IOM 580*	Project Management	3
ISE 515	Engineering Product Management	3
ISE 517	Modern Enterprise Systems	3
ISE 544	Management of Engineering Teams	3
ISE 562	Value and Decision Theory	3
ISE 585	Strategic Management of Technology	3
MOR 561*	Strategies in High-Tech Businesses	3
SAE 550	Systems Architecting and the Political Process	3

\*USC Marshall School of Business course.

*General Technical Area:* Take one course (3 units) from the following:

CSCI 510	Software Management and Economics	3
CSCI 577ab	Software Engineering	4-4
IOM 535*	Database Management	3
ISE 580	Advanced Concepts in Computer Simulation	3
SAE 542	Advanced Topics in Systems Engineering	3
SAE 543	Case Studies in Systems Engineering and Management	3
SAE 550	Systems Architecting and the Political Process	3
SAE 551	Lean Operations	3

\*USC Marshall School of Business course.

*Technical Specialization Area:* Twelve units are required, usually in the student's present or intended technical specialty. Courses are intended to complement the student's prior education and experience toward becoming a well-rounded systems architect-engineer or architect-manager. With a few exceptions, the courses should come from the recommended list, and usually all from a single specialization.

The student may choose from a large variety of technical specializations spanning all departments in the Viterbi School of Engineering. Flexibility is emphasized in this choice; the program director is expected to work closely with the student in choosing the best set of courses to meet the student's need.

Several sample specializations are listed below but are not intended to be complete.

*Recommended Courses*

*Aerospace and Mechanical Systems:* AME 503, AME 504, AME 521, AME 532a, AME 544, AME 548, AME 560, AME 588

*Artificial Intelligence/Neural Networks:* CSCI 460, CSCI 545, CSCI 561, CSCI 564, CSCI 566, CSCI 567, CSCI 574; EE 547

*Automation and Control Systems:* EE 543a, EE 547, EE 585, EE 587, EE 588, EE 593

*Communication and Signal Processing Systems:* EE 551, EE 562a, EE 563, EE 564, EE 567, EE 580, EE 582, EE 583

*Computer and Information Systems:* CSCI 485, CSCI 551, CSCI 585, EE 552, EE 554, EE 561, EE 562a, EE 574, EE 658

*Construction:* CE 501, CE 519, CE 525ab, CE 533, CE 536, CE 556ab, CE 583

*Engineering Management Systems:* ISE 515, ISE 530, ISE 535, ISE 544, ISE 562, ISE 580, ISE 585; SAE 541, SAE 550

*Integrated Media Systems:* EE 450, EE 469, EE 522, EE 555, EE 569, EE 596; CSCI 480, CSCI 551, CSCI 574, CSCI 576, CSCI 585, CSCI 588

*Manufacturing Systems:* AME 588; EE 561ab; ISE 511, ISE 514, ISE 516, ISE 517, ISE 544, ISE 570

*Network-centric:* CSCI 402, CSCI 530, CSCI 551, CSCI 555, CSCI 558L, CSCI 577ab, EE 550, SAE 574

*Software Process Architecture:* CSCI 510, CSCI 577b, CSCI 665; EE 554, EE 557; ISE 544, ISE 562, ISE 564

*Systems:* EE 598; ISE 515, ISE 520, ISE 525, ISE 527, ISE 528, ISE 532, ISE 535, ISE 536, ISE 538, ISE 544, ISE 562, ISE 580, ISE 585; SAE 541, SAE 542

**Graduate Certificate in Systems Architecting and Engineering**

The graduate certificate in systems architecting and engineering is designed for practicing engineers engaged in the creation and design of complex innovative systems, in aerospace and commercial fields. Entering students are expected to have a bachelor's degree in engineering or a related field from an accredited institution. Three years of industry experience are recommended. Students are required to earn a cumulative B average or higher in courses taken for the certificate. The courses taken for the certificate may be applied later to the Master of Science in Systems Architecting and Engineering.

**REQUIRED COURSES - CHOOSE FOUR** **UNITS**

ISE 460	Engineering Economy, or	
ISE 561	Economic Analysis of Engineering Projects, or	
SAE 560	Economic Considerations for Systems Engineering	3
ISE 515	Engineering Project Management	3
ISE 544	Management of Engineering Teams	3
SAE 541	Systems Engineering Theory and Practice	3
SAE 542	Advanced Topics in Systems Engineering	3
SAE 549	Systems Architecting	3

In addition, one 3- or 4-unit elective course shall be taken from the list of those approved for the Master of Science in Systems Architecting and Engineering.

All programs of study will be approved by the director of the Systems Architecting and Engineering program.

**Graduate Certificate in Network Centric Systems**

This 15-unit graduate certificate is jointly sponsored by the Epstein Industrial and Systems Engineering, Hsieh Electrical Engineering and Computer Science departments, and administered by the Epstein ISE Department. This certificate is designed for practicing engineers engaged in the creation and design of complex innovative network centric systems in aerospace and commercial fields. Entering students are expected to have a bachelor's degree in engineering or a related field from an accredited institution. Three years of industry experience are recommended. Students are required to earn a cumulative B average or higher in courses taken for the certificate. The courses taken for the certificate may be applied later to the Master of Science in Computer Science, Electrical Engineering or Systems Architecting Engineering with departmental approval.

REQUIRED COURSES	UNITS					
SAE 574	Net-centric Systems Architecting and Engineering	3	CSCI 555	Advanced Operating Systems	3	
			CSCI 556	Introduction to Cryptography	3	
			CSCI 558L	Internetworking and Distributed Systems Laboratory	3	
	Choose 4 courses from one area of emphasis:	12	CSCI 561	Foundations of Artificial Intelligence	3	
	<i>Computer Science Emphasis</i>		CSCI 573	Advanced Artificial Intelligence	3	
	Required CSCI course		CSCI 576	Multimedia Systems Design	3	
	CSCI 551	Computer Communications	3	CSCI 585	Database Systems	3
				<i>Electrical Engineering Emphasis</i>		
	CSCI Electives (choose three courses, 9 units)			Required EE course		
	CSCI 530	Security Systems	4	EE 535	Mobile Communications	3
	CSCI 531	Applied Cryptography	3			
	CSCI 546	Intelligent Embedded Systems	3			
				EE Electives (choose three courses, 9 units)		
				EE 541	Radio Frequency Filter Design	3
				EE 544	Radio Frequency Systems and Hardware	3
				EE 550	Design and Analysis of Computer Communication Networks	3
				EE 555	Broadband Network Architectures	3
				EE 562ab	Random Processes in Engineering	3-3
				EE 564	Communication Theory	3
				EE 567	Communication Systems	3
				EE 579	Wireless and Mobile Networks Design and Laboratory	3
				EE 666	Data Communication	3

15

## Courses of Instruction

### SYSTEMS ARCHITECTING AND ENGINEERING (SAE)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**SAE 496 Systems Engineering Through Motorsports (3, FaSp)** Applied systems architecting, engineering and management to motorsports from design to validation and verification; venues include drag racing, grand prix Formula SAE racing, DARPA Challenges.

**SAE 499 Special Topics (2-4, max 8)** Course content to be selected each semester from recent developments in Systems Architecting and Engineering and related fields.

**SAE 541 Systems Engineering Theory and Practice (3, FaSpSm)** Integration of engineering problem solving methodologies based on systems concepts. Application to complex, large scale technical systems and problems faced by engineering managers. Case studies. (Duplicates credit in former ISE 541).

**SAE 542 Advanced Topics in Systems Engineering (3, FaSp)** Advanced topics in integration software management and systems engineering, probabilistic foundations of decision-based theory, quantitative risk management, decision-based design, and safety aspects of systems engineering. (Duplicates credit in former ISE 542). *Prerequisite:* SAE 541.

**SAE 543 Case Studies in Systems Engineering and Management (3, FaSp)** Real-world case studies in DoD, NASA, and commercial arenas, employing new methodologies to cover the fundamental positive and negative development learning principles of systems engineering. *Prerequisite:* SAE 541, SAE 549.

**SAE 547 Model-Based Systems Architecting and Engineering (3)** Approaches for modeling systems using software such as SysML; modeling system, requirements, structure, behavior, and parametrics; mapping to hardware description language and behavioral code generation. *Recommended preparation:* Modeling and simulation courses.

**SAE 549 Systems Architecting (3, FaSp)** Introduction to systems architecture in aerospace, electrical, computer, and manufacturing systems emphasizing the conceptual and acceptance phases and using heuristics. *Prerequisite:* B.S. degree in a related field of engineering.

**SAE 550 Systems Architecting and the Political Process (3)** Analysis of risks inherent in managing high-tech/high-cost government-funded engineering programs; tools and techniques for coping with the impacts of politically-driven budgets on the engineering design process. (Duplicates credit in former ISE 550). *Recommended preparation:* two years of work experience.

**SAE 551 Lean Operations (3, Sp)** Study of lean principles and practices as applied to automotive, aerospace and other industries.

**SAE 560 Economic Considerations for Systems Engineering (3)** Impact of economic factors for systems architects and engineers, tools for understanding these factors, fundamental quantitative analysis of cash flow, life-cost estimating for systems and software engineering.

**SAE 574 Net-Centric Systems Architecting and Engineering (3, FaSp)** In-depth examination of the technical design approaches, tools, and processes to enable the benefits of net-centric operations in a networked systems-of-systems.

**SAE 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**SAE 594abz Master's Thesis (2-2-0, FaSpSm)** Credit on acceptance of thesis. Graded IP/CR/NC.

**SAE 599 Special Topics (2-4, max 9, FaSpSm)** Course content will be selected each semester to reflect current trends and developments in the field of systems architecting and engineering.

---

# USC Roski School of Fine Arts

*While the white tempera paint on art major Neena Holzman cracked and dried, she modeled Epitaph in Wax, a sculpture created by fellow student Ariel McCleese, at the opening reception of 400 Percent, an exhibition showcasing advanced student work.*

**F**irst organized in 1883, the USC Roski School of Fine Arts is the oldest art school in Southern California. A supportive environment for experimentation in visual art, the school encourages interdisciplinary, progressive approaches to studio art, design, curatorial practice and critical studies. With equal emphasis on making and thinking, USC Roski prepares artists, designers, curators and writers to impact visual culture in new ways.

Each year the school attracts 275 undergraduate majors, 175 undergraduate minors and 35 graduate students. USC Roski also welcomes more than 1,000 liberal arts, science and business students to its classes. The school's undergraduate programs develop students' visual acuity, technical ability and critical insight. Students pursuing a B.A. have ample opportunity to take advantage of the wide-ranging academic offerings at USC, while BFA students can immerse themselves more fully in the production of studio art. A faculty of distinguished, dedicated artists and designers teach innovative and comprehensive courses in painting, drawing, printmaking, sculpture, ceramics, photography, design, digital media and critical studies. Students have the freedom to work across media in order to push perceived boundaries and discover their individual creative voices.

The school's highly competitive Master of Fine Arts program has quickly risen in prominence and competes with the nation's finest graduate art programs. With spacious private studios; an extraordinary lineup of visiting artists, critics and curators; and just 16 enrolled students, the program provides an expansive though individualized experience. The Master of Arts, Art and Curatorial Practices in the Public Sphere program is a platform for scholarship in contemporary art that addresses social questions of public space and the public sphere. Individually, each student produces a thoroughly researched master's thesis; together, they engage in a curatorial practicum, culminating in an exhibition project that explores city-space.

As a place to study art, Southern California is unparalleled. The region boasts major museums such as the Getty Center, the Los Angeles County Museum of Art (LACMA), the Museum of Contemporary Art (MOCA), the Norton Simon Museum and the Hammer Museum, as well as a constellation of other influential art schools. In addition to hundreds of commercial galleries and alternative spaces, Los Angeles is home to a great number of artists and designers, who make the city one of the world's creative capitals. Leading museums, galleries, advertising agencies, design firms, artist studios, and the music and film industries offer emerging artists and designers a wealth of internship and employment opportunities.

Steiner, B.A.; Jamie Sweetman, MFA; John Tain, B.A.; Caroline Thomas, MFA; Osvaldo Trujillo, MFA; Noura Wedell, Ph.D.; Alexis Weidig, MFA; Ewa Wojciak, MFA; Mark Wyse, MFA

*Emeritus Professor:* Jay Willis, M.A.

\*Recipient of university-wide or school teaching award.

## General Information

### Degrees Offered

At the undergraduate level, the school offers the Bachelor of Fine Arts. The Bachelor of Arts in Art is offered in conjunction with the Dornsife College of Letters, Arts and Sciences. The Roski School of Fine Arts also offers six minor programs in studio arts and participates in a 3-D animation minor in conjunction with the Viterbi School of Engineering's Information Technology Program, a communication design minor in conjunction with the Marshall School of Business and the Annenberg School for Communication and Journalism, and a 2-D art for games minor and 3-D art for games minor with the Viterbi School of Engineering and the School of Cinematic Arts.

Degrees offered at the graduate level are: Master of Fine Arts and Master of Arts, Art and Curatorial Practices in the Public Sphere. A dual degree is also available: Master of Arts, Art and Curatorial Practices in the Public Sphere/Master of Planning.

### Minimum Grade Point Average Requirements

A minimum grade of C (2.0) or higher is required in all studio and art history courses for all undergraduate majors and minors in the Roski School of Fine Arts. A grade of C- or lower will not satisfy a major or minor

requirement. A minimum grade point average of 3.0 must be maintained by all candidates for the Master of Fine Arts and Master of Arts.

### Undergraduate Admission

Admission to the Roski School of Fine Arts at the undergraduate level is granted through the USC Office of Admission. Freshman applicants applying by December 1 for the fall semester will receive priority consideration for admission to the university. The deadline for transfer applicants for the fall semester is February 1.

Undergraduate applicants must upload a portfolio of images and an artist statement at the school's Website. Specific requirements and additional information are available at [roski.usc.edu/undergrad](http://roski.usc.edu/undergrad) or email [finearts@usc.edu](mailto:finearts@usc.edu).

Students who have not been admitted to the Roski School of Fine Arts may complete a maximum of 20 units of fine arts course work at USC. No further course work may be taken until admitted. Students who are interested in becoming fine arts majors or minors should meet with the Roski School's advisers as soon as possible, preferably during their first semester taking art classes. Advisers can be contacted through the school's Student Services Office, Watt Hall 116, (213) 821-1290, for advisement and assistance.

### Graduate Admission

Applications for admission to the graduate programs are evaluated by the USC Office of Graduate Admission before being forwarded to the school. Students must be admitted by both the USC Graduate School and the Roski School of Fine Arts. The Graduate School's general admission requirements include official transcripts of all previous college and university work, and three letters of recommendation from instructors or persons able to comment on the applicant's creative work and/or scholarly potential.

Applicants to the MFA degree must upload a portfolio of images and an artist statement at the school's Website. Specific requirements and additional information are available at [roski.usc.edu/mfa](http://roski.usc.edu/mfa).

Applicants to the M.A. degree are encouraged to review program requirements at [roski.usc.edu/ma](http://roski.usc.edu/ma).

### Advisement

Academic advisement is provided to fine arts majors, minors and graduate students through the Student Services Office in Watt Hall 116, (213) 821-1290. All students who are interested in taking art courses are welcomed and encouraged to make an appointment for advisement as well. The staff advisers

provide information regarding academic life at the university, program requirements, policies and procedures to assist students with their degree completion. Majors are required to meet with advisers before registering each semester. Appointments may be scheduled at most times during the academic year.

### International Study Options

Fine arts majors may take advantage of art courses offered through study abroad programs in Canberra, Australia; Cape Town, South Africa; and Florence or Cortona, Italy. These options are described on page 71.

Please contact the USC Overseas Studies Office in CAS 104, (213) 740-3636, or [www.usc.edu/schools/college/overseas](http://www.usc.edu/schools/college/overseas) for complete information, program requirements and applications.

## Undergraduate Degrees

### Bachelor of Fine Arts

The BFA is a four-year studio intensive program in preparation for a career in the fine arts, design and/or related fields or pursuit of a master of fine arts degree. With few required courses or electives and a wide variety of media from which to choose, the BFA provides ample opportunity to explore and develop a strong personal vision in art.

Introductory courses focus on technique and conceptual context while building a solid grounding in art history and critical theory. Advanced students work on self-generated independent projects under the guidance and mentoring of individual faculty members. Emphasis in the last year is on the production of a professional quality portfolio of work.

#### Curriculum Requirements

The BFA requires a total of 128 units, including 96 units of fine art requirements.

In addition to the fine arts required courses, BFA students are encouraged to explore in greater depth an area of art in which they have an interest. Students should select electives based on their personal and professional goals and in consultation with academic

advisers. Electives are typically clustered in a particular field but may be spread across different areas.

REQUIRED COURSES		UNITS
FACS 150	Visual Culture and Literacy I	4
FACS 250	Visual Culture and Literacy II	4
FACS 350	Art Theory and Criticism	4
FACS 450x	Senior Seminar	4
FADN 102	Design Fundamentals	4
FADW 101	Introduction to Drawing: Studio Projects, Methods, Materials	4
FASC 106	Sculpture I	4
One course from the following:		
AHIS 363	Race, Gender and Sexuality in Contemporary Art	4
AHIS 370	Modern Art III: 1940 to the Present	4
PAS 371	Art in the Public Realm: Contemporary Issues	4

#### Fine Arts electives:

Select 24 additional units from any 100-299 studio courses, no "x" classes

Select 40 additional units from any 300-499 studio courses

Total units: 96

#### General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See pages 63 and 250 for more information.

### Bachelor of Arts, Art

The Bachelor of Arts program offers a more flexible and broad academic education than the bachelor of fine arts (BFA) degree while still providing a meaningful experience in the studio area that can be an asset in preparing for many art-related careers. The degree provides the student with the opportunity to double major or to combine an art major with a minor in various fields. Some possibilities for minors include communication, multimedia, education, business, film, animation and many other options.

#### Curriculum Requirements

The bachelor of arts (B.A.) requires a total of 128 units including 64 units of fine arts requirements.

In addition to the fine arts required courses, B.A. students should select electives based on their personal and professional goals and in consultation with academic advisers. Electives are typically clustered in a particular field but may be spread across different areas.

REQUIRED COURSES		UNITS
FACS 150	Visual Culture and Literacy I	4
FACS 250	Visual Culture and Literacy II	4
FACS 350	Art Theory and Criticism	4
FADN 102	Design Fundamentals	4
FADW 101	Introduction to Drawing: Studio Projects, Methods, Materials	4
FASC 106	Sculpture I	4

One course from the following:

AHIS 363	Race, Gender and Sexuality in Contemporary Art	4
AHIS 370	Modern Art III: 1940 to the Present	4
PAS 371	Art in the Public Realm: Contemporary Issues	4

*Fine Arts electives:*

Select 12 additional units from any 100-299 studio courses, no "x" classes

Select 24 additional units from the following: 300-499 studio. At least four units must be from one of the following classes: FACE 412, FADN 402, FADW 401, FAIN 410, FAIN 420, FAPH 409, FAPR 411, FAPT 405, FASC 406

Total units: 64

to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing, foreign language and diversity requirements, which together comprise the USC Core. See pages 63 and 250 for more information.

**General Education Requirements**

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need

## Minor Programs

**Minors in Fine Arts**

The Roski School of Fine Arts offers minors in fine arts as supplements to major fields of specialization in other departments and schools for students whose academic programs do not permit the opportunity to pursue one of the school's regular degree options. There are six intensive studio minors — in painting, drawing, photography, sculpture, two-dimensional studies, and digital media-based imaging — as well as interdisciplinary minors in communication design, 2-D art for games, 3-D animation and 3-D art for games. There is a separate application for fine arts minors available at [roski.usc.edu/minors](http://roski.usc.edu/minors).

Candidates for the minors in the Roski School of Fine Arts will be counseled by an academic adviser in the school.

*Minor in Communication Design*

The core of this minor is communication design. In addition to courses in design, visual literacy and digital imaging, this minor includes optional courses in business, communication, journalism and marketing, allowing students to translate their design foundation in ways that are directly relevant to their career paths. The total number of units required for the minor is 24.

REQUIRED COURSES (24 UNITS)		UNITS
FADN 102	Design Fundamentals	4

One lower division course (4 units) chosen from the following:

FACS 150	Visual Culture and Literacy I	4
FADN 202	Design II (corequisite: FADN 203)	4

FAIN 210	Introduction to Digital Photography	4
FAIN 220	Introduction to Video and Time-based Experimentation	4

Four upper division courses (16 units) chosen from the following:

ACCT 410x	Foundations of Accounting	4
BAEP 423	Management of Small Businesses	4
BAEP 451	The Management of New Enterprises	4
BAEP 454	The Entrepreneurial Business Plan	4
BUAD 307	Marketing Fundamentals	4
COMM 321	Communication in the Virtual Group	4
COMM 339	Communication Technology and Culture	4
COMM 340	The Culture of New Media	4
COMM 375	Business and Professional Communication	4
FADN 302	Design III	4
FADN 332ab	Typography	2, 2
FADN 333	New York Design Study Tour	2
FADN 402	Advanced Design Projects	4, max 12
FAIN 310	Digital Photo Studio	4
FAIN 315	Internet Studio: Online Experimentation and Expression	4
FAIN 320	Video Studio	4
FAIN 410	Advanced Digital Photo Studio	4, max 12
FAIN 420	Advanced Video Studio	4, max 12
JOUR 340	Introduction to Advertising	4
JOUR 342	Advertising Media and Analysis	4
JOUR 343	Advertising Design and Production	4

MKT 405	Advertising and Promotion Management	4
MKT 406	Practicum in Advertising and Promotion Design	4
MKT 450	Consumer Behavior and Marketing	4

*Minor in Digital Media-based Imaging*

This minor deals with art making using new technologies, including digital photography, digital video and computer imaging. Course work includes choice of classes in history of photography, digital media, visual literacy and computer imaging. The professional aspects of this minor assist students in developing careers in fine arts, communication, engineering, film, journalism and in any area where there is a need for flexible and creative imaging using digital media. The total number of units required for the minor is 28.

REQUIRED COURSES (28 UNITS)		UNITS
Lower division		
FACS 150	Visual Culture and Literacy I	4
FAIN 210	Introduction to Digital Photography	4
FAIN 220	Introduction to Video and Time-based Experimentation	4
FAPH 209	Photography	4

Three upper division courses (12 units) chosen from the following:

AHIS 373	History of Photography	4
AHIS 469	Critical Approaches to Photography	4
CTAN 451	History of Animation	2
FACS 350	Art Theory and Criticism	4
FAIN 310	Digital Photo Studio	4
FAIN 315	Internet Studio: Online Experimentation and Expression	4

FAIN 320	Video Studio	4
FAIN 410	Advanced Digital Photo Studio	4, max 12
FAIN 420	Advanced Video Studio	4, max 12

*Minor in Drawing*

Students enrolled in the minor in drawing will develop their creativity and technical drawing skills, as well as deepen their understanding of contemporary art. Foundation courses provide the fundamentals of spatial rendering, composition, figure drawing and visual expression. Advanced courses require more ambitious projects, personal direction, research and sustained focus. The minor is available to all USC students who wish to develop their abilities to communicate through visual means, or who wish to develop skills for conceptualization and problem solving. The minor in drawing can assist the students in art-related work, as well as creative pursuits such as printed works with images, games and animation. A total of 20 units are required for this minor.

REQUIRED COURSES (8 UNITS)		UNITS
FADW 101	Introduction to Drawing: Studio Projects, Methods, Materials	4
FADW 201	Intermediate Drawing	4
Optional extra lower-division course:		
FACS 150	Visual Culture and Literacy I	4

ELECTIVES		UNITS
Three upper division courses (12 units) chosen from the following:		
FADW 301	Advanced Drawing	4
FADW 331	Studies in Drawing and Painting	4, max 12
FADW 401	Topics in Advanced Drawing	4, max 12
FAPR 311	Printmaking	4
FAPR 411	Topics in Advanced Printmaking	4, max 12

*Minor in Painting*

Within both western and non-western traditions, painting has a long history as a site for aesthetic experience and cultural questioning. This minor allows students to immerse themselves in painting, as well as developing a grasp of the critical issues surrounding it. Foundation courses provide the fundamentals of color, composition, medium and drawing. Advanced courses require more ambitious projects, personal direction, research and sustained focus. Students majoring in many areas of the humanities may pursue this minor to augment their understanding of one of the key media in the arts. The minor is available to all USC students who wish to develop their painting skills. A total of 24 units are required for this minor.

REQUIRED COURSES (24 UNITS)		UNITS
Three lower division courses (12 units) chosen from the following:		
FACS 150	Visual Culture and Literacy I	4
FADW 101	Introduction to Drawing: Studio Projects, Methods, Materials	4
FAPT 105	Painting I	4
FAPT 205	Painting II	4

Three upper division courses (12 units) chosen from the following:		
FACS 350	Art Theory and Criticism	4
FADW 331	Studies in Drawing and Painting	4, max 12
FAPR 311	Printmaking	4
FAPR 411	Topics in Advanced Printmaking	4, max 12
FAPT 305	Advanced Painting	4
FAPT 405	Topics in Advanced Painting	4, max 12

*Minor in Photography*

The photography minor provides an in-depth experience in all aspects of photography. The well-equipped darkrooms allow individual hands-on exploration of black and white and color processes, camera types, historical and traditional printing methods, lighting and film technology. It also includes a foundation in photo theory and criticism. This minor is appropriate for students interested in an intense experiential exploration of the medium of photography. The total number of units required for the minor is 28.

REQUIRED COURSES (28 UNITS)		UNITS
Lower division courses (12 units)		
FACS 150	Visual Culture and Literacy I	4
FAIN 210	Introduction to Digital Photography	4
FAPH 209	Introduction to Photography	4

One upper division course (4 units) chosen from the following:		
AHIS 373	History of Photography	4
AHIS 469	Critical Approaches to Photography	4

Three upper division courses (12 units):		
FACS 350	Art Theory and Criticism	4
FAIN 310	Digital Photo Studio	4
FAIN 410	Advanced Digital Photo Studio	4, max 12
FAPH 309ab	Intermediate Photography	4-4
FAPH 409	Topics in Advanced Photography	4, max 12

*Minor in Sculpture*

This minor focuses on making, organizing and manipulating objects and their spatial relationships in a range of materials such as wood, fiberglass, clay, plaster, latex and metal. Course work includes choice of classes in sculpture, ceramics, visual literacy, public art, moldmaking, metal and casting. The three-dimensional skills taught in this minor intersect with many other disciplines including architecture, cinematic arts, special effects, engineering design, urban planning and any other areas where skills in maquette and model building are relevant. The total number of units required for the minor is 28.

REQUIRED COURSES (28 UNITS)		UNITS
FACS 150	Visual Culture and Literacy I	4
FASC 106	Sculpture I	4

Eight lower division units chosen from the following:		
FACE 112	Ceramics	4
FACE 212	Wheel Throwing	2
FACE 213	Clay and Glazes	2
FACE 214	3-D/Actual and Virtual	4
FADW 101	Introduction to Drawing: Studio Projects, Methods, Materials	4
FASC 136	Modeling and Mold Making	2
FASC 206	Sculpture II	4
FASC 236	Metal	2
FASC 246	Construction Techniques	2

Three upper division courses (12 units) chosen from the following:		
FACE 312	Advanced Ceramics	4
FACE 412	Topics in Advanced Ceramics	4, max 12
FASC 306	Advanced Sculpture	4
FASC 366	Art and Site	4
FASC 406	Topics in Advanced Sculpture	4, max 12
FASC 436	Art and Technology	4
PAS 371	Art in the Public Realm: Contemporary Issues	4

*Minor in Two-Dimensional Studies*

This minor is designed for students who wish to augment their understanding of art in general in two-dimensional areas, rather than complete a minor that focuses on one medium. This minor provides a broad scope of courses in 2-D media and studies. This minor is open to any USC student, especially those interested in animation to sharpen their drawing, color and compositional skills. Students interested in the vast varieties of digital visual communication can develop better color and compositional skills. Total number of units required is 28.

FAPT 205	Painting II	4	CTAN 451	History of Animation	2	CTAN 330	Animation Fundamentals	2
Three upper division courses (12 units) chosen from the following:			CTAN 452	Introduction to 3-D Computer Animation	2, max 4	CTAN 451	History of Animation	2
FADW 301	Advanced Drawing	4	CTIN 484L	Intermediate Game Development	2	CTAN 452	Introduction to 3-D Computer Animation	2, max 4
FADW 331	Studies in Drawing and Painting	4, max 12	CTIN 489	Intermediate Game Design Workshop	2	CTIN 483	Introduction to Game Development	4
FADW 401	Topics in Advanced Drawing	4, max 12	CTIN 493L	Advanced Game Project II	2, max 4	CTIN 488*	Game Design Workshop	4
FAIN 310	Digital Photo Studio	4	FACS 150	Visual Culture and Literacy I	4	CTIN 489	Intermediate Game Design Workshop	2
FAPR 311	Printmaking	4	FADN 203	Digital Tools for Design	2	CTIN 493L	Advanced Game Project II	2, max 4
FAPR 411	Topics in Advanced Printmaking	4, max 12	FADW 301	Advanced Drawing	4	FACS 150	Visual Culture and Literacy I	4
FAPT 305	Advanced Painting	4	FADW 331	Studies in Drawing and Painting	4, max 12	FACS 350	Art Theory and Criticism	4
FAPT 405	Topics in Advanced Painting	4, max 12	FAIN 210	Introduction to Digital Photography	4	FAIN 210	Introduction to Digital Photography	4
			FAPT 105	Painting I	4	FAIN 220	Introduction to Video and Time-based Experimentation	4
			ITP 280	Video Game Production	4	FAIN 315	Internet Studio: Online Experimentation and Expression	4
			Note: A minimum of 28 units is required for this minor.			FAIN 330	Ideas in Intermedia	4
			<i>Minor in 3-D Art for Games</i>			ITP 280	Video Game Production	4
			The focus of the 3-D art for games minor is a trans-disciplinary approach that incorporates the creative, technological and team-based communication skills necessary to develop 3-D art skills for video games. It includes a choice of courses from fine arts, computer science, information technology, interactive media and animation and digital arts. In preparation for the transition from the theoretical assignment to professional practice, students will present game prototypes to outside professionals at "Demo Days" at the end of each semester. The minimum number of units is 28.			*Can be taken as elective if not taken as upper-division requirement.		
			<i>Minor in 3-D Animation</i>			Note: A minimum of 28 units is required for this minor.		
			The 3-D animation minor merges theoretical concepts and practical skills to prepare students for a career in their major field of work with incorporation of 3-D animation and interactive technologies. Through integration of three major disciplines (cinema, fine arts and information technology), students gain a solid foundation in a wide range of important industry and academic skills. Two concentrations are available depending on professional goals and career or industry objectives. Refer to the Viterbi School of Engineering's Information Technology program, page 671, for course requirements.					
REQUIRED LOWER DIVISION COURSES (12 UNITS)		UNITS	REQUIRED LOWER DIVISION COURSES (13 UNITS)		UNITS			
FADN 102	Design Fundamentals	4	CSCI 281	Pipelines for Games and Interactives	3			
FADW 101	Introduction to Drawing: Studio Projects, Methods, Materials	4	FACE 214	3-D/Actual and Virtual Sculpture I	4			
FADW 201	Intermediate Drawing	4	FASC 106	Sculpture I	4			
			ITP 215x	3D Modeling, Animation and Special Effects	2			

## Graduate Degrees

### Master of Fine Arts

A two-year program administered in collaboration with the Graduate School, the Master of Fine Arts is a professional degree in the practice of art preparing students to pursue careers as professional artists. With an influential and innovative faculty and expansive facilities, the MFA program is one of the most ambitious, energetic and forward-thinking MFA programs in the United States. In addition to close, constant interaction with the permanent faculty, students participate in regular seminars, lectures, discussions, and studio visits with leading artists, critics, curators and theorists from around the world. The school's immersion in the contemporary art community is a critical component of the MFA program.

The opportunity to gain experience as a teaching assistant is available on a competitive basis. All incoming students, regardless of country of citizenship, are considered for departmental funding and teaching assistantships; a separate application is not required.

#### Program Requirements

At least 48 units are required for the Master of Fine Arts, to be distributed as follows: FA 515 Visiting Artist Forum, 6 units; FA 520 Individual Studies, max 16 units; FA 555 Seminar in Art Theory and Criticism, 8 units; FA 550 Seminar: Contemporary Issues, 4 units; FA 551 Fine Art and Interdisciplinary Studies, 8 units; 400 or 500-level electives outside of Fine Arts, 4 units; 594abz Master's Thesis, 4 units.

Master of Fine Arts students are evaluated by faculty during reviews held near the end of each semester. Before a student is recommended for the Master of Fine Arts, a comprehensive review of past work and professional goals is held. An exhibition of work at the end of the course of study and a written thesis, documented with visual material, complete the Master of Fine Arts program. A minimum grade point average of 3.0 on all graduate work is required for the Master of Fine Arts degree.

### Master of Arts, Art and Curatorial Practices in the Public Sphere

The Master of Arts, Art and Curatorial Practices in the Public Sphere is a two-year master's degree administered by the Roski School of Fine Arts, in collaboration with the Graduate School, preparing students for careers as curators, organizers, critics and scholars. The program is an interdisciplinary research laboratory that focuses on the role of contemporary art and curatorial practices in relation to public space and the public sphere. The course of study encompasses seminars on curatorial practice/organizational methods; social, urban and media theory; critical writing; exhibition histories; and selected topics in art and architectural history. Students examine how artists, curators, organizers, architects and other cultural producers engage public space and analyze the cultural conditions of the public sphere. The program features a curatorial practicum in which students collaborate on the development and organization of a city-space exhibition project. Students are also responsible for the research and writing of a thesis that develops innovative concepts and new scholarship on the interrelationships between art, public space and the public sphere.

#### Admission Requirements

Requirements for admission: (1) a Bachelor of Arts or Bachelor of Fine Arts degree, or equivalent, from an accredited school; (2) a minimum 3.0 overall GPA; (3) three letters of recommendation; (4) two writing samples (one academic paper and the admission essay). The GRE General Test is required. International applicants are required to take the Test of English as a Foreign Language (TOEFL).

#### Thesis Requirements

A master's thesis committee comprises three members: a primary reader, a secondary reader and the director of the program. The thesis committee is established and contingent upon satisfactory completion of the second semester's course work. Advancement to candidacy is determined by the director of the program, in consultation with other faculty.

#### Curatorial Practicum Requirement

All students participate in the group curatorial practicum course for three consecutive terms (which complements the thesis requirement).

#### Program Requirements

A minimum of 33 units is required, taken during a consecutive two-year period, distributed as follows:

FIRST YEAR, FALL		UNITS
PAS 549	Methodologies of Art Writing	3
PAS 561	Curatorial/Organizational Models	2
PAS 571	Histories of Art in the Public Sphere	3
		8
FIRST YEAR, SPRING		UNITS
PAS 555a	Curatorial Practicum	2
PAS 572	Contemporary Art in the Public Sphere	3
PAS 581	Critical Conversations	3
		8
SECOND YEAR, FALL		UNITS
PAS 555b	Curatorial Practicum	2
PAS 585	Theorizing the Public Realm	3
PAS 594a	Master's Thesis	2
Elective		2
		9

SECOND YEAR, SPRING		UNITS
PAS 555c	Curatorial Practicum	2
PAS 591	Field Internship Experience	1
PAS 594b	Master's Thesis	2
Elective		3
		8

### Elective Requirement

Candidates for the Master of Arts, Art and Curatorial Practices in the Public Sphere must complete a minimum of 5 units of graduate level electives, chosen from either the Master of Arts, Art and Curatorial Practices in the Public Sphere program, or another relevant area in the university (with departmental approval).

## Dual Degree

### Master of Arts, Art and Curatorial Practices in the Public Sphere/Master of Planning

The Master of Arts, Art and Curatorial Practices in the Public Sphere/Master of Planning dual degree program offers an unusually rich opportunity for students interested in developing a new knowledge base to become successful professionals working in the arena of organizing art projects in urban public space, planning and community development. Los Angeles and the facilities at USC provide a unique learning laboratory to educate a more competitive professional with a better understanding of both the administration of public art and issues of urban planning.

Students must complete the following requirements in this program: 70 units, including 28 units in the Master of Arts, Art and Curatorial Practices in the Public Sphere program, 22 in policy, planning, and development, and 20 in a field of study with no more than 8 units taken from other USC programs.

MASTER OF ARTS, ART AND CURATORIAL PRACTICES IN THE PUBLIC SPHERE (28 UNITS)		UNITS
PAS 549	Methodologies of Art Writing	3
PAS 555abc	Curatorial Practicum	2-2-2
PAS 561	Curatorial/Organizational Models	2
PAS 571	Histories of Art in the Public Sphere	3
PAS 572	Contemporary Art in the Public Sphere	3
PAS 581	Critical Conversations	3

PAS 585	Theorizing the Public Realm	3
PAS 591	Field Internship Experience	1
PAS 594ab	Master's Thesis	2-2

POLICY, PLANNING, AND DEVELOPMENT (22 UNITS)		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 529	Legal Environment of Planning	2
PPD 531L	Planning Studio	4
PPD 533	Planning History and Urban Form	2
PPD 627*	Design Skills for Urban Planners	4

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

\*PPD 627 is the methodology course for the Preservation and Design of the Built Environment concentration. Students who choose to do a concentration other than Preservation and Design of the Built Environment need to take the respective methodology course.

Dual degree students, like all other MPI students, must take a comprehensive examination and fulfill the internship requirement.

### Field of Study (20 units)

No more than 8 units from outside the Roski School of Fine Arts and the USC Price School of Public Policy. The MPI program requires students to declare their concentration during the fall semester prior to taking the comprehensive examination in the spring semester. Students are required to complete the gateway course and methodology course related to their concentration as part of their preparation for their comprehensive examination. The student's concentration must contain a 4-unit methodology course, a 4-unit gateway course and 8 other units directly concerned with the subject matter of the concentration.

### Capstone Projects

Students must complete a master's thesis or final thesis project through the Roski School of Fine Arts and the MPI comprehensive examination through the USC Price School of Public Policy.

### Internship

All students must complete 400 hours of internship through the USC Price School of Public Policy. This internship may be partially or completely fulfilled through prior professional experience.

## Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

### FINE ARTS (FA)

**FA 140x A Cultural Guide to Los Angeles (2, FaSp)** An experiential and critical survey of the cultural phenomena that make up Los Angeles: dance, music, theater, film; emphasis on visual arts. Not available for major credit to fine arts majors. Graded CR/NC.

**FA 207abx Two-Dimensional Art Workshop (a: 2, max 8, Fa; b: 2, max 8, FaSp)** *a:* Studio practice to develop standards of judgment and appreciation of the visual arts. Not available for credit to studio majors. *b:* Continuation of *a*.

**FA 208abx Three-Dimensional Art Workshop (a: 2, max 8, FaSp; b: 2, max 8, FaSp)** *a:* Studio practice to develop standards of judgment and appreciation of the visual arts. Not available for credit to studio majors. *b:* Continuation of *a*.

**FA 300 Professional Practices (2, FaSp)** Instruction on producing written and visual documentation of art/design work, proposals, statements, and portfolios; applications for art/design employment opportunities, grants, research projects, and graduate school. Open only to sophomores, juniors and seniors.

**FA 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**FA 418 Independent Studies in Studio Arts (1-4, max 10, FaSpSm)** Independent research of specific topics under the direction of a faculty member. Administrative and faculty approval required. *Recommended preparation:* appropriate 300-level course work.

**FA 419 Professional Internship in the Arts (2, max 4, FaSpSm)** An experiential/academic opportunity in a museum, gallery, community cultural center, or related facility. Lectures, seminars, written analysis, and working internship. Open to upper division fine arts majors.

**FA 490x Directed Research (2-8, max 8, FaSpSm)** Individual research and readings. Not available for graduate credit.

**FA 499 Special Topics (2-4, max 8, FaSpSm)** Comprehensive exploration of particular aspects of visual art.

**FA 515 Visiting Artist Forum (1, max 6, FaSpSm)** Lecture and discussion course in the professional practice of art featuring formal presentations by visiting artists.

**FA 520 Individual Studies (1-5, max 16, FaSpSm)** Investigation of creative problems through various media. Course may be repeated; maximum number of units to be determined by adviser.

**FA 550 Seminar: Contemporary Issues (1, max 4, FaSp)** Study of issues relative to current directions in the visual arts; analysis and implications of forces contributing to conceptual development.

**FA 551 Fine Art and Interdisciplinary Studies (4, max 12, Fa)** Issues and theories of contemporary art in relation to philosophy, history, literature, music, theatre, film, culture, politics, science, psychology and other disciplines.

**FA 555 Seminar in Art Theory and Criticism (4, max 8, 5m)** An intensive seminar taught by well-known visiting critics, writers and artists addressing the deconstruction of a variety of theories in the humanities, including art, film, literature, and philosophy.

**FA 560 Studies in Two-Dimensional Media (1-8, max 22)** Investigation of creative problems through two-dimensional media. Course may be repeated; maximum number of units to be determined by adviser.

**FA 570 Studies in Three-Dimensional Media (1-8, max 22)** Investigation of creative problems through three-dimensional media. Course may be repeated; maximum number of units to be determined by adviser.

**FA 580 Studies in Intermedia (1-8, max 22)** Investigation of creative problems through intermedia. Course may be repeated; maximum number of units to be determined by adviser.

**FA 590 Directed Research (1-12, FaSpSm)** Research leading to the graduate degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. *Prerequisite:* departmental approval, approval by Dean of School of Fine Arts or formal contract for research project.

**FA 594abz Master's Thesis (2-2-0, FaSpSm)** Credit on acceptance of thesis. Graded IP/CR/NC.

### CERAMICS (FACE)

**FACE 112 Ceramics (4, FaSpSm)** Practical and theoretical exploration of the nature of surface, form, volume and mass as fundamental elements of clay sculpture and the ceramic object. (Duplicates credit in former FA 112.)

**FACE 212 Wheel Throwing (2, FaSp)** An introductory course using wheel throwing techniques for ceramics to explore a variety of forms through three-dimensional exercises. (Duplicates credit in former FA 212.)

**FACE 213 Clay and Glazes (2, Sp)** Provides a foundation in clay and glaze materials as they relate to making ceramic art. (Duplicates credit in former FA 213.) *Prerequisite:* FACE 112.

**FACE 214 3-D/Actual and Virtual (4)** A conceptually inventive introduction to clay and computer modeling. An investigation of the relationship between actual and virtual objects and how it affects our perception. (Duplicates credit in former FA 214.)

**FACE 312 Advanced Ceramics (4, FaSpSm)** Directed examination of aesthetic concepts and investigation into personal ideas as they relate to the development of a creative visual language in ceramics. (Duplicates credit in former FA 312.) *Prerequisite:* FACE 112.

**FACE 412 Topics in Advanced Ceramics (4, max 12, FaSpSm)** Continued directed examination of aesthetic concepts and investigation into personal ideas as they relate to the development of a creative visual language in ceramics. (Duplicates credit in former FA 412.) *Prerequisite:* FACE 312.

### CRITICAL STUDIES (FACS)

**FACS 150 Visual Culture and Literacy I (4, FaSp)** Introduction to modern and contemporary visual culture with emphasis on the major aesthetic theories and practices of the past 150 years. (Duplicates credit in former FA 150.)

**FACS 250 Visual Culture and Literacy II (4, FaSp)** Critical examination of the key developments and theoretical discourses of 20th century visual culture. (Duplicates credit in former FA 250.) *Recommended preparation:* FACS 150.

**FACS 350 Art Theory and Criticism (4, FaSp)** An intellectual framework for the practice of art making; the historical context for current ideas. (Duplicates credit in former FA 350.)

**FACS 450x Senior Seminar (4, FaSp)** Contemporary professional issues facing the studio artist; current directions in the visual arts; forces and attitudes affecting the practicing artist in our society. Available for credit to art and fine arts majors only. (Duplicates credit in former FA 450x.)

## DESIGN (FADN)

**FADN 102 Design Fundamentals (4, FaSp)** Introduction to the basic elements and processes of visual communication and design. Instruction includes studio projects, lectures and readings. Various media used. (Duplicates credit in former FA 102.)

**FADN 202 Design II (4, FaSp)** Exploration of essential elements of traditional and digital design, including color and image-text integration, editing information, typography and sequencing. (Duplicates credit in former FA 202.) *Prerequisite:* FADN 102; *corequisite:* FADN 203.

**FADN 203 Digital Tools for Design (2, FaSp)** Exploration of the processes of germination, ideation and application/execution in design integrated with computer usage. (Duplicates credit in former FA 203.) *Corequisite:* FADN 202.

**FADN 302 Design III (4, FaSp)** Advanced exploration of typography and image-text integration, including collaborative projects, pre-press and proofing techniques, narrative concepts and information architecture. (Duplicates credit in former FA 302.) *Prerequisite:* FADN 202.

**FADN 332ab Typography (2-2, FaSp)** *a:* The study of visual communication through the use of letterforms from historical tradition to contemporary experimental rebellion. *b:* Continuation of *a*. (Duplicates credit in former FA 332ab.)

**FADN 333 New York Design Study Tour (2, Sp)** Historical and contemporary aspects of the New York design world, including a one-week trip to New York City to visit design firms, studios and museums. Airfare and accommodations extra. By application only. (Duplicates credit in former FA 333.)

**FADN 402 Advanced Design Projects (4, max 12, FaSp)** Advanced information design within a flexible curriculum. Emphasis on team-oriented projects. (Duplicates credit in former FA 402.) *Prerequisite:* FADN 302.

**FADN 432 Special Projects in Design (2, max 6, FaSp)** Students work on projects for outside clients, and receive instruction in professional practices, advanced design techniques, and sophisticated technology. By invitation or portfolio review only. Only open to upper division students. (Duplicates credit in former FA 432.) *Prerequisite:* FADN 302.

## DRAWING (FADW)

**FADW 101 Introduction to Drawing: Studio Projects, Methods, Materials (4, FaSpSm)** An introduction to drawing, both skill and perception oriented, as the basic tool for all the visual arts. (Duplicates credit in former FA 101a.)

**FADW 201 Intermediate Drawing (4, FaSpSm)** Drawing methods and concepts, with emphasis on observing and rendering the human form and anatomy. Continued acquisition of skills, with compositional, gestural, and interpretive elements. (Duplicates credit in the former FA 101b.) *Prerequisite:* FADW 101a.

**FADW 301 Advanced Drawing (4, FaSpSm)** Directed examination of personal approaches in drawing; emphasis on making visual and artistic decisions and developing an appropriate attitude towards individual expression. (Duplicates credit in former FA 301.) *Prerequisite:* FADW 201.

**FADW 331 Studies in Drawing and Painting (4, max 12, FaSpSm)** A studio examination of rotating topics in drawing/painting, either media-based or content-driven, with individual and collaborative projects; topics change each semester. By invitation only or request by portfolio submission. Open only to sophomores, juniors and seniors. (Duplicates credit in the former FA 331.) *Recommended preparation:* FADW 301 or FAPT 305.

**FADW 401 Topics in Advanced Drawing (4, max 12, FaSpSm)** Continued directed examination of personal approaches in drawing, emphasis on making visual and artistic decisions and developing an appropriate attitude toward visual expression. (Duplicates credit in former FA 401.) *Prerequisite:* FADW 301.

## INTERMEDIA (FAIN)

**FAIN 210 Introduction to Digital Photography (4, FaSp)** An introductory course exploring the processes and practices of digital capture, imaging and printing, from web-based image posting to large-scale printing. (Duplicates credit in former FA 210.)

**FAIN 220 Introduction to Video and Time-based Experimentation (4, FaSp)** An introductory course exploring contemporary processes and practices of video experimentation including the camera, desktop production, and editing. Experimentation with multiple modes of execution, presentation, and distribution. (Duplicates credit in former FA 215 and former FA 220.)

**FAIN 310 Digital Photo Studio (4, FaSp)** A technically and conceptually intensive studio in digital 2-D imaging/photography. (Duplicates credit in former FA 310.) *Prerequisite:* FAIN 210.

**FAIN 315 Internet Studio: Online Experimentation and Expression (4, FaSp)** A technically and conceptually intensive studio exploring contemporary processes and practices of Internet art and online expression.

**FAIN 320 Video Studio (4, FaSpSm)** An intensive video studio in the understanding and method of time-based, narrative and non-narrative art. (Duplicates credit in former FA 320.) *Prerequisite:* FAIN 220.

**FAIN 330 Ideas in Intermedia (4, max 8, FaSp)** An examination of the impact of digital media on contemporary culture, with attention to a particular, changing topic each semester. (Duplicates credit in former FA 330.)

**FAIN 410 Advanced Digital Photo Studio (4, max 12, FaSp)** Intensive open studio environment for individually-directed student art projects in digital media, with an emphasis on 2-D photography. (Duplicates credit in former FA 410.) *Prerequisite:* FAIN 310.

**FAIN 420 Advanced Video Studio (4, max 12, FaSp)** An intensive open studio environment for individually-directed student art projects in digital media, with an emphasis on video. (Duplicates credit in former FA 420.) *Prerequisite:* FAIN 320.

## PHOTOGRAPHY (FAPH)

**FAPH 209 Introduction to Photography (4, FaSp)** Introduction to the practice of photographic image-making within fine arts. Emphasis on developing technical skills in relation to personal vision. Work in black and white. (Duplicates credit in the former FA 209a.)

**FAPH 309ab Intermediate Photography (4-4, FaSp)** Instruction in photographic image-making within fine art; development of technical skills in relation to personal vision; working with color, medium-format cameras, and studio lighting. *a:* Duplicates credit in the former FA 209*b*; *b:* Duplicates credit in the former FA 309. *Prerequisite:* FAPH 209.

**FAPH 409 Topics in Advanced Photography (4, max 12, FaSp)** In-depth exploration of photographic and artistic concepts as they apply to the articulation of personal work. (Duplicates credit in former FA 409.) *Prerequisite:* FAPH 309*b*.

#### PRINTMAKING (FAPR)

**FAPR 311 Printmaking (4, FaSp)** Introductory course in various printmaking techniques; necessary skills and inherent expressive qualities of different printmaking methods are explored. (Duplicates credit in former FA 311.)

**FAPR 411 Topics in Advanced Printmaking (4, max 12, FaSp)** Directed examination of specific printmaking media in relation to personal aesthetic goals and expressive concepts. (Duplicates credit in former FA 411.) *Prerequisite:* FAPR 311.

#### PAINTING (FAPT)

**FAPT 105 Painting I (4, FaSpSm)** Practical introduction to oil and acrylic pigments, painting equipment, processes, and media. Also, primary experience in: color, composition and perception through representational and abstract painting. (Duplicates credit in former FA 105.)

**FAPT 205 Painting II (4, FaSpSm)** Continuation of practical and theoretical skills introduced in Painting I. Color in personal expression, perception, and content; cultural subjects/objects and symbols signifying a personal language. (Duplicates credit in the former FA 205*a*.) *Prerequisite:* FAPT 105.

**FAPT 305 Advanced Painting (4, FaSpSm)** Directed examination of aesthetic concepts; investigation into personal ideas related to the development of a creative visual language in painting. (Duplicates credit in former FA 305.) *Prerequisite:* FAPT 205.

**FAPT 331 Studies in Drawing and Painting (4, max 12, FaSpSm)** (Enroll in FADW 331)

**FAPT 405 Topics in Advanced Painting (4, max 12, FaSpSm)** Directed painting with continued emphasis on personal choices regarding appropriation of conceptual images and arrangement, material processes, scale, number of paintings. Ongoing critical response to painting. (Duplicates credit in former FA 405.) *Prerequisite:* FAPT 305.

#### SCULPTURE (FASC)

**FASC 106 Sculpture I (4, FaSp)** Practical and theoretical introduction to sculpture as dimensional manipulation. Primary exploration of form, mass, gravity, surface, structure and associative recognition in three-dimensional art. (Duplicates credit in former FA 106.)

**FASC 136 Modeling and Mold Making (2, FaSp)** Introduction to plaster mold making using clay and wax for both ceramics and sculpture. Exploration of casting materials. (Duplicates credit in former FA 136.)

**FASC 206 Sculpture II (4, FaSp)** Continued examination of the concepts of three-dimensional art: interrelation of material and image, public, human and intimate scale. (Duplicates credit in former FA 206.) *Prerequisite:* FASC 106.

**FASC 236 Metal (2, FaSp)** Introduction to metal in fine art. Emphasis on technical proficiencies and effective solutions working in a variety of metals. (Duplicates credit in former FA 236.) *Recommended preparation:* FASC 106.

**FASC 246 Construction Techniques (2)** Exploration of art fabrication and the techniques and philosophies of working with a variety of materials. (Duplicates credit in former FA 246.) *Recommended preparation:* FASC 106.

**FASC 306 Advanced Sculpture (4, FaSp)** Directed examination of three-dimensional aesthetic concepts; development of an individual creative vision. (Duplicates credit in former FA 306.) *Prerequisite:* FASC 206.

**FASC 334 Space/Motion/Site: Investigating Performance and Installation (2)** Exploration of performance and installation art, including historical influences and integration of multimedia and new technologies. (Duplicates credit in former FA 334.)

**FASC 335 New Genres: Experimental Practices in Contemporary Art (4)** Ideas in New Genres, topic changes each semester. (Duplicates credit in former FA 335.)

**FASC 366 Art and Site (4)** Exploration focusing on site as a major component of artwork in both content and form, emphasizing multidimensional work in relation to context, material and intent. (Duplicates credit in former FA 366.) *Prerequisite:* FASC 106.

**FASC 406 Topics in Advanced Sculpture (4, max 12, FaSp)** Individual direction of the study of aesthetic issues in sculpture; investigation of an individual creative vision. (Duplicates credit in former FA 406.) *Prerequisite:* FASC 306.

**FASC 436 Art and Technology (4, FaSp)** An interdisciplinary course between art and engineering that addresses creative thinking in the manipulation of media and the communication of ideas. (Duplicates credit in former FA 436.)

#### PUBLIC ART STUDIES (PAS)

**PAS 371 Art in the Public Realm: Contemporary Issues (4, FaSp)** Critical frameworks and theoretical perspectives of contemporary public art issues explored through case studies and discussions with artists, architects, and designers engaging the public realm.

**PAS 400 New Models of Art in City-Space (4)** A focused examination of innovative processes utilized by contemporary local, national and international artists working in the public/social spaces of cities.

**PAS 499 Special Topics (2-4, max 8, FaSp)** Comprehensive exploration of particular aspects of public art.

**PAS 549 Methodologies of Art Writing (3, Fa)** Writing methods on art practices in the public sphere and public space, by curators, organizers, critics, scholars and artists.

**PAS 550 Social Space, Publics and Counter-Publics (1)** Seminar on interconnections between art, social space, media culture, in relation to notions of audience, community, and publics.

**PAS 555abc Curatorial Practicum (a: 2, Sp; b: 2, Fa; c: 2, Sp)** Students collaborate as a group for three terms to conceptualize and organize an exhibition project in an urban public space.

**PAS 561 Curatorial/Organizational Models (2, Fa)** Overview of strategies utilized by art organizations, curators, museums and non-profit/alternative spaces to conceptualize, develop, and organize art projects in the public realm.

**PAS 571 Histories of Art in the Public Sphere (3, Fa)** Topics in the history of the avant-garde in relation to public space and the public sphere, focusing on critical moments during the 20th Century.

**PAS 572 Contemporary Art in the Public Sphere (3, Sp)** Thematic investigation of artists who engage social space/the public realm, emphasizing practices and critical issues in contemporary art from the 1970s to the present.

**PAS 581 Critical Conversations (3, Sp)** A series of conversations with visiting artists, curators, organizers, critics, architects and theorists on seminal issues regarding the public sphere and public space.

**PAS 582 Seminar: Contemporary Issues (3)** Thematic seminar on the most recent developments of art in public space, and analysis of debates regarding the theorization of public space/the public sphere. Graded CR/NC.

**PAS 585 Theorizing the Public Realm (3, Fa)** Interdisciplinary exploration of theories of public space and the public domain, from the 19th century to the present.

**PAS 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PAS 591 Field Internship Experience (1, max 2, FaSpSm)** Supervised internship in an art institution or an art agency, or with an independent curator or artist, on projects and research specific to public space. Graded CR/NC. *Recommended preparation:* completion of first year of courses.

**PAS 594abz Master's Thesis (a: 2, Fa; b: 2, Sp; z: 0, FaSpSm)** Credit on acceptance of thesis. Graded IP/CR/NC.

**PAS 599 Special Topics (2-4, max 8)**

---

# USC Davis School of Gerontology

*USC Davis professor Valter Longo, left, brought a group of students to his hometown of Genoa, Italy, to study the relationship between healthy aging and lifestyle — especially food choices. “We would laugh at the irony: one minute in class, we were learning about the benefits of caloric restriction, and the next minute, we were biting into the best pesto gnocchi in the world!” said graduate student Elaine Martini.*

**T**he USC Davis School of Gerontology explores all aspects of human development and aging. Course work and research opportunities in biology, psychology, sociology, policy and aging services make up the breadth of its multidisciplinary curriculum.

Founded in 1975, USC Davis is not only the nation’s premiere school of gerontology, it is also the first. Named in honor of Leonard Davis, a philanthropist and businessman who pioneered insurance plans for the elderly through his involvement in AARP and his own company Colonial Penn Life Insurance, the school continues to provide ground-breaking solutions to issues facing an aging population.

USC Davis is committed to providing students with a broad theoretical understanding of lifespan development as well as dynamic post-graduate career placement. Students on all levels often enroll in semester-long internship programs. Working with our internship director, students can apply their gerontological knowledge to an array of industries such as health, medicine, business, finance, policy, direct services, program development, counseling and many other fields.

USC Davis School’s Bachelor of Science degrees can be pursued with a health science, a social science or a global emphasis. The school also offers four master’s degrees, nine dual master’s programs, a graduate certificate, and an esteemed Ph.D. program in gerontology.

The school’s research and services arm is the Ethel Percy Andrus Gerontology Center. To date the ever-expanding center now houses the USC Biology of Aging Program, the California Center for Long Term Care Integration, the Fall Prevention Center of Excellence, the Long Beach Longitudinal Study, the Longitudinal Study of Generations, the Society for the Study of Social Biology, and the USC/UCLA Center on Biodemography and Population Health.

#### Administration

Pinchas Cohen, M.D., *Dean and Executive Director of the Ethel Percy Andrus Gerontology Center*

Bob Knight, Ph.D., *Associate Dean*

Maria Henke, M.A., *Assistant Dean*

#### Faculty

*William and Sylvia Kugel Dean's Chair in Gerontology:* Pinchas Cohen, M.D.

*AARP University Chair in Gerontology:* Eileen Crimmins, Ph.D.\*

*ARCO/William F. Kieschnick Chair in the Neurobiology of Aging:* Caleb E. Finch, Ph.D.

*James E. Birren Chair in Gerontology:* Kelvin J.A. Davies, Ph.D., D.Sc.

*The Golden Age Association/Frances Wu Chair in Chinese Elderly:* Iris Chi, Ph.D. (*Social Work*)

*Edna M. Jones Chair in Gerontology:* Valter D. Longo, Ph.D.

*Rita and Edward Polusky Chair in Education and Aging:* Elizabeth M. Zelinski, Ph.D.\*

*UPS Foundation Chair in Gerontology:* Jon Pynoos, Ph.D.\*

*Merle H. Bensinger Professor of Gerontology:* Bob G. Knight, Ph.D.

*Mary Pickford Foundation Professor of Gerontology:* Kathleen H. Wilber, Ph.D.\*

*Albert L. and Madelyne G. Hanson Family Trust Assistant Professor:* Susan H. Enguidanos, Ph.D.

*Professors:* Kathleen Chambers, Ph.D. (*Psychology*); Margaret Gatz, Ph.D. (*Psychology*); Martin Levine, Ph.D. (*Law, Psychiatry and the Behavioral Sciences*); Mara Mather, Ph.D.; John J. McArdle, Ph.D. (*Psychology*); Michal Mor-Barak, DSW (*Social Work*); Roseann Mulligan, DDS (*Dentistry*); Robert C. Myrtle, DPA (*Public Policy*); Mike Nichol, Ph.D. (*Pharmacy and Public Policy*); Victor Regnier, M.Arch. (*Architecture*); Edward L. Schneider, M.D.; Lon Schneider, M.D. (*Psychiatry and Neurology*); Merrill Silverstein, Ph.D.; John Tower, Ph.D. (*Biological Sciences*); Bradley R. Williams, Pharm.D. (*Clinical Pharmacy*)

*Associate Professors:* Maria Aranda, Ph.D. (*Social Work*); Loren G. Lipson, M.D. (*Medicine*);

Jeffrey McCombs, Ph.D. (*Pharmacy*); Christian Pike, Ph.D.; John P. Walsh, Ph.D.\*

*Assistant Professors:* Cleopatra Abdou, Ph.D.; Sean Curran, Ph.D.; Susan Enguidanos, Ph.D.; Tara Lynn Gruenewald, Ph.D.; Ana Marie Yamada, Ph.D. (*Social Work*)

*Research Professors:* Todd Morgan, Ph.D.; Albert Rizzo III, Ph.D.

*Research Associate Professors:* Gennady Ermak, Ph.D.; Roseann Giarrusso, Ph.D.; Jung Ki Kim, Ph.D.

*Research Assistant Professors:* Garnik K. Akopian, M.D., Ph.D.; Donna Benton, Ph.D.; Thomas Parsons, Ph.D.

*Adjunct Professors:* Neal Cutler, Ph.D.; Fernando Torres-Gil, Ph.D.\*

*Adjunct Associate Professors:* Joanna Davies, Ph.D.; Monika White, Ph.D.

*Adjunct Research Professor:* Larry Rubenstein, Ph.D.

*Adjunct Research Assistant Professor:* Tracy Armstrong, Ph.D.

*Adjunct Clinical Professor:* Robert M. Tager, M.D.

*Clinical Professor:* Anne Katz, Ph.D.

*Clinical Associate Professors:* Raquel D. Arias, M.D.; Michael Gilewski, Ph.D.; Carl Renold, Ph.D.; Debra Sheets, Ph.D.

*Clinical Assistant Professors:* Aaron Hagedorn, Ph.D.; Freddi Segal-Gidan, Ph.D.

*Emeritus Professors:* Vern Bengtson, Ph.D.; James E. Birren, Ph.D.; Gerald A. Larue, Ph.D.

*Emeritus Associate Professor:* Phoebe Liebig, Ph.D.

\*Recipient of university-wide or college teaching award.

#### Programs

The Davis School of Gerontology offers a Bachelor of Science in Human Development and Aging, a Bachelor of Science in Lifespan Health, undergraduate classes through the health and humanity major in the USC Dornsife College of Letters, Arts and Sciences, two minors in aging and a progressive Master of Science in Gerontology open to all undergraduate students.

The School of Gerontology offers several graduate degrees including: a Master of Science in Gerontology; a Master of Aging Services Management; a Master of Arts in Gerontology; a Master of Long Term Care Administration (with the Marshall School of Business and the Price School of Public Policy). All master's degrees are offered online and onsite. The School of Gerontology offers the premiere Ph.D. in Gerontology program in the nation. The program is not offered online. Non-degree graduate students may complete 16 units of gerontology and be awarded a graduate level certificate in gerontology (also available online).

Master's degree students may pursue one of several dual degrees, which are jointly offered with other professional schools. These are the Master of Science in Gerontology and the Master of Business Administration (M.S./MBA) with the Marshall School of Business; the Master of Science in Gerontology and the Doctor of Dental Surgery (M.S./DDS) with the Ostrow School of Dentistry; the Master of Science in Gerontology and the Juris Doctor (M.S./J.D.) with the Gould School of Law; the Master of Science in Gerontology and the Master of Public Administration (M.S./MPA), the Master of Science in Gerontology and the Master of Health Administration (M.S./MHA), and the Master of Science in Gerontology and the Master of Planning (M.S./MPI) with the Price School of Public Policy; the Master of Science in Gerontology and the Master of Social Work (M.S./MSW) with the School of Social Work; and the Master of Science in Gerontology and the Doctor of Pharmacy (M.S./Pharm.D.) with the School of Pharmacy.

In addition to the degree and minor programs, overview courses in aging are offered for undergraduates enrolled in other units of the university. Many gerontology courses can be credited as elective units.

#### Honor Society

The student honor society is Sigma Phi Omega, the national honor society formed in 1980 to recognize the excellence of those who study gerontology. The organization seeks to promote scholarship and professionalism, and to recognize exemplary attainment in the field of aging. Undergraduates must have a GPA of at least 3.3 and graduate students a GPA of at least 3.5. Sigma Phi Omega is administered by the Association for Gerontology in Higher Education, an educational unit of the Gerontological Society of America.

**Ethel Percy Andrus Gerontology Center**

The Andrus Gerontology Center initiates, designs and executes basic and applied research on the many phases of development and aging, and provides for graduate and post-graduate training in the biological, social, behavioral and policy sciences.

Specific areas of study include neurobiology, cognitive science, biology, social organization behavior, human service delivery, biodemography and social policy.

The Andrus Center offers a multidisciplinary research training program in gerontology. It is directed toward graduate students pursuing the Ph.D. as well as a limited number of post-doctoral fellows who develop research and academic careers in specialized areas of gerontology. Research training is carried out within individual disciplines.

## Undergraduate Programs

### Bachelor of Science in Human Development and Aging

The Bachelor of Science in Human Development and Aging is an undergraduate degree offered at the USC Davis School of Gerontology in the social sciences. Students in this program often pursue careers related to older adults in business, law, the nonprofit sector or government agencies.

Students may also specialize in a health science track. The health science track combines the core gerontology curriculum with the prerequisites for admission to medical school and other health-related fields including: dentistry, pharmacy, occupational/physical therapy, physician assistant programs and others. In addition, students will participate in a supervised practicum experience in which they will become directly involved with aging clients in a health care setting.

Students planning to pursue a B.S. are urged to notify the school of this intent as early as possible during their undergraduate study. This will help ensure that the student receives proper advisement and that the student is alerted to any special requirements or program modifications.

During the freshman and sophomore years, students enroll primarily in general education required courses as specified by the university and the Human Development and Aging gateway course (GERO 200).

During their junior and senior years, students enroll in required and elective courses in the School of Gerontology as well as other courses throughout the university. These courses are selected in consultation with an adviser and reflect the personal and professional interests of the students.

The honors program is available to juniors who maintain a GPA of 3.5 in gerontology and a GPA of 3.3 in other USC course work. The honors program includes mentored training in research and course work relevant to research methodology and statistics.

A grade point average of at least C (2.0) on all units attempted at USC is required for undergraduate degrees. The School of Gerontology requires a minimum 2.0 grade point average in upper division courses applied toward the major.

**General Education Requirements**

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to be considered a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See pages 63 and 250 for more information.

**Foreign Language or Programming Skills (12 Units)**

Students must satisfy the skill level requirement in one language or complete ITP 101x and additional ITP 100-level programming courses to total 12 units. Students in the health science track are required to complete only ITP 101x.

**Degree Requirements**

REQUIRED COURSES		UNITS
GERO 200	Gerontology: The Science of Adult Development	4
GERO 320	Psychology of Adult Development	4
GERO 330	Society and Adult Development	4
GERO 340	Policy, Values, and Power in an Aging Society	4
GERO 350	Administrative Problems in Aging	4
GERO 416	Health Issues in Adulthood	4
GERO 481	Case Management for Older Adults	4
GERO 491	Practicum	4
GERO 492	Senior Seminar	4
General Education		24
Writing Requirement		8
Foreign Language or Programming		12
Gerontology electives		12
One approved statistics course		4
General electives in gerontology or related disciplines (8 units upper division)		32
Total:		128

RECOMMENDED GENERAL ELECTIVES		UNITS
ANTH 305	Childhood, Birth and Reproduction	4
HP 402	Maternal and Child Health	4
LING 405	Child Language Acquisition	4
PSYC 100	Introduction to Psychology	4
PSYC 336L*	Developmental Psychology	4
PSYC 437*	Adolescent Development	4
SOCI 305	Sociology of Childhood	4
SOCI 369	The Family in a Changing Society	4
SOCI 385	Population, Society, and Aging	4

\*Prerequisite required.

### Health Science Track in Human Development and Aging

#### Requirements for Admission

The listed requirements for admission to the health science track in human development and aging will not differ from existing requirements for admission to the Bachelor of Science in Human Development and Aging. However, because health professional schools are very competitive, USC students interested in this program will be expected to have achieved at least a 3.0 grade point average (A = 4.0). Students entering the program from high schools or transferring from community colleges will also be expected to meet the minimum admission standards.

#### Degree Requirements

##### SCIENCE AND MATHEMATICS UNITS

BISC 120Lx	General Biology: Organismal Biology and Evolution	4
BISC 220L	General Biology: Cell Biology and Physiology	4
CHEM 105abL*	General Chemistry	4-4
CHEM 322abL*	Organic Chemistry	4-4
MATH 125*	Calculus I	4
PHYS 135abL*	Physics for the Life Sciences	4-4
		36

##### GERONTOLOGY UPPER DIVISION CORE COURSES UNITS

GERO 310*	Physiology of Aging	4
GERO 320	Psychology of Adult Development, or	
GERO 330	Society and Adult Development	4
GERO 340	Policy, Values, and Power in an Aging Society	4
GERO 414*	Neurobiology of Aging	4
GERO 495	Practicum in Geriatric Care	4
		20

##### ADDITIONAL REQUIREMENTS UNITS

ITP 101x	Introduction to Information Technology	4
	General Education	24
	Writing Requirement	8
	Gerontology upper division electives	12
	General electives in gerontology or related disciplines (8 units upper division)	24
		72
Total:		128

##### RECOMMENDED GENERAL ELECTIVES UNITS

ANTH 305	Childhood, Birth and Reproduction	4
BISC 480*	Developmental Biology	4
HP 402	Maternal and Child Health	4
LING 405	Child Language Acquisition	4
PSYC 100	Introduction to Psychology	4
PSYC 336L*	Developmental Psychology	4
PSYC 437*	Adolescent Development	4
SOCI 305	Sociology of Childhood	4
SOCI 369	The Family in a Changing Society	4
SOCI 385	Population, Society, and Aging	4

\*Prerequisite required.

#### Honors Program in Human Development and Aging

USC Davis offers an honors program to outstanding students already pursuing studies for the B.S. in Human Development and Aging degree. This program offers students an opportunity to participate in mentored undergraduate research, taking course work in research methods and statistics in aging, and experience in writing an honors thesis that summarizes the research project. Honors students are required to complete GERO 497abc for a total of 6-8 units, beginning in the fall or spring of the junior year. In the senior year, they must complete GERO 593 Research Methods with a minimum grade of B. GERO 593 is offered only in the fall semester. Completion of the program requires a minimum GPA of 3.5 in gerontology and 3.3 in other courses. The program leads to the designation on the transcript of Bachelor of Science in Human Development and Aging with Honors.

The student takes 2 units of GERO 497a in the fall or spring of the junior year as a mentored research course to begin the process of developing an honors thesis. This would be in lieu of elective units. In the fall of the junior or senior year the student would complete GERO 593 for 4 units and 2 units of GERO 497b, both in lieu of elective units. Also during the fall semester, the research design and methods for the honors thesis are finalized and the research project begun. In the spring, the student would register for 2-4 units of GERO 497c in lieu of elective units. The goal for that semester is to complete the research and write the honors thesis.

#### Degree Requirements

##### REQUIRED COURSES UNITS

GERO 200	Gerontology: The Science of Adult Development	4
GERO 320	Psychology of Adult Development	4
GERO 330	Society and Adult Development	4
GERO 340	Policy, Values, and Power in an Aging Society	4
GERO 350	Administrative Problems in Aging	4

\*Prerequisite required.

## Bachelor of Science in Lifespan Health

The Bachelor of Science in Lifespan Health prepares students for admission to a graduate or professional school with an emphasis on the biomedical aspects of health including disease prevention, detection and treatment. This program is designed for students wishing to pursue graduate studies in a health field such as medicine, pharmacy, occupational/physical therapy, psychology and other related fields.

Admission to this program is granted through USC's admission process, described in the admission section of this catalogue. The same foreign language requirement for the B.S. in Human Development and Aging is required

as well as the USC Core (see pages 63 and 250 for more information). Students must enroll in the following courses:

GERONTOLOGY REQUIRED COURSES		UNITS
GERO 200	Gerontology: The Science of Adult Development	4
GERO 310*	Physiology of Aging	4
GERO 320	Psychology of Adult Development	4
GERO 416	Health Issues in Adulthood	4
GERO 483	Global Health and Aging	4
GERO 492	Senior Seminar	4
GERO 495	Practicum in Geriatric Care	4

Choose three from the following four courses:

GERO 414*	Neurobiology of Aging	4
GERO 437**	Social and Psychological Aspects of Death and Dying	4
GERO 475	Ethical Issues in Geriatric Care	4
GERO 481	Case Management for Older Adults	4
Electives		32
Gerontology electives		12

\*Prerequisite required.

\*\*GERO 437 must be taken for 4 units of credit

## Bachelor of Arts in Health and Humanity

The USC Davis School of Gerontology offers undergraduate classes through the Health and Humanity major in the USC Dornsife College of Letters, Arts and Sciences (see page 364).

## Progressive Degree in Gerontology/Master of Science in Gerontology

The progressive degree program allows high performing students to integrate their current undergraduate major with a Master of Science in Gerontology. Students with at least a 3.0 overall GPA may apply for admission to the degree program in their junior year.

Students will meet with the gerontology student adviser to develop a course plan that must be approved by the School of Gerontology and the student's home department. Students admitted into the progressive degree program begin taking master's level courses in their senior year and will complete the master's degree in year five. For more information on the admission process, see the gerontology student adviser. For further details on progressive degree programs, see page 86.

## Minors in Aging

The undergraduate minor program gives students the option of combining their major with an emphasis in gerontology, the study of aging. The minors provide students with the opportunity to supplement their education with a life course perspective of aging processes.

The minor programs, which are multidisciplinary in nature, allow the student to survey the sociological, political, psychological and biological aspects of aging; to gain an understanding of the current services available to older persons; and to examine the contemporary policy issues facing the field.

### *Individuals, Societies and Aging*

This minor is a fit for students in business, engineering, communication, cinematic arts, or arts and sciences interested in developing a broad knowledge of issues in aging. Based largely on disciplines in the behavioral and social sciences, students learn how aging will impact their lives, families and careers. Upon completion of 20 units and graduation, the minor is noted on the student's transcript.

### *Science, Health and Aging*

The Science, Health and Aging minor is appropriate for students working toward careers in medicine, dentistry, pharmacy, biological sciences, public health or other health related fields. Admission to the minor is only

available to students who have completed 4 units of prerequisites (BISC 220L or BISC 221L) as part of their major requirements. Upon completion of 20 units and graduation, the minor is noted on the student's transcript.

### **Course Requirements**

#### *Individuals, Societies and Aging*

REQUIRED COURSES		UNITS
GERO 320	Psychology of Adult Development	4
GERO 330	Society and Adult Development	4
GERO 340	Policy, Values, and Power in an Aging Society	4
Select two from the following:		
GERO 380	Diversity in Aging	4
GERO 416	Health Issues in Adulthood	4
GERO 435	Women and Aging: Psychological, Social and Political Implications	4
GERO 437	Social and Psychological Aspects of Death and Dying	4
GERO 481	Case Management for Older Adults	4
GERO 491	Practicum	4
		20

### *Science, Health and Aging*

REQUIRED COURSES		UNITS
GERO 310	Physiology of Aging	4
GERO 414	Neurobiology of Aging	4
GERO 416	Health Issues in Adulthood, or	
GERO 496	Introduction to Clinical Geriatrics	4
Select two from the following:		
GERO 415	Neuroaffective Disorders of Aging	4
GERO 421	Managed Care for an Aging Society	4
GERO 437	Social and Psychological Aspects of Death and Dying	4
GERO 475	Ethical Issues in Geriatric Health Care	4
GERO 495	Practicum in Geriatric Care	4
		20

## Graduate Degrees

### Master's Degrees in Gerontology

#### **Master of Science in Gerontology**

The Master of Science in Gerontology prepares graduates to assume major leadership roles in the field of aging, primarily in the planning, administration and evaluation of programs in the private and public sectors, as well as executive positions in the delivery of direct services to older people and their families and in the instruction of older adults and service providers. The Master of Science in Gerontology requires 44 units of course work. This includes 32 units of required courses and 12 units of electives. As part of this curriculum, a field practicum assures that these skills can be applied in agencies and institutional settings.

All students take core courses in physiological, psychological, sociological, social policy and professional issues relating to aging, as well as research methods and the capstone course.

The course work includes instruction on the processes of aging and professional courses designed to develop the skills needed for practice. The field practicum includes one or two semesters of practical experience working in an organizational setting.

Continuous registration in the program is required. There is a five year completion time limit for the degree. Leaves of absence are available for limited times and are excluded from the total time limit. A maximum of two absences (one year each) is allowed. Most courses are offered on campus and online.

#### *Prerequisites for Admission*

Students applying for admission to the Master of Science in Gerontology program must have a bachelor's degree from an accredited college or university. In selecting applicants for admission, the School of Gerontology considers both academic potential (as reflected in undergraduate study and scores on the Graduate Record Examinations) and professional potential (as reflected in experience, references and career goals). The school requests information from applicants to supplement that supplied by the USC Application for Graduate Admission. Such supplemental information usually includes a resume, statement of interest in gerontology and letters of reference. Interviews may be required.

*Probation and Disqualification*

*Probation and Warning* Any graduate student whose cumulative or semester grade point average in the university falls below B (3.0) will be placed on academic probation.

A graduate student whose semester average falls below B (3.0) but whose cumulative grade point average in the university is 3.0 (A = 4.0) or higher will be placed on academic warning.

*Disqualification* A graduate student on academic probation will be disqualified if his or her cumulative record accumulates more than 12 units of C work. A graduate student, whether on probation or not, will be subject to disqualification if the Student Affairs Committee of the USC Davis School at any time determines deficiency in academic achievement.

*Common Requirements*

All candidates for the Master of Science degree must complete the following common requirements:

REQUIRED COURSES	UNITS
GERO 510	Physiology of Development and Aging 4
GERO 520	Life Span Developmental Psychology 4
GERO 530	Life Span Developmental Sociology 4
GERO 540	Social Policy and Aging 4
GERO 589	Case Studies in Leadership and Change Management 4
GERO 591	Field Practicum 4
GERO 593	Research Methods 4
	28

*Capstone Course*

GERO 555	Integrating Gerontology: A Multidisciplinary Approach 4
----------	---

*Suggested Electives*

12 elective units:

GERO 522	Counseling Older Adults and Their Families 4
GERO 543	Continuum of Care: A Systems Perspective 4
GERO 550	Administration and System Management in Programs for Older Adults 4
GERO 551	Applied Policy Skills in Aging 4
GERO 554	Evaluation: Incorporating Evidence-Based Practices 4
GERO 591	Field Practicum 4

Common requirements for all programs include the 28 required units and GERO 555, totaling 32 units. In addition, each candidate must complete the 12 units of electives chosen from the complete list of electives approved by the student's adviser.

*Field Practicum*

The field practicum provides the opportunity for the student to gain valuable experience and develop needed skills by working in a community agency or institution. It involves a minimum of 240 hours of involvement. Students may elect to take an additional 4 units of GERO 591 Field Practicum as an elective.

Field placement assignments are made by the internship coordinator of the school in consultation with the student and in accordance with the resources available in the community. Every effort is made to secure placement which will reflect the student's capacity to assume the responsibilities of a professional in gerontology. Evaluations of the student's performance are sent to the school by the community agency; the student receives a grade of credit/no credit in GERO 591 Field Practicum.

**Master of Science with Specialization in the Health Service Area and Ambulatory Care Certificate**

In addition to the 32 units of common requirements for the M.S. in Gerontology, the following courses are required to earn the certificate.

CORE COURSES	UNITS
PPD 509	Problems and Issues in the Health Field 4
PPD 510a	Financial Management of Health Services, or 4
PPD 516	Financial Accounting for Health Care Organizations 4
PPD 545	Human Behavior in Public Organizations, or 4
PPD 557	Modeling and Operations Research 4
Elective	4
	16
<b>ONE SPECIALIZED COURSE FROM THE FOLLOWING:</b>	
GERO 550	Administration and System Management in Programs for Older Adults 4
PPD 600	Management of Managed Care Organizations 4
PPD 601	Management of Long-Term Care Organizations 4

**Advanced Placement Master of Science in Gerontology**

The Advanced Placement M.S. program allows the outstanding student who has completed a Bachelor of Science in Gerontology to waive several courses in order to complete the master's degree in 36 units rather than the 44 units for the regular program.

REQUIRED COURSES	UNITS
GERO 510	Physiology of Development and Aging, or 4
GERO 520	Life Span Developmental Psychology, or 4
GERO 530	Life Span Developmental Sociology, or 4
GERO 540	Social Policy and Aging 4
GERO 555	Integrating Gerontology: A Multidisciplinary Approach 4
GERO 591	Field Practicum 8
GERO 593	Research Methods 4
Gerontology skill requirements	12
Gerontology electives	4
	36

*Program Adaptation*

Three of the following courses, GERO 510, GERO 520, GERO 530 and GERO 540, will be waived for students in the advanced placement track. Advanced placement students admitted to dual degree programs (page 706) must meet curriculum requirements for the respective programs.

**Progressive Degree in Gerontology**

A progressive degree program allows qualified undergraduate students the opportunity to complete an integrated program of study joining a bachelor's degree and a master's degree in the same or different departments.

The progressive degree program in gerontology allows students in their junior year to apply for the Master of Science in Gerontology program and complete both degrees in five years. Students must fulfill all the requirements for both the bachelor's degree and the master's degree. The total number of units for the master's degree, however, may be reduced by a maximum of one third. Students must obtain permission from both the bachelor's degree granting program and the USC Davis School of Gerontology. This program may be particularly attractive to students majoring in biology, psychology, policy and sociology. For more information on progressive degrees, see the entry under Undergraduate Programs, page 67, or Graduate and Professional Education, page 87.

**Master of Aging Services Management**

The Master of Aging Services Management provides an opportunity for those seeking careers in the aging services industries to acquire skills and knowledge related to management of services, products and programs for older persons. The program requires a minimum of 12 units of core courses (three courses) and 20 units of electives (five courses). All graduate level courses are offered on campus and via the Internet. Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time.

In order to participate in online courses, students will be required to have access to a computer with multimedia capability including a modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. Specific details regarding the computer requirements will be provided by the department. This program is available as a progressive degree (see Progressive Degree in Gerontology).

Students applying to the Master of Aging Services Management must have a bachelor's degree from an accredited college or university with a GPA of 3.0. If the applicant's GPA falls below 3.0 the GRE will be required.

Students must choose a minimum of 12 units of core courses from the following:

CORE COURSES (MINIMUM OF 12 UNITS)		UNITS
GERO 500	Perspectives on a Changing Society: An Introduction to Aging	4
GERO 501	Applied Legal and Regulatory Issues in Aging	4
GERO 502	Marketing and Shifts in Consumer Decision Making	4
GERO 504	Current Issues in Aging Services Management	4
GERO 589	Case Studies in Leadership and Change Management	4
		12

Students must select up to five courses (for a total of 20 units) from the following courses or any other adviser-approved elective:

SUGGESTED ELECTIVE COURSES (20 UNITS)		UNITS
GERO 505	Behavioral and Social Consequences of Design and Environment	4
GERO 506	Technological Innovations in Aging (Gerontechnology)	4
GERO 507	End of Life Care	4
GERO 508	The Mind and Body Connection through the Lifespan	4

GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology	4
GERO 522	Counseling Older Adults and Their Families	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 541	Health Care Delivery Models: Comparative Approaches	4
GERO 543	Continuum of Care: Systems Perspective	4
GERO 550	Administration and Systems Management in Programs for Older Adults	4
GERO 551	Applied Policy Skills in Aging	4
GERO 554	Evaluation: Incorporating Evidence-Based Practices	4
GERO 560	Complementary Medicine for Health and Longevity	4
GERO 585	The Aging Family	4
GERO 593	Research Methods	4
Total:		20

**Master of Arts in Gerontology**

The M.A. in Gerontology provides an opportunity to acquire skills and formal training in gerontology. The online program requires 28 units of course work. Most courses are offered online and on campus.

Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time limit.

In order to participate in the online courses, students will be required to have access to a multimedia computer with modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. Specific details regarding the computer requirements will be provided by the department.

Admission standards and prerequisites are the same as listed for the Master of Science in Gerontology with the exception that students in the online M.A. program are expected to have a significant amount of experience working in human services, health care, business or similar settings. Students are not required to have taken an approved additional course.

REQUIRED COURSES (20 UNITS)		UNITS
GERO 500	Perspectives on a Changing Society: An Introduction to Aging	4
GERO 508	The Mind and Body Connection through the Lifespan	4
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
		20

Students must select two courses (for a total of 8 units) from the following courses:

ELECTIVE COURSES (8 UNITS)		UNITS
GERO 522	Counseling Older Adults and Their Families	4
GERO 550	Administration and System Management in Programs for Older Adults	4
GERO 560	Complementary Medicine for Health and Longevity	4
GERO 585	The Aging Family	4
GERO 589	Case Studies in Leadership and Change Management	4
Total:		28

**Graduate Level Certificate in Gerontology**

The residential graduate certificate in gerontology program provides an opportunity for those who have completed a bachelor's degree in another profession or discipline and are employed in the field of aging to acquire a greater understanding of gerontology theory and research. The program consists of 16 units of gerontology content designed to familiarize the student with several areas of the field which relate to professional practice.

In addition to three of the four required core course areas for the certificate program (GERO 510, GERO 520 or GERO 522, GERO 530 or GERO 585, GERO 540), each student will have the option to choose one elective course which meets his or her particular area of interest.

Certificate students do not take a field practicum. Students admitted to the non-degree certificate program are expected to enroll each semester until the program is completed.

**Online Graduate Level Certificate in Gerontology**

The online graduate certificate in gerontology program provides an opportunity for those with a bachelor's degree in another profession or discipline who are employed in the field of aging to acquire a greater understanding of gerontology theory and research. The program consists of 16 units of gerontology courses designed to familiarize the student with several areas of the field which relate to professional practice.

Students complete the introductory course, GERO 500, two of the four required core course areas (GERO 508 or GERO 510 or, GERO 520 or GERO 522, GERO 530 or GERO 585, and GERO 540), and one elective course in a particular area of interest.

The required courses are delivered via the Internet. The courses are offered in sequential order and are restricted by availability. Continuous registration in the non-degree program is required. Leaves of absence are available for limited times and are excluded from the total time limit. Entering students are encouraged to begin their course of study by taking GERO 500.

In order to participate in the online courses, students will be required to have access to a multimedia computer with modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. The department will provide specific details regarding the computer requirements.

**Master of Long Term Care Administration**

The Master of Long Term Care Administration provides an opportunity for professionals who are currently working in a long term care profession to acquire skills and formal training in long term care administration. The online program requires 28 units of course work.

The required courses are in sequential order and are restricted by availability. Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time limit.

In order to participate in the online courses, students will be required to have access to a multimedia computer with modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. Specific details regarding the computer requirements will be provided by the department.

Admission standards are the same as for the Master of Science in Gerontology.

*Transfer Credits*

An admission credit evaluation is prepared for graduate students with previous graduate level course work. This review indicates which courses the university will approve but it is the relevant school (Gerontology, Business, or Public Policy) that determines if any of these courses are appropriate for this degree. A maximum of 4 units may be used toward the master's degree.

Graduate transfer credit will not be granted for life experience, credit by examination, non-credit extension courses, correspondence courses or thesis supervision. Graduate transfer credit will not be granted for any course work taken elsewhere after the student has been admitted and enrolled at USC unless the student receives prior written approval from the department.

REQUIRED COURSES (24 UNITS)		UNITS
ACCT 509	Concepts of Financial and Management Accounting	4
FBE 587	Legal and Regulatory Environment of Long Term Care	4
GERO 500	Perspectives on a Changing Society: An Introduction to Aging	4
GERO 508	The Mind and Body Connection through the Lifespan, or	
GERO 522	Counseling Older Adults and Their Families	4
PPD 601	Management of Long-Term Care Organizations	4
PPD 649	Concepts and Practices in Public Personnel Administration	4

Students must select one course (for a total of 28 units) from the following courses.

ELECTIVE COURSE (4 UNITS)		UNITS
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 589	Case Studies in Leadership and Change Management	4

**Pharm.D./Graduate Certificate in Gerontology**

This integrated program in pharmacy and gerontology prepares students with an interest in geriatric pharmacy to assume leadership roles at academic, administrative or policy levels within the profession.

The program involves the completion of 16 units of core courses in physiology, psychology, sociology and social policy aspects of aging offered by the School of Gerontology. In addition, students are required to complete 8 units of approved elective courses in gerontology or geriatric pharmacy to be credited toward the requirements for the Pharm.D. and the Graduate Certificate in Gerontology.

REQUIRED COURSES IN GERONTOLOGY		UNITS
GERO 508	The Mind and Body Connection through the Lifespan, or	
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology, or	
GERO 522	Counseling Older Adults and Their Families	4
GERO 530	Life Span Developmental Sociology, or	
GERO 585	The Aging Family	4
GERO 540	Social Policy and Aging	4
		16

ELECTIVES IN GERONTOLOGY AND GERIATRIC PHARMACY (8 UNITS)		UNITS
GERO 554	Evaluation: Incorporating Evidence-Based Practices	4
GERO 555	Integrating Gerontology: A Multidisciplinary Approach	4
PHRD 655	Geriatric Pharmacy I	3
PHRD 656	Geriatric Pharmacy II	3
PHRD 703	Long Term Care Clerkship	6
PHRD 706	Geriatrics Clerkship	6
PHRD 730	Acute Care Geriatrics Clerkship	6
PHRD 731	Advanced Geriatrics Clerkship	6

It is expected that the program can be successfully completed by candidates taking electives in geriatric pharmacy or gerontology during the regular semester and completing one core course in gerontology during each summer in the four year Pharm.D. program.

*Admission Requirements*

Students who have a baccalaureate degree from an accredited college or university must submit separate applications to the USC School of Pharmacy and the USC Davis School of Gerontology. All requirements for admission to the regular Pharm.D. program must be fulfilled by the candidate. GRE scores are not required for admission to the certificate program.

## Dual Degree Programs

The USC Davis School of Gerontology cooperates with six other professional schools at USC in offering programs in which the student receives two master's degrees.

These degrees provide the student with the knowledge and skills of gerontology as well as those of the other professional field. The dual degrees require more course work than the M.S. alone, but offer the graduate greater breadth of education and employment options.

Dual degrees currently available are the Master of Science in Gerontology and the Master of Business Administration (M.S./MBA) with the Marshall School of Business; the Master of Science in Gerontology and the Doctor of Dental Surgery (M.S./DDS) with the Ostrow School of Dentistry; the Master of Science in Gerontology and the Juris Doctor (M.S./J.D.) with the Gould School of Law; the Master of Science in Gerontology and the Master of Public Administration (M.S./MPA), the Master of Science in Gerontology and the Master of Health Administration (M.S./MHA), and the Master of Science in Gerontology and the Master of Planning (M.S./MPI) with the Price School of Public Policy; the Master of Science in Gerontology and the Master of Social Work (M.S./MSW) with the School of Social Work; and the Master of Science in Gerontology and the Doctor of Pharmacy (M.S./Pharm.D.) with the School of Pharmacy. Students must apply to both schools simultaneously and, if accepted to both, participate in specially designed programs combining the courses of each school.

### Admission to Dual Degree Programs

Applicants to any of the dual degree programs must submit two application forms to the Office of Admissions; one indicating gerontology as the major and one indicating the other degree as the major. Each of the schools must accept the student for admission. Acceptance into one school's degree program does not imply acceptance into the dual degree program.

### Gerontology and Business Administration

The M.S./MBA dual degree combines knowledge of the older population with the skills of business management. The program prepares graduates for a number of roles in both public and private sector organizations including the marketing of products or services to seniors, human resource development with older workers and retirement benefits.

### Gerontology Requirements

The Master of Science in Gerontology requires 30 units of course and fieldwork which covers the core content of the M.S. program.

REQUIRED COURSES		UNITS
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 555	Integrating Gerontology: A Multidisciplinary Approach	4
GERO 591	Field Practicum	4
	Gerontology electives	6
		30

### Business Administration Requirements

The Master of Business Administration will require 48 units of credit. Required courses include: all required courses in an MBA program; MOR 548 Competitive Advantage Through People (3); one marketing elective chosen from among MKT 512 Marketing and Consumer Research, MKT 525 Consumer Behavior, MKT 560 Marketing Strategy and Policy and MKT 569 Contemporary Marketing Problems (3); and additional graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students may not count courses taken outside the School of Business toward the 48 units.

### Program Adaptation

The USC Davis School of Gerontology will waive 18 units of electives, plus GERO 593 Research Methods (4 units) and GERO 589 Case Studies in Leadership and Change Management (4 units), which are required in the regular M.S. program. Students will be exposed to research and professional issues in business administration course work.

### Gerontology and Dentistry

The M.S./DDS dual degree program extends over five years and is offered cooperatively by the Ostrow School of Dentistry and the Davis School of Gerontology. The program addresses the challenges facing oral health care providers as the number of older persons needing dental care increases. With the evolution of care toward patients who live longer lives, graduating dentists will be better prepared to provide service to the aging population in community settings and health care facilities. See the Ostrow School of Dentistry of USC, page 532, for course requirements.

### Gerontology and Pharmacy

The emerging impact of the elderly on the health care system has created a need for health care providers who understand the unique needs of the elderly. As drug therapy remains the primary therapeutic option for chronic disease, the demand for prescription drugs will continue to rise. There is a demand for pharmacists who are equipped to meet the pharmaceutical care needs of this population. Geriatric pharmacy is becoming increasingly recognized as a specialty. Pharmacists with expertise in gerontology and geriatrics are in an excellent position to play a leading role in health policy and direct patient care. The Pharm.D./M.S., Gerontology program will provide extensive education and training in the unique health care needs of older adults. It will allow student pharmacists with a career interest in geriatrics or gerontology to work with health care planning or delivery organizations to develop and implement progressive pharmaceutical care programs for the elderly.

### Application and Admissions Requirements

Students applying for the dual degree program must meet the respective admission requirements for each program. This includes having completed a baccalaureate degree from an accredited college or university with a minimum G.P.A. of 3.0 and a minimum GRE score of 1000. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual Pharm.D./M.S. degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both programs. Students, who elect this approach, must identify themselves on both applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the Pharm.D. and will be offered admission to the dual degree program contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 G.P.A. Students who are accepted by only one program may choose to attend that program, but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the M.S. in Gerontology program during their first year of enrollment in the Pharm.D. prior to the M.S., Gerontology published application deadline. Students, who elect this approach, must apply through the School of Pharmacy. Students admitted to the M.S. program using this approach will be offered admission to the dual degree

contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 G.P.A. Students accepted to the dual degree program must maintain a minimum 3.0 G.P.A. in their gerontology and Pharm.D. courses.

#### Graduation Requirements

Students must complete all requirements for the Pharm.D. and M.S. degrees as listed in the catalogue with a minimum cumulative 3.0 G.P.A. Students must complete 44 Gerontology units as indicated. The Davis School of Gerontology will waive GERO 589 Case Studies in Leadership and Change Management (4 units) because students enrolled in this program will have a primary professional focus on pharmacy. The Pharm.D. degree course requirements are listed in the School of Pharmacy section on page 856.

GERONTOLOGY REQUIREMENTS		UNITS
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 555	Integrating Gerontology: A Multidisciplinary Approach	4
GERO 591	Field Practicum (480 hours)	8
GERO 593	Research Methods	4
Gerontology electives*		12
		<hr/> 44

\*Choose three of the following: GERO 522, GERO 543, GERO 550, GERO 551 or GERO 554.

#### Gerontology and Public Administration

The M.S./MPA dual degree offers the student interested in management of agencies and institutions the opportunity to gain in-depth knowledge of the administrative and organizational processes and management skills necessary for the effective delivery of services to older persons. See the Price School of Public Policy, page 900, for course requirements.

#### Gerontology and Health Administration

Students can specialize in health care administration (profit and non-profit) through the dual degree with the Price School of Public Policy's Health Administration Program. See the Price School of Public Policy, page 901, for course requirements.

#### Gerontology and Planning

The M.S./MPI dual degree is one of few in the nation which combines the knowledge of the older population with the skills needed to plan services for older people. The MPI prepares the graduate for the responsibilities involved in development of public and private institutions and programs. The M.S. indicates a special focus on the older person and the skills to analyze and design programs for this growing population. See the Price School of Public Policy, page 896, for course requirement.

#### Gerontology and Law

The M.S./J.D. dual degree combines the knowledge of the older population with understanding of the legal system. The program prepares graduates for a number of roles in both public and private sector organizations. Students are required to complete 110 units of course work, 74 from the Gould School of Law and 36 from the Davis School of Gerontology. The first year is devoted to required law courses, and the second, third and fourth years combine gerontology and law courses. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to the rule for students enrolled in the law school honors program. See the Gould School of Law, page 739, for course requirements.

#### Gerontology and Social Work

The M.S./MSW dual degree offers the student interested in direct service or community organization the credentials most valued in clinical and therapeutic practice. Taken in connection with the social work degree, the M.S. focuses course and fieldwork on the older person and prepares the student for social work with older persons and their families.

In the M.S./MSW dual degree program, the student enrolls primarily in the first year program of the USC School of Social Work. During the summer session, courses are taken in the USC Davis School of Gerontology. Second year courses are taken in both schools and fieldwork during the second year is taken in the School of Gerontology. The research course is taken through the School of Social Work in the student's concentration area. The School of Gerontology will waive GERO 589 Case Studies in Leadership and Change Management (4 units) and GERO 555 Integrating Gerontology: A Multidisciplinary Approach (4 units) because students enrolled in this program have a primary professional focus on social work.

GERONTOLOGY REQUIREMENTS		UNITS
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 591	Field Practicum	8
Gerontology electives		8
		<hr/> 32

SOCIAL WORK REQUIREMENTS		UNITS
SOWK 503	Human Behavior and the Social Environment I	3
SOWK 505	Human Behavior and the Social Environment II	3
SOWK 534	Policy and Practice in Social Service Organizations	3
SOWK 543	Social Work Practice with Individuals	4
SOWK 545	Social Work Practice with Families, Groups and Complex Cases	2
SOWK 562	Social Work Research	3
SOWK 586ab	Field Practicum	3-3
SOWK 587ab	Integrative Learning for Social Work Practice	2-2
SOWK 611	Leadership in the Social Work Profession and Organizations: Theory and Practice	3
		<hr/> 31

In the second half of the social work program, students may enroll in one of four concentrations: Health; World of Work; Mental Health; or Community Organization, Planning and Administration (COPA). All students are required to take SOWK 611 Leadership in the Social Work Profession and Organizations: Theory and Practice. Required courses are selected based on the chosen concentration as follows:

HEALTH		UNITS
SOWK 631	Advanced Theories and Clinical Interventions in Health Care	3
SOWK 632	Program Planning and Evaluation in Health Care	3
SOWK 636	Policy in the Health Care Sector	3

WORLD OF WORK		UNITS	COMMUNITY ORGANIZATION, PLANNING, AND ADMINISTRATION (COPA)		UNITS
SOWK 671	Clinical Intervention and Advanced Theories in Work Settings	3	SOWK 629	Evaluation of Research: Community Organization, Planning and Administration	3
SOWK 672	Improving Work Life Through Social Policy and Managing Organizational Development and Change	3	SOWK 639	Social Policy for Managers, Planners, and Community Organizers	3
SOWK 673	Program Development, Training, Grant Writing and Program Evaluation in Work Settings	3	SOWK 648	Management for Community and Social Services	3
MENTAL HEALTH		UNITS	Course selection is done only with an academic adviser's approval.		
SOWK 605	Human Development and Mental Health	3			
SOWK 625	Evaluation of Research: Mental Health	3			
SOWK 645	Clinical Practice in Mental Health Settings	3			

### Program Adaptations

The School of Gerontology waives 12 units. The research course is taken through the School of Social Work in the student's concentration area, and GERO 593, the research course, and GERO 555 are waived as well as one elective. The School of Social Work waives 12 units.

## Doctor of Philosophy in Gerontology

The purpose of the Ph.D. in Gerontology is to provide research training in the multi-disciplinary field of aging. The program is designed to enhance the potential of able students to make scholarly and professional contributions to the field of gerontology through research and teaching. To obtain this goal, the Ph.D. in Gerontology provides (1) high level rigorous research training, (2) the acquisition and application of scientific knowledge in the field of aging and (3) the development of leadership skills.

### Admission Requirements

Applicants for admission to the doctoral program must meet the following requirements:

- (1) Recipient of a bachelor's degree from an accredited college or university by anticipated enrollment date.
- (2) Academic promise, as evidenced by above average achievement in previous undergraduate and graduate education. A minimum GPA of 3.5 on all prior graduate work is required. In addition, a 3.25 GPA in an appropriate undergraduate major and a baccalaureate degree are required.
- (3) Personal qualities compatible with high level performance in gerontology and indicating a potential for leadership in the field. This includes a strong commitment to developing a scientific research program. Applicants to the Ph.D. program must submit a resume of professional and academic experience, three letters of reference (academic and professional), a statement of objectives and examples of written work.

(4) Satisfactory performance on the Graduate Record Examinations — existing test scores may be submitted if the GRE has been completed no more than five years prior to the date of application. A satisfactory score on the Verbal and Quantitative GRE is required. Students should also provide scores from the Analytic exam.

(5) Submission of application materials as required. Instructions for application to the Doctor of Philosophy in Gerontology may be obtained by contacting the Davis School of Gerontology.

### Degree Requirements

#### Course Requirements

Students must complete a minimum of 60 units of course work (with at least 24 of these units being completed in residency at USC), as well as additional dissertation units as required. All students will take courses in three areas:

- (1) A basic scientific core area, taught by School of Gerontology faculty, will stress the physiological, psychological, sociological and theoretical dimensions of both individual and population aging. Five required courses include GERO 510 Physiology of Development and Aging, GERO 520 Life Span Developmental Psychology, GERO 530 Life Span Developmental Sociology, GERO 540 Social Policy and Aging, and GERO 628 Theories of Aging.
- (2) A second core area will develop appropriate research tools for the students' area of specialization. All students will learn data analysis skills, including appropriate statistics

as well as appropriate laboratory methods. It should be noted that the School of Gerontology requires all graduate students to demonstrate basic competence in statistics as a prerequisite of enrollment.

(3) A third area will involve electives which allow students to concentrate in a substantive or analytic field of inquiry. Areas of concentration include but are not limited to: the biology of aging, social processes and aging, psychology of aging and aging policy; courses may be taken in relevant USC schools or departments. Aging is an inherently interdisciplinary field and each student must develop a set of electives in conjunction with his or her advisory committee that is appropriate for the area of concentration.

Students will be advised about course selection during the first year by the Ph.D. committee. As soon as they have selected a specialization (e.g., biology, psychology, sociology, policy), an advisory committee of appropriate faculty will be appointed. The purpose of the advisory committee is to help the student in the selection of courses and research; to monitor the student's progress; and to insure preparation for the qualifying examination.

During the first year, the student is expected to complete two of the three semesters of the core courses in gerontology (GERO 510, GERO 520, GERO 530, GERO 540, GERO 628). Courses in research skills and specialization areas may also be taken in the first year and will be taken in subsequent years.

**Foreign Language Requirements**

There are no foreign language requirements for the Ph.D. program.

**Transfer Credits**

Students with master's degrees or prior graduate course work in gerontology can petition to apply the credit toward required courses. Petition for credit will be based on the Graduate School's policies and requirements for "transfer of credit" and on approval by the doctoral advisory committee. Transfer credits toward the Ph.D. requirements will be limited to 20 units and must be credits taken within 10 years of entering the program.

**Time Limit**

The normal time for completing the Ph.D. is four to five years (without a prior master's degree). The first two years will consist of required and elective courses. The third year will consist of electives, the Ph.D. qualifying exams and completion of the dissertation proposal. The final year(s) will involve the completion of the dissertation. The maximum time to complete all requirements for the Ph.D. degree is eight years from the first course at USC applied toward the degree.

Students who have completed an applicable master's degree at USC or elsewhere within five years of the proposed enrollment in the Ph.D. program must complete the Ph.D. in six years.

**Screening Procedures**

When students have completed a minimum of 16 but not more than 24 units of doctoral course work, the doctoral advisory committee assesses their performance through a screening process and makes a decision regarding their ability to continue in the program. If the student is granted permission to continue, a guidance committee is established.

**Guidance Committee**

The guidance committee is composed of five faculty members, at least three from the School of Gerontology and at least one who holds a primary appointment in another academic unit of the university. The function of the guidance committee is to oversee the development of the student's academic progress through the qualifying examination, including the preliminary dissertation proposal.

**Qualifying Examination**

As a prerequisite for candidacy for the Ph.D., students must pass a qualifying examination, which is multidisciplinary and comprehensive in nature and that necessitates independent study beyond course requirements. Students must have completed at least 28 units of course work in the doctoral program with a GPA of at least 3.25 before attempting the qualifying exam. The exam is designed to test mastery of knowledge and scholarly skills and to test readiness to undertake independent research. If the student fails this exam, it may be repeated one time. When the exam

is successfully completed, the student then must develop and have a dissertation proposal approved before the student is officially admitted to candidacy for the Ph.D. degree.

**Doctoral Dissertation**

Upon admission to candidacy, a dissertation committee is established which consists of three members of the faculty, some of whom may be from the guidance committee, one of whom must hold his or her primary appointment outside the School of Gerontology.

The dissertation committee has responsibility for providing guidance and consultation during the research process, approving the dissertation, conducting the final oral examination, and recommending the candidate for the Ph.D. degree. The doctoral dissertation should make an original contribution to the development of knowledge and theory in gerontology.

**Final Oral Examination**

Upon approval of the final draft of the dissertation by all members of the dissertation committee, the candidate must pass a final oral examination. Upon successful completion of this final examination, the committee recommends the candidate to the Graduate School for award of the Ph.D. degree.

## Courses of Instruction

**GERONTOLOGY (GERO)**

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**GERO 200 Gerontology: The Science of Adult Development (4, FaSp)** Introduction to adult development through the lifespan; biological, psychological, and social processes; gerontology as a career for the future.

**GERO 310 Physiology of Aging (4, Fa)** Effects of normative aging processes on homeostatic mechanisms and how these changes relate to development of disorder and disease in later life. Lecture and discussion. *Prerequisite:* BISC 220L or BISC 221L.

**GERO 320 Psychology of Adult Development (4, FaSp)** How psychologists study thinking, memory, emotions, personality, and behavior, and how people change in these throughout adulthood to old age. *Recommended preparation:* PSYC 100.

**GERO 330 Society and Adult Development (4, FaSp)** How social relationships affect adults of different ages; the changing contract across generations; interaction of culture, race, family and social values with adult development.

**GERO 340 Policy, Values, and Power in an Aging Society (4, FaSp)** How Americans' political values affect public policy. Studies of landmark legislation to explore the social contract between generations and role of governments in social welfare.

**GERO 350 Administrative Problems in Aging (2 or 4, Fa)** Analysis of the skills, approaches and issues involved in the planning, development, and implementation of programs directed at meeting the needs of older persons.

**GERO 380m Diversity in Aging (4)** Exploring diversity in the older population and variability in the human aging process.

**GERO 385 Transitions in Adulthood (2 or 4)** An exploration of the critical issues and transitions in the adult years, including careers, relationships, parenthood, and major turning points for personal development.

**GERO 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**GERO 402 Housing for the Elderly: Policy, Programs, and Design (2)** An overview of housing policies, programs and design for the elderly, including analysis and evaluation of past, current and proposed government programs.

**GERO 411L Physiology, Nutrition, and Aging (2 or 4)** Explores nutritional needs and the physiological, psychological, and sociological relationships to nutrition. Laboratory experiments in assessment and evaluation.

**GERO 412L Exercise and Aging: Principles and Programs (2 or 4)** Physiological, psychological, and sociological aspects of exercise. Laboratory involvement in assessment and evaluation of fitness.

**GERO 414 Neurobiology of Aging (4, Fa)** Age-related changes in nervous system structure and function; relationship of brain changes to changes in cognitive function and perception; Alzheimer's and Parkinson's diseases. Lecture and discussion. *Prerequisite:* BISC 220L or BISC 221L.

**GERO 415 Neuroaffective Disorders of Aging (4, Sp)** Methods of studying, evaluating, and treating cognitive, psychiatric, and behavioral problems associated with medical conditions of old age.

**GERO 416 Health Issues in Adulthood (4, Sp)** Physiological, psychological, and social health problems of adults as they are impacted by health choices throughout life.

**GERO 421 Managed Care for an Aging Society (4, FaSp)** Examines key legislation, policies, practice, and outcomes of managed care and how population aging affects health care delivery.

**GERO 423 Psychological Development through Autobiography (4)** Introduction to autobiography as a source of individual psychological development, with emphasis on integration of cognitive, emotional, and decision processes.

**GERO 435m Women and Aging: Psychological, Social and Political Implications (4)** Problems and resources of the middle-aged and older woman in a changing society; including discrimination, stereotypes, employment, social interaction, etc.

**GERO 437 Social and Psychological Aspects of Death and Dying (2 or 4, FaSp)** Introduction and critical survey of the current issues, concepts, and research of the social and psychological aspects of death and dying.

**GERO 440 Biodemography of Aging (4)** Consideration of the biological and social-cultural factors that govern the evolution of life spans and the life of humans and selected animal models. *Prerequisite:* BISC 112 or BISC 113 or BISC 120 or BISC 121; *recommended preparation:* statistics.

**GERO 451 Policy and Program Development in Aging (4)** Policy trends and changing roles of local, state, and federal agencies in planning, managing, and evaluating programs in comprehensive, coordinated systems of service for older persons.

**GERO 452 Economic Issues and the Aged (2 or 4)** Analysis of economic factors associated with the aged; implications for individuals, society, and the economy; lifecycle economics, retirement, income maintenance, and social security.

**GERO 461 Seminar in Molecular and Computational Biology (2, FaSpSm)** (Enroll in BISC 461)

**GERO 470 Aging and Business (4, Fa)** An introduction to the dynamic roles of business in an aging society focusing on workplace issues, marketing to mature consumers, and careers for business gerontologists.

**GERO 475 Ethical Issues in Geriatric Health Care (4)** Biomedical ethical issues that are encountered in working with geriatric patients. Examination of ethical theory and the application of theory to clinical settings.

**GERO 481 Case Management for Older Adults (4, Fa)** Overview of the concepts, characteristics, skills, and clinical issues of case management in a variety of settings serving older persons.

**GERO 483 Global Health and Aging (4, Fa)** Overview of the impact aging populations will have on global institutions from a variety of perspectives. Examination of public health policy issues.

**GERO 490x Directed Research (2-8, max 8)** Individual research and readings. Not available for graduate credit.

**GERO 491 Practicum (2-8, max 8, FaSpSm)** Supervised experience in one or more community agencies. Graded CR/NC.

**GERO 492 Senior Seminar (4, Sp)** An in-depth integration of major research and professional themes in the study of human development and aging.

**GERO 495 Practicum in Geriatric Care (4, FaSpSm)** Supervised experience in a geriatric health care setting which allows students to put theories and ideas into practice. Graded CR/NC. Lecture, discussion, and fieldwork.

**GERO 496 Introduction to Clinical Geriatrics (4)** Medical problems of older adults emphasizing common geriatric syndromes, chronic illness, and alternative approaches to primary health care of older persons and their families. Upper division standing. *Prerequisite:* BISC 220L or BISC 221L.

**GERO 497abc Honors Seminar (2, 2, 2-4, FaSpSm)** Advanced study of empirical approaches in gerontology. Preparation, progress, presentation, and evaluation of Senior Honors Thesis research. *Prerequisite:* standing in Gerontology Honors Program.

**GERO 498 Nutrition, Genes, Longevity and Diseases (4, Sm)** Examines the role of nutrition and genes and the impact each has on longevity and diseases, particularly diseases related to aging. Offered in Genoa, Italy.

**GERO 499 Special Topics (2-4, max 8, FaSpSm)** Examination of special topics in the area of gerontology.

**GERO 500 Perspectives on a Changing Society: An Introduction to Aging (4, Fa)** Analysis of physical, mental, and social age-related changes as well as implications of population aging trends for individuals and society.

**GERO 501 Applied Legal and Regulatory Issues in Aging (4, Fa)** Analysis of shifting legal and regulatory issues affecting the delivery of aging services.

**GERO 502 Marketing and Shifts in Consumer Decision Making (4, Fa)** Branding, marketing, and consumer behavior through examination of established, transitioning and emerging aging services and organizations.

**GERO 504 Current Issues in Aging Services Management (4, Sp)** Basic skills needed for an executive working in an aging services environment. Recommended for entry level administrators and managers.

**GERO 505 Behavioral and Social Consequences of Design and Environment (4, Fa)** Examination of the behavioral and social consequences of design and the environment to create a more satisfying physical environment for both frail and active older adults.

**GERO 506 Technological Innovations in Aging (Gerontechnology) (4, Sp)** Reflections on shifts in preferences for aging in place and the market ramifications of innovations in science and technology on older consumers and service providers.

**GERO 507 End of Life Care (4, Sp)** Examination of programs related to end of life care. Cultural competencies in working with a diverse population on end of life issues.

**GERO 508 The Mind and Body Connection through the Lifespan (4, FaSpSm)** An introduction to mind-body processes involved in healthy aging. Examines the interplay of emotions, beliefs, and behaviors in shaping health-relevant biological processes.

**GERO 510 Physiology of Development and Aging (4, Sp)** Examination of lifespan physiology of human development, growth, and aging; major emphasis in the physiology of the later years and implications for health maintenance.

**GERO 519 Recent Advances in Neurobiology and Endocrinology of Aging (2 or 4)** Theories of the biology of aging and the effects of age on functional integrity of the total organism.

**GERO 520 Life Span Developmental Psychology (2 or 4, FaSm)** Behavior from adulthood to old age; study of major components of behavior such as perception, cognitive processes, personality, intergenerational relationships, sexuality, and life styles.

**GERO 522 Counseling Older Adults and Their Families (2 or 4, Sp)** Theory and application of assessment and intervention techniques with older adults and their families. Topics include: treatment modalities, psychopathology, ethical and legal issues, brain disorders.

**GERO 529 Seminar in Psychological Aspects of Aging (2 or 4)** Psychological changes in the later years; perception; sensory factors; intelligence and memory; psychophysiological measures; personality; psychopathology.

**GERO 530 Life Span Developmental Sociology (4, Sp)** Life span perspective on the sociological theories of marriage and the family, inter-generational relationships, work and retirement, and other forms of social organization.

**GERO 540 Social Policy and Aging (4, Fa)** Major legislation and programs; examination and analysis of policy-making and political processes affecting development and implementation of programs for older persons.

**GERO 541 Health Care Delivery Models: Comparative Approaches (4)** Examination of current trends and future prospects of finance and reimbursement systems. Topics include major legislation and programs such as Medicare and Medicaid.

**GERO 543 Continuum of Care: Systems Perspective (4)** Structural and organizational aspects of institutional and community programs; public policies, fiscal management, regulation, administration; obstacles to inter-agency coordination; the continuum of care.

**GERO 550 Administration and System Management in Programs for Older Adults (4, Sp)** Application of theories of administration and system management to public and volunteer programs and services for older adults including residential institutions and community programs.

**GERO 551 Applied Policy Skills in Aging (4, Sp)** An overview and application of techniques and approaches used in the definition and analysis of policy problems in aging.  
*Prerequisite:* GERO 540.

**GERO 554 Evaluation: Incorporating Evidence-Based Practices (4, Sp)** Examination of the evaluation of health and service delivery in aging services industries.

**GERO 555 Integrating Gerontology: A Multidisciplinary Approach (4, Sp)** Aging (commonalities and distinctions) as addressed by biologists, psychologists, and sociologists. Topics include research perspectives, normative aging, functional decline and disability, and aging and society.

**GERO 556 Program Development (2 or 4)** Principles and procedures of assessing needs, collecting resources, designing activities, and implementing programs for older people in a variety of community and institutional settings.

**GERO 560 Complementary Medicine for Health and Longevity (4, Sp)** Alternative healing practices and complementary medicine including Eastern medicine, herbal therapies, vitamin and dietary supplements for general health and specific issues in aging. Open to graduate students or undergraduate students with senior standing for undergraduate credit. *Recommended preparation:* GERO 500.

**GERO 570 Corporate Policies and Aging (4)** An introduction to the evolving roles of corporations in an aging society including such topics as retaining older workers, retiree benefits, and the mature consumer.

**GERO 585 The Aging Family (2 or 4, Sm)** Family processes and structure in families with aged persons will be reviewed, including marital and family therapy and intervention strategies.

**GERO 589 Case Studies in Leadership and Change Management (4, Fa)** Examination of case studies of issues affecting the aging services industries and the role industry leaders play in reacting to change.

**GERO 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**GERO 591 Field Practicum (1-12, max 12, FaSpSm)** Supervised experiential learning in one or more organizations that serve older adults; includes a regularly scheduled seminar. Graded CR/NC.

**GERO 592 Multidisciplinary Research Seminar in Aging (2, max 8, FaSp)** Multidisciplinary perspectives on current research in gerontology, including physiology, neurobiology, health and medicine, psychology, sociology, and public policy. Topics will change each semester.

**GERO 593 Research Methods (4, Fa)** An introduction to research methods and their application to gerontology including problem formation, research design, data collection, descriptive and analytic statistics, interpretation, and report preparation.

**GERO 594abz Master's Thesis (2-2-0, FaSpSm)** Credit on acceptance of thesis. Graded IP/CR/NC.

**GERO 599 Special Topics (2-4, max 8, FaSpSm)** Examination of special topics in the area of gerontological study.

**GERO 610 The Aging Society (4, Sp)** The interaction of demographic and economic processes, with emphasis on how the contemporary nature of these interactions influence public policy response to an aging population.

**GERO 613 Health and Aging (4, Sp)** Examination of changes in health related to age, changes in health in populations over time, and the key health issues facing older persons.

**GERO 628 Theories of Aging (4)** An examination of the nature and adequacy of existing explanations of aging. Focus will be on psychological, sociological, and biological paradigms, and on the epistemology of theory.

**GERO 640 Data Analysis Strategies (4, FaSpSm)** Hands-on experience in developing and testing hypotheses using various types of databases, data management and analysis strategies and written presentation of findings. *Recommended preparation:* GERO 593.

**GERO 645 Politics and Policy Processes in an Aging Society (4, Fa)** Dynamics of the policy-making process in the context of aging policy in the United States; focus on the political system and its social dynamics.

**GERO 790 Research (1-12, FaSpSm)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**GERO 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm)** Credit on acceptance of dissertation. Graded IP/CR/NC.

---

# USC Independent Health Professions at the Ostrow School of Dentistry

*In 2011, the USC Division of Occupational Science and Occupational Therapy hosted its first White Coat Ceremony, symbolizing the transition into professional health care. During the celebratory occasion, more than 200 graduate students recited the Oath of an Occupational Therapist, a pledge to “model and foster leadership, and facilitate spiritual, personal and professional growth in myself, my profession and in others.”*

**T**he USC Division of Biokinesiology and Physical Therapy and the Division of Occupational Science and Occupational Therapy are administered by the Ostrow School of Dentistry of USC. Both of these divisions offer outstanding education at either the graduate or undergraduate level.

The Division of Biokinesiology and Physical Therapy was established in 1944. For those wishing to enter the profession of physical therapy, the division offers the Doctor of Physical Therapy degree. For persons who are practicing physical therapists, the division offers a Master of Science program. In addition, the division offers the nation’s longest-standing Ph.D. degree program in Physical Therapy, now a Ph.D. in Biokinesiology. Experienced clinicians with a master’s degree in physical therapy may be eligible to apply for the Doctor of Physical Therapy in an Advanced Standing program. Clinicians seeking specialization in a specific area of practice may enter the Clinical Residency Program. The division is headquartered on the Health Sciences Campus; all degree programs are offered through the Graduate School.

The Division of Occupational Science and Occupational Therapy opened in 1942 and is headquartered on the Health Sciences Campus. More than 50 percent of the recipients of the highest academic awards given by the American Occupational Therapy Association have been USC alumni. The division offers a professional degree program allowing students to earn a B.S. degree from the USC Dornsife College of Letters, Arts and Sciences and, in one additional year, an M.A. in occupational therapy. These graduates are eligible to sit for The National Board for Certification in Occupational Therapy as occupational therapists. The division offers three degrees in conjunction with the Graduate School: the Master of Arts for both currently registered occupational therapists or for persons with degrees in related fields, the world’s first Ph.D. in Occupational Science and the professional Occupational Therapy Doctorate (OTD). The division also confers an undergraduate minor in occupational science, one of only a few similar programs offered worldwide. The Division of Occupational Science and Occupational Therapy is fully accredited by the Accreditation Council for Occupational Therapy Education, 4720 Montgomery Lane, Bethesda, Maryland 20824-1220, (301) 652-2682.

### Faculty

*Associate Dean and Chair:* James Gordon, Ed.D., P.T., FAPTA

*Associate Chair:* Cheryl Resnik, P.T., DPT

*Professors:* James Gordon, Ed.D., P.T., FAPTA; Carolee J. Winstein, Ph.D., P.T., FAPTA; Francisco Valero-Cuevas, Ph.D.

*Professors (Clinical Scholars):* Linda Fettes, Ph.D., P.T.; Robert F. Landel, DPT, OCS, CSCS, MTC

*Associate Professors:* Lucinda L. Baker, Ph.D., P.T.; Nina S. Bradley, Ph.D., P.T.; Sandra Howell, Ph.D., P.T.; Christopher Powers, Ph.D., P.T., FAPTA; George J. Salem, Ph.D.; Nicolas Schweighofer, Ph.D.

*Assistant Professor:* Jason Kutch, Ph.D.

*Associate Professors of Clinical Physical Therapy:* Beth Fisher, Ph.D., P.T.; Kornelia Kulig, Ph.D., P.T., FAPTA; Cheryl Resnik, P.T., DPT; Katherine Sullivan, Ph.D., P.T.

*Assistant Professors of Clinical Physical Therapy:* Jesus Dominguez, Ph.D., P.T.; Jacquelyn Dylla, P.T., DPT; Rose Hamm, DPT, CWS; Yogi Matharu, DPT, OCS; Michael O'Donnell, P.T., DPT, OCS, FAAOMPT; Marisa Perdomo, P.T., DPT; Amy Pomrantz, P.T., DPT, OCS, ATC; E. Todd Schroeder, Ph.D.; Susan Sigward, Ph.D., P.T., ATC;

Michael Simpson, D.P.T.; Julie Tilson, P.T., DPT, NCS; Kimiko Yamada Heng, DPT, ATC, CSCS

*Assistant Professors of Research Physical Therapy:* Steven Cen, Ph.D., Christina Dieli-Conwright, Ph.D.

*Instructors of Clinical Physical Therapy:* Andrea Austin, P.T., DPT; Geoffrey Cariker, P.T., DPT; Aimee Diaz, P.T., SCS, ATC; Wilfred Diaz, P.T., DPT, OCS; Lori Ginoza, P.T., DPT, NCS; Julie A. Guthrie, P.T., DPT, OCS; Erin Hayden, P.T., DPT, OCS; Cole Hughlett, P.T., DPT; Nicole Irizarry, P.T., DPT; Sean Johnson, DPT, OCS; Yasuyuki Kasayama, DPT, OCS; Daniel Kirages, P.T., DPT, OCS, FAAOMPT; Cherise Lathan, P.T., DPT; Clarisa Martinez, DPT; David Richards, P.T., DPT; Jeffrey Rodrigues, P.T., DPT, CCS; Scott Russell, P.T., DPT; Erica Sigman, DPT, OCS; Jonathan Sum, P.T., DPT, OCS, CSCS

*Adjunct Associate Professors:* Joseph Godges, DPT; Ning Lan, Ph.D.; Stephen Reischl, P.T., DPT, OCS; Rizkalla Zakhary, Ph.D.

*Adjunct Assistant Professors of Clinical Physical Therapy:* Mike Andersen, P.T., DPT; Kyle F. Baldwin, P.T., DPT; Julia Burlette Itamura, P.T., DPT, OCS; Lily Cabellon, M.D.; Jason Cozby, DPT, OCS; Sharon DeMuth, P.T., DPT; Daniel Farwell, DPT; Sean Flanagan, Ph.D., ATC, CSCS; Robert Grego, Ph.D.; Larry Ho, P.T., DPT, OCS; Sally Ho, P.T., DPT, OCS; Robbin Howard, P.T., DPT, NCS; John Jankoski, MPT, NCS, OCS; Susan Layfield, P.T., DPT, M.S., OCS; Covey Lazoras, DPT, NCS; Rebecca Lewthwaite, Ph.D.; Ndidiamaka Matthews, P.T., DPT, NCS; John Meyer, P.T., DPT, OCS; Elizabeth Poppert, P.T., DPT, M.S., OCS; Gary Souza, P.T., DPT, OCS

*Adjunct Instructors of Clinical Physical Therapy:* Ginelle Amormino, P.T., DPT; Liz Bottrell, P.T., DPT; Julie Hershberg, P.T., DPT, NCS; Lauren Raquel Leporini, DPT; Mils Limcay, P.T., DPT, OCS; James Liston, M.Ed., CSCS; Jill Masutomi, P.T., DPT, PCS; Claire McLean, DPT, NCS; Lisa Meyer, P.T., DPT; Lisa Nocetti-DeWit, P.T., DPT, ATC; Cassandra Sanders-Holly, P.T., DPT; Claire Smith, P.T., DPT; Katie Weimer, P.T., DPT; Rami Weinberg, DPT, CSCS, OCS; Noriko Yamaguchi, P.T., DPT, CSCS; Maria Zibell, P.T., MPT

*Emeritus Professors:* Helen J. Hislop, Ph.D., Sc.D., FAPTA; Jacquelin Perry, M.D. (*Orthopedics*)

*Emeritus Associate Professor:* Lenore M. Krusell, M.A., P.T.

### Programs

The Division of Biokinesiology and Physical Therapy offers multiple degrees, certificates and clinical residency programs allowing graduates the opportunity to choose educational programs that will expose them to cutting-edge research and scientific advancements, in turn creating innovators in the physical therapy profession. The largest degree program is the three-year Doctor of Physical Therapy (DPT), which is offered in addition to a post professional DPT, and a post professional DPT and Master of Public Health dual degree. The division also offers a Ph.D. in Biokinesiology, one of the nation's first Ph.D. degrees in physical therapy education, as well as a Ph.D. in Biokinesiology and Physical Therapy. The graduate curricula for the Master of Science and Doctor of Philosophy degrees are open to all qualified students who are or are not physical therapists.

## Master of Science

Graduate study for the Master of Science in Biokinesiology is open to individuals who have a bachelor's degree and who have a strong interest in movement science.

### Admission Requirements

Admission requirements include a superior grade point average in cumulative undergraduate and graduate course work (if applicable). Applicants should score at least 600 in each area of the Graduate Record Examinations. Applicants are to provide the department with three letters of recommendation. The faculty may request a personal interview

before making a decision on admission. Admission will be considered for the fall semester only. The application deadline is November 1. All applicants should contact the Division of Biokinesiology and Physical Therapy for advisement.

**Prerequisites**

The prerequisite for applicants to the Master of Science program in biokinesiology is either: (a) a bachelor's degree or higher with a science major or equivalent; or (b) a bachelor's or master's degree in physical therapy with appropriate basic science content. Courses completed at the time of application must include work (with appropriate laboratory study) in chemistry, physics, calculus and biology. Highly recommended is course work in anatomy, physiology, histology, kinesiology, trigonometry, neuroscience, analytical geometry, exercise physiology, biochemistry and computer programming. Applicants with no background in cellular or molecular biology may be required to take PT 509 in the entry-level DPT program. Candidates should have some degree of computer literacy. International applicants will be considered on a special evaluation of credentials.

Students deficient in certain prerequisites may be admitted subject to completion of requirements within two years after admission. An additional year may be granted upon review of the student's program by a faculty committee. Work in any prerequisite subjects will not be part of the required units for the Master of Science.

**Degree Requirements**

Completion of the degree requires satisfactory completion of a minimum of 32 credits of course work at the 500 level or above, a research project (BKN 559 and BKN 590), and a comprehensive examination administered with the chair of the Biokinesiology Committee acting as the examination adviser.

REQUIRED COURSES		UNITS
BKN 550	Neurobehavioral Basis of Movement	4
BKN 551	Musculoskeletal and Biomechanical Basis of Movement	4
BKN 552	Physiological Basis of Voluntary Movement	4
BKN 559	Readings in Biokinesiology	1-4, max 8
BKN 590	Directed Research	1-12
PM 510L	Principles of Biostatistics	4

Students must complete the three biokinesiology core courses (BKN 550, BKN 551, BKN 552) before sitting for their comprehensive examination. Substituting a course for one of the core courses may be allowed after receiving approval from the Biokinesiology Program Committee prior to the beginning of the course.

In order to fulfill the research project requirement, the following plan is suggested; however, each plan can be individualized based on the needs of the student and/or adviser:

1. Select a research professor (from the department) whose work interests them. This should be done by the end of the first year of study.
2. After receiving the professor's approval, sign up for BKN 559 (4 units) and complete a semester reading the literature pertinent to the professor's work.
3. The following semester, sign up for BKN 590 (4 units) and participate in an ongoing research project that is being conducted by the professor. The research paper must be completed within the semester for which BKN 590 units are being given.

See the Doctor of Philosophy in Biokinesiology section, page 717, for a list of courses available to M.S. students.

**Doctor of Physical Therapy**

**Post Professional Doctor of Physical Therapy Program**

Applicants must be experienced physical therapy clinicians licensed to practice in the United States. Alternatively, foreign trained therapists must be graduates of institutions recognized by the American Physical Therapy Association. Applicants must also hold a master's degree in physical therapy or a field related to physical therapy practice. Generally, a minimum grade point average of 3.0 on a 4.0 scale as well as a minimum score of 500 on each of the three components of the Graduate Record Examinations are required. The degree requirement includes successful completion of 30-31 units as described in the following three sections:

REQUIRED COURSES	UNITS
PT 573	Physical Examination and Differential Diagnosis in Patients with Medical Disorders 2
PT 585	Physical Examination and Differential Diagnosis in Patients with Neurological Disorders, or 2

PT 624a	Neurological Differential Diagnosis and Therapeutic Interventions	3
PT 591	Physical Examination and Differential Diagnosis in Patients with Orthopedic Disorders	2
PT 605	Orthopedic Radiology	2
PT 607	Clinical Scanning	2
PT 608	Pharmacotherapeutics	2

**ELECTIVES (A MINIMUM OF 9 UNITS IS REQUIRED, ONE FROM EACH CATEGORY IS RECOMMENDED)**

Anatomy		UNITS
BKN 551	Musculoskeletal and Biomechanical Basis of Movement	4
BKN 563	Biomechanics	2
BKN 573ab	Advanced Dissection	2
PT 514L	Musculoskeletal Anatomy	4
PT 534	Neuroanatomy	3
PT 554L	Analytical Anatomy	3
PT 622	Advanced Management of Spinal Disorders	3
PT 623	Advanced Management of Extremity Disorders	3

Neurobiology		UNITS
BKN 550	Neurobehavioral Basis of Movement	4
BKN 566	Neurobiology of Locomotion	2
BKN 578	Classic Readings in Biokinesiology	2
BKN 587ab	Physiological Correlates of Therapeutic Exercise	4-4
BKN 593	Behavioral Basis of Motor Control and Learning	3
PT 509	Cellular and Systems Physiology	3
PT 546	Neuropathology	3
PT 549L	Clinical Exercise Physiology	4
PT 569	Fundamentals of Neuroscience	4
PT 624bL	Neurological Differential Diagnosis and Therapeutic Interventions	3

*Exercise Physiology*

BKN 552	Physiological Basis of Voluntary Movement	4
BKN 587ab	Physiological Correlates of Therapeutic Exercise	4-4
BKN 588	Physiology and Biomechanics of Resistance Exercise	2
PT 509	Cellular and Systems Physiology	3
PT 549L	Clinical Exercise Physiology	4
PT 571L	Clinical Management of Cardiopulmonary Dysfunction	4
PT 622	Advanced Management of Spinal Disorders	3
PT 624bL	Neurological Differential Diagnosis and Therapeutic Interventions	3

*Capstone Project (PT 592)*

This required project provides the student with the opportunity to synthesize the learning experiences of the DPT program. It can take the form of a case study, a learning module for students or patients, a business plan for a unique form of health care delivery, or some other innovative concept. Work towards the completion of the project is done under the guidance of a single faculty member or a committee, depending on the magnitude and scope of the project. The primary faculty adviser will determine the unit value of the project.

A clinical residency is also available as part of the post-professional DPT program.

#### **Certificate in Orthopedic Physical Therapy Certificate in Neurologic Physical Therapy Clinical Residency Programs**

These programs are directed at practicing clinicians who seek post-professional clinical residency education in orthopedic or neurologic physical therapy and wish to obtain an academic credential for its completion.

*Admission Requirements, Prerequisites and Degree Requirements*

Admission requirements such as grade point average, GRE scores and P.T. licensure are the same as those for the post-professional DPT. In addition to the above listed requirements, experience in orthopedic physical therapy as evidenced by the years in practice and post-graduate course work taken will be assessed in the applicant's portfolio. The faculty may request a personal interview. Admission will be considered for fall semester only. Deadline for application is four months prior to the proposed starting date. All applicants should contact the Division of Biokinesiology and Physical Therapy for advisement. Completion of the certificate requires satisfactory completion of a minimum of 15 units.

**REQUIRED COURSES FOR CERTIFICATE IN**

<b>ORTHOPEDIC PHYSICAL THERAPY</b>		<b>UNITS</b>
PT 595abcd	Residency in Advanced Clinical Physical Therapy	1-4 each
PT 622	Advanced Management of Spinal Disorders	3
PT 623	Advanced Management of Extremity Disorders	3

**REQUIRED COURSES FOR CERTIFICATE IN**

<b>NEUROLOGIC PHYSICAL THERAPY</b>		<b>UNITS</b>
PT 595abcd	Residency in Advanced Clinical Physical Therapy	1-4 each
PT 624abL	Neurological Differential Diagnosis and Therapeutic Interventions	3-3

#### **Doctor of Physical Therapy and Master of Public Health**

The Post Professional Doctor of Physical Therapy (DPT) and the Master of Public Health (MPH) dual degree program offers the opportunity for physical therapy clinicians to pursue a doctoral-level education in combination with an integrated approach to health care. The program spans four years. Students begin the first one to two years completing MPH core and elective course work in the Department of Preventive Medicine. The remaining years are devoted to program requirements in physical therapy.

#### **Professional Entry-Level Doctor of Physical Therapy Program**

This program comprises six semesters and two summer courses for completion of the required 115 units. Clinical experience (clerkship) is part of the curriculum during all three years. The Division of Biokinesiology and Physical Therapy awards the DPT to enrolled students who have satisfactorily completed the three-year curriculum. For successful completion, students must complete all course work with a minimum cumulative GPA of 2.75, meet all professional standards and pass all clinical clerkships.

#### **Admission Requirements (Entry-Level)**

Applicants are required to complete the equivalent of a U.S. baccalaureate degree at an accredited college or university prior to matriculation. Prerequisite course work must include: four courses in the biological sciences (including human anatomy, human physiology and either cell or molecular biology); one year of college physics; one year of college chemistry; one semester of college mathematics; two courses in psychology; one course in composition and writing; and one course in either literature or history. Human anatomy, human physiology, physics and

chemistry must include laboratories. The following courses are highly recommended: biochemistry, calculus, kinesiology, exercise physiology, neuroscience, genetics and a cross-cultural course in sociology. Applicants should be computer literate.

Students from foreign countries must have completed one year of study in the United States prior to application. Credits from foreign institutions must be approved by the USC Office of Admission.

*Graduate Record Examinations (GRE)*

The GRE is required of all applicants. In general, minimum scores of 500 are required on each of the general test measures of verbal, quantitative and analytical ability.

*Applications*

Applications are available in September for the class entering in September of the following year. The deadline for receipt of applications is December 1 of each year. Only one class is admitted each year.

The Admissions Committee reviews all information submitted. Applicants may be requested to appear for a personal interview. It is highly recommended that all applicants make an appointment to visit the division's office located on the Health Sciences Campus and talk with students and members of the faculty.

*Notice of Acceptance*

Notice of acceptance will be sent to successful candidates no earlier than late January and continually thereafter until the class is filled. In no case will an acceptance be offered earlier than one year before anticipated enrollment.

Candidates should reply to an offer of acceptance within three weeks enclosing a \$1,000 deposit (nonrefundable) which is credited to tuition at the time of registration. A letter of withdrawal is required if applicants wish to relinquish their place in the class; release is granted automatically upon receipt of the letter.

#### **Degree Requirements (Entry-Level)**

The DPT is awarded to enrolled students who have completed satisfactorily the three-year curriculum of 115 credits (depending on electives chosen). The minimum number of credits required for graduation is 115. The minimum GPA required for graduation is 2.75. Clinical experience (clerkship) is part of the curriculum during all three years.

The Division of Biokinesiology and Physical Therapy uses a system of student evaluation and grading that is designed to encourage self-reliance, to stimulate the student's independent quest for knowledge and to promote excellence in clinical and academic achievement.

Faculty of the program are responsible for establishing evaluation criteria appropriate to the objectives of each course and for specifying the manner in which evaluative information is to be gathered. For clinical evaluation, descriptive comments based on the student's performance are submitted by faculty and clinical instructors to the student's permanent file.

REQUIRED COURSES		UNITS
PT 509	Cellular and Systems Physiology	3
PT 514L	Musculoskeletal Anatomy	4
PT 516	Principles of Disease	2
PT 521L	Basics of Patient Management	4
PT 529	Life Span Motor Control	3
PT 530ab	Therapeutic Exercise	2-2
PT 534L	Neuroanatomy	3
PT 536	Pathology of Cardiopulmonary Disease and General Medical Conditions	3
PT 539	Clinical Pharmacology	1
PT 546	Neuropathology	3

PT 549L	Clinical Exercise Physiology	4
PT 551L	Therapeutic Application of Physical Agents	2
PT 554L	Analytical Anatomy	3
PT 561abcde	Evidence for Physical Therapist Practice	2-2-2-2-2
PT 566	Disorders of the Musculoskeletal System	3
PT 569	Fundamentals of Neuroscience	4
PT 571L	Clinical Management of Cardiopulmonary Dysfunction	4
PT 574	Clinical Biomechanics	3
PT 581L	Clinical Management of the Patient with Neurological Dysfunction	5
PT 582	Mechanics of Human Gait	2
PT 583L	Clinical Electrophysiology	3
PT 600abcdez	Clinical Clerkship	1-3-1-1-3-0
PT 606	Clinical Imaging	2
PT 621L	Clinical Management of the Patient with Musculoskeletal Dysfunction	5
PT 630	Integrated Management of the Upper and Lower Extremities	3

PT 631	Integrated Management of the Axial Skeletal System and Related Movement Disorders	3
PT 632	Integrated Patient Management Seminar	5
PT 650	Differential Diagnosis in Physical Therapy	2
PT 660	Advanced Clerkship with Academic Integration	5
PT 665	Advanced Clinical Clerkship	8
ELECTIVE COURSES		UNITS
PT 612L	Physical Therapy Management of Spinal Disorders	2
PT 613L	Physical Therapy Management of the Foot and Lower Quarter	2
PT 614L	Evaluation and Management for Hand Dysfunction	2
PT 615	Management of the Complicated Patient	2
PT 618L	Seminar in Advanced Neurological Rehabilitation	2
PT 619L	Clinical Electrophysiology	2
PT 654	Physical Therapy Interventions in Pediatrics	2

## Doctor of Philosophy in Biokinesiology

The graduate program leading to the Doctor of Philosophy in Biokinesiology is designed to prepare candidates for research and teaching at the university level. Actual programs of study will be designed with a degree of flexibility directed toward individual students who seek to become independent scholars.

### Admission Requirements

Applicants must meet all general admission requirements of the university. Admission requirements include a superior grade point average in cumulative undergraduate and graduate course work (if applicable). In addition, applicants should score at least 600 in each area of the Graduate Record Examinations (GRE) and have some research experience. Students admitted for the Master of Science degree are not automatically admitted to the Doctor of Philosophy program. The Master of Science is not required as a prerequisite to the Ph.D. but may be advised.

Applicants must have a personal interview with the program faculty. A student can be considered for admission only when a member of the full-time Ph.D. faculty has agreed to serve as the student's Ph.D. adviser. Three letters of recommendation and duplicate transcripts must be sent to the division for preliminary evaluation, although final acceptance is based upon the official USC application procedure.

### Prerequisites (Ph.D. Program)

The prerequisite for applicants to the Ph.D. program in biokinesiology is either: (a) a bachelor's degree or higher with a science major or equivalent; or (b) a bachelor's or master's degree in physical therapy with appropriate basic science content. Courses completed at the time of application must include work (with appropriate laboratory study) in chemistry, calculus, physics and biology. Highly recommended is course work in anatomy, physiology, histology, cell biology, exercise physiology, kinesiology, biochemistry, neuroscience, trigonometry, analytical geometry and computer programming.

Candidates should be computer literate. International applicants will be considered upon evaluation of credentials by the USC Office of Admission.

Students deficient in certain prerequisites may be admitted subject to completion of requirements within two years after admission. An additional year may be granted upon review of the student's program by a faculty committee. Work in any prerequisite subject will not be part of the required 60 units for the Doctor of Philosophy.

### Screening Procedure

A screening procedure will be offered twice each year for qualified students. It must be taken prior to the completion of 24 units at the 500-level or higher. The purpose of the screening procedure is to assess the progress of the Ph.D. student and to determine whether that progress is sufficient to continue in the Ph.D. program. Passing the procedure is a prerequisite for continuation in the Ph.D. program.

**Course Requirements**

A minimum of 60 units is required for the Doctor of Philosophy degree.

REQUIRED COURSE WORK		UNITS
BKN 550	Neurobehavioral Basis of Movement	4
BKN 551	Musculoskeletal and Biomechanical Basis of Movement	4
BKN 552	Physiological Basis of Voluntary Movement	4
BKN 790	Research	1-12
BKN 794abcdz	Doctoral Dissertation	2-2-2-2-0
INTD 500*	Ethics and Accountability in Biomedical Research	1
PM 510L**	Principles of Biostatistics	4
PM 511aL**	Data Analysis	4

\*Or equivalent graduate ethics course.

\*\*Or equivalent graduate level statistics.

Ph.D. students must complete three core courses (BKN 550, BKN 551, BKN 552) before participating in the screening procedure. Substituting a course for one of the core courses may be allowed after receiving approval from the Biokinesiology Program Committee prior to the beginning of the course.

Other course requirements (to complete 60 units) will vary according to the specific needs of each student. Course work other than departmental offerings is encouraged and may be required by the student's guidance committee.

COURSES AVAILABLE FOR M.S./PH.D. STUDENTS		UNITS
BKN 559	Readings in Biokinesiology	1-4, max 8
BKN 563	Biomechanics	2
BKN 566	Neurobiology of Locomotion	2

BKN 567	Advanced Topics in Biomechanics	2
BKN 573ab	Advanced Dissection Anatomy	2-2
BKN 575	Principles of Musculoskeletal Imaging	2
BKN 585	Systematic Research Writing	3
BKN 587ab	Physiological Correlates of Therapeutic Exercise	4-4
BKN 588	Physiology and Biomechanics of Resistance Exercise	4
BKN 590	Directed Research	1-12
BKN 593	Behavioral Basis of Motor Control and Learning	3
BKN 594abz	Master's Thesis	2-2-0
BKN 599	Special Topics	2-4, max 8
BKN 615	Principles of Skeletal Adaptation	4
BKN 617	Modeling the Motor System: An Introduction	2
BKN 618L	Modeling the Motor System: Laboratory	1
BKN 621	Electromyography in Research and Practice	3
BKN 623	Neuroplasticity and Neural Repair	3
BKN 672	Advanced Independent Study in Biokinesiology	1-4, max 8
BKN 790	Research	1-12
BKN 794abcdz	Doctoral Dissertation	2-2-2-2-0

**Foreign Language Requirement**

There is no foreign language requirement.

**Guidance Committee**

Upon successful completion of the screening examination the student and the major adviser will select a guidance committee for continuing course work and independent study. The guidance committee comprises five members: three to four full-time faculty from the Division of Biokinesiology and Physical Therapy, one whom serves as committee chair, and one or two faculty members outside the division.

The guidance committee will recommend course work, independent study and readings in the major and cognate areas.

**Qualifying Examination**

The Ph.D. qualifying examination is offered during the fall or spring semesters. The qualifying examination concentrates on the student's ability to demonstrate knowledge in the major academic area chosen and its relation to other areas of study offered in the department. The qualifying examination has both written and oral components. A student failing any part of the examination may be allowed one additional opportunity to pass that portion at the discretion of the guidance committee, within the regulations of the Graduate School governing the repetition of qualifying examinations.

**Dissertation Committee**

After the qualifying examination has been passed and a dissertation topic approved, the guidance committee shall be known as the dissertation committee and may be reduced to three members upon unanimous recommendation to the dean of graduate studies. One of the three members must be from outside the major division. The chair of the dissertation committee will be the principal research adviser.

**Dissertation and Oral Defense**

An acceptable dissertation based on original investigation is required. The dissertation must show technical mastery of a special field, capacity for independent research and scholarly ability.

The dissertation and the defense or final oral must have the unanimous approval of the dissertation committee. The dissertation should be complete within three years of the date the proposal is approved.

## Doctor of Philosophy in Biokinesiology and Physical Therapy

The graduate program leading to the Doctor of Philosophy in Biokinesiology and Physical Therapy offers an opportunity for highly qualified students to prepare for careers in academic health care. The curriculum is designed for individuals who envision a career that combines training for physical therapy practice and scholarly research.

**Admission Requirements**

Applicants must have earned a bachelor's degree with a superior grade point average as well as Graduate Record Examinations scores. A personal interview with program faculty is required. Prerequisite course work must include: four courses in the biological sciences with labs (including human anatomy, human physiology and cell or molecular biology); one year of college physics with lab;

one year of college chemistry with lab; one semester of college mathematics; two courses in psychology; one course in composition and writing; one course in literature or history. Courses that are highly recommended include: biochemistry, calculus, kinesiology, exercise physiology, neuroscience, genetics and a cross-cultural course in sociology.

Application for admission to the Division of Biokinesiology and Physical Therapy requires submission of two sets of materials: special division application and university application forms. Students are admitted for study in the Ph.D. in Biokinesiology and Physical Therapy program beginning in the fall semester of each academic year. Both sets of applications must be submitted by December 1 of the previous year. At the time of admission to the program, the student must identify a faculty member who will serve as an adviser throughout every phase of study.

**Degree Requirements**

This degree is under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section (page 86) and the Graduate School section of this catalogue (page 97) for general regulations.

YEARS 1, 2 - REQUIRED COURSES		UNITS
PM 510L	Principles of Biostatistics	4
PM 511aL	Data Analysis	4
PT 507	Professional Practice: Therapist Perspective	2
PT 509	Cellular and Systems Physiology	3
PT 514L	Musculoskeletal Anatomy	4
PT 516	Principles of Disease	2
PT 521L	Basics of Patient Management	4
PT 529	Life Span Motor Control	3
PT 534L	Neuroanatomy	3
PT 536	Pathology of Cardiopulmonary Disease and General Medical Conditions	3
PT 539	Clinical Pharmacology	1
PT 546	Neuropathology	3
PT 547	Professional Practice: System Perspective	2

PT 549L	Clinical Exercise Physiology	4
PT 551L	Therapeutic Applications of Physical Agents	2
PT 554L	Analytical Anatomy	3
PT 557	Professional Practice: Patient Perspective	2
PT 566	Disorders of the Musculoskeletal System	3
PT 569	Fundamentals of Neuroscience	4
PT 571L	Clinical Management of Cardiopulmonary Dysfunction	4
PT 574	Clinical Biomechanics	3
PT 581L	Clinical Management of the Patient with Neurological Dysfunction	5
PT 582	Mechanics of Human Gait	2
PT 583L	Clinical Electrophysiology	3
PT 600abcdez	Clinical Clerkship 1-3-1-1-3-0	
PT 621L	Clinical Management of the Patient with Musculoskeletal Dysfunction	5

YEARS 3, 4, 5 - REQUIRED COURSES		UNITS
BKN 790	Research	1-12
BKN 794abcdez	Dissertation	2-2-2-2-0

YEAR 6 - REQUIRED COURSES		UNITS
PT 630	Integrated Management of the Upper and Lower Extremities	3
PT 631	Integrated Management of the Axial Skeletal System and Related Movement Disorders	3
PT 632	Integrated Patient Management Seminar	5

PT 660	Advanced Clerkship with Academic Integration	5
PT 665	Advanced Clinical Clerkship	8

A minimum of 116 units is required for completion of this program.

**Estimated Calendar of Study**

*Basic and Clinical Science Foundation Courses (Years 1, 2)*

The student will enroll in all required course work and clinical experiences *excluding* BKN 790, BKN 794abcdez, PT 630, PT 631, PT 632, PT 660, PT 665.

*Qualifying Exam (Year 3)*

The student will select a guidance committee and begin preparing a research proposal (register for BKN 790). During this time, the student is encouraged to enroll in key elective courses, both inside and outside the division, which will enhance research proposal development. The expectation is that the student will sit for the qualifying exam and achieve doctoral candidacy at the end of year three.

*Research and Dissertation Preparation (Years 4, 5)*

The student will complete the research project and prepare a dissertation (register for BKN 790 and BKN 794). The expectation is that the student will successfully defend the dissertation by the end of year five.

*Completion of Internship Requirement (Year 6)*

The student will complete the required internships to achieve clinical competency (register for PT 630, PT 631, PT 632, PT 660 and PT 665).

Courses of Instruction

**BIOKINESIOLOGY (BKN)**

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**BKN 504 Neuromuscular Systems (3, Fa)**  
(Enroll in BME 504)

**BKN 550 Neurobehavioral Basis of Movement (4, Sp)** Introduction to the neurobehavioral and neurobiological basis of movement. Review of information processing, neural basis of perception/action, motor systems, and higher cognitive function and behavior. *Recommended preparation:* biology and physiology.

**BKN 551 Musculoskeletal and Biomechanical Basis of Movement (4, Fa)** Introduction to the mechanical properties of the musculoskeletal system. Review of connective tissue and muscle mechanics, arthrology, anatomical design and statics. Laboratory dissections illustrate biomechanical concepts.

**BKN 552 Physiological Basis of Voluntary Movement (4, Sp)** Consideration of the neuromuscular and musculoskeletal physiology of voluntary movement.

**BKN 559 Readings in Biokinesiology (1-4, max 8, FaSp5m)** Independent review and synthesis of papers appearing in the current literature.

**BKN 563 Biomechanics (2, 2 years, Sp)**

Advanced study of the kinematics of human motion. Emphasis on the inverse dynamics solution to qualify forces and moments of force. Lecture and demonstration.

**BKN 566 Neurobiology of Locomotion (2)**

Topics include developmental biology of embryonic motility, central pattern generators, descending neural regulation, sensory modulation, and perception/action influences on the motor control of locomotion. *Prerequisite:* BISC 524, BISC 525; *recommended preparation:* BKN 550.

**BKN 567 Advanced Topics in Biomechanics (2, Sp)** Advanced examination of motion-analysis techniques, applications and data interpretation. Magnetic tracking techniques, upper-extremity kinematics, energy/work/impulse concepts, intersegmental dynamics, and EMG muscle modeling are examined. *Prerequisite:* BKN 563.

**BKN 573ab Advanced Dissection Anatomy (2-2, FaSpSm)** Advanced analysis of systems or structures with dissection. Emphasis on correlations with function.

**BKN 575 Principles of Musculoskeletal Imaging (2, Sm)** Basic principles of musculoskeletal imaging as it relates to biomechanics research. Topics include MRI physics, variable imaging parameters and selection of pulse sequences.

**BKN 578 Classic Readings in Biokinesiology (2)** A seminar course in which students read and discuss classic scientific papers that have shaped the development of the movement sciences over the past 150 years.

**BKN 585 Systematic Research Writing (3, Sm)** Development of analytical journal reading skills and proficiency in scientific writing. Lecture and tutorial format.

**BKN 587ab Physiological Correlates of Therapeutic Exercise (4-4, FaSp)**  
*a:* Responses of the physically handicapped to exercise. Emphasis on muscle, energy metabolism, body temperature, environment, endocrine considerations. Strengthening, training, endurance, and evaluation of performance. *b:* Responses of the physically handicapped to exercise, with emphasis on cardiovascular and respiratory adaptations and pathology.

**BKN 588 Physiology and Biomechanics of Resistance Exercise (2, Sp)** Science of resistance-exercise prescription, adaptation, and outcome assessment. Topics include periodization, neuromuscular and connective-tissue adaptation, special populations, and biomechanical considerations.

**BKN 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**BKN 593 Behavioral Basis of Motor Control and Learning (3, Fa)** Seminar in movement science dealing with the behavioral basis of motor control and learning from an information processing perspective. *Recommended preparation:* statistics; psychology.

**BKN 594abz Master's Thesis (2-2-0)** Credit on acceptance of thesis. Graded IP/CR/NC.

**BKN 599 Special Topics (2-4, max 8, FaSpSm)** Studies of scientific theory in physical therapy.

**BKN 615 Principles of Skeletal Adaptation (4, 2 years, Sm)** Introduction to the integrative physiology of skeletal adaptation to mechanical loading. Emphasis on mechanical and chemical regulation of bone mass.

**BKN 617 Modeling the Motor System: An Introduction (2, 2 years, Sp)** Introduction of basic principles and models of the primate motor system. Emphasis on arm control.

**BKN 618L Modeling the Motor System: Laboratory (1, 2 years, Sp)** Introduction of computer programming and implementation of computational models in a laboratory setting.

**BKN 621 Electromyography in Research and Practice (3, 2 years, Fa)** Physiology and electrophysiology of muscular contraction, how it is collected, quantified and processed. Uses of electromyographic information for research and clinical assessments. *Recommended preparation:* human anatomy, skeletal muscle physiology.

**BKN 623 Neuroplasticity and Neural Repair (3, 2 years, Fa)** Integration of basic research on neuroplasticity and clinical research on central nervous system reorganization after brain injury. Implication for neurorecovery and rehabilitation.

**BKN 672 Advanced Independent Study in Biokinesiology (1-4, max 8, FaSpSm)** Examination of selected mechanisms underlying normal movement and pathological movement. Ph.D. students only.

**BKN 790 Research (1-12, FaSpSm)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**BKN 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm)** Credit on acceptance of dissertation. Graded IP/CR/NC.

#### PHYSICAL THERAPY (PT)

**PT 507 Professional Practice: Therapist Perspective (2, Fa)** Identification of personal values, attitudes and beliefs and their relationship to personal development into a health care provider. Emphasis on communication skills, ethics, and professional guidelines, laws and regulations.

**PT 509 Cellular and Systems Physiology (3, Fa)** Selected subjects in cellular and systems physiology. Emphasis on molecular and cellular aspects of neuromuscular function; also renal and endocrine physiology.

**PT 514L Musculoskeletal Anatomy (4, Fa)** Musculoskeletal anatomy, innervation, blood supply, and function: intensive study of the head, neck, trunk, and limbs. Lecture, dissection laboratory.

**PT 516 Principles of Disease (2, Fa)** Principles and mechanisms of genetics, immunology, infection, wound healing, and oncology. Lecture.

**PT 521L Basics of Patient Management (4, Fa)** Development of basic decision-making skills, professional behaviors and impairment assessment in patients with musculoskeletal neurologic and/or cardiopulmonary dysfunction. Lecture, laboratory.

**PT 529 Life Span Motor Control (3, Fa)** Introduction to sensorimotor systems, overview of current perspectives in motor control from fetus through late adulthood, and clinical tests of motor proficiency. Lecture, limited laboratory.

**PT 530ab Therapeutic Exercise (a: 2, Sp; b: 2, Sm)** *a:* Theoretical and practical principles for evaluation of exercise need and prescription of exercise programs. Emphasis on approaches for patients with musculoskeletal deficits. (Duplicates credit in former PT 530.) *b:* Examination of needs analysis and prescription of exercise programs for special patient populations and assessment of current community trends in exercise and wellness.

**PT 534L Neuroanatomy (3, Sm)** Organized approach to structures in the brain, spinal cord and peripheral nervous systems that subserve motor, sensory, and integrative functions, memory, cognitive and special senses. Lecture, laboratory.

**PT 536 Pathology of Cardiopulmonary Disease and General Medical Conditions (3, Fa)** Pathology and pathophysiological mechanisms in disease of the cardiac, pulmonary and circulatory systems; examination of diabetes, burns, and other disabling medical disorders. Lecture. *Prerequisite:* PT 509, PT 514L, PT 516, PT 521L, PT 529.

**PT 539 Clinical Pharmacology (1, Fa)** Effects of commonly used drugs in patients with physical disability; side effects that alter physical performance or responses to exercise.

**PT 546 Neuropathology (3, Sp)** Pathology in the central and peripheral nervous systems that alter motor and sensory performance. Emphasis on loss of motion, excessive and involuntary movement disorders. Lecture. *Prerequisite:* PT 516, PT 534L.

**PT 547 Professional Practice: System Perspective (2, Sm)** Analysis of the integration of physical therapy practice into the national health care system; administration, budgeting and reimbursement for physical therapy services.

**PT 549L Clinical Exercise Physiology (4, Fa)** Adaptation of the human body to exercise and the use of exercise to modify human function. Lecture and laboratory.

**PT 551L Therapeutic Application of Physical Agents (2, Sp)** Physiologic responses to the application of thermal, mechanical, electromagnetic and hydrodynamic therapeutic procedures. Evaluation procedures and intervention planning. Lecture, laboratory. *Prerequisite:* PT 521L.

**PT 554L Analytical Anatomy (3, Sp)** Detailed kinesiological analysis of axial, spine, head, neck, face and bulbar muscles. Lecture, laboratory and clinical demonstration. *Prerequisite:* PT 514L.

**PT 557 Professional Practice: Patient Perspective (2, Sp)** Examination of issues related to professional-patient relationships, culture, lifestyles, ethnicity, gender and age. Emphasis on communication within a patient care model.

**PT 561abcde Evidence for Physical Therapist Practice (2-2-2-2-2) a:** Introduction to a patient-centered Evidence Based Practice model with emphasis on professional communication skills, ethics, professional guidelines, laws and regulations; *b:* introduction to acquiring, appraising and integrating research evidence; *c:* advanced critical analysis and application of research of evidence; *d:* advanced integration of patient values as influenced by culture, ethnicity, lifestyles, gender, and age into patient-centered clinical decision making; *e:* analysis of the integration of physical therapist practice into the national health care system; administration, budgeting and reimbursement for physical therapist services.

**PT 566 Disorders of the Musculoskeletal System (3, Sp)** Regional description of pathology and pathophysiological mechanisms of disorders of bone, connective tissue, and joints. Lecture, demonstration.

**PT 569 Fundamentals of Neuroscience (4, Sp)** Detailed analysis of neurophysiologic mechanisms underlying normal and abnormal motor and sensory function. Lecture. *Prerequisite:* PT 509, PT 516, PT 529, PT 534L.

**PT 571L Clinical Management of Cardiopulmonary Dysfunction (4, Fa)** Physical therapy evaluation and intervention in the care of patients with circulatory, cardiac, or pulmonary dysfunction. Lecture, case presentations, laboratory. *Prerequisite:* PT 521L.

**PT 573 Physical Examination and Differential Diagnosis in Patients with Medical Disorders (2, Fa)** Physical assessment and differential diagnosis in common medical conditions. Emphasis on factors that influence physical therapy or require referral back to the physician.

**PT 574 Clinical Biomechanics (3, Fa)** Introduction to the principles of biomechanics (statics, dynamics) as they apply to physical therapy practice. Emphasis on tissue mechanics, joint function and gait. Lecture. *Prerequisite:* PT 554L.

**PT 581L Clinical Management of the Patient with Neurological Dysfunction (5, Fa)** Physical therapy theory and methods for intervention in neurological dysfunction. Lecture, laboratory. Neuroanatomy lab available. *Prerequisite:* PT 509, PT 516, PT 521L, PT 529, PT 534L.

**PT 582 Mechanics of Human Gait (2, Sp)** Introduction to both normal and pathological gait. Emphasis on the basic components of abnormal ambulation including temporal-spatial factors, joint motion, kinetics, kinematics, and muscle activity. Lecture.

**PT 583L Clinical Electrophysiology (3, Sp)** Use of electrical currents to evaluate and treat musculoskeletal, neurological and wound disorders. Theory and practice. Lecture, laboratory. *Prerequisite:* PT 514L, PT 554L.

**PT 585 Physical Examination and Differential Diagnosis in Patients with Neurological Disorders (2, Fa)** Physical examination and differential diagnosis in neurologic disorders. Emphasis on factors that influence physical therapy or require referral back to the physician.

**PT 591 Physical Examination and Differential Diagnosis in Patients with Orthopedic Disorders (2, Sp)** Physical examination and differential diagnosis in orthopedic disorders. Emphasis on factors that influence physical therapy or require referral back to the physician.

**PT 592 Capstone Project (1-6, max 6, FaSpSm)** Synthesis of knowledge gained in the pursuit of D.P.T. degree through a case study, a learning module for students or patients, a business plan for a unique form of health care delivery, or some other innovative concept. The primary faculty adviser will determine the unit value of the project.

**PT 595abcd Residency in Advanced Clinical Physical Therapy (1-4 each, FaSpSm)** Residency open to students pursuing a Graduate Certificate in Orthopedic Physical Therapy or Neurologic Physical Therapy or the post-professional D.P.T. program. Graded CR/NC. P.T. Licensure required.

**PT 600abcdez Clinical Clerkship (1-3-1-1-3-0, FaSpSm) a:** Practical experience in two- or six-week physical therapy manual skills, decision making and professional behaviors. *b:* Practical experience in six-week physical therapy manual skills, decision making, and professional behaviors. *c:* Practical experience in two-week physical therapy psychomotor skills, decision making and professional behaviors. *d:* Practical experience in two-week physical therapy psychomotor skills, decision making and professional behaviors. *e:* Practical experience in six-week physical therapy psychomotor skills, decision making and professional behaviors. Graded CR/NC.

**PT 605 Orthopedic Radiology (2, Fa)** Study of normal and pathologic skeletal radiographic examinations.

**PT 606 Clinical Imaging (2, SpSm)** Elements of reading roentgenographs, CAT and MRI scans for the physical therapist. Lecture, demonstration, practical experience. Open only to Biokinesiology and Physical Therapy graduate students.

**PT 607 Clinical Scanning (2, Sp)** Survey of diagnostic imaging for orthopedic and neurologic disorders seen in physical therapy practice.

**PT 608 Pharmacotherapeutics (2, Fa)** Indications, contraindications, physiologic mechanisms, and side-effects of pharmacologic agents. Analysis of interactions between drugs and physical therapy interventions.

**PT 612L Physical Therapy Management of Spinal Disorders (2, FaSpSm)** Advanced evaluation and treatment skills for the management of individuals with spinal disorders. Lecture, laboratory. *Prerequisite:* PT 600d.

**PT 613L Physical Therapy Management of the Foot and Lower Quarter (2, Fa)** Advanced evaluation and treatment skills for management of individuals with lower extremity disorders. Lecture, laboratory. *Prerequisite:* PT 600d.

**PT 614L Evaluation and Management of Hand Dysfunction (2, Sp)** Pathology, evaluation, differential diagnosis and treatment of hand and wrist dysfunction. Lecture, laboratory. *Prerequisite:* PT 600d.

**PT 618L Seminar in Advanced Neurological Rehabilitation (2, Sp)** Advanced evaluation treatment, and problem solving skills for the individual with neurological dysfunction. Lecture, laboratory. *Prerequisite:* PT 600d.

**PT 619L Clinical Electrophysiology (2, Fa)** Advanced evaluation and treatment of individuals with peripheral nerve disorders using electrotherapy. Lecture, laboratory. *Prerequisite:* PT 600d.

**PT 621L Clinical Management of the Patient with Musculoskeletal Dysfunction (5, Sp)** Physical therapy theory and methods of evaluation and treatment of orthopedic dysfunction. Lecture, demonstration, laboratory. Dissection lab available. *Prerequisite:* PT 514L, PT 521L.

**PT 622 Advanced Management of Spinal Disorders (3, FaSpSm)** Theoretical and practical foundations in orthopedic rehabilitation of spinal disorders with emphasis on differential diagnosis from systemic manifestation. Lecture, laboratory, and case presentations. Open to licensed physical therapists only.

**PT 623 Advanced Management of Extremity Disorders (3, FaSpSm)** Theoretical and practical foundations in orthopedic rehabilitation of occupational, recreational and athletic disorders of the extremities; emphasis on differential diagnosis from systemic manifestations. Lecture, laboratory, and case presentations. Open to licensed physical therapists only.

**PT 624abL Neurological Differential Diagnosis and Therapeutic Interventions (3-3, FaSp)** Theoretical and practical foundations of clinical practice for specialization in neurologic physical therapy. *a:* Principles of neurologic differential diagnosis, mechanisms of neurorecovery and rehabilitation of focal neurologic disorders covered. *b:* Emphasis on advanced skills in neurologic differential diagnosis and rehabilitation for complex neurologic disorders.

**PT 630 Integrated Management of the Upper and Lower Extremities (3, FaSp)** Advanced evaluation and management of upper and lower extremity disorders and related movement dysfunction. *Prerequisite:* PT 600e.

**PT 631 Integrated Patient Management of the Axial Skeletal System and Related Movement Disorders (3, FaSp)** Advanced assessment and management of axial skeletal dysfunctions and related movement disorders. *Prerequisite:* PT 600e.

**PT 632 Integrated Patient Management Seminar (5, FaSp)** Integration of physical therapy management of complicated patients with concurrent musculoskeletal, cardiopulmonary and/or neurologic disorders. *Prerequisite:* PT 571L, PT 581L, PT 621L.

**PT 642abc Evidence Based Practice (2-2-2, a: 5m, b: Fa, c: Sp)** *a:* Practical considerations of evidence-based practice including patient interviews and search methods. *b:* Development of critical analysis skills of evidence to enhance critical thinking. *c:* Focus on evidence-based decision making using patient perspectives to effect optimal function outcomes.

**PT 650 Differential Diagnosis in Physical Therapy (2, FaSpSm)** Consideration of principle of differential diagnosis with emphasis on mastering this skill. Open only to Biokinesiology and Physical Therapy graduate students. *Recommended preparation:* completion of years 1 and 2.

**PT 654 Physical Therapy Intervention in Pediatrics (2, Sm)** Physical therapy management of commonly encountered pediatric diagnoses. Seminar, clinical laboratory. Open to students enrolled in physical therapy degree programs only.

**PT 660 Advanced Clerkship with Academic Integration (5, FaSp)** A 16-week clerkship consisting of a minimum of 24 hours per week in a part-time setting. Emphasis on the care of orthopedic, neurologic, pediatric or complicated medical conditions. Graded CR/NC. *Prerequisite:* PT 600e.

**PT 665 Advanced Clinical Clerkship (8, FaSp)** A 16-week clerkship consisting of a minimum of 36 hours per week in a full-time setting. Emphasis on care of orthopedic, neurologic, pediatric or complicated medical conditions. Graded CR/NC. *Prerequisite:* PT 600e.

### Faculty

*Associate Dean and Chair:* Florence A. Clark, Ph.D., OTR/L

*Associate Chair:* Ann Neville-Jan, Ph.D., OTR/L

*Professors:* Sharon Cermak, Ed.D.; Florence A. Clark, Ph.D., OTR/L; Gelya Frank, Ph.D.; Mary Lawlor, Sc.D., OTR/L; Cheryl Mattingly, Ph.D.; William Morgan, Ph.D.

*Associate Professors:* Ann Neville-Jan, Ph.D., OTR/L

*Assistant Professors:* Lisa Aziz-Zadeh, Ph.D.; Natalie Leland, Ph.D., OTR/L, BCG; Trudy Mallinson, Ph.D., OTR/L; Beth Pyatak, Ph.D., OTR/L; Shawn Roll, Ph.D., OTR/L, CWCE; Olga Solomon, Ph.D.; Barbara Thompson, Ph.D.

*Professor of Clinical Occupational Therapy:* Linda Fazio, Ph.D., OTR/L

*Associate Professors of Clinical Occupational Therapy:* Erna Blanche, Ph.D., OTR/L; Katie Jordan, OTD, OTR/L; Linda Liang, M.A., OTR/L; Julie McLaughlin Gray, Ph.D., OTR/L

*Assistant Professors of Clinical Occupational Therapy:* Sarah Bream, OTD, OTR/L; Carlin Daley, OTD, OTR/L; Camille Dieterle, OTD, OTR/L; Michelle Farmer, OTD, OTR/L; Don Gordon, Ph.D., OTR/L; Karrie Kingsley, OTD, OTR/L; Michael McNulty, OTD, OTR/L; Jaynee Meyer, OTD, OTR/L; Phoung Nguyen, OTD, OTR/L; Shannon O'Brien, OTD, OTR/L; Daniel Park, OTD, OTR/L; Lindsay Price, OTD, OTR/L; Samia Rafeedie, OTD, OTR/L; Chantelle Rice, OTD, OTR/L; Shelby Surfes, OTD,

ORT/L; Ashley Uyeshiro, OTD, OTR/L; Myka Winder, OTD, OTR/L

*Instructors of Clinical Occupational Therapy:*

Mahjabeen Aftab, OTR/L; Catherine Crowley, OTD, OTR/L; Kim Eggleston, M.A., OTR/L; Kathleen Gross, M.A., OTR/L; Heather Kitching, M.A., OTR/L; Michelle Lee, OTD, OTR/L; Stephanie Mielke, OTD, OTR/L; Tessa Milman, OTD, OTR/L; Whitney Pike, B.S., OTR/L; Deborah Pitts, MBA, OTR/L; Lindsay Pugh, M.S., CCC-SLP; Janice Rocker, M.S., OTR/L; Joan Vartanian, B.S., OTR/L

*Research Professor:* Michael Carlson, Ph.D.

*Research Adjunct Professor:* Susan Lipton Garber, Ph.D.

*Research Assistant Professors:* Jesus Diaz, OTD, OTR/L; Cheryl Vigen, Ph.D.

*Research Adjunct Assistant Professor:* Celso Delgado Jr., OTD, OTR/L

*Adjunct Associate Professor of Clinical Occupational Therapy:* Diane Kellegrew, Ph.D., OTR/L

*Adjunct Assistant Professors of Clinical Occupational Therapy:* Kiley Hanish, OTD, OTR/L; Susan McNulty, OTD, OTR/L; Bonnie Nakasuji, OTD, OTR/L, C/NDT; Rachel Proffitt, OTD, OTR/L; Clarissa

Saunders-Newton, Ph.D., OTR/L; Susan Spitzer, Ph.D., OTR/L

*Adjunct Instructors of Clinical Occupational*

*Therapy:* Susan Bowles, OTD, OTR/L; Cynthia Burt, M.A., OTR/L; Remy Chu, B.S., OTR/L; Lisa Deshaies, M.A., OTR/L; Heidi Dombish, M.S., OTR/L; Arlene Long, B.S., OTR/L; Karen Park, M.A.; Barbara Phillips, M.A., OTR/L; Tammy Richmond, M.A., OTR/L; Pamela Roberts, M.A., OTR/L; Joan Surfus, M.A., OTR/L; Ana Verran, M.A., OTR/L

*Emeritus Professors:* Elizabeth J. Yerxa, Ed.D.; Ruth Zemke, Ph.D.

**Degrees Offered**

The Division of Occupational Science and Occupational Therapy offers a Bachelor of Science in Occupational Therapy, a minor in Occupational Science, and a Master of Arts in Occupational Therapy. The Master of Arts in Occupational Therapy is offered for students continuing their education following their undergraduate degree in occupational therapy, for those whose first degree is in another field and also for certified occupational therapists seeking a post-professional degree. The division also offers the Occupational Therapy Doctorate (OTD) and the Ph.D. in Occupational Science. The Division of

Occupational Science and Occupational Therapy is fully accredited by the Accreditation Council for Occupational Therapy Education, 4720 Montgomery Lane, P.O. Box 31220, Bethesda, Maryland 20824-1220, (301) 652-2682.

Entry into occupational therapy practice is at the graduate degree level only. In order to practice, students in the bachelor's program must earn an M.A. degree in Occupational Therapy, sit for the National Board for Certification in Occupational Therapy (NBCOT) exam and apply for a license (in most states including California).

**Pi Theta Epsilon**

Pi Theta Epsilon is a national honor society for occupational therapy students and alumni. This society recognizes and encourages superior scholarship among students enrolled in entry-level graduate programs of occupational therapy across the United States.

The Alpha Eta Chapter of Pi Theta Epsilon at the University of Southern California selects candidates early in the spring semester of each year based on their academic standing and their potential for leadership in the profession.

## Bachelor of Science

The undergraduate curriculum leads to the Bachelor of Science with a major in occupational therapy. Although professional study begins either during the junior year or in the summer preceding the senior year, students may apply to the major at any time. Successful completion of the Master of Arts degree and successful completion of a minimum of 24 full-time weeks of clinical fieldwork are required for eligibility to sit for the National Board for Certification in Occupational Therapy. Certification from the board and licensure (most states) are required to practice as an occupational therapist. (See page 725 for a description of the M.A. degree program.)

**Application Procedures for Incoming Freshman and Transfer Applicants**

Students may request admission to the occupational therapy major when applying as freshmen or when transferring to USC. Students transferring from other institutions

need to enter USC no later than the first semester of their junior year. See the Undergraduate Admission section of this catalogue for admission procedures to the university.

**Admission Criteria for Current USC Students**

After admission to USC, students wishing to add or change their major to occupational therapy should contact the division. Requirements for admission are:

1. an autobiographical statement which demonstrates an exploration and understanding of occupational therapy as a career choice
2. a cumulative grade point average of 3.0 or higher in undergraduate course work for USC undergraduate and transferring students
3. a plan for completion of all USC Dornsife College of Letters, Arts and Sciences general education requirements and foreign language requirements by the beginning of the senior year

**Application Procedures for Current USC Students**

Applications will be reviewed when the following materials have been received by the Division of Occupational Science and Occupational Therapy:

1. Completed division application form
2. Current copy of the student's STARS report
3. Autobiographical statement including:
  - a. Reasons for wanting to enter the profession
  - b. Understanding of occupational therapy
  - c. Experience relevant to occupational therapy
  - d. Summary of skills and accomplishments
4. Three letters of recommendation from professors, employers or other professionals, not related to the applicant, sent directly to the division or delivered in a sealed envelope. One letter should be from a professor.

**Deadlines**

Freshmen may apply anytime. Sophomores must apply by April 30 to begin the program in the fall of their junior year. Juniors must apply by January 15 to begin the program with an eight-week summer session prior to their senior year. Students transferring from other institutions need to enter USC no later than the first semester of their junior year.

**Program Requirements**

A total of 128 units is required for the Bachelor of Science degree. An occupational therapy major cannot count any 300-level OT course toward the B.S. degree.

**General Education Requirements**

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge needed to become a well-educated person. This program requires six courses in different categories, plus writing, diversity and foreign language requirements, which together comprise the USC Core. See pages 63 and 250 for more information.

**Required Pre-Professional Courses**

We recommend that you meet with an admissions counselor within the division in order to determine course work that can be taken at USC or could be transferred and substituted for required course work. Before taking the advanced professional courses you must have completed the pre-professional required courses:

- Within the last five years
- With a minimum GPA of 3.0 (pass/fail or grades below a C are not accepted)
- From an accredited junior college, four year college or university
- Either in a classroom setting or online; however, anatomy must be completed in a classroom setting (refer to Course Work Taken Elsewhere on page 58)
- For a total of three or four semester units each (with the exception of medical terminology which may be 1 or 2 units)

Required Pre-Professional Courses (USC course numbers are noted)

- Enrolled or transferring students who wish to transfer credit for courses taken at another institution must gain university approval:

PRE-PROFESSIONAL COURSES	UNITS
OT 200 Medical Terminology for Health Professions	1
SOCI 200 Introduction to Sociology, or	
ANTH 201 Introduction to Social Anthropology	4

OT 260	Human Functional Anatomy for the Occupational Therapist (with laboratory), or	3
EXSC 301L	Human Anatomy (with laboratory)	4
OT 261	Human Physiology for Occupational Therapists, or	3
BISC 307L	General Physiology	4
PSYC 274	Statistics I, or	4
HP 340L	Health Behavior Statistical Methods, and	4
HP 350L	Health Behavior Research Methods	4
PSYC 336L	Developmental Psychology	4
PSYC 360	Abnormal Psychology	4
	Gerontology or adult development (recommended but not required)	

Four-week intensive courses are offered by the division in human anatomy (OT 260) and human physiology (OT 261) from mid-May to mid-June (just prior to the start of summer professional courses) for those students who have been unable to complete those courses earlier. These courses are also offered fall and spring semesters.

Students may take OT 405L, OT 440 and OT 441 in the junior year, after having completed Human Anatomy and Developmental Psychology. Human Physiology must be completed by fall of the junior year. The remaining pre-professional courses must be completed by the start of the senior year.

**Required Professional Courses**

Enrollment in professional occupational therapy courses is limited to junior and senior occupational therapy majors only.

REQUIRED PROFESSIONAL COURSES	UNITS
OT 405L	Foundations: Occupation 4
OT 440L	Foundations: Kinesiology 2
OT 441L	Foundations: Neuroscience 2

Two of the following: OT 401L Practice Immersion: Physical Rehabilitation and Geriatrics (8), OT 402L Practice Immersion: Mental Health (8), or OT 403L Practice Immersion: Pediatrics (8)

OT 410	Therapeutic Use of Self	2
OT 411	Clinical Reasoning	2
OT 430	Communication Skills for Effective Practice	4
OT 451	Neuroscience of Behavior	4
OT 470	Qualitative Research for Evidence-Based Practice	4
OT 480	Quantitative Research for Evidence-Based Practice	4

**Scholastic Standards**

Undergraduate occupational therapy students must maintain a GPA of at least 3.0 (A = 4.0) in all required OT courses and successfully complete the Graduate Record Examinations in order to continue into the master's (M.A.) program. If an undergraduate student's OT grade point average (GPA) falls below 3.0, or if the cumulative undergraduate GPA falls below 3.0 at the end of the fall semester of the senior year, continuance is not assured.

**Advising**

Advisement is available through the division.

**Minor in Occupational Science**

The division offers a minor in the dynamic discipline of occupational science. It is one of a select few programs in the world that offers undergraduates the opportunity to explore the fields of occupational science and occupational therapy.

Unlike other creatures, humans are innately driven to fill their time with interesting, meaningful activities, which scholars call "occupations." That is, humans need to be occupied. These occupations have a profound impact on physical and mental health, one's sense of well-being and the experience of quality of life. Occupational Science seeks to understand the precise nature and function of occupations and the critical effect of daily activity on human beings. Scientists working in the field examine questions such as: what is the relationship between childhood occupations and adult competency and achievement; what constitutes a healthy balance of work, rest and leisure; what factors contribute to a good fit between a particular individual and his or her occupations; as well as many other issues.

The minor in occupational science requires a total of 20 units: a gateway course (OT 250) for 4 units plus 16 units of upper division courses selected from ten courses. It is open to all majors at USC. An occupational therapy major cannot count any 300-level OT course toward the B.S. degree.

LOWER DIVISION: GATEWAY COURSE	UNITS
OT 250	Introduction to Occupational Science and Occupational Therapy 4

UPPER DIVISION: 16 UNITS REQUIRED		UNITS						
OT 300	Occupational Expressions of Diverse Identities and Lifestyles	4	OT 325	The Brain: Mind, Body and Self	4	OT 360	Creating the Self through Narrative: Acts of Life Story Production	4
OT 310	Creativity Workshop	2	OT 330	Perspectives on the Daily Life of Families	4	OT 375	The Narrative Structure of Social Action: Narrative, Healing, and Occupation	4
OT 312	Creating a Sustainable Lifestyle	2	OT 333	Sports Ethics	4			
OT 320	The Nature of Human Occupation: Form, Function, and Meaning	4	OT 350	Disability, Occupations, and the Health Care System	4			

## Master of Arts

The Division of Occupational Science and Occupational Therapy offers a Master of Arts degree with two routes of entry. Those with a baccalaureate degree in occupational therapy will begin graduate course work in the post-professional master's degree program. Those with a baccalaureate degree in a field other than occupational therapy take additional 400-level courses before beginning graduate work in the entry-level master's degree program. For students in the entry-level program, eligibility to sit for the National Board for Certification in Occupational Therapy examination occurs when all course work is completed, including the equivalent of 24 full-time weeks of clinical fieldwork, and the M.A. degree has been awarded.

### Admission Requirements

Applicants must have a bachelor's degree from an accredited college or university; a minimum grade point average of 3.0 (A = 4.0); total score of 1000 or higher on the General Test of the Graduate Record Examinations taken within five years of enrollment; three letters of recommendation and an autobiographical sketch/statement of purpose. A satisfactory score on the TOEFL within two years of enrollment is a requirement for most international students.

*Those with a baccalaureate degree in occupational therapy must have graduated from a World Federation of Occupational Therapy (WFOT) approved program.*

*Those with a baccalaureate degree in a field other than occupational therapy also must have completed all of the following prerequisites:*

- Within five years of enrollment
- Prior to the start of the program with a minimum GPA of 3.0 (pass/fail or grades below a C are not accepted)
- From an accredited junior college, college or university
- Either in a classroom setting or online; however anatomy must be completed in a classroom setting

- With each course totaling three or four semester units (with exception of medical terminology which may be 1 or 2 units) as follows (course numbers refer to USC courses, but prerequisites can be taken at any accredited college or university):

PREREQUISITES		UNITS
OT 200	Medical Terminology for Health Professions	1
SOCI 200	Introduction to Sociology, or	
ANTH 201	Introduction to Social Anthropology	4
OT 260	Human Functional Anatomy for the Occupational Therapist (with laboratory)	3
EXSC 301L*	Human Anatomy (with laboratory)	4
OT 261*	Human Physiology for Occupational Therapists, or	3
BISC 307L	General Physiology	4
PSYC 274	Statistics I, or	4
HP 340L	Health Behavior Statistical Methods, and	4
HP 350L	Health Behavior Research Methods	4
PSYC 336L	Developmental Psychology	4
PSYC 360	Abnormal Psychology	4
	Gerontology or adult development (recommended but not required)	

\*If anatomy and physiology are combined, students must take two sequential semesters with a laboratory each semester (6-8 units).

Four-week intensive courses are offered by the division in human anatomy (OT 260) and human physiology (OT 261) from mid-May to mid-June (just prior to the start of summer professional courses) for those students who have been unable to complete those courses earlier. These courses are also offered fall and spring semesters.

### Application Procedures

*For those with a baccalaureate degree in occupational therapy:* applications are accepted at

any time, preferably by February 15 for fall admission.

*For those with a baccalaureate degree in a field other than occupational therapy:* applications for early decisions are due by November 30; all other applications are due February 15.

Applications received after the February 15 deadline are considered on a space-available basis.

Application materials include: 1) USC Online Graduate Application; 2) division online Supplemental Application for Graduate Admission; 3) three letters of recommendation; 4) transcripts from all colleges/universities attended; 5) results of the aptitude test of the Graduate Record Examinations; and 6) TOEFL scores if required. A personal interview may be requested. Please see the division Website for the most up-to-date application procedures.

### International Students

Students educated outside the United States must have their credentials evaluated by the Office of Admission before application to the division can be reviewed. See the Admission section of this catalogue. International students must demonstrate competency in English, as measured by the Test of English as a Foreign Language (TOEFL).

### Degree Requirements

The M.A. degree is under the jurisdiction of the USC Graduate School. Students should also refer to the Graduate School section of this catalogue (page 97) for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School.

Requirements include: GPA of 3.0 in all course work attempted and all course work applied to the degree; at least two-thirds of units applied to the degree must be at the 500 level or higher.

Courses prerequisite to master's degree work for students entering the M.A. program with a degree other than occupational therapy include *two of the following three*: OT 401L, OT 402L, OT 403L, *and all of the following*: OT 405L, OT 410, OT 411, OT 430, OT 440L, OT 441L, OT 451, OT 470 and OT 480.

REQUIRED COURSES	UNITS
OT 451	Neuroscience of Behavior, 4 and
OT 470	Qualitative Research for Evidence-Based Practice, 4 or
OT 401 or OT 402 or OT 403	(Practice Immersion Courses) 8

OT 504	Health Promotion and Wellness	4
OT 570	Occupation-Centered Programs for the Community, or	
OT 581	Quantitative Research for the Practicing Clinician	4
OT 580	Leadership Capstone	2
OT 585	Advanced Seminar in Occupational Science	2

#### Thesis Option

A minimum of 28 units is required: 20 units of required courses, 4 units of elective at 500 level or above, and 4 units of OT 594ab Master's Thesis. Acceptance of the thesis by the guidance committee and the university completes the degree.

#### Comprehensive Examination Option

A minimum of 32 units is required: 20 units of required courses, 4 units of elective and 8 units of occupational therapy electives. All electives must be 500 level or above. Successful performance on a written comprehensive examination administered on campus each fall and spring semester completes the degree.

## Doctor of Occupational Therapy

The Occupational Therapy Doctorate (OTD) is a post-professional degree program that provides graduates with advanced knowledge and skills in one of four leadership concentrations: 1) advanced clinical practice; 2) clinical research; 3) policy and administration; and (4) pedagogy. OTD students graduate from the program with a strong foundation in occupational science as well as in-depth mentored residency experience. The OTD prepares graduates to secure positions as expert clinicians in specialty or emerging practice areas, as contributors to clinical research teams, as administrative leaders within health care organizations, and as non-tenure track faculty in institutions of higher education.

#### Admission Requirements

Applicants for admission to the OTD program are expected to have at least a baccalaureate degree from an accredited college or university and must be certified or licensed as an occupational therapist or be eligible to sit for the National Board for Certification in Occupational Therapy (NBCOT) examination at time of matriculation. Domestic students not certified upon matriculation must pass the NBCOT examination by the end of the first semester of the program to maintain enrollment. At the discretion of the OTD director, some international students may not be required to obtain NBCOT certification. A minimum GPA of 3.0 (A = 4.0) and a minimum GRE combined verbal and quantitative score of 1000 are required. Applicants must have earned a minimum cumulative 3.0 GPA in the 400- and 500-level required courses. At least three letters of reference, an autobiographical statement of purpose and a current resume are required. Applicants' leadership

potential, previous academic record, clinical experiences and professional accomplishments will also be considered.

#### International Students

Students educated outside the United States must have graduated from a program approved by the World Federation of Occupational Therapists (WFOT). USC maintains additional admissions requirements for international students (see the Admission section of this catalogue), including English language competence as measured by the Test of English as a Foreign Language (TOEFL) examination.

#### Application Procedures

Applications are accepted on a continuous basis. For consideration for fall semester admission, applications must be received by November 15 for maximum funding consideration. Applications received after November 15 will be considered on a space-available basis. Application requirements include: 1) USC Online Graduate Application; 2) Division of Occupational Science and Occupational Therapy online supplemental application for graduate admission; 3) three letters of reference; 4) autobiographical statement of purpose; 5) transcripts from all colleges/universities attended; and 6) GRE General Test scores.

#### Degree Requirements

The degree is awarded under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section, page 86, and the Graduate School section, page 97, of this catalogue, for general regulations. All courses applied toward the degree must be accepted by the USC Graduate School.

#### Course Requirements

Satisfactory completion of 60 units beyond the baccalaureate degree is required.

#### REQUIRED OCCUPATIONAL THERAPY

FOUNDATION COURSES (20 UNITS REQUIRED)	UNITS	
OT 451	Neuroscience of Behavior	4
OT 470	Qualitative Research for Evidence-Based Practice	4
OT 504	Health Promotion and Wellness	4
OT 580	Leadership Capstone	2
OT 581	Quantitative Research for the Practicing Clinician	4
OT 585	Advanced Seminar in Occupational Science	2

#### REQUIRED OCCUPATIONAL SCIENCE CORE

COURSES (8 UNITS REQUIRED)	UNITS	
OT 620	Current Issues in Occupational Science and Occupational Therapy	4
OT 621	Occupational Therapy Leadership: Contemporary Issues	4

#### Elective Courses (8 units required)

Students will complete a minimum of 8 course units at the 500-level or higher. A minimum of 4 of these 8 elective units must be selected from courses outside the Division of Occupational Science and Occupational Therapy.

#### Residency Requirement (24 units required)

Students will complete 24 units of OT 686 residency. The residency ensures that graduates of the OTD program demonstrate competence in one of the following leadership concentrations: 1) advanced clinical practice; 2) clinical research; 3) policy and administration; and 4) pedagogy.

At least 20 units applied toward the OTD must be successfully completed before enrolling in OT 686. Students may complete their residency over three consecutive semesters (6 units, 6 units and 12 units) or over four consecutive semesters. It is highly recommended that one semester of OT 686 be enrolled full-time (12 units without any other simultaneous course enrollment). Full-time residency ensures the opportunity for full immersion in residency. Faculty must approve each student's residency plan prior to enrollment. OTD residency provides students the opportunity for mentorship by experts in their OTD leadership concentration (e.g., a master clinician, a world-class occupational science researcher, a leader in professional policy or administration, or a

faculty member with at least three years of academic experience).

#### *Capstone Requirement*

In the final semester of enrollment, each student will submit a portfolio demonstrating competence in his or her chosen leadership concentration. The final portfolio will include documentation of both written and oral presentation skills and expertise as designated in the residency plan.

#### *Clinical Experience Criterion*

If the student has less than three years of clinical experience as a registered and/or licensed occupational therapist at time of admission, he or she may be required to

complete at least 8 units of clinical occupational therapy courses, which may include:

OT 500abc	Clinical Problems in Occupational Therapy	2-4 each
OT 560	Contemporary Issues in School-Based Practice	4
OT 564	Sensory Integration	4
OT 572	Ergonomics	4
OT 574	Enhancing Motor Control for Occupation	4
OT 583	Lifestyle Redesign	4
OT 590	Directed Research	1-12
OT 610	Sensory Integrative Dysfunction	4

## Doctor of Philosophy

The Ph.D. in Occupational Science educates individuals to engage in the scientific study of human occupation, the purposeful activities that constitute our life experiences. This important new science is chiefly concerned with the unique capacity of humans to develop adaptive skills, such as tool use and related occupational behaviors, and to choose and orchestrate daily occupations. It also seeks to understand the function, structure and inter-relationship of these occupations and their impact on individuals and institutions.

The focus on occupation distinguishes this program from closely-related disciplines such as psychology, sociology and anthropology. The program emphasizes the development of research skills and encourages students to organize and synthesize knowledge to contribute to occupational science theory, as opposed to therapeutic application.

#### **Admission Requirements**

Applicants for admission to the Ph.D. program are expected to have a baccalaureate degree in an appropriate field, such as one of the biological or social sciences or occupational therapy, with a minimum GPA of 3.0 (A = 4.0) and a minimum score of 1100 on the verbal and quantitative sections of the Graduate Record Examinations. At least three academic letters of reference must also be submitted. Other considerations include evidence of academic potential based on master's level study (if relevant), research skills and interest, and a statement of purpose. International students must demonstrate competency in English, as measured by the Test of English as a Foreign Language (TOEFL) examination.

#### **Degree Requirements**

This degree is awarded under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section (page 86) and the Graduate School section of this catalogue (page 97) for general regulations. All courses applied toward the degree must be courses accepted by the USC Graduate School.

#### **Course Requirements**

Satisfactory completion of 60 units beyond the baccalaureate degree is required, including the following courses:

REQUIRED CORE COURSES		UNITS
OT 640	Conceptual Foundations of Occupational Science	4
OT 641	The Nature of Occupation	4
OT 660	Research Practicum (2 units - six semesters)	12

#### **REQUIRED CORE ELECTIVES (SELECT 5)**

OT 604	Temporal Adaptation: Organization and Use of Time	4
OT 612	Information Processing and Occupation	4
OT 642	Therapeutic Uses of Self: Psychodynamic Perspectives	4
OT 643	Meaningful Engagement in Everyday Life	4
OT 644	Foundations of Research on Activity and Health	4
OT 645	Narrative, Healing and the Culture of Biomedicine	4
OT 646	Intersections of Occupational Science and Human Development	4
OT 650	Development of Adaptive Skills	4
OT 651	Adaptation and Disability	4
OT 653	Play and Occupation	4
OT 655	Work and Leisure	4

40 units of OT core courses must be completed. 20 of those units include the required courses OT 640 (4 units), OT 641 (4 units) and OT 660 (12 units). The remaining 20 units are to be selected from the other OT 600-level classes.

Those students who also wish to participate in clinical practice in occupational therapy may opt to complete a master's degree in occupational therapy. Such students are required to complete the requirements for that degree as well as the occupational therapy undergraduate major courses if they are not registered occupational therapists or eligible for registration prior to study.

#### *Cognate Requirement*

Completion of a minimum of 12 units in a topic area such as one of the following is required: quantitative research approaches, qualitative research approaches, neuroscience, social development, life span development or gerontology.

#### *Research Practicum*

Each student will enroll in 2 units of OT 660 Research Practicum in Occupation per semester for six consecutive semesters, for a total of 12 units. Students are required to begin enrolling in OT 660 in their first semester of doctoral study. In this practicum the student will develop research skills by working as part of a research team under the direction of a faculty member.

#### *Screening Procedures*

Departmental screening will be required. Passing this procedure is prerequisite to continuation in the doctoral program. Directions for obtaining and filing the Report on Ph.D. Screening Procedures are found in the Graduate School section of this catalogue.

**Dissertation Enrollment**

Doctoral students must submit a dissertation according to the policies and procedures described in the Graduate School section of this catalogue. Registration in OT 794 Doctoral Dissertation for a minimum of 4 units (2 units in each of two consecutive semesters) is required.

**Summary of All Course Requirements**

Required core courses are OT 640 (4), OT 641 (4), OT 660 (12) for a total of 20 units.

Required electives are five 600-level OT courses for a total of 20 units.

Cognate courses are a minimum total of 12 units.

Dissertation requires 2 units per semester for at least two semesters for a minimum total of 4 units.

Additional 4 units can include 4 further units of dissertation or cognate.

Total: 60 units

**Foreign Language or Research Skills**

The Ph.D. in Occupational Science does not require the demonstration of competence in a foreign language. However, each student is expected to achieve expertise, as defined by

the student's guidance committee, in either qualitative or quantitative research techniques through participation in course work and the research practicum.

**Guidance Committee**

The guidance committee is composed of five faculty members. Three members of the committee must be regular faculty from the Division of Occupational Science and Occupational Therapy. One member must be from outside the division. Complete regulations for establishing a guidance committee are found in the Graduate School section of this catalogue.

**Qualifying Examination**

The qualifying examination is comprehensive in nature and requires the student to demonstrate a grasp of content from the core courses and the cognate area. The examination is both written and oral and is set and administered by the student's guidance committee. Refer to the Graduate School section of this catalogue for specific directions for filing a request to take the examination.

**Dissertation**

Doctoral students must submit a dissertation based on students' original research according to the policies and procedures of the Graduate School section of this catalogue.

Upon approval of the preliminary copy of the dissertation by all members of the dissertation committee, the candidate must pass an oral defense of the dissertation. Upon successful completion of the oral defense and revisions, approval for final typing is granted and the committee recommends the candidate to the Graduate School for the Ph.D.

**Teaching**

To prepare students for anticipated roles as faculty members, a teaching component is incorporated into the program. Students who receive teaching assistantships will be required to assist in relevant teaching assignments for a minimum of one academic year. Those who do not receive teaching assistantships are required to present a minimum of six lectures or laboratory sessions.

**Additional Information**

Further information about the baccalaureate, master's and doctoral programs can be obtained by writing or calling the USC Division of Occupational Science and Occupational Therapy, 1540 Alcazar Street (CHP 133), Los Angeles, CA 90089-9003; (323) 442-2850, toll free (866) 385-4250, or by sending email to [otdept@hsc.usc.edu](mailto:otdept@hsc.usc.edu). Information regarding the Division of Occupational Science and Occupational Therapy is available at [ot.usc.edu](http://ot.usc.edu).

## Courses of Instruction

### OCCUPATIONAL SCIENCE AND OCCUPATIONAL THERAPY (OT)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

#### OT 105g Culture, Medicine and Politics (4, Fa) (Enroll in ANTH 105g)

**OT 200 Medical Terminology for Health Professions (1)** Foundation of medical terminology and hospital abbreviations useful for practice in health care.

**OT 220 Lifestyle Design: Introduction to Occupational Therapy (2, FaSp)** Introduction to theoretical concepts concerning the relationship of engagement in activities (occupations) to health and well being. Application of these perspectives to students' own lives.

#### OT 250 Introduction to Occupational Science and Occupational Therapy (4)

Introduction to concept of occupation and overview of human drive for meaningful activity; impact of occupations on health and well-being; analysis of personal occupational patterns; selected therapeutic applications.

#### OT 260 Human Functional Anatomy for the Occupational Therapist (3, Sm)

An anatomical survey of the human musculoskeletal, nervous, cardiovascular, respiratory, digestive and urinary system. *Recommended preparation:* introductory undergraduate course in biology.

#### OT 261 Human Physiology for Occupational Therapists (3, FaSp)

Provides a general overview of human physiology with special emphasis on physiologic systems supporting internal homeostatic mechanisms and human motion applicable for occupational therapists. Open only to OT majors. *Recommended preparation:* undergraduate biology course.

#### OT 300 Occupational Expressions of Diverse Identities and Lifestyles (4)

Exploration of the diverse ways occupational practices become central to identity, reify standard social ideologies, and are manipulated to redress conventional standards.

#### OT 310 Creativity Workshop (2, FaSpSm)

Theories and practice of the creative process in varied media, genres and occupations. Explores creativity in the arts, sciences, professions, evolution, daily life, and culture.

#### OT 312 Creating a Sustainable Lifestyle (2)

Scientists and policymakers advocate lifestyle changes as crucial to solving the environmental crisis. Investigation into the development of habits that promote environmental sustainability and personal wellbeing.

#### OT 320 The Nature of Human Occupation: Form, Function, and Meaning (4)

The complex nature of human occupation is covered from an interdisciplinary perspective. Emphasis is on how occupation contributes to human experience in a lived world.

**OT 325 The Brain: Mind, Body, and Self (4, FaSpSm)** Exploration of neuroscience as it impacts everyday living, from the fundamentals of neurons and synapses, to the neural basis of language, empathy, and social interaction.

**OT 330 Perspectives on the Daily Life of Families (4)** Examines family structures and processes, the occupational dimensions of families, and the meanings embedded in the acts of daily life of contemporary families.

**OT 333 Sports Ethics (4, FaSp)** Critically examines ethical issues central to the world of sports that range from matters of fair play and cheating to performance-enhancing drugs and gene-doping.

**OT 350 Disability, Occupations, and the Health Care System (4)** Exploration of the ways in which able-bodyism, sexism, racism, classism and homophobia contribute to occupational opportunities or barriers and weave their way into health care.

**OT 360 Creating the Self through Narrative: Acts of Life Story Production (4)** Analysis of life stories, life histories, and testimonies in social interactions, texts, and films. Life stories are an occupation to re-create the "Self" in response to conflict and change.

**OT 375 The Narrative Structure of Social Action: Narrative, Healing and Occupation (4)** Narrative as guide and structure of practical action. Special emphasis on chronic illness and disability and narrative structure of clinical interactions.

**OT 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**OT 401L Practice Immersion: Physical Rehabilitation and Geriatrics (8, FaSp)** Scientific and theoretical underpinnings and knowledge and skills necessary for occupational therapy evaluation and intervention in adult rehabilitation and geriatrics; incorporates related Level I Fieldwork. Open only to upper division and master's level occupational therapy majors. *Prerequisite:* OT 405L, OT 440L, OT 441L.

**OT 402L Practice Immersion: Mental Health (8, FaSp)** Scientific and theoretical underpinnings and knowledge and skills necessary for occupational therapy evaluation and intervention in mental health practice; incorporates related Level I Fieldwork. Open only to upper division and master's level occupational therapy majors. *Prerequisite:* OT 405L, OT 440L, OT 441L.

**OT 403L Practice Immersion: Pediatrics (8, FaSp)** Scientific and theoretical underpinnings and knowledge and skills necessary for occupational therapy evaluation and intervention in pediatrics; incorporates related Level I Fieldwork. Open only to upper division and master's level occupational therapy majors. *Prerequisite:* OT 405L, OT 440L, OT 441L.

**OT 405L Foundations: Occupation (4, FaSp)** Introduction to basic tenets of occupational therapy history and practice, the profession's language, and foundations of occupational science; incorporates experience and analysis of activities. Open only to upper division and master's occupational therapy majors.

**OT 410 Therapeutic Use of Self (2, FaSp)** Exploration of efficacy, therapeutic use of self, empathy and mindfulness; development of self-awareness to support the art, craft and skill of effective therapeutic relationships. Open only to upper division and master's level occupational therapy majors. *Prerequisite:* OT 405L, OT 440L, OT 441L.

**OT 411 Clinical Reasoning (2, FaSp)** Dynamic look at creation and application of professional knowledge and expertise; examines interrelationship between theory and practice; incorporates narrative and illness experiences in clinical reasoning. Open only to upper division and master's level occupational therapy majors. *Prerequisite:* OT 410 and OT 401L or OT 402L or OT 403L.

**OT 430 Communication Skills for Effective Practice (4, FaSp)** Principles of written, verbal and non-verbal communication with professionals, clients and families, from a personal and professional perspective; group interventions; interview skills; advocacy as communication. Open only to upper division and master's level occupational therapy majors. *Prerequisite:* OT 410 and OT 401L or OT 402L or OT 403L.

**OT 440L Foundations: Kinesiology (2, FaSpSm)** Review of joint and muscle structure and function; application of basic biomechanical, neuromuscular and musculoskeletal principles to the analysis of everyday activities and therapeutic interventions. Open only to upper division and master's occupational therapy majors.

**OT 441L Foundations: Neuroscience (2, FaSpSm)** Application of basic neural function to the analysis of daily living tasks and activities; review of pathological conditions that interfere with performance in occupation. Open only to upper division and master's occupational therapy majors.

**OT 451 Neuroscience of Behavior (4, FaSp)** Foundation for understanding neural functions involved in typical/atypical behaviors; review of neural circuitry, experimental methods, basic behavioral systems, higher order cognitive functions and associated disorders. Open only to upper division and master's level occupational therapy majors. *Prerequisite:* OT 405L, OT 440L, OT 441L.

**OT 470 Qualitative Research for Evidence-Based Practice (4, FaSp)** Traditions and methods of qualitative research; development of skills for research design, implementation and dissemination; critique of qualitative research for evidence-based practice and occupational science. Open only to upper division and master's level occupational therapy majors. *Prerequisite:* OT 405L, OT 440L, OT 441L.

**OT 480 Quantitative Research for Evidence-Based Practice (4, FaSp)** Traditions and methods of quantitative research; emphasis on formulation of clear clinical questions; finding, evaluating, and applying evidence to a clinical problem; includes journal club. Open only to upper division and master's level occupational therapy majors. *Prerequisite:* OT 410 and OT 401L or OT 402L or OT 403L.

**OT 486 Clinical Internship with Seminar (1-2, max 6, FaSpSm)** Clinical internship to qualify for professional certification. Seminar to integrate theory with application of treatment principles for various populations. Graded CR/NC. Open only to OT majors. *Prerequisite:* completion of all OT major academic requirements.

**OT 490x Directed Research (2-8, max 8, FaSp)** Individual research and readings. Not available for graduate credit. Open only to OT majors.

**OT 499 Special Topics (2-4, max 8, FaSpSm)** Course content to be selected in occupational therapy and occupational science.

**OT 500abc Clinical Problems in Occupational Therapy (2-4, 2-4, 2-4, FaSpSm)** Specific applications of occupational therapy practice in varied clinical/health settings. Seminar to integrate theory with application of intervention principles for various populations. Graded CR/NC.

**OT 504 Health Promotion and Wellness (4, FaSp)** Examination of relationship of occupation to health, well-being, participation; critical thinking about lifestyle factors influencing occupational engagement; occupational science and wellness in occupational therapy practice. Open only to occupational therapy majors.

**OT 505 Seminar in Occupational Therapy (2-4)** Occupational therapy and the health care system. Open only to OT majors. Graded CR/NC.

**OT 555 Seminar: Implementation of the Advocacy Model (2-4, Sp)** The patient as decision-maker in chronic care; competency development through activities of daily living, leisure skills, time organization and life goal planning; action research. Open only to OT majors.

**OT 560 Contemporary Issues in School-Based Practice (4, FaSp)** Current issues in school-based occupational therapy evaluation, ongoing assessment and intervention. Topics include successful collaboration in inclusive classrooms and on IFSP and IEP teams. Open only to OT majors. Graded CR/NC.

**OT 564 Sensory Integration (4, Sp)** Comprehensive overview of sensory integration theory and basic intervention principles. A case-based approach will facilitate the integration of sensory integration, evidence-based practice and occupational science. Open only to OT majors. Graded CR/NC.

**OT 570 Occupation-Centered Programs for the Community (4, FaSp)** Development of a proposal for new or extended services; includes trends analysis, needs assessment, literature review, marketing plan, mock funding request, program evaluation and presentation. Open only to occupational therapy majors.

**OT 571 Assistive Technology (4, Sp)** Principles of assessment, selection, training, and follow-up with clients in the use of assistive technologies to enable and enhance participation in a meaningful occupation. Open only to OT majors. Graded CR/NC.

**OT 572 Ergonomics (4, Sp)** Focus on the effects of physical design in the workplace on users' injury rate, behavior, performance and stress levels. Intervention for repetitive motion included. Open only to OT majors. Graded CR/NC.

**OT 573 Hand Rehabilitation (4, Fa)** Occupation-based evaluation and intervention for individuals with acute and chronic hand disorders. Topics include scar management, splinting, peripheral nerve injury, wound healing and physical agent modalities. Open only to OT majors. Graded CR/NC.

**OT 574 Enhancing Motor Control for Occupation (4, FaSp)** Laboratory examining approaches to assessment and remediation of motor control following upper motor neuron lesions. An occupation-based approach to Neurodevelopmental Treatment (NDT) will be emphasized. Open only to OT majors. Graded CR/NC.

**OT 575 Dysphagia Across the Lifespan: Pediatrics through Geriatrics (2, Sp)** A comprehensive investigation of the anatomy and physiology of normal and abnormal swallowing. Didactic and hands-on study of assessment and treatment interventions will be addressed. Open only to OT majors. Graded CR/NC.

**OT 576 Universal Design (4, Fa)** Examination of the concepts and principles of universal design and the benefits of the approach for people with disabilities and for all individuals. Open only to Occupational Therapy and Occupational Science majors. Graded CR/NC.

**OT 578 Therapeutic Communication for the Healthcare Practitioner (2)** Explores the principles and practice of therapeutic communication including motivational interviewing, mindfulness, and cognitive behavioral therapy. Graded CR/NC. Not open to undergraduates.

**OT 580 Leadership Capstone (2, FaSp)** Professional capstone in leadership, advocacy, ethical reasoning, professional behavior, and public policy as it impacts the practice of occupational therapy; independent professional externship.

**OT 581 Quantitative Research for the Practicing Clinician (4, FaSp)** Traditions and methods of quantitative research for practicing clinicians; emphasis on formulation of clear clinical questions; finding, evaluating, and applying evidence to a clinical problem. Open only to occupational therapy majors.

**OT 583 Lifestyle Redesign (4, Sp)** Seminar examining occupations and lifestyle redesign as a contribution to health and well-being. Topics include therapeutic process, needs assessment, design and marketing of lifestyle modules. Open only to OT majors. Graded CR/NC.

**OT 585 Advanced Seminar in Occupational Science (2, FaSp)** Advanced analysis of occupational science concepts including dimensions of occupation and the impact of occupation on health and wellbeing; factors associated with participation in occupation at the individual, community and global levels. Open only to occupational therapy majors.

**OT 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. Open only to OT majors.

**OT 594abz Master's Thesis (2-2-0, FaSp)** Credit on acceptance of thesis. Graded IP/CR/NC. Open only to OT majors.

**OT 599 Special Topics (2-4, max 8, FaSpSm)** Recent developments in occupational therapy and occupational science.

**OT 604 Temporal Adaptation: Organization and Use of Time (4, 2 years, Fa)** Environmental, biological, psychological and socio-cultural influences on perceptions of and utilization of time. Implications for human adaptation.

**OT 610 Sensory Integrative Dysfunction (4, FaSpSm)** Differential evaluation of sensory integrative dysfunction; theory and procedure for enhancing the processing of sensory data by children with learning and behavior disorders. *Prerequisite:* admission by advance application and instructor's approval only; must be certified as an occupational or physical therapist.

**OT 612 Information Processing and Occupation (4, 2 years, Fa)** Phylogenesis and ontogenesis of human information processing capacity enabling engagement in occupation; components and contributions to adaptation and coping.

**OT 620 Current Issues in Occupational Science and Occupational Therapy (4)** Review of current occupational science research as it is applied to practice; examination of leadership opportunities; development of proposal focusing on chosen area of study. Open only to occupational therapy doctoral students. *Prerequisite:* OT 585.

**OT 621 Occupational Therapy Leadership: Contemporary Issues (4)** Examination of themes in occupational therapy related to power, confidence, and identity; development of leadership skills; analysis of the impact of policy and advocacy on occupational therapy. Open only to occupational therapy doctoral students.

**OT 640 Conceptual Foundations of Occupational Science (4, FaSp)** Analysis of the conceptual foundations and methodological orientations for occupational science, understandings of disciplinary perspectives, formulation of theoretical arguments, and the interpretation of research data.

**OT 641 The Nature of Occupation (4, FaSp)**

Theoretical and historical foundations for the study of occupation, engagement in living and learning in everyday life.

**OT 642 Therapeutic Uses of Self: Psycho-dynamic Perspectives (4, FaSp)**

Survey of the diversity of analytic conceptions of subjectivity and intersubjectivity. Emphasis on the way these ideas influence the notion of therapeutic efficacy within Occupational Science.

**OT 643 Meaningful Engagement in Everyday Life (4)**

Exploration of the subjective experience of meaningful engagement in work, play, and the occupational pursuits of everyday life, drawing on contributions from the social sciences.

**OT 644 Foundations of Research on Activity and Health (4, FaSp)**

Examination of effectiveness and efficacy research, study design and methodology, dimensions of adaptation and research methods through the lens of two division-based research programs.

**OT 645 Narrative, Healing and the Culture of Biomedicine (4, FaSp)**

Introduction to narrative as analytic framework for considering chronic illness, disability, occupation, and the moral and cultural influences on the clinical reasoning of health professionals.

**OT 646 Intersections of Occupational Science and Human Development (4, FaSp)**

Analysis of occupational science perspectives related to human development and participation in sociocultural practices and examination of developmental theories and their relationship to occupational science.

**OT 650 Development of Adaptive Skills (4, Fa)**

Critical analysis of occupation as means and product of human adaptation. Adaptive skill development from traditional and occupational science approaches. Research methods and results.

**OT 651 Adaptation and Disability (4, Sp)**

Social and cultural adaptation to disabilities and stigmatized medical conditions through anthropological studies of groups and individuals. Training in ethnographic methods with such populations. (Duplicates credit in former OT 551.)

**OT 653 Play and Occupation (4, 2 years, Sp)**

Major conceptual, theoretical, and empirical studies of play; development and organization of play in relation to occupation; research on play as occupation. (Duplicates credit in former OT 553.)

**OT 655 Work and Leisure (4, Sp)** Ontogenesis and phylogenesis of work and leisure. Systems view of person/environmental interactions affecting competence and satisfaction with activity. Occupation and the need for mastery.

**OT 660 Research Practicum (2, max 12)**

Experiential learning through immersion in one or more externally funded research groups in the Division, enabling intense participation in multi-skilled research groups. Graded CR/NC. Open only to Occupational Therapy and Occupational Science majors.

**OT 686 Residency (6 or 12, max 24, FaSpSm)**

Residency involving development, administration, evaluation, or policy formulation for occupation-centered programs in clinical or community settings. Development of portfolio for professional doctorate. Open to OT majors only. Graded CR/NC.

**OT 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. Open only to OT majors.

**OT 794abcdz Doctoral Dissertation**

**(2-2-2-2-0, FaSp)** Credit on acceptance of dissertation. Graded IP/CR/NC. Open only to OT majors.

---

# USC Gould School of Law

*Law student Michelle Mello discussed the benefits of higher education with local junior and senior high school students at the annual Mentor Day, hosted by USC Gould's Street Law Society. Topics ranged from financial aid to the application process to more general words of inspiration. "Don't let anyone knock you down, and you'll succeed," advised Amanda Smith, president of the Black Law Students Association.*

**T**he USC Gould School of Law provides a forward-looking, interdisciplinary and inter-professional legal education guided by nationally renowned professors and informed by the diversity of a friendly and collegial student body. As one of the most diverse of the nation's top law schools, USC Law is made up of students from throughout the country and around the world whose ideas and experiences enrich the learning process and provide new perspectives on the law. Through close collaboration, interdisciplinary academic training and hands-on application of skills, students acquire the experiences and knowledge necessary to succeed as leaders in a global environment.

USC Law alumni are partners in the world's largest law firms, CEOs and presidents of multimillion-dollar companies, and leaders in public service organizations. Since its founding in 1900, the school has produced hundreds of judges, and its graduates have held elected offices ranging from mayor of cities large and small to a United States senator.

#### Faculty

*Dean and Carl Mason Franklin Dean's Chair in Law:* Robert K. Rasmussen, J.D.\*

*Scott H. Bice Chair in Healthcare Law, Policy and Ethics:* Alexander Morgan Capron, LL.B.

*Carolyn Craig Franklin Chair in Law and Religion:* Ronald R. Garet, J.D., Ph.D.\*

*Judge Edward J. and Ruey L. Guirado Endowed Chair in Law:* Thomas D. Lyon, J.D., Ph.D.\*

*Edward G. Lewis Chair in Law:* Nancy C. Staudt, J.D., Ph.D.

*J. Thomas McCarthy Trustee Chair in Law:* Christopher D. Stone, J.D.

*Robert C. Packard Trustee Chair in Law:* Edward J. McCaffery, M.A., J.D.\*

*George T. and Harriet E. Pfleger Chair in Law:* Daria Roithmayr, J.D.

*Rader Family Trustee Chair in Law and Provost Professor of Law and Political Science:* Lee Epstein, Ph.D.

*Nathan and Lilly Shapell Chair in Law:* Nomi M. Stolzenberg, J.D.

*UPS Foundation Chair in Law and Gerontology:* Martin L. Levine, J.D., LL.D.

*Ervin and Florine Yoder Chair in Real Estate Law:* George Lefcoe, LL.B.

*Herbert W. Armstrong Professor of Constitutional Law:* Larry G. Simon, LL.B.

*Leon Benwell Professor of Law:* Edwin M. Smith, J.D.\*

*Virginia S. and Fred H. Bice Professor of Law:* Scott A. Altman, J.D.

*Roy P. Crocker Professor of Law:* Jody David Armour, J.D.

*William T. Dalessi Professor of Law:* Gregory C. Keating, J.D., Ph.D.

*Frances R. and John J. Duggan Professor of Law:* Elizabeth Garrett, J.D.

*Orrin B. Evans Professor of Law:* Elyn R. Saks, M.Litt., J.D., Ph.D., LL.D. (Hon.)

*Judge Edward J. and Ruey L. Guirado Professor of Law:* Mary L. Dudziak, J.D., Ph.D.

*Charles L. and Ramona I. Hilliard Professor of Law:* Daniel M. Klerman, J.D., Ph.D.

*Maurice Jones, Jr. – Class of 1925 Professor of Law:* Andrei Marmor, LL.B, Ph.D.

*Robert Kingsley Professor of Law:* Susan Estrich, J.D.

*Richard L. and Antoinette Schamoi Kirtland Professor of Law:* Gillian K. Hadfield, J.D., Ph.D.

*John B. Milliken Professor of Taxation:* Thomas D. Griffith, MAT, J.D.\*

*Dorothy W. Nelson Professor of Law:* Michael H. Shapiro, M.A., J.D.

*Newton Professor of Constitutional Law:* Rebecca L. Brown, J.D.

*Robert C. and Nanette T. Packard Professor of Law:* Scott H. Bice, J.D.\*

*John B. and Alice R. Sharp Professor of Law:* Ariela J. Gross, J.D., Ph.D.

*Provost Professor of Business, Law, and Political Economy:* Mathew D. McCubbins, Ph.D. (*Political Science and Public Policy*)

*Provost Professor of Philosophy and Law:* Gary Watson, Ph.D. (*Philosophy*)

*University Professor:* Alexander Morgan Capron, LL.B.

*University Professor, Emeritus:* Marshall Cohen, M.A., M.A. (Oxon)

*Professors:* Anthony M. Bertelli, J.D., Ph.D. (*Public Administration and Policy*); Geoffrey Cowan, LL.B. (*Journalism*); David B. Cruz, M.S., J.D.\*; Edward J. Finegan, Ph.D. (*Linguistics*); Geoffrey Garrett, Ph.D. (*International Relations*); Howard A. Gillman, Ph.D. (*Political Science*); Sofia Mary Gruskin, J.D., MIA (*Preventive Medicine*); Cynthia B. Herrup, Ph.D. (*History*); Ehud Kamar, LL.B., LL.M., LL.M., JSD; Edward D. Kleinbard, M.A., J.D.; Bart Kosko, J.D., Ph.D. (*Electrical Engineering*); Sharon A. Lloyd, Ph.D. (*Philosophy*); John G. Matsusaka, Ph.D. (*Finance and Business Economics*); Mathew McCubbins, M.S., Ph.D.; Claudia Moatti, Ph.D., HDR (*Classics*); Kevin J. Murphy, Ph.D. (*Finance and Business Economics*); John E. Rolph, Ph.D. (*Information and Operations Management*); Hilary M. Schor, Ph.D. (*English*); Dan Simon, LL.B., MBA, LL.M., SJD; Simon J. Wilkie, Ph.D. (*Economics*)

*Associate Professors:* Jonathan M. Barnett, M.Phil., J.D.; Kim Shayo Buchanan, LL.B./J.D., LL.M., JSD; Shmuel Leshem, LL.B., MBA, JSD, LL.M.; Camille Gear Rich, J.D.; Nina Walton, LL.B., C.Phil., MPP, Ph.D.; Mark I. Weinstein, MSIA, M.B.A., Ph.D. (*Finance and Business Economics*); Gideon D. Yaffe, Ph.D. (*Philosophy*)

*Assistant Professors:* Megan Hibler Reid, Ph.D. (*Religion*); Stephen Rich, M.A., J.D.; Diana I. Williams, Ph.D. (*History*)

*Adjunct Professors:* Pauline M. Aranas, J.D., MLIS (*Deputy Director; Law Library*); Robert M. Saltzman, J.D.\*

*Adjunct Assistant Professors:* Catherine Coleman, J.D.; Lecanna Izuel, J.D., LL.M.; Tami Lefko, J.D. (*Associate Director of LL.M. Legal Writing and Advocacy*); Rebecca S. Lonergan, J.D. (*Interim Co-director of Legal Writing and Advocacy*); Paul Moorman, MLIS, J.D.; Linda Bassett Puertas, J.D.; Brian Raphael, MLS, J.D.; Julie A. Ryan, J.D. (*Interim Co-director of Legal Writing and Advocacy*)

*Clinical Professors:* Michael J. Brennan, LL.B.; Lee W. Campbell, J.D.; Niels W. Frenzen, J.D.

*Clinical Associate Professors:* Michael Chasalow, J.D., MBA; Jack Lerner, J.D.; Heidi L. Rummel, J.D.

*Clinical Assistant Professor:* Hannah R. Garry, M.A., J.D.

*Professor of the Practice of Law:* Clare Pastore, J.D.

*Emeritus Professors:* Marshall Cohen, M.A., M.A. (Oxon.) (*Philosophy*); W. David Slawson, M.A., LL.B.\* (*Torrey H. Webb Professor of Law, Emeritus*)

*Clinical Emeritus Professor:* Noel M. Ragsdale, J.D.\*

\*Recipient of university-wide or school teaching award.

## Degree Programs

### *Juris Doctor*

The Juris Doctor (J.D.) is the basic law degree. To obtain the degree, full-time attendance for six semesters is required. During the first year, the student takes a required curriculum of basic courses that examines fundamental legal institutions and addresses legal problems relevant to today's society and the modern practice of law. During the second and third years the student must complete a writing requirement and at least one course that provides substantial instruction in professional skills generally regarded as necessary in the practice of law. The remainder of the courses taken in the last two years are primarily elective.

### *Dual Degrees*

USC Law maintains dual degree programs with the graduate programs in accounting, business administration, economics, gerontology, pharmacy, philosophy, public administration, public policy, social work, political science, politics and international relations, religion, real estate development, and communication. These programs enable qualified students to earn a law degree (J.D.) and the appropriate master's degree. If the master's degree normally requires one year of study, a student in a dual degree program earns both degrees in only three years. If the master's normally requires two years of post-baccalaureate courses, a total of four years is required. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC beyond the first year curriculum.

The goal of these programs is to encourage law students to gain a recognized competence in another discipline that has a direct relevance to the roles lawyers play in society. The dual degree programs are based on the premise that some topics covered in the law school are also covered in the programs of the cooperating departments, so that some credit toward the law degree may appropriately be given for specified graduate work taken in the cooperating department. Similarly, the cooperating departments have recognized that some credit toward the master's degree may appropriately be awarded for certain work completed in the law school.

### *LL.M. Degree*

The LL.M. program is a master's degree program for foreign graduate students trained in law. This two-semester, full-time program introduces foreign lawyers to American law and the U.S. legal system and prepares them for leadership roles in the global market. After successfully completing the program, students will be awarded the Master of Laws degree.

### *MCL Degree*

The MCL program is a master's degree program for foreign graduate students trained in law who have already earned their LL.M. degree. This two-semester, full-time program is focused on the study of comparative law. Students are provided with the opportunity to study the differences, similarities and interrelationships of different systems of law around the world. After successfully completing the program, students will be awarded the Master of Comparative Law degree.

## Continuing Legal Education

The law school's Continuing Legal Education Program provides the legal community with the greatest variety of offerings of any law school in the west. USC Law has been approved as a provider of Minimum Continuing Legal Education (CLE) by the State Bar of California and offers general CLE and Legal Specialization Credit for lawyers, as well as continuing education credits for accountants and real estate professionals.

USC Law is a national leader in continuing education, presenting six annual programs designed for sophisticated attendees from the bar, judiciary, accounting, business and law student communities and supported by both law firm and corporate sponsors.

CLE programs in 2012-2013 include the Institute on Entertainment Law and Business, Trust and Estate Conference, Tax Institute, Institute for Corporate Counsel, Real Estate Law and Business Forum, and Intellectual Property Institute.

For detailed program and registration information, visit [law.usc.edu/cle](http://law.usc.edu/cle). For additional questions, call (213) 743-1772 or email [cle@law.usc.edu](mailto:cle@law.usc.edu).

## Tuition and Fees (Estimated)

Students in the law school's J.D. program pay tuition of \$25,319 per semester (13-17 units). For less than 13 units the tuition is \$1,957 per unit, and tuition is an additional \$1,957 for each unit over 17.

Students in the law school's LL.M. and MCL programs pay tuition of \$25,319 per semester, for two semesters.

The university reserves the right to assess new fees or charges as it may determine. The rates listed are subject to change without notice by action of the Board of Trustees.

These fees are based upon current information available at the time of publication and are subject to possible later change.

In addition to the mandatory fees charged to all USC students, law students must also join the Student Bar Association. In 2012-2013, this membership fee was \$25 per semester.

## Admission Requirements — J.D. and Dual Degrees

First-year students must have a bachelor's degree from an accredited college by the beginning of their law school classes. USC Law does not require applicants to take any specific college courses, and discourages pre-law students from enrolling in college courses that duplicate the law school curriculum. The faculty recommends college courses that are intellectually challenging and require disciplined study. Training in careful reading and skilled writing is most valuable, as are courses involving seminar discussion and sustained research. The student will find that a broad exposure to such fields as economics, philosophy, history, political science, anthropology, mathematics and psychology is more useful than narrow exposure to vocationally oriented courses.

All applicants are required to take the Law School Admission Test (LSAT) administered by the Law School Admissions Council. Applicants must take the test no later than December if they seek to start law school the following August.

Like most law schools, the USC Gould School of Law requires students to use the Law School Data Assembly Service (LSDAS). The LSDAS assembles an applicant's transcripts and LSAT scores and forwards copies of them to law schools of the applicant's choosing. An applicant who has previously registered with the LSDAS need only request on the appropriate form

that the name of the University of Southern California Gould School of Law be added to the list of schools to which the student is applying. Further information about the LSAT and the LSDAS may be obtained from the Law School Admission Council, 662 Penn St., Box 40, Newtown, PA 18940 and online at [www.lsac.org](http://www.lsac.org).

Detailed information regarding admission application procedures is available from the Dean of Admissions, University of Southern California Gould School of Law, University Park, Los Angeles, CA 90089-0074 and on the school's Website ([www.law.usc.edu](http://www.law.usc.edu)).

#### *Transfer Students and Visiting Students*

A student in good standing at a law school that is approved by the American Bar Association may apply for admission with advanced standing either as a transfer student or as a visiting student. Transfer students enter USC Law after one year at another law school; they then spend two years at the law school and earn the J.D. degree from USC. Visiting students spend one or two semesters at the law school during their third year of law school; they are not eligible for a USC degree. For further information, please request Transfer/Visitor Information from the Admissions Office at USC Law.

#### *Transfer LL.M. Students*

Law students who are enrolled in USC Law's LL.M. program for foreign lawyers may apply to the J.D. program as transfer LL.M. students during the transfer application period. Only USC Law LL.M. students may apply in this manner. Those who have already been awarded an LL.M. at another U.S. law school may apply as international J.D. applicants to the three-year program. For further information, request LL.M. transfer information from the Graduate and International Programs Office at USC Law.

## Juris Doctor

The Juris Doctor is the basic law degree. To obtain the degree, a student must satisfactorily complete 88 units, be in full-time attendance for six semesters and complete all required courses. Several options are available through which students may, with appropriate permission, take courses outside the law school. Except with special permission, however, each student (including a dual degree student) must successfully complete at least 35 units beyond the first year curriculum, in law courses, taken at this law school, and graded in the normal manner. Each student

#### **Admission Requirements — LL.M. Degree**

Students submitting an application must have earned a basic law degree, a Bachelor of Laws (LL.B.) degree or the foreign equivalent. Some experience following the completion of the first professional degree is preferred. For further information, contact the law school at (213) 821-5916 or visit the school's Website ([law.usc.edu](http://law.usc.edu)).

#### **Admission Requirements — MCL Degree**

Students submitting an application must have earned a basic law degree, a Bachelor of Laws (LL.B.) degree or the foreign equivalent and will have previously earned their LL.M. degree. Some experience following the completion of the first professional degree is preferred. For further information, contact the law school at (213) 821-5916 or visit the school's Website ([law.usc.edu](http://law.usc.edu)).

#### **Registration**

Registration is handled by the Registration and Records Office of the USC Gould School of Law. First-year students will automatically be registered in their fall semester courses approximately two to three weeks prior to the beginning of the school year and for their spring semester courses approximately two to three weeks prior to the dates listed in the law school calendar for upper-division student registration.

#### **Grading and Attendance Policies**

##### *Grading*

The grading system uses both numbers and letters in a range from 1.9 to 4.4 with letter-grade equivalents ranging from F to A+. The grade equivalents are: A+ (4.1-4.4); A (3.8-4.0); A- (3.5-3.7); B+ (3.3-3.4); B (3.0-3.2); B- (2.7-2.9); C+ (2.5-2.6); C (2.4); C- (2.1-2.3); D (2.0); and F (1.9). Students receiving a grade of 1.9 will not be given credit for the course toward graduation. A student who fails a first-year course must repeat the course, but both grades will be included in computing

must also complete a minimum of 65 of the required 88 units by attendance in regularly scheduled class sessions at the law school. A law student is expected to devote the major portion of his or her time to law studies; any outside employment must therefore be restricted. First-year students are not permitted to hold jobs, and second- and third-year students may not hold outside employment requiring more than 20 hours of work per week.

First-year students are required to carry the full load of courses prescribed for that year, and second- and third-year students are

that student's general average. Other courses may not be repeated except on petition to the associate dean. A student with a weighted cumulative average of less than 3.0 at the end of the year will be placed on restricted enrollment. A student with a weighted cumulative average of less than 2.7 at the end of any year will not be permitted to continue.

#### *Credit/D/F*

After the first year, a student may take up to a total of 8 units on an elected CR/D/F basis, chosen from among courses otherwise graded in a normal manner. No more than 4 such units may be taken in a semester. The student must elect to take a course CR/D/F during the first two weeks of the semester. Courses or seminars may, at the instructor's option, be designated prior to registration as not available for CR/D/F grading. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC beyond the first year curriculum.

Students may also take such courses regularly offered only on a CR/D/F basis, in addition to courses taken under this rule.

#### *Withdrawals from Courses*

A student may not withdraw from a course later than two weeks after the first day of classes of any semester without permission of both the associate dean and the instructor.

#### *Attendance*

Class attendance is an important part of law school education. It assists both the individual and fellow students in making the most of the educational opportunity offered. Students should, therefore, attend class regularly and participate in the discussion. Professors may require attendance and may take attendance into account in evaluating student performance.

required to carry between 13 and 17 units each semester, unless special permission to carry a reduced or enlarged schedule is granted by the associate dean. After completion of the first full year of law study, students who are expecting a child may be given permission to carry a reduced load in their subsequent years, but they must complete all requirements for the degree within a reasonable period of time (usually within four years). All students must complete six full-time semesters.

Requirements for degrees, as well as the courses offered, may be changed by the faculty at any time. The associate dean may waive some requirements for individual students.

### The First Year

During the first year, the student takes a required curriculum of basic courses that examines fundamental legal institutions and addresses legal problems relevant to today's society and the modern practice of law.

In the fall semester, Law, Language, and Values introduces students to foundational concepts in legal reasoning, including theories of interpretation, the rule of law and normative reasoning.

Torts I explores the individual's obligation to refrain from harming others and studies the bases for compensating persons who suffer injuries — either by holding responsible whomever is at fault for the harm, or by invoking other principles of liability including the efficiency of resource allocation and spreading of losses.

Procedure introduces students to the issues of what constitutes fair, adequate and efficient procedures in resolving legal disputes. Study focuses on the procedures outlined in Federal Rules of Civil Procedure.

Contracts studies the law regulating consensual arrangements entered into for commercial purposes. It concerns such questions as what promises do and should the state enforce and what remedies are available when enforceable promises are breached.

In the spring semester, students take Criminal Law, which studies issues relating to the decision, by legislature or court, to designate behavior as a "crime." Significant attention is given to the moral, psychological and philosophical issues involved in ascribing criminal responsibility.

Legal Profession examines the functions of the lawyer in modern society, the history and organization of the legal profession, as well as lawyers' conflicting duties. It also looks into the adversary system, equal access to justice, and other problems of ethics and professional responsibility.

Constitutional Law considers the delineation of spheres of responsibility between the judiciary and legislature, the nation and the state, and the government and the individual.

Property analyzes the development of rules dealing with land, water and other natural resources, frequently from historical and economic perspectives.

All students take a year-long course, Legal Research, Writing and Advocacy. The course is coordinated with other first-year courses, and provides students an opportunity to draft pleadings and to prepare legal memoranda and briefs. Toward the end of the second semester, each student participates in a moot court argument based on work previously prepared for the course.

Students study basic sources of the law — case reports, constitutions, statutes and interdisciplinary materials. There is no uniform method of teaching, but Socratic dialogue and class discussion are primarily employed to help the students analyze issues, reasons and arguments. Moreover, law school faculty have traditionally employed interdisciplinary approaches in analyzing legal problems. First-year classes meet in sections of 60 to 100 students, about half the class size of many law schools.

### The Second and Third Years

#### Requirements

The upper two years of law study are primarily elective, with only two requirements. First, students must satisfy the upper division writing requirement, either by completing a major faculty-supervised writing project, such as a dissertation, or by taking a course with a substantial writing component.

Second, students must enroll in course work that offers substantial instruction in professional skills generally regarded as necessary for the effective and responsible participation in the legal profession. Such course work includes simulation courses (including Trial Advocacy and Pretrial Advocacy), live-client clinical offerings and courses involving the drafting of legal documents (including Contract Drafting and Negotiation).

#### Course Offerings

The basic courses that most students elect to take — for example: Business Organizations, Evidence, Taxation, and Gifts, Wills and Trusts — are offered every year and usually twice a year. Other courses listed are offered once a year, or in some cases, once every several years. Each year the law school attempts to provide upper-division students with a wide variety of optional specialized courses. Often these reflect the research interests of the faculty. Some examples in recent years have been Biotechnology and the Law, Global Warming, Counterterrorism and Homeland Security, Wrongful Convictions, Reproductive Rights, Special Education and Disability Law, and seminars on the Enron era. Because there are specialty courses in nearly every major area of the law, upper-division students are able to concentrate in a particular area, or, if they prefer, pursue a broad, basic legal education.

#### Clinical Offerings

The upper-division curriculum includes a variety of opportunities for clinical legal education. "Clinical" courses are of two kinds. First, clinical refers to courses in which the learning of legal principles occurs through actual work on cases in particular subject matter areas. For example, the law of prisoners' rights and post-conviction remedies is taught in the Post-Conviction Justice Project, a course in which students represent inmates in the California Institution for Women. This representation is under the direct supervision of full-time law school faculty members. About 20 students participate each semester, traveling to the prison to meet with their clients on a regular basis, attending seminars at the law school, preparing briefs and papers, drafting habeas petitions, and negotiating and dealing with prosecutors and prison and court personnel. In addition, students make court appearances on behalf of clients in state and federal courts, as well as courts of appeals.

The second type of clinical course concentrates on specific lawyering skills taught in a classroom setting through the use of hypothetical case materials, with actors and actresses playing the roles of clients. The best illustration of this form of clinical teaching is the three-course sequence of Pretrial, Trial and Appellate Advocacy, which covers the stages in the litigation process suggested by the course titles. In these courses, students actually perform, in a simulated courtroom or law office environment, the multiple tasks required of lawyers. Most work is done in small groups; students are videotaped and intensively reviewed by the instructors. A student can take part or all of this sequence. The three courses together require the student to do at least the following: client interviewing and counseling, legal research, fact-finding, drafting of legal documents, negotiation with opposing counsel, arguing pretrial motions to a judge, preparing witnesses to testify, selecting a jury, conducting direct and cross-examination, proposing and opposing exhibits and testimonial evidence, arguing to a jury, and drafting and arguing an appellate brief.

The Post-Conviction Justice Project and the advocacy courses are not the only clinical courses in the curriculum, but they are useful examples of the variety of clinical teaching. A course in a specific area of law, like the Post-Conviction Justice Project, necessarily requires students to acquire basic courtroom, negotiation and client interviewing skills. The skills-oriented advocacy courses require students to be familiar with substantive areas like evidence, procedure and the law in the area of the hypothetical client's problems.

These two kinds of clinical courses supplement each other, just as substantive knowledge and expert skills do in the practice of law. Considered as a whole, USC's clinical courses provide the foundation of knowledge and skill necessary to begin the practice of law.

#### *Judicial Externships and Clinical Internships*

The clinical opportunities listed previously are focused primarily within the law school. In addition, there are two categories of clinical options for students to pursue outside the law school in the actual environments of courts and law offices.

The first of these, the judicial externship program, enables students to receive credit for full- or part-time work as an extern to a judge of the state or federal court. Students are selected by the judges themselves. USC students have served as externs in the California Supreme Court, U.S. Court of Appeals, U.S. District Court, U.S. Bankruptcy Court, California Court of Appeal and Superior Court. During the externship, each student is supervised by the assistant dean and the placement supervisor.

The second program, the clinical internship option, allows USC Law students to work part-time in government agencies, legal services programs or other nonprofit organizations under the supervision of practicing attorneys and faculty members. Students earn academic credit while providing representation to actual clients, learning important government processes or participating in large-scale impact litigation. Since the program includes more than 50 pre-approved agencies, students may choose from a wide range of clinical internships.

Neither program is considered a regularly scheduled class session for purposes of graduation requirements.

#### *Individual Research Projects*

A wide variety of courses and institutes offers opportunities for upper-division students to engage in individual research under faculty supervision and often in conjunction with course offerings, as well as to participate in large research projects. Projects presently underway include the uses of ocean and sea resources, the development and regulation of geothermal energy, sentencing practices in felony cases, the effects of real estate taxation, the delivery of legal service to low- and middle-income persons, the civil commitment of elderly persons, the relationships between corporate law and actual corporate practices, and theoretical studies in law and economics. Such research projects are financed by grants from the Brookings Institution, the U.S. Commission on Civil Rights, the National Science Foundation,

the Ford Foundation, the Lincoln Institute of Land Policy, the National Institute of Mental Health, and the Energy Research and Development Administration.

Independent research completed for academic credit is not considered a regularly scheduled class session for purposes of graduation requirements.

#### *Courses Outside the Law School*

With the concurrence of the associate dean, a student may receive up to 12 units of J.D. credit for courses taken outside the law school. These courses must be on the graduate level and may be taken only at USC. Taking graduate level courses outside the law school is an alternative to the dual degree program; a student may not pursue both approaches. With the approval of the associate dean, a student may receive a limited number of J.D. credits for undergraduate language courses taken at USC. For purposes of meeting the 35-graded-units rule, all non-law courses are counted as CR/D/F units.

A student may, with permission of the associate dean, enroll in and transfer the credit from a law course taken at another school that is a member of the Association of American Law Schools, if the course is equivalent to one included in the USC Law curriculum that will not be offered here during the semester the student takes the course. Credit will be granted only for courses graded "C" or better. A maximum of 5 such units may be counted toward the J.D.

Courses taken outside of the law school are not considered regularly scheduled class sessions for purposes of graduation requirements.

#### *Course Selection in the Upper Division*

With such a variety of courses available, how do second- and third-year students go about selecting the program that will be best suited to their individual interests and ambitions?

There are no precise rules or proven methods for selecting second- and third-year courses. To a large extent, these choices reflect each student's personal assessment at the end of the first year — strengths and weaknesses, developing intellectual interests and first tentative career plans. For this reason, the combination of courses most desirable for one person will not necessarily be best for anyone else. Students are urged to be wary of the notion that there is a specific, recommended curriculum to follow. But reluctance to impose a model course of study does not mean that no guidance is available, for there are at least four ways of thinking about these choices that, in combination, will help each student choose the best array of courses.

One recommended approach to course selection is to choose courses taught by professors the student admires, without regard to subject matter. For each student there are teachers who are particularly able to create intellectual excitement and whose approach to analysis and teaching strikes a responsive note. Students will benefit as much from exposure to a specific professor's analytic skills and approach to legal issues as from specific course content.

A second approach is to choose courses that look exciting, without worrying about whether such courses are directly related to the student's current career plans or to some idea of traditional curriculum. If it appears that a course will be intellectually interesting, will expose students to a new area of the law, or provide needed variety, there is already more than enough reason to enroll. Courses taken because of enthusiasm for either the instructor or the subject matter often lead to the richest academic experience of law school.

The third way to make decisions about taking courses is to classify them according to clusters that emphasize similar issues or themes and then select from each area. For example, a student interested in ideas about family relationships will find them discussed in different contexts in Gifts, Wills, and Trusts; Family Law; and the Children's Legal Issues Practicum. Trial Advocacy and Pretrial Advocacy are courses that teach practical litigation skills, relating various performance tasks to the underlying skills of legal writing, advocacy, legal counseling, negotiation, and factual analysis. A further example includes courses involving close work with statutes, such as Labor Law, Securities Regulation and Taxation, any of which will provide opportunities to develop important and transferable skills.

Finally, students might think about selection as a way of building a wide substantive expertise in an area of particular interest. For example, the following courses are crucial to one anticipating a substantial wills and estate planning practice: Family Law; Community Property; Taxation; Estate Planning; Real Estate Transactions; and Gifts, Wills and Trusts. This kind of course planning requires some thought and investigation, since a casual examination might omit such courses as Community Property (which may affect one's legal ability to transfer property by will), and Real Estate Transactions (since various forms of property ownership may dictate a specific will or create planning considerations).

These approaches to course selection describe only some of the ways in which students might make reasoned choices about their academic programs. Formal and informal academic counseling are available from the associate dean, the assistant deans

and other faculty. In addition, students are encouraged to follow the written recommendations available in the online *Student Handbook* available via the Student Portal on the USC Law School Website.

## Dual Degrees

### Admission

Students may be accepted for a dual degree program when they are accepted to the law school, although most students do not apply until sometime in the first year. All programs require that students successfully complete the required first year of law school before beginning work toward the master's degree. Credit toward the law degree may not be given for graduate work completed prior to the completion of the first year of law school, although some credit toward the master's degree may be allowed by the faculty of the cooperating department of approved work completed prior to the first year of law school. Students are not eligible for either of their dual degrees until they complete the requirements for both degrees. All students (including dual degree students) must complete at least 35 numerically graded USC Law units beyond the first year curriculum.

Following are general descriptions of the dual degree programs. Students interested in further information should consult the USC Law Admissions Office.

### Juris Doctor/Master of Arts in Economics

Students are required to complete 92 units of law and economics course work, 4 units of which must constitute a thesis acceptable to the faculties of the law school and the Department of Economics. Before enrolling in economics courses, students must have completed an undergraduate course in probability and statistical inference (e.g., BUAD 310). Students with undergraduate degrees in such disciplines as business, economics, mathematics and psychology will usually have taken such a course as part of their undergraduate program.

*First Year:* Required law school courses.

SECOND AND THIRD YEARS:		UNITS
ECON 500	Microeconomic Analysis and Policy	4
ECON 511	Econometric Methods, or	
ECON 513	Practice of Econometrics	4

*Two Additional Graduate Level Courses in Economics (8 units):* ECON 680 Industrial Organization and ECON 681 Economics of Regulated Industries are recommended, but the student is free to choose any graduate level courses other than ECON 590 or ECON 790 in consultation with the program adviser. ECON 401 Mathematical Methods in Economics may be substituted for one of these courses, and ECON 417 Statistics for Economics or ECON 414 Introduction to Econometrics may be substituted for the other. (These three courses are applicable toward graduate credit.)

*Four Units of Thesis:* The thesis must be acceptable to both the faculty of the law school and the faculty of the Department of Economics.

*Thirty-nine Units of Law Courses:* including one course in a subject matter related to economics (including but not necessarily limited to Taxation, International Business Transactions, Antitrust Law I, Regulated Industries, Labor Law, Administrative Process, Business Enterprise Taxation or Land Use Controls). In addition to the LSAT, students interested in this dual degree program are required to take the aptitude and advanced economic portions of the Graduate Record Examinations (GRE).

### Juris Doctor/Master of Science in Gerontology

The J.D./M.S. dual degree combines the knowledge of the older population with understanding of the legal system. The program prepares graduates for a number of roles in both public and private sector organizations. Students are required to complete 110 units of course work, 74 from the law school and 36 from the Davis School of Gerontology. The first year is devoted to required law courses, and the second, third and fourth years combine gerontology and law courses.

#### *Gerontology Requirements*

The Master of Science in Gerontology will require 36 units of course and fieldwork that cover the core content of the M.S. program.

GERONTOLOGY REQUIREMENTS		UNITS
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 555	Integrating Gerontology: A Multidisciplinary Approach	4
GERO 591	Field Practicum	8
GERO 593	Research Methods	4
	Gerontology elective	4

The Davis School of Gerontology will waive 16 units of electives, which are required in the regular M.S. program, as well as GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program have a primary professional focus in law.

#### *Law School Requirements*

The law school requires 74 units of credit.

FIRST YEAR REQUIREMENTS		UNITS
LAW 502	Procedure I	4
LAW 503	Contracts	4
LAW 504	Criminal Law	3
LAW 505	Legal Profession	3
LAW 507	Property	4
LAW 508	Constitutional Law I	4
LAW 509	Torts I	4
LAW 512	Law, Language, and Values	2
LAW 515	Legal Research, Writing and Advocacy I	3
LAW 516	Legal Research, Writing and Advocacy II	2

#### *Elective Course Work*

The second and third year of law study are primarily elective with one requirement. Students must satisfy the upper division writing requirement, either by completing a major, faculty-supervised writing project such as a dissertation, or by taking a course with a substantial writing component.

The law school will waive 14 units of electives which are required in the regular J.D. program.

### **Juris Doctor/Master of Business Administration**

In addition to the LSAT, applicants to this dual degree program are required to take the Graduate Management Aptitude Test. Requirements for the dual degree program are listed in the Marshall School of Business section of this catalogue on page 159.

### **Juris Doctor/Master of Business Taxation**

The Leventhal School of Accounting offers a specialized 45-unit program in taxation leading to the Master in Business Taxation (MBT). However, up to 15 units of preliminary courses in the MBT program may be waived by the Leventhal School of Accounting in light of previous education or completion of a proficiency examination. The total number of units required may thus vary, but all students are required to complete a minimum of 30 units of business courses and maintain an overall grade point average of 3.0 for these courses. Students also must complete 76 law units to satisfy the J.D. portion of the dual degree. Requirements for this dual degree are listed in the Leventhal School of Accounting section of this catalogue on page 197.

### **Juris Doctor/Pharm.D.**

#### *Admission Requirements*

Admission to the dual Pharm.D./J.D. program is competitive, and involves meeting admission requirements and gaining acceptance to both the School of Pharmacy and the law school. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students that have a baccalaureate degree may apply to the dual Pharm.D./J.D. degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both schools. Students who elect this approach must identify themselves on their Pharm.D. applications as potential dual Pharm.D./J.D. degree students. Students who are admitted to both schools will be offered admission to the dual degree contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA.

Students pursuing the dual Pharm.D./J.D. degree must notify the law school in a timely fashion that they will be enrolling in the dual Pharm.D./J.D. degree program and will not matriculate at the law school until the following year. Students who are accepted only by one school may choose to attend that school but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the law school during their first year of enrollment in the Pharm.D. program prior to the law school's published application deadline. Students who elect this approach must apply through the

School of Pharmacy. Students admitted to the law school using this approach would be offered admission to the dual degree contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA. See the admissions section of the School of Pharmacy and the law school for specific requirements.

#### *Degree Requirements*

The professions of pharmacy and law are distinctly different, yet pharmacists are often involved in legal issues and lawyers frequently deal with pharmacy, drug, health care, product development and toxin-related matters. This dual degree program provides qualified students with an efficient mechanism for obtaining the expertise and professional credentials that will enable them to develop professional practices that bring together expertise in both areas.

#### *Overall Requirements*

A student is required to complete all work for both degrees within six years of the date of matriculation at the School of Pharmacy (Pharm.D.) and five years of matriculation at the law school (J.D.). The entire dual degree program will take six years to complete. Dual degree students will be allowed to use 12 units of approved J.D. course work (elective or required) to meet 12 units of Pharm.D. electives and 12 units of approved Pharm.D. course work (elective or required) to meet 12 units of J.D. electives. A faculty guidance committee will determine the exact program for each student, including the appropriateness of courses in one program used to meet elective requirements for the other program. A total of 208 units is required for the dual degree.

#### *Pharm.D. Requirements*

Dual degree students must successfully complete 144 units of Pharm.D. and acceptable J.D. units to receive the Pharm.D. degree. The 144 units must include 132 units of required and elective pharmacy course work plus 12 units of J.D. course work deemed acceptable to meet Pharm.D. elective requirements. Dual degree students should graduate with their Pharm.D. degrees at the completion of the first semester of the sixth academic year of the dual degree program. Students will be eligible to sit for the Pharmacy Board Exams after completion of the Pharm.D. degree requirements. However, dual degree students will not actually be awarded their Pharm.D. degrees until they complete requirements for both degrees.

#### *Juris Doctor Requirements*

Dual degree students must successfully complete 88 units of J.D. and acceptable Pharm.D. course work during the second to sixth years of the dual degree program to receive the J.D. degree. The 88 units must

be composed of 76 units of J.D. course work, including satisfaction of the upper-division writing requirement and any other substantive requirements, plus 12 units of Pharm.D. course work deemed acceptable to meet J.D. elective requirements. No J.D. credit will be awarded for Pharm.D. course work completed prior to matriculation in the law school. Students cannot receive the J.D. degree under requirements for the dual degree program without prior or simultaneous completion of the Pharm.D. degree.

Both professions require passing a state board or bar exam to practice the respective professions. Neither of these degrees requires a thesis or comprehensive final exam.

#### *Recommended Program*

Pharm.D./J.D. dual degree students will begin with the first year of the Pharm.D. curriculum (36 units). During the second year, students will take the first year law core (33 units), plus 3-5 Pharm.D. units. Due to the rigor of the law school core, pharmacy courses during the first year of law school are limited to non-science courses. The third through fifth years of the program focus on Pharm.D. courses with sufficient law courses to maintain students' educational momentum in law. Students should complete their Pharm.D. requirements during the fall of their sixth year of the program and their law course work also during the sixth year. Students must complete both degree requirements by the end of the sixth year of the program.

### **Juris Doctor/Master of Public Administration**

Students are required to complete 97 units of course work. Candidates for the dual degree must fulfill the statistics requirement of the MPA degree. See the Master of Public Administration section, page 886. Requirements for this dual degree program are listed in the USC Price School of Public Policy section of this catalogue, page 901.

### **Juris Doctor/Master of Public Policy**

The USC Price School of Public Policy and the law school offer a dual degree that enables qualified students to earn both a Juris Doctor and a Master of Public Policy in approximately four years of study.

The dual degree allows students to acquire a blend of the analytic skills of public policy and an understanding of legal institutions and processes. This combination of knowledge is well suited for law students who want to affect the policy-making process and craft legislation to aid in achievement of public policy goals. It is equally appropriate for prospective policy analysts who are interested in law and public policy.

Students must apply to, and be accepted by, both schools. They may be accepted to the dual degree at the time of their acceptance to the law school or at the beginning of their second year of law school. Dual degree students spend the first year of the program completing the required first year of law school. The remaining units of law school courses and the required 36 units of core MPP courses are taken by students in the second through fourth years.

Students are required to complete 114 units of course work, including 78 units in the Gould School of Law and 36 units in the USC Price School of Public Policy. The MPP program has a statistics prerequisite. See the Master of Public Policy section, page 888. Requirements for this dual degree are listed in the USC Price School of Public Policy section (page 899).

#### **Juris Doctor/Master of Social Work**

Students are required to complete 123 units of course work, including 76 units in the Gould School of Law and 47 units in the USC School of Social Work.

*First and Second Years:* Complete both the first year J.D. program of study and the first year MSW course of study.

*Third Year:* Complete the second year J.D. program.

*Fourth Year:* Complete the core concentration courses (included SOWK 686a Field Practicum II) of the concentration selected in the MSW program, with the fourth course to be determined as part of the student's individualized educational plan approved by that concentration. The final semester will be taken in the J.D. program in the spring. The law school gives credit for the third semester in the School of Social Work, while the latter recognizes law courses as substitutions for three social work courses and one semester of field instruction (for which a clinical law semester is substituted).

#### **Juris Doctor/Master of Arts, International Relations**

The USC Gould School of Law and the USC School of International Relations jointly offer a three-year program leading to the J.D. and M.A. degrees. (Students may extend the dual degree program to four years.) Applicants must apply to both the law school and the School of International Relations and meet requirements for admission to both. In addition to the LSAT, students interested in this program are required to take the Graduate Record Examinations (GRE). Law students may apply to the School of International Relations during their first year at the law school.

In the first year, students take their course work in the law school exclusively. The second and third years include 24 units of courses in international relations and 40 units in law. Students pursuing the dual degree must complete LAW 662 or LAW 764 and one additional international law course.

Students pursuing the dual degree must complete 24 units within the School of International Relations at the 500 level or above. These students are required to successfully complete IR 500 International Relations Theory, either IR 513 Social Science and Historical Research Methods: Introduction to Research Design or IR 517 International Policy Analysis, and two domain courses selected from among IR 502 Conflict and Cooperation, IR 509 Culture, Gender, and Global Society, IR 521 Introduction to Foreign Policy Analysis, and IR 541 Politics of the World Economy. Like all other master's students, students in the dual degree program must complete a substantive paper or alternative project. The requirements, standards and evaluation procedure for the substantive paper are identical to those listed for all M.A. students except that one member of the examining committee must come from the law school.

#### **Juris Doctor/Master of Arts, Religion and Social Ethics**

Students must complete 20 units in the graduate School of Religion, plus 4 units of thesis.

*First Year:* Required law school curriculum.

*Second and Third Years:* Students will take any two of the three core courses in the School of Religion and a maximum of three elective courses from Areas I and II. Students may substitute the third core course for an elective course. LAW 508 Constitutional Law or such other law course as the schools agree may be substituted for one of the electives. Students must also complete 36 additional law units.

#### **Juris Doctor/Master of Communication Management**

Students must complete 20 units (five courses) of communication courses at the School of Communication: one core class from the student's preferred track; one method course; CMGT 597; and the remaining two courses may be from either core or elective offerings.

*First Year:* Required law school courses.

*Second and Third Years:* 20 units of communications courses and 38 units of law courses, of which 8 units must be approved as appropriate for acceptance by the Annenberg School for Communication and Journalism toward its degree. All students take CMGT 597 in the third year.

Application to pursue the dual degree should be made before completion of 15 units of work on law or 8 units toward the M.A. Admission by the law school to its J.D. degree will be evaluated as a substitute for GRE scores.

#### **Juris Doctor/Master of Real Estate Development**

The Juris Doctor/Master of Real Estate Development dual degree program provides the opportunity for in-depth study of legal issues and real estate development. The increasingly regulatory environment developers work within demands that professionals in the real estate industry have a strong understanding of the legal system. Lawyers who plan to specialize in real estate law will benefit from a thorough understanding of the development process, including financial, planning, marketing and design issues.

Application must be made to both the Gould School of Law and the USC Price School of Public Policy. This program normally requires three years (including one summer) of full-time study in residence to complete.

Students must have use of an approved laptop computer as required by instructors and must demonstrate calculator and spreadsheet skills; a calculator and/or spreadsheet class is offered online via the Internet.

Requirements for completion of the dual degree program are 112 units, including 78 units in law and 34 units in planning. For a complete listing, see Public Policy (page 899).

#### **Juris Doctor/Master of Arts, Philosophy**

Students must complete 24 units in the USC School of Philosophy and 69 units in the Gould School of Law.

*First Year:* Required law school curriculum.

*Second and Third Years:* The School of Philosophy prefers that students take at least one philosophy course each semester. During the four semesters, students must take at least 16 units at the 500 level, including PHIL 450 Intermediate Symbolic Logic and PHIL 500 Introduction to Contemporary Philosophical Literature; one 400- or 500-level course in ethics or social/political philosophy or aesthetics or philosophy of law; one 400- or 500-level course in metaphysics or epistemology or philosophy of language or philosophy of science or philosophy of mind; one 400- or 500-level course in the history of ancient or early modern philosophy; passage of the second year review, which shall include a research paper based on a completed seminar paper and

completion of a publishable research paper. Students must also complete 36 additional law units.

#### **Juris Doctor/Master of Arts, Political Science**

The Department of Political Science and the Gould School of Law jointly offer a dual degree program leading to the J.D. and M.A. degrees. Applicants must apply to both the Department of Political Science and the law school and meet the requirements for admission to both. In addition to the LSAT, students interested in this program are required to take the Graduate Record Examinations (GRE).

In the first year, students take their course work in the law school exclusively. The second and third years include 24 units in political science and 40 units in law.

Like all other students in the political science M.A. program, students pursuing the dual degree must pass a master's screening examination in their field of choice. If they wish to write a master's thesis, they may do so in lieu of two courses.

#### **Juris Doctor/Doctor of Philosophy in Political Science and International Relations**

The Department of Political Science and the Gould School of Law offer a dual degree program leading to the J.D. and Ph.D. degrees. Applicants must apply to the Department of Political Science, the School of International Relations and the law school, and meet requirements for admission to all. In addition to the LSAT, students interested in this program are required to take the Graduate Record Examinations (GRE).

In the first year, students take their course work in the law school exclusively. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in the law school honors programs. The second and third years include 40 units of courses in political science and 40 units of law. Students must take two methodology courses, POSC 500 and POSC 600, and three core courses to be selected from POSC 510, POSC 512, POSC 520, POSC 530 and POSC 540.

## Graduate Degree Programs

USC Law's graduate degree programs include an LL.M. program and an MCL program for foreign law graduates. Through the graduate degree programs, students have opportunities to meet and interact with faculty and J.D. students and also with practicing lawyers from around the world.

To obtain a Ph.D. in Political Science and International Relations, students must pass the screening process. After the completion of additional course work, students must take a Ph.D. qualifying examination in three fields. Students will be examined in two of their three fields of concentration. The third ("write-off") field will be completed by taking at least three courses and passing them with a grade of B or better. The final requirement, following successful completion of the qualifying examination, is a doctoral dissertation.

#### **Other Graduate Courses**

Students interested in combining an expertise in another discipline with the law degree may arrange individually to take approved graduate courses for limited credit toward the law degree.

Students may receive up to 12 units for graduate work taken outside the law school with the prior permission of the administration. These units may be concentrated in a single appropriate discipline; they may not, however, be applied to another graduate degree in progress unless it is a certificate program offered by another department.

#### **J.D. Study Abroad Programs**

USC Law offers four study abroad programs for J.D. students that provide opportunities to learn about foreign legal systems and to experience different cultures. Qualified second- and third-year J.D. candidates are exposed to international law as they take part in exchange programs with leading partner institutions worldwide.

##### *International Semester Abroad Programs*

*University of Hong Kong:* The semester exchange program at the University of Hong Kong (HKU) allows USC Law J.D. students to experience Hong Kong and its legal culture and business in the Pacific Rim.

HKU was established in 1911 and is a leading university in Asia. It is linked with over 80 partner institutions in 15 countries and has exchange programs with prominent universities worldwide. The language of teaching at HKU for its law courses is English.

##### *Course requirements*

The LL.M. for foreign lawyers and MCL programs are intended for individuals who are trained in law abroad and wish to gain a basic knowledge of U.S. law and our legal

*Bocconi University:* USC Law J.D. students have the opportunity to learn about law and business in Milan, Italy, in this semester exchange program with Bocconi University. An Italian course is available to interested exchange students who wish to study the language before the law program begins.

Bocconi University, a private institution in Milan, Italy, has a global reputation as a research university in business, economics and law. Bocconi offers its exchange students law courses in English. These include courses in international and European law, international trade law, and comparative business and corporate law.

*University Jean Moulin Lyon 3:* The semester abroad program at the University Jean Moulin Lyon 3 allows USC Law J.D. students the chance to study in English at a leading law school in Lyon, France. After earning the J.D. degree, graduates may elect to return to Lyon for a semester to complete an LL.M. in international and European law.

The University Jean Moulin Lyon 3 is a public university ranked among the top in France. Lyon 3 is one of three universities in Lyon with a combined population of 100,000 students. Lyon is the second-largest city in France with a great selection of cultural and professional opportunities.

*Bond University:* USC Law J.D. students have the opportunity to live in Queensland, on the Gold Coast of Australia, for a semester while studying at Bond University.

Bond University has a distinctly global perspective, aspiring to a 50:50 ratio of Australian to international students, who come from 80 countries worldwide. Under the guidance of Australia's most eminent legal professionals, internationally renowned criminologists and specialists, students benefit from the mentoring relationship fostered at Bond where professors take an active role in charting student success.

system and/or who wish to engage in comparative legal study.

## Certificate Programs

The law school offers two certificates.

### Certificate in Business Law

J.D. students must complete at least 27 units of business-related classes to receive this certificate. Interested J.D. students must submit their applications for this certificate program after completing the first year of law school. J.D. students complete the certificate requirements during their second and third years of law school, and courses may count both toward the J.D. degree and the certificate.

LL.M. students must complete at least 14 units of business-related classes to receive this certificate. LL.M. students complete the certificate requirements during the year they are taking their LL.M. course work, and courses may count both toward the LL.M. degree and the certificate.

All students are required to take both mandatory business law courses (such as business organizations) and a selection of elective business law courses (such as mergers and acquisitions, advanced contracts and bankruptcy).

### Certificate in Entertainment Law

J.D. students must complete at least 21 units of entertainment-related classes to receive this certificate. J.D. students must submit their applications for this certificate program after completing the first year of law school. J.D. students complete the certificate requirements during their second and third years of law school, and courses may count both toward the J.D. degree and the certificate.

LL.M. students must complete at least 14 units of entertainment-related classes to receive this certificate. LL.M. students complete the certificate requirements during the year they are taking their LL.M. course work, and courses may count both toward the LL.M. degree and the certificate.

All students are required to take both mandatory entertainment law courses (such as intellectual property) and a selection of elective entertainment law courses (such as copyright, legal issues in music and sports law).

## Undergraduate Programs

### B.A. Philosophy, Politics and Law

This interdisciplinary program consists of nine courses chosen from philosophy, political science, law and anthropology courses. See Philosophy, page 422, for degree requirements.

### Minor in Law and Public Policy

The minor in law and public policy draws upon four fields of study: public policy and management, law, economics and political science. It provides students with an understanding of the political and economic contexts in which laws are made, as well as how legal institutions shape policy formulation. Students learn to analyze the consequences

of policy and alternatives; the roles played by government, business and nonprofit organizations in public decision-making; and the legal bases for various areas of public policy. See Public Policy, page 875, for requirements.

### Minor in Law and Society

This interdisciplinary program focuses on the effect of law on society and the way in which social forces influence the legal system. The idea is that students will understand the law if they look beyond “law in books” to “law in action.” See Political Science, page 439, for requirements.

### Minor in Psychology and Law

This interdisciplinary minor brings together courses in psychology that focus on the social, ethical, cognitive and societal aspects of psychology and how it relates to law. This knowledge is augmented with law courses that identify the relationship between mental health, social psychology and law. See Psychology, page 452, for requirements.

## Courses of Instruction

### LAW (LAW)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

Courses numbered 500 and above are open only to law students except by special permission from the associate dean.

**LAW 200x Law and Society (4)** Sources and structure of law; history of Bill of Rights emphasizing effect on criminal justice system; limits of law in solving problems in American society. Not available for major credit to law students.

### LAW 201x Law and Politics: Electing a

**President (4)** Examination of the rules and realities of American politics, and the role politics plays in American life and culture. Not available for major credit to law students.

**LAW 300 Concepts in American Law (4)** The main concepts and topics in American law, in the historical, economic and cultural contexts in which they have developed. Open only to students enrolled in the Philosophy, Politics and Law (PPL) major.

### LAW 402 Psychology and Law (4, Sp)

Explores issues of responsibility and credibility. Intentional and unintentional behavior. Clinical biases. Topics include witness credibility, confessions, cults, hostages, battered persons, and repressed memories.

**LAW 403 Mental Health Law (4, Sp)** Issues at the intersection of law and psychology, both civil – e.g., civil commitment – and criminal – e.g., the insanity defense. Emphasis on ethical issues.

**LAW 404 Law and Psychology: Examining the Criminal Justice Process (4, FaSpSm)**

Examination of the capacity of the criminal justice process to produce accurate verdicts. Application of psychological research on witnesses, detectives, suspects, judges and jurors. *Recommended preparation:* PSYC 100.

**LAW 444 Civil and Political Rights and Liberties (4)** (Enroll in POSC 444)

**LAW 450 Internet Law (4, FaSp)** Basic issues of current Internet regulation, intellectual property rights, freedom of expression on the Internet, privacy, security, and jurisdiction and zoning as it relates to the Internet. *Prerequisite:* LAW 200.

**LAW 502 Procedure I (4, Fa)** Consideration of the participants in litigation – private and public plaintiffs, defendants, and courts. Information exchange, process, outcomes, and costs of lawsuits.

**LAW 503 Contracts (4, Fa)** The interpretation and enforcement of promises and agreements.

**LAW 504 Criminal Law (3, Sp)** The crime problem and the legislative response to it through substantive criminal law; administration of criminal justice through police, prosecutorial, sentencing, and penological discretion.

**LAW 505 Legal Profession (2-4)** Functions of the lawyer in modern society; history and organization of the legal profession; the adversary system; equal access to justice; other problems of ethics and professional responsibility.

**LAW 507 Property (4, Sp)** The idea of property as understood through economic and philosophical concepts. Rights in land, water and other natural resources. Forms of shared ownership (e.g., landlord and tenant), and a survey of mechanisms for controlling land use.

**LAW 508 Constitutional Law I (4 or 5, Sp)** Considers the delineation of spheres of responsibility between the judiciary and legislature, the nation and the state, and the government and the individual.

**LAW 509 Torts I (4, Fa)** Individual's obligation not to harm others; bases for compensating persons who are harmed, either by holding responsible whoever is at fault or by invoking other principles of liability, including the efficiency of resource allocation and the spreading of losses.

**LAW 510 Legal Research (0 or 1, FaSpSm)**

Examination of the basic sources of law for federal and California jurisdictions, utilizing a vast array of sources from books to computer-assisted research and analyzing research methodology and techniques. Graded CR/D/F.

**LAW 511ab Legal Writing (a: 1-2, Fa; b: 1-2, Sp)** Two-semester course focusing on developing analytic and communication skills. Lawyers will analyze legal principles and incisively apply them to facts. Graded CR/D/F.

**LAW 512 Law, Language and Values (2-4)**

An introduction to legal interpretation and normative reasoning. Among the topics addressed are statutory and common law interpretation, the rule of law, externalities, and inequity.

**LAW 515 Legal Research, Writing and Advocacy I (2-3)** Development of legal research, writing and advocacy skills. Emphasis on objective legal writing, including memoranda, and researching case law through primary and secondary sources.

**LAW 516 Legal Research, Writing and Advocacy II (2, Sp)** Continuation of LAW 515. Development of legal research, writing, and advocacy skills. Emphasis on persuasive legal writing, including appellate briefs, and researching statutory and administrative law. Participation in a moot court program. *Prerequisite:* LAW 515.

**LAW 520 Introduction to U.S. Legal System (2)** The basic structure of government in the U.S., including the constitutionally mandated division of power in the federal government and the federal system of power sharing between state and federal systems. A comparative perspective on selected substantive and procedural matters, such as common law reasoning, jury trials, adversary process, and various aspects of civil procedure. Open to LL.M. students only.

**LAW 521 Topics in American Law (1-4, FaSp)** This course provides LL.M. and MCL students with a survey of various topics in American law, including criminal law, evidence, family law, constitutional law, torts, wills and trusts, administrative law and property law. Open to LL.M. and MCL students only.

**LAW 522 Legal Writing Overview (3 or 4)** Develops written analytic skills. Includes short exercises that progress to drafting legal memoranda. Teaches advocacy through drafting legal briefs and client letters. Graded CR/D/F.

**LAW 568 The Rights of Groups (4)** (Enroll in REL 568)

**LAW 599 Special Topics (2-4, max 8)**

**LAW 600 Taxation (3 or 4)** Federal tax statutes, technical issues and social problems involved in tax planning, tax litigation, and reform of the tax laws.

**LAW 601 Advanced Legal Writing Practicum (2-4)** Requires students to draft legal documents they were not exposed to in the first-year writing course, such as client letters, demand letters, and contracts.

**LAW 602 Criminal Procedure (2-4, FaSpSm)** Criminal procedure in the courts, and the regulation of law enforcement by the courts through rules of evidence and interpretation of the Bill of Rights.

**LAW 603 Business Organizations (3-5, FaSp)** Organization of economic activity – especially the modern corporation – as institutions of social power. The roles of managers, owners, and public regulatory agencies in shaping processes of decision-making.

**LAW 604 Real Estate Transactions Problems (1, Fa)** Selected problems to supplement LAW 605. *Corequisite:* LAW 605.

**LAW 605 Real Estate Transactions (3-5, Fa)** The land transfer process: arrangements between buyers and sellers, brokers, escrows, recorders, title companies. Real estate financing through mortgages and other land security devices.

**LAW 606 Land Use Controls (3 or 4)** The regulation of land development through planning, zoning, subdivision controls and private devices. Mechanisms for coordinating regional development and financing new urban infrastructure.

**LAW 607 Gifts, Wills, and Trusts (3 or 4)** Gratuitous transfer of wealth, especially the transmission of wealth from one generation to the next as a settlement of family affairs. Comparative analysis of the legal mechanisms of gifts, wills, and trusts. Introduction to problems of fiduciary administration.

**LAW 608 Evidence (3 or 4)** The purpose and character of trial. Problems of adversary presentation and the nature of proof. The basis for admission and exclusion of evidence in judicial proceedings.

**LAW 609 Torts II (2 or 3)** Remedies of the law for injuries to an individual's personal integrity or to his reasonable economic expectations, including the torts of misrepresentation, defamation, and assault.

**LAW 610 Advanced Civil Procedure (2-4, Sp)**

This course will look at juries and judges as decision-makers during trials. As background, we will examine the constitutional rights to a civil and criminal jury trial, and then focus on such features of the jury as voir dire, peremptory challenges, instructions, deliberations and differences in perceptions. The scope of jury authority, including jury nullification, as well as various models for the proper role of the jury in our society.

**LAW 612 California Civil Procedure (2-4)**

Examines the California rules of civil procedure. Emphasizes California law, with some discussion of the differences between state and federal procedure.

**LAW 614 Accounting for Lawyers (2 or 3)**

The lawyer's skills needed to understand the financial affairs of a business client.

**LAW 615 Election Law (1-4)** Consideration of legal regulation of the right to vote and otherwise to participate in the electoral process.

**LAW 617 History of American Law (2 or 3)**

Explores the interaction of law, culture, and politics in American society from the Revolution through the New Deal.

**LAW 618 Advanced Contracts (2-4, FaSp)**

Students work in groups using principles of contract design analyzing concrete cases based on actual events in transactions handled by a large commercial law firm.

**LAW 619 Employment Law (2-4)**

Examination of the evolving role of work in our society and the nature and scope of legal regulation of the employment relationship.

**LAW 620 Mortgage Law (2-4, Sp)**

Deals with the rights and remedies of mortgage lenders and borrowers after the mortgage loan has gone into default. *Recommended preparation:* LAW 605.

**LAW 621 Gender Discrimination (1-4)**

Analysis of the constitutional and statutory debates about the meaning of equality, and the recognition and accommodation of difference.

**LAW 622 Family Violence (2-4, Fa)**

Practical and theoretical aspects of legal practice in cases involving family violence, including both spousal violence and child abuse.

**LAW 623 Family Law (3 or 4)**

Creating, regulating and dissolving family relationships. Explore moral and power relations among men, women, children and the state. Develop skills to help clients in families.

**LAW 625 Remedies (3 or 4)** Comparison of the remedial goals of contracts, torts, and property and the impact of procedural devices in law and equity. Damages, injunctions, specific performance and restitution. Remedial theory and transactional application.

**LAW 626 International Arbitration (2-4, Fa)**

Steps in the arbitration process, attorney's functions in the process, relation of arbitration to national courts, policy issues, issues involved when governments are parties to international commercial disputes.

**LAW 628 Real Estate Finance Problems (1, Sp)**

Selected problems to supplement LAW 629. *Corequisite:* LAW 629.

**LAW 629 Real Estate Finance (2-4, Sp)**

A survey of the major types of financing used for real estate and the basic techniques used to make real estate investment and financing decisions. *Prerequisite:* LAW 605.

**LAW 630 Mediation Clinic (2-4, max 8, FaSp)**

Students receive the training required to become professional mediators for civil cases in the L.A. County Superior Court, and mediate these cases.

**LAW 632 Business for Lawyers (2-4)**

This course introduces law students to the tools, concept, and language of business. It is premised on the belief that to excel as a business lawyer, one must understand the business world from the perspective of the clients one counsels and assists. The course will cover, in compressed form, the basic subjects from the MBA program which are most useful to lawyers.

**LAW 633 Law and Economics (4)**

Employs economic reasoning to explain and provide a normative basis for the analysis of property, contract, tort and criminal law and the legal process. *Prerequisite:* ECON 500 or ECON 503.

**LAW 634 Legal Analysis of Evidence (2-4)**

Legal analysis of the rules of Evidence using problems designed to improve analytic skills and problem-solving. Taken in conjunction with Evidence. *Corequisite:* LAW 608.

**LAW 635 Employment Discrimination Law (2-4)**

Examines the regulation of employment discrimination under federal law. Pays primary attention to issues of race, sex, age and disability discrimination.

**LAW 636 Labor Law (3 or 4)**

The interrelation of labor, business, and government in collective bargaining, federal regulation of union and management practices and pressures, especially through the Taft-Hartley Act.

**LAW 637 International Trade Policy (1-4)**

Examination of the institutions and laws that regulate international economic relations. Students will be introduced to the major international agreements and national laws that regulate international trade goods, services and capital.

**LAW 638 Topics in Alternative Dispute Resolution (2-4, max 6, Sp)**

Examines selected topics in negotiation, mediation, or alternative dispute resolution. May be repeated with permission of the instructor as topics vary. Graded CR/D/F.

**LAW 639 Law and Literature (1-4, max 8)**

Selected topics in law and literature.

**LAW 640 The United States Supreme Court (1-4)**

Introduction to the state of the art in legal and social-scientific work on the United States Supreme Court.

**LAW 641 Commercial Law (2 or 4)**

Commercial transactions involving secured financing (other than land). Government regulation of such sales and borrowing through Article 9 of the Uniform Consumer Credit Code and other recent legislation.

**LAW 642 Secured Transactions (2-4)**

This is a course on Chattel paper and secured transactions involving personal property under Article 9 of the Uniform Commercial Code and some related bodies of law.

**LAW 643 Securities Fraud Litigation (2-4, FaSpSm)**

Examination of the laws governing fraud in securities markets. Focus on several sections of the Securities Exchange Act of 1934, including fraudulent statements and insider trading, fraud in the takeover context, fraud in proxies, and controlling personal liability.

**LAW 644 Corporate Taxation (2-4)**

Tax principles and practice applicable to business, especially problems of formation, liquidation, and reorganization. *Prerequisite:* LAW 600.

**LAW 645 Realities of Commercial Lending (1-4, FaSpSm)**

Involves issues including loan restructuring; what loan agreements cover; how representations, covenants, default and financial and repayment terms interrelate; and how security documents fit in. Graded CR/D/F. *Prerequisite:* LAW 642.

**LAW 646 Advanced Topics in Employment Discrimination (1-3)**

Reviews recent Supreme Court decisions and legal scholarship with attention to statutory interpretation, consistency with constitutional antidiscrimination standards, and consistency with current understandings about discrimination.

**LAW 647 Bankruptcy: Debtors and Creditors I (2 or 3)** Bankruptcy of the poor, imprudent or unlucky, and of unsuccessful businesses. The mechanisms of our law for distributing the debtor's property and discharging his obligations.

**LAW 648 Topics in Entertainment Law (1-4, max 8)** Contemporary topics in the field of entertainment law.

**LAW 649 Insurance (2 or 3)** The pooling of risks and distributing of losses. Actuarial foundation and contract problems of insurance.

**LAW 650 Entertainment Law (2-4, FaSp)** An examination of how the courts are handling selected, "cutting edge" topics in entertainment law. The topics will include the scope of and limitations on the right of publicity; fair use and parody defenses to copyright infringement; future technology clauses in rights contracts; and copyright and defamation issues arising in the online world. Previous entertainment law courses recommended, but not required. *Corequisite:* LAW 772.

**LAW 651 Entertainment Law Practicum (1-2, max 8, FaSpSm)** Supervised internship for students enrolled in LAW 650. Graded CR/D/F. *Corequisite:* LAW 650.

**LAW 652 Persuasion (2-3, Fa)** Analysis and development of persuasive arguments using principles of persuasion; translation of the arguments into visual presentations using presentation models; persuasive presentation of visuals.

**LAW 653 Legal Issues in the Music Industry (1-4, FaSp)** The course will focus on contract drafting and negotiation issues relevant to an artist's pursuit of a career in the music business.

**LAW 654 Legal Issues in the Television Industry (2-4)** An in-depth study of television industry legal concepts, contracts, business structures and economic models.

**LAW 655 Environmental Law (2-4)** Focus on environmental law policy and practice. This course is a combination of regulatory and private law, with a special emphasis on disputes and regulations involving contamination in soil, water and air.

**LAW 657 International Protection of Intellectual Property (1-4)** The laws concerning how to enforce and exploit rights protecting media creations, marketing symbols, computer programs, new technologies, designs, know-how, and data across national borders.

**LAW 658 Mergers and Acquisitions (1-4, Sp)** Problems of integrating the corporate, securities, tax, business, antitrust, accounting and contractual aspects of corporate mergers and acquisitions. *Prerequisite:* LAW 603.

**LAW 659 Legal Issues in the Motion Picture Industry (2-4)** Involves the legal and business principles involved in structuring, negotiating and documenting agreements relating to the development, production and distribution of theatrical motion pictures. *Prerequisite:* LAW 650, LAW 772.

**LAW 660 Trademark (1-4)** A rigorous introduction to a law of trademarks. A trademark can be any word, symbol, design, sound, fragrance or product configuration that is used to distinguish the goods or services of one person from those of another, and to indicate the origin of the goods or services.

**LAW 661 National Security Law (2-4)** Examination of the nature of United States' national security law, focusing on how it is created, violated and enforced.

**LAW 662 Public International Law (3-4)** Principles of international law involving relations among governments. The function of international tribunals and organizations.

**LAW 663 European Union Law (2-4, FaSpSm)** Introduction to the EU legal system and an understanding of the functioning EU, constitutive treaties, and evolving judicial and regulatory system being established within Europe.

**LAW 664 Globalization and Law (2-4)** The impacts of globalization and legal reactions in a number of areas including constitutional law, trade law, military law and the environment.

**LAW 665 Art Law (2 or 3)** Provides an overview, often from a litigation perspective, of legal issues affecting artworks and cultural property.

**LAW 667 Hale Moot Court Brief (2)** Invitation-only course offered to second-year students as part of the Hale Moot Court Honors Program. Students write an appellate brief. Open only to students in J.D. program (including dual degrees).

**LAW 668 Hale Moot Court Oral Advocacy (1, Sp)** Invitation-only course for students in the Hale Moot Court Honors Program. Students present an oral argument and judge first-year student rounds. Graded CR/NC. *Prerequisite:* LAW 667.

**LAW 669 Moot Court Supervision (1-3, max 6, FaSp)** Evaluation and supervision of the preparation of briefs and oral arguments in the Hale Moot Court honors competition. Graded CR/D/F.

**LAW 670 Advanced Moot Court Oral Arguments (1-3, max 3, Sp)** Preparation of oral arguments in approved moot court competitions, such as national and state prize rounds (other than Hale Moot Court Program). Graded CR/D/F.

**LAW 671 Advanced Moot Court Briefs (1-3, Sp)** Preparation of briefs in approved moot court competitions, such as national and state prize rounds (other than Hale Moot Court Program).

**LAW 672 Jessup Moot Court Briefs (1-3, Fa)** Students prepare for competition by writing a brief on the issues in a problem that is the basis for the Jessup International Moot Court Competition. Participation is by faculty selection only.

**LAW 675 Mental Health Law (2-4)** Studies the important issues at the intersection of law and psychology/psychiatry, both civil and criminal.

**LAW 677 Quantitative Methods in the Law (2-4, FaSp)** Introduces students to basic principles of descriptive and inferential statistics, probability, and valuation.

**LAW 678ab Review of Law and Social Justice Staff (1-4; 1-4)** Writing, source-checking, and preliminary editing of articles and comments for publication in the *Review of Law and Social Justice*. For second-year students serving as staff members on the *Review*. Graded CR/D/F.

**LAW 679ab Review of Law and Social Justice Writing (1; 1-4)** Writing, source-checking, and preliminary editing of articles and comments for publication in the *Review of Law and Social Justice*. For second-year students serving as staff members on the *Review*. Graded IP to numerical.

**LAW 680ab Review of Law and Social Justice Editing (1-3; 1-4)** Supervision of research and writing, and final editing of articles and comments for publication in the *Review of Law and Social Justice*. For officers of the *Review*. Graded IP to CR/D/F.

**LAW 681 Analytical Methods for Lawyers (2-4)** Teaches important business and economic concepts that will assist with problems lawyers in every practice area routinely encounter.

**LAW 682 Jessup Moot Court Oral Arguments (1, Sp)** Students prepare oral arguments on the issues in a problem that is the basis for the Jessup International Moot Court competition. Participation is by faculty selection only. Graded CR/D/F. *Prerequisite:* LAW 672.

**LAW 683 Client Interviewing and Counseling (2, 3, FaSp)** Introduction to a practice-oriented approach to interviewing and counseling clients. Enables students to develop a useful framework for effectively interviewing and representing clients.

**LAW 685 Civil Discovery (2-4)** Focuses on the discovery phase of pre-trial litigation and many of the skills new lawyers are called upon to use right out of law school.

**LAW 697 Foreign Relations and National Security Law (2-4, FaSp)** This course will examine the statutory, constitutional, and international legal structures that form the base of American diplomacy.

**LAW 700 Health Care Regulations (1-4)** Regulation of the medical profession; the physician-patient relationship; professional and institutional liability; health care institutions and delivery systems; quality control; access to health care services and problems of distribution and rationing; cost control, including government and private health care programs; patient rights; antitrust.

**LAW 701 Child Interviewing Seminar (1-4)** Students learn how to effectively interview child witnesses. Students will practice mock interviews, and may be eligible to conduct actual interviews of child witnesses.

**LAW 702 Children, Sexuality and the Law (2-4)** Explores laws designed to protect children from sexual abuse and exploitation, with a limited emphasis on foreign and international law for comparative perspective.

**LAW 703ab Children's Legal Issues (1-4; 1-4)** Students will work on cases in the following areas: (1) Dependent and neglected children: All children who are wards of the court must have legal counsel. (2) Children with AIDS: Legal implications of such issues as health care and custody. (3) Guardianships or other temporary arrangements for children whose parents are terminally ill or are otherwise unable to care for them. Graded CR/D/F.

**LAW 704 Poverty Law (2-4, FaSp)** An introduction to the problem of poverty in the United States and to the response of government and the legal system to the problems of the poor.

**LAW 705 Community Property (1-3)** The law of community property, including disposition of property on dissolution of the marriage and questions of conflict of laws. May be offered as a reading course.

**LAW 706 Public Health Law (2, 3, 4)** Provides an introduction to the legal foundations of the public health system in the United States.

**LAW 708 Reviewing and Negotiating Business Contracts (2-4, FaSp)** Covers the fundamentals of reviewing and analyzing business contracts and strategies for negotiating business issues with an emphasis on developing practical skills.

**LAW 709 Contract Drafting and Negotiation (2-4, FaSp)** Contract Drafting and Negotiation will teach students the mechanics of drafting and negotiating sophisticated contracts from a variety of legal disciplines including entertainment law, real estate law and general corporate law.

**LAW 711 Access to Justice Practicum (2-4)** Real world advocacy projects involving issues such as civil rights, disability rights, foster care, welfare, and health care, among others.

**LAW 712 Negotiation and Mediation Advocacy (2 or 3, FaSp)** Develops enhanced negotiation skills and a working understanding of ADR processes and procedures in an interactive classroom experience. (Duplicates credit in LAW 638.) Graded CR/NC.

**LAW 713 International Human Rights (2-4, FaSp)** This course will address the international law and institutions which have developed since World War II for the protection of human rights.

**LAW 715 Law and Policy of Alternative Dispute Resolution (2-4)** Exploration of the origin, development, and practice of mediation, arbitration and other forms of ADR, emphasizing the policies underlying these increasingly significant and evolving areas.

**LAW 716 Race and Gender in the Law (1-4)** Investigates the experience of women and people of color as they have encountered legal institutions and processes.

**LAW 717 Estate Planning (3, FaSp)** Legal and tax considerations important to the lawyer advising his client on the transmission of wealth from one generation to the next.

**LAW 718 Sports Law (1-4, Sp)** Sports law is a blend of contract, labor, antitrust, agency, tax, intellectual property, tort, civil rights and constitutional law.

**LAW 719 Corporate Finance (3 or 4)** Legal and economic aspects of corporate finance including capital structure, policy, mergers, takeovers, and freeze-outs; analysis of policy relating to present law and possible reforms.

**LAW 720 Topics in Corporate Law (1-4, max 8, FaSp)** Executive malfeasance, shareholder rights, securities class actions, asset securitizations, hedge fund regulation and corporate social responsibility from a theoretical and corporate finance framework.

**LAW 723 Law, Literature and Feminism (1-4, FaSp)** Looks at the interweaving of the culture wars, feminism and law, with a particular focus on questions of choice, marriage, and the family.

**LAW 724 International Finance (2-4, FaSp)** An examination of international aspects of U.S. securities and banking law, capital markets and regulations, Eurobonds, Futures and Options, asset securitization, swaps and project finance.

**LAW 725 Bioethics and Law (3)** Legal, ethical and economic problems of advanced biological technologies, for example, behavior, genetic, and reproductive control; control of the processes of dying; organ transplantation and the use of artificial organs; regulation of scientific research and human experimentation.

**LAW 726 Stereotypes, Prejudice, and the Rule of Law (2-4, FaSp)** An examination of the role of race (and other markers of social marginality) in the administration of justice in American courts.

**LAW 727 Partnerships and Limited Liability Companies (2-4, FaSp)** Deals with the formation, features and functions of general partnerships, limited partnerships and limited liability companies. Also focuses on business planning, recognizing business and legal objectives and selecting the appropriate entity to accomplish these objectives.

**LAW 728 Topics in Amateur Sports Law (1 or 2)** Focuses on the legal and institutional regulation of high school and collegiate sports and the business transactions that are an integral part of collegiate sports.

**LAW 730 Immigrants and the Constitution (2-4, FaSp)** A focus on the constitutional rights of noncitizens. The course will explore the role of immigrants and immigration in American history.

**LAW 731 Gender, Crime and Justice Seminar (2-4, FaSp)** Analyzes various criminal justice issues with a focus on the questions of how gender may shape and inform those issues.

**LAW 733 Corporate Reorganization (2 or 3)** Reorganization of failing corporations under Chapter XI of the Bankruptcy Act. Claims, protective committees, plans, tax considerations.

**LAW 734 Local Government Law (3 or 4)** Study and evaluation of the municipal and regional legal institutions. Emphasis on the crises in financing and governing the urban society.

**LAW 735 Employer Legal Advice Clinic (2-4, Sp)** Provides legal advice to clients in the area of employment law. Graded CR/D/F. *Prerequisite:* LAW 619.

**LAW 736 Small Business Clinic I (2-4, FaSpSm)** Students provide legal assistance to small businesses, entrepreneurs and non-profit organizations that cannot pay market rates for legal services. Graded CR/NC.

**LAW 737 Small Business Clinic II (2-4, Sp)** Continuation of Small Business Clinic I. *Prerequisite:* LAW 736.

**LAW 738 Civil Rights Litigation (2-4, FaSp)** An examination of issues of class action and other impact civil rights litigation with an emphasis on federal court practice.

**LAW 741 Sentencing Law, Practice and Policy (2-4, FaSp)** This seminar will explore the law, purposes and practices of sentencing. Students will study and compare the different systems of sentencing and the procedures by which sentences are imposed. Students may also examine some actual pending criminal cases.

**LAW 742 Criminal Law Motion Practice (2-4, FaSp)** This course instructs students on the law and strategy concerning most major criminal case motions. Students will draft and argue motions based on actual cases.

**LAW 743 Federal Criminal Law (2-4, max 8)** Covered topics include offenses relating to fraud and political corruption, terrorism, narcotics, money laundering, organized crime, false statements and obstruction of justice.

**LAW 744 Comparative Islamic Law (2-4, FaSp)** Course will cover basic principles of Islamic transactional laws as adapted and incorporated into contemporary Islamic countries. Laws will be compared with U.S. and California.

**LAW 745 Comparative Constitutional Law (2-4, FaSp)** Comparison of the U.S. Constitution with constitutions in other nations. Exploration of differences in structure and substance, with a focus on how nations address pluralism.

**LAW 746 Critical Race Theory (2-4)** Intersectionality, destruction and critical historiography; specifically affirmative action in education, hate speech and immigration reform.

**LAW 747 Constitution in the 20th Century (2-4)** This course examines the impact of historical events, world wars, the Cold War, and civil rights, and understanding the role of the Constitution in American life.

**LAW 748 Topics in Constitutional Law and Religious Ethics (2-4, FaSp)** This seminar will discuss religious views about the meaning and nature of human existence and address contested contemporary issues of constitutional law.

**LAW 749 Securities Regulation (2-4, Sp)** Regulation by state and federal agencies of issuance of, and trading in, stocks, bonds, and other securities. Particular reference to SEC regulations.

**LAW 751 Sexual Orientation and the Law (2-4, FaSp)** Explores the ways in which American law has responded to the diversity that exists within human sexual orientation.

**LAW 753 Antitrust Law I (3 or 4)** Laws designed to preserve and promote business competition, with heavy emphasis on the federal antitrust laws.

**LAW 754 Antitrust and Intellectual Property Law (2-4)** Covers the interface between antitrust law and intellectual property law.

**LAW 758 Identity Categories (2-4, FaSp)** Drawing on feminist legal theory, critical race theory, and lesbian/gay/bisexual and queer theory, this seminar will explore the treatment of identity categories in United States law.

**LAW 760ab Interdisciplinary Law Journal Staff (1-1 or 2, FaSp)** Source-checking and preliminary editing of articles and comments for publication in the *Interdisciplinary Law Journal*. For third-year students serving as staff members on the *Journal*. Graded *a*: IP to CR/D/F; *b*: CR/D/F.

**LAW 761ab Interdisciplinary Law Journal Writing (1-1 or 2, FaSp)** Writing of an article for the *Interdisciplinary Law Journal*. For second-year students serving as staff members on the *Journal*. *a*: Graded IP to numerical. *b*: numerical.

**LAW 762ab Interdisciplinary Law Journal Editing (1-3, Fa; 1-3, Sp)** Supervision and final editing of articles and comments for publication in the *Interdisciplinary Law Journal*. Graded IP to CR/D/F.

**LAW 763 Federal Courts: The Federal System II (3-5, FaSpSm)** Problems of adjudication in a federal system. Allocation of authority between federal and state courts and among Congress, the Executive and the Courts; choice of federal and state law; jurisdiction of federal courts and significant rules of practice.

**LAW 764 International Business Transactions (3 or 4)** Survey of legal aspects of international trade and investment transactions, including tax considerations.

**LAW 765 Topics in Intellectual Property Law (1-4)** Analyzes selected contributions to intellectual property scholarship and explores some challenging problems in contemporary intellectual property law.

**LAW 766 Journal Note Writing Seminar (1-3, max 8)** A special section of selected seminars for second-year law students writing journal notes.

**LAW 767ab Law Review Staff I (1-1 or 2)** Writing, source-checking, and preliminary editing of articles and comments for publication in the *Southern California Law Review*. For second-year students serving as staff members on the *Review*. Graded CR/D/F.

**LAW 768ab Law Review Writing (1-1 or 2)** Writing, source-checking and preliminary editing of articles and comments for publication in the *Southern California Law Review*. For second-year students serving as staff members on the *Review*. Graded IP to numerical.

**LAW 769ab Law Review Editing (1-3, FaSp)** Supervision of research and writing, and final editing of articles and comments for publication in the *Southern California Law Review*. For officers of the *Review*. Graded IP to CR/D/F.

**LAW 771 Intellectual Property and Technology Law Clinic I (1-5, max 8, Fa)** Provides law students with the ability to represent clients (under the supervision of the professor) in cutting-edge issues of intellectual property and technology law. *Corequisite:* LAW 772.

**LAW 772 Intellectual Property (2 or 3)** The protection of intellectual property and encouragement of creativity. Explores copyright, trademarks, patents, and selected state law theories.

**LAW 773 Internet Law (2-4, Fa)** Integration of cyberspace and the Internet into existing legal structures. Topics include: First Amendment issues; intellectual property, privacy and child protection; criminal activity and governance and jurisdictional activities.

**LAW 774 Rights of Groups Seminar (2 or 3, FaSp)** Explores the place of groups (such as racial and ethnic groups, labor unions, family, neighborhood, class and religious groups) in the legal order governed and protected by the Constitution. Asks whether groups have rights comparable in stature to the rights of persons, and, if they do, how conflicts between the group rights and individual rights should be adjudicated.

**LAW 775 Immigration Law (2-5)** The development of immigration law to its present state.

**LAW 776 Immigration Clinic I (2-4, FaSpSm)** Students represent clients before Immigration and Customs Enforcement, the Immigration Court, and certain law enforcement agencies in cases including applications for relief under the Violence Against Women Act, for asylum, and for relief against deportation. Graded CR/D/F.

**LAW 777 Administrative Law and Regulatory Policy (1-4)** Legal principles subject to judicial control and the alternative ways in which agencies can be organized to serve their purposes.

**LAW 778 Sales (2-4, FaSp)** Analysis of the buying and selling of goods both in domestic and international transactions with a heavy focus on Article 2 of the Uniform Commercial Code.

**LAW 780 Intellectual Property and Technology Law Clinic II (2-4, max 4, Fa)** Continuation of LAW 771. *Prerequisite:* LAW 771.

**LAW 781 Clinical Internship/Externship I (1-13, FaSpSm)** A clinical internship or judicial externship allows a student to gain hands-on legal experience in legal settings. Students will be assigned to a legal services program, government agency, or state or federal judge under faculty supervision. Graded CR/D/F.

**LAW 782 Clinical Internship/Externship II (1-13, FaSp)** Advanced clinical training/externship. Graded CR/D/F.

**LAW 787 International Sales of Goods (2-4)**

**LAW 789 Dissertation (1-4)** Students should register for 2 to 4 units of dissertation to engage in supervised research and writing that is expected to result in a paper of publishable quality. Any regular, full-time member of the faculty (including full-time visitors) may supervise students in this course upon agreement by the faculty member and the student. Other persons who teach in the J.D. program may supervise dissertation only upon approval of the Board of Review. A one unit registration for dissertation will be available only where the unit is to be added to the course where a paper is already required, in recognition that the student's paper will require substantially more work than that expected of other students in the course. Students may take a total of 4 units of dissertation during their educational experience at the law school.

**LAW 792 Law and Philosophy (2-4, max 8, FaSp)** Examination of the best scholarly work currently done by legal, moral and political philosophers in the country.

**LAW 793 Law and Economics Seminar (1-4, max 8)** Key concepts and cutting-edge research in law and economics. Workshops with leading scholars from around the country.

**LAW 795 Law of the Political Process (2-4, max 8)** Examines the state and federal laws regulating the political process and related Constitutional issues.

**LAW 796 Immigration Clinic II (2-4, Sp)** Continuation of LAW 776. *Prerequisite:* LAW 776.

**LAW 797 Public Policy in Law: Analysis and Advocacy (1-4)** Focuses on contemporary policy problems, identifies relevant legal issues and utilizes multidisciplinary techniques found in law, political science, economics and history to formulate positions.

**LAW 798 Law, Mental Health and Ethics (2-4, max 8, FaSp)** Focuses on one or two topics per year at the intersection of law, mental health and ethics and explores them from an interdisciplinary perspective.

**LAW 809 Deposition Strategies and Techniques (2, 3)** Emphasizes strategies and tactics in asking and objecting to questions at a deposition in a civil case. Students will conduct mock depositions.

**LAW 810 Patent Law (2 or 3, Sp)** Patent laws, litigation, and the process of prosecuting the patent application. The concept of invention and ownership of rights under patents.

**LAW 811 Law and Medicine (2-4, max 8)** Explores the "social determinants of health," including medical, legal, social, environmental, and behavioral factors affecting the health of individuals and communities, especially poor, vulnerable populations.

**LAW 815 Deals (3-4)** Examines the collaboration between business people aiming to accomplish a goal and lawyers translating their business objectives into contract language to achieve the goal.

**LAW 820 Pretrial Advocacy (3 or 4)** Examines conceptual and practical aspects of interviewing, counseling, negotiation, settlement, drafting, and formal advocacy in the handling of legal cases.

**LAW 821 Trial Advocacy (3 or 4, FaSp)** Examines decision-making by counsel in the litigation of cases. Emphasis is given to decisions involving tactics and strategies and their implications for the functioning of legal institutions and substantive doctrine. Extensive use of simulated trial practice exercises.

**LAW 823 Statutory Interpretation (2 or 3)** Examines the change and evolution of law to discover its political roots and the ways policy making branches work to make and implement law.

**LAW 827 Counseling the Startup Company (2-4, Sp)** Role of the attorney in startup firms: business plan, employment agreements, lease, stock option plan, financing documents and distribution and strategic partnership arrangements.

**LAW 839 Copyright (2-4)** Study of federal copyright law, analysis of property rights and interests created thereunder. Manner in which these rights can be exploited in the various entertainment media. *Prerequisite:* LAW 772.

**LAW 840 Copyright and Fictional Characters (2-4)** Involves the treatment of fictional characters by the courts and in new media and the fundamental copyright concepts that have shaped that treatment.

**LAW 842 Partnership Taxation (2-4)**

**LAW 849 International Human Rights Clinic I (4-5)** Students work under close faculty supervision on cases and projects that involve the application of international law to address human rights violations.

**LAW 850 International Human Rights Clinic II (4 or 5)** Continuation of the International Human Rights Clinic. *Prerequisite:* LAW 849.

**LAW 851 Topics in Criminal Law and Criminology (2-4, max 6)** Selected topics in criminal law or criminology. May be repeated with permission of the instructor as topics vary.

**LAW 855 Topics in Maritime and Admiralty Law (2-4, max 6, FaSp)** Taught in honor of James Ackerman, USC Law graduate of 1948, this class examines selected topics in maritime and admiralty law. May be repeated with permission of the instructor as topics vary.

**LAW 859 Regulation of Telecommunications (2-4, FaSp)** Concentration on the regulation of broadcast television, cable television, telephone, and spectrum management.

**LAW 861 International Law Seminar (2-3, max 6, Sp)** Investigation of selected problems of international law. May be repeated with permission of the instructor as topics vary.

**LAW 863 International Negotiations and Mediation (2-4)** Introduction to negotiation and mediation from an international perspective. Development of essential skills for effective client representation in negotiation and mediation.

**LAW 864 International Insolvency (1-4)** Deals with multi-jurisdictional insolvency. Examines the insolvency laws of several different countries as well as Chapter 15 of the US Bankruptcy Code and other issues.

**LAW 866 Homeland Security and Counterterrorism Law and Policy (2-4)** Explores the spectrum of interrelated legal and policy issues known as “homeland security” since the events of September 11, 2001.

**LAW 867 Corporate Fraud: Enron and the Financial Crisis of 2008 (2-4)** The lessons of the “Enron era” and the “financial crisis era” from many of the top practitioners in the field.

**LAW 868 Business Enterprise Taxation (2-4, FaSp)** Examination of the taxation of corporations, partnerships, and limited liability companies.

**LAW 870 Legal Writing Fellows (1-4, max 7, FaSpSm)** Assist in teaching writing and advocacy. Responsibilities include helping prepare lesson plans and drafting writing assignments and sample answers; leading class exercises; and judging first-year moot court practice rounds. Graded CR/D/F.

**LAW 871 First Amendment (2-4, FaSp)** Freedom of expression (political speech, symbolic expression, obscenity, commercial speech, defamation), rights of access to the media, religious protection and prohibition of establishment of religion.

**LAW 872 Advanced Legal Writing and Advocacy: Appellate Advocacy (1-4, FaSp)** Students will research, write, and rewrite an appellate brief and may work on motions and oral advocacy as well.

**LAW 873 Judicial Opinion Writing (2-4)** Students write a majority opinion and a dissenting opinion based on cases pending before the U.S. Supreme Court. This is a writing-intensive course.

**LAW 874 Media Law in the Digital Age (1-3)** Explores the interplay between the law, politics, and media, particularly mass media, in the digital age.

**LAW 875 Theories of Constitutional Interpretation (1-4)** Seminar course devoted to different methods of reading the Constitution.

**LAW 877 Major Trends in American Legal Thought (1-3)** Survey of major trends in American legal thought.

**LAW 878 Evolutionary Game Theory and the Law (1-3)** Uses the Evolutionary Game Theory methodology to explore the dynamics of cooperative interaction among people, and the role that legal punishment plays.

**LAW 884 Constitutional Law: Equality and Liberty (3-4)** Focuses on individual rights and liberties, with special attention paid to equal protection and substantive due process.

**LAW 886 Justice and the Foundations of Liberalism (1-4)** Discusses John Rawls’ *A Theory of Justice* (1971), critical reactions to it and some possible extensions of Rawls’ theory of justice.

**LAW 887 Law and War in 20th Century America (1-3)** Examines the experience of war during the 20th century and the impact on American law, particularly the relationship between national security and individual rights.

**LAW 888 First Amendment: Law and Religion (1-3)** Explores the laws that govern and affect religious groups and religious belief-systems and religious experience in the United States.

**LAW 890 Directed Research (1-4)** Directed Research may be taken only with the approval of the Administrative Board. This course is intended for substantial independent research and study that does not result in a paper of publishable quality. It includes, but is not limited to, preparation of research memoranda for faculty research projects, empirical research for such projects, and supervised independent study. Directed research is to be supervised by a regular, full-time faculty member (including full-time visiting faculty). Students may take a maximum of 4 units of Directed Research during their educational experience at the law school.

**LAW 891 Post-Conviction Justice Seminar I (1-5, max 5, Fa)** Examines the substantive rights of federal prisoners with respect to parole, sentencing, validity of conviction and conditions of confinement and the procedural mechanisms by which to enforce those rights. Under faculty supervision, students provide legal assistance to federal inmates in administrative and judicial proceedings. Graded CR/D/F.

**LAW 892 Post-Conviction Justice Seminar II (1-5, max 5, Sp)** Continuation of LAW 891. *Prerequisite:* LAW 891.

**LAW 893 Advanced Clinical Training (1-5, max 10, FaSp)** For third-year students who wish to continue their clinical training.

---

# Keck School of Medicine of USC

*The Keck Medicine Initiative will transform the future of health care by advancing research, medical education, patient care and infrastructure with support from the W. M. Keck Foundation's \$150 million lead gift. USC President C. L. Max Nikias, right, and Keck Foundation CEO and Chairman Robert Day celebrate the gift at a festive gathering on the USC Health Sciences Campus.*

**F**ounded in 1885, the Keck School of Medicine of USC is part of Keck Medicine of USC, a major center of medical research, education and patient care with more than 1,369 full-time faculty members and a voluntary faculty of more than 4,000 physicians. Faculty of the school include national leaders in each of its 24 clinical and basic science departments. Located on the university's 30.8-acre Health Sciences Campus three miles northeast of downtown Los Angeles, the Keck School is adjacent to the Los Angeles County+USC Medical Center, one of the largest teaching hospitals in the United States.

Keck's faculty, students and residents serve more than one million patients each year through the Los Angeles County+USC Medical Center, the USC Norris Cancer Hospital, the Keck Hospital of USC, Doheny Eye Institute, Children's Hospital Los Angeles, and a network of additional USC-affiliated hospitals throughout Southern California. More than 500 faculty physicians comprise the Keck Doctors of USC, caring for patients with a variety of complex medical needs as well as providing primary care.

The new Eli and Edythe Broad CIRM Center for Regenerative Medicine and Stem Cell Research of USC, which opened in the fall of 2010, joins the Harlyne J. Norris Cancer Research Tower and USC Zilkha Neurogenetic Institute in providing state-of-the-art facilities for important scientific discovery. With more than \$248 million in total federal research support, the Keck School ranks among the top U.S. medical schools in federal funding. Research programs in stem cell/regenerative medicine, cancer, genetics, neuroscience, preventive medicine, transplantation medicine, bioengineering and other key areas have attracted national recognition.

The Keck School of Medicine of USC is at the forefront of medical education, with an integrated, modern curriculum. Keck was among the first medical schools to adopt Introduction to Clinical Medicine courses for first-year students, providing direct experience in patient care from the start of medical school.

Sajaad Yacoob, M.D., *Assistant Dean, Student Affairs*

## Admissions

### Doctor of Medicine

**Keith Administration Building 100C**  
1975 Zonal Avenue, Los Angeles 90089-9021  
(323) 442-2552  
FAX: (323) 442-2433

*Associate Dean, Admissions:* Raquel D. Arias, M.D.

The Keck School of Medicine Committee on Admissions is responsible for selecting members of the entering class. The committee comprises both faculty and students. The committee reviews candidates whose academic achievement, commitment to service and personal qualities distinguish them from the many thousands of applicants who apply.

The applicant's undergraduate major may be in any subject area from an accredited college or university. Although sound preparation in the basic sciences is essential, a background in the humanities, and depth and breadth of personal experience are also important.

#### General Admissions Information

All applicants must submit a supplemental application. The Keck School of Medicine of USC receives approximately 7,000 applications per year. Approximately 700 applicants

receive interview invitations, which take place on the Health Sciences Campus. The interview day consists of a tour, lunch with medical students, a financial aid session and two 45-minute interviews with one faculty member and one medical student. Interviews begin in mid-September and end in early March. Students receive acceptance letters beginning in October. Applicants placed on the alternate list may send additional information to update their files.

#### Requirements

All applicants to the Keck School of Medicine of USC M.D. program must complete a minimum of four full years or 120 semester hours of academic work at an accredited college or university by the time of matriculation. Applicants are strongly encouraged to complete all basic science requirements by the time of application. Required courses include two semesters, with associated labs, in biology, general chemistry, and physics. Applicants must complete one semester of organic chemistry with a lab component. In addition, applicants must complete a course in molecular biology and an additional 30 semester hours in a

combination of social sciences, humanities and English composition courses. USC recommends that applicants take statistics and Spanish courses. The MCAT is required, and scores must be from within the previous three years of the date of matriculation.

International students must take at least one year of study in the United States prior to application; credits from abroad must be certified by a U.S. college both as to number of hours and course content. Individuals who have discontinued studies in medical school for academic reasons are not eligible to apply to the Keck School of Medicine.

#### Medical College Admission Test (MCAT)

The MCAT is required of all applicants. Applicants are strongly urged to take the MCAT early in the year of application. Applicants to the 2013 entering class are required to take the MCAT no earlier than August 2010 and no later than August 2012. Scores from earlier administrations of the examination will not be accepted.

### Applications

The Keck School of Medicine of USC participates in the American Medical College Application Service (AMCAS). AMCAS reproduces and distributes an application and standardized academic record to participating medical schools designated by the student. The fee charged for this service depends upon the number of schools to which an application is sent. Applications may be obtained from its Website ([www.aamc.org](http://www.aamc.org)).

Applications are available after June 1 for the class entering in August of the following year. Applications to USC must be returned to AMCAS before November 1, but earlier application is encouraged. The Keck School of Medicine of USC participates in the Early Decision Program. Interested applicants apply between June 1 and July 31 and are notified of the Admissions Committee's decision by September 1.

## M.D./Ph.D. Program

The Keck School of Medicine has developed an M.D./Ph.D. program designed for individuals who aspire to a career in academic medicine or a leadership role within the biomedical industry. Students are expected to acquire the modern skills that are required for physician competence. Additionally, the M.D./Ph.D. program provides an opportunity for the development of research expertise and academic excellence while fulfilling the requirements for a Ph.D. degree.

A joint program between the Keck School of Medicine and the California Institute of Technology (Caltech) was established in fall 1997 for the granting of the M.D./Ph.D. degree. Ph.D. studies may be carried out at Caltech or through collaboration between two laboratories at both institutions. The M.D. will be awarded from the Keck School of Medicine and the Ph.D. will be awarded from Caltech.

The M.D./Ph.D. executive committee is responsible for selecting students for the M.D./Ph.D. program. Members of the committee review the qualifications of each applicant, including MCAT and Graduate Record Examinations (GRE) scores available, academic performance, letters of recommendation and research experience. The committee interviews candidates and then selects students for admission to the program. All applicants to the joint program interview at Keck School of Medicine and the California Institute of Technology.

The Committee on Admissions reviews all information submitted on the AMCAS application as well as any supplemental data; the school charges a \$90 fee for this review. The most qualified candidates, as determined by this review, are invited for an interview.

### Personal Interviews

Personal interviews are a required aspect of the application process. Invited candidates participate in two interviews; one with a faculty member and the other with a medical student. Interviews are conducted at the Keck School of Medicine on the Health Sciences Campus of the University of Southern California.

### General Information

The M.D./Ph.D. program enrolls two to eight students annually. Students have the option of doing the Ph.D. at USC or Caltech. Each student accepted to the program must also be accepted to the Keck School of Medicine. All positions are fully funded.

### Requirements

Admission requirements for the M.D./Ph.D. program are those of one of the graduate programs concerned or Caltech and the Keck School of Medicine. Students select the basic science program of their choice during the first two years of the medical curriculum; descriptions of these programs are available from each department or program and Caltech.

### Graduate Record Examinations (GRE)

To assist the M.D./Ph.D. Committee in its evaluation of candidates, applicants to the M.D./Ph.D. program are encouraged to provide recent GRE scores. The committee does not, however, require GRE scores in order to consider an application.

### Applications

Applicants to the Keck School of Medicine are advised to request information about the M.D./Ph.D. program at the time of application. In addition to completing the medical school application, applicants should indicate their interest in the M.D./Ph.D. program.

### Notice of Acceptance

Notices of acceptance will be sent to successful candidates beginning in October until the class is filled. Since Keck uses a rolling admissions process, it is highly recommended to submit a completed application early in the cycle. If not chosen for an interview, candidates are usually notified by March of the application year.

Candidates must reply to an offer of acceptance within two weeks by sending a \$100 deposit and completing an Essential Characteristics form. A letter of withdrawal is required if students wish to relinquish their place in the class; release is granted automatically when the letter is received.

Students who are currently pursuing the medical curriculum at the Keck School of Medicine may apply to the M.D./Ph.D. program by contacting: M.D./Ph.D. Program, Keck School of Medicine, 1975 Zonal Avenue (KAM 314), Los Angeles, CA 90089-9023; (323) 442-2965, FAX: (323) 442-2318.

### Personal Interviews

All applicants are screened by members of the M.D./Ph.D. Executive Committee; candidates who meet the basic criteria of the program are then invited to be interviewed by members of the committee and faculty associated with the program.

### Notice of Acceptance

Students selected for acceptance to the M.D./Ph.D. program are notified between January and May of each year. Students begin their program in the fall semester and register for courses in the medical curriculum at that time.

Further information about the M.D./Ph.D. program at the Keck School of Medicine may be obtained by contacting: M.D./Ph.D. Program, Keck School of Medicine, 1975 Zonal Avenue (KAM 314), Los Angeles, CA 90089-9023; (323) 442-2965, FAX: (323) 442-2318; email: [mdphdpgm@hsc.usc.edu](mailto:mdphdpgm@hsc.usc.edu).

## Graduate Degree Programs

Admission standards for these curricula are established jointly by the Keck School of Medicine, its participating programs and the Graduate School.

Applicants to graduate degree programs offered by departments of the Keck School

of Medicine must meet the general criteria for acceptance to the Graduate School. Each participating department may have additional requirements for application. The programmatic requirements for the Keck School of Medicine's graduate programs are detailed in the Graduate Degree Programs section on page 763.

Further information about graduate degree programs at the Keck School of Medicine may be obtained by contacting: Office of the Associate Dean for Graduate Studies, Keck School of Medicine, 1975 Zonal Avenue (KAM B16), Los Angeles, CA 90089-9023; (323) 442-1607, FAX: (323) 442-1199.

## Tuition and Fees

The tuition and fees listed below are estimated for fall semester, 2012. All fees are subject to change without notice by action of the University of Southern California Board of Trustees. The university reserves the right to assess new fees or charges. Tuition is not refundable; late registration fees are mandatory and cannot be waived.

Tuition for each semester of the medical school curriculum is due and payable at the beginning of the semester. Registration is not permitted after the third week of instruction. Late payment of tuition is subject to a mandatory late fee. Average budgets for medical students will vary according to their year in the curriculum. Sample budgets for Year I,

Year II, and the Junior/Senior Continuum may be requested from the Office of Financial Aid. Tuition, mandatory fees and parking are the same for all years.

Tuition for courses of the graduate curriculum is based upon the number of units assigned to each course. The Graduate Degree Programs section provides a department-by-department list of graduate course titles; the number following each title indicates the number of units for which tuition is charged. Late payment of tuition is subject to a mandatory late fee.

### Required Fees (Estimated)

Academic Year Tuition (two semesters)	\$50,246
Graduate Tuition (per unit)	1,473
Student Health Service Fee (annual)	506
Student Programming Fee (graduate)	75
Student Services Fee	25
Norman Topping Scholarship Fee	16
Health Insurance	1,288
Annual Dental Rate	136
Malpractice Insurance	25 (per term)
Disability Insurance	61 (per term)

### Optional Fees

Parking fee, per semester (see Tuition and Fees, page 42).

## Grading and Evaluation

The Keck School of Medicine employs a system of evaluation and grading designed to encourage student self-reliance, to stimulate the student's independent quest for knowledge and to promote excellence in academic achievement.

For courses of the medical curriculum, the Keck School of Medicine does not award numerical or letter grades. The evaluation process leading to a pass or fail grade is based on performance of the student in relation to announced course criteria. Throughout medical school, students will be evaluated on their fund of knowledge, problem-solving ability, professional behavior, relevant personality traits and clinical and interpersonal skills. Additional information on grading and evaluation is contained in the handbook provided to every enrolled medical student.

Faculty instructors are responsible for establishing evaluation criteria appropriate to the objectives of each course, discipline and clerkship, and for specifying the manner in which evaluative information is to be gathered. Instructor comments on student performance form an integral part of a student's total evaluation. For each evaluation, descriptive comments based on the student's overall performance in relation to course criteria are submitted for permanent file to the office of the associate dean for student affairs, together with performance reports.

The student's permanent file is used to prepare a letter from the associate dean of Student Affairs of the Keck School of Medicine, which accompanies student applications for internships and residencies, and to

determine scholastic suitability for election to Alpha Omega Alpha, the medical school honor society. These records are maintained by the Office of Student Affairs; students may review their records during regular office hours. During the lifetime of the physician, the permanent student record may be consulted as evidence of completion of the required curriculum and as certification for licensure.

Grading and evaluation policies for graduate degree programs and for joint M.D./Ph.D. degrees are established in conjunction with the Graduate School. In general, courses taken in partial fulfillment of graduate degree requirements receive letter grades that are recorded by the university.

## Degrees and Requirements

The Keck School of Medicine and its departments offer types of curricula leading to award of: the Doctor of Medicine; joint M.D./Ph.D.; joint M.D./MBA; joint M.D./MPH; a Master of Academic Medicine, MAM; Global Medicine, M.S.; Global Health, B.S.; graduate degrees in conjunction with the Graduate School in Applied Biostatistics/Epidemiology, M.S.; Biochemistry and Molecular Biology, M.S., Ph.D.; Biometry, M.S., Ph.D.; Biostatistics, M.S., Ph.D.; Cell and Neurobiology, M.S., Ph.D.; Clinical and Biomedical Investigations, M.S.; Epidemiology, Ph.D.; Experimental and Molecular Pathology, M.S.; Genetic, Molecular and Cellular Biology, Ph.D.; Molecular Epidemiology, M.S., Ph.D.; Molecular Microbiology and Immunology, M.S., Ph.D.; Nurse Anesthesia, M.S.; Physiology and Biophysics, M.S., Ph.D.; Psychology and Public Health, Ph.D./MPH; Statistical Genetics and Genetic Epidemiology, Ph.D.; Systems Biology and Disease, Ph.D.

The Department of Family Medicine has one academic division: the Division of Physician Assistant Studies, which offers the Master of Physician Assistant Practice.

The Department of Preventive Medicine has two academic divisions: the Health Behavior Research Division, which offers a B.S., Health Promotion and Disease Prevention Studies/Master of Public Health; Master of Public Health; Pharm.D./Master of Public Health; Ph.D., Physical Therapy/Master of Public Health; Ph.D., Preventive Medicine (Health Behavior Research); and the Biostatistics Division, which offers M.S. programs in Biostatistics, Molecular Epidemiology, and Applied and Biostatistics/Epidemiology.

The division also offers Ph.D. programs in Biostatistics, Epidemiology, Molecular Epidemiology, and Statistical Genetics and Genetic Epidemiology.

In addition, departments of the school have certificate programs in certain medical specialties.

The Medical Education Committee is responsible for overall planning of the medical school curriculum. Separate curriculum committees plan and supervise the instructional programs for each year of medical school. Each of the committees includes student representatives and faculty members from the departments involved in each year's teaching program.

The curriculum of medical education at USC continues to emphasize preparation of the student to give optimal patient care. Students are progressively involved in patient care beginning with their first semester. The curriculum is patient-oriented, and students are expected to assume increasing responsibility for patient care as they acquire sufficient knowledge and skills. During the clinical experiences of the Junior/Senior Continuum students eventually attain a level equivalent to that of an intern.

At the same time, the school recognizes that the explosion of knowledge and techniques brought about by the current "biotechnology revolution" is rapidly altering the practice of medicine. During the four years of medical school, students cannot be taught all that will

be needed for the practice of medicine — either now or in the years ahead. To a far greater degree than in the past, the present curriculum encourages students to acquire skills and habits of self-education and self-instruction that will prepare them for lifelong learning.

The faculty of the school recognize that while most students will eventually practice medicine, some will choose an academic research career. The plan of medical education fosters the development of individuals whose careers may be directed along this path. Faculty are available to counsel and encourage research participation by students during their medical school training.

The curricula of the Keck School of Medicine and its departments acknowledge the crucial place of basic medical science in the advance of modern clinical practice. Both basic and clinical science are taught throughout the four years of the undergraduate medical curriculum. Basic science is taught both as pure basic science and in correlation with clinical science. In addition, a number of the school's departments cooperate with the USC Graduate School to offer degree courses leading to the award of the Master of Science and Doctor of Philosophy. Most of these graduate courses may also be taken as part of the school's joint M.D./Ph.D. program.

## Doctor of Medicine

The Keck School of Medicine awards the Doctor of Medicine to enrolled students who have satisfactorily completed the four-year curriculum of the school. This curriculum integrates instruction in all departments of the school: Department of Anesthesiology, Department of Biochemistry and Molecular Biology, Department of Cell and Neurobiology, Department of Dermatology, Department of Emergency Medicine, Department of Family Medicine, Division of Medical Education, Department of Medicine, Department of Molecular

Microbiology and Immunology, Department of Neurological Surgery, Department of Neurology, Department of Obstetrics and Gynecology, Department of Ophthalmology, Department of Orthopaedics, Department of Otolaryngology – Head and Neck Surgery, Department of Pathology, Department of Pediatrics, Department of Physiology and Biophysics, Department of Preventive Medicine, Department of Psychiatry and

the Behavioral Sciences, Department of Radiation Oncology, Department of Radiology, Department of Surgery and Department of Urology.

The sections that follow provide a synopsis of the emphases and organization of this four-year curriculum.

### Years I-II (two academic years)

The curriculum is designed to enhance the students' understanding of the basic sciences and their relevance to clinical medicine. The methodology used will improve students' problem-solving and independent study skills. Curriculum themes are delivered in a case-centered format with the integration of small-group learning sessions, directed independent study and newer instructional technologies emphasized.

Year I-II begins in the first semester with Core Principles of Health and Disease followed by organ system review ending with Integrated Case Study section. There is an eight-week summer break between the first and second years. Students also take Introduction to Clinical Medicine and Professionalism and the Practice of Medicine.

Each week of the academic year is composed of approximately 20 hours of lecture and small group sessions with an additional 20 hours of independent directed study, Introduction to Clinical Medicine and the Patient and Professionalism and the Practice of Medicine. Examinations in all systems throughout the first two years are graded Pass/Fail. Dean's recognition is awarded on the basis of year-end comprehensive examinations and special projects.

#### *Core Principles of Biomedicine*

This introductory section provides the student with the fundamental knowledge necessary for the integrated study of the basic and clinical sciences in the subsequent human organ systems. Included in Core Principles are these major areas: molecular and cellular medicine, development and structural medicine, foundations of clinical medicine, evidenced-based medicine, preventive medicine including biostatistics, epidemiology and nutrition. This section is taught in an integrated fashion and includes the use of clinical case correlations. Gross Anatomy and Introduction to Clinical Medicine begin during this introductory section of the Year I-II curriculum.

#### *Gross Anatomy*

Cadaver dissection remains a unique teaching tool by which the three dimensional organization of the human body is studied. Gross Anatomy will begin in the Core Principles of health and disease system with the dissection of the body wall and major body cavities followed by head and neck dissection in the neurosciences system, limbs, dissection during the musculoskeletal system and pelvic cavity dissection in reproduction system. Continued study of gross anatomy by use of prosected anatomical specimens as well as computer programs, selected review lectures, and so on, continues throughout the integrated organ systems.

#### *Introduction to Clinical Medicine (ICM)*

ICM expresses the strongly patient-centered orientation of the medical school curriculum. The student is introduced to patients and is involved in patient care activities from day one. Students are introduced to the principles of patient care and management and examine what it means to be a physician and how one becomes a physician.

The major content areas of the course include communication in the setting of illness, the unified concept of health and disease (the biopsychosocial model), basic clinical skills and the correlation of basic science with clinical medicine.

ICM emphasizes the systematic acquisition of the clinical skills of interviewing, history taking, physical examination, elementary clinical problem solving, and medical record keeping. Throughout the Year I-II continuum, the ICM clinical skills curriculum is integrated with basic science instruction. Students can therefore learn and apply basic science knowledge in the clinical setting. By encouraging a thorough understanding of the direct applications of basic science research to modern clinical medicine, instructors motivate the student to learn, use and retain more of the content and concepts presented in the basic science portions of the curriculum.

A group of five or six students spends from four to eight hours each week with an instructor from the clinical faculty who remains with the group for one to two years. As the group deals with basic medical themes (death, pain and helplessness) and issues (patient responsibility, learning to live with ambiguity and uncertainty), instructors help students to cope with their own feelings. This format opens the door for student-faculty interaction and improvement of student-faculty communication.

Instructors encourage students to take advantage of the learning experiences provided by their roles as helping and therapeutic persons. Students develop their ability to communicate with patients in the setting of illness and are guided by patient concerns to enhance their own growing knowledge, skills, abilities and responsibilities. Students are expected to acquire skills and habits of self-education and self-instruction that will prepare them for lifelong learning.

The unified concept of health and disease presented in this course enables students to comprehend the human organism in all its complexity. Using their clinical experiences as a teaching model, students are taught to consider the patient as an integrated whole and to view the patient's illness or disease as

more than simply a disruption of physiologic processes or a collection of physical findings.

Additional learning experiences occur through workshops and focus experiences. ICM workshops provide standardized instruction in history taking and physical examination, as well as integrated instruction in areas that cross disciplines. These include physician well being, substance abuse, domestic violence, and ethics. Through focus experiences, students are encouraged to explore a variety of practice environments as well as community-based health and social services. For example, students may visit outpatient clinical settings, a geriatrics long term care facility, a hospice care facility or homeless services organizations.

#### *Professionalism and the Practice of Medicine (PPM)*

The purpose of the PPM course is to create a community and social context to provide, identify and facilitate learning from professional role models for students throughout the first two years of the medical school curriculum, as well as to help students gain skills and competence in the areas of communication, the social and community context of health care, ethical judgment, self-awareness and reflection, self-care and personal growth, professionalism, cultural competence, and lifelong learning. The curriculum is dynamic and interactive, allowing for much small-group discussion and participation. Students are encouraged to work collaboratively and enhance small-group skills, in order to improve their participation in Introduction to Clinical Medicine (ICM), Gross Anatomy, MDL laboratories and large-group sessions, as well as to prepare them for the team work of their clinical years.

The PPM course sessions meet on Monday afternoons, typically for two hours per session. The students meet in groups with two faculty members, who serve as their mentors throughout the first year of their pre-clinical education; at least one mentor is a clinician. The clinical faculty comes from multiple disciplines within Keck and the local community. While the course features large lectures, there is a great emphasis on small-group learning acquired from community leaders, faculty-mentored small-group discussions, student presentations and student-led sessions.

The students participate in a core curriculum in Year I, which includes general topics such as cultural competence, ethics, health care policy and finance, professionalism, and empathy. In Year II, the students are allowed to select from nine different areas of interest (selectives), and meet in groups with faculty

having expertise in the given area. Examples of selectives presented include advanced ethics, medicine and the mind, spirituality and medicine, medical arts and humanities, global health, complementary and alternative medicine, medicine's intersection with technology, physicians operating outside their comfort zones, and the future of health care.

The PPM course provides students with an opportunity to build a professional identity, develop relationships with faculty mentors, and increase team-building and community-building skills. Students receive an introduction to the concepts of professionalism and ethics, with a better understanding of their real-world implications. The PPM course encourages leadership while engaging in the process of learning, characterized by presentations within both small and large groups, as well as professional development through exposure to multiple professional, ethical, and cross-cultural scenarios, cases, and providers. Evaluation is provided through student submission of portfolios containing written self-reflections, responses to faculty and peer feedback, and evaluations completed over the course of a two-year longitudinal curriculum. Finally, PPM hones sensitivity and skills relevant to medical professionalism to better prepare students for their transition into the clinical years of the medical school curriculum.

#### *Organ System Review*

A sequence of study presenting integrated basic and clinical science instruction involving 10 human organ systems — Skin, Hematology and Clinical Immunology, Neurosciences, Musculoskeletal, Cardiovascular, Renal, Respiratory, Endocrine/Metabolism, Reproduction, Gastrointestinal/Liver — follows Core Principles of Biomedicine.

#### *Integrated Case Study*

This section completes the second year of the Year I-II continuum and emphasizes patient-centered problems that integrate the basic and clinical science presented in the preceding organ systems. Students will explore the multi-organ effects of disease processes and reinforce diagnostic reasoning skills. In addition, concepts of pathophysiology, evaluation and management that can be applied to any organ system will be included. This section will also reinforce the appropriate use of medical information resources, effective self-directed learning skills, and interpersonal and group communication skills.

Separate review sessions of the important basic science and clinical concepts covered during the previous two years also occur during this seven-week section. These sessions will assist students in preparing to take Step I

of the United States Medical Licensing Examination (USMLE).

By early spring of the second year of the Year I-II continuum, students are expected to select their academic clinical advisers and to begin arranging the schedule of clerkships to be taken during Year III-IV. By the end of the fall semester, Year II, each student receives information that describes the curriculum requirements of Year III-IV. Students choose the area of medical practice that they are most likely to pursue and an adviser is assigned from that discipline. The adviser counsels the student on clerkships and opportunities in graduate medical education.

#### **Year III-IV (two academic years)**

The final two years of medical school are designed as a continuum of two calendar years, beginning in July at the end of Year II. During the spring of their second year, students schedule clerkship rotations to be taken during the two years. Each student's program is designed with the assistance of faculty advisers and includes 50 weeks of required clerkships, 16 weeks of selective clerkships and 16 weeks of elective clerkships.

All degree candidates are required to take Step I of the United States Medical Licensing Examination (USMLE) prior to entering Year III-IV and pass it before starting their senior year. Students must pass Step II CK and CS of the USMLE as a graduation requirement.

During Year III-IV, each student may schedule 16 weeks of discretionary time for personal convenience, remedial work, funded research work and other non-curricular activities, such as investigating postgraduate training programs. Although every effort is made to provide flexibility in the scheduling of each student's program, some inherent limitations are imposed by the maximum enrollment permitted for each clerkship. Students are a vital part of the university's medical team, which provides health care for patients throughout the year. Vacations are therefore subject to some scheduling adjustments.

#### *Required Clerkships*

Family Medicine	6 weeks
General Surgery	6 weeks
Surgical Subspecialty	4 weeks
Internal Medicine	6 weeks
Internal Medicine Sub-internship	4 weeks
Neurology	4 weeks
Obstetrics and Gynecology	6 weeks
Pediatrics	6 weeks
Psychiatry	6 weeks
Intersessions	2 weeks

(two, one-week sessions)

#### *Intersession I and II*

The Intersession curriculum is two one-week sessions established for Year III students that will enable learners to pause, reflect and consolidate the many and varied clinical experiences that they encounter in their third year of medical school; to promote advanced clinical skills, professional development, health policy formulation and ethical decision-making, and patient safety; and to further prepare for the residency application process.

This individualized curriculum will allow students to revisit and focus basic-science topics through the prism of newly learned clinical material and to foster capacity for the analysis and formulation of health care policy in light of the political, economic, legal and social, and ethical dimensions of health care.

Students will be instructed in a systems-based approach to patient safety by stimulating the imagination, curiosity and skills of close observation and careful interpretation through engagement with the arts and humanities. Developing and building advanced clinical skills by acquiring, appraising and applying evidence in the context of individual patient decision-making, (i.e., Evidence Based Medicine) are two important goals of the Intersession curriculum.

Providing comprehensive, coordinated and consistent career advising along with fostering the continuing professional development of the learners in the frame of clinical practice are key components. Finally, the curriculum will provide ongoing instruction in the provision of culturally competent care and prepare learners for their Required Community Project.

#### *Selective Clerkships*

Students are required to schedule 16 weeks of selective clerkships, chosen from a list of four- or six-week clerkships approved by the Clinical Curriculum Committee. Selective clerkships are carried out at USC-affiliated hospitals and encompass virtually all specialty areas. Information is available at [medweb.usc.edu](http://medweb.usc.edu).

#### *Elective Clerkship*

The elective period consists of 16 weeks, during which electives may be taken on campus, at USC-affiliated hospitals or at more distant medical schools or medical centers. Approved on-campus electives that are offered regularly are listed in the elective catalogue.

Proposals for other on-campus and off-campus electives are reviewed individually by a committee composed of faculty members and students. All petitions must be submitted at least six weeks before the beginning of the rotation. Off-campus electives require documentation from the off-campus preceptor, endorsement of the student's medical school adviser, and prior approval and review by the Clinical Curriculum Committee. Credit is not given for electives until an evaluation has been received from the preceptor and a critique of the elective submitted by the student. Students with an academic deficiency may not schedule off-campus electives.

#### *Program in Medical Humanities, Arts and Ethics*

This curriculum begins with collaborative discourse about ethical problems to help students learn to identify, analyze and resolve clinical ethical problems. This exercise is followed by interim skill building/maintenance and by instructor facilitated discussion of videotaped ethics cases.

In Year II, the program focuses on ethical discernment and action in simulated settings and the study of the human dimensions of medicine. In the first exercise, standardized patients interact with students to help teach the telling of bad news. Students also learn from the humanities about patients as persons. The program concludes with a forum theatre in which students must decide what action to take based on their own convictions.

## M.D./Ph.D. Program

Departments and programs of the University of Southern California and the California Institute of Technology participate in the joint M.D./Ph.D. degree program administered by the USC Graduate School, the Keck School of Medicine and the California Institute of Technology. This program integrates the medical school curriculum with graduate curricula in the basic sciences, to provide a unified course of study leading to both the M.D. and Ph.D. degrees.

This program is especially designed to prepare highly qualified students for careers in academic medicine and medical research. Formal course work and dissertation research provide the student with in-depth scientific preparation and research experience which enhances the application of basic science information to the diagnosis, treatment and prevention of disease.

Year III is devoted to ethics education by clinical role models and encompasses instruction in the core clerkship by ethical standard-bearers. Students also participate in home hospice care and pain management cases.

During Intersession I and II, the program includes a series of sessions that focus on contemporary health care and the physician-in-society. The goal of the sessions is to provide students with the experience of integrating the principles, methods and bedside issues included in Year I-III of the program. Students practice applying the micro-level (individual/clinical) decisions to the ethical dilemmas and policy issues that face physicians at the mezzo-level (health care organizations), and to the macro-level (profession as a whole, state and nation). Topics include issues of professionalism; allocation of resources; the economics, organization and societal oversight of health care; and the care of dying patients.

#### *Fifth Year Research Option*

USC offers students the opportunity to take a full year of research experience with either a Keck School of Medicine faculty mentor or an approved faculty mentor at another institution. This program is open to any student in good to excellent academic standing who has completed his or her first year of medical

Conversely, the Ph.D. education becomes more meaningful because of its disease-oriented emphasis.

The curriculum for M.D./Ph.D. students differs from that of Ph.D. graduate students in the basic sciences in that the former take medical school courses as well as selected graduate level basic science courses and specific courses designed for M.D./Ph.D. students. The integrated training of the M.D./Ph.D. program enables students to compress their total academic effort by applying some course work toward the requirements of both degrees. On average, completion of the combined program requires a total of eight years.

school. Students interested in the option should identify a faculty preceptor and present a description of the proposed research program and funds available in support of the program to the associate dean for curriculum. A stipend, comparable to that received by a graduate student at the postgraduate level, is available. Application for this program is made through the Office for Student Affairs (KAM 100B) and will be supervised through the Office of the Associate Dean for Student Affairs (KAM 100B). Dean's research scholarships are available for selected dean's research scholars pursuing this option.

#### **Baccalaureate/M.D. Program**

The focus of this program is to assure these students admission to medical school (based upon the maintenance of their GPAs and requisite MCAT scores) and to allow them the opportunity to enrich their studies with a balanced liberal arts education. The goal is that these students will explore the diverse educational opportunities the University of Southern California has to offer and become members of the medical profession with a balance of medicine, science and the arts. The Baccalaureate/M.D. Program is not designed to advance these potential medical professionals with four years of science and medicine prior to attending medical school, but rather to allow them the necessary time to explore and develop into mature and serious students of medicine. There are no new admissions to this program beginning in academic year 2013-14.

The following graduate programs participate in the M.D./Ph.D. program:

- Biochemistry and Molecular Biology
- Cell and Neurobiology
- Epidemiology
- Genetic Molecular and Cellular Biology
- Molecular Microbiology and Immunology
- Pathology
- Physiology and Biophysics
- Preventive Medicine
- Systems Biology and Disease

Selected graduate programs from the Viterbi School of Engineering and the Dornsife College of Letters, Arts, and Sciences also participate in the combined degree program.

Time limits for qualifying examinations and other procedures are determined by considering M.D./Ph.D. students as medical students for the periods when they are following the medical curriculum and as full-time graduate students during their years of graduate research prior to advancement to the Junior/Senior Continuum.

M.D./Ph.D. candidates have the option of pursuing a laboratory experience before beginning the Year I medical curriculum through a laboratory rotation at either USC or the California Institute of Technology. This laboratory experience is strongly encouraged although not required.

During the first two years of their program, M.D./Ph.D. students follow the medical school curriculum and gain added exposure to the basic science departments through a special survey course. Students are guided by the M.D./Ph.D. executive committee, which outlines the integration of the graduate program with the medical school curriculum and serves as the students' liaison until they have selected a graduate program and graduate research adviser. The graduate programs vary widely in the extent to which they allow credit toward the Ph.D. for courses taken during the first two years of medical school. M.D./Ph.D. students are encouraged to select a graduate program by early spring of the second year of medical school. Students are required to apply for admission to the Ph.D. program of their choice by the recommended deadline on the graduate application.

Prior to entering Ph.D. studies, the Keck School of Medicine allows M.D./Ph.D. candidates the option of beginning their clinical training by taking the six-week required clerkship in Family Medicine, Internal Medicine or Pediatrics. This can provide an early introduction to clinical medicine and a context for integration with the basic sciences of the thesis years.

Beginning with the third year of the M.D./Ph.D. program, students enter their selected program as full-time graduate students. Although the content of graduate courses required of M.D./Ph.D. students is generally identical to that required of Ph.D. students in the same graduate program, M.D./Ph.D. students are permitted greater latitude in the scheduling of their graduate courses. Four years are commonly necessary to fulfill requirements for the Ph.D., including course work, qualifying examinations, independent dissertation research, and writing of the dissertation.

After completion of the graduate program, the student is advanced to the Junior/Senior Continuum and completes the final two years of clinical training required by the medical school curriculum. No portion of clinical training is deleted from the joint program. Prior to entering the clinical component of the joint degree, students will be expected to participate in a clinical shadowing experience, which could be done throughout the Ph.D. studies or as part of an intensive program prior to entering the clinic. Students will also be required to participate in the Medical Scholars Program clinical tutoring

skills program held in April of each year and re-take the Year II Objective Structured Clinical Examination at the end of May with the second year medical students.

#### **Keck School of Medicine-Caltech M.D./Ph.D. Program**

A joint program between the Keck School of Medicine and the California Institute of Technology (Caltech) was established for the granting of the M.D./Ph.D. degree. Students do their preclinical and clinical work at the Keck School of Medicine and their Ph.D. work with any member of the Caltech faculty, including the biology, chemistry, engineering, applied sciences divisions and interdisciplinary programs divisions.

Admission to this joint program is made through the usual Keck/USC M.D./Ph.D. process. All applicants are interviewed at Keck School of Medicine and Caltech. Matriculated students in this program have the option of doing their Ph.D. at USC or Caltech. The M.D. degree will be awarded from the Keck School of Medicine and the Ph.D. from Caltech.

Further information about the M.D./Ph.D. programs at the Keck School of Medicine may be obtained by contacting: M.D./Ph.D. Program, Keck School of Medicine, 1975 Zonal Avenue (KAM 314), Los Angeles, CA 90089-9023; (323) 442-2965, FAX: (323) 442-2318; Email: mdphdp@usc.edu.

## M.D./MBA Dual Degree Program

In response to the ongoing reorganization of health care delivery systems, and the growing awareness of the impact of business decisions on health care, the Keck School of Medicine and the Marshall School of Business jointly offer an innovative program for individuals seeking knowledge in both medicine and business administration. The program is designed to prepare its graduates to assume leadership in the design and management of health care systems.

The M.D./MBA program spans five years. Interested students apply during their second or third year of medical school, and begin required MBA courses following successful completion of the first two or first three years of medical school. The remaining time is devoted to the clinical clerkships of the Keck School of Medicine and completion of graduate business elective courses.

At the conclusion of the program, students will have completed 48 units in the Marshall School of Business, including required and elective courses, and four years of courses in the Keck School of Medicine. Dual degree students may not count courses taken outside the Marshall School of Business toward the 48 units.

*First and Second Years:* Required medicine courses.

*Third or Fourth Year:* Required MBA courses and graduate business electives.

*Remaining Years:* Keck School of Medicine core, selective, and elective clerkships and graduate business electives.

#### *Admission Requirements*

Students who have a baccalaureate degree from an accredited college or university and have successfully completed at least two years in the Keck School of Medicine will be considered for admission to the Marshall School of Business (see page 154). All requirements for admission to the regular MBA Program (GPA, GMAT score, etc.) must be fulfilled by the medical student for admission to the Marshall School.

The M.D. and the MBA degrees are awarded simultaneously upon completion of their requirements by the Keck School of Medicine and the Marshall School of Business.

## M.D./Master of Public Health

The joint M.D./MPH program at the Keck School of Medicine is designed for individuals who envision a medical career that combines public health and medical disciplines. Many individuals entering careers as medical doctors or public health practitioners wish to acquire not only medical practice competencies, but also an understanding of the history, organization, goals and philosophy of public health. The joint M.D./MPH program offers a broad-based orientation to public health while the student completes medical school requirements. The Master of Public Health degree provides increased knowledge of and sensitivity to the political, historical, economic and social environments of health promotion and health services delivery.

The M.D./MPH program spans five years (four years of medical school and one year of public health courses). Students begin the core MPH courses following the successful completion of the first two years of medical school. The last two years of the program are devoted to clinical clerkships of the School of Medicine and to the completion of the elective courses and practicum (field experience) of the MPH program. At the conclusion of the joint degree program, students will have completed 42-46 units in the Master of Public Health program and four years of courses in the Keck School of Medicine.

Students who are enrolled in the Keck School of Medicine must apply to the Master of Public Health program no later than January of their second year. All requirements for admission to the regular MPH program must also be fulfilled by dual degree applicants.

All students in the M.D./MPH program must meet course requirements, grade point average requirements and program proficiency requirements of both programs. Students must have a grade point average of 3.0 in the MPH curriculum to meet graduation requirements.

The M.D. and the MPH degrees are awarded simultaneously upon completion of the Keck School of Medicine and the Master of Public Health program requirements. For more information, contact the MPH Program Office at (626) 457-6677.

## Master of Science in Clinical, Biomedical, and Translational Investigations

### Admission

Candidates for admission include medical students, fellows or other health professionals. The program will consider applicants who satisfy all requirements for admission to the Graduate School. MCAT scores may be substituted for GRE scores. All graduate students must maintain a GPA of 3.0 throughout their graduate studies.

The Master of Science in Clinical, Biomedical, and Translational Investigations is a joint effort to train medical students, residents, fellows or other health professionals, including faculty and other scientists conducting clinically related research, in clinical research methods to translate clinical, biomedical and technological discoveries into advances in population-based, clinical or basic science research. The M.S. in Clinical, Biomedical, and Translational Investigations is available to medical students who have completed their second year of medical school, as well as MDs doing their fellowships at USC or Children's Hospital Los Angeles (CHLA), and faculty interested in advancing their research careers. Tracks include: 1) patient-oriented translational research, 2) community-based intervention trials, 3) design, conduct and analyze clinical studies, 4) epidemiology and disease etiology, 5) molecular biology, 6) cell biology, 7) health outcomes research, 8) vision science, 9) environmental epidemiology, and 10) alternative options track.

For those trainees who do not wish to pursue an M.S. degree, the school offers a Certificate in Clinical, Biomedical, and Translational Investigations.

The Keck School of Medicine, through an oversight committee that includes a director and senior staff, administers this program in conjunction with faculty representing basic science and clinical departments.

The M.S. in Clinical, Biomedical, and Translational Investigations is designed to train students for future independent research careers in academic, government or private sector settings. The program gives students a solid background in the methodological aspects of research and in statistical thinking as applied to molecular epidemiology, as well as a solid grounding in biostatistical, epidemiological methods.

### General Requirements

Graduation requires the completion of 29 units, of which a maximum of 15 units are research track core courses taken in the first year (including summer sessions), with the remaining being directed to: 590 Directed Research (1-10 units) in an approved graduate-degree granting department for which research is being conducted and 594ab Thesis (2-2 units) in the same approved department taken in the second year. The equivalent of one year of full-time effort must be devoted to research leading to a master's thesis.

Because the background and interests of applicants vary widely, the director will consult with each student prior to the first year to design a schedule of recommended courses. The direction of research will also be facilitated by mandatory attendance in the Recent Advances Journal Club workshop. At the end of the first year, the student must submit a final program to the director. This will summarize the courses taken, the proposed thesis title and the names and credentials of the thesis committee. One of the members of the thesis committee will be the student's research adviser and will serve as the committee chair. For faculty, at least two members of the thesis committee must be from outside the student's department.

### Certificate Program

Students who do not wish to pursue an M.S. degree may earn a university Certificate in Clinical, Biomedical, and Translational Investigations. The certificate program requires 12 credits and a minimum of six months of practical experience working on a research project approved by the oversight committee.

*Recommended Core Courses for Each Research Track*

**PATIENT-ORIENTED TRANSLATIONAL RESEARCH UNITS**

MPTX 517	Structure and Management of Clinical Trials	4
PM 510L	Principles of Biostatistics	4
PM 512	Principles of Epidemiology	4
PM 523	Design of Clinical Studies	3
PM 570	Statistical Methods in Human Genetics, or	
BIOC 543	Human Molecular Genetics	4
		19

**COMMUNITY-BASED INTERVENTION TRIALS UNITS**

PM 510L	Principles of Biostatistics	4
PM 512	Principles of Epidemiology	4
PM 526	Communications in Public Health	4
PM 528	Program Design and Evaluation	4
		16

**DESIGN, CONDUCT AND ANALYSIS OF CLINICAL STUDIES UNITS**

PM 510L	Principles of Biostatistics	4
PM 511a	Data Analysis	4
PM 523	Design of Clinical Studies	3
PM 538	Introduction to Biomedical Informatics	3
PM 570	Statistical Methods in Human Genetics	4
		18

**EPIDEMIOLOGY AND DISEASE ETIOLOGY UNITS**

PM 510L	Principles of Biostatistics	4
PM 512	Principles of Epidemiology	4
PM 517a	Research Methods in Epidemiology	3
PM 518a	Statistical Methods for Epidemiological Studies I	3
PM 527	Epidemiology of Infectious Disease, or	
PM 529	Environmental and Occupational Health: An Epidemiological Approach, or	
PM 533	Genetic and Molecular Epidemiology	3
		17

**HEALTH OUTCOMES RESEARCH UNITS**

PM 511a	Data Analysis	4
PMEP 538	Pharmaceutical Economics	4
PMEP 539	Economic Assessment of Medical Care	4
PMEP 540ab	Seminar in Pharmaceutical Economics and Policy	2-2
		16

**MOLECULAR BIOLOGY UNITS**

BIOC 543	Human Molecular Genetics, or	
INTD 504	Molecular Biology of Cancer, or	
INTD 555	Biochemical and Molecular Bases of Disease, or	
MICB 551	Prokaryotic Molecular Genetics	4
INTD 531	Cell Biology	4
INTD 561	Molecular Genetics	4
INTD 571	Biochemistry	4
		16

**CELL BIOLOGY UNITS**

INTD 504	Molecular Biology of Cancer, or	
INTD 555	Biochemical and Molecular Bases of Disease	4
INTD 531	Cell Biology	4
INTD 571	Biochemistry	4
PATH 552a	Methods in Experimental Pathology	3
		15

**VISION SCIENCE UNITS**

BME 670	Early Visual Processing	4
CNB 590	Directed Research	1-12
CNB 594abz	Master's Thesis	2-2-0
INTD 501	Recent Advances in Vision Science	1, max 4
INTD 531	Cell Biology	4
INTD 571	Biochemistry	4
PHBI 608a	Advanced Cellular, Molecular and Systemic Physiology	2
PSCI 667	Intracellular Drug Delivery and Targeting	2
		21-24

**ENVIRONMENTAL EPIDEMIOLOGY UNITS**

PM 510L	Principles of Biostatistics	4
PM 512	Principles of Epidemiology	4
PM 518a	Statistical Methods for Epidemiological Studies I	3
PM 529	Environmental and Occupational Health: An Epidemiological Approach	3

Elective Options (select one course)

PM 511a	Data Analysis I	4
PM 533	Genetic and Molecular Epidemiology	3
PM 570	Statistical Methods in Human Genetics	4
PM 599	Special Topics	4
		17-18

**ALTERNATIVE OPTIONS TRACK (MINIMUM 15 UNITS)**

Courses are determined by mentor and student, based on research interests, with approval from the Oversight Committee.

**Seminars/Workshops**

Participation is required in a Recent Advances Journal Club to learn how to read papers critically and develop the speaking skills necessary to explain a research paper. Faculty members in the program rotate as course directors in order to emphasize new topics. Students are expected to attend the three-day workshop on NIH Proposal Development offered by Thomas Ogden, Ph.D., and a workshop on the principles of scientific manuscript preparation.

## Certificate in Health, Technology and Engineering (HTE@USC)

*Academic Director:* Terry Sanger, M.D., Ph.D.,  
*Provost Associate Professor of Biomedical  
Engineering, Neurology, Biokinesiology, and  
Physical Therapy*

*Administrative Director:* George Tolomiczenko,  
Ph.D., *Assistant Professor, Neurology*

This program offers current second-year USC Ph.D. engineering students and first-year M.D. students an opportunity to learn about and gain experience in medical device and process innovation. Through project-based and interdisciplinary collaboration, students will augment their current programs with a set of courses and lab experiences linking medical and engineering research groups. By applying design-informed approaches toward problem identification and solution prototyping, students will be involved in all the steps of medical device innovation from conception to commercialization. The program aims to create interdisciplinary, boundary-spanning, inventive entrepreneurs seeking early practical experience with device and method

innovation in health care. Program participants will form bonds with a group of like-minded medical students and engineers who will be their mentors, colleagues and contacts as they advance in their careers.

The courses unique to the program include a seminar sequence (Topics in Health, Technology and Engineering), which must be taken during the first two years of involvement with the HTE@USC program, a case studies sequence taken during the second year and a research course to earn project-related credits:

COURSES		UNITS
BME 566abcd	Topics in Health, Technology and Engineering	2-2-2-2
BME 567ab	Case Studies in Health, Technology and Engineering	2-2
BME 790	Research	12

Other required courses that are part of the M.D. curriculum (Ph.D. students enroll in INTD course versions of the same courses open only to HTE students on CR/NC basis):

INTD 621ab	Introduction to Clinical Medicine (ICM) for HTE	3-3
INTD 622L	Pre-clinical System Block for Health, Technology and Engineering	3-9

Candidates interested in applying should contact HTE@usc.edu via email.

## Ph.D. Programs in Biomedical and Biological Sciences (PIBBS)

**Keith Administration Building B-16**  
**1975 Zonal Avenue**  
**Los Angeles, CA 90089-9031**  
**(323) 442-1609**  
**FAX: (323) 442-1199**  
**Email: pibbs@usc.edu**  
**[www.usc.edu/pibbs](http://www.usc.edu/pibbs)**

*Program Director:* Ite A. Laird-Offringa, Ph.D.,  
*Associate Professor of Surgery, Biochemistry and  
Molecular Biology*

The USC Ph.D. Programs in Biomedical and Biological Sciences (PIBBS) is a university-wide program that is an entryway into graduate studies and research leading to the Ph.D. degree in a broad range of biological and biomedical disciplines. Interdisciplinary studies that span multiple fields have sparked a startling surge in new discoveries that excite intellectually and also promise great benefits to society.

Students will complete three research rotations in any of over 200 different research laboratories during their first year. In addition, they spend two semesters taking courses of their choice in a variety of disciplines such as biochemistry, epidemiology, (stem) cell biology, neurobiology, molecular genetics, cancer and physiology. At the end of the

second semester each student chooses a faculty member to serve as a thesis research adviser and chooses a specific Ph.D. program from among the participating programs listed. Subsequently, each student will focus on the completion of course requirements and qualifying examinations for the chosen Ph.D. program and will develop and complete an original research project that will serve as the basis for a doctoral dissertation.

For information on application materials and descriptions of the research interests of participating faculty, see the PIBBS site on USCweb ([www.usc.edu/pibbs](http://www.usc.edu/pibbs)).

### Participating Schools and Graduate Programs

Dornsife College of Letters, Arts and Sciences  
Department of Biological Sciences  
Marine Environmental Biology  
Molecular and Computational Biology  
Integrative and Evolutionary Biology  
Department of Chemistry  
Neuroscience  
Ostrow School of Dentistry  
Craniofacial Biology  
Viterbi School of Engineering  
Biomedical Engineering  
Davis School of Gerontology

Keck School of Medicine  
Genetic, Molecular and Cellular Biology  
Preventive Medicine  
Biostatistics  
Health Behavior Research  
Molecular Epidemiology  
Systems Biology and Disease  
School of Pharmacy  
Pharmacology and Pharmaceutical Sciences  
Molecular Pharmacology and Toxicology  
Pharmaceutical Sciences

A detailed description of each of the Ph.D. programs listed here can be found by consulting the Catalogue index.

### Admission

Applicants to PIBBS must have a bachelor's or master's degree with a major emphasis in the natural sciences. Applicants must have a strong record of academic achievement, satisfactory performance on the general and advanced portions of the GREs. Three letters of recommendation are required, one of which should be from a laboratory research mentor. Previous research experience is expected. Students are admitted for the academic year beginning in the fall. Although there is no formal application deadline, complete applications received before December 1 will be given priority.

Applications are submitted electronically. Please see the PIBBS Website for information: [www.usc.edu/pibbs](http://www.usc.edu/pibbs). Supporting materials should be sent to: PIBBS, University of Southern California, 1975 Zonal Avenue, KAM B-16, Los Angeles, CA 90089-9031.

#### Financial Support

Admitted students are supported by research assistantships or fellowships during their two semesters in the PIBBS program. Tuition, health insurance and standard fees are also covered. After the student completes the PIBBS program and enters a specific Ph.D. program, similar support mechanisms are generally provided by the Ph.D. granting program.

## Graduate Degree Programs

In conjunction with the Graduate School, the Keck School of Medicine offers graduate curricula on the Health Sciences Campus leading to the Doctor of Philosophy in two interdisciplinary programs: Genetic, Molecular and Cellular Biology (GMCB) and Systems Biology and Disease (SBD) with participating faculty from biochemistry and molecular biology, cell and neurobiology, molecular microbiology and immunology, physiology and biophysics and preventive medicine. In addition, individual departments offer degrees in biochemistry and molecular biology, cell and neurobiology, molecular microbiology and immunology, physiology and biophysics.

The Departments of Preventive Medicine and Cell and Neurobiology along with the Price School of Public Policy offer the Master in Public Health with concentrated study in one of four tracks: health promotion and disease prevention, biostatistics/epidemiology, nutrition, and health communication.

The Department of Preventive Medicine also offers graduate curricula leading to Ph.D. degrees in biostatistics, epidemiology, molecular epidemiology, statistical genetics and genetic epidemiology or health behavior research.

Graduate credit is provided for some courses included in the Years I and II curriculum of the medical school.

The following sections provide an overview of the departmental graduate studies programs. The requirements listed are those of the individual departments and must be taken in conjunction with the general requirements of the Graduate School. For further information regarding graduate studies in the medical sciences, consult the

#### Curriculum

Most students will choose from the following courses during a two-semester period:

COURSES		UNITS
BIOC 790	Research (taken in conjunction with the rotation plan described below)	1-12
INTD 504	Molecular Biology of Cancer, or	
INTD 555	Biochemical and Molecular Bases of Disease, or	
INTD 572	Systems Physiology and Disease I	4

INTD 531	Cell Biology	4
INTD 561	Molecular Genetics	4
INTD 571	Biochemistry	4
INTD 573	Systems Physiology and Disease II	4

However, the list of courses for individual students may vary from this plan with permission of the program director. As part of the BIOC 790 course, each student will complete research rotations with three or more faculty members in participating Ph.D. programs. At the end of the second semester, each student will choose a faculty member to serve as dissertation adviser and will choose a specific Ph.D. program from the list of participating programs.

specific departments or contact: Office of Graduate Affairs, Keck School of Medicine, 1975 Zonal Avenue (KAM B-16), Los Angeles, CA 90089-9023; (323) 442-1607, FAX: (323) 442-1199.

#### Doctor of Philosophy in Genetic, Molecular and Cellular Biology

**Genetic, Molecular, and Cellular Biology**  
KAM B-16, MC 9031  
(323) 442-1475  
FAX: (323) 442-1199  
Email: [intbio@usc.edu](mailto:intbio@usc.edu)

*Director:* Henry Sucov

*Participating faculty:* School of Medicine faculty from both basic and clinical departments who perform research. Interested faculty from other schools including Pharmacy, Dentistry, Engineering and USC College are encouraged to request to become participating faculty.

The goal of the Ph.D. program in Genetic, Molecular and Cellular Biology (GMCB) is to train investigators to develop multidisciplinary strategies to elucidate the basic molecular and cellular mechanisms responsible for the ability of cells and organisms to reproduce, differentiate, communicate with each other, and respond to internal and external stimuli. Such studies will also logically facilitate our understanding of disease processes and the ability of organisms to defend themselves against disease.

Major advances in biological and biomedical sciences frequently involve the bridging of ideas and technology from diverse disciplines. The Ph.D. program in genetic, molecular and cellular biology will emphasize breadth

of research training fostered by the broad range of research interests and technological emphasis among participating faculty members from a variety of academic departments and disciplines. Close interactions among faculty and students provide an ideal environment for learning not only the skills required to conduct experiments but also the skills required to form new liaisons and collaborations with other scientists in diverse fields.

#### Admission Requirements

A baccalaureate degree in life sciences or sufficient courses in mathematics and the life sciences is required to provide a strong background for studies in biomedical research. Appropriate undergraduate degrees would be biology, physiology, engineering, chemistry or computer science. Successful applicants must have satisfactory performance on the general and advanced portions of the GREs and three letters of recommendation. Previous research experience in a related field is expected but not required. Applicants who are accepted with minor deficiencies are expected to correct these during the first year.

In general (although not exclusively), new graduate students apply for admission to USC through the Ph.D. Programs in Biomedical and Biological Sciences (PIBBS), and become enrolled in the genetic, molecular and cellular biology graduate program after having completed the first year's course work and rotations. Application forms and information are available online at [www.usc.edu/pibbs](http://www.usc.edu/pibbs), or can be obtained from the PIBBS program, Office of Graduate Affairs, University of Southern California Keck School of Medicine, KAM B-16, 1975 Zonal Ave., Los Angeles, CA 90089-9031; email [pibbs@usc.edu](mailto:pibbs@usc.edu).

*Degree Requirements*

These degrees are awarded under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section, page 86, and the Graduate School section, page 97, of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

*Advisory Committee*

The student will be advised during the first year by the genetic, molecular and cellular biology executive committee. The purpose of the executive committee is to help the student in the selection of courses, selection of research rotations and, ultimately, a mentor and laboratory, to monitor the student's progress, and to ensure preparation for the screening procedure at the end of the first year.

*Course Requirements*

A minimum of 60 units is required, consisting of formal courses, seminars and research credits. At least 24 of the 60 units are to be formal graduate course work (lecture or seminar courses). Students must complete 16 units of course work before they are considered for the screening procedure. Additional course work relevant to the research interests of the student may be required by the student's guidance committee or by the student's academic adviser in addition to the required 24 units.

*Lab Rotations*

During the first year, students sign up for BIOC 790 Research (4 units each semester) and rotate through the labs of three mentor members of the program (potential research advisers). By the first summer of graduate study, but no later than after 18 months in the program, each student is expected to have selected a research adviser.

In the first year, in addition to lab rotations, students are also required to take two 4-unit graduate-level courses each semester. In the second year, courses are selected with the approval of the student's guidance committee with reference to the research area in which the student is working. The GMCB program requires students to take courses in biochemistry, cell biology and molecular genetics; a list of recommended/suggested courses that will satisfy these requirements is distributed to all students at the beginning of each academic year. During the first summer term, all students take an ethics class (INTD 500 Ethics and Accountability in Biomedical

Research). Within the first two years, each student must take a statistics course (PM 510L Principles of Biostatistics (4) or equivalent); students who have previously taken an undergraduate or graduate course in statistics or one in which statistical methods were emphasized should petition to request permission to waive this requirement. In the second and subsequent years, students are required to take BIOC 573 Optimal Research Presentations by Ph.D. Students. For these required courses, opting out, delaying or substituting a class requires the approval of the advisory committee of the program.

*Screening Procedures*

At the end of the first year, each student is required to pass a screening procedure based on the first year's required courses submitted by reports from the genetic, molecular, and cellular biology faculty to the executive committee, which is intended to expose any weaknesses in the student's abilities. Progress must be judged satisfactory in two areas: maintenance of satisfactory performance in course work and satisfactory completion of all research rotations.

*Qualifying Examination*

The qualifying examination, administered by the guidance committee, should demonstrate a conceptual grasp of the major area of interest chosen and an understanding of the general framework and approaches of hypothesis-driven research.

*Annual Research Appraisal*

After advancing to candidacy, progress on dissertation research by each student is evaluated annually with an Annual Research Appraisal (ARA).

*Dissertation*

At the last ARA before the defense of the dissertation, the student submits an outline draft to the dissertation committee.

*Defense*

An acceptable dissertation based upon completion of an original investigation is required. The candidate must defend an approved draft of the dissertation in a public oral defense. The dissertation committee will then meet with the student in a closed session and complete the oral examination.

**Doctor of Philosophy in Systems Biology and Disease**

**Systems Biology and Disease**  
KAM B-16, MC 9031  
(323) 442-1475  
FAX: (323) 442-1199  
Email: dawnburk@usc.edu

*Director:* Alicia A. McDonough,  
mcdonoug@usc.edu

*Participating Faculty:* School of Medicine faculty from both basic and clinical departments with research programs. Interested faculty from other schools including Pharmacy, Dentistry, Engineering and USC College are encouraged to petition to join participating faculty.

The goal of the Ph.D. program in Systems Biology and Disease (SBD) is to train investigators to develop strategies to implement and integrate the detailed information gained from cellular, molecular and genetic advances into studies of normal system function as well as studies of how and why systems are disrupted in disease.

The program applies a multidisciplinary approach to understanding the human organism as a whole. Breadth of interests and training are major features of this track and wide and varied skills in many research areas characterize the faculty. To facilitate application of multidisciplinary approaches, close and regular contact between participating faculty and students is a major theme of the Ph.D. track.

*Admission Requirements*

Students routinely enter the SBD program after completing their first year in the interdisciplinary Ph.D. Programs in Biomedical and Biological Sciences (PIBBS) year 1 program (instructions to apply below), through the M.D./Ph.D. program or after completing one year in a related basic science department. A baccalaureate degree in life sciences or sufficient courses in mathematics and the life sciences is required to provide a strong background for studies in biomedical research. Appropriate undergraduate degrees would be biology, physiology, engineering, chemistry or computer science. Successful applicants must have satisfactory performance on the general and advanced portions of the GREs and three letters of recommendation. Previous research experience in a related field is expected but not required. Applicants who are accepted with minor deficiencies are expected to correct these during the first year.

Students enter the systems biology and disease program only after being accepted into a laboratory for graduate work, usually in their second year through the PIBBS program after completing research rotations, through the M.D./Ph.D. program or through a department-based program. Students may petition the systems biology and disease program executive committee for entrance before the second year if they have been accepted into a lab.

Online application to PIBBS is available at: [www.usc.edu/pibbs](http://www.usc.edu/pibbs). Additional information can be obtained from the PIBBS program, Office of Graduate Affairs, University of Southern California Keck School of Medicine, KAM B-16, 1975 Zonal Ave., Los Angeles, CA 90089-9031; email [pibbs@usc.edu](mailto:pibbs@usc.edu).

#### *Degree Requirements*

These degrees are awarded under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section, page 86, and the Graduate School section, page 97, of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

#### *Advisory Committee*

Students will be advised before their qualifying exam by the PIBBS program director and the systems biology and disease mentor. The purpose of the executive committee is to help students in the selection of courses, selection of research rotations and, ultimately, a mentor and laboratory, to monitor students' progress, and to ensure preparation for the screening procedure at the end of the first year.

#### *Course Requirements*

A minimum of 60 units is required, consisting of formal courses, seminars and research credits. At least 24 of the 60 units are to be formal graduate course work (lecture or seminar courses). Students must complete 16 units of course work before they are considered for the screening procedure. Additional course work relevant to the research interests of the student may be required by the student's guidance committee or by the student's academic adviser in addition to the required 24 units.

#### *Lab Rotations*

During the first year in PIBBS, students sign up for BIOC 790 Research (4 units each semester), and rotate through the labs of three mentor members of the program (potential research advisers). By the first

summer of graduate study, but no later than after 18 months in the program, each student is expected to have selected a research adviser.

In the first year, in addition to lab rotations, students are also required to take two, four-unit graduate-level courses each semester including one in each of the following areas: biochemistry, cell biology, molecular genetics, systems physiology and disease, or pathology. Substitutions are possible, with approval of the executive committee if a student has already completed advanced course work in one or more of these areas. Suggested courses are provided in the list below. During summer term all students take an ethics class: INTD 500 Ethics and Accountability in Biomedical Research. For these required courses, opting out, delaying or substituting a class requires the approval of the advisory committee of the program.

SUGGESTED COURSES		UNITS
<i>Biochemistry</i>		
BISC 502a	Molecular Genetics and Biochemistry	4
INTD 571	Biochemistry	4
<i>Cell Biology</i>		
INTD 531	Cell Biology	4
<i>Molecular Genetics</i>		
BISC 502b	Molecular Genetics and Biochemistry	4
INTD 561	Eukaryotic Molecular Genetics	4
<i>Systems Physiology and Disease/Pathology</i>		
INTD 550	Introduction to Pathology	2
INTD 551	Pathobiology of Disease	4
INTD 572	Systems Physiology and Disease I	4
INTD 573	Systems Physiology and Disease II	4
<i>Ethics</i>		
INTD 500	Ethics and Accountability in Biomedical Research	4

In the second year, courses are selected with the approval of the student's guidance committee with reference to the research area in which the student is working. By the end of the second year all students are required to complete both INTD 572 Systems Physiology and Disease I and INTD 573 Systems Physiology and Disease II. Completion of both INTD 550 (2) and

INTD 551 (6) can be substituted for either INTD 572 or INTD 573. In the second and subsequent years, students are required to take INTD 574 Systems Biology and Disease Seminar. Participation in an organized journal club or working group recognized by the executive committee is required each year. Within the first two years, each student must take a statistics course: PM 510L Principles of Biostatistics or equivalent.

#### *Screening Procedures*

At the end of the first year, each student is required to pass a screening procedure based on the first year's required courses submitted by reports from the Systems Biology and Disease faculty to the executive committee. This is intended to expose any weaknesses in the student's abilities. Progress must be judged satisfactory in two areas: maintain satisfactory performance in course work, and satisfactory completion of all research rotations.

#### *Qualifying Examination*

The qualifying examination, taken at the end of the second year, is administered by the guidance committee, should demonstrate a conceptual grasp of the major area of interest chosen and an understanding of the general framework and approaches of hypothesis-driven research.

#### *Annual Research Appraisal*

After advancing to candidacy, progress on dissertation research by each student is evaluated annually with an Annual Research Appraisal (ARA).

#### *Dissertation*

At the last ARA before the defense of the dissertation, the student submits an outline draft to the dissertation committee.

#### *Defense*

An acceptable dissertation based upon completion of an original investigation is required. The candidate must defend an approved draft of the dissertation in a public oral defense. The dissertation committee will then meet with the student in a closed session and complete the oral examination.

## Courses of Instruction

### INTERDEPARTMENTAL (INTD)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**INTD 500 Ethics and Accountability in Biomedical Research (1, 5m)** The purpose of this course is to engage current (and potential) research trainees in discussions about the responsible conduct of science. The course is designed as an option for meeting current federal regulations which require that all predoctoral and postdoctoral fellows paid from federal contracts and grants have a component of ethical training. Graded CR/NC.

**INTD 501 Recent Advances in Vision Science (1, max 4, FaSp)** Recent advances in the understanding of the ocular surface are reported and discussed; students will learn how to read papers critically, develop speaking skills to explain a research paper and attend a three-day workshop on NIH proposal development and scientific manuscript preparation. Graded CR/NC.

**INTD 504 Molecular Biology of Cancer (4, 2 years, Sp)** Epidemiology, pathobiology, carcinogenesis, tumor biology and heterogeneity; retroviruses, oncogenes, cell cycle control, genetics of cancer, tumor immunology; treatment strategies.

**INTD 522 Infection and Host Responses (4, Sp)** Overview of microbes, their life cycles and the host response they elicit, evade or exploit, including the manipulation and the malfunction of the immune system.

**INTD 531 Cell Biology (4, Fa)** Current perspectives on major research areas in cell biology. Emphasis will be on in-depth examination of cellular structures, regulatory processes, intra-cellular routing and targeting, and cell/environmental interactions.

**INTD 535 Continuing Introduction to Clinical Medicine for M.D./Ph.D. Students (1, FaSp)** Course for M.D./Ph.D. students in Ph.D. years designed to allow maintenance and improvement of clinical skills prior to re-entry in clinical rotations in the Year III medical curriculum. Open only to medical students who have completed Years I and II. Graded CR/NC.

**INTD 537 The Structure of Scientific Revolutions in Molecular Biology (1, Irregular)** A course in how scientists make breakthrough discoveries and whether there are predictable ingredients for significant changes in perception of the living system. Open only to graduate-level students in any of the biological sciences. *Recommended preparation:* one year in cell and molecular biology.

**INTD 549 Protein Chemistry – Structure and Function (4, Sp)** Chemistry of peptides and proteins; protein structure and folding; molecular basis of protein action. (Duplicates credit in former BIOC 549.) *Prerequisite:* general biochemistry.

**INTD 550 Introduction to Pathology (4, Fa)** Normal histology and introduction to basic pathological concepts. Provides a solid and basic understanding of normal structures and how they relate to function.

**INTD 551 Pathobiology of Disease (4, Sp)** Relationship between histopathological and clinical manifestations of disease and their underlying molecular mechanisms. Topics include inflammatory, developmental, environmental, degenerative, and neoplastic disease processes. *Prerequisite:* INTD 550.

**INTD 555 Biochemical and Molecular Bases of Disease (4)** Biochemical and molecular abnormalities in disease states. *Prerequisite:* general biochemistry.

**INTD 561 Molecular Genetics (4, Sp)** Prokaryotic and eukaryotic molecular genetics: DNA and RNA structure and function; biochemistry and molecular biology of replication, transcription, RNA processing, translation, and regulation of gene expression. (Duplicates credit in former BIOC 561.) *Prerequisite:* INTD 571.

**INTD 567 Molecular and Cellular Neurobiology (4)** (Enroll in NEUR 531)

**INTD 571 Biochemistry (4, Sp)** Physical-chemical basis of life processes: protein structure and enzyme function; synthesis and metabolism of carbohydrates, lipids, amino acids, and nucleotides. (Duplicates credit in former BIOC 441.) *Prerequisite:* open to qualified students.

**INTD 572 Systems Physiology and Disease I (4, Fa)** Mammalian organ systems operation during health, and pathophysiologic analysis of related diseases with focus on muscle, respiratory, cardiovascular and renal systems. Faculty from basic and clinical sciences. Open to graduate students in biomedical science only.

**INTD 573 Systems Physiology and Disease II (4, Sp)** Mammalian organ systems operation during health, and pathophysiologic analysis of related diseases with focus on neuroscience, immunology, metabolism, endocrine, reproduction, GI and liver. Faculty from basic and clinical sciences. Open to graduate students in biomedical science only.

**INTD 574 Systems Biology and Disease Seminar (1, max 16, FaSp)** Selected topics in systems biology and disease. Graded CR/NC. Open only to systems biology and disease Ph.D. students.

**INTD 620 Medical Students Elective Program (0)** Opportunities for medical students as preceptors in research laboratories or in field medical service under guidance of sponsors approved by faculty committees. Graded CR/NC.

**INTD 621ab Introduction to Clinical Medicine (ICM) for HTE (a: 3, Fa; b: 3, Sp)** A strongly patient-centered course in which both Ph.D. engineering and M.D. students experience how doctors handle communications, basic diagnostic thinking and engineering perspectives. Open only to Health, Technology and Engineering students. Graded CR/NC.

**INTD 622L Pre-clinical System Block for Health, Technology and Engineering (3-9, FaSp)** A three-to-nine week block of lectures and laboratories focused on particular body system (e.g., cardiovascular, renal, etc.). Open only to Health, Technology and Engineering students. Graded CR/NC.

**INTD 650 Stem Cell Biology and Medicine (4, Sp)** Basic principles, available embryonic and adult stem cells, principles of organogenesis and regeneration, animal models, delivery of engineered tissues to patients, promise and limitations of stem cells. Open to master's and Ph.D. students on the Health Sciences Campus and to medical and post-doctoral fellow trainees only. *Prerequisite:* INTD 531 or INTD 571.

## Master of Academic Medicine

**Keith Administration Building 211**  
 1975 Zonal Avenue  
 Los Angeles, CA 90033  
 (323) 442-2372  
 FAX: (323) 442-2051  
 Email: nyquist@usc.edu

*Program Director:* Julie G. Nyquist, Ph.D.

### Faculty

*Professors:* Donna Elliott, M.D., Ed.D. (*Pediatrics*); Win May, M.D., Ph.D. (*Pediatrics/Medical Education*); Julie G. Nyquist, Ph.D. (*Pediatrics/Medical Education*); Dwight Warren, III, Ph.D. (*Cell and Neurobiology*); Beverly Wood, M.D., Ph.D. (*Pediatrics/Medical Education*)

*Associate Professors:* Kathleen Besinque, Pharm.D., M.S.Ed. (*Pharmacy*); Jerry Gates, Ph.D. (*Family Medicine*); Win May, M.D., Ph.D. (*Pediatrics/Medical Education*)

*Assistant Professors:* Dixie Fisher, Ph.D. (*Pediatrics/Medical Education*); Lori Marshall, Ph.D., MSN (*Pediatrics*); Niurka Rivero, M.D. (*Pediatrics*); Maura Sullivan, Ph.D., MSN (*Surgery*); Janet Trial, Ed.D., CNM/MSN (*Obstetrics/Gynecology*); Samuel Yanofsky, M.D., M.S.Ed. (*Anesthesiology*)

The Master of Academic Medicine is offered by the Keck School of Medicine in collaboration with the Schools of Dentistry and Pharmacy. The goal is to develop leaders who will create and enhance academic and training programs for health care professions globally. Academic medicine is defined in broad terms as relating to those who lead training worldwide in medicine or in other health care related fields. Enacting this vision is possible due to the flexible delivery model selected. The program will employ a hybrid model, combining on-campus face-to-face sessions, blended with online course work. During the 32-unit program, the majority of sessions will be delivered using interactive online delivery methods. All students will also be on campus for one-week intensive sessions in the spring of each year, which focus on community building and the development and evaluation of skills.

The program addresses the unique population of medical and health professions faculty who are focused on leading the academic enterprise for health professionals at the undergraduate, graduate and continuing education levels. Our graduates will be positioned to guide future generations of health professionals around the world toward better

meeting the health needs of our global society. For those with a clear focus on the academic enterprise, a complementary degree in academic medicine offers the specialized skills needed to lead worldwide development of enhanced training for health professionals, increases professional capacity and provides new opportunity for promotion. The audiences for this degree will typically have primary professional degrees in health fields (e.g., M.D., DDS, DPT, R.N., MSN, P.A., DVM, D.O., Pharm.D., D.C., DOM). The Master of Academic Medicine will provide the needed complementary training for clinician educators.

### Admission

Applicants for admission to the Master of Academic Medicine program are generally expected to have an advanced degree in a health profession. Proof of graduation is required. For applicants who do not have a degree in a health profession, a bachelor's degree or its equivalent from an accredited institution is required, a grade point average of 3.0 (A = 4.0) is usually expected as well as satisfactory scores on the Graduate Record Examinations (GRE) General Test and three letters of recommendation. For specific information on admission and application procedures, contact the Office of Medical Education, (323) 442-2372.

Students are admitted for the academic year beginning in the fall, although those admitted prior to March 15 may enroll in summer courses. Although there is no formal application deadline, complete applications received before March 1 will be given priority. Application inquiries should be made to: Master of Academic Medicine Program, University of Southern California, Office of Medical Education, 1975 Zonal Avenue, KAM 211, Los Angeles, CA 90033, telephone (323) 442-2372.

### Satisfactory Academic Progress

A graduate GPA of at least 3.0 is required at all times. Any student whose graduate GPA falls below 3.0 will be placed on academic probation. Students on academic probation who do not raise their GPA to 3.0 after two semesters of written notification of academic probation will be academically disqualified.

A minimum of 32 units of graduate-level course work is required.

### Degree Requirements

ACADEMIC COURSES (26 UNITS)		UNITS
ACMD 501	Introduction to Academic Medicine Worldwide	3
ACMD 502	Becoming a Leader in Academic Medicine Worldwide	3
ACMD 503	Leading Change in Academic Medical Centers	3
ACMD 511	Competencies in Academic Medicine and Health I	3
ACMD 512	Competencies in Academic Medicine and Health II	3
ACMD 513	Professionalism in Academic Medicine and Health	3
ACMD 514	Accreditation and Program Evaluation in Academic Medicine	3
ACMD 591	Designing Research on Innovations in Academic Medicine	2
ACMD 592	Implementing Research on Innovations in Academic Medicine	2
ACMD 598	Fieldwork: Designing Innovations for the Health Professions	1
<b>Electives (6 units)</b>		
Six units of electives may be selected from the recommended courses below, or these may be replaced with approved courses at the 500 level or within USC that equal 6 units.		
ACMD 593	Foundations of Scholarly Writing in Academic Medicine	1
ACMD 598	Fieldwork in Designing Innovations for the Health Professions	1-2
ACMD 604	Supporting the Educational Enterprise in Academic Medicine	3
ACMD 605	Faculty Development for Health Sciences Faculty Educators	2
ACMD 615	Maintenance of Competence in the Health Professions	2
INTB 603	Systematic Approach to Scientific Writing	2
MPTX 517	Structure and Management of Clinical Trials	4
PM 513	Experimental Designs	3

## Courses of Instruction

### ACADEMIC MEDICINE (ACMD)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**ACMD 501 Introduction to Academic Medicine Worldwide (3)** Introduces the master's program; includes historical development of training in the health professions; current issues, challenges and opportunities in academic medicine and health worldwide.

**ACMD 502 Becoming a Leader in Academic Medicine Worldwide (3)** Current approaches to leadership within the context of global academic medicine and health professions education; individual applications, group dynamics, teamwork, and interpersonal skill enhancement.

**ACMD 503 Leading Change in Academic Medical Centers (3)** Exploration and practice of skills for promoting programs within academic medicine and health professions' education; building trust, organizational change, conflict resolution, negotiation, and managing resources.

**ACMD 511 Competencies in Academic Medicine and Health I (3)** Acquisition of cognitive knowledge and problem-solving skills in health professions worldwide; instructional methods, assessment techniques, designing curricula for health professions education.

**ACMD 512 Competencies in Academic Medicine and Health II (3)** Learning theory, teaching methods, assessment techniques related to acquisition and reinforcement of competencies related to patient care, practice-based learning and improvement and systems-based practice.

**ACMD 513 Professionalism in Academic Medicine and Health (3)** Acquisition and evaluation of interpersonal and communication skills and professionalism including ethics and cultural competence; within the context of health care disparities and health initiatives.

**ACMD 514 Accreditation and Program Evaluation in Academic Medicine (3)** Evaluating health professions training programs within guidelines of relevant accreditation organizations; models of evaluation, designing plans and tools for evaluation of program elements.

**ACMD 591 Designing Research on Innovations in Academic Medicine (2)** Introduction to design and scholarly review of innovations in health professions education; needs assessment, problem selection, use of research methods to study an innovation.

**ACMD 592 Implementing Research on Innovation in Academic Medicine (2)** Mentored research on an innovation in academic medicine leading to the master's degree. The project will result in a formal written research report. *Prerequisite:* ACMD 591.

**ACMD 593 Foundations of Academic Writing (1)** Academic writing for conference papers, grant proposals and journal articles. *Recommended preparation:* A completed study of an innovation in academic medicine or other health-related field that is ready to move to publication.

**ACMD 598 Fieldwork: Designing Innovations for the Health Professions (1-3, max 3)** Individual projects designing curricular or other innovations for the home program as an application of Year 1 concepts and as part of the capstone experience. *Prerequisite:* ACMD 591.

**ACMD 604 Supporting the Educational Enterprise in Academic Medicine (3)** Explores support functions in academic medical centers and health professions schools; financial, scientific, educational, faculty and student affairs departments, and offices of medical education.

**ACMD 605 Faculty Development for Health Sciences Faculty Educators (2)** Role of faculty development programs in health professions schools; tools for delivering effective continuing education and faculty development; models for mentoring clinical faculty.

**ACMD 615 Maintenance of Competence in the Health Professions (2)** Maintenance of competence and continuing professional development (CPD) of physicians and other health care professionals; trends, needs, strategies, assessing outcomes, examining effectiveness of CPD programs.

## Master of Science in Global Medicine

Keith Administration Building 317  
1975 Zonal Ave.  
Los Angeles, CA 90033  
Tel: (323) 442-3141  
FAX: (323) 442-1766  
[www.usc.edu/msgm](http://www.usc.edu/msgm)

*Program Directors:* Elahe Nezami, Ph.D.; Allan Abbott, M.D.

The Master of Science in Global Medicine is offered by the Department of Educational Affairs of the Keck School of Medicine. The program aims to train medical, dental and pharmacy students; current physicians and allied health professionals; and those planning to pursue degrees in the allied health professions to analyze and address critical issues in global medicine. The program provides a solid foundation in basic science

while also exposing students to a broad scope of pertinent issues in global medicine. Physicians and current medical students may use previous equivalent course work for 8 units of credit toward GM 503L Core Principles System I and GM 504L Core Principles System II course requirements.

By providing the knowledge and training necessary to address current and future global medical challenges, the M.S. in Global Medicine program responds to the Institute of Medicine's recommendation that the education of health professionals include course work that promotes literacy in global medicine. In addition to gaining a strong medical science foundation, students are immersed in course work that examines methods used to create innovative programming, solutions and

responses to global health challenges, thereby furnishing them with the problem-solving skills and analytical frameworks essential to their future career paths. Through partnerships with the Marshall School of Business and the Viterbi School of Engineering, the M.S. in Global Medicine also includes a management track for students who intend to pursue international health management.

Upon completion of the M.S. in Global Medicine, students will be equipped to serve as leaders within the allied health field, including, but not limited to: medicine, pharmacy, dentistry and nursing. In addition, graduates will be prepared to collaborate with or seek employment from a variety of international aid, nonprofit, and global health organizations

such as: the United Nations, the International Red Cross, United Nations Joint Programme on HIV/AIDS, United Nations Children’s Fund, World Health Organization, World Bank and the Centers for Disease Control and Prevention.

**Admission**

Applicants for admission to the program must have a bachelor’s degree or its equivalent from an accredited institution and have earned a GPA of 3.0 (A = 4.0) in undergraduate work. Prerequisite undergraduate course work must include one year of general biology, one year of general chemistry, one year of organic chemistry and one semester of calculus.

All applicants are required to have taken either the Graduate Record Examinations (GRE) General Test or the Medical College Admission Test (MCAT). A minimum score of 1000 on the GRE or 28 on the MCAT is required. Students must also supply three letters of recommendation from evaluators qualified to assess their potential for graduate work.

Applicants must supply a completed application for graduate studies including: transcripts from all institutions previously attended, standardized test scores and three letters of recommendation. Applications are considered for enrollment in both fall and spring semesters. For further information contact: Dr. Elahe Nezami, Master of Science in Global Medicine Program, 1975 Zonal Ave., KAM 317, Los Angeles, CA 90033, Tel: (323) 442-3141, Fax: (323) 442-1766.

**Advisement**

The program recommends that students meet with the academic adviser of the program each semester prior to registration.

**Satisfactory Academic Progress**

A graduate GPA of at least 3.0 is required at all times. Any student whose graduate GPA falls below 3.0 will be placed on academic probation. Students on academic probation who do not raise their GPA to 3.0 after two semesters of written notification of academic probation will be academically disqualified. A minimum of 32 units of graduate level course work is required for graduation.

**Degree Requirements**

**CORE COURSES (MINIMUM 14 UNITS) UNITS**

*Common Core*

GM 500	Basic Concepts in Global Health	4
GM 502	Global Epidemiology of Diseases and Risk Factors	4

*GM Core*

GM 503L	Core Principles System I	4
GM 504L	Core Principles System II	4

*GM Management Core*

GSBA 520	Business Fundamentals for Non-Business Professionals	3
IOM 582	Service Management: Economics and Operations	3

**ELECTIVE COURSES (MINIMUM 16 UNITS; GM MANAGEMENT TRACK STUDENTS MUST COMPLETE AT LEAST 12 GM ELECTIVES)\* UNITS**

*GM Electives*

GM 501	Critical Issues in Global Health	4
GM 510	Global Health Modules, Malaria	2
GM 511	Global Health Modules, Tuberculosis	2
GM 512	Global Health Modules, Maternal and Child Health I	2
GM 513	Global Health Modules, Maternal and Child Health II	2

GM 514	Global Health Modules, Tropical Diseases	2
GM 515	Global Health Modules, HIV/AIDS	2
GM 516	Cultural Competence in Health and Medicine	2
GM 517	Health and Human Rights	2
GM 521	Emerging and Re-emerging Infectious Diseases	2
GM 522	Human Hepatitis Viruses	2
GM 523	Global Toxicity and Carcinogenesis	2
GM 524	Grantwriting for Non-Government Organizations	2
GM 526	Alternative and Eastern Medicine: A Biomedical Approach	2
GM 535	Culture, Lifestyle, and Health	2
GM 550	Clinical Medicine and Healthcare Reform in Taiwan	2
GM 551	Clinical Medicine and Socioeconomic Factors in Uganda	2
GM 590	Directed Research	2, 4

*GM Management Track Electives*

MOR 569	Negotiation and Deal-making	3
MOR 470	Global Leadership	4
MKT 565	Global Marketing	3
ISE 507	Six-Sigma Quality Resources for Health Care	3
ISE 508	Health Care Operations Improvement	3

Note: On a case-by-case basis, GM students and GM Management students may take classes outside their particular group.

\*Students will take 8 units of electives that have a global focus, chosen in consultation with their adviser from among GM courses.

**Graduate Certificate in Global Medicine**

The certificate program in global medicine is for students who do not wish to pursue an M.S. degree in global medicine, but hope to pursue or expand careers in global health care. Students will study current topics in global health and health care, and will have a strong grounding in cultural competence, specific diseases, and creating and implementing health interventions in developing countries.

Students take 16 units of graduate course work that may not be used or have been used for any other degree or certificate program. These units include two core classes and eight units of electives, as follows:

**CORE COURSES UNITS**

GM 500	Basic Concepts in Global Health	4
GM 502	Global Epidemiology of Diseases and Risk Factors	4

**ELECTIVE COURSES:**

Students will take 8 units of electives, chosen in consultation with their adviser, from among all GM courses numbered 510 or above. For example, there are groups of courses relevant to women’s and family health; infectious diseases; health care in developing countries; working with diverse populations in the United States, etc.

## Courses of Instruction

### GLOBAL MEDICINE (GM)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**GM 500 Basic Concepts in Global Health (4, Fa)** Exploration of global health issues facing resource-poor societies; emphasizes contributing factors including behavioral and physiological bases, economic, social, and political context.

**GM 501 Critical Issues in Global Health (4, FaSpSm)** Evaluation of government and non-government organizations' new global health responses, and critical issues affecting global health including: environment, workforce conditions, obesity, nutrition, drugs, poverty.

**GM 502 Global Epidemiology of Diseases and Risk Factors (4, FaSpSm)** Survey of major populations' crises and risk factors accounting for global health challenges. Evaluation of case studies of global health interventions and effective methodologies.

**GM 503L Core Principles System I (4, Fa)** Introduction to basic medical concepts and biological system functions; examination of core principles of science and medical treatment.

**GM 504L Core Principles System II (4, Fa)** Continuation of concepts from GM 503L. Basic medical concepts and biological system functions; examination of core principles of science and medical treatment. *Prerequisite:* GM 503L.

**GM 510 Global Health Modules, Malaria (2, FaSp)** Critical issues in international control and treatment of malaria. Exploration of biological and epidemiological fundamentals of human-parasite interaction, including dynamics of transmission among populations.

**GM 511 Global Health Modules, Tuberculosis (2, FaSpSm)** Exploration of biological and epidemiological fundamentals of tuberculosis including dynamics of transmission among populations. Overview of clinical manifestations, diagnosis, and treatment of infections.

**GM 512 Global Health Modules, Maternal and Child Health I (2, FaSpSm)** Biopsychosocial, cultural and economic aspects of women's health: pregnancy, childbirth, marriage. Examination of health promotion and policy efforts to improve women's health globally.

**GM 513 Global Health Modules, Maternal and Child Health II (2, FaSpSm)** In-depth examination of women's health issues; health promotion and policy efforts to improve women's health globally.

**GM 514 Global Health Modules, Tropical Disease (2, FaSpSm)** Examination of prevalent tropical diseases: epidemiology, clinical manifestations, treatment, impact on economies of tropical countries. Key issues related to these diseases; World Health Organization responses.

**GM 515 Global Health Modules, HIV/AIDS (2, FaSpSm)** HIV epidemiology, basic biology of transmission and pathophysiology, associated opportunistic infections, and challenges to providing care in the developing world, including government responses.

**GM 516 Cultural Competence in Health and Medicine (2, FaSpSm)** Practical approach to the development of professional skills for providing culturally sensitive clinical health services to ethnically and linguistically diverse patients.

**GM 517 Health and Human Rights (2, FaSpSm)** The relationship between health and human rights, and the study of human rights issues relevant to healthcare professionals.

**GM 520 Medical Spanish for the Health Professions (2, FaSpSm)** Spanish language course for students planning to enter the health professions. Graded CR/NC.

**GM 521 Emerging and Re-emerging Infectious Diseases (2, FaSpSm)** Exploration of the threat of major worldwide epidemics and diseases with a focus on the recent emergence of new plagues.

**GM 522 Human Hepatitis Viruses (2, FaSpSm)** Human hepatitis and the viruses that cause them, how they are spread, symptoms, treatment, and prevention.

**GM 523 Global Toxicity and Carcinogenesis (2, FaSpSm)** Covers the occurrences of toxic substances and the toxicity/diseases they cause, and chemical carcinogens and the types of cancer they cause worldwide.

**GM 524 Grantwriting for Non-Government Organizations (2, FaSpSm)** Instruction on the process and methods of writing effective grants from identifying appropriate funders to implementing project upon receipt of funding award.

**GM 525 Global Mental Health (2, FaSpSm)** Examines the major mental health diagnoses from clinically relevant perspectives and their prevalence in specific geographical regions around the world.

**GM 526 Alternative and Eastern Medicine: A Biomedical Approach (2, FaSpSm)** Exploration of issues of complementary and alternative medicine (CAM) and traditional Eastern medical views of health and illness from a Western biomedical perspective.

**GM 530abc Foundation of Medicine: Anatomy, Physiology, and Pathology (4-4-4, FaSpSm)** *a:* Fundamentals of physiology, chemistry, anatomy, biochemistry and microbiology, as well as pharmacological issues, mathematical basis of lab instruments or techniques, and computational modeling. *b:* The basics of human anatomy (gross anatomy, histology, radiographic anatomy), physiology (cellular physiology, organ system areas) and pathology (general, systemic, cellular pathology). *c:* Continues material from GM 530*a* and GM 530*b*, covering human anatomy (gross anatomy, histology, radiographic anatomy), physiology (cellular physiology, organ systems) and pathology (general, systemic, cellular pathology).

**GM 535 Culture, Lifestyle, and Health (2)** Overview of national and international variations in health status indicators in regard to cultural and lifestyle differences.

**GM 550 Clinical Medicine and Healthcare Reform in Taiwan (2, Sm)** Two-week in-depth study abroad in Taipei, Taiwan, focused on understanding Taiwan's health care system, health priorities, and needs.

**GM 551 Clinical Medicine and Socioeconomic Factors in Uganda (2, Sm)** Two-week course that provides students with hands-on experience in clinical medicine/public health and exposure to the various socioeconomic factors impacting health in the developing world.

**GM 590 Directed Research (1-12)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**GM 597ab Health Technology Internship (2-2, FaSpSm)** Internship course on the use of new technology based on sensors and wireless communications to the health care industry. Open only to M.S., Electrical Engineering (Wireless Health Technology) students. Graded IP/CR/NC.

**GM 599 Special Topics (2-4, max 8)** Lecture and discussion focused on specific topics within global medicine. Course topic will vary from semester to semester.

## Department of Anesthesiology

**Nurse Anesthesia Program**  
1540 Alcazar Street  
Suite 205  
Los Angeles 90089-9012  
(323) 442-2037  
FAX: (323) 442-1701  
Email: [uscnap@usc.edu](mailto:uscnap@usc.edu)  
[keck.usc.edu/nurse-anesthesia](http://keck.usc.edu/nurse-anesthesia)

*Program Director:* Michele E. Gold

*Associate Program Director:* Teresa Norris

*Assistant Program Director of Clinical Services:*  
Kären Embrey

### Faculty

*Chair and Professor:* Philip Lumb

*Professor of Pediatrics and Anesthesiology:*  
Randall Wetzel

*Professors of Clinical Anesthesiology:*  
Mary Joseph; Ronald Katz; Vladimir Zelman

*Associate Professors of Clinical Anesthesiology:*  
Jack Berger; Jeffrey Lee; Rajesh Patel; David Raphael; Earl Strum

*Assistant Professors of Clinical Anesthesiology:*  
Rudolfo Amaya; Dimiter Arnaudov; Armin Azad; Maxim Benbassat; Martin Bohorquez; Kari Cole; James Daniel; Barbara Gasior; Gligor Gucev; Samuel Yanofsky

*Instructors of Clinical Anesthesiology:* Roberta Ashley; Deborah Avnet; Brindusa Bauer; James Carey; Jennilyn Casalme; Carey Catania; Johnny Cheng; Nancy Christiano; Geoffrey Edwards; Judy Franco; Charlotte Garcia; Sarah Giron; Elizabeth Glazer; David Godden; Heather Hamza; Jennifer Hogan; Robert Horn; Dina Hunt; Monique Jabbour; Kim Jones-Tang; Rory Keenan; Cathy Kiem; Benjamin Lindsey; Victoria McKinzie; Arthur Norcliffe; Nilu Patel; Margaret Oliveto; Robert Olson; Patty Paik; Erin Peters; Gabriel Punsalan; Ilene Richards; Joseph Sammut; Hil Tantoco; Rhona Wang; Kelly Zhou

The nurse anesthesia program prepares qualified nurses in the specialty of nurse anesthesia and qualifies the graduate to sit for the certification examination given by the Council on Certification of Nurse Anesthetists. The graduate attains a high level of clinical competence with an extensive body of didactic knowledge relevant to the specialty and advanced practice nursing. The mission of the USC Program of Nurse Anesthesia is scholarly education and professional development of future nurse anesthetists with the academic strength and leadership skills to advance our profession.

Students enrolling in the M.S., Nurse Anesthesia course of study must complete the nurse anesthesia core curriculum and specialty practicum. The program consists of 45 to 49 units and is completed in 24 months of continuous enrollment (six semesters). There is an optional one-semester clinical fellowship offered in the seventh semester of enrollment to provide specialty training in a clinical area of choice: critical care, cardiovascular, neurosurgical, ambulatory anesthesia or pain management. Students may sit for the certification examination during this semester.

The program is based in the Department of Anesthesiology, and classroom instruction is provided by nurse anesthesia program faculty and faculty from the Department of Anesthesiology, the Department of Physiology and Biophysics, and the Department of Cell and Neurobiology within the Keck School of Medicine, as well as clinical faculty from the program clinical sites. Clinical training occurs at Los Angeles County + USC Medical Center, Keck Hospital of USC, Harbor-UCLA Medical Center, Long Beach Veterans' Administration Medical Center and West Los Angeles Veterans' Administration Medical Center for the primary rotations. Advanced rotations occur at those sites, as well as Cedars-Sinai Medical Center, Children's Hospital of Los Angeles, Hallmark Pain Management and Surgery Center, and UCLA Medical Center.

### Master of Science (in Nurse Anesthesia)

General requirements for admission include a minimum 3.0 undergraduate grade point average, a minimum score on the verbal and quantitative sections of the Graduate Record Examinations of 1000 (or the equivalent score on the GRE after September 2011), current licensure as a Registered Nurse, a bachelor's degree in nursing or a related field from an accredited university or college, submission of an essay describing the applicant's career goals, professional resume and three letters of reference.

Competitive applicants will be interviewed and must demonstrate an acceptable understanding of the role and responsibilities of certified registered nurse anesthetists. Selections are made on the basis of the formal interview and consideration of a variety of factors that include academic record, type and amount of clinical experience and professionalism.

### Academic and Scientific Prerequisites

The admission requirements also include appropriate undergraduate course work in biology, anatomy, physiology, chemistry, biochemistry, physics and statistics (or nursing research). A minimum of one year of experience in critical care nursing as a registered nurse is required. Licensure as an RN in California and current BCLS, ACLS and PALS certifications are required prior to enrollment. Conversational Spanish is strongly recommended.

### Computer Skill Requirements

During the program, students must have a personal computer or notebook with Internet access and a PDA. The primary mode of program communication is email. Computer accounts are provided by the university to all students and can be activated online.

### Advisement

Prospective students should contact the program's admission office, (323) 442-2037 or [uscnap@usc.edu](mailto:uscnap@usc.edu) for evaluation of previous course work and clinical background.

**Admission**

Admission procedures follow the information in the USC Graduate School section of this catalogue. Admission standards for the USC nurse anesthesia program are established jointly by the Keck School of Medicine, the USC Graduate School and the Department of Anesthesiology. Interested students should apply online at [www.usc.edu/admission/graduate/apply](http://www.usc.edu/admission/graduate/apply). Additional admissions requirements and the supplemental application must be obtained from the nurse anesthesia program and can be requested through email at [uscnap@usc.edu](mailto:uscnap@usc.edu) or accessed at [keck.usc.edu/nurse-anesthesia](http://keck.usc.edu/nurse-anesthesia).

DEGREE REQUIREMENTS		UNITS
<i>Academic Courses</i>		
ANST 500	Human Anatomy	3
ANST 501	Pharmacology of Anesthesia Practice	4
ANST 502	Principles of Nurse Anesthesia Practice	4

ANST 503	Advanced Pharmacology of Anesthesia Practice	3
ANST 504	Pathophysiology Related to Anesthesia Practice	4
ANST 506	Advanced Principles of Nurse Anesthesia Practice	4
ANST 508	Research: Investigative Inquiry	2
ANST 510	Professional Aspects of Nurse Anesthesia	3
ANST 512	Research Integration: Capstone Experience	1
INTD 572	Systems Physiology and Disease I	4

*Residency Courses*

ANST 505	Clinical Residency in Nurse Anesthesia I	3
ANST 507	Clinical Residency in Nurse Anesthesia II	2
ANST 509	Advanced Clinical Residency in Nurse Anesthesia I	3

*Optional Course*

ANST 514	Specialty Fellowship	2
----------	----------------------	---

All students will take the Self-Evaluation Examination (SEE) administered by the Council on Certification of Nurse Anesthetists at the end of the first clinical year. Student scores must be above the national mean for advancement into the research capstone experience.

## Courses of Instruction

### ANESTHESIOLOGY (ANST)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**ANST 500 Human Anatomy (3, Fa)** Lectures and laboratory simulation in anatomy emphasizing structure and function of major organs to include brain, cardiovascular, lungs, liver, kidneys and musculoskeletal system. Open to nurse anesthesia students only.

**ANST 501 Pharmacology of Anesthesia Practice (4, Fa)** Pharmacokinetic and pharmacodynamic principles, uptake and distribution of inhalational anesthetics, and pharmacology of respiratory and cardiovascular drugs. Application of pharmacologic principles to anesthetic management. Open to nurse anesthesia students only.

**ANST 502 Principles of Nurse Anesthesia Practice (4, Fa)** Basic theory of anesthesia administration, preanesthetic assessment, physical examination, monitoring. Case management including airway and blood/fluid management, anesthesia machine, and postoperative pain. Lecture/case study format. Open to nurse anesthesia students only.

**ANST 503 Advanced Pharmacology of Anesthesia Practice (3, Sp)** Pharmacokinetic/pharmacodynamic principles of drugs covering different organs systems (CNS, hematology, endocrine), herbal therapies, chemotherapeutics, and antimicrobials. Application of pharmacology to anesthetic management using problem-based learning. *Prerequisite:* ANST 501, ANST 502.

**ANST 504 Pathophysiology Related to Anesthesia Practice (4, Sp)** In-depth study of cardiovascular, respiratory, renal, liver, endocrine and neuropathophysiology with application of these principles to anesthetic case management using problem-based learning. *Prerequisite:* ANST 501, ANST 502.

**ANST 505 Clinical Residency in Nurse Anesthesia I (3, Sp)** Correlation of techniques of anesthesia administration with application of scientific and pharmacologic theory in the clinical setting with observation and supervised clinical residency. *Prerequisite:* ANST 501, ANST 502.

**ANST 506 Advanced Principles of Nurse Anesthesia Practice (4, Sm)** Advanced theory of anesthesia management for general and specialized procedures, diagnostic procedures, pediatrics and obstetrics. *Prerequisite:* ANST 503, ANST 504, ANST 505.

**ANST 507 Clinical Residency in Nurse Anesthesia II (2, Sm)** Correlation of techniques of anesthesia administration with application of scientific and pharmacologic theory in the clinical setting with observation and supervised clinical residency. *Prerequisite:* ANST 505.

**ANST 508 Research: Investigative Inquiry (2, Fa)** Utilization of research, which includes the evaluation of research, problem identification within the practice setting, awareness of practice outcomes and the clinical application of research. *Prerequisite:* research course, basic statistics.

**ANST 509 Advanced Clinical Residency in Nurse Anesthesia I (3, Fa)** Correlation of techniques of anesthesia administration with application of scientific and pharmacologic theory expanded to geriatric, obstetrical, and pediatric anesthesia; anesthetic management to include medically compromised patients. *Prerequisite:* ANST 506, ANST 507.

**ANST 510 Professional Aspects of Nurse Anesthesia (3, Fa)** Emphasis on the professional components of nurse anesthesia practice including socialization, regulation, culture, ethics, law, employment, advocacy, and contemporary practice issues. Open to nurse anesthesia students only.

**ANST 511 Advanced Clinical Residency in Nurse Anesthesia II (4-8, Sp)** Correlation of techniques of anesthesia administration with application of scientific and pharmacologic theory expanded to neuroanesthesia, cardiac anesthesia, trauma anesthesia, critical care and pain management. Open to nurse anesthesia students only. *Prerequisite:* ANST 509.

**ANST 512 Research Integration: Capstone Experience (1, Sm)** A capstone course requiring students to demonstrate ability to integrate theory, research and practice through a mentored research experience with direct relevance to graduate specialization. Open to nurse anesthesia students only.

**ANST 513 Advanced Clinical Residency in Nurse Anesthesia III (1, Sm)** Correlation of advanced techniques of anesthesia administration with application of scientific and pharmacologic theory in diverse specialty anesthesia rotations. *Prerequisite:* ANST 511.

**ANST 514 Specialty Fellowship (2, Fa)** Optional internship to develop advanced skills and critical assessment of anesthesia specialty or clinical research. Graded CR/NC. *Prerequisite:* ANST 513; graduate of an accredited nurse anesthesia program.

**ANST 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree in nurse anesthesia. Maximum units which may be applied to the degree to be determined by the department. Open to nurse anesthesia majors only. Graded CR/NC. *Prerequisite:* ANST 508.

**ANST 591 Special Projects (1-4, max 4, FaSpSm)** Supervised learning in functional and/or clinical area of focus reflecting current trends and development in the field of nurse anesthesia. Open to nurse anesthesia majors only. Graded CR/NC.

## Department of Biochemistry and Molecular Biology

### Faculty

Michael R. Stallcup, *Chair and Professor of Biochemistry and Molecular Biology*

Zoltan A. Tokes, *Vice Chair for Doctoral Education and Master of Science Program*

Joseph G. Hacia, *Vice Chair for Medical Education*

*Catherine and Joseph Aresty Chair in Urologic Research:* Chih-Lin Hsieh

*Ralph Edgington Chair in Medicine:* Zea Borok

*Judy and Larry Freeman Chair in Basic Science Research:* Amy S. Lee

*H. Leslie Hoffman and Elaine S. Hoffman Chair in Cancer Research:* Peter A. Jones

*William M. Keck Chair in Biochemistry and Molecular Biology:* Peggy Farnham

*J. Harold and Edna L. LaBriola Chair in Genetic Orthopaedic Research:* Baruch Frenkel

*Rita and Edward Polusky Chair in Basic Cancer Research:* Michael Lieber, Ph.D., M.D.

*Provost Professor of Medicine and Pharmacy:* Michael Kahn

*Professors:* N. Arnheim (*Biological Sciences*); Z. Borok (*Medicine*); E. Cadenas (*Molecular Pharmacology and Toxicology*); P.V. Danenberg; Y.A. De Clerck (*Medicine*); R. Farley (*Physiology and Biophysics*); P. Farnham; B. Frenkel (*Orthopaedics*); C.L. Hsieh (*Urology*); D. Johnson; P.A. Jones (*Urology*); M. Kahn; V.K. Kalra; R. Langen; A.S. Lee; D. Levy; M. Lieber (*Pathology*); F.S. Markland, Jr.; R.E. Maxson; M.E. Nimni (*Pediatrics*); P. Patel; D. Polk (*Pediatrics*); P. Roy-Burman (*Pathology*); M.R. Stallcup; Z. Tokes; A. Warshel (*Chemistry*)

*Associate Professors:* W. An; P. Cannon (*Pediatrics*); I.S. Haworth (*Pharmacy*); J. Hacia; Y. Hong (*Surgery*); I. Laird-Offringa (*Surgery*); P. Laird (*Surgery*); R.D. Mosteller; S. Reddy; J. Rice; H. Sucov (*Cell and Neurobiology*); T. Ulmer

*Assistant Professors:* R. Bajpai (*Dentistry*); S. Curran (*Bio-Gerontology*); M. Frey (*Pediatrics*); A. Kobiela (*Otolaryngology*); C. Lien (*Pediatrics*); A. Merrill (*Dentistry*); W. Lu

*Assistant Professors of Research:* T. Miki; S. Swenson; D. Weisenberger; S. Zhong

The USC Department of Biochemistry and Molecular Biology prides itself on maintaining a broad-based approach to various aspects of biochemical and molecular biological research. In 2010, the department received more than \$10 million in research funding for its primary faculty members.

Altogether, the department numbers 49 primary and joint-appointment faculty members, who conduct research in a variety of areas including: molecular biology and

genetics of development and cell differentiation; mammalian and human genetics; DNA methylation, replication, recombination and repair; membrane transport; kinetics and mechanism of enzyme action; protein structure-function interrelationships; carcinogenesis and cancer chemotherapy; and stem-cell biology.

The department also has major research programs in the molecular basis of control and regulation of gene expression, epigenetics, molecular mechanisms of signal processing and transduction, developmental and stem cell biology, detailed analysis of macromolecular structure and function, the biochemistry and molecular biology of the brain, and genetic medicine including gene therapy.

The department's exceptionally strong research into various aspects of the biochemistry and cell biology of cancer is internationally recognized. Ongoing research programs in this area include mechanism of action of cancer chemotherapeutic agents, tumor cell invasion and metastasis, and cancer cell epigenetics and gene regulation.

Many members of the department are members of the USC Norris Comprehensive Cancer Center, USC Institute for Genetic Medicine (IGM), USC Zilkha Neurogenetic Institute (ZNI), Eli and Edythe Broad CIRM Center for Regenerative Medicine and Stem Cell Research at USC, and Children's Hospital Los Angeles (CHLA).

The USC Norris Comprehensive Cancer Center maintains a microchemical core facility that includes capabilities for gas phase protein sequencing, amino acid analysis, peptide synthesis, DNA synthesis and sequencing.

The Institute for Genetic Medicine maintains a customized microarray core facility. Other facilities available to support the research of members of the department include mass spectroscopy, transgenic mice, flow-cytometry, biostatistics, microchemical resource for DNA, and protein sequencing and synthesis core facilities.

The primary offices and laboratories of the department are located on the Health Sciences Campus.

## Graduate Programs

### Admissions

The prerequisite for applicants to the graduate program in biochemistry and molecular biology is a bachelor's degree with an undergraduate major in one of the natural sciences. Undergraduate course work should have included organic chemistry, the physics and mathematics required of a chemistry major and some courses in the biological sciences. A course in general biochemistry is also required, but may be taken during the period of graduate study. Previous course work in physical chemistry is strongly recommended. A minimum GPA of 3.0 in the natural sciences (including mathematics) is normally required.

Applicants must pass satisfactorily the general portions of the Graduate Record Examinations. In addition, the department requires at least three letters of recommendation from faculty members who can evaluate the applicant's potential for graduate work and independent research.

Faculty members of the Department of Biochemistry and Molecular Biology participate in a variety of interdisciplinary Ph.D. programs. Students interested in pursuing a Ph.D. degree in the fields related to biochemistry, molecular and cellular biology, and genetics should apply to USC's Programs in Biomedical and Biological Sciences (PIBBS). Applications for the Ph.D. Programs in Biomedical and Biological Sciences should be submitted online through the PIBBS Website ([www.usc.edu/pibbs](http://www.usc.edu/pibbs)).

Applications should be submitted before the application due date specified on the PIBBS Website. Applications for the M.S. program in biochemistry and molecular biology can be obtained from the department at the address listed below. In addition to the university application, a supplemental departmental application must be completed and returned with transcripts, GRE scores and letters of recommendation to: Graduate Admissions Committee, Department of Biochemistry and Molecular Biology, 1333 San Pablo Street, Los Angeles, CA 90089-9151.

### Fellowships

Students admitted to PIBBS are awarded fellowships which pay for tuition and provide a stipend. No fellowships are available for master's degree students.

### Master of Science

The Department of Biochemistry and Molecular Biology offers a program for the Master of Science degree. The primary objectives of this program are to provide the necessary theoretical preparation for biochemical careers and to expose students to biochemistry and molecular biology related research activities culminating with the Master of Science degree. Goals of the program are to train students in preparation for (1) further doctoral study, (2) advanced biochemical research positions in industry and academia and (3) teaching positions at the community college level.

In general, admission requirements are the same as for the Doctor of Philosophy degree. The prerequisite for applicants to the graduate program in biochemistry is a bachelor's degree with an undergraduate major in one of the natural sciences. A minimum GPA of 3.0 in the natural sciences (including mathematics) is normally required. Applicants must satisfactorily pass the general and advanced (chemistry, or biology or molecular biology) portions of the Graduate Record Examinations. In addition, the department requires at least three letters of recommendation from faculty members who can evaluate the applicant's potential for graduate work and independent research. Demonstrated proficiency in the English language is required. Special circumstances may provide consideration for conditional admission.

The master's degree in biochemistry and molecular biology requires 34 units of elective graduate study to be determined by the student's Advisory Committee. Fourteen or more course units must be taken in biochemistry and molecular biology; eight units may be pursued outside the department. Students interested in the commercial aspects of biotechnology may take courses focusing on business entrepreneurship, finance, management and marketing in the Marshall School of Business. Master's students have the option of completing a research thesis allowing state-of-the-art laboratory-based investigation or a non-research-based theoretical thesis. Upon approval, a maximum of 10 units of directed research in biochemistry will be applied to the degree. Up to six units of graduate course work taken outside of USC may be applied toward the M.S. degree. Flexibility exists to plan each student's program to suit individual needs, ambitions and background.

### Master of Science, Molecular Epidemiology

A joint program with the Department of Preventive Medicine offers an M.S. degree in Molecular Epidemiology that requires 37 units of graduate study (see page 782 for course requirements). Students must also complete a master's thesis. Students can register for up to 10 units of master's research units. Interested students should contact Anne Rice ([annvazqu@usc.edu](mailto:annvazqu@usc.edu)) or the Department of Preventive Medicine.

### Ph.D. in Genetic, Molecular and Cellular Biology (GMCB) or Ph.D. in Systems Biology and Disease (SYBD)

Faculty members in the Department of Biochemistry and Molecular Biology participate in the GMCB and SYBD Ph.D. programs. For admission information and degree requirements, see GMCB (page 763) and SYBD (page 764).

### Doctor of Philosophy

The Department of Biochemistry and Molecular Biology offers graduate degree courses directed toward the Ph.D. degree in this discipline. The objective of this program is to prepare students for careers as independent investigators and instructors in biochemistry, molecular biology and related fields.

The program consists of both course work and research and is intended to provide students with a broad conceptual background as well as focused research training. The flexibility of the program is designed to meet the interests of individual students and to prepare them for specialization in any of the major subdivisions of biochemistry.

**Course Requirements** A total of 60 units of graduate credits is required for the Ph.D., including course work, research and dissertation units. At least 24 of these units must be from courses numbered 500 or higher; at least 12 of these units must be taken in biochemistry, while the remaining 12 units may be taken in various related disciplines. Students are expected to take the three seminar courses and additional courses may be required by the Graduate Advisory Committee or by the student's guidance committee. Students must complete all courses with a cumulative GPA of not less than 3.0 and must maintain this average in order to remain in the graduate program. Students are expected to spend full time during the academic year and summer on course work or research.

**Screening Procedure** The department's Graduate Advisory Committee, consisting of four faculty members, assesses the educational objectives and research interests of each student admitted to the graduate program. The committee then recommends a program of graduate courses and research suited to the individual student. The advisory committee

evaluates the student's performance throughout the first year and must approve the student's progress prior to his or her selection of a research adviser.

**Guidance Committee** To assist students in selecting their research advisers, doctoral students rotate through four research laboratories during their first year in the graduate program. By the first summer of graduate study, each student is expected to have selected a research adviser. Shortly afterward the student should form a five-member guidance committee. Members of the committee must include the student's research adviser, at least three faculty members from the Department of Biochemistry and Molecular Biology and at least one member from outside the department.

**Qualifying Examination** Students in the Ph.D. program must pass both the written and oral portions of a comprehensive qualifying examination on the major areas of biochemistry. The written portion consists of a comprehensive examination given annually, which must be passed before the oral portion can

be taken. The oral portion must be scheduled within three months of the successful completion of the written examination. The proposition will be focused on the student's dissertation research and is intended to test the student's depth and breadth of knowledge in his or her area of research. The student will be asked to prepare a short summary of the dissertation research proposal and submit it within two weeks of the oral defense. The oral examination consists of a defense of both propositions and can include questions dealing with the written examination and other areas of biochemistry. The oral examination will give applicants the opportunity to unravel complex problems and will also test their overall knowledge of biochemistry and molecular biology.

Recommendations for advancement to candidacy for the Ph.D. degree are made on the basis of the successful completion of these requirements and the student's maintenance of at least a 3.0 GPA. A student who has not been recommended for advancement to

candidacy at the end of three years will be terminated unless given permission to write a master's thesis and terminate graduate work with an M.S. degree.

**Dissertation and Oral Defense** The student's dissertation committee consists of the research adviser, one other member from the department and one member from outside the department. The dissertation must represent an original contribution to biochemistry and should indicate the ability of the student to undertake independent investigation. The defense of the dissertation includes the presentation of a seminar that is open to the public.

#### *Ph.D. in Molecular Epidemiology*

Faculty members in the Department of Biochemistry and Molecular Biology participate in the Molecular Epidemiology Ph.D. program. For admission information and degree requirements, see the Department of Preventive Medicine, page 795.

## Courses of Instruction

### **BIOCHEMISTRY (BIOC)**

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**BIOC 501 Recent Advances in Biochemistry (2-4, max 16, Fa)** Lectures on areas of intermediary metabolism and the chemistry of natural products. *Prerequisite*: BISC 435, CHEM 430*ab*.

**BIOC 502 Biochemistry Seminar (1, max 12, FaSp)** Formal presentations and discussion by students of material from research literature.

**BIOC 504 Molecular Biology of Cancer (4, Sp)** (Enroll in INTD 504)

**BIOC 510 Introductory Molecular Biology (2, Sp)** Principles of molecular biology with applications to the medical sciences. Nucleic acid structure, function, and analysis. *Recommended preparation*: a course in biochemistry.

**BIOC 512 Molecular Basis of Cell Proliferation and Differentiation (2, Irregular)** An advanced seminar course in molecular cell biology, discussing current literature with significant impact on the understanding of the cell cycle and differentiation of various cell types. *Recommended preparation*: basic cell biology and molecular biology. (Frenkel)

**BIOC 522 Applications of Physical Methods in Biochemistry (2, FaSp)** Applications of physical analytical methods commonly utilized in research in biochemistry and molecular biology. *Concurrent enrollment*: CHEM 521. (Langen)

**BIOC 531 Cell Biology (4)** (Enroll in INTD 531)

**BIOC 536 Molecular Biology of Cellular Communication in the Nervous System (2, Sp)** Discussion of cellular communications in the nervous system through neurotransmitters and their receptors, neuromodulators; biochemical changes during development and the impact of human genomic research. *Recommended preparation*: one year of general biochemistry or molecular biology. (Tokes)

**BIOC 542 Cellular and Molecular Basis of Animal Development (4, Fa)** Processes of cell type specification, determination, and morphogenesis in metazoans from vertebrates to insects. Genetic, paragenetic and molecular biological approaches to developmental processes. *Prerequisite*: INTD 571. (Maxson)

**BIOC 543 Human Molecular Genetics (4, Fa)** Comprehensive course covering basic principles of human genetics, genetic disease, the Human Genome Project, and gene therapy. *Recommended preparation*: undergraduate genetics. (Allayee)

**BIOC 551 Prokaryotic Molecular Genetics (4, Fa)** (Enroll in MICB 551)

**BIOC 555 Biochemical and Molecular Bases of Disease (4)** (Enroll in INTD 555)

**BIOC 561 Molecular Genetics (4, Sp)** (Enroll in INTD 561)

**BIOC 571 Biochemistry (4, Fa)** (Enroll in INTD 571)

**BIOC 573 Optimal Research Presentations by Ph.D. Students (1, max 12, FaSp)** Students will attend lectures by peers, and after their first year in the Ph.D. program, prepare and present their own research to an audience of faculty and peers. Open to Ph.D. students in Genetic, Molecular and Cellular Biology Program (GMCB), Biochemistry and Molecular Biology and Molecular Epidemiology only. Graded CR/NC. (Hong)

**BIOC 574 Systems Physiology and Disease II (4, Sp)** (Enroll in INTD 573)

**BIOC 590 Directed Research (1-10, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**BIOC 594abz Master's Thesis (2-2-0, FaSpSm)**  
Credit on acceptance of thesis. Graded IP/CR/NC.

**BIOC 599 Special Topics (2-4, max 8)**

**BIOC 601 Molecular Biology of Gene Regulation (2, max 8, FaSp)** Current techniques and systems in molecular biology from an interdisciplinary perspective: microbiological, biochemical, and pharmaceutical.

**BIOC 604 Current Topics in Animal Development (2, Sp)** (Enroll in CNB 604)

**BIOC 790 Research (1-12, FaSpSm)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**BIOC 794abcdz Doctoral Dissertation (2-2-2-0, FaSpSm)** Credit on acceptance of dissertation. Graded IP/CR/NC.

## Department of Cell and Neurobiology

**Bishop Medical Teaching and Research Building 401**  
1333 San Pablo Street  
Los Angeles 90089-9112  
(323) 442-1881  
FAX: (323) 442-3466  
Email: [cnb@hsc.usc.edu](mailto:cnb@hsc.usc.edu)

*Graduate Advisory Committee Chair:* Joel Schechter (323) 442-1862

### Faculty

*Professor and Chair:* Pat Levitt

*William M. Keck Chair in Medicine:* Martin Pera

*Provost Professor of Cell and Neurobiology, Pharmacology and Pharmaceutical Sciences and Psychology:* Pat Levitt

*Professors:* M. Fini; T.H. McNeill\*; M. Pera; J.E. Schechter\*; M. Snow; R. I. Wood\*; S.Y. Ying

*Associate Professors:* G.H. Albrecht\*; J. Chen; K. Eagleson; J.A. Garner\*; R. Gopalakrishna\*; J.D. Miller; P. Elyse Schauwecker; B.G. Slavin\*; H. Sucov\*

*Assistant Professors:* A. Bonnin; K. Chang; G. Crump; L. Ma; Francesca Mariani; H. Tao; B. Thompson; H. Wu; Q. Ying

*Associate Professor Clinical:* J.D. Miller\*

*Assistant Professor Clinical:* M. Winfield

*Adjunct Professor:* Vijaya Kumari

*Emeritus Professors:* D.A. Berman\*; Dwight Warren III

*Emeritus Associate Professor:* C.K. Haun\*

\*Recipient of university-wide or school teaching award.

The Department of Cell and Neurobiology provides interdisciplinary training in molecular, cellular and systems biology. Ongoing programs explore basic mechanisms in molecular and cellular neurobiology, neurogenetics, endocrinology, pharmacology, stem cell biology and vertebrate evolution. Disease-oriented research, bridging basic and clinical disciplines, investigates inherited or acquired disorders in vision, stroke, Parkinson's disease, Alzheimer's disease, epilepsy and steroid abuse. The challenge is to weld interdisciplinary activities into a conduit for transferring basic science discoveries into more effective and innovative clinical interventions in the treatment of disease-related disabilities.

The Department of Cell and Neurobiology has 34 primary faculty members, including 21 dual appointments in other university departments or research institutes.

The graduate program of the Department of Cell and Neurobiology is dedicated to excellence and state-of-the-art training and education in molecular and cellular aspects of normal function and in acquired or genetic disorders that cause human disease. Professional and intellectual development is fostered through a broadly based curriculum from which students can tailor a menu of specialization and by a supportive environment of faculty interactions. Graduate education is designed to prepare the student for a lifetime of learning, exploring the limits of research, teaching and creative activities.

### Master of Science and Certificate Program in Clinical, Biomedical, and Translational Investigations

Refer to page 760, for certificate and degree requirements.

### Cell and Neurobiology Graduate Program

The graduate program offered in cell and neurobiology provides a flexible, individualized course of study directed toward developing independent, resourceful scholars. The major thrust of this program is devoted to

students training for the Ph.D. degree but study toward the M.S. degree is also possible.

### Admissions

*Master of Science* The prerequisite for applicants to the M.S. graduate program in cell and neurobiology is a bachelor's degree with a science major or equivalent. Applicants should have a superior undergraduate record at an accredited college or university. Additional requirements include three letters of recommendation and satisfactory performance on the general and advanced (biology or chemistry) portions of the Graduate Record Examinations. Students are normally admitted for the academic year beginning in the fall; however admission to the master's program can begin in the spring semester with approval from the Graduate Admission Committee. Application deadline for the following academic year is January 1.

*Doctor of Philosophy* Doctoral candidates interested in working with CNB faculty in the areas of neural, computational, cognitive and behavioral science should apply through either of the two university wide interdisciplinary graduate programs at USC: the neuroscience graduate program or the Program in Biomedical and Biological Science (PIBBS). Applicants interested in working with CNB faculty as part of the M.D./Ph.D. program should apply directly to the Keck School of Medicine.

### Application deadlines:

M.D./Ph.D. program – American Medical College Application Service (AMCAS) – November 1; Supplemental – December 1

Neuroscience – January 15 (see Graduate School, page 97, for Ph.D. student funding deadline information)

PIBBS – December 15

*Master of Science*

The Master of Science degree is awarded for demonstrated competence in the cell biological sciences, broadly defined. Two options are available: (1) a non-thesis M.S. program based entirely on course work followed by a comprehensive examination; and (2) a thesis M.S. program that includes fewer courses but requires a written thesis based on original laboratory research. Students take courses both from the Department of Cell and Neurobiology and other departments to obtain a broad appreciation of structure and function. Students must maintain a minimum GPA of 3.0. The Master of Science candidate may engage in teaching if this is beneficial to the individual program.

Students in the non-thesis program must complete a minimum of 34 units of graduate level courses (500 or higher) beyond the baccalaureate degree.

Non-thesis students must take 16 units from the following list of courses: BISC 421, BME 552, BME 575L, BME 670, BME 671, CNB 501ab, CNB 511abL, CNB 512L, CNB 513, CNB 521, CNB 525, CNB 534, CNB 631, INTD 504, INTD 531, INTD 555, INTD 561, INTD 571, INTD 572, INTD 573, MICB 551, NEUR 524. All students must pass additional courses totaling 18 units. All course work must be approved by the student's graduate adviser and the chair of the graduate program.

Students in the thesis program must complete a minimum of 38 units of graduate level courses (500 or higher) beyond the baccalaureate degree.

The regulations for thesis students are the same as specified above, except the student is required to take only 12 units from the course list and an additional 16 units from other departmental or non-departmental courses. Students will also take 6 units of CNB 590. The thesis M.S. student is required to take at least 4 units of Master's Thesis (CNB 594). All course work must be approved by the student's graduate adviser and the chair of the graduate program.

*Doctor of Philosophy*

The Ph.D. student develops background knowledge in cellular, molecular and structural biological sciences. The objective of the Ph.D. program is rigorous, original research experience obtained by design and execution of a dissertation project. Active research areas for which guidance is available include

cell and molecular biology, neurobiology of circadian rhythms, visual neuroscience, neuropharmacology, neurodegenerative and neurogenetic diseases, developmental and cellular neuroscience, neuroendocrinology, reproductive endocrinology and evolutionary biology.

*Research Tool-Statistics*

Each student must demonstrate competence in statistics. The student must demonstrate competence in the theory and use of statistics including knowledge of regression, correlation and analysis of variance. A student who has prior experience in statistics should consult the faculty adviser and petition the Graduate Advisory Committee to waive the research tool requirement. This requirement may be fulfilled by obtaining a grade of B (3.0) or higher in specified courses. This requirement must be fulfilled before the qualifying examination.

*Course Requirements*

A minimum of 60 units of course credit is required for the Ph.D. Course requirements vary according to the specific needs of the student. Graduate students must take at least 16 units from the following list of courses: BISC 421, BME 552, BME 575L, BME 670, BME 671, CNB 501ab, CNB 511abL, CNB 512L, CNB 521, CNB 525, CNB 534, CNB 631, INTD 504, INTD 531, INTD 555, INTD 561, INTD 571, INTD 572, INTD 573, MICB 551, NEUR 524. Ph.D. students must take additional classes or research units totaling 44 units from other departmental or non-departmental courses. All course work must be approved by the student's graduate adviser and the chair of the graduate program.

Prior to the qualifying examination, each student must complete at least three, eight-week periods of introductory research in the laboratories of departmental faculty. The purpose of the laboratory rotations is to encourage one-on-one interactions between new students and departmental faculty while at the same time providing an introduction to research in a sampling of departmental laboratories.

Course work outside of the departmental offerings is often encouraged and may be required by the student's guidance committee. In most instances, a program will include extradepartmental courses such as physiology, biochemistry and molecular biology. A grade point average of at least 3.0 (A = 4.0) must be maintained in both departmental and overall course work.

*Communication Skills Requirement*

The department considers teaching experience to be an important part of graduate education. Students in the Ph.D. program are required to serve a teaching practicum during at least one semester of their graduate training.

*Screening Procedure*

The Graduate Affairs Committee conducts a screening for each student at the end of one full year in the program. The committee reviews thoroughly all facets of the student's performance in the graduate program. The student's progress must be judged satisfactory before a guidance committee can be nominated.

*Guidance Committee*

Students are expected to select a general area of research interest and a dissertation adviser as soon as possible but no later than 18 months after entering the graduate program in this department. The dissertation adviser and the Graduate Affairs Committee consult with the student to select a guidance committee. After the student has successfully completed the first-year screening, the guidance committee's nomination is forwarded to the Graduate School.

*Qualifying Examination*

Before the end of their fifth semester of graduate standing, students in the Ph.D. program must pass both the written and oral portions of a qualifying examination. The examination is intended to reveal the student's insight and understanding of general concepts and the ability to design and defend a dissertation research project. The examination is designed and administered by the student's guidance committee.

*Dissertation and Oral Defense*

After the student has passed the qualifying examination, a dissertation committee (commonly comprising the former guidance committee) is appointed to advise the student regarding the research project and to supervise writing of the dissertation. The dissertation must be an original contribution giving evidence of the student's ability to perform independent and innovative research. The final oral defense shall be open to the public and the dissertation adviser will entertain questions from the dissertation committee and assembled audience.

## Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

### CELL AND NEUROBIOLOGY (CNB)

**CNB 501ab Gross Human Anatomy (3-4, FaSp)** A complete dissection of the adult human body. Supplementary lectures and demonstrations. Emphasis on correlating development, structure and function.

**CNB 511abl Microscopic Anatomy (3-3, FaSp)** Lectures and laboratory in microscopic anatomy emphasizing embryonic origin of the basic body plan, cells, tissues, and organs; ultrastructural and functional correlations.

**CNB 512L Pharmacology I (5, Fa)** Actions, chemical properties, bodily distribution, and toxicology of drugs. Laboratory. (Duplicates credit in former PHNU 510L.)

**CNB 513 Pharmacology II (3, Sp)** Continuation of 512L. (Duplicates credit in former PHNU 511.) *Prerequisite:* CNB 512L.

**CNB 521 Neuroanatomy (3, Sp)** Structure and function of the human nervous system with emphasis on central conduction pathways, especially those of clinical significance.

**CNB 525 Neural Development (3, Fa)** Cellular, molecular, and physiological features of development and plasticity in the nervous system. Lecture and student presentations and discussion of classic and current research literature. *Prerequisite:* BISC 524; *recommended preparation:* background in neurosciences.

**CNB 530 Anatomy for the Artist (1-2, Irregular)** This course includes lectures and demonstrations of human anatomy specifically for the artist, and art instruction on drawing the human figure.

**CNB 531 Cell Biology (4, Fa)** (Enroll in INTD 531)

**CNB 534 Molecular Aspects of Neuropharmacology (2, FaSp)** Current advances in selected areas of molecular neuropharmacology, e.g., mechanisms by which drugs affect neurotransmitter systems, neural plasticity, treatment of neurological and psychiatric diseases.

**CNB 550 Cell and Neurobiology Seminar (1, max 6, FaSp)** Reports and discussion on recent advances in anatomy. Graded CR/NC. (Duplicates credit in former ANCB 550.)

**CNB 561 Molecular Genetics (4, Sp)** (Enroll in INTD 561)

**CNB 571 Biochemistry (4, Fa)** (Enroll in INTD 571)

**CNB 572 Systems Physiology and Disease I (4, Fa)** (Enroll in INTD 572)

**CNB 573 Systems Physiology and Disease II (4, Sp)** (Enroll in INTD 573)

**CNB 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**CNB 594abz Master's Thesis (2-2-0, FaSpSm)** Credit on acceptance of thesis. Graded IP/CR/NC.

**CNB 598 Introductory Laboratory Rotations (1-3, FaSp)** Introductory laboratory rotations wherein students are directed in individualized research, reading and discussion to provide perspective and supplemental background in areas of faculty research interests.

**CNB 599 Special Topics (2-4, max 8, FaSp)** Special topics provides background for instruction and research in the Department of Cell and Neurobiology through lectures, discussions, assigned readings, and student presentations. (Duplicates credit in former ANCB 599 and PHNU 599.)

**CNB 600 Literature Tutorial (1, max 3, FaSp)** Individualized readings and discussions culminating in a literature-review paper; to promote the acquisition of critical thinking skills in the evaluation of scientific problems. *Recommended preparation:* background in biological sciences.

**CNB 603 Current Topics in Vision Research (2, Sp)** Basic science (e.g., anatomy, cell biology, electrophysiology) and clinical aspects of the eye: cornea, lens, retina, and optic nerve. USC faculty and authorities from other institutions will lecture.

**CNB 604 Current Topics in Animal Development (2, 2 years, Sp)** Current research in selected aspects of mammalian and non-mammalian developmental biology, including the molecular genetics and molecular biology of organogenesis, morphogenesis, lineage specification, and differentiation. *Prerequisite:* INTD 561 and CNB 542.

**CNB 631 Morphogenesis and Regeneration (2, 2 years, Sp)** Analysis of developing and regenerating systems: historical and recent interpretations of morphogenetic movements, tissue interactions, fields, gradients, differentiation, and determination.

**CNB 641 Brain-Endocrine Interactions in Reproduction (2, 2 years, Fa)** Past and current experimental approaches to morphology and endocrinology at hypothalamic, pituitary, and gonadal levels in both males and females. *Prerequisite:* CNB 511abl or a general endocrinology course.

**CNB 790 Research (1-12, FaSpSm)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**CNB 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm)** Credit on acceptance of dissertation. Graded IP/CR/NC.

## Department of Family Medicine

**Division of Physician Assistant Studies**  
**Primary Care Physician Assistant Program**  
 1000 South Fremont Avenue  
 Unit 7, Building A11, Room 11-150  
 Alhambra, CA 91803  
 (626) 457-4240  
 FAX: (626) 457-4245  
 Email: [uscpa@usc.edu](mailto:uscpa@usc.edu)  
[www.usc.edu/pa](http://www.usc.edu/pa)

*Program Director:* Kevin Loherty, Ph.D., PA-C

*Medical Director:* Ignacio DeArtola, M.D.

### Faculty

*Professor of Clinical Family Medicine:* D. Lie

*Assistant Professors of Clinical Family Medicine:*  
 I. DeArtola; M. Durham; C. Forest;  
 L. Landry-Taylor; K. Loherty; J. Mabec

*Instructors of Clinical Family Medicine:*

L. Kirakosian; M. Maldonado; D. Mayo;  
 A. Schultz; J. Tramel; A. Walsh; J. Wegler

The faculty listed above are faculty with the Primary Care Physician Assistant Program.

The Primary Care Physician Assistant Program prepares students to practice medicine under the supervision of a physician. Students earn a Master of Physician Assistant Practice (MPAP) upon completion of the program.

The program is part of the Department of Family Medicine's Division of Physician Assistant Studies. Didactic instruction is provided by physician assistant program faculty and faculty from other departments within the Keck School of Medicine, the USC School of Pharmacy, divisions within the Health Sciences Campus, as well as clinicians from the surrounding communities. Emphasis is placed on primary care medicine and caring for medically underserved populations. Clinical training occurs at various clinical sites throughout the greater Los Angeles region, including the Los Angeles County+USC Medical Center, Arrowhead Regional Medical Center, Long Beach Memorial Family Practice Residency, private offices and managed-care settings, community-based clinics, VA facilities and specialty settings. Opportunities to train in selected off-site settings serving Native American populations in the Southwest are also available to students upon approval.

Students complete eight, six-week clinical clerkships in emergency medicine, family medicine, internal medicine/geriatrics, orthopedics/occupational medicine, pediatrics, general surgery and women's health. These clerkships emphasize the development of

necessary clinical skills as well as learning to work as part of a health care team. The Primary Care Physician Assistant Program is committed to recruiting disadvantaged applicants and preparing graduates to practice in medically underserved communities.

The USC Primary Care Physician Assistant Program is accredited by the Accreditation Review Committee on Education for the Physician Assistant (ARC-PA), which is sponsored by seven national medical associations including the American Medical Association. The program is approved by the Physician Assistant Committee (PAC) of the Medical Board of California. Graduates must pass the NCCPA Physician Assistant National Certifying Exam to qualify for licensure in California.

### Master of Physician Assistant Practice

#### *Admission Requirements and Procedures*

Application to the Physician Assistant Program requires completion of a bachelor's degree (in any discipline) from a regionally accredited four-year institution and completion of academic prerequisite requirements.

Admission to the program is for the fall semester only. Admission is granted by the physician assistant admissions committee after careful review of all applications. Selections are made on the basis of a formal interview (for competitive applicants) and consideration of a variety of factors which include: academic record, type and amount of clinical experience, multicultural sensitivity, community service experience and professional experience.

Applicants are required to submit an application through the Central Application Service for Physician Assistants (CASPA) as well as a USC Supplemental Application by December 1 of each year. Further details regarding admission procedures are provided online at [www.usc.edu/pa](http://www.usc.edu/pa).

#### *Transfer Students or Advanced Placement*

The Physician Assistant Program does not accept transfer students, nor do we allow advanced placement based on prior education or clinical experience. Each applicant who is admitted is required to complete the full Master of Physician Assistant Practice curriculum in residence at USC. No waivers or substitutions are permitted.

#### *Registration*

Students receive information regarding registration procedures during an orientation program held the week before classes begin.

#### *Advisement*

Monthly information sessions are available for prospective students who would like to receive more information regarding the program. Applicants who are interested in applying to the program are encouraged to visit the PA Program Website at [www.usc.edu/pa](http://www.usc.edu/pa) or call the PA Program Office at (626) 457-4240.

#### *Degree Prerequisites*

A bachelor's degree from a regionally accredited institution and completion of all prerequisite course work are required for admission to the Physician Assistant Program.

#### *Science Prerequisites*

A one-year general biology sequence with lab and a one-year general chemistry sequence with lab, each for science majors. All science prerequisites must be completed within 10 years of application to the program.

Three semester units or 4 quarter units of each of the following: human anatomy with lab; human physiology with lab; and microbiology with lab.

Online science courses are not eligible for consideration as a prerequisite.

Students are expected to have a strong competency in medical terminology.

#### *Non-Science Prerequisites*

Six semester units or 8 quarter units: English composition (6) or English composition (3) and critical thinking (3) or logic (3).

Six semester units or 3 quarter units each: general (introduction to) psychology.

Three semester units or 4 quarter units of statistics, preferably statistics for psychology or sociology.

Two semester units or 3 quarter units: Spanish language composition and speech.

Students who intend to apply to the Physician Assistant Program should contact the admission office for evaluation of previous baccalaureate and/or post-baccalaureate course work.

#### *Standardized Tests*

The GRE (Aptitude) or the MCAT is required. Either test must be taken within five years of application to the program.

The program expects that applicants earn a combined quantitative and verbal score of no less than 1000 (a score of 450 or higher on the verbal is expected).

*Clinical Experience Prerequisite*

A minimum of 1,000 hours of “hands-on” patient care experience is strongly recommended. Successful applicants typically have 2,000 hours or more of paid clinical hours and have worked as one of the following: emergency medical technician, licensed vocational nurse, medical assistant, medical scribe, medical technologist, military medical corpsman, paramedic, psychiatric technician, physical therapy aide, radiological technician, respiratory therapist or registered nurse. Other health care experience is equally acceptable as long as the experience is “hands-on” in nature.

*Physician Assistant Shadowing Experience*

Shadowing a physician assistant in a clinical setting is strongly recommended. This activity provides the applicant with the up-close experience needed to understand the role and responsibilities of the PA and may help the applicant make a better informed decision in choosing a career as a PA.

*Community Service Prerequisite*

Community service activities/projects are strongly recommended of all applicants. Service which benefits medically underserved or disadvantaged populations is preferred.

*Curriculum Requirements*

The completion of a 33-month professional curriculum is required to earn the Master of Physician Assistant Practice degree. Students do not have choices of courses to take nor are they permitted to drop any course or courses during the semester. Progress is permitted only when the prior semester is successfully completed. Students should view the curriculum outlined here as advisory only and subject to modification.

*Summative Evaluation*

A summative evaluation is conducted on each student during the sixth and final semester of the program to verify that each student is prepared to enter clinical practice.

*Degree Requirements*

All students in the Master of Physician Assistant Practice degree program must meet course and grade point average requirements. All course requirements must be completed with a grade of “B” or better. The degree will not be conferred until the student has successfully completed all degree requirements. Students are subject to the degree requirements in the catalogue current for the semester of their admission into the program.

Physician assistant students are enrolled in a standard curriculum during their 33 months in the program. The following courses must be successfully completed in order to earn the Master of Physician Assistant Practice. Only physician assistant students may enroll in these courses. Departmental clearance is required to enroll.

YEAR I, FALL SEMESTER		UNITS
PCPA 503	Behavioral Sciences I	4
PCPA 523	Clinical Skills I	4
PCPA 530	Basic Medical Sciences	6
PCPA 543	Topics in Medicine I	4
		18
YEAR I, SPRING SEMESTER		UNITS

Requests for further information may be addressed to: USC Primary Care Physician Assistant Program, Keck School of Medicine, University of Southern California, 1000 South Fremont Avenue, Unit 7, Building A11, Room 11-150, Alhambra, CA 91803, or accessed at the program Website at [www.usc.edu/lpa](http://www.usc.edu/lpa).

## Courses of Instruction

### PRIMARY CARE PHYSICIAN ASSISTANT (PCPA)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**PCPA 503 Behavioral Sciences I (4, Fa)** First of three-semester sequence in current topics in behavioral medicine, psychological and cultural factors in health and illness, interpersonal and sociological aspects of patient care, and competencies for PA practice. Open to physician assistant practice majors only.

### PCPA 506 Behavioral Sciences II (4, Sp)

Second of three-semester sequence in current topics in behavioral medicine, psychological and cultural factors in health and illness, interpersonal and sociological aspects of patient care, and competencies for PA practice. Open to physician assistant practice majors only. *Prerequisite:* PCPA 503.

### PCPA 509 Behavioral Sciences III (4, Fa)

Last of three-semester sequence in current topics in behavioral medicine, psychological and cultural factors in health and illness, interpersonal and sociological aspects of patient care, and competencies for PA practice. Open to physician assistant practice majors only. *Prerequisite:* PCPA 506.

**PCPA 523 Clinical Skills I (4, Fa)** Laboratory experiences with basic clinical skills essential to medical practice. First of four courses. Open to physician assistant practice majors only.

**PCPA 526 Clinical Skills II (6, Sp)** Laboratory experiences with basic clinical skills essential to medical practice. Second of four courses. Open to physician assistant practice majors only. *Prerequisite:* PCPA 523.

**PCPA 529 Clinical Skills III (6, Fa)** Laboratory experiences with basic clinical skills essential to medical practice. Third of four courses. Open to physician assistant practice majors only. *Prerequisite:* PCPA 526.

**PCPA 530 Basic Medical Sciences (6, Fa)** A one-semester overview of clinical anatomy, physiology, pathophysiology, and pathology essential to understanding disease mechanisms commonly encountered in primary care and specialty practices of medicine. Open to physician assistant practice majors only.

**PCPA 532 Clinical Skills IV (3, SpSm)** Laboratory experiences with basic clinical skills essential to medical practice. Last of four courses. Open to physician assistant practice majors only. *Prerequisite:* PCPA 529.

**PCPA 543 Topics in Medicine I (4, Fa)** Basic instruction in normal/abnormal states of organ systems in the study of human disease. The first of three courses that includes instruction in pathophysiology, pharmacology, diagnostic studies, and medicine. Open to physician assistant practice majors only.

**PCPA 546 Topics in Medicine II (6, Sp)** Basic instruction in normal/abnormal states of organ systems in the study of human disease. The second of three courses that includes instruction in pathophysiology, pharmacology, diagnostic studies, and medicine. Open to physician assistant practice majors only. *Prerequisite:* PCPA 543.

**PCPA 549 Topics in Medicine III (6, Fa)** Basic instruction in normal/abnormal states of organ systems in the study of human disease. The third of three courses that includes instruction in pathophysiology, pharmacology, diagnostic studies, and medicine. Open to physician assistant practice majors only. *Prerequisite:* PCPA 546.

**PCPA 561 Clinical Assignment I (3.5, FaSpSm)** One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

**PCPA 562 Clinical Assignment II (3.5, FaSpSm)** One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

**PCPA 563 Clinical Assignment III (3.5, FaSpSm)** One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

**PCPA 564ab Clinical Assignment IV (a: 3.5; b: 0, FaSpSm)** One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

**PCPA 565ab Clinical Assignment V (a: 3.5; b: 0, FaSpSm)** One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

**PCPA 566 Clinical Assignment VI (3.5, FaSpSm)** One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

**PCPA 567 Clinical Assignment VII (3.5, FaSpSm)** One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

**PCPA 568 Clinical Assignment VIII (3.5, FaSpSm)** One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

**PCPA 583 Advanced Topics in PA Studies: Education (4, Sp)** Seminar format: students explore educational theories and methods used by PAs in a variety of settings, including clinical practice, classroom and community. Open to physician assistant practice majors only.

**PCPA 586 Advanced Topics in PA Studies: Research (4, Sp)** Seminar format: students receive an integrated experience in research methods including methodology, data collection, analysis and evaluation. Open to physician assistant practice majors only.

**PCPA 589 Advanced Topics in PA Studies: Medical Care Organization (4, Sp)** Seminar format: students will explore current topics in medical care organization and physician assistant practice including administration, financing, changing organizational settings, and workforce issues. Open to physician assistant practice majors only.

## Department of Molecular Microbiology and Immunology

Hoffman Medical Research Center 401  
2011 Zonal Avenue, Los Angeles  
90089-9094

(323) 442-1713

### Faculty

*Professor and Chair:* Jae U. Jung, Ph.D.

*Fletcher Jonas Foundation Chair of Molecular Biology and Immunology:* Jae Jung, Ph.D.

*Rita and Edward Polusky Chair in Basic Cancer Research:* Michael Lieber, Ph.D., M.D.

*Walter A. Richter Chair in Cancer Research:* W. Martin Kast, Ph.D.

*Leslie P. Weiner Chair in Neurology and Richard Angus Grant, Sr., Chair in Neurology:* Leslie P. Weiner, M.D.

*Chair, Graduate Advisory Committee:* Stanley M. Tahara, Associate Professor

*Professors:* S. Chen; L. Comai; S.J. Gao; D.A. Horwitz (*Medicine*); M. Lieber (*Pathology, Biochemistry and Molecular Biology*); W.M. Kast; M. McMillan; J.-H. Ou; P. K. Pattengale (*Pathology*); L.P. Weiner (*Neurology*)

*Associate Professors:* Omid Akbari; E. Bogenmann (*Pediatrics*); P. Cannon; G. Coetzee (*Urology*); R. Duncan (*Pharmacy*); P. Feng; H.K.W. Fong (*Ophthalmology*); C. Hill (*Radiation Oncology*); A. Jong (*Pediatrics*); J.R. Landolph; H. Lee; A. Schönthal; S. Tahara; E. Zandi

*Assistant Professors:* R.W. DePaolo; X.F. Huang; C. Liang; K. Machida; T. Saito (*GI Liver-Medicine*); W. Yuan

*Associate Professor of Research:* S.Y. Park

*Assistant Professors of Research:* H. Jeong;  
M. Villacres (*Pediatrics*)

*Emeritus Professors:* F. Aladjem; M. Lieb;  
G. Dennert

*Clinical Assistant Professor:* Jie Li

*Distinguished Professor, Emeritus:* Michael M.C.  
Lai

The Department of Molecular Microbiology and Immunology is located on the Health Sciences Campus in the Elaine Stevely Hoffman Medical Research Center, in the USC Norris Comprehensive Cancer Center and at the USC Institute for Genetic Medicine. Faculty guidance and specialized facilities are available for advanced research in animal virology, eucaryotic cell biology and cellular differentiation, molecular and cellular immunology, genetic diseases, microbial and molecular genetics, regulation of gene expression, and chemical and viral carcinogenesis.

### Graduate Programs

#### *Admissions*

An applicant to the graduate programs in molecular microbiology and immunology must have a bachelor's degree from an accredited college or university with a major in science — usually biology, chemistry or physics. The applicant must have demonstrated strength in science or mathematics. Undergraduate course work should have included at least one year of biology, chemistry through organic chemistry, mathematics through calculus, physics and physical chemistry. Deficiencies may be made up early in the predoctoral program.

The department encourages applicants to contact its office prior to making formal application. Each applicant must pass satisfactorily the general and advanced (biochemistry, cell and molecular biology or biology, chemistry or physics) portions of the Graduate Record Examinations, and must also arrange for three letters of recommendation to be written. In addition, the applicant must provide a one-page statement of career objectives, including the general area of research interest. This statement is intended to facilitate selection of those students who will most benefit from the department's graduate program. A personal interview is strongly recommended but not required.

Applicants who have attended graduate school at another university may be admitted to advanced standing upon recommendation of the department.

#### *Training Grants and Fellowships*

Incoming domestic students may be supported by a departmental training grant or by a research grant to a specific faculty mentor during their first year; subsequently, students are supported by research grants awarded to individual faculty members. International students are supported by research assistantships.

#### *Master of Science*

The primary objective of the Master of Science program is to prepare students for a career in the broad field of biomedical sciences with focus on, but not limited to, microbiology, virology, immunology and cancer research. This program provides extensive theoretical preparation in combination with hands-on research, where students are trained in research laboratories located on the Health Sciences Campus (HSC), comprising the Keck Medical School, the School of Pharmacy and the USC Norris Comprehensive Cancer Center, or located at Children's Hospital Los Angeles (CHLA).

Goals of the program are to prepare students for employment opportunities in: academic research or teaching at universities, institutes or not-for-profit research centers; research and development in industry (biotech, pharma, petrol, dairies, breweries); health care (hospitals and health care providers, medical technology, diagnostic laboratories); law firms (patents, intellectual property rights, technology transfer, toxic torts); environmental organizations (advisory, management, planning); government (public health, waste management, EPA, FDA, NIH, etc.); publishing (journalism, journal editor).

*Admission Requirements* Applicants are expected to have a bachelor's degree in science (usually biology, chemistry or physics) from an accredited college or university. Generally required courses include: at least one year of college-level biology, chemistry through organic chemistry, mathematics through calculus, and one year of college-level physics. Students who do not meet all requirements may still apply, and admission will be decided on a case-by-case basis. In general, a minimum undergraduate GPA of 3.0 is expected. Additionally, a student must take the Graduate Record Examinations (GRE), and a minimum score of 1000 is expected. International applicants are expected to provide results from the Test of English as a Foreign Language (TOEFL; results from Internet-based, computer-based or paper-based tests are acceptable).

*Course Requirements* A total of 34 units is required. Students may pursue a thesis option which requires completion of MICB 594abz (2-2-0) plus 30 units of approved course work, no more than 8 of which can be MICB 590 Directed Research. Students pursuing a non-thesis option must complete 34 units of approved course work. Students must choose one of these options by the end of the first year of study.

Fourteen or more course units must be taken in the Department of Molecular Microbiology and Immunology; 8 units may be pursued outside the department and, upon approval, a maximum of 8 units of directed research in molecular microbiology and immunology may be applied to the degree. No more than 4 units of course work taken outside of USC can be applied toward the M.S. degree requirements. Students considering such an action should submit a petition to the department and document a rigorous academic standard for the course (reading materials, tests and other performance criteria, lecture content, etc.). The graduate advisory committee will review the petition and inform the student of its decision.

#### *Doctor of Philosophy*

The Department of Molecular Microbiology and Immunology offers a Ph.D. degree program geared toward training students for future independent research careers in an academic or industrial setting. The program introduces students to research early in their first year through rotations in laboratories. Subsequent required course work in basic and advanced topics and an intensive research experience are designed to foster independent and critical thinking.

Students normally select a faculty research adviser for their dissertation by the end of their first year.

*Course Requirements* A minimum of 60 units of graduate study is required for the Ph.D. degree; at least 30 of these must be taken at USC. Because the background of applicants varies widely, the department's graduate advisory committee consults with each student to design an individualized schedule of prescribed courses. In the course of their program, all students are expected to become familiar with the principles of microbiology and general biochemistry and to study advanced biochemistry, microbial physiology and genetics, immunology, virology, molecular biology, and chemical and viral oncology.

*Screening Procedure* Before completing more than six courses (24 units) in regular graduate status, each student is required to pass a written screening examination administered at the end of the first year of graduate study. This examination consists of questions submitted by the faculty and is intended to expose any areas of weakness in the student's abilities. After passing the screening examination, the student is expected to select an area of research and obtain the consent of a member of the department to serve as research adviser.

*Guidance Committee* The department's graduate advisory committee serves as the advisory committee for all first- and second-year graduate students. To replace the graduate committee, a five-member guidance committee is appointed for each student after the departmental screening examination is passed. The guidance committee is responsible for counseling the student, preparing the student for the qualifying examination, administering the examination, and recommending advancement of the student to candidacy for the Ph.D. degree. The student may recommend a chair for this committee, who must be a departmental faculty member but not the student's Ph.D. adviser. Appointment of the chair is subject to approval of the student's research adviser, the department chair and the graduate advisory committee. Other committee members must include three faculty members from within the department (other than the student's Ph.D. adviser) and one faculty member from another Ph.D. granting department. Members of the committee must be approved by the department chair and the full training committee faculty and are officially appointed by the dean of graduate studies.

*Qualifying Examination* Students in the Ph.D. program must pass both the written and oral portions of the qualifying examination administered by their guidance committee during the second year of graduate study. The examination consists of a research proposition which must be presented in written form and defended orally. The written proposition is an independent research proposal, outside of the student's immediate area of thesis research and supported by documentary references.

The graduate advisory committee and the guidance committee will instruct the student in how to prepare the proposition in appropriate subdisciplines of microbiology. The final draft of the written proposition must be submitted to the department faculty at least two weeks in advance of the oral examination. The oral examination is open, and all members of the department faculty may

participate in questioning the student. The examination will include exploration of the student's written proposition but need not be restricted to it; faculty may also question the student on relevant areas of science covered in course work or in current scientific literature. All portions of the oral examination must be completed at the same time.

Final evaluation of the examination is by vote of the guidance committee alone. If there is more than one dissenting vote from the guidance committee, the student is judged to have failed the examination. At the discretion of the committee, the student may be allowed to repeat the examination once within a period of one year from the date of the original examination but not before six months.

*Annual Research Appraisal (ARA)* Beginning in the second year, each graduate student presents a progress report to his or her research committee. For students not yet appointed to candidacy, their major adviser, one faculty member from within the department and one faculty member from outside the department comprise the committee. Students appointed to candidacy meet with their dissertation committee. Prior to the meeting, the student prepares a short written document describing significant experiments, problems and projected studies. This document is distributed to committee members and is included in the student's file. The ARA meeting is intended to be a working session between the student and his or her committee; experimental results and problems are discussed within this context. In addition the student presents a research plan for the next year of work.

A satisfactory ARA is required of every student for each year in residence.

A final ARA is required before the student is permitted to write the dissertation. The student collects and organizes all experimental data to be written into the dissertation as the final ARA document. This will be considered a preliminary draft of the dissertation. At the conclusion of the final ARA meeting, the dissertation committee will either recommend further experiments or approve the document and give permission for writing the dissertation.

*Advancement to Candidacy* When the student has successfully passed the qualifying examination, the guidance committee recommends the student's advancement to candidacy for the Ph.D. degree. Admission is by action of the dean of graduate studies. At this time the guidance committee also approves the student's dissertation topic.

*Dissertation Committee* After advancement to candidacy and approval of the dissertation topic, and with the unanimous recommendation of the committee to the dean of graduate studies, the guidance committee may be reduced to a three-member dissertation committee. Members of the dissertation committee should include the student's research adviser as chair, another faculty member from the department and one faculty member from outside the department; additional members may be appointed. This committee is responsible for counseling the student during preparation of the dissertation, and conducting the final oral examination during the dissertation defense.

*Dissertation and Oral Defense* The student's research is reported in a dissertation written under the guidance of the research adviser. The dissertation must demonstrate the student's capacity for independent research, scholarly achievement and technical mastery of a special field. When the final draft of the dissertation is ready, the student will take the final oral examination, which is open to the university community. This examination is a defense of the major research conclusions of the dissertation.

All doctoral candidates must be registered in 794 Doctoral Dissertation each semester (excluding summer sessions) from the time of their advancement to candidacy until their dissertation is approved for final text preparation. Under exceptional circumstances students may be excused from registration for a semester by petitioning the Graduate School for a leave of absence. The granting of a leave does not alter the student's responsibility to meet the time schedule for completion of all degree requirements.

*Time Requirements* It is the policy of the department to encourage students to complete the degree program for the Ph.D. as rapidly as possible. Ph.D. degrees are currently taking an average of four-and-a-half to five years. The university requires that the student complete the degree within six or eight years of the date on which USC graduate work commenced, depending upon whether the student was admitted with a prior applicable master's degree. Extensions may be granted for compelling reasons, but in no case may the time be extended for more than two years.

## Courses of Instruction

### MOLECULAR MICROBIOLOGY AND IMMUNOLOGY (MICB)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**MICB 500L Introductory Medical Microbiology (4, Irregular)** A survey of microorganisms which cause human infectious diseases including mechanisms of pathogenesis, principles of antibiotic usage, pertinent microbial genetics; lectures, laboratories and demonstrations. *Prerequisite:* one year general biology, one semester biochemistry.

**MICB 501 Introduction to Immunology (1, Irregular)** Basic introduction into molecular, cellular, and clinical immunology for second year medical students and graduate students in Microbiology. (Duplicates credit in BISC 450L.)

**MICB 502 Molecular and Cellular Immunology (2, max 8, Irregular)** Specific topics to be scheduled on a yearly and rotating basis. *Prerequisite:* MICB 501.

**MICB 503 Current Topics in Immunology (1, max 8, Irregular)** Discussion forum on the diverse areas of research which constitute modern immunology. *Prerequisite:* MICB 501.

**MICB 504 Molecular Biology of Cancer (4, Sp)** (Enroll in INTD 504)

**MICB 522 Infection and Host Responses (4, Sp)** (Enroll in INTD 522)

**MICB 531 Cell Biology (4)** (Enroll in INTD 531)

**MICB 542 Animal Virology (2, max 6, Irregular)** Virus structure and chemistry; virus-cell interactions; aspects of virus genetics; molecular biology; pathogenesis, immunology, and evolution of viral infections.

**MICB 549 Student Seminar Series (1, max 8, FaSp)** Microbiology students will present research seminars describing their thesis progress.

**MICB 550 Microbial Pathogenesis (2, Irregular)** Critical discussion of recent developments in pathogenesis of select microbial, viral and parasitic agents with particular emphasis on molecular factors and their synergistic (antagonistic) actions.

**MICB 551 Prokaryotic Molecular Genetics (4, Fa)** Macromolecular processes and their regulation in prokaryotes; DNA replication, transcription, and post-transcriptional events in general and as related to operons, phage biology, and eucaryotic organelles.

**MICB 560 Recent Advances in Microbiology (1, max 6, Irregular)** Intensive examination of selected topics in microbiology. Student presentations and critiques. Required for all graduate students.

**MICB 561 Molecular Genetics (4, Sp)** (Enroll in INTD 561)

**MICB 570 Microbiology Research Seminar (1, max 10, FaSpSm)** Critical discussion of current research topics. Students present published and unpublished research results for discussion and critique. *Prerequisite:* current enrollment in Microbiology Ph.D. program.

**MICB 571 Biochemistry (4, Fa)** (Enroll in INTD 571)

**MICB 572 Systems Physiology and Disease I (4, Fa)** (Enroll in INTD 572)

**MICB 573 Systems Physiology and Disease II (4, Sp)** (Enroll in INTD 573)

**MICB 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MICB 594abz Master's Thesis (2-2-0, FaSpSm)** Credit on acceptance of thesis. Graded IP/CR/NC.

**MICB 601 Molecular Biology of Gene Regulation (2, max 8, FaSp)** (Enroll in BIOC 601)

**MICB 790 Research (1-12, FaSpSm)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MICB 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm)** Credit on acceptance of dissertation. Graded IP/CR/NC.

## Department of Pathology

Hoffman Medical Research Center 204  
2011 Zonal Avenue, Los Angeles 90089-9092

*M.S. Student Adviser:* Cheng-Ming Chuong, M.D., Ph.D., (323) 442-1296  
*Ph.D. Student Adviser:* Florence M. Hofman, Ph.D., (323) 442-1153  
FAX: (323) 442-3049

### Faculty

Michael E. Selsted, M.D., Ph.D., *Professor and Chair*

*Renette and Marshall Ezralow Family Chair in Cancer Therapeutics:* Parkash Gill, M.D.

*Harold E. Lee Chair in Cancer Research:* Michael F. Press, M.D., Ph.D.

*Kenneth T. Norris Jr. Chair in Medicine and Hastings Professor of Medicine:* Edward D. Crandall, M.D., Ph.D.

*Rita and Edward Polusky Chair in Basic Cancer Research:* Michael Lieber, Ph.D., M.D.

*Rupert and Gertrude Stieger Vision Research Chair:* Narsing Rao, M.D.

*Gavin S. Herbert Professor of Vision Research:* David R. Hinton, M.D.

*Professors:* V. Askanas (*Neurology*); P.T. Chandrasoma\*; C.-M. Chuong; T.D. Coates (*Pediatrics*); E.D. Crandall (*Medicine*); L. Dubeau; W.K. Engel (*Neurology*); A.L. Epstein; P.S. Gill (*Medicine, Urology*); F.H. Gilles (*Neurological Surgery, Neurology*); S. Govindarajan; D. Hinton (*Neurological Surgery,*

*Ophthalmology*); F.M. Hofman (*Ophthalmology, Neurological Surgery*); R.W. Jelliffe (*Medicine*); M.N. Koss; M.R. Lieber (*Biochemistry and Molecular Biology, Molecular Microbiology and Immunology*); T.M. Mack (*Family and Preventive Medicine*); C.A. Miller (*Neurology*); B.N. Nathwani; A. Ouellette; P.K. Pattengale (*Molecular Microbiology and Immunology*); M.F. Press; F.P. Quismorio, Jr. (*Medicine*); N.A. Rao (*Ophthalmology*); S. Rasheed; P. Roy-Burman (*Biochemistry and Molecular Biology*)\*; M.E. Selsted; R.P. Sherwin; D.K. Shibata; I.A. Shulman; M.R. Stallcup (*Biochemistry and Molecular Biology*); C.R. Taylor; T.J. Triche (*Pediatrics*); H. Tsukamoto

*Associate Professors:* S. Bellusci (*Surgery*); T.C. Chen (*Neurological Surgery*); W. Cozen (*Preventive Medicine*); A. Erdreich-Epstein (*Pediatrics*); B.H. Gross (*Psychiatry and Behavioral Sciences, Medicine*); A. Kovacs (*Pediatrics*); B.W. Kovacs (*Obstetrics and Gynecology*); J.R. Landolph (*Molecular Microbiology and Immunology, Molecular Pharmacology and Toxicology*); H.A. Liebman (*Medicine*); S.E. Martin; S.B. Turkel (*Psychiatry and Behavioral Sciences, Pediatrics*)

*Assistant Professors:* S. Asgharzadeh (*Pediatrics*); E.P. Kartalov; Y.M. Kim (*Pediatrics*); K. Kobiela; R.D. Ladner; B. Stiles (*Pharmacology and Pharmaceutical Sciences*)

*Adjunct Professor:* W.M. Blackmore (*Physiology and Biophysics*)

*Clinical Professors:* R.D. Aller; C.A. Bell; H.N. Canawati; J.N. Carberry; J. Ciccirelli (*Urology*); K.A. Frankel; A.M. Gown; D.S. Harrington; R.E. Horowitz; G. Kanel; A. Keyser; L. Khawli; D.V. Kon; O.T. Kuzma (*Medicine*); D.H. Mills; D.L. Moyer; J. Nelson; P. Nichols; P.N. Rao; C. Rogers; A.A. Roscher; L. Sathyavagiswaran (*Medicine*); S.-R. Shi; S.V. Sostrin; A. Verity

*Clinical Associate Professors:* C. J. Cobb; M.M. Cosgrove; B.D. Florentine; T.E. Howard; G. Pezeshkpour; M. Pietruszka; A.S.S. Raza; J.S. Wollman

*Clinical Assistant Professors:* A. Baltayan; S.G. Brodie; E. Carpenter, Jr.; J.A. Chan; W. Chick; O. Chinwah; P.D. Colman; E.C. Dinovo; R. Gellibolian; M.D. Haimowitz; L.K. Kelly; M.T. Kiyabu; B. Kwok; B.J. Le Berthon; M.S. Lewis; A.M. Marinovich; K. Matsuda; V. Nelson; M. Osby; L.A. Pena; R. Phan; G. Pinsky; S.T. Pullarkat; V. Richters; L.A. Scheinin; R.A. Soni; K.J. Young; S.K. Young

*Clinical Instructors:* P. Javaherbin; G.N. Pontrelli

*Professors of Clinical:* R.K. Brynes; K.-M. Chan; D.L. Commins; J.F. Emerson; D.B. Endres; J.C. Felix (*Obstetrics and Gynecology*); E.M. Gomperts (*Pediatrics*); A.L. Hiti; Y. Iwaki (*Urology, Surgery*); P. Mhawech-Fauceglia; W.Y. Naritoku; L.M. Petrovic; A.E. Sherrod; H. Shimada; S. Wu (*Pediatrics*)

*Professors of Research:* J. Groffen (*Pediatrics*); E. Heisterkamp (*Pediatrics*)

*Associate Professors of Clinical:* N.J. Barr; D.B. Casebolt; A.N. Fedenko (*Orthopaedic Surgery*); D. Hawes; S. He (*Ophthalmology*); A.R. Judkins; Y. Ma; L.L. Wang (*Surgery*); P.M. Ward; G.D. Zeger

*Assistant Professors of Clinical:* J.A.M. Benjamin; M. Burnett (*Neurology*); A.J. Correa; C.E. Day; W.A. Elat; X. Fu; G.H. Kim; N.E. Klipfel; I. Knezevic-Maramica; K.K.Y. Lai; F. Ough; K.A. Rich; M. Shamszadeh; M.E. Sibug; I. Siddiqi; R.G. Simental-Pizarro; K.D. Tsoulas; J.D. Vallone; L. Wang; Y. Wang

*Associate Professors of Research:* W. Cozen (*Preventive Medicine*); R.B. Widelitz; L. Wu

*Assistant Professors of Research:* K. Asahani; Y.-P. Han (*Surgery*); T. Jiang; R.D. Ladner; S. Lee; R.A. Moats (*Radiology*); K.A. Nash; P. Tongaonkar; P. Wu; Jun Xu; J.F. Zhong; D. Zhu

*Research Professor:* T. Oki

*Research Associate Professor:* S.M. Brennan

*Research Assistant Professors:* P. Hu; N.W. Marten; Y. Ouyang

*Resident Clinical Instructors:* S. Acree; M. Afkhami; W. Apichairuk; W. Bishop; M. Boonyasampant; E. Broxman; D. Cortez; S. Das; A. D'Auria; N. Ellis; J. Friedman; A. Garcia; Juan Guo; T. Hacopian; A. Hagiya; M. Holden; M. Karunanayake; B. Kay; M. Kennedy; K.I. Kersch; G. Kim; C. Lee; E. Loo; C. Magana; A. Marachan; J. Marchan; A. Mathew; T. Meneses; C. Pang; M. Pessaraki; O. Press; K. Qidwai; X. Qing; N. Rawlinson; D. Samrao; M. Sharifian; B. Shlopov; S. Srivastava; L. Whitledge (Zamis); J. Xie; Y. Xie; E. Yung

*Emeritus Professors:* S.B. Chandor; J.W. Parker; A. Richters; D. Tatter; R. Terry; N.E. Warner; E.T. Wong

*Emeritus Associate Professor:* A.D. Cramer

*Emeritus Clinical Professors:* H.S. Aijian; M. Greenblatt; G.G. Hadley; W.H. Kern; J.A. Kernen; E.B. Reilly; D.S. Shillam; R.J. Schroeder; S.C. Sommers; P.R. Thompson

*Emeritus Clinical Associate Professor:* W.C. Smith

*Emeritus Clinical Assistant Professors:* R.L. McClure; J.K. Waken

*Emeritus Professors of Clinical:* J.F.P. Dixon; T.T. Noguchi (*Emergency Medicine*)

*Emeritus Associate Professor of Clinical:* W.P. Lewis

*Emeritus Assistant Professor of Clinical:* R.B. Hopper

*Emeritus Professor of Research:* T.L. Lincoln

The Department of Pathology provides training for both medical and graduate students. Medical students are trained in general, systemic and cellular pathology, providing them with an understanding and visualization of the basic processes underlying symptoms and clinical courses, as well as the ability to evaluate laboratory findings. This department also contributes to the training of residents and fellows at the LAC+USC Healthcare Network, Keck Hospital of USC and USC Norris Cancer Hospital, and the VA Greater Los Angeles Healthcare Network, providing these residents and fellows with an intensive residency program in anatomic and clinical pathology and offering subspecialty fellowship training in surgical pathology, cytopathology, hematopathology and neuropathology.

The Department of Pathology has a Master of Science program. The two-year M.S. program provides training in the latest technologies and concepts of biomedical research and provides the graduate with enhanced opportunities for positions in biotechnology companies, teaching colleges and various health department/governmental positions.

With more than 87 full-time faculty and more than 40 residents and fellows in training, the USC Department of Pathology is one of the largest pathology departments in the United States. The department is particularly strong in areas of surgical pathology, cytopathology, hematopathology, immunocytochemistry, immunopathology, neuropathology, and AIDS-related research. The department maintains active research programs in hematopathology, neuropathology and translational cancer research and has begun to expand its base in radioimmunology and immunotherapy. It also has ongoing research projects in the new areas of molecular and genetic pathology. Since October 2003, the VA Greater Los Angeles Healthcare System Pathology Residency Training Program has been incorporated with the LAC+USC Medical Center Pathology Residency Training Program.

The department provides diagnostic laboratory services for the LAC+USC Medical Center, the USC Norris Cancer Hospital, the Doheny Eye Hospital, Keck Hospital of USC and the USC Clinical Laboratories Group. Approximately 40 of the department's full-time faculty members work in service laboratories throughout the LAC+USC Medical Center, where they are supported by 40 residents and fellows and a technical and clerical staff numbering in excess of 500. The USC Norris Cancer Hospital and Research Institute and Keck Hospital of USC houses seven full-time pathologists, two fellows, two residents and approximately 25 clerical and support staff.

\*Recipient of university-wide or school teaching award.

## Graduate Programs

### General Admissions

Applicants to the graduate program in pathology must have a bachelor's degree from an accredited college or university with an undergraduate major in one of the natural sciences; a minimum cumulative GPA of 3.0 for undergraduate work is required. Applicants must submit undergraduate transcripts and letters of recommendation from two undergraduate teachers with their application. All applicants must take the general portion of the Graduate Record Examinations (GRE). A combined score of at least 1100 for the verbal and quantitative scores is required. International students whose native language is not English must submit scores from the TOEFL (Test of English as a Foreign Language) examination. Personal interviews by members of the department's Graduate Committee may be requested.

Original application materials, except letters of recommendation, should be sent to the Office of Admission, University of Southern California. To expedite consideration of the application, applicants should also send photocopies of the application, transcripts, and GRE scores to the Pathology Department's Graduate Committee secretary, Lisa Doumak. Letters of recommendation should be addressed directly to the secretary, Graduate Committee. Applications are considered for admission to both the fall and spring semesters.

### Residency and Fellowship Programs

The Department of Pathology offers seven first-year residency positions and 28 residency positions in its fully approved four-year training program in anatomic and clinical pathology at the LAC+USC Medical Center. Training is offered in autopsy and surgical pathology, neuropathology, cytology, microbiology, hematopathology, immunohematology, clinical chemistry, toxicology, immunopathology, radioisotopes, cytogenetics, instrumentation, management, computer techniques, electron microscopy, molecular pathology

and other specialty areas. The Department of Pathology also offers the Accreditation Council on Graduate Medical Education (ACGME) fully-credited fellowship training in cytopathology (four positions), Hematopathology (two positions) and neuropathology (one position). The Surgical Pathology Fellowship Training Program recently received five years full accreditation of their program (seven positions).

### Master of Science in Experimental and Molecular Pathology

The Department of Pathology offers a program for the master of science degree with a major in experimental and molecular pathology. The primary objectives of this program are to provide the necessary theoretical and practical training in experimental pathology that culminates with the master of science degree. Goals of the program are to train students in preparation for senior research staff or senior technician positions in academic or industrial institutes, further M.D. or Ph.D. study, consultantships requiring multidisciplinary backgrounds or advanced teaching positions in community colleges.

**Admissions** The prerequisite for applicants to this program in pathology is a bachelor's degree with an undergraduate major in one of the natural sciences. A minimum GPA of 3.0 in the natural sciences (including mathematics) is usually required. Applicants must achieve a competitive score on the general portions of the Graduate Record Examinations (GRE). In addition, the department requires at least three letters of recommendation from faculty members who can evaluate the applicant's potential for graduate work. Demonstrated proficiency in the English language is required. International students whose native language is not English must submit scores from the TOEFL (Test of English as a Foreign Language) examination. Special circumstances may provide consideration for conditional admission.

**Course Requirements** At least 34 units of graduate study are required. The required courses include INTD 522 Infection and Host Responses (4), INTD 531 Cell Biology (4), INTD 550 Introduction to Pathology (4), INTD 551 Pathobiology of Disease (4), INTD 571 Biochemistry (4), PATH 552ab Methods in Experimental Pathology (5) and PATH 570ab Seminar in Pathology (2). Fourteen or more course units must be taken in the Department of Pathology, 8 units may be pursued outside the department, and a maximum of 8 units of directed research in pathology may be applied to the degree. No more than 4 units of course work taken outside of USC should be applied toward the M.S. degree requirements. Students considering such an action should submit a petition to the pathology graduate committee and document a rigorous academic standard for the course (reading materials, texts and other performance criteria, lecture content, etc.). The pathology graduate committee reviews the petition and informs the student of its decision.

### Master's Examinations/Master's Thesis

The Master of Science has the option of either an experiment-based thesis or theory-based thesis course of study. Each student's program will be tailored to suit individual needs and background. Students who require training mainly in the knowledge of pathology may opt for the theory-based thesis course of study. Students also have an opportunity to register for directed research (PATH 590). For the experiment-based thesis option, the student must take PATH 594ab Master's Thesis. For the theory-based thesis option, the student must take GRSC 810 Studies for Master's Examination during the semester they plan to graduate if not otherwise enrolled.

## Courses of Instruction

### **PATHOLOGY (PATH)**

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**PATH 500ab Basic and Applied Systemic Pathology (3-2, Irregular)** Clinical, gross, and microscopic study of basic disease processes. Pathophysiology of major organ systems; etiology, pathogenesis and histopathology of important diseases; oral manifestations, clinical recognition.

**PATH 531 Cell Biology (4)** (Enroll in INTD 531)

**PATH 550 Introduction to Pathology (4, Fa)** (Enroll in INTD 550)

**PATH 551 Pathobiology of Disease (4)** (Enroll in INTD 551)

**PATH 552ab Methods in Experimental Pathology (a: 3, Fa; b: 2, Sp)** Includes advanced techniques in: *a*: cell biology and protein chemistry; *b*: DNA analysis. The course is a practical approach to acquaint graduate students with current methodologies and applications used in biomedical research.

**PATH 555 Biochemical and Molecular Bases of Disease (4, Sp)** (Enroll in INTD 555)

**PATH 561 Molecular Genetics (4, Sp)** (Enroll in INTD 561)

**PATH 570abcd Seminar in Pathology (1-1-1-1, FaSp)** Recent advances in the understanding of diseased cells and tissues are reported and discussed using standard seminars, as well as autopsy organ reviews.

**PATH 571 Biochemistry (4, Fa)** (Enroll in INTD 571)

**PATH 572 Systems Physiology and Disease I (4, Fa)** (Enroll in INTD 572)

**PATH 573 Systems Physiology and Disease II (4, Sp)** (Enroll in INTD 573)

**PATH 575 Frontiers of Pathology (2, max 8, Sp)** Weekly research lectures by leading investigators in the field of homeostatic response to injury such as cell death, inflammation, fibrosis and regeneration.

**PATH 580 Cell Cycle Regulation (2, Sp)**  
The course will focus on recent advances in cell cycle research and discuss its potential significance for human development and health care. *Prerequisite:* biochemistry and cell biology.

**PATH 581 Essentials of Animal Experimentation (1, Fa)** A course providing basic information on the issues and responsibilities of investigators using animals in biomedical research. *Recommended preparation:* graduate standing.

**PATH 590 Directed Research (1-12, FaSpSm)**  
Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PATH 594abz Master's Thesis (2-2-0, FaSpSm)** Credit on acceptance of thesis. Graded IP/CR/NC.

**PATH 599 Special Topics (2-4, max 8, FaSp)**

**PATH 620 Neuropathology (2, max 8, Sp)**  
Diseases of the nervous system with special emphasis on disease processes exclusive to that organ system. *Prerequisite:* INTD 550; *corequisite:* INTD 551.

**PATH 625 Comparative Pathology (2, Fa)**  
Unifying concept of diseases common to animals and man. Similarities and differences of diseases affecting certain organ systems of animals as compared to man. *Prerequisite:* INTD 550; *corequisite:* INTD 551.

**PATH 630 Viral Oncology (2, Sp)** Broad aspects of RNA and DNA viral oncology from epidemiology to molecular genetics. *Prerequisite:* INTD 550; *corequisite:* INTD 551.

**PATH 650 Stem Cell Biology and Medicine (4, Sp)** (Enroll in INTD 650)

**PATH 790 Research (1-12, FaSpSm)**  
Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PATH 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm)** Credit on acceptance of dissertation. Graded IP/CR/NC.

## Department of Pediatrics Division of Medical Education

Keith Administration Building 211  
1975 Zonal Avenue, Los Angeles  
90089-9024  
(323) 442-2372  
FAX: (323) 442-2051

*Program Adviser:* Diane Boughton

Email: boughton@usc.edu

### Faculty

*Division Head:* M.A. Hitchcock

*Professors:* M.A. Hitchcock (*Education*);  
J.G. Nyquist; B.P. Wood

*Associate Professors:* J. Gates (*Family Medicine*);  
R.A. Girard; W. May

*Instructor:* D. Poole

*Clinical Faculty:* A.M. Alexander; J. Davis;  
D.L. Fisher; S.A. Lemme (*Family Medicine*);  
D. Souder; M. Sullivan

*Emeritus Professor:* S. Abrahamson

Established in 1963 as one of the first medical education units in the United States, the division conducts educational programs for four different types of students: medical students; graduate students in education; those teaching in medical and other health professional education settings; and physicians in the postgraduate study of medical education.

The division's primary mission is to enhance the quality of medical education by serving as a resource of educational expertise for planning, developing, and evaluating medical education programs and conducting educational research. Similar activities and programs are conducted with various government and private organizations outside the university.

Major research and training interests of the faculty include the instruction of lay persons to be used as standardized patients for teaching and evaluation, case-based learning, pre-med programs for minority students and interactive video systems.

Administratively, the division is an independent unit in Educational Affairs in the Keck School of Medicine. The faculty hold appointments in the Department of Pediatrics. The division also employs 10 staff and research assistants. All activities of the division are conducted at the USC Health Sciences Campus.

### Fellowship Programs

#### *Teaching and Learning*

A Teaching and Learning Fellowship program is offered to health care professionals who are engaged in teaching. The primary goals of this fellowship are to provide participants with multiple ways to teach and evaluate effectively. Through seminars, fellows will gain increased understanding of basic principles of teaching and learning and achieve the skills necessary to apply principles effectively.

*Educational Leadership*

An Educational Leadership Fellowship program is available for health care professionals with two primary goals: to prepare participants for understanding and serving in positions of leadership and enhance fellows' personal and professional effectiveness. Seminars will explore transformational change, team and community formation, group dynamics, organizational culture and resources.

*Health Professions Teachers*

From time to time, the division offers special workshops or seminars in various subject areas related to the improvement of instruction. Division staff members are available to plan these special programs on request.

## Department of Physiology and Biophysics

**Mudd Memorial Research Building 626**  
 1333 San Pablo Street, Los Angeles  
 90089-9142  
 (323) 442-1040  
 FAX: (323) 442-2283  
 Email: [physiol@hsc.usc.edu](mailto:physiol@hsc.usc.edu)

*Student Adviser:* H. Kaslow  
 (323) 442-1244

**Faculty**

Berislav V. Zlokovic, M.D., Ph.D., *Chair of the Department of Physiology and Biophysics and Director of the Center for Neurodegeneration and Regeneration at the USC Zilkha Neurogenic Institute*

*Director, USC Research Center for Liver Diseases, Chief, Division of Gastrointestinal and Liver Diseases, USC Associates/Thomas H. Brem Chair in Medicine, and Veronica P. Budnick, M.D., Chair in Liver Disease:* Neil Kaplowitz, M.D.

*Professors:* Michael Arbib (*Computer Science/Engineering*); Thomas Buchanan (*Medicine/Obstetrics and Gynecology*); Vito M. Campese; Timothy M. Chan (*Molecular Pharmacology and Toxicology*); Casey Donovan (*Exercise Science*); Robert A. Farley\* (*Biochemistry*); Caleb Finch (*Gerontology and Neurobiology*); Michael Goran (*Preventive Medicine*); Sarah Hamm-Alvarez (*Pharmaceutical Sciences*); Cage S. Johnson (*Medicine/Hematology*); Neil Kaplowitz (*Medicine/GI Liver/Patient Care*); Kwang Jin Kim (*Medicine, Biomedical Engineering*); Herbert J. Meiselman; Austin K. Mircheff; Dennis O'Leary (*Otolaryngology*); Janos Peti-Peterdi; Alan G. Watts

**Master of Academic Medicine**

The program addresses the unique population of medical and health professions faculty who are focused on leading the academic enterprise for health professionals at the undergraduate, graduate and continuing education levels. The six-semester program consists of 32 graduate units and employs a hybrid model, combining on-campus face-to-face sessions, blended with online course work. For more information, see page 767.

*Associate Professors:* Marilyn Ader; Robert H. Chow; Harvey R. Kaslow; Richard L. Lubman (*Medicine/Pulmonary Patient Care*); Alapakkam P. Sampath; Richard Watanabe; Jang-Hyun Youn; Alan S.L. Yu; Li Zhang

*Assistant Professors:* Steven Mittelman; Joyce Richey; Samuel Yiu

*Adjunct Professor:* Dwight W. Warren III

\*Recipient of university-wide or school teaching award.

The Department of Physiology and Biophysics is located on the Health Sciences Campus, with laboratories and administrative offices in the Seeley Mudd Laboratory, the Doheny Eye Institute, the Parkview Medical Building and the Raulston Building. Faculty of the department are also located at the LAC+USC Medical Center and in research laboratories on the University Park Campus.

The graduate program in physiology and biophysics is designed to prepare students for a career in research and teaching in physiology and related fields. Faculty of the department guide students toward becoming effective members of today's scientific community by providing an integrated knowledge of physiological systems at several levels of organization. The course of study required of each candidate is planned to meet his or her individual interests and needs.

Faculty guidance and specialized facilities are available for advanced research in the four broad areas of research represented in the department: endocrinology, reproduction and metabolism; neurophysiology; fluid and electrolyte physiology; and cellular and molecular physiology.

**Postgraduate Program**

Individually tailored programs of study in medical education are available to visiting postdoctoral fellows who wish to gain an understanding of principles, problems and practices in medical education. These visiting fellows may spend from a few weeks to a year in residence, participating in ongoing projects, seminars, readings and independent study.

**Graduate Programs***Admissions*

Applicants should have a bachelor's degree in one of the natural sciences. Undergraduate course work in mathematics (including one and a half years of calculus), physics (one year), organic chemistry (aliphatic and aromatic), and biological sciences (one year) is required. Prospective students should also have completed at least two courses from among the following areas: physical chemistry, advanced physics, electronics, histology, physiology, cell biology, computer science, or biochemistry. Equivalent work will be considered on an individual basis.

Students interested in applying must complete a departmental preapplication available from the director of graduate studies. Graduate Record Examinations scores, complete undergraduate transcripts and three letters of recommendation are required before the application can be considered.

The preapplication procedure should be completed before May 1 for admission to the following fall semester. All applicants must also apply formally to the university. Final acceptance is contingent upon completion of the official admission procedure.

*Master of Science*

Admission requirements are the same as for the Doctor of Philosophy degree.

*Course Requirements* The master's degree in physiology and biophysics requires completion of 33 graduate level units with a minimum grade point average of 3.0. All students

are required to take the following: INTD 500, INTD 572, INTD 573, PHBI 608ab and/or PHBI 550, PM 510L, and two of the following: INTD 531, INTD 571, NEUR 524, NEUR 531. Students enroll in additional graduate level classes with prior approval of their graduate student adviser. The Master of Science candidate has the option of either a thesis or non-thesis course of study; the thesis option is usually required if more than 6 research units make up a 33-unit course plan. The specific program followed by thesis-option students is tailored to suit individual needs and background in consultation with the academic director of the program and the student's guidance committee. There is no foreign language requirement.

Minimum standards for satisfactory performance and continued enrollment in the M.S. program are an average of 3.0 in all non-research courses, an average of 3.0 in all courses and a grade of B or higher in INTD 572, INTD 573 and PHBI 608a.

#### *Doctor of Philosophy*

**Course Requirements** A total of 60 units of graduate study is required for the Ph.D. degree. All students are required to take INTD 500, INTD 572, INTD 573, PHBI 608ab and/or PHBI 550, PM 510L, and two of the following: INTD 531, INTD 571, NEUR 524, NEUR 531. The balance of the 60-unit requirement will be drawn from advanced physiology courses and seminars, courses from other departments, research and the dissertation. The specific program to be followed by each student is determined in consultation with the student's adviser, guidance committee and the department faculty. There is no foreign language requirement.

## Courses of Instruction

### **PHYSIOLOGY AND BIOPHYSICS (PHBI)**

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**PHBI 524 Advanced Overview of Neurosciences (4, Fa)** (Enroll in NEUR 524)

**PHBI 531 Cell Biology (4)** (Enroll in INTD 531)

**PHBI 550 Seminar in Advanced Cellular, Molecular and Systemic Physiology (1, max 12, FaSp)** Lectures and student presentations on advanced topics in molecular, cellular and systemic physiology. Open to systems biology and disease program, physiology and biophysics, and pathobiology students only. Graded CR/NC.

**Screening Procedure** An overall GPA of 3.0 or better and a minimum grade of B (3.0) in all courses given by the department and also in INTD 531 are the minimum requirements for continuation in the Ph.D. program. After completion of the first two semesters of study, the eligibility of each student for continuation in the program will be reviewed by a departmental graduate screening committee. At the discretion of the graduate committee, successful completion of a screening examination may be required for progression to the third semester of graduate study.

**Guidance Committee** The guidance committee consists of at least five members, three of whom must be from within the department and at least one of whom must be drawn from the faculty of another department. The chair of the committee will be the student's dissertation adviser.

**Qualifying Examination** The purpose of the qualifying examination is to give the student a formal opportunity to demonstrate to the faculty that he or she is qualified to conduct independent research. Passing this examination is formal recognition that the student has independently developed a research proposal that is significant and can be reasonably accomplished with available resources.

At least 60 days prior to its scheduled date, the student must petition the Graduate School for permission to take the qualifying examination; the examination must be completed by the end of the semester during which application is made. Students must complete this examination no later than the fifth semester of graduate work. If the

student fails to take the examination by this time, the guidance committee will report a failure to pass the examination. The student then has one additional chance to take and pass the examination; this may not occur sooner than six months nor later than one year after the first examination. Applications to take the qualifying examination later than the fifth semester may be considered on an individual basis and must be approved by both the guidance committee chair and the department chair.

The qualifying examination consists of a written and an oral portion. For the written portion, the student must prepare a proposal for a research project. The proposal must be submitted to the members of the guidance committee not less than 10 days prior to the oral portion of the examination. For the oral defense, the student should prepare an oral presentation of the proposal of approximately 30 minutes duration and be prepared to answer questions regarding any topic related to the proposal.

**Dissertation and Oral Defense** Upon completion of the research project, and with the consent of the dissertation committee, the candidate prepares the written dissertation. After the dissertation has been read by the committee, the candidate must make an oral defense of the work.

**PHBI 561 Molecular Genetics (4, Sp)** (Enroll in INTD 561)

**PHBI 571 Biochemistry (4, Fa)** (Enroll in INTD 571)

**PHBI 572 Systems Physiology and Disease I (4)** (Enroll in INTD 572)

**PHBI 573 Systems Physiology and Disease II (4)** (Enroll in INTD 573)

**PHBI 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PHBI 594abz Master's Thesis (2-2-0, FaSpSm)** Credit upon acceptance of thesis. Graded IP/CR/NC.

**PHBI 599 Special Topics (2-4, max 8, Sp)**

**PHBI 608ab Advanced Cellular, Molecular and Systemic Physiology (a: 2 or 4, Fa; b: 2 or 4, Sp)** Lectures and student presentations on advanced topics in molecular, cellular and systemic physiology.

**PHBI 618 Mathematical Modeling in Endocrinology and Metabolism (3, Fa)** The application of mathematics to problems including hormone-receptor interactions, tracer kinetics, and regulation of hormones and substrates at the level of the whole organism. *Prerequisite:* Calculus III.

**PHBI 650 Mechanisms of Ion and Solute Transport Across Cell Membranes (2, Fa)**

Biophysical examination of the mechanisms of ion and solute transport across cell membranes; emphasis on the structures of transport proteins and kinetic models of transport. *Recommended preparation:* graduate level course in biochemistry, physical biochemistry, or cell biology.

**PHBI 651 Molecular Modeling and Kinetic Simulations in Membrane Transport (2, Fa)**

Introduction to the principles of mathematical modeling of biological systems and molecular dynamics simulations, with emphasis on membrane transport. *Recommended preparation:* graduate level courses in biochemistry or physical biochemistry, and cell biology.

**PHBI 660 Understanding Diseases of Ion Transport (2, Sp)** Examination of the genetics, biochemical mechanisms, and physiological characteristics of diseases caused by inherited mutations in ion channels and ion transport proteins.

**PHBI 790 Research (1-12, FaSpSm)**

Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PHBI 794abcdz Doctoral Dissertation (2-2-2-0, FaSpSm)** Credit on acceptance of dissertation. Graded IP/CR/NC.

**Faculty**

*AFLAC Chair in Cancer Research:* Robert Haile, Ph.D.

*The Dr. Robert C. and Veronica Atkins Chair in Childhood Obesity and Diabetes:* Michael I. Goran, Ph.D.

*Kenneth T. Norris Jr. Chair in Epidemiology:* Brian E. Henderson, M.D.

*Verna R. Richter Chair in Cancer Research:* Duncan Thomas, Ph.D.

*Flora L. Thornton Chair in Preventive Medicine:* Jonathan M. Samet, M.S., M.D.

*Harry J. Bauer and Dorothy Bauer Rawlins Professor of Cardiology:* Howard N. Hodis, M.D.

*Professors:* S.P. Azen (*Biokinesiology and Physical Therapy, Ophthalmology, Occupational Science*); K. Berhane; R. Bluthenthal; G. Casey, C.-P. Chou (*Social Work*); P. Clarke (*Communication*); G. Coetzee (*Urology, Microbiology*); W.J. Gauderman; S. Gayther; F.D. Gilliland;

M. Goran (*Physiology/Biophysics and Pediatrics [CHLA]*); S. Gruskin; R. Haile; B.E. Henderson; H. Hodis (*Medicine*); B. Langholz; T.M. Mack (*Pathology*); Wendy Mack; R. McConnell; B. Meyerowitz (*Psychology*); M.A. Pentz; B. Portnoy (*Pediatrics*); J. Richardson; J.M. Samet; D. Stram; S. Sussman; T. Valente; D.C. Thomas; J. Unger; A. Wu; J. Zhang

*Associate Professors:* H. Allayee; L. Baezconde-Garbanati; J.C. Chen; M. Cockburn; D. Conti; W. Cozen (*Pathology*); C. Haiman; S. Ingles; S. Ramus; L. Rohrbach; T. Seeman (*Gerontology*); K. Siegmund; D. Spruijt-Metz; P.D. Thomas, Jr.; G. Ursin; R. Watanabe (*Physiology/Biophysics*)

*Assistant Professors:* B. Berman; C. Breton; C. Curtis; G. Dunton; S. Eckel; M. Franklin; J. Figueiredo; A. Leventhal; J.P. Lewinger; C.L. Pearce; N. Riggs; F. Schumacher; W. Setiawan; H. Wipfli

*Professors of Clinical:* E.L. Avol; J.T. Casagrande; D. Deapen; A. Hricko; J.M. McCoy

*Associate Professors of Clinical:* E. Nezami; D. Van Den Berg

*Assistant Professors of Clinical:* T. Boley-Cruz; C. Koprowski; L. Liu; K. Monroe; C. Patino-Sutton

*Clinical Associate Professor:* W.S. Linn

*Clinical Assistant Professors:* K. Dwyer; J. Schmitz

*Professors of Research:* T. Alonzo; J.D. Buckley (*Pediatrics*); S. Groshen; M. Krailo; B. Langholz; M.C. Pike; R. Sposto; F. Stanczyk (*Obstetrics and Gynecology*)

*Associate Professors of Research:* A. Hamilton; P. Marjoram; M. Stern

*Assistant Professors of Research:* D. Barkauskas; G. Chen; V. Cortessis; L. Chen; J. Davis; G. Dunton; S. Fruin; M. Gago; J. Huh; C. Lane; E. Lee; R. McKean-Cowdin; H. Mi; J. Milam; J. Millsten; L. Raskin; M.T. Salam; P. Sun; H. Volk; T. Zhou

*Adjunct Professor:* J. Niland

*Adjunct Associate Professors:* C.N. Bailey-Merz; M.R. Calderon; G. Marks

*Adjunct Assistant Professors:* J. Lawrence; J.A. Longmate; S.V. McKane; S. Montgomery

*Emeritus Professors:* Leslie Bernstein; R.K. Peters (*Family Medicine*); S. Preston-Martin

The Department of Preventive Medicine is responsible for training medical, graduate and undergraduate students in the areas of biostatistics, epidemiology, health behavior research, public health, and preventive medicine. Faculty from the statistical genetics and molecular epidemiology department also perform research in the areas of biostatistics, epidemiology of acute and chronic diseases, and environmental health.

The undergraduate and graduate programs offered by the department are noteworthy for the extensive opportunities offered to the students for involvement in faculty research. It is not uncommon for students to begin working closely with faculty members on research projects as early as their first or second year of study.

*Degree Programs*

The Department of Preventive Medicine offers the following degree programs:

- B.S. in Global Health
- B.S. in Health Promotion and Disease Prevention Studies
- B.S. in Health Promotion and Disease Prevention/Master of Public Health
- B.S. in Health Promotion and Disease Prevention/M.S. in Biostatistics
- B.S. in Health Promotion and Disease Prevention/M.S. in Molecular Epidemiology
- B.S. in Dental Hygiene/Master of Public Health
- M.S. in Applied Biostatistics/Epidemiology
- M.S. in Clinical and Biomedical Investigations
- M.S. in Molecular Epidemiology
- M.S. in Biostatistics
- Master of Public Health
- Master of Public Health/Doctor of Medicine
- Master of Public Health (Health Promotion)/Ph.D. in Psychology (Clinical)
- Master of Public Health/Pharm.D.
- Master of Public Health/ Master of Planning
- Master of Public Health/Doctor of Physical Therapy

- Master of Public Health/Master of Social Work
- Ph.D. in Biostatistics
- Ph.D. in Epidemiology
- Ph.D. in Molecular Epidemiology
- Ph.D. in Preventive Medicine (Health Behavior Research)
- Ph.D. in Statistical Genetics and Genetic Epidemiology

The Department of Preventive Medicine also offers the following undergraduate minor programs:

- Minor in Cinema-Television for the Health Professions
- Minor in Cultural Competence in Medicine
- Minor in Global Health
- Minor in Health Communication
- Minor in Public Health
- Minor in Nutrition and Health Promotion
- Minor in Substance Abuse Prevention

**Bachelor of Science in Health Promotion and Disease Prevention Studies**

3375 S. Hoover Street  
 University Village, Suite E 210  
 Los Angeles, CA 90089-7798  
 Director: Elahe Nezami, Ph.D.  
 (213) 740-1060  
 FAX: (213) 821-1733  
 Email: [bhealthy@usc.edu](mailto:bhealthy@usc.edu)  
[www.usc.edu/medicine/hp](http://www.usc.edu/medicine/hp)

The undergraduate program in Health Promotion and Disease Prevention Studies (HP) provides a well-rounded, professionally-focused education leading to the Bachelor of Science degree. The program is concerned with the sociocultural, behavioral, psychological, and biological factors contributing to wellness and disease. It is an ideal major for students interested in medicine, pharmacy, dentistry, public health, epidemiology, health psychology, and health behavior research. Areas of study include: global health; cultural diversity in medicine; substance abuse prevention and program planning; nutrition and fitness; health promotion of minority and underserved populations; and general public health issues (e.g., HIV/AIDS, violence, health promotion in the workplace and behavioral medicine).

*Program Requirements*

The Bachelor of Science degree is awarded after students successfully complete 128 units, consisting of 66 units for the major and fulfillment of USC general education requirements including third semester equivalency in a foreign language.

*General Education Requirements*

The university's general education program requires six courses plus writing and diversity requirements, which provide a coherent, integrated introduction to the liberal arts and sciences. See pages 63 and 250 for more information.

*Requirements for the Major (66 units)*

The program is divided into core and elective components.

The following core component (42 units) is required of all students.

NON-HP COURSES (20 UNITS)		UNITS
BISC 120L	General Biology: Organismal Biology and Evolution, or	
BISC 121L	Advanced General Biology: Organismal Biology and Evolution	4
BISC 220L	General Biology: Cell Biology and Physiology, or	
BISC 221L	Advanced General Biology: Cell Biology and Physiology	4
CHEM 105aL	General Chemistry, or	
CHEM 115aL	Advanced General Chemistry	4
MATH 116	Mathematics for the Social Sciences, or	
MATH 125*	Calculus I	4
PSYC 100	Introduction to Psychology	4

\*MATH 125 allows students who have placed out of MATH 116 to take a higher-level math class; it also satisfies the math requirement for premedical students.

HP COURSES (22 UNITS)		UNITS
HP 200	Introduction to Health Promotion and Disease Prevention	4
HP 300	Theoretical Principles of Health Behavior	4
HP 320	Biological and Behavioral Basis of Disease	4
HP 340L	Health Behavior Statistical Methods	4
HP 350L	Health Behavior Research Methods	4
HP 480	Internship in Health Promotion and Disease Prevention, or	2-4
HP 490x	Directed Research	2-8

*Advanced HP and Health Profession Preparatory Courses*

A total of 24 units of electives are required of all students (at least 12 of the 24 must be HP courses).

ELECTIVES (24 UNITS)		UNITS
BISC 320L	Molecular Biology	4
BISC 330L	Biochemistry	4
CHEM 105bL	General Chemistry, or	
CHEM 115bL	Advanced General Chemistry	4
CHEM 322abL	Organic Chemistry	4-4
EXSC 300L	Physiology of Exercise	4
EXSC 301L	Human Anatomy	4
EXSC 407aL	Advanced Exercise Physiology	4
HP 400	Culture, Lifestyle, and Health	4
HP 401	Cultural Competence in Medicine	4
HP 402	Maternal and Child Health	4
HP 403	Behavioral Medicine	4
HP 404	Religion and Health	4
HP 405	Sexually Transmitted Disease: A Global Public Health Priority	4
HP 408	Environmental Health in the Community	4
HP 410	Issues in Prevention and Cessation of Drug Abuse	4
HP 411	Drug Intervention Program Design and Evaluation	4
HP 412	Health Promotion and Prevention Policy	4
HP 420	Gender and Minority Health Issues	4
HP 421	Violence as a Public Health Issue	4
HP 422	AIDS in Society	4
HP 430	Obesity and Health	4
HP 431	Behavior and Education Strategies for Nutrition and Fitness	4
HP 432	Clinical Nutrition	4
HP 433	Advanced Topics in Nutrition	4
HP 434	Physical Activity and Health	4
HP 441	Health Promotion in the Workplace	4
HP 442	Chronic Disease Epidemiology	4
HP 450	Traditional Eastern Medicine and Modern Health	4
HP 460	Adolescent Health	4
HP 465	Health Status of Indigenous Peoples of America	4
HP 485	Global Health: Obesity and Nutrition	4

PHYS 135abL	Physics for the Life Sciences, or	4-4
PHYS 151L	Fundamentals of Physics I: Mechanics and Thermodynamics, and	4
PHYS 152L	Fundamentals of Physics II: Electricity and Magnetism	4
PPD 325	Fundamentals of Health Policy and Management	4
PPD 330	Introduction to Health Care Systems	4
PSYC 336L	Developmental Psychology	4
PSYC 355	Social Psychology	4
PSYC 437	Adolescent Development	4
SOCI 350	Social Exclusion, Social Power, and Deviance	4
SOCI 475	Medical Sociology	4

**Bachelor of Science in Global Health Studies**

3375 S. Hoover Street  
University Village, Suite E 210  
Los Angeles, CA 90089-7798  
Director: Elahe Nezami, Ph.D.  
(213) 740-1060  
FAX: (213) 821-1733  
Email: [bhealthy@usc.edu](mailto:bhealthy@usc.edu)  
[www.usc.edu/globalhealthprogram](http://www.usc.edu/globalhealthprogram)

The Bachelor of Science in Global Health is a multidisciplinary degree of the Keck School of Medicine's Department of Preventive Medicine. This undergraduate program offers an examination of public health and policy issues in the context of global affairs. Students complete course work from Health Promotion and Disease Prevention Studies and International Relations in addition to requirements from other schools of the university. The program provides students with a strong background in understanding and evaluating global health issues and prepares students to become health professionals with international competencies. This program is an ideal major for students interested in medicine, pharmacy, dentistry, international relations, public health, epidemiology, health psychology and health behavior research.

*Program Requirements*

The Bachelor of Science degree is awarded after students successfully complete 128 units, consisting of 66 units for the major and fulfillment of USC general education requirements including third semester equivalency in a foreign language.

*General Education Requirements*

The university's general education program requires six courses plus writing and diversity requirements, which provide a coherent, integrated introduction to the liberal arts and sciences. See pages 63 and 250 for more information.

*Requirements for the Major (66 units)*

The program is divided into core and elective components. As part of the core research requirements, students must complete a directed research requirement, HP 490x, with a specific international research focus.

The core component (42-46 units) is required for all students.

CORE COURSES (32 UNITS)		UNITS
BISC 220L	General Biology: Cell Biology and Physiology, or	
BISC 221L	Advanced General Biology: Cell Biology and Physiology	4
CHEM 105aL	General Chemistry, or	
CHEM 115aL	Advanced General Chemistry	4
ECON 203	Principles of Microeconomics	4
HP 270	Introduction to Global Health	4
HP 320	Biological and Behavioral Basis of Disease	4
HP 470	Case Studies in Global Health	4
IR 308	Globalization: Issues and Controversies	4
MATH 125	Calculus I	4

**CORE RESEARCH COURSES (10-16 UNITS)**

CORE RESEARCH COURSES (10-16 UNITS)		UNITS
HP 340L	Health Behavior Statistical Methods	4
HP 350L	Health Behavior Research Methods	4
HP 490x	Directed Research 2-8, max 8	

Students must choose 24 units of elective course work from the following lists. At least 8 units must be from HP and at least 8 units must be from IR.

**HP ELECTIVES (MINIMUM 8 UNITS)**

HP ELECTIVES (MINIMUM 8 UNITS)		UNITS
HP 300	Theoretical Principles of Health Behavior	4
HP 400	Culture, Lifestyle, and Health	4
HP 401	Cultural Competence in Medicine: Promoting Health in Diverse Communities	4
HP 402	Maternal and Child Health	4
HP 403	Behavioral Medicine	4
HP 404	Religion and Health	4
HP 405	Sexually Transmitted Diseases: A Global Public Health Priority	4
HP 420	Gender and Minority Health Issues	4
HP 422	AIDS in Society	4
HP 450	Traditional Eastern Medicine and Modern Health	4

IR ELECTIVES (MINIMUM 8 UNITS)		UNITS
IR 305	Managing New Global Challenges	4
IR 306	International Organizations	4
IR 307	Contemporary International Politics	4
IR 308	Globalization: Issues and Controversies	4
IR 315	Ethnicity and Nationalism in World Politics	4
IR 323	Politics of Global Environment	4
IR 325	Rich and Poor States in the World Political Economy	4
IR 371	Global Civil Society: Non-State Actors in World Politics	4
IR 424	Citizenship and Migration in International Politics	4
IR 444	Issues and Theories in Global Society	4
OTHER ELECTIVES (MAXIMUM 8 UNITS)		UNITS
BISC 120Lx	General Biology: Organismal Biology and Evolution, or	
BISC 121L	Advanced General Biology: Organismal Biology and Evolution	4
BISC 320L	Molecular Biology	4
BISC 330L	Biochemistry	4
CHEM 105bL	General Chemistry, or	
CHEM 115bL	Advanced General Chemistry	4
CHEM 322aL	Organic Chemistry	4
CHEM 322bL	Organic Chemistry	4
GERO 483	Global Health and Aging	4
PHYS 135aL	Physics for the Life Sciences, or	
PHYS 151L	Fundamentals of Physics I: Mechanics and Thermodynamics	4
PHYS 135bL	Physics for the Life Sciences, or	
PHYS 152L	Fundamentals of Physics II: Electricity and Magnetism	4
POSC 442	The Politics of Human Differences: Diversity and Discrimination	4
POSC 451	Politics of Resources and Development	4
POSC 456	Women in International Development	4
PPD 250	Third World Cities	4
PPD 382	International Development	4
SOCI 432	Racial and Ethnic Relations in a Global Society	4
SOCI 460	Key Issues in Contemporary International Migration	4
SOCI 470	Development and Social Change in the Third World	4

**Progressive Degree Programs in Preventive Medicine**

The Master of Public Health, the Master of Science in Biostatistics and the Master of Science in Molecular Epidemiology programs admit a limited number of undergraduate students to a progressive degree program which allows them to pursue a master's level degree while completing the bachelor's degree. Applicants to the program must have completed 64 units of course work and must submit their applications prior to the completion of 96 units of course work. Applicants need not submit GRE scores, but are expected to have a minimum GPA of 3.0 at the time of application. The application for admission to a progressive degree program must be accompanied by an approved course plan proposal and two letters of recommendation. The requirements for both the B.S. and the master's degrees must be satisfied, including a minimum of 128 undergraduate units. For further details on progressive degree programs, see page 86.

**Minor in Cinema-Television for the Health Professions**

This minor introduces pre-health students to the theory and techniques of the cinematic arts and to a set of media practices useful for the implementation of health promotion strategies. This minor is designed for students who plan to enter careers or professional programs in medicine after graduation and are interested in working with film and television producers to disseminate accurate health information to the public. It complements major programs such as biological sciences, chemistry, kinesiology, health promotion and disease prevention studies, and environmental studies.

**REQUIRED COURSES (24 UNITS)**

		UNITS
CTCS 190	Introduction to Cinema	4
HP 345	Health Issues in Entertainment Media	4
Two of the following:		
HP 370	Introduction to Epidemiology: Methods and Applications	4
HP 401	Cultural Competence in Medicine	4
HP 408	Environmental Health in the Community	4
HP 410	Issues in Prevention and Cessation of Drug Abuse	4
HP 420	Gender and Minority Health Issues	4
HP 421	Violence as a Public Health Issue	4
HP 422	AIDS in Society	4

Eight additional units from the following:

CTAN 451	History of Animation	2
CTCS 400	Non-Fiction Film and Television	4
CTPR 301	Creating the Non-Fiction Film	4
CTPR 375	Functions of a Director	4
CTPR 385	Colloquium: Motion Picture Production Techniques	4
CTPR 474	Television Documentary Production	4
CTWR 315x	Filmwriting	3
CTWR 412	Introduction to Screenwriting	2
CTWR 416	Motion Picture Script Analysis	2-4

**Minor in Cultural Competence in Medicine**

This minor is designed for students who plan to enter careers or professional programs in medicine after graduation and are interested in using cultural knowledge to provide more effective health care. The minor focuses on cultural differences in the understanding of health, disease, health care and risk factors unique to specific populations. The minor provides a foundation for students who want to become effective health care providers in an increasingly diverse society. It complements major programs such as biological sciences, chemistry, kinesiology and environmental studies.

**REQUIRED COURSES (20 UNITS)**

		UNITS
HP 200	Introduction to Health Promotion and Disease Prevention	4
HP 400	Culture, Lifestyle and Health	4
HP 401	Cultural Competence in Medicine	4
HP 420	Gender and Minority Health Issues	4
One of the following:		
HP 370	Introduction to Epidemiology: Methods and Applications	4
HP 402	Maternal and Child Health	4
HP 408	Environmental Health in the Community	4
HP 410	Issues in Prevention and Cessation of Drug Abuse	4
HP 421	Violence as a Public Health Issue	4
HP 422	AIDS in Society	4
HP 442	Chronic Disease Epidemiology	4
HP 450	Traditional Eastern Medicine and Modern Health	4
HP 460	Adolescent Health	4
PSYC 462	Minority Mental Health	4

**Minor in Global Health**

This minor provides students with a basic understanding of the factors that determine the health of populations around the globe. Curriculum focuses on the cultural, environmental and clinical aspects of various health topics such as maternal and child health, aging, obesity, infectious disease and others. By studying these issues, students from majors across the university will be prepared to assess and contribute to the resolution of emerging global health challenges. This minor will appeal to a wide variety of majors, particularly majors centered on international affairs, business and health care.

REQUIRED COURSES (20 UNITS)		UNITS
HP 270	Introduction to Global Health	4
HP 470	Case Studies in Global Health	4
Three of the following:		
GERO 483	Global Health and Aging	4
HP 400	Culture, Lifestyle, and Health	4
HP 401	Cultural Competence in Medicine	4
HP 402	Maternal and Child Health	4
HP 422	AIDS in Society	4

**Minor in Health Communication**

This minor is designed to appeal to students with a wide range of interests, including those with a general interest in promoting healthy lifestyle practices through effective communication. These students will be prepared to seek jobs in areas such as the managed care industry, hospitals, wellness programs, broadcast and cable companies, and private and governmental agencies, as well as other organizations looking for experts with demonstrated knowledge in health-related fields.

REQUIRED COURSES (20 UNITS)		UNITS
COMM 302	Persuasion	4
COMM 385	Survey of Organizational Communication	4
COMM 443	Health Communication Strategies and Evaluation	4
HP 200	Introduction to Health Promotion and Disease Prevention	4
One of the following:		
COMM 304	Interpersonal Communication	4
COMM 308	Communication and Conflict	4
COMM 315	Health Communication	4
COMM 324	Intercultural Communication	4
COMM 375	Business and Professional Communication	4

COMM 402	Public Communication Campaigns	4
COMM 480	Nonverbal Communication	4
COMM 486	Human and Technological Systems in Organizations	4
HP 370	Introduction to Epidemiology: Methods and Applications	4
HP 400	Culture, Lifestyle, and Health	4
HP 401	Cultural Competence in Medicine	4
HP 402	Maternal and Child Health	4
HP 403	Behavioral Medicine	4
HP 408	Environmental Health in the Community	4
HP 412	Health Promotion and Prevention Policy	4
HP 420	Gender and Minority Health Issues	4
HP 421	Violence as a Public Health Issue	4
HP 422	AIDS in Society	4
HP 430	Obesity and Health	4
HP 442	Chronic Disease Epidemiology	4

**Minor in Public Health**

This minor is designed for students interested in a broad array of health issues. The focus of the minor is on reducing disability and mortality from avoidable injuries and chronic disease, educating the community about healthy lifestyles, assuring access to health care, and measuring changes using various indicators over time. This minor teaches students to meet the challenges of the changing environment of the health care system. It complements a number of majors including psychology, sociology, American studies and ethnicity, biological sciences, economics, environmental studies, kinesiology, gender studies, international relations, philosophy, religion, gerontology and political science.

REQUIRED COURSES (20-24 UNITS*)		UNITS
HP 200	Introduction to Health Promotion and Disease Prevention	4
PPD 330	Introduction to Health Care Systems	4
Three of the following:		
HP 370	Introduction to Epidemiology: Methods and Applications	4
HP 400	Culture, Lifestyle, and Health	4
HP 401	Cultural Competence in Medicine	4
HP 402	Maternal and Child Health	4
HP 403	Behavioral Medicine	4
HP 408	Environmental Health in the Community	4

HP 410	Issues in Prevention and Cessation of Drug Abuse	4
HP 412	Health Promotion and Prevention Policy	4
HP 420	Gender and Minority Health Issues	4
HP 421	Violence as a Public Health Issue	4
HP 422	AIDS in Society	4
HP 430	Obesity and Health	4
HP 441	Health Promotion in the Workplace	4
HP 442	Chronic Disease Epidemiology	4
HP 460	Adolescent Health	4

**Minor in Nutrition and Health Promotion**

This minor is designed to appeal to students interested in nutrition, especially in preparation for graduate study in health-related fields (e.g., medicine, public health) or to enter health-related fields of employment. The focus of the minor is on assessing, planning and evaluating dietary intake of individuals or groups under various conditions of health and disease based upon principles of nutrition and behavioral science. Students in this minor will study factors associated with dietary habits and the development of effective individual and group interventions. It complements majors including psychology, gerontology, biological sciences, chemistry, kinesiology and environmental studies.

REQUIRED COURSES (20 UNITS)		UNITS
HP 230	Nutrition and Health	4
HP 430	Obesity and Health	4
HP 431	Behavior and Education Strategies for Nutrition and Fitness	4

Two of the following:

HP 370	Introduction to Epidemiology: Methods and Applications	4
HP 400	Culture, Lifestyle, and Health	4
HP 401	Cultural Competence in Medicine	4
HP 402	Maternal and Child Health	4
HP 403	Behavioral Medicine	4
HP 412	Health Promotion and Prevention Policy	4
HP 420	Gender and Minority Health Issues	4
HP 432	Clinical Nutrition	4
HP 433	Advanced Topics in Nutrition	4
HP 460	Adolescent Health	4
HP 480	Internship in Health Promotion and Disease Prevention	2-4, max 4
HP 490x	Directed Research	2-8, max 8

**Minor in Substance Abuse Prevention**

This minor offers students an opportunity to gain an overall understanding of substance abuse as a major modifiable risk factor for illness. It allows students to learn theories of behavior change, to understand the issues in prevention and cessation of drug abuse, and to develop, implement, and evaluate intervention strategies. It complements a number of majors including psychology, sociology, American studies and ethnicity, biological science and gerontology.

REQUIRED COURSES (24 UNITS*)		UNITS
HP 200	Introduction to Health Promotion and Disease Prevention	4
HP 300*	Theoretical Principles of Health Behavior (Prerequisite: PSYC 100)	4
HP 410	Issues in Prevention and Cessation of Drug Abuse	4
HP 411	Drug Intervention Program Design and Evaluation	4
One of the following:		
HP 370	Introduction to Epidemiology: Methods and Applications	4
HP 400	Culture, Lifestyle, and Health	4
HP 401	Cultural Competence in Medicine	4
HP 402	Maternal and Child Health	4
HP 403	Behavioral Medicine	4
HP 412	Health Promotion and Prevention Policy	4
HP 421	Violence as a Public Health Issue	4

\*Including prerequisite

**Graduate Programs – Admissions**

*Master of Science in Applied Biostatistics/ Epidemiology*

The department encourages applicants with undergraduate degrees in allied health, pharmacology, public health, medicine, biological and clinical sciences or other related fields. Undergraduate preparation should have included applied statistics, college algebra, an introductory course in calculus and basic computer programming. Applicants should also meet the minimum requirements for admission to the Graduate School. Demonstrated proficiency in the English language is essential. With approval of the Graduate School, applicants not meeting these requirements may be conditionally admitted contingent upon maintaining a GPA of 3.0 for the first 12 units of graduate study.

*Master of Science in Biostatistics*

The department encourages applicants with undergraduate degrees in mathematics, statistics or biostatistics, computer science or other related fields. Undergraduate preparation should have included differential and integral calculus, introduction to mathematical statistics, and basic computer programming. Applicants should also meet the minimum requirements for admission to the Graduate School. Demonstrated proficiency in the English language is essential. With approval of the Graduate School, applicants not meeting these requirements may be conditionally admitted contingent upon maintaining a GPA of 3.0 for the first 12 units of graduate study.

*Master of Science, Molecular Epidemiology*

Students with a bachelor's degree in quantitative biological sciences will be eligible for admission. In addition, the B.A. students must have completed at least one year of general biology, one semester of biochemistry and one semester of statistics to be admitted into the Graduate School. Under unusual circumstances, conditional acceptance will be offered to students who do not meet these requirements — allowing them to complete the missing undergraduate courses prior to their full admission into the Graduate School. An introductory biochemistry class is also available in the School of Pharmacy, which may satisfy the biochemistry prerequisite. A joint departmental admission committee will review all applicants.

*Master of Public Health*

The MPH program has seven tracks: Health Education and Health Promotion, Biostatistics/Epidemiology, Health Communication, Child and Family Health, Global Health Leadership, Public Health Policy and Environmental Health. The curriculum includes a set of core courses for each track and electives. The program also includes an internship placement that integrates academic and practical experiences and prepares individuals to work in governmental and non-governmental organizations in health-related fields.

The department encourages applicants from the USC undergraduate program in health promotion and disease prevention and throughout the campus, as well as health professionals seeking advanced degrees, medical students who are interested in pursuing an MPH along with their medical degree, nurses who desire a more public health focus, pharmacists and dentists. Applicants should meet the minimum requirements for admission to the Graduate School. Demonstrated proficiency in the English language is essential. With approval of the Graduate School, applicants not meeting these requirements may be conditionally admitted contingent upon maintaining a grade point average of 3.0

(A = 4.0) in PM 501, PM 510L and PM 512 (12 units).

*Doctor of Philosophy in Biostatistics*

The department encourages applicants with undergraduate degrees in mathematics, statistics or biostatistics, or other related fields. Undergraduate preparation should have included differential and integral calculus, introduction to mathematical statistics and basic computer programming. Applicants should also meet the minimum requirements for admission to the Graduate School. Demonstrated proficiency in the English language is essential. With approval of the Graduate School, applicants not meeting these requirements may be conditionally admitted contingent upon maintaining a GPA of 3.5 for the first 12 units of graduate study.

*Doctor of Philosophy in Epidemiology*

The department encourages applicants who have undergraduate degrees in allied health, public health, biological sciences or other related fields. Applicants not meeting these requirements may, with approval of the Graduate School, be conditionally admitted contingent upon maintaining a GPA of 3.5 in the first 12 units of graduate studies. Applicants should also meet the minimum requirements for admission to the Graduate School.

*Doctor of Philosophy in Molecular Epidemiology*

The department encourages applicants who have undergraduate or master's degrees in quantitative biological sciences or other related fields. Undergraduate preparation should include at least one year of general biology, one semester of biochemistry and molecular biology, and one semester of applied statistics. The Ph.D. program is designed to train students for future independent research careers in an academic, government or private sector setting. The objective of the Ph.D. program is to produce a molecular epidemiologist with in-depth laboratory, statistical and analytic skills in both epidemiology and the molecular biosciences. To meet this objective, the program introduces students to molecular/laboratory science and research early in their training.

The program will consider applicants who satisfy all requirements for admission to the Graduate School and demonstrate proficiency in the English language. Applicants not meeting Graduate School requirements for regular standing may, with approval of the Graduate School, be conditionally admitted. Regular standing is contingent upon maintaining a GPA of 3.5 in the first 12 units of graduate credit.

A student in one of the division's master's programs in biostatistics, epidemiology or molecular epidemiology may be considered for either the Ph.D. in biostatistics, epidemiology or molecular epidemiology prior to completing the M.S. degree, providing he or she has met the requirements for admission to the Ph.D. program, obtained approval of the department's Admission Committee, demonstrated research and writing ability, and passed the doctoral-level screening examination. For further information contact: Mary Trujillo, Program Coordinator, Keck School of Medicine, Department of Preventive Medicine, Division of Biostatistics, Center for Health Professions 222, 1540 Alcazar Street, Los Angeles, CA 90089-9010, (323) 442-1810, FAX: (323) 442-2993.

*Doctor of Philosophy in Preventive Medicine (Health Behavior Research)*

Applicants must have a bachelor's degree from an accredited institution; students entering with an advanced degree may be eligible to transfer course credit. Applicants should also meet the minimum requirements for admission to the Graduate School.

Applicants must supply a completed application for graduate studies, including transcripts from all institutions previously attended, a curriculum vitae (if available), a statement of interest, and three letters of recommendation. For further information contact: Director for Graduate Studies, USC Institute for Health Promotion and Disease Prevention Research, 1000 S. Fremont Avenue, Alhambra, CA 91803, (323) 442-2605, (626) 457-4012, FAX: (323) 442-2601.

*Doctor of Philosophy in Statistical Genetics and Genetic Epidemiology*

This program is designed to train students for future independent research careers in an academic, government or private sector setting. The department encourages applicants who have undergraduate or master's degrees in mathematics, statistics or biostatistics; statistical genetics or quantitative biological sciences; or other related fields. The program will consider applicants who satisfy all requirements for admission to the Graduate School and demonstrate proficiency in the English language.

**Master of Science in Applied Biostatistics/Epidemiology**

*Course Requirements*

General requirements include at least 37 units of required courses as follows: 24 units of core courses and at least 9 units of elective courses. In addition, each student must register for four units of 594ab Thesis and write a master's thesis.

CORE COURSES (24 UNITS)			UNITS	CORE COURSES (26 UNITS)			UNITS

Electives will be determined by the student's needs and interests and will be approved by the student's adviser. When appropriate, courses not listed above may be chosen with approval of the student's adviser. Sufficient familiarity in computer languages to operate major software packages for data management and analysis is required.

*Thesis Requirement*

A master's thesis is required of all students. This thesis consists of a research project approved by the faculty and chosen from problems encountered within the department, in other departments of the Keck School of Medicine or university or elsewhere in the community.

**Master of Science in Biostatistics**

*Course Requirements*

General requirements include at least 37 units of required courses as follows: 26 units of core courses and at least 7 units of elective courses. Each student must also register for four units of 594ab Thesis and write a master's thesis.

The student's choice of elective courses will be directed by needs and interests and must be approved by the student's graduate adviser. When appropriate, elective courses not listed above may be substituted with approval of the adviser. Sufficient familiarity in computer languages to operate major software packages for data management and analysis is required.

*Thesis Requirement*

A master's thesis is required of all students. This thesis consists of a research project approved by the faculty and chosen from problems encountered within the department, in other departments of the Keck School of Medicine or university or elsewhere in the community.

**Master of Science in Molecular Epidemiology**

*Course Requirements*

The M.S. program requires 37 graduate-level units with a minimum grade point average of 3.0 including epidemiology core courses, 14 units; molecular biology core courses, 12 units; at least 3 elective units; laboratory research plus thesis, 8 units. Students must also complete a master's thesis.

*Prerequisite:* PM 510 Principles of Biostatistics

EPIDEMIOLOGY CORE COURSES (14 UNITS)		UNITS
PM 511aL	Data Analysis	4
PM 512	Principles of Epidemiology	4
PM 518a	Statistical Methods for Epidemiological Studies	3
PM 533	Genetic and Molecular Epidemiology	3
MOLECULAR BIOLOGY CORE COURSES (12 UNITS)		UNITS
BIOC 543	Human Molecular Genetics	4
INTD 504	Molecular Biology of Cancer, or	
INTD 555	Biochemical and Molecular Basis of Disease	4
INTD 571	Biochemistry	4
ELECTIVES (AT LEAST 3 UNITS)		UNITS
INTD 561	Molecular Genetics/Biology	4
PM 517a	Research Methods in Epidemiology	3
PM 523	Design of Clinical Studies	3
LABORATORY RESEARCH + THESIS (8 UNITS)		UNITS
DPT 590abcd	Directed Research	1-1-1-1
DPT 594ab	Thesis	2-2

(1) DPT refers to the department offering the laboratory/directed research experience and thesis supervision. DPT is one of the following departments (but not restricted to): PM, BIOC, PATH.

(2) Laboratories should expose students to: statistical and epidemiological methods, molecular techniques, human genetics, population-based studies.

**Master of Public Health**

*Course Requirements*

The master's degree program in public health (MPH) requires a minimum of 43-47 semester units of required and elective graduate study.

CORE REQUIREMENTS		UNITS
PM 501	Foundations in Health Education and Promotion	4
PM 508	Health Service Delivery in the U.S., or	
PM 509	Comparative Health Care Systems	4
PM 510L	Principles of Biostatistics	4
PM 512	Principles of Epidemiology	4
PM 529	Environmental Health: An Epidemiological Approach	4

In addition, at least another 24 to 28 units including the practicum must be completed in a selected track of either health education and health promotion, biostatistics/epidemiology, health communication, child and family health, global health leadership, public health policy, or environmental health.

*Track 1: Health Education and Health Promotion*

REQUIRED COURSES (12 UNITS)		UNITS
PM 526*	Communication in Public Health, or	
PM 562*	Intervention Approaches for Health Promotion and Disease Prevention	4
PM 528	Program Design and Evaluation	4
PM 563	Organizing and Mobilizing Communities for Global Health	4

At least 4 units from: PM 505, PM 514, PM 525, PM 526\*, PM 530, PM 536, PM 562\*, PM 564 (4 unit courses)

At least 3 units from any 500- or 600-level course

And 8 units of a practicum (PM 593) ending in a final report.

\*May not receive credit for both track core and track elective category.

*Track 2: Biostatistics/Epidemiology*

REQUIRED COURSES (AT LEAST 10 UNITS)		UNITS
PM 511aL	Data Analysis	4
Select two courses from the following:		
PM 527*	Epidemiology of Infectious Disease	3
PM 536*	Program Evaluation and Research	4
PM 537*	Chronic Disease Epidemiology	3

At least 6 units from: PM 511bL, PM 514, PM 517ab, PM 518ab, PM 530, PM 532, PM 536\*, PM 542, PM 546, PM 558 (4 unit courses); PM 515, PM 523, PM 527\*, PM 537\*, PM 538, PM 586 (3 unit courses)

At least 3 units from any 500- or 600-level course

And 8 units of a practicum (PM 593) ending in a final report.

\*May not receive credit for both track core and track elective category.

The elective courses will be directed by the student's needs and interests and must be approved by the student's graduate adviser. Sufficient familiarity in computer languages to operate major software packages for data management and analysis is required.

*Track 3: Health Communication*

REQUIRED COURSES (8 UNITS)		UNITS
PM 526	Communications in Public Health	4
PM 536	Program Evaluation and Research	4

At least 8 units from:

CMGT 510, CMGT 511, CMGT 528, CMGT 583, CMGT 587 (4 unit courses); PM 530, PM 542, PM 562 (4 unit courses); JOUR 508, JOUR 536 (3 unit courses)

At least 3 units from any 500- or 600-level course

And 8 units of a practicum (PM 593) ending in a final report.

*Track 4: Child and Family Health*

REQUIRED COURSES (12 UNITS)		UNITS
PM 528	Program Design and Evaluation	4
PM 580	Foundations of Child Health	4
PM 585	Child Health Policy	4

At least 4 units from: PM 530, PM 540, PM 581, PM 582, PM 583, PM 584, PM 585 (4 unit courses)

At least 3 units from any 500- or 600-level course

And 8 units of a practicum (PM 593) ending in a final report.

*Track 5: Global Health Leadership*

REQUIRED COURSES (12 UNITS)		UNITS
PM 525	Culture and Health: An International Perspective	4
PM 564	Public Health Leadership and Management	4
PM 565	Emerging Trends in Global Health: A Public Health Seminar	4

At least 4 units from:  
CMGT 583, PM 530, PM 557, PM 563, PM 566,  
PM 567, PM 568 (4 unit courses)

At least 3 units from any 500- or 600-level course

And 8 units of a practicum (PM 593) ending in  
a final report.

#### Track 6: Public Health Policy

REQUIRED COURSES (16 UNITS)		UNITS
PM 547	Public Health Policy and Politics	4
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 555	Public Policy Formulation and Implementation	4
PPD 560	Methods for Policy Analysis	4

At least 2 units from: PM 514, PM 528, PM 530,  
PM 536, PM 542, PM 548, PM 555, PM 585,  
PPD 513, PPD 514, PPD 542, or PPD 560

At least 1 unit from any 500- or 600- level course

And 8 units of a practicum (PM 593) ending in  
a final report

#### Track 7: Environmental Health

REQUIRED COURSES (12 UNITS)		UNITS
PM 553	Human Exposure Assessment for Public Health	4
PM 554	Biological Effects of Environmental Toxins	4
PM 555	Environmental Health, Policy and Practice	4

At least 4 units from: PM 530, PM 556, PM 557,  
PM 558

At least 3 units from any 500- or 600-level  
course

And 8 units of a practicum (PM 593) ending  
in a final report

The elective courses will be directed by the  
student's needs and interests and must be  
approved by the student's graduate adviser.

#### Practicum Requirement

A practicum, PM 593, is required of all stu-  
dents as part of the culminating experience  
to the master's program. It is provided by an  
internship rotation through an area of public  
health practice in a county, state, federal or  
community-based agency. The practicum  
offers students the opportunity to observe  
as well as participate in applying their newly  
acquired skills and tools. All students are  
expected to participate in at least one inter-  
ship and attend a corresponding seminar.  
An electronic portfolio describing the project

and evaluating the outcomes completes the  
course requirement.

#### Criteria

Students enrolled in one of the MPH  
professional dual degree programs (e.g.,  
M.D./MPH, Pharm.D./MPH, DPT/ MPH,  
and Ph.D. (Clinical Psychology)/ MPH, MPI/  
MPH) may waive 4 units of the practicum  
requirement and thus are required a mini-  
mum of 43 units to graduate. All other stu-  
dents must complete a minimum of 47 units  
to graduate.

#### Doctor of Philosophy in Psychology (Clinical)/Master of Public Health (Health Promotion)

The Ph.D./MPH dual degree combines  
knowledge of clinical psychology research  
and practice with an understanding of health  
from a population perspective. The student  
enrolls primarily in the clinical psychology  
doctoral program and may apply to the MPH  
program during the first year. During the  
second and subsequent years, course work  
is taken in both programs. The dissertation  
is undertaken through the Department of  
Psychology.

#### Pharm.D./Master of Public Health

The School of Pharmacy and the Master of  
Public Health program, in recognition of the  
rapidly changing health care environment  
and in response to the growing demand for  
pharmacists who are knowledgeable in both  
pharmacy and population-based health care  
issues, have developed a dual degree pro-  
gram. The joint Pharm.D./MPH degree  
will enable graduates to be more responsive  
to today's health care needs and will provide  
training for pharmacists who seek to be  
agents of change within the profession and to  
assume leadership roles in the pharmacy field  
and in public health at the local, state and  
national levels.

The Pharm.D./MPH program spans five  
years (four years of pharmacy school courses  
and one year of public health courses).  
Students begin the core MPH courses follow-  
ing the successful completion of the first year  
of pharmacy school. The last three years of  
the program are devoted to the clinical rota-  
tions of the School of Pharmacy and to the  
completion of the elective courses and practi-  
cum (field experience) of the MPH program.

All students in the Pharm.D./MPH program  
must meet course requirements, grade point  
average requirements and program residency  
requirements of both programs. Students must  
have a cumulative GPA of 3.0 in the Pharm.D.  
curriculum and a 3.0 in the MPH curriculum  
to meet graduation requirements.

The Pharm.D. and the MPH degrees are  
awarded simultaneously upon completion of  
the School of Pharmacy and the Master of  
Public Health requirements.

#### Application and Admissions Requirements

Students may apply to the dual Pharm.D./  
MPH degree program in two ways. First,  
they may apply at the time they submit  
their Pharm.D. application by concurrently  
submitting applications to both programs.  
Students who elect this approach must iden-  
tify themselves on both applications as poten-  
tial dual degree students. Students admitted  
to both programs will be offered admission to  
the Pharm.D. and will be offered admission  
to the dual degree program contingent on  
passing all courses in their first year of  
the Pharm.D. with a minimum 3.0 G.P.A.  
Students who are accepted only by one pro-  
gram may choose to attend that program  
but will not be eligible for the dual degree.  
Second, students can apply to the dual degree  
by submitting an application to the MPH  
program during their first year of enrollment  
in the Pharm.D. prior to the MPH published  
application deadline. Students who elect this  
approach must apply through the School of  
Pharmacy. Students admitted to the MPH  
program using this approach will be offered  
admission to the dual degree contingent  
on passing all courses in their first year of  
the Pharm.D. with a minimum 3.0 G.P.A.  
Students accepted to the dual degree pro-  
gram must maintain a minimum 3.0 G.P.A. in  
Public Health and Pharm.D. courses.

#### Master of Planning/Master of Public Health

The Master of Planning/ Master of Public  
Health (MPI/MPH) dual degree is designed  
for individuals who envision a career that  
combines urban planning and public health  
disciplines. This dual degree combines the  
knowledge of urban planning with an under-  
standing of health from a population perspec-  
tive. It will provide training for planning,  
evaluating and guiding healthy community  
and urban development, and will enable  
graduates who seek to be agents of change  
within the profession to assume leadership  
roles in planning and in public health at  
the local, state and national levels. A total  
of 79 units are required for the dual degree.  
For further information about dual degree  
requirements, see the Price School of Public  
Policy, page 897.

#### Master of Social Work/Master of Public Health

The Master of Social Work/Master of Public  
Health (MSW/MPH) dual degree offers the  
student interdisciplinary preparation in the  
fields of public health and social work lead-  
ing to the Master of Social Work (MSW) and  
Master of Public Health (MPH) degrees.

The dual degree program is a collaborative effort between the School of Social Work and the Department of Preventive Medicine in the Keck School of Medicine. The objectives of the program are to provide students with the knowledge and skills necessary to promote health, prevent disease, and enhance the delivery of health and social services in the community. Students will build interdisciplinary skills and an interdisciplinary professional identity by developing an understanding of the breadth of each field and their interface, while permitting concentration in particular specialization areas. The program prepares graduates for work in a variety of interdisciplinary settings; and for some, it will provide the basis for doctoral study.

Students must complete a minimum of 81 units: 45 units in social work and 36 units in preventive medicine; 16 of these units fulfill requirements for both degrees. Depending on specific social work concentration and public health track requirements, there may be additional courses and an increase in the total number of units. Most students complete both program requirements over three years for full-time students; however, the program can be completed in two years if the student takes a full course load during the two summer sessions. Dual degree students in this program complete the standard foundation year courses during the first year in the School of Social Work with the exception of SOWK 562 Social Work Research. Students may select any one of the social work concentrations: community organization, planning and administration (COPA); families and children; health; mental health; and work and life and any one of the public health tracks: health education and promotion; biostatistics/epidemiology; health communication; child and family health; global health leadership; and public health policy.

#### **M.D./Master of Public Health**

The joint M.D./MPH program at the Keck School of Medicine is designed for individuals who envision a medical career that combines public health and medical disciplines. For further information about the joint program, refer to page 760.

#### **Doctor of Physical Therapy/Master of Public Health**

The Post Professional Doctor of Physical Therapy (DPT) and the Master of Public Health (MPH) dual degree program offers the opportunity for physical therapy clinicians to pursue a doctoral-level education in combination with an integrated approach to health care. The program spans four years. Students begin the first one to two years completing MPH core and elective course work in the Department of Preventive Medicine. The remaining two years are devoted to program requirements in physical therapy.

#### **Doctor of Philosophy in Biostatistics**

The department offers a degree program leading to the Ph.D. in biostatistics. The program is designed to produce biostatisticians who will have in-depth knowledge of statistical theory and methodology and the ability to apply this knowledge creatively to statistical problems in the biological and health sciences.

##### *Course Requirements*

A minimum of 60 units of graduate study is required for the Ph.D. degree; a maximum of 19 of these units may be from research and dissertation. In preparation for the screening examination, all students must take the required and elective courses for the M.S. in Biostatistics (33 units). In preparation for the qualifying examination, all students are required to take PM 610 (at least two semesters). The student is also required to take at least six units from the following sequence: PM 543L, PM 544L, PM 550 or PM 552.

##### *Screening Procedure*

A student failing the screening examination will either terminate or will terminate with the M.S. degree upon completion of an acceptable thesis.

##### *Guidance Committee*

A formal guidance committee consisting of five faculty members — four from within the department (one of whom is designated as chair), and one from an outside department offering the Ph.D. degree — will recommend courses in preparation for the qualifying examination.

##### *Qualifying Examination*

The qualifying examination will test the student's integration of knowledge in biostatistics, mathematical statistics and the health sciences. An oral examination will ascertain the student's competence in orally communicating this knowledge. Students must pass the written portions and the oral portions in order to pass the qualifying examination.

##### *Dissertation and Oral Defense*

Upon passing the qualifying examination the Ph.D. candidate and his or her chair will recommend a three-member dissertation committee. The dissertation should be completed within two years and should be oriented toward a theoretical-methodological application to a problem area in the biological or health sciences. The oral defense is based on a rough draft or final version of the dissertation. The defense is administered by the dissertation committee, with other faculty invited to attend.

#### **Doctor of Philosophy in Epidemiology**

The department offers a degree leading to the Ph.D. in epidemiology. This program may be an extension of the applied biostatistics and epidemiology M.S. program and is especially aimed at persons with a strong background in medicine: in particular, students enrolled in the M.D. program of the Keck School of Medicine who wish to interrupt their M.D. studies after two years to complete a Ph.D. degree. This program is designed to produce an epidemiologist with in-depth statistical skills. The program requires a solid core of courses in methodological aspects of statistics and in statistical thinking as applied to medicine, as well as a solid grounding in epidemiological methods and in certain medical disciplines.

##### *Course Requirements*

A minimum of 60 course units with a maximum of 20 units of research and dissertation; passing of screening and qualifying examinations; and completion of dissertation and final oral are required. In preparation for the screening examination the student must take the required core course and elective 33 units of master's level applied biostatistics and epidemiology courses. A student failing the screening examination will either terminate or terminate with the M.S. degree upon satisfactory completion of a master's thesis. In preparation for the qualifying examination, the student is required to join an on-going research project under the direction of the chair of the guidance committee and directly participate in the conduct of that project. Credit will be given as PM 790 (4 units, two semesters). In addition, it is recommended that the student take PM 610 (at least two semesters). Electives may be selected with the approval of the chair of the guidance committee from courses in the biological sciences or from the medical school. For students in the M.D./Ph.D. program in epidemiology, satisfactory completion of the first two years of the M.D. program will be considered to provide 20 units toward the Ph.D. degree.

##### *Guidance Committee*

A formal guidance committee, consisting of five faculty members, with at least three from the Department of Preventive Medicine (one designated as chair) and one from a department offering a Ph.D. outside of the Department of Preventive Medicine, will recommend courses in preparation for the qualifying examination.

*Qualifying Examination*

The written portion of the qualifying examination will test the student's integration of knowledge in biostatistics and medicine. In general, the qualifying examination will present plans for implementation and completion of three components: an independent and complete data analysis arising from ongoing epidemiological study, a "review" paper on an area of epidemiological research, and a grant application for a new epidemiological study.

*Dissertation*

Upon passing the qualifying examination, the Ph.D. candidate and his or her chair will recommend a three-member dissertation committee. The dissertation should be completed within two years and should be oriented toward a methodological application to a problem area in the biological or health sciences.

*The Oral Defense*

This examination is based on a draft or final version of the dissertation and will be administered by the dissertation committee with other faculty invited to attend.

*Language and Other Requirements*

Proficiency in the English language is essential.

**Doctor of Philosophy in Molecular Epidemiology**

The Doctor of Philosophy in molecular epidemiology combines molecular and population-based research. The objective of the Ph.D. program is to produce a molecular epidemiologist with in-depth laboratory, statistical and analytical skills in both epidemiology and the molecular biosciences. Applicants who have undergraduate or master's degrees in quantitative biological sciences or other related fields and graduate students in the PIBBS program at USC are encouraged to apply. The program is jointly administered by the Departments of Preventive Medicine and Biochemistry and Molecular Biology.

*Course Requirements*

Students must complete a minimum of 60 units, with a maximum of 20 units of research and dissertation; pass screening and qualifying examinations; complete the dissertation and the dissertation defense examination. In addition the student is required to join a research project under the direction of one or both of the chairs of the guidance committee and directly participate in the conduct of that project. Credit will be given by the department (DPT) conducting the research project DPT 790 Research (4 units, 2 semesters). In addition, at least two semesters of PM 610 is recommended.

*Prerequisites:* PM 510 Principles of Biostatistics or the equivalent. INTD 571 Biochemistry or the equivalent.

*Biochemistry and Molecular Biology Core Courses (16 units):* BIOC 543, INTD 531, INTD 561, INTD 504 or INTD 555.

*Preventive Medicine Core Courses (17 units):* PM 522aL, PM 512, PM 517a, PM 518a, PM 533.

*Suggested Electives (at least 7 units) from:* MICB 551, PM 511bL, PM 517b, PM 523, PM 527, PM 529 and PM 534.

*Preparation for Screening Examination*

The screening examination will be taken after two years in the program. Prior to the screening examination a mentor who will serve on the guidance committee must be identified. The screening examination will consist of a written component and an oral component. The written component will be drawn from the core courses. A student failing the screening examination may be given a second opportunity to retake either one or both portions. Students failing the examination for the second time will terminate with the M.S. degree upon satisfactory completion of 37 units and an acceptable master's thesis.

*Annual Research Appraisal (ARA)*

Beginning in the second year, each student must register for PM 610 (1 unit) and present an annual progress report to the program oversight committee. Once a dissertation topic has been selected, the annual progress report is presented to the student's guidance committee. Once the student has passed the qualifying examination and is appointed to candidacy, the annual progress report is presented to the student's dissertation committee. The student will meet annually with the dissertation committee, until he or she graduates from the program. The oral portion of the screening examination as well as the qualifying examination and the defense examination will count as ARAs.

*Guidance Committee*

A formal guidance committee will be formed, consisting of five faculty members: two from the Department of Preventive Medicine (one member designated as co-chair); two from the basic science departments (one designated as co-chair with an appointment in biochemistry and molecular biology) and one from an outside department offering a Ph.D. degree (neither preventive medicine or biochemistry and molecular biology). The guidance committee will recommend courses in preparation for the qualifying examination based on the student's research and dissertation topic.

*Qualifying Examination*

The dissertation topic should be both population-based and functional-based; the molecular/epidemiological nature of the dissertation topic must be agreed on by the guidance committee co-chairs.

*Dissertation and Oral Defense*

Upon passing the qualifying examination, the Ph.D. candidate and his or her chair will recommend a dissertation committee (typically all five members of the guidance committee). However, the university requires only three members; a three-member dissertation committee must consist of the co-chairs and the outside member. The dissertation should be completed within two years of the qualifying examination. The oral defense examination is based on the final version of the dissertation and will be administered by the dissertation committee and other invited faculty and students. The defense examination should contain a summary of the review article, the completed research and data analyses and the finalized grant proposal.

**Doctor of Philosophy in Preventive Medicine (Health Behavior Research)**

The Department of Preventive Medicine, Division of Health Behavior Research, offers a degree program in preventive medicine (health behavior), leading to attainment of the Ph.D. The program is designed to train exceptional researchers and scholars in the multidisciplinary field of health behavior research. Students receive a thorough grounding in academic and research experience, encompassing theoretical and methodological training in such allied fields as communication, psychology, preventive medicine, biostatistics, public health and epidemiology. Students receive research experience by participating in projects conducted through the USC Institute for Health Promotion and Disease Prevention Research (IPR). The doctoral program is full-time: students are expected to enroll for fall, spring and summer semesters.

*Assistantships*

Financial and educational support is provided to qualified doctoral students in health behavior research. Graduate (research and/or teaching) assistantships are half-time (20 hours per week) and provide tuition remission as well as a monthly stipend.

*Computer Language Requirement*

Sufficient familiarity in computer languages to operate major software packages for data management and analysis is required.

**Course Requirements**

The doctoral program in health behavior research is structured as a four to five year course of study for students entering with a bachelor's degree. Time requirements are subject to review and approval by the division's Graduate Program Committee and the Graduate School.

A total of 60 units of graduate study is required for the Ph.D. in health behavior research. Students are required to complete nine core courses: PM 500, PM 511abL, PM 515, PM 530, PM 601, PM 602, PM 604 and PM 756 (total of 37 units). Other requirements include: two elective PM courses, one not offered by health behavior faculty (minimum of 7 units); and a minimum of 4 units each in PM 590, PM 690abcdz, PM 790 and PM 794abcdz.

For students entering with a bachelor's degree, one of the directed research projects will be equivalent in scope to a master's thesis. All research experiences/projects must be completed before registering for 794abcdz Doctoral Dissertation.

**Screening Procedure**

The progress of each student is reviewed at the end of every academic year. At the end of the second year of study, students who have not made satisfactory progress are advised that they will be dropped from the program unless their progress improves during their second year.

**Guidance Committee**

Each student's guidance committee consists of five members, including: no more than three health behavior faculty members; one other member from the Department of Preventive Medicine; and one member from a doctorate-granting program outside the Department of Preventive Medicine, representing the student's minor field.

**Qualifying Examination**

Following course work and prior to beginning the dissertation, students must demonstrate written and oral mastery of the general field of health behavior research as well as of their chosen area of specialization. The qualifying process includes a written examination on theory and literature relevant to a selected content area. The examination is administered by the student's guidance committee.

In addition to the qualifying examination, each student is expected to produce the following as evidence of qualification to conduct dissertation research: an academic dossier consisting of a summary of the student's academic record, teaching and research experience, and professional presentations and publications; at least one original empirical research paper of publishable quality,

produced in connection with one of the student's courses or research experiences or developed independently; a dissertation proposal; and an oral defense of all the preceding materials.

**Doctor of Philosophy in Statistical Genetics and Genetic Epidemiology**

The program gives students a solid background in the methodological aspects of biostatistics and statistical genetics as well as solid grounding in molecular/laboratory science. The objective of the Ph.D. program is to produce a statistical geneticist or genetic epidemiologist with in-depth statistical and analytic skills in biostatistics, computational methods and the molecular biosciences. The program combines biostatistics, epidemiology, statistical and molecular genetics and computational methods in order to develop new and cutting-edge statistical methodology appropriate for human genomic studies.

**Course Requirements**

Graduation requires the completion of a minimum of 60 units, with a maximum of 20 units of research and dissertation, passing of screening and qualifying examinations, completion of the dissertation and the dissertation defense examination. Because the background of applicants varies widely, the program oversight committee consults with each student to design an individualized schedule of recommended courses. Electives may be selected (with the approval of the chair) from courses in preventive medicine, biological sciences, mathematics, and computational biology. For students in the M.D./Ph.D. program in statistical genetics and genetic epidemiology, satisfactory completion of the first two years of the M.D. program will be considered to provide 20 units toward the Ph.D. degree. After passing the screening examination, each student should register for at least two semesters of PM 610. Prior to passing the qualifying exam, each student must present an annual progress report (the Annual Research Appraisal, ARA) to the program oversight committee.

CORE COURSES (25-26 UNITS)		UNITS
PM 511abL	Data Analysis	4-4
PM 518a	Statistical Methods for Epidemiological Studies I	3
PM 522a	Introduction to Theory of Biostatistics (E), or	4
MATH 541a	Introduction to Mathematical Statistics (S)	3
PM 533	Genetic and Molecular Epidemiology	3
PM 534	Statistical Genetics	4
PM 570	Statistical Methods in Human Genetics	4

RECOMMENDED ELECTIVE COURSES		UNITS
BISC 478	Computational Genome Analysis (S, E)	4
BISC 505	Genomics and Molecular Genetics (S, E)	4
BIOC 543	Human Molecular Genetics (S, E)	4
INTD 504	Molecular Biology of Cancer (E)	4
INTD 531	Cell Biology (E)	4
INTD 555	Biochemical and Molecular Bases of Disease (E)	4
INTD 561	Molecular Genetics (E)	4
INTD 571	Biochemistry (E)	4
MATH 505a	Applied Probability (S)	3
MATH 541ab	Introduction to Mathematical Statistics (S)	3-3
MATH 577ab	Computational Molecular Biology Laboratory (S)	2-2
MATH 578	DNA and Protein Sequence Analysis (S)	3
PM 510L	Principles of Biostatistics (S, E)	4
PM 512	Principles of Epidemiology (S, E)	4
PM 517ab	Research Methods in Epidemiology (E)	3-3
PM 520L	Advanced Statistical Computing (S)	3
PM 538	Introduction to Biomedical Informatics (S, E)	3
PM 544L	Multivariate Analysis (S)	3
PM 610	Seminar in Biostatistics/Epidemiology (S, E) 1, max 4	
PM 611	Advanced Topics in Epidemiology (S, E)	3

(S) Statistical genetics track  
(E) Genetic epidemiology track

**Screening Procedure**

The screening examination will be taken after two years in the program. Prior to the screening examination, a mentor who will serve on the guidance committee must be identified. The screening examination will consist of a written and oral component. The written component is a two-day examination that tests the student's knowledge of both theory and applications, drawn from the core courses. The oral portion comprises a one-hour presentation of a research plan that encompasses the student's own ideas and will constitute the annual research appraisal. A student failing the screening examination may be given a second opportunity to retake either one or both portions of the screening examination. Students failing the examination for the second time will terminate with the M.S. in Applied Biostatistics and Epidemiology upon satisfactory completion of 37 units (33 course units and 4 units of PM 594ab) and an acceptable master's thesis.

*Guidance Committee*

A formal guidance committee will be formed, consisting of five faculty members; at least one member from the Department of Preventive Medicine designated as chair, and one from an outside department offering a Ph.D. degree. The guidance committee will recommend courses in preparation for the qualifying examination based on the student's research and dissertation topic.

*Qualifying Examination*

Prior to the qualifying examination, a written draft of the dissertation proposal must be submitted to the Guidance Committee. The dissertation topic should be both population-based and functionally-based. The dissertation for the statistical genetics track will typically consist of (a) a "review" paper on current statistical genetic methods, (b) a proposal for a new methodological approach, (c) evaluation of the new methodological

approach from a theoretical and/or computational perspective, and (d) application to real data arising from genetic research. Typically, the dissertation proposal should contain a near-completed draft of (a) and (b) and preliminary results from (c) and (d).

The dissertation for the genetic epidemiology track will typically consist of: (a) a "review" paper on an area of genetic epidemiological research, (b) an independent and complete data analysis arising from an ongoing genetic epidemiological study and (c) a grant application for a new genetic epidemiological study. The review paper (a) typically will provide the rationale and context for the data analysis (b). Typically, the dissertation proposal should contain a nearly completed draft of (a), preliminary results from (b) and preliminary plans for (c).

*Dissertation and Oral Defense*

Upon passing the qualifying examination, the Ph.D. candidate and his or her chair will recommend a dissertation committee (typically all five members of the guidance committee; however, the university requires only three members. (A three-member dissertation committee must consist of the chair and the outside members). The dissertation should be completed within two years of the qualifying examination. The oral defense examination is based on the final version of the dissertation and will be administered by the dissertation committee and other invited faculty and students.

## Courses of Instruction

### HEALTH PROMOTION AND DISEASE PREVENTION STUDIES (HP)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

**HP 101 Current Issues in Medical Education and Healthcare (2, Sp)** Current critical issues in healthcare delivery; strategies to succeed in medical school and as physicians.

**HP 200 Introduction to Health Promotion and Disease Prevention (4, Fa)** Introduction to strategies for promoting health and wellness. Includes self monitoring of health risk behavior, goal setting, and behavior changes.

**HP 230 Nutrition and Health (4, FaSp)** Nutrition as it relates to health promotion across the lifespan and disease prevention. Discussion of nutrients, factors affecting food choices, food safety and global nutrition issues.

**HP 270 Introduction to Global Health (4, Fa)** Introduction to concepts of global health and disease control. Issues of globalization, global governance, emerging diseases, infectious disease treatment, and outbreak challenges.

**HP 290 Introduction to Research Apprenticeship (2, max 8, FaSp)** Individual research apprenticeship in health related fields under supervision of a departmental faculty member. Graded CR/NC.

**HP 300 Theoretical Principles of Health Behavior (4, FaSp)** Overview and analysis of predictors and consequences of health-related behaviors; theoretical viewpoints and strategies for behavior change. *Recommended preparation:* HP 200; *prerequisite:* PSYC 100.

**HP 320 Biological and Behavioral Basis of Disease (4, FaSp)** Examination of the major systems of the human body; disease processes and behavioral risk factors. *Prerequisite:* BISC 220L or BISC 221L.

**HP 340L Health Behavior Statistical Methods (4, FaSp)** Intermediate statistics for health behavior studies; topics include descriptive statistics, hypothesis testing, correlation and regression, and use of computer software in data analysis.

**HP 345 Health Issues in Entertainment Media (4, FaSpSm)** Study of major chronic illnesses and their risk factors as a foundation for discussions about the portrayal of health and illness in entertainment media. (Duplicates credit in the former CNTV 345.)

**HP 350L Health Behavior Research Methods (4, FaSp)** Introduction to the design, conduct and evaluation of health behavior research studies; quantitative and qualitative approaches to research and analysis. *Recommended preparation:* HP 340L.

**HP 370 Introduction to Epidemiology: Methods and Applications (4)** Examines the primary goals and methods of epidemiology, the study of factors that influence health and disease in individuals and populations.

**HP 400m Culture, Lifestyle, and Health (4, Sp)** Comparison of national and international differences in health status as influenced by cultural practices and lifestyles within geographic, economic and political environments.

**HP 401 Cultural Competence in Medicine (4, Fa)** Systematic development of specific professional skills for providing effective, culturally sensitive health services to diverse populations. *Recommended preparation:* ANTH 101.

**HP 402 Maternal and Child Health (4, Sp)** Health issues of women of childbearing age from pre-pregnancy through the postpartum period, and of children from their development in utero through early adolescence. *Recommended preparation:* PSYC 100.

**HP 403 Behavioral Medicine (4, Sp)** Examines behavioral risk factors for illness, health-enhancing and health-compromising behaviors, stress/coping in promoting health and preventing illness, and behavioral management of chronic illness. *Prerequisite:* PSYC 100.

**HP 404 Religion and Health (4, Fa)** Differential relationships of religiosity and spirituality with health and risk behaviors, physical and mental health outcomes, coping skills and well-being across cultures and religions.

**HP 405 Sexually Transmitted Diseases:**

**A Global Public Health Priority (4)** An overview of the magnitude and impact of STDs including prevention, diagnosis, and treatment of common STDs, STD/HIV inter-relationship, global burden, trends, public health challenges, and STD/HIV prevention and control strategies and programs worldwide.

**HP 408 Environmental Health in the Community (4)**

Survey of occupational and environmental health. Introduction to epidemiology, exposure assessment, toxicology, policy development, risk assessment, and effects of urban development on health.

**HP 410 Issues in Prevention and Cessation of Drug Abuse (4, Sp)**

Examination of factors related to drug abuse behaviors; overview and assessment of drug abuse prevention and cessation programs; relapse prevention programs. *Recommended preparation:* HP 300.

**HP 411 Drug Intervention Program Design and Evaluation (4, Sp)**

Strategies for drug abuse prevention and intervention; introduction to techniques and research methods used in designing, conducting, and evaluating drug abuse prevention programs. *Recommended preparation:* HP 410.

**HP 412 Health Promotion and Prevention Policy (4, Sp)**

Overview of health promotion and drug prevention policy at local, state, and federal levels; methods for evaluating policy effectiveness and cost effectiveness.

**HP 420m Gender and Minority Health Issues (4, Fa)**

Examines the nature and roots of health disparities among women, men, and different ethnic and age groups; methods for reducing such disparities; strategies for prevention services.

**HP 421 Violence as a Public Health Issue (4, Fa)**

Patterns and prevalence of violence; psychosocial, environmental, and biological influences on violent behavior; youth gangs; drugs and violence; family violence; and prevention and intervention strategies.

**HP 422 AIDS in Society (4, Sp)** Provides a broad examination of issues in HIV/AIDS, including behavioral, social, biological, clinical and ethical dimensions of the pandemic in the U.S. and elsewhere.

**HP 430 Obesity and Health (4, Fa)** Examination of causes and consequences of obesity, with emphasis on health risks of type II diabetes and cardiovascular disease. *Recommended preparation:* HP 230.

**HP 431 Behavior and Education Strategies for Nutrition and Fitness (4, Sp)**

Examination of dietary intake and exercise behaviors as they relate to health and illness; methods for measuring diet and exercise. *Recommended preparation:* HP 430.

**HP 432 Clinical Nutrition (4, Irregular)**

Metabolism of carbohydrates, fats and protein; introduction to vitamins, minerals and dietary modifications in various pathological conditions. *Prerequisite:* CHEM 105a; *recommended preparation:* HP 230.

**HP 433 Advanced Topics in Nutrition (4, Sp)**

In-depth discussion of vitamins and minerals and their role in human nutrition; introduction to the role of vitamins and minerals in selected pathological conditions. *Prerequisite:* HP 432.

**HP 434 Physical Activity and Health (4, FaSpSm)**

Examination of the health impacts of physical inactivity; participation rates across subgroups; physical activity determinants; and interventions, programs, and policies to promote physical activity. *Recommended preparation:* HP 200.

**HP 440 Happiness, Well-Being, and Health (4, Sp)**

Explores human strengths that promote happiness/well-being and whether they influence physical health; mind-body relationships; and strategies for promoting hope, resilience, and quality of life. *Recommended preparation:* HP 200, PSYC 100.

**HP 441 Health Promotion in the Workplace (4, Fa)**

Covers phases of worksite health promotion; research, design, implementation and evaluation; concerns regarding escalating medical costs and the role of health promotion in offering solutions.

**HP 442 Chronic Disease Epidemiology (4, Sp)**

Overview of causative factors and demographic distributions of the major chronic diseases in the western world; epidemiologic concepts and research designs. *Recommended preparation:* HP 320.

**HP 443 Communicating Health Messages and Medical Issues (4)**

(Enroll in COMM 443)

**HP 450 Traditional Eastern Medicine and Modern Health (4, Fa)**

Overview of traditional Eastern approaches toward health and disease; relevance to modern health issues, emphasizing a comparison between traditional Chinese and modern Western medicine. *Recommended preparation:* fundamentals of medicine.

**HP 460 Adolescent Health (4, Fa)** Survey of the development of healthy and the prevention of health-risk behaviors during adolescence. Prevention and promotion techniques will be explored emphasizing cultural differences.

**HP 465 Health Status of Indigenous Peoples of America (4, FaSpSm)**

Survey of indigenous people's health, including health conditions, special cultural and ethical considerations, the Indian health system, and the politics of indigenous health.

**HP 470 Case Studies in Global Health (4, Sp)**

Case study examination of programs and organizational structure underlying current international efforts addressing problems related to infection disease, chronic disease, global environmental change, emergencies and emerging disease epidemics. *Prerequisite:* HP 270.

**HP 480 Internship in Health Promotion and Disease Prevention (2-4, max 4, FaSpSm)**

Field placement in a community agency such as a county health services agency, a not for profit voluntary agency or a health care setting. Open to majors only. Graded CR/NC. *Prerequisite:* completion or concurrent registration in required core courses.

**HP 483 Global Health and Aging (4, Fa)**

(Enroll in GERO 483.)

**HP 485 Global Health: Obesity and Nutrition (4, FaSpSm)**

Overview of the epidemiology of obesity and related diseases and the etiology of obesity, including genetic, biological, behavioral, environmental and socio-cultural correlations.

**HP 490x Directed Research (2-8, max 8, FaSpSm)**

Individual research and readings. Not available for graduate credit. Open to HP majors only. *Corequisite:* HP 340L; *recommended preparation:* HP 350L.

**HP 499 Special Topics (2-4, max 8)**

Lecture and discussion focused on specific topics within health promotion and disease prevention. Course topic will vary from semester to semester.

**PREVENTIVE MEDICINE (PM)****PM 500 Foundations of Health Behavior (4, Fa)**

Overview of behavioral theory and research in disease prevention and health promotion and in adaptation of chronic disease, including an introduction to measures of outcomes. *Prerequisite:* admission to Ph.D. in Preventive Medicine.

**PM 501 Foundations in Health Education and Promotion (4, FaSpSm)** Overview and application of behavioral theories to the field of health education and promotion. Examines the determinants of health behavior and strategies for change at the individual, group and community level.

**PM 505 Training and Curriculum Design in Public Health (4, Sm)** Curriculum writing and training skills applied to public health needs and settings. Covers adult learning theories, assessment of learning needs, curriculum design, training design, conduct and evaluation. *Recommended preparation:* PM 500.

**PM 508 Health Service Delivery in the U.S. (4, FaSpSm)** Historical development of the American health care system; determinants of health care utilization; role of health care providers; health policy; public health services; and health care finance.

**PM 509 Comparative Health Care Systems (4, Sp)** Macro-level analysis of the structure and delivery of health care services around the world, including an examination and comparison of health system performance.

**PM 510L Principles of Biostatistics (4, FaSp)** Concepts of biostatistics; appropriate uses and common misuses of health statistics; practice in the application of statistical procedures; introduction to statistical software including EXCEL, SPSS, nQuery. Laboratory.

**PM 511abCL Data Analysis (4-4-4, a: FaSp, b: Sp, c: FaSpSm)** *a:* Major parametric and nonparametric statistical tools used in biomedical research, computer packages including SAS. Includes laboratory. Lecture, 3 hours; laboratory, 1 hour. *Prerequisite:* PM 510L. *b:* Exploratory data analysis, detection of outliers, robust methods, fitting data with linear and nonlinear regression models, computer packages including BMDP. Includes laboratory. Lecture, 3 hours; laboratory, 1 hour. *c:* Methods and applications for modeling longitudinal, time-to-event and multi-level data. Includes laboratory using R package. Lecture, 2 hours; laboratory, 2 hours.

**PM 512 Principles of Epidemiology (4, FaSp)** Terminology/uses of epidemiology and demography; sources/uses of population data; types of epidemiologic studies; risk assessment; common sources of bias in population studies; principles of screening. *Recommended preparation:* algebra.

**PM 513 Experimental Designs (3, Sp)** Statistical methods for analysis of various experimental designs. Parametric analysis of variance (ANOVA), repeated measures methods, crossover designs, non-parametric ANOVA. *Prerequisite:* PM 510L.

**PM 514 Detection and Control of Sexually Transmitted Infections (4, Sm)** Overview of issues concerning the design and implementation of STI prevention and control programs. Epidemiology, diagnosis, treatment and partner management strategies for common STIs in the U.S. *Recommended preparation:* PM 501, PM 512.

**PM 515 Behavioral Epidemiology (3, 2 years, Sp)** Basic understanding of behavioral risk factors in chronic disease and premature mortality; epidemiological methods for studying behavioral risk factors. *Recommended preparation:* PM 511ab, PM 512.

**PM 516ab Statistical Problem Solving (1-1, FaSpSm)** An overview of the tools used by statisticians for solving statistical problems. *Prerequisite:* PM 510L.

**PM 517ab Research Methods in Epidemiology (a: 3, Fa, b: 3, Sp)** *a:* Study design, ascertainment of study objects, questionnaire development, various methodological issues in data analysis and interpretation including bias, measurement error, confounding and effect modification. *Prerequisite:* PM 511aL, PM 518a. *b:* Overview of epidemiologic research in cancer. Selected cancer sites will be covered to highlight study design and conduct, exposure assessment, data analysis and interpretation. *Prerequisite:* PM 517a.

**PM 518ab Statistical Methods for Epidemiological Studies I, II (3-3, Sp)** *a:* Principles and methods used in epidemiology for comparing disease frequencies between groups. Restricted to the analysis of binary outcome variables. *Prerequisite:* PM 512. *b:* Statistical methods for binary outcomes by introducing techniques for cross classified risks and rates and regression models for individual data. *Prerequisite:* PM 518a.

**PM 519 Introduction to Human Nutrition (4, Sp)** Dietary role of carbohydrates, proteins, lipids, vitamins, and minerals in metabolism; nutritional assessment; nutritional deficiencies. Focus on the role of nutrition in the prevention and treatment of chronic disease. (Duplicates credit in former PHNU 527.) *Recommended preparation:* PM 530.

**PM 520L Advanced Statistical Computing (3, SpSm)** Techniques for the solution of statistical problems through intensive computing; iterative techniques, randomization tests, the bootstrap, Monte Carlo methods.

**PM 521ab Seminar in Nutrition (2-2, FaSp)** (Duplicates credit in former PHNU 520ab.)

**PM 522ab Introduction to the Theory of Biostatistics (a: 4, Fa; b: 4)** *a:* Density distribution and hazard functions; normal, chi-square, student's t and F distributions; and sampling procedures for single factor and multiple factor designs, distributions. *Prerequisite:* undergraduate differential and integral calculus. *b:* Theory of estimation and testing, determining structure in data, and sampling methods. *Prerequisite:* PM 522a.

**PM 523 Design of Clinical Studies (3, Sp)** Design, conduct, and interpretation of results of clinical trials; emphasis on principles affecting structure, size, duration of a trial, and the impact of ethical and practical considerations. *Prerequisite:* PM 511abL, PM 513.

**PM 524abc Practicum in Health Behavior (2-2-2, FaSpSm)** Practical experience in a variety of field settings to gain a certain type of skill such as curriculum development, media production, and patient education. *a:* Practicum in prevention; *b:* practicum in compliance; *c:* practicum in health behavior topics. *Recommended preparation:* PM 500.

**PM 525 Culture and Health: An International Perspective (4, Fa)** International variations in health status with a focus on the impact of socioeconomic status, politics, environment, education and gender in etiology of illness, access to health care, progression of disease, and recovery.

**PM 526 Communications in Public Health (4, Sp)** Application of communication theories and methods to community health problems. Includes background assessment, program design, evaluation, social marketing, media advocacy, review of major health campaigns. *Recommended preparation:* PM 500.

**PM 527 Epidemiology of Infectious Disease (3, Sp)** Survey of natural history of infectious disease, methods of disease control and outbreak investigation. *Prerequisite:* PM 512.

**PM 528 Program Design and Evaluation (4, Sp)** Core concepts, methods and values of public health program planning and evaluation, including community needs assessment, writing objectives, designing health promotion programs, process and outcome evaluation. *Recommended preparation:* PM 500.

**PM 529 Environmental Health: An Epidemiological Approach (4, FaSp)** An overview of environmental health, identifying issues in assessing effects of exposure on health and potential interventions for reducing adverse health risks. *Prerequisite:* PM 510L, PM 512.

**PM 530 Biological Basis of Disease (4, 2 years, Sp)** With a physiological overview, differentiates genetic and environmental disease; emphasis on the relationships between lifestyle, behavior, and health. *Prerequisite:* admission to Ph.D. in Preventive Medicine, Health Behavior Research or basic biology.

**PM 531 Research Methods in Nutrition (4, Fa)** In-depth discussion of nutrition research including nutrition assessment, measurement of dietary intake, study design, statistical issues, critical appraisal, and translation into practice. Open to M.P.H. nutrition track students only. *Prerequisite:* PM 510, PM 512.

**PM 532 Genetics in Public Health and Preventive Medicine (4, Sm)** History and philosophy of public health genetics and mechanisms of genetic diseases. Epidemiologic methods used to identify genetic diseases in individuals, families, and populations. Emphasis on prevention and relevant ethical issues. *Recommended preparation:* PM 512.

**PM 533 Genetic and Molecular Epidemiology (3, 2 year, Fa)** Genetic principles; design and analysis of family studies; introduction to likelihood estimation; segregation and linkage analysis; biomarkers of exposure, susceptibility, and disease; laboratory methods; susceptibility genes; association and linkage disequilibrium. *Prerequisite:* PM 510L, PM 511a, PM 512, PM 518a.

**PM 534 Statistical Genetics (4, Sp)** Familial aggregation, segregation analysis, linkage analysis, association, regressive models, gene-environment interactions, genetic heterogeneity and linkage disequilibrium. *Prerequisite:* PM 518a, PM 522a.

**PM 535 Nutrition in Public Health (4, Fa)** Principles related to developing effective programs and services to improve the health and nutrition within a community. Attaining and maintaining nutritional health related to biology, lifestyle choices, environments, and health care delivery systems. (Duplicates credit in former PHNU 523.) *Recommended preparation:* PM 530.

**PM 536 Program Evaluation and Research (4, Fa)** Overview of concepts, tools, data collection, analysis methods and designs used to evaluate health promotion programs. Examples from substance abuse prevention, family planning and reproductive health programs.

**PM 537 Chronic Disease Epidemiology (3)** Overview of causative factors and demographic distribution of major chronic diseases in the western world. Epidemiologic concepts, methods and research design as applied to chronic disease prevention will be emphasized. *Prerequisite:* PM 512; *recommended preparation:* PM 527.

**PM 538 Introduction to Biomedical Informatics (3, Sm)** Overview of current topics, enabling technologies, research initiatives, and practical considerations in biomedical informatics.

**PM 539 Nutrient-Drug Interactions (2, Sm)** Examines the various ways foods, and the nutrients contained in them, interact with medications used to treat chronic health conditions.

**PM 540 Maternal and Child Nutrition (4)** Physiological basis for good nutrition during pregnancy and childhood through adolescence. Design, implementation and evaluation of public health nutrition programs serving women and children. *Recommended preparation:* PM 530.

**PM 541 Obesity, Metabolism and Health (4, Fa)** Overview of the epidemiology of obesity, related health conditions and mechanisms related to energy balance, food intake and genetics. Discussion of prevention and treatment strategies. *Recommended preparation:* PM 530.

**PM 542 Social Network Analysis (4, Sp)** Theory, methods and procedures of network analysis with emphasis on applications to public health programs.

**PM 543L Nonparametric Statistics (3)** (Enroll in MATH 543L)

**PM 544L Multivariate Analysis (3, 2 years, SpSm)** Exploratory and inferential techniques for multivariate data, Hotelling's T<sup>2</sup>, multivariate analysis of variance, classification analysis, principle components, cluster analysis, factor analysis. Involves computer use. *Prerequisite:* PM 510L, PM 522a.

**PM 545L Introduction to Time Series (3)** (Enroll in MATH 545L)

**PM 546 Biological Threats and Terrorism (4, Fa)** History of biowarfare and bioterrorism; proper surveillance techniques, capacity building for public health and medical communities, and the importance of effective communications. Methods of preparedness, prevention and response are examined. *Recommended preparation:* PM 512.

**PM 547 Public Health Policy and Politics (4, FaSp)** Examination of major policy issues in the U.S. health care delivery system to understand policy options in reforming health care and reducing health care disparities. *Prerequisite:* PM 508.

**PM 548 Prevention and Public Policy (2, FaSp)** Introduction to prevention policy framework; examination of how the application of epidemiology and behavioral aspects of diseases shapes the development of public health policy. *Prerequisite:* PM 508, PM 512.

**PM 549 Human Molecular Genetics (4, FaSpSm)** (Enroll in BIOC 543)

**PM 550 Sample Surveys (3)** (Enroll in MATH 550)

**PM 552 Statistical Methods in Clinical Trials (3, 2 years, Sp)** Stochastic failure process; parametric models for survival data; sample size estimation procedures for clinical trials; multivariate regression models for binary outcome and censored survival data; computer programs; multiple failure modes and competing risks. *Prerequisite:* PM 518a, MATH 408.

**PM 553 Human Exposure Assessment for Public Health (4, FaSpSm)** Examination of important routes of exposure to toxic materials; how to measure exposure; strengths and weaknesses of different measurement techniques; design of exposure assessment studies. *Prerequisite:* PM 510; *recommended preparation:* one semester of statistics and background in science or engineering for graduate students not in MPH.

**PM 554 Biological Effects of Environmental Toxins (4, FaSp)** Overview of how environmental exposures affect various biological systems and lead to observed health outcomes in populations. *Prerequisite:* PM 512; *recommended preparation:* PM 529.

**PM 555 Environmental Health, Policy and Practice (4, FaSp)** Examination of environmental public health policies/regulations, the role of science in assessment and policy initiatives, barriers to change, and competing interests that influence policy adoption. *Prerequisite:* PM 529.

**PM 556 Environment and the Brain (4, FaSpSm)** An examination of the effects of environmental exposures on the brain, addressing both human health and neurobiologic correlates throughout the lifespan.

**PM 557 Global Environmental Health (4, Sp)** Examination of the health effects of global environmental changes, including climate change, globalization, food safety, air pollution, water pollution, and radiation.

**PM 558 Environmental Epidemiology: Concepts, Methods, and Practice (4, FaSp)** Examine epidemiologic methods, concepts, and statistical approaches; case-study seminars with structured critiques of current literature on human-environment interactions affecting public health. *Prerequisite:* PM 510 and PM 512.

**PM 561 Promoting Dietary Change (3, Sp)** Development, implementation, and evaluation of dietary interventions at community and individual levels. Discussion of lifespan, culture, socioeconomic, and environmental factors. Open to M.P.H. nutrition track students only. *Prerequisite:* PM 501.

**PM 562 Intervention Approaches for Health Promotion and Disease Prevention (4, Sp)** Approaches for modifying health behavior in various settings and within diverse populations. Emphasis on practical considerations necessary to design and implement interventions with demonstrated effectiveness.

**PM 563 Organizing and Mobilizing Communities for Global Health (4, Fa)** Survey of effective community organizing and mobilization efforts in the U.S. and abroad, using participatory, organizational, community empowerment and public-private partnership models.

**PM 564 Public Health Leadership and Management (4, Fa)** Examination of future-focused leadership principles with applications to public health systems. Formulation and implementation of strategy, organizational management and change, and development of public health organizations.

**PM 565 Emerging Trends In Global Health: A Public Health Seminar (4, Sp)** Current public health issues and research topics relating to 21st century challenges and threats. Lessons learned and best practices to strengthen public health systems and enhance public health readiness and preparedness.

**PM 566 Public Health in China: A System and Country in Transition (4, Fa)** Scientific, political, economic, social, and historical influences affecting Chinese public health policy and practice. *Prerequisite:* PM 501, PM 510L; *recommended preparation:* PM 512.

**PM 567 Floods, Quakes and Human Folly: An Interdisciplinary Approach to Disaster Study (4, Sp)** Definition and chronology of natural and man-made disasters and their effects on the global community. Structure and organization of disaster management systems and the role of humanitarian organizations. *Recommended preparation:* PM 501, PM 512.

**PM 568 Ethical Issues in International Health Research: Promotion and Intervention (4, Fa)** Ethical principles in the distribution of health resources, the conduct of global public health research, and the implementation of public health initiatives and practices across different nations, cultures, religions. *Recommended preparation:* PM 501.

**PM 570 Statistical Methods in Human Genetics (4, Sp)** An introductory course in the statistical methods used in the analysis of human genetic data. *Prerequisite:* PM 533.

**PM 571 Applied Logistic Regression (3, Sm)** An introduction to the logistic regression model, emphasizing practical data analysis techniques. *Prerequisite:* PM 510L; PM 512; and PM 511aL or PM 518a.

**PM 572 Systems Physiology and Disease I (4, Fa)** (Enroll in INTD 572)

**PM 573 Systems Physiology and Disease II (4, Sp)** (Enroll in INTD 573)

**PM 574 Programming In Modern Statistical Software (2, FaSpSm)** Programming using SAS Software, including branching, sub-setting, PDV, looping, by-group processing, array, combining data functions, ODS, and macros.

**PM 575 Statistical Methods in Environmental Epidemiology (3, FaSpSm)** Study designs, exposure-time response, longitudinal, spatial, ecologic correlation and mechanistic models, measurement error interactions, measurement error, public policy implications. *Prerequisite:* PM 511b and PM 518a.

**PM 580 Foundations of Child Health (4, Sp)** Overview of issues related to infant, child and adolescent health, including special health considerations at different points in the developmental cycle, health care systems and policies and health disparities.

**PM 581 Quality and Inequality in Health Care: Examination of Health Services (4, Fa)** Social inequalities, including racial/ethnic disparities and income related inequalities are examined in the context of access and delivery of health care in the U.S.

**PM 582 Epidemiology and Prevention of Pediatric Injuries (4, Fa)** Examines the incidence and causes of injuries to children from birth to adolescence, risk factor distributions and approaches to prevention.

**PM 583 Foundations of Early Childhood Mental Health (4, Fa)** Overview of major infant and early childhood mental health issues, relating to the status of child mental health and the importance of comprehensive systems of care for children that support resilience and respond to biological and psychosocial mental health risks.

**PM 584 Systems of Care for Children with Special Needs (4, Sm)** Examines and evaluates principles, policies, programs and practices (systems) that have evolved to identify, assess and meet the special needs of children and families. Includes both historical and current perspectives.

**PM 585 Child Health Policy (4, Sp)** History of child health and social welfare programs during the past century. Issues examining health status and health service delivery, the role of health care financing and health policy.

**PM 586 Reproductive and Perinatal Epidemiology (3, FaSpSm)** Introduction to reproductive health, from preconception to the neonatal and early period of human development. Heavy emphasis on the methods and public health implications. *Prerequisite:* PM 510L and PM 512.

**PM 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PM 593 Public Health Practicum (4 or 8, FaSpSm)** Field placement in a community agency, such as a county health department or community-based organization. Open to MPH candidates only. Graded CR/NC. *Recommended preparation:* completion of all course work.

**PM 594abz Master's Thesis (2-2-0, FaSpSm)** Credit on acceptance of thesis. Graded IP/CR/NC.

**PM 599 Special Topics (2-4, max 8, Irregular)** Special topics relevant to the study of selected issues and areas of health behavior research or other aspects of preventive medicine.

**PM 601 Basic Theory and Strategies in Prevention (4, 2 years, Fa)** Psychosocial basis of health-hazardous lifestyle behaviors and preventive strategies. *Recommended preparation:* PM 500, PM 515.

**PM 602 Basic Theory and Strategies for Compliance/Adaptation (4, 2 years, Fa)** Behavioral and psychosocial demands of acute and chronic diseases. Comparison of theoretical models of compliance and adaptation with intervention methods to improve compliance and adaptation. *Recommended preparation:* PM 500, PM 515.

**PM 603 Structural Equation Modeling (4, 2 years, Fa)** Factor analytic and structural equation modeling approaches to health behavior research – conceptual, practical and mathematical. *Prerequisite:* PM 511b.

**PM 604 Health Behavior Research Methods (4, Sp)** Health research/evaluation philosophies, approaches, and development of skills for development and critique of health behavior research projects/studies. *Recommended preparation:* PM 511.

**PM 610 Seminar in Biostatistics and Epidemiology (1, max 4, FaSpSm)** Special topics of current interest to provide background for research in biostatistics and epidemiology. Based largely on student dissertation research. Graded CR/NC. *Prerequisite:* Ph.D. level.

**PM 611 Advanced Topics in Epidemiology (3, Irregular)** Review of current epidemiologic research contained in recent medical literature; emphasis on critique of studies and interpretation of findings.

**PM 690abcdz Directed Research in Health Behavior (2-2-2-2-0, FaSpSm)** Independent research at an advanced level on a problem in the field of Health Behavior. Graded CR/NC. *Recommended preparation:* PM 604.

**PM 756 Research Seminar in Health Behavior (1, max 6, FaSp)** Short seminar presentations and discussions on issues accompanying the development of the field of health behavior and implementation of research in this field. Graded CR/NC.

**PM 790 Research (1-12, FaSpSm)** Research applicable to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PM 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm)** Credit on acceptance of dissertation. Graded IP/CR/NC.

---

# USC Thornton School of Music

*The ensembles and orchestras at USC Thornton feature some of the nation's most accomplished young musicians, such as Sarah Davis, Master of Music student and winner of the national Lyon & Healy harpist competition. USC Thornton consistently ranks among the top one percent of the nation's music schools, and combines a conservatory-style education with the benefits of a top research university.*

Since its founding in 1884, the USC Thornton School of Music has become the center of higher education in music in the western United States and ranks among the top schools of music in the nation. Situated in the heart of the vital musical life of Los Angeles, USC Thornton brings together a distinguished faculty and gifted students from around the world. It is in this wonderfully diverse cultural milieu that students are offered instruction in virtually all professional and scholarly branches of music, including instrumental and vocal performance, jazz, early music, conducting, composition, film scoring, music industry, musicology, music education, pedagogy, popular music performance, choral and sacred music, conducting and opera. In addition to its major programs, USC Thornton also offers a wide array of music minors and general interest courses for students majoring in other disciplines.

The USC Thornton Symphony, Chamber Choir, Concert Choir, Opera, Wind Ensemble, Trojan Marching Band, Jazz Orchestra, Contemporary Music Ensemble, Early Music Ensemble and a wide variety of large and small choral and instrumental ensembles assure students the broadest performing experience. More than 500 formal and informal concerts and recitals are presented on campus each year and the school regularly presents eminent visiting artists and scholars in master classes, workshops, lectures, seminars and in performance.

Los Angeles is the home of numerous musical organizations whose performances contribute immeasurably to the cultural life of the region, and also the home of the nation's major recording, radio, film and television industries. All offer abundant opportunities to the serious young musician.

Brian Head, M.M., *Assistant Dean for Curriculum*

Phillip Placenti, M.P.A., *Assistant Dean for Admission and Student Affairs*

**Faculty**

*Jascha Heifetz Chair in Music and Distinguished Professor of Strings/Harp: Midori Goto, M.A.*

*Bowen H. "Buzz" McCoy and Barbara M. McCoy Endowed Chair in Jazz at the Flora L. Thornton School of Music, Honoring President Steven B. Sample, 10th President of the University of Southern California: Bob Mintzer, B.A.*

*Gregor Piatigorsky Chair in Violoncello: Ralph Kirshbaum, B.A.*

*H. Robert Reynolds Chair in Wind Conducting: H. Robert Reynolds, M.M.*

*Alice and Eleanore Schoenfeld Endowed Chair in String Instruction: Alice Schoenfeld, Dipl.*

*Stephen Crocker Professor of Music: Rod Gilfry, M.M.*

*Distinguished Professor of Composition: Morten Lauridsen, DMA\**

*Distinguished Professor of Composition: Stephen Hartke, Ph.D.*

*Professors: Arthur C. Bartner, Ed.D.\*; Bruce Brown, Ph.D.; Terry Cravens, DMA; Donald Crockett, Ph.D.\*; Robert A. Cutietta, D.Ed.; Kevin Fitz-Gerald, Art. Dipl.; Gary Glaze, M.M.; Stewart Gordon, DMA; Norman Krieger, Dipl.; Frederick Lesemann, DMA\*; Larry Livingston, M.M.; Thom Mason, DMA; Ronald McCurdy, Ph.D.; Richard McIlvery, M.M.; Donald McInnes, M.M.; Erica Muhl, DMA; Tim Page, B.A.; Alan Pasqua, B.M.; John Perry, M.M.\*; Daniel Pollack, M.S.\*; Frank Potenza, M.M.; Jo-Michael Scheibe, DMA; Bryan Simms, Ph.D.\*; Alan Smith, DMA; Richard Smith, M.M.; John Thomas, M.M.; Ladd Thomas, D.Mus.; Frank Ticheli, DMA*

*Associate Professors: Ken Cazan, BFA; Joanna Demers, Ph.D.; Yehuda Gilad, Dipl.; Adam Gilbert, Ph.D.; Elizabeth Hynes, B.M.; Robert Moore, Ph.D.; Cynthia Munzer, B.M.*

*Assistant Professors: Rod Gilfry, M.M.; Cristian Grases, DMA; Beatriz Ilari, Ph.D.; David Moore, B.M.; Mina Yang, Ph.D.*

*Professors of Practice: Peter Erskine; Boyde Hood, M.M.; Joel Timm, DMA; James Walker, B.M.E.*

*Associate Professors of Practice:* Bernadene Blaha, M.M.; Lucinda Carver, DMA; Mark Goldstein, J.D.; Henry Gronnier, Art. Dipl.; Brian Head, M.M.; Ken Lopez, B.A.; Brent McMunn, M.M.; Richard Schmunk, DMA; Brian Shepard, DMA; Nick Strimple, DMA; Scott Tennant, M.M.; John Whitener, DMA

*Assistant Professors of Practice:* Steven Cunningham, B.S.; Andrew Garver, B.S.\*; Rotem Gilbert, DMA; Susan Helfter, DMA; William Kanengiser, M.M.; Veronika Krausas, DMA; Sharon Lavery, M.M.; Kristy Morrell, DMA; Christopher Sampson, M.M.

*Senior Lecturers (Full-time):* William Biersach; Patrick Kelley; Antoinette Perry; Christopher Roze; Nick Stoubis; Stephen Trovato; Paul Young

*Adjunct Professors:* Donald Brinegar; Bruce Broughton; Martin Chalifour; Suzi Digby; Lamont Dozier; Donald Green; Melissa Manchester; Norman Pearson; H. Robert Reynolds; Cherry Rhodes; Pepe Romero; Patrice Rushen; Carl St. Clair; James Self; Jack Smalley; Allan Vogel; William Watrous; Suli Xue; Michele Zukovsky

*Adjunct Associate Professors:* Judith Farmer; David Howard; Andrew Shulman; James Thatcher; Jo Ann Turovsky; David Weiss

*Adjunct Assistant Professors:* Jeffrey Allen; David Arny; James Babor; Margaret Batjer; Jon Burlingame; Leon Ndugu Chanler; Che-Yen Chen; Neal Desby; Susan Feldman; Russell Ferrante; Parmer Fuller; Adam Kofler; Shigemi Matsumoto; Janice McVeigh; Vincent Mendoza; Leah Morrison; Darek Oleszkiewicz; Joseph Pereira; James Rötter; Aaron Serfaty; Robert Sheppard; Kathleen Roland Silverstein; Andrea Stolpe; Alexander Suleiman; Lisa Sylvester; Mark Weiser; Gary Woodward; Robert Young

*Adjunct Instructors:* Andy Abad; Ted Ancona; Robert Anderson; Adriana Balic; Amy Bowers; Delbert Bowers; Stacy Brightman; Gilbert Castellanos; Paul Chaikin; Joel Clift; Christina DeMore; Sean Dougall; Barbara Dyer; Bruce Forman; Rachele Fox; John Fumo; Sara Gazarek; Jason Goldman; Kathleen Grace; Karin Carson; William Hollis; Dean Immel; Alphonso Johnson; Aron Kallay; Dax Kimbrough; Patrick Kirst; Tim Kobza; Edwin Livingston; Mary Mattei; Roy McCurdy; Shawn Mouser; Vicki Muto; Sung-Hwa Park; David Poe; Michael Powers; Otmaro Ruiz; John Schmidt; Gary Schyman; Paul Sherman; Scott Shubeck; William Skeen; Lisa Smith; Douglas Tornquist; Tina Vartanian; Carl Verheyen; David Wilkinson; Tien-Hsin Wu; Shanon Zusman

*Emeritus Professors:* Nancy Bricard, M.M.\*; James Hopkins, Ph.D.; Arend Kooole, D.Litt. et Phil.; William A. Schaefer, M.A.; Margaret Schaper, M.M.\*; Alice Schoenfeld\*; William Thomson, Ph.D.; James Vail, DMA

\*Recipient of university-wide or school teaching award.

### Degree Programs

The Thornton School of Music offers professional and academic degrees at the bachelor's, master's and doctoral levels. These degrees are summarized below.

*Bachelor of Music:* Students working toward this professional degree have a wide choice of specializations: composition, music industry, instrumental performance, jazz studies, popular music performance and vocal arts. Students can take either a single major program or double majors in several combinations such as piano and composition, string, or percussion instrument. The two majors must be offered by different departments but lead to the same degree (for example, Bachelor of Music). Double majors consisting of two majors in the same department are not permitted. The degree is granted by the Thornton School of Music.

*Bachelor of Arts:* This degree is for students with a strong music background but who wish to combine professional music training with substantial study in other disciplines.

*Bachelor of Science:* Offered by the Thornton School of Music in the specialized area of music industry.

*Minors in Music:* Seven different minors in music are offered, each approaching the discipline from a unique perspective and with a distinct curriculum: Jazz Studies, Musical Studies (Performance), Musical Theatre, Music Industry, Music Recording, Popular Music Studies, and Songwriting.

*Master of Music:* This is a professional degree that represents proficiency in one area of musical practice and relevant knowledge in musical literature, performance and technique. It requires a minimum of 30 graduate units, of which 15 must be at the 500 level or higher. Students complete either a thesis or recital(s) as part of the degree requirements. The degree can be earned in choral music, composition, conducting, music education, keyboard collaborative arts, guitar, jazz studies, organ, piano, voice or instrumental performance. The degree is granted by the Thornton School of Music.

*Master of Arts:* This degree, offered through the Graduate School in conjunction with the Thornton School of Music, stresses music history or early music performance, with emphasis on scholarly research.

*Doctor of Musical Arts:* This is a professional degree that represents the highest level of expertise in a major field of musical practice and competence in several additional areas. Students may specialize in choral music, composition, jazz studies, music education, vocal or instrumental performance.

*Doctor of Philosophy:* Offered through the Graduate School, this is an academic degree in the field of historical musicology. A substantial background in music, research and languages is required.

### Entrance to the Degree Programs

Admission to a degree program is granted through USC's admission process, described in the Admission section of this catalogue. A supplementary application form is also required for students seeking admission to the Thornton School of Music, which can be obtained from the School of Music Office of Admission.

Applicants to a program within the school are screened by appropriate faculty selection committees that hold auditions, interviews and examine supportive materials. Letters of acceptance are issued by the USC Office of Admission.

### Audition

A performance audition is required of applicants to most degree and certificate programs in the Thornton School of Music. Refer to individual curriculum listings for details.

### Graduate Record Examinations

Scores from the General Test of the Graduate Record Examinations (GRE) are required for application and admission to the Master of Arts, Doctor of Musical Arts and Doctor of Philosophy degrees. (The Music Subject Test is not required.) Test scores on the GRE that are more than five years old at the time of application are not accepted.

### Placement Tests

Undergraduate transfer students who have had formal study in any of the following areas must take the appropriate placement examination prior to their first registration: aural skills, theory, music history, conducting, analysis, orchestration and performance. The results of these examinations determine placement in appropriate sequential courses.

### Admission to Graduate Standing

Achievement tests in basic musical skills and areas of study (Music Graduate Entrance Examinations) are required of all entering graduate students during the first semester or summer session in residence. If all examinations are not passed by the end of two semesters of course work, then further registration must include remedial courses in all areas

where deficiencies exist. In degree programs in which one recital is required, all entrance examinations must be passed or corresponding remedial course work completed with a minimum grade of B- before permission to present a graduate recital is given. In programs with two or more recitals, only the first may be given prior to passing all entrance examinations or completing corresponding remedial courses.

#### *Test of English as a Foreign Language (TOEFL)*

All applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL). Test scores that are more than two years old at the time of application are not accepted.

#### *Advanced Standing Credit for Music Taken in Accredited Schools of Music*

Music courses completed with satisfactory grades in a member institution of the National Association of Schools of Music are acceptable for transfer. The university reserves the right, however, to require a student to take a placement test (at no cost) to determine the level of achievement in any given aspect of music, and to review the student's credentials at the end of one semester at USC to determine what credit will in fact be transferred.

#### *Advanced Standing Credit for Music Not Taken in Accredited Schools of Music*

Students who wish credit for music taken in institutions not accredited by the National Association of Schools of Music must provide the Office of Admission with information on their prior work, showing the subjects studied, the number of lessons in each subject, the length of each lesson, number of years of study and the names of instructors. Such special requests are dealt with on an individual basis. Examinations or continuation work or

both may be required before credit allowance is considered.

#### **General Requirements**

All curricula leading to the Bachelor of Music, Master of Music and Doctor of Musical Arts degrees require proficiency in performance. This is accomplished by individual instruction in the areas best suited to the student's ability and interests.

Proficiency in piano is required in all curricula and may be achieved through class and/or individual instruction. Some curricula require competency in one additional performance medium.

Attendance at recitals in the field of the student's major is a regular part of the work in applied music for all music majors. Attendance at recitals is recommended for non-music majors who take individual instruction as an elective.

#### **Curriculum Requirements**

The curriculum requirements for each major are listed under each degree. The USC course classification and numbering system is explained on page 32. In addition, music courses sometimes carry the following abbreviations: CD = Conducting; CG = Classical Guitar; HC = Harpsichord; OR = Organ; P = Piano; SG = Studio Guitar; VA = Viola; VC = Voice Coaching; VO = Voice.

#### **Change of Curriculum**

To change from one curriculum to another, a student must obtain written approval of all of the following: the department chair in the curriculum which the student is leaving, the department chair for the new curriculum and the dean of the Thornton School of Music.

#### **Non-Degree Programs**

Students who have highly specialized interests which may not be met through degree programs may apply for admission to one of the following non-degree programs.

##### *Artist Diploma Program*

This program is designed for young artists of exceptional ability and musical sensitivity who plan careers as solo performers. The Artist Diploma Program provides young artists the opportunity to devote their full time to concentrated study and practice for the duration of their assigned programs. This program typically requires two to three consecutive years of study for completion.

##### *Graduate Certificate Program in Performance*

This two-year graduate-level program is designed for students who have completed their undergraduate education in music, or its equivalent, and intend to concentrate their energies on the full-time development of their discipline.

##### *Graduate Certificate Program in Scoring for Motion Pictures and Television*

This one-year program is designed for students who hold the Bachelor of Music in Composition or its equivalent. Students in this program must maintain a 3.0 grade point average, with no course grade lower than a C (2.0). Work graded C- or below is not acceptable for credit toward the certificate.

#### **Honor Society**

##### *Pi Kappa Lambda*

Pi Kappa Lambda is a national honor society established in 1918 for the promotion and recognition of scholarship and performance in music. Students of the School of Music are eligible for election to Eta chapter at the University of Southern California, established in 1923.

## Undergraduate Degrees

### Bachelor of Music

The Bachelor of Music (B.M.) is a professional degree granted by the Thornton School of Music. The various majors for the degree are listed subsequently along with special requirements for each.

#### **Individual Instruction in Residence**

Candidates for the B.M. degree in performance must complete a minimum of three

semesters of individual instruction in their major field while in residence.

#### **Senior Recital**

All performance majors must present a senior recital consisting of a memorized program one hour long (except in the case of certain wind instruments) in partial fulfillment of the degree requirements. Composition majors present a full-length recital of their

original compositions. A candidate's program must be ready for presentation before a faculty committee at least one month before the required public recital. Complete details are available from the Music Operations Office, Thornton School of Music.

**General Education Requirements**

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements.

The provost has allowed an exception to the rules governing the new general education requirements for certain groups of students pursuing performance degrees in music. Students pursuing the Bachelor of Music in Jazz Studies or the Bachelor of Music in Performance (in all tracks except organ) may satisfy their social issues and first writing requirement separately by taking WRIT 130 (instead of WRIT 140) in the spring of their freshman year. In addition those pursuing the Bachelor of Music in Performance (vocal arts) may satisfy Category I of the new program with MUHL 331 and MUHL 332.

In all other respects, students in the Thornton School of Music must satisfy the general education requirements as described on pages 63 and 250.

**Individual Instruction Limitations**

Music majors may accumulate a maximum of 16 units of individual instruction at the 300 level toward an undergraduate degree program.

**Bachelor of Music in Composition****Entrance Requirements**

Applicants must submit the Thornton School of Music Supplementary Application, a statement of objectives, resume, complete academic transcripts, three original compositions, and a complete list of all original compositions including dates and media. If available, audio recordings of the submitted scores should also be included. An on-campus interview with the composition faculty is encouraged but not required. Admission to the B.M. in Composition is highly competitive. The program is a four-year program, to which transfer students are rarely admitted. Admission to programs in composition is limited to fall semester only.

CURRICULUM REQUIREMENTS	UNITS
General education	6 courses
Writing	2 courses
Large ensemble*	4
Ensemble electives	2
MPKS 250ab (4), MPKS 350ab (4), MPKS 301P (4)**	12

MUCO 132ab (4), MUCO 133ab (6), MUCO 135 (2), MUCO 137ab (4), MUCO 232ab (4), MUCO 233ab (6), MUCO 235 (2), MUCO 236 (2), MUCO 237ab (8), MUCO 336ab (4), MUCO 337ab (8), MUCO 434 (2), MUCO 435 (2), MUCO 437ab (4)	58
MUCD 340 (2), MUCD 343 (2)	4

MUHL 231 (3), MUHL 232 (3), MUHL 331 (3), MUHL 332 (3)	12
Electives in music	2
General electives	4
Senior recital	0
<b>Total required for degree</b>	<b>132</b>

\*Transfer credit may not fulfill the large ensemble requirement.

\*\*Requirement may be fulfilled with MPKS 301P if proficiency level equivalent to MPKS 350b is demonstrated by examination.

In addition to the above curricular requirements, B.M. candidates in composition must take departmental comprehensive examinations in all six areas:

- (1) instrumental performance at an intermediate level;
- (2) theory and analysis;
- (3) aural skills;
- (4) instrumentation;
- (5) music literature;
- (6) elementary score-reading.

Students must pass in at least four areas to continue on to the senior year of the major and, in order to graduate, must pass in all six areas.

**Bachelor of Music in Jazz Studies****Entrance Requirements**

Applicants must submit the Thornton School of Music Supplementary Application, a statement of objectives, resume and repertoire list. A performance audition is required for admission to this program. Specific audition requirements, along with other entrance requirements, are reviewed on an annual basis and published in the Application Requirements section online at [www.usc.edu/music](http://www.usc.edu/music). Most applicants will also be asked to sit for a written examination consisting of listening to excerpts, basic jazz theory and jazz history. Though applicants are strongly encouraged to perform a live audition, a recent video recording may be submitted in lieu of a live audition if necessary.

	<hr/> 132

\*All individual instruction units must be taken in the same area in which the students auditioned.

**Bachelor of Science in the Music Industry**

The Bachelor of Science in the Music Industry is a professional degree that prepares students to enter a variety of careers in the music industry of today. Students must fulfill a series of core requirements for the degree, but they are allowed to choose one of two options for the remainder of their curriculum. The industry option emphasizes classes in the business and legal aspects of the music industry, while the technology option allows students to gain a solid background in the various uses of technology in the modern music industry.

*Entrance Requirements*

Applicants must submit the Thornton School of Music Supplementary Application, a statement of objectives, resume and full academic transcripts. A full academic review will be the primary consideration for admission to this program. In some cases, a phone or in-person interview will be requested by the Thornton admission office.

*General Education Requirements*

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which comprise the USC Core. See pages 63 and 250 for more information.

*Business-related Requirements*

In addition to the above general education requirements, the following courses offered through the Marshall School of Business, the Leventhal School of Accounting and the Dornsife College of Letters, Arts and Sciences are required.

ECON 203	1 course
ECON 205	1 course
BUAD 307	1 course

Total:	128

**Bachelor of Arts**

Applicants must submit the Thornton School of Music Supplementary Application, a statement of objectives, resume and repertoire list. A performance audition according to the requirements of the department of the applicant's primary instrument or voice is also required.

*General Education Requirements*

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing, foreign language and diversity requirements, which together comprise the USC Core. See pages 63 and 250 for more information.

*Curriculum Requirements*

REQUIRED COURSES	UNITS
General education, writing, foreign language, and electives	64

*Lower division*

MPKS 250ab	4
MUCO 132ab (2-2), MUCO 133ab (3-3),	
MUCO 232ab (2-2), MUCO 233ab (3-3)	20
MUHL 231 (3), MUHL 232 (3)	6

*Upper division*

Ensemble electives	4
Individual instruction 301	6
MUCO 338x	2
MUHL 331 (3), MUHL 332 (3)	6
Music electives	<hr/> 16
Total required for degree	128

*Curriculum Areas of Study*

Within the curriculum for the B.A., students may wish to focus in a particular area of music that suits their interest and the faculty's expertise. Two of the possible areas are listed below. Students may specialize in one area or may design individual programs of study by choosing various combinations of electives that best meet their needs and career objectives. Relevant courses for each area are posted at [www.usc.edu/music](http://www.usc.edu/music).

*Choral Music Option:* This option is designed for students with a strong interest in choral singing and conducting. Students take a course that introduces them to choral music and choral conducting, and may elect to receive instruction in advanced choral conducting, as well as participate in one of the choral ensembles of the Thornton School.

*Vocal Jazz Option:* This option is designed for students with a strong interest in the performance of solo and ensemble vocal jazz music. Students should take two semesters of Vocal Jazz Techniques, as well as individual instruction in jazz voice. Students may also perform in vocal ensembles and with instrumental combos.

## Minors in Music

### Minor in Music Recording

A minor in music recording is offered for undergraduate students to provide them with the background necessary to enter the field of recording engineering and to familiarize them with the design needs of recording equipment. The minor is not available to music industry majors.

#### Prerequisite

Acceptance into the program might require a personal interview by the Thornton School of Music to assure that the student has sufficient musical background and skill.

Students admitted to this minor will be expected to have a minimum GPA of 2.0 and to maintain that average with no grade lower than a "C" for all courses taken in the minor.

REQUIRED COURSES	UNITS
MUIN 275ab	Recording Arts Workshop 4-4
MUIN 286	Record Production Management 2
MUIN 287	The Business and Economics of the Recording Industry 2
MUIN 446a	Computer Assisted Recording and Editing 2
Select 10 units from the following courses:	
MUIN 389	Digital Equipment and Recording 2
MUIN 392a	Acoustics and Speaker Design 2
MUIN 446b	Computer Assisted Recording and Editing 2
MUIN 477	Remote Recording Techniques 2
MUIN 478	Advanced Multichannel Remix 2
MUIN 479	Audio Mastering 2
MUIN 493	Audio Signal Processing Equipment 2
	24

### Minor in Music Industry

A minor in the music industry is offered for undergraduate students to provide them with the background necessary to enter varied fields in the music business and to familiarize them with standard practices and procedures. A minimum of 20 units is required for completion of this minor. The minor is not available to music industry majors.

#### Prerequisite

Acceptance into the program might require a personal interview by the Thornton School of Music.

Students admitted to this minor will be expected to have a minimum GPA of 2.0 and to maintain that average with no grade lower than a "C" for all courses taken in the minor.

REQUIRED COURSES	UNITS
MUIN 277x	Introduction to Music Technology 4
MUIN 372abx	Business and Legal Aspects of the Music Industry 4-4
One course from the following:	
MUHL 315x	Music and Culture 4
MUSC 444	American Roots Music: History and Culture 4
MUSC 450	The Music of Black Americans 4
MUSC 460	Film Music: History and Function from 1930 to the Present 4
MUSC 465	Music, Television and American Culture 4
Select 4 units from the following:	
MUIN 370	Distribution of Recorded Music and Music Publishing 4
MUIN 385	Radio in the Music Industry 4
MUIN 425	Live Music Production and Promotion 4
MUIN 430	Artist Management and Development 4
MUIN 435	Manufacture and Distribution of Musical Products 4
MUIN 443	The Business of Music for Visual Media 4
MUIN 446ab	Computer Assisted Recording and Editing 2-2
MUIN 495	Music Industry, Broadcast and the Internet 4
	20

### Minor in Jazz Studies

This 20-unit minor program in jazz studies incorporates course work in individual instruction, the history of jazz masters, techniques of jazz improvisation and jazz theory for improvisers. The minor is not available to B.M. jazz studies majors.

Requirements for admission are: GPA per university regulations and an audition.

REQUIRED COURSES	UNITS
MUCO 130a	Basics of Music Theory 3
MUEN 329	Jazz Ensemble (1, max 8), or
MUEN 332	Jazz Chamber (1, max 8) 4
MUJZ 150x	Beginning Jazz Improvisation 2
MUJZ 301	Individual Instruction 4
MUJZ 419	The Jazz Experience: Myths and Culture, or
MUSC 450	The Music of Black Americans 4
MUJZ 450	Intermediate Jazz Improvisation 2
Music courses numbered 300-499 2	
Total units	21

### Minor in Musical Theatre

The minor in musical theatre, interdisciplinary in nature, is a 27-unit program incorporating the study of acting, dance or movement, vocal arts and related musical subjects. Admission to the minor requires an audition for music but not for theatre.

For students majoring in theatre or another non-music discipline:

REQUIRED COURSES	UNITS
MUSC 400	The Broadway Musical: Reflection of American Diversity, Issues, and Experiences 4
MPGU 125	Beginning Fingerstyle/Chord Guitar, and
MPGU 126	Easy Fingerstyle Beatles, or
MPKS 150ab	Beginning Piano, or
MUED 330x	Fundamentals of Music 4
MPVA 301	Individual Instruction (6), or
MPVA 141	Class Voice (2), or
MPVA 241	Intermediate Class Voice (2), and
MPVA 301	Individual Instruction (4) 6
MPVA 402*	Musical Theatre Workshop 8

2 units to be selected from:

THTR 181-189, or	
THTR 216	Movement for Actors, or
THTR 316	Advanced Movement for Actors 2
THTR 343	Musical Theatre Audition 3
Total units	27

\*2 units of MPVA 402 may be satisfied by taking THTR 397 Theatre Practicum I.

For students majoring in music performance (vocal arts):

REQUIRED COURSES	UNITS
MPVA 402* Musical Theatre Workshop	8
MUSC 400 The Broadway Musical: Reflection of American Diversity, Issues, and Experiences	4
THTR 101 Introduction to Acting	4
THTR 343 Musical Theatre Audition	3
2 units to be selected from:	
THTR 181-189, or	
THTR 216 Movement for Actors, or	
THTR 316 Advanced Movement for Actors	2
6 units to be selected from:	
THTR 252ab Intermediate Acting I, or	
THTR 352ab Intermediate Acting II	6
Total units	27

\*2 units of MPVA 402 may be satisfied by taking THTR 397 Theatre Practicum.

For students majoring in music (non-vocal arts performance):

REQUIRED COURSES	UNITS
MPVA 301 Individual Instruction	4
MPVA 402* Musical Theatre Workshop	8
MUSC 400 The Broadway Musical: Reflection of American Diversity, Issues, and Experiences	4
THTR 101 Introduction to Acting	4
THTR 343 Musical Theatre Audition	3
2 units to be selected from:	
THTR 181-189, or	
THTR 216 Movement for Actors, or	
THTR 316 Advanced Movement for Actors	2
2 units to be selected from:	
THTR 252ab Intermediate Acting I, or	
THTR 352ab Intermediate Acting II	2
Total units	27

\*2 units of MPVA 402 may be satisfied by taking THTR 397 Theatre Practicum I.

### Minor in Musical Studies

This 26-unit program in musical studies, with an emphasis in performance, incorporates the study of music theory, music history, performance, ensembles and electives. Students may enter the program in their freshman year. An audition is required for this minor, which is not available to music majors.

REQUIRED COURSES	UNITS
MUEN 300-499	2
MUHL 315x Music and Culture	4
MPKS 250a Keyboard Instruction I	2
Individual Instruction at the 301 level	6
MUCO 130abx Basics of Music Theory	6
Music electives *	6
Total	26

\*Must include 4 upper division units.

### Minor in Popular Music Studies

This minor consists of four upper division courses, to be chosen from courses that examine different aspects of popular music. The minor focuses on the study of the repertoires and their cultural and social context. Students must be in good academic standing to be admitted. No previous musical experience is required.

COURSE REQUIREMENTS	UNITS
Choose four courses (16 units) from the following:	
MUSC 400 The Broadway Musical: Reflection of American Diversity, Issues, and Experiences	4
MUSC 420 Hip-Hop Music and Culture	4
MUSC 422 The Beatles: Their Music and Their Times	4
MUSC 444 American Roots Music: History and Culture	4
MUSC 450 The Music of Black Americans	4
MUSC 460 Film Music: History and Function from 1930 to the Present	4
MUSC 465 Music, Television and American Culture	4
MUJZ 419 The Jazz Experience: Myths and Culture	4

### Minor in Songwriting

The minor in songwriting incorporates practical instruction in the craft of songwriting and in performance skills, instruction in the technology relevant to songwriting, and critical studies in the relevant repertoires.

*Requirements for admission:* Successful completion of MUSC 255 Songwriting I and an interview with the admission coordinator.

REQUIRED COURSES	UNITS
MUCO 130abx Basics of Music Theory	3-3
MUSC 255 Songwriting I	2
MUSC 355 Songwriting II	2
MUSC 455 Songwriting III: The Performing Songwriter	2
MUSC 310 Computer Recording for the Performing Musician	2
MUSC 311 MIDI Techniques for the Performing Musician	2

Choose one of the following courses:

COMM 306 The Communication Revolution, Entertainment and the Arts	4
COMM 307 Sound Clash: Popular Music and American Culture	4
COMM 384 Interpreting Popular Culture	4
COMM 440 Music as Communication	4

Choose one of the following courses:

MUSC 400 The Broadway Musical: Reflection of American Diversity, Issues, and Experiences	4
MUSC 420 Hip-Hop Music and Culture	4
MUSC 422 The Beatles: Their Music and Their Times	4
MUSC 444 American Roots Music: History and Culture	4
MUSC 450 The Music of Black Americans	4
MUSC 460 Film Music: History and Function from 1930 to Present	4
Total	24

### Minor in Performing Arts Studies

The minor in performing arts provides an interdisciplinary inquiry into the nature and aesthetics of the performing arts. It combines the disciplines of cinematic arts, dance, music and theatre. The minor is a unique course of study that looks at how the performing arts contribute to a culturally literate society. See the School of Theatre section of this catalogue, page 943.

## Graduate Degrees

### Admission-Audition Requirements

Applicants to graduate programs in the Thornton School of Music must submit the music supplementary application in addition to fulfilling all USC graduate admission requirements. Applicants to all doctoral programs, the M.A. in Music History and Literature and the M.A. in Early Music must also submit scores from the general test of the Graduate Record Examinations (GRE). Any applicant whose native language is not English must also submit scores from the Test of English as a Foreign Language (TOEFL). GRE test scores that are more than five years old, and TOEFL scores that are more than two years old, at the time of application, will not be accepted.

Additional requirements for specific graduate programs are detailed below.

#### Choral Music

Applicants must submit the following: a brief resume detailing conducting experience; a statement of objectives; a repertoire list divided into categories of works sung, works studied and works conducted; three letters of recommendation; a videotape of both a choral ensemble performance and rehearsal conducted by the applicant, including choral works from several periods and styles, with at least one being a 20th century work. Master of Music applicants should have a minimum of two years' experience as the regular conductor of a choral ensemble. Doctor of Musical Arts applicants should have a minimum of four years' experience.

#### Composition

Applicants must submit the following: three carefully prepared scores and audio recordings of recent works; a complete list of all compositions, including dates and media; a statement of objectives; resume; transcripts from all universities attended. An on-campus interview with the composition faculty is encouraged but not required. Admission to graduate programs in composition is highly competitive and is limited to approximately six new students per year.

#### Conducting

Applicants must submit the following: a repertoire list, clearly indicating both works conducted in rehearsal and those conducted in performance; an unedited videotape from the orchestra's side of the podium, no less than 30 minutes in length, of which half should be of the applicant in rehearsal; a statement of objectives; three letters of recommendation; resume. Selected applicants will be invited to present a live audition with the university. Such applicants will be contacted to determine repertoire.

#### Jazz Studies

Applicants must submit a statement of objectives, resume and repertoire list. A performance audition is required for admission to this program. Specific audition requirements, along with other entrance requirements, are reviewed on an annual basis and published in the Application Requirements section online at [www.usc.edu/music](http://www.usc.edu/music). Most applicants will also be asked to sit for a written examination consisting of listening to excerpts, basic jazz theory and jazz history.

#### Music Education

Applicants must submit the following: a resume listing group teaching experience (one year experience or more for M.M. applicants, three years' experience or more for DMA applicants); brief statement of objectives and professional goals; academic transcripts from all universities attended; writing sample (essay or research abstract on a music education topic for M.M. applicants, a copy of the master's thesis or written project on a music education topic for DMA applicants); an audition tape, approximately 15 minutes in length, of the applicant's solo performance field; three letters of recommendation.

#### Music History and Literature

Applicants must submit the following: a statement of objectives and professional goals; academic transcripts from all universities attended; three letters of recommendation; writing sample (one or two historical or analytical term papers or a copy of the master's thesis).

#### Performance

A performance audition is required for all applicants for admission to a *performance major*. In the case of some programs, additional materials are also required. Specific audition requirements, along with other entrance requirements, are reviewed on an annual basis and published in the Application Requirements section online at [www.usc.edu/music](http://www.usc.edu/music).

## Master of Music

#### Unit and Grade Requirements

Thirty units of graduate work are required; a minimum of 15 units (excluding thesis) must be at the 500 level or higher. All students must satisfy the special requirements of their major department (see departmental adviser). Students must complete at least 26 semester units at USC, including the thesis or recital.

A grade point average of not less than 3.0 (A = 4.0) is required for all graduate courses in music, and a grade of B or higher is required for all courses in the major department. Students who transfer credits must achieve this average on all combined transferred and residence units.

#### Transferred Credits

All credits transferred must be the equivalent of corresponding *current work* at USC. Transfer work must have been completed within seven years from the date of admission to a master's degree program to be applied toward that degree. Transfer credit petitions must be filed with the appropriate faculty chair and the chair's decision made no later than the end of the first year in either the master's or doctoral program.

**Time Limit**

The time limit for completing the Master of Music degree is five years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

**Thesis Requirements and Guidance Committees**

A composition portfolio is required of candidates for the Master of Music degree in composition; a thesis or final project is required of candidates for the Master of Music degree in music education. For music education majors, the thesis will consist of a research document written on a topic approved by the music education department, the final project will consist of a creative project that will present the arrangement, production or design of innovative ideas, materials or curricula for specific applications in teaching music. Before registering for 594a Thesis, a student must choose a guidance committee composed of three regular faculty, approved by the department chair, of which at least two come from the home department. The chair of the guidance committee directly supervises the preparation of the thesis, the final acceptance of which is based upon the unanimous recommendation of all three members of the committee.

**Master's Recital**

At least one public recital is required of all candidates for the Master of Music degree with a major in choral music, composition, organ, strings, vocal arts or wind and percussion instruments. Two public recitals are required for majors in conducting, guitar, jazz studies, keyboard collaborative arts and piano. Candidates should apply at the Music Operations Office for recital dates. Some departments require that a candidate be prepared to play or conduct the program for the approval of a faculty committee in advance of the recital.

Students majoring in conducting may complete the recital requirements with a formal public recital or with special projects assigned, approved and attended by faculty from the conducting department, who also judge the acceptability of all such performances.

**Comprehensive Review**

Candidates for the Master of Music must pass a comprehensive review toward the end of their course of study. This review, which is administered by the faculty of the major department, consists of an oral or written examination or a specially designated course; it will cover relevant aspects of musical performance, literature and technique.

**Master of Music in Choral Music***Prerequisite*

Applicants must hold a Bachelor of Music degree or its equivalent. Completed course work must include at least the following: Conducting MUCD 340, MUCD 343 and MUCD 441; Music History and Literature MUHL 331 and MUHL 332; Theory and Composition MUCO 232b, MUCO 233b and MUCO 338x. One year of German or French is strongly recommended. Applicants must have attained senior standing in a principal performance medium.

*Keyboard Proficiency*

A keyboard proficiency test will be given by the choral faculty during the student's first semester in residence to determine if additional study in keyboard is required.

*Comprehensive Review*

A final oral examination in choral literature, conducting and rehearsal techniques will be administered by the choral music faculty.

CURRICULUM REQUIREMENTS	UNITS
MUCM 440 (2), MUCM 541 (2), MUCM 542 (2), MUCM 543 (2), MUCM 590 (2)	10
MUCD 443 (2), MUCD 541 (6)	8
Ensemble	2
MUHL 570 (2), electives at 500 level (4)	6
MPVA 439 (2), MPVA 501VO (2)	4
Graduate recital	0
Comprehensive review	0
	<hr/> 30

**Master of Music in Composition***Prerequisite*

The applicant must hold a Bachelor of Music degree with a major in composition or theory.

CURRICULUM REQUIREMENTS	UNITS
Ensemble	2
MUHL 570 (2), electives at the 500 level in MUHL or MUCO (6)	8
Individual instruction 501 in any performance medium (MPxx 501) or applicable MUCD or MUEA instruction	4
MUCO 537 (8), MUCO 592 (2), MUCO 536 (2)	12
Electives	4
Graduate recital	0
Comprehensive review	0
M.M. composition portfolio	0
	<hr/> 30

**Master of Music in Conducting***Prerequisite*

The applicant must hold a bachelor's degree with a music major and have at least one year of experience conducting an orchestra.

CURRICULUM REQUIREMENTS	UNITS
MUCD 550 (8)	8
Ensemble (preferably chamber music)	4
MUHL 570 (2), MUHL 575 (2), MUHL 591 (2)	6
One course from MUHL 573 (2), MUHL 574 (2), MUHL 576 (2), MUHL 577 (2) or MUHL 578 (2)	2
MUCO 501 (2), MUCO 502 (2)	4
Electives	6
Two graduate recitals	0
Comprehensive review	0
	<hr/> 30

**Master of Music in Jazz Studies***Prerequisite*

The applicant must hold a Bachelor of Music degree with a major in jazz studies or its equivalent.

CURRICULUM REQUIREMENTS	UNITS
MUEN 505 or MUEN 529 (4), MUEN 532 (4)	8
MUHL 570 (2), MUHL 578 (2), MUHL electives at the 500 level (2)	6
MUJZ 443 (2) or MUJZ 545 (2)	2
MUJZ 547 (2), MUJZ 553 (8)	10
Electives	4
Two graduate recitals	0
Comprehensive review	0
	<hr/> 30

**Master of Music in Music Education***Prerequisite*

The applicant must hold a Bachelor of Music degree with a major in music education and have one year of teaching experience beyond supervised student teaching.

CURRICULUM REQUIREMENTS	UNITS
MUED 500 (3), MUED 505 (2), MUHL electives at the 500 level (4)	9
MUCD 441 (2) or MUCD 443 (2)	2
MUCO 501 (2) or MUCO 502 (2)	2
MUED 594ab (4), or MUED 590 (2) and MUED 592 (2)	4
Two courses from: MUED 501 (3), MUED 502 (3), MUED 503 (3) or MUED 504 (3)	6
Individual instruction (organ, piano, string instrument, vocal arts, or wind or percussion instrument), courses in conducting, composition or arranging, or ensemble	4
Electives in music	3
Comprehensive review	0
	<hr/> 30

**Master of Music in Performance (Keyboard Collaborative Arts)***Prerequisite*

Applicants must hold the Bachelor of Music degree with a major in piano or keyboard collaborative arts or equivalent background as determined by the collaborative arts faculty. It is strongly suggested that students who have not previously taken courses in Italian, French, English and German diction, or in song literature, enroll in the appropriate course(s) (MPVA 440, MPVA 441, MPVA 479) as part of their electives.

CURRICULUM REQUIREMENTS	UNITS
MUHL 570 (2), MUHL 578 (2), MUHL electives at the 500 level (4)	8
MPKS 481 (2), 553CP (8), 560 (2), 561 (2)	14
Electives in music	8
Two graduate recitals, one with voice(s), the other with instrument(s)	0
Comprehensive review	0
	30

**Master of Music in Performance (Classical Guitar)***Prerequisite*

The applicant must hold a bachelor's degree with a major in music with guitar as the principal instrument.

CURRICULUM REQUIREMENTS	UNITS
MUEN 526 (2), electives (2)	4
MUHL 570 (2), MUHL 578 (2), MUHL electives at the 500 level (2)	6
MPGU 427 (3), MPGU 553CG (8), MPGU 557 (4)	15
MPKS 481 (2)	2
Electives	3
Two graduate recitals	0
Comprehensive review	0
	30

**Master of Music in Performance (Studio Guitar)***Prerequisite*

The applicant must hold a bachelor's degree with a major in music with guitar as the principal instrument.

CURRICULUM REQUIREMENTS	UNITS
MUEN 526 (2), electives (2)	4
MUHL 570 (2), MUHL 578 (2), MUHL electives at the 500 level (2)	6
MPGU 553SG (8), MPGU 558 (4)	12
Music electives	4
Electives	4
Two graduate recitals	0
Comprehensive review	0

**Master of Music in Performance (Organ)***Prerequisite*

The applicant must hold a Bachelor of Music degree with a major in organ or equivalent.

CURRICULUM REQUIREMENTS	UNITS
Ensemble	2
MUHL 570 (2), MUHL 578 (2), MUHL electives at the 500 level (4)	8
MPKS 481 (2), MPKS 553OR (8)	10
Music electives (at least two from the 500 level)	6
Electives	4
Graduate recital	0
Comprehensive review	0
	30

**Master of Music in Performance (Piano)***Prerequisite*

The applicant must hold a Bachelor of Music degree in piano or equivalent.

CURRICULUM REQUIREMENTS	UNITS
Ensemble	2
MUHL 570 (2), MUHL electives at 500 level (6)	8
MPKS 553P (8), MPKS 450a (2), MPKS 520 (6)	16
Electives	4
Two graduate recitals	0
Comprehensive review	0
	30

**Master of Music in Performance (Violin), (Viola), (Violoncello), (Double Bass) or (Harp)***Prerequisite*

The applicant must hold a Bachelor of Music degree with a major in a string instrument or equivalent.

CURRICULUM REQUIREMENTS	UNITS
MUCD 443	2
MUEN 527 (2) and MUEN 520, MUEN 530 or MUEN 550 (4)	6
MUHL 570 (2), MUHL 578 (2), MUHL electives at the 500 level (4)	8
MPKS 481	2
MPST 553 (8)	8
Music electives	4
Graduate recital	0
Comprehensive review	0
	30

**Master of Music in Performance (Vocal Arts)***Prerequisite*

The applicant must hold a Bachelor of Music degree with a major in vocal arts. Students who have not had formal training in foreign language, diction, vocal pedagogy, acting for singers, song literature and in Italian, French or German languages must show competency in these areas through examination or complete appropriate course work with a grade of B or higher.

CURRICULUM REQUIREMENTS	UNITS
Ensemble	2
MUHL 570 (2), electives at 500 level (2)	4
MPVA 443 (2), MPVA 540 (2), MPVA 541 (2), MPVA 553VO (8)	14
Electives in music (400 or 500 level)	5
Electives	5
Graduate recital	0
Comprehensive review	0
	30

*Comprehensive Review*

A final examination in vocal pedagogy, art song and oratorio literature and diction will be administered by the vocal arts faculty. Students are required to write extensive program notes for the degree recital.

*USC Opera*

USC Opera is an integral part of the Vocal Arts Department, providing career development opportunities for singers, coach/pianists, conductors and directors. The program includes instruction in opera history and literature, coaching techniques, stage direction, body movement for singers, stage training, role study and analysis.

The opera workshop is a repertory experience involving preparation and performance of operatic works and excerpts for performance both on and off the USC campus.

**Master of Music in Performance (Flute), (Oboe), (Clarinet), (Bassoon), (Saxophone), (French Horn), (Trumpet), (Trombone), (Tuba) or (Percussion)***Prerequisite*

The applicant must hold a Bachelor of Music degree with a major in a wind instrument or percussion or equivalent.

CURRICULUM REQUIREMENTS	UNITS
MUCD 443	2
MUEN 523 (4), MUEN 525 (4)	8
MUHL 570 (2), MUHL 578 (2), MUHL electives at the 500 level (4)	8
MPWP 481 or MPWP 482 (2), MPWP 551 (2), MPWP 553 (8)	12
Graduate recital	0
Comprehensive review	0
	30

## Master of Arts

This degree is under the jurisdiction of the Graduate School. Students should also refer to the Graduate School section of this catalog for general regulations, page 97.

### Departmental Requirements

Applicants will be evaluated on the basis of scores on the Graduate Record Examinations, transcripts of previous college courses, a research paper and letters of reference.

Regular (classified) standing is achieved when the general test of the Graduate Record Examinations has been taken, and when the Music Graduate Entrance Examinations have been completed satisfactorily. Remedial course work, if recommended, may be substituted for repetition of examinations.

### Language Requirement

Students are required to demonstrate a reading knowledge by passing an examination in one foreign language chosen by the student from among French, German, Italian or Latin. This requirement must be passed prior to the comprehensive examination.

### Prerequisites

Applicants should have an undergraduate degree with a major in music or the equivalent, and a substantial background in languages, arts and letters.

### Degree Requirements for the Music History and Literature Emphasis

REQUIREMENTS	UNITS
MUHL 570	2
MUHL courses numbered 579, 600-699	6
Courses in history, language, literature or the arts other than music	8
Courses drawn from: MUHL 500-699, MUCO 501 and MUCO 502	8
Electives	6
Comprehensive examination	0
	<hr/> 30

### Degree Requirements for the Early Music Performance Emphasis

REQUIREMENTS	UNITS
MUEN 550	3
MUHL 570 (2), MUHL 572 (2), MUHL 574 (2), MUHL 575 (2), MUHL 589 (2), MUHL 591 (2), MUHL 594ab (2-2),	16
MPEM 450 (2), MPEM 553 (5)	7
Elective in music	2
Electives in letters, arts and sciences	4
	<hr/> 32

The thesis will include the planning, research, preparation and leadership of a full-length program in early music. This practical work will be supported by a written essay that deals, as appropriate, with historical data sources, authentic performance practices and a stylistic assessment of the repertoire that is performed. In lieu of a comprehensive examination, candidates for the Early Music Performance Emphasis will be required to pass periodic reviews to demonstrate progress.

## Non-Degree Programs

### Artist Diploma Program

This program is designed for young artists of exceptional ability and musical sensitivity who plan careers as solo performers. The Artist Diploma Program provides young artists with the opportunity to devote their full time to concentrated study and practice for the duration of their assigned programs.

#### Entrance Requirements

Following the recommendation of the student's major department, a performance audition, consisting of a full-length recital before the Artist Diploma Committee, is required.

#### Curriculum Requirements

A minimum of 16 units at the 754 level (from MPEM, MPGU, MPKS, MPST, MPVA or MPWP) and four full-length recitals are required. This program typically requires two to three consecutive years of study for completion.

### Graduate Certificate Program in Performance

This two-year graduate-level program is designed for students who have completed their undergraduate education in music, or its equivalent, and intend to concentrate their energies on the full-time development of their discipline.

#### Entrance Requirements

A performance audition is required with repertory to be determined by the student's primary department.

#### Curriculum Requirements

The requirements for this program consist of 16 units of Graduate Certificate Performance (4 units per semester of MPEM 554, MPGU 554, MPKS 554, MPST 554, MPVA 554, MPWP 554 or MUJZ 554). Graduate Certificate Performance encompasses individual instruction, studio class and two ensembles or the equivalent as appropriate to the discipline.

### Graduate Certificate Program in Scoring for Motion Pictures and Television

This one-year program is designed for students who hold the Bachelor of Music in Composition or its equivalent. Students in the SMPTV program must maintain a 3.0 GPA (A = 4.0), with no course grade lower than a C (2.0). Work graded C- or below is not acceptable for credit toward the certificate.

#### Entrance Requirements

Specific entrance requirements are reviewed on an annual basis and published in the Application Requirements section online at [www.usc.edu/music](http://www.usc.edu/music).

CURRICULUM REQUIREMENTS	UNITS
MUCO 440ab (4), MUCO 442ab (4), MUCO 443ab (4), MUCO 520 (2), MUCO 522ab (4), MUCO 523ab (4), MUCO 545 (4), MUCO 560ab (4)	30

## Doctor of Musical Arts

### Degree Prerequisites

DMA applicants must complete the appropriate master of music degree program or its equivalent.

### Admission

Refer to School of Music Graduate Degrees, Admission Requirements.

### Graduate Record Examinations

Scores from the General Test of the Graduate Record Examinations (GRE) are required for application and admission to the Doctor of Musical Arts degree. Test scores on the GRE that are more than five years old at the time of application are not accepted.

### Graduate Committee Interview

Before the completion of 16 units beyond the master's degree and before permission to present the second doctoral recital is requested, doctoral students must submit a detailed curriculum vitae to the Graduate Committee of the School of Music summarizing their background and objectives. The student will be evaluated on musicianship and general academic qualifications, teaching experience and the validity and quality of creative, literary or performance projects submitted. The committee determines the student's continuation in the program, proposed areas of concentration and the guidance committee members.

### Course Requirements

Each student is required to prepare four areas of concentration: the major field, an academic field (chosen from among musicology, theory and analysis, music education, choral music or sacred music), and elective areas selected in consultation with an adviser from two of the following: theory or compositional skills (composition, counterpoint, orchestration, band arranging or choral arranging); performance, early music or jazz studies; music education; sacred or choral music; conducting; performance pedagogy; electroacoustic media; a field outside of music. The academic field may not duplicate a major or an elective field. Admission to elective and academic fields must be approved by the department concerned, prior to the Graduate Committee interview.

The elective and academic fields are supported by courses that are determined by the department in which these fields are administered. Six to 8 units are taken in elective fields; 8 to 10 units in the academic field. No more than two of the four fields may be under the guidance of the same department within the School of Music, and at least one of the elective fields must result in a written examination as part of the qualifying examinations.

Required courses for each major curriculum are listed subsequently in this catalogue. Special requirements in any of the four areas of concentration (if any) are determined by the guidance committee member responsible for that area.

A minimum of 65 graduate units beyond the bachelor's degree are required to complete the degree. Fifty-five or more units must be in music, 12 of these beyond the master's level must be in the major. At least 40 of these must be at the 500 level or higher. All course work earned under these requirements for a doctoral degree is considered to be obsolete after 10 years from the date of completion of such work and may not be used to fulfill degree requirements.

### Residence Requirement

A minimum of two years of full-time study beyond the Master of Music degree is required for the Doctor of Musical Arts. At least one year of full-time study beyond the master's degree (8 units or more per semester) must be in residence at USC.

### Grade Point Average Requirements

A minimum grade point average of 3.0 (A = 4.0) is required for all graduate course units in music. A grade of B or higher is required for all courses in the major.

### Transfer Credit

The Degree Progress Department in the Office of Academic Records and Registrar determines whether course work taken elsewhere is available for transfer credit. A maximum of 30 units of transfer credit may be applied toward a doctoral degree in music. Whether such credit is applicable toward a specific requirement in a major or minor field is determined by the chair of the department in the School of Music in which the subject is taught, pending approval by the dean of the Thornton School of Music. Transfer credit petitions must be filed with the appropriate faculty chair and the chair's decision made no later than the end of the first year in either the master's or doctoral program. Transfer work must have been completed within 10 years of admission to the DMA program to be applied toward that degree.

### Foreign Language

A reading knowledge of French, German, Italian or Spanish is required of all students. Departments within the Thornton School may require additional language skills. All language requirements must be fulfilled one semester before the qualifying examination at the latest.

### Guidance Committee

The guidance committee is composed of at least five members: two faculty from the major department, one of whom will serve as chair, and a faculty member from each of the three other areas of concentration. At least three members of a committee must be drawn from tenured and tenure-track faculty.

The committee administers the written and oral parts of the qualifying examination. The committee continues to serve until the qualifying examination has been passed, the dissertation topic approved (if applicable) and the student is admitted to candidacy. For students in curricula which require recitals, the guidance committee serves as the recital committee and is responsible for the format, content, scheduling, and approval of the required performances.

### Qualifying Examination

The qualifying examination for the DMA is administered by the student's guidance committee. It is comprehensive, partly written and partly oral, and designed in part to test the student's fitness for independence as a performer, composer, teacher, researcher and/or scholar. The student must obtain permission from the guidance committee to take the qualifying examination and schedule it at least two months in advance to ensure the committee's availability. The examination may be taken either during the final semester of course work (except dissertation or individual instruction) or within two semesters immediately after, provided that all members of the guidance committee are available to administer it. In degree programs that require the presentation of four major recitals, at least two major recitals must be presented prior to the administration of the qualifying examination. Qualifying examinations will not be scheduled during summer sessions except under extraordinary circumstances and only with the written approval of all guidance committee members. All portions of the examination must be completed within one month.

Written examinations are prepared and read by the guidance committee. All of the student's areas of concentration, except performance, conducting and composition, will be covered in a written examination or comparable project. The examination in performance, conducting or composition normally is a public recital, evaluated by appropriate members of the guidance committee. If the written examinations, comparable project(s), or recital(s) are judged to be satisfactory, an oral examination is then given. This examination covers in depth topics discussed in the written examinations and/or new material.

The two representatives of the department and the academic minor representative must be present at the oral examination and render a judgment on the acceptability of the qualifying examinations as a whole. The representatives of the two elective fields, at their discretion, may take part in the oral examination, especially if they feel that the project, recital or written examination passed by the candidate for their field should be explored further. Their presence is not required if they feel that the candidate has demonstrated knowledge and accomplishments appropriate for an elective field in their disciplines. The examinations will be reported as passing if there is no more than one dissenting vote on the guidance committee. A student must pass both the written and oral examinations to pass the qualifying examination. A pass on the examination cannot be made contingent upon any form of additional work.

If a student fails the qualifying examination, the guidance committee may permit the student to repeat it once at a mutually satisfactory time within a period of not less than six months nor more than one year from the date of the first examination. A student may not take the qualifying examination more than twice.

#### Admission to Candidacy

Admission to candidacy occurs after the student has passed the qualifying examination, upon formal action of the dean of the Thornton School. The dissertation or one final recital must be completed *after* admission to candidacy.

#### Doctoral Dissertation

A dissertation based on original investigation is required of candidates in composition, music education and choral music. The dissertation must reveal scholarly ability, technical mastery, capacity for independent research and originality in creative thought.

#### Dissertation Committee

After the guidance committee recommends admission to candidacy and approves the dissertation, it is reduced to three members. This smaller committee guides the student through the completion of the final project. Additional members may be added at the discretion of the chair of the committee if the topic requires special expertise.

#### Registration

The student must register in 794 Dissertation each semester after admission to candidacy until degree requirements are completed. Registration for the dissertation in no less than two regular term semesters following admission to candidacy entitles the candidate to supervision by the dissertation committee.

If the dissertation is not completed and accepted within two semesters, the candidate must register for 794 each semester thereafter until the document has been accepted. No more than 8 units of credit in 794 may be accumulated regardless of the number of semesters the candidate may be required to register.

A candidate who must withdraw temporarily from registration in 794 for a semester must formally report this before the beginning of that semester to the Office of Doctoral Programs, Thornton School of Music, requesting by petition a leave of absence. During a leave of absence the candidate will not be entitled to assistance from the guidance committee or to the use of university facilities. Leave will be granted only under exceptional circumstances.

#### Format for Theses and Dissertations

All theses and dissertations submitted for requirements for graduate degrees must conform to university regulations in format and method of preparation. See Theses and Dissertations, page 100.

#### Defense of the Dissertation

After meeting all requirements including the qualifying examination, the candidate must defend the dissertation. This defense occurs to determine for the committee that the candidate has attained the stage of scholarly advancement and power of investigation demanded for recommendation to the doctorate. While this oral defense is open to the general university community, only the members of the dissertation committee have the authority to recommend its acceptance or denial. The recommendation must be unanimous.

At least seven weeks before the scheduled date of the defense of the dissertation, written approval by all members of the candidate's dissertation committee must be filed with the dean of the Thornton School of Music. The typed copy for the abstract of the dissertation is due at this time.

A candidate may defend the dissertation on the basis of an approved preliminary copy. If the defense is satisfactory and the committee is satisfied with the manuscript as presented, the committee then signs the Approval to Submit Defended and Final Copy of the Doctoral Work form. If additional work is required, the form is left unsigned until the work has been approved.

The final electronic PDF copy of the dissertation, together with signed signature sheet and approval forms, must be presented to the Thesis Editor, the Graduate School, GFS 315, by the Graduate School's submission date and times. Approval of format and acceptance by the Graduate School must be presented to the dean of the Thornton School of Music at least one week before the end of the semester.

#### Abstract of Dissertation

Since the abstract of the dissertation is published in Dissertation Abstracts International, it should be written with care and be representative of the final draft of the dissertation.

#### Time Schedule

The DMA is established on the assumption that a well-qualified student can complete it in three years of full-time work. If the student pursues part-time graduate study, or if the field of graduate work is not that of undergraduate study, more time may be required.

The time limit for completing the Doctor of Musical Arts degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the doctoral program, the time limit for completing the Doctor of Musical Arts degree is six years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

#### Basic DMA Curriculum

REQUIRED FOR ALL DMA CANDIDATES	UNITS
MUCD 441* (2), MUCD 443 (2)	4
MUCO 501 (2), MUCO 502 (2)	4
MUED 505	2
MUHL 570	2
MUHL electives numbered 500 through 695	6
Ensemble	2
	<hr/>
	20

\*Choral music majors are exempt from taking MUCD 441.

Courses with similar content taken for graduate credit in another accredited institution may be substituted, subject to departmental approval. Master's degree credit for ensemble taken at USC may fulfill this requirement, subject to departmental approval.

**Choral Music Major**

A keyboard proficiency test will be given by the choral faculty during the student's first semester in residence to determine if additional study in keyboard is required.

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum**	20
MUCM 440* (2), MUCM 541* (2), MUCM 542* (2), MUCM 643 (4), MUCM 794ab (2-2)	14
MUCH 571	2
MUCD 541 (4), MUCD 641 (2), MUCD 653 (2)	8
Ensemble (500 level; choral music majors must participate in a choral ensemble each semester if enrolled for 4 or more units)	2
Electives	19
Conduct two principal choral concerts (at least one of which will include instrumental ensemble)	0
	<hr/> 65

\*May be taken as part of the master's degree.

\*\*Choral music majors are not required to take MUCD 441.

**Composition Major**

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum	20
MUCO 536 (4), MUCO 592 (4), MUCO 637 (4), MUCO 737 (4), MUCO 794ab (4)	20
Electives	25
Graduate recital	0
	<hr/> 65

**Jazz Studies Major**

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum	20
MUEN 532	4
MUJZ 443 (2), MUJZ 545 (2), MUJZ 547 (4), MUJZ 653 (8), MUJZ 688 (4)	20
Electives	21
Two recitals of original compositions and arrangements written while in the DMA program	0
Lecture-recital in conjunction with an appropriate research project	0
	<hr/> 65

**Music Education Major**

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum*	20
MUED 500 (3), MUED 605 (3), MUED 606 (3), MUED 607 (3), MUED 790 (1), MUED 791 (3), MUED 794ab (4)	20
Two courses from: MUED 501 (3), MUED 502 (3), MUED 503 (3), MUED 504 (3)	6
One course from: MUED 792 (3), MUED 793 (3)	3
Electives	16
	<hr/> 65

\*MUED 500 may be taken as a substitute for MUHL 570 in the basic DMA curriculum.

**Performance Major**

It is the objective of the performance curriculum to combine high standards of performance with intellectual accomplishments appropriate to a university degree. Candidates electing this major must present at least four major public appearances: two solo recitals and two other appropriate appearances. The exact format, content and scheduling of the four appearances are the responsibility of the candidate's guidance committee.

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum	20
Individual instruction 653 (take organ, string instrument, vocal arts, wind instrument or percussion for a maximum of 12 units)	12
Electives	33
Two solo recitals and two other appropriate performances	0
	<hr/> 65

String and wind instrument and percussion majors must participate in a large ensemble each semester if enrolled in four or more units.

**Performance Major — Piano**

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum	20
MPKS 653 (12), MPKS 520 (6)	18
Electives	27
Four graduate recitals: two solo recitals, one chamber recital, and one lecture-recital	0
	<hr/> 65

**Performance Major — Keyboard Collaborative Arts**

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum	20
MPKS 481 (2), MPKS 560 (2), MPKS 561 (2), MPKS 653 (12)	18
Electives	27
Four doctoral level recitals; one with voice(s), one with instrument(s), one lecture recital, and other recital as approved	0
	<hr/> 65

The exact format, content and scheduling of the four graduate recitals are the responsibility of the candidate's major professor.

**Performance Major — Early Music**

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum*	20
MPEN 653 (8); MPEN 650 (4) MUHL 572 (2), MUHL 589 (2), MUHL 591 (2)	6
MUEN 650	4
Electives	23
Four graduate recitals: two as soloist and ensemble director, one lecture-recital, and one recital of the student's choice	0
	<hr/> 65

\*Must include MUHL 574 and MUHL 575.

**Performance Major — Classical Guitar**

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum	20
MPGU 653 (12), MPGU 427 (3) MPKS 481	15
Electives	28
Two solo recitals and two other appropriate performances	0
	<hr/> 65

**Performance Major — Studio Guitar**

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum	20
MPGU 558 (4), MPGU 653 (12) MUEN 526 (4)	16
Electives	4
Four doctoral recitals, one of which must be a lecture recital in conjunction with an appropriate research project.	0
	<hr/> 65

## Doctor of Philosophy

The Doctor of Philosophy degree with a major in music is granted by the Graduate School. Candidates for the Ph.D. in music should also refer to the Graduate School section of this catalogue for general regulations, page 97.

A substantial background in music and liberal arts is required. Graduate course requirements for the Ph.D. are adapted to the needs and research interests of the individual student. A minimum of 60 post-baccalaureate units is required.

### Foreign Language Requirements

Students are required to demonstrate a reading knowledge by passing an examination in German and one other foreign language chosen by the student from among French, Italian or Latin. With the permission of the chair of the guidance committee, a foreign

language relevant to the dissertation may be chosen in place of French, Italian or Latin. The language requirement for the M.A. degree may be applied toward the Ph.D. Doctoral language requirements should be passed as early as possible, but, at latest, during the fourth semester of course work.

### Screening Procedure

Before the completion of 24 units of graduate work at USC and with the approval of the department chair, students must be interviewed by the curriculum committee of the School of Music. Continuance in course work will be contingent upon approval of the committee. Ph.D. candidates in musicology who did not receive an M.A. degree from USC must take the M.A. comprehensive examination in historical musicology prior to the

interview. Continuance in course work will be contingent upon passing these examinations.

### Historical Musicology Emphasis

REQUIREMENTS	UNITS
MUHL 570	2
Courses selected from:	
MUHL 579, MUHL 600-699	12
Electives in history, language, literature or arts other than music	8
Courses drawn from:	
MUHL 500-699, MUCO 501, MUCO 502	10
Electives in music, letters, arts and sciences	24
Dissertation (MUHL 794ab)	4
	<hr/> 60

## Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

### CHORAL MUSIC (MUCM)

**MUCM 320 Introduction to Choral Music (3, FaSp)** An introduction to the many facets of choral music. Grounding in the intellectual and practical issues of choirs, singing, and choral literature. *Recommended preparation:* ability to read music.

**MUCM 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration is permitted. Enrollment by petition only.

**MUCM 440 Choral Development (2)** Problems of achieving proper balance, blend, intonation, diction, precision, etc., in choral groups; criteria for selection of repertoire for particular groups. Junior standing in music.

**MUCM 490x Directed Research (2-8, max 8)** Individual research and readings. Not available for graduate credit.

**MUCM 541 Choral Literature I (2)** Choral composition from c. 1500 to 1800. Performance and analysis of representative works.

**MUCM 542 Choral Literature II (2)** 19th and 20th century choral works; criteria for program building.

**MUCM 543 Seminar in Choral Music (2, max 4)** Advanced choral techniques; historical, analytical and performance problems. *Prerequisite:* MUCM 641.

**MUCM 590 Directed Research (1-12)** Supervised research in preparation for the Master's recital. Graded CR/NC.

**MUCM 641 Choral Literature III (2)** Detailed study of selected major choral works; historical context, score analysis, performance practices. *Prerequisite:* MUCM 541, MUCM 542.

**MUCM 643 Seminar in Choral Music II (2, max 4, Sp)** Continuation of MUCM 543, with concentration on the conducting problems in major choral-orchestral works.

**MUCM 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MUCM 794abcdz Doctoral Dissertation (2-2-2-2-0)** Credit on acceptance of dissertation. Graded IP/CR/NC.

### SACRED MUSIC (MUCH)

**MUCH 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**MUCH 473 Hymns and Service Music (2)** History and uses of the hymn and hymn tune; evaluation of anthems and other service music for worship.

**MUCH 474 The Church Organist (2)** Accompanying; hymn playing; transposition; improvisation; vocal score reading; conducting from the console; service repertoire. Basic knowledge of the organ for conductors who are not organists.

**MUCH 490x Directed Research (2-8, max 8)** Individual research and readings. Not available for graduate credit.

**MUCH 570 Foundations of Sacred Music (2, Fa)** An introduction to the history of sacred music, liturgical practices and worship traditions from antiquity to present day.

**MUCH 571 Music of the Great Liturgies (2)** Comparison of the Jewish, Eastern Orthodox, Roman Catholic, Lutheran, and Anglican liturgies and their music; relation to music in the nonliturgical service; the church year.

**MUCH 572 Sacred Music Administration (2, Sp)** Developing, maintaining and administering the music program of the church or other religious institutions. Programming, staffing, developing budgets, techniques and repertoire for the graded choir program, handbell choir and other ensembles.

**MUCH 590 Directed Research (1-12)**

Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MUCH 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MUCH 794abcdz Doctoral Dissertation (2-2-2-2-0)** Credit on acceptance of dissertation. Graded IP/CR/NC.

**COMPOSITION (MUCO)**

**MUCO 101x Fundamentals of Music Theory (2, FaSp)** An introductory course in music theory required for those majors in need of remedial training, and available to the general student who wishes to develop music writing skills. Not available for credit to B.M. and B.A. music majors. *Recommended preparation:* ability to read music.

**MUCO 130abx Basics of Music Theory (a: 3, Fa; b: 3, Sp)** Introduction to music theory; scales, intervals, principles of common practice and popular music harmony; melodic, harmonic, and structural analysis; 20th century developments. Not available for credit to B.M. majors.

**MUCO 131ab Harmony in Popular Music (2, Fa; 2, Sp)** Study of harmony used in the popular music idiom, as well as diminished chord patterns, modulation techniques, basic modal theory, and principles of melodic construction. *Prerequisite:* MUCO 130b.

**MUCO 132ab Aural Skills I (a: 2, Fa; b: 2, Sp)** Sight-singing, dictation, related keyboard application.

**MUCO 133ab Theory I (a: 3, Fa; b: 3, Sp)**  
*a:* Notation, scales, intervals; introduction to counterpoint; harmonic principles of the common practice period; analysis, written work.  
*b:* Continuation of MUCO 133a; elements of form; application of analysis to performance. Concurrent registration in Aural Skills required.

**MUCO 135 Counterpoint I (2, Sp)** The study of the techniques of modal counterpoint; exercises in two-, three- and four-part writing in 16th century style. *Prerequisite:* MUCO 137a.

**MUCO 137ab Introduction to Composition (2-2, FaSp)** Beginning exercises in composition, study and class discussion of assigned scores and recordings.

**MUCO 221abx Composition for Non-Majors (2-2, FaSp)** Introduction to the composition of concert music. Includes set exercises, free composition, study of selected compositions. Intended for interested, qualified students not majoring in composition. Not available for degree credit to composition majors. *Prerequisite:* MUCO 221a; *recommended preparation:* MUCO 130bx, MUCO 133b.

**MUCO 232ab Aural Skills II (a: 2, Fa; b: 2, Sp)** Continuation of MUCO 132ab.

**MUCO 233ab Theory II (a: 3, Fa; b: 3, Sp)**  
*a:* Analysis of representative pieces from the classic and romantic periods; exercises in composition. *b:* Survey of 20th century developments; composition utilizing 20th century techniques. *Prerequisite:* MUCO 133b.

**MUCO 235 Counterpoint II (2, Sp)** Studies in tonal counterpoint; two-, three- and four-part counterpoint in 18th century style; polyphonic variations; inventions. *Prerequisite:* MUCO 137b.

**MUCO 236 Orchestration I (2, Fa)** Introduction to the principles of instrumentation; ranges techniques, timbres; transpositions of orchestral instruments; beginning exercises in orchestration. *Prerequisite:* MUCO 137b.

**MUCO 237ab Composition I (4-4, FaSp)** Composition in shorter forms, continuation of score analysis and listening assignments. *Prerequisite:* MUCO 137b.

**MUCO 300 Theory Review (1, FaSpSm)** Review of materials covered in Theory I and II. For students whose entrance examination in music theory indicates the need for further study.

**MUCO 321x Composition for Non-Majors II (1-2, max 8, FaSpSm)** Individual instruction in composition for non-composition majors. Continuation of MUCO 221abx. Not open to B.M. in composition majors. *Prerequisite:* MUCO 221bx.

**MUCO 333 Aural Skills Review (1, FaSp)** Review of the materials covered in Aural Skills I, II, and III. For students whose entrance examination in aural skills indicates the need for further study.

**MUCO 336ab Orchestration II (a: 2, Fa; b: 2, Sp)** Intermediate exercises in orchestration, including scoring for chamber ensembles and orchestra; study of the history of orchestration. *Prerequisite:* MUCO 236.

**MUCO 337ab Composition II (4, Fa; 4, Sp)** Continuation of MUCO 237; composition in larger forms. *Prerequisite:* MUCO 237b.

**MUCO 338x Elementary Orchestration (2, Fa)** Range, techniques, timbre, transposition of orchestral instruments; exercises in orchestration. Not available for credit to Composition majors. *Recommended preparation:* MUCO 233b.

**MUCO 339 Orchestration Review (1, FaSm)** Review of materials covered in elementary orchestration; for students whose entrance examination in orchestration indicates a need for further study.

**MUCO 341 Counterpoint Review (1, SpSm)** Review of materials covered in tonal counterpoint. For students whose entrance examination in counterpoint indicates the need for further study. For graduate students only.

**MUCO 360 Music Notation and Copying (1)** Development of skills in music calligraphy.

**MUCO 370ab Arranging for the Recording Media (2-2)** Arranging and composing for studio recording ensembles.

**MUCO 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**MUCO 406ab Contemporary Notation (2-2)** Notating new music; study and comparison of representative scores.

**MUCO 425 Instrumental Music of Debussy and Ravel (2)** Critical examination of the piano, chamber, and orchestral scores; comparison of styles, techniques and aesthetics of these "Impressionist" composers. *Prerequisite:* MUCO 336a or MUCO 338x; MUHL 331; MUHL 332.

**MUCO 432ab Advanced Theory (1 or 2; 1 or 2)** Special problems in music theory.

**MUCO 434 Analytical Techniques (2)** Selected analytical topics. *Prerequisite:* MUCO 232b, MUCO 233b.

**MUCO 435 Counterpoint III (2, Fa)** Canon and fugue; 19th and 20th century developments. *Prerequisite:* MUCO 235.

**MUCO 436 Orchestration III (2, Sp)** Continuation of Orchestration II. *Prerequisite:* MUCO 336ab.

**MUCO 437ab Composition III (2-2, FaSp)**

Individual instruction in composition; preparation for senior recital. Not intended for SMPTV students. *Prerequisite:* MUCO 337b.

**MUCO 438 Arranging for Marching Band (2)**

Fundamental concepts; instrumental capabilities; notation; color and scoring; modulation; percussion writing. *Prerequisite:* MUCO 336b or MUCO 338x.

**MUCO 439 Band Arranging (2, max 4)**

Characteristics and use of individual instruments; writing for separate choirs; chamber and solo writing; scoring piano, organ, and orchestral music for band. *Prerequisite:* MUCO 237b, MUCO 336b or MUCO 338x.

**MUCO 440ab Composition for Films and Television (2-2)**

Planning, timing, composing, and orchestrating music for dramatic and documentary films and television programs. *Prerequisite:* MUCO 336b or MUCO 338x, MUCO 337b.

**MUCO 441 Choral Arranging (1 or 2, max 4)**

Practice in arranging and composing for chorus. *Prerequisite:* MUCO 237b.

**MUCO 442ab History of Film Music Scoring (a: 2, Fa; b: 2, Sp)**

A comprehensive survey of the craft of composing music for motion pictures and television, combining film music history and score analysis, geared specifically to composers. Open only to students in the Advanced Studies Certificate Program in Scoring for Motion Pictures and Television and the B.M. in Composition (Film Scoring).

**MUCO 443ab Film Score Analysis and Preparation (2-2, FaSp)**

Applied techniques in film music analysis and preparation for scoring.

**MUCO 470 Electroacoustic Composition (2)**

Electronic music for the composer: history of means and styles, aesthetic issues and practical problems, computer usages, bibliography and repertoire. *Recommended preparation:* MUEA 474a.

**MUCO 490x Directed Research (2-8, max 8)**

Individual research and readings. Not available for graduate credit.

**MUCO 499 Special Topics (2-4, max 8)**

Selected topics of current interest.

**MUCO 501 Introduction to the Analysis of Tonal Music (2, FaSp)**

Survey of common practice period (1650-1900) approaches to phrase design, tonal organization and type-forms (binary, ternary, rondo, sonata).

**MUCO 502 Introduction to the Analysis of Post-Tonal Music (2, FaSp)**

Introductory survey of 20th/21st century approaches to the organization of pitch (serial, modal, extended tonal, etc.), rhythm, texture and form.

**MUCO 520 Composition Forum (1, max 2, FaSp)**

Graded CR/NC.

**MUCO 521x Composition for Non-Majors III (1-2, max 8, FaSp5m)**

Individual instruction in composition. Not open to graduate students in composition. *Prerequisite:* submission of portfolio of musical compositions.

**MUCO 522ab Sketching and Scoring for Film and TV (2-2, FaSp)**

Applying techniques of music composition, orchestration and conducting towards creating original dramatic scores for film and TV.

**MUCO 523ab Advanced Application of Film Music Technology (2-2, FaSp)**

Applying advanced state of the art technologies to the art of film music, including synthesizers, samplers, digital audio workstations and hard disk recording.

**MUCO 533ab Analytical Approaches to Tonal Music (2-2, FaSp)**

*a:* Introducing to essential structural and prolongational aspects of Schenkerian theory. *b:* Application of the Schenkerian methods to individual movements and short pieces. *Prerequisite:* MUCO 501.

**MUCO 536 Advanced Orchestration I (1 or 2, max 4, FaSp)**

Continuation of Orchestration III with emphasis on contemporary techniques. *Prerequisite:* MUCO 436b.

**MUCO 537 Advanced Composition I (1 or 2, max 8)**

For graduates with evidence of preparation for advanced work. *Prerequisite:* MUCO 437b.

**MUCO 538ab Analytical Approaches to Post-Tonal Music from 1908-1950 (2-2, FaSp)**

*a:* The breakdown of tonality, rise of atonal/pantonal pitch organization, new and extended approaches to tonality, modality. *b:* Continuation of 538a; twelve-tone methods, just tuning systems, new approaches to rhythm, texture, timbre. *Prerequisite:* MUCO 502.

**MUCO 539ab Theoretical and Aesthetic Issues in Music from 1950 to the Present (2-2, FaSp)**

*a:* Anti-rationality and indeterminacy, ultra-rationality and integral serialism, new performance procedures, electronic music and new technologies, minimalism. *b:* Post-modernism of reaction, post-modernism of resistance, mannerist minimalism, anti-modernism. *Prerequisite:* MUCO 502.

**MUCO 540ab Composing Music for Games (a: 2, Fa; b: 2, Sp)**

Applied techniques of music composition to video games. Includes conceptual and technical details which differentiate scoring for games.

**MUCO 545 Individual Instruction in Advanced Film Music Composition (2, max 4, FaSp)**

Private instruction in composition and conducting for film and television.

**MUCO 548 Writer and Composer (3, Sp)**

Structured collaboration among composers and poets. Activities include fundamentals of poetry, comparative analysis, creative projects. Open to Literature and Creative Writing and Composition majors only; students with other majors require departmental approval.

**MUCO 550 Teaching Music Theory (2)**

Comparative study of curricula, text materials, and teaching strategies in music theory.

**MUCO 560ab Music Editing for Film (2-2, FaSp)**

Develop and implement state of the art techniques in joining music and film.

**MUCO 571 Comparative Analytical Studies: Traditional Forms (2, Irregular)**

Analytical survey of the development of a specific form or genre. Specific emphasis to be determined by the department. *Prerequisite:* MUCO 501.

**MUCO 572 Comparative Analytical Studies: 20th/21st Century and Non-Traditional Forms (2, Irregular)**

In-depth analysis of characteristic forms and genres of 20th century music or of other forms and genres that do not figure largely in the "common practice" tradition. Specific emphasis to be determined by the department. *Prerequisite:* MUCO 501.

**MUCO 573 Special Studies in Contrapuntal Music (2, Irregular)**

In-depth analytical and historical study of contrapuntal techniques and styles. Emphasis to be determined by the department. *Prerequisite:* MUCO 501.

**MUCO 574 Special Studies in Tonal Analysis (2, Irregular)**

Analytical study of major composers and/or problems in tonal music. Emphasis to be determined by the department. *Prerequisite:* MUCO 501.

**MUCO 575 Special Studies in Post-Tonal Analysis (2, Irregular)**

Analytical study of major composers and/or problems in post-tonal music. Emphasis to be determined by the department. *Prerequisite:* MUCO 502.

**MUCO 576 Special Studies in Musical Aesthetics (2, Irregular)**

An investigation of aesthetics in general and the application of aesthetic theories to music; readings will be selected from pre-modern, modern, and post-modern texts. *Prerequisite:* MUCO 501, MUCO 502.

**MUCO 590 Directed Research (1-12)**

Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MUCO 592 Selected Topics in Graduate**

**Composition (2, max 8, Irregular)** Seminar for graduate students in composition that addresses aesthetic, technical and analytical issues from a composer's perspective. Open only to Composition majors.

**MUCO 594abz Master's Thesis (2-2-0)** Credit on acceptance of thesis. Graded IP/CR/NC.

**MUCO 599 Special Topics (2-4, max 8)**

Seminars in selected areas of study.

**MUCO 633ab Advanced Analysis of Tonal**

**Music (2-2) a:** Application of Schenkerian techniques to large works. **b:** Criticisms and extensions of Schenker, semiotic approaches, theories of rhythmic structure. *Prerequisite:* MUCO 533b.

**MUCO 636 Advanced Orchestration II**

**(1 or 2, max 4, FaSp)** Continuation of Advanced Orchestration I with emphasis on historical survey of orchestral compositions and advanced orchestration projects. *Prerequisite:* MUCO 536.

**MUCO 637 Advanced Composition II**

**(1 or 2, max 4)** Continuation of MUCO 537. For students holding the M.M. degree in composition. *Prerequisite:* MUCO 537.

**MUCO 737 Advanced Composition III**

**(1 or 2, max 8)** Continuation of MUCO 637. *Prerequisite:* MUCO 536, MUCO 637.

**MUCO 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MUCO 794abcdz Doctoral Dissertation**

**(2-2-2-2-0)** Credit on acceptance of dissertation. Graded IP/CR/NC.

**CONDUCTING (MUCD)****MUCD 301 Individual Instruction (1-2,**

**max 16, FaSpSm)** Intermediate and advanced instruction secondary emphasis for music majors and minors. (Duplicates credit in former MUCD 401.)

**MUCD 340 Choral Conducting I (2)**

Basic conducting techniques; score analysis; conducting patterns; problems of tempo, dynamics, articulation and text. Laboratory, 3 hours. *Prerequisite:* ability to read a music score.

**MUCD 343 Instrumental Conducting I**

**(2, FaSp)** Communicating musical ideas to instrumental ensembles; reading and conducting from full score of orchestral compositions. Laboratory, 3 hours. *Prerequisite:* ability to read a music score.

**MUCD 390 Special Problems (1-4)**

Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**MUCD 441 Choral Conducting II (2)**

Refinement of techniques developed in MUCD 340; study of styles and interpretations of choral music from the Renaissance to the present. Laboratory, 3 hours. *Prerequisite:* MUCD 340, MUCD 343.

**MUCD 443 Instrumental Conducting II**

**(2, FaSpSm)** Principal composers and representative instrumental works since the 18th century; studies of styles and interpretations based on scores and the performance of works in class.

**MUCD 490x Directed Research (2-8, max 8)**

Individual research and readings. Not available for graduate credit.

**MUCD 499 Special Topics (2-4, max 8)**

Selected topics of current interest.

**MUCD 501 Individual Instruction (1 or 2,**

**max 8, FaSpSm)** Secondary instruction for graduate music majors or instruction for graduate non-music majors.

**MUCD 541 Choral Conducting III (2, max 6)**

Problems of preparing and conducting contemporary choral music and major choral-orchestral works from full score; special projects according to student's development and interests. Laboratory, 3 hours. *Prerequisite:* MUCD 441.

**MUCD 543 Instrumental Conducting III**

**(2, max 4, FaSp)** Problems in advanced conducting. *Prerequisite:* MUCD 443.

**MUCD 550 Orchestral Conducting Seminar**

**(2, max 8, FaSp)** Advanced instrumental conducting techniques. Literature drawn from music of all periods. *Prerequisite:* MUCD 441, MUCD 443, and admission as candidate for M.M. degree in conducting.

**MUCD 553 Individual Instruction (1 or 2,**

**max 8, FaSpSm)** (Duplicates credit in former MUPF 553.)

**MUCD 590 Directed Research (1-12)**

Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MUCD 641 Choral Conducting IV (2, max 8)**

Continuation of MUCD 541, including choral conducting pedagogy. *Prerequisite:* MUCD 541.

**MUCD 653 Performance (1 or 2, max 12,**

**FaSpSm)** Individual or master class instruction for DMA Performance majors. (Duplicates credit in former MUPF 653.)

**MUCD 790 Research (1-12)**

Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**ELECTROACOUSTIC MEDIA (MUEA)****MUEA 105 Electronic Studio Techniques (2)**

Electronic Music procedures in a multi-track studio. Computer applications. (Duplicates credit in former MUEA 101.)

**MUEA 174 Fundamentals of Music Technology**

**(2)** Introductory microphone technique, signal processing, and computer literacy for musical performers. (Duplicates credit in former MUPF 174.)

**MUEA 205ab Music with Computers (4-4)**

Computers in music composition, realization and performance. Representative hardware, software and languages. (Duplicates credit in former MUEA 201ab.) *Recommended preparation:* MUEA 105.

**MUEA 305ab Electroacoustic Media I (4-4)**

Composition, arranging, performance and/or fixed medium realization of electroacoustic music. Critical/analytic listening. History of the medium. (Duplicates credit in former MUEA 301ab.) *Prerequisite:* MUEA 205b.

**MUEA 390 Special Problems (1-4, Irregular)**

Supervised, individual studies. No more than one registration permitted. Enrollment by petition only. (Duplicates credit in former MUPF 390.)

**MUEA 405ab Electroacoustic Media II (4-4)**

Continuation of MUEA 305ab. (Duplicates credit in former MUEA 401ab.) *Prerequisite:* MUEA 305b.

**MUEA 474abx Electronic Synthesizer Techniques**

**(2-4; 2-4, FaSp) a and b:** Electronic music procedures in a multi-track studio. **b:** Computer applications.

**MUEA 476ab Advanced Electronic Studio Techniques (2-4; 2-4) a:** Digital devices and specialized audio processing modules applied to electronic music. (Duplicates credit in former MUPF 476ab.) *Prerequisite:* MUEA 474b. *b:* Continuation of MUEA 476a. Emphasis on individual projects.

**MUEA 481 Programming the MIDI Interface (2, FaSp)** Programming MIDI Interface Software using the C Programming Language. Developing original applications software for sequencing and real-time event processing. *Prerequisite:* prior experience in electronic music or computers.

**MUEA 490x Directed Research (2-8, max 8, FaSpSm)** Individual research and readings. Not available for graduate credit. (Duplicates credit in former MUPF 490x.)

**MUEA 499 Special Topics (2-4, max 8)** Selected topics of current interest. (Duplicates credit in former MUPF 499.)

**MUEA 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. (Duplicates credit in former MUPF 590.)

**MUEA 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

## JAZZ STUDIES (MUJZ)

**MUJZ 100xm Jazz: A History of America's Music (4)** Gateway to the minor in Jazz Studies. Historical evolution of jazz from its origins to present day; elements of musical structures and jazz styles revealed through the study of recorded examples, live performances and video. Not available for credit to jazz studies majors.

**MUJZ 101x Non-Major Beginning Individual Instruction (1-2, max 2, FaSpSm)** Individual instruction at the beginning level designed for non-music majors with no previous experience. Not available for credit to music majors.

**MUJZ 105ab Jazz Theory (2-2, FaSp)** Study of basic and advanced concepts of jazz melody, harmony and form. Includes functional chord idioms and relationships, compositional and improvisational devices, and song forms.

**MUJZ 141ab Basic Keyboard Skills for the Improviser (2-2, FaSp)** Reading skills related to jazz accompanying, including the ability to identify and play chords on the piano utilizing different voicings.

**MUJZ 142ab Jazz Ear Training (2-2, FaSp)** Sight-singing and melodic/rhythmic reading and dictation applied to jazz repertoire. Includes vocalization of scales and chord patterns and study of rhythmic reading and jazz articulation.

**MUJZ 150x Beginning Jazz Improvisation (2, max 4, FaSp)** Development of beginning improvisational skills, including modal and the ii-V7-I chord progression, through instrumental performance. Recommended to non-jazz majors. Not available for credit to jazz studies majors. *Recommended preparation:* demonstration of major scales of eighth notes at a tempo of 120 mm.

**MUJZ 153 Individual Instruction (1-2, max 8, FaSpSm)** Weekly individual instruction and performance forum. Open only to jazz studies majors. (Duplicates credit in former MUPF 153.)

**MUJZ 180 Techniques of Jazz Improvisation (2, max 4)** Development of improvisational skills through instrumental performance. (Duplicates credit in former MUPF 180.)

**MUJZ 195L Jazz Elements I (2, max 8, FaSp)** Study of compositional, improvisational, performance, and arranging elements found in jazz. Students will model influential groups and jazz artists.

**MUJZ 196 Jazz Combo I (2, max 8, FaSp)** Rehearsal and performance of literature for jazz chamber groups. Graded CR/NC. (Duplicates credit in MUEN 332.)

**MUJZ 200ab Jazz Styles Analysis (2-2)** Theoretical skills and analytical techniques related to jazz styles from Dixieland to the present. *a:* Styles through Progressive Swing; *b:* Bebop to the present. (Duplicates credit in former MUCO 200ab.)

**MUJZ 218ab Afro-Latin Percussion Instruments (2-2)** Instruction in the performance of percussion instruments associated with African, South American, and Caribbean music traditions, with special emphasis on adaptation to jazz music. (Duplicates credit in former MUPF 218ab.)

**MUJZ 252 Individual Instrument Performance Class I (1, max 4, FaSp)** Solo and orchestra repertoire, professional preparation, reed making, and other matters appropriate to group study. Required of all first and second year wind and percussion majors each semester in residence. (Duplicates credit in former MUPF 252.)

**MUJZ 253 Individual Instruction (1-2, max 8, FaSpSm)** Weekly individual instruction and performance forum. Open only to jazz studies majors. (Duplicates credit in former MUPF 253.)

**MUJZ 286ab The History of Jazz (3-3, FaSp)** A study of the evolution of American jazz music from its roots in Africa to the present day. Includes an introduction to world music elements. *Prerequisite:* MUJZ 105b, MUJZ 142b.

**MUJZ 300x Non-Major Individual Instruction (1-2, max 16, FaSpSm)** Intermediate and advanced instruction designed for non-music majors. Not available for credit to music majors. (Duplicates credit in former MUJZ 201 and MUJZ 401.)

**MUJZ 301 Individual Instruction (1-2, max 16, FaSpSm)** Intermediate and advanced instruction: secondary emphasis for music majors, principal emphasis for music minors and B.A. music majors. Open only to music majors and minors. (Duplicates credit in former MUJZ 201 and MUJZ 401.)

**MUJZ 305ab Advanced Jazz Theory (2-2, FaSp)** Analysis and transcription of jazz performances and scores, encompassing questions of style, form, harmonic and melodic language, and considerations of rhythm. *Prerequisite:* MUJZ 105b, MUJZ 142b.

**MUJZ 311 Vocal Jazz Techniques (2, max 4)** Development of skills needed for the professional vocal jazz musician. Study of the standard jazz repertoire, vocal improvisation, lead sheet writing, and working with rhythm sections. (Duplicates credit in former MUPF 311.) *Prerequisite:* MUJZ 180.

**MUJZ 341 Keyboard Skills for Improvisers (2)** Reading skills related to jazz accompanying; "fake" books, chord progressions commonly used in jazz. (Duplicates credit in former MUPF 341.) *Prerequisite:* MPKS 250ab.

**MUJZ 342ab Aural Skills for Improvisers (1-1, FaSp)** Sight-singing and dictation applied to jazz repertoire. Vocalization of modal and synthetic jazz scales and chordal qualities. (Duplicates credit in former MUCO 342ab.) *Prerequisite:* MUCO 132b.

**MUJZ 347 Jazz Composition (2, max 4)** Composing in the jazz medium. (Duplicates credit in former MUCO 347.)

**MUJZ 353 Individual Instruction (1-2, max 8, FaSpSm)** Weekly individual instruction and performance forum. Open only to jazz studies majors. (Duplicates credit in former MUPF 353.)

**MUJZ 390 Special Problems (1-4, Irregular)**

Supervised, individual studies. No more than one registration permitted. Enrollment by petition only. (Duplicates credit in former MUPF 390.)

**MUJZ 395 Jazz Elements II (2, max 8, FaSp)**

Advanced study of compositional, improvisational, performance, conducting, and arranging elements found in the jazz repertoire. Students will be encouraged to forge individual musical expressions. Open to juniors and seniors only. *Prerequisite:* MUJZ 195.

**MUJZ 396 Jazz Combo II (2, max 8, FaSp)**

Preparation and performance of literature for jazz combos. Open to juniors and seniors only. Graded CR/NC. *Prerequisite:* MUJZ 195.

**MUJZ 400 Arranging for Jazz Ensemble (2)**

Scoring for jazz ensemble with emphasis on writing for sections of like and mixed instruments as well as full ensemble. (Duplicates credit in former MUCO 400.)

**MUJZ 403 Studio Singing Techniques (2, FaSp)**

Study of technique, theory and aural skills as applied to studio singing; critical listening; study of various styles; ear training and sight singing as these apply to working in a studio. *Recommended preparation:* jazz background; can read music and sing well.

**MUJZ 419m The Jazz Experience: Myths and Culture (4, FaSp)**

An examination of the music, culture, and mythology of jazz revealed through the study of jazz fiction, film, poetry, and recorded examples.

**MUJZ 443 Jazz Pedagogy (2, 2 years, Sp)**

Concepts, methods, and resources; examination and comparison of textbooks, recordings, tapes, and materials related to the study and teaching of jazz. (Duplicates credit in former MUED 443.)

**MUJZ 450 Intermediate Jazz Improvisation (2, max 4, Sp)**

Development of intermediate jazz improvisational skills, starting with dominant seventh chords and progressing through the minor ii-V7-I chord progression. Not open to Jazz Studies majors. *Prerequisite:* MUJZ 150x.

**MUJZ 451 Advanced Jazz Improvisation (2, max 4, Sp)**

Development of advanced improvisational skills, including Lydian-chromatic and bi-modal techniques, through instrumental performance. (Duplicates credit in former MUPF 451.) Junior standing.

**MUJZ 452 Individual Instrument Performance Class II (1, max 4, FaSp)**

Solo and orchestra repertoire, professional preparation, reed making, and other matters appropriate to group study. Required of all third and fourth year wind and percussion majors each semester in residence. (Duplicates credit in former MUPF 452.)

**MUJZ 453 Individual Instruction (1-2, max 8, FaSpSm)**

Weekly individual instruction and performance forum. Open only to jazz studies majors. (Duplicates credit in former MUPF 453.)

**MUJZ 486 Jazz Masters from World War II to the Present (2)**

Examination of major jazz artists from World War II to the present with emphasis on the innovators of each period. Detailed analysis of selected repertoire. (Duplicates credit in former MUHL 486.) *Recommended preparation:* MUJZ 419.

**MUJZ 490x Directed Research (2-8, max 8, FaSpSm)**

Individual research and readings. Not available for graduate credit. (Duplicates credit in former MUPF 490x.)

**MUJZ 499 Special Topics (2-4, max 8)**

Selected topics of current interest. (Duplicates credit in former MUPF 499.)

**MUJZ 501 Individual Instruction (1 or 2, max 8, FaSpSm)**

Secondary instruction for graduate music majors or instruction for graduate non-music majors.

**MUJZ 545 Jazz Ensemble Development (2, 2 years, Sp)**

Techniques, approaches, teaching materials, and music useful in developing jazz ensembles in educational settings, from junior high school through college. (Duplicates credit in former MUED 547.)

**MUJZ 547 Jazz Composition (2, max 4, Fa)**

Application of theoretical and compositional techniques used in jazz to written music. Analysis and performance of historical and contemporary examples will be included. (Duplicates credit in former MUCO 547.)

**MUJZ 551 Graduate Jazz Improvisation (2, Sp)**

Development of proficiency in improvising to advanced jazz concepts, including transposition, substitute harmony, superimposed harmony, atypical harmonic schemes and contemporary chord and scale types. Open to jazz studies and studio guitar majors only. *Prerequisite:* MUJZ 451.

**MUJZ 553 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 553.)

**MUJZ 554 Graduate Certificate Performance (4, max 16, FaSpSm)** Individual instruction and related lab participation for Graduate Certificate students.

**MUJZ 588 Special Studies in Jazz Performance (2, max 6)**

Performance problems, composers and/or stylistic analysis of music from the jazz idiom. Specific emphasis to be determined by the Jazz Studies department. (Duplicates credit in former MUPF 588.)

**MUJZ 590 Directed Research (1-12, FaSpSm)**

Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. (Duplicates credit in former MUPF 590.)

**MUJZ 653 Performance (1 or 2, max 12, FaSpSm)**

Individual or master class instruction for DMA Performance majors. (Duplicates credit in former MUPF 653.)

**MUJZ 688 Special Topics in Jazz Performance (2, max 4, Fa)**

Examination and analysis of solo and compositional repertoire of the jazz idiom through transcription and comparative research. Specific emphasis to be determined by the Jazz Studies department. (Duplicates credit in former MUPF 688.)

**MUJZ 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MUSIC EDUCATION (MUED)****MUED 330x Fundamentals of Music (4, FaSp)**

Introduction to the content of music through an investigation of its melodic, rhythmic, and harmonic structure. Not available for credit to music majors.

**MUED 390 Special Problems (1-4, FaSp)**

Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**MUED 402 Teaching Choral Music (2, Sp)**

Problems of school choral organizations; the changing and adolescent voice; appropriate repertoire and materials. *Corequisite:* MUCD 340 or MUCD 343.

**MUED 403 Teaching Instrumental Music (2, Sp)**

Problems of school instrumental organizations; teaching wind, string, and percussion instruments; appropriate repertoire and materials.

**MUED 420 Teaching Beginning Improvisation (2, Irregular)** Strategies for teaching beginning improvisation in K-12 music classes; includes playing/singing and teaching in many styles. No improvisation experience necessary.

**MUED 440ab Music and Movement: The Orff Approach (2-2)** Orff Schulwerk techniques in rhythmic and melodic training through speech, singing, body percussion, playing Orff instruments, improvisation, and elemental movement. Certification available.

**MUED 443 Teaching Vocal Jazz (2)** Strategies for teaching the principles of vocal jazz; historical perspective, repertoire, recordings, improvisation, scat, accompaniment, amplification, rehearsing, teaching sequences. No prior jazz experience necessary. (Duplicates credit in former MUED 530.)

**MUED 449 Teaching Marching Band (2, Fa)** Modern school marching band techniques; precision drill; administration; rehearsal techniques.

**MUED 452 Introduction to Technology in Music Education (2, Fa)** Applications of computers and electronic music to music education; survey of current approaches and materials.

**MUED 479x Music for the Elementary Classroom Teacher (2, FaSp)** The nature and structure of music, its processes, and its notational symbols. Not available for credit to music majors. *Recommended preparation:* MUED 330.

**MUED 490x Directed Research (2-8, max 8, FaSpSm)** Individual research and readings. Not available for graduate credit.

**MUED 499 Special Topics (2-4, max 8, Irregular)** Selected topics of current interest reflective of changing trends in music education.

**MUED 500 Research Foundations in Music Education (3, Fa)** Introductory exploration of types of research linked to research literature in music education; interpreting and organizing research proposals and reports.

**MUED 501 Historical Foundations of Music Education (3)** A contextual exploration of the historical development of American music education.

**MUED 502 Sociological Foundations of Music (3)** Study of interdependent relationship between society, music and music education.

**MUED 503 Philosophical Foundations of Music Education (3)** Exploration of philosophical thinking in the field of music with emphasis on philosophical foundations for teaching and learning.

**MUED 504 Psychological Foundations of Music (3)** Exploration of theories, research and practice in psychological foundations of music teaching and learning.

**MUED 505 Teaching and Learning Music (2, Irregular)** Studies of the latest resources concerning the teaching and learning of music so that musicians can function more effectively as both teachers and performers.

**MUED 510 Leading a Music Program in a Public School Setting (2, Sm)** The philosophy and purposes of music programs combined with early field experiences, varied teaching strategies, and music learning assessment.

**MUED 515 Using Technology in the Classroom (2, Sm)** Study of the tools and knowledge necessary to the music educator to facilitate the application of computers and electronic music in music education.

**MUED 520 Early Childhood Music (2, Irregular)** An overview of significant developmental issues, current research, and appropriate practices for children from birth to age eight. Professor-guided practicum teaching.

**MUED 522ab Teaching Public School Instrumental Music (a: 3, Fa; b: 2, Sp)** Methods and materials appropriate for teaching and modeling instrumental lessons and instruction in the public and private schools.

**MUED 524 Teaching and Conducting Public School Instrumental Ensembles (4, Sp)** Study of the methods and materials needed to rehearse an instrumental ensemble in K-12 settings. Includes conducting and rehearsal techniques, literature selection, score analysis.

**MUED 526 Teaching General/Choral Music for Instrumentalists (2, Sp)** Study of psychomotor and cognitive learning in K-12 classes. Vocal/choral music in classroom settings; techniques and repertoire for use in K-12 choirs.

**MUED 532 Teaching General Music K-8 (4, Fa)** Methods and materials for cognitive learning and development of music skills in K-8 music classes, featuring Orff, Kodaly, and Dalcroze approaches.

**MUED 534 Teaching and Conducting Public School Choral Ensembles (4, Sp)** Comprehensive consideration of the choral music program in grades K-12. Topics include: development and care of the voice, audition and rehearsal techniques, conducting, lesson planning.

**MUED 536 Teaching Instrumental Music for Vocalists (2, Sp)** An introduction to the pedagogical and acoustic aspects for woodwind, brass, string and percussion instruments. Includes hands-on performance, class discussion and practical application.

**MUED 540 Motivation and Discipline in the Music Classroom (2, Sp)** An examination of the current research into learning theories and motivation with emphasis on the application of these theories to the music classroom.

**MUED 542 Orchestra Development (2, Irregular)** Repertoire and rehearsal techniques appropriate for school and community orchestras useful in solving specific problems of technical and tonal growth. *Prerequisite:* MUCD 343.

**MUED 545 String Class Pedagogy (2, Irregular)** Approaches to beginning through intermediate string class instruction in school and other group setting derived from principles of Suzuki, Bornoff, Rolland, and other leading teachers. *Prerequisite:* MUED 345abL.

**MUED 546 Wind Band Pedagogy (2, 2 years, Fa)** Methods and materials relevant to current trends in wind band pedagogy; development of comprehensive pedagogical and performance practices; appropriate wind band music survey. *Prerequisite:* MUCD 343.

**MUED 547 Vocal Pedagogy in the Public School Classroom (2, Sp)** Development of technical knowledge, tone production, and performance skills for voice appropriate for public school music teaching.

**MUED 548 Orchestral Bowing (2, Irregular)** Introduction to bowing function and style with application to typical repertoire; practical experience for teachers and conductors in educational and community settings.

**MUED 549ab Directed Teaching: Public School Music (2-2)** Observation and teaching under the guidance of a university supervisor and a directing teacher. Open only to MAT, Single Subject (Music Education) majors.

**MUED 550 Teaching Music Fundamentals and Appreciation Courses (2, 2 years, Fa or Sp)** Purpose and objectives of music in general education. Survey of current approaches and materials.

**MUED 552 Music Education Courseware Development (2, Sp)** Development of music education courseware using current technology. Two lecture hours per week. *Prerequisite:* MUED 452.

**MUED 555 Entering the Music Professoriate (3, Fa)** Preparation for academic careers in music. Methodologies and approaches to teaching, learning, and assessment; statements of teaching philosophies; creation of academic portfolio. Open only to doctoral students (DMA and Ph.D.) in the Thornton School of Music.

**MUED 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MUED 592 Final Project (2, max 2)** Required for the Master of Music Education degree. Credit upon acceptance. Graded CR/NC. *Prerequisite:* MUED 500.

**MUED 594abz Master's Thesis (2-2-0, FaSpSm)** Credit on acceptance of thesis. Graded IP/CR/NC.

**MUED 599 Special Topics (2-4, max 8, Irregular)** Selected topics of current interest reflective of changing trends in music education.

**MUED 601 Field Seminar in Elementary School Music Education (2, 2 years, Fa or Sp)** Observation in schools. Identification and analysis of problems; strategies for improvement; alternative approaches including those of Orff and Kodaly. Readings, examination of teaching materials.

**MUED 602 Field Seminar in Choral Music Education (2, 2 years, Fa or Sp)** Observation in schools. Current practice; identification and analysis of problems; strategies for improvement; readings, examination of music and teaching materials.

**MUED 603 Field Seminar in Instrumental Music Education (2, 2 years, Fa or Sp)** Observation in schools. Identification and analysis of problems; strategies for improvement. Readings, examination of music and teaching materials.

**MUED 604 Preparing School Music Teachers (2, 2 years, Fa or Sp)** Analysis of best practices in teacher training; faculty, curriculum, schedule, materials, methods, and supervision of directed teaching. *Prerequisite:* three years of teaching music in public schools or two years of college teaching.

**MUED 605 College Teaching in Music Education (3)** Exploration of music education faculty duties at the collegiate level, including teacher training, working with local school systems, leading professional organizations, and conducting research.

**MUED 606 Internship in Collegiate Music Education (3)** Students intern with USC professors in training music teachers in traditional and alternative music education practices.

**MUED 607 Alternative Models in Music Education (3)** Examination of diverse, evolving settings for music teaching and learning in contemporary society. Emphasis on programming and administrative structures of community-based music providers.

**MUED 610 Pedagogy for Collegiate Teaching (2, FaSpSm)** A preparation for teaching in the modern university environment, examining the role of the professor, and focusing on the development of innovative collegiate teaching skills.

**MUED 640 Research and Practice in Orff Schulwerk (2, Sp)** Exploring research on the philosophical and historical bases of the Orff Schulwerk approach and acquiring skills in pedagogical applications in early childhood through collegiate settings.

**MUED 650 Pedagogy for Collegiate Music Appreciation and Fundamentals (2, Sp)** Design and teaching strategies for collegiate music appreciation and fundamentals classes developed for the adult, non-music major student.

**MUED 790 Research (1-12, FaSpSm)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MUED 791 Pedagogical Writing and Media in Music Education (3)** Development of skills in pedagogical writing for professional journals, text books, and multimedia publications, and knowledge of publishing procedures for compositions and arrangements.

**MUED 792 Quantitative Research in Music Education (3)** Survey of theories, concepts and procedures for designing and evaluating quantitative research studies. *Prerequisite:* MUED 500.

**MUED 793 Qualitative Research in Music Education (3)** Survey of theories, concepts and procedures for designing and evaluating qualitative research studies. *Prerequisite:* MUED 500.

**MUED 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm)** Credit on acceptance of dissertation. Graded IP/CR/NC.

## MUSIC ENSEMBLE (MUEN)

Large ensemble requirements in undergraduate curricula must be fulfilled by the following ensembles: University Chorus (MUEN 307); Men's Chorus (MUEN 308); Oriana Choir (MUEN 311); University Concert Choir (MUEN 310); Chamber Choir (MUEN 312); USC Symphony (MUEN 320); USC Concert Orchestra (MUEN 321); University Wind Ensemble (MUEN 323); or University Band (MUEN 324).

Exceptions to the above policies include: Contemporary Music Ensemble and Early Music Ensemble may fulfill the large ensemble requirement for instrumental majors, with the approval of the conductor of University Symphony or Wind Ensemble and the chair of the student's major department.

Music Education majors with an instrumental emphasis must take one semester of a choral ensemble.

Composition majors must register for at least 2 units in a choral ensemble.

Students majoring in Strings, Vocal Arts, or Wind and Percussion may not count USC Concert Orchestra toward their large ensemble requirement.

Vocal Arts majors must register for University Concert Choir, USC Chamber Choir, or USC Oriana Choir to fulfill their large ensemble requirement.

Further exceptions may be made subject to departmental approval and approval of the conductor of the appropriate large ensemble.

**MUEN 222 Trojan Marching Band (1, max 4)** Rehearsal and participation in performances for athletic and other university functions. Graded CR/NC. Open to all students by audition.

**MUEN 305 Vocal Jazz Ensemble (1, max 8, FaSp)** Study and performance of vocal ensemble literature from the Jazz idiom, with emphasis on improvisational techniques. Open to all students by audition. Graded CR/NC.

**MUEN 307 University Chorus (1, max 8, FaSp)** Rehearsal and performance of choral literature from all periods of music history. Open to all students. Graded CR/NC.

**MUEN 308 USC Men's Chorus (1, max 8, FaSp)** Rehearsal and performance of choral repertoire from all periods written for male voices. Open to all students. Graded CR/NC.

**MUEN 310 University Concert Choir (1, max 8, FaSp)** Performance of choral works of all styles and periods. Open to all students by audition. Graded CR/NC.

**MUEN 311 USC Oriana Choir (1, max 8, FaSp)** Rehearsal and performance of advanced chamber music written for women's voices. Open to all students by audition. Graded CR/NC.

**MUEN 312 USC Chamber Choir (1, max 8, FaSp)** Performance of vocal chamber music and choral masterworks from the 16th century to the present. Open to all students by audition. (Duplicates credit in former MUEN 212 and MUEN 412.) Graded CR/NC.

**MUEN 314 Opera Chorus (1, max 8, FaSp)** Study and performance of operatic choruses and extended ensembles of all styles and periods. Open to all students by audition. (Duplicates credit in former MUEN 214 and MUEN 414.) Graded CR/NC.

**MUEN 320 USC Symphony (1, max 8, FaSp)** Rehearsal and performance of orchestra repertoire. Open to all students by audition. (Duplicates credit in former MUEN 220 and MUEN 420.) Graded CR/NC.

**MUEN 321 USC Concert Orchestra (1, max 8, FaSp)** Rehearsal and performance of orchestra repertoire. Open to all students, faculty, staff, and members of the community. Audition not required. Graded CR/NC.

**MUEN 322 Trojan Marching Band (1, max 4)** Continuation of MUEN 222. Graded CR/NC.

**MUEN 323 University Wind Ensemble (1, max 8, FaSp)** Rehearsal and participation in concert programs. Open to all students by audition. (Duplicates credit in former MUEN 223 and MUEN 423.) Graded CR/NC.

**MUEN 324 University Band (1, max 8, FaSp)** Rehearsal and performance of standard repertoire. Open to all students by audition. Graded CR/NC.

**MUEN 325 Wind and Percussion Chamber Music (1, max 8, FaSp)** Performance of chamber music for wind and percussion instruments. Open to all students by audition. (Duplicates credit in former MUEN 225 and MUEN 425.) Graded CR/NC.

**MUEN 326 Guitar Ensemble (1, max 8, FaSp)** Rehearsal and performance of literature composed, transcribed and arranged for small ensembles, including literature for small ensembles of guitar and other instruments, as well as voice. (Duplicates credit in former MUEN 226 and MUEN 426.) Graded CR/NC.

**MUEN 327 String Chamber Music (1, max 8, FaSp)** Preparation and performance of small ensemble literature for strings. (Duplicates credit in former MUEN 227 and MUEN 427.) Graded CR/NC.

**MUEN 328 Keyboard Collaboration (1, max 4, FaSp)** Preparation and performance of literature for piano with voice and string, woodwind, brass and percussion instruments. (Duplicates credit in former MUEN 428.) Graded CR/NC.

**MUEN 329 Jazz Ensemble (1, max 8, FaSp)** Rehearsal and performance of literature written for large jazz ensemble. Open to all students by audition. (Duplicates credit in former MUEN 229 and MUEN 429.) Graded CR/NC.

**MUEN 330 Contemporary Music Ensemble (1, max 8, FaSp)** Performance of 20th-century music; readings of student and faculty compositions; experimental music; guest conductors, composers, performers; annual concert series. (Duplicates credit in former MUEN 230 and MUEN 430.) Graded CR/NC.

**MUEN 331 Guitar Big Band (1, max 8, FaSp)** Rehearsal and preparation of big band literature adapted for large guitar ensemble. Guitarists perform in place of the traditional trumpet, trombone and sax sections. Graded CR/NC.

**MUEN 332 Jazz Chamber Music (1, max 8, FaSp)** Preparation and performance of literature for jazz chamber groups. Open to all students by audition. (Duplicates credit in former MUEN 232 and MUEN 432.) Graded CR/NC.

**MUEN 335 University Brass Band (1, max 8, FaSp)** The study, rehearsal and performance of standard brass choir and brass band literature. (Duplicates credit in former MUEN 235 and MUEN 435.) Graded CR/NC.

**MUEN 344 Vocal Chamber Music (1, max 8, Fa)** Study of solo ensemble vocal literature such as duets, trios, quartets, madrigals, etc. Open to all students by audition. (Duplicates credit in former MUEN 244 and MUEN 444.) Graded CR/NC.

**MUEN 350 Early Music Ensemble (1, max 8, FaSp)** Rehearsal and performance of vocal and instrumental ensemble music of the Renaissance and Baroque, with emphasis on chamber music for solo voices and bowed and plucked strings. Instrumentalists are required to perform on either their own or the school's historical instruments. Open to all students by audition. (Duplicates credit in former MUEN 250 and MUEN 450.) Graded CR/NC.

**MUEN 505 Vocal Jazz Ensemble (1, max 4, FaSp)** Study and performance of vocal ensemble literature from the Jazz idiom, with emphasis on improvisational techniques. Open to graduate students by audition.

**MUEN 507 University Chorus (1, max 8, FaSp)** Rehearsal and performance of choral literature from all periods of music history. Open to all graduate students.

**MUEN 508 USC Men's Chorus (1, max 4, FaSp)** Rehearsal and performance of choral repertoire from all periods written for male voices.

**MUEN 510 University Concert Choir (1, max 4, FaSp)** Performance of choral works of all styles and periods. Open to all graduate students by audition.

**MUEN 511 USC Oriana Choir (1, max 4, FaSp)** Rehearsal and performance of advanced chamber music written for women's voices. Open to all graduate students by audition.

**MUEN 512 USC Chamber Choir (1, max 4, FaSp)** Performance of vocal chamber music and choral masterworks from the 16th century to the present. Open to all graduate students by audition. (Duplicates credit in former MUEN 412.)

**MUEN 514 Opera Chorus (1, max 4, FaSp)** Study and performance of operatic choruses and extended ensembles of all styles and periods. Open to all graduate students by audition. (Duplicates credit in former MUEN 414.)

**MUEN 520 USC Symphony (1, max 4, FaSp)** Rehearsal and performance of orchestra repertoire. Open to all graduate students by audition. (Duplicates credit in former MUEN 420.)

**MUEN 521 USC Concert Orchestra (1, max 4, FaSp)** Rehearsal and performance of orchestra repertoire. Open to all graduate students. Audition not required.

**MUEN 523 University Wind Ensemble (1, max 4, FaSp)** Rehearsal and participation in concert programs. Open to all graduate students by audition. (Duplicates credit in former MUEN 423.)

**MUEN 525 Wind and Percussion Chamber Music (1, max 4, FaSp)** Performance of chamber music for wind and percussion instruments. Open to all students by audition. (Duplicates credit in former MUEN 425.)

**MUEN 526 Guitar Ensemble (1, max 4, FaSp)** Rehearsal and performance of literature composed, transcribed and arranged for small ensembles, including literature for small ensembles of guitar and other instruments, as well as voice. (Duplicates credit in former MUEN 426.)

**MUEN 527 String Chamber Music (1, max 4, FaSp)** Preparation and performance of small ensemble literature for strings. (Duplicates credit in former MUEN 427.)

**MUEN 528 Keyboard Collaboration (1, max 4, FaSp)** Continuation of MUEN 328.

**MUEN 529 Jazz Ensemble (1, max 4, FaSp)** Rehearsal and performance of literature written for large jazz ensemble. Open to all graduate students by audition. (Duplicates credit in former MUEN 429.)

**MUEN 530 Contemporary Music Ensemble (1, max 4, FaSp)** Performance of 20th-century music; readings of student and faculty compositions; experimental music; guest conductors, composers, performers; annual concert series. (Duplicates credit in former MUEN 430.)

**MUEN 531 Guitar Big Band (1, max 4, FaSp)** Rehearsal and preparation of big band literature adapted for large guitar ensemble. Guitarists perform in place of the traditional trumpet, trombone and sax sections.

**MUEN 532 Jazz Chamber Music (1, max 4, FaSp)** Preparation and performance of advanced literature for jazz chamber groups. Open to graduate students, by audition.

**MUEN 535 University Brass Band (1, max 4)** The study, rehearsal and performance of standard brass choir and brass band literature. (Duplicates credit in former MUEN 435.)

**MUEN 544 Vocal Chamber Music (1, max 4, Fa)** Study of solo ensemble vocal literature such as duets, trios, quartets, madrigals, etc. Open to all graduate students by audition. (Duplicates credit in former MUEN 444.)

**MUEN 550 Early Music Ensemble (1, max 4, FaSp)** Rehearsal and performance of vocal and instrumental ensemble music of the Renaissance and Baroque, with emphasis on chamber music for solo voices and bowed or plucked strings. Instrumentalists are required to perform on either their own or the school's historical instruments. Open to all graduate students by audition. (Duplicates credit in former MUEN 450.) Graded CR/NC.

**MUEN 628 Keyboard Collaboration (1, max 4, FaSp)** Continuation of MUEN 328.

**MUEN 650 Early Music Ensemble (1, max 8, FaSp)** Rehearsal and public performance of vocal and instrumental music of the Renaissance and Baroque era; emphasis is on large- and small-scale chamber works. Instrumentalists are required to perform on historical instruments.

## **MUSIC HISTORY AND LITERATURE (MUHL)**

**MUHL 231 Music History (3, Fa)** A study of the musical styles and genres from antiquity to c. 1680 within their historical context. Detailed analysis of selected works. (Duplicates credit in MUHL 385a.) *Prerequisite:* MUCO 132b, MUCO 133b.

**MUHL 232 Music History II (3, Sp)** A study of the musical styles and genres from c. 1680 to c. 1850 within their historical context. Detailed analysis of selected works. (Duplicates credit in MUHL 385b.) *Prerequisite:* MUCO 132b, MUCO 133b.

**MUHL 302 Musical Cultures of the World (4, FaSp)** Survey of the world's major musical cultures; aesthetic and social values, theoretical systems, musical style and structure, instruments, and performance traditions.

**MUHL 315x Music and Culture (4, FaSpSm)** Gateway to the B.A. degree in music. Western and non-Western music in its socio-cultural context. Not available for credit to B.M. majors. Ability to read music highly recommended.

**MUHL 331 Music History III (3)** A study of the musical styles and genres from c. 1850 to the present within their historical context. Detailed analysis of selected works. (Duplicates credit in former MUHL 280a.) *Prerequisite:* MUCO 132b, MUCO 133b; *recommended preparation:* MUCO 232b, MUCO 233b.

**MUHL 332 Studies in Musical Culture (3)** Special musical repertoires, issues, and critical problems; emphasis determined by the department. (Duplicates credit in former MUHL 280b.) *Recommended preparation:* MUHL 231, MUHL 232, MUHL 331, MUCO 232b, MUCO 233b.

**MUHL 333 Music History Review (1-2, FaSpSm)** Supervised review of the materials covered in undergraduate music history courses for students whose music history examinations indicate the need for further study.

**MUHL 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**MUHL 403 Armenian Musical Culture (2)** Study of the four branches of Armenian music within the context of past and present Armenian culture.

**MUHL 476 Music Criticism (2)** Procedure and practice in forming critical judgments of music and in writing music criticism; practical journalism; professional and community ethics. *Prerequisite:* for music majors, MUHL 331, MUHL 332; for nonmusic majors, MUHL 315x.

**MUHL 490x Directed Research (2-8, max 8, FaSpSm)** Individual research and readings. Not available for graduate credit.

**MUHL 499 Special Topics (2-4, max 8, FaSpSm)** Selected topics of current interest.

**MUHL 560 Studies in World Music I (2, Fa)** The indigenous and syncretic musics of Africa, India, Indonesia, and the Balkan countries. *Prerequisite:* MUHL 570.

**MUHL 561 Studies in World Music II (2, Sp)** The indigenous and syncretic musics of the post-Soviet political landscape, the Far East, the Middle East, and Latin America. *Prerequisite:* MUHL 570.

**MUHL 570 Research Materials and Techniques (2, FaSpSm)** Introduction to music research, information science and technical writing. Required of all graduate students majoring in music.

**MUHL 572 Seminar in Historical Musical Notation (2, Fa)** Performing, reading, and editing historical notation from original sources. *Prerequisite:* MUHL 570.

**MUHL 573 Music of the Middle Ages (2, Sp; 2 years, Sm)** Chief musical developments in Western Europe from the beginning of the Christian era to the middle of the 14th century. *Prerequisite:* MUHL 570.

**MUHL 574 Music of the Renaissance (2, Sp; 2 years, Sm)** Chief musical developments in Western Europe from the middle of the 14th century to the end of the 16th. *Prerequisite:* MUHL 570.

**MUHL 575 Music of the Baroque Era (2, Fa; 2 years, Sm)** Styles, forms, composers, and compositions of the Baroque era. *Prerequisite:* MUHL 570.

**MUHL 576 Music of the Classical Period (2, Sp; 2 years, Sm)** Development of classical style in symphonic music, opera, and chamber music. *Prerequisite:* MUHL 570.

**MUHL 577 Music of the 19th Century (2, Fa; 2 years, Sm)** Vocal and instrumental music of the Romantic era from late Beethoven through Brahms. *Prerequisite:* MUHL 570.

**MUHL 578 Music since 1900 (2, FaSpSm)**

Musical developments in Europe and the Americas from 1900 to the present. *Prerequisite:* MUHL 570.

**MUHL 579 Studies in Music History (4, max 16, FaSp)**

Intensive study of major problems, issues, and interpretations in the history of music. *Prerequisite:* MUHL 570.

**MUHL 580 Historical Perspectives in Jazz (2)**

Chief musical developments in the principal styles of Jazz from their inception to the present. *Prerequisite:* graduate standing or departmental approval.

**MUHL 583 Special Studies in Medieval Music (2, max 4, Irregular)**

Music problems and composers of the period. Specific emphasis to be determined by the department. *Prerequisite:* MUHL 570.

**MUHL 584 Special Studies in Renaissance Music (2, max 4, Irregular)**

Music problems and composers of the period. Specific emphasis to be determined by the department. *Prerequisite:* MUHL 570.

**MUHL 585 Special Studies in Baroque Music (2, max 6, Irregular)**

Music problems and composers of the period. Specific emphasis to be determined by the department. *Prerequisite:* MUHL 570.

**MUHL 586 Special Studies in the Music of the Classical Period, 1730-1800 (2, max 6, Irregular)**

Music problems and composers of the period. Specific emphasis to be determined by the department. *Prerequisite:* MUHL 570.

**MUHL 587 Special Studies in the Music of the 19th Century (2, max 6, Irregular)**

Music problems and composers of the period. Specific emphasis to be determined by the department. *Prerequisite:* MUHL 570.

**MUHL 588 Special Studies in Music since 1900 (2, max 6)**

Music problems and composers of the period. Specific emphasis to be determined by the department. *Prerequisite:* MUHL 570.

**MUHL 589 Seminar in Renaissance Repertoires and Performance Practice (2, Sp)**

Study and discussion of Renaissance music sources and performance practice treatises. *Corequisite:* MUHL 570.

**MUHL 590 Directed Research (1-12, FaSpSm)**

Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. *Prerequisite:* MUHL 570.

**MUHL 591 Seminar in Baroque Repertoires and Performance Practice (2)**

Study and discussion of Baroque music sources and performance practice treatises. *Corequisite:* MUHL 570.

**MUHL 594abz Master's Thesis (2-2-0)**

Credit on acceptance of thesis. Graded IP/CR/NC.

**MUHL 595 Seminar in Performance Practices (2, max 4)**

Scholarly preparation and authentic performance of music written before c. 1770. Ornamentation and improvisation, tunings and temperaments, early language pronunciation, historical instruments, etc. *Prerequisite:* MUHL 570.

**MUHL 599 Special Topics (2-4, max 8, Irregular)**

Selected topics of current interest.

**MUHL 681 Studies in Musicology (4, max 16, FaSp)**

Close study of musical repertoires and issues (particularly ones transcending period divisions), with emphasis on recent scholarship and methodologies. *Prerequisite:* MUHL 570.

**MUHL 683 Seminar in Medieval Music (2-3, max 6, Irregular)**

Problems and composers of the period; specific emphasis determined by the department. *Prerequisite:* MUHL 570.

**MUHL 684 Seminar in Renaissance Music (2-3, max 6, Irregular)**

Problems and composers of the period; specific emphasis determined by the department. *Prerequisite:* MUHL 570.

**MUHL 685 Seminar in Baroque Music (2-3, max 6, Irregular)**

Problems and composers of the period; specific emphasis determined by the department. *Prerequisite:* MUHL 570.

**MUHL 686 Seminar in Classical Music (2-3, max 6, Irregular)**

Problems and composers of the period; specific emphasis determined by the department. *Prerequisite:* MUHL 570.

**MUHL 687 Seminar in Romantic Music (2-3, max 6, Irregular)**

Problems and composers of the period; specific emphasis determined by the department. *Prerequisite:* MUHL 570.

**MUHL 688 Seminar in Music since 1900 (2-3, max 6, Irregular)**

Problems and composers of the period; specific emphasis determined by the department. *Prerequisite:* MUHL 570.

**MUHL 790 Research (1-12, FaSpSm)**

Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. *Prerequisite:* MUHL 570.

**MUHL 794abcdz Doctoral Dissertation (2-2-2-0, FaSpSm)**

Credit on acceptance of dissertation. Graded IP/CR/NC.

**MUSIC INDUSTRY (MUIN)****MUIN 270 Introduction to the Music Industry (4, FaSp)**

A survey of the music business with emphasis on distribution of recorded music, music publishing, performance rights societies, record companies, agents, personal managers and contracts. Open to music majors (B.M. and B.S. degrees) only.

**MUIN 275ab Recording Arts Workshop (4-4, FaSp)**

Principles, techniques, and aesthetic possibilities of the recording studio chain and its application to various media. Open to recording arts and music industry majors only.

**MUIN 277x Introduction to Music Technology (4, FaSp)**

A survey of the technology used to create, prepare, perform, and distribute music, with an emphasis on recording, MIDI, music production, mastering, and Internet technologies. Not available for major credit to B.M. and B.S. music industry majors.

**MUIN 280 Communications in the Music Industry (4)**

A survey of the music industry communications including radio, television, film, satellite communications, records, compact disc, cassette, cable and any future forms of transmission and delivery systems.

**MUIN 286 Record Production Management (2, FaSp)**

Function of the record producer, studio procedures, music business law, union relations, artist management, copyright and publishing agreements, record company structure.

**MUIN 287 The Business and Economics of the Recording Industry (2, Fa)**

Economic considerations of home, studio and location recording. Equipment, labor, facilities, media, legal and tax considerations will be explored.

**MUIN 291 The Mixing Console (2, Fa)**

Professional mixing console design, layout, operation, mic preamps, switching, VCAs, automation, computerized recall. *Prerequisite:* MUIN 275b.

**MUIN 305 MIDI and Computer Music**

**Production (4, FaSp)** Recording and editing MIDI and digital audio using computer software. Modern MIDI sequencing techniques for the music, film and television industries. *Recommended preparation:* MUIN 270, MUIN 275b, MUIN 280.

**MUIN 340 Introduction to Sound Reinforcement (4, Sp)** An introduction to the practical application of large scale sound reinforcement for concerts, sporting events, church services and convention situations.

**MUIN 360 Introduction to Music Law (4, FaSp)** A study of entertainment law with a focus on the music industry. Areas of study include contracts, domestic practices, international practices, copyright protection, trademarks. *Prerequisite:* MUIN 270; *corequisite:* MUIN 280.

**MUIN 370 Distribution of Recorded Music and Music Publishing (4, Sp)** A survey of various methods used to distribute music to the public. Record distribution, manufacturing, retail outlets, accounting, publishing and performance rights. *Prerequisite:* MUIN 360 or MUIN 372bx.

**MUIN 372abx The Business and Legal Aspects of the Music Industry (4-4, FaSp)**

A survey of the major elements that support the music industry. History, copyright, music contracts, radio, record companies, managers, music publishing and communication. Not available for major credit to B.M. and B.S. music industry majors.

**MUIN 379ab Recording Studio Theory (a: 2, Fa; b: 2, Sp)** Basic electronic concepts needed to understand operational parameters of a state-of-the-art recording studio; schematics, interface, capacitance, resistance, and problem solving. *Prerequisite:* MUIN 275b.

**MUIN 385 Radio in the Music Industry (4, Fa)** A survey of radio; its operation and effect on the music industry. Topics include advertising, playlists, program direction, FCC, networks, news, promotion, payola and format development.

**MUIN 389 Digital Equipment and Recording (2, Fa)** Digital equipment including computers, sequencers, digital signal processors, digital synthesizers, MIDI, and rotary and stationary digital recording. *Prerequisite:* MUIN 275b.

**MUIN 392ab Acoustics and Speaker Design (2, FaSp)** Principles of acoustics relating to studio construction, wall treatment and furnishings; natural reverberation, speaker materials, passive and active crossovers, and time alignment. *Prerequisite:* MUIN 275b.

**MUIN 425 Live Music Production and Promotion (4)** A survey of the presentation of the live musical experience. Both classical and popular concert presentation will be examined including venue selection, promotion and security.

**MUIN 430 Artist Management and Development (4)** A study of issues relating to the personal management of music artists including negotiating contracts, image, career development, agents, touring, merchandising, fees and duties.

**MUIN 435 Manufacture and Distribution of Musical Products (4, Sp)** An in-depth study of musical instrument manufacture and distribution in the United States. Topics covered include sheet music, instrument rentals, lessons and band operations.

**MUIN 440 Arts Management (4, Fa)** A survey of the management of non-profit and for-profit arts organizations with emphasis on funding, donor development tax status and promotion.

**MUIN 442 Operation of the Radio Studio (2, Fa)** An in-depth study of radio studio technical operations. Topics include consoles, microphones, transmission considerations, networks, satellites, and digital and analog production situations. *Prerequisite:* MUIN 275b.

**MUIN 443 The Business of Music for Visual Media (4, Sp)** Introduction to music designed for synchronization to picture including history of music in cinema, music editing, supervision, performance rights licensing, production and music scoring procedures. *Prerequisite:* MUIN 360 or MUIN 372bx.

**MUIN 445 International Music Industry (4, Sp)** A survey of international operations of music distribution, publishing, touring, law, promotion, customs and practices. *Prerequisite:* MUIN 360.

**MUIN 446ab Computer Assisted Recording and Editing (2-2, FaSp)** Techniques and applications of recording and editing sound on personal computers. Hardware, software, editing for song, sound effects and dialog for film.

**MUIN 448 Computer Music Notation and Preparation (2, FaSp)** Techniques and principles of computer music notation including conventions of music notation, idiomatic practices, preparation of significant score types, and MIDI basics.

**MUIN 450 Practicum in Music Industry Issues (Internship) (2-4, max 8, FaSp)** Field application of music industry theories and practices; part-time employment. Project jointly defined by student, employer and professor. Junior or senior standing. Graded CR/NC. *Prerequisite:* MUIN 360 or MUIN 372bx.

**MUIN 475 Advanced Concert Management (4, Sp)** Application of theories, technologies, and practices of the live music industry. Focus on the business, management, marketing, promotion, and production of professional concert events. *Prerequisite:* MUIN 425.

**MUIN 476ab Advanced Sound Reinforcement (2-2, FaSp)** Special problems of multimedia mixing with simultaneous audio re-processing for live performance situations including rigging, house mix, monitor mix, venues and power distribution.

**MUIN 477 Remote Recording Techniques (2, Sp)** Special problems of location recording; specialized equipment; microphone design and operation. *Prerequisite:* MUIN 275b.

**MUIN 478 Advanced Multichannel Remix (2, FaSp)** Special problems of multichannel remixing with simultaneous audio re-processing. Album, film, television and multimedia formats will be covered. *Prerequisite:* MUIN 446a.

**MUIN 479 Audio Mastering (2, Fa)** A survey of the final creative steps of an audio CD. Concepts of acoustics, mastering suite design, critical listening, frequency, dynamics and sequencing. *Prerequisite:* MUIN 275b; *recommended preparation:* MUIN 446a.

**MUIN 486 Computer-Assisted Music Editing for Picture (2, Fa)** Techniques and applications of recording, editing and synchronizing music and sounds to film, video or games, using time code and personal computers. *Prerequisite:* MUIN 446b.

**MUIN 488ab Recording Studio Maintenance (2-2)** Fundamentals needed to perform maintenance on professional audio equipment including trouble-shooting, interface, and alignment procedures. *Prerequisite:* MUIN 275ab.

**MUIN 490 Directed Research (2-8, max 8)** Individual research and readings. Not available for graduate credit. (Duplicates credit in former MUPF 490.)

**MUIN 493 Audio Signal Processing Equipment (2, FaSp)** Principles and design characteristics of digital and analog signal processing equipment including plate and digital reverbs, synchronizers, digital editing systems and mastering systems. *Prerequisite:* MUIN 275b.

**MUIN 494 Classical Music Recording (4, FaSm)** Principles of classical music recording with emphasis on history, equipment, techniques, and locations. Differences in orchestral, choral, opera, and small ensemble recording.

**MUIN 495 Music Industry, Broadcast and the Internet (4, Fa)** An exploration of the effects of new technologies, laws, economic models, media (Internet, mobile, satellite), the decline of traditional broadcasting, and convergence with the music industry. *Recommended preparation:* MUIN 360 or MUIN 372bx.

**MUIN 496 Music Media Solutions (4, FaSp)** Group study of one current music media issue, focusing on possible solutions with practical applications. Stress on leadership, critical thinking, and professional practices. By application only. Open only to junior level and above.

**MUIN 498 Final Project (1, max 4, FaSp)** Required for students who are working on recording projects. Booking of studios, weekly review of projects and advice on procedures and progress.

**MUIN 499 Special Topics (2, max 8)** Selected topics of current interest.

**MUIN 570 The Music Industry (4, FaSpSm)** A graduate level survey of the music business with emphasis on distribution of recorded music, music publishing, performance rights societies, musical products and live music.

**MUIN 575 Music Technology and Production (4, Fa)** Fundamentals of audio recording. Focuses on the principles and applications of sound and hearing, recording systems and their components, and production techniques.

**MUIN 590 Directed Research (1-12)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. (Duplicates credit in former MUPF 590). Graded CR/NC.

**MUIN 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

#### **PERFORMANCE (EARLY MUSIC) (MPEM)**

**MPEM 201 Individual Instruction (1 or 2, max 8, FaSpSm)** Secondary instrument for lower division students. (Duplicates credit in former MUPF 201.)

**MPEM 390 Special Problems (1-4, Irregular)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only. (Duplicates credit in former MUPF 390.)

**MPEM 450 Collegium Workshop (1, max 8, FaSp)** Study and rehearsal of music of the Middle Ages, Renaissance, and Baroque; technique, interpretation, improvisation, and ornamentation. Open to all students. (Duplicates credit in former MUPF 450.)

**MPEM 490x Directed Research (2-8, max 8, FaSpSm)** Individual research and readings. Not available for graduate credit. (Duplicates credit in former MUPF 490x.)

**MPEM 499 Special Topics (2-4, max 8)** Selected topics of current interest. (Duplicates credit in former MUPF 499.)

**MPEM 501 Individual Instruction (1 or 2, max 8, FaSpSm)** Secondary instruction for graduate music majors or instruction for graduate non-music majors.

**MPEM 553 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 553.)

**MPEM 554 Graduate Certificate Performance (4, max 16, FaSpSm)** Individual instruction and related lab participation for Graduate Certificate students.

**MPEM 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. (Duplicates credit in former MUPF 590.)

**MPEM 650 Collegium Directing (2, max 4)** Practical training in the direction of a Collegium Musicum or other early music ensemble; program planning, repertory search and preparation, historical instrumentation and arranging, rehearsal procedure, improvisational techniques, and maintenance of instruments. (Duplicates credit in former MUPF 650.)

**MPEM 653 Performance (1 or 2, max 12, FaSpSm)** Individual or master class instruction for DMA Performance majors. (Duplicates credit in former MUPF 653.)

**MPEM 754 Artist Diploma Performance (4, max 16, FaSpSm)** Individual instruction and related lab participation for Artist Diploma students.

**MPEM 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

#### **PERFORMANCE (GUITAR) (MPGU)**

**MPGU 101x Non-Major Beginning Individual Instruction (1-2, max 2, FaSpSm)** Individual instruction at the beginning level designed for non-music majors with no previous experience. Not available for credit to music majors.

**MPGU 120abcd Beginning Pop/Rock Guitar (2-2-2-2, FaSpSm)** Introduction to the performance technique of pop/rock guitar as well as music theory fundamentals, exploring repertoire by artists such as The Beatles and Dave Matthews.

**MPGU 121 Intensive Beginning Pop/Rock Guitar (4, FaSp)** Introduction to the performance technique of pop/rock guitar as well as music theory fundamentals, exploring repertoire by artists such as The Beatles and Dave Matthews.

**MPGU 125 Beginning Fingerstyle/Chord Guitar (2, FaSp)** Basic fingerstyle guitar, learned through the study of such pieces as "Greensleeves," "Malaguena," and "Minuet" (Bach); song accompaniment patterns and music notation for the beginner.

**MPGU 126 Easy Fingerstyle Beatles (2, FaSp)** Techniques of classical guitar applied to the study of five to eight Beatles songs, from "Hey Jude" to "Blackbird." No guitar or background music required.

**MPGU 153 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 153.)

**MPGU 158 Guitarists in the U.S. (2)** Study of the lives and music of influential guitarists; analysis of musical and technical details. Open to all university students. (Duplicates credit in former MUPF 158.)

**MPGU 159 Functional Skills for Studio Guitarists I (2)** Study of technique, theory and aural skills as applied to guitar; fingerboard organization of melodic and chordal topics; sight reading. (Duplicates credit in former MUPF 159.)

**MPGU 253 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 253.)

**MPGU 257 Classical Guitar Performance Class (2, max 8, FaSp)** Technical problems; solo and ensemble literature; interpretation; professional preparation. Required of first and second year Classical Guitar majors each semester in residence. (Duplicates credit in former MUPF 257.)

**MPGU 258 Functional Skills for Studio Guitarists I (2, max 4, FaSp)** Melodic and chordal topics applied to the total fingerboard; successful completion required for junior standing. (Duplicates credit in former MUPF 258.) *Prerequisite:* MPGU 159.

**MPGU 259 Functional Skills for Classical Guitarists I (2, Fa)** Fundamentals of music theory experienced through the medium of the classical guitar. Topics include analysis of important guitar works, basso continuo realization, arranging, and improvisation. *Recommended preparation:* MUCO 232a.

**MPGU 300x Non-Major Individual Instruction (1-2, max 16, FaSpSm)** Intermediate and advanced instruction designed for non-music majors. Not available for credit to music majors. (Duplicates credit in former MPGU 201 and MPGU 401.) *Recommended preparation:* MPGU 101x.

**MPGU 301 Individual Instruction (1-2, max 16, FaSpSm)** Intermediate and advanced instruction on secondary instrument for music majors, on principal instrument for music minors and B.A. music majors. Open only to music majors and minors. (Duplicates credit in former MPGU 201 and MPGU 401.)

**MPGU 335 Jazz Guitar Master Class (1, FaSp)** Explore the music of Joe Diorio, Wes Montgomery and John Coltrane in a master class setting.

**MPGU 353 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 353.)

**MPGU 357 Advanced Classical Guitar Techniques (2, Sp)** An in-depth exploration of the most advanced facets of classical guitar technique. *Recommended preparation:* MPGU 257.

**MPGU 358 Performance Practices for Studio Guitarists (2, max 4)** Rehearsal procedures; stage deportment; interpretation of solo and ensemble literature; preparation for recitals and professional performance. (Duplicates credit in former MUPF 358.) *Prerequisite:* MPGU 258.

**MPGU 390 Special Problems (1-4, Irregular)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only. (Duplicates credit in former MUPF 390.)

**MPGU 415 Studio Guitar Pedagogy (2)** Teaching techniques and literature; function of the hands; acoustical properties of instruments. (Duplicates credit in former MUPF 415.)

**MPGU 416 Evolution of the Guitar in the United States (3)** Historical survey of styles, literature and performance practice; emphasis on playing technique and interpretation. A time-line study relating guitar to popular music and historical events. (Duplicates credit in former MUHL 416.)

**MPGU 417 Classical Guitar Pedagogy (2)** Teaching techniques and literature; function of the hands; acoustical properties of instruments. (Duplicates credit in former MUPF 417.)

**MPGU 426 Classical Guitar History and Literature (3, Fa)** A survey of music for the guitar, lute and vihuela from 1500 to the present. (Duplicates credit in former MPGU 426a and former MUHL 426a.) *Recommended preparation:* MUHL 332.

**MPGU 427 Advanced Topics in Classical Guitar History and Literature (3, Sp)** An in-depth study of major works for lute, vihuela and classical guitar, with emphasis on early music and the music of the 20th century. (Duplicates credit in former MPGU 426b and former MUHL 426b.) *Recommended preparation:* MPGU 426.

**MPGU 428ab Improvisation and Arranging for Guitarists (3-3)** Principles of improvisation and impromptu arranging; comparison and application of techniques and musical styles of the various kinds of guitars and related fretted instruments. (Duplicates credit in former MUPF 328ab.)

**MPGU 453 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 453.)

**MPGU 457 Classical Guitar Performance Class (2, max 8, FaSp)** Technical problems; solo and ensemble literature. Required of all third and fourth year classical guitar majors each semester in residence. (Duplicates credit in former MUPF 457.)

**MPGU 458 Current Electric Guitar Styles (2)** Analysis and performance of music and techniques currently in use in the recording, TV and motion picture studios; includes study of recordings, videos and guitar equipment. (Duplicates credit in former MUPF 458.)

**MPGU 459 Functional Skills for Classical Guitarists II (2, Sp)** Advanced theory and composition on the guitar. Weekly analysis exercises, arranging projects and studies in improvisation and ornamentation are directed toward creating an original solo or chamber work for guitar. *Recommended preparation:* MUCO 232b, MUCO 233b.

**MPGU 490x Directed Research (2-8, max 8, FaSpSm)** Individual research and readings. Not available for graduate credit. (Duplicates credit in former MUPF 490x.)

**MPGU 499 Special Topics (2-4, max 8)** Selected topics of current interest. (Duplicates credit in former MUPF 253.)

**MPGU 501 Individual Instruction (1 or 2, max 8, FaSpSm)** Secondary instruction for graduate music majors or instruction for graduate non-music majors.

**MPGU 553 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 553.)

**MPGU 554 Graduate Certificate Performance (4, max 16, FaSpSm)** Individual instruction and related lab participation for Graduate Certificate students.

**MPGU 557 Advanced Classical Guitar Performance Class (1, max 4)** Study of advanced classical guitar solo and ensemble literature; interpretation; professional preparation and other topics appropriate for group study. (Duplicates credit in former MUPF 557.) *Prerequisite:* bachelor's degree with music major; principal instrument, classical guitar.

**MPGU 558 Advanced Studio Guitar Performance Class (1, max 4)** Study of advanced studio guitar and ensemble literature; interpretation; professional preparation and other topics appropriate for group study. (Duplicates credit in former MUPF 558.) *Prerequisite:* bachelor's degree with music major; principal instrument, studio guitar.

**MPGU 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. (Duplicates credit in former MUPF 590.)

**MPGU 653 Performance (1 or 2, max 12, FaSpSm)** Individual or master class instruction for DMA Performance majors. (Duplicates credit in former MUPF 653.)

**MPGU 754 Artist Diploma Performance (4, max 16, FaSpSm)** Individual instruction and related lab participation for Artist Diploma students.

**MPGU 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PERFORMANCE (KEYBOARD STUDIES) (MPKS)**

**MPKS 150abcd Beginning Piano (2-2-2-2, FaSp)** Techniques of performance, note reading, and basic musicianship. Not open to music majors.

**MPKS 153 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 153.)

**MPKS 160ab Functional Skills for Keyboard Majors I (a: 2, Fa; b: 2, Sp)** Sight-reading and principles of style as related to intermediate literature; c-clef and open score reading; improvisation and functional harmony. Introduction to standard reference works, periodicals. Required of all keyboard majors. (Duplicates credit in former MUPF 160ab.)

**MPKS 170ab Introduction to Piano Repertoire and Performance (a: 1, Fa; b: 1, Sp)** Survey of basic piano repertoire and styles through lecture, discussion, and performance. *a:* Late Baroque through Beethoven; *b:* Schubert to the present. (Duplicates credit in former MUPF 170ab.) *Prerequisite:* piano performance major status.

**MPKS 228 Four-Hand Keyboard Repertoire (1, max 4, FaSp)** Preparation and performance of literature for piano duets and duo-piano. (Duplicates credit in former MUEN 228.)

**MPKS 250ab Keyboard Instruction I (2-2, FaSp)** Beginning and elementary instruction; emphasis on reading skills, harmonization, transposition, score reading, improvisation; group instruction in a keyboard laboratory facility.

**MPKS 253 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 253.)

**MPKS 260ab Functional Skills for Keyboard Majors II (2-2, FaSp)** Sight-reading and principles of style as related to lower advanced literature; extended score reading; improvisation and functional harmony. Mini-survey; basic keyboard literature. (Duplicates credit in former MUPF 260ab.) *Prerequisite:* MPKS 160b.

**MPKS 300x Non-Major Individual Instruction (1-2, max 16, FaSpSm)** Intermediate and advanced instruction designed for non-music majors. Not available for credit to music majors. (Duplicates credit in former MPKS 201 and MPKS 401.)

**MPKS 301 Individual Instruction (1-2, max 16, FaSpSm)** Intermediate and advanced instruction on secondary instrument for music majors, on principal instrument for music minors and B.A. music majors. Open only to music majors and minors. (Duplicates credit in former MPKS 201 and MPKS 401.)

**MPKS 350ab Keyboard Instruction II (2-2, FaSp)** Intermediate and advanced instruction; development of reading, performance and improvisation skills necessary for proficiency examinations. Group and individualized instruction in a keyboard laboratory facility. *Prerequisite:* MPKS 250b.

**MPKS 353 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 353.)

**MPKS 360ab Accompanying (a: 2, Fa; b: 2, Sp)** Techniques of vocal and instrumental accompanying. (Duplicates credit in former MUPF 360ab.)

**MPKS 390 Special Problems (1-4, Irregular)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only. (Duplicates credit in former MUPF 390.)

**MPKS 431ab Piano Pedagogy: Introduction and Practicum (2-2, FaSp)** The learning process at the keyboard; pedagogy and methodology of beginning methods. Studio/group instruction: children/adults. MPKS 431*a:* survey and observation. MPKS 431*b:* practice teaching; beginners. (Duplicates credit in former MUPF 431ab.) *Prerequisite:* MPKS 253, MPKS 260b.

**MPKS 435 Technology of the Pianoforte and Harpsichord (2, Irregular)** Analysis of technical innovations and maintenance of the pianoforte and harpsichord as related to musical performance. (Duplicates credit in former MUPF 436.)

**MPKS 450ab Piano Pedagogy: Intermediate Literature and Functional Skills (a: 2, Fa; b: 2, Sp)** Methods, study of college curriculum keyboard classes. Studio/group instruction. Business practices; audition, interview techniques. 450*a:* Survey and observation. 450*b:* practice teaching; secondary piano classes. (Duplicates credit in former MUED 450ab.) *Prerequisite:* *a:* MPKS 431b; *b:* MPKS 450a.

**MPKS 453 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 453.)

**MPKS 472ab Piano History and Literature (a: 2, Fa; b: 2, Sp)** Solo piano literature; emphasis on composers' influences, performance practices and the development of the pianoforte. *a:* Late Baroque through Beethoven. *b:* Schubert to the present. (Duplicates credit in former MUHL 472ab.) *Prerequisite:* for music majors, MUHL 331, MUHL 332; for nonmusic majors, MUHL 315x.

**MPKS 481 Interpretation of Baroque Music (2, max 6, FaSp)** Repertoire and performance practice in music of the period: style, phrasing, embellishments, dynamics, improvisation, tempi. Performance in class of solo and ensemble works, instrumental and vocal.

**MPKS 490x Directed Research (2-8, max 8, FaSpSm)** Individual research and readings. Not available for graduate credit. (Duplicates credit in former MUPF 490x.)

**MPKS 499 Special Topics (2-4, max 8)** Selected topics of current interest. (Duplicates credit in former MUPF 499.)

**MPKS 501 Individual Instruction (1 or 2, max 8, FaSpSm)** Secondary instruction for graduate music majors or instruction for graduate non-music majors.

**MPKS 520 Special Studies in Solo Repertoire for Piano (2, max 12, FaSp)** Historical, stylistic and pedagogical aspects of solo repertoire. Special emphasis to be determined by the department. (Duplicates credit in former MUPF 520.)

**MPKS 553 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 553.)

**MPKS 554 Graduate Certificate Performance (4, max 16, FaSpSm)** Individual instruction and related lab participation for Graduate Certificate students.

**MPKS 560 Song Interpretation Master Class (2, max 12, FaSp)** For advanced singers and pianists. (Duplicates credit in former MUPF 560.)

**MPKS 561 Chamber Music Interpretation Master Class (2, max 12, FaSp)** For advanced pianists and instrumentalists. (Duplicates credit in former MUPF 561.)

**MPKS 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. (Duplicates credit in former MUPF 590.)

**MPKS 653 Performance (1 or 2, max 12, FaSpSm)** Individual or master class instruction for DMA Performance majors. (Duplicates credit in former MUPF 653.)

**MPKS 754 Artist Diploma Performance (4, max 16, FaSpSm)** Individual instruction and related lab participation for Artist Diploma students.

**MPKS 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

#### **PERFORMANCE (POPULAR MUSIC) (MPPM)**

**MPPM 100 Popular Music Forum (1, max 4, FaSp)** A weekly lecture series addressing a wide range of special topics and issues confronting the popular musician. Graded CR/NC.

**MPPM 120 Popular Music Performance I (2, FaSp)** Study of musical elements appropriate to the performance of popular music in a collaborative, interactive environment.

**MPPM 153 Individual Instruction (1, 2, max 8, FaSp)** Weekly individual instruction.

**MPPM 240 Drumming Proficiency for the Popular Musician (2, FaSp)** Beginning and elementary instruction in drum set techniques.

**MPPM 250 Keyboard Proficiency for the Popular Musician (2, FaSp)** Development of practical keyboard skills, including reading and realizing chord symbols, basics of voice leading, study of various harmonic and rhythmic styles.

**MPPM 253 Individual Instruction (1, 2, max 8, FaSp)** Weekly individual instruction.

**MPPM 301 Individual Instruction (1-2, max 16, FaSpSm)** Intermediate and advanced instruction on secondary instrument for all majors and minors except MPPM. Not open to B.M. in Popular Music Performance students.

**MPPM 320 Popular Music Performance II (2, max 8, FaSp)** Development of ensemble and communication skills through the performance and interpretation of American popular music in concert and studio settings. Development of original compositions. Open only to juniors and seniors. *Prerequisite:* MPPM 120.

**MPPM 325ab Arranging in Popular Music (2, Fa; 2, Sp) a:** Principles and techniques of arranging for voice and rhythm section in the popular music idiom. *Prerequisite:* MUSC 310 and MUSC 311 or MUIA 446b; *b:* writing and arranging for small groups of brass, wind, and/or string instruments with rhythm section in the popular music idiom.

**MPPM 450ab Final Project (1, Fa; 1, Sp)** Major collaborative performance project in popular music. Graded CR/NC.

#### **PERFORMANCE (STRINGS) (MPST)**

**MPST 101x Non-Major Beginning Individual Instruction (1-2, max 2, FaSpSm)** Individual instruction at the beginning level designed for non-music majors with no previous experience. Not available for credit to music majors.

**MPST 153 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 153.)

**MPST 163 Beginning Harp (2, max 8, FaSp)** Basic instruction in the fundamentals of solo harp playing, note reading, and basic musicianship. Open to music and non-music majors.

**MPST 253 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 253.)

**MPST 262 Double Bass Performance Class (1, max 4, FaSp)** Study of solo and orchestra repertoire, professional preparation, and teaching techniques. Required of all first and second year double bass majors each semester in residence. (Duplicates credit in former MUPF 262.) *Prerequisite:* music major.

**MPST 263 Harp Performance Class (1, max 4, FaSp)** Study of solo and orchestra repertoire, professional preparation, and teaching technique. Required of all first and second year harp majors each semester in residence. (Duplicates credit in former MUPF 263.) *Prerequisite:* music major.

**MPST 300x Non-Major Individual Instruction (1-2, max 16, FaSpSm)** Intermediate and advanced instruction designed for non-music majors. Not available for credit to music majors. (Duplicates credit in former MPST 201 and MPST 401.) *Recommended preparation:* MPST 101x.

**MPST 301 Individual Instruction (1-2, max 16, FaSpSm)** Intermediate and advanced instruction on secondary instrument for music majors, on principal instrument for music minors and B.A. music majors. Open only to music majors and minors. (Duplicates credit in former MPST 201 and MPST 401.)

**MPST 353 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 353.)

**MPST 390 Special Problems (1-4, Irregular)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only. (Duplicates credit in former MUPF 390.)

**MPST 453 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 453.)

**MPST 462 Double Bass Performance Class (1, max 8, FaSp)** Continuation of MPST 262. Required of all third and fourth year double bass majors each semester in residence. (Duplicates credit in former MUPF 462.) *Prerequisite:* music major.

**MPST 463 Harp Performance Class (1, max 8, FaSp)** Continuation of MPST 263. Required of all third and fourth year harp majors each semester in residence. (Duplicates credit in former MUPF 463.) *Prerequisite:* music major.

**MPST 471ab String Pedagogy (a: 2, Fa; b: 2, Sp)** Survey of teaching literature; techniques of teaching beginning, intermediate, and advanced students. (Duplicates credit in former MUPF 471ab.)

**MPST 472 Orchestra Repertoire – Strings (2, max 8, FaSp)** Orchestral literature for string players, covering a broad spectrum of the repertoire; emphasis on preparation for auditions. (Duplicates credit in former MUPF 472.)

**MPST 490x Directed Research (2-8, max 8, FaSpSm)** Individual research and readings. Not available for graduate credit. (Duplicates credit in former MUPF 490x.)

**MPST 499 Special Topics (2-4, max 8)** Selected topics of current interest. (Duplicates credit in former MUPF 499.)

**MPST 501 Individual Instruction (1 or 2, max 8, FaSpSm)** Secondary instruction for graduate music majors or instruction for graduate non-music majors.

**MPST 553 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 553.)

**MPST 554 Graduate Certificate Performance (4, max 16, FaSpSm)** Individual instruction and related lab participation for Graduate Certificate students.

**MPST 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. (Duplicates credit in former MUPF 590.)

**MPST 653 Performance (1 or 2, max 12, FaSpSm)** Individual or master class instruction for DMA Performance majors. (Duplicates credit in former MUPF 653.)

**MPST 754 Artist Diploma Performance (4, max 16, FaSpSm)** Individual instruction and related lab participation for Artist Diploma students.

**MPST 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

#### **PERFORMANCE (VOCAL ARTS) (MPVA)**

**MPVA 101x Non-Major Beginning Individual Instruction (1-2, max 2, FaSpSm)** Individual instruction at the beginning level designed for non-music majors with no previous experience. Not available for credit to music majors.

**MPVA 141 Class Voice (2, max 4, FaSp)** Introduction to the fundamental principles of singing: breath control, tone production, diction, and the use of appropriate song material.

**MPVA 153 Individual Instruction (1 or 2, max 8, FaSpSm)** Weekly individual instruction and vocal performance forum. (Duplicates credit in former MUPF 153.)

**MPVA 203ab Acting for Singers I (2-2, FaSp)** Use of dramatic techniques in the interpretation and performance of music; basic acting techniques for the operatic and recital stages; sensory exercises, movement, improvisation, relaxation and make-up. (Duplicates credit in former MPVA 303 and former MUPF 303.) *Recommended preparation:* MPVA 153.

**MPVA 241 Intermediate Class Voice (2, max 4, FaSp)** Continued development of the fundamentals of singing, diction, and repertoire building. *Prerequisite:* MPVA 141.

**MPVA 253 Individual Instruction (1 or 2, max 8, FaSpSm)** Weekly individual instruction and vocal performance forum. (Duplicates credit in former MUPF 253.)

**MPVA 300x Non-Major Individual Instruction (1-2, max 16, FaSpSm)** Intermediate and advanced instruction designed for non-music majors. Not available for credit to music majors. (Duplicates credit in former MPVA 201 and MPVA 401.) *Recommended preparation:* MPVA 101x.

**MPVA 301 Individual Instruction (1-2, max 16, FaSpSm)** Intermediate and advanced instruction: secondary emphasis for music majors, principal emphasis for music minors and B.A. music majors. Open only to music majors and minors. (Duplicates credit in former MPVA 201 and MPVA 401.)

**MPVA 353 Individual Instruction (1 or 2, max 8, FaSpSm)** Weekly individual instruction and vocal performance forum. (Duplicates credit in former MUPF 353.)

**MPVA 390 Special Problems (1-4, Irregular)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only. (Duplicates credit in former MUPF 390.)

**MPVA 402 Musical Theatre Workshop (2, max 8, Irregular)** Stylistic and technical features of dramatic and musical elements involved in performance of American musical and standard operetta repertoire; staging of scenes.

**MPVA 403 Acting for Singers II (2, max 8, FaSp)** Continuation of MPVA 203ab. Acting of operatic roles in different periods and styles; specific recital and audition techniques. (Duplicates credit in former MUPF 403.) *Recommended preparation:* MPVA 203ab.

**MPVA 404 Word and Music in Opera (2, max 8, Irregular)** Performance class for singers and pianists; analysis of recitatives, arias, and ensembles of various operatic styles; study of the technique of effective musical delivery. By audition only. (Duplicates credit in former MUPF 404.) *Recommended preparation:* MPVA 203ab.

**MPVA 405 USC Opera (2, max 12, FaSp)** Preparation, rehearsal, and performance of operatic works and excerpts; study of different operatic styles; public appearances. By audition only. (Duplicates credit in former MUPF 405.)

**MPVA 406 Opera Coaching Techniques (2, max 8, Irregular)** Score study for pianists, coaches, and conductors; role analysis; transcription techniques for one or two pianos of an orchestral score. (Duplicates credit in former MUPF 406.)

**MPVA 407 Directing for the Operatic Stage (2, max 8, FaSp)** Various approaches to operatic style; basic blocking; stage management. Student direction of scenes produced in USC Opera. (Duplicates credit in former MUPF 407.)

**MPVA 438 Vocal Pedagogy (2, Fa)** Voice physiology and function. (Duplicates credit in former MUPF 438.)

**MPVA 439 Vocal Pedagogy Practicum (2, Sp)** Pedagogical approaches and methodology; practice teaching. (Duplicates credit in former MUPF 441b.) *Prerequisite:* MPVA 438.

**MPVA 440 Italian and French Diction (2)** Principles of pronunciation and enunciation; use of international phonetic alphabet. (Duplicates credit in former MPVA 442a.)

**MPVA 441 English and German Diction (2)** Principles of pronunciation and enunciation; use of international phonetic alphabet. (Duplicates credit in former MPVA 442b.)

**MPVA 443 Cantata and Oratorio (2, 2 years, Fa)** Historical survey of literature, style and performance practice; emphasis on performing solo and small ensemble sections of larger works. (Duplicates credit in former MUPF 443.)

**MPVA 453 Individual Instruction (1 or 2, max 8, FaSpSm)** Weekly individual instruction and vocal performance forum. (Duplicates credit in former MUPF 453.)

**MPVA 479 Song Literature (2, max 4, FaSp)** Song literature of Italy, France, Germany, Russia, Norway, Sweden, England, America; comparative analysis of various composers and their influence on song literature. (Duplicates credit in former MUHL 479.) *Recommended preparation:* for music majors, MUHL 331; for non-music majors, MUHL 315x.

**MPVA 490x Directed Research (2-8, max 8, FaSpSm)** Individual research and readings. Not available for graduate credit. (Duplicates credit in former MUPF 490x.)

**MPVA 499 Special Topics (2-4, max 8)** Selected topics of current interest. (Duplicates credit in former MUPF 499.)

**MPVA 501 Individual Instruction (1 or 2, max 8, FaSpSm)** Secondary instruction for graduate music majors or instruction for graduate non-music majors.

**MPVA 540 Special Studies in Vocal Literature (2, max 6, Sp)** Art song, concert and operatic repertoire. Emphasis to be determined by the department. (Duplicates credit in former MUPF 540.)

**MPVA 541 Comparative Vocal Pedagogy (2, 2 years, Sp)** Survey of pedagogical sources from early 17th century to present; major historic figures, terminologies and methods; relevance to modern-day singing and teaching practice. (Duplicates credit in former MUPF 541.)

**MPVA 553 Individual Instruction (1 or 2, max 8, FaSpSm)** Weekly individual instruction and vocal performance forum. (Duplicates credit in former MUPF 553.)

**MPVA 554 Graduate Certificate Performance (4, max 16, FaSpSm)** Individual instruction and related lab participation for Graduate Certificate students.

**MPVA 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. (Duplicates credit in former MUPF 590.)

**MPVA 653 Individual Instruction (1 or 2, max 12, FaSpSm)** Weekly individual instruction and vocal performance forum. (Duplicates credit in former MUPF 653.)

**MPVA 754 Artist Diploma Performance (4, max 16, FaSpSm)** Individual instruction and related lab participation for Artist Diploma students.

**MPVA 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

#### **PERFORMANCE (WIND AND PERCUSSION) (MPWP)**

**MPWP 101x Non-Major Beginning Individual Instruction (1-2, max 2, FaSpSm)** Individual instruction at the beginning level designed for non-music majors with no previous experience. Not available for credit to music majors.

**MPWP 153 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 153.)

**MPWP 252 Individual Instrument Performance Class I (1, max 4, FaSp)** Solo and orchestra repertoire, professional preparation, reed making, and other matters appropriate to group study. Required of all first and second year wind and percussion majors each semester in residence. (Duplicates credit in former MUPF 252.)

**MPWP 253 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 253.)

**MPWP 300x Non-Major Individual Instruction (1-2, max 16, FaSpSm)** Intermediate and advanced instruction designed for non-music majors. Not available for credit to music majors. (Duplicates credit in former MPWP 201 and MPWP 401.) *Recommended preparation:* MPWP 101x.

**MPWP 301 Individual Instruction (1-2, max 16, FaSpSm)** Intermediate and advanced instruction on secondary instrument for music majors, on principal instrument for music minors and B.A. music majors. Open only to music majors and minors. (Duplicates credit in former MPWP 201 and MPWP 401.)

**MPWP 353 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 353.)

**MPWP 390 Special Problems (1-4, Irregular)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only. (Duplicates credit in former MUPF 390.)

**MPWP 452 Individual Instrument Performance Class II (1, max 4, FaSp)** Solo and orchestra repertoire, professional preparation, reed making, and other matters appropriate to group study. Required of all third and fourth year wind and percussion majors each semester in residence. (Duplicates credit in former MUPF 452.)

**MPWP 453 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 453.)

**MPWP 481 Interpretation of Baroque Music (2, max 6, FaSp)** Repertoire and performance practice in music of the period: style, phrasing, embellishments, dynamics, tempi. Performance in class of solo and ensemble works, instrumental and vocal. (Duplicates credit in former MUPF 481.)

**MPWP 482 Interpretation of Classic, Romantic, and 20th Century Wind and Percussion Music (2)** Analysis and performance of 18th, 19th, and 20th century ensemble music, octet through symphonic band; historical perspectives of instruments including technical developments. (Duplicates credit in former MUPF 482.)

**MPWP 490x Directed Research (2-8, max 8, FaSpSm)** Individual research and readings. Not available for graduate credit. (Duplicates credit in former MUPF 490x.)

**MPWP 499 Special Topics (2-4, max 8)** Selected topics of current interest. (Duplicates credit in former MUPF 499.)

**MPWP 501 Individual Instruction (1 or 2, max 8, FaSpSm)** Secondary instruction for graduate music majors or instruction for graduate non-music majors.

**MPWP 551 Individual Instrument Performance Class III (1, max 2, FaSp)** Solo and orchestra repertoire, professional preparation, reed making, and other matters appropriate to group study. Intended for M.M. wind and percussion majors.

**MPWP 553 Individual Instruction (1 or 2, max 8, FaSpSm)** (Duplicates credit in former MUPF 553.)

**MPWP 554 Graduate Certificate Performance (4, max 16, FaSpSm)** Individual instruction and related lab participation for Graduate Certificate students.

**MPWP 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. (Duplicates credit in former MUPF 590.)

**MPWP 653 Performance (1 or 2, max 12, FaSpSm)** Individual or master class instruction for DMA Performance majors. (Duplicates credit in former MUPF 653.)

**MPWP 754 Artist Diploma Performance (4, max 16, FaSpSm)** Individual instruction and related lab participation for Artist Diploma students.

**MPWP 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

#### **SCHOOL OF MUSIC (MUSC)**

**MUSC 110 Freshman Forum (1, FaSp)** Introduction to issues and skills relevant to the professional musical world of today. Open only to music majors. Graded CR/NC.

**MUSC 255 Songwriting I (2, FaSp)** Development of musical and lyrical skills, composing, listening, analysis, and critiques of popular original music.

**MUSC 310 Computer Recording for the Performing Musician (2, FaSp)** Fundamentals of computer music production for music students. Recording and editing multitrack digital audio using computer software. Open to music majors only, with the exception of majors in music industry.

**MUSC 311 MIDI Techniques for the Performing Musician (2, Sp)** Techniques of sequencing and recording musical compositions via MIDI on personal computers. Includes study of hardware, software, processes, functions, editing and orchestration techniques. Not open to music industry majors.

**MUSC 355 Songwriting II (2, FaSp)** Continuation of Songwriting I; particular emphasis on the analysis of the techniques of important popular songwriters and the application of these techniques to original songs. (Duplicates credit in former MUCO 252.) *Prerequisite:* MUSC 255.

**MUSC 400m The Broadway Musical: Reflection of American Diversity, Issues, and Experiences (4, FaSpSm)** Selected Broadway musicals serve as a catalyst for inquiry into human diversity, cross-culturalism, and significant social and political issues.

**MUSC 420m Hip-Hop Music and Culture (4)** A history of hip-hop music from its inception to the present: its musical processes and styles, as well as attendant social, political, and cultural issues.

**MUSC 422 The Beatles: Their Music and Their Times (4)** Music, lyrics, recordings, production techniques, career strategy, social ramifications, and especially the technological impact of the musical group known as The Beatles.

**MUSC 423 Classic Rock: Popular Music of the Sixties and Seventies (2)** Critical examination of the lyrics, structure, associated mythology, technology, and evolving styles of popular music reflecting the turbulent societal changes during the Sixties and Seventies.

**MUSC 424 Iconic Figures of Popular Music (2, max 8, FaSp)** Music, life, recordings, and attendant musical, cultural and political influences of a seminal musician or group in 20th or 21st century popular music.

**MUSC 430m Music and the Holocaust (4, FaSp)** Study of the creation and performance of Holocaust-related music from 1933 to the present, including interaction with other arts.

**MUSC 444 American Roots Music: History and Culture (4, Irregular)** The history, genre, styles, songs, lyrics, and influences of American vernacular music in the 20th century, including the background that spawned these musical genres.

**MUSC 450m The Music of Black Americans (4, FaSp)** The musical contribution of Africans and African Americans to American society. Musical genres and the relationship between music and society will be topics for examination.

**MUSC 455 Songwriting III: The Performing Songwriter (2)** Continuation of Songwriting I and II with emphasis on the development of performance skills of original popular music in preparation for songwriting showcases. (Duplicates credit in former MUCO 254.) *Prerequisite:* MUSC 355.

**MUSC 460 Film Music: History and Function from 1930 to the Present (4, Fa)** A survey of the art and craft of film music as practiced by outstanding composers in motion pictures.

**MUSC 465 Music, Television and American Culture (4, Sp)** An exploration of the social and cultural impact of music written for, popularized by, or exploited by American television from the 1950s through today.

**MUSC 470 Contemporary Popular Music: A Global Perspective (2, Sm)** Contemporary popular music in global culture; includes performance and collaboration opportunities with local musicians.

**MUSC 496 Careers in Music (2, Sp)** A study of the practical aspects of the music business, including the history, procedures, standard practices, economics and technologies employed by the music industry. Open to juniors and seniors only.

**MUSC 498x Internship in Music (1-4, max 8, FaSpSm)** Practical work experience in the student's field of study, at an off-campus location. Students are individually supervised by faculty. Open only to Bachelor of Music and Bachelor of Arts, Music majors only. Not available for graduate credit. Graded CR/NC.

**MUSC 499 Special Topics (2, 3, 4, max 8, FaSpSm)** Selected topics of current interest.

**MUSC 598 Internship in Music (1-4, max 4, FaSpSm)** Practical work experience in the student's field of study, at an off-campus location. Students are individually supervised by faculty. Open only to music majors. Graded CR/NC.

**MUSC 798 Internship in Music (1-4, max 4, FaSpSm)** Practical work experience in the student's field of study, at an off-campus location. Students are individually supervised by faculty. Open only to doctoral students in music. Graded CR/NC.

**MUSC 800 Studies for the Qualifying Examination in Music (0, FaSpSm)** Studies for the qualifying examination. Duplicates credit in GRSC 800. Graded Credit/No Credit. Open only to Doctor of Musical Arts students.

---

# USC School of Pharmacy

*Graduates of the USC School of Pharmacy — ranked tenth nationwide and first among private pharmacy programs by U.S. News & World Report — go on to careers in clinics, community pharmacies, hospitals, industry and government. Students begin clinical experiences early, receiving intensive, hands-on training in immunizations and health screening tests in the first three weeks of the program. The school offers a diverse and broad range of clinical experiences at over 300 sites.*

**F**ounded in 1905, the USC School of Pharmacy is the oldest and foremost pharmacy school in Southern California. The school is a national leader known for its progressive curriculum and research excellence. Approximately 50 percent of the practicing pharmacists in Southern California are graduates of USC. The school has an average student body of 739 full-time students in the Pharm.D. program, 220 students in Master of Science, Doctor of Philosophy and Doctor of Regulatory Science programs, a full-time faculty of 76 and more than 400 part-time and volunteer faculty.

The school occupies state-of-the-art facilities on the USC Health Sciences Campus in metropolitan Los Angeles, adjacent to the Los Angeles County+USC Medical Center (one of the largest teaching hospitals in the country), the USC Norris Cancer Hospital, the Doheny Eye Institute and the Keck Hospital of USC. USC pharmacy students receive clinical training at these facilities and many other affiliated hospitals, health care clinics, skilled nursing facilities, home health care agencies and pharmacies in the Southern California region. The school also owns and operates two campus pharmacies.

Recognized as one of the most innovative schools of pharmacy in the nation, the USC School of Pharmacy serves as a model for other progressive schools. In 1950, USC was the first to establish a Doctor of Pharmacy program. Additional national “firsts” that distinguish the school include: first clinical pharmacy program and first M.S. in radiopharmacy (both in 1968); first Pharm.D./MBA dual degree program (1988); first M.S. and Ph.D. programs in pharmaceutical economics and policy (1994) and first professional doctorate in regulatory science (2008). The Pharm.D. program is complemented by dual/joint degree options, including the Pharm.D./J.D., Pharm.D./Ph.D., Pharm.D./M.S. in regulatory science, Pharm.D./MPH and Pharm.D./M.S. in gerontology. The school also offers Ph.D. and M.S. degrees in pharmaceutical sciences, molecular pharmacology and toxicology, and pharmaceutical economics and policy. In regulatory science, the school offers an M.S. and a D.R.Sc.

Consistently the top-ranked private school of pharmacy, the school is second in the nation in funding from the National Institutes of Health. The School of Pharmacy is a member of the American Association of Colleges of Pharmacy, and the Pharm.D. program is accredited by the Accreditation Council for Pharmacy Education.

**Administration**

R. Pete Vanderveen, Ph.D., R.Ph., *Dean*

Sarah F. Hamm-Alvarez, Ph.D., *Vice Dean, Research and Graduate Affairs; Interim Chair, Department of Pharmacology and Pharmaceutical Sciences*

Kathleen A. Johnson, Pharm.D., MPH, Ph.D., *Vice Dean, Clinical Affairs and Outcome Sciences; Chair, Titus Family Department of Clinical Pharmacy and Pharmaceutical Economics & Policy*

Ronald L. Alkana, Pharm.D., Ph.D., *Associate Dean, Graduate Affairs and Interdisciplinary Graduate Programs*

Fred G. Weissman, Pharm.D., J.D., *Associate Dean, Student/Faculty Affairs and Admission*

Cynthia C. White, B.A., *Associate Dean, Administrative Affairs*

Michael Z. Wincor, Pharm.D., *Associate Dean, Global Initiatives and Technology*

Kathleen H. Besinque, Pharm.D., M.S.Ed., *Assistant Dean, Curriculum and Assessment*

**Faculty**

*John Stauffer Dean's Chair in Pharmaceutical Sciences:* R. Pete Vanderveen, Ph.D., R.Ph.

*University Professor and Boyd P. and Elsie D. Welin Professor in Pharmaceutical Sciences:* Jean Chen Shih, Ph.D.

*Distinguished Professor:* Walter Wolf, Ph.D.

*William A. Heeres and Josephine A. Heeres Endowed Chair in Community Pharmacy:* Kathleen A. Johnson, Pharm.D., MPH, Ph.D.

*Hygeia Centennial Chair in Clinical Pharmacy:* Steven Chen, Pharm.D.

*R. Pete Vanderveen Endowed Chair in Therapeutic Discovery and Development:* Roberta Diaz Brinton, Ph.D.

*John A. Biles Professor in Pharmaceutical Sciences:* Wei-Chiang Shen, Ph.D.

*Gavin S. Herbert Professor in Pharmaceutical Sciences:* Sarah F. Hamm-Alvarez, Ph.D.

*Charles Krown/Pharmacy Alumni Professor in Pharmaceutical Sciences:* Enrique Cadenas, M.D., Ph.D.

*Provost Professor of Cell and Neurobiology, Pharmacology and Pharmaceutical Sciences, and Psychology:* Pat Levitt, Ph.D.

*Provost Professor of Medicine and Pharmacy:* Michael Kahn, Ph.D.

*Professors:* Ronald L. Alkana, Pharm.D., Ph.D.; Enrique Cadenas, M.D., Ph.D.; Roberta Diaz-Brinton, Ph.D.; Dana Goldman, Ph.D.; Sarah F. Hamm-Alvarez, Ph.D.; Nouri Neamati, Ph.D.; Michael B. Nichol, Ph.D.; Wei-Chiang Shen, Ph.D.; Jean C. Shih, Ph.D.; Rajindar Sohal, Ph.D.; R. Pete Vanderveen, Ph.D.; Walter W. Wolf, Ph.D.

*Associate Professors:* James D. Adams, Jr., Ph.D.; Julio A. Camarero, Ph.D.; Jason N. Doctor, Ph.D.; Roger F. Duncan, Ph.D.; Ian S. Haworth, Ph.D.; Geoffrey Joyce, Ph.D.; Jeffrey S. McCombs, Ph.D.; Curtis T. Okamoto, Ph.D.; Neeraj Sood, Ph.D.; Clay C.C. Wang, Ph.D.

*Assistant Professors:* J. Andrew MacKay, Ph.D.; Bogdan Z. Olenyuk, Ph.D.; Bangyan Stiles, Ph.D.

*Lecturer:* Rebecca Romero, Ph.D.

*Research Professor:* Ian Hutchinson, Ph.D., D.Sc.

*Research Associate Professors:* Kevin J.Y.H. Shin Chen, Ph.D.; Liqun Zhao, Ph.D.; Julie Zissimopoulos, Ph.D.

*Research Assistant Professors:* Marco Bortolato, Ph.D.; Julianna Hwang, Pharm.D., Ph.D.; Jennica Krankel, Ph.D.

*Professors of Pharmacy:* Kathleen A. Johnson, Pharm.D., MPH, Ph.D.; Frances Richmond, Ph.D.; Glen L. Stimmel, Pharm.D.; Bradley R. Williams, Pharm.D.

*Associate Professors of Pharmacy:* Melvin F. Baron, Pharm.D., MPA; Paul M. Beringer, Pharm.D.; Kathleen H. Besinque, Pharm.D., M.S.Ed.; Steven Chen, Pharm.D.; Alfred Chin, Pharm.D.; Daryl L. Davies, Ph.D.; Julie A. Dopheide, Pharm.D.; Kevin L. Forrester, Pharm.D.; Jeffery Goad, Pharm.D., MPH; William C. Gong, Pharm.D.; Jack W. Kern, Pharm.D.; Cynthia L.L. Lieu, Pharm.D.; Stanley G. Louie, Pharm.D.; Gladys H. Mitani, Pharm.D.; Tien Ng, Pharm.D.; Kathleen Rodgers, Ph.D.; Irving Steinberg, Pharm.D.; Gregory A. Thompson, Pharm.D.; Fred G. Weissman, Pharm.D., J.D.;

Michael Z. Wincor, Pharm.D.; Annie Wong-Beringer, Pharm.D.; Frances S. Wong, Pharm.D.

*Assistant Professors of Pharmacy:* Betty Chan, Pharm.D.; Marc Cosep, Pharm.D.; Jennifer H. Cupo-Abbott, Pharm.D.; Shetal Desai, Pharm.D.; Melissa Durham, Pharm.D.; Emily Han, Pharm.D.; Kevin Kaneko, Pharm.D.; Jiwon Kim, Pharm.D.; Kum Ja K. Lee, Pharm.D.; May C. Mak, Pharm.D.; Edith Mirzaian, Pharm.D.; Susie Park, Pharm.D.; Paula Phongsamron, Pharm.D.; Florence H. Wong-Yu, Pharm.D.

*Distinguished Emeritus Professor and Dean:* John A. Biles, Ph.D.

*Emeritus Professor and Dean:* Timothy M. Chan, Ph.D.

*Emeritus Professor:* Eric J. Lien, Ph.D.

**Programs**

The School of Pharmacy offers curricula leading to the Doctor of Pharmacy (Pharm.D.) and Doctor of Regulatory Science (D.R.Sc.) degrees. Through the Graduate School, graduate degrees offered are: Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in pharmaceutical sciences, Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in molecular pharmacology and toxicology, Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in pharmaceutical economics and policy, Doctor of Philosophy (Ph.D.) in clinical and experimental therapeutics and Master of Science (M.S.) in regulatory science. Five dual degree programs, one joint program and numerous certificate programs are also offered: Pharm.D./J.D., Pharm.D./MBA, Pharm.D./MPH, Pharm.D./M.S. in regulatory science, Pharm.D./M.S. in gerontology, Pharm.D./Ph.D., Pharm.D./graduate certificate in gerontology, certificate in clinical research design and management, certificate in food safety, certificate in pre-clinical drug development, and certificate in patient and product safety.

The USC School of Pharmacy Doctor of Pharmacy is accredited by the Accreditation Council for Pharmacy Education, 20 North Clark Street, Suite 2500, Chicago, IL 60602, Phone: (312) 664-3575, FAX (312) 664-4652.

**Tuition and Fees (Estimated)**

Tuition for School of Pharmacy degree programs (Pharm.D.; M.S. and Ph.D. in pharmaceutical sciences; M.S. and Ph.D. in molecular pharmacology and toxicology; M.S. and Ph.D. in pharmaceutical economics and policy) is charged at the following rate (which differs from standard USC tuition): per semester (15-18 units) \$21,663; for less than 15 units and each unit above 18 units,

\$1,497 per unit. See the Tuition and Fees section, page 41, for fee information. These fees are based upon current information available at the time of publication and are subject to possible later change.

Doctor of Pharmacy students must pay a \$500 non-refundable acceptance deposit that is applicable toward tuition. For deposit information in other degree programs in the School of Pharmacy, please consult appropriate offices.

#### Honor Societies

##### *Rho Chi*

Theta chapter of Rho Chi, national honorary pharmaceutical society, was established at USC in 1925. Charters for chapters of this organization are granted only to student groups in those colleges that are members in good standing of the American Association of Colleges of Pharmacy. Eligibility for membership is based on high attainment in scholarship, character, personality and leadership.

All candidates selected for membership must have completed two years of college work, and they must be approved by the Dean of the School of Pharmacy.

##### *Phi Lambda Sigma*

The Phi Lambda Sigma chapter was established at USC in 1988. This national pharmacy leadership society is devoted to identifying, supporting and recognizing the contribution of pharmacy students to their colleges, their classmates, their campuses, their communities and to their chosen profession.

#### Student Housing and Service Facility, Health Sciences Campus

There are limited university-managed accommodations on the Health Sciences Campus. Students may wish to live in student housing on the University Park Campus, located about eight miles from the Health Sciences Campus.

The Blanche and Frank R. Seaver Student Residence, adjacent to the John Stauffer Pharmaceutical Sciences Center, provides dining facilities and a book store. For

residence information, phone (323) 442-1576; for bookstore information call (323) 442-2674.

#### Student Health Services, Health Sciences Campus

Services of the Student Health Center, covered by the mandatory student health fee, include the usual ambulatory care health services given by the faculty of the USC Department of Family Medicine and the Student Health Center nursing staff. Hours are from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding USC holidays. The Student Health Center is located in the USC Health Care Consultation Center, 1500 San Pablo Street, Suite 104, adjacent to the USC University Hospital, one block northeast of the School of Pharmacy. The telephone number is (323) 442-5980. In addition to the student health fee, all Pharm.D. students must have major medical insurance coverage from the USC Health Plan. A student may request a waiver of the USC Health Plan if covered by a personal medical plan acceptable to the Health Insurance Office.

## Professional Degrees

### Doctor of Pharmacy

A four-year curriculum, following appropriate college prerequisite work, leading to the Doctor of Pharmacy (Pharm.D.) is offered to students admitted to the School of Pharmacy. A sample outline of the curriculum is listed in the following pages. The degree will be conferred when the student has successfully completed all Doctor of Pharmacy degree requirements.

#### Application Procedure

The School of Pharmacy uses the Pharmacy College Application Service (PharmCAS) and a supplemental application for its admission process. Applications are available at [pharmacaschool.usc.edu](http://pharmacaschool.usc.edu). The PharmCAS and supplemental application deadline is November 1.

Applications are due November 1. Priority interview consideration is given when the PharmCAS and supplemental application are submitted and all necessary criteria have been met. Follow the instructions carefully for the PharmCAS application and the supplemental application for the USC School of Pharmacy. Both applications must

be received by the Office of Admission and Student Affairs before the evaluation process can begin.

All documents mailed directly to the School of Pharmacy and received from PharmCAS by the Office of Admission become the property of the university and cannot be returned or duplicated for other than university purposes.

#### Admission Guidelines

The Admission Committee considers several factors in making admissions decisions: strong academics; competitive performance in the interview; recommendation forms; and written comments specified in the application. The committee also considers a candidate's motivation to pursue pharmacy, strong interpersonal skills, excellent oral and written communication skills, and leadership abilities. While the School of Pharmacy gives equal consideration to every qualified applicant, the school cannot accommodate all qualified candidates who apply for admission.

#### Admission of International Students

Applicants for the School of Pharmacy's Doctor of Pharmacy (Pharm.D.) program holding international visas should contact the USC School of Pharmacy for information.

#### Entrance Requirements

Admission to the School of Pharmacy requires completion of a baccalaureate degree, completion of the prerequisite college courses, a minimum 3.0 (A = 4.0) cumulative grade point average and a minimum 3.0 grade point average in the prepharmacy prerequisites.

#### Prepharmacy Requirements

To be eligible for admission to the School of Pharmacy, students must take the required prerequisite college courses, including general chemistry, organic chemistry, general biology, physics, biochemistry, molecular biology or cell biology, microbiology, mammalian physiology, calculus, statistics, a social sciences course related to human behavior, and a course in microeconomics. These science requirements should be completed at

an accredited four-year university. All other requirements may be completed at a two-year college.

Grades of pass/no pass or credit/no credit will not be accepted (unless a course is only offered on a pass/no pass basis).

#### *Mathematics and Physical Sciences*

Courses must include calculus, statistics, general chemistry, organic chemistry and physics. Only courses for science majors are acceptable. It is highly recommended that math and science courses be completed during the regular academic year and not during a summer term.

Calculus: one semester or two quarters of calculus are required. The course should include differential and integral calculus for science majors. The recommended course at USC is MATH 125.

Statistics: One course in statistics (not business statistics) is required.

General chemistry: a one-year course for science majors, including laboratory, is required. The course should include inorganic chemistry and qualitative analysis. The recommended courses at USC are CHEM 105a**LbL**.

Organic chemistry: a one-year course for science majors, including laboratory, is required. If the school offers less than a one-year course, the student must complete the second semester at another institution. The recommended courses at USC are CHEM 322a**L**.

Physics: a one-semester (two quarters) course in physics for science majors with laboratory is required (inclusion of thermodynamics and electromagnetism is recommended). The recommended courses at USC are PHYS 135a**L** or PHYS 151L and PHYS 152L.

#### *Biological Sciences*

General biology: a one-year course (two semesters, three quarters) for science majors is required in general biology with laboratory (excluding courses in human anatomy, human physiology, botany and microbiology). If the school offers less than a one-year course, the student must complete the second semester at another institution. The recommended courses at USC are BISC 120L**x** and BISC 220L.

Microbiology: one course in fundamental microbiology for science majors is required. The recommended course at USC is BISC 300L. Lab is recommended.

Molecular or cell biology: one upper division course in molecular or cell biology for science majors is required. The recommended course at USC is BISC 320L or BISC 411.

Biochemistry: one upper division course in biochemistry for science majors is required. The recommended course at USC is BISC 330L.

Mammalian physiology: one course in mammalian physiology for science majors is required (human physiology is preferred; courses in plant physiology, cell physiology and marine physiology cannot be used to meet this requirement). The recommended course at USC is BISC 307L.

#### *Social and Behavioral Sciences*

One course in human behavior (psychology, sociology, cultural anthropology or related courses is required).

Economics: one course in microeconomics is required. If a one-year course is offered, both semesters may be taken and excess units may be applied to either the remainder of the unit requirements for the subject area or as elective units. The equivalent course at USC is ECON 203.

Students who have earned a baccalaureate degree and meet the prerequisites described above (including general psychology or introduction to sociology and microeconomics) at the time of admission will have fulfilled the requirement for social and behavioral sciences.

#### **Advanced Placement and International Baccalaureate Examinations**

Applicants can use AP and IB courses to meet USC School of Pharmacy prerequisites with the following provisos. AP prereqs are acceptable with scores of 4 or 5. IB results are acceptable with a score of 5. Science courses must include respective laboratory courses taken at the college/university level. AP/IB courses used to meet prerequisites will be for course credit only (i.e., they will not count toward the GPA). The Admission Committee recommends that applicants enroll in all of the required pre-pharmacy courses. Please contact the School of Pharmacy Office of Admission for specific information.

#### **Entrance Examination**

An in-person interview is required for admission. The PCAT is not required.

#### **Special Admission Program for Entering Freshmen and Current Undergraduates**

The Trojan Admission Prepharmacy (TAP) program provides admission to the USC School of Pharmacy's four-year Doctor of Pharmacy (Pharm.D.) program for USC undergraduates who meet preset performance standards. The TAP program is designed to

attract highly qualified, mature high school seniors applying to USC. A specific listing of USC courses and a recommended program for TAP participants can be obtained from the School of Pharmacy Office of Admission or online at [pharmacyschool.usc.edu/programs/preltap](http://pharmacyschool.usc.edu/programs/preltap).

#### *General Education Requirements (TAP Students Only)*

TAP students must meet the university's general education requirements; see pages 63 and 250 for details.

#### **Pharm.D. Curriculum Requirements**

The completion of a four-year professional curriculum is required to earn the Doctor of Pharmacy degree. The curriculum, except for the fourth year, is a "block" program. All students must enroll in 18 units each semester in courses designated for the fall or spring. Students do not have choices of courses to take nor are they permitted to drop any one course or courses during the semester. (Year III and IV students have elective course choices). Progress is permitted only when the prior semester is completed in full. Students should view the curriculum outlined here as advisory only and subject to modification. Aggregate hours must equal a minimum of 144 units to meet graduation requirements.

The pharmacist of tomorrow will provide preventive and therapeutic pharmaceutical care, provide drugs to patients, communicate in health care matters, meet the ethical and legal requirements of the practice of pharmacy and maintain professional expertise.

The curriculum committee of the School of Pharmacy has developed guidelines and patient care competencies consistent with interpretations of this new role. An appropriate and dynamic educational program is needed to develop these competencies, and curriculum changes are necessary and desirable in order to meet scientific advances, population profile changes, increasing health expectations, technological advances, the increasing role of the government in health services and other influences.

#### **Program of Courses**

YEAR I, FALL (18 UNITS)		UNITS
PHRD 501	Pharmaceutics I	4
PHRD 503	Biological Systems I	4
PHRD 507	Health Care Delivery Systems	2
PHRD 509	Pharmacy Practice and Experience I	4
PHRD 555	Biochemical and Molecular Sites of Drug Action	4

**YEAR I, SPRING (18 UNITS)**

		UNITS
PHRD 502	Pharmaceutics II	3
PHRD 504	Biological Systems II	6
PHRD 505	Molecular Genetics and Therapy	3
PHRD 510	Pharmacy Practice and Experience II	4
PHRD 554	Public Health and Epidemiology	2

**YEAR II, FALL (18 UNITS)**

		UNITS
PHRD 506	Self Care and Non-Prescription Therapies	5
PHRD 508	Pharmacy Literature Analysis and Drug Information, or	
PHRD 561	Parenteral Therapy Externship	3
PHRD 551	Immunology	3
PHRD 557	Therapeutics I: Introductory Principles	4
PHRD 559	Therapeutics II: Pharmacokinetics	3

**YEAR II, SPRING (18 UNITS)**

		UNITS
PHRD 552	Pharmaceutics III	3
PHRD 553	Management within Health Care Organizations	2
PHRD 560	Therapeutics III	6
PHRD 561	Parenteral Therapy Externship, or	
PHRD 508	Pharmacy Literature Analysis and Drug Information	3
PHRD 562	Therapeutics IV	4

**YEAR III, FALL (18 UNITS)**

		UNITS
PHRD 601	Therapeutics V	6
PHRD 603	Therapeutics VI	3
PHRD 605	Therapeutics VII	4
PHRD 607	Nutrition	2
Elective		3

**YEAR III, SPRING (18 UNITS)**

		UNITS
PHRD 606	Therapeutics VIII	2
PHRD 608	Therapeutics IX	2
PHRD 610	Therapeutics X	3
PHRD 612	Therapeutics XI	2
PHRD 614	Pharmaceutical Economics and Outcome Studies	3
PHRD 616	Pharmacy Law and Ethics	3
Elective		3

Year III students must choose their electives from the following (3 units each):

PHRD 651	Community Pharmacy I
PHRD 652	Community Pharmacy II
PHRD 653	Health Systems Pharmacy I
PHRD 654	Health Systems Pharmacy II
PHRD 655	Geriatric Pharmacy I
PHRD 656	Geriatric Pharmacy II
PHRD 657L	Basic Research Design
PHRD 658	Sleep and the Pharmacologic Management of Its Disorders
PHRD 659	Molecular Therapeutics: Signal Transduction

PHRD 660	Disease State Management I
PHRD 661	Pharmacy Practice in Women's Health
PHRD 662	Psychiatric Pharmacy Practice
PHRD 663	Pharmaceutical Development
PHRD 664	Clinical Problem Solving
PHRD 665	Complementary/Alternative Therapeutics
PHRD 666	Therapeutic Drug Monitoring
PHRD 667	Drugs of Abuse
PHRD 668	Computing Application
PHRD 669	Health Care Needs of Special Populations
PHRD 670	Marketing and Development in the Pharmaceutical Industry
PHRD 675	Travel Medicine
PHRD 677	Risk Assessment and Management in Pharmacy Practice

**YEAR IV, FALL (18 UNITS)**

Required Clerkships  
Elective Clerkships

**YEAR IV, SPRING (18 UNITS)**

Required Clerkships  
Elective Clerkships

**Required Clerkships (6 units each) — four rotations:**

PHRD 701	Acute Care Clinical APPE
PHRD 705	Community Pharmacy APPE
PHRD 704	Primary Care APPE, or
PHRD 718	Hospital Pharmacy Practice Clerkship

An inpatient practice elective must be satisfied by PHRD 702 if the student selects PHRD 707 Outpatient Psychiatric Pharmacy Clerkship. If the student selects PHRD 702, the student may take elective clerkships marked \* to satisfy the requirement.

**Elective Clerkships — two rotations (limit of one course that does not involve direct patient care):**

PHRD 702*	Inpatient Psychiatric Pharmacy Clerkship
PHRD 703	Long Term Care Clerkship
PHRD 706	Geriatrics Clerkship
PHRD 707	Outpatient Psychiatric Pharmacy Clerkship
PHRD 708*	Inpatient Clinical Practice Clerkship
PHRD 709*	Pediatric Drug Therapy Clerkship
PHRD 710*	Surgery Clerkship
PHRD 711*	Cardiovascular Drug Therapy Clerkship
PHRD 712*	Applied Clinical Pharmacokinetics Clerkship
PHRD 713*	Drug Information Clerkship

PHRD 714*	Radiopharmacy Clerkship
PHRD 715*	Oncology Clerkship
PHRD 716*	Ob-Gyn Clerkship
PHRD 717	Dermatology Clerkship
PHRD 719	Pain Management Clerkship
PHRD 720*	Critical Care Clerkship
PHRD 721*	Drug Utilization and Evaluation Clerkship
PHRD 722	Home Health Care Clerkship
PHRD 723*	Nutritional Support Clerkship
PHRD 724	Advanced Community Pharmacy Clerkship
PHRD 725*	International Pharmacy Clerkship
PHRD 726*	Directed Clinical Clerkship Project I
PHRD 727	Directed Clinical Clerkship Project II
PHRD 728	Directed Clinical Clerkship Project III
PHRD 729	Directed Clinical Clerkship Project IV
PHRD 730	Acute Care Geriatrics Clerkship
PHRD 731	Advanced Geriatrics Clerkship
PHRD 732*	Pharmacy Administration Clerkship
PHRD 733*	Anticoagulation Therapy Clerkship
PHRD 734*	Antimicrobial Therapy Clerkship
PHRD 735*	Clinical Pharmacy Research Clerkship
PHRD 736*	Chemical Dependency Clerkship
PHRD 737*	Clinical Transplantation Clerkship
PHRD 738*	Pharmaceutical Industry Clerkship
PHRD 739	AIDS/Immune Disorders Clerkship
PHRD 740*	Health Care Systems Administration Clerkship
PHRD 741	Advanced Primary Care Clerkship

\*Indicates course does not involve direct patient care.

Total for Pharm.D. degree: 144 semester units.

**Degree Requirements**

All students in the Doctor of Pharmacy degree program must meet course requirements, grade point average requirements and program residency requirements. All course requirements must be completed with a grade of "C" or better. The degree will not be conferred until the student has successfully completed all Doctor of Pharmacy degree requirements. Students are subject to the degree requirements in the *USC Catalogue* current for the semester of their admission into the Doctor of Pharmacy program.

Students must have a cumulative grade point average of 3.0 in the Pharm.D. curriculum to meet graduation requirements.

#### Registration

Details of the School of Pharmacy registration procedure will be included in the orientation program prior to the first week of classes.

#### Cancellation of Registration

During the first three years of the Doctor of Pharmacy program (Years I, II and III), a student will only be permitted to withdraw from all courses enrolled in a semester and may not selectively withdraw from a single course or group of courses. During the fourth year, students must contact the School of Pharmacy Office of Admission and Student

Affairs for withdrawal guidelines. Procedures for readmission into the program or make-up of incomplete courses and clerkships are included in the school's brochure on academic policies and procedures.

## Graduate Degrees

The School of Pharmacy, through the Graduate School, offers curricula leading to the M.S. and Ph.D. degrees in pharmaceutical sciences and in molecular pharmacology and toxicology as well as a Ph.D. in clinical and experimental therapeutics. The school also offers interdisciplinary M.S. degrees in regulatory science and in the management of drug development. The Ph.D. degree in pharmaceutical economics and policy is offered jointly with the Department of Economics. The M.S. degree in pharmaceutical economics and policy is offered jointly with the USC Price School of Public Policy and the Department of Economics. In addition, the school offers dual degrees with the schools of law, business and gerontology as well as other programs. Instructions given in the Admission section of this catalogue are to be followed, but the application and the supplemental information requested should first be submitted to: Graduate Programs Office, USC School of Pharmacy, 1985 Zonal Avenue, Los Angeles, CA 90033. Additional information may be obtained by calling (323) 442-1474 or sending email to pharmgrd@usc.edu.

#### Admission Requirements for the Master of Science and Doctor of Philosophy in Pharmaceutical Sciences

Applicants should possess a bachelor's degree or equivalent from an accredited college or university. A minimum grade point average of 3.0 and qualifying scores on the GRE in the verbal and quantitative tests are required. In addition to excellent communication skills, applicants should possess knowledge and competence equivalent to one year of acceptable course work in at least three of the following disciplines: mathematics, organic chemistry, physical chemistry, biochemistry, physiology and pharmacology. In addition to the application for admission, three letters of recommendation from faculty members who can evaluate the promise of the applicant for graduate study and a personal statement summarizing career objectives and research interests must be submitted.

Applicants who do not meet all the specific requirements indicated above, but who show unique potential, may be considered for admission with conditions which may be fulfilled during the first semester of enrollment. See the Graduate School section of this catalogue, page 97.

#### Admission Requirements for the Master of Science and Doctor of Philosophy in Molecular Pharmacology and Toxicology

Applicants should possess a bachelor's degree or equivalent from an accredited college or university. A minimum grade point average of 3.0 and qualifying scores on the GRE in verbal and quantitative tests are required. In addition to excellent communication skills, applicants should possess knowledge and competence equivalent to one year of work in at least three of the following disciplines: mathematics, organic chemistry, physical chemistry, biochemistry, molecular biology, cell biology, physiology, pharmacology, economics, statistics and computer sciences. In addition to the application for admission, the candidate must submit three letters of recommendation from faculty members who can evaluate the promise of the applicant for graduate study and a personal statement summarizing the candidate's career objectives and research interests. Students will be selected for admission on the basis of their academic and scientific record, and, whenever possible, interviews (in person or by phone) with one or more members of the faculty.

#### Admission Requirements for the Master of Science in Pharmaceutical Economics and Policy

Applicants for admission must have achieved a minimum 3.0 GPA in undergraduate or professional school and adequate scores on the GRE. In addition, applicants will be required to have completed upper division courses in statistical methods, calculus and microeconomics.

#### Admission Requirements for the Doctor of Philosophy in Clinical and Experimental Therapeutics

Applicants should possess a bachelor's degree in quantitative/biological sciences (or health profession) or an advanced health professional degree (i.e., Pharm.D., M.D., DDS) from an accredited college or university. A minimum grade point average of 3.0 and qualifying scores on the GRE in the verbal and quantitative tests are required. A student currently enrolled in the Pharm.D. program may pursue a Pharm.D./Ph.D. dual degree following the admission procedure in the Catalogue.

In addition to the application for admission, three letters of recommendation from faculty members who can evaluate the promise of the applicant for graduate study and a personal statement summarizing career objectives and research interests must be submitted.

Applicants who do not meet all the specific requirements indicated above, but who show unique potential, may be considered for admission with conditions, which may be fulfilled during the first semester of enrollment. See the Graduate School section, page 97, of this catalogue for further information.

#### Admission Requirements for the Doctor of Philosophy in Pharmaceutical Economics and Policy

Candidates with a bachelor's, master's or Pharm.D. degree are invited to apply. Applicants must have demonstrated proficiency in verbal and written English and aptitude in economics, mathematics, statistics and computer science. Deficiencies in economics and statistical background can be addressed through preliminary course work after admission to the program.

A minimum grade point average of at least 3.0 (A = 4.0) is required. Special attention is given to the grades achieved in economics, statistics and mathematics courses relevant to the program. A qualifying score on the GRE in verbal and quantitative areas is required. Students with GRE scores of 1200 or better will be given priority for financial aid support.

#### **Admission Requirements for the Master of Science in Regulatory Science**

Applicants should possess a bachelor's degree or equivalent from an accredited college or university. Applicants with graduate or professional degrees are encouraged to apply. A minimum grade point average of 3.0 or qualifying scores on the GRE or equivalent examination are required. The program encourages the participation of part-time students with work experience.

## Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Students should also refer to the Requirements for Graduation section, page 86 and the Graduate School section of this catalogue for general regulations, page 97. All courses applied toward the degrees must be courses accepted by the Graduate School.

#### **Master of Science in Pharmaceutical Sciences**

A Master of Science in the pharmaceutical sciences will be granted on the basis of completion of at least 24 units of formal course work and presentation of an acceptable thesis (PSCI 594ab, 4 units) based on the results of an original investigation.

#### **Master of Science in Molecular Pharmacology and Toxicology**

A Master of Science in molecular pharmacology and toxicology will be granted on the basis of completion of 32 units: 24 units of formal course work, MPTX 594ab (4 units over two semesters), MPTX 700 (4 units over four semesters) and a presentation of an acceptable thesis based on the results of an original investigation.

#### **Master of Science in Pharmaceutical Economics and Policy**

The Department of Pharmaceutical Economics and Policy (School of Pharmacy) offers a program of study leading to the M.S. degree. Applicants must apply to the Graduate School and meet the admissions requirements of the program. This program requires students to demonstrate skills in the analysis of pharmaceutical and health technology innovations, as well as an understanding of contemporary health policy issues.

Acceptance criteria for those individuals will be assessed on a case-by-case basis. English proficiency is essential. Students will be selected for admission, whenever possible, after interviews with one or more members of faculty.

#### **Admission Requirements for the Master of Science in Management of Drug Development**

Applicants should possess a bachelor's degree or equivalent from an accredited college or university. Applicants with graduate or professional degrees are encouraged to apply. A minimum grade point average of 3.0 or equivalent and qualifying scores on the GRE or equivalent examination are required.

The program encourages the participation of part-time students with work experience. Acceptance criteria for those individuals will be assessed on a case-by-case basis. English proficiency is essential.

#### **Admission of International Students to Graduate Degree Programs**

All requirements described in this section are also applicable to the admission of international students. In addition, special application and admission procedures are required of international students. Refer to the section on Admission of International Students in this catalogue.

A minimum of 36 units of graduate level courses is required.

#### *Grade Point Average*

A grade point average of at least 3.0 (A = 4.0) must be achieved on graduate course work at USC.

#### *Course Requirements*

The student is required to complete the following 36 units of graduate level course work: ECON 414 (4 units), ECON 500 (4 units) or PPD 501 (4 units), PM 511aL (4 units), PM 512 (4 units) or approved elective, PMEP 509 (4 units), PMEP 519 (4 units), PMEP 529 (4 units), PMEP 538 (4 units) and PMEP 539 (4 units).

Students must complete all requirements for the degree within five years of entry into the program.

#### *Additional Degree Requirements*

The student must satisfactorily complete the specified courses in economics, preventive medicine and public administration prior to enrolling in PMEP 538 or PMEP 539. The student is also required to complete an empirical research project on a topic relevant to pharmaceutical economics and policy.

#### **Master of Science in Regulatory Science**

Regulatory science relates the regulatory and legal requirements of biomedical product development to the scientific study needed to establish product safety and efficacy. A Master of Science degree in regulatory science will be granted upon completion of at least 30 units of formal course work and

6 units of research project work in an internship setting (MPTX 630). Students with experience in industry or government can substitute an equivalent amount of formal course work for the research project with the permission of the admissions committee. Course requirements normally include a minimum of three courses concerned with regulatory aspects of medical product development and a minimum of one course each in quality assurance, clinical research, business, statistics and law. Recommended course work includes some courses available in other departments of the university. Students should develop a specific plan of study in consultation with the graduate advisers before beginning the program.

#### **Master of Science in Management of Drug Development**

A Master of Science degree in the management of drug development will be granted upon completion of at least 32 units of course and research project work. The program is offered on both a full-time and part-time basis, and courses are also available in distance formats. Most students will take six units of directed research as part of this program. Students with appropriate industry or laboratory experience can substitute an equivalent amount of formal course work for the research project with the permission of the program director. Course requirements normally include a minimum of three courses concerned with translational aspects of medical product development. Recommended courses to satisfy this core requirement include RSCI 530, RSCI 531, RSCI 532, PSCI 664 or CXPT 609. The program must also include a minimum of one course in

each of: regulatory science, quality assurance, clinical research, business and statistics. Students should develop a specific plan of study in consultation with graduate advisers before beginning the program.

### Doctor of Regulatory Science

The Doctor of Regulatory Science program cultivates research, leadership and inquiry skills for advanced students in the emerging profession of global regulatory science. It is designed to produce graduates with expertise in strategic management, policy development and research assessment who can play leadership roles in the public sector, academia and the medical products industry. Participants in this program will take a set of interdependent courses that extend from a strong core of basic regulatory science course work and additionally focus on three main areas — global product strategy, product lifecycle strategy, and project and personnel management. After students have completed foundational course work, they will participate as a cohort that typically has a two-year cycle of classes and an additional year of dissertation research. The program has been designed to meet the needs of individuals who are already working full-time outside of the university. The doctoral degree will be administered by the School of Pharmacy.

### Admission

The program is designed for individuals with strong professional experience and demonstrated intellectual and leadership capabilities. Applicants are expected to have a GPA of 3.0 on university-level course work and five or more years of professional experience. Admission requirements include university transcripts, a resume, at least three letters of reference, and a one-page personal statement that outlines the background and goals of the applicant. Students are encouraged even at this early stage to identify areas in which they are interested in conducting research. Additional requirements for international students are outlined by university regulations under Admission of International Students, page 81. Students are not required to provide GRE scores unless indicated by the program director.

Students with an appropriate graduate or professional degree may use some previous graduate courses as transfer units toward the overall credit requirements of the Doctor of Regulatory Science program with the approval of the program director and under the normal rules of the university. Students who have graduated from the M.S. program in Regulatory Science can apply all of the previously taken course work toward the doctoral degree. Students with graduate degrees from outside of the regulatory science program are required to take a minimum of 32 units of course work and 4 units of dissertation

research to complete the requirements for graduation. The course work requirements will be determined on an individual basis in consultation with the program director and participant's advisers.

### Curriculum Requirements

The Doctor of Regulatory Science is administered by the School of Pharmacy. It requires participants to complete 64 units that include the following elements:

REQUIREMENTS	UNITS
Foundation courses	15
Product lifecycle strategy	8
Global strategy	8
Project/personnel management	8
Research methods	4
Dissertation	4

Additional elective course work will be selected in consultation with the program advisers according to the areas of intended specialization of the participant in order to meet the credit requirements of the program. Typically foundational courses and some electives will be taken in the first two years of the program. Advanced courses in product lifecycle strategy, global strategy and project/personnel management will normally be taken by the doctoral cohort of students during the third and fourth years of the program. Dissertation planning and research will typically commence in the third year of the program, and extend until the successful completion of the dissertation.

### Foundation Courses

Fifteen or more units of foundation courses may be taken as part of the master's program in regulatory science, or with prior approval, from another graduate program with similar objectives. Required foundational courses normally include: MPTX 511 Introduction to Medical Product Regulation; two from MPTX 512 Regulation of Pharmaceutical and Biological Products, MPTX 513 Regulation of Medical Devices and Diagnostics, MPTX 514 Regulation of Food and Dietary Supplements; MPTX 515 Quality Systems and Standards; MPTX 516 Medical Products and the Law; MPTX 517 Structure and Management of Clinical Trials. Other courses may be substituted after the participant's background preparation has been considered.

### Product Lifecycle Strategy

Eight or more units of course work related to product lifecycle management, from discovery to commercialization, will be drawn from a broad list of courses offered in regulatory science or through the Titus Family Department of Clinical Pharmacy and Pharmaceutical Economics and Policy. Included in this list are: PMEP 538 Pharmaceutical Economics; PMEP 539 Economic Assessment of Medical Care; RSCI 601 Biomedical Commerce. Other courses may

also be considered in consultation with the supervisors and program director. Students are also encouraged to take courses outside the School of Pharmacy when more specialized courses fit their professional research or development plans.

### Global Regulatory Strategy and Policy

Eight or more units of course work related to global regulatory strategy could include some of the following courses: MPTX 519 Global Regulation of Medical Products; PPD 571 International Public Policy and Management Seminar; RSCI 604 Regulatory Strategy in Asia; RSCI 608 Regulatory Strategy in Europe and the Americas.

### Project and Personnel Management

Eight or more units of relevant course work should typically include: MPTX 602 Science, Research and Ethics; RSCI 603 Managing Complex Projects; RSCI 605 Managing Organizations and Human Resources. Graduate courses in other university departments or schools can be substituted with the approval of the program director.

### Research Methods

Participants will typically take PMEP 509 Research Design or MPTX 522 Introduction to Clinical Design and Statistics.

### Student Progress and Assessments

In the third year, students are expected to identify a pair of advisers including one USC faculty member and one adviser from industry or the private sector. Students are typically placed in study groups of three or four whose dissertation interests are most similar and whose collective supervisors will oversee their academic and research progress. This committee will form the dissertation committee.

At the completion of the foundational course work, students will undergo a competency review that will include considerations of academic progress. Students are expected to maintain a GPA of 3.0 and will be required to pass a written examination designed to assure the professional competence of the student prior to advancing further in the program. Students who do not pass this preliminary review, administered prior to entering the dissertation and advanced course work phase of the program, will be notified of dismissal from the program in writing by the associate dean for graduate studies in the School of Pharmacy.

### Doctoral Dissertation

Students must enroll in RSCI 794 Doctoral Dissertation for at least two terms, during which time they will develop a dissertation proposal and conduct the necessary research and analysis in collaboration with the supervisory team. The dissertation committee

will approve the thesis plan and monitor its progress. Each student will be required to produce and defend an independent dissertation as a requirement for graduation. A maximum of 6 dissertation units can be applied to satisfy the degree requirement, but students should register for the dissertation units in each term subsequent to the completion of their course work requirements. Institutional Review Board approval is required for all human studies.

### **Doctor of Philosophy in Clinical and Experimental Therapeutics**

The goal of the Ph.D. program in Clinical and Experimental Therapeutics is to develop a scientist who is engaged in team science through interdisciplinary education; competent in conducting research across clinical and basic science disciplines; and integrates basic investigations and clinical observations in applied research to better understand disease process, advance drug development and evaluate efficacy and toxicity of therapeutic regimens with the goal of improving the safe, effective and economical use of therapeutic modalities by patients.

The program applies an interdisciplinary approach that focuses the graduate studies directly toward translational, rather than basic science, aiming to educate students with the perspective and skill set to identify important connections between fundamental biomedical research and human disease. This program emphasizes cross-training between clinical and basic sciences focusing on the investigation of disease processes, drug development and the efficacy and toxicity of therapeutic regimens. Course requirements and research opportunities for graduate students enrolled in the program provide both experimental (basic) and disease-focused experiences that complement the graduate's research focus.

#### *Course Requirements*

A minimum of 60 units is required. At least 26 of the 60 units are to be formal graduate course work at the 500-level or above, exclusive of seminars and directed research. Students must complete 14 units of course work before they are eligible for the screening procedure. Additional course work relevant to the research interests of the student may be required by the student's advisers or the student's guidance committee, with an emphasis on cross-training and taking into account the amount and level of previous scientific preparation and the nature of the research dissertation that will be the major endpoint of the program. Specifically, course work requirements differ between students who have an advanced professional degree

(Track I) and those who do not (Track II). A maximum of 12 units may be transferred from graduate studies elsewhere.

In the first year, all students (Tracks I and II) are required to take 14 units of course work in translational medicine (RSCI 530, 2 units), research design (PMEP 509, 4 units), biostatistics (PM 510L, 4 units), and clinical trial design (MPTX 517, 4 units). In the second year, Track I students will take the remaining 12 units of course work as electives based on the background of the student and the proposed research focus of the student. Track II students who do not have an advanced professional degree will need to select from the following courses as part of their electives: systems physiology and disease (INTD 572 and INTD 573, 4 units each) or pathology (INTD 550 and INTD 551, 4 units each). Other electives that can be chosen are INTD 531, INTD 561, PATH 580, PM 533, PM 538, PM 570, PSCI 661L and PSCI 665.

The remaining 34 of the 60 units required for the Ph.D. degree may be fulfilled with other courses including ethics, interdisciplinary seminar, directed research and dissertation. Note that to become eligible to take the qualifying exam, Track II students must fulfill the prescribed clinical experiences that match the disease-related topic of the student's thesis work as approved by the student's advisers and advisory committee. Students with a bachelor's degree in a health care subject area (e.g., nursing, pharmacy, medicine) will be evaluated on a case basis and may be required to meet the therapeutic course work or clinical experience component described above, as determined by their background and previous experiences.

#### *Foreign Language Requirement*

There is no formal language requirement. However, an individual guidance committee can require competency in a foreign language or a computer language if it is relevant for the student's area of research.

#### *Guidance Committee*

Upon admission, the student will be assigned to a member of the graduate faculty who will serve as his or her temporary adviser until a permanent adviser has been identified. The student's program of study will be under the direction of the guidance committee composed of at least five members, one of whom must be from outside the department. Because of the centrality of research in the Ph.D. program, the student is encouraged to get acquainted with the participating faculty mentors from the day they enter the program, and have selected a research direction, paired graduate advisers (clinical and basic scientists), and guidance committee no later than the third semester of study. The graduate affairs committee will serve as the guidance committee until one is selected.

#### *Screening Procedure*

The performance of each student will be evaluated no later than the end of the second semester of enrollment in the graduate program. This screening procedure is conducted by the student's guidance committee or, if a student has not yet selected a guidance committee, by the graduate affairs committee. The committee reviews the student's progress to date in various areas including course work, research interests, and laboratory performance on his or her research project or laboratory rotations. If a performance deficiency is determined, specific goals will be established that the student must fulfill to continue in the program. Passing this screening procedure is prerequisite to continuation in the Ph.D. program.

#### *Qualifying Examination*

Students will be required to pass a comprehensive written and oral examination on the chosen disease-focused area of research emphasis. The examination will encompass basic scientific concepts relevant to the disease under study and the laboratory techniques in that discipline, fundamental principles of clinical research and design, biostatistics, and therapeutics in the chosen disease-focused area of research. The examination is administered by the guidance committee and consists of two parts: a written examination administered to all students at the end of their second year of study and a detailed written proposal and its oral presentation and defense by the student to the guidance committee. The examination process is conducted by the student's advisory committee with oversight by the graduate affairs committee. All course and qualifying examination requirements for the Doctor of Philosophy must be completed within two-and-a-half years after admission. After passing these examinations, the student is admitted to candidacy for the Ph.D. degree.

#### *Dissertation*

A dissertation based on original investigation in a relevant scientific area is required for the Ph.D. The dissertation research must represent a significant contribution to science and should demonstrate the candidate's scholarly advancement and competence to undertake independent research. An oral defense of the dissertation will be held after the candidate submits the final draft of the dissertation to the dissertation committee. (See Theses and Dissertations in the Graduate School section, page 100.)

#### *Student Teaching*

Teaching experience is considered an integral part of the training of graduate students. As part of the general requirements for the Ph.D. degree, each student is required to participate in the teaching program of the School of Pharmacy.

### **Doctor of Philosophy in Pharmaceutical Sciences**

This program emphasizes basic as well as applied research in drug delivery and targeting, utilizing medicinal chemistry, computational chemistry, pharmaceuticals, pharmacodynamics, molecular pharmacology, immunology and cell biology.

A minimum of 60 units is required for the Doctor of Philosophy degree. At least 24 units of course work are required at the 500-level or above, exclusive of seminar and directed research. The guidance committee may require more than 24 units of course work. A minimum of 12 units is to be taken in courses in the Department of Pharmaceutical Sciences and a minimum of 8 units must be taken in various related disciplines outside the department. The remaining 36 units may be fulfilled with other courses, directed research and dissertation.

#### *Foreign Language Requirement*

There is no formal foreign language requirement. However, an individual guidance committee can require competency in a foreign language or some other research tool such as computer language, if this is relevant for the student's area of research.

#### *Guidance Committee*

Upon admission, the student will be assigned to a member of the graduate faculty who will serve as his or her temporary adviser until a permanent adviser has been identified. The student's program of study will be under the direction of a guidance committee composed of at least five members, one of whom must be from outside the department granting the degree. The student should select a graduate adviser and guidance committee no later than the third semester in residence.

#### *Screening Procedure*

The performance of each student will be evaluated no later than the end of the second semester of enrollment in the graduate program. This screening procedure is conducted by the student's guidance committee or, if a student has not selected his or her research adviser at that time, by the Graduate Review Committee of the department. The committee reviews thoroughly the student's progress up to that point in various areas including course work, research interests and laboratory performance on his or her research project or laboratory rotations. If a performance deficiency is detected at that point by the committee, the student will be recommended to either take additional course work or transfer to the Master of Science program. Passing this screening procedure is prerequisite to continuation in the Ph.D. program.

#### *Qualifying Examination*

Students will be required to pass a comprehensive qualifying examination in major areas of the pharmaceutical sciences. The examination is administered by the guidance committee and consists of two parts: a written examination and a written proposition outlining a research project, followed by an oral examination based on the proposition and questions dealing with the written examination.

All course and qualifying examination requirements for the Doctor of Philosophy must be completed within two and one half years after admission.

#### *Dissertation*

A dissertation based on original investigation is required. The research should make a contribution to science and should demonstrate the candidate's scholarly advancement and competence to undertake independent research. An oral defense of the dissertation will be held after the candidate submits the final draft of the dissertation to the dissertation committee (see Theses and Dissertations, page 100).

#### *Student Teaching*

Teaching experience is considered an integral part of the training of graduate students. Thus, as part of the general requirements for the Ph.D., each student is required to participate in the teaching program of the School of Pharmacy.

### **Doctor of Philosophy in Molecular Pharmacology and Toxicology**

This program emphasizes basic as well as applied research in various aspects of drug discovery and molecular and behavioral mechanisms of action. Research opportunities span investigations of fundamental molecular and cellular physiological mechanisms, including receptor activity, intracellular signaling and the regulation of gene expression, to the molecular bases of disease and aging, including avenues of pharmacological intervention.

A minimum of 60 units is required. At least 24 units of course work are required at the 500-level or above, exclusive of seminars and directed research. The guidance committee may require more than 24 units of course work in some cases. The specific requirements will depend on the student's background and research area and will be determined by the student's adviser and advisory committee. A minimum of 12 units is to be taken in appropriate courses offered by the School of Pharmacy. The remaining 36 units may be fulfilled with other courses, directed research and dissertation. A maximum of 12 units can be transferred from graduate studies elsewhere.

#### *Foreign Language Requirement*

There is no formal language requirement. However, an individual guidance committee can require competency in a foreign language or a computer language if it is relevant for the student's area of research.

#### *Guidance Committee*

Upon admission, the student will be assigned to a member of the graduate faculty who will serve as his or her temporary adviser until a permanent adviser has been identified. The student's program of study will be under the direction of a guidance committee composed of at least five members, one of whom must be from outside the department. The student should select a graduate adviser and guidance committee no later than the third semester in residence. The graduate affairs committee will serve as the guidance committee until one is selected.

#### *Screening Procedure*

The performance of each student will be evaluated no later than the end of the second semester of enrollment in the graduate program. This screening procedure is conducted by the student's guidance committee or, if a student has not yet selected a guidance committee, by the graduate affairs committee. The committee reviews the student's progress to date in various areas including course work, research interests and laboratory performance on his or her research project or laboratory rotations. If a performance deficiency is determined, specific goals will be established that the student must fulfill to continue in the program. Passing this screening procedure is prerequisite to continuation in the Ph.D. program.

#### *Qualifying Examination*

Students will be required to pass a comprehensive qualifying examination in major areas of molecular pharmacology, including fundamental principals of molecular and cellular biology. The examination is administered by the guidance committee and consists of two parts: a written examination administered to all students at the end of their second year of study and a written proposal outlining the dissertation goals, and its oral presentation and defense by the student to the guidance committee. The examination process is conducted by the student's advisory committee with oversight by the graduate affairs committee. The qualifying examination must be completed within three years after admission, unless an extension is obtained from the guidance committee.

#### *Annual Research Appraisal (ARA)*

Beginning in the third year, each graduate student will meet with the guidance committee and present a progress report on his or her research. Prior to the meeting the student will present a short written document describing significant experiments during the

past year, problems and projected studies. This document is distributed to the committee members and is included in the student's file. The oral ARA meeting is intended to be a working session between the student and the guidance committee. Experimental results and problems are discussed in this context, as well as a research plan for the next year of work. A satisfactory ARA is required for each year in the graduate program.

#### *Dissertation*

A dissertation based on original investigation in a relevant scientific area is required for the Ph.D. The dissertation research should demonstrate the student's ability to undertake independent research through planning, conducting and evaluating experiments. The dissertation research must represent a significant contribution to knowledge. A public oral defense of the dissertation will be held after the candidate submits the final draft of the dissertation to the dissertation committee, and it is approved by the graduate adviser and dissertation committee. For additional details, see *Theses and Dissertations*, page 100.

#### *Student Teaching*

Teaching experience is considered an integral part of the training of graduate students. As part of the general requirements for the Ph.D. degree, each student is required to participate in the teaching program of the School of Pharmacy.

#### **Doctor of Philosophy in Pharmaceutical Economics and Policy**

The Department of Pharmaceutical Economics and Policy (School of Pharmacy) offers a program of study leading to the Ph.D. degree. This program focuses on economic assessment of pharmaceuticals and medical technology and research in the finance and delivery of pharmaceuticals and pharmacy services. A minimum of 64 units of graduate level courses numbered 500 or higher (excluding 794) and a minimum of four units of 794 is required.

#### *Foreign Language Requirement*

There is no formal foreign language requirement. However, competence in the use of one computer programming language is required for the graduate degrees. Such competence can be demonstrated either by course work or examination.

#### *Grade Point Average*

A grade point average of at least 3.0 (A = 4.0) must have been achieved on graduate course work at USC. ECON 615 or a higher level course in econometrics must be completed with a grade of B or higher.

#### *Unit Requirements and Recommended Courses*

Students are required to complete a minimum of 64 units of graduate level course work. The following courses are recommended towards fulfilling the 64-unit requirement: ECON 401, ECON 500, ECON 511, ECON 513, ECON 514, ECON 615, PM 511a, PMEP 509, PMEP 519, PMEP 529, PMEP 538, PMEP 539, PMEP 549 and PMEP 698. Students may transfer and substitute up to 24 units of graduate course work from other universities to fulfill the required 64 units of graduate credit subject to the approval of the department.

#### *Guidance Committee*

The student will be assigned to a member of the graduate faculty who will serve as his or her temporary adviser until the formation of a guidance committee. The student should consult the pharmaceutical economics and policy director of graduate studies on the appointment of a Ph.D. guidance committee after taking the written qualifying examination. The chairman of the student's Ph.D. guidance committee advises the student on matters of curriculum and graduate opportunities. The guidance committee comprises three to five members, at least one of whom must be from outside the department; at least two members must specialize in the student's area of emphasis; and at least three of the members must be suitable for service on the student's dissertation committee. The composition of all Ph.D. guidance committees must be approved by the pharmaceutical economics and policy director of graduate studies. The student must form his or her guidance committee within one month after passing the departmental screening procedure.

#### *Screening Procedure*

The student's progress will be reviewed after each semester and before registration for any additional course work to determine if progress has been satisfactory.

#### *Seminar Requirements*

Every student is required to take and satisfactorily complete 8 units of research seminars chosen from PMEP 698 or the equivalent. At least one of these seminars must be related to the student's major field and the same seminar may be taken more than once. Before completing the dissertation, the student must present at least one original research paper in a seminar of his or her choice. This paper should typically consist of original results contained in the student's dissertation. It becomes part of the student's permanent file.

#### *Dissertation Proposal Preparation*

The student is required to register for two units of PMEP 790 and write a research paper on a topic suitable for a dissertation. Typically, the chair of the student's guidance committee directs this work. The resulting

essay becomes part of the student's written dissertation proposal which is presented and critiqued during the oral portion of the qualifying examination.

#### *Qualifying Examination*

Upon successful completion of the first two years of course and grade requirements, the student takes a general written and oral examination on the chosen area of research emphasis after presenting a detailed written dissertation proposal. After passing these examinations, the student is admitted to candidacy for the Ph.D. degree.

#### *Dissertation*

After admission to candidacy, the student forms a dissertation committee comprising three faculty members, one of whom must be from an outside department. The chair of this committee is the dissertation supervisor. The student must register for PMEP 794 each semester, excluding summer sessions, until the dissertation and all other degree requirements are completed.

The student is expected to complete a dissertation based on original investigation. The dissertation must represent a significant contribution to knowledge and must be defended in an oral examination administered by the dissertation committee (see the section on *Theses and Dissertations*, page 100).

#### *Student Teaching*

Teaching experience is considered an integral part of the training of graduate students. As part of the general requirements for the Ph.D., all students are required to undergo training as an educator. This will include participating in seminars on educational techniques and hands-on teaching experiences through participation in didactic and small group teaching in the School of Pharmacy.

#### **Pharm.D./Juris Doctor**

##### *Admission Requirements*

Admission to the dual Pharm.D./J.D. program is competitive, and involves meeting admission requirements and gaining acceptance to both the School of Pharmacy and the USC Gould School of Law. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students who have a baccalaureate degree may apply to the dual Pharm.D./J.D. degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both schools. Students who elect this approach must identify themselves on their Pharm.D. applications as potential dual Pharm.D./J.D. degree students. Students who are admitted to both schools will be offered admission to the dual degree contingent on passing all courses in

their first year of the Pharm.D. with a minimum 3.0 GPA. Students pursuing the dual Pharm.D./J.D. degree must notify the law school in a timely fashion that they will be enrolling in the dual Pharm.D./J.D. degree program and will not matriculate at the law school until the following year. Students who are accepted by only one school may choose to attend that school but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the Gould School of Law during their first year of enrollment in the Pharm.D. program prior to the law school's published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students who are admitted to the law school using this approach would be offered admission to the dual degree contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA. See the admissions section of the School of Pharmacy and the Gould School of Law for specific requirements.

#### *Degree Requirements*

The professions of pharmacy and law are distinctly different, yet pharmacists are often involved in legal issues and lawyers frequently deal with pharmacy, drug, health care, product development and toxin-related matters. This dual degree program provides qualified students with an efficient mechanism for obtaining the expertise and professional credentials that will enable them to develop professional practices that bring together expertise in both areas.

#### *Overall Requirements*

A student is required to complete all work for both degrees within six years of the date of matriculation at the School of Pharmacy (Pharm.D.) and five years of matriculation at the Gould School of Law (J.D.). The entire dual degree program will take six years to complete. Dual degree students will be allowed to use 12 units of approved J.D. course work (elective or required) to meet 12 units of Pharm.D. electives and 12 units of approved Pharm.D. course work (elective or required) to meet J.D. electives. A faculty guidance committee will determine the exact program for each student, including the appropriateness of courses in one program used to meet elective requirements for the other program. A total of 208 units are required for the dual degree.

#### *Pharm.D. Requirements*

Dual degree students must successfully complete 144 units of Pharm.D. and acceptable J.D. units to receive the Pharm.D. degree. The 144 units must include 132 units of required and elective pharmacy course work plus 12 units of J.D. course work deemed acceptable to meet Pharm.D. elective requirements. Dual degree students should graduate

with their Pharm.D. degrees at the completion of the first semester of the sixth academic year of the dual degree program. Students will be eligible to sit for the Pharmacy Board Exams after completion of the Pharm.D. degree requirements. However, dual degree students will not actually be awarded their Pharm.D. degrees until they complete requirements for both degrees.

#### *Juris Doctor Requirements*

Dual degree students must successfully complete 88 units of J.D. and acceptable Pharm.D. course work during the second to sixth years of the dual degree program to receive the J.D. degree. The 88 units must be composed of 76 units of J.D. course work, including satisfaction of the upper-division writing requirement and any other substantive requirements, plus 12 units of Pharm.D. course work deemed acceptable to meet J.D. elective requirements. No J.D. credit will be awarded for Pharm.D. course work completed prior to matriculation in the law school. Students cannot receive the J.D. degree under requirements for the dual degree program without prior or simultaneous completion of the Pharm.D. degree.

Both professions require passing a state board or bar exam to practice the respective professions. Neither of these professional doctoral degrees requires a thesis or comprehensive final exam.

#### *Recommended Program*

Pharm.D./J.D. dual degree students will begin with the first year of the Pharm.D. curriculum (36 units). During the second year, students will take the first year law core (33 units), plus 3-5 Pharm.D. units. Due to the rigor of the law school core, pharmacy courses during the first year of law school are limited to non-science courses. The third through fifth years of the program focus on Pharm.D. courses with sufficient law courses to maintain students' educational momentum in law. Students should complete their Pharm.D. requirements during the fall of their sixth year of the program and their law course work also during the sixth year. Students must complete both degree requirements by the end of the sixth year of the program.

#### **Pharm.D./MBA Dual Degree Program**

Responding to the growing demand on pharmacists to be knowledgeable in both science and business administration, the USC School of Pharmacy in 1988 helped pioneer an innovation in pharmaceutical education by offering this unique five-year dual degree program.

The Pharm.D./MBA dual degree program is offered cooperatively by the School of Pharmacy and the USC Marshall School of Business. Students must complete

concurrently all requirements established by both schools for their respective degrees.

The program involves completion of the first year in the School of Pharmacy, the second in the Marshall School of Business, and then completion of the balance of both degrees during the third through fifth years. A total of 48 units must be completed in the Marshall School of Business.

*First Year:* Required Pharmacy School courses.

*Second Year:* Required MBA courses and graduate business electives.

*Third to Fifth Years:* 108 units of Pharmacy courses and graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students may not count courses taken outside the Marshall School of Business toward the 48 units.

The Pharm.D. and the MBA are awarded simultaneously upon completion of the School of Pharmacy and the Marshall School of Business requirements.

#### *Admission Requirements*

Applicants to this program must have a baccalaureate degree from an accredited college or university and should apply during their first year of pharmacy studies. Only students who have successfully completed one year in the School of Pharmacy will be considered for admission to the Marshall School of Business. See the Marshall School of Business, page 154, for admission requirements.

#### **Pharm.D./M.S., Gerontology**

The emerging impact of the elderly on the health care system has created a need for health care providers who understand the unique health-related needs of the elderly. As drug therapy remains the primary therapeutic option for chronic disease, the demand for prescription drugs will continue to rise. There is a demand for pharmacists who are equipped to meet the pharmaceutical care needs of this population. Geriatric pharmacy is becoming increasingly recognized as a specialty. Pharmacists with expertise in gerontology and geriatrics are in an excellent position to play a leading role in health policy and direct patient care. The Pharm.D./M.S., Gerontology program will provide extensive education and training in the unique health care needs of older adults. It will allow student pharmacists with a career interest in geriatrics or gerontology to work with health care planning or delivery organizations to develop and implement progressive pharmaceutical care programs for the elderly.

*Application and Admission Requirements*

Students who would like to pursue the dual Pharm.D./M.S. degree must be accepted by both programs. Students applying for the dual degree program must meet the respective admission requirements for each program. This includes having completed a baccalaureate degree from an accredited college or university with a minimum GPA of 3.0 and a minimum GRE score of 1000. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual Pharm.D./M.S. degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both programs. Students who elect this approach must identify themselves on both applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the Pharm.D. and will be offered admission to the dual degree program contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA. Students who are accepted only by one program may choose to attend that program, but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the M.S. program during their first year of enrollment in the Pharm.D. prior to the M.S. published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students admitted to the M.S. program using this approach will be offered admission to the dual degree contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA. Students accepted to the dual degree program must maintain a minimum 3.0 GPA in their Gerontology and Pharm.D. courses.

*Recommended Program*

*First year:* Required Year I Pharm.D. course work

*Second year:* Required Gerontology course work

*Third year:* Required Year II Pharm.D. course work

*Fourth year:* Required Year III Pharm.D. course work

*Fifth year:* Required Year IV Pharm.D. course work

*Graduation Requirements*

Students must complete all requirements for the Pharm.D. (see page 847) and M.S., Gerontology degrees as listed in the current catalogue with a minimum cumulative 3.0 GPA. The specific M.S. course requirements for the dual Pharm.D./M.S. degree are listed on page 706.

**Pharm.D./Master of Public Health**

The School of Pharmacy and the Master of Public Health program, in recognition of the rapidly changing health care environment, and in response to the growing demand for pharmacists who are knowledgeable in both pharmacy and population-based health care issues, have developed a dual degree program. The joint Pharm.D./MPH degree will enable graduates to be more responsive to today's health care needs and will provide training for pharmacists who seek to be agents of change within the profession and to assume leadership roles in the pharmacy field and in public health at the local, state and national levels.

Students who are enrolled in the School of Pharmacy must apply to the Master of Public Health program no later than January of their first year. All requirements for admission to the regular MPH program must also be fulfilled by dual degree applicants.

The Pharm.D./MPH program spans five years (four years of pharmacy school courses and one year of public health courses). Students begin the core MPH courses following the successful completion of the first year of pharmacy school. The last three years of the program are devoted to course work and the clinical rotations of the School of Pharmacy and to the completion of the elective courses and practicum (field experience) of the MPH program.

All students in the Pharm.D./MPH program must meet course requirements, grade point average requirements and program residency requirements of both programs. Students must have a cumulative GPA of 3.0 in the Pharm.D. curriculum and a 3.0 in the MPH curriculum to meet graduation requirements.

The Pharm.D. and the MPH degrees are awarded simultaneously upon completion of the School of Pharmacy and the Master of Public Health requirements.

*Admission Requirements and Procedures*

Students applying for the dual degree program must meet the respective admission requirements for each program. This includes having completed a baccalaureate degree from an accredited college or university with a minimum GPA of 3.0 and having acceptable GRE and TOEFL scores as applicable. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual Pharm.D./MPH degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both programs. Students who elect this approach must identify themselves on both

applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the Pharm.D. and will be offered admission to the dual degree program contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA. Students who are accepted by only one program may choose to attend that program, but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the MPH program during their first year of enrollment in the Pharm.D. prior to the MPH published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students admitted to the MPH program using this approach will be offered admission to the dual degree contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA.

**Pharm.D./M.S., Regulatory Science**

Regulatory science is that branch of knowledge which relates the regulatory and legal requirements of biomedical product development to the scientific testing and oversight needed to ensure product safety and efficacy. The program provides an opportunity for advanced preparation in the fields of regulatory affairs, quality assurance and clinical research. Students must complete concurrently all of the requirements established for the respective degrees. The program alternates the courses required for the Pharm.D. program during the fall and spring terms with courses required in summer terms for the M.S. program. Students will typically take courses in the summers of years two-four. Up to 12 appropriate units of course work from the Pharm.D. program can be applied toward the M.S. degree. The Pharm.D. and the M.S., Regulatory Science degrees will be awarded simultaneously upon completion of requirements for the two programs.

*Admission Requirements and Procedures*

Students applying for the dual degree program must meet the respective admission requirements for each program and must have a baccalaureate degree. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual Pharm.D./M.S., Regulatory Science degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both programs. Students who elect this approach must identify themselves on both applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the Pharm.D. and will be offered admission to the dual degree program contingent on passing all courses in their first

year of the Pharm.D. with a minimum 3.0 GPA. Students who are accepted by only one program may choose to attend that program but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the M.S. in Regulatory Science program during their first or second year of enrollment in the Pharm.D. prior to the M.S. in Regulatory Science published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students admitted to the M.S. in Regulatory Science using this approach will be offered admission to the dual degree contingent on passing all courses in their Pharm.D. studies with a minimum 3.0 GPA.

#### **Pharm.D./Doctor of Philosophy**

The Doctor of Pharmacy/Doctor of Philosophy (Pharm.D./Ph.D.) program is designed to permit qualified Pharm.D. students with a bachelor of science or equivalent degree to pursue research training in the pharmaceutical sciences and toxicology. A student accepted into the joint program must meet all requirements for the Pharm.D., as well as the requirements for the Ph.D. in the pharmaceutical sciences or toxicology sections listed in this catalogue. A maximum of 20 units from the Pharm.D. program may be credited toward the Ph.D. Up to 12 units of these Pharm.D. courses may, at the discretion of the student's Ph.D. adviser, be counted toward the required 24 units of core course work.

#### *Admission Procedure*

Students applying for the dual degree program must meet the respective admission requirements for each program. This includes having completed a baccalaureate degree from an accredited college or university with

a minimum GPA of 3.0 and a minimum GRE score of 1000. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual Pharm.D./Ph.D. degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both programs. Students who elect this approach must identify themselves on both applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the dual degree program contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA. Students who are accepted by only one program may choose to attend that program but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to one of the Ph.D. programs in the School of Pharmacy during their first two years of enrollment in the Pharm.D. prior to the respective published application deadlines for the Ph.D. programs. Students who elect this approach must apply through the Pharm.D. program. Students admitted to the Ph.D. program using this approach will be offered admission to the dual degree contingent on their having maintained a minimum 3.0 GPA in the Pharm.D. program.

#### **Post-Pharm.D. Graduate Studies**

Qualified students who wish to continue graduate studies within the School of Pharmacy upon completion of the Pharm.D. may, with permission of the dean, substitute certain Pharm.D. courses with courses necessary for the graduate degree so that the graduate program will not be delayed. These

units cannot, however, be substituted for the 24 units of core course work.

#### **Pharm.D./Graduate Certificate in Gerontology**

This integrated program in pharmacy and gerontology prepares students with an interest in geriatric pharmacy to assume leadership roles at academic, administrative or policy levels within the profession. The program involves the completion of 16 units of core area courses in physiology, psychology, sociology and social policy aspects of aging offered by the USC Davis School of Gerontology. In addition, students are required to complete 8 units of approved elective courses in gerontology or geriatric pharmacy to be credited toward the requirements for the Pharm.D. and the Graduate Certificate in Gerontology. It is expected that the program can be successfully completed by candidates taking electives in geriatric pharmacy or gerontology during the regular semester and completing one core course in gerontology during each summer in the four year Pharm.D. program.

See the Davis School of Gerontology, page 705, for complete requirements.

#### *Admission Requirements*

Students who have a baccalaureate degree from an accredited college or university must submit separate applications to the School of Pharmacy and the Davis School of Gerontology. All requirements for admission to the regular Pharm.D. program must be fulfilled by the candidate. GRE scores are not required for admission to the certificate program.

## Certificate Programs

**Regulatory Science Program**  
USC School of Pharmacy  
1540 Alcazar St., CHP G32  
Los Angeles, CA 90089

#### **Certificate in Clinical Research Design and Management**

The graduate certificate in clinical research design and management is designed to strengthen the statistical, research and project management skills of clinical researchers and their associated clinical team members.

Students must complete at least 12 units of course work including at least two courses in clinical design and trial management, one course in ethics and one course in a specialized aspect of design, management or statistics, subject to the approval of the program director. The program will include course work delivered in nontraditional formats such as intensive weekend sessions and will use distance learning tools, Webcast lectures and study materials. Courses can be taken on site, by distance or as a blended combination.

Students should confirm their specific course work plan in consultation with the graduate advisers before beginning the program. Students who have bachelor's degrees from accredited colleges or universities must submit an application for graduate study through the regulatory science program of the School of Pharmacy. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed.

REQUIREMENTS	UNITS	REQUIREMENTS	UNITS	REQUIREMENTS	UNITS
<i>Introduction to Clinical Trials</i>					
MPTX 517	4	MPTX 514	3	MPTX 602	2
Structure and Management of Clinical Trials		Regulation of Food and Dietary Supplements		Science, Research and Ethics	
<i>Clinical Design/Statistics (choose one)</i>

Risk Management for Health Care Products		RSCI 529	2	Application of Risk Management Tools and Techniques	
PM 510L	4	<b>Certificate in Patient and Product Safety</b>			
Principles of Biostatistics		The graduate certificate in patient and product safety is a 12-unit program that educates students in the emerging field of safety and risk management in the health care environment. It is designed to produce graduates who have a particular expertise in the evaluation and mitigation of medical errors and health-care product problems. Course work is typically delivered in nontraditional formats such as intensive weekend sessions and will use distance learning tools, Webcast lectures and study materials. Courses can be taken on site, by distance or as a blended combination. Students should confirm their specific course work plan in consultation with the graduate advisers before beginning the program. Students who have bachelor's degrees from accredited colleges or universities must submit an application for graduate study through the regulatory science program of the School of Pharmacy. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed.			
PM 511a	4	Students must complete 12 units of specified course work, that normally will include an introductory course in the basic principles of risk management, a second course in the use of risk management tools, and two additional courses in patient and product safety respectively as listed below. In addition, a course in medical ethics is recommended. Most students will take the courses that are listed in the sample student program below, but if students have already strong previous experience in risk management or safety, other statistical or quality courses taught in graduate programs at USC may be substituted with the permission of the program director. The certificate can be completed on a part-time basis but must be finished within five years.

RSCI 528	3				
Safety in the Health Care Environment					

### Certificate in Food Safety

The graduate certificate in food safety is a 12-unit program of course work designed to strengthen the knowledge base and functional "toolkit" of individuals who deal with the production and management of food in industry and government. Students are required to take an entry level course that focuses on regulatory requirements for foods and dietary supplements and two additional courses that focus on food science and food/drug toxicology respectively. Final course work will be selected from a small grouping of electives that deal with quality systems or risk management. The program will include course work delivered in nontraditional formats, such as intensive weekend sessions, and will use distance learning tools, Webcast lectures and study materials. Courses can be taken on site, by distance or as a blended combination. Students should confirm their specific course work plan in consultation with the graduate advisers before beginning the program. Students who have bachelor's degrees from accredited colleges or universities must submit an application for graduate study through the regulatory science program of the School of Pharmacy. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed.

### Certificate in Preclinical Drug Development

The graduate certificate in preclinical drug development provides advanced foundational training in preclinical aspects of drug development, translational research and regulatory control. Students must complete at least 12 units of course work including at least three courses in preclinical design and development (typically, RSCI 530 Translational Medicine: An Overview; RSCI 531 Drug Discovery; RSCI 532 Early Stage Drug Development) and one course in a related aspect of research design, regulation or ethics, subject to the approval of the program director. The program will include course work delivered in nontraditional formats such as intensive weekend sessions and will use distance capabilities, Webcast lectures and study materials. Courses can be taken on site, by distance or as a blended combination. Students should confirm their specific course work plan in consultation with graduate advisers before beginning the program. Students who have baccalaureate degrees from accredited colleges or universities must submit an application for graduate study through the regulatory science program of the School of Pharmacy. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed.

### Certificate in Regulatory and Clinical Affairs

The graduate certificate in regulatory and clinical affairs is designed to provide specialized education for individuals interested in developing a systematic understanding of the U.S. regulatory system for medical products. Students must complete at least 12 units of course work including an introductory course in regulatory affairs:

REQUIREMENTS	UNITS
<i>One introductory course in regulatory affairs</i>	
MPTX 511	3
Introduction to Medical Product Regulation	
RSCI 530	2
Translational Medicine: An Overview	
RSCI 532	3
Early Stage Drug Development	

*At least one specialized course in regulatory management of a particular product type*

MPTX 512	Regulation of Pharmaceutical and Biological Products	3
MPTX 513	Regulation of Medical Devices and Diagnostics	3
MPTX 514	Regulation of Food and Dietary Supplements	3

*at least one course in clinical design*

MPTX 517	Structure and Management of Clinical Trials, or	4
MPTX 522	Introduction to Clinical Trial Design and Statistics	4

*one course in quality systems or risk management*

MPTX 515	Quality Systems and Standards	3
MPTX 526	Chemistry Manufacturing and Controls	3
MPTX 520	Risk Management for Health Care Products	3
RSCI 525	Introduction to Drug and Food Toxicology	3

Other courses may be substituted with the approval of the program director. The program will include course work delivered in nontraditional formats such as intensive weekend sessions and will use distance capabilities to capture and Webcast lectures and study materials. Courses can be taken on

site, by distance or as a blended combination. Students should confirm their specific course work plan in consultation with the graduate advisers before beginning the program. Students who have a baccalaureate degree from an accredited college or university must submit an application for graduate study through the regulatory science program of the School of Pharmacy. This program is particularly directed at Ph.D. students who wish to take the certificate during their USC studies. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed.

## Non-Degree Programs

Office of Continuing Professional Development  
1985 Zonal Avenue  
Los Angeles, CA 90089-9121

### Continuing Education

The School of Pharmacy, Office of Continuing Professional Development, is a recognized provider of continuing pharmacy education and certificate programs accredited by the Accreditation Council for Pharmacy Education (ACPE) and recognized by the California State Board of Pharmacy and throughout the United States.

The school serves as a primary educational resource for pharmacists in California and as a supplementary resource for other health professionals and pharmacists, nationally and internationally.

Programs are designed to educate pharmacists about current issues in pharmaceutical care, practice management, therapeutics and other topics of professional interest. Continuing education programs are held at the School of Pharmacy, other campus locations, and annually in Las Vegas and Hawaii.

For information concerning continuing education programs contact: Office of Continuing Professional Development.

## Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

### CLINICAL AND EXPERIMENTAL THERAPEUTICS (CXPT)

**CXPT 609 Preclinical Experimental Therapeutic Development (4, FaSpSm)** Evolution of a chemical entity as it is transformed into a drug candidate. Open only to students in clinical and experimental therapeutics and management of drug development.

**CXPT 664 Clinical Problem Solving (3, Sp)** (Enroll in PHRD 664)

### MOLECULAR PHARMACOLOGY AND TOXICOLOGY (MPTX)

**MPTX 500 Molecular Pharmacology and Toxicology I (4, Fa)** This is the first part of a two-semester introductory and survey course for the molecular pharmacology and toxicology degree program. *Prerequisite:* knowledge of biochemistry.

**MPTX 501 Molecular Pharmacology and Toxicology II (4, Sp)** The second part of the two-semester course covers the general aspects of molecular pharmacology and toxicology on the basis of biochemical, molecular, biological and environmental approaches. *Prerequisite:* MPTX 500.

**MPTX 502 Pharmacology (4, Fa)** Fundamentals of pharmacology in the context of the rapidly developing knowledge of related disciplines.

**MPTX 511 Introduction to Medical Product Regulation (3, Sm)** Introduction to regulatory environments surrounding medical product development, manufacturing and marketing; operation of federal, state and international regulatory bodies. *Recommended preparation:* undergraduate degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

**MPTX 512 Regulation of Pharmaceutical and Biological Products (3, Sm)** Ensuring safety and effectiveness of new drugs and biologics; marketing and monitoring approved pharmaceutical/biological products; management of genetically engineered products. *Recommended preparation:* undergraduate degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

**MPTX 513 Regulation of Medical Devices and Diagnostics (3, Sm)** Development and testing of new medical products according to U.S. and international regulatory requirements. *Recommended preparation:* undergraduate degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

**MPTX 514 Regulation of Food and Dietary Supplements (3, Sm)** Regulation and testing of foods, food additives and dietary supplements in the U.S. and abroad. *Recommended preparation:* undergraduate degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

**MPTX 515 Quality Systems and Standards (3, Sm)** Principles of quality assurance and quality control for medical-product development and manufacture. *Recommended preparation:* undergraduate degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

**MPTX 516 Medical Products and the Law (3, Fa)** Legal issues affecting intellectual property, medical product development, marketing and safety, taught through case studies and lectures. *Recommended preparation:* undergraduate degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

**MPTX 517 Structure and Management of Clinical Trials (4, FaSpSm)** Development and execution of clinical trials: bioethical principles, good clinical practices, project management and documentation.

**MPTX 518 Writing Regulatory Drug Submissions (3, Sp)** Developing form and content for investigational drug applications, new drug applications, biologic licensing applications to FDA; common technical documents; considerations of writing style.

**MPTX 519 Global Regulation of Medical Products (3, Fa)** Regulatory requirements governing medical products in European Union, Asia and other global markets.

**MPTX 520 Risk Management for Health Care Products (3, Sp)** Risk assessment and management techniques, including FMEA, HACCP, HAZAP, human factors analysis; policies, regulations, requirements and standards; loss control and liability prevention.

**MPTX 522 Introduction to Clinical Trial Design and Statistics (3)** Clinical designs and statistics commonly used to test medical products in general populations and special patient groups.

**MPTX 524 Introduction to Food Science and Technology (3, Sm)** Discusses the basic and applied concepts of food science and food safety, and demonstrates the principles of food chemistry, sensory evaluation, and product development. *Recommended preparation:* undergraduate degree in biological sciences or related disciplines.

**MPTX 526 Chemistry Manufacturing and Controls (3, Fa)** Provides a firm foundation in the domestic and international CMC process, from concept to commercialization of new active pharmaceutical ingredients and products. *Recommended preparation:* undergraduate degree in pharmacy, medicine or independent health science, engineering or equivalent.

**MPTX 531 Cell Biology (4)** (Enroll in INTD 531)

**MPTX 561 Molecular Genetics (4, Sp)** (Enroll in INTD 561)

**MPTX 571 Biochemistry (4, Sp)** (Enroll in INTD 571)

**MPTX 572 Systems Physiology and Disease I (4, Fa)** (Enroll in INTD 572)

**MPTX 573 Systems Physiology and Disease II (4, Sp)** (Enroll in INTD 573)

**MPTX 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MPTX 594abz Master's Thesis (2-2-0, FaSpSm)** Credit on acceptance of thesis. Graded IP/CR/NC.

**MPTX 599 Special Topics (2-4, max 8)** Special topics in Molecular Pharmacology and Toxicology.

**MPTX 602 Science, Research and Ethics (2, Fa)** A discussion of the unique technological and philosophical issues that challenge modern scientists and a discernment of ethical responses to those challenges.

**MPTX 603 Molecular Mechanisms for Biological Signals (4, Fa)** Biological mechanisms of hormone, neuro-transmitter, growth factor and xenobiotic actions from ligand-receptor interactions, signal transductions, modification processes to regulation of gene expression and cellular growth. *Prerequisite:* knowledge of physiology and biochemistry.

**MPTX 630 Directed Field-Research Project (6, FaSpSm)** Research/policy analysis conducted under preceptor supervision in an industrial or governmental setting. Open to students who have completed the majority of course credits in the Regulatory Science program. Graded CR/NC.

**MPTX 700 Seminar in Molecular Pharmacology and Toxicology (1, max 8, FaSp)** Contemporary advances in molecular pharmacology and toxicology research. Registration required during each year of residency.

**MPTX 790 Research (1-12, FaSpSm)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MPTX 794abcdz Doctoral Dissertation (2-2-2-0, FaSpSm)** Credit on acceptance of dissertation. Graded IP/CR/NC.

## PHARMACY (PHRD)

**PHRD 501 Pharmaceutics I (4, Fa)** Introduction to physiochemical principles of dosage forms; properties of molecules in dosage forms, stability of pharmaceuticals and their interactions in body tissue, including computational approaches. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 303.)

**PHRD 502 Pharmaceutics II (3, Sp)** Principles involved in molecules movement across biological barriers. Properties, characteristics, application of homogeneous and heterogeneous dosage forms, liquid, semi-solid and solid. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 306L.)

**PHRD 503 Biological Systems I (4, Fa)** Integrated teaching of anatomy, histology, physiology and pathophysiology using an organ-based approach. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 309, PHAR 313, PHAR 314 and PHAR 419.)

**PHRD 504 Biological Systems II (6, Sp)**

Continued integrated teaching of anatomy, histology, physiology and pathophysiology, using an organ-based approach. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 310 and PHAR 419.)

**PHRD 505 Molecular Genetics and Therapy (3, Fa)**

Principles of gene expression, and recombinant DNA methods and applications. Focus on human genetics and influence of genetic background on the utilization and effectiveness of drugs. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 316.)

**PHRD 506 Self Care and Non-Prescription Therapies (5, Fa)**

Facilitate patient selection of self-care health care products: OTC drugs, dosages, pharmacology, efficacy, cost, side effects, adverse reactions, contraindications, and interactions with other medications. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 331 and PHAR 332.)

**PHRD 507 Health Care Delivery Systems (2, Fa)**

Introduction to understanding the structure of the health care system. Includes health care financing and the role of pharmacy and the pharmacist in health systems.

**PHRD 508 Pharmacy Literature Analysis and Drug Information (3, FaSp)**

Literature evaluation and biostatistics of clinical and health services research, and drug information services. Emphasis on drug therapy, patient outcomes, and formulary development. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 319 and PHAR 366.)

**PHRD 509 Pharmacy Practice and Experience I (4, Fa)**

Introduction of principles and the application of pharmaceutical care in community or hospital pharmacy setting. Includes communications, basic practice skills, career pathways and leadership. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 361, PHAR 363, PHAR 365 and PHAR 450.)

**PHRD 510 Pharmacy Practice and Experience II (4, Sp)**

Introduction of principles and the application of pharmaceutical care in community or hospital pharmacy setting. Includes calculations, drug information, and basic practice skills. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 362, PHAR 368 and PHAR 450.)

**PHRD 551 Immunology (3, Fa)** Basic principles of immunology and their application to the understanding and treatment of immunologically-mediated diseases. Provides the scientific basis of immunotherapy and immunodiagnosis. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 441.)

**PHRD 552 Pharmaceutics III (3, Sp)** Principles and applications of controlled, targeted, and self-regulating drug delivery. Methods to deliver therapeutic peptides, proteins and genetic materials. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 406.)

**PHRD 553 Management within Health Care Organizations (2, Fa)**

Management of the professional practice of pharmacy in organized health care systems. Introduction to formulary development and outcome analysis. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 431 and PHAR 432.)

**PHRD 554 Public Health and Epidemiology (2, Sp)**

Introduction to epidemiology, environmental health, health education, health care organizations and financing. Orientation to social and governmental controls on the health care system. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 437.)

**PHRD 555 Biochemical and Molecular Sites of Drug Action (4, Fa)**

Basic principles of drug action and receptor actions. Includes their application to the understanding and treatment of disease. Provides the scientific basis of pharmaceutical action.

**PHRD 557 Therapeutics I: Introductory Principles (4, Fa)**

Integrated teaching of the principles of pharmacology, biomedical chemistry, pharmacogenomics and clinical therapeutics. Open to Doctor of Pharmacy students only.

**PHRD 559 Therapeutics II: Pharmacokinetics (3, Fa)**

Integrated teaching of basic and clinical pharmacokinetic/pharmacodynamic concepts. Open to Doctor of Pharmacy students only.

**PHRD 560 Therapeutics III (6, Sp)**

Integrated teaching of biomedical chemistry, pharmacology, clinical pharmacokinetics, and therapeutics of drugs, with emphasis on pharmaceuticals treating diseases associated with the central nervous system. Open to Doctor of Pharmacy students only.

**PHRD 561 Parenteral Therapy Externship (3, FaSpSm)**

Drug weight/volume concentrations, dilutions and additive volumes are calculated in compounding of parenteral products in various patient-care settings using aseptic technique. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 414, PHAR 460 and PHAR 545.)

**PHRD 562 Therapeutics IV (4, Sp)**

Integrated teaching of biomedical chemistry, pharmacology, clinical pharmacokinetics, and therapeutics of drugs with an emphasis on treating diseases of the renal, GI and pulmonary systems. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 548 and PHAR 549.)

**PHRD 601 Therapeutics V (6, Fa)**

Integrated teaching of biomedical chemistry, pharmacology, clinical pharmacokinetics, and therapeutics of drugs, with emphasis on pharmaceuticals affecting cardiovascular and circulatory diseases. CPR certification. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 546.)

**PHRD 603 Therapeutics VI (3, Fa)**

Integrated teaching of biomedical chemistry, pharmacology, clinical pharmacokinetics and therapeutics of drugs with an emphasis on pharmaceuticals affecting the endocrine diseases, systems and women's health. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 548 and PHAR 549.)

**PHRD 605 Therapeutics VII (4, Fa)**

Integrated teaching of the biomedical chemistry, pharmacology, clinical pharmacokinetics, and therapeutics of drugs; with emphasis on chemotherapy of infectious disease: bacterial, microbial, viral, parasitic, and fungal. (Duplicates credit in former PHAR 411L, PHAR 418.)

**PHRD 606 Therapeutics VIII (2, Sp)**

Advanced topics and clinical therapeutics of drugs, with emphasis on the treatment of infectious disease: bacterial, microbial, viral, parasitic and fungal. (Duplicates credit in former PHAR 411L, PHAR 418.)

**PHRD 607 Nutrition (2, Fa)**

Biomedical knowledge is correlated with assessments of clinical case-management problems to understand the interrelationship between nutrition and health in both hospitalized and healthy patients. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 422.)

**PHRD 608 Therapeutics IX (2, Sp)** Integrated teaching of biomedical chemistry, pharmacology, clinical pharmacokinetics and therapeutics of drugs, with emphasis on pharmaceuticals for managing oncological diseases. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 550 and PHAR 562.)

**PHRD 610 Therapeutics X (3, Sp)** Focuses on the pharmacology, pharmacokinetics, medicinal chemistry and clinical therapeutics that apply to pharmaceutical care of pediatric, geriatric and chronic pain patients.

**PHRD 612 Therapeutics XI (2, Sp)** Updates students on recent advances in clinical areas, prepares students for advanced practice experiences and assessment of clinical readiness via a final examination. Graded CR/NC.

**PHRD 614 Pharmaceutical Economics and Outcome Studies (3, Sp)** Economic analysis of the U.S. health care system, the pharmaceutical industry, and the profession; economic assessment of drug therapy costs and health care outcomes applying pharmacoeconomic research methodologies. Open to Doctor of Pharmacy students only. (Duplicates credit in PHAR 406 and PHAR 553.)

**PHRD 616 Pharmacy, Law and Ethics (3, Sp)** To provide students with an understanding of ethical issues that arise in pharmacy practice along with state and federal statutes, regulations, and pharmacy-related cases. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 552 and PHAR 554.)

**PHRD 651 Community Pharmacy I (3, Fa)** Development of specialized knowledge and skills in community pharmacy practice involving location analysis, pharmacy management principles, and introduction to business law concepts. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 541 and PHAR 555.)

**PHRD 652 Community Pharmacy II (3, Sp)** A continuation of pharmacy business law concepts encompassing contract principles and forms of ownership, including a review of pharmacy laws, compounding principles, and OTC agents. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 556.) *Prerequisite:* PHRD 651.

**PHRD 653 Health Systems Pharmacy I (3, Fa)** Understanding formal and informal organizations in institutions, managed care, disease management, health care policy and financing, patients' chart organization, and clinical monitoring parameters. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 541 and PHAR 557.)

**PHRD 654 Health Systems Pharmacy II (3, Sp)** Recognizing resources available for drug information, familiarity with institutional formularies, medication counseling, writing chart notes, and clinical activities at an off-campus health care institution. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 558.) *Prerequisite:* PHRD 557.

**PHRD 655 Geriatric Pharmacy I (3, Fa)** Specialized knowledge and skills in geriatric pharmacy, pharmacology of aging, and unique functions of health care team providing care to the elderly patient. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 559.)

**PHRD 656 Geriatric Pharmacy II (3, Sp)** Specialized knowledge and skills in gerontology and geriatric pharmacy including the pathophysiology of selected cardiovascular, endocrine, genitourinary gastrointestinal disorders, osteoarthritis, and osteoporosis. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 560.) *Prerequisite:* PHRD 559.

**PHRD 657L Basic Research Design (3, max 6, FaSp)** Research experience to integrate research into Doctor of Pharmacy program. Research focuses on industrial, academic, or governmental issues. Open to Doctor of Pharmacy students only.

**PHRD 658 Sleep and the Pharmacologic Management of Its Disorders (3, FaSp)** Overview of normal sleep manifestations, and treatment of common sleep disorders, and the pharmacist's role in assessment, treatment, and referral. Open to Level III Doctor of Pharmacy students only. (Duplicates credit in former PHAR 570.)

**PHRD 659 Molecular Therapeutics: Signal Transduction (3, FaSp)** Principles of molecular therapeutics against signaling pathways; emphasis on biological mechanisms underlying hormone, growth factor, and neurotransmitter-mediated gene regulation, proliferation, and cell death. Open to Level III Pharm.D. students only. (Duplicates credit in former PHAR 573.)

**PHRD 660 Disease State Management I (3, FaSp)** The processes required to develop disease state management protocols based on data drawn from the medical research literature. Open to Level III Doctor of Pharmacy students only. (Duplicates credit in former PHAR 571.)

**PHRD 661 Pharmacy Practice in Women's Health (3, FaSp)** The pharmaceutical care of women patients is emphasized. Therapeutic, psychosocial factors and current research in women's health. Open to Level III Pharm.D. students only. (Duplicates credit in former PHAR 577.)

**PHRD 662 Psychiatric Pharmacy Practice (3, Sp)** Specialized knowledge and skills in psychiatric pharmacy practice including child, adult, and geriatric psychopharmacology applied to inpatient and outpatient treatment. Open to Level III Pharm.D. students only. (Duplicates credit in former PHAR 578.)

**PHRD 663 Pharmaceutical Development (3, FaSp)** Examination of pharmaceutical product development process including discovery, preclinical/clinical studies, regulatory-legal issues, and marketing. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 566.)

**PHRD 664 Clinical Problem Solving (3, Sp)** Integration of physical assessment, laboratory tests, history-taking, and diagnosis to formulate decisions for optimal treatment plans in specific disease states. Open to graduate pharmacy students only.

**PHRD 665 Complementary/Alternative Therapeutics (3, FaSp)** Examines the therapeutic use of complementary/alternative medicines, such as herbal medicines, homeopathic drugs, vitamins and other nutritional supplements. Open to Level III Pharm.D. students only. (Duplicates credit in former PHAR 579.)

**PHRD 666 Therapeutic Drug Monitoring (3, FaSp)** Application of pharmacokinetic and pharmacodynamic principles to individualize patient drug regimens. Open to Level III Pharm.D. students only. (Duplicates credit in former PHAR 575.)

**PHRD 667 Drugs of Abuse (3, FaSp)** Specialized knowledge and skills in specific substance abuse-related areas. Each area will include addiction, wellness, and prevention components. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 568.)

**PHRD 668 Computing Application (3, FaSp)** Specialized knowledge and skills using computers in professional practice: telecommunication protocols, typical patient databases in hospital and community pharmacies, drug interactions, insurance billing, inventory control. Open to Doctor of Pharmacy students only. (Duplicates credit in former PHAR 568.)

**PHRD 669 Health Care Needs of Special Populations (3, FaSp)** Health care needs of the poor will be examined through participation in a multidisciplinary community clinic setting focusing on medication counseling and compliance. Open to Level III Pharm.D. students only. (Duplicates credit in former PHAR 576.)

**PHRD 670 Marketing and Development in the Pharmaceutical Industry (3, FaSp)** Basic and advanced strategies for marketing and development of new compounds or indication in the pharmaceutical industry. *Recommended preparation:* PHRD 663.

**PHRD 671 Pharmacy Education Seminar (3, FaSp)** A seminar course with a focus on educational methods and teaching skills providing career development for students interested in academia. Open to Doctor of Pharmacy students only.

**PHRD 675 Travel Medicine (3, FaSp)** An elective course for emphasizing the role of the pharmacist in preventing and treating travel related medical conditions. Open only to pharmacy majors.

**PHRD 677 Risk Assessment and Management in Pharmacy Practice (3, FaSp)** Specific risk management issues, legal and professional expectations of pharmacists, and assessing and avoiding risk. Open only to Doctor of Pharmacy students.

**PHRD 701 Acute Care Clinical APPE (6, FaSpSm)** Application of pharmaceutical care principles to the adult patient population in an acute care environment. Pharmacology, pharmacokinetics, and disease state management will be emphasized. Open to Doctor of Pharmacy students only. Graded CR/NC.

**PHRD 702 Inpatient Psychiatric Pharmacy Clerkship (6, FaSpSm)** Application of pharmaceutical care principles to the inpatient psychiatric patient. Understanding of the treatment of common psychiatric disorders, patient interviewing skills and health care teams. Open to Level IV Doctor of Pharmacy students only.

**PHRD 703 Long Term Care Clerkship (6, FaSpSm)** Application of pharmaceutical care to patients in long term care environments. Understanding of the therapeutic, legal and special needs of this patient population. Open to Level IV Doctor of Pharmacy students only.

**PHRD 704 Primary Care APPE (6)** Disease state management and a primary care setting. Modification and design of drug therapy regimens and primary patient care using a team based approach. Open to Doctor of Pharmacy students only. Graded CR/NC.

**PHRD 705 Community Pharmacy APPE (6, FaSpSm)** Pharmaceutical care principles applied to the community pharmacy environment. Participating in the development, implementation and outcome evaluation of patient care services in the community. Open to Level IV Doctor of Pharmacy students only. Graded CR/NC.

**PHRD 706 Geriatrics Clerkship (6, FaSpSm)** Drug therapy and management of geriatric patients with a focus on unique medical, economic, and psycho-social problems of this population. Open to Level IV Doctor of Pharmacy students only.

**PHRD 707 Outpatient Psychiatric Pharmacy Clerkship (6, FaSpSm)** Disease state management and pharmaceutical care in ambulatory mental health care. Modification and design of psychiatric therapy regimens, participation in multidisciplinary teams and patient care. Open to Level IV Doctor of Pharmacy students only.

**PHRD 708 Inpatient Clinical Practice Clerkship (6, FaSpSm)** Drug therapy in a variety of inpatient clinical settings. Emphasis: patient monitoring, evaluation of therapeutic response, and provision of drug information.

**PHRD 709 Pediatric Drug Therapy Clerkship (4-6, FaSpSm)** Clinical therapeutic and pharmacokinetic concepts applied to the pediatric patient. Unique aspects of pediatric clinical pharmacology emphasized in treating a variety of organ system diseases.

**PHRD 710 Surgery Clerkship (6, FaSpSm)** Drug therapy in clinical situations common to surgical patients. The use of drugs and monitoring for response to treatment in surgical settings. Open to Level IV Doctor of Pharmacy students only.

**PHRD 711 Cardiovascular Drug Therapy Clerkship (6, FaSpSm)** Pharmaceutical care applied to cardiac patients. The use of cardiac drugs with an emphasis on physiologic response, pharmacokinetic principles and desired treatment outcomes. Open to Level IV Doctor of Pharmacy students only.

**PHRD 712 Applied Clinical Pharmacokinetics Clerkship (6, FaSpSm)** Practical experience in applying pharmacokinetic principles to patients in the health care system. A variety of disease states and therapeutic agents will be reviewed. Open to Level IV Doctor of Pharmacy students only.

**PHRD 713 Drug Information Clerkship (6, FaSpSm)** Practical experience and training in the use of information resources and technology to improve patient care. Experience in information retrieval, literature evaluation, problem solving skills and communication skills emphasized. Open to Level IV Doctor of Pharmacy students only.

**PHRD 714 Radiopharmacy Clerkship (6, FaSpSm)** Provides practical and theoretical aspects of radiopharmacy services delivery. Open only to Pharm.D. students.

**PHRD 715 Oncology Clerkship (6, FaSpSm)** Directed experiences in the use and monitoring of oncological drugs. Open only to Pharm.D. students.

**PHRD 716 Ob-Gyn Clerkship (6, FaSpSm)** Provides experiences in disease states common to this area and the drug therapy management employed. Open only to Pharm.D. students.

**PHRD 717 Dermatology Clerkship (6, FaSpSm)** Provides experiences in disease states common to this area and the drug therapy management employed.

**PHRD 718 Hospital Pharmacy Practice Clerkship (6, FaSpSm)** Practical experience and training in the practice of hospital pharmacy. Administrative, practice-based and therapeutic competencies emphasized. Open to Level IV Doctor of Pharmacy students only.

**PHRD 719 Pain Management Clerkship (6, FaSpSm)** Pharmaceutical care principles applied to patients requiring treatment in pain management. Pharmacology, patient counseling and management emphasized. Open to Level IV Doctor of Pharmacy students only.

**PHRD 720 Critical Care Clerkship (6, FaSpSm)** Drug therapy in a critical care setting. Emphasizes therapeutic management in critically ill patients, often with multisystem failure.

**PHRD 721 Drug Utilization and Evaluation Clerkship (6, FaSpSm)** Practical experience and training in the design, implementation and evaluation instruments (DUE/MUE) to measure the appropriate use of therapeutic agents and the evaluation of desired therapeutic outcomes. Open to Level IV Doctor of Pharmacy students only.

**PHRD 722 Home Health Care Clerkship (6, FaSpSm)** Practical experience in the provision of comprehensive home intravenous and nutritional support services, including fluid and electrolyte therapy, chemotherapy, antibiotics, pain control and nutrition support. Open to Level IV Doctor of Pharmacy students only.

**PHRD 723 Nutritional Support Clerkship (6, FaSpSm)** Experiential training in the pharmacy specialty of nutritional support. Activities include: patient evaluation, developing treatment plans, formula composition and design, integration with nutritional support team and consult services. Open to Level IV Doctor of Pharmacy students only.

**PHRD 724 Advanced Community Pharmacy Clerkship (6, FaSpSm)** Directed project in community pharmacy.

**PHRD 725 International Pharmacy Clerkship (6, FaSpSm)** Practical experience and training in the practice of pharmacy in the international setting. Students will visit an international pharmacy practice setting and complete a project. Open to Level IV Doctor of Pharmacy students only.

**PHRD 726 Directed Clinical Clerkship Project I (6, FaSpSm)** Directed educational opportunities not presently offered as electives, e.g., research projects or new and evolving clerkships.

**PHRD 727 Directed Clinical Clerkship Project II (6, FaSpSm)** Directed educational opportunities not presently offered as electives, e.g., research projects or new and evolving clerkships.

**PHRD 728 Directed Clinical Clerkship Project III (6, FaSpSm)** Directed educational opportunities not presently offered as electives, e.g., research projects or new and evolving clerkships.

**PHRD 729 Directed Clinical Clerkship Project IV (6, FaSpSm)** Directed educational opportunities not presently offered as electives, e.g., research projects or new and evolving clerkships.

**PHRD 730 Acute Care Geriatrics Clerkship (6, FaSpSm)** Pharmaceutical care principles applied to the acutely ill geriatric patient population. Emphasis on drug therapy problem solving, physiology, pharmacokinetics and compliance problems. Open to Level IV Doctor of Pharmacy students only.

**PHRD 731 Advanced Geriatrics Clerkship (6, FaSpSm)** Directed projects and experiences in geriatric drug therapy. (Duplicates credit in former PHAR 632.)

**PHRD 732 Pharmacy Administration Clerkship (6, FaSpSm)** Principles and practices of hospital pharmacy administration, management and departmental relationships. Practical experiences and projects emphasized. Open to Level IV Doctor of Pharmacy students only.

**PHRD 733 Anticoagulation Therapy Clerkship (6, FaSpSm)** Management of patients requiring anticoagulation. Applied knowledge of disease pathophysiology, anticoagulant pharmacology, and laboratory methods toward safe and effective patient outcomes. Open to Level IV Doctor of Pharmacy students only.

**PHRD 734 Antimicrobial Therapy Clerkship (6, FaSpSm)** Antimicrobial therapy, including antibiotic selection, dosage adjustment, and outcomes assessment of patients in the health care setting. Open to Level IV Doctor of Pharmacy students only.

**PHRD 735 Clinical Pharmacy Research Clerkship (6, FaSpSm)** Drug research administration: research design; ethics; record-keeping; and institutional review. Practical experience and projects are emphasized. Open to Level IV Doctor of Pharmacy students only.

**PHRD 736 Chemical Dependency Clerkship (6, FaSpSm)** The psychiatric, social, and pharmacological management of chemical dependency. Emphasizes the inpatient, day treatment, and outpatient components of detoxification and recovery.

**PHRD 737 Clinical Transplantation Clerkship (6, FaSpSm)** Drug therapy to organ transplantation. Emphasizes pre- and post-transplantation therapy designed to minimize organ rejection, prevent infection, and improve survival.

**PHRD 738 Pharmaceutical Industry Clerkship (6, FaSpSm)** Train within a pharmaceutical company to develop an understanding of the drug development, research, marketing process.

**PHRD 739 AIDS/Immune Disorders Clerkship (6, FaSpSm)** A multidisciplinary approach to the management of AIDS and other immuno-compromised patients. Pharmacologic management is directed toward opportunistic infections, disease modifiers, and adjuvant therapy.

**PHRD 740 Health Care Systems Administration Clerkship (6, FaSpSm)** Practical experience and training in managed care settings and health care systems. Emphasis on administrative principles, management and health outcomes. Students will complete a project. Open to Doctor of Pharmacy students only.

**PHRD 741 Advanced Primary Care Clerkship (6, FaSpSm)** Advanced experience in disease state management in the primary care setting. Design drug therapy regimens using a team-based approach at an advanced level of practice. Open to Doctor of Pharmacy students only. *Prerequisite:* PHRD 704.

**PHRD 790 Directed Research (1-12, max 12)** Research leading to doctorate in Clinical and Experimental Therapeutics. Graded CR/NC.

**PHRD 794abcdz Doctoral Dissertation (2-2-2-0)** Dissertation research required for completion of Doctor of Philosophy in Clinical and Experimental Therapeutics.

## PHARMACEUTICAL ECONOMICS AND POLICY (PMEP)

**PMEP 509 Research Design (4, Fa)** Introduction to the concept of research design and examples of the variant research methods utilized in the field. Both the conceptual and practical issues of research including development of the research question, selection of appropriate methods, data sources and analytic approaches to address the research question will be addressed.

**PMEP 519 Survey Research and Quality of Life Assessment (4, Sp)** Skills to develop and assess surveys which are integral in Pharmaceutical Economics and Policy research. *Prerequisite:* PMEP 509; *recommended preparation:* biostatistics, econometrics.

**PMEP 529 Risk, Probabilities and Preferences (4, Sp)** Analysis of economic and psychological constructs of risks, probabilities, and health related preferences and utilities.

**PMEP 538 Pharmaceutical Economics (4, Sm)** Introduction to pharmacoeconomics with special emphasis on the role of pharmaceuticals and the pharmaceutical industry, insurance, managed care, regulation and pricing. *Prerequisite:* ECON 500.

**PMEP 539 Economic Assessment of Medical Care (4, Fa)** Principles of cost-benefit analysis and medical cost-effectiveness analysis with applications in medical care and the pharmaceutical field. *Prerequisite:* ECON 500 and ECON 581.

**PMEP 549 Applied Pharmacoeconometrics (4, Sp)** Use of quantitative models to describe and analyze pharmaceutical and health care markets; experimental design/power calculations; survival models; multiple indicator models; qualitative and limited dependent variables models; estimation and application of such models to selected problems. *Prerequisite:* ECON 615.

**PMEP 590 Directed Research (1-12, FaSpSm)**

Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PMEP 594abz Master's Thesis (2-2-0, FaSp)**

Credit on acceptance of thesis. Graded IP/CR/NC. *Prerequisite:* completion of all required course work for the M.S. degree.

**PMEP 698 Seminar in Pharmaceutical Economics and Policy (4, max 8, FaSp)**

Current research in pharmaceutical economics and policy presented by outside scholars, faculty and students. Graded CR/NC.

**PMEP 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PMEP 794abcdz Doctoral Dissertation (2-2-2-2-0)** Credit on acceptance of dissertation. Graded IP/CR/NC.

**PHARMACEUTICAL SCIENCES (PSCI)**

**PSCI 531 Cell Biology (4)** (Enroll in INTD 531)

**PSCI 556 Principal Research Approaches in PPSI (2, Fa)** Familiarize new graduate students with basic approaches used in biomedical research with focus on data interpretation and experimental approaches. Graded CR/NC.

**PSCI 557 Introduction to Tools and Techniques for Chemical Biology (2, Sp)** Multidisciplinary science where the knowledge of chemistry is utilized to solve problems in biology, and biological systems are evolved to gain new functions. This course aims to establish a great opportunity for graduate students at the interface of biology and chemistry. *Recommended preparation:* formal course work in chemistry and biochemistry.

**PSCI 561 Molecular Genetics (4, Sp)** (Enroll in INTD 561)

**PSCI 571 Biochemistry (4, Fa)** (Enroll in INTD 571)

**PSCI 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PSCI 594abz Master's Thesis (2-2-0, FaSp)**

Credit on acceptance of thesis. Graded IP/CR/NC. *Prerequisite:* completion of all required course work for the M.S. degree.

**PSCI 599 Special Topics (2-4, max 8, FaSp)**

Topics in advanced pharmaceutical sciences.

**PSCI 601 Molecular Biology of Gene Regulation (2, max 8)**

(Enroll in BIOC 601)

**PSCI 655 Immunopharmaceutics (2, 2 years, Fa)** Lectures and discussion sessions on pharmaceuticals-related immunology, including drugs affecting the immune system, antibodies and cytokines as drugs, and new developments in immunobiotechnology.

**PSCI 661L Advanced Pharmaceutical Analysis (4, 2 years, Fa)**

Theory and application of quantitative instrumental techniques to the pharmaceutical sciences. Includes principles of chromatography, spectrophotometry, fluorescence, mass spectrometry and immunological assays. Lecture and laboratory.

**PSCI 662 Advanced Pharmacokinetics/Pharmacodynamics (2, max 4, FaSp)** Principles of advanced pharmacokinetics/pharmacodynamics. Mathematical description of drug disposition processes. Design and evaluation of pharmacokinetic/pharmacodynamic studies. Advanced approaches to parameter estimates.

**PSCI 663 Advanced Drug Delivery Systems (2, Fa)** Design and applications of polymers, liposomes, micro/nanoparticles, prodrugs, and macromolecules for parenteral, oral, transdermal, respiratory and CNS drug delivery. *Prerequisite:* PSCI 665; *recommended preparation:* college level chemistry and biology.

**PSCI 664 Drug Discovery and Design (4, FaSpSm)** Principles of drug discovery, design and characterization. Mechanisms of action of major classes of drugs. Open only to students in management of drug development. *Recommended preparation:* college level chemistry and biology.

**PSCI 665 Drug Transport and Delivery (4, Fa)** Principles of cellular drug transport, in vivo drug transport, and modern drug delivery, including drug targeting. *Recommended preparation:* college level chemistry and biology.

**PSCI 667 Intracellular Drug Delivery and Targeting (2, 2 years, Sp)** Mechanisms of membrane trafficking and intracellular transport and the utilization of these mechanisms in drug delivery and targeting. *Recommended preparation:* college level chemistry and biology, INTD 531.

**PSCI 756ab Seminar in Pharmaceutical Sciences (1-1, FaSpSm)** Review of current pharmaceutical and related research topics.

**PSCI 790 Research (1-12, FaSpSm)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PSCI 791L Research (2-12, no max)** Directed research for the M.S. thesis or Ph.D. dissertation.

**PSCI 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm)** Credit on acceptance of dissertation. Graded IP/CR/NC.

**REGULATORY SCIENCE (RSCI)**

**RSCI 520 Introduction to Risk Management for Health Care Products (2)** Historical development, formal language and theoretical approaches to risk management in health care and medical product environment; policies, regulations, standards; liability prevention and loss control. (Duplicates credit in MPTX 520.) *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

**RSCI 521 Seminars in Regulatory Science (1, max 6, FaSpSm)** Current problems in regulatory affairs, legal management, preclinical and clinical testing, scientific evaluation and quality assurance. (Duplicates credit in former MPTX 521.) Graded CR/NC. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post secondary training and industry experience; enrollment in M.S., Regulatory Science program.

**RSCI 523 Advanced Concepts in Risk Management for Medical Products (3)** Managing risk in demanding health-care and medical-product situations: clinical trials, emerging technologies, counterfeit prevention, hard-to-reach populations. *Recommended preparation:* undergraduate or professional degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience; enrollment in M.S. (Regulatory Science), Certificate in Patient and Product Safety, or permission of instructor.

**RSCI 525 Introduction to Drug and Food Toxicology (3)** Factors affecting toxic responses to foods and drugs: dose-response relationships, absorption, distribution, bio-transformation, elimination of toxicants; target organ toxicity, teratogenesis, mutagenesis, carcinogenesis, food allergies, risk assessment. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

**RSCI 527 Medical Product Safety (3)** Management of medical product safety by manufacturers/suppliers including: safe manufacturing, labeling, packaging; pharmacovigilance, field observations, complaint handling; record-keeping, safety issues documentation; crisis management/recalls. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

**RSCI 528 Safety in the Health Care Environment (3)** Regulatory expectations for health care facilities and services: JCAHO certification, environmental risk management, management of medical and medication errors, reduction of health hazards. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

**RSCI 529 Application of Risk Management Tools and Techniques (2)** Use of risk management tools in the medical products arena: functional analysis, fault-tree analysis, failure modes and effects analysis, HACCP and six sigma methods. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

**RSCI 530 Translational Medicine: An Overview (2, FaSpSm)** An overview of principles and concepts underlying drug discovery and development, including terminology of translational science. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience; enrollment in M.S., Regulatory Science, Certificate in Preclinical Drug Development and M.S., Management of Drug Development.

**RSCI 531 Industrial Approaches to Drug Discovery (4, FaSpSm)** Examines the process of drug discovery from selection of disease and therapeutic target to characterization and validation of lead drug candidates. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience; enrollment in M.S., Regulatory Science, Certificate in Preclinical Drug Development and M.S., Management of Drug Development.

**RSCI 532 Early Stage Drug Development (3, FaSpSm)** Explores the activities involved in transforming an early drug or biological candidate to a drug approved for marketing by regulatory authorities. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience; enrollment in M.S., Regulatory Science, Certificate in Preclinical Drug Development and M.S., Management of Drug Development.

**RSCI 596 Internship for Curricular Practical Training in Regulatory Science (1, FaSpSm)** Part-time or full-time practical work experience in Regulatory Science. The internship must be located at an off-campus facility. Students are individually supervised by faculty. Graded CR/NC. *Recommended preparation:* undergraduate or professional degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience; enrollment in M.S. (Regulatory Science).

**RSCI 601 Biomedical Commerce (4)** Introduction to business principles appropriate to medical products, including: supply and demand, product entry-exit strategies, financing, reimbursement, marketing and pricing in global marketplace. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience; enrollment in M.S., Regulatory Science.

**RSCI 603 Managing Complex Projects (3)** Theory and methods to manage complex projects in medical products sectors; timelines, intellectual property, security, contracts, budgets, review activities, reports, electronic tools, cross-cultural communication. *Recommended preparation:* undergraduate or professional degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

**RSCI 604 Regulatory Strategy in Asia (4)** Regulatory policy, standards and practices in different Asian markets: product licensing, import/export management, materials sourcing, quality systems compliance, reimbursement, prescribing practices. Travel may be required. *Prerequisite:* MPTX 519; *recommended preparation:* undergraduate or professional degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

**RSCI 605 Managing Organizations and Human Resources (3)** Theory and practice of personnel management, organizational structure and industrial relations in small, growing enterprises and large global companies typical of pharmaceutical and medical device sectors. *Recommended preparation:* undergraduate or professional degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

**RSCI 608 Regulatory Strategy in Europe and the Americas (4)** Regulatory strategy in EU, Canada, Mexico and South America; culture, health-care practices, reimbursement, product registration, quality systems, trade restrictions, import/export requirements. Travel may be required. *Recommended preparation:* undergraduate or professional degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

**RSCI 794abcdz Doctoral Dissertation (2-2-2-2-0)** Dissertation research required for completion of doctoral degree in regulatory science. Graded IP/CR/NC.

---

# USC Price School of Public Policy

*Confetti rained down on the Trojans gathered to celebrate the naming of the USC Price School of Public Policy, which recently received a \$50 million gift from the Price Family Charitable Fund. "Through this gift, we can advance our scholarship on major issues and our work in educating the next generation of leaders in government, in business and in the nonprofit sector," said Jack H. Knott, dean of the school, which is ranked sixth among public administration graduate programs by U.S. News & World Report.*

**T**he USC Price School of Public Policy provides a dynamic learning environment where interdisciplinary education abounds. At USC Price, students choose a program of study from the independent yet related fields of public administration, public policy, health management and policy, urban planning, real estate development and executive leadership. Students are supported by a committed faculty who contribute to the strong sense of community present in the school.

The school's mission is to improve the quality of life for people and their communities, here and abroad. Faculty across all its academic programs engage in solving some of society's most pressing issues — and challenge students to do the same. USC Price is renowned for its expertise in areas such as: sustainability and the environment, health care policy, nonprofit management, housing and real estate, transportation, infrastructure, urban development and land use, social policy, governance, civic engagement, community development, immigration and risk analysis, among others.

Defining characteristics of USC Price are the depth of its academic classroom experience *and* connecting classroom theory to professional practice through practicums, internships and laboratory work locally, nationally and around the globe. Students graduate with the knowledge, skills and experiences to lead in their chosen field of practice.

Today's complex challenges call for leaders who are able to work across disciplines and across the public, private and nonprofit sectors to find solutions. It is for this multidisciplinary reality that USC Price prepares its students.

USC Price students go on to hold high-ranking appointments in our nation's capital, analyze and determine public policy, design new transportation systems, and redesign city, county, state and federal governance structures — in the United States and abroad. They lead health care reform efforts and manage the delivery of our health care services. They oversee operational aspects of our airports, railroad systems and harbors. They build healthy, sustainable communities, lead major nonprofit organizations, and shape our world for the better.

#### Administration

Jack H. Knott, Ph.D., *Dean*

Elizabeth Graddy, Ph.D.\*, *Vice Dean*

Genevieve Giuliano, Ph.D.\*, *Senior Associate Dean, Research and Technology*

Regina T. Nordahl, J.D., MBA, SPHR,  
*Associate Dean, Administration*

Carol A. Rush, MPA, *Associate Dean, Student Affairs*

John Sonogo, M.A., *Associate Dean for Development and External Relations*

#### Faculty

*C. Erwin and Ione L. Piper Dean's Chair*: Jack H. Knott, Ph.D.

*University Professor*: Kevin Starr, Ph.D.  
(*History*)

*Wallis Annenberg Chair in Communication Technology and Society*: Manuel Castells, Ph.D.  
(*Communication*)

*Judith & John Bedrosian Chair in Governance & Public Enterprise*: Raphael Bostic, Ph.D.

*Blue Cross of California Chair in Health Care Finance*: Glenn A. Melnick, Ph.D.

*C.C. Crawford Professor of Management and Performance*: Anthony Bertelli, Ph.D.

*Margaret and John Ferraro Chair in Effective Local Government*: Genevieve Giuliano, Ph.D.\*

*James Irvine Chair in Urban and Regional Planning*: Tridib Banerjee, Ph.D., FAICP\*

*James Irvine Chair in Urban and Regional Planning*: Harry W. Richardson, M.A.

*Edward G. Lewis Endowed Chair in Law*: Nancy Staudt, J.D., Ph.D. (*Law*)

*Lusk Chair in Real Estate*: Richard K. Green, Ph.D. (*Business*)

*Jeffrey J. Miller Chair in Government, Business and the Economy*: Elizabeth Graddy, Ph.D.\*

*Emery Evans Olson Chair in Nonprofit Entrepreneurship & Public Policy*: James M. Ferris, Ph.D.

*Norman Topping/National Medical Enterprises Chair in Medicine and Public Policy*: Dana Goldman, Ph.D.\*

*Maria B. Crutcher Professor of Citizenship and Democratic Values*: Terry L. Cooper, Ph.D.

*Frances R. and John J. Duggan Distinguished Professor of Public Administration*: Shui Yan Tang, Ph.D.\*

*Houston Flournoy Professor of State Government*: Juliet Musso, Ph.D.\*

*William M. Keck Professor of Energy Resources*: Donald Paul, Ph.D. (*Engineering and Earth Sciences*)

*Dr. Chester A. Newland Endowed Professor of Public Administration*: Janet Denhardt, DPA

*Presidential Professor of Health Economics*: Daniel McFadden, Ph.D.

*Provost Professor of Business, Law and Political Economy*: Mathew McCubbins, Ph.D.  
(*Finance and Business Economics*)

*Judge Widney Professor*: Leonard D. Schaeffer

*Judge Widney Professor of Poetry and Public Culture*: Dana Gioia, M.A., MBA

*Professors*: Marlon Boarnet, Ph.D.; Raphael Bostic, Ph.D.; Gerald Caiden, Ph.D.\*; Ann Crigler, Ph.D. (*Political Science*); Elizabeth Garrett, J.D. (*Law*); Peter Gordon, Ph.D. (*Economics*); Howard Greenwald, Ph.D.; Eric Heikkila, Ph.D.; Alan Kreditor, MCP, AICP; Dan Mazmanian, Ph.D.; Martin Krieger, Ph.D.; Jacquelyn McCroskey, Ph.D. (*Social Work*); James Moore II, Ph.D. (*Engineering*); Dowell Myers, Ph.D.; Robert C. Myrtle, DPA\*; Michael Nichol, Ph.D. (*Pharmacy*); Gary Painter, Ph.D.; Manuel Pastor, Ph.D. (*Geography and American Studies and Ethnicity*); Jane Pisano, Ph.D.; Jon Pynoos, Ph.D. (*Gerontology*); Alison D. Renteln, Ph.D.\* (*Political Science*); David Sloane, Ph.D.; Robert Suro (*Journalism*); Detlof von Winterfeldt, Ph.D. (*Engineering*); Priscilla Wohlstetter, Ph.D. (*Education*)

*Associate Professors*: Elizabeth Currid-Halkett, Ph.D.; Darius Lakdawalla, Ph.D.; Christian Redfeare, Ph.D.; Peter Robertson Ph.D.\*; Lisa Schweitzer, Ph.D.; Jeffrey Sellers, Ph.D., (*Political Science*); Kathleen Wilber, Ph.D. (*Gerontology*)

*Assistant Professors*: Nicole Esparza, Ph.D.; Marco Huesch, Ph.D.; Mark D. Phillips, Ph.D.; Jenny Schuetz, Ph.D.; David Suarez, Ph.D.; Vivian Wu, Ph.D.

*Distinguished Fellow*: Stan Ross, Honorary J.D.

*Senior Fellows*: Robert Denhardt, Ph.D.; William B. Fulton, Ph.D.; Sherry Bebitch Jeffe, Ph.D.; Richard G. Little, AICP; Mark Pisano; Frank Zerunyan, J.D.

*Research Professors*: Hilda Blanco, Ph.D.; Stephen Hora, D.B.A.; Donald L. Paul, Ph.D. (*Engineering and Earth Sciences*); Adam Rose, Ph.D.

*Research Associate Professors*: Michael Cousineau, Ph.D. (*Medicine*); Christopher Weare, Ph.D.

*Research Assistant Professors*: John Romley, Ph.D.; Heather Rosoff, Ph.D.; Dan Wei, Ph.D.

*Clinical Professor*: Leonard Mitchell, M.A., MBA, J.D.

*Teaching Professor*: LaVonna B. Lewis, Ph.D.

*Teaching Assistant Professors*: Elizabeth Falletta, MRED; T.J. McCarthy, Ph.D.; Jennifer Miller, Ph.D.; Michael Thom, Ph.D.

*Adjunct Professors*: Jonathan Brown, DPA; Garrett Capune, Ph.D.; Robert Champion, MRED; Charles Cicchetti, Ph.D.; Thomas Collins, Ed.D.; Tim Gage, MPP; Patrick G. Hays, MHA; Lori Howard, Ph.D.; Stanley Iezman, J.D.; Jong S. Jun, Ph.D.; Patrick Kapsner, MPA, FACMPE; Catherine Kay, J.D.; Michael Keston, MBA; Dora Kingsley, DPA; Allan Kotin, M.A.; Ehud Mouchly, M.A.; Ira Norris, MBA; Tomson Ong, J.D., Ph.D., LL.M.; James Osterling, MBA; Robert Smythe, B.S.; Erroll Southers, MPA; Henry Zaretsky, Ph.D.

*Adjunct Associate Professors*: Austin Anderson, MBA; Bruce Baltin; William Barcellona, MHA, J.D.; Janis Breidenbach, M.A.; Ali Farahani, Ph.D.; James Fawcett, Ph.D.; Richard Garcia, DPA; Guillermo Gil, MBA; Daniel Haverty, DPA; Robert Ingenito, M.A.; Bryan Jackson, J.D.; Daniel Jordan, Ph.D.; Steven Kellenberg, M.A.U.D.; Michael Kodama, M.A.; Carl Meyer, M.Arch.; Maurice Rahimi, Ph.D.; Ellen Riley, MBA; Jeffrey Schaffer, MPA; Susan Sinclair, MBA; Jeffrey Smith, Ph.D.; Helene Smookler, Ph.D.; Donna Staal, DPA; Halil Toros, Ph.D.; Deborah Torres, M.Arch.; Clyde Wesp, M.D.; Jack Wong, M.A.

*Adjunct Assistant Professors*: Deepak Bahl, MPI; Michael Carter, MPH; Terri Dickerhoff, MRED; Matt Gainer, MFA; Jeffrey Green, MHA; Earl Greenia, Ph.D.; Richard A. Hagy, Ph.D.; Kathy Kolnick, Ph.D.; Donald Morgan, Ph.D.; Mark E. Oliver, MRED; Deike Peters, Ph.D.; Chris Van Gorder, MPA; Chris Wilson, MBA; Diane Yoder, Ph.D.

*Frances R. and John J. Duggan Professor Emeritus in Public Administration*: Chester A. Newland, Ph.D.

*Emeritus Professors:* William C. Baer, Ph.D., AICP; Robert M. Carter, D.Crim.; T. Ross Clayton, Ph.D.; Lois Friss, Dr.P.H.; David Lopez-Lee, Ph.D.; David Mars, Ph.D.; Alexander McEachern, M.A.; E.K. Nelson, DPA; William Petak, DPA; Francine Rabvintovitz, Ph.D., AICP; Warren Schmidt, Ph.D.; Gilbert Siegel, Ph.D.; Robert Stallings, Ph.D.; Richard A. Sundeen, Ph.D.\*; Robert E. Tranquada, M.D.; Joseph S. Wholey, Ph.D.; William J. Williams, DPA

*Emeritus Associate Professors:* Wesley E. Bjur, Ph.D.; Catherine Burke, Ph.D.

\*Recipient of university-wide or school teaching award.

### Degrees Offered

The Price School of Public Policy offers the following degrees:

- Bachelor of Science in Policy, Planning and Development
- Master of Health Administration
- Executive Master of Health Administration
- Master of Science in Health Systems Management Engineering (with Industrial and Systems Engineering)
- Executive Master of Leadership
- Master of Public Policy and Management
- Master of Planning
- Master of Planning and Development Studies
- Master of Public Administration
- Master of Public Policy
- Master of Real Estate Development
- Doctor of Philosophy in Public Policy and Management

- Doctor of Philosophy in Urban Planning and Development
- Doctor of Policy, Planning, and Development

The Bachelor of Science and the school's master's degrees are also offered jointly as a progressive five-year program and the school participates in the following interdisciplinary minors:

- Children and Families in Urban America
- Construction Planning and Management
- Environmental Planning and Development
- Health Policy and Management
- International Policy and Management
- Law and Public Policy
- Nonprofits, Philanthropy and Volunteerism
- Real Estate Development
- Urban Policy and Planning

The Master of Planning is offered as a dual master's degree with programs in architecture, landscape architecture, art and curatorial practices in the public sphere, business administration, economics, gerontology, international relations, public administration, public health, public policy, real estate development and social work.

The Master of Public Administration is offered as a dual master's degree with programs in planning, gerontology, international relations, Jewish nonprofit management, law and social work.

The Master of Real Estate Development is offered as a dual degree with the Master of Business Administration, Juris Doctor and Master of Planning.

The Master of Health Administration is offered as a dual degree with the Master of Science in Gerontology.

The Master of Public Policy is offered as a dual degree with programs in law and planning.

### National Honor Societies

#### *Pi Alpha Alpha*

Pi Alpha Alpha is the national honor society for public affairs and administration. Graduate students in the Price School of Public Policy who have completed at least 18 semester units and have earned a 3.7 grade point average are eligible for membership.

#### *Pi Sigma Alpha*

Pi Sigma Alpha is the national honor society for students in public administration, political science, and international relations. Students who have completed at least three courses from among these fields and have earned at least a 3.5 grade point average are eligible to apply.

## Undergraduate Degrees

The Price School of Public Policy offers a suite of degrees that allow undergraduate students to gain the skills and knowledge necessary to understand complex health, environmental and urban issues, as well as to potentially enter the professional fields of health and nonprofit management, public policy, real estate development, and urban planning. Students may enroll in the Bachelor of Science in Policy, Planning, and Development, or a challenging set of minors, or possibly the very competitive progressive degrees associated with the Master of Health Administration, Master of Planning and Master of Public Administration.

### Admission

Freshman and transfer students may indicate their desire to declare policy, planning, and development as a major on their university application. Students enrolled at USC wishing to declare the major or to be admitted into the minors must be in good academic standing. Interested current USC students should contact the Admissions and Recruitment Office in RGL 111 for more information.

### Advisement

Students must discuss courses of study with the appropriate undergraduate advisers throughout their college enrollment and need to develop their own individual programs with faculty and staff advisers at the time of first enrollment and throughout their college careers.

## Bachelor of Science in Policy, Planning, and Development

The Bachelor of Science in Policy, Planning, and Development is an interdisciplinary major that prepares students for graduate study and/or professional careers by engaging them in the analysis of society's political, social and economic issues in such areas as environment, health care and urban life. The major introduces students to theoretical foundations and practical applications through a set of cross-cutting introductory courses and specialized courses in one of five tracks: health policy and management, public policy and law, nonprofits and social innovation, real estate development, or sustainable planning. Students will be introduced to analytical and research tools, including economics, Geographic Information Systems, statistics, urban design, and applied field research. Throughout, the students' education will be connected to professional practice, as exemplified by the mandatory internship. Finally, the major is structured to provide students with sufficient elective credits to explore minors or other programs at USC so they can broaden their education to better prepare themselves for the next stage of their lives.

### General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See pages 63 and 250 for more information.

### Major Requirements

A minimum grade of C- 1.7 (A=4.0) must be earned in each PPD course specifically listed as a degree requirement. In addition, a minimum grade point average of C (2.0) or higher must be achieved to earn all Price degrees. The GPA for all upper division PPD courses applied toward the major must also be a C (2.0) or higher. No more than 16 units of PPD course work may be taken prior to the successful completion of pre-major requirements.

### Pre-major Requirements (8 units)

A minimum grade of C, 2.0 (A=4.0), must be earned in each of the pre-major courses.

All pre-major requirements must be taken for a letter grade.

#### Math

MATH 117 (4)

#### Economics

ECON 203 Microeconomics (4)

### General Electives (26 units\*)

#### Policy, Planning, and Development Core Courses

CORE COURSES (30 UNITS)		UNITS
PPD 225	Public Policy and Management (gateway course)	4
PPD 227	Urban Planning and Development (gateway course)	4
PPD 240	Citizenship and Public Ethics	4
PPD 245	The Urban Context for Policy and Planning	4
PPD 357	Government and Business	4
PPD 301	PPD Practices: Internship Seminar	2
PPD 303	Statistics for Policy, Planning and Development	4
PPD 373	Public Policy and Planning Analysis	4

### Tracks

Students select one track for degree emphasis; they take 28 units (seven courses) from the track selected. Each track includes four required courses and three elective courses. During advisement, students will be given a list of recommended elective courses particularly appropriate for the chosen track, but students have the flexibility to craft the electives out of Price School courses to meet their academic needs. The four requirement courses for each track are listed below.

#### HEALTH POLICY AND MANAGEMENT UNITS

Required courses:		UNITS
PPD 325	Fundamentals of Health Policy and Management	4

#### Health Policy Focus:

PPD 314	Public Policy and Law	4
PPD 315	Analytical Foundations for Public Policy	4
PPD 415	Health Policy	4

#### Health Management Focus:

PPD 320	Organizational Behavior in Public Administration	4
PPD 407	Financial Management of Public and Nonprofit Organizations	4
PPD 413	Administration of Health Care Organizations	4

#### Electives (select 3):

Health Policy Focus:		UNITS
GERO 416	Health Issues in Adulthood	4
HP 408	Environmental Health in the Community	4

HP 412	Health Promotion and Prevention Policy	4
PPD 330	Introduction to Health Care Systems	4
PPD 413	Administration of Health Care Organizations	4
PPD 414	Community Health Policy and Planning	4
(Study abroad if applicable to track)		

#### Health Management Focus:

PPD 318	Financial Accounting in Public and Nonprofit Organizations	4
PPD 330	Introduction to Health Care Systems	4
PPD 403	Management Analysis I	4
PPD 414	Community Health Policy and Planning	4
PPD 478	Social Innovations	4
(Study abroad if applicable to track)		

#### PUBLIC POLICY AND LAW UNITS

##### Required courses:

PPD 313	Finance of the Public Sector	4
PPD 314	Public Policy and Law	4
PPD 315	Analytical Foundations for Public Policy	4
POSC 340	Constitutional Law	4

##### Electives (select 3):

ECON 434	Economic Analysis of Law	4
LAW 200x	Law and Society	4
POSC 444	Civil and Political Rights and Liberties	4
PPD 342	Crime and Public Policy	4
PPD 410	Comparative Urban Development	4
PPD 415	Health Policy	4
PPD 439	Housing and Community Development	4
PPD 461	Sustainable Communities, Policy and Planning	4
PPD 478	Social Innovations	4
PPD 485	U.S. Immigration Policy and Liberties	4
Washington, D.C. Semester (Study abroad if applicable to track)		

#### NONPROFITS AND SOCIAL INNOVATION UNITS

##### Required courses:

PPD 371	The Nonprofit Sector and the Public Interest	4
PPD 402	Management of Public and Nonprofit Organizations	4
PPD 407	Financial Management of Public and Nonprofit Organizations	4
PPD 478	Social Innovations	4

Electives (select 3):		PPD 438	Local Economic Development	4
BUCO 485	Business Communication Management for Nonprofits	4		
IR 371	Global Civil Society: Non-State Actors in World Politics	4		
PPD 318	Financial Accounting in Public and Nonprofit Organizations	4		
PPD 320	Organizational Behavior in Public Administration	4		
PPD 353	Introduction to Philanthropy and Grant-Writing	4		
PPD 372	Public Service in an Urban Setting	4		
PPD 382	International Development	4		
PPD 403	Management Analysis I	4		
(Study abroad if applicable to track)				
<b>REAL ESTATE DEVELOPMENT</b>		<b>UNITS</b>		
Required courses:				
FBE 400x	Introduction to Real Estate Finance and Development	4		
PPD 362	Real Estate Fundamentals for Planning and Development	4		
PPD 417	History of Planning and Development	4		
PPD 437	Advanced Finance and Investment for Planning and Development	4		
Electives (select 3):				
CE 460*	Construction Engineering	3		
FBE 427	Real Estate Law	4		
PPD 410	Comparative Urban Development	4		
PPD 420	Environmental Impact Assessment	4		
PPD 425	Designing Livable Communities	4		
PPD 435	Analyzing Real Estate Markets for Planning and Development	4		

PPD 439	Housing and Community Development	4
(Study abroad if applicable to track)		
*Students in the real estate track who select CE 460 as an elective will earn 27 units rather than 28 in the track and will require 27 units of general electives rather than 26 to reach 128 units total.		
<b>SUSTAINABLE PLANNING</b>		<b>UNITS</b>
Required courses:		
PPD 417	History of Planning and Development	4
PPD 420	Environmental Impact Assessment	4
PPD 427L	Geographic Information Systems and Planning Applications	4
PPD 461	Sustainable Communities, Policy and Planning	4

Electives (select 3):				
PPD 306	Visual Methods in Policy, Management, Planning and Development	4		
PPD 358	Urban and Regional Economics	4		
PPD 360	Urban Transportation Planning and Policy	4		
PPD 362	Real Estate Fundamentals for Planning and Development	4		
PPD 410	Comparative Urban Development	4		
PPD 414	Community Health Policy and Planning	4		
PPD 425	Designing Livable Communities	4		
PPD 438	Local Economic Development	4		
PPD 439	Housing and Community Development	4		
(Study abroad if applicable to track)				

The faculty director of the undergraduate program may approve students' petitions to substitute or mix track classes if based on an appropriate academic/career rationale.

**Capstone**

All students will take four units of a capstone experience during their senior year. This may be fulfilled by taking PPD 431L Undergraduate Policy, Planning, and Development Studies (4) or PPD 497ab Senior Thesis (2-2). Students wishing to enroll in PPD 497ab must have a 3.7 GPA in PPD courses and an overall 3.5 GPA.

**Internships**

Policy, Planning and Development majors are required to complete 140 hours of internship by enrolling in PPD 301 PPD Practices: Internship Seminar or the Washington, D.C., Semester internship. Internships are matched as closely as possible to the student's interests and skills.

PPD 301 and the internship in a position provide numerous opportunities to develop and formulate future career goals, as well as to gain personal and professional experience while completing the undergraduate degree.

**Honors**

Price School honors are available at graduation to qualified PPD majors and result in a special designation of departmental honors on a student's transcript. Achievement of PPD honors requires a 3.7 GPA in PPD major courses and a 3.5 overall GPA as well as nomination by the professor in the capstone experience. In addition, students must earn an A in their capstone course (PPD 497ab or PPD 431).

**Washington, D.C., Semester**

The Washington, D.C., Semester program provides an intensive semester of confrontation with the political center of the nation and its complex components. The program offers opportunities for behind-the-scenes work in national government agencies and related organizations, combined with an academic environment and the chance to explore, share and learn with a group of fellow students.

## Progressive Degrees in the Price School of Public Policy

The Price School of Public Policy offers students who have demonstrated exceptional academic success the opportunity to earn both bachelor's and master's degrees in a progressive degree program. This program allows students to earn both the Bachelor of Science and a master's degree in five years. Further details about progressive degrees can be found on page 87.

**Admission**

Admission is available after the completion of 64 units of course work toward the undergraduate degree. Students must apply for admission to the progressive degree program after completing 64 units of applicable course work to their undergraduate programs, but prior to the completion of 96 units of course

work (not including AP, IB or courses taken prior to high school graduation). The application for admission to the progressive degree plan must be accompanied by a course proposal plan and two letters of recommendation with one at least from a Price School faculty member.

### Awarding of Degrees

The Bachelor of Science and master's degree may be awarded separately upon completion of all degree requirements, but the master's degree will not be awarded before the bachelor's degree. Students who elect not to complete the master's, must complete 128 units to earn the bachelor's degree, including

32 units of upper division Price course work (including any graduate Price classes).

### Time Limits

All requirements for the progressive degree must be completed within 12 semesters. If not completed within that time, students will no longer be eligible for the master's degree but may still earn the bachelor's.

### Transfer of Credits

Graduate courses will not be accepted for transfer credit. Undergraduate classes may be transferred in accordance with university guidelines.

## Minor Programs

### Minor in Children and Families in Urban America

What's happening to children and families in urban America? Students will examine changing demographics, economics, and cultures and the challenges of building communities that support families. They will assess innovative ways to improve access to and utilization of human services, including inter-professional practice, integrated services and community-based initiatives. Analysis of current social policies and policy reform initiatives will provide a framework for students who want to help improve student outcomes for children and families.

This minor includes courses from social work, planning, psychology, communication, education and other academic areas. It requires 22 units. See the USC School of Social Work section (page 929) for course requirements.

### Minor in Construction Planning and Management

This program covers the most current theories and practice of construction planning and management. The program provides a valuable adjunct credential to professional school students pursuing careers in business administration, public administration, environmental studies, and other areas; and a unique opportunity for professional focus to students in the USC Dornsife College of Letters, Arts and Sciences.

Construction activities are complex. In contemporary society, effective planning and management of these activities requires specialized knowledge of the technical, economic and political environment. This program couples the knowledge of how construction activities are organized with a broader understanding of the urban system in which construction projects are embedded. With the exception of statistics, all of the required courses are within the Department of Civil Engineering and the Price School of Public Policy.

Any USC undergraduate who has completed the equivalent of two full-time semesters in good standing is eligible to pursue the minor program. This minor program is rigorous enough to serve as an introductory credential for students subsequently electing to pursue advanced studies in development, urban planning, construction management or allied fields.

See the Department of Civil Engineering (page 624) for course requirements.

### Minor in Health Policy and Management

This 24-unit minor in health policy and management provides students with a background in the institutions, policy and management issues in the field of health care and the skills necessary to pursue a range of health-related management and/or policy opportunities in the for-profit, nonprofit and governmental sectors. This minor is appropriate for students interested in pursuing careers in the health care field, especially students majoring in pre-health services fields, business, gerontology or the social sciences.

REQUIRED COURSES		UNITS
PPD 325*	Fundamentals of Health Policy and Management	4
PPD 330	Introduction to Health Care Systems	4
PPD 415*	Health Policy	4
ELECTIVES		UNITS
Choose three courses from one of the two tracks:		
<i>Health Issues Track</i>		
ECON 472*	Economics of Medical Care	4
GERO 416	Health Issues in Aging	4
GERO 421	Managed Care for an Aging Society	4
HP 412	Health Promotion and Prevention Policy	4
HP 420	Gender and Minority Health Issues	4
HP 422	AIDS in Society	4
PPD 414	Community Health Policy and Planning	4
SOCI 475	Medical Sociology	4

### Health Management Track

ECON 472*	Economics of Medical Care	4
PPD 316	Human Resource Management for Public Organizations	4
PPD 318	Financial Accounting in Public and Nonprofit Organizations	4
PPD 320	Organizational Behavior in Public Administration	4
PPD 407*	Financial Management of Public and Nonprofit Organizations	4
PPD 413	Administration of Health Care Organizations	4

\*Prerequisite required

### Minor in International Policy and Management

The minor in international policy and management brings together courses from the School of International Relations, dealing with the new global challenges, specific regions of the world, and international organizations and policies, and the Price School of Public Policy, dealing with core management skills and public policy processes. Students will examine the changes and challenges which are transforming the world, and the policy and management skills used to deal with them. To increase their understanding of the context and application of these concepts, students must complete a semester-long internship either in Washington, D.C. (through participation in the Washington, D.C. semester program) or in Los Angeles with an organization that has an international focus.

Students minoring in international policy and management take three courses in international relations, including the gateway course, IR 305 Managing New Global Challenges; three courses in public policy and management; and an approved internship through the School of International Relations (IR 491 Field Study). For additional course information, see International Relations (page 378).

**Minor in Law and Public Policy**

The minor in law and public policy draws upon four fields of study: public policy and management, law, economics and political science. It provides students with an understanding of the political and economic contexts in which laws are made as well as how legal institutions shape policy formulation. Students learn to analyze the consequences of policy and alternatives; the roles played by government, business and nonprofit organizations in public decision making; and the legal bases for various areas of public policy.

Students minoring in law and public policy take six required courses, including the gateway class, PPD 225 Public Policy and Management, and one elective. The latter enables the student to focus on a specific area of law.

REQUIRED COURSES	UNITS
ECON 203	Principles of Microeconomics 4
LAW 200x	Law and Society 4
POSC 340	Constitutional Law 4
PPD 225	Public Policy and Management 4
PPD 303	Statistics for Policy, Planning, and Development 4
PPD 373*	Public Policy and Planning Analysis 4
And one of the following:	
ECON 434	Economic Analysis of Law 4
FBE 403	Introduction to the Legal Environment of Business 4
POSC 345	International Law 4
POSC 347	Environmental Law 4
POSC 432	The Politics of Local Criminal Justice 4
POSC 440	Comparative Law and the Judicial Process 4
POSC 441	Cultural Diversity and the Law 4
POSC 444	Civil and Political Rights and Liberties 4
POSC 452	Critical Issues in Law and Public Policy 4
PPD 314*	Public Policy and Law 4
PPD 315*	Analytic Foundations for Public Policy 4

\*Prerequisite required

**Minor in Nonprofits, Philanthropy and Volunteerism**

This four-course minor enables students to learn about the nonprofit sector – its organizations, philanthropy and voluntary action. The three course core provides: (1) an overview of the nonprofit sector and philanthropy and its role in the United States, including its historical and theoretical foundations, its various components and its relation to public policy;

(2) a focus on voluntary action and service as one means for social change and problem-solving; and (3) insights into the management of nonprofit organizations. Students select an elective that extends their understanding to the role of nongovernmental organizations in international affairs or to the role of public relations for nonprofits.

This minor is intended for students who plan (1) to work in a nonprofit or charitable organization, whether it is a large organization such as United Way, a small social service agency, an environmental advocacy group, a museum or a religious organization, (2) to participate with nonprofits as a volunteer throughout their lives or (3) pursue further graduate work in a service-related profession.

REQUIRED COURSES	UNITS
PPD 371	The Nonprofit Sector and the Public Interest 4
PPD 402	Management of Public and Nonprofit Organizations 4
PPD 478	Social Innovations 4
Electives (select one)	
BUCO 485	Business Communication Management for Nonprofits 4
JOUR 455*	Public Relations for Non-Profit Organizations 4
IR 371	Global Civil Society: Non-State Actors in World Politics 4
PPD 318	Financial Accounting in Public and Nonprofit Organizations 4
PPD 320	Organizational Behavior in Public Administration 4
PPD 353	Introduction to Philanthropy and Grant Writing 4
PPD 372	Public Service in an Urban Setting 4
PPD 382	International Development 4
PPD 403	Management Analysis I 4

\*Prerequisite: JOUR 350

**Minor in Real Estate Development**

This minor provides students with an overview of the field of real estate development – its principles, market analysis, finance and history, as well as the opportunity to pursue more specialized interests and skills through a set of electives (including courses in architecture, civil engineering and business). It is a 23-24 unit minor, requiring four core courses and two electives. The minor is intended for any students with interests in careers in real estate development or other areas that might be related to real estate development, such as local government, non-profit housing and land use enterprises, urban economics,

public-private partnerships or related entrepreneurial ventures.

REQUIRED COURSES	UNITS
FBE 400x	Introduction to Real Estate Finance and Development 4
PPD 362	Real Estate Fundamentals for Planning and Development 4
PPD 417	History of Planning and Development 4
PPD 437*	Advanced Finance and Investment for Planning and Development 4
Electives (select two):	
CE 460**	Construction Engineering 3
FBE 427	Real Estate Law 4
PPD 410	Comparative Urban Development 4
PPD 420	Environmental Impact Assessment 4
PPD 425	Designing Livable Communities 4
PPD 435	Analyzing Real Estate Markets for Planning and Development 4
PPD 438	Local Economic Development 4
PPD 439	Housing and Community Development 4
PPD 461	Sustainable Communities, Policy and Planning 4
<u>23-24</u>	

\*Prerequisite: MATH 117 and PPD 362

\*\*7 units if CE 460 is selected

**Minor in Urban Policy and Planning**

The 28-unit minor in urban policy and planning focuses on the application of public policy, urban planning and public management to the analysis and solution of urban problems. It draws upon the interdisciplinary faculty and programs of the Price School of Public Policy and includes foundational courses that introduce students to the nature of urban phenomena and the analysis and solution of urban problems. The minor also introduces students to the professional and academic fields of either urban planning and development or public policy and public management. Additionally, based on their specific interests, students have the opportunity to explore in greater depth three areas and approaches of urban problem-solving. This minor is appropriate for students interested in expanding their understanding of the fields of urban planning and public policy and management as potential professional careers as well as increasing their comprehension of the analysis and solution of urban problems.

REQUIRED COURSES (20 UNITS)		UNITS	ELECTIVE COURSES (8 UNITS)		UNITS			
<i>Foundational Courses (12 units)</i>			Students select two courses from this list. They are encouraged through advisement to consider course clusters that reflect special interests.			PPD 372	Public Service in an Urban Setting	4
PPD 225	Public Policy and Management	4	PPD 315*	Analytical Foundations for Public Policy	4	PPD 425	Designing Livable Communities	4
PPD 245	The Urban Context for Policy and Planning	4	PPD 342	Crime and Public Policy	4	PPD 439	Housing and Community Development	4
PPD 303	Statistics for Policy, Planning, and Development	4	PPD 360	Urban Transportation Planning and Policy	4	PPD 461	Sustainable Communities, Policy and Planning	4
<i>Organizations in the Urban Context (4 units)</i>			PPD 362	Real Estate Fundamentals for Planning and Development	4	*Prerequisite required		
PPD 314*	Public Policy and Law	4	PPD 371	The Nonprofit Sector and the Public Interest	4			

## Aerospace Studies

Physical Education Building 112  
(213) 740-2670

### Administration

Jason Ohta, *Lieutenant Colonel, USAF*

### Faculty

*Professor:* Jason Ohta, MPA (*Lieutenant Colonel, USAF*)

*Assistant Professors:* Jorge Avila, M.S. (*Captain, USAF*); Daniel Hampton, B.A. (*Captain, USAF*)

The Department of Aerospace Studies offers a two to four-year program of instruction leading directly to commissioning as an officer in the United States Air Force. To obtain a commission, qualified students must pass an aptitude and physical fitness test and a medical examination, complete the program of instruction and concurrently receive an undergraduate or graduate degree. Credits earned in aerospace studies courses count as electives in some degree programs. Those students who qualify for and are selected to enter Air Force pilot training will be given flight instruction. Qualified applicants may compete for Air Force scholarships. Scholarships may pay for full tuition, books and associated fees. See page 46 for additional scholarship information.

### Program Requirements

#### *Academic Year Program*

This program consists of up to eight semesters of aerospace studies courses (AEST 100ab through AEST 400ab) plus a four- to six-week summer field training course. Students enroll in the first four semesters of aerospace studies (AEST 100ab and AEST 200ab) in the same manner as in any other course of instruction at USC. Application to enroll in the last four semesters (AEST 300ab and AEST 400ab) must be made after completion of the summer field training course. The program can be tailored for students who join after the beginning of their freshman year.

#### *Summer Training Courses*

Field training is offered during the summer months at selected Air Force bases throughout the United States. Students participate in four to six weeks of intensive training, normally between their sophomore and junior years.

The major areas of study in the four-week field training course include junior officer leadership training, career orientation, survival training, weapons training, base functions and Air Force environment, and physical training.

The major areas of study included in the six-week field training course are the same as those conducted at four-week field training, plus the equivalent of the AEST 100ab and AEST 200ab courses.

Additional summer training courses at locations around the world are available to interested students to help them gain knowledge of the management challenges in leadership and human relations, provide a general orientation in Air Force specialties and motivate cadets toward an Air Force career. The training opportunities vary each year but may include parachute and glider training, cultural and language immersion programs, engineering research and apprentice experience, and orientation programs related to space and other Air Force specialties.

---

## Military Science

---

Physical Education Building 110  
(213) 740-4026

### Administration

Robert O. Kirkland, Ph.D. (*Lieutenant Colonel, U.S. Army*)

### Faculty

*Professor/Commander:* Robert O. Kirkland, Ph.D. (*Lieutenant Colonel, U.S. Army*)

*Assistant Professor:* Heath E. Papkov, B.A. (*Captain, U.S. Army*)

The Department of Military Science provides professional training for students leading to a commission, upon graduation, in the Active Army, Army Reserve or the Army National Guard. Through the Army Reserve Officers' Training Corps Program (AROTC), scholarship benefits include full tuition, fees and book stipends. Scholarships are also available for Guaranteed Reserve Forces Duty. Military Science instruction is focused on hands-on leadership development and the practical application of military skills needed to produce America's future leaders. Additionally, military science courses count as electives in many degree programs. MS 101 and MS 102 are open to students who are not enrolled in the program, but have an interest in leadership, management, military history or military training. Enrollment in the Army ROTC program is open to qualified full-time students.

### Scholarship Program

The majority of Army ROTC cadets attend USC on Army scholarships. All Army scholarships are merit-based and are not dependent on individual financial need.

Scholarships are available for both Active Duty and Guaranteed Reserve Forces Duty. Scholarships are awarded on a competitive basis to qualified applicants for two-, three- or four-year periods depending on the applicant's academic level and program of study. Scholarship cadets receive benefits that cover full tuition, fees and a book stipend, and are available to all majors. See page 46 for additional scholarship information.

### Enrolled Cadets

Contracted scholarship and non-scholarship cadets can receive a monthly stipend of up to \$300-\$500 per month subsistence allowance, based on academic class. Contracted scholarship cadets receive an annual \$1,200 book allowance. All enrolled scholarship and non-scholarship cadets receive uniforms and military science textbooks from the department.

### Four-Year Program

The four-year military science curriculum is designed to be part of the student's undergraduate degree program. During the freshman and sophomore years, students receive introductory instruction in the theory of warfare, military history, military leadership and basic military skills. Cadets participate during their junior and senior years in a professional development program with instruction in leadership, management, military justice and advanced military skills.

### Three-Year Program

The three-year program is available to qualified sophomore undergraduate students. Students may compress the first two years of the ROTC program by attending two ROTC classes per semester during their sophomore year. Scholarships are available, on a competitive basis, for students with three years remaining toward the completion of their undergraduate degree. Transfer students who meet the same criteria are also eligible for scholarships. Upon acceptance, students then follow the military science program described for the four-year program.

### Two-Year Program

The two-year program is available to qualified junior and senior undergraduate students and graduate students who have two years of academic work remaining. Veterans who have achieved junior academic status and meet enrollment criteria are also eligible for this program. Students may receive credit

for the first two years of the ROTC program by attending the ROTC Leaders Training Course or by previous junior ROTC participation. Transfer students who meet the same criteria are also eligible for scholarships. Upon acceptance, students then follow the military science program described for junior and senior cadets in the four-year program.

### Field Training

Several military training programs are available to qualified cadets. A five-week paid Leaders Training Course at Fort Knox, Kentucky, qualifies students for the two-year program. All cadets attend a 32-day paid ROTC Leadership Development and Assessment Course at Fort Lewis, Washington, after their junior year. This course provides practical application of advanced military and leadership skills required for commissioning.

### Adventure Training

Qualified candidates may also receive training in Airborne school, Air Assault school (rappelling from helicopters), Cadet Troop Leadership Training (training in Army units around the world), Northern Warfare school (Arctic survival) and Mountain Warfare school.

## Naval Science

Physical Education Building 101  
(213) 740-2663

### Administration

Alvah E. Ingersoll III, M.A., M.S. (*Colonel, U.S. Marine Corps*), Commanding Officer

### Faculty

*Professor:* Alvah E. Ingersoll III, M.A., M.S. (*Colonel, U.S. Marine Corps*)

*Associate Professor:* Rommel M. Esteves, M.S.Eng. (*Commander, U.S. Navy*)

*Assistant Professors:* Scott Carr, B.S. (*Lieutenant, U.S. Navy*); M. Craig Palmer, B.S., M.S. (*Major, U.S. Marine Corps*); Tiana Tafua, B.A. (*Lieutenant, U.S. Navy*); Matthew Thatcher, B.S. (*Lieutenant, U.S. Navy*)

The Department of Naval Science provides professional training for students leading to a reserve commission, upon graduation, in the United States Navy or the United States Marine Corps. Through the Naval Reserve Officers Training Corps Program (NROTC), scholarship students receive full tuition, fees, book stipend and \$250-\$400 per month subsistence allowance. The university also provides an additional automatic scholarship of \$4,000 per year for each NROTC scholarship recipient. Non-scholarship students may apply to participate as members of the midshipman battalion with limited financial assistance, earning a reserve commission upon completion of the baccalaureate degree. Because of the rapid development of highly technical ship systems, aviation and other military equipment, science and engineering majors are highly desirable; however, Navy scholarships are currently available to students pursuing any major offered by the university, as long as they complete basic technical requirements. In addition to university requirements, midshipmen must complete 22 units of naval science courses, a physical fitness test and three summer cruises, each about four to eight weeks long. The department also conducts a sail training program for all midshipmen.

All naval science courses, from ship systems and management to naval operations and amphibious warfare, are open to students who are not in the program but have an interest in the Navy and related fields, such as engineering, navigation and naval operations, history and management.

### Program Requirements

#### *Scholarship Program*

The majority of naval science students attend the university on Navy scholarships. Scholarships are awarded primarily on a four-year basis to high school seniors selected in nationwide competition. A two-year upper division scholarship program is also available with a similar selection process to students who have not yet begun their junior year in college. Applications for both types of scholarships are due by December 1 and March 1, respectively, each year. In addition to tuition and fees, books and uniforms, students receive subsistence allowance of \$250-\$400 per month. Navy Option midshipmen starting their freshman year of college in the fall of 2010 or later will be required upon graduation to serve a minimum of five years of active military service. Additional requirements may be required for specific job assignments.

#### *College Program*

College program non-scholarship students are selected by the professor of naval science at the beginning of each academic year from among applicants of the freshman and sophomore classes. These students receive uniforms, naval science textbooks, and if selected for advanced standing, subsistence pay of \$150 per month in their junior and senior years. Upon graduation, a non-scholarship student receives a reserve commission in the U.S. Navy or U.S. Marine Corps, and serves on active duty for a minimum of three years. College Program students may be recommended for scholarship benefits based on superior academic performance and participation in NROTC. See page 46 for additional scholarship information.

#### *Marine Corps Option*

Highly motivated NROTC students may request designation as Marine Corps option students, and may also pursue any USC academic degree. Marine Corps option students are required to take NSC 135, NSC 137, NSC 343, NSC 392, NSC 453 and NSC 454. In addition, their final summer cruise involves intensive Marine training. Marine Corps option students also participate, on a limited basis, in field training exercises during the academic year. Marine Corps Option midshipmen will be required upon graduation to serve at least four years on active duty.

#### *Requirements for Commissioning*

Students must meet USC degree requirements in their chosen fields and complete the prescribed naval science courses. In addition, scholarship students must include in their programs MATH 125 Calculus I and MATH 126 Calculus II and PHYS 151L Fundamentals of Physics I: Mechanics and Thermodynamics and PHYS 152L Fundamentals of Physics II: Electricity and Magnetism; two courses of English, one course in American history/national security policy and one course in world cultural regional studies. College program students may take a year of both college-level algebra and physical science in lieu of the calculus and physics requirements.

## Graduate Degrees

### Admission

Applicants for admission to the Master of Health Administration; Executive Master of Health Administration; Executive Master of Leadership; Master of Planning; Master of Planning and Development Studies; Master of Public Administration; Master of Public Policy; Master of Public Policy and Management; Master of Real Estate Development; Doctor of Policy, Planning, and Development; Doctor of Philosophy in Public Policy and Management; and Doctor of Philosophy in Urban Planning and Development must have a bachelor's degree or its equivalent from an accredited educational institution. In recognition of the increasing diversity of capabilities required as the theories and practices of policy, planning, and development evolve, students from a variety of undergraduate and graduate backgrounds are encouraged to apply.

Applicants for admission will be expected to have completed a broad range of undergraduate courses in addition to their academic major or professional concentration. Generally, this will be reflected in completion of courses from the following fields: English; economics (basic theory); political science, history or sociology; physical or natural science; art or philosophy. In addition, mathematics (algebra, calculus, probability theory) and a course in statistics are strongly recommended.

### Application for Admission

Admission to graduate programs in the Price School of Public Policy is highly selective and competitive. Preference is given to those with a record of high educational achievement and personal qualities favoring success in the fields of planning or development. Applicants must have achieved superior grades during undergraduate and any graduate education. A grade point average of at least 3.0 (A = 4.0) is normally expected as well as satisfactory scores on the Graduate Record Examinations (GRE). The GRE and GMAT are neither accepted nor required for the DPPD or executive MHA programs. Students applying for admission to the Master of Planning, Master of Planning and Development Studies or the Master of Real Estate Development program may also submit either the Graduate

Management Administration Test (GMAT) or the Law School Admission Test (LSAT). In exceptional cases, an applicant who has not met these scholarship requirements may be admitted with conditions of admission.

For specific information on admission requirements and application procedures, contact the Price School of Public Policy, Office of Recruitment and Admissions, at (213) 740-0550. Certificate in Transportation Systems applicants should apply to the USC Viterbi School of Engineering. For additional information, contact the school at (213) 740-0587.

### Transfer Credit

The Degree Progress Department determines whether work done elsewhere is available for consideration for credit toward the USC degree. That office requires official transcripts of all course work done before entering USC. A Graduate Transfer Credit Statement of these official transcripts, done after a student has been admitted to regular status at USC, will indicate which units are available for transfer. These courses do not apply toward the degree unless, and until, the student's major department approves and submits transfer credit to the Degree Progress Department in the Office of Academic Records and Registrar.

Application of any available transfer credits toward a graduate degree will be determined by the director of the particular degree program, based on the semester units available for transfer as shown on the Transfer Credit Statement.

These general guidelines are followed by the admissions evaluator and by faculty members: (1) the work must be completed at an accredited graduate school; (2) the grade must be B or better; (3) the work must be a fair and reasonable equivalent to current USC course work at the graduate level which fits into the logical program for the degree;

(4) the units are not more than seven years old at the time of admission to their master's program (or 10 years old for a doctoral program); (5) the units must reflect current knowledge in the field; and (6) the work must be completed prior to admission to the USC program.

USC does not give transfer credit for life experience, credit by examination, noncredit extension courses or thesis course supervision.

Please consult with your degree director before enrolling in courses outside of USC. In many of the Price School's master's degree programs, only courses taken outside of USC prior to admission may be applied to your degree.

### Waiver of Course Content

The school recognizes that some applicants may have covered the material contained in core courses or courses required for a particular specialization. Under these circumstances, one particular course requirement may be waived, allowing the student to complete a more advanced course in the same area. Students who have a background in a particular area of study may be allowed to substitute other courses. In these situations students do not receive unit credit but are permitted to take course work which does not repeat earlier academic experiences.

Waiver of content is usually given only in the case of previous academic study of the subject, not in the case of experiential background in the area.

Students who believe they are eligible for content waiver decisions must petition the faculty of the school, providing evidence of the previous work through transcripts, syllabi and other pertinent material. Contact the school's Student Affairs Office for information.

## Master of Health Administration

The issues surrounding the delivery and financing of health services have an enormous impact on individuals and the communities in which we live. The health care industry now accounts for more than 15 percent of the U.S. economy. Fast-moving developments in technology, economics, ethics, finance, policy, management and globalization are driving changes in the health sector. Effective health leadership requires an understanding of governance systems and the complex interplay between the public, private and nonprofit sectors as well as the dual imperatives of both the clinical and business facets of health care delivery. As the health care system changes, career opportunities abound. The field has a tremendous need for leaders, managers and analysts – in hospitals, health plans, physician practices, health-related enterprises, community health organizations, social advocacy groups, and regulatory and legislative agencies.

The Price School of Public Policy's multidisciplinary nature, with degree programs in public policy, public administration, urban planning, and international policy, adds breadth that distinguishes USC's MHA degree, providing students with an understanding of the larger social context in which the health sector is embedded and how it intersects and interacts with other social policy issues.

The Price School programs in health management and policy offer two degree options – the Master of Health Administration and the Executive Master of Health Administration. These degrees position the student to acquire the knowledge, skills and applied experience to shape health policy and lead health organizations. Requirements for the Executive MHA differ from those of the traditional MHA and are found on page 881.

The Master of Health Administration builds a solid foundation emphasizing managerial, analytical and public policy skills for those entering the health field, while the Executive Master of Health Administration deepens professional skills and permits those already working in the health field to advance to higher levels of leadership.

The MHA curriculum incorporates five major areas of competence: management/operations/leadership; health policy analysis; health finance; health information technology; and, health care quality. Each student will be exposed to these core areas and will specialize in two of them. The program prepares students for management positions in hospitals; managed care systems; physician

groups; ambulatory care systems, government agencies concerned with health care policy, planning, quality assurance and regulation; and private firms involved in health care consulting, finance, performance assessment and evaluation.

### Requirements for Admission

#### General

Applicants must have a bachelor's degree from an accredited college or university. Applicants may take courses on limited standing pending formal admission to the master's degree program.

Applicants with bachelor's degrees must have a minimum grade point average of 3.0 in their undergraduate course work and a score of at least 500 on the verbal and at least 500 on the quantitative sections of the GRE. Deviations from these minimums will be allowed when justified by exceptional work experience, letters of recommendation or improvement in academic performance during the third and fourth years of undergraduate study.

### Prerequisites

#### Statistics

A basic competence in descriptive and inferential statistics is also required for the MHA program. The statistics prerequisite must be satisfied within the first 12 units or before enrolling in PPD 557 Modeling and Operations Research. This prerequisite may be met in one of two ways: (1) entering students must have passed an undergraduate inferential statistics class, with a grade of "B" or better, at an approved university within three years of matriculation, or (2) completing PPD 502x Statistical Foundations for Public Management and Policy with a grade of "B" or better (this course credit may not count toward the MHA degree).

#### Limited Status Students (Preadmission)

Students taking courses who have not been admitted to the school are designated limited status students. These students may be waiting for part of their application package materials to arrive; or they may be investigating whether an MHA may be right for them.

To be considered for limited status reenrollment, interested students need to complete the Price School of Public Policy Limited Student Application for Enrollment form and submit official or unofficial copies of their transcripts from their bachelor's degree granting institution. Students with a 3.0 grade point average (A = 4.0) may enroll in up to 8 units of graduate courses in the Price School of Public Policy.

Price School of Public Policy Limited Student Application for Enrollment forms may be obtained from the Admissions Office, USC Price School of Public Policy, University of Southern California, RGL 111, Los Angeles, CA 90089-0626, telephone (213) 740-6842. Limited students may only enroll during the in-person registration period (the week before classes begin).

Limited status students may apply only 8 units of appropriate graduate work toward the MHA after admission. Units beyond these first 8 must be petitioned for through the school. Students on limited status are encouraged to complete the application and admission process before completing those first 8 units.

### Certificate Program

Information regarding the Certificate Program in Health Management and Policy Programs can be found on page 892.

### Curriculum

Curriculum for the MHA includes 48 units (40 required units and 8 elective units). In addition, a supervised field placement (residency) in a health service organization is required. The MHA degree is designed to be completed in two years of full-time study, but can be extended for those who work while going to school. Evening classes and classes that meet in an intensive, workshop format of two to four sequential days of training are designed to accommodate working professionals.

REQUIRED CORE (40 UNITS)		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 509	Problems and Issues in the Health Field	4
PPD 510a	Financial Management of Health Services	4
PPD 511	Health Information Systems	2
PPD 513	Legal Issues in Health Care Delivery	2
PPD 514	Economic Concepts Applied to Health	4
PPD 515	Strategic Management of Health Organizations	4
PPD 516	Financial Accounting for Health Care Organizations	4
PPD 517	Concepts and Practices in Managing Health Care Organizations	2
PPD 518	Quality of Care Concepts	2
PPD 545	Human Behavior in Public Organizations	4
PPD 557	Modeling and Operations Research	4

*Electives*

In addition to the 40 required units, students are required to take 8 units of electives. Elective courses will be taken in two of the five specialization areas: management/operations/leadership; health policy analysis; health finance; health information technology; and health care quality. The two specializations will be selected by the student with

the advice and written consent of the MHA program director and faculty adviser.

**Residency**

The MHA student is required to complete a 1,000 hour residency at a health care organization, generally during the second year of study. This residency may be reduced, but

must include at least 500 hours, depending on the health care experience of the student. The residency is designed to provide the student with practical administrative experience that complements program course work.

## Executive Master of Health Administration

The Executive MHA Program offers clinical and management professionals an opportunity to advance their careers in health care and to more effectively improve health services within their communities. Mid- to senior-level professionals who have the ambition and potential to serve as industry leaders in the highly dynamic and competitive health care environment are encouraged to consider the Executive MHA degree. The Executive MHA is geared to those who have demonstrated capabilities, yet who will benefit from expanded skills and competencies that will enable them to lead.

Participants sharpen their business acumen by gaining exposure to and in-depth knowledge of the latest theories and the best in contemporary health management practice. A practical, problem-solving approach ensures that skills can immediately be applied on the job.

**Requirements for Admission**

Applicants for the Executive Master of Health Administration apply directly to the program. A minimum of five years of experience with progressively greater levels of responsibility in health care or a related field is required for entry into the Executive MHA program. Applicants must have earned a bachelor's degree from an accredited college or university. A minimum grade point average of 3.0 in undergraduate course work is required. Allowances may be made when justified by exceptional work experience and letters of recommendation.

**Prerequisites**

*Accounting*

A basic competence in accounting is required for the Executive MHA program. The accounting prerequisite must be satisfied before enrolling in HMGT 565 Managing the Organization's Financial Health. This prerequisite may be met in one of three ways: (1) completing the non-credit Executive MHA accounting workshop with a passing score; (2) demonstrating prior work experience or (3) completing prior course work at an accredited academic institution in accounting and finance.

**Curriculum**

The Executive MHA offers a hybrid online/in-residence executive education program that will prepare the graduate to meet career objectives. The program provides students with the flexibility to meet program requirements while maintaining full-time administrative positions, but also emphasizes the importance of an integrated approach to executive education. In addition to the synchronous and asynchronous learning modules included in each course, students will participate in five-day, in-residence sessions at the University Park Campus twice during the program. The first in-residence session will occur before the midpoint of the program, and the second session will be a capstone experience in the last semester of the program. The Executive MHA degree program does not require a supervised field placement (residency) in a health care organization.

The curriculum of the EMHA is organized around five themes: thriving in transformational times through innovative leadership; delivering cost-effective care in an era of value-based purchasing; providing efficient management and administration; developing and implementing strategies to enhance patient safety and quality of care; and demonstrating organizational and clinical effectiveness through health information technology. These integrated themes and the associated content provide graduates with a comprehensive approach that expands their understanding of the key principles and applications necessary to function in a senior administrative leadership role.

REQUIRED COURSES (36 UNITS)		UNITS
HMGT 520	Leading People and Health Care Organizations	4
HMGT 540	Health Economics, Financing and Reimbursement	2
HMGT 565	Managing the Organization's Financial Health	4
HMGT 570	Strategic Management	4

HMGT 575	Managing and Improving Health	4
HMGT 600	Managing Risk	2
HMGT 601	Operations Management for Accountability	4
HMGT 602	Operational Efficiency Processes in Health Care Organizations	2
HMGT 603	Developing and Monitoring of Quality and Patient Safety Outcomes	2
PPD 511	Health Information Systems	2
PPD 518	Quality of Care Concepts	2
PPD 521a	Information Technology Management Systems in Health Care	2
PPD 605	Frontline Issues in Health Services Administration and Policy	2

Participants in the executive program gain practical skills. Emphasis is given to executive decision-making; development of sound planning, analytical and leadership capabilities; and strong interpersonal communication. More specifically, Executive MHA graduates will achieve advanced competency in disciplines which include economics and finance, health care regulation, business development, operations, strategic analysis and management, organizational design, quality and outcomes assessment, and information management. Our graduates will model effective leadership and management in a rapidly evolving health care environment.

The core faculty is drawn from the USC Price School of Public Policy and includes senior, experienced faculty, along with nationally-renowned academic specialists and health care experts. The opportunity to interact with health care's leading thinkers, policymakers and practitioners is an essential component of the Executive MHA program.

The Executive MHA office is located in Ralph and Goldy Lewis Hall, Room 307, Price School of Public Policy, (213) 740-2984, email emha@usc.edu.

## Master of Science in Health Systems Management Engineering

This program is jointly sponsored by the Epstein Industrial and Systems Engineering Department and the Price School of Public Policy, and administered by the Epstein Industrial and Systems Engineering Department. This degree is designed for students with sufficiently quantitative bachelor's degrees in engineering, the sciences or applied social science who are interested in operations management and health care applications, and whose career objectives lead to increasing technical management responsibilities in large health

care organizations, particularly hospitals. Students with less quantitative social science or other non-technical backgrounds interested in health administration objectives may also want to consider the Master of Health Administration program in the Price School of Public Policy. For degree requirements, see Industrial and Systems Engineering, page 665.

## Executive Master of Leadership

The Executive Master of Leadership Program offers professionals from a variety of fields including public administration, public policy, planning, law enforcement, transportation and other public, nonprofit and business organizations, with at least five years of professional experience, the opportunity to build leadership skills at five levels: individual, team, organizational, community and institutional. The program design offers participants insight into the mechanisms that facilitate effective personal and organizational networks, as well as collaborative problem-solving strategies and practices.

The program follows a cohort model for the four required core courses. The degree curriculum has three distinguishing features: a design to connect ethics with leading through core values; an interdisciplinary and multi-disciplinary problem-solving approach; and transformational leadership that connects the public, private and nonprofit sectors.

### Requirements for Admission

Applicants for the Executive Master of Leadership apply directly to the program. A minimum of five years of experience with progressively greater levels of responsibility is required for entry into the program.

Candidates for admission must have earned a bachelor's degree from an accredited college or university with a minimum 3.0 grade point average. Exceptions to the minimum GPA requirement may be made when justified by exceptional work experience and letters of recommendation.

Applicants must submit a standard USC graduate application and fee along with official transcripts from all undergraduate and graduate institutions attended. Letters of recommendation, a current resume, an essay and an interview will also be required.

### Degree Requirements

Students are required to complete 28 units of graduate work – 16 units of required core courses and 12 units of electives.

REQUIRED CORE COURSES (16 UNITS)		UNITS
PPD 640	Leadership Foundations: Competencies and Core Values	4
PPD 641	Leading Individuals, Groups and Teams	4
PPD 642	Strategic Leadership of Organizations	4
PPD 643	Leading Transformations Across Sectors: Integrative Seminar	4

### Electives

In addition to these 16 required units, students are required to take 12 units of electives.

Elective courses will be selected in consultation with the faculty adviser based on the student's individual learning/development plan. Students will choose these electives in order to concentrate in a particular area of study. The following are examples of concentrations that are available: public management, nonprofit policy and management, urban planning, transportation, public policy and political management. The Price School of Public Policy offers a wide range of electives to students each semester.

## Master of Planning

The planning of cities is as old as urban civilization. The contemporary planning profession has expanded to include a broad range of applications that draws upon emphases of foresight, common good and interconnections of elements in human settlements. Planners are engaged in evaluating and guiding community and urban development at geographic scales, ranging from the local American

neighborhood to the global village utilizing the public, private and nonprofit sectors.

Planners play an increasingly important role in managing the pressing problems and competing demands of change and growth in shaping a better future. The Master of Planning (MPI) curriculum reflects this forward-looking and constantly evolving role.

The MPI curriculum provides a core of knowledge underlying the key forms and applications of planning. This core sets the foundation for a wide choice of specific careers in the field and extends the relevance and value of graduate education over an extended period of time. A goal of the MPI curriculum is to prepare planners to practice anywhere in the world.

The Planning Accreditation Board of the American Planning Association and the Association of Collegiate Schools of Planning accredit the MPI program.

All persons pursuing the MPI will complete core courses which present basic theories, techniques and methods.

Concentrations are available in five broad areas: economic development; preservation and design of the built environment; social and community planning; sustainable land use planning; and transportation and infrastructure planning. After students register, the faculty will suggest specializations that allow students to focus their concentrations even further or span planning more broadly.

A concentration in any of these areas qualifies graduates for a wide range of private, public and nonprofit sector careers with government agencies, consulting firms, corporations, utilities, international technical assistance programs, nonprofit and special interest organizations and joint public-private ventures.

**Curriculum Requirements**

The program of study for this professional graduate degree requires completion of 48 units, including 16 units of core curriculum, 8 units of planning studios, 4 units of methodology related to the student’s concentration, a required concentration gateway course and 16 units of electives, including two additional courses related to a student’s concentration. A comprehensive examination and an approved non-credit internship are also required. The degree may be pursued on either a full-time or part-time basis.

*Statistics Prerequisite*

A basic competence in descriptive and inferential statistics is required. This prerequisite may be fulfilled by successfully completing PPD 525 or by having completed a previous course (within five years) with a grade of B or higher (A= 4.0).

*Core Curriculum*

**THE CORE CURRICULUM COMPRISES EIGHT**

LECTURE-SEMINAR COURSES:		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2

PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2
		16

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

*Planning Studios*

Planning studios are an integral part of the curriculum of the Price School of Public Policy, providing the essential educational link between academic education and preparation for professional practice. The planning studios require that students learn to work together as a team by applying their respective capabilities and knowledge to a real-world common problem and to produce a professional project. Students must complete 8 units of domestic or international planning studios under PPD 531L (4) to satisfy this requirement. A maximum of 12 units may be taken.

Local agencies, communities and firms often sponsor planning studios to obtain research and analysis. Community groups seek assistance as a means of informing themselves more thoroughly on community problems and issues or for obtaining planning analysis otherwise unavailable to them. The products of planning studios are usually in the form of policy recommendations, a suggested plan or alternative plans, databases, background information, base maps, or any one of many specific contributions.

MPI planning studios can either be situated in the United States or around the world. Past courses have examined the tragedy around Katrina in New Orleans, developed economic development plans for local Southern California cities, and studied changing public spaces in Germany.

Price International Laboratories (PPD 613ab) can be taken as an elective in the MPI program. The program strongly encourages students to enroll in one laboratory during their course of study. In recent years, Price lab courses have been offered in China, Brazil and England.

*Concentrations (16 units)*

Students must declare their concentration during the fall semester prior to taking the comprehensive examination in the spring semester. Students are required to complete the gateway course and methodology course related to their concentration as part of their preparation for their comprehensive examination. The student’s concentration must contain a 4-unit methodology course, a 4-unit gateway course and 8 other units. At least 12 of these units must be selected from Price

School curriculum. Courses outside the Price School should be selected by the student with the approval of an academic adviser and must be directly concerned with the subject matter of the concentration.

After students register, the faculty will provide them with a series of specializations they may take in association with the concentrations. These specializations are not required; they are provided as guidance for students interested in these subject areas. The specializations vary. Some suggest ways that students can more deeply study a single area within planning, while others provide a broad overview of planning and policy issues. The specializations draw upon courses within the MPI program, the Price School sister programs and courses from other USC units.

*Economic Development* is the basis for prosperous community development. Job creation and the development of service or employment sites are the core of economic development. At a higher geographical scale, development of regional economies provides a focus for planning in an international context. Suggested courses for students selecting this concentration include PPD 622, PPD 624, PPD 625, PPD 626, RED 509 and RED 542.

*Preservation and Design of the Built Environment*

addresses the architecture of the city, viewed not as a series of individual buildings, but as a set of visual and functional connections between buildings on a street front or in a district. In contemporary settings, planning and construction do not begin with a blank slate. Rather, new structures are inserted into an existing built environment, which must be respected for its historical heritage and its contributions to the new. Students in this concentration are encouraged to draw from courses related to landscape architecture and historic preservation in the School of Architecture. Suggested courses for students selecting this concentration include PPD 530, PPD 615, PPD 618, PPD 619, PPD 623, PPD 631 and PPD 692.

*Social and Community Planning* gives specific attention to the changing needs of neighborhood residents and to the ways in which different planning policies, programs and activities contribute to resident well-being. Community planning is a process of organizational change that links residents and services to produce communities that are safe, healthy and socially connected. Achieving these goals demands that residents actively advocate for their communities. Suggested courses for students selecting this concentration include PLUS 611, PPD 606, PPD 617, PPD 618, PPD 619, PPD 620, PPD 621, PPD 686 and PPD 690.

*Sustainable Land Use Planning* centers on community land use planning set in the context of regional growth or decline. The planning process involves forecasting transportation means, population growth and housing needs, together with providing comprehensive planning to accommodate that growth in a way that preserves and enhances local quality of life. Envisioning better futures, livability, environmental protection accessibility, mobility and affordable housing production are all part of smart growth strategies for sustainable regional growth. Suggested courses for students selecting this concentration include PLUS 611, PPD 615, PPD 618, PPD 620, PPD 621, PPD 627, PPD 631, PPD 692 and PPD 694.

*Transportation and Infrastructure Planning* is the combination of vital functions that determine the efficiency and productivity of a city. Issues of access and mobility of urban residents must be addressed. Circulation of workers from home to workplace, and of residents to shopping and services, are fundamental determinants of land use and urban form. Students in this concentration acquire mastery of the basics of transportation analysis, with emphasis on analysis of different policies that serve transportation and infrastructure needs within urban areas. Suggested courses for students selecting this concentration include PPD 557, PPD 588, PPD 589, PPD 621, PPD 630, PPD 631, PPD 635 and PPD 692.

#### *Concentration Gateway Courses*

Students are required to complete their gateway course prior to participating in the comprehensive examination. The following courses are required for their concentration:

*Economic Development:* PPD 639 Introduction to Community and Economic Development

#### *Preservation and Design of the Built*

*Environment:* PPD 644 Shaping the Built Environment

*Social and Community Planning:* PPD 628 Urban Planning and Social Policy

*Sustainable Land Use Planning:* PPD 619 Smart Growth and Urban Sprawl: Policy Debates and Planning Solutions

*Transportation and Infrastructure Planning:* PPD 634 Institutional and Policy Issues in Transportation

#### *Concentration Methodology Courses*

Students are required to complete one methodology course related to their concentration. Students are encouraged to complete a second methodology course among their electives. The following courses are required for their concentration:

*Economic Development:* PPD 625 Planning and Economic Development Finance

#### *Preservation and Design of the Built*

*Environment:* PPD 627 Design Skills for Urban Planners

*Social and Community Planning:* PPD 616 Participatory Methods in Planning and Policy

*Sustainable Land Use Planning:* PPD 617 Urban Demography and Growth

*Transportation and Infrastructure Planning:* PPD 633 Urban Transportation Planning and Management

#### *Comprehensive Examination*

Successful completion of a comprehensive examination is required of each student seeking the Master of Planning degree (except for students pursuing the dual degree with either economics or gerontology). Students pursuing the dual degree with real estate development can choose the MPI or MRED examination. The comprehensive examination integrates accumulated lessons of the core courses and planning studios. Students are also expected to utilize material covered in their concentration and electives.

The comprehensive examination is given only in the spring semester of each year. Students usually take the examination in the last semester of their second year. Students must declare their concentration during the fall semester prior to completing the comprehensive examination in the spring semester. They must have completed the gateway and methodology courses in the declared concentration prior to taking the comprehensive examination.

The MPI Program degree committee administers the comprehensive examination. Examinations are graded on a pass/fail basis. Students who fail the examination may take it a second time the next year. The examination may only be repeated once.

#### *Planning Electives*

Students are encouraged to select electives related to their course of study. A Price international laboratory course is especially encouraged.

#### *Internship*

Students working toward the Master of Planning degree must complete an internship of at least 10 weeks duration and 400 hours in an organization engaged in planning or a closely related activity. Students must submit a report to the director of career services describing and evaluating the internship experience. Arrangements must also be made for an evaluative report of the internship by the student's supervisor submitted directly to the academic adviser. The internship is not for unit credit.

Students often fulfill their internship while working part-time in a planning-related job during their course of study in the program or in the summer between the two academic years. If a student has had equivalent career experience prior to admission to the program, the MPI director may waive the internship requirement on the recommendation of the student's academic adviser.

The Price Office of Career Services actively works with school alumni and area planning organizations to assist students in obtaining appropriate internships. Numerous internship opportunities are available in the greater Los Angeles area. The student is responsible for securing the internship and fulfilling the requirement.

#### *Directed Research*

With the advice of the faculty, a student may elect to enroll in directed research as an elective. Working directly with a faculty member, the student pursues an interest or problem appropriate to the student's program of study.

The faculty member supervising the student must approve the final product of directed research. The final product may be a written report, article, graphic formulation, physical model, mathematical-statistical analysis, computer output or film — depending on the most appropriate expression of the research undertaken.

#### **General Requirements**

##### *Residence and Course Load*

The Master of Planning normally requires two academic years of full-time study. Courses are also scheduled to allow completion on a part-time basis.

At least 36 units of graduate-level study must be done in residence at USC. The residency requirement may not be interrupted without prior permission from the Price School of Public Policy. Students accepted into the program with academic deficiencies will require a correspondingly longer time to complete their course work. Students seeking the degree on a part-time basis must take at least one course each semester.

Students must be enrolled at USC for the fall and spring semesters each year until all degree requirements have been met. Students who find it necessary to be excused from a semester of registration must request a leave of absence from the Academic Programs Office by the last day to drop/add courses of the semester in question; such leaves may be granted for up to one year. For additional information refer to USC policies governing continuous enrollment, readmission, and leaves of absence in the Academic Policies section of this catalogue.

*Time Limits*

All requirements for the Master of Planning must be completed within five calendar years from the beginning of the semester in which the student was admitted to the program. University regulations prohibit the acceptance of credits for courses taken toward the Master of Planning degree more than seven years after the date they were successfully completed.

*Grade Point Average Requirement*

While enrolled in the program a student must maintain a grade point average of at least a 3.0 for all courses taken toward the degree.

*Probation and Disqualification*

Any student with a cumulative grade point average below 3.0 for all courses taken in the program will be placed on academic probation. A student whose semester grade point average is below 3.0, but whose cumulative grade point average is 3.0 or higher, will be placed on academic warning.

A student may be disqualified to continue toward a graduate degree if the student has been on academic probation for two consecutive semesters. Whether or not on academic probation or warning, a student may be disqualified at any time from continuing in the program if the dean of the school, after consultation with the faculty, determines that the student is deficient in academic achievement or in another qualification required for the attainment of the Master of Planning degree.

*Course Exemptions and Transfer of Credits*

Graduate work by transfer may be accepted from approved graduate schools as determined by the USC Articulation Office upon recommendation of the dean of the school.

Not more than 12 units of graduate work, with grades of B or better may be transferred for credit to the Master of Planning degree.

The following courses, or their equivalents, cannot normally be transferred for unit credit from other institutions: PPD 500, PPD 501a, PPD 524, PPD 525, PPD 526, PPD 527, PPD 529, PPD 531L, PPD 533, PPD 590, PPD 594ab. Undergraduate work will not be credited for advanced or graduate standing. Students may petition to receive subject credit for these courses; but unit requirements must be met through the completion of additional electives.

Some applicants for admission to the school have been engaged in work in planning, development or closely related activities. Although this experience may have been beneficial to the students involved and may satisfy the internship requirement, it may not be considered equivalent to academic education.

## Master of Planning and Development Studies

The Master of Planning and Development Studies degree is designed for mid-career professionals in planning, development or related disciplines who desire to update and/or redirect their professional skills and careers. The program is very flexible, allowing students to pursue areas of expertise that they find valuable in their present or future careers. Entering students must have a minimum of five years of planning, development or related professional work experience.

**Curriculum Requirements**

The Master of Planning and Development Studies program requires completion of 28 units. Basic degree requirements consist of two core courses; 16 units in a concentration area approved by an adviser; and an integrative seminar course during which the student completes a written and oral comprehensive examination.

REQUIRED COURSES		UNITS
PPD 611	Policy Issues in Planning and Development	4
PPD 612	Research and Analytical Techniques	4
PPD 638	Integrative Seminar (normally in the last semester in conjunction with the comprehensive examination)	4

*Concentration Area(s)*

Students elect a concentration area from one of three already defined or, with prior approval by an adviser, design a concentration from Price School of Public Policy courses and USC graduate courses. A minimum of eight units must be Price School of Public Policy courses. The three defined concentration areas are:

*Community Economic Development Select*

16 units from the following courses: PPD 618 (4), PPD 623 (4), PPD 624 (4), PPD 625 (4), PPD 626 (4), PPD 629 (4), PPD 631 (2); RED 509 (4), RED 542 (3), RED 546 (3)

*Environmental Policy and Planning Select*

16 units from the following courses: PLUS 600 (4), PLUS 633 (4), PPD 531L (4), PPD 617 (4), PPD 619 (4), PPD 620 (4), PPD 621 (4), PPD 622 (4), PPD 631 (2), PPD 634 (4), PPD 712 (4)

*International Planning and Development Select*

16 units from the following courses: PLUS 631 (4), PLUS 632 (4), PLUS 633 (4), PLUS 635 (4), PLUS 640 (4); PPD 626 (4); RED 583 (2), RED 585 (4)

*Integrative Seminar and Comprehensive Examination*

Successful completion of a comprehensive examination is required of all students seeking the Master of Planning and Development Studies degree. The integrative seminar course (PPD 638) and comprehensive exam should be taken during the semester of intended graduation. During the seminar class, students identify a practice-oriented problem covering the core courses and concentration area, which ideally is sponsored by a planning and/or development office or firm. The student will: (1) prepare a professional-quality document; (2) present the solution to a faculty committee with invited sponsor guests; and (3) have an oral defense. Students who fail the examination may take it again within one year, but it may only be repeated once.

**General Requirements**

*Residence and Course Load*

The Master of Planning and Development Studies may be completed in one academic year of 12 units in the fall and spring semesters and the four-unit integrative seminar/comprehensive examination the following summer semester.

At least 18 units of graduate study must be done in residence at the University Park Campus, the USC State Capital Center or at an approved off-campus study center.

**Time Limit**

Students in the program must complete all requirements for the Master of Planning and Development Studies within five calendar years from the beginning of the semester in which the student was admitted to the program.

**Grade Point Average Requirement**

While enrolled in the program, a student must maintain a grade point average of at least 3.0 (A = 4.0) for all courses taken toward the degree.

**Probation and Disqualification**

Any student with a cumulative grade point average below 3.0 for all courses taken in the program will be placed on academic probation. A student whose semester grade point average is below 3.0, but whose cumulative grade point average is 3.0 or higher, will be placed on warning.

A student may be disqualified to continue toward a graduate degree if the student has been on academic probation for two consecutive semesters. Whether or not on academic probation or warning, a student may be disqualified at any time from continuing in the program if the dean of the school, after consultation with the faculty, determines the student is deficient in any degree requirement.

**Course Exemption and Transfer of Credits**

Credit for graduate work may be transferred from approved graduate schools as determined by the USC Degree Progress Department in the Office of Academic Records and Register on recommendation of the dean of the school. Not more than four units of graduate work, with grades of B or better, can be transferred for credit toward the Master of Planning and Development Studies degree.

The following courses, or their equivalents, may not normally be transferred for unit credit from other institutions: PPD 611, PPD 612 and PPD 638. Undergraduate work may not be transferred into the degree program for unit credit.

Some applicants for admission to the school will have been engaged in work in planning, development or closely related activities. Although this experience should be beneficial to the students involved, it may not be considered equivalent to academic education.

## Master of Public Administration

**Admission**

The Master of Public Administration programs are under the jurisdiction of the Price School of Public Policy. All admissions decisions are made by the school, following guidelines set by the university. See the Admission section of this catalogue.

All questions about the programs and all materials required for admission should be submitted to: MPA Programs, Admissions Office, RGL 111, University Park, University of Southern California, Los Angeles, CA 90089-0626.

Admission to each of these programs is determined by the faculty and admissions committees connected with those areas. Application packages should be sent directly to the program office.

**Applications**

The admission decision is made using criteria which include verification that the applicant has completed a bachelor's degree from an accredited college, has maintained a B average in undergraduate course work and has earned an acceptable score on the verbal and quantitative portions of the Graduate Record Examinations (GRE) or the Graduate Management Admissions Test (GMAT). Other elements of the applicant's educational and experiential background are also evaluated. International students whose native language is not English must also submit a Test of English as a Foreign Language (TOEFL) score.

Each candidate should submit the following to the school: (1) official transcripts of all previous college and university work, showing an awarded degree where appropriate; (2) copies of GRE or GMAT scores; (3) an essay answering questions on the admission questionnaire provided by the school; (4) an up-to-date resume which includes academic and professional accomplishments; (5) three or more letters of evaluation from previous instructors and from professional associates who can attest to the applicant's potential; (6) completed USC Graduate Admission Application, along with the non-refundable processing fee; and (7) completed Price School of Public Policy Supplemental Graduate Application.

International applicants may be asked to supply additional information. See the Graduate Admission section of this catalogue.

**Deadlines**

Applications for admission are evaluated monthly. Those students who are also applying for financial aid, or who must meet other deadlines for admission, should submit application materials early enough to allow the admissions decision to be made in advance of those other deadlines.

The admissions process generally takes about four to six weeks after all necessary materials have been submitted.

**Pre-Service/In-Service Designation**

Most MPA students are classified as pre-service or in-service students at the time of admission. Pre-service students are those who enter the program with less than two years of professional work experience. In addition to course work, pre-service students complete an internship. Students pursuing the Intergovernmental Management specialization or one of the dual degree programs are not classified as pre-service or in-service. Appeals for reclassification of this designation must be submitted during the first semester of enrollment.

**Prerequisites****Social Science**

Any undergraduate major is acceptable as preprofessional background, provided the applicant has had at least 12 semester units (16 quarter units) of undergraduate course work in cultural anthropology, economics, ethnic studies, social and human geography, political science, sociology or related social science area courses; no more than two of these courses may be in the same field.

Deficiencies in the social science prerequisite may be met while in residence by taking appropriate courses in other departments, but such course work may not be counted toward the course requirements for the master's degree.

### Statistics

A basic competence in descriptive and inferential statistics is also required for the MPA programs. This prerequisite may be met in one of two ways:

1. Entering students must have passed an undergraduate inferential statistics class, with a grade of "B" or better, at an approved university within three years of matriculation.
2. If students do not satisfy this prerequisite, they will be required to take PPD 502x Statistical Foundation for Public Management and Policy, a two-unit graduate level inferential statistics course. They must complete the course with a grade of "B" or better. The units associated with this class may not be used toward the MPA degree.

All prerequisites must be fulfilled within the first 12 units of graduate course work. The statistics prerequisite must also be met before enrolling in PPD 541, PPD 542, PPD 557, PPD 638 or PPD 666.

### International Students

Students applying for graduate programs should send applications and appropriate documents to the MPA Programs Admissions Office, which processes all such applications.

### Admission

A student is accepted for admission only for the semester indicated on the letter of admission. If the student desires to enter at another time, or if the student cannot arrive on campus in time for the semester in which he or she was admitted, the student must contact the MPA Programs Admissions Office in writing. That office will contact the Office of International Admissions.

Students who do not enroll for the semester indicated on the letter of admission cannot be guaranteed admission to a later session. They will need to work with the MPA Programs Admissions Office to determine procedures to follow.

### Registration Requirements

International students on student visas must be registered as full-time students as arranged by the Office of International Services. Doctoral students must carry a load of at least 6 units to be considered full-time students. A full-time graduate load is eight units. Such students are not eligible to be considered students without formal registration and may be in violation of immigration laws when not properly registered.

International students who have questions about registration requirements should contact the Office of Recruitment and Student Affairs.

### Admission Status

MPA applicants may be permitted to take courses before the admission process is completed or they may be admitted before certain conditions have been met; each student must, however, attain regular status (standing) admission to the school prior to or upon completion of 8 graduate units.

### Limited Status Students (Preadmission)

Students taking courses who have not been admitted to the school are designated limited status students. These students may be taking courses to meet prerequisites; they may be waiting for part of their application package materials to arrive; or they may be investigating whether an MPA is the best choice for them.

To be considered for limited status enrollment, interested students need to complete the Price School of Public Policy Limited Student Application for Enrollment form and submit official or unofficial copies of their transcripts from their bachelor's degree granting institution. Students with a 3.0 grade point average (A = 4.0) may enroll in up to 8 units of graduate courses in the Price School of Public Policy.

Price School of Public Policy Limited Student Application for Enrollment forms may be obtained from the Admissions Office, Price School of Public Policy, University of Southern California, RGL 111, Los Angeles, CA 90089-0626; (213) 740-6842. Limited students may only enroll during the in-person registration period (the week before classes begin).

Limited status students may apply only 8 units of appropriate graduate work toward the MPA after admission. Units beyond these first 8 must be petitioned for through the school. Students on limited status are encouraged to complete the application and admission processes before completing those first 8 units.

### Ph.D. Candidates

Ph.D. students who pass the qualifying examinations and complete the MPA course requirements or their equivalent during their course work at USC may, with the recommendation of the coordinator of the MPA program, apply for and receive the MPA degree.

### MPA Curriculum

The MPA course requirements are designed to address current and future professional competencies for accomplishment; to establish a sequence of basic required courses; and to maximize student choice and depth in specialized studies. The curriculum requires 40 units for completion (41 for pre-service students). Pre-service students, that is, those who have less than 25 months' employment experience in a professional level position, are also required to take an internship that includes a one-unit seminar.

CORE COURSES		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 540	Public Administration and Society	4
PPD 546	Professional Practice of Public Administration	4

Three of the required core courses (PPD 500, PPD 501ab and PPD 540) provide the foundation to the field and the fourth (PPD 546) serves as a capstone course. PPD 540 must be taken in the first semester or within the first 12 units and PPD 546 must be taken in the final semester or last 12 units of the student's program.

### Management Competencies

MPA students are expected to develop managerial competencies in three areas by taking at least one course in each of the following areas:

MANAGEMENT COMPETENCIES		UNITS
<i>Analytic Methods</i>		
PPD 542*	Policy and Program Evaluation, or	
PPD 557*	Modeling and Operations Research, or	
PPD 666*	Administrative Research and Analysis	4
<i>Organizational Behavior</i>		
PPD 545	Human Behavior in Public Organizations	4
<i>Finance</i>		
PPD 541*	Public Financial Management and Budgeting	4

(With the approval of the MPA or center director, the student may choose a human resource management elective to fulfill this requirement.)

(With the approval of the MPA or center director, the student may choose a financial management elective to fulfill this requirement.)

\*The statistics requirement must be met before enrolling in PPD 541, PPD 542, PPD 557 or PPD 666.

### Area Cluster Electives

Students may elect to devote their elective courses (14 units) to gain depth in a designated area cluster. These areas include the following: community and economic development, environmental management and land-use policy, financial management, health administration, human resources management, information technology management, intergovernmental management, international policy and management, local government, nonprofit management, planning, public policy, real estate development, transportation, and urban form and design.

Students may elect to follow a more generalist perspective and take their elective courses from the array of elective offerings.

### Thesis Option

Thesis option, PPD 594ab Master's Thesis (4 units), may be taken as part of the elective category. Information regarding the thesis

contract is available from the MPA director. All theses and dissertations submitted in fulfillment of requirements for graduate degrees must conform to university regulations with regard to form and method of preparation.

### Internships

Pre-service students – that is, those with fewer than 25 months' employment in a professional level position – are required to complete at least 300 hours of an internship and an internship seminar (PPD 543). MPA students may enroll in the internship seminar during their first semester. Students complete internships in conjunction with the internship seminar.

### Specialization in Intergovernmental Management

In addition to the substantive area cluster, MPA students may choose the specialization in intergovernmental management.

Students enroll in courses and serve in internships in at least two levels of governance. A student may take courses toward this specialization at either the Los Angeles or USC State Capital Center. Internships may be taken through either of these centers. Students electing this specialization meet with the intergovernmental management coordinator at either the Los Angeles or the USC State Capital Center to design their program.

To complete this specialization, students complete three courses from the following lists (with at least two drawn from the first list): (1) PPD 661, PPD 662, PPD 663, PPD 669, PPD 670; (2) PPD 688, PPD 689, PPD 690.

## Master of Public Policy

The Master of Public Policy (MPP) program is designed to prepare students for careers as professional policy analysts. Through an interdisciplinary curriculum and real world experience, students gain an understanding of the policy process, and develop the capacity to formulate, analyze and implement public policy.

The MPP degree is offered at the University Park Campus only.

### Requirements for Admission

Candidates for admission must have maintained a minimum B (3.0) average during their undergraduate degree work and attain a score of at least 500 on the verbal and at least 500 on the quantitative sections of the GRE. Exceptions to these requirements are allowed if justified by outstanding work experience, letters of recommendation, or demonstrated improvement in academic performance during undergraduate studies.

Applicants must have a bachelor's degree from an accredited institution and have a basic competence in descriptive and inferential statistics. This prerequisite may be met in one of two ways: (1) entering students must have passed an undergraduate inferential statistics class, with a grade of "B" or better, at an approved university within three years of matriculation, and must pass the MPP lab associated with PPD 554 Foundations of Policy Analysis, or (2) take PPD 502x Statistical Foundations for Public

Management and Policy and complete with a grade of "B" or better. If students select to take PPD 502x, the units associated with this class may not be used toward the MPP degree.

### Degree Requirements

Students are required to complete 48 units of graduate work, with 28 units of core and 20 elective units divided between management, analytic and specialization areas.

REQUIRED CORE COURSES		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 554	Foundations of Public Policy Analysis	2
PPD 555	Public Policy Formulation and Implementation	4
PPD 557	Modeling and Operations Research	4
PPD 558	Multivariate Statistical Analysis	4
PPD 560	Methods for Policy Analysis	4
PPD 561ab*	Policy Analysis Practicum	1, 3

\*During a student's final semester of the program, the Policy Analysis Practicum is required as a component of the program's 48 units of course work. The practicum is an opportunity for students to apply their analytic skills to a current problem for an actual client. Admission to the practicum is granted on the approval of the MPP director, and normally requires prior completion of most required courses.

### Electives

Students complete 4 units of management elective, 4 units of analytic elective and 12 units of specialization elective. These electives typically are selected to support specialization in a substantive policy area (e.g., environment or community economic development).

MANAGEMENT ELECTIVE (CHOOSE 4 UNITS)		UNITS
PPD 516	Financial Accounting for Health Care Organizations	4
PPD 541	Public Financial Management and Budgeting	4
PPD 545	Human Behavior in Public Organizations	4
PPD 654	Information Technology Management in the Public Sector	4
PPD 656	Political Management: Theory and Applied Techniques	4
PPD 661	Intergovernmental Management: Local Perspective	4
PPD 662	Intergovernmental Management: State Perspective	4
PPD 675	Nonprofit Management and Leadership	4
PPD 687	Strategic Management in the Nonprofit Sector	4
PPD 690	Alternative Dispute Resolution	4

ANALYTIC ELECTIVE (CHOOSE 4 UNITS)		UNITS
PPD 542	Policy and Program Evaluation	4
PPD 587	Risk Analysis	4
PPD 617	Urban Demography and Growth	4
PPD 647	Finance of the Public Sector	4

In addition, students take 12 units of additional electives selected by the students with the advice of the academic adviser or director of the MPP program. These electives typically are taken in an area of policy specialization, such as: community economic development, education policy, environmental policy, health, infrastructure, international policy and development, media and communications, philanthropy and nonprofit, and transportation.

Students may not take more than 12 course units outside of the Price School of Public Policy without written consent of the director of the MPP program.

## Master of Public Policy and Management

The International Public Policy and Management (IPPAM) Program offers a Master of Public Policy and Management (MPPM). The degree is designed for managers, planners and analysts involved in social sector programs who want to strengthen their management skills and further develop their policy analysis capabilities. For professionals working in the social sectors, IPPAM offers an opportunity to deepen their conceptual understanding of the forces driving change in their sectors and to develop an analytical approach for accessing and reshaping social policy. The program is well-suited for mid-career professionals working in the social sectors, such as physicians, nurses and pharmacists in the health professions; educators and administrators in the teaching professions; government regulators, managers and staff; community organizers, aid workers and others working in the NGO sector; and reporters and others in the news professions interested in covering social issues.

This program is specifically designed for international students and U.S. students who wish to work in international settings, including the Pacific Rim, Latin America and countries in other regions with evolving social systems.

Students are required to complete a minimum of 32 units. All students must fulfill core requirements (18 units) in fundamental policy analysis and management disciplines and an additional 14 units in an area of concentration chosen by the student. The core requirements include: PPD 501a Economics for Policy Planning and Development; PPD 542 Policy and Program Evaluation; PPD 569 Applied International Policy Analysis and Management Project; PPD 570 Applied Statistics for Planning, Policy and Management; and PPD 571 International Public Policy and Management Seminar.

Students select an area of concentration in which they complete a set of recommended elective courses. Each concentration allows students to pursue in depth one or more areas of particular relevance to their career goals. The concentration areas enable students in the interdisciplinary IPPAM program to establish a second “home” in one of the school’s programs, such as health administration or urban planning. Students are required to consult with IPPAM faculty advisers to choose elective courses from a recommended list of courses relevant to the MPPM degree.

Through the integrated curriculum, participants gain practical skills which are developed within an appropriate conceptual context. Many of the courses and applied projects integrate examples and data from the student’s home countries. Program graduates will have achieved advanced competency in disciplines that include public sector economics, applied methods for public policy analysis, evaluation and management.

Core faculty are drawn from the Price School of Public Policy and include senior, experienced faculty along with leading practitioners and experts in applied fields such as community development, international trade policy, health care policy, and so forth. In addition to the participation of distinguished visiting scholars as guest lecturers in class sessions, the program features an international seminar on public policy and management with guest lectures by policy makers. The opportunity to interact with leading scholars, policy makers, and practitioners from the United States and abroad is an essential component of the program.

The program begins in mid-June with intensive English language workshops and the course in applied statistics. The language workshop can be waived for students with 250+ computer-based TOEFL scores or 600+ paper-based TOEFL scores. In the fall semester, international students transition into the regular program consisting of required courses and electives in their chosen concentration area. Some international students may be required to enroll in additional English language workshops depending on how they score on required English exams. Most students can expect to complete the program in 13 months. The intensive nature of the program is designed for full-time students who take a leave from work while enrolled in the program. This approach minimizes the amount of time that professionals must be away from their full-time careers to pursue an advanced degree.

Applicants should have at least a bachelor’s degree from an accredited university and three to seven years of significant professional experience. The IPPAM Program office is located in the Price School of Public Policy, Von KleinSmid Center, Room 253, phone (213) 740-0547, fax (213) 821-1331, email: [ippam@usc.edu](mailto:ippam@usc.edu).

## Master of Real Estate Development

The Master of Real Estate Development program is a carefully integrated program that brings together the three main elements of real estate development: design, finance and policy. It is a one-year full-time or two-year evening executive program of study designed to provide students with the knowledge and skills they require to compete successfully in the development industry. The curriculum encompasses eight areas of study with which developers must be conversant, including real estate law, economics, finance, market analysis, negotiation, planning, architecture and engineering. Courses are taught by full-time faculty members from the Price School of Public Policy. In addition, practicing developers, lawyers, planners and other professionals make regular contributions to the course of study, helping students link learning to practice.

### Curriculum Requirements

The program of graduate study for the professional degree requires successful completion of the core curriculum (36 units), elective courses (8 units) and a comprehensive examination. Students must complete a total of 44 units.

### Core Curriculum

The core comprises 13 lecture-seminar courses that combine lectures, projects, case analyses, and exercises which allow students to experience all facets of the developer's tasks and problems. The integrative project, RED 575L, provides problem solving exercises and the evaluation of actual development situations. Courses emphasize various design, regulatory and fiscal problems associated with urban development and the developer's role in improving development standards in the industry.

CORE COURSES		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
RED 509	Market Analysis for Real Estate	4
RED 542	Finance of Real Estate Development	3
RED 544	Real Estate Capital Markets	2
RED 546	Application of Real Estate Finance to Problems of Development	3

RED 547	Project Management and Construction	2
RED 551	The Approval Process	4
RED 562	Legal Issues in Real Estate Development	4
RED 573	Design History and Criticism	2
RED 574	Building Typologies	2
RED 575L	Community Design and Site Planning	4
RED 598	Real Estate Product Development	2

Eight units of elective course work are required for the Master of Real Estate Development. These courses may be taken in the Schools of Public Policy, Architecture, Business, Law and the Department of Civil Engineering. Admission to some classes requires advanced prerequisites and is subject to availability and approval of the instructor.

### Comprehensive Examination

Successful completion of a comprehensive written and oral examination is required of all students seeking the Master of Real Estate Development degree. The examination explicitly covers the core courses. It is normally administered late in the spring semester by a faculty committee appointed by the dean. Students who fail the examination once may take it again within one year. The examination may not be repeated more than once.

### General Requirements

#### Residence and Course Load

The Master of Real Estate Development may be completed on either a full-time or part-time basis. Both options begin in the summer session in June. The full-time program requires 11 months of study. The evening executive option is completed over a two-year period. Students are also expected to participate fully in all extracurricular activities associated with the Master of Real Estate Development program, including the weekly speaker series.

Students who wish a leave of absence for a semester or longer must request it from the dean in writing; such leaves may be granted for up to one year.

Students must have an approved laptop computer as required by instructors and must demonstrate calculator and spreadsheet skills.

### Time Limit

The time limit within which students in the program must complete the requirements for the Master of Real Estate Development is governed by the following regulations:

All requirements for the Master of Real Estate Development must be completed within five calendar years from the first course at USC applied toward the degree.

University regulations prohibit the acceptance of credits for courses taken toward a Master of Real Estate Development degree more than seven years after the date they were successfully completed.

### Grade Point Average Requirement

While enrolled in the program, a student must maintain a grade point average of at least 3.0 for all courses taken toward the degree.

### Probation and Disqualification

Any student with a cumulative grade point average of below 3.0 for all courses taken in the program will be placed on academic probation. A student may be disqualified to continue toward a graduate degree if the student has been on academic probation for two consecutive semesters. Whether or not on academic probation or warning, a student may be disqualified at any time from continuing in the program if the dean of the school, after consultation with the faculty, determines that the student is deficient in academic achievement or in another qualification required for the attainment of the Master of Real Estate Development degree.

### Course Exemptions and Transfer of Credits

Courses taken toward other degree programs, if determined by the dean to be equivalent to courses in the curriculum, may be accepted for subject credit only. All students are required to complete 44 units while enrolled in the Master of Real Estate Development program. The acceptance of previous course work for subject credit will enable the student to take additional elective courses.

## Graduate Professional Labs

USC's Price School of Public Policy offers professional consulting-like experience for graduate students in its core master's degree programs. Participants are presented with a challenging professional assignment and a well-defined client and terms of reference. Students typically work in teams to produce a professional report and related materials that are presented to the client at the close of the assignment. The terms of reference for the lab vary each year depending upon the client, the instructor and the setting, among other considerations.

In principle, these professional labs may be held anywhere, either in Los Angeles, elsewhere in the United States or abroad.

The Price School professional laboratory teaches students to integrate scholarly knowledge with professional practice. Likewise, it helps participants make the transition from the classroom back to a "real world" setting.

In the case of international labs, participants also gain a deeper and more direct understanding of how the culture of professional practice can vary from one setting to the next. Through the Price School professional laboratory students build their credentials and experience while also extending their network of professional contacts.

These professional labs are intended primarily for graduate students in public administration, planning, real estate development, public policy and health administration. A distinctive feature of the professional laboratory is that it is intended as an integrative professional experience across the school, so that students from any of these programs may participate fully.

Each summer the Price School offers one or more international labs/workshops. Recent international labs have been held in China,

Brazil, Germany, Morocco, Italy and Vietnam. All students are encouraged to take at least one international lab course.

### *Exchange Program*

The Hertie School of Governance exchange program is a one-semester exchange program offered during the fall semester. The program will provide opportunities for students to acquire knowledge and skills necessary to become global leaders and succeed in a global market. All instruction is in English; proficiency in a foreign language is not required. Courses completed at the Hertie School of Governance are graded credit/no credit on the student's USC transcript. The courses are selected from a list approved by the Price School of Public Policy. Students must work with their program administrator to understand how the courses will return to their degree.

## Graduate Certificate Programs

### **Certificate in Transportation Systems**

The graduate Certificate in Transportation Systems is an interdisciplinary program administered by the Department of Civil Engineering. The certificate program allows students to specialize in transportation applications, while simultaneously receiving a degree in their home department. The certificate in transportation systems combines elements of transportation engineering with transportation policy, planning and project management. The program is especially appropriate for students intending to pursue careers as developers of transportation technologies or as implementors of technologies within government agencies.

Students electing the certificate program apply to the Department of Civil Engineering.

Course prerequisites for the program are:

- 1) one course in statistics or uncertainty, equivalent to CE 408, ISE 225 or PPD 404x;
- 2) one course in engineering economy, equivalent to ISE 460;
- 3) one course in microeconomics, equivalent to ECON 203; and
- 4) one course in a high level programming language, such as C or Fortran.

These prerequisites may be satisfied after enrollment in the certificate program by taking the indicated courses or their equivalent.

Graduate students cannot receive credit for courses numbered below 400. Detailed admissions requirements are published by the Department of Civil Engineering.

### *Requirements for Completion*

The curriculum consists of five graduate courses for a total of 17 units.

REQUIRED COURSES		UNITS
CE 519	Transportation Engineering	3
CE 585	Traffic Engineering and Control	3
ISE 515	Engineering Project Management	3
PPD 633	Urban Transportation Planning and Management	4
PPD 634	Institutional and Policy Issues in Transportation	4

Qualified students holding a bachelor's degree also have the option of enrolling in the certificate program without receiving a separate graduate degree.

### **Certificate in Nonprofit Management and Policy**

This graduate certificate program provides students with a foundation in nonprofit management and policy. The certificate develops nonprofit management skills and provides

students the knowledge needed to understand the increasing importance of nonprofits in society and their role in forming and influencing public policy.

Applicants for the Certificate in Nonprofit Management and Policy who are currently enrolled in a graduate program at USC and are in good standing with a 3.0 GPA only need to submit the appropriate paperwork for adding the certificate program, which may be obtained from the student services adviser.

Applicants for the Certificate in Nonprofit Management and Policy who have not matriculated at USC must make a formal application for admission to the certificate program, provide transcripts of all college work, a resume and one letter of recommendation.

The certificate in nonprofit management and policy consists of 16 units of graduate course work.

### *Required courses (16 units)*

CORE COURSES (12 UNITS)		UNITS
PPD 675	Nonprofit Management and Leadership	4
PPD 687	Strategic Management in the Sector	4
PPD 689	The Nonprofit Sector and Philanthropy	4

*Elective Course*

Students select 4 elective units. The elective course(s) may be taken from within the Price School of Public Policy course offerings or other USC units. The elective selection must be approved by the faculty adviser for the certificate program.

Up to 10 units of the certificate may be applied to both the certificate and the core requirements or electives in the Master of Public Administration program. Up to 12 units may be applied toward both the certificate and the core or electives in the Master of Public Policy program.

The Master of Public Administration director will provide advisement.

**Certificate in Political Management**

This graduate certificate program provides students with a foundation in political management. It is designed to provide expertise for students who wish to work in public policy advocacy, in political relations, with elected officials and with the public, non-profit or private sectors.

Applicants who are currently enrolled in a graduate program at USC and are in good standing with a 3.0 GPA only need to submit the appropriate paperwork for adding the certificate program which may be obtained from the student services adviser.

Applicants who have not matriculated at USC must make a formal application for admission to the certificate program, as well as provide transcripts of all college work, a resume and one letter of recommendation.

The Certificate in Political Management consists of 14-16 units of graduate course work depending on the courses selected.

CORE COURSE (4 UNITS)		UNITS
PPD 658	Advocacy in Public Administration	4
FOUNDATION COURSE		UNITS
Select one: 2 or 4 units		
PPD 500	Intersectoral Leadership	2
PPD 540	Public Administration and Society	4
PPD 554	Foundations of Public Policy Analysis	2
PPD 684	Leadership Development in the Public and Nonprofit Sectors	2

**CHOOSE TWO OF THE FOLLOWING (8 UNITS)**

CHOOSE TWO OF THE FOLLOWING (8 UNITS)		UNITS
PPD 616	Participatory Methods in Planning and Policy	4
PPD 656	Political Management: Theory and Applied Techniques	4
PPD 657	Political Leadership in Public Organizations	4
PPD 693	Communicating Public Policy	4

Up to 10 units of the certificate may be applied toward both the certificate and to the core requirements or electives in the Master of Public Administration. Up to 12 units may be applied toward both the certificate and toward core or electives in the Master of Public Policy or Master of Planning.

The director of the graduate programs in public policy and management will provide advisement.

**Certificate Programs in Public Financial Management**

Students enrolled in the Public Financial Management certificate program are required to take 52 graduate units of course work (53 for pre-service students). Fourteen of these units are MPA core courses (PPD 500, PPD 501ab, PPD 540 and PPD 546); and 12 units of management competencies (PPD 541, PPD 542 or PPD 557 or PPD 666, and PPD 545). In addition, students must take 16 units of course work in finance and related subjects (PPD 516, PPD 554\* or PPD 555, PPD 647 and PPD 661 or PPD 662 or PPD 669). Ten units of approved electives will be selected from among: PPD 510b, PPD 542, PPD 652, PPD 660, PPD 661, PPD 662, PPD 669, PPD 679 and PPD 688. Pre-service students must also serve an internship and be enrolled in PPD 543.

Students may receive this certificate with a specialization in intergovernmental management provided they complete the three course sequence (PPD 661, PPD 662, PPD 669). Students may satisfy this requirement if they apply two of these courses toward the 10-unit elective requirement and apply the third course toward the 16-unit finance and related subjects requirement.

\*Students who select PPD 554 (rather than PPD 555) must select an additional 2-unit elective.

**Certificate Programs in Health Management and Policy Programs**

The Health Management and Policy Programs of the Price School of Public Policy offers certificate programs in specialized areas of health care administration. The certificates are designed to provide practitioners with means for improving or updating their knowledge and experience in a challenging and professionally relevant course of study. Certificates are offered in Administration of

Long Term Care Programs and Management of Ambulatory Care Systems. Applicants for the certificate programs must make formal application for admission to the certificate program, provide transcripts of all college work, supplemented by three letters of recommendation, including one from a former instructor, a resume and a personal statement describing their career goals and the relationship of the certificate to those ends.

It is expected that applicants to the certificate programs should have graduated from a recognized college with an approximate grade point average of B in the last 60 units of college work. Non-graduates may be admitted if the director believes that there is evidence to suggest that the applicant is capable of graduate level work.

Successful completion of the certificate will not be a deciding factor in the admission decision for the degrees offered by the Health Management and Policy Programs or the Price School of Public Policy.

The Ambulatory Care program requires 20 units of graduate credit including a 16-unit core and a four-unit specialized seminar in the area of the certificate concentration. Core courses (16 units) are: PPD 509; PPD 510a or PPD 516; PPD 545 or PPD 557; one elective. One specialized seminar as follows (four units): PPD 600, PPD 601 or GERO 550.

The Certificate in Administration of Long Term Care Programs requires 16 units of course work. The required courses are GERO 500; PPD 513; PPD 518; PPD 601; PPD 510a or PPDE 645. The program can be completed via distance learning.

Completing a certificate program does not constitute completion of or admission to the Master of Health Administration (MHA) or Executive Master of Health Administration (EMHA) degree programs nor will it be a deciding factor in the admission decision to those programs. Students in the MHA program, however, may qualify for award of these certificates if they complete the applicable course requirements.

**Certificate in Public Management**

This program provides students with a solid foundation of training and skills in management. Individuals who need training in public administration but who are unable to enroll for the Master of Public Administration (MPA) degree may find this certificate program of particular interest. Key to the program's success is the close integration of the academic curriculum and the application of skills and theory to managerial work assignments. Students may enroll at any time throughout the year.

The program consists of four courses: PPD 540, PPD 542, PPD 545, and one elective selected from any 500-level offering in the Price curriculum.

**Certificate in Public Policy**

This graduate certificate program provides students with a foundation in public policy analysis. It is designed to provide expertise in public policy to individuals who do not want to pursue the Master of Public Policy degree. Potential students include those who are pursuing another degree and want to complement that work with a specialization in public policy, as well as qualified students holding a bachelor's degree who have not matriculated at USC. The certificate develops policy analytic skills and their integration with a policy issue area of interest to the student.

Applicants for the Certificate in Public Policy who have not matriculated at USC must make a formal application for admission to the certificate program, provide transcripts of all college work, a resume and one letter of recommendation.

The program consists of 16 units of graduate course work.

*Required courses (16 units)*

CORE COURSES (8 UNITS)		UNITS
PPD 500	Intersectoral Leadership	2
PPD 554	Foundations of Public Policy Analysis	2
PPD 555	Public Policy Formulation and Implementation	4
Choose 4 units from:		
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 557	Modeling and Operations Research	4
PPD 558	Multivariate Statistical Analysis	4
PPD 560	Methods for Policy Analysis	4

Choose one course from a policy area. There are many policy issues courses from which to choose (e.g., health, nonprofit, transportation, environment, housing). 4

The Master of Public Policy director will provide advisement.

**Certificate in Homeland Security and Public Policy**

This graduate certificate program provides students with a foundation in homeland security and public policy. It is designed to provide expertise to individuals working in the field with an interest in refining their risk and security analysis skills as well as others with

interest in the field. The certificate develops risk analysis skills and provides students with the knowledge needed to understand the issues surrounding the increasingly important issues of homeland security and public policy.

Applicants for the Certificate in Homeland Security and Public Policy who are currently enrolled in a graduate program at USC in good standing with a 3.0 GPA only need to submit the appropriate paperwork for adding the certificate program which may be obtained from the student services adviser.

Applicants for the Certificate in Homeland Security and Public Policy who have not matriculated at USC must make a formal application for admission to the certificate program, provide transcripts of all college work, a resume and one letter of recommendation.

The certificate in homeland security and public policy consists of 15-16 units of graduate course work depending on the course selected.

REQUIRED CORE COURSE		(4 UNITS)
PPD 683	Homeland Security and Public Policy	4
Choose three of the following (11-12 units):		
PPD 501ab	Economics for Policy, Planning, and Development	4
PPD 557	Modeling and Operations Research	4, or
ISE 530	Introduction to Operations Research	3, or
ISE 562	Value and Decision Theory	3
PPD 587	Risk Analysis	4

**Sustainable Cities Graduate Certificate**

The Sustainable Cities Graduate Certificate program is a multidisciplinary certificate program open to USC students pursuing graduate degrees in many disciplines including anthropology, architecture, biology, chemistry, communication, earth sciences, economics, education, engineering, geography, international relations, political science, public policy, sociology, urban planning and others.

Creating sustainable cities for the 21st century is a major challenge for society. The growth of cities, caused by natural population increase and massive rural-to-urban population flows, poses critical environmental problems that reach far beyond municipal boundaries and transcend national borders. Resolving such problems requires contributions from natural scientists, engineers, behavioral scientists and policy experts. To solve problems of national concern, such scientists must work productively with public administrators, political decision-makers and diverse interest groups.

This program seeks to equip graduate students with both the requisite knowledge of other fields and the political, interpersonal and communication skills necessary to succeed in research and practical contexts.

Applicants for the Certificate in Sustainable Cities who are currently enrolled in a graduate program at USC and are in good standing with a 3.0 GPA only need to submit the appropriate paperwork for adding the certificate program, which may be obtained from the student services adviser.

Applicants for the Certificate in Sustainable Cities who have not matriculated at USC must make a formal application for admission to the certificate program, provide transcripts of all college work, a resume and one letter of recommendation.

REQUIRED COURSES (14-15* UNITS)		UNITS
ARCH 519	Sustainability in the Environment: Infrastructure, Urban Landscapes, and Buildings	3
CE 564*	Methods for Assessment and Protection of Environmental Quality (3), or	
ENE 502*	Environmental and Regulatory Compliance (3), or	
PPD 587	Risk Analysis (4)	3-4
PPDE 632	Sustainable Cities	4
*Students who select CE 564 or ENE 502 will complete 14 units for the certificate.		
Four units from:		
PPD 568	Environmental Governance and Sustainability	2
PPD 619	Smart Growth and Urban Sprawl: Policy Debates and Planning Solutions	4
PPD 621	Environmental Impacts	4
PPD 692	Transportation and the Environment	4
PPDE 660	Environmental Policy Design and Analysis	2

Each academic unit, department or program will determine the number of units completed that may be applied to the student's master's or doctoral degree.

**Certificate in Health Systems Operations**

This 17-unit graduate certificate is jointly sponsored by the Epstein Industrial and Systems Engineering Department and the Price School of Public Policy (Master of Health Administration program), and administered by the Epstein Industrial and Systems Engineering Department. See Industrial Systems and Engineering Department on page 667 for course requirements.

**Certificate in Real Estate Development**

This graduate certificate program provides students with a foundation of the key elements of real estate development. It is designed to provide these foundations for non-Master of Real Estate Development students who wish to obtain this knowledge to complement their graduate program of study as well as their careers. For admissions information, visit the Price School Website.

The certificate in real estate development consists of 12 units of graduate course work: RED 510, RED 511 and RED 512.

**Non-Credit Programs Offered by the Center for International Training and Development Management Effectiveness Program**

This is a four-week intensive training program in the art and science of management. The program is designed to enhance leadership effectiveness and the development of a management generalist perspective.

*International Executive Development Laboratory*

This five-week laboratory focuses on issues in executive leadership, strategic management, environmental analysis, international finance and economics, computer-based project planning, and implementation of planned change strategies.

## Dual Degree Programs

A dual degree program is an academic option which allows a student to enroll in two graduate programs simultaneously. Application must be made to both schools, and if accepted to both, the student pursues a specially designed program which combines selected courses from the two academic units. Students are required to seek advisement from both schools. The student will have the opportunity to acquire the knowledge and skills from two fields of study.

The dual degree program enables the student to integrate a closely related field with planning or development. The purpose of the dual program is to provide an enriched educational experience; accordingly, concurrent course work in the two fields is required.

Since the unit requirements of dual degrees depend upon the mutual transfer of units between the two academic units, no other transfer of credits will be allowed.

Students who decide, at any point, to earn only one of the two degrees must meet all the regular requirements for earning that degree alone.

Students in Master of Planning dual degree programs must fulfill the comprehensive examination and appropriate internship requirements except where noted otherwise.

**Master of Planning/Master of Architecture**

The Master of Planning/Master of Architecture dual degree program facilitates highly related cross-disciplinary studies in architecture (through the USC School of Architecture) and in planning at the master's level. This program offers students interested in developing a career in urban design an opportunity to make more substantial commitments in both disciplines and to achieve a more

coherent and extensive knowledge in the design of built environments and public policy. Candidates must already possess a degree in architecture. This dual degree program normally requires five semesters in residence.

*Requirements*

Requirements for completion of the dual degree program are 72 units, including 36 units in architecture and 36 units in planning. See the School of Architecture, page 128, for course requirements.

**Master of Planning/Master of Business Administration**

The Master of Planning/Master of Business Administration dual degree program enables the student to understand the conduct and requirements of business, accounting, corporate and strategic planning, real estate marketing, and finance. Further, students gain expertise in public policy, city planning and the interpretation of government regulations. Exposure to both fields becomes an educational as well as a professional asset for careers in either public service or private enterprise. This dual degree program normally requires five semesters in residence.

*Requirements*

A total of 84 units is required for the dual degree: 48 units of work in the Marshall School of Business and 36 units in the Price School of Public Policy. Required courses that must be taken in the Marshall School of Business include: all required courses in an MBA program and graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students must not count courses taken outside the Marshall School of Business toward the 48 units.

PLANNING		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

*Concentration Methodology:* A 4-unit course selected from the concentration list shown in the MPI program.

*Planning Studios:* PPD 531L (4, 4) to total 8 units.

*Electives:* 8 units of elective courses taken within the Price School of Public Policy.

Dual degree students, like all other MPI students, must take a comprehensive examination and fulfill the internship requirement.

**Master of Planning/Master of Arts in Economics**

The USC Price School of Public Policy and the Department of Economics jointly offer a two-year program leading to the MPI and M.A. degrees. Applicants must apply to the Price School of Public Policy and the USC Graduate School and meet the admission requirements of both.

**Requirements**

Requirements for completion of the dual degree program are 58 units, including 24 units in economics and 34 units in planning.

ECONOMICS		UNITS
ECON 500	Microeconomic Analysis and Policy	4
ECON 501	Macroeconomic Analysis and Policy	4
ECON 513	The Practice of Econometrics	4
ECON 594abz	Master's Thesis	4
Electives	Economics	8
PLANNING		UNITS
PPD 500	Intersectoral Leadership	2
PPD 524	Planning Theory	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

*Planning Studios:* PPD 531L (4, 4) to total 8 units.

*Electives:* 14 units of elective courses taken within the Price School of Public Policy.

Dual degree students in this program must fulfill the internship requirement.

*Thesis:* A thesis is required on a subject interrelating economics and urban planning and development. Students must register in a minimum of 4 units of ECON 594abz (2-2-0) and maintain continuous registration until completion of the thesis.

During the summer after the first year of graduate study, the student normally serves an internship in a planning organization. The student must complete a thesis acceptable to both faculties.

**Master of Planning/Master of Arts in International Relations**

The USC Price School of Public Policy and the School of International Relations jointly offer a three-year program leading to both M.A. and MPI degrees. Applicants must apply to the Price School of Public Policy and the School of International Relations and meet the requirements for admission to both. Students interested in this program are required to take the Graduate Record Examinations (GRE).

Requirements for the dual degree program are 56 units, including 24 units in the School of International Relations and 32 units in the Price School of Public Policy.

INTERNATIONAL RELATIONS		UNITS
IR 517	International Policy Analysis	4
	one course that focuses on a specific region	4
	one functional course from the following:	4
IR 502	Conflict and Cooperation	
IR 509	Culture, Gender and Global Society	
IR 521	Introduction to Foreign Policy Analysis	
IR 541	Politics of the World Economy	
	three IR electives	12
PLANNING		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

*Planning Studios:* PPD 531L (4, 4) to total 8 units

*Electives:* 8 units of elective courses in planning (including one methods class) taken within the Price School of Public Policy.

Dual degree students, like all other MPI students, must take a comprehensive examination and fulfill the internship requirement. Students in the dual degree program must complete a substantive paper or alternative project. The requirements, standards and evaluation procedure for the substantive paper are identical to those listed for the M.A. in Political Science and International Relations except that one member of the examining committee must come from the Price School of Public Policy.

**Master of Planning/Master of Real Estate Development**

The Master of Planning/Master of Real Estate Development dual degree program enables students to expand their skills in planning, land development, market analysis, finance and economics. Exposure to both fields becomes an educational as well as a

professional asset for careers in either real estate development or planning. This dual degree program normally requires five semesters, including one summer, in residence.

**Requirements**

A total of 74 units is required for the dual degree, all from within the Price School of Public Policy.

REQUIRED COURSES		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PLANNING CORE		UNITS
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 531L	Planning Studio	4
PPD 533	Planning History and Urban Form	2
REAL ESTATE CORE		UNITS
RED 509	Market Analysis for Real Estate	4
RED 542	Finance of Real Estate Development	3
RED 544	Real Estate Capital Markets	2
RED 546	Applications of Real Estate Finance to Problems of Development	3
RED 547	Project Management and Construction	2
RED 551	The Approval Process	4
RED 562	Legal Issues in Real Estate Development	4
RED 573	Design History and Criticism	2
RED 574	Building Typologies	2
RED 575L	Community Design and Site Planning	4
RED 598	Real Estate Product Development	2

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

RED 542	Finance of Real Estate Development	3
RED 544	Real Estate Capital Markets	2
RED 546	Applications of Real Estate Finance to Problems of Development	3
RED 547	Project Management and Construction	2
RED 551	The Approval Process	4
RED 562	Legal Issues in Real Estate Development	4
RED 573	Design History and Criticism	2
RED 574	Building Typologies	2
RED 575L	Community Design and Site Planning	4
RED 598	Real Estate Product Development	2

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

*Electives:* 12 units of PPD courses and 12 additional units of elective courses taken within the Price School of Public Policy.

Students are also required to complete a comprehensive examination. Students have the option of selecting either the existing MPI or existing MRED examination.

The internship requirement is waived for students who enter the program with professional experience in either planning, real estate or a related field.

### Master of Planning/Master of Science in Gerontology

The M.S./MPI dual degree is one of a few in the nation which combines the knowledge of the older population with the skills needed to plan services for older people. The MPI prepares the graduate for the responsibilities involved in development of public and private institutions and programs. The M.S. indicates a special focus on the older person and the skills to analyze and design programs for this growing population. The M.S. is offered through the USC Davis School of Gerontology.

#### Requirements

Requirements for completion of the dual degree program are 66 units including 26 units in gerontology, 36 units in planning and a minimum of 4 units of thesis in either gerontology or planning, as follows:

GERONTOLOGY		UNITS
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 591	Field Practicum	6
	Gerontology elective	4
PLANNING		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

**Concentration Methodology:** A 4-unit course selected from the concentration list shown in MPI program.

**Planning Studios:** PPD 531L (4, 4) to total 8 units.

**Electives:** 8 units of elective courses taken within the Price School of Public Policy.

**Thesis:** A thesis is required on a subject interrelating gerontology and planning. Students must register in a minimum of 4 units of PPD 594abz (2,2,0) or GERO 594abz (2,2,0). Students must maintain continuous registration until completion of the thesis.

**Program Adaptation:** The USC Davis School of Gerontology waives GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program will have a primary professional focus in planning.

### Master of Planning/Master of Landscape Architecture

The dual degree option in planning and landscape architecture (in the USC School of Architecture) trains professionals in policy and design, and to be competent with design problems at different scales, but with a distinctly urban focus. Candidates must be independently admitted to the Master of Planning and Master of Landscape Architecture programs. The dual degree program normally requires between five and seven semesters in residence.

#### Requirements

Completion of the dual degree requires 24 units of courses in urban planning, 10 units of thesis option I or II and either 32 units of landscape architecture (for those students admitted with advanced standing); 48 units of landscape architecture (for those students admitted with advanced placement); or 74 units of landscape architecture (for those students admitted to the three-year curriculum). See School of Architecture, page 128, for course requirements.

### Master of Planning/Master of Public Administration

The Master of Planning/Master of Public Administration dual degree program is designed for the study of the relationships between planning and public administration. Administrative skills, budgeting and fiscal analysis, a knowledge of operations services of local governments, and formulation and conduct of planning operations within the context of municipal management are required. This dual degree program normally requires five semesters in residence.

#### Requirements

Requirements for completion of the dual degree program are 60 units, including 26 units in public administration, 20 units in planning and 14 units of electives (8 in planning), as follows:

**Prerequisites:** 12 undergraduate course credit units of social science, not more than 8 units in any one field, are required. Students must also satisfy the MPA statistics prerequisite and other prerequisites. PPD 525 satisfies

the Price School of Public Policy prerequisite in descriptive and inferential statistics for students in the Master of Planning/Master of Public Administration dual degree program. Dual degree students completing PPD 525 with a grade of B or higher (A = 4.0) need not take PPD 502x Statistical Foundations for Public Management and Policy.

PUBLIC ADMINISTRATION		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 540	Public Administration and Society	4
PPD 541	Public Financial Management and Budgeting	4
PPD 542	Policy and Program Evaluation, or Modeling and Operations Research, or Administrative Research and Analysis	4
PPD 545	Human Behavior in Public Organizations	4
PPD 546	Professional Practice of Public Administration	4
PLANNING		UNITS
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

**Planning Studios:** PPD 531L (4, 4) to total 8 units.

**Electives:** 14 units of elective courses taken within the Price School of Public Policy. Eight of these elective units must be taken in the planning program. Dual degree students who complete PPD 502x with a grade of C or higher need not take PPD 525. Instead, they should take 2 additional elective units for a total of 16.

Dual degree students, like all other MPI students, must take a comprehensive examination and fulfill the internship requirement.

**Master of Planning/Master of Public Health**

The Master of Planning/ Master of Public Health (MPI/MPH) dual degree is designed for individuals who envision a career that combines urban planning and public health disciplines. This dual degree combines the knowledge of urban planning with an understanding of health from a population perspective. It will provide training for planning, evaluating and guiding healthy community and urban development, and will enable graduates who seek to be agents of change within the profession to assume leadership roles in planning and in public health at the local, state and national levels.

A total of 79 units are required for the dual degree.

PLANNING CORE REQUIREMENTS		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 524	Planning Theory	2
PPD 527	The Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2

**Concentration**

Students must select 16 units in a concentration from one of the five concentrations in the planning program. Students are required to complete the gateway course and methodology course related to their concentration as part of their preparation for their comprehensive examination. The student's concentration must contain a 4-unit methodology course, a 4-unit gateway course and 8 other units. See further details on the concentrations in the Master of Planning section of the catalogue.

**Planning Studios**

Students will complete a total of 8 units of domestic or international planning studios under PPD 531L (4) to satisfy this requirement.

Dual degree students, like all other MPI students, must take a comprehensive examination and fulfill an internship requirement. Students will take 200 hours of planning internship placement in addition to 4 units of PM 593. See below for further internship details for this dual degree.

**PREVENTIVE MEDICINE – PUBLIC HEALTH**

CORE REQUIREMENTS		UNITS
PM 501	Foundations in Health Education and Promotion	4
PM 508	Health Service Delivery in the U.S.	4
PM 510L	Principles of Biostatistics	4
PM 512	Principles of Epidemiology	4
PM 529	Environmental Health: An Epidemiological Approach	4
PM 593*	Public Health Practicum	4 or 8

\*PM 593 is a variable unit course, 4 or 8 units. Students are required to take 4 units for this dual degree.

HEALTH PROMOTION TRACK REQUIREMENTS		UNITS
PM 528	Program Design and Evaluation	4
PM 562	Intervention Approaches for Health Promotion and Disease Prevention	4
PM 563	Organizing and Mobilizing Communities for Global Health	4
	Health Promotion Track Electives	4
	Other Electives	3

All students admitted into the dual degree program must complete all requirements for each program.

Students in the dual degree may substitute two MPI core courses with PM courses. PPD 525 may be substituted with PM 510 and PPD 526 may be substituted with PM 563. Students enrolled in the dual degree are not required to take PPD 525 (as opposed to the stand alone MPI degree students) because they develop the necessary proficiencies in statistics in PM 510L, which provides them the opportunity to learn biostatistics, health statistics and the application of statistics necessary for success in this dual degree and for their future career. Dual degree students are not required to take PPD 526 and may take PM 563 as this course covers global health and international issues and will provide students with the information needed for success in their career.

In addition, for PM 593, a variable unit course depending on experience (4 or 8 units), students complete an internship specific to meet the competencies of the health promotion track. Dual degree students would enroll in 4 units, completing a 200-hour placement. The other 4 units would be waived because students will spend 200 hours during their planning internship, acquiring additional

relevant practical experience. (Note: This is consistent with the established dual degree programs with medicine, pharmacy and clinical psychology).

The skeleton curriculum is described by these requirements. In fact, students will tend to take additional courses specific to their planning concentration and will enroll in additional units.

**Master of Planning/Master of Arts, Art and Curatorial Practices in the Public Sphere**

The Master of Planning/Master of Arts, Art and Curatorial Practices in the Public Sphere dual degree program offers an unusually rich opportunity for students interested in developing a new knowledge base to become successful professionals working in the arena of organizing art projects in urban public space, planning and community development. Los Angeles and the facilities at USC provide a unique learning laboratory to educate a more competitive professional with a better understanding of both the administration of public art and issues of urban planning.

Students must complete the following requirements in this program: 70 units, including 28 units in the Master of Arts, Art and Curatorial Practices in the Public Sphere program, 22 in policy, planning, and development, and 20 in a field of study with no more than 8 units taken from other USC programs.

MASTER OF ARTS, ART AND CURATORIAL PRACTICES IN THE PUBLIC SPHERE (28 UNITS)		UNITS
PAS 549	Methodologies of Art Writing	3
PAS 555abc	Curatorial Practicum	2-2-2
PAS 561	Curatorial/Organizational Models	2
PAS 571	Histories of Art in the Public Sphere	3
PAS 572	Contemporary Art in the Public Sphere	3
PAS 581	Critical Conversations	3
PAS 585	Theorizing the Public Realm	3
PAS 591	Field Internship Experience	1
PAS 594ab	Master's Thesis	2, 2

MASTER OF PLANNING (22 UNITS)		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2

PPD 529	Legal Environment of Planning	2
PPD 531L	Core Laboratory Workshop	4
PPD 533	Planning History and Urban Form	2
PPD 627*	Design Skills for Urban Planners	4

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

\*PPD 627 is the methodology course for the Preservation and Design of the Built Environment concentration. Students who choose to do a concentration other than Preservation and Design of the Built Environment need to take the respective methodology course.

Dual degree students, like all other MPI students, must take a comprehensive examination and fulfill the internship requirement.

#### Field of Study (20 units)

Students may include no more than 8 units from outside the Roski School of Fine Arts and the Price School of Public Policy. The MPI program requires students to declare their concentration during the fall semester prior to taking the comprehensive examination in the spring semester. Students are required to complete the gateway course and methodology course related to their concentration as part of their preparation for their comprehensive examination. The student's concentration must contain a 4-unit methodology course, a 4-unit gateway course and 8 other units directly concerned with the subject matter of the concentration.

#### Capstone Projects

Students must complete a master's thesis or final thesis project through the Roski School of Fine Arts and the MPI comprehensive examination through the Price School of Public Policy.

#### Internship

All students must complete 400 hours of internship through the Price School of Public Policy. This internship may be partially or completely fulfilled through prior professional experience.

#### Master of Public Policy/Master of Planning

The Master of Public Policy/Master of Planning dual degree program gives students the opportunity to develop a depth of analytic and design skills with which to effectively address the problems of urban communities. The dual degree program normally requires six semesters in residence.

#### Requirements

Completion of the dual degree requires 72 units, including: PPD 500 and PPD 501a, 32 units in public policy, 22 units in planning, 6 units in electives and 8 units in planning studios/practicum.

#### Prerequisites

Applicants must have a basic competence in descriptive and inferential statistics. This prerequisite may be met in one of two ways: (1) entering students must have passed an undergraduate inferential statistics class, with a grade of "B" or better, at an approved university within three years of matriculation, and must pass the MPP lab associated with PPD 554 Foundations of Policy Analysis, or (2) take PPD 502x Statistical Foundations for Public Management and Policy and complete with a grade of "B" or better. If students select to take PPD 502x, the units associated with this class may not be used for graduate credit.

REQUIRED COURSES		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PUBLIC POLICY COURSES		UNITS
PPD 501b	Economics for Policy, Planning and Development	2
PPD 554	Foundations of Public Policy Analysis	2
PPD 555	Public Policy Formulation and Implementation	4
PPD 557	Modeling and Operations Research	4
PPD 558	Multivariate Statistical Analysis	4
PPD 560	Methods for Policy Analysis	4
	Public policy elective	4
	Analytic elective (PPD 542, PPD 587, PPD 617 or PPD 647)	4
	One management elective from the following list:	4
PPD 516	Financial Accounting for Health Care Organizations	
PPD 541	Public Financial Management and Budgeting	
PPD 545	Human Behavior in Public Organizations	
PPD 654	Information Technology Management in the Public Sector	
PPD 656	Political Management: Theory and Applied Techniques	
PPD 661	Intergovernmental Management: Local Perspective	

PPD 662	Intergovernmental Management: State Perspective	
PPD 675	Nonprofit Management and Leadership	
PPD 687	Strategic Management in the Nonprofit Sector	
PPD 690	Alternative Dispute Resolution	
		32

PLANNING		UNITS
PPD 524	Planning Theory	2
PPD 526	Comparative International Development	2
PPD 527	Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2
	Concentration electives in planning from the Price School (includes 4 units of methodology to be selected with adviser from the following list)	12
PPD 612	Research and Analytical Techniques	
PPD 616	Participatory Methods in Planning and Policy	
PPD 617	Urban Demography and Growth	
PPD 627	Design Skills for Urban Planners	
PPD 634	Institutional and Policy Issues in Transportation	
		22

#### Electives

Students are required to take 6 units of electives from the curriculum offered by the university. Non-Price School courses may be selected by the students with the approval of an academic adviser.

#### Practicum/Planning Studios

After finishing the core courses of both programs, students are required to take 8 units in practicum/planning studios: 4 units from the public policy program (PPD 561ab) and 4 units from the planning program (PPD 531L).

#### Comprehensive Exam and Internship

Dual degree students, like all other MPI students, must take a comprehensive examination and fulfill the internship requirement.

**Master of Planning/Master of Social Work**

The dual degree program between the USC School of Social Work and the USC Price School of Public Policy offers unique opportunities for students who want to devote their professional careers to social policy, social planning or social services delivery. Students with a dual degree will have broader employment options beyond those in traditional planning or social work.

The schedule of courses allows students to experience direct service in the first year so that course work planning is supplemented by a knowledge of consumers, service delivery, etc. Courses for both schools are taken simultaneously, intermingling social work and planning content. Two years of field practicums in social work provide in-depth exposure to social service issues from both planning and direct service perspectives, thus satisfying some of the planning laboratory/workshop requirements and eliminating the need for a separate planning internship requirement.

**Requirements**

Requirements for completion of the MSW/MPI degree are 83 units including 51 units in social work and 32 units in planning. Students must select a community organization, planning and administration concentration in the second year of their social work program.

SOCIAL WORK		UNITS
SOWK 503	Human Behavior and the Social Environment I	3
SOWK 505	Human Behavior and the Social Environment II	3
SOWK 534	Policy and Practice in Social Service Organizations	3
SOWK 543	Social Work Practice with Individuals	4
SOWK 545	Social Work Practice with Families, Groups and Complex Cases	2
SOWK 562	Social Work Research	3
SOWK 586ab	Field Practicum	3-3
SOWK 587ab	Integrative Learning for Social Work Practice	2-2
SOWK 599	Special Topics (approved by concentration)	3
SOWK 611*	Leadership in the Social Work Profession and Organization: Theory and Practice	3
SOWK 629	Evaluation of Research: Community Organization, Planning and Administration	3
SOWK 648	Management for Community and Social Services	3
SOWK 686ab	Field Practicum II	4-4

and one of the following:

SOWK 603	Merging Policy, Planning, and Research for Change in Families and Children's Settings	3
SOWK 636	Social Policy: Health Care	3
SOWK 672	Improving Work Life Through Social Policy and Managing Organizational Development and Change	3

\*Students who have taken a leadership course in PPD are not required to take SOWK 611.

PLANNING		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2
PPD 628	Urban Planning and Social Policy	4

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

*Planning Studios:* PPD 531L (4) for 4 units.

*Electives:* 8 units of elective courses taken within the Price School of Public Policy.

Dual degree students, like all over MPI students, must take a comprehensive examination and fulfill the internship requirement.

**Master of Public Policy/Juris Doctor**

The Price School of Public Policy and the USC Gould School of Law offer a dual degree that enables qualified students to earn both a Juris Doctor and a Master of Public Policy in approximately four years of study.

The dual degree allows students to acquire a blend of the analytic skills of public policy and an understanding of legal institutions and processes. This combination of knowledge is well suited for law students who want to affect the policy-making process and craft legislation to aid in the achievement of public policy goals. It is equally appropriate for prospective policy analysts who are interested in law and public policy.

Students must apply to, and be accepted by, both schools. They may be accepted to the dual degree at the time of their acceptance to the law school or at the beginning of their second year of law school. Dual degree students spend the first year of the program completing the required first year of law school. The remaining units of law school courses and the required 36 units of core MPP courses are taken by students in the second through fourth years.

Students are required to complete 114 units of course work, 78 units in the law school and 36 units in the Price School of Public Policy. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honor programs. In addition, the MPP program has a statistics prerequisite. Please see the MPP degree in the Price School of Public Policy section of the catalogue for the requirements.

The required MPP courses are PPD 500, PPD 501ab, PPD 554, PPD 555, PPD 557, PPD 558, PPD 560, PPD 561ab; 4 units of a management elective (PPD 516, PPD 541, PPD 545, PPD 654, PPD 656, PPD 661, PPD 662, PPD 675, PPD 687 or PPD 690); and 4 units of an analytic elective (PPD 542, PPD 587, PPD 617 or PPD 647).

**Master of Real Estate Development/Juris Doctor**

The Juris Doctor/Master of Real Estate Development dual degree program provides the opportunity for in-depth study of legal issues and real estate development. The increasingly regulatory environment developers work within demands that professionals in the real estate industry have a strong understanding of the legal system. Lawyers who plan to specialize in real estate law will benefit from a thorough understanding of the development process, including financial, planning, marketing and design issues. Application must be made to both the USC Gould School of Law and the USC Price School of Public Policy. This program normally requires three years (including one summer) of full-time study in residence to complete.

Requirements for completion of the dual degree program are 112 units, including 78 units in law and 34 units in planning and development. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honors programs.

LAW SCHOOL		UNITS
LAW 502	Procedure I	4
LAW 503	Contracts	4
LAW 504	Criminal Law	3
LAW 505	Legal Profession	3
LAW 507	Property	4
LAW 508	Constitutional Law I	4

RED 598	Real Estate Product Development	2
Elective from the Price School of Public Policy		2

Students are required to complete a comprehensive examination administered by faculty members from both the law school and the Price School of Public Policy.

Students must have an approved laptop computer as required by instructors and must demonstrate calculator and spreadsheet skills.

**Master of Real Estate Development/ Master of Business Administration**

The Master of Real Estate Development/ Master of Business Administration dual degree program enables students to expand their skills in planning, land development, marketing, decision sciences, accounting, management, finance and economics. The program is targeted for students who have a clear career goal of becoming real estate developers but who lack formal training in business. The program normally requires two

years (including summers) of full-time study in residence to complete.

*Requirements*

A total of 82 units is required. Required courses include: all required courses in an MBA program; FBE 565 Economics of Urban Land Use – Feasibility Studies (3 units); FBE 588 Advanced Real Estate Law (3 units); graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48; and Policy, Planning, and Development courses (34 units). Dual degree students may not count courses taken outside the Marshall School of Business toward the 48 units.

Students must have an approved laptop computer as required by instructors and must demonstrate calculator and spreadsheet skills.

REAL ESTATE DEVELOPMENT		UNITS

RED 573	Design History and Criticism	2
RED 574	Building Typologies	2
RED 575L	Community Design and Site Planning	4
RED 598	Real Estate Product Development	2
Elective from the Price School of Public Policy		4

*Comprehensive Examination:* Students are required to complete a comprehensive examination administered by faculty members from both the Marshall School of Business and the Price School of Public Policy.

**Master of Public Administration/Master of Science in Gerontology**

The Master of Public Administration/Master of Science in Gerontology (MPA/M.S.) dual degree offers students interested in management of agencies and institutions the opportunity to gain in-depth knowledge of the administrative and organizational processes and management skills necessary for the effective delivery of services to older persons.

In the MPA/M.S. dual degree, students spend their first year taking the required courses in the USC Davis School of Gerontology.

The research course, GERO 593 Research Methods and the capstone course GERO 555 Integrating Gerontology: A Multidisciplinary Approach, are taken in the USC Davis School of Gerontology. The student begins courses in the Price School of Public Policy during the second semester of the first year.

Two versions of this dual degree are available, one with a general orientation and one with an emphasis on health services administration. Students must apply to both schools and, if accepted to both, participate in a specially designed program combining course work from both schools.

Curriculum requirements for the general focus dual degree are detailed in the USC Davis School of Gerontology section of this catalogue. Students are encouraged to seek advisement as they plan their actual programs, since curriculum changes may occur.

GERONTOLOGY REQUIREMENTS		UNITS
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Development Psychology	4
GERO 530	Life Span Development Sociology	4
GERO 540	Social Policy and Aging	4
GERO 550	Administration and System Management in Programs for Older Adults	4
GERO 555	Integrating Gerontology: A Multidisciplinary Approach	4
GERO 591	Field Practicum	8
GERO 593	Research Methods	4
Gerontology elective		4
		<hr/> 40

PUBLIC ADMINISTRATION REQUIREMENTS		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 540	Public Administration and Society	4
PPD 541	Public Financial Management and Budgeting	4
PPD 542	Policy and Program Evaluation, or	
PPD 557	Modeling and Operations Research, or	
PPD 666	Administrative Research and Analysis	4
PPD 545	Human Behavior in Public Organizations	4
PPD 546	Professional Practice of Public Administration	4
Elective		2
		<hr/> 28

*Program Adaptation*

For the M.S. in Gerontology, 12 units of electives are waived as well as GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program have a primary professional focus in public administration. For the Master of Public Administration, 12 units of gerontology courses are used as the substantive specialization.

**Master of Health Administration/Master of Science in Gerontology**

Gerontology and health administration students can specialize in health care administration (profit and non-profit) through the dual degree with the USC Davis School of Gerontology and the USC Price School of Public Policy's Health Administration Program. Students in the dual degree program must be admitted by both academic units and complete 78 units of post-graduate academic work.

GERONTOLOGY REQUIREMENTS		UNITS
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging Administration and System Management in Programs for Older Adults	4
GERO 555	Integrating Gerontology: A Multidisciplinary Approach	4
GERO 591	Field Practicum	8
GERO 593	Research Methods	4
		36

HEALTH ADMINISTRATION REQUIREMENTS		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 509	Problems and Issues in the Health Field	4
PPD 510a	Financial Management of Health Services	4
PPD 513	Legal Issues in Health Care Delivery	2
PPD 514	Economic Concepts Applied to Health	4
PPD 515	Strategic Management of Health Organizations	4
PPD 516	Financial Accounting for Health Care Organizations	4
PPD 517	Concepts and Practices in Managing Health Care Organizations	2

PPD 518	Quality of Care Concepts	2
PPD 545	Human Behavior in Public Organizations	4
PPD 557	Modeling and Operations Research	4
PPD 601	Management of Long-Term Care Organizations	4
		42

*Statistics:* The statistics requirement for dual degree students is the same as those that apply to the Master of Health Administration (see page 880).

*Program Adaptation:* The USC Davis School of Gerontology will waive GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program will have a primary professional focus in health administration.

Students enrolled in the dual degree are not required to take PPD 511 (as opposed to the stand alone MHA degree students) because they develop the necessary proficiencies related to their career goals in long term care administration through other courses such as GERO 550, GERO 591 and GERO 593. In addition, PPD 601 is required for the dual degree (and not the stand alone MHA program) because most of these students will work in long-term care facilities and this course is critical for success in that market.

Any course substitutions are done by petition on an individual basis and should be part of a carefully developed course of study. The USC Price School of Public Policy should be consulted concerning this program of study.

**Master of Public Administration/Master of Arts, International Relations**

The Price School of Public Policy and the School of International Relations jointly offer a three-year program leading to both M.A. and MPA degrees (students may extend the dual degree program to four years). Applicants must apply to the Price School of Public Policy and the School of International Relations and meet requirements for admission to both. Students interested in this program are required to take the Graduate Record Examinations (GRE).

*Requirements*

Students pursuing the dual degree must complete the degree requirements at the Price School of Public Policy and at least 24 units within the School of International Relations.

INTERNATIONAL RELATIONS		UNITS
IR 517	International Policy Analysis	4
one course that focuses on a specific region		4
one functional course from the following:		4
IR 502	Conflict and Cooperation	
IR 509	Culture, Gender and Global Society	
IR 521	Introduction to Foreign Policy	
IR 541	Politics of the World Economy	
three IR electives		12
		24

PUBLIC ADMINISTRATION		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 540	Public Administration and Society	4
PPD 541	Public Financial Management and Budgeting	4
PPD 542	Policy and Program Evaluation, or	
PPD 557	Modeling and Operations Research, or	
PPD 666	Administrative Research and Analysis	4
PPD 545	Human Behavior in Public Organizations	4
PPD 546	Professional Practice of Public Administration	4
Elective		2
		28

*Electives:* 12 units of elective courses taken from the School of International Relations.

Like all other M.A. students, students in the dual degree program must complete a substantive paper or alternative project. The requirements, standards and evaluation procedure for the substantive paper are identical to those listed for all M.A., International Relations students except that one member of the examining committee must come from the Price School of Public Policy. Students must also meet the statistics prerequisite and internship requirement of the MPA.

**Master of Public Administration/Juris Doctor**

The dual degree program with the USC Gould School of Law and the USC Price School of Public Policy enables qualified students to earn a Juris Doctor/ Master of Public Administration (J.D./MPA) in approximately four years of study.

Some of the topics covered in the law school are also covered in the program of the Price School of Public Policy, so some credit toward the law degree may appropriately be given for specified graduate work taken in the Price School of Public Policy. Similarly, some credit toward the master's degree may appropriately be awarded for certain work completed in the law school. The goal of the program is to encourage law students to gain a recognized competence in administration, which has a direct relevance for the roles lawyers are asked to play in society.

Students must apply to, and be accepted by, both schools. They may be accepted to a dual degree program at the time of their acceptance to the law school or at the beginning of their second year of law school. The program requires the completion of the required first year of law school and the fulfillment of a statistics prerequisite, which can be met by passing an undergraduate inferential statistics class with a grade of B or better at an approved university within three years of matriculation or taking PPD 502x Statistical Foundations for Public Management and Policy and completing with a grade of "B" or better. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honors programs.

Credit toward the law degree may not be given for graduate work completed prior to the completion of the first year of law school. The Price School of Public Policy, on the other hand, may allow some credit toward the MPA for approved work completed prior to the first year of law school.

Students are required to complete 97 units of course work.

*Curriculum Requirements*

*First Year* Required law school courses

*Second and Third Year* The remaining 39 units of law school courses, 32 additional units of public administration courses. These courses are from the MPA core (PPD 500, PPD 501ab, PPD 540 and PPD 546) and management competencies (PPD 542 or PPD 557 or PPD 666, PPD 541, PPD 545) and 6 units of PPD electives.

**Master of Public Administration/Master of Social Work**

The Master of Public Administration/Master of Social Work (MPA/MSW) dual degree offers students interested in careers as administrators of social agencies the opportunity to prepare for social work while developing the administrative capabilities necessary in the public sector.

The MPA/MSW will require two calendar years of full-time study. The first academic year is devoted to the standard social work first year curriculum. During the second year, the curriculum combines social work and public administration course work. The curriculum for both summers will be in public administration.

Students can enter this program only with the written consent of both schools. Students who apply initially to the USC School of Social Work must declare their intention to pursue the MPA/MSW dual degree at the time of their application. If admission is approved, such students will be admitted to the dual degree program. Social work students selecting this program are required to select the Community Organization, Planning and Administration concentration in their second year program.

Students must complete 82 units (54 in social work and 28 in public administration).

SOCIAL WORK (54 UNITS)		UNITS
SOWK 503	Human Behavior and the Social Environment I	3
SOWK 505	Human Behavior and the Social Environment II	3
SOWK 534	Policy and Practice in Social Service Organizations	3
SOWK 535	Social Welfare	3
SOWK 543	Social Work Practice with Individuals	4
SOWK 545	Social Work Practice with Families, Groups and Complex Cases	2
SOWK 562	Social Work Research	3
SOWK 586ab	Field Practicum	3-3
SOWK 587ab	Integrative Learning for Social Work Practice	2-2
SOWK 599	Special Topics (approved by concentration)	3
SOWK 611*	Leadership in the Social Work Profession and Organizations: Theory and Practice	3
SOWK 629	Evaluation of Research: Community Organization, Planning and Administration	3

SOWK 639	Social Policy for Managers, Planners, and Community Organizers	3
SOWK 648	Management for Community and Social Services	3
SOWK 686ab	Field Practicum II	8

\*Students who have taken a Price leadership course are not required to take SOWK 611.

PUBLIC ADMINISTRATION (28 UNITS)		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 540	Public Administration and Society	4
PPD 541	Public Financial Management and Budgeting	4
PPD 546	Professional Practice of Public Administration	4
PPD electives**		10

\*\*Electives in public administration need to be approved by the graduate adviser in the Price School of Public Policy.

**Master of Public Administration/Master of Arts in Jewish Nonprofit Management**

The Master of Public Administration/Master of Arts in Jewish Nonprofit Management (MPA/M.A.) has been developed, in cooperation between the USC Price School of Public Policy and the HUC-JIR School of Jewish Nonprofit Management, to prepare those students who want to make a career in Jewish nonprofit management. Students receive a solid academic and experiential foundation in the American Jewish experience — its history, culture and structure — combined with the theory and practice of community organization and administration.

Students must complete 88 units of course work, 36 in public administration, and must serve two academic years in supervised fieldwork. There is an opportunity to spend either 12 months in Sacramento, California, or Washington, D.C. At these sites, students attend classes while serving internships in the offices of politicians, lobbyists or other advocates.

Students must meet admission requirements and be admitted by both the Price School of Public Policy and HUC-JIR's School of Jewish Nonprofit Management (formerly the HUC-JIR School of Jewish Communal Service).

*Curriculum Requirements*

The program begins in June of each year and continues for the next 24 months. Students are expected to work out individual course plans with advisers from each school.

In addition to applying to the Price School of Public Policy, those interested in the program should contact the Office of Admissions, Hebrew Union College — Jewish Institute of Religion, 3077 University Avenue, Los Angeles, CA 90007-3796, for comprehensive information about its requirements.

Public administration course work may be taken in Los Angeles or Sacramento. In Sacramento, a student will complete the Price core and elective courses, will take independent study with an HUC professor, and will serve in an internship while enrolled in HUC fieldwork classes.

PUBLIC ADMINISTRATION REQUIREMENTS		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 540	Public Administration and Society	4
PPD 541	Public Financial Management and Budgeting	4
PPD 545	Human Behavior in Public Organizations	4
PPD 546	Professional Practice of Public Administration	4
PPD electives*		14

**AN ELECTIVE IS DEFINED AS ONE OF THE FOLLOWING COURSES:**

PPD 516x	Financial Accounting for Health Care Organizations	4
PPD 668	Entrepreneurship and the Public Sector	4
PPD 675	Nonprofit Management and Leadership	4
PPD 689	The Nonprofit Sector and Philanthropy	4

\*Two of the above electives and an additional 6 units of elective classes offered within the Price School must be taken. Substitutions for the two electives may be requested by petition to the graduate adviser in the Price School of Public Policy.

*Fieldwork Requirement*

Throughout the program, students are expected to serve in supervised internships. Fieldwork is administered cooperatively by the faculties of HUC-JIR School of Jewish Nonprofit Management and the Price School of Public Policy.

*Program Adaptation*

Students enrolled in the dual degree are not required to take a research methods course (PPD 542, PPD 557 or PPD 666) in the MPA program (as opposed to the stand alone MPA degree students) because they develop the necessary proficiencies in research methods in the course offered in the HUC-JIR School of Jewish Nonprofit Management (CS 562 Jewish Social Research: Trends and Analysis). Students in the dual degree may elect an alternative four units within the Price School.

**Regulations Concerning a Second Master's Degree**

For rules governing a second master's degree, see page 88 of this catalogue. In accordance with these policies, transfer credits will be granted only on the basis of a written petition to the MPA program coordinator and on the basis of credits recognized by USC in a Transfer Credit Statement.

**Teaching Opportunities**

Students may want to prepare for teaching as well as for public service. By careful planning in the upper division of the undergraduate degree and during the graduate years, requirements for a bachelor's degree, a master's degree and the university recommendation for a community college instructorship may be met without unnecessary duplication of effort and waste of time. Those interested in teaching should consult advisers in both the USC Price School of Public Policy and the USC Rossier School of Education before beginning upper division and graduate work.

**Public Administration Professional Sequence with the Viterbi School of Engineering**

Regulations governing the Master of Science in Civil Engineering permit some candidates for this degree to take 12 units outside the School of Engineering. Those who wish to do so may take 12 units in public administration. Two courses in this sequence must be selected from among PPD 500, PPD 501ab, PPD 540, PPD 541, PPD 545, PPD 546. One course in this sequence must be selected from among PPD 542, PPD 557, PPD 666. PPD 541 requires PPD 502x and statistics as prerequisites. PPD 546 should be taken last if elected.

**Joint Degree Programs**

**Master of Long Term Care Administration**

This program is designed to prepare competent individuals to administer the long term care needs of America's elderly population. It is jointly offered by the Davis School of Gerontology, the Marshall School of Business, and the Price School of Public Policy. For information see the Davis School of Gerontology, page 705.

**Master of Science in Health Systems Management Engineering**

For information, see Industrial and Systems Engineering, page 665.

## Doctoral Degrees

The USC Price School of Public Policy offers the Doctor of Philosophy in Public Policy and Management (Ph.D.), the Doctor of Philosophy in Urban Planning and Development (Ph.D.) and the Doctor of Policy, Planning, and Development (DPPD). The Ph.D. degrees are designed to prepare individuals for university level teaching and research. The DPPD degree is intended to develop a high level of conceptual and research competence for professional leadership in planning and development. The DPPD is administered by the Price School of Public Policy; the Ph.D. programs are administered by the Graduate School and the faculty of the Price School of Public Policy. Ph.D. students must consult the Graduate School section of this catalogue for regulations and requirements pertaining to its degrees. Students should also consult the Academic Policies section of this catalogue.

Completion of the requirements for all these degrees is assumed to take a minimum of three years of approved graduate study and research beyond the bachelor's degree. For the Ph.D. student, a minimum of 24 graduate units completed in residence on the University Park Campus in Los Angeles is required. DPPD students are required to complete a minimum of 24 units at the University Park Campus. Full-time study is represented by enrollment in 6 units during the semester. Usually the school and the student's guidance committee insist on a clear and mutually understood commitment of time and energy by the student to ensure significant involvement in the doctoral learning experience. For university policies regarding continuous enrollment, leave of absence and readmission, see pages 88-89.

### Application and Admission

Admission to graduate standing for the Ph.D. or DPPD is recommended by the school's admissions committee acting under guidelines established by the Graduate School as outlined in the Graduate School section, page 97, and the Graduate Admission section, page 80. In addition to those guidelines, DPPD students are expected to have a minimum of five years of substantial relevant experience. Students intending to apply should direct questions about the program and all materials for the admission application to Doctoral Programs, Office of Student Affairs, RGL 111, Price School of Public Policy, University of Southern California, University Park, Los Angeles, CA 90089-0626.

The deadline for applications for admission to the Ph.D. and DPPD programs is December 1. Applications for admission are made once each year for fall semester admission.

The admission decision for Ph.D. students is made using criteria which include verification that the applicant has a bachelor's degree from an accredited college or university, has maintained a high grade point average in the last 60 units of undergraduate work, and has earned a competitive score on the verbal and quantitative portions of the Graduate Record Examinations (GRE). Other elements of the applicant's educational and experiential background are also evaluated, including performance in other advanced degrees. DPPD applicants must also provide evidence of at least five years of practical administrative or other relevant experience. The GRE and GMAT scores are neither accepted nor required for the DPPD program.

Each applicant should submit the following: (1) one copy of official transcripts of all previous college and university work (be sure that these official transcripts show an awarded degree where appropriate); (2) copies of GRE scores; (3) a 1,000-word essay discussing the applicant's background and reasons for wanting to pursue a Ph.D. degree and identifying his or her personal, educational and professional goals; (4) an up-to-date resume, including academic and professional accomplishments; (5) three letters of recommendation, two from previous instructors, the other from an instructor or from a professional supervisor or colleague. The letters should indicate the applicant's academic and professional accomplishments and potential; (6) a completed USC Graduate Admission Application, along with the nonrefundable application fee; (7) a writing sample of approximately 1,000 words (in addition to the applicant essay); and (8) a completed Price School of Public Policy Supplemental Graduate Application. International applicants are asked to submit additional information. Applicants should carefully choose, and clearly state, the degree objective (Ph.D. or DPPD) for which they are applying, since different sets of admissions criteria exist for each of them.

### Transfer Credits

The application of any available transfer credits toward a graduate degree at USC will be determined by the faculty and the dean of the Price School of Public Policy, based on the semester units available for transfer as shown in the Transfer Credit Statement (determined by the USC Office of Academic Records and Registrar). Refer to Admission with Advanced Standing, page 906, for more information.

### Deferral of Enrollment

Admission to the university is granted for a specified semester, and it is expected that students will begin their programs during that semester. The school will normally allow students to defer their enrollment up to one year from the admission semester. Students who wish to defer enrollment should notify the school in writing no more than 30 days after the beginning of the semester of admission. Students who do not inform the school in a timely manner of their intent to defer enrollment may be required to reapply for admission.

Please note that more stringent regulations apply to international students. See the Admission section of this catalogue, page 81.

### Admission to Candidacy

Acceptance to graduate standing does not in itself imply that the student is admitted or will be admitted to candidacy for an advanced degree. Application for admission as a candidate for an advanced degree is a separate and subsequent step. See the Graduate School section of this catalogue, page 97.

### Admission of International Students

All international applicants for admission to doctoral programs should submit materials to Doctoral Programs, Recruitment and Admissions Office, RGL 111, Price School of Public Policy, University of Southern California, University Park, Los Angeles, CA 90089-0626. See the Admission of International Students section of this catalogue, page 81.

**Screening**

Ph.D. students are required to have a 3.3 overall G.P.A. in first-year courses to continue in the program. DPPD students are required to pass a screening procedure after 16 units of course work. The procedure is designed to ensure that only those students who have demonstrated intellectual and scholarly potential continue in the program.

There are differences between the screening process for Ph.D. and DPPD students. Students should consult the relevant faculty director of the doctoral program in which they are enrolled.

**Guidance Committee (for the Ph.D. programs)**

A guidance committee assists the student in outlining an academic program leading toward the degree. Students will form an initial guidance committee by the end of the first fall semester. The committee might not yet include the Graduate School representative from outside the Price School, but must include at least three tenure track the Price

School faculty members, one of whom is identified as the chair. This committee bears responsibility for counseling the doctoral student, for approving a course schedule and preliminary and qualifying examinations, and for recommending the student for admission to candidacy. After approval of the student's program and proposed time schedule, the program is submitted in writing to the relevant director. This should be accomplished by the beginning of the second year, following successful screening.

The complete guidance committee must be in place no later than the third semester. The chair should have recognized expertise in the qualifying area and should be a regular participant in the qualifying examination committee for that area. The majority of the members of the guidance committee (typically at least three out of five) should be experts in the area in which the student is qualifying and should be regular participants in the qualifying examination committee.

The remaining members should have a clear interest in this area with the exception of the outside member whose primary responsibility is to serve as the representative of the Graduate School, ensuring the university's commitment to the equitable treatment of all students and that the highest quality education standards are upheld.

Students will formalize their relationship with their committees through the development of a work plan which specifies all courses, degree progress, seminar attendance and what was learned from these sessions as well as a research plan that articulates major research questions being explored. At the end of the first year of study, the guidance committee chair reviews and approves the work plan. At the end of the second year, the full guidance committee reviews the work plan and the second year paper.

## Doctor of Philosophy in Public Policy and Management Doctor of Philosophy in Urban Planning and Development

The Price School offers two Ph.D. programs. Both the Doctor of Philosophy (Ph.D.) in Public Policy and Management and the Doctor of Philosophy (Ph.D.) in Urban Planning and Development degree programs are under the jurisdiction of the Graduate School. Students should also refer to the Graduate and Professional Education, page 79, and Graduate School, page 97, sections of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

The Ph.D. programs in the Price School both emphasize rigorous programs of advanced study and research, stressing qualitative or quantitative analysis and the theoretical foundations of their field of study. The programs are designed to provide students with the opportunity to develop their own specialization and expertise in either major field – public policy and management or urban planning and development – while also offering them a breadth of knowledge in an especially rich intellectual environment.

**Curriculum Requirements**

The Doctor of Philosophy in Public Policy and Management and the Doctor of Philosophy in Urban Planning and Development are administered by the doctoral committee of the school. The Ph.D. program in Public Policy and Management requires the completion of

60 units of course work, comprising the following elements: master's core in a substantive field (15-17 units), doctoral core (11 units), methodology (10-12 units), field/specialization courses (9-12 units), teaching seminar (2 units), research seminar (4 units) and dissertation (4 units minimum). The Ph.D. program in Urban Planning and Development requires the completion of 60 units of course work, comprising the following elements: master's core (14-16 units), doctoral core (8 units), methodology (10-12 units), field/specialization courses (16 units), teaching seminar (2 units), research seminar (4 units), and dissertation (4 units minimum).

**Ph.D., Public Policy and Management  
Core Curriculum**

THEORETICAL CORE (11 UNITS)		UNITS
MOR 602	Organization Theory	3
PPD 712	Seminar in Public Policy	4
PUAD 675	Institutional Context of the Public Sector	4
METHODOLOGY (10-12 UNITS)		UNITS
PPD 558	Multivariate Statistical Analysis, or	
ECON 511	Econometric Methods	4
PPD 706	Paradigms of Research and the Design Inquiry	4
One additional methods course selected with guidance committee approval		2-4

*Field Courses (9-12 units)*

Students select three courses of field courses which can be used to develop disciplinary expertise related to specialization interest or additional methodological expertise. Fields are developed with guidance committee approval, can include any combination of the Price School and outside courses and are unique to each student.

*Research Seminar (4 units)*

Students will take PPD 710ab (2 units each, 4 total units), the Price School research seminar course.

*Teaching Seminar (2 units)*

Students will take two semesters of the teaching seminar, PPD 700ab (1 unit each, 2 total units).

Students entering the doctoral program without a relevant master's degree in public administration or public policy or a related field will be required to complete prerequisites (15-17 units) relevant to their program.

For the Ph.D. in Public Policy and Management, possible courses include:

PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 525	Statistics and Arguing from Data	2
PPD 540	Public Administration and Society	4
PPD 542	Policy and Program Evaluation	4
PPD 554	Foundations of Public Policy Analysis	2
PPD 555	Public Policy Formulation and Implementation	4

### Ph.D., Urban Planning and Development

#### Core Curriculum

THEORETICAL CORE (8 UNITS)		UNITS
PPD 713	Advanced Planning Theory	4
PPD 714	Advanced Urban Development	4
METHODOLOGY (10-12 UNITS)		UNITS
PPD 706	Paradigms of Research and the Design of Inquiry	4
Two additional methods courses selected with guidance committee approval		6-8

#### Specialized Field Courses (16 units)

Students take a minimum of four courses to develop their specialized area of study. Courses may be taken in the Price School or other USC units. Students, working with their guidance committees, have considerable flexibility in forming specializations.

#### Research Seminar (4 units)

Students will take PPD 710ab (2 units each, 4 total units), the Price School research seminar course.

#### Teaching Seminar (2 units)

Students will take two semesters of the teaching seminar, PPD 700ab (1 unit each, 2 total units).

Students entering the doctoral program without a relevant master's degree in urban planning or a related field will be required to complete prerequisites (16-18 units) relevant to their program.

For the Ph.D. in Urban Planning and Development, possible courses include:

PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2

PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 533	Planning History and Urban Form	2
PPD 634	Institutional and Policy Issues in Transportation	4

### Admission with Advanced Standing

Students entering the doctoral program with a master's degree from an accredited institution in public management/administration, public policy, planning, or urban development or related field may be admitted with advanced standing to either Ph.D. program. In the Public Policy and Management program, students must complete a minimum of 39-41 units of doctoral classes beyond that graduate degree, exclusive of 794ab doctoral dissertation units, for a minimum of 43-45 semester units. In the Urban Planning and Development program, students must complete a minimum of 40-42 units of doctoral classes beyond that graduate degree, exclusive of 794ab doctoral dissertation units, for a minimum of 44-46 semester units. Additional course work may be required if deemed necessary by the student's faculty following the screening examination.

A maximum of 6 units of transfer credit may be applied toward a doctoral degree with advanced standing. Only course work not used to complete the master's degree described above is available for transfer credit. No exceptions are allowed.

### Guidance Committee

Students will form an initial guidance committee by the end of the first fall semester, which officially oversees the development of the student's academic program through the qualifying examination. Five tenure or tenure track committee members are designated to provide guidance in the field developed by the student. A minimum of three members, including at least one tenured member, must be from among the faculty participating in this Doctor of Philosophy program, and at least one member must be from outside the Price School of Public Policy. Students should refer to the Graduate School section, page 102, regarding the guidance committee and the outside member. The complete Guidance Committee must be in place no later than the third semester.

### Screening Procedures

Students must have a 3.3 overall GPA in first-year courses to continue in the program.

### Work Plans

At the end of each spring semester, the student submits an academic work plan for the coming year to his or her guidance committee chair. The plan should include courses, degree progress, seminar attendance and what was learned from those, and a research plan that articulates the major research questions being explored. At the conclusion of year one, the Chair reviews and approves the work plan and at the end of year two, the chair reviews the work plan and the second year paper.

### Qualifying Examination

The guidance committee prepares a comprehensive written examination covering the fields of study. Following completion of the written portion, the entire committee conducts an oral examination of the student, focusing on material both complementary and supplementary to the written examination but relevant to the field and overall program selected by the student. Upon passing both portions of the qualifying examination, the student becomes a candidate for the Doctor of Philosophy degree. The qualifying exam will occur in the fall of year three.

### Proposal Defense

Students are expected to have a proposal defense within one year of passing the qualifying exam.

### Doctoral Dissertation

The dissertation is based on original research. The research is supervised by a dissertation committee of three or more regular USC faculty, at least one of whom must be from outside the Price School of Public Policy. A two-semester minimum registration in PPD 794 is required of all candidates. Students must maintain continuous registration until completion of the dissertation.

### Defense of the Dissertation

Oral defense of the dissertation before the dissertation committee is usually made on a preliminary draft.

### Format for Theses and Dissertations

All theses and dissertations submitted in fulfillment of requirements for graduate degrees must conform to university regulations with regard to format and method of preparation. Regulations for Format and Presentation of Theses and Dissertations is available from the Graduate School, Grace Ford Salvatori 315, or online at the Graduate School Website.

### General Requirements

Refer to the Graduate School, page 97, section in this catalogue for policies regarding time limits, leave of absence, scholarship standing and probation.

## Doctor of Policy, Planning, and Development

Planning and development are critical concerns of the nation and the world today. Whether redesigning the health care system, reproducing economic innovation in our central cities, or facilitating economic and social relationships across the globe, planners and developers are on center stage.

Leading the way into the next century will be a group of experienced practitioners who have updated and expanded their professional achievements by developing additional conceptual and research competency through the Doctor of Policy, Planning, and Development (DPPD).

The goals of the program are: to create a unique educational environment that will forge these professionals into a cadre for urban change; to develop urban professionals who can merge development and planning tools to design new integrative policy planning and implementation systems; to establish a set of new problem solving paradigms for examining and altering planning and development decision-making and to equip professionals with sophisticated analytical tools and a sharper cultural awareness so they can practice planning and development anywhere in the world.

### Admission

The program is intended for people with considerable professional experience and intellectual interests. Requirements for admission include: GPA of 3.0 (A = 4.0) for all post-high school academic work, and, for international students, submission of TOEFL scores; five letters of recommendation, including at least one academic and one professional; five or more years of professional experience; a resume and, if appropriate, a portfolio; and a study prospectus detailing a proposed field of study. Guidelines for preparing the prospectus are included in the application package. Additional requirements for international students are listed under Admission of International Students, page 81. The GRE and GMAT are neither accepted nor required for the DPPD program. Each application will be examined with the aim of admitting an applicant whose study prospectus suggests the ability and focus to produce an innovative approach to professional practice.

Applicants are expected to hold a master's degree in architecture, landscape architecture, public administration, real estate development, urban/city/regional planning, urban design or a closely related field. Applicants with master's degrees in other fields will be expected to complete foundation courses prior to entering the degree's core classes.

Upon admission to the program, each student will be assigned a faculty adviser who will oversee his or her program.

### Curriculum Requirements

The Doctor of Policy, Planning, and Development is administered by the Price School of Public Policy for full-time and part-time students. The DPPD requires completion of 60 units of course work comprising the following elements:

REQUIREMENTS	UNITS
Foundation courses	20
Core courses	8
Methods course	4
Field of study	20
Conspectus preparation	4
Planning, design and development project	(minimum) 4

### Foundation Courses

Up to 20 units of foundation courses are required. These courses may be taken from the school's master's degree programs or, with prior approval, from other USC graduate degree programs. Students who hold a related master's degree may be admitted with advanced standing. Students are required to complete 36 units of course work and 4 units of PLUS 694 (project units).

REQUIRED COURSES	UNITS
<i>Core Courses</i>	
PLUS 603	Planning and Development Paradigms 4
PLUS 623	Politics of Planning and the Urban Environment 4
<i>Conspectus Preparation</i>	
PLUS 692	Conspectus Preparation 4

### Methods

A student's methods course should be approved by the student's Professional Advisory Committee. Possible courses include:

PLUS 612	Analysis of Quantitative Data for Planning and Development 4
PPD 627	Design Skills for Urban Planners 4
PPD 632	Planning Analysis and Evaluation 4
PPD 707	Survey Research Methods 4
PPD 708	Qualitative Methods 4

### Screening Process

As quickly as possible, the student will form a Professional Advisory Committee consisting of the student's adviser and two other school and/or USC faculty and up to five professionals whose activities are related to the student's. This committee shall oversee the student's program to its conclusion.

At the completion of no more than 16 units beyond the foundation courses and/or PLUS 603 and PLUS 623, students will complete a written examination which will consist of responding to a short list of specific planning and development problems using appropriate professional paradigms. The student will then meet with the Professional Advisory Committee to formally review the student's progress toward the degree.

### Field of Study

In consultation with their faculty adviser and Professional Advisory Committee, students will craft a field of study related to the professional arena of practice. The field may or may not reflect standard academic boundaries, such as transportation and land use planning. Students should take advantage of USC's resources in developing the field, especially taking into consideration the relationship of practice to theory and context. Twenty units of course work are required for the field of study, 8 of which may be taken outside the Price School of Public Policy.

### Conspectus Preparation

In PLUS 692 students complete a professional conspectus that defines their field of study, its structure and place within professional practice, and other related questions. The conspectus will be presented to the student's Professional Advisory Committee for acceptance. Only after it is accepted may the student proceed to the Planning, Design and Development Project.

### Planning, Design and Development Project

The capstone project of the DPPD is the student's completion of the Planning, Design and Development Project (PDDP). The PDDP is a study of an aspect, site, issue or other such element of professional practice. Each PDDP should be designed to present an innovative or original contribution to the practice of planning and development. The parameters of the PDDP are intentionally left wide, allowing the project to be produced as solely text, or text in conjunction with film, computer program, design or another multimedia format.

The PDDP is supervised by the student's Professional Advisory Committee. Students must maintain continuous registration in the PLUS 694 series until completion of the PDDP. Upon completion of an approved draft of the PDDP, students will present their findings in an open session, but the Professional Advisory Committee is the sole evaluator.

## Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

### HEALTH CARE MANAGEMENT (HMGT)

**HMGT 510 The Dynamics of Health Care Leadership (4)** A five-day residential provides an intensive, multi-faceted learning experience in leadership, communication, managed care, systems thinking, and the health care environment. Open to EMHA students only.

**HMGT 520 Leading People and Health Care Organizations (4, Fa)** An exploration of contemporary work force issues and skills development in organizational design, performance measurement, teamwork, conflict resolution, leadership, and change management. Open to EMHA students only.

**HMGT 525 Managed Care Operations (4)** Focuses on managerial, operational, and organizational aspects of managed care for integrated delivery systems, health plans, and medical groups. Open to EMHA students only.

**HMGT 540 Health Economics, Financing and Reimbursement (2, Fa)** Provides a framework for the economic analysis of health care issues and provides students with an opportunity to apply economic methods to a number of actual health care problems. Open to EMHA students only.

**HMGT 545 Systems Thinking and the Analysis of Data (4)** Quality improvement and statistical tools for health managers. Covers analyzing processes; collecting and analyzing operational data; drawing valid conclusions from data. Open to EMHA students only.

**HMGT 550 Law, Regulation, and Ethics (4)** An intensive introduction to business and health care law, ethics and regulation; gives executives practical knowledge regarding legal consideration in business transactions. Open to EMHA students only.

### General Requirements

This degree is administered by the Price School of Public Policy. At least 24 units must be fulfilled in residence at USC. The total length of the study must not exceed six academic years. Students are encouraged to actively participate in a non-credit Price School of Public Policy doctoral workshop. Policies regarding time limits, leave of absence, scholarship standing,

academic warning, and other issues not directly addressed are consistent with those of the Graduate School. Please consult the Academic Policies (page 29), Graduate and Professional Education (page 79) and Graduate School (page 97) sections for additional information.

**HMGT 560 Customer-Focused Health Care Organization (2)** Strategies for gaining and using customer-derived data in planning, marketing and managing health care organizations. Open to EMHA students only.

**HMGT 565 Managing the Organization's Financial Health (4, Fa)** Executives confront and solve problems requiring use of accounting, finance, and management control principles; provides core financial skills for non-finance professionals. Open to EMHA students only.

**HMGT 570 Strategic Management (4, Sm)** Provides skill development and application in the integrative discipline of strategic management including assessment, strategy formulation, implementation and control. Open to EMHA students only.

**HMGT 575 Managing and Improving Health (4, Sp)** Methods for monitoring and improving the health of populations. Topics include outcomes management, risk-adjustment, development and implementation of practice guidelines. Open to EMHA students only.

**HMGT 600 Managing Risk (2, FaSp)** Overview of reimbursement models in clinical and institutional settings; legal, financial and clinical assumption of risk pursuant to new and evolving federal and state statutory and regulatory provisions. Open only to EMHA students.

**HMGT 601 Operations Management for Accountability (4, FaSp)** Hospital operations in the inpatient/outpatient setting; special emphasis on the growing requirement to more effectively manage across the continuum of care while assuming greater accountability in the delivery of care. Open only to EMHA students.

**HMGT 602 Operational Efficiency Processes in Health Care Organizations (2, FaSp)** Improving productivity and efficiency of health care organizations combining the application of key operational analysis principles to improve quality, speed and productivity in the delivery of health care. Open only to EMHA students.

**HMGT 603 Developing and Monitoring of Quality and Patient Safety Outcomes (2, Sm)** Overview of contemporary methods used to develop and monitor patient quality and safety outcomes; develop skill in data collection and analysis of clinical care outcomes; focus on operationalizing outcomes that matter to payers, organizations, and clinicians. Open only to EMHA students.

### URBAN AND REGIONAL PLANNING (PLUS)

**PLUS 600 Environmental Goods in Planning and Development (4, Irregular)** Production, distribution, and valuation of environmental goods with attention to amenity concepts, externalities, public goods, consumer behavior; as characterized in economics, political science, sociology, psychology.

**PLUS 601 Advanced Planning Theory I (4, Fa)** Value hierarchies, means-ends continuums, and the nature of social action; problems of prediction and choice under conditions of uncertainty; alternative planning strategies.

**PLUS 603 Planning and Development Paradigms (4, Sp)** Introduction to historic, prevalent, and alternative paradigms of professional planning and development practice; seminar format and case studies.

**PLUS 611 Sustainable Cities: Problems and Policies (3, Fa)** (Enroll in GEOG 601)

**PLUS 612 Analysis of Quantitative Data for Planning and Development (4, Fa)** Planning and development case study approach to identifying data needs, acquisition, evaluation, manipulation, analysis, and multimedia presentation. *Prerequisite:* PPD 525.

**PLUS 615 Behavioral Issues in Environmental Design (4, Irregular)** Planning and design of the physical environment for human activities, e.g., user preferences, privacy, territoriality, stress and adaptation, cognitive mapping, lifestyles.

**PLUS 623 Politics of Planning and the Urban Environment (4, Sp)** Historic roots of property rights and obligations related to public policy, focus on current issues and discourse.

**PLUS 626 Information Systems for Planning and Development (4, 2 years, Sp)** Structure, content, and applications of formal information systems in planning and policy making emphasizing social accounts and indicators, censuses, social reporting, and “futures” research.

**PLUS 631 Seminar in Physical Planning and Design in Developing Countries (4, Irregular)** Issues in comparative urbanism; planning and design in developing countries: slums and squatters, housing and infrastructure, new towns, land policy, conservation and redevelopment, city design.

**PLUS 632 National Urban Policy in Developing Countries (4, Irregular)** The problems of the primate city, the role of intermediate cities, and the implicit spatial impacts of macro and sectoral policies.

**PLUS 633 Seminar in Comparative Housing Policy and Urban Planning Programs (4, Irregular)** Comparative examination of urbanization experience in selected areas and cities throughout the world; housing policies, urban planning approaches, financial, administrative, legal, and other techniques.

**PLUS 635 Urban Finance (4, Irregular)** The theory of fiscal federalism and municipal finance, with examples from the USA and other countries, public/private partnerships in urban development, and government decentralization.

**PLUS 640 International Urban Development (4, Irregular)** Study of urbanization in developing countries; special attention to urban growth, migration, city size, land use, and urban management. Comparative case studies.

**PLUS 680 Advanced Urban and Regional Transportation Planning (4, 2 years, Fa)** Social and environmental impacts; incentive structures; alternate travel; investment guidelines; technological change.

**PLUS 692 Conspectus Preparation (4, FaSpSm)** Preparation of a case study of a specific planning and/or development project that defines the student’s field of study.

**PLUS 694abcdz Planning, Design and Development Project (2-2-2-0, FaSp)** Credit on acceptance of planning, design and development project. Graded IP/CR/NC.

#### **POLICY, PLANNING, AND DEVELOPMENT (PPD)**

**PPD 100m Los Angeles, The Enduring Pueblo (4, FaSp)** Gateway to the minor in Planning and Development. Ethnic history of Los Angeles, emphasis placed on architecture, planning, and development. Multiplicity of cross-connections shaped by race, ethnicity, religion, gender, and sexual orientation. (Duplicates credit in former PLDV 100.)

**PPD 225 Public Policy and Management (4, FaSp)** Institutions, legal context, and processes of public policy and management. Contemporary theories of public policy formulation, implementation, and evaluation. Public managerial challenges and reforms.

**PPD 227 Urban Planning and Development (4, FaSp)** Gateway to B.S., Public Policy, Management and Planning and minor in Planning and Development. City building and development process; who plans, politics of planning and development; major topics include land use, fiscal policy, transportation, sustainability, and economic development.

**PPD 240 Citizenship and Public Ethics (4, Fa, Sp)** Review of legal and ethical traditions of citizenship with emphasis on the latter; consideration of implications for current practice of public policy-making and management. (Duplicates credit in former PPMT 240.)

**PPD 245 The Urban Context for Policy and Planning (4, Fa)** The urban context for planning and policy decisions. Socioeconomic, physical, and spatial structure of cities; and the underlying demographic, economic, and social processes that drive their ongoing transformation.

**PPD 250m Third World Cities (4, FaSp)** Gateway to the B.S., Planning and Development. The transition from traditional to modern cities in the developing world. Primacy and dualism; comparative urbanism as an expression of cultural variation; contrast in Western cities. (Duplicates credit in former PLDV 250.)

**PPD 301 PPD Practices: Internship Seminar (2, FaSpSm)** Policy, planning, and development skills for practice; internship seminar; leadership, group dynamics and presentation skills; application of management; organizational diversity; reflection on experiences. (Duplicates credit in the former PPD 401.)

**PPD 303 Statistics for Policy, Planning, and Development (4, FaSpSm)** Statistical applications applied to the real world; techniques including probability, sampling; hypothesis formation and testing; correlation, and linear regression. (Duplicates credit in the former PPD 404.)

**PPD 306 Visual Methods in Policy, Management, Planning and Development (4, FaSp)** Introduction to graphic design, photodocumentation, and geographic information systems as employed in planning, policy, and development. Visual explanations. Computer and by-hand applications. (Duplicates credit in former PLDV 410.)

**PPD 313 Finance of the Public Sector (4, FaSp)** Justifications for and effects of government policies; tax and spending sides of government budgets; public goods; externalities; social insurance; redistribution and welfare; tax policy. (Duplicates credit in former PPMT 313.) *Prerequisite:* ECON 203.

**PPD 314 Public Policy and Law (4, Fa)** Institutional foundations and analysis of public policy issues; policy formulation and implementation; application of theories; case analyses.

**PPD 315 Analytic Foundations for Public Policy (4, Sp)** Qualitative methods of analysis; ethical and political implications of policy choices; issue diagnosis and policy design skills; critical reasoning and ethics; policy leadership. *Prerequisite:* PPD 314.

**PPD 316 Human Resource Management for Public Organizations (4, FaSp)** Human resource development and management; values and processes in civil service career systems; training practices; human relations in supervision; personnel theory. (Duplicates credit in former PPMT 316.)

**PPD 318 Financial Accounting in Public and Nonprofit Organizations (4, FaSp)** Basic accounting principles and concepts necessary for the preparation and understanding of financial statements; accounting for service organizations in the public/nonprofit sector; fund accounting. (Duplicates credit in former PPMT 351.)

**PPD 320 Organizational Behavior in Public Administration (4, FaSp)** Understanding human behavior in public organization: motivation, roles, communication; group behavior and decision-making in public context; managing conflict; leadership and change in public complex organizational systems. (Duplicates credit in former PPMT 485.)

**PPD 325 Fundamentals of Health Policy and Management (4, FaSp)** Institutions, policies, and processes affecting health care policy and management; historical and philosophical roots; management of health care delivery; access and quality issues; responsiveness to public needs. (Duplicates credit in the former PPD 230.)

**PPD 330 Introduction to Health Care Systems (4, Sp)** Concepts and determinants of health and illness; health care delivery organizations and programs; the role of the administrator; issues in health care financing and access; quality evaluation; future trends. (Duplicates credit in former PPMT 330.)

**PPD 340 The American System of Justice (4, Irregular)** Introduction to the system of justice administration: components — police services, judiciary, corrections; interrelationships and issues; management strategies for change. (Duplicates credit in former PPMT 340.)

**PPD 342 Crime and Public Policy (4, Fa)** Public policy agenda-setting, alternatives formulation, and implementation for crime and criminal justice; analysis of specific issues including crime control, death penalty and gun control. (Duplicates credit in former PPMT 342.)

**PPD 343 Terrorism, Homeland Security, and Public Policy (4, Fa)** Overview of terrorism, government policies and practices, issues of civil liberties, challenges to public sector management.

**PPD 353 Introduction to Philanthropy and Grant-writing (4, Fa)** History, theories, philosophies, and practices of philanthropy; relationship between philanthropy and nonprofit world; grant-making procedures and relation to social innovation.

**PPD 357 Government and Business (4, FaSp)** Interrelated roles of business and public institutions; effects of public policies and laws on business sector; incorporates public and business perspectives. (Duplicates credit in former PPMT 357.) *Prerequisite:* ECON 203.

**PPD 358 Urban and Regional Economics (4, Fa)** Basic concepts of urban and regional economies; how planners intervene in the urban market; housing, transportation, public goods; land use politics; fiscal issues; cost-benefit analysis. (Duplicates credit in former PLDV 402.)

**PPD 360 Urban Transportation Planning and Policy (4, Sp)** Current transportation planning and policy critiques. Transportation planning; the relationship to urban structure; conventional and para-transit modes; analysis of local plans. (Duplicates credit in former PLDV 480.)

**PPD 362 Real Estate Fundamentals for Planning and Development (4, Fa)** Urban markets, government role and influences; capital markets and financing environment; mortgage instruments and analytic tools for decision-making. (Duplicates credit in former PLDV 406.)

**PPD 371 The Nonprofit Sector and the Public Interest (4, Fa)** Theories of the voluntary nonprofit sector in society and its relationship to government and business; public policies toward the sector. (Duplicates credit in former PPMT 371.)

**PPD 372m Public Service in an Urban Setting (4, Sp)** Voluntary service in an urban, multicultural context: diverse meanings and practices, history, motivations, relationship to charity and change, dilemmas, public policies; service learning project required. (Duplicates credit in former PPMT 372.)

**PPD 373 Public Policy and Planning Analysis (4, FaSp)** Applied analytic modeling and data manipulation; visual presentation; interpretation of data; needs assessment and market failure analysis; indexing; extrapolation and simple forecasting; simple risk analysis; benefit-cost analysis. (Duplicates credit in the former PPD 473.) *Prerequisite:* ECON 203, PPD 225, PPD 303.

**PPD 380ab International Perspectives on Urban Problem Solving (4-4, Irregular)** Research on comparative urban public policy and administration utilizing case study approach; field research includes study in various foreign cities. (Duplicates credit in former PPMT 412ab.)

**PPD 382 International Development (4, FaSp)** Definitions and measurements of development; impact of globalization; concept and practice of international and development administration and planning at local, national, and global governance levels. (Duplicates credit in former PLDV 405.)

**PPD 390 Special Problems (1-4)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only. (Duplicates credit in former PLDV 390 and PPMT 390.)

**PPD 402 Management of Public and Non-profit Organizations (4, Fa)** Contemporary management theory; the nature of complex organizations; organizational and intergovernmental arrangements; roles and responsibilities of managers; managerial and organizational effectiveness; organizational structure and dynamics.

**PPD 403 Management Analysis I (4, Sp)** Introduction to organizational and systems analysis; historical perspective; systems theory; information systems, procedure analysis; management planning; introduction to models. (Duplicates credit in former PPMT 403.)

**PPD 407 Financial Management of Public and Nonprofit Organizations (4, Sp)** Time value of money, risk, government bonds and tax-exempt financing, cost of capital, budgeting, financial statement analysis, and working capital management.

**PPD 410 Comparative Urban Development (4, Sp)** Urbanization and urban development and growth through an international scope; globalizing cities.

**PPD 411abcd Sacramento Semester (4-4-4-4, Irregular)** Exploration of political, economic, and administrative climate of the state government; basic processes and functions considered through seminars, research projects, visitations, group discussions, and internships. (Duplicates credit in former PPMT 411abcd.)

**PPD 413 Administration of Health Care Organizations (4, Sp)** Theory and practice; role of governing bodies, medical staffs and quality review committees; current trends; community responsibility; regulatory and oversight agencies. (Duplicates credit in former PPMT 439.)

**PPD 414 Community Health Policy and Planning (4, Sp)** Historical perspectives on and the contemporary practice of community health planning; impact of culture, socio-economics, and environment; policy dimensions; urban planning's role in enhancing and sustaining health.

**PPD 415 Health Policy (4, Sp)** Health policy analysis and challenges; price of health; structure of major sectors in health care; role of insurance in policy debates; trade-offs with policy decisions. *Prerequisite:* PPD 325.

**PPD 417 History of Planning and Development (4, Sp)** Historical evolution of planning and development. How changing modes of planning and development have shaped the built landscape throughout the century. (Duplicates credit in former PLDV 485.)

**PPD 420 Environmental Impact Assessment (4, Sp)** Exploration of the role of the National Environmental Policy Act and the California Environmental Policy Act; study of environmental impact assessments including the regulatory aspects, stakeholder and participatory processes, and legal framework.

**PPD 425 Designing Livable Communities (4, Fa)** Theories and concepts of livable communities and good city form; case studies of historical and current best practices; field visits; collaborative design project. (Duplicates credit in former PLDV 407.)

**PPD 427L Geographic Information Systems and Planning Applications (4, Fa)** Basic GIS concepts, ArcView and other GIS software, planning applications and databases, basic cartography; students select, research and prepare a planning GIS analysis project.

**PPD 429 Urban Design Practicum (4, Irregular)** Application of design concepts and graphic skills to a local design problem sponsored by a local public or private client in a studio setting; site visits, community contact, presentations. (Duplicates credit in former PLDV 414.) *Prerequisite:* PPD 306, PPD 425.

**PPD 431 Undergraduate Policy, Planning, and Development Studio (4, FaSp)** Application of methods in the exploration of a specific project, policy, or organization from the multiple perspectives of the five tracks in the undergraduate program. Open only to seniors.

**PPD 435 Analyzing Real Estate Markets for Planning and Development (4)** Macro- and micro-analysis of urban property markets (residential, commercial, and industrial) with regard to their location and dynamics. (Duplicates credit in former PLDV 446.) *Recommended preparation:* PPD 362.

**PPD 437 Advanced Finance and Investment for Planning and Development (4, FaSpSm)** Advanced real estate principles. The nature, operation, and role of U.S. mortgage markets. Mortgage financing of residential and income-producing property types. (Duplicates credit in former PLDV 456.) *Prerequisite:* PPD 362, MATH 117.

**PPD 438 Local Economic Development (4, Fa)** Economic development in a capitalist system, historic review, sectoral review, funding, strategizing, partnerships, evaluation; class project. (Duplicates credit in former PLDV 447.)

**PPD 439 Housing and Community Development (4, Fa)** Evolution of government housing and community development programs; present practices, e.g., housing elements, economic development, neighborhood rehabilitation; housing needs and market analysis; housing and health. (Duplicates credit in former PLDV 440.)

**PPD 440 Management of Justice Systems (4, Irregular)** Social controls and delivery of justice administration services; comparative systems; organization theory and justice administration; system adaptation and change; system performance measurement: economy, efficiency, effectiveness. (Duplicates credit in former PPMT 440.)

**PPD 441 Judicial Administration (4, Irregular)** Local, state, federal judicial systems; constitutional, legislative, judicial influences on administrative action. Administrative problems associated with judicial functions including district attorney, public defender, the courts. (Duplicates credit in former PPMT 441.)

**PPD 442 Administration of Police Services (4, Irregular)** Police and society; the structure and organization of American policing, current managerial problems; police research and development; future planning; administration of police juvenile programs. (Duplicates credit in former PPMT 442.)

**PPD 452 Organization and Interface of Juvenile Justice Subsystems (2, FaSp)** Effective interface among juvenile justice subsystems (police and social service agencies, schools, courts); legal/jurisdictional parameters, resource constraints; strategies for joint intervention and problem resolution. (Duplicates credit in former PPMT 452.)

**PPD 453 Program, Policy, and Legislative Trends in Juvenile Justice (2, Irregular)** Examination of current research findings and legislation in juvenile justice; relations of new information to operating assumptions of agencies; impacts, trends; implications for management practice. (Duplicates credit in former PPMT 453.)

**PPD 454 Problems and Issues in the Delivery of Youth Services (2, Irregular)** Strategies for coordinated mobilization of diverse juvenile justice agencies; resolution of conflicting agency objectives (e.g., enforcement vs. rehabilitation). Information and resource needs; organizational skills, techniques. (Duplicates credit in former PPMT 454.)

**PPD 461 Sustainable Communities, Policy and Planning (4, FaSp)** Policy and planning as shaped by sustainability theories; sustainability indicators; topics include water resources, air quality, land use regulations, environmental design, carrying capacity, ecological footprint analysis.

**PPD 466 Urban Government and Management (4, Irregular)** Preparation and discussion of cases dealing with selected policy areas including transportation, housing, poverty, and environmental quality. (Duplicates credit in former PPMT 427.)

**PPD 468 Cross-Cultural Negotiations: Communication and Strategy (4)** (Enroll in COMM 468)

**PPD 475 The Future of California (4)** (Enroll in MDA 475)

**PPD 476 Politics and Administration (4, Sp)** Administrative relationships to the policy processes; influence of political and economic pressures on administrative policy determination; political behavior by administrators; case analysis. (Duplicates credit in former PPMT 486.)

**PPD 478 Social Innovations (4, Fa)** Strategies and processes of social innovation and change; examination of social change in the market, government, and within the nonprofit sector; dynamics; civic action and activism.

**PPD 482 Comparative Public Administration (4, Sp)** Methodology, theories, and models of comparison; functional processes of administration in developing and developed nations compared; role of bureaucracy in development and nation-building; ecology of administration. (Duplicates credit in former PPMT 482.)

**PPD 485m U.S. Immigration Policy (4, Fa)** Examination of the historical and contemporary components of U.S. immigration policy with emphasis on policies addressing legal permanent immigrants, refugees, asylees, the undocumented.

**PPD 490x Directed Research (2-8, max 8, FaSpSm)** Individual research and readings. Not available for graduate credit. (Duplicates credit in former PLDV 490x and PPMT 490x.)

**PPD 497ab Senior Thesis (a: 2, Fa; b: 2, Sp)** Writing of the honors capstone project in an area of interest related to the track of study; research and writing skills. Open only to seniors.

**PPD 498 Senior Honors Seminar (4, FaSpSm)**

Concepts, theories, and methods of analysis of a selected topic within the fields of public policy, management and planning. Students must have a 3.5 GPA in PPD courses; 3.0 GPA overall.

**PPD 499 Special Topics (2-4, max 8, FaSpSm)**

Selected topics in Policy, Management and Planning. (Duplicates credit in former PLDV 499 and PPMT 499.)

**PPD 500 Intersectoral Leadership (2)**

Roles of public, private, nonprofit, and civil society sectors in policy, planning, and development. Leadership skills in negotiation, conflict resolution, institutional design, problem solving.

**PPD 501ab Economics for Policy, Planning and Development (2-2)**

*a:* Microeconomic theory as applied to policy, planning, and development; concepts of efficiency; macroeconomic issues. *b:* Microeconomic analysis and modeling to incorporate Market failure and issues of uncertainty and information failure; organization models; policy instruments; policy and planning applications.

**PPD 502x Statistical Foundations for Public Management and Policy (2, FaSp)**

Statistical analysis concepts and reasoning; sampling and data sources; focus on basic statistical applications in public management and policy analysis. Not for graduate credit for MHA, MPA, MPP and affiliated degrees.

**PPD 507 Six-Sigma Quality Resources for Health Care (3, Fa)**

(Enroll in ISE 507)

**PPD 508 Health Care Operations Improvement (3, Sp)**

(Enroll in ISE 508)

**PPD 509 Problems and Issues in the Health Field (4, FaSp)**

Principles of epidemiology; disease trends, treatment efficacy, influences on utilization; health promotion, disease prevention and health protection; intergovernmental relationships; management of public health programs. (Duplicates credit in former PUAD 530.)

**PPD 510ab Financial Management of Health Services (4-2, FaSp)**

*a:* Accounting principles, financial reports, managerial finance, financial planning, capital investments, working capital analysis; elements of budgeting and reimbursement; performance standards; reporting; developing a management system. Open only to graduate students. *Prerequisite:* PPD 516; *recommended preparation:* PPD 502x or competence in statistics. *b:* Changing practices, emerging issues, strategies and innovations in financial planning, management, and regulation; federal and state policies and requirements.

**PPD 511 Health Information Systems (2, FaSm)**

Conceptual framework for data base development; relational data management; use of health statistics; health indicators; confidentiality, security, privacy. *Recommended preparation:* PPD 502x or competence in statistics and PPD 516 or competence in accounting.

**PPD 512 Health Administration Residency Seminar (2, max 4, Sp)**

Supervised study of health care administration, governance, professional staff relations, internal operations and controls, legal and regulatory requirements, management policy and strategy. (Duplicates credit in former PUAD 533.) *Prerequisite:* PPD 509, PPD 510a, PPD 545; minimum of 20 graduate level units.

**PPD 513 Legal Issues in Health Care Delivery (2, FaSp)**

Rights of consumers; health-related powers of governments; rights and responsibilities of health care providers; interrelationships of rights, powers, and responsibilities. Open only to graduate students. *Recommended preparation:* PPD 509 or substantial prior work experience in health care organizations.

**PPD 514 Economic Concepts Applied to Health (4, FaSpSm)**

Relationships between economic characteristics and health status; impact of economy on health services industry; demand and resources for health services; utilization, prices, costs, health insurance. (Duplicates credit in former PUAD 537.) *Prerequisite:* PPD 501a.

**PPD 515 Strategic Management of Health Organizations (4, FaSpSm)**

Application of principles of health administration in several practice settings. Decision-making; strategic management; organizational performance; communication; provider comparisons. *Prerequisite:* PPD 510a or HMG 565, PPD 545 or HMG 520; *recommended preparation:* PPD 509, PPD 511, PPD 513, PPD 514, PPD 557.

**PPD 516 Financial Accounting for Health Care Organizations (4)**

Accounting as a management tool; accounting systems; basic accounting concepts and procedures; budgets; financial statements. Open only to graduate students.

**PPD 517 Concepts and Practices in Managing Health Care Organizations (2, FaSm)**

Application of principles of health administration. Role of managers; managing people and programs; human resource management concepts and applications; working with professionals; governance; public relations.

**PPD 518 Quality of Care Concepts (2, Sp)**

Quality issues and complexities affecting health care; fundamentals of quality improvement programs; examination of quality issues and improvement programs in various health care venues; strategies.

**PPD 519 Methods and Applications of Health Services Research (2, Fa)**

Examination of policy and management issues for empirical research; indicators and measurement of outcomes; impact on policy and management decisions; methodology; analysis of quantitative and qualitative data. *Prerequisite:* PPD 514.

**PPD 520 Economic Approaches to Health Policy Analysis (2, Sp)**

Evaluation of current major health policy challenges and issues; economic analysis of behavioral responses to change in health care policy; new legislation; policy trade-offs. *Prerequisite:* PPD 514.

**PPD 521ab Information Technology Management Systems in Health Care (2-2, Sm)**

Principles and methods of systems analysis; assessment; strategic planning, design consideration; e-health and e-commerce system trends; health care information systems application areas; regulatory requirements. *Prerequisite:* PPD 511. *b:* Analytic methods used to develop data-driven solutions; specific problems in health care organizations; integrating data; communicating data; interpretation; exploration of new approaches for improvement.

**PPD 524 Planning Theory (2, Fa)**

Development of a critical perspective by becoming more aware of the intellectual roots of the planning profession, with a focus on practical outcomes of actions. (Duplicates credit in former PLUS 501.)

**PPD 525 Statistics and Arguing from Data (2, FaSp)**

Fundamentals of probability and statistics, planning analysis techniques, computing standards, and understanding of the rhetoric related to statistical analysis. (Duplicates credit in former PLUS 502.)

**PPD 526 Comparative International Development (2, Fa)**

Introduction to comparative international development with a focus on regional growth and urban development. (Duplicates credit in former PLUS 505.)

**PPD 527 The Social Context of Planning (2, Sp)**

Examination of the formation of the modern urban environment with its consumer culture, social classes, and racial and ethnic diversity. (Duplicates credit in former PLUS 506.)

**PPD 529 Legal Environment of Planning (2, Sp)** Understanding of the legal system and its processes and laws applicable to land use and development and the legal nature of powers of public and private entities. (Duplicates credit in former PLUS 509.)

**PPD 530 Historical Analysis of Urban Form and Planning Practice (2, Sp)** Awareness, analysis, understanding, and influencing the city building process locally and regionally; isolate and exercise tools and methods of visual literacy. (Duplicates credit in former PLUS 510.)

**PPD 531L Planning Studio (4, 8, 12, max 12, FaSp)** Application of methods in planning, programming, research, and evaluation in a professional context; data collection and analysis; case studies; practical applications. (Duplicates credit in former PLUS 576L and PLUS 676L.)

**PPD 532L International Planning and Development Laboratory Workshop (4-8, Sm)** Application of planning principles and methods to specific urban planning problems abroad; involves preparation in the spring semester and an overseas field visit and a collaborative practicum. (Duplicates credit in former PLUS 575L.)

**PPD 533 Planning History and Urban Form (2)** History of urban planning with an emphasis on the evolution of how planning shaped the physical environment in response to political, economic, and social issues.

**PPD 540 Public Administration and Society (4, FaSpSm)** Administrative concepts, institutions, legal systems, and practices; values; facilitation of responsibilities and rights; professional applications for personal, private sector, and public achievement. (Duplicates credit in former PUAD 500.)

**PPD 541 Public Financial Management and Budgeting (4, Fa)** Financial management applied to public and nonprofit organizations; financial valuation, financial markets, budgeting, tax administration, debt financing, cost-benefit analysis and financial analysis. (Duplicates credit in former PUAD 514.)  
*Prerequisite:* PPD 502x.

**PPD 542 Policy and Program Evaluation (4, Sp)** Methods and models for policy and program evaluation; methods of collecting and analyzing evaluation data; processes for linking evaluation to policy formulation and program management. (Duplicates credit in former PUAD 525 and former PUAD 529.)  
*Prerequisite:* PPD 502x.

**PPD 543 Internship Seminar (1, FaSp)** Supervised study of management, analytical, or other professional activities in government; integration of theory, practice and relevant literature. (Duplicates credit in former PUAD 544.)

**PPD 545 Human Behavior in Public Organizations (4, FaSpSm)** Behavior in organizations; focus on personal, interpersonal, and group level factors that influence such behavior. (Duplicates credit in former PUAD 585.)

**PPD 546 Professional Practice of Public Administration (4, FaSpSm)** Practice of public management; use of management theories; strategic thinking and planning; understanding organizations; management skills and techniques; management in a public setting; ethics. (Duplicates credit in former PUAD 597.)  
*Prerequisite:* PPD 501b, PPD 540, PPD 545.

**PPD 552 Managing and Financing Public Engineering Works (3, FaSpSm)** (Enroll in CE 552)

**PPD 554 Foundations of Public Policy Analysis (2, Fa)** Introduction to public policy analysis; issue diagnosis and policy design; analytic reasoning and argumentation; the role of the public policy professional; ethical issues in policy analysis. Open only to MPP students and Certificate in Public Policy students.

**PPD 555 Public Policy Formulation and Implementation (4, Sp)** Political and organizational perspectives on policy making process; agenda setting, policy design, adoption, implementation, evaluation, modification or termination. Policy leadership skills: negotiation and strategic mapping. (Duplicates credit in former PUAD 528 and PPD 554 and PPD 559.)

**PPD 557 Modeling and Operations Research (4, FaSpSm)** Management science methods that support decision making in policy, management, and planning settings. Includes linear programming, queuing theory, decision analysis, and forecasting. Open only to master's or doctoral students. *Prerequisite:* PPD 502x or PPD 525.

**PPD 558 Multivariate Statistical Analysis (4, FaSp)** Applied multivariate statistics in support of policy, management, and planning problem solving. Includes regression analysis, logit models, and an introduction to time-series models and multi-equation estimation. Open only to master's and doctoral students. *Prerequisite:* PPD 502x or PPD 525.

**PPD 559 Policy Implementation and Evaluation (4, FaSp)** Theoretical approaches, critical issues, and research methods in public policy implementation. Field-based research project. (Duplicates credit in former PUAD 570.)

**PPD 560 Methods for Policy Analysis (4, Sp)** Examination of methods used in the analysis of policy methods, including cost benefit analysis, decision and risk analysis, and applied social science methods. (Duplicates credit in former PUAD 572.) *Prerequisite:* PPD 502x and PPD 554 and PPD 501b.

**PPD 561ab Policy Analysis Practicum (1, 3, FaSp)** Application and integration of the knowledge and techniques of analytic, quantitative, managerial, political and ethical analyses to specific public policy problems. (Duplicates credit in former PUAD 589.)

**PPD 568 Environmental Governance and Sustainability (2, Fa)** Introduction to leading issues of environmental governance and policy in looking toward a more sustainable future; normatively important concerns and the social, cultural, and political dimensions; thematic look from values to action.

**PPD 569 Applied International Policy Analysis and Management Project (4, Sp)** Enables students to integrate theory, research and practice into an applied project of their own choosing. The output of this course is a professional report in a selected public policy or management area. (Duplicates credit in former PUAD 507.)

**PPD 570 Applied Statistics for Planning, Policy and Management (4, Sm)** Use of statistical reasoning to answer questions related to public policy and management. Students will review and understand selected statistical techniques for analyzing data and for addressing public policy and management questions of interest using applied data analysis. (Duplicates credit in former PUAD 523.)

**PPD 571 International Public Policy and Management Seminar (4, Fa)** An introduction to the concepts and methods of public policy analysis and management. Highlights some of the constraints of the policy process. Includes examples from the United States but also presents comparative views of the contours of public policy in both developed and developing nations. The course applies public policy and management frameworks to selected areas of social policy. (Duplicates credit in former PUAD 524.)

**PPD 572 Special Issues in International Public Policy (1-4, max 12, FaSpSm)** Current international public policy on issues such as governmental reform, regulation, social welfare, poverty alleviation and international aid. Policy framework and in-depth analysis of specific topics of relevance to governmental agencies and international organizations.

**PPD 587 Risk Analysis (4)** Concepts of risk analysis, risk in engineered systems, environmental risk, security risks; fault trees, event trees, risk simulations; risks and decision-making. *Recommended preparation:* MATH 108 or MATH 116.

**PPD 588 Introduction to Transportation Planning Law (3)** (Enroll in CE 579)

**PPD 589 Port Engineering: Planning and Operations (3)** (Enroll in CE 589)

**PPD 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PPD 594abz Master's Thesis (2-2-0, FaSp)** Credit on acceptance of thesis. Graded IP/CR/NC.

**PPD 599 Special Topics (2-4, max 8, FaSpSm)** Selected topics in public policy, management and planning.

**PPD 600 Management of Managed Care Organizations (2, FaSpSm)** Managed care arrangements, interorganizational relations, management practices and controls, medical staff relations, strategic planning, marketing, utilization review, quality assurance, outcomes measures. *Prerequisite:* PPD 545 or HMG 520; *recommended preparation:* PPD 516, PPD 510a or HMG 565.

**PPD 601 Management of Long-Term Care Organizations (4, Fa)** History, development, trends; major policy issues; organization of systems; principles and techniques of administration; management of institutional and community based programs. Open only to graduate students.

**PPD 602 Strategic and Operational Planning for Health Services (4, 2 years, Fa)** Strategic, institutional, and program planning theory and methods; governmental and legal requirements, certificate of need processes, reimbursement controls; financing and marketing considerations, practices, and methods. (Duplicates credit in former PUAD 535.)

**PPD 603 Marketing of Health Services (4, Sm)** Assessing community needs and organizational service capabilities; evaluating competition; qualitative and quantitative market research methods; market communications and advertising; developing marketing plans. *Recommended preparation:* PPD 502x or competence in statistics.

**PPD 604 Seminar in Hospital Administration (4, Sm)** Hospital systems and functions; managerial processes, theory, and practice; governance structures; legal, regulatory, administrative, and professional requirements; medical and professional staff; multi-institutional arrangements; controls. Open only to graduate students. *Prerequisite:* PPD 545 or HMG 520; *recommended preparation:* PPD 516.

**PPD 605 Frontline Issues in Health Services Administration and Policy (2, max 6, FaSpSm)** Emphasis on current or emergent issues in the health care industry. Focus on impact of recent health legislation and/or health care system responsiveness.

**PPD 606 Urban Health Policy (4, Fa)** Addresses current U.S. health policy issues and the critical processes that shape them, with an emphasis on urban populations; institutional, economic, social, ethical, and political factors.

**PPD 607 Introduction to Public Health Policy (4, Sp)** Public health policy and analysis methods; evaluation of the public health system and safety net programs.

**PPD 608 Leadership Symposium in Health Management and Policy (1, max 3, FaSpSm)** A forum for leading executives and policymakers to address ways they or their organizations improve healthcare financing, delivery and management, in the U.S. and internationally.

**PPD 609 Physician Practice Management (2, Sp)** Overview of medical practice management issues, structures, systems and strategies for effective clinical and financial performance of physician organizations. *Recommended preparation:* PPD 509.

**PPD 610 Managed Care Contracting (2, Fa)** Provides practical and strategic decision-making skills in managed care contracting, including contract types, terms and conditions; financial assessment; proposal development and analysis; and negotiation. *Prerequisite:* PPD 600; *recommended preparation:* PPD 510a or HMG 565, PPD 514.

**PPD 611 Policy Issues in Planning and Development (4, Fa)** Overview of policy issues in planning and development professions in the U.S. and abroad. Special attention to collective decision making, role of institutions, and ethics. (Duplicates credit in former PLUS 503.)

**PPD 612 Research and Analytical Techniques (4, Sp)** Professional practice-oriented analytic skill; fundamentals of data manipulation; spreadsheet applications and forecasting; and communication of results. (Duplicates credit in former PLUS 504.)

**PPD 613ab Policy, Planning, and Development International Laboratory (a: 1, max 2, Sp; b: 3, max 6, Sm)** Research methods for intensive practical field research and evaluation; policy, management and planning practice in intercultural contexts; preparation for professional-level consulting abroad.

**PPD 614 Management in Planning Practice (2 or 4, 2 years, Sp)** Administrative, management, political, and other problems faced by the practicing professional planner. (Duplicates credit in former PLUS 521.)

**PPD 615 Comparative Urbanization, Development, and Inequality (4, Irregular)** Theories of inequality, dependency and dualism in relation to urbanization, growth, and poverty in developing countries; development and underdevelopment; core-periphery linkages. (Duplicates credit in former PLUS 534.)

**PPD 616 Participatory Methods in Planning and Policy (4)** Approaches to community participation, introducing students to the theories behind participatory methods as well as to the skills to implement them.

**PPD 617 Urban Demography and Growth (4, Fa)** Theory and policy regarding population change in urban areas; housing; cohort analysis; immigration; ethnicity; employment; education. Methods of graphic representation; census data manipulation, interpretation, forecasting. (Duplicates credit in former PLUS 539.)

**PPD 618 Housing Facilities and Community Development (4, Irregular)** Structure of the building industry and technology. Housing markets and programs; environmental standards. Community development and redevelopment. Planning, program development, finance, and coordination of public facilities and services. (Duplicates credit in former PLUS 540.)

**PPD 619 Smart Growth and Urban Sprawl: Policy Debates and Planning Solutions (4, Irregular)**

Determinants and analytical models of land use; interaction of land uses with environmental quality and natural resources, land use policy instruments; regulation, taxation, public services. (Duplicates credit in former PLUS 562.)

**PPD 620 General Plans (4, Fa)** Assessment of a recently adopted general plan, analysis of the general plan process, and detailed review of each major element and issue. (Duplicates credit in former PLUS 563.)

**PPD 621 Environmental Impacts (4, Sp)**

Legal, political/institutional, and technical aspects of environmental impact reports for urban planning. (Duplicates credit in former PLUS 561.)

**PPD 622 Seminar in Urban Development (4, Irregular)**

Central city housing and renewal problems and policies. Site selection, organization; land valuation, acquisition, disposition; relocation and management; reuse; site planning and development; politics; financing. (Duplicates credit in former PLUS 541.)

**PPD 623 Community Development and Site Planning (4, Sp)**

Urban form and emerging community design practices; design project development; evaluation and assessment of site planning in cities and local communities.

**PPD 624 Local Economic Development: Theory and Finance (4, Sp)**

Socioeconomic change, economic development theory, assessment techniques, and economic indicators in the context of planning and development policies and programs. (Duplicates credit in former PLUS 547.)

**PPD 625 Planning and Economic Development Finance (4, Fa)**

Fundamentals for economic development professionals and policy makers including feasibility analysis and the financing of facilities, social services, and community-based enterprises. (Duplicates credit in former PLUS 546.)

**PPD 626 Public/Private and Mixed Enterprises Planning (2, Sp; 4, Fa)**

Case studies of planning and public/private and mixed enterprises; public production of private goods; privatization of public services; public/private partnerships; mixed enterprises.

**PPD 627 Design Skills for Urban Planners (4, Fa)**

Develop observation, description, analysis, and conceptualization skills related to urban spatial conditions; advance professional communication proficiencies. (Duplicates credit in former PLUS 573.)

**PPD 628 Urban Planning and Social Policy (4, Irregular)**

Urban planning and social work: theory, values, techniques of inquiry, and problem-solving methods appropriate to urban planning and social work. (Duplicates credit in former PLUS 552.)

**PPD 629 Planning in the Voluntary Non-profit Sector (4, Irregular)**

Structure of voluntary nonprofit sector; role in social, economic, and spatial planning; corporate philanthropy; foundations; pass-through organizations; nonprofit planning requirements. (Duplicates credit in former PLUS 545.)

**PPD 630 Urban Economic Analysis (4, Sp)**

Economic models of cities and city development and structure; housing and land markets; transportation systems; problems of congestion and pollution; evaluation of urban policies. (Duplicates credit in former PLUS 566.)

**PPD 631 Geographic Information Systems for Policy, Planning, and Development (2)**

Introduction to GIS systems and usage in the public sector; spatial data; understanding software and the application of technology; analysis of data using GIS.

**PPD 632 Planning Analysis and Evaluation (4, Sp)**

Methods of policy, program, and plan evaluation: economic principles and theoretical concepts introduced, followed by case studies. (Duplicates credit in former PLUS 574.)

**PPD 633 Urban Transportation Planning and Management (4, 2 years, Fa)**

Background applications of established urban travel forecasting procedures; land use; trip-generation, trip-distribution, modal-choice, trip-assignment; evaluation; criticisms. (Duplicates credit in former PLUS 580.)

**PPD 634 Institutional and Policy Issues in Transportation (4, Sp)**

Analysis of policies relating to transportation alternatives; institutional environment and background; federal, state, regional, and local agency responsibilities and interactions. (Duplicates credit in former PLUS 581.)

**PPD 635 Principles of Transportation Systems Analysis (4, Fa)**

Planning, design, modeling, and operation of inter- and intra-urban transportation networks. Analysis of contemporary engineering-economic issues relevant to transport, especially questions pertaining to infrastructure. (Duplicates credit in former PLUS 582.)

**PPD 636 Infrastructure and Modern Society (2, Sp)**

Survey of infrastructure issues that relates principles from multiple disciplines to the provision of vital services and encourages critical thinking within a systems context.

**PPD 637 Forecasting and Urban Planning: A Survey of Theory and Methods (4, Sp)**

Overview of forecasting methods and applications in urban planning processes used to determine urban futures; includes theoretical and institutional factors as well as quantitative methods.

**PPD 638 Integrative Seminar (4, FaSpSm)**

Individual research and preparation of an integrated comprehensive study coordinated with a sponsor such as a government agency or development firm. (Duplicates credit in former PLUS 591.) *Prerequisite:* PPD 611, PPD 612.

**PPD 639 Introduction to Community and Economic Development (4, FaSp)**

Theories of community and economic development and a contextual understanding of the forces that change the development and community life of urban areas.

**PPD 640 Leadership Foundations: Competencies and Core Values (4, Sm)**

An intensive introduction to leading through core values. Focuses on developing leadership skills at the personal level to build a foundation for leadership at all levels. Open only to Executive Master of Leadership students.

**PPD 641 Leading Individuals, Groups and Teams (4, Fa)**

Leadership styles in various settings; team demographics, and dynamics; problem-solving; decision-making; diversity and critical thinking skills; effect of culture on small group communication; managing conflict. Open only to Executive Master of Leadership students. *Prerequisite:* PPD 640.

**PPD 642 Strategic Leadership of Organizations (4, Sp)**

Strategic analysis; strategic planning; leadership; performance measurement and management; control systems; organizational structure and networks; organizational culture; organizational learning and change. Open only to Executive Master of Leadership students. *Prerequisite:* PPD 641.

**PPD 643 Leading Transformations Across Sectors: Integrative Seminar (4, Sm)**

Application and practice of leadership skills working across the public, private and nonprofit sectors. Skills include negotiation, collaboration, communication, political management and ethical responsibilities. Open only to Executive Master of Leadership students. *Prerequisite:* PPD 642.

**PPD 644 Shaping the Built Environment (4)**

Introduction to the theories and concepts and good city form. Explores the options for designing more livable and sustainable urban communities.

**PPD 645 Professional Development (1-4, max 8, Irregular)** Selected topics in the practical application of administrative concepts. Graded CR/NC. (Duplicates credit in former PUAD 502.)

**PPD 646 Fieldwork (1-4, max 8, Sp)** Supervised study of management activities in governmental agencies. Graded CR/NC. (Duplicates credit in former PUAD 503.)

**PPD 647 Finance of the Public Sector (4, Sp)** Sources of government revenue, intergovernmental financial relations, budgeting, public goods theory. Theoretical and applied skills in analysis of equity and efficiency issues. (Duplicates credit in former PUAD 513.)  
*Prerequisite:* PPD 501b.

**PPD 648 Concepts and Practices of Public Budgeting (4, Irregular)** Budget planning, budget formulation, tools for budget analysis and budget implementation. (Duplicates credit in former PUAD 515.)

**PPD 649 Concepts and Practices in Public Personnel Administration (4, FaSm)** Concepts of man and of work; workforce; government personnel systems, including merit concepts, classification, and compensation; collective bargaining; organizational justice; training and development. (Duplicates credit in former PUAD 516.)

**PPD 650 Organization Development in Public Administration (4, FaSp)** Overview of concepts and methodologies of organization development; diagnosing organizational needs; developing change strategies; selecting appropriate interventions. (Duplicates credit in former PUAD 517.)

**PPD 651 Seminar in the Administration of Local Government (4, Irregular)** Intensive consideration of the functions of the municipal executive and his environment. Research preparation and discussion of cases. (Duplicates credit in former PUAD 520.)

**PPD 652 Financial Administration in Local Government (4, Irregular)** Revenue sources, fees and charges, benefit assessments; financing economic development and redevelopment, issuing and managing debt, current asset management, and state-local relations. (Duplicates credit in former PUAD 521.)

**PPD 653 Training in the Public Sector (4, Fa)** Emergence of public service training; learning theories; program development process — assessing needs, design, delivery, and evaluation; role of media; individual, group, organization development; managing training. (Duplicates credit in former PUAD 522.)

**PPD 654 Information Technology Management in the Public Sector (4, FaSpSm)** Application of computer and information technology in government; e-government; information technology architecture; systems project management. (Duplicates credit in former PPD 518.)

**PPD 655 Administrative Law (4, Sm)** Administrative perspectives on legal principles of agency rule-making and adjudication; distinctions between the two; informal administrative actions; decision-making; judicial review; public control of administrative decisions. (Duplicates credit in former PUAD 543.)

**PPD 656 Political Management: Theory and Applied Techniques (4, Sm)** Political management theories; strategy formation; research and data collection approaches; computer applications; electronic databases; issue management; problem-solving techniques; ethical considerations. (Duplicates credit in former PUAD 545.)

**PPD 657 Political Leadership in Public Organizations (4, Sp)** Concepts and skills for public executives and senior managers; understanding the dynamics of governmental institutions and policy processes; organizational and personal assessment skills. (Duplicates credit in former PUAD 546.)

**PPD 658 Advocacy in Public Administration (4, Fa)** Perspectives on advocacy in the policy process; practice of advocacy; accessing the policy process; simulation of the advocacy process; ethical considerations. (Duplicates credit in former PUAD 547.)

**PPD 659 National Security Administration and the Domestic and International Environment (4, Irregular)** Interplay of domestic and international environments; resultant constraints upon national security program administration; administrative and organizational implications for future scenarios. (Duplicates credit in former PUAD 549.)

**PPD 660 Local Agency Debt and Cash Administration (4, Irregular)** Overview of methods of debt and cash administration including official statement analysis; mechanics of different types of issues; and cash management principles. (Duplicates credit in former PUAD 550.)

**PPD 661 Intergovernmental Management: Local Perspective (4, Fa)** Role of city, special district, and metropolitan governments in intergovernmental relations; intergovernmental impacts on local policy process and service delivery; management problems and alternatives. (Duplicates credit in former PUAD 552.)

**PPD 662 Intergovernmental Management: State Perspective (4, FaSp)** Role of state government in intergovernmental relations, emphasis on California experience; financial aspects of intergovernmental system. (Duplicates credit in former PUAD 553.)

**PPD 663 Intergovernmental Management: Federal Perspective (4, Irregular)** Role of national government in intergovernmental process; impact of federal legislative, executive, and judicial actions on state and local government; intergovernmental policy-making process. (Duplicates credit in former PUAD 554.)

**PPD 664 Contract Management (2, Sp)** Contract management techniques in the public and private sectors; micro and macro management; compliance and negotiation; conflicts of interest and ethical issues.

**PPD 665 Contemporary Issues in Philanthropy (4)** Motivations and strategies of philanthropists; philanthropic foundations and emerging institutions for philanthropy; issues of philanthropic stewardship, public policy and public accountability.

**PPD 666 Administrative Research and Analysis (4, Irregular)** Theory and methods for study of administrative effectiveness: problem solving, performance measurement, administrative and organizational research, quality improvement, and change implementation. (Duplicates credit in former PUAD 506.) *Prerequisite:* PPD 502x.

**PPD 667 Public Ethics (4, Sp)** Following an introduction to the study of ethics, relationships among administrative, political and policy ethics are examined, emphasizing the ethics of the administrative role. (Duplicates credit in former PUAD 560.)

**PPD 668 Entrepreneurship in the Public Sector (4, Irregular)** Providing public services through the private and nonprofit sectors; public-private partnerships; political and organizational skills required for public entrepreneurship. (Duplicates credit in former PUAD 561.)

**PPD 669 Federal Management Systems (4, FaSp)** Principal institutions and processes in federal government for overhead leadership and control; examines Office of Management and Budget, Office of Personnel Management, Merit Systems Protection Board, General Services Administration, and General Accounting Office. (Duplicates credit in former PUAD 564.)

**PPD 670 Management of Intergovernmental Programs (4, Sp)** Analysis of relationships among governmental units in delivery of governmental programs; historical development of intergovernmental relations; present status and future implications. (Duplicates credit in former PUAD 566.)

**PPD 671 Decision-Making in Regulatory Agencies (4, Irregular)** Risk assessment, management, and communication concepts and practices; comparisons of regulatory decision making in regulatory agencies; emerging benefit assessment, cost-effectiveness, and communication issues. (Duplicates credit in former PUAD 567.)

**PPD 672 Presidency, Congress, and the Bureaucracy (4, SpSm)** Relationships in national government among political executive, legislative, and administrative units; reviews institutions, formal processes, and political dynamics. (Duplicates credit in former PUAD 568.)

**PPD 673 Strategic Planning in the Public Sector (4, Sp)** Analysis/field application of action research models for strategic planning in public agencies; design of effective public systems; citizens/administrators' roles in strategic decision-making. (Duplicates credit in former PUAD 574.)

**PPD 674 Science, Technology, and Government (4, Irregular)** Impact of science/technology on governmental policy, processes, institutions; critical policy areas in science/technology; machinery for formulating science policy; governmental impact on science/technology. (Duplicates credit in former PUAD 575.)

**PPD 675 Nonprofit Management and Leadership (4)** Issues in nonprofit management and leadership including: the role of boards; strategic planning; marketing and fundraising; financial management; and volunteer and human resource management. *Prerequisite:* PPD 689.

**PPD 676 Comparative Public Administration (4, Irregular)** Methodologies, theories and models of comparison; administrative systems; role and functions of the public sector; administrative cultures. (Duplicates credit in former PUAD 579.)

**PPD 677 International Development Administration (4, Sp)** Development of theories; role of international institutions in resource exchanges; foreign investment and trade policies; national planning and allocation systems; development and modernization strategies and implementation. (Duplicates credit in former PUAD 581.)

**PPD 678 Processes of Change in Developing Societies (4, Irregular)** Nature of traditional and transitional societies; theories and practice of developmental change; role of bureaucracy in development; institution building; public enterprise; technology assessment and transfer. (Duplicates credit in former PUAD 582.)

**PPD 679 Financial Administration in Developing Countries (4, Sm)** Public sector finance; tax policy and administration; budgeting and auditing; debt management; public enterprise and development banks; planning; techniques; project assessment. (Duplicates credit in former PUAD 583.)

**PPD 680 Development of Effective Groups and Organizations (4, Fa)** Theories and techniques of assessing and improving interpersonal relationships and group dynamics in an organizational context; action research-based approaches to implementing organizational change. (Duplicates credit in former PUAD 586.)

**PPD 681 Public Organization and Management Theory (4, FaSp)** Nature and management of public organizations; examination of organizational characteristics, forms, and processes, including the relationship with the broader environment. (Duplicates credit in former PUAD 595.)

**PPD 682 Justice Administration: A Management Perspective (4, 2 years, Fa)** Justice administration as an interactive system: law, etiology of crime, police, the judiciary and corrections. Interface of offenders with community and political force fields. (Duplicates credit in former PUAD 540.)

**PPD 683 Homeland Security and Public Policy (4, FaSp)** Definition and history of terrorism, counterterrorism, domestic policy and public sector management; intelligence/information sharing and analysis; emergency preparedness planning, response and recovery.

**PPD 684 Leadership Development in the Public and Nonprofit Sectors (2, Fa)** An overview of leadership concepts, frameworks and skills; application of leadership in complex or inter-sectoral settings.

**PPD 685 Human Resources Management in Public and Non-Profit Sectors (2, Fa)** Merit principles, position classification, recruitment and selection, compensation, organizational development, labor relations; challenges and strategies for managing a diverse workforce.

**PPD 686 U.S. Immigration Policy (4, Sp)** Overall understanding of contemporary U.S. immigration policy.

**PPD 687 Strategic Management in the Nonprofit Sector (4, Sp)** Strategic management of nonprofit organizations, social entrepreneurship, and management practice. *Prerequisite:* PPD 675 and PPD 689.

**PPD 688 Business and Public Policy (4, Irregular)** The business-government relationship; effects of selected public policies (antitrust, economic, and social regulation, industrial policies, legal policy) on firm and industry behavior. (Duplicates credit in former PUAD 557.) *Prerequisite:* PPD 501b.

**PPD 689 The Nonprofit Sector and Philanthropy (4, FaSp)** Nonprofit organizations and their relation to government and business; the role of philanthropy, social enterprise and public support; and implications for policy, strategy and management.

**PPD 690 Alternative Dispute Resolution (4, Fa)** Theory and methods of conflict analysis, negotiation, facilitation and mediation in the public sector. (Duplicates credit in former PUAD 519.)

**PPD 691 Methods for Assessment and Protection of Environmental Quality (3, Sp)** (Enroll in CE 564)

**PPD 692 Transportation and the Environment (4, Sp)** Analysis of the benefits and costs of urban transportation; concepts of social costs; benefits and externalities; environmental costs; social justice issues; policy and planning alternatives for sustainable transportation. (Duplicates credit in former PPD 584.) *Prerequisite:* PPD 501a.

**PPD 693 Communicating Public Policy (4)** Exploring the complex relationships that exist among policies, policymakers, and the media; analyzing the role of journalists and policy analysts in the public policy process.

**PPD 694 Coastal Policy and Planning (4, Sp)** Coastal management issues in the context of public and private users competing for land resources, the costs and benefits of seaports, compare coastal development models.

**PPD 695 Clinical Issues for Managers (1, Fa)** Introduces key information and concepts for managers of clinical services. Examines problems and issues facing health care managers and clinician relations.

**PPD 696 Health Care Venture Development (2, SpSm)** Focuses on developing the resourcefulness, know-how and decision support skills needed to identify, assess and develop new health ventures. Includes business planning, financing, strategy, entrepreneurship. *Recommended preparation:* PPD 510a or HMG 565.

**PPD 697 Cultural Proficiency in Health Management and Policy (2, Sp)** Provides an understanding of what social factors contribute to racial/ethnic, socioeconomic, and gender disparities in health and the culturally proficient provision of health care.

**PPD 698 Strategic Management and Change (4)** Theory and applied skills in management of social sector organizations with applications in international settings. Strategic management and planning; communication strategies, marketing and promotion; leadership skills; organizational development and change.

**PPD 700ab Teaching Seminar (1-1, FaSpSm)** Pedagogy: learning objectives, curriculum design, teaching methods, evaluation. Open only to doctoral students. Graded CR/NC.

**PPD 706 Paradigms of Research and the Design of Inquiry (4, FaSp)** Philosophy of social science; applied social research; research design; sampling and validity; overview of qualitative and quantitative methods. Open only to doctoral students.

**PPD 707 Survey Research Methods (4, Sp)** Collection and use of survey data: basic orientation, mechanics of using SAS, and interpretation of survey tabulations. Graduate standing. (Duplicates credit in former PLUS 608.) *Prerequisite:* PPD 525.

**PPD 708 Qualitative Methods (4, Sp)** Reflective and critical approach that questions data collection techniques, positions relative to those being studied, and explanatory methods. (Duplicates credit in former PLUS 609.) *Recommended preparation:* PPD 525 or PPD 612.

**PPD 709 Applications in the Advanced Quantitative Methods (4, Sp)** Statistical and econometric modeling in real estate finance, urban economics, public policy, and planning research. Building, estimating and adjusting models for real-world. *Prerequisite:* PPD 525.

**PPD 710ab Research Seminar (a: 2, Fa; b: 2, Sp)** Research fields and design; literature reviews; critical reading and critiquing; project development. Open only to doctoral students. Graded CR/NC. *Prerequisite:* PPD 706.

**PPD 711 Theoretical Foundation of Public Management (4, Fa)** Theories of the role, structure, and growth of the public sector; political economy of public bureaucracies; the voluntary nonprofit sector. *Prerequisite:* PPD 501b.

**PPD 712 Seminar in Public Policy (4, Fa)** Critical analysis of the policy field; theoretical foundations; integration of quantitative, organizational, and political considerations; policy research. (Duplicates credit in former PUAD 626.) *Prerequisite:* PPD 501b, PPD 554.

**PPD 713 Advanced Planning Theory (4, Fa)** Positive and normative attitudes of public plans, policies, programs, organizational and institutional settings; policy analysis; modeling of social choices; evaluation; applied welfare analysis; performance assessment. (Duplicates credit in former PLUS 605.)

**PPD 714 Advanced Urban Development (4, Fa)** Urbanization, urban economics, land use, the politics of growth, governance, regulation, and the state, immigration, and place promotion.

**PPD 790 Research (1-12, FaSpSm)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. (Duplicates credit in former PLUS 790 and PUAD 790.)

**PPD 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm)** Credit on acceptance of dissertation. Graded IP/CR/NC. (Duplicates credit in former PLUS 794abcdz and PUAD 794abcdz.)

**PPD 795 Law of the Political Process (2-4, max 8)** (Enroll in LAW 795)

**PPD 797 Public Policy in Law: Analysis and Advocacy (1-4)** (Enroll in LAW 797)

#### **POLICY, PLANNING, AND DEVELOPMENT – EXPANDED (PPDE)**

**PPDE 630 Community Health Planning (4, Sp)** The role of planning in sustaining community health; examines relationship between health and environment; historical development, conceptualization and practice of community health planning.

**PPDE 631 Public Space: Theory, Policy, and Design (4)** Examination of contemporary issues and practices in the design, production, and uses of public space in a comparative perspective; implications for future design and public policy.

**PPDE 632 Sustainable Cities (4, FaSp)** Exploration of environmental problems linked to urbanization, drawing on historical analysis, social theory, scientific research, and city planning/design practice. Alternative policy options for urban sustainability. (Duplicates credit in the former GEOG 601.)

**PPDE 645 Financial Management of Non-profit Organizations (4)** Accounting and financial management principles and practices in nonprofit organizations: budgeting financial analysis, internal controls, financial policies, grant making and financial reporting.

**PPDE 646 Grant Writing Practicum (2)** Grant making process and proposal development; philanthropic foundations; strategies for funding; budgeting, logic models, and evaluation; peer review.

**PPDE 660 Environmental Policy Design and Analysis (2, Sp)** Analytical foundation for design of institutions and policies; environmental policy; welfare economics and market failure; policy evaluation; economic policy instruments; climate change policy issues; other policy issues. *Prerequisite:* PPD 501a; *recommended preparation:* PPD 501b.

#### **PUBLIC ADMINISTRATION (PUAD)**

*Frequency of course offerings varies from campus to campus. Check with individual campuses regarding availability.*

**PUAD 613 Seminar in Financial Policy (4, Irregular)** Historical development and trends in public revenues and expenditures. Political, economic, and administrative significance of decisions in the field of financial management. *Prerequisite:* PPD 647.

**PUAD 617 Seminar on Behavioral Aspects of Training and Development (4, Irregular)** Theoretical concepts governing the administration of socio-technical systems, organization development, action training and research, and other development and change processes utilized in public service.

**PUAD 675 Institutional Context of the Public Sector (4, Sp)** Theories of the role, structure and growth of the public sector; public choice processes; political economy of public bureaucracies; the voluntary nonprofit sector. *Prerequisite:* PPD 501b.

**PUAD 685 Seminar on Organizational Behavior in Public Systems (4, FaSp)** Organizing processes; decision-making; communication; leadership; behavioral models; political and social behavior in organizations. *Prerequisite:* PPD 545.

**PUAD 692 Multivariate Statistical Analysis (4, Fa)** Multivariate analysis of qualitative and quantitative variables including multiple linear regression, multiple contingency table analysis, log-linear and logit models, and path analysis. *Prerequisite:* PPD 502x.

**PUAD 695 Seminar in Administrative Theory (4, FaSp)** Assessment of current normative and descriptive theories of public administration; variety of conceptual systems; operationalism; levels of organizational analysis. *Prerequisite:* PPD 540.

**PUAD 697 Seminar in Public Management (4, Irregular)** Public management research and theory; differences between private and public organizations; contextual influences on public management; contemporary empirical studies; bibliographic research. *Prerequisite:* admission to the DPA program.

**PUAD 791ab Public Administration Research Seminar (1, 1, FaSp)** Presentation and discussion of research histories and current research projects of members of the faculty and distinguished guest scholars. Open only to Ph.D. and DPA students. Graded CR/NC.

#### **REAL ESTATE DEVELOPMENT (RED)**

**RED 500 Real Estate Development and the Economy (2, Sm)** Linkages between national and regional economies and the performance of the real estate sector. Anticipating development trends. Public policy applications.

**RED 509 Market Analysis for Real Estate (4, Fa)** Explores macro and micro aspects of residential, retail, office, and industrial markets and examines methodologies for analyzing such markets for real estate development/investment purposes. *Prerequisite:* RED 542.

**RED 510 Real Estate Practice and Principles (4, FaSp)** Fundamental principles of real estate analysis; economics; capital markets; development decision-making; relationships between real estate markets and federal, state and local government policies; property value.

**RED 511 Foundations of Real Estate Analysis (4, FaSp)** Principles of real estate analysis; capital markets; importance of uncertainty and metrics of risk; investments; valuation techniques; use of debt and equity, leases, taxes. *Prerequisite:* RED 510.

**RED 512 Real Estate Project Analysis (4, FaSp)** Fundamental economic theories; analytical techniques; practical applications for market analysis of various forms of real estate. *Prerequisite:* RED 511.

**RED 541 Finance Fundamentals for Real Estate Development (2, Sm)** Introduction to the general principles of finance with application to real estate development, including capital markets, financial institutions, valuation and risk management.

**RED 542 Finance of Real Estate Development (3, FaSm)** Theory and methods of real estate finance and investment. Real estate investment analysis, real estate entities, taxation; introduction to securitization of real estate equities, debt. *Prerequisite:* RED 541.

**RED 544 Real Estate Capital Markets (2, Fa)** Explore structure, instruments and institutions of real estate capital markets. Consider linkages between real estate and capital markets. Assess role of Real Estate Investment Trusts. *Prerequisite:* RED 542.

**RED 545 Advanced Real Estate and Financial Modeling (2, Sp)** Quantitative problem solving using computerized modeling. Complex debt financing, including lender participation, subordination, joint venture structuring, systematic treatment of real estate portfolios. *Prerequisite:* RED 542.

**RED 546 Applications of Real Estate Finance to Problems of Development (3, Sp)** Advanced topics in finance applied to cases and problems of real estate development; emphasis on structuring, finance and evaluation of various types of development projects. *Prerequisite:* RED 542.

**RED 547 Project Management and Construction (2, Sm)** Managing the building phase of development. Architectural and engineering aspects of construction management for the real estate developer.

**RED 551 The Approval Process (4, FaSpSm)** Approval process for real estate development including land use entitlement, site selection, zoning, environmental review, community and government relations, infrastructure financing, ethical issues, negotiation skills.

**RED 562 Legal Issues in Real Estate Development (4, FaSp)** Ownership and transfer of real estate; formation and enforcement of contracts; business associations; environmental regulation; taxation of property transfers; acquiring, financing, leasing of commercial property. (Duplicates credit in former RED 662.)

**RED 563 Introduction to the Asset Management of Real Estate (2, Fa)** Overview of institutional asset management: creating and implementing investment and portfolio strategies through the development, acquisition, underwriting, and operational stages of the investment, asset disposition.

**RED 564 Issues in Asset Management of Real Estate (2, Sp)** Advanced issues in institutional asset management. How value is created during investment process with focus on tactical, operational, and strategic goals of asset and owner. *Prerequisite:* RED 563.

**RED 571 Introduction to Appraisal Principles, Procedures, and Standards (4, Fa)** Valuation concepts. Theory and problem solving. Cost, sales comparison, and income approaches.

**RED 572 Advanced Appraisal Approaches and Applications (2, Sp)** Highest and best use. Advanced income capitalization. Advanced cost and sales comparison approaches. Advanced applications. *Recommended preparation:* RED 571.

**RED 573 Design History and Criticism (2, Sm)** The concepts, language and metaphors of design-related disciplines are examined in relation to design and construction values and choices in real estate development. (Duplicates credit in former RED 673.)

**RED 574 Building Typologies (2, Fa)** The exploration of categories of building types, including retail, industrial, residential, office and institutional, using key examples or case studies from each. (Duplicates credit in former RED 674.)

**RED 575L Community Design and Site Planning (2-4, max 8, Sp)** Physical implementation of development projects. Students will develop concept plan, preliminary design and marketing plan for selected domestic and/or international development sites. (Duplicates credit in former RED 675L.)

**RED 583 International Development Opportunities (2, Sp)** A survey of various markets prominent in the global real estate community. Protocols for analyzing international development opportunities and cultural, political, and socioeconomic considerations.

**RED 585 Comparative International Development Workshop (2-4, Sm)** Comparative study tour focused on understanding international real estate development practices and markets, site visits and meeting with principals.

**RED 590 Directed Research (1-12, FaSpSm)** Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department.

**RED 598 Real Estate Product Development (2-4, max 12, FaSpSm)** An evaluation of various real estate development types. Case studies and site visits.

**RED 599 Special Topics (2-4, max 8)** Current issues, trends, and developments in real estate development.

## Military Courses of Instruction

### AEROSPACE STUDIES (AEST)

#### **AEST 100ab Aerospace Studies I: Air Force Mission and Organization (1-1, FaSp)**

*a:* Introduction to U.S. Air Force and the military profession; USAF organization and functions; Strategic Air Command organization, command, control, and weapons systems; communication skills. *b:* Organization and function of NORAD; tactical air, military airlift, systems, logistics, air training and communications commands; Army, Navy, Marines; reserves; separate operating agencies.

#### **AEST 110ab Leadership Laboratory I**

**(1-1, FaSp)** Introduction to the military experience focusing on customs and courtesies, drill and ceremonies, and the environment of an Air Force officer. Graded CR/NC.

#### **AEST 200ab Aerospace Studies II: Air Force History (1-1, FaSp)**

*a:* Development of aerospace power in the U.S. through World War II; emphasis on the Army Air Corps; communication skills. *b:* Development of aerospace power since World War II; emphasis on international confrontations involving the United States; communication skills.

**AEST 210ab Leadership Laboratory II (1-1, FaSp)** Introduction to the military experience focusing on customs and courtesies, drill and ceremonies, and the environment of an Air Force officer. Graded CR/NC.

**AEST 220ab Advanced Leadership Laboratory II (a: 1, Fa; b: 1, Sp)** Additional exposure to the military experience for continuing AFROTC cadets, focusing on customs and courtesies, drill and ceremonies, and the environment of an Air Force officer. Graded CR/NC.

#### **AEST 300ab Aerospace Studies III: Air Force Management and Leadership (3-3, FaSp)**

Air Force management focusing on the new manager in the Air Force milieu. Emphasis on communication skills peculiar to the Air Force.

#### **AEST 310ab Leadership Laboratory III**

**(1-1, FaSp)** Practical introduction to Air Force leadership focusing on military communicative skills, group dynamics, and application of theories of leadership and management. Graded CR/NC.

#### **AEST 400ab Aerospace Studies IV: National Security Forces in Contemporary American Society (3-3, FaSp)**

Military professionalism and the context in which defense policy is formulated and implemented; national security policy, political/ social constraints, and military justice.

#### **AEST 410ab Leadership Laboratory IV**

**(1-1, FaSp)** Advanced Air Force leadership experience focusing on the practical development of the Air Force officer through command and staff positions within the Cadet Corps. Graded CR/NC.

#### **AEST 420ab Leadership Laboratory V**

**(1-1, FaSp)** Advanced leadership experiences for AFROTC continuing cadets. Graded CR/NC.

### MILITARY SCIENCE (MS)

#### **MS 101 Foundations of Officership (1, Fa)**

Introduces students to issues and competencies that are central to a commissioned officer's responsibilities. Establish framework for understanding officership, leadership, and Army values followed and "life skills" such as physical fitness and time management. (Duplicates credit in former MS 100.)

**MS 102 Basic Leadership (1, Sp)** Establishes foundation of basic leadership fundamentals such as problem solving, communications, briefings and effective writing, goal setting, techniques for improving listening and speaking skills and an introduction to counseling. (Duplicates credit in former MS 110.)

#### **MS 201 Individual Leadership Studies**

**(2, Sp)** Students identify successful leadership characteristics through observation of others and self through experimental learning exercises. Students record observed traits (good and bad) in a dimensional leadership journal and discuss observations in small group settings. (Duplicates credit in former MS 200.)

#### **MS 202 Leadership and Teamwork (2, Sp)**

Study examines how to build successful teams, various methods for influencing action, effective communication in setting and achieving goals, the importance of timing the decision, creativity in the problem solving process, and obtaining team buy-in through immediate feedback. (Duplicates credit in former MS 210.)

#### **MS 301 Leadership and Problem Solving**

**(3, Fa)** Students conduct self-assessment of leadership style, develop personal fitness regimen, and learn to plan and conduct individual/small unit tactical training while testing reasoning and problem-solving techniques. Students receive direct feedback on leadership abilities. (Duplicates credit in former MS 300.)

#### **MS 302 Leadership and Ethics (3, Sp)**

Examines the role communications, values, and ethics play in effective leadership. Topics include ethical decision-making, consideration of others, spirituality in the military, and survey Army leadership doctrine. Emphasis on improving oral and written communication abilities. (Duplicates credit in former MS 310.)

#### **MS 401 Leadership and Management I**

**(3, Fa)** Develops student proficiency in planning and executing complex operations, functioning as a member of a staff, and mentoring subordinates. Students explore training management, methods of effective staff collaboration, and developmental counseling techniques. (Duplicates credit in former MS 400.)

#### **MS 402 Leadership and Management II**

**(3, Sp)** Study includes case study analysis of military law and practical exercises on establishing an ethical command climate. Students must complete a semester long Senior Leadership Project that requires them to plan, organize, collaborate, analyze, and demonstrate their leadership skills. (Duplicates credit in former MS 410.)

#### **MS 499 Special Topics (2-4, max 8, FaSpSm)**

Selected topics in military science.

### NAUTICAL SCIENCE (NAUT)

#### **NAUT 001abx Deepwater Cruising (2-2,**

**FaSp)** An experiential approach to the sailing ship and seafaring, introducing offshore sailing theory and techniques, navigation, and basic oceanography as relevant to seamanship. Lecture and lab. Not available for degree credit. *a:* Crew level. *b:* Watch captain.

**NAUT 002abx Advanced Deepwater Cruising (2-2)** Responsibilities and operations commanding an offshore sailing vessel including sailing theory and advanced techniques, advanced navigation, ships engineering, and oceanography relevant to seamanship. Not available for degree credit. *a:* Senior skipper. *b:* Advanced senior skipper. (Duplicates credit in former NAUT 302*ab*.)  
*Prerequisite:* NAUT 001*bx*.

#### NAVAL SCIENCE (NSC)

**NSC 135 Introduction to Naval Science (2, Fa)** Introduction to the structure, principles, and practices, lines of command and control, and functions of the various components of the naval service. Lecture, 2 hours; laboratory, 2 hours.

**NSC 137 Seapower and Maritime Affairs (4, Sp)** Analysis of U.S. Navy development and campaigns; evolution of strategic, tactical, and maritime doctrines; interaction of naval affairs with national security and domestic policies. Lecture, 3 hours; laboratory, 2 hours. (Duplicates credit in former NSC 282.)

**NSC 251 Seamanship and Ship Operations (3, Fa)** Vector solutions of relative motion, tactical problems; tactical communications, instructions; fleet communications, organizations; rules of the Nautical Road; aviation and maritime meteorology; operation plans and orders. Lecture, 3 hours; laboratory, 1 hour. (Duplicates credit in former NSC 336.)

**NSC 283 Naval Ships Systems I (Engineering) (3, Sp)** Types, structure, and purpose of Naval ships, compartmentation, propulsion systems, auxiliary power systems, interior communications, ship control; ship design and stability. Lecture, 3 hours; laboratory, 2 hours. (Duplicates credit in former NSC 136.)

**NSC 335 Navigation (3, Fa)** Purposes, methods, and instruments of navigation; terrestrial and celestial navigation and nautical astronomy; time diagrams; lines of position by observation of celestial bodies. Lecture, 3 hours; laboratory, 2 hours.

**NSC 337 Naval Ships Systems II (Weapons) (3, Sp)** Systems approach to naval weapons; linear analysis of ballistics; weapons control systems configurations and dynamics. Field trips. Lecture, 3 hours; laboratory, 2 hours. (Duplicates credit in former NSC 250.)

**NSC 343 Evolution of Warfare (3, Fa)** Causes and practice of warfare from ancient times; impact of changes in strategy, tactics, and technology; modern revolutionary warfare, global conflict, and politico-military relationships. Lecture, 3 hours; laboratory, 2 hours.

**NSC 392 Amphibious Warfare (3, Sp)** Concepts of seaborne military operations; relationship of factors involved; characteristic operations of World War II; amphibious operation planning. Lecture, 3 hours; laboratory, 2 hours.

**NSC 453 Leadership and Management I (2, Fa)** Principles of human relationships; principles of decision-making and management at the junior officer level; theory and techniques of leadership. Lecture, 2 hours; laboratory, 2 hours.

**NSC 454 Leadership and Management II (2, Sp)** Introduction to primary duties of junior naval officers; counseling and interviewing techniques; review of basic administrative responsibilities at the division officer level. Lecture, 2 hours; laboratory, 2 hours.

---

# USC School of Social Work

*The USC School of Social Work, a leader in education and research that improves the lives of veterans and their families, launched the Building Capacity in Military-Connected Schools project in partnership with eight school districts near Camp Pendleton. During an on-campus roundtable discussion, Jill Biden — wife of U.S. Vice President Joe Biden — met some of the people who have benefited from the four-year, \$7.6 million national effort, which encourages civilian schools to support military children and parents.*

**T**he USC School of Social Work offers programs of study leading to the Master of Social Work (MSW) and Doctor of Philosophy (Ph.D.) in social work. These programs provide the student a broad background of knowledge about health and welfare problems, the meaning of programs past and present that have been established to meet them, and current issues and policy trends in the field.

At the same time, the student is helped to become a professional person through development of a philosophy in harmony with that of the profession: to prevent and mitigate severe social problems that challenge the viability of culturally diverse and complex urban settings; to build on the strengths of individuals, families and communities; and to lead the scholarly search for innovative, efficacious and just solutions.

Terris Wolff, MBA, MSBA, *Director, Information Technology*

Marleen Wong, Ph.D., *Assistant Dean, Field Education*

#### Faculty

*The Golden Age Association/Frances Wu Chair in Chinese Elderly:* Iris Chi, DSW

*Driscoll/Cleaver Professor of Social Policy and Administration:* Bruce Jansson, Ph.D.\*

*Albert G. and Frances Lomas Feldman Professor of Social Policy and Health:* Lawrence Palinkas, Ph.D.

*Ernest P. Larson Professor of Health, Ethnicity and Poverty:* Kathleen Ell, DSW

*Frances G. Larson Professor of Social Work Research:* John Brekke, Ph.D.\*

*John Milner Professor of Child Welfare:* Jacquelyn McCroskey, DSW\*

*Provost's Professor of Social Work, Preventive Medicine, Psychiatry, Family Medicine and Gerontology:* William Vega, Ph.D.

*David Lawrence Stein/Violet Goldberg Sachs Professor:* Penelope K. Trickett, Ph.D.\*

*Lenore Stein-Wood and William S. Wood Professor of Social Work and Business in a Global Society:* Mich lle E. Mor Barak, Ph.D.\*

*Richard M. and Ann L. Thor Endowed Professor of Urban Social Development:* Ron Avi Astor, Ph.D.

*Professors:* Ron Avi Astor, Ph.D.; John Brekke, Ph.D.\*; Iris Chi, DSW; Kathleen Ell, DSW; Marilyn L. Flynn, Ph.D.; Bruce Jansson, Ph.D.\*; R. Paul Maiden, Ph.D.; Jacquelyn McCroskey, DSW\*; Mich lle E. Mor Barak, Ph.D.\*; Lawrence Palinkas, Ph.D.; Penelope K. Trickett, Ph.D.\*; Avelardo Valdez, Ph.D.; William Vega, Ph.D.; Wynne Waugaman, Ph.D.; Suzanne Wenzel, Ph.D.

*Associate Professors:* Maria Aranda, Ph.D.\*; Concepcion Barrio, Ph.D.; Devon Brooks, Ph.D.; Maryalice Jordan-Marsh, Ph.D.; Helen Land, Ph.D.\*; Karen Lincoln, Ph.D.; Ferol Mennen, DSW\*; Ramon Salcido, DSW\*; Ann Marie Yamada, Ph.D.

*Assistant Professors:* Julie Cederbaum, Ph.D.; Alice Cepeda, Ph.D.; Tamika Gilreath, Ph.D.; Erick Guerrero, Ph.D.; Michael Hulburt, Ph.D.; Seth Kurzban, Ph.D.; Emily Putnam-Hornstein, Ph.D.; Eric Rice, Ph.D.; Dorian Traube, Ph.D.

*Senior Clinical Fellow:* Mary Gress, Ph.D.

*Clinical Professors:* Margarita Artavia, MSW; Ralph Fertig, J.D.; Stephen Hydon, MSW; Jolene Swain, MSW; Doni Whittsett, Ph.D.; Marleen Wong, MSW; Gary J. Wood, Ph.D.

*Clinical Associate Professors:* Jane Allgood, Ph.D.; Rafael Angulo, MSW; Judy Axonovitz, MSW; Annalisa Enrile, Ph.D.; Kim Goodman, MSW; Heather Halperin, MSW; Mary Beth Harris, Ph.D.; Anthony Hassan, Ed.D.; Shelley Levin, Ph.D.; Gokul Mandayam, Ph.D.; Shannon Mayeda, Ph.D.; Sam Mistrano, J.D.; Tyan Parker Dominguez, Ph.D.; Elizabeth Pringle-Hornsby, MSW; Jon Simon Sager, Ph.D.; Michal Sela-Amit, Ph.D.; Eugenia Weiss, Psy.D.; June Wiley, Ph.D.; Leslie Wind, Ph.D.; Deborah Winters, MSW; Darlene Woo, MSW

*Clinical Assistant Professors:* Rosemary Alamo, MSW; Juan Araque, Ph.D.; Suh Chen Hsiao, MSW; Tory Cox, MSW; Laurel Davis, MSW; Pamela Franzwa, MSW; Conrad Fuentes, MSW; Michael Johnson, Ed.D.; Dawn Joosten, Ph.D.; Omar Lopez, MSW; Elizabeth Phillips, MSW, Ph.D.; Vivien Villaverde, MSW

*Adjunct Professors:* Lucia Aparicio, MSW; Margaret Fetting, Ph.D.; Michael Jackson, Ph.D.; Wanda Jewell, MSW; Sheri Kelfer, MSW; Diane Meadow, Ph.D.; Rose Monteiro, MSW; Pat Sable, Ph.D.

*Adjunct Associate Professors:* Linda Cox, MSW; Rita Davis, MSW; Nancy Flax-Plaza, MSW; Herbert Hatanaka, DSW; Martha Lyon-Levine, Ph.D.; Leigh Miller, MSW; Carol Ann Peterson, Ph.D.; Monika White, Ph.D.; Marcia Wilson, Ph.D.; Mara Ziegler, MSW

*Adjunct Assistant Professors:* Steven Bush, MSW; Sara McSweyn, MSW; Erik Schott, MSW; Carlos Sosa, MSW

*Research Professors:* Charles Kaplan, Ph.D.; John Landsverk, Ph.D.; Haluk Soydan, Ph.D.

*Research Associate Professors:* Jehoon Lee, Ph.D.; Donald Lloyd, Ph.D.; Janet Schneiderman, Ph.D.

*Research Assistant Professors:* Jan Nissly, Ph.D.; Hazel Atuel, Ph.D.

*Emeritus Professors:* Howard J. Parad, DSW\*; Rino Patti, DSW\*; Barbara Solomon, DSW\*

*Emeritus Field Education Faculty:* Rhoda G. Sarnat, M.A.

\*Recipient of university-wide or school teaching award.

## Master of Social Work

The program of study which leads to the Master of Social Work degree consists of 60 units (46 units of course work and 14 units of field practicum). The program is available at these locations: University Park, Orange County Academic Center in Irvine, Skirball Academic Center in West Los Angeles, San Diego Academic Center in Rancho Bernardo and Virtual Academic Center via the Internet and can be completed in a full-time (two-year) program or part-time (three- or four-year) program. In addition, some classes are offered at City Center in downtown Los Angeles.

The basic foundation curriculum introduces students to the range of social welfare problems and programs, and to the varieties of human behavior with which social work is concerned. At the same time, students learn the methods by which the social worker, the social agency and the organized community work with people and problems. Field instruction, under supervision in a social agency, is scheduled for two or three days a week, enabling students to apply theory to practice. All content areas include content on diversity, social work values and ethics, and economic justice and populations at risk. At the completion of foundation requirements, students are expected to have acquired a sense of professional responsibility and the ability to use knowledge on behalf of the individual, the group and the community.

The concentration curriculum builds on the generic social work knowledge obtained in the foundation study by offering a choice of five advanced practice concentrations: families and children; health; mental health; community organization, planning and administration (COPA); and social work and business in a global society. Students can complete all foundation courses in Orange County, as well as course work for the concentrations offered, which is determined by student interest but is typically families and children; health; and mental health concentrations. If a student's concentration is not offered, classes must be taken at the University Park Campus.

### Degree Programs

The School of Social Work offers the Master of Social Work (MSW), the Doctor of Philosophy (Ph.D.) and the dual Master of Social Work/Doctor of Philosophy, Social Work (MSW/Ph.D.) degrees. In addition, the school offers dual degrees with the schools of business; gerontology; law; medicine;

The San Diego Academic Center offers all foundation courses, as well as all course work for the mental health and COPA concentrations. Students in the Virtual Academic Center may select the COPA; families and children; and mental health concentrations. The Skirball Academic Center and City Center locations offer selected courses in the concentrations. Students who attend first-year courses at the Skirball Academic Center will take some or all concentration courses at University Park.

There are also five sub-concentrations at University Park: social work practice (1) with older adults; (2) for systems of mental illness recovery; (3) in school settings, which meets the academic requirements for the Pupil Personnel Services Credential necessary for social work practice in the public schools of California; (4) in public child welfare; and (5) in military social work and veteran services. The San Diego Academic Center offers the social work practice in school settings and the military social work and veteran services sub-concentrations. Students in the Virtual Academic Center may select the military social work and veteran services sub-concentration. Students designate their choice of concentration in the final semester of the foundation year. The basic second-year curriculum (required courses and field instruction placement) will be determined by this choice of concentration; elective courses are available as part of the concentration-year curriculum. Students in all concentrations are required to enroll in SOWK 611 Leadership in the Social Work Profession and Organizations: Theory and Practice.

This system of curriculum offerings provides a strong educational program with a continuing commitment to a generalist base and a focused set of concentrations, in combination with a range of options to meet special interests. This program enables graduates to move into the social work community with a combination of knowledge and skills in a broad arena, as well as in-depth knowledge and skills in a particular method, population or area of service.

public policy; and Hebrew Union College. Undergraduate students in the university may earn a minor in Children and Families in Urban America.

The curriculum builds on a liberal arts foundation which all entering students are required to have. The applicant should have a range of undergraduate courses in the humanities and the social and physical sciences.

### General Requirements

The Master of Social Work degree requires a minimum of 60 semester units of courses, including field education (1000 clock hours).

The degree is not awarded solely on the basis of credits earned but also requires evidence of competence in both theory and practice. At their discretion, the faculty may require courses or fieldwork or both beyond the minimum requirements.

### Time Limit

The master's degree program requires two academic years of full-time study or a structured part-time program which must be completed in a maximum of four years.

### Grade Point Average Requirement

In accordance with the requirements of the Graduate School, a grade point average of 3.0 (A = 4.0) is required for admission to the School of Social Work. Likewise, the university requires an overall GPA of 3.0 for graduation from the master's degree program.

### Course Requirements

Course requirements are organized in five interdependent content areas that continue throughout the two years: social work practice; social welfare, policy and services; human behavior and the social environment; research; and fieldwork.

A typical foundation program includes two courses in social work practice; two courses in social welfare, policy and organizations; two courses in human behavior; two semesters of fieldwork; two semesters of fieldwork seminars; and one course in research methods.

Students typically choose their concentration in the final semester of the foundation year and must enroll in three courses required by the concentration they select. Additionally, students in all concentrations must take two semesters of field instruction, three elective courses and SOWK 611 Leadership in the Social Work Profession and Organizations: Theory and Practice. Each student completes an individualized study plan, which is approved by the concentration faculty.

Academic credit is not granted for life experience or work experience in lieu of the field practicum or any other courses in the curriculum.

REQUIRED COURSES		UNITS
SOWK 503	Human Behavior and the Social Environment I	3
SOWK 505	Human Behavior and the Social Environment II	3
SOWK 534	Policy and Practice in Social Service Organizations	3
SOWK 535	Social Welfare	3
SOWK 543	Social Work Practice with Individuals	3
SOWK 545	Social Work Practice with Families, Groups and Complex Cases	3
SOWK 562	Social Work Research	3
SOWK 586ab	Field Practicum	3-3
SOWK 587ab	Integrative Learning for Social Work Practice	2-2
SOWK 611	Leadership in the Social Work Profession and Organizations: Theory and Practice	3
SOWK 686ab	Field Practicum II	4-4

Plus 9 additional units of concentration courses and 9 additional units of Social Work electives.

### Field Education

Field education is an integral part of the Master of Social Work curriculum. Two year-long field education courses are required. In the foundation year, the field courses include: 16 hours per week in field placement and participation in a field seminar on campus. In the concentration year, students are typically in placement 20 hours per week. Field education takes place in selected agencies and centers, which represent the complete range of social services. Field placements are approved on the basis of the quality of their professional practice, commitment to social justice and to addressing social work problems, interest in participating in professional education, and ability to make personnel and resources available. Field instructors, who are employed by either the agency or the school, are responsible for teaching students in their field placements. The assistant dean for field education is administratively responsible for all field assignments.

Each placement in field education is made on an individual basis which takes into consideration the following: geographic location, previous experiences, future goals, professional interests, special needs and stipend requirements. In these placements, students engage in selected and organized social work activities that provide practical experience in applying skills learned in the classroom.

Foundation field placement is arranged by the school with the view of building a generalist foundation in direct services through providing practice experiences in a continuum of modalities including work with individuals, families, small groups and communities and with a diversity of client populations and treatment issues. All students are also required to complete an assignment related to the organization in which they are placed. The generalist experience also encompasses a range of theoretical concepts and models to develop breadth of learning and establish a broad base for practice. The foundation year field course is a prerequisite for entry into the concentration placement.

The school, the agency and the student collaboratively decide on the concentration field placement with the view of developing the special knowledge and depth of skill needed for professional practice in a designated area of concentration. This advanced experience is designed to build on the student's foundation year and to develop knowledge and skills within the concentration the student has selected.

Students must participate in an appropriate practice class concurrently with the field course and in a field seminar during the foundation field course. Satisfactory performance in both foundation and advanced field courses is required for all students earning the Master of Social Work degree, including those enrolled in dual degree programs.

The number of field placement options for non-driving students is limited. Students are encouraged to have access to an automobile for field placement.

A student must complete and receive credit for a minimum of 450 hours in the foundation year and 550 hours in the concentration year of field placement in order to be awarded the Master of Social Work degree.

### Research Requirement

The research requirement consists of one foundation course. In the foundation year of study, SOWK 562 is designed to impart knowledge of research methodology and statistics. In the concentration year, students are required to enroll in core concentration courses that combine research skills acquired in the foundation year with evaluation and

program development in their concentration field of study.

### Transfer Students

Applicants who have recently completed part or all of the first half of graduate study at a Council on Social Work Education-accredited school of social work may apply as transfer students. In addition to materials described in the section on application procedures, transfer students should forward course syllabi and a bulletin of the school for the year in which the course or courses were taken.

Transfer credits may be applied for those courses determined to be equivalent to USC's first-year courses or to meet the expectation of the second-year electives. The grade point average for any course taken at another school of social work must be at least 3.0 on a 4.0 grading scale. Where foundation courses are similar, but not equivalent, transfer students may be permitted to take a waiver examination for possible exemption from those courses. Transferred credit for fieldwork will be computed on the basis of clock hours completed as well as on the breadth and depth of contents covered.

### Military Social Work and Veteran Services

The School of Social Work offers a Military Social Work and Veteran Services sub-concentration in the MSW curriculum targeting military personnel, spouses and other military dependents and military retirees who wish to maintain a post-military career affiliation with the armed forces; military veterans who wish to provide professional services to their military comrades; and civilian personnel who are committed to assisting military personnel, their families and military veterans with adapting, coping and managing the stresses and strains of military life and post-military life.

### Course Requirements

Beyond the basic professional social work foundation course requirement of the Master of Social Work degree, the sub-concentration in Military Social Work and Veteran Services will offer a series of highly specialized courses focusing on the needs of military personnel, veterans and their families. Students will take three courses in special topics that focus on this sub-concentration. Individuals pursuing the Military Social Work and Veteran Services sub-concentration will also be able to select from a variety of highly relevant elective courses that will serve to enhance their training and future service delivery capabilities.

### Field Instruction

Students must complete a 600-clock hour internship in a military hospital, base/installation family services unit, Veterans Affairs, Vet Center, etc.

### Advanced Standing Option

The School of Social Work offers an advanced standing option for students who have graduated with a Bachelor of Social Work (BSW) degree from a Council on Social Work Education (CWSE)-accredited BSW program within the past five years. To be eligible for the advanced standing option, students must have successfully completed their BSW with a minimum GPA of 3.25 for the last 60/90 units of undergraduate work. A cumulative 3.5 GPA for all social work courses with a grade of B or better is required for admission.

Students admitted to advanced standing must successfully complete three 2-unit intensive courses (SOWK 600 Assessment in Social Work Practice, SOWK 606 Neuropsychological Development and SOWK 604 The Role of Evidence-Based Practice in Social Work) in one six-week session prior to their first academic semester. Students who successfully complete these courses will be given credit for foundation year requirements (31 units) and advance

into the concentration year or second year of study to complete the additional 29 units required for graduation. Students who do not pass the bridge courses will not be given the 31 units of credit, but may opt for the 60-unit MSW program and enter the foundation year or first year of the program.

Advanced standing allows students to bypass the foundation year and enter the concentration year of studies. The concentration curriculum builds on the generic social work knowledge, which they obtained through their BSW experience, by offering a choice of five advanced practice concentrations: (1) community organization, planning and administration (COPA); (2) families and children; (3) health; (4) mental health; and (5) work and life. Students in all concentrations are required to enroll in SOWK 611 Leadership in the Social Work Profession and Organizations: Theory and Practice. Advanced standing students may also complete one of the following five sub-concentrations at the University Park

Campus: (1) social work practice with older adults; (2) systems of mental illness recovery; (3) school social work, which meets the academic requirements for the Pupil Personnel Services Credential necessary for social work practice in the public schools of California; (4) public child welfare; and (5) military social work and veteran services. Please note, some academic centers do not offer all concentration and/or sub-concentration areas of studies.

The advanced standing option consists of 35 units (27 units of course work and 8 units of field practicum). The option is available at these locations: University Park Campus, Orange County Academic Center in Irvine, San Diego Academic Center in Rancho Bernardo and Virtual Academic Center via the Internet and can be completed in three semesters. In addition, some classes are offered at City Center in downtown Los Angeles.

## Dual Degree Programs

The School of Social Work currently offers dual degree programs with a number of other USC professional schools. In addition, the school maintains a dual degree program at Hebrew Union College located adjacent to the USC campus.

The goal of these programs is to encourage graduate students to gain a recognized competence in another discipline which has direct relevance to the roles filled by social workers in society. Dual degree programs are based on the premise that some topics covered in the school are also addressed in the curricula of other departments, so that some credit toward an MSW degree may be given for specific courses in the cooperating department. Similarly, these departments have recognized that some credit toward their corresponding degree may be awarded for work completed in the School of Social Work. For this reason, students enrolled in dual degree programs can obtain both degrees with a reduced number of total units. Students wishing to enroll in dual degree programs must apply for and be admitted to both schools.

### Master of Social Work/Doctor of Philosophy, Social Work (MSW/Ph.D.)

The MSW/Ph.D. dual degree program is a course of study leading to both a graduate degree (Master of Social Work) and doctor of philosophy (Ph.D.) in social work. This course of study is offered to exemplary students seeking advanced research based study in social work to become professional leaders who will make significant contributions to the knowledge base of the profession in the social work academic world.

Prospective students must meet both the MSW and Ph.D. standing admission requirements.

#### Requirements

A total of at least 90 units is required for the dual degree with at least 42 units in the MSW program and at least 48 units in the Ph.D. program (exclusive of SOWK 794 Doctoral Dissertation). Students who select the mental health concentration will be required to complete at least 93 units (at least 45 MSW units and at least 48 Ph.D. units). The program can be completed within four years.

REQUIRED MSW COURSES	UNITS
SOWK 505	Human Behavior and the Social Environment II, or a graduate-level course in developmental psychology in Department of Psychology or another department 3
SOWK 543	Social Work Practice with Individuals 3
SOWK 545	Social Work Practice with Families, Groups and Complex Cases 3
SOWK 562	Social Work Research 3
SOWK 586ab	Field Practicum 3-3
SOWK 587ab	Integrative Learning for Social Work Practice 2-2
SOWK 611	Leadership in the Social Work Profession and Organizations 3
SOWK 686ab	Field Practicum II 4-4

Students in the COPA, Families and Children, Health, and Work and Life concentrations will be required to complete an additional 9 units of MSW core concentration specific courses, while students in the Mental Health concentration will be required to complete an additional 12 units of MSW core concentration specific courses.

REQUIRED PH.D. COURSES	UNITS
SOWK 702 Theories of Human Behavior in the Contexts of Social Environments	3
SOWK 703 Explanatory Theories for Larger Social Systems, or	
SOWK 743 Theories for Practice with Small Systems	3
SOWK 733 Policy Analysis and Advocacy in a Comparative Social Policy Context	3
SOWK 744 Theories for Practice with Large Systems	3
SOWK 760L Introduction to Social Work Statistics	3
SOWK 761L Multiple Regression for Social Work Research	3
SOWK 762 Social Work Research Methods I	3
SOWK 763 Social Work Research Methods II: Issues in Research for Social Work Practice	3
SOWK 764 Advanced Multivariate Statistics	3

Dual degree students will develop an Individualized Study Plan (ISP) at two points in their educational process. They will develop a plan with their mentor before the fall semester begins in year 1 to identify courses they plan to take in years 1 and 2.

It will be approved by the doctoral committee. Students will develop a plan with their mentor in the spring semester of their second year to identify courses and tutorials they will take in their third and fourth years.

#### *Program Adaptation*

The USC School of Social Work waives the following 9 units of the MSW foundation curriculum for students in the MSW/Ph.D. Dual Degree Program: SOWK 503, SOWK 534 and SOWK 535. Content and theory from these courses will be more rigorously covered during the first year in the following Ph.D. courses: SOWK 702, SOWK 733 and SOWK 744.

The MSW and the Ph.D. degrees are awarded separately upon completion of all program requirements.

#### **Master of Social Work/Master of Science, Gerontology**

The M.S./MSW dual degree offers the student interested in direct service or community organization the credentials most valued in clinical and therapeutic practice. Students enrolled in this dual degree receive an MSW as well as an M.S. in Gerontology. This dual degree requires completion of 72 units: 32 units of work in the Davis School of Gerontology and 40 units in the School of Social Work. The course work is usually completed over a 24-month period for

full-time students. Dual degree students in this program complete the standard foundation year courses in the School of Social Work, with the exception of SOWK 535 Social Welfare. Students may select any concentration, with the exception of Families and Children. In the concentration year, students must complete the three required core concentration courses as well as SOWK 611 Leadership in the Social Work Profession and Organizations: Theory and Practice. See the Davis School of Gerontology, page 707, for course requirements.

#### **Master of Social Work/Master of Planning, Public Policy**

The dual degree program between social work and planning offers unique opportunities for students who want to devote their professional careers to social policy, social planning or social services delivery. Dual degree students in this program receive an MSW as well as a Master of Planning (MPI). The MPI/MSW degree requires completion of a total of 83 units: 51 units in social work and 32 units in planning. The course work is normally completed over a period of 28 months for full-time students.

Dual degree students in this program complete the standard foundation year courses in the School of Social Work, with the exception of SOWK 535 Social Welfare. Students must select the Community Organization, Planning and Administration (COPA) concentration. In the concentration year, students must complete the following SOWK courses: SOWK 599, SOWK 611, SOWK 629, SOWK 648, SOWK 686ab, as well as one of the following courses: SOWK 603, SOWK 636 or SOWK 672. Students must apply to both programs prior to matriculation. See the USC Price School of Public Policy, page 899, for course requirements.

#### **Master of Social Work/Master of Public Administration, Public Policy**

The Master of Public Administration/Master of Social Work (MPA/MSW) dual degree program provides those students interested in careers as administrators of social service agencies the opportunity to combine preparation in the substantive field of social work with the acquisition of the administrative capabilities necessary in the public sector. Students must complete 82 units: 54 units in social work and 28 units in public administration. Dual degree students in this program complete the standard foundation year courses in the School of Social Work. Students must select the Community Organization, Planning and Administration (COPA) concentration. In the concentration year, students must complete the following SOWK courses: SOWK 599, SOWK 611, SOWK 629, SOWK 639, SOWK 648 and SOWK 686ab. Most students complete both

program requirements over a 24-month period for full-time students. See the USC Price School of Public Policy, page 902, for course requirements.

#### **Master of Social Work/Master of Public Health, Medicine**

The Master of Social Work/Master of Public Health (MSW/MPH) dual degree offers the student interdisciplinary preparation in the fields of public health and social work leading to the Master of Social Work (MSW) and Master of Public Health (MPH) degrees. The dual degree program is a collaborative effort between the School of Social Work and the Department of Preventive Medicine in the Keck School of Medicine. The objectives of the program are to provide students with the knowledge and skills necessary to promote health, prevent disease and enhance the delivery of health and social services in the community. Students will build interdisciplinary skills and an interdisciplinary professional identity by developing an understanding of the breadth of each field and their interface, while permitting concentration in particular specialization areas. The program prepares graduates for work in a variety of interdisciplinary settings; and for some, it will provide the basis for doctoral study.

Students must complete a minimum of 81 units: 45 units in social work and 36 units in preventive medicine; 16 of these units fulfill requirements for both degrees. Depending on specific social work concentration and public health track requirements, there may be additional courses and an increase in the total number of units. Most students complete both program requirements over three years for full-time students; however, the program can be completed in two years if the student takes a full course load during the two summer sessions.

Dual degree students in this program complete the standard foundation year courses during the first year in the School of Social Work with the exception of SOWK 562 Social Work Research. Students may select any one of the social work concentrations: community organization, planning and administration (COPA); families and children; health; mental health; and work and life; and any one of the public health tracks: health education and health promotion; biostatistics/epidemiology; health communication; child and family health; global health leadership; and public health policy.

#### **Master of Social Work/Juris Doctor, Law**

The Juris Doctor and Master of Social Work (J.D./MSW) dual degree program with the USC Gould School of Law is a four-year program in which students complete a total of 123 units. This includes 47 units in social work and 76 units in law.

To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honors programs. Students must apply to both programs prior to matriculation. The program of study is as follows:

*First and Second Years:* Complete both the first year J.D. program of study and the first year MSW course of study.

*Third Year:* Complete the second year J.D. program.

*Fourth Year:* Complete the core required concentration courses and one semester of field instruction and the final semester of the J.D. program in the spring.

The law school gives credit for the third semester in the School of Social Work, while the latter recognizes law courses as substitutions for a one-semester practice course, special topics courses, a third semester of social policy and one semester of field instruction (for which a clinical law semester is substituted).

#### Master of Social Work/Master of Arts, Jewish Nonprofit Management

The dual degree program combines in-class learning and fieldwork under the auspices of the Hebrew Union College-Jewish Institute of Religion's School of Jewish Nonprofit Management (formerly the School of Jewish

Communal Service) and the University of Southern California's School of Social Work. Students in this dual degree program simultaneously pursue graduate studies leading to the MSW and an M.A. in Jewish Nonprofit Management over a 24-month period for full-time students. A total of 90 units must be completed to meet the requirements of both degrees (44 units in social work and 46 units at the HUC-JIR School of Jewish Nonprofit Management). Dual degree students in this program complete the standard foundation year course in the School of Social Work, including the foundation field instruction. Students may select any concentration of interest. During their concentration year, students must enroll in the following: core required concentration courses: two SOWK 599 Special Topics courses (to be approved for the concentration). Students must apply to both programs prior to matriculation.

#### Master of Social Work/Master of Business Administration, Business

The MSW/MBA dual degree develops knowledge and skills in working with individuals, families and groups, as well as organizational dynamics, marketing, decision sciences, accounting and human relations. Students interested in working in the management of human services and not-for-profit organizations will develop knowledge of human resources, philanthropic and corporate social responsibility, organizational development and information management.

Prospective students must apply to both the School of Social Work and the Marshall School of Business.

The MSW/MBA requires completion of a total of 96 units: 48 in the Marshall School of Business and 48 in the School of Social Work. This dual degree program is typically completed in a three-year period, including summer, for full-time students.

Dual degree students in this program complete the standard foundation year courses in the School of Social Work. Students must select the work and life concentration. During their concentration year, students must enroll in the following: three core required concentration courses and SOWK 686ab Field Practicum. Course requirements in the Marshall School of Business include all required courses in an MBA program and graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students may not count courses taken outside the Marshall School of Business toward the 48 units.

The MBA and the MSW degrees are awarded simultaneously upon completion of all program requirements.

## Undergraduate Minor Program

### Minor in Children and Families in Urban America

Twenty-two units of course work are required for the completion of the minor; a total of 16 of these units must be upper division course work.

REQUIRED COURSES	UNITS
SOWK 304	Children and Families in Urban America (gateway course) 4
SOWK 305L	Children and Families in Urban America Integrative Seminar 2
SOWK 400	Children and Families in Urban America Capstone Course 4

Students choose three elective (4-unit) courses, one from each of the following three content areas. Of the three electives, only two may be taken from the same school or department.

### Families and Children

OT 330	Perspectives on the Daily Life of Families	4
PSYC 336L	Developmental Psychology	4
PSYC 437	Adolescent Development	4
SOCI 305	Sociology of Childhood	4
SOCI 369	The Family in a Changing Society	4

### Communities and Culture

ANTH 370	Family and Kinship in Cross-Cultural Perspective	4
COMM 324	Intercultural Communication	4
PPD 245	The Urban Context for Policy and Planning	4
PPD 439	Housing and Community Development	4
PPD 478	Social Innovations	4
SOWK 200x	Institutional Inequality in American Political and Social Policy	4

### Professions and Partnerships

COMM 320	Small Group and Team Communication	4
COMM 388	Ethics in Human Communication	4
EDPA 308	Politics and American Education	4
PPD 342	Crime and Public Policy	4
PPD 402	Management of Public and Nonprofit Organizations	4

## Doctor of Philosophy

With the enrollment of a small group of highly qualified experienced social workers, the School of Social Work established the first social work doctoral program in the Western United States in 1953. Over the years, the school has continued the tradition of providing opportunities for learning in small classes, seminars and tutorials.

The major goal of the doctoral program in social work is to produce social work scholars who will have the capacity to make valuable and significant contributions to the knowledge base of the profession. Students acquire the skills necessary to become professional scholars and develop a significant capacity for professional leadership. Toward this end, the school is committed to pursuing excellence in education with persons of definite promise and to seeking gifted students of varied social, ethnic and economic backgrounds.

Through training in specific areas, graduates of the program develop theoretical, conceptual, critical and analytic skills which can be applied to social, organizational, interpersonal and personal problems. They emerge from the program with substantive knowledge and analytic skills that enable them to contribute to understanding social problems and ways of solving them. With these skills, they are able to take a disciplined approach to the issues confronting the profession of social work and the field of social welfare and are prepared to make a significant contribution to the research and scholarship that informs society's effort to improve the human condition.

The Ph.D. program in social work is administered by the Doctoral Committee of the School of Social Work in accordance with the policies set by the Graduate School. The requirements listed below are special to the School of Social Work and must be read in conjunction with the general requirements of the Graduate School listed in this catalogue on page 97.

### Admission Requirements

Applicants for admission to the doctoral program must meet the following requirements:

- (1) A master's degree from a program accredited by the Council on Social Work Education or from another field related to social work.
- (2) Academic promise, as evidenced by above average achievement in undergraduate and professional education and a personal statement outlining the applicant's scholarly goals.

- (3) Professional competence as demonstrated through substantial experience in responsible social work, internships or other positions either during or subsequent to the master's program.

- (4) Personal qualities compatible with performance in social work and indicating a potential for leadership in the field: skill in relationships, flexibility and openness to new ideas, maturity, identification with the profession of social work, and commitment to furthering the development of the profession.

- (5) Satisfactory performance on the Graduate Record Examinations – existing test scores may be submitted if the GRE has been completed no more than five years prior to the date of application. Information may be obtained from the USC Testing Bureau, YWCA 104, 857 W. 36th Place, Los Angeles, CA 90089-0052, (213) 740-7166, or from the Educational Testing Service at [www.ets.org](http://www.ets.org).

- (6) Satisfactory performance on the Test of English as a Foreign Language (TOEFL) for all international students prior to the date of application. Existing test scores may be submitted if the TOEFL has been completed no more than two years prior to the date of application. Information may be obtained from the USC Testing Bureau, YWCA 104, 857 W. 36th Place, Los Angeles, CA 90089-0052, (213) 740-7166, or from the Educational Testing Service at [www.ets.org](http://www.ets.org).

- (7) Submission of application materials as required. Instructions for application to the Doctor of Philosophy in Social Work program may be obtained by writing to the director of the program.

Under unusual circumstances, applications from persons who do not meet these requirements, including those who have just been awarded the MSW degree, will be considered. In cases where the MSW (or its equivalent) has recently been granted and the applicant does not have the prerequisite post-master's degree employment experience, it may be required that such experience be acquired concurrent with enrollment in the doctoral program.

Under very unusual circumstances, applications to the doctoral program in social work will be considered from those who do not hold the MSW or an equivalent degree. Such applicants, in order to be admitted to the program, must have a master's degree (or its equivalent) in a field related to social work and a demonstrated commitment to the field of social work as evidenced by substantial contribution to the knowledge base of the

profession. Admission decisions on applicants who do not hold an MSW or equivalent degree will be made by the full Doctoral Program Committee of the School of Social Work rather than by a subcommittee of that body.

Priority will be given to applications that are completed by January 1.

### Application Procedure

All applicants to the doctoral program must submit the following information: (1) graduate admission application using the university's online system; (2) statement of purpose which is submitted as part of the online application; (3) current resume which is uploaded as part of the online application; (4) all undergraduate and graduate transcripts; (5) four letters of reference, at least three of which are from persons who can assess the student's scholarly potential; (6) recent GRE scores; (7) recent TOEFL scores; (8) documented evidence of financial support is required of all international applicants; (9) Ph.D. Information Form for the School of Social Work; (10) career plans and goals; and (11) scholarly writing sample.

### Foreign Language/Research/English Language Requirements

There is no foreign language requirement for the Ph.D. degree. Competence in advanced research methodology and statistics is required through satisfactory completion of required courses. All international students are required to submit their TOEFL scores from a test date prior to application and to meet university requirements for teaching.

### Course Requirements

Students must complete a minimum of 48 course units beyond the master's degree (exclusive of SOWK 794 Doctoral Dissertation). Students must complete at least 24 units within the School of Social Work and at least three courses in other departments or schools within the university. At least 8 of these 12 units must be in courses with a substantive rather than a research-methodology or statistic focus. Students must also take at least one 3-unit elective and one additional research or statistics course either in the School of Social Work or elsewhere in the university. Each student must develop a concentration either in another discipline outside the School of Social Work (such as gerontology; sociology; psychology; preventive medicine; business; policy, planning and development; or political science) or in a problem area where different external courses in different departments or schools bear on a specific social problem like homelessness.

An overall grade point average of B (3.0) on all graduate work attempted in the doctoral program is required for graduation.

*Core Content*

All students are expected to master core content. They must also complete 12 units from the substantive five core courses.

REQUIRED COURSES	UNITS
24 units from the following:	
SOWK 702 Theories of Human Behavior in the Contexts of Social Environments	3
SOWK 703 Explanatory Theories for Larger Social Systems	3
SOWK 733 Policy Analysis and Advocacy in a Comparative Social Policy Context	3
SOWK 743 Theories for Practice with Small Systems	3
SOWK 744 Theories for Practice with Large Systems	3
<i>Core Courses:</i>	
SOWK 760L Introduction to Social Work Statistics	3
SOWK 761L Multiple Regression in Social Work Research	3
SOWK 762 Social Work Research Methods I	3
SOWK 763 Social Work Research Methods II: Issues in Research for Social Work Practice	3
SOWK 764 Advanced Multivariate Statistics	3

Macro focus: students with a macro focus in policy, community organization or administration must complete either SOWK 702 or SOWK 743 as part of their core curriculum.

Micro focus: students with a micro focus in direct practice must complete either SOWK 703, SOWK 733 or SOWK 744.

OTHER REQUIREMENTS	UNITS
Elective*	3
Research or statistics course*	3
SOWK 790 Research	6

\*Must be taken in School of Social Work or elsewhere at USC

Students must complete a minimum of 12 units per semester in their first semester and second semester of their first year in the program to maintain their status as full-time students and eligibility for financial support from the School of Social Work.

*Individualized Course of Study*

The second year of the curriculum is largely individualized to meet each student’s educational goals. It is organized around a specific field of social work practice or a problem area. In the case of fields of practice or problem area, students gain knowledge of that field’s development and policies; one level of comparative practice theory applicable to that field; comparative explanatory theory appropriate to the field and the chosen practice level; and advanced research methods which can be used to explore field-specific questions.

*Field of Practice* is defined as a field of activity in which there is an identifiable service delivery system, a continuum of care for clients, and a defined or established role for social workers.

Given the current expertise of the faculty and available faculty resources, students may choose from the following fields of practice specializations: (1) families and children, (2) mental health, (3) health, (4) occupational/ industrial employment, (5) aging/gerontology, or (6) economic security/income maintenance.

Additional fields of practice can be added to the above choices depending on faculty interest, expertise and availability.

*Problem Area* is defined as a social or service delivery problem that is relevant to the field of social work such as homelessness or urban health systems.

*Practice Theory* is defined as advanced knowledge of comparative practice theories at one point on the intervention continuum as they relate to the field of practice chosen. The practice intervention continuum is defined to include practice with individuals, families and groups, as well as community practice, administration, planning, and policy practice.

*Explanatory Theory* is defined as advanced knowledge of comparative social science theories as they relate to the field of practice and level of intervention chosen.

*Specialized Research Skills* is defined as advanced skills in research methodology and statistics which support the student’s dissertation within the field of practice.

Students fulfill the requirement for the mastery of the content of their individualized course of study through a combination of at least three (2-unit) directed tutorials (SOWK 790) with members of the social work faculty, at least three university courses in other departments of the university and an elective.

Students prepare an individualized course study plan with their faculty adviser in the spring of the first year that is approved by the doctoral committee. It details classes and tutorials that each student will take during the second year of the program.

**Opportunities for Further Skill Development**

The program offers students skills training in both teaching and research.

*Teaching Skills*

All doctoral students must teach for two semesters before they graduate. Requirements may be fulfilled by co-teaching, teaching as an assistant or solo teaching. Before beginning these teaching experiences, students must take a teaching course approved by the doctoral committee. International students must meet the English proficiency standards set forth by the American Language Institute and participate, if necessary, in specialized training offered by the Center for Excellence in Teaching.

*Additional Research Skills*

Students are also offered the opportunity for enhanced skills building in research through a research internship. The one- or two-semester internship (SOWK 785), starting typically in the spring of the second year, is designed to provide students with hands-on, practical experience with an ongoing faculty research project prior to the start of their own dissertation research. Typically, activities include data collection and/or analysis. The practicum is expected to yield a paper of publishable quality co-authored by the student and the faculty member.

Students may enroll in SOWK 599 Special Topics by petitioning the doctoral committee in writing. The decision to grant or deny admission will be based on each applicant’s learning and research interests and permission of the instructor.

The usual program includes two years of full-time course work, plus an additional period for completing the qualifying examinations and dissertation. In rare cases, students who are not able to take the full-time program because of employment may spread course work over three years. They must, however, have the equivalent of full-time study in residence for at least one year.

Students should specify whether they are applying for the full-time or part-time program at the time they apply to the program. Part-time students usually carry two courses per semester during the academic year. They may wish to accelerate their progress by enrolling in appropriate courses when available during the summer session.

The time limit for completing all requirements for the Ph.D. degree is eight years from the first course taken at USC to be applied toward the degree. Students who have completed an applicable master's degree at USC or elsewhere (almost all students in the social work doctoral program) must complete the Ph.D. in six years.

#### **Transfer of Credit**

The transfer of post-master's doctoral course work from another institution will only be considered if a grade of B or better (A = 4.0) has been obtained, and the course has been completed within the last five years. Transfer of credits must be petitioned and approved by both the School of Social Work and the Graduate School.

#### **Screening Procedures**

When students have completed a minimum of 16 units (but not more than 24 units) of doctoral course work, the doctoral committee assesses their performance and makes a decision about their readiness to continue in the program. If the decision is to deny permission to continue, the students are so notified. If permission is granted, a guidance committee is established.

#### **Guidance Committee**

The guidance committee is composed of five faculty members, four of whom, including the chair, are from the School of Social Work and one from an academic unit of the university other than the School of Social Work. The function of the guidance committee is to oversee the development of the student's academic program through the qualifying examination.

#### **Qualifying Examination**

As a prerequisite to candidacy for the Ph.D. degree, students must pass written and oral qualifying examinations. In order to take the examinations, students must complete all core courses, at least 6 units of SOWK 790 tutorials and at least 32 units of course work in the doctoral program with a minimum grade point average of 3.0.

All students must pass a qualifying examination by completing a paper that the examination committee judges to be of publishable quality and passing an oral examination on subject matter related to the paper. The paper must deal with a substantive theoretical, model-building or methodological issue in the student's chosen area. Critical reviews of the literature or reports of empirical studies conducted by the student specifically for the qualifying examination are acceptable.

The topic of the paper will be chosen in conjunction with the student's chair and must be defended before and agreed to by the entire examination committee. The content of the paper is to go beyond products developed for tutorials and must be an independent effort. Further details for completing the paper and oral examination are provided as needed. When students pass the written and oral portions of the qualifying examination, they advance to candidacy.

In accordance with university policy, since the two portions of the qualifying examination are considered part of a single examination, only one retake of either portion of the examination is permitted. When the oral examination has been passed, the student is formally admitted to candidacy.

#### **Doctoral Dissertation**

When the student is admitted to candidacy, a dissertation committee is established consisting of three members of the guidance committee, one of whom must be from outside the School of Social Work. The dissertation committee has the responsibility of providing consultation in research, approving the dissertation, conducting the final oral examination and recommending the candidate for the Ph.D. degree. The doctoral dissertation should make a contribution to knowledge and theory related to the profession of social work. Dissertations must not only show technical mastery of the subject and research methodology but must also demonstrate the candidate's ability to work independently as a scholar.

The first step in the dissertation process is the development of a dissertation proposal. Normally about 25-30 pages, the proposal should contain a clear statement of purpose, a rationale for the research, research questions or hypotheses, a review of pertinent literature, and an explication of the research methods to be used including the design, instrumentation, sampling procedures and plan for analysis. The proposal must include human subject clearances for the anticipated research obtained from the appropriate school and university committees.

The dissertation proposal is submitted to the student's dissertation committee and defended. Upon approval of the proposal, a copy is filed with the director of the doctoral program.

It is expected that students will begin work on their dissertation prospectus as soon as possible after completion of the qualifying examinations, and that an acceptable proposal will be presented within three months of the completion of the examination.

#### *Abstract of Dissertation*

Since the abstract of the dissertation is also published in *Dissertation Abstracts International*, it should be written with care and must be representative of the final draft of the dissertation. A shorter abstract for publication in *Social Work Research and Abstracts* is also required.

#### *Final Oral Examination*

Upon approval of the final draft of the dissertation by all members of the dissertation committee, the candidate must pass a general final oral examination. After the candidate successfully completes the final oral examination, the committee recommends the candidate to the Graduate School for the Ph.D. degree.

#### **Hamovitch Center for Science in the Human Services**

The Hamovitch Center for Science in the Human Services, located in the School of Social Work, serves as the administrative umbrella for the school's centers of research excellence. These centers of interdisciplinary research include the areas of mental health, health, corporate and industrial social work, child abuse, interpersonal violence and other projects of interest to individual faculty. The center hosts seminars and colloquia which are open to the university and community.

Research projects are supported by federal, state, county and school resources. The center engages faculty in research, demonstration and application in building and testing theory, developing research instruments, testing models of service and treatment modalities, evaluating programs and service policy. The center also provides opportunities for doctoral students to acquire research training through ongoing and newly initiated faculty research projects. Doctoral students are encouraged to apply to participate in such projects which often lead to dissertation possibilities. Predoctoral fellowships and/or research assistantships for projects conducted at the center are sometimes available to incoming and ongoing doctoral students. The center also enables doctoral students to conduct their own research through the auspices of the center, including their dissertation research. All doctoral students are encouraged to attend and participate in the center's colloquia and programs to enhance their involvement with and skills in research and knowledge development.

## Courses of Instruction

### SOCIAL WORK (SOWK)

The following courses may be offered during any given term; consult the *Schedule of Classes*.

#### **SOWK 200xm Institutional Inequality in American Political and Social Policy (4)**

Historic and philosophical roots of inequality for minority groups in the United States and implications for public policy. Not available for major credit.

#### **SOWK 303 Crises in Human Development (4)**

Issues, concepts, and methodology related to understanding human behavior, growth and development from infancy through old age; developmental crises at each stage of the life cycle.

#### **SOWK 304 Children and Families in Urban America (4)**

Gateway to the minor in Children and Families in Urban America. Provides foundation for principles on the conditions of children, families and communities, partnerships between families and human service professionals, and inter-professional practice in urban American communities.

#### **SOWK 305L Children and Families in Urban America Integrative Seminar (2)**

Introduction to human service professionals, agencies and institutions in the greater Los Angeles area which serve children and families who reside there.

#### **SOWK 350 Adolescent Gang Intervention (4)**

The incidence of gangs (particularly in the Los Angeles area), gang interventions, and policies developed to address the growing gang situation.

#### **SOWK 390 Special Problems (1-4)**

Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

#### **SOWK 400 Children and Families in Urban America Capstone Course (4)**

The capstone course for the "Children and Families in Urban America" minor will provide an opportunity to understand the relationship between federal, state, and local policies which provide services to children and families. It will apply the knowledge learned in previous minor-related courses.

#### **SOWK 499 Special Topics (2-4, max 8)**

Selected topics in various specialty areas within social work.

#### **SOWK 503 Human Behavior and the Social Environment I (3)**

The ecological systems paradigm is the lens through which theories of personality, family, group, organization, community and culture and the interaction among these systems are explored.

#### **SOWK 505 Human Behavior and the Social Environment II (3)**

The course of human life, including the factors which impinge on the developmental continuum between normal and pathological conditions. *Prerequisite:* SOWK 503.

#### **SOWK 522 Global Violence Against Women (3)**

This course provides a broad understanding of violence against women within a global context.

#### **SOWK 525 Social Work Practice with Transitional Youth (3)**

Students will be introduced to policies affecting transitional youth and use a biopsychosocial perspective to work with them on macro, meso, and micro levels.

#### **SOWK 534 Policy and Practice in Social Service Organizations (3)**

Study of social work organizations with emphasis on their policy contexts, organizational theory, and the development of delivery systems.

#### **SOWK 535 Social Welfare (3)**

Structure and operation of current American social welfare programs (social policy analysis). *Prerequisite:* SOWK 534.

#### **SOWK 543 Social Work Practice with Individuals (3)**

Theory and principles underlying generic social work practice with primary emphasis on working with individuals.

#### **SOWK 545 Social Work Practice with Families, Groups and Complex Cases (3)**

Theories and principles with primary emphasis on families and groups with application to problems requiring multi-level interventions. *Prerequisite:* SOWK 503, SOWK 534, SOWK 543.

#### **SOWK 562 Social Work Research (3)**

Introduction to research methods, including conceptualization of research problems, literature review, research design, sampling, measurement, data collection and data analysis.

#### **SOWK 586ab Field Practicum (3-3)**

Supervised field placement to develop generalist practice skills in working with individuals, families, groups, communities and organizations. Graded IP/CR/NC.

#### **SOWK 587ab Integrative Learning for Social Work Practice (2-2)**

Integrative content from Policy, Research, Human Behavior, Social Work Practice and Field Practicum. Graded CR/NC. *Concurrent enrollment:* a: SOWK 586a, SOWK 543; b: SOWK 586b, SOWK 545.

#### **SOWK 590 Directed Research (1-12)**

Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

#### **SOWK 599 Special Topics (1-4, max 13)**

#### **SOWK 600 Assessment in Social Work Practice (2, 5m)**

Theory and principles underlying generic social work practice with primary emphasis on psychosocial assessment. Open only to master's students in the School of Social Work.

#### **SOWK 601 Advanced Theories and Interventions with Children and Adolescents (3)**

Advances students' knowledge and clinical skills working with children and adolescents. Emphasis on problems affecting children, including developmental derailments and disruptions. *Prerequisite:* SOWK 505, SOWK 545; or SOWK 600, SOWK 604, and SOWK 606.

#### **SOWK 602 Advanced Theories and Clinical Interventions with Families (3)**

Advances students' knowledge and clinical skills working with diverse urban families experiencing various stressors. Exploration and application of a range of family therapy models. *Prerequisite:* SOWK 505, SOWK 545; or SOWK 600, SOWK 604, and SOWK 606.

#### **SOWK 603 Merging Policy, Planning and Research for Change in Families and Children's Settings (3)**

Development and evaluation of service programs for children and families incorporating social welfare policy, macro practice and research skills. *Prerequisite:* SOWK 534, SOWK 535, SOWK 562; or SOWK 600, SOWK 604, and SOWK 606.

#### **SOWK 604 The Role of Evidence-Based Practice in Social Work (2, 5m)**

Study of the important role research plays in the development of evidence-based practice methods. Open only to doctoral and master's students in the School of Social Work.

**SOWK 605 Human Development and Mental Health (3)** Understanding problem-producing behaviors and their ramifications on individuals, families, and groups that comprise the clientele in mental health settings. Required for students in Mental Health concentration. *Prerequisite:* SOWK 503, SOWK 505; or SOWK 600, SOWK 604, and SOWK 606.

**SOWK 606 Neuropsychological Development (2, 5m)** Study of human neuropsychological development within the context of social work. Open only to doctoral and master's students in the School of Social Work.

**SOWK 607 Feminist Theory, Social Action, and Social Work: Philippines (4, 5m)** Understanding and awareness of the political, economic, social, and cultural contexts through a feminist perspective, using the Philippines as a case study. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 611 Leadership in the Social Work Profession and Organizations: Theory and Practice (3)** Through didactic and experiential methods, students learn to interpret and apply leadership theory and research. Covers skills of effective leadership at all organizational levels.

**SOWK 612 Psychopathology and Diagnosis of Mental Disorder (3)** Assessment of psychopathology, and the rationale and organization of the system for diagnosis of mental disorders. Emphasis is on developing differential diagnostic skills.

**SOWK 614 Social Work Practice in School Settings (3)** Based on ecosystems perspectives, this course examines policies, theories and principles of social work practice in school settings.

**SOWK 615 Brief Therapy and Crisis Intervention (3)** Theory and multimodal approaches for brief therapy and crisis intervention with diverse clientele in a range of mental health and health settings.

**SOWK 616 Clinical Practice with Older Adults (3)** Developmental tasks of adulthood and later life, as well as assessment and intervention for problems and disorders associated with aging.

**SOWK 617 Substance Abuse with Consideration of Other Addictive Disorders (3)** Exploration of nature and treatment of substance abuse and other addictive disorders as well as relevant treatment models for individuals, groups and families.

**SOWK 618 Systems of Recovery from Mental Illness in Adults (3, FaSp5m)** Focus on the multi-level impact of mental illness on adults and families. Evidence-based interventions promoting increased quality of life and stability are emphasized.

**SOWK 619 Social Work in Public Child Welfare Settings (3)** This advanced seminar will provide tools to enhance the practitioner's response to the special challenges (substance abuse, HIV/AIDS, domestic violence) in public child welfare.

**SOWK 622 Social Work Practice with African American Families (3, FaSp5m)** Presents various theories for understanding African American families and addresses an Afrocentric framework for clinical practice and intervention with individuals and families. *Prerequisites:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

**SOWK 625 Evaluation of Research: Mental Health (3)** Range of research conducted in mental health; evaluation of selected research reports and their application to social work practice. Required for students in Mental Health concentration. *Prerequisite:* SOWK 562; or SOWK 600, SOWK 604, and SOWK 606.

**SOWK 626 Social Conflict, Empowerment and Creative Practice in Israel (4, 5m)** The summer global immersion program in Israel focuses on understanding social problems and alleviating them through empowerment approaches and the utilization of expressive practices. Open only to social work students.

**SOWK 628 Social Work with Latino Populations (3, Fa)** Current issues, trends and developments in social work practice with Latino populations.

**SOWK 629 Evaluation of Research: Community Organization, Planning and Administration (3)** Research for macro-practice, emphasizing qualitative methods, participatory action research, program evaluation, needs assessment; mapping and GIS to understand urban environments. *Prerequisite:* SOWK 562; or SOWK 600, SOWK 604, and SOWK 606.

**SOWK 631 Advanced Theories and Clinical Interventions in Health Care (3)** Evaluation of theory, best practices, emerging issues, and skill development in health settings; interaction among cultural, socioeconomic, and organizational factors. *Prerequisite:* SOWK 505, SOWK 545; or SOWK 600, SOWK 604, and SOWK 606.

**SOWK 632 Program Planning and Evaluation in Health Care (3)** Program and intervention development and evaluation research in health settings. Issues and skill development in program design and methods for evaluation. *Prerequisite:* SOWK 562; or SOWK 600, SOWK 604, and SOWK 606.

**SOWK 636 Policy in the Health Care Sector (3)** Analysis of behavioral, practice and research considerations in addressing a range of health problems and the policy-making process. Required for students in Mental Health in Health Settings concentration. *Prerequisite:* SOWK 535; or SOWK 600, SOWK 604, and SOWK 606.

**SOWK 639 Social Policy for Managers, Planners and Community Organizers (3)** Analysis of efforts to improve local human services organizations and agencies with consideration of political, social, demographic and organization contexts. *Prerequisite:* SOWK 535; or SOWK 600, SOWK 604, and SOWK 606.

**SOWK 640 Clinical Practice with the Military Family (3)** Theoretical and practical approaches to clinical practice with military families. Overview of common social issues in the military system and demands on the family dynamic. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 641 Clinical Practice with Service Members and Veterans (3)** Theoretical and practical approaches to trauma for use in treatment of PTSD. Advances students' knowledge of best practices and current evidence-based models on PTSD. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 642 Military Culture as a Workplace Environment (1)** Examination of complex issues of the military as a workplace environment including gender, the role of rank structure, psychological development of basic training, and ethics of counseling.

**SOWK 645 Clinical Practice in Mental Health Settings (3)** Social work processes from intake to termination; emphasis on clinical skills required for social work practice in a broad spectrum of mental health settings. Required for students in Mental Health concentration.

**SOWK 648 Management for Community and Social Services (3)** Methods and principles of management in urban settings with primary emphasis on strategic management, finance analysis, and innovative project development.

**SOWK 653 Social Work Practice With and In Behalf of Older Adults (3)** Integrates foundation and advanced knowledge and skill for practice with and in behalf of older adults. Graded CR/NC.

**SOWK 654 Social Work Practice with Severely and Persistently Mentally Ill (1)** Integrates foundation and advanced knowledge and skill for practice with severely and persistently mentally ill. Graded CR/NC.

**SOWK 655 Global Immersion in Military Culture: U.S. Forces Abroad (4, 5m)** This course will enhance students' understanding of the delivery of human services on overseas military installations.

**SOWK 660 Health Care Delivery Systems: Planning for Health and Social Services (3)** Evaluating health care delivery systems in the U.S. and internationally including community social capital, health disparities, access to care, and policy implications for diverse populations.

**SOWK 661 Case Management as a Service Model (3)** Case management as a service model for increasing cost effectiveness and quality of care for diverse populations including transitional planning, utilization management and resource utilization.

**SOWK 662 Information Technology for Human Services (3)** Information technology as a resource for quality health and human services. Implications for interagency collaboration, empowerment of clients and professionals, evidence-based practice, education and ethics.

**SOWK 663 Clinical Practice with Couples (3)** Examination of major models and diverse intervention strategies to ameliorate common presenting problems of couples. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

**SOWK 664 Consultation, Coaching and Social Entrepreneurship (3)** Expanding roles that social workers play within both non-profit and for profit corporations. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

**SOWK 665 Program Development and Grant Writing for Social Workers (3)** Planning and program development that are generalized to any setting and relevant to direct and macro social work practice expertise. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

**SOWK 666 Domestic Violence (3)** Recognition of domestic violence and examination of effective intervention measures and preventive methods. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

**SOWK 667 Information Systems for Program Development (3)** Theoretical framework and practical skills in the use of some of the most common and up-to-date applications today of computers and electronic communication. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

**SOWK 668 Social Work and Law (3)** Examination of roles, opportunities, and concerns for the practice of social work in the structures and procedures of the law. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

**SOWK 669 Managing Change and Organization Development (3)** Conceptual framework and practical skills needed to design, implement and evaluate effective change and organization development programs. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

**SOWK 670 Global Dimensions in Social Policy and Social Work Practice (3)** Exploration and critique of how political, economic, cultural, religious and environmental factors impact social welfare policies, social work practice, and social development globally. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 671 Clinical Intervention and Advanced Theories in Work Settings (3)** Clinical intervention strategies and theories emphasizing crisis intervention, task-centered, and short-term interventions with individuals, families, and social networks effective in work settings. *Prerequisite:* SOWK 505, SOWK 545; or SOWK 600, SOWK 604, and SOWK 606.

**SOWK 672 Improving Work Life Through Social Policy and Managing Organizational Development and Change (3)** Advances students' ability to formulate social policy and conceptual understanding of workplace issues. Intervention strategies for organizational development. *Prerequisite:* SOWK 535; or SOWK 600, SOWK 604, and SOWK 606.

**SOWK 673 Program Development, Training, Grant Writing, and Program Evaluation in Work Settings (3)** Focus on the role of social workers in program development and evaluation, supervision and training, and research in workplace settings. *Prerequisite:* SOWK 562; or SOWK 600, SOWK 604, and SOWK 606.

**SOWK 674 Human Sexuality in Clinical Social Work Practice (3)** Explores physiological, psychological, and socio-cultural variables associated with sexual identity, sexual orientation, and sexual behavior to increase student understanding and appreciation for human sexual behavior. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 675 Play Therapy in Social Work with Children and Adolescents (3)** Advances student theoretical knowledge and clinical practice skills in working with children, adolescents, and their families and explores the process of child psychotherapy. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 676 Psychopharmacology for Therapists and Counselors (1, FaSpSm)** Overview of various classes of basic psychotherapeutic medications. Useful to social workers, counselors, therapists, and other individuals who counsel and treat mentally ill patients.

**SOWK 677 Mental Health Practice with Children and Adolescents (3)** The assessment and treatment of children with serious emotional disturbance, including the service delivery models and policies that influence service delivery. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 678 Child Abuse and Neglect: Intervention and Treatment (3)** Advanced practice course focusing on interventions with and treatment of complex family systems where the effects of child maltreatment are the presenting problems. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 680 Social Work Spanish for Culturally Competent Services (3)** Integration of cross-cultural practice skills with Spanish language development through the class instruction and practice development. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

**SOWK 681 Managing Diversity in a Global Context (3)** Interdisciplinary approach to innovative practices that make the workplace more inclusive and productive. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

**SOWK 682 Spirituality, Religion, and Faith in Clinical Practice (3)** Examination of diverse spiritual and religious traditions. Spiritually-sensitive treatment approaches applied to psychological and spiritual clinical problems of individuals, couples, and families. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 683 Hypnosis Social Work Practice (3)** Examination of major theoretical and practice applications of hypnosis in social work practice and development of a beginning level of competency. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

**SOWK 684 Community Practice for Social Change (3)** Prepares students to work effectively within complex and diverse community settings. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

**SOWK 685 Working with Adolescents: Practice, Systems and Advocacy (3)**

Enhance knowledge and skill in working with adolescents involved in the child welfare, juvenile justice and other systems. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 686abc Field Practicum II (4-4-4)**

Supervised field placement to develop depth of skill and practice in area of concentration. Graded CR/NC/IP. Open only to Social Work students. *Prerequisite:* SOWK 586ab.

**SOWK 687 Media in Social Work (3)**

Creation of short documentaries for social change. Techniques in media production, strategies for media outreach, and development of media literacy skills to deconstruct media messages. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 688 School Violence (3)**

Examines theoretical, empirical and practice-based literature on school violence including how students' physical well-being, academic functioning, social relations, and emotional and cognitive development are affected. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 689 Models of Family Therapy: Theory and Practice (3)**

Expand students' theoretical and practical competence in systemic and narrative family therapy models for work with 21st century families. *Prerequisite:* SOWK 505, SOWK 535

**SOWK 690ab Research (1-4; 1-4)** Intensive individual study of specific problems. Graded CR/NC.

**SOWK 691 Psychosocial Issues in Health and Mental Health (3)**

Course examines psychosocial issues in health, including coping and social support, chronic illness, patient-provider communication, stigma and discrimination, quality of life, religion/spirituality, and social justice. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 692 Loss, Grief and Bereavement (3)**

Focus on the experiences of loss, death and bereavement as it is viewed by individuals, families and loved ones. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 693 Diagnosing Psychopathology: Introduction to DSM IV-TR (1)**

Advanced exposure to several issues in the area of adult psychopathology and diagnostics through didactic and experiential modalities. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 694 Group Psychotherapy in Mental Health Settings (3)**

Focus on group therapy for clinical social workers as practiced in various mental health settings. The entire process of group development is examined. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 695 Research Project I (2)** Credit on acceptance of professional research project proposal. Graded CR/NC. *Prerequisite:* SOWK 562.

**SOWK 696 LGBT Psycho/Social/Political Issues (3)**

Overview of clinical, social and political issues with which social workers should be familiar when working with lesbian, gay, bisexual and transgender clients. *Prerequisite:* SOWK 505, SOWK 535.

**SOWK 697 Research Project II (1)** Credit on acceptance of professional research project. Graded CR/NC. *Prerequisite:* SOWK 695.

**SOWK 700 Innovations in Interactive Media and Informatics (3, Sp5m)**

Theory, design, and analysis of interactive media research applications and informatics resources relevant to behavior and neurobiology within global interdisciplinary practice and policy settings. Open only to doctoral students. *Recommended preparation:* advanced research methods classes and grounding in discipline.

**SOWK 702 Theories of Human Behavior in the Contexts of Social Environments (3)**

A focus on human behavior in interaction with the social environment; major paradigms including general systems theory, ego psychology, and role theories are examined.

**SOWK 703 Explanatory Theories for Larger Social Systems (3)**

Theories of organizational and community behavior are examined in relation to their influence on the development of social services.

**SOWK 733 Policy Analysis and Advocacy in a Comparative Social Policy Context (3)**

Examination of the evolution of American and other welfare states in selected nations. Analysis of global welfare institutions. Engaging in policy analysis in a comparative context.

**SOWK 743 Theories for Practice with Small Systems (3)**

Early practice theories and their historical roots are examined. Implications for evolving current practice theories with individuals, families, and groups are discussed.

**SOWK 744 Theories for Practice with Large Systems (3)**

Examination of the development and utility of theories, models and approaches to social work community and administrative practice.

**SOWK 760L Introduction to Social Work Statistics (3)**

Foundation course covering univariate and bivariate descriptive and inferential statistics. Required lab covering basic computer skills and utilization of statistical software.

**SOWK 761L Multiple Regression for Social Work Research (3)**

Multivariate statistical methods including descriptive and inferential statistics, parametric and non-parametric tests of hypotheses; correlation, analysis of variance, multiple regression, and factor analysis; utilization of computer programs for statistical analysis.

**SOWK 762 Social Work Research Methods I (3)**

Models of research, the nature of inquiry, and the research process including problem formulation, measurement, designs, sampling and data sources. *Prerequisite:* doctoral standing.

**SOWK 763 Social Work Research Methods II: Issues in Research for Social Work Practice (3)**

Research methods to provide students with advanced methodological knowledge in two areas related to social work practice: psychotherapy outcome research and program research. *Prerequisite:* SOWK 762.

**SOWK 764 Advanced Multivariate Statistics (3)**

Introduction to single equation statistical modeling using limited dependent variables (categorical and ordered categorical). Methods are drawn from statistics and econometrics.

**SOWK 770 Introduction to Qualitative and Mixed Research Methods (3)**

Overview of the use of qualitative and mixed methods in social, clinical and health services research.

**SOWK 781 Guided Teaching Experience (2)**

Mentorship with a member of the teaching faculty; discussions of curriculum design; observation; preparation and delivery of selected course sessions. Graded CR/NC.

**SOWK 785 Guided Research Internship (2)**

Research practicum designed to provide students with hands-on practical experience with an ongoing faculty research project. Graded CR/NC. *Prerequisite:* SOWK 763.

**SOWK 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**SOWK 794abcdz Doctoral Dissertation (2-2-2-0)**

Credit on acceptance of dissertation. Graded IP/CR/NC.

---

# USC School of Theatre

*The USC School of Theatre took a page from the Western canon with a 2011-2012 season of literary adaptations of works by Jane Austen, Ivan Turgenev, George Bernard Shaw and James Joyce. From left, BFA students Keelin Woodell and Bryce McBratnie play aristocrats behaving badly in Les Liaisons Dangereuses, an adaptation of Choderlos de Laclos' 18th century novel of revenge.*

One of the premier theatre schools in the United States, the USC School of Theatre provides the necessary education and training for graduates to excel in the professional theatre and related fields. Theatre also provides an ideal foundation to a liberal education that prepares students for a wide range of career interests. The school promotes and supports innovative and flexible ways to achieve students' educational and professional goals.

Theatre is both a collaborative endeavor and a universal means of communication. The school educates students in the history of theatre, while preparing them to add to that history, to use their talents, skill and imagination to explore the limitless possibilities the art of theatre offers.

The USC School of Theatre is significantly enhanced by its location in Los Angeles, the entertainment capital of the world. Theatre professionals frequently teach seminars, mentor students and participate in School of Theatre productions.

Graduates of the school work professionally in all aspects of theatre, film and television. The school's performance and design faculty are dynamic teachers who also regularly work in the theatre and entertainment industry.

The breadth of learning opportunities offered at the school prepares students for the spectrum of careers in the professional theatre, including performance, production, design, sound design, management and teaching. The School of Theatre also strives to instill confidence, integrity, excellence and artistic sensitivity into each of its students — traits that are essential to success in any field.

The USC School of Theatre has been renamed to the USC School of Dramatic Arts effective July 1, 2012.

#### **Faculty**

*Professors:* Sharon M. Carnicke, Ph.D.; Velina Hasu Houston, Ph.D.

*Associate Professors:* Margo Apostolos, Ph.D.; Meiling Cheng, DFA; Don Llewellyn, Jr., MFA; Oliver Mayer, MFA

*Assistant Professors:* Luis Alfaro; Angus Fletcher, Ph.D.; Christina Haatainen-Jones; Tom Ontiveros, MFA; Sibyl Wickersheimer, MFA

*Professors of Theatre Practice:* Andrei Belgrader; Natsuko Ohama; Brian Parsons; Andrew J. Robinson

*Associate Professors of Theatre Practice:* Paul Backer, Ph.D.; Brent Blair, M.A.; David Bridel; Elsbeth M. Collins; Joseph Hacker, MFA; Duncan Mahoney; Mary-Joan Negro; Jack R. Rowe; Stephanie Shroyer, MFA; Eric Trules; L. Zane, MFA

*Assistant Professors of Theatre Practice:* Philip G. Allen; Anita Dashiell-Sparks, MFA

*Adjunct Faculty:* Tony Abatemarco; Joe Anthony; Robert Bailey; Corbett Barklie; Joe Bays; Jason Robert Brown; Anne Burk; Louis Butelli; Frank Catalano; Julian Cha; Stacie Chaiken; Paula Cizmar; Anastasia

Coon, MFA; Debra DeLiso; Barbara Dodge; Kathleen Dunn-Muzingo; Frank Dwyer; Dan Fishbach; Laura Flanagan; Jeff Flowers; Jay Fuentes; Parmer Fuller; Julianne Gale, M.A.; Rafael Garcia; Miranda Garrison; Terry Gordon; Alexander Greschenko; Elizabeth Hogan; Paula Holt; Takeshi Kata; Michael Keenan; Mary K Klinger; Shishir Kurup; Nikolaos Lagousakos; Edgar Landa; Rachael Lawrence; Joey Letteri; Victoria Looseleaf; Helene Lorenz; Heather Lyle, M.M.; Marjo-Riikka Makela, MFA; Kevin McCorkle; Babette Markus; Laural Meade; Randy Mell; Ntare Guma Mbaho Mwine; Angeliki Papadakis, J.D.; Jacqueline Pavlich; Leah Piehl; Debra Piver; Ron Popenhagen, Ph.D.; Bradley Rapiet; Jon Lawrence Rivera; John Rubinstein; Mady Schutzman; Doug Tompos; Matt Walker; Julie Welch; Kenji Yamaguchi

*Emeritus Professors:* Eve Roberts, MFA; Robert R. Scales, Ph.D.; James Wilson, MFA

## General Information

### **Degree Programs**

The School of Theatre offers professional and academic degrees at the Bachelor and Master of Fine Arts levels as well as a Master of Arts in Applied Theatre Arts. USC offers two degree programs to undergraduate students interested in the study of theatre arts. The professional degree programs, the Bachelor of Fine Arts (BFA) in Acting, Design/Technical Direction, Sound Design, and Stage Management, offer a conservatory approach to training for students committed to pursuing careers in the professional theatre, film and television industries. The Bachelor of Arts degree program (B.A.) incorporates a broad, general education in addition to a thorough study of drama. The Bachelor of Arts in Visual and Performing Arts Studies provides students with a broad understanding of the various disciplines. The School of Theatre also offers minor programs in applied theatre arts, theatre, dance, musical theatre, performing arts studies and playwriting.

### **Bachelor of Arts**

The Bachelor of Arts (B.A.) degree is ideal for students who want a broad education in addition to production and performance experience. The degree is offered in cooperation with the USC Dornsife College of Letters, Arts and Sciences.

### **Bachelor of Fine Arts**

*Acting:* The BFA acting degree is a four-year professional training program with opportunities for performances beginning with the sophomore year. The program comprises an integrated sequence of training in acting, voice and body movement, based on the belief that an actor's emotional and imaginative abilities cannot be released without control over vocal and physical resources. This training is combined with course work in critical and historical studies, stagecraft, technical theatre, scenic design, costume and lighting. An audition is required for admission. The BFA acting program is highly competitive.

*Design/Technical Direction:* The BFA program in design/technical production offers two areas of study: design — incorporating study in scenic, lighting and costume design; and technical production — incorporating the study of theatrical design with training in the professional skills needed to execute stage designs. An interview is required for admission.

*Sound Design:* The BFA program in sound design offers the student a combination of technical, management and design training in sound design. The student is also introduced to sound recording and mixing through a series of courses offered by the USC Thornton School of Music. Students begin using this training as early as the second

semester of the second year of enrollment. The skills acquired in the classroom are further explored through sound design assignments on School of Theatre public productions in each subsequent semester of the student's program. Students in the sound design program build and design the sound component for the majority of the School of Theatre's productions under the supervision of a professional staff of designers and theatre technicians. An interview is required for admission.

*Stage Management:* The BFA program in stage management offers the student a combination of technical, management and design training. Students begin using this training as early as the first year of enrollment. The skills acquired in the classroom are further explored through stage management assignments in each year of the student's program. An interview is required for admission.

Students in the design/technical production and stage management programs design, build and stage manage the majority of the School of Theatre's productions under the supervision of a professional staff of designers and theatre technicians.

### **Bachelor of Arts in Visual and Performing Arts Studies**

The Bachelor of Arts in Visual and Performing Arts Studies is an interdisciplinary degree offered jointly by the School of Theatre, the School of Architecture, the School of Cinematic Arts, the Roski School of Fine Arts, the Thornton School of Music, and the Dornsife College of Letters, Arts and Sciences.

#### **Minor Programs**

**Theatre** This general minor in theatre invites students to explore the many facets of this exciting field. Students have the opportunity to take a variety of classes in acting, applied theatre arts, applied theatre arts/education, playwriting, literature, stage management, directing, costume design and production. The curriculum is very flexible and encourages students to develop a primary interest for upper-division course work. All minor students are eligible to participate in performance and production projects.

**Dance** The dance minor is designed to present undergraduate students with a focus on the discipline of dance as an educational tool for studies and research. The dance program has a variety of courses in dance technique, dance history and philosophy, choreography, production and performance. This minor will offer each student a unique interdisciplinary experience; it is compatible with a variety of majors designated by the students. Student choreography, performances and productions include work with international dances and dances in the Southern California/Los Angeles region.

**Applied Theatre Arts** The minor in applied theatre arts addresses the theory and practice of applying theatre arts in non-traditional settings with emphases that include education, therapy and social change.

**Musical Theatre** The minor in musical theatre, interdisciplinary in nature, is a 27-unit program incorporating the study of acting, dance or movement, vocal arts and related musical subjects presented in association with the Thornton School of Music.

**Performing Arts Studies** The minor in performing arts provides an interdisciplinary inquiry into the nature and aesthetics of the performing arts. It combines the disciplines of cinema-television, dance, music and theatre. The minor is a unique course of study that looks at how the performing arts contribute to a culturally literate society.

**Playwriting** The minor in playwriting presents undergraduate students who are not theatre majors with a concentration in the discipline of playwriting as a means for broadening and deepening expression using the literary and performing arts. This minor offers a foundation for extended expression in dramatic writing and creative writing genres in general.

#### **Master of Fine Arts**

The Master of Fine Arts with a major in theatre requires 48-64 units of course work at the 400 or 500 level. The areas of emphasis include acting, theatrical design, dramatic writing and directing. These programs provide a high level of practical experience. To ensure this, the number of students accepted in each area of emphasis is strictly limited. An interview is required for admission.

#### **Master of Arts, Applied Theatre Arts**

The Master of Arts in Applied Theatre Arts explores the intersection of theatre arts and cultural fieldwork, encompassing the fields of theatre and therapy, theatre in education and theatre for social change/community-based theatre. Practitioners of applied theatre arts supplement their work as classroom teachers, therapists, social workers, case managers, community organizers and social activists.

#### **Dance Program**

The school offers dance classes for all university students at the beginning, intermediate and advanced level, including ballet, jazz and modern. Additional offerings in tap and choreography are also available. A minor is also offered in dance.

#### **Auditions and Entrance to the Degree Programs**

Admission to the various degree programs is granted through the university's regular admission procedures in conjunction with the School of Theatre supplementary application procedure. See the Admission section of this catalogue, page 48 (undergraduate) and page 80 (graduate).

Admission to the B.A. program is determined by academic record, experience in theatre, and information required on the USC application for admission and the School of Theatre supplementary application. Students applying for the B.A. program must contact the School of Theatre directly to obtain the theatre supplementary application. However, no audition is required.

In addition to submitting a USC application for admission, a theatre supplementary application and an in-person audition are required for the BFA and MFA programs. Auditions are held during January and February. Applicants should contact the School of Theatre directly to obtain supplementary application materials and to arrange for their audition.

The acting audition requires two monologues: one contemporary and one classical (preferably verse).

Auditions and interviews for all programs are held in major cities around the country including Los Angeles, Chicago and New York.

Students wishing to transfer from a community college or another four-year college or university into the Bachelor of Fine Arts curriculum must present training equivalent to their level of transfer or be prepared to take remedial work in acting, voice, movement, dramatic literature and stagecraft.

Admission to the BFA and MFA Design/Technical Direction, Stage Management and Sound Design programs is based on a personal interview and/or review of a portfolio. In addition, the student must submit a USC application for admission and a theatre supplementary application.

Applicants for the design programs must present a portfolio of their work at the time of their interview with the design faculty.

Interviews are held beginning in January for the following fall semester.

Admission to full graduate standing will be granted after the satisfactory completion of one semester. A satisfactory test score on the Graduate Record Examinations and a satisfactory grade point average are also required.

Application materials and details about audition dates and locations may be obtained from the Office of Admissions and Recruitment, School of Theatre, University of Southern California, Los Angeles, CA 90089-0791, (213) 740-1286.

#### **International Study**

In conjunction with Sarah Lawrence College and the British American Drama Academy, USC students have the opportunity to study theatre in London. For additional information, see International Study Options, page 71.

## Degree Requirements

### Bachelor of Arts

The Bachelor of Arts with a major or minor in theatre is a comprehensive theatre degree offered in cooperation with the USC Dornsife College of Letters, Arts and Sciences. Candidates for the degree must complete the university general education requirements in addition to the courses in the major prescribed by the School of Theatre. A total of 128 units is required for completion of the degree.

#### General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing, foreign language and diversity requirements, which together comprise the USC Core. See pages 63 and 250 for more information.

#### School Majors

Students who choose the school major are required to complete a minimum of 52 units in theatre as specified:

REQUIRED COURSES		UNITS
THTR 101	Introduction to Acting	4
THTR 125	Text Studies for Production	4
THTR 130	Introduction to Theatrical Production	4
THTR 210	Theory and Practice of World Theatre I	4
THTR 211	Theory and Practice of World Theatre II	4
THTR 212	Theory and Practice of World Theatre III	4
THTR 305a	Directing	4
		28
One course (3 units) from:		
THTR 230	Communicating Theatrical Design Concepts	3
THTR 231a	Costume Construction	3

THTR 232	Stage Lighting	3
THTR 335	Scenic Construction	3

One course (4 units) from:

THTR 300	Introduction to Modern Drama	4
THTR 301	Greek and Roman Theatre	4
THTR 302	Shakespeare in His World	4
THTR 313	Comedy of Manners	4
THTR 314	Advanced Topics in Modern Drama	4
THTR 395	Drama as Human Relations	4
THTR 396	God, Drama and Entertainment	4
THTR 403	The Performing Arts	4
THTR 404	Acting Theory	4
THTR 405	Performing Identities	4
THTR 406	Theatre on the Edge	4
THTR 476	African American Theatre, Dance and Performance	4

Required upper division theatre electives: 17  
Total required theatre units: 52

### Bachelor of Fine Arts

The Bachelor of Fine Arts provides four years of intensive training at the undergraduate level in performance studies including acting, design, sound design, stage management and technical direction. A total of 128 units of course work is required for this degree, including a minimum range of 75-84 theatre units depending on the requirements of each program.

All BFA Theatre majors are required to earn a grade point average of 2.75 (A = 4.0) in their theatre courses each semester. BFA students who fail to earn a GPA of 2.75 in their theatre courses will be placed on probation the following semester. Students who remain on probation for a consecutive second semester will be disqualified from the BFA program.

A student disqualified from continued study in the BFA program for failing to meet the GPA standards outlined above will be given the option of transferring into the B.A. program.

#### General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See pages 63 and 250 for more information.

REQUIRED COURSES FOR THE ACTING EMPHASIS (84 UNITS)		UNITS
THTR 110	Dramatic Analysis	2
THTR 115	Movement I	2
THTR 120ab	Acting I	2-2
THTR 130	Introduction to Theatrical Production	2-2
THTR 140ab	Voice I	2-2
THTR 210	Theory and Practice of World Theatre I	4
THTR 211	Theory and Practice of World Theatre II	4

THTR 212	Theory and Practice of World Theatre III	4
THTR 215ab	Movement II	2-2
THTR 220ab	Intermediate Acting I	2-2
THTR 240ab	Voice II	2-2
THTR 315ab	Physical Theatre I	2-2
THTR 320ab	Intermediate Acting II	2-2
THTR 340ab	Intermediate Voice	2-2
THTR 397	Theatre Practicum	2-2-2
THTR 415ab	Physical Theatre II	2-2
THTR 420ab	Advanced Acting	2-2
THTR 440ab	Advanced Voice	2-2
THTR 471	Senior Showcase	2
THTR 480a	Performance for Camera	2
THTR 497	Advanced Theatre Practicum	2

One course from:

THTR 305a	Directing	4
THTR 365	Playwriting I	4

One course from:

THTR 300	Introduction to Modern Drama	4
THTR 301	Greek and Roman Theatre	4

THTR 302	Shakespeare in His World	4	<b>REQUIRED COURSES FOR THE SOUND</b>		THTR 336	Introduction to Sound Design	3

## Bachelor of Arts in Visual and Performing Arts Studies

The Bachelor of Arts in Visual and Performing Arts Studies is an interdisciplinary degree offered jointly by the School of Theatre, the School of Architecture, the School of Cinematic Arts, the Roski School of Fine Arts, the Thornton School of Music, and the Dornsife College of Letters, Arts and Sciences. Candidates for the degree must complete the university general education requirements in addition to the courses in the major. Students in this major complete a core of required courses that provides them with a broad understanding of the various disciplines. The work in the major is completed by choosing courses from a wide array of course offerings from all the participating schools. A total of 128 units is required for completion of the degree.

### General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing, foreign language and diversity requirements, which together comprise the USC Core. See page 63 and page 250 for more information.

### REQUIRED CORE COURSES (SURVEY OF THE ARTS) UNITS

AHIS 120	Foundations of Western Art	4
ARCH 304x	Intensive Survey: Prehistory to the Present	4
CTCS 393	History of the American Film, 1946-1975	4
FACS 150	Visual Culture and Literacy I	4
MUHL 315x	Music and Culture	4
THTR 125	Text Studies for Production	4
THTR 380	Historical Approaches to Dance	4
Total:		28

### CASE STUDIES IN THE ARTS:

12 units of upper division course work from the following:

#### Architecture:

ARCH 314	History of Architecture: Contemporary Issues	3
ARCH 432	People, Places and Culture: Architecture of the Public Realm	4
ARCH 434	City Cine: Visuality, Media and Urban Experience	3

ARCH 440	Literature and the Urban Experience	4
ARCH 444	Great Houses of Los Angeles	4
ARCH 454	Contemporary Asian Architecture	4
<i>Cinematic Arts:</i>		
CTAN 451	History of Animation	2
CTCS 392	History of the American Film, 1925-1950	4
CTCS 394	History of the American Film, 1977-present	4
CTCS 406	History of American Television	4
CTCS 407	African-American Cinema	4
CTCS 409	Censorship in Cinema	4
CTCS 411	Film, Television, and Cultural Studies	4
CTCS 412	Gender, Sexuality, and Media	4
CTCS 414	Latina/o Screen Cultures	4
ENGL 471	Literary Genres and Film	4
PHIL 446	Aesthetics and the Film	4
<i>Fine Arts:</i>		
AHIS 319	Mesoamerican Art and Culture	4
AHIS 321	Greek Art and Archaeology	4
AHIS 322	Roman Art and Archaeology	4
AHIS 330	Medieval Art	4
AHIS 343	Renaissance Art	4
AHIS 364	Myths, Arts, Realities: Visual Culture in California 1849 to the Present	4
AHIS 368	Modern Art I: 1700-1850	4
AHIS 369	Modern Art II: 1851-1940	4
AHIS 370	Modern Art III: 1940 to the Present	4
AHIS 373	History of Photography	4
AHIS 384	Early Chinese Art	4
AHIS 385	Later Chinese Art	4
FACS 350	Art Theory and Criticism	4
FAIN 330	Ideas in Intermedia	4
PAS 371	Art in the Public Realm: Contemporary Issues	4
PAS 400	New Models of Art in City-Space	4

#### Music:

MUHL 331	Music History III	3
MUHL 332	Studies in Musical Culture	3
MUHL 476	Music Criticism	2
MUJZ 419	The Jazz Experience: Myths and Culture	4
MUSC 400	The Broadway Musical: Reflection of American Diversity, Issues, and Experiences	4
MUSC 420	Hip-Hop Music and Culture	4
MUSC 444	American Roots Music: History and Culture	4
MUSC 460	Film Music: History and Function from 1930 to the Present	4
MUSC 465	Music, Television and American Culture	4

#### Theatre:

COLT 354	Revolutions in Theater	4
THTR 301	Greek and Roman Theatre	4
THTR 302	Shakespeare in His World	4
THTR 313	Comedy of Manners	4
THTR 314	Advanced Topics in Modern Drama	4
THTR 403	The Performing Arts	4
THTR 405	Performing Identities	4
THTR 406	Theatre on the Edge	4
THTR 476	African-American Theatre, Dance and Performance	4
THTR 481	From the Border to Broadway	4

#### Other Courses:

COLT 381	Psychoanalysis and the Arts	4
PHIL 445	Philosophy of the Arts	4

#### Overseas Study Opportunities:

FREN 432	French Theatre (Paris Semester)	4
SPAN 464	Introduction to Contemporary Spanish Theatre (Madrid Center)	4

## Minor Programs

### Minor in Applied Theatre Arts

Applied theatre arts is a field of study addressing the theory and practice of applying theatre arts in non-traditional settings with emphases that include education, therapy and social change. The minor in applied theatre arts addresses the theory and practice of applying theatre skills in these environments to promote engaged and enlivened interactive critical thinking and community development from a performative perspective. ATA minors learn how to turn passive spectators into more active participants through the process of theatre.

Courses taken for this minor may not duplicate requirements for a student's major or other minor program requirements:

#### FOUNDATION SKILLS COURSES (8 UNITS) UNITS

It is recommended these be taken first:

THTR 101	Introduction to Acting	4
THTR 305a	Directing	4

#### ATA FOCUS COURSES (12 UNITS) UNITS

It is recommended these be taken after foundation skills courses:

THTR 468	Theatre in Education	4
THTR 477	Theatre and Therapy	4
THTR 488	Theatre in the Community	4

### Minor in Theatre

This general minor in theatre invites students to explore the many facets of this exciting field. Students have the opportunity to take a variety of classes in acting, playwriting, literature, state management, directing, costume design and production. The curriculum is very flexible and encourages students to develop a primary interest for upper-division course work. All minor students are eligible to participate in performance and production projects.

#### REQUIRED COURSES UNITS

THTR 101	Introduction to Acting, or	
THTR 125	Text Studies for Production	4
THTR 130	Introduction to Theatrical Production	2

One of the following:

THTR 301	Greek and Roman Theatre	4
THTR 302	Shakespeare in His World	4
THTR 313	Comedy of Manners	4
THTR 314	Advanced Topics in Modern Drama	4
THTR 476	African American Theatre	4

Required upper-division THTR electives: 14

Required theatre units: 24

### Minor in Dance

The minor in dance is open to all undergraduates, including theatre majors, and is a 27-28 unit program. Students applying to this minor must have a minimum GPA of 2.0 (A = 4.0).

#### UPPER DIVISION REQUIRED COURSES (16 UNITS) UNITS

THTR 380	Historical Approaches to Dance	4
THTR 388	Senior Seminar in Dance	4
THTR 482	Choreography for Television	4
THTR 483	Dance Performance	4

#### ELECTIVES (11-12 UNITS) UNITS

THTR 280	Dance as an Art Form	4
THTR 282	Activities for Professional Preparation: Dance (concurrent enrollment in a 2-unit, 100-level technique course* required)	1
THTR 285	Elements of Dance Production	4
THTR 385	Choreography and Performance	4

#### \*TECHNIQUE COURSES UNITS

THTR 181a	Modern Dance	2
THTR 181b	Modern Dance	2
THTR 182a	Advanced Modern Dance	2
THTR 182b	Advanced Modern Dance	2
THTR 183a	Ballet	2
THTR 183b	Ballet	2
THTR 183c	Ballet	2
THTR 183d	Ballet	2
THTR 184a	Jazz Dance	2
THTR 184b	Jazz Dance	2
THTR 184c	Jazz Dance	2
THTR 188a	International Style Ballroom Dance (to include folk and square dance)	2
THTR 188b	International Style Ballroom Dance	2

### Minor in Musical Theatre

The minor in musical theatre, interdisciplinary in nature, is a 27-unit program incorporating the study of acting, dance or movement, vocal arts and related musical subjects. Admission to the minor requires an audition for music but not for theatre. See the Thornton School of Music, page 817, for requirements.

### Minor in Performing Arts Studies

The minor in performing arts provides an interdisciplinary inquiry into the nature and aesthetics of the performing arts. It combines the disciplines of cinematic arts, dance, music and theatre. The minor is a unique course of study that looks at how the performing arts contribute to a culturally literate society. The minor in performing arts studies is a 20-unit program.

#### REQUIRED COURSES UNITS

Required capstone course:		
THTR 403	The Performing Arts	4

Plus a minimum of four courses (16 units) from the following list. Three courses (12 units) must be upper division. One course (4 units) must be selected from each school.

CTCS 190	Introduction to Cinema	4
CTCS 200	History of the International Cinema I	4
CTCS 201	History of the International Cinema II	4
CTCS 392	History of the American Film, 1925-1950	4
CTCS 393	History of the American Film, 1946-1975	4
CTCS 404	Television Criticism and Theory	4
CTCS 464	Film and/or Television Genres	4
CTCS 469	Film and/or Television Style Analysis	4
MUHL 302	Musical Cultures of the World	4
MUJZ 100x	Jazz: A History of America's Music	4
MUSC 400	The Broadway Musical: Reflection of American Diversity, Issues, and Experiences	4
THTR 201	Introduction to the Theatre	4
THTR 280	Dance as an Art Form	4
THTR 300	Introduction to Modern Drama	4
THTR 301	Greek and Roman Theatre	4
THTR 302	Shakespeare in His World	4
THTR 380	Historical Approaches to Dance	4
THTR 385	Choreography and Performance	4
THTR 404	Acting Theory	4
THTR 493ab	Periods and Styles	2-2

Total units required: 20

Note for cinematic arts, music and theatre majors: cinema majors take 8 units of music and 8 units of theatre; music majors take 8 units of cinema and 8 units of theatre; theatre majors take 8 units of cinema and 8 units of music.

**Minor in Playwriting**

The minor in playwriting presents undergraduate students who are not theatre majors with a concentration in the discipline of playwriting as a means for broadening and deepening expression using the literary and performing arts. This minor offers a foundation for extended expression in dramatic

writing and creative writing genres in general; fostering skills in research, development, communication, collaboration and craftsmanship in the process of preparing a play for its realization on stage. The minor in playwriting is a 20-unit program.

REQUIRED COURSES		UNITS
THTR 101	Introduction to Acting, or	
THTR 125	Text Studies for	
	Production	4
THTR 305a	Directing	4
THTR 365	Playwriting I	4
THTR 366	Playwriting II	4
THTR 479	Solo Performance	4

**Master of Fine Arts**

The Master of Fine Arts in theatre allows the choice of an area of emphasis in theatre performance studies including acting, directing, dramatic writing or theatrical design.

Seventy-two units of study at the 400- or 500-level are required for the acting emphasis, 72 units for the dramatic writing emphasis and 48 units for the directing and theatrical design emphases. Regardless of the emphasis, at least two-thirds of the units must be at the 500 level or higher. In design, instead of a conventional thesis, the MFA student completes a final project in the area of design and defends it orally before the design faculty. A grade point average of 3.0 must be achieved in all graduate work taken in the School of Theatre. Graduate candidates whose undergraduate degrees are in disciplines other than theatre may be required to satisfy undergraduate prerequisites in theatre as determined by School of Theatre faculty.

**Curricula for the Master of Fine Arts Degree**

ACTING EMPHASIS		UNITS
THTR 480ab	Performance for the Camera	2-2
THTR 504	The Art of Collaboration and Ensemble	2
THTR 512	Studies in Dramatic Analysis	2
THTR 515abcde	Advanced Movement	10
THTR 520abcde	Advanced Acting	16
THTR 529ab	Textual Studies for Performance	8
THTR 540abcdef	Advanced Voice Diction	12
THTR 541	Diction and Dialects	2
THTR 554	Visual and Spatial Relationship	2
THTR 571	Professional Seminar	2
THTR 575	Creative Production Projects	4
THTR 597	Theatre Practicum	8
		<u>72</u>

DIRECTING EMPHASIS		UNITS
THTR 520ab	Advanced Acting	8
THTR 525	Seminar in Contemporary Theatre	4
THTR 528	Seminar in Dramatic Analysis	4

THTR 555	Directing Fundamentals	2
THTR 556ab	Directing	4
THTR 558ab	Design for Directors	4
THTR 567a	Studies in Playwriting	4
THTR 591	Seminar in Producing Theatre	4
THTR 593	MFA Project	4
Electives by advisement		10
		<u>48</u>

**THEATRICAL DESIGN EMPHASIS**

THEATRICAL DESIGN EMPHASIS		UNITS
Two courses from:		
THTR 550a	Seminar in Scene Design	3
THTR 552a	Seminar in Costume Design	3
THTR 553a	Seminar in Lighting Design	3
Two continuing courses from:		
THTR 550b	Seminar in Scene Design	3
THTR 552b	Seminar in Costume Design	3
THTR 553b	Seminar in Lighting Design	3
One remaining course from:		
THTR 550a	Seminar in Scene Design	3
THTR 552a	Seminar in Costume Design	3
THTR 553a	Seminar in Lighting Design	3

All of the following:

THTR 407ab	Drawing and Rendering for the Theatre	2-2
THTR 435	Advanced Theatrical Drafting	3
THTR 493ab	Periods and Styles	2-2
THTR 593	MFA Project	4
Two seminars, one of which must be		
THTR 528	Seminar in Dramatic Analysis (4)	8

400- or 500-level electives by advisement,		10
5 units of which must be at the 500 level		<u>48</u>

DRAMATIC WRITING EMPHASIS		UNITS
CTWR 513	Writing the Short Script	2
CTWR 514ab	Basic Dramatic Screenwriting	2-2
THTR 486	Creating Characters	4
THTR 501	Poetry and Prose into Drama	4
THTR 504	The Art of Collaboration and Ensemble	2
THTR 510	Writing the Short Drama	2
THTR 512	Studies in Dramatic Analysis	2
THTR 525	Seminar in Contemporary Theatre	4
THTR 529a	Textual Studies for Performance	4
THTR 554	Visual and Spatial Relationship	2
THTR 567ab	Studies in Playwriting	4-4
THTR 572	Global Dramatic Writing	4
THTR 574	Dramatic Writing Across Media for the Playwright	4
THTR 575	Creative Production Projects	4
THTR 593	MFA Project	4
THTR 595ab	Graduate Playwrights' Workshop	4-4
Electives		10
		<u>72</u>

A minimum of 72 units of graduate course work must be completed prior to the degree being granted. Thesis Requirement: The student is required to complete a thesis portfolio consisting of four theatre projects: (1) a full-length original play, (2) a full-length original play or an adaptation, (3) a full length screenplay, (4) a project that is either a play of any length, or a short subject or feature length script, a set of television speculative scripts (either in three half-hour short form of drama from the same TV program or a set of characters; or one-hour long form) or an interdisciplinary/multimedia project (approved in advance by the dramatic writing faculty.) An oral defense and review by program faculty and the developing portfolio is required when the student has completed two-thirds of the program, generally in the fall term of the student's third year.

## Master of Arts, Applied Theatre Arts

The Master of Arts in Applied Theatre Arts explores the intersection of theatre and cultural fieldwork, encompassing the fields of theatre and therapy, theatre in education and theatre for social change/community-based theatre. This combined area of study weaves all three disciplines together under the aegis of training practitioners in the *art* of popular theatre with primarily marginalized communities. Practitioners of applied theatre arts supplement their work as classroom teachers, therapists, social workers, case managers, community organizers and social activists to engage public groups to obtain their goals and desires by using the tools of theatre to expedite dialogue and foster an atmosphere of greater critical consciousness and increased agency. A written and oral examination is required upon completion of course work.

### International Study

All students will participate in an international externship during the summer following their academic year. This externship takes place in an approved overseas site where the practice of applied theatre arts is well established, with whom the university has a contractual agreement for supervised observation. This externship intends to provide a supervisory, logistical and theoretical container for students to explore cultural fieldwork in the international arena.

### Curricula for the Master of Arts Degree

APPLIED THEATRE ARTS		UNITS
THTR 505	Staging Community-based Theatre	3
THTR 521	Engaging Community Narratives	3
THTR 544	Embodied Poetics	2
THTR 568	Popular Theatre for Education and Development	3

THTR 577	Theatre and Therapy for Cultural Fieldwork	3
THTR 578	Theatre of the Oppressed Theory, Games, and Techniques	4
THTR 579	Writing Culture	3
THTR 586ab	Applied Theatre Arts: Los Angeles Residency	2-2
THTR 587	Liberation Arts and Community Engagement — Theory	4
THTR 588	Liberation Arts and Community Engagement — Praxis	3
THTR 592ab	Participatory Action Research for Community-based Theatre	2-2
THTR 598	Applied Theatre Arts: International Externship	2
		<hr/> 38

## Courses of Instruction

### THEATRE (THTR)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

#### THTR 101 Introduction to Acting (4, FaSp)

Study of genres, terminology, and disciplines of acting; fundamental techniques necessary for performance; scene study from contemporary plays.

#### THTR 110 Dramatic Analysis (2, Fa)

Actors work on the text: analysis in rehearsal of scripts drawn from contemporary realism for dramatic characterization. *Corequisite:* THTR 115, THTR 120a, THTR 140a.

#### THTR 115 Movement I (2, Fa)

Basic training for the actor's body for expression and communication. Awareness and control through mind-body techniques. *Corequisite:* THTR 110, THTR 120a, THTR 140a.

#### THTR 120ab Acting I (2-2, Sp)

Basic principles and techniques of acting through theatre games and improvisation. Introduction to contemporary texts, basic characterization and cold reading techniques. Open to BFA majors only. *Corequisite:* a: THTR 110, THTR 115, THTR 140a; b: THTR 140b.

#### THTR 121abx Fundamentals of Acting (2-2, FaSp)

a: The elements of the actor's imaginative skills. b: Continuation of THTR 121a. Not available for credit to theatre majors.

#### THTR 122 Improvisation and Theatre Games (2, max 4, FaSp)

Individual and group exercise to free the actor physically and emotionally and to stimulate creativity, imagination, and self-expression.

#### THTR 124abx Character Acting (2-2, FaSp)

a: Concentration of imaginative processes which develop the individual characteristics of a dramatic role. b: Continuation of THTR 124a. Not available for credit to theatre majors.

#### THTR 125 Text Studies for Production (4, Fa)

Focuses on the questions, artistic choices, methodologies, and approaches of an actor/director/designer in the preparation of a production score prior to rehearsal.

#### THTR 130 Introduction to Theatrical Production (2, max 4, FaSp)

Introduction to the non-performance areas of theatrical production (administrative, design, and technical fields) through hands-on participation in USC productions.

#### THTR 132ab Art of Theatrical Design (2-2, FaSp)

a: A guided student exploration of the fundamentals of applied design elements and their use as creative tools in the design process; b: Development of the artistic process and theatrical design vocabulary of the individual within the environment of collaborative storytelling.

#### THTR 140ab Voice I (2-2, Fa)

Physiological mechanism of voice: breath control, phonation, resonance, articulation of language for the stage; expressive use of stress, intonation and rhythm. *Corequisite:* a: THTR 110, THTR 115, THTR 120a; b: THTR 120b.

#### THTR 152 Introduction to Scene Study (2, FaSp)

Application and consolidation of the skills, knowledge and techniques acquired in the study of fundamentals of acting encountered in THTR 101. *Prerequisite:* THTR 101.

#### THTR 181ab Modern Dance (2-2, FaSpSm)

a: Techniques of modern dance; elements of dance composition. b: Advanced techniques of modern dance; elements of choreography and production.

**THTR 182ab Advanced Modern Dance (2-2, FaSpSm)** *a:* A continuing study of modern dance skills toward an advanced level of competency. *b:* Advanced technique and composition.

**THTR 183abcd Ballet (2-2-2-2, FaSpSm)** *a:* Beginning techniques of classical ballet consisting of basic barre and center work; basic body and arm positions, port de bras, allegro and elementary adagio. *b:* Intermediate techniques of classical ballet with intermediate barre, adagio, allegro combinations and pirouettes; development of a working knowledge of ballet terminology. *c:* Advanced techniques of classical ballet; emphasis on clarity and precision with execution of movement. Study of beats, tours, advanced adagio and allegro, grand combinations, pointe-work. *d:* Elementary to intermediate level ballet technique en pointes for women and men; conditioning and barre exercises; variations from classical and modern ballets.

**THTR 184abc Jazz Dance (2-2-2, FaSpSm)** *a:* Beginning techniques and practice of jazz dance. *b:* Continuing study in the techniques of jazz dance. *c:* Advanced techniques of jazz dance: advanced warm up, rhythmic and isolation exercises, turns and advanced jazz sequences or combinations.

**THTR 185 Hip-Hop Dance (2, max 4, FaSpSm)** Elements of Hip-Hop dance, including technique, movement, musical rhythm, tempo and phrasing required to develop the skills needed to perform this unique dance form.

**THTR 188ab International Style Ballroom Dance (2-2, FaSpSm)** Representative ballroom dances: waltz, slow foxtrot, tango, and quickstep. *a:* Beginning. *b:* Intermediate. Graded CR/NC.

**THTR 189ab Tap Dance (2-2, FaSpSm)** *a:* Basic tap rhythms developed into elementary dances with progression of time steps and other combinations of sound. *b:* Continuing study of tap dancing including more complicated rhythmic patterns and combinations; polishing technique; combinations to varied music and introduction to advanced steps and combinations. *Prerequisite:* THTR 189a or departmental approval.

**THTR 195 Theatre on Film (4, FaSp)** Introduction to the theatre and its relationship to society through major plays in film versions. Separate screenings to be arranged.

**THTR 201 Introduction to the Theatre (4, Sp)** Gateway to the majors and minors in theatre. Introduction to and exploration of the creative elements of theatre art: playwriting, acting, directing, and design of scenery, lighting, and costume. Research on a selected area. (Duplicates credit in former THTR 100.)

**THTR 210 Theory and Practice of World Theatre I (4, Fa)** A multicultural and transnational examination of the history, theory and practice of theatre from its origins to the age of Shakespeare and Zeami. *Recommended preparation:* THTR 125.

**THTR 211 Theory and Practice of World Theatre II (4, Sp)** A multicultural and transnational examination of the history, theory and practice of theatre from the Renaissance to the 19th Century. (Duplicates credit in former THTR 311.) *Recommended preparation:* THTR 125.

**THTR 212 Theory and Practice of World Theatre III (4, Sp)** A multicultural and transnational examination of the history, theory and practice of theatre from the late 19th century to the present date. *Recommended preparation:* THTR 125.

**THTR 215ab Movement II (a: 2, Fa; b: 2, Sp)** *a:* Training of the actor's body with focus on development of precision and strength. *Prerequisite:* THTR 115; *corequisite:* THTR 220a, THTR 240a. *b:* Training of the actor's body with focus on mask work for the development of precision, strength and expressiveness. *Prerequisite:* THTR 215a; *corequisite:* THTR 220b, THTR 240b.

**THTR 216 Movement for Actors (2, FaSp)** Training and practice in the coordination of the physical apparatus of the actor utilizing various movement techniques through improvisation.

**THTR 220ab Intermediate Acting I (2-2, FaSp)** Continuing development of imagination leading to an increased range of dramatic expression through the formalized text of William Shakespeare. *Prerequisite:* THTR 120b.

**THTR 222 Stage Make-up (2, FaSp)** Principles of stage make-up materials and skills allowing the actors to enhance their features and techniques for moderate and extreme aging, injuries, and character roles.

**THTR 230 Communicating Theatrical Design Concepts (3, FaSp)** The visualization and communication of design ideas through free-hand and mechanical drawing, including orthographics, isometrics, perspective, shades and shadows, plans, sections and elevations.

**THTR 231ab Costume Construction (3-3, FaSp)** Historical survey, theory and practice in construction of costume, emphasis on period and style. *Recommended preparation:* THTR 125, THTR 201.

**THTR 232 Stage Lighting (3, FaSp)** Theory and practice of theatrical lighting design including electricity, radiant energy, refraction, reflection, absorption, chromatic variation, and electronic controls. *Prerequisite:* THTR 131.

**THTR 236 Stage Sound (2, FaSp)** Basic audio engineering science, how sound is measured, basic transducers and signal flow. Operation of recording and playback equipment used in theatrical sound design/mixing.

**THTR 240ab Voice II (2-2, FaSp)** Development of the voice using material which explores the techniques of Shakespeare and his contemporaries. *Prerequisite:* THTR 140b; *corequisite:* a: THTR 215a, THTR 220a; b: THTR 215b, THTR 220b.

**THTR 241 Methods and Materials (2, FaSp)** Cutting-edge and traditional methods and materials that enhance both the planning stages and realization of the theatrical design.

**THTR 252ab Intermediate Acting I (2-2, FaSp)** *a:* Polishing the actor's skills through analysis and class performance of scenes from plays. *b:* Continuation of THTR 252a.

**THTR 280 Dance as an Art Form (4, FaSpSm)** Gateway to the minor in dance. Concepts of art exemplified in dance; origins and evolution of classic and contemporary dance forms; elements of art criticism applied to dance productions. Required attendance at dance concerts and art exhibits.

**THTR 282 Activities for Professional Preparation: Dance (1)** Fundamental movements and composition in modern and aerobic dance; study of popular social dance forms; teaching and evaluation methodologies; course and class planning.

**THTR 285 Elements of Dance Production (4)** Theoretical aspects of creativity, choreography, accompaniment, dance notation, and production; application in individual and group composition. Lecture, 2 hours; performance laboratory, 6 hours.

**THTR 295 Theatre in America (2, max 8, FaSp)** Current state of American theatre, through a study of acting, playwriting, criticism, stage design, lighting, and dramatic styles.

**THTR 300 Introduction to Modern Drama (4, Fa)** An investigation of the ideas, forms, genres, and thematic concerns of modern drama. Equal emphasis is placed on the plays and their historical contexts. (Duplicates credit in former THTR 200.)

**THTR 301 Greek and Roman Theatre (4, Fa)** Examines the function of theatre, production and acting conventions, and the drama of classical Greece and Rome. (Duplicates credit in former THTR 213.) *Recommended preparation:* THTR 125, THTR 201.

**THTR 302 Shakespeare in His World (4, Sp)** The plays and theatre of Shakespeare, the influences on his work and his contemporary world. (Duplicates credit in former THTR 214.) *Recommended preparation:* THTR 201, THTR 210, THTR 211.

**THTR 305ab Directing (4-4, FaSp)** Examination of basic directorial principles. Pre-production analysis and rehearsal procedures; relationship of the director to actor; integration of technical aspects of production. *Prerequisite:* THTR 305a before b.

**THTR 313 Comedy of Manners (4, Fa)** Study of the development of Comedy of Manners, with primary focus on Restoration Comedy of Manners. *Recommended preparation:* THTR 201, THTR 210, THTR 211.

**THTR 314 Advanced Topics in Modern Drama (4, Sp)** 20th century realism and the avant-garde. *Recommended preparation:* THTR 201, THTR 210, THTR 211.

**THTR 315ab Physical Theatre I (2-2, FaSp)** Actor training anchored by rigorous physical movements. Activities include comedy, clowning, juggling, and mask work. Open to BFA Acting majors only.

**THTR 316 Advanced Movement for Actors (2, FaSp)** Advanced physical training for the B.A. actor utilizing various movement techniques through improvisation. For B.A., Theatre (Acting) students only. *Prerequisite:* THTR 216.

**THTR 320ab Intermediate Acting II (2-2, FaSp)** Further development of range and breadth of performance skills with emphasis on texts of heightened language and style. Open to BFA acting majors only. *Prerequisite:* THTR 220b; *corequisite:* a: THTR 315a, THTR 340a; b: THTR 315b, THTR 340b.

**THTR 330 Scene Design I (4, Fa)** Historical styles, methods, and dramatic analysis for scene design as applied in contemporary practice. *Recommended preparation:* THTR 130ab.

**THTR 331 Costume Design I (4, Sp)** Historical styles, methods, and dramatic analysis in costume design as applied in contemporary practice. Execution of costume designs for assigned works. *Recommended preparation:* THTR 231.

**THTR 332 Lighting Design I (4, FaSp)** Historical styles, methods, and dramatic analysis in lighting design as applied in contemporary practice.

**THTR 333 Stage Management I (3, Fa)** Basic skills, including assembly of prompt book, blocking notation, and organizational and communication procedures applied in theatre production.

**THTR 335 Scenic Construction (3, FaSp)** Technology, organization, and operation of the theatrical scene shop centered around the proper and safe use of tools, the choosing of materials, and methods of construction. (Duplicates credit in former THTR 131.)

**THTR 336 Introduction to Sound Design (3, FaSp)** The art and techniques of theatrical sound design. The use of music and ambient sound in theatrical presentations. Design elements as metaphor.

**THTR 340ab Intermediate Voice (2-2, FaSp)** Extended development of vocal freedom and range, acquisition of articulate speech. Enhancement of vocal power and resonance, techniques for performing with a dialect. Open to BFA Acting majors only. *Concurrent enrollment:* THTR 315ab, THTR 320ab.

**THTR 341x Voice for the Non-Theatre Major (2, Fa)** Designed for the non-theatre major focusing on the range, color, texture, and projection of the human voice in a variety of situations. Not available for credit to theatre majors.

**THTR 342ab Basic Voice (2-2, FaSp)** a: Examination of the individual voice centering on resonance, tone, flexibility, and support through dramatic selections for transmitting meaning and emotion of character. b: Continuation of THTR 342a.

**THTR 343 Musical Theatre Audition (3, FaSpSm)** Designed to give students confidence and integrity for auditions in musical theatre. Choosing appropriate material and preparation for the audition and performance. Audition required.

**THTR 352ab Intermediate Acting II (2-2, FaSp)** a: Building and sustaining character in drama. b: Continuation of world drama. Class performance and critique. *Prerequisite:* THTR 252b.

**THTR 354 Acting Shakespeare (2, FaSp)** Basic approach to the acting and analysis of the highly formalized texts of William Shakespeare. *Prerequisite:* THTR 101; *recommended preparation:* THTR 252b.

**THTR 365 Playwriting I (4, FaSp)** Essential elements of playwriting through weekly assignments, students' initiative, occasional productions of scenes, and extensive classroom analysis.

**THTR 366 Playwriting II (4, FaSp)** Continuation of the work begun in THTR 365. *Prerequisite:* THTR 365.

**THTR 380 Historical Approaches to Dance (4)** Roles of dance in pre-technological societies; development of classic and romantic ballet from medieval, baroque, and renaissance periods to contemporary forms.

**THTR 385 Choreography and Performance (4)** Aesthetic concepts in dance and related arts; integration of concepts in choreography, performance, and production; philosophical bases of dance criticism; critical analysis of performances. Lecture, 3 hours; performance laboratory, 3 hours.

**THTR 388 Senior Seminar in Dance (4)** Synthesis of principles, philosophy, and history of dance, culminating in senior individual project.

**THTR 390 Special Problems (1-4, FaSp)** Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

**THTR 395m Drama as Human Relations (4)** A focus on American ethnic and multicultural diversity from the perspectives of gender, race, and myth as revealed in plays, film, and other performance media.

**THTR 396 God, Drama and Entertainment (4, FaSp)** An exploration of money, power, sex and love in relation to secular and spiritual values represented by contemporary theatre media.

**THTR 397 Theatre Practicum (1-4, max 12, FaSpSm)** Substantive participation in productions sponsored by the school and supervised by the faculty.

**THTR 403 The Performing Arts (4, FaSp)**

An interdisciplinary inquiry into the aesthetics of the performing arts. Examines a dramatic classic and its adaptation into musical theatre, opera, ballet, and film. (Duplicates credit in the former THTR 303.)

**THTR 404 Acting Theory (4, FaSp)** Examination of the theoretical foundations of acting as an art form through the reading of primary historical texts.

**THTR 405m Performing Identities (4, FaSp)** This course explores the live performance medium as a creative means of social redress and personal expression. (Duplicates credit in the former THTR 393m.)

**THTR 406 Theatre on the Edge (4, FaSp)** An exploration of the art of theatre at the edge of possibilities.

**THTR 407ab Drawing and Rendering for the Theatre (2-2, FaSp)** Drawing and rendering techniques appropriate for theatre designers. *a:* Drawing and drawing theory. *b:* Drawing and rendering. (Duplicates credit in former FA 407ab.)

**THTR 408ab Dialects (2-2, FaSpSm)** *a:* The study of standard American stage dialect using the international phonetic alphabet. *b:* The study of accents and regional dialects. *Prerequisite for b:* THTR 408a.

**THTR 415ab Physical Theatre II (2-2, FaSp)** Advanced Physical Acting focusing on principles of verbal/non-verbal improvisation and communication. Elements of textual analysis, including development of character mask and of the ensemble. Open to BFA Acting majors only. *Prerequisite:* THTR 315b.

**THTR 417 Stage Combat (2, FaSp)** Introduction to safe and effective portrayals of violence for the stage. Training and practice of unarmed stage combat skills. *Recommended preparation:* THTR 216.

**THTR 420ab Advanced Acting (2-2, FaSp)** Contemporary material from plays and screenplays with an emphasis on individual challenges and problems. Open to BFA acting majors only. *Prerequisite:* THTR 320b; *corequisite:* *a:* THTR 415a, THTR 440a; *b:* THTR 415b, THTR 440b.

**THTR 421 Effective Oral Presentation (2, FaSp)** Developing and practicing performance skills necessary to give an effective oral presentation.

**THTR 430 Stage Management II (3, Sp)** Application of stage management procedures required in the professional theatre. *Prerequisite:* THTR 333.

**THTR 431 Seminar in Theatre Design (2, FaSp)** Research into the application of contemporary topics relevant to theatrical design within the diverse cultural environment of the greater Los Angeles area.

**THTR 432ab Scene Design II (3-3, FaSp)** Continuation of THTR 330. Evolution of scene design through analysis of script, environmental factors, and styles. *Prerequisite:* THTR 330.

**THTR 433ab Costume Design II (3-3, FaSp)** Evolution of costume design through analysis of script, environmental factors, and styles. *Prerequisite:* THTR 331.

**THTR 434ab Lighting Design II (3-3, FaSp)** Continuation of THTR 332. Evolution of lighting design through analysis of script, environmental factors, and styles. *Prerequisite:* THTR 332.

**THTR 435 Advanced Theatrical Drafting (3)** Drafting style and complex graphic communication. Emphasis on creating professional plates, developing an individual style and graphic problem solving.

**THTR 436 Sound for Theatre (3, Fa)** Introduction to electronic sound and sound reinforcement, including basic equipment, recording, editing, and show operation.

**THTR 437 Scene Painting (3, Sp)** Techniques, materials, and equipment of the scenic artist, including both historic and modern methods. *Recommended preparation:* paint and drawing experience.

**THTR 438 Technical Theatre (3, Sp)** Theory and practice of technical theatre. Emphasis is on technical problem solving and graphic solutions to technical theatre. *Prerequisite:* THTR 230.

**THTR 439 Stage Properties (3, Sp)** Organization, management, and construction of properties for the theatre.

**THTR 440ab Advanced Voice (2-2, FaSp)** Continuation of exercises related to the individual student for the stage. Open to BFA students only. *Prerequisite:* THTR 340ab.

**THTR 441 Advanced Sound Design (3, Sp)** Advanced exploration of theatrical sound design theory and related technology; creative uses of music, sound effects, and audio equipment in modern theatres. *Prerequisite:* THTR 436.

**THTR 442 Voice-over Acting (2, FaSp)** Acting techniques, recording studio technology and editing for the field of voice acting and voice-overs. *Prerequisite:* THTR 342a or THTR 408a.

**THTR 444 Applied Voice: Speech and Text (3, Fa)** Intensive study of speech and voice regarding text, context, environment, dynamics, range, and accent. *Recommended preparation:* THTR 342ab.

**THTR 452ab Advanced Acting (4-4, FaSp)** Intensive investigation and performance of audition techniques. Scene study skills developed, including cold readings, first readings, rehearsal procedure, performance process, camera/taping. *Prerequisite:* THTR 352b.

**THTR 458 Visiting Artist Workshop (2, max 4, FaSp)** A workshop course taught by the visiting artist holding the George Burns chair. Course topics will be determined by the instructor.

**THTR 459 Songwriting for the Musical Theatre (2, FaSp)** Structure, character and intention in songwriting for the musical theatre. Writing for the voice and examination of how form follows content. Portfolio submission required.

**THTR 465 Playwriting III (4)** Analysis of a full-length play or its equivalent with continued production opportunity. *Prerequisite:* THTR 366.

**THTR 466 Playwriting IV (4)** Continuation of the work begun in THTR 465. *Prerequisite:* THTR 465.

**THTR 468 Theatre in Education (4, Sp)** Exploration of the theory and practice of theatre arts in the learning environment. Design and implement projects to support elementary and secondary education. *Recommended preparation:* THTR 201, EDUC 200.

**THTR 471 Senior Showcase (2)** Designed to provide the graduating students with an opportunity to select, prepare and perform for agents, directors and producers in film, television and theatre. Audition required. Open to Theatre majors only.

**THTR 472 Professional Preparation for Actors (2, FaSp)** Introduction to the skills, knowledge, and promotional materials that will enable the student to manage an independent career in the performing arts. Open only to theatre majors at the senior level. *Recommended preparation:* THTR 101, THTR 252ab.

**THTR 475 Acting on Camera: The Collaborative Process (4, max 8)** Acting students will learn to develop on-camera acting skills and to collaborate with student directors and cinematographers from the School of Cinematic Arts. *Recommended preparation:* 300-level acting course.

**THTR 476m African American Theatre, Dance, and Performance (4)** A survey of African American theatre and cultural performance traditions as a reflection of both African American culture and American history.

**THTR 477 Theatre and Therapy (4, Fa)** Explores theatre as a healing art form. Techniques include games, improv, playback theatre, Boal's and Moreno's drama therapy, and Jungian dream theatre to name a few. Work with incarcerated youth, gay/lesbian/bi teens, elderly, disabled and other populations.

**THTR 478ab Theatre for Youth (2-2)**  
*a:* Theory and practice of youth theatre, including development and rehearsal of mainstage productions. Emphasis on multi-cultural and bilingual pieces. Enroll by audition or interview only. *b:* Continuation of *a*, bringing developed pieces into production for regional K-12.

**THTR 479 Solo Performance (4, Fa)** A writing-performance workshop in which students write, develop, and rehearse original, autobiographical and character monologues and perform them at the end of the semester.

**THTR 480ab Performance for Camera (2-2, FaSpSm)** *a:* Structured to address the dynamics of acting in relation to film/television. Refining the students' understanding of the similarities/differences between acting on stage/film. (Duplicates credit in former THTR 480.) *b:* Continued exploration of acting for film/television. Furthering the student's understanding of the similarities/differences between acting on stage/film.

**THTR 481 From The Border to Broadway (4, Fa)** An investigation of the role that Latina/o plays and performances have played in creating and documenting a contemporary American experience of the theatre.

**THTR 482 Choreography for Television (4)** Creative choreography of theatrical dance for television. Emphasis on rhythmic analysis, versatility, composition, notation techniques, and stylizing.

**THTR 483 Dance Performance (2, max 8, Sm)** Preparation, rehearsal, and performance of experimental choreography in main stage repertory.

**THTR 484 Acting in Television Commercials (2, FaSm)** An on-camera, workshop-style introduction to techniques, perspectives and theories unique to performing in television commercials. *Recommended preparation:* a 300-level acting or voice class.

**THTR 485 Advanced Solo Performance (4, Sp)** An advanced writing and performance workshop. Students will write and rehearse an extended personal monologue to be presented at the end of the semester. *Prerequisite:* THTR 479.

**THTR 486 Creating Characters (4)** A writing workshop devoted to the creation of living, breathing characters, exploring a range of techniques designed to develop authenticity.

**THTR 487 Promotion for the Performing Arts (4, Fa)** Introduction and overview of all aspects of marketing the arts including both non-profit and commercial organizations.

**THTR 488m Theatre in the Community (4, Fa)** Research and actively develop the theory of theatre as a moving political, social, economic and spiritual force of change within the local community.

**THTR 489 Theatre Internship (2-6, max 12, FaSpSm)** Practical experience in the entertainment industry.

**THTR 490x Directed Research (2-8, max 8, FaSpSm)** Individual research and readings. Not available for graduate credit.

**THTR 491 Theatre Organization and Administration (4, Fa)** Budgets, contracts, box-office procedures, public relations; personnel and executive policies of the school, community, and professional theatre.

**THTR 492 Producing Theatre (4, Sp)** Analysis of all procedures involved in producing theatre (commercial or non-profit) including legal and business guidelines and contracts. *Prerequisite:* THTR 491.

**THTR 493ab Periods and Styles (2-2, FaSp)** A survey of the influence of historical and cultural events on the evaluation of theatrical styles. *a:* Classical to Jacobean. *b:* Restoration to 20th century.

**THTR 494 Raising Money for the Arts (4, Sp)** Overview of fundraising techniques for non-profit theatre including grantsmanship, board development, direct mail soliciting, and money raising activities and events.

**THTR 495 Experimental Theatre Workshop I (4, max 8, FaSp)** Guidance and direction in the production of new and experimental plays for a public audience.

**THTR 496 Experimental Theatre Workshop II (4, max 8, FaSp)** Continuation of THTR 495*ab*. Enrollment by audition only.

**THTR 497 Advanced Theatre Practicum (2, max 4, FaSp)** Intensive participation in a production sponsored by the school and supervised by the faculty, to increase and develop artistic growth. *Prerequisite:* THTR 397.

**THTR 498 Production Analysis and Performance (4)** Investigation and analysis of the work of a major dramatist and his milieu; production of one of his plays.

**THTR 499 Special Topics (2-4, max 8, FaSp)** Studies in selected areas of theatre art. Intensive practice in role and script interpretation and its psychological relationship to the audience.

**THTR 501 Poetry and Prose into Drama (4, Sp)** Plays for the stage shall be written using public-domain poetry and prose as inspiration and source material, complemented with exploring poetry, prose, and varied dramas as context for the student writer. Students should be well-versed in literature, and have written in one or more genres. *Recommended preparation:* reading poetry and novels.

**THTR 504 The Art of Collaboration and Ensemble (2, FaSp)** An investigation of the role that collaboration plays in making ensemble work. MFA Actors will collaborate with MFA Dramatic Writers in creating an ensemble company.

**THTR 505 Staging Community-based Theatre (3, Sp)** Explores the theory and practice of staging community-based popular theatre, including Theatre of the Oppressed, street theatre, witness theatre, agit-prop and festival theatre events.

**THTR 510 Writing the Short Drama (2, FaSp)** The art and craft of dramatic writing. In particular exploring its dimensions with regard to character and story development in the ten minute play.

**THTR 512 Studies in Dramatic Analysis (2, FaSp)** A skill-based workshop that uses a historical survey of theatre texts to develop critical reading skills along two different tracks: Acting and Dramatic Writing.

**THTR 513 Seminar in History of the Theatre (4)** Bibliography, historical evolution, patterns, and techniques of the theatre from primitive to modern times.

**THTR 515abcdef Advanced Movement (2-2-2-2-2-2, FaSp)** Advanced exercises in movement for the use of the body in relation to the stage. *Corequisite for e:* THTR 480, THTR 540*e*, THTR 555, THTR 575; *corequisite for f:* THTR 520*e*, THTR 540*f*, THTR 597.

**THTR 520abcde Advanced Acting (4-4-2-4-2, FaSp)** Advanced training in acting skills; emphasis upon individual needs. *Corequisite for e:* THTR 515f, THTR 540f, THTR 571, THTR 597.

**THTR 521 Engaging Community Narratives (3, Fa)** Provides training for actor/artists who partner with non-actors in community-based theatre projects.

**THTR 525 Seminar in Contemporary Theatre (4, SpSm)** Analysis of trends, problems, and the work of major figures in the contemporary theatre.

**THTR 526 Seminar in Dramatic Literature (4)** Study and analysis of world drama best representing changes in philosophies, aesthetics, and tastes of audiences.

**THTR 528 Seminar in Dramatic Analysis (4, Fa)** Drama as a living art; reading, analysis, and discussion of plays which best illustrate principles of effective playwriting.

**THTR 529ab Textual Studies for Performance (a: 4, Fa; b: 4, Sp)** Close textual reading of dramatic texts as a fundamental tool for rehearsal and performance.

**THTR 530 Seminar in Dramatic Criticism (4)** Dramatic criticism from the classical Greek period to the modern.

**THTR 533 Seminar in the American Theatre (4, 2 years, SpSm)** History and literature of the American theatre from its beginning to the present day.

**THTR 535 Seminar in Aesthetics of the Theatre (4)** Aesthetic theories which apply to the art of the theatre; emphasis upon acting and play direction.

**THTR 540abcdef Advanced Voice Diction (2-2-2-2-2, FaSp)** Advanced individual vocal development and application to a variety of professional and performance circumstances. *Corequisite for e:* THTR 515e, THTR 575, THTR 480, THTR 555; *corequisite for f:* THTR 515f, THTR 520e, THTR 571, THTR 597.

**THTR 541 Diction and Dialects (2, Fa)** Fundamentals of speech, diction, dialects and accents, including work in the International Phonetic Alphabet.

**THTR 544 Embodied Poetics (2, Fa)** Explores the relationship between vocal and physical expression and the spontaneity of human impulse within the community-based context.

**THTR 545 Visiting Artists Master Seminar (4, Sp)** A workshop taught by a master visiting artist, concentrating on his/her specific expertise in relation to dramatic writing. Course topics determined by the instructor. *Recommended preparation:* reading or viewing the work of the visiting master artist.

**THTR 550ab Seminar in Scene Design (3-3, FaSp)** Theory and practice of scene design; an intensive investigation into the relationship of a script to the visual statement.

**THTR 552ab Seminar in Costume Design (3-3, FaSp)** Theory and practice of costume design; intensive investigation into the relationship of a script to the visual statement.

**THTR 553ab Seminar in Lighting Design (3-3, FaSp)** Theory and practice of lighting design; intensive investigation into the relationship of a script to the visual statement.

**THTR 554 Visual and Spatial Relationship (2, FaSp)** The illustration and understanding of how space can be used to add emotional undertone, contextual information and strong staging ideas to a production.

**THTR 555 Directing Fundamentals (2)** To provide the basic foundations for the conceptualization and execution of works for the stage.

**THTR 556ab Directing (2-2)** A seminar/workshop in developing and testing directorial skills: text, design, acting, producing, and communication with an audience. *Prerequisite:* a: THTR 555; b: THTR 556a.

**THTR 558ab Design for Directors (2-2)** Basic elements of scenic, costume, props, lighting, sound, and make-up design, as they apply to the art of directing. *Prerequisite:* a: THTR 555; b: THTR 558a.

**THTR 567ab Studies in Playwriting (4-4)** a: Extensive examination of playwriting, dramaturgical development process, and readings of work toward the completion of professionally promising plays. b: Continued extensive examination of playwriting, dramaturgy, development, and readings of work toward the completion of professionally promising plays.

**THTR 568 Popular Theatre for Education and Development (3, Sp)** Theory and practice of Theatre in Education and Theatre for Development as resources for conscientization and liberation of communities at the margins of power.

**THTR 571 Professional Seminar (2, Sp)** Introduction to the world of the professional actor.

**THTR 572 Global Dramatic Writing (4, FaSp)** “Tour” of non-European and non-European American cultures with regard to their dramatic subject matter and traditions.

**THTR 574 Dramatic Writing Across Media for the Playwright (4, FaSp)** Intensive overview of career paths for playwrights in a wide array of media as they exist now, and as new opportunities arise.

**THTR 575 Creative Production Projects (4)** Advanced creative projects for production with emphasis on theatre as a synthesis of the performing arts.

**THTR 577 Theatre and Therapy for Cultural Fieldwork (3, Sp)** Explores the theory and practice of theatre and therapy in the cultural fieldwork and community development settings. *Recommended preparation:* THTR 587.

**THTR 578 Theatre of the Oppressed Theory, Games, and Techniques (4, FaSpSm)** Basic theoretical foundations of game playing for populations at the margins of power. *Recommended preparation:* THTR 521, THTR 544.

**THTR 579 Writing Culture (3, FaSpSm)** Borrows from anthropology, popular/community-based theatre, cultural studies, and literature to provide an array of methodologies and approaches to artistic collaboration across cultures and difference.

**THTR 586ab Applied Theatre Arts: Los Angeles Residency (2-2, FaSp)** a: Academic and group process context for students’ work in their chosen local internships to help students engage with communities as cultural fieldworkers. b: Supervisory, logistical, and theoretical container for THTR 586a. Engages students in their curricular experiences in the cultural field in partnership with their community-based organizations.

**THTR 587 Liberation Arts and Community Engagement – Theory (4, Fa)** Historical foundations of liberatory movements using expressive arts towards community-based goals of reciprocal and collaborative empowerment, civil rights, psychological or political freedom and justice.

**THTR 588 Liberation Arts and Community Engagement – Praxis (3, Sp)** Theory and practice of developing liberatory and Theatre of the Oppressed events, from first community contact to staged public event. *Prerequisite:* THTR 587.

**THTR 590 Directed Research (1-12, FaSpSm)**

Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**THTR 591 Seminar in Producing Theatre (4)**

A seminar in the theories and processes of producing theatre (commercial and non-profit).

**THTR 592ab Participatory Action Research for Community-based Theatre (a: 2, FaSp; b: 2, Sm)**

*a*: Examination of theories and practices of Participatory Action Research (PAR) to better understand its various forms in community-based contexts using theatre as the research mode. *b*: Implements the theories and practices of THTR 592*a* towards the creation of a summative research paper on the local and international applied theatre arts experience.

**THTR 593 MFA Project (2, max 4, FaSpSm)**

Credit awarded upon completion of project. Graded CR/NC.

**THTR 594abz Master's Thesis (2-2-0, FaSpSm)**

Credit on acceptance of thesis. Graded CR/NC.

**THTR 595ab Graduate Playwrights' Workshop (4-4)**

*a*: Development of thesis plays utilizing faculty dramaturgical support and involvement of student actors/directors. Includes readings with/without audiences. Simulates professional development process. *b*: Continued development of thesis plays in a simulated professional development workshop process utilizing dramaturgy and involvement of student actors/directors. Culminates in staged readings.

**THTR 597 Theatre Practicum (1-4, max 12, FaSpSm)**

Preparation, rehearsal, and performance of dramatic works in main stage repertory.

**THTR 598 Applied Theatre Arts: International Externship (2)**

Supervisory, logistical and theoretical container for students exploring cultural fieldwork in international settings. *Prerequisite*: THTR 588.

**THTR 599 Special Topics (2-4, max 8)**

Studies in selected areas of theatre art.
