SWMS 415 Ecofeminism (4, Sp) Examination of the philosophy and politics of Ecofeminism. It will critique the ideologies that link the oppression of women to the exploitation of nature. Recommended preparation: SWMS 210 or SWMS 301.

SWMS 425 Queer Los Angeles (4, Sp) Interdisciplinary study of queer Los Angeles through examination of histories, memoirs, essays, fiction, poetry, documentaries, narrative films, and local archives.

SWMS 426 Gender, Family and Society in Europe and the United States, 1500–Present (4) (Enroll in HIST 426)

SWMS 430 Gender and Sexuality in Korean Literature and Culture (4) (Enroll in EALC 430)

SWMS 434m Women and Aging: Psychological, Social and Political Influences (4, FaSpSm) (Enroll in GERD 434m)

SWMS 435m Women in Society (4) (Enroll in SOCI 435m)

SWMS 437m Sexuality and Society (4) (Enroll in SOCI 437m)

SWMS 440 Women’s Literature in Germany I (4) (Enroll in GERM 440)

SWMS 443m Women’s Spaces in History: “Hussies,” “Harems,” and “Housewives” (4) (Enroll in ARCH 443m)

SWMS 445 Studies in Gender and Feminism (4) (Enroll in FREN 445)

SWMS 455m Gender and Sport (4) Sport as an institutional locus for construction of gender relations; lives of female and male athletes; issues of sexuality, violence, racism, spectatorship, and media.

SWMS 456 Women in International Development (4) (Enroll in POSC 456)

SWMS 465 Gender in Media Industries and Products (4) (Enroll in COMM 465)

SWMS 467 Gender and the News Media (4) (Enroll in JOUR 467)

SWMS 469 Women in English Literature before 1800 (4) (Enroll in ENGL 469)

SWMS 470 Women in English and American Literature after 1800 (4) (Enroll in ENGL 470)

SWMS 476m Images of Women in Contemporary Culture (4) (Enroll in ENGL 476m)
SWMS 478m Sexual/Textual Diversity (4) (Enroll in ENGL 478m)
SWMS 490x Directed Research (1-8, max 12, FaSpSm) Independent research and readings. Not available for graduate credit.
SWMS 492 Honors Thesis (4, Sp) Writing of the honors thesis; for students in the Gender Studies Honors Program. Open only to gender studies majors. Recommended preparation: SWMS 410.
SWMS 499 Special Topics (2-4, max 8) Study of a selected problem, period, or theme through interdisciplinary approaches.
SWMS 504 Theories of Race, Class, and Gender (4) (Enroll in ENGL 524)
SWMS 505 Seminar in Feminist Theory and Art History (4, max 8) (Enroll in AHIS 505)
SWMS 507 Gender and International Relations (4, Irregular) (Enroll in IR 507)
SWMS 508 Ethics of Liberation Theology (4) (Enroll in REL 508)
SWMS 509 Culture, Gender, and Global Society (4) (Enroll in IR 509)
SWMS 516 Seminar: Feminist Theory and Communication (4, 2 years, Sp) (Enroll in COMM 516)
SWMS 530 Sociology of Gender and Sexuality (4, FaSp) (Enroll in SOCI 530)
SWMS 544 Feminist Theory for Historians (4, Fa) (Enroll in HIST 544)
SWMS 546 Comparative History of Women and Gender in the West to 1800 (4, Fa) (Enroll in HIST 546)
SWMS 548 Fertility Control Policies (4) (Enroll in SOCI 548)
SWMS 550 Gender and Education in the Third World (4) (Enroll in EDPA 550)
SWMS 551 Studies in the History of Women, Gender and Sexuality (4, max 8) (Enroll in HIST 550)
SWMS 552 Sex and Gender in Society (4) (Enroll in SOCI 552)
SWMS 553 Race, Gender and Sexuality (4) (Enroll in AMST 553)
SWMS 554 Women in Global Perspective (4) Women and immigration, employment, and household and family relations in the context of the global economy; women's social and political movements in diverse cultural contexts.
SWMS 556 Seminar on Women and the Family in China (4) (Enroll in EALC 556)
SWMS 560 Feminist Theory (4, FaSpSm) History of feminist theory and major perspectives of current feminist theory: liberal feminism, socialist/Marxist feminism, radical feminism, psychological feminism, spiritual feminism, and ecological feminism.
SWMS 577 Therapy, Gender, and Ethnicity (3) (Enroll in SOCI 577)
SWMS 588 Seminar in Gay, Lesbian, Bisexual and Transgender Studies (4) Interdisciplinary cross-cultural, historical, psychological, sociological, and contemporary political perspectives on female and male homosexuals, and the emergence of gay, lesbian, bisexual, and transgender identities.
SWMS 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree in cognate fields. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.
SWMS 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)
SWMS 599 Special Topics (2-4, max 8) Seminar in selected topics relating to gender and feminism.
SWMS 621 Gender Discrimination (1-4, FaSp) (Enroll in LAW 621)
SWMS 623 Family Law (3 or 4) (Enroll in LAW 623)
SWMS 630 Studies in Gender (4, max 12) (Enroll in ENGL 630)
SWMS 650 Seminar on Women's and Family History (4, max 8, Sp) (Enroll in HIST 650)

Courses of Instruction
Geography (GEOG)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

GEOG 255 American Environmentalism (4, FaSm) Geographic and historic approach to the growth of environmental awareness in the United States from Colonial times to the present. Extensive use of case materials.
GEOG 257 Environmental and Ethics (4, SpSm) Examination of ethical issues in environmental context: systematic analysis of problems associated with protection and use of selected environments.
GEOG 345 Conservation of Natural Resources (4, Fa) Interaction between resource conservation and people based on recent advances, current developments, and future resource utilization. Special attention to the western United States. Field trips.
GEOG 360 Environmental Disasters (4, Sp) Evaluates the causes, effects, and responses to international environmental disasters. Emphasis is on contemporary case studies in a theoretical context.
GEOG 390 Special Problems (1-4, FaSp) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.
GEOG 399 Field Techniques (4, Fa) Field exploration of physical and cultural aspects of different regions, with emphasis on rural California. Field methods, especially mapping and interviewing.
GEOG 431 California's Changing Landscapes (4, Sp) Type study of a region; distribution of physical and cultural phenomena; delimitation into natural regions; analysis of human-environment interaction in regions of the state. Field trips.
GEOG 490x Directed Research (1-8, max 12, FaSp) Individual research and readings. Not available for graduate credit.
GEOG 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)
GEOG 599 Special Topics (2-4, max 8, Irregular) Seminar in selected topics in geography.
GEOG 681 Environmental Modeling with GIS (4, 2 years, Sp) Advanced topics related to the collection, analysis, modeling, interpretation, and display of environmental information using GIS and related technologies. Recommended preparation: graduate standing and prior GIS experience equivalent to SSCl 382L or department approval.
GEOG 682 Health and Place (4, Sp) Examines the relationship between health and place and how geopolitical approaches to analyzing and visualizing spatial data may advance our understanding of disease systems. Graduate standing.
GEOG 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.
GEOG 794abcd Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Units required in the two areas of concentration.
GERM 010X Course in Reading German (2) For graduate students who wish help in meeting the German reading requirement for the Ph.D. degree. Emphasis on development of reading skills. Not available for degree credit. Graded CR/NC.

GERM 025X Course in Reading German (2) Continuation of 010X. Reading selections appropriate to candidate’s major field. Not available for degree credit. Graded CR/NC.

GERM 101 German I (4) Introduction to modern German. Oral practice, listening and reading comprehension. Basic structures necessary for simple spoken and written expression.

GERM 102 German II (4) Continuation of German I. Introduction to German culture. Prerequisite: GERM 101.

GERM 201 German III, Conversation and Composition (4) Intermediate German. Increasing emphasis on listening and speaking skills and a review of basic structures of German. Discussion of cultural aspects. Prerequisite: GERM 102.

GERM 221 Conversational German IV (4) Conversational German in a variety of topical settings and vocabulary domains. Prerequisite: GERM 201.

GERM 310 Business German I (4, Sp) Introduction to German business language structure including correspondence and oral communication. In German. Prerequisite: GERM 201.

GERM 311 Business German II (4, Fa) Continuation of GERM 310. Terminology and style of commercial and legal texts, analyzed and applied in oral and written work. In German. Prerequisite: GERM 201.

GERM 320 Composition and Conversation on Contemporary Affairs (4) Practice in oral and written German, emphasizing contemporary cultural and social developments in the German-speaking countries of Europe. In German. Prerequisite: GERM 221.

GERM 325 Composition and Conversation in Cultural History (4) Practice in oral and written German, emphasizing the cultural history of the German-speaking countries of Europe. In German. Prerequisite: GERM 221.

GERM 330 Introduction to Literary Studies (4) Review of essential literary terms, concepts, and critical methods through analysis and discussion of selected primary and secondary works. In German.

GERM 335 Applied German Drama (4, max 8) Works of a German playwright in their social and cultural context, leading to a dramatization of one of the works. In German.

GERM 340 German Prose Fiction from Goethe to Thomas Mann (4) Examines German prose fiction from the late 18th to the early 20th centuries, with particular emphasis on how narrative texts are constructed in English.

GERM 346 German Folklore and Popular Culture (4) Survey and analysis of folklore and cultural phenomena, including tales, legends, and myths; folk and popular music; beliefs and customs. In English.

GERM 351 Colloquium on Drama (4) German drama from the 18th century, with emphasis on modernism (since Büchner) and the 20th century avant garde styles: Expressionist, Epic, Grotesque, Documentary, and Sprechtheater. In German.

GERM 352 Colloquium on Poetry (4) Definition and analysis of lyric genre through a study of major poets, such as Goethe, Schiller, Heine, Rilke, and Hofmannsthal; poetic traditions from the 17th century to the present. In German.

GERM 353 Colloquium on Prose (4) Study of German prose from the 18th century to the present; emphasis on narrative and thematic perspectives in relation to social change and on modernism since Kafka. In German.

GERM 360 20th Century German Prose: Texts and Films (4) Aesthetic and historical analysis of major German 20th century novels, complemented by brief study of cinematic adaptation of each text. Texts in English; films with subtitles.

GERM 370 Literature and Culture in Vienna at the Turn of the Century (4) Literature, culture, and society in Vienna 1890-1915; works by figures such as Schnitzler, Hofmannsthal, Kafka, Musil, Kraus, Schönberg, Kokoschka, Freud, Wittgenstein, and others. In English.

GERM 372 Literature and Culture in Berlin of the 1920s (4) Literature, culture, and society through works by figures such as Schnitzler, Hofmannsthal, Kafka, Musil, Kraus, Schönberg, Kokoschka, Freud, Wittgenstein, and others. In English.

GERM 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

GERM 410 Profile of German Literature I (4) Survey of major trends in German literature within their historical and cultural contexts from the beginnings to the Baroque period. In German.

GERM 420 Profile of German Literature II (4) Survey of major trends, figures, and authors in German literature and culture of the 18th and 19th centuries within the European context. In German.

GERM 430 Age of Goethe (4) Background and significance of the period; lyrics, major dramatic and prose works from 1770-1832; Storm and Stress; Classicism; Goethe and Schiller. In German.

GERM 440 Women’s Literature in Germany I (4) Reading and analysis of medieval texts from German-speaking countries, written by and about women: science, love, poetry, letters, drama, mysticism, romance. Conducted in German.

GERM 450 Expressionism to the Present (4) Representative authors and works since 1910; World War I, Expressionism, New Objectivity, World War II; literature after 1945: East and West, Swiss and Austrian.

GERM 465 Germany East and West (4) Study of the ideological, economic, social, and cultural differences between East and West Germany between 1945 and 1990 and their impact on today’s unified Germany. In English.

GERM 466 The German Speaking Nations (4) Focus on the culture, history, and society of Austria, East and West Germany, and Switzerland. In German.

GERM 470 Advanced Composition and Stylistics (4) Development of competence in written expression; fundamentals of style in expository writing. In German.

GERM 490 Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

GERM 499 Special Topics (2-4, max 8) Intensive study of selected topics or regions.

GERM 508 Bibliography and Research Techniques (4) Bibliographic sources, reference works and periodicals, standard bibliographic formats; research methods and the writing of genres, stylistics, and textual interpretation.

GERM 510 Methods of Literary Criticism and Linguistic Analysis (4) Historical perspective on critical methods such as genre poems, hermeneutics, Marxist and Freudian theories, structuralism, reception-aesthetics, literary semantics, pragmatics, and text linguistics.

GERM 511 Weimar Culture (4) A historical topic-oriented exploration of cultural activities in Weimar Germany. Examination of reflections of the social-political experience of the period in literary (essay, cultural critique, investigative reporting) and pictorial (painting, sculpture, photography, film) discourse.

GERM 530 Directed Research (1-12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

GERM 533 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

GERM 555a Directed Readings (2-4, 2-4)

GERM 599 Special Topics (2-4, max 3) Special topics such as concepts of government, roots of fascism, and ideologies of Hegel, Marx, Wagner, Nietzsche in German literature.

GERM 573 Seminar in Brecht (4)

GERM 730 Research (1-2) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

GERM 794abcdz Doctoral Dissertation (2-2.5-2.0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Health and Humanity
Bachelor of Arts in Health and Humanity

The Bachelor of Arts in Health and Humanity is a liberal arts degree. It is intended for students interested in fields that inform the health professions and in related questions about health and human experience. Courses in this interdisciplinary major meet many of the requirements for admission to the professional programs in medicine, nursing and other fields, but do not meet all of those entrance requirements. Some electives in this major have prerequisites in mathematics and physics that cannot be counted toward the 36-unit requirement in major electives. Students should consult their academic advisers for precise information on prerequisites and admission requirements for specific health fields.

Summary of Requirements

Core: 24 units; experiential learning: 1-4 units; major electives: one thematic module 16-20 units, other electives 16-20 units; total requirements: 61-64 units including at least 36 upper-division units plus prerequisites for certain electives.

Core (16 lower-division, 8 upper-division) Units
BISC 100L General Biology: Organismal Biology and Evolution, or
BISC 121L Advanced General Biology: Organismal Biology and Evolution
BISC 220L General Biology: Cell Biology and Physiology, or
BISC 221L Advanced General Biology: Cell Biology and Physiology
CHEM 10LALB General Chemistry, or
CHEM 115ALB Advanced General Chemistry
HIBIO 300 Evolution, Ecology, and Culture

Experiential Learning (1-4 units) Units
Choose one course. A health-related internship is required:
AMST 306 Leadership in the Community
GERO 495 Practicum in Geriatric Care
MDA 250 Internship for Liberal Arts: Work and Career — Theory and Practice
max 1-2
POSC 395 Directed Governmental and Political Leadership Internship
SWMS 311 Gender Studies and the Community: Internship

Major Electives

Choose one complete thematic module from the list below (16-20 units). Then choose additional electives from the list of modules to equal nine courses (36 units) in all. No more than two courses may be lower-division (100- or 200-level). At least two courses must come from Group A and two courses from Group B.

Group A Units
Bioethics Module (16 units)
ANTH 305 Childhood, Birth and Reproduction,
POSC 333 Stigma and Society: Physical Disability in America,
SOCI 475 Medical Sociology,
GERO 475 Care,
OT 375 The Narrative Structure of Social Action: Narrative, Healing and

Group B Units
Biological Sciences Module (20 units)
BISC 290L Introduction to Biological Research (lab assignment required), or
BISC 490X Directed Research (lab assignment required)
BISC 325 Genetics,
BISC 330L Biochemistry
CHEM 322BL Organic Chemistry, or
CHEM 354BL Organic Chemistry
MATH 208X Elementary Probability and Statistics

Health and Aging Module (16 units) Units
GERO 350 Psychology of Adult Development (Recommended preparation: PSYC 100), or
GERO 350 Society and Adult Development
GERO 360 Policy, Values, and Power in an Aging Society, or
GERO 437 Social and Psychological Aspects of Death and Dying
GERO 350 Diversity in Aging, or
GERO 450 Women and Aging: Psychological, Social and Political Implications
GERO 416 Health Issues in Adulthood

Health and the Mind Module (20 units) Units
PSYC 100 Introduction to Psychology
PSYC 320 Principles of Psychology, or
PSYC 326 Behavioral Neuroscience
PSYC 336L Developmental Psychology
PSYC 360 Abnormal Psychology, or
PSYC 404L Psychophysiology of Emotion
PSYC 361 Introduction to Clinical Psychology
PSYC 462 Minority Mental Health

Global Health Module (20 units) Units
ANTH 101 Body, Mind, and Healing, or
ANTH 105 Culture, Medicine, and Politics
max 1
ANTH 305 Childhood, Birth and Reproduction, or
HIBIO 405 Evolutionary Medicine
IR 305 Managing New Global Challenges, or
IR 382 Order and Disorder in Global Affairs
IR 306 International Organizations, or
IR 371 Global Civil Society: Non-State Actors in World Politics
IR 344 Developing Countries in World Politics

Chair: William Deverell, Ph.D.

Faculty

University Professor: Kevin Starr, Ph.D.

University Professor and Leo S. Bing Chair in English and American Literature and Professor of English and History: Leo Braudy, Ph.D. (English)

Gordon L. MacDonald Chair in History: Joan Piggott, Ph.D.

Shappell-Guenin Chair in Jewish Studies: Wolf Gruner, Ph.D.

Andrew W. Mellon Professor of the Humanities: Peter C. Mancall, Ph.D.

Turpanian Early Career Chair in Contemporary Armenian Studies: Richard Antaramian, Ph.D.

Professors: Elinor A. Accampo, Ph.D.; Lisa Bitel, Ph.D.; Leo Braudy, Ph.D. (English); William Deverell, Ph.D.∗; Mary Dudziak, Ph.D. (Law); Alice Echos, Ph.D. ∗; Philip J. Ethington, Ph.D.; Richard W. Fox, Ph.D.; Ariela Gross, Ph.D. (Law); Karen Halttunen, Ph.D.; Daniel Klerman, Ph.D. (Law); Carolyn Malone, Ph.D. (Art History); John Pollini, Ph.D. (Art History); Azade-Ayse Rorlich, Ph.D.∗; Steven J. Ross, Ph.D.∗; George J. Sanchez, Ph.D.∗ (American Studies and Ethnicity); Mary Sarotte, Ph.D. (International Relations); Vanessa Schwartz, Ph.D.; David Sloane, Ph.D. (Public Policy); Jacob Soll, Ph.D.

Associate Professors: Marjorie R. Becker, Ph.D.; Bettine Birge, Ph.D. (East Asian Languages and Cultures); Daniela Bleichmar, Ph.D. (Art History); Jason Glenn, Ph.D.; Joshua Goldstein, Ph.D.; Sarah Guaitieri, Ph.D.; Kyung Moon Hwang, Ph.D.; Lon Kurashige, Ph.D.; Paul Lerner, Ph.D.∗; Mariá Elena Martínez, Ph.D.; Ramzi Rought, Ph.D.; Brett Sheehan, Ph.D.; Francile Wilson, Ph.D. (American Studies and Ethnicity)

Assistant Professors: Gerhard Clinton Rainier Godart, Ph.D.; Nathan Perl-Rosenthal, Ph.D.; Diana Williams, Ph.D.

Assistant Professor (Research): Peter Westwick, Ph.D.

Professor (Teaching): Deborah Harkness, Ph.D.∗

Professor (Teaching): Lindsay O’Neill, Ph.D.

Professor Emerita of History and John R. Hubbard Chair in British History Emerita: Judith Bennett, Ph.D.∗
The Department of History offers courses in ancient, medieval and modern European history, including Russian history; in both North and Latin American history; in the history of East Asia; and in world history. Some of the department’s courses are chronological, some national or regional and some are thematic, with special strengths in gender, race and ethnicity, popular culture, medicine and urban history. The faculty is committed to continuous review and revision of the department curriculum, as student needs and professional emphases shift. Many departmental courses meet general education requirements, and various programs for majors and non-majors are available.

The department offers an honors program for qualified seniors. Honors programs are individually arranged through consultation with the honors director, and completion of an honors thesis is required.

Degree Programs

The Department of History offers the B.A., a minor, the M.A. and Ph.D. in History.

Honor Society

The department sponsors its own local chapter of Phi Alpha Theta, the national history honor society. Phi Alpha Theta provides opportunities for students to take their interest in history beyond the classroom and to cultivate their intellectual pursuits in a community setting.

Membership is open to history majors and other interested students with a 3.33 GPA in history courses and a 3.0 overall GPA. For more information contact the honors director.

Undergraduate Degrees

Advisement

All history department majors should consult with the department student adviser and with one of our faculty advisers. Students should seek an appointment early in each semester so that an advisement file may be established for each student. The file will be kept current.

Bachelor of Arts in History

HIST 201 Approaches to History is required of all majors. In addition, ten courses in history are required, three at the lower-division level and six at the upper-division level. The three required lower-division courses must include one from the 100 level and one from the 200 level, and each of the three must be from a different geographic category. The department will accept scores of 4 or 5 on either Advanced Placement European history or Advanced Placement American history as a substitute for one requirement at the 100 level. At the upper division, majors are required to take a minimum of three courses in a thematic, temporal or geographic concentration they articulate under the guidance of faculty; they must also take at least two upper-division seminars, approved by the department, including one in their concentration. No more than 4 units of HIST 490x Directed Research may be counted as satisfying the upper-division seminar requirement.

For geographic breadth, at least one of the 10 courses must be taken from approved course work in each of the three following areas: Asia and Eurasia, Europe, and North and Latin America. For temporal breadth, at least one of the 10 courses must be taken from approved course work in each of the three following time periods: before 1300, 1300 to 1800, 1800 to the present. Students must consult with a department adviser in order to determine which courses meet these requirements.

Bachelor of Arts in History and Social Science Education

This degree is designed for students who are interested in a career in secondary school teaching. The courses chosen reflect the content of subjects taught in high schools and middle schools in California and therefore should be useful for those contemplating the profession of teaching history and social studies. It does not, however, provide a waiver of the CSET examination.

Bachelor of Arts in Middle East Studies

See the Degree for Middle East Studies for a complete listing of requirements.
Interdisciplinary Minor in Resistance to Genocide

To resist genocide effectively, we need to understand its history—the factors that have brought it about and those that have enabled people to prevent, resist or recuperate from mass violence. This interdisciplinary minor draws upon USC faculty in 11 academic units researching the causes, results and representations of attempted genocide as well as resistance to genocidal mass violence. Courses include attention to different definitions of genocide, its occurrence around the world and its representation in literature and the arts.

Course Requirements

The minor requires five courses (20 units); at least four must be at the upper-division level. As with all minors, students must choose at least four courses (16 units) outside their major department and four courses (16 units) that are not being used to satisfy any other subject requirement.

Graduate Degrees

The graduate program in history provides advanced training in historical research and writing leading to the Doctor of Philosophy degree. Once admitted to the Ph.D. program, a student in exceptional cases may work for a Master of Arts degree, but the department does not accept applicants for an M.A. For further information, contact the director of the graduate program for the Department of History.

Admission Requirements

Prerequisites

An applicant should have an undergraduate degree or an M.A. degree in history or a related discipline. Promising students trained in other fields will also be considered.

Requirements: 20 upper-division units, including a minimum of 16 upper-division units from Department of History offerings. The remaining 4 units may come from either (1) HIST 201 (preferable), or (2) upon the approval of a History Department adviser, 4 upper-division units from another department.

An appropriate capstone course chosen from 400-level seminar offerings must be included in the proposed program as part of the departmental work. The capstone course will normally be the last (or among the last) courses taken for the minor.

Honors Program

The department offers a two-semester honors program, in which qualified students spend their first semester in an honors track in an upper-division seminar or take HIST 490 Directed Research in their concentration. During the second semester, all honors students are required to take HIST 492 Honors Thesis in which each completes a thesis project on a topic of his or her choosing under faculty direction. Contact the department honors director for further information. To graduate with honors, department majors must have a minimum GPA of 3.5 in their major course work.

Teaching Credential Requirements

Credential requirements in California and elsewhere are complex and changeable. Students interested in preparing for public school teaching should contact the Credentials Office, Rossier School of Education, and the undergraduate adviser, Department of History, for up-to-date information.

Interdisciplinary Minor in Early Modern Studies

This minor brings together the resources of the departments of English, History and Art History to study the literatures and cultures of Europe and the Americas from the late medieval period to 1800. For a complete listing of requirements, see Department of English.

Interdisciplinary Middle East Studies Minor

See the Department of Middle East Studies.

Interdisciplinary Race, Ethnicity and Politics Minor

See Department of Political Science.

Interdisciplinary Russian Area Studies Minor

See Department of Slavic Languages and Literatures.

Interdisciplinary Law and Society Minor

See Department of Political Science.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Arts in History

The department does not accept applicants for a Master of Arts degree in history. The M.A. degree is intended only as a transitional degree in the process of completing requirements for the Ph.D. in history.

Foreign Language/Research Tool Requirement

Students are required to demonstrate competence in one foreign language, with the exception that none is required of majors in United States history.

Course Requirements

All students must enroll in HIST 500 Introduction to Graduate Historical Studies, and it is recommended that it be completed in the first year of residence.

Thesis Plan

Students must take a minimum of six graduate courses, including HIST 500 plus HIST 594ab Master’s Thesis. No more than two 400-level courses may count toward this total. A thesis must be written and defended.

Comprehensive Examination Plan

This plan requires the approval of the student’s master’s committee chair to substitute a comprehensive examination for the thesis. If approved, the student completes eight graduate level courses, including 500, with no more than two 400-level courses counting toward this total, plus written exams in three fields, one of which may be in another department. Examinations are normally offered in October and April. An oral examination may be given at the discretion of the master’s committee. Examinations are graded on an honors, pass or fail basis. Any student who receives a grade of fail in two examinations is considered as not having qualified for the degree. A student who receives one fail must reattempt an examination in that field at the next scheduled examination period. An examination cannot be reattempted more than once.

Doctor of Philosophy in History

Application deadline: December 1

The history profession nationwide combines a traditional emphasis on geo-temporal fields (e.g., U.S. in
the 19th century; medieval Europe) with a new emphasis on trans-nationalism, comparative history and interdisciplinary investigation. The IUC program is at the forefront of these trends. Following the traditional emphasis, each graduate student must declare a major field in a geo-temporal area at the time of application to the program. Major fields of study include: China, Japan, Korea, Latin America, Middle East, American/United States, medieval Europe, early modern Europe and modern Europe. The purpose of the major field is to prepare students broadly for teaching and research.

By the beginning of his or her second year in the program, each graduate student must declare a minor field and an area of specialization. The minor field is intended to broaden skills beyond the geo-temporal boundaries of the major field; the area of specialization is intended to deepen the student’s scholarly training in the chosen area of the dissertation. The minor field may be chosen from the list of major fields (i.e., a student entering the program with American/ U.S. as a major field might select “modern Europe” as a minor field), or it may be conceived comparatively, thematically or cross-disciplinarily. Possible minor fields include: Latin America; pre-modern Japan; the colonial Americas; gender and sexuality; visual culture; and anthropology. Possible fields for the area of specialization include: 19th or 20th century U.S. intellectual history; visual culture of the 20th century; modern European cities; and the American West. These lists are not exhaustive and are meant to suggest only possible courses of study.

For the major field, each student must take a minimum of four courses; for the minor field two courses; for the area of specialization three courses. Either the minor field or the area of specialization must be outside the major field of study, transnational or outside the discipline of history. Each student must consult with his or her adviser in putting together these fields of study.

Foreign Language/Research Tool Requirements

Students are required to demonstrate competence in two foreign languages to be selected in consultation with the faculty adviser. Students in United States history may substitute competence in quantitative methods for one foreign language. The requirements in this category must be met before a student is eligible to take the qualifying examination.

Course Requirements

All entering students (including those with H.A. degrees) are required to take HIST 500 in their first semester of study. All students are required to take two 600-level research seminars in the History Department. At least one of these seminars must be in the major area of study. Students must complete a minimum of 60 units of course work. No more than 8 units of the 60 may be in HIST 102gm (dissertation writing). Students must complete at least 30 units of graduate course work within the History Department.

Screening Procedures

The performance of every doctoral student is formally evaluated by the full faculty of the History Department, normally at the end of the spring semester and before a student has completed 24 units toward the degree. Unsatisfactory progress toward the degree requires either remedial of the deficiencies or termination of the student’s graduate program. After successfully passing the screening procedures, each student establishes a qualifying exam committee which then supervises preparation for the qualifying examination.

Qualifying Exam Committee and Qualifying Examinations

Each student must set up a qualifying exam committee by the end of the third semester in residence. It includes at least five members, at least three of them from the History Department, and at least one of them from outside the History Department (this person must be a tenure-track faculty member from a Ph.D. granting program). The qualifying exam committee will oversee the student’s written and oral qualifying examination, which should be taken by the end of his or her fifth semester in residence and no later than the end of the sixth semester. The examination covers the major field, minor field and area of specialization. Students prepare for these exams by developing, in collaboration with their qualifying exam committee, reading lists for study in their major field, minor field and area of specialization.

The qualifying examination consists of two parts: (1) Three-four hour written responses, based, respectively, on the major field, the minor field and the area of specialization; (2) a two-hour oral session, which may include some discussion of the written exam. Students with one fail or more than two low-pass grades on the written responses will not be permitted to sit for the oral segment of the examination. The qualifying exam committee determines whether a student may retake any parts of the examination graded low-pass or fail. A student must wait at least six, but not more than nine, months to retake any part, or all, of the qualifying examination. No part of the examination can be retaken more than once.

Dissertation

After students have successfully completed their qualifying examinations, they will select a dissertation committee consisting of at least three members, including at least two from the History Department. These individuals will be in charge of guiding the dissertation to completion. Within six months of passing the qualifying examination, students must submit a formal dissertation prospectus to all members of the dissertation committee and pass a one-hour prospectus defense convened by that committee. Some students (e.g., those whose major field is East Asia), (2) with the approval of their dissertation committee, petition the Graduate Studies Committee for an extension of this six-month deadline. After passing the dissertation prospectus defense, a student is admitted to candidacy for the Ph.D. degree. The student will thereafter concentrate on the dissertation. After a student becomes a doctoral candidate, he or she must register for HIST 794 Doctoral Dissertation each semester thereafter until the dissertation is completed.

Advisement

Students should seek advice on their program of studies from the director of the graduate program, the professor in their major field of study and other members of their qualifying exam committee.

Courses of Instruction

History (HIST)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

HIST 100gm The American Experience (4, FaSpSm) Patterns of American development from Colonial times to the present. (Duplicates credit in former HIST 200gm.)

HIST 101gm The Ancient World (4, FaSpSm) Achievements of the near East, Greece, and Rome with emphasis on the development of ideas, arts, and institutions which have influenced modern man.

HIST 102gm Medieval People: Early Europe and Its Neighbors, 400-1500 (4) Early Europe, c. 400-1500, with a focus on Europe’s diverse communities, cultural interactions among them, dealings between conquerors and conquered, and European contacts with non-Europeans.

HIST 103g The Enlightenment of Modern Europe (4, Fa) Political, intellectual, and cultural developments in Europe, 1300-1815, Renaissance and Reformation; absolute monarchy, scientific changes, and Enlightenment; French Revolution and Napoleon.

HIST 104g Modern Europe (4, Sp) The Enlightenment, French Revolution, industrialization, Darwinism, socialism, nationalism, technological revolutions, mass culture, imperialism, race, fascism, communism, world wars, genocide, migration, the Cold War, terrorism.

HIST 105g The Korean Past (4) A topical and chronological study of the major political, social, and intellectual forces that have shaped the history of Korea.

HIST 106g Chinese Lives: An Introduction to Chinese History (4, FaSp) Study of the lives of selected individuals who have helped to shape Chinese politics and culture.

HIST 107g Japanese History (4, FaSp) Japan from the earliest times to the present; social, cultural, and political dimensions.

HIST 180g The Middle East (4, FaSpSm) Introduction to the history and the study of the Middle East from ancient to modern times.

HIST 195 Selected Themes and Topics in History (4, Irregular) Study of special historical themes and topics through readings, lectures, discussions, and supervised writings.

HIST 201 Approaches to History (4, FaSp) Methods and theories of historical interpretation of evidence; uses of archives; modes of presenting the past to the public. Required of all history majors. (Duplicates credit in former HIST 300.)

HIST 215g Business and Labor in America (4, Fa) Expansion of business enterprise from colonial merchants to modern corporations; evolution of the labor force from artisans to skilled and unskilled industrial workers.

HIST 220 Murder on Trial in America (4) Examination of high-profile murders and murder trials in order to explore major social, political, and cultural issues from the colonial period to the present.

HIST 235g Film, Power, and American History (4, Sp) U.S. motion pictures as both a response to and comment upon major events, problems, and themes in 20th century America.

HIST 235g War and the American Experience (4, Fa) Comparative historical analysis of the American experience of war: war decision-making processes; evolution of strategy and tactics; the political, economic, and social effects of war.

HIST 240g The History of California (4, Fa) A thematic approach to California history from precontact to present; focus on peoples, environments, economic, social, and cultural development, politics, and rise to global influence.

HIST 245g Gender and Sexualities in American History (4) An investigation of the nature of femininities and masculinities over the course of U.S. history; including topics like women’s rights, birth control, abortion, and
gay/lesbian liberation.

HIST 255g The Evolution Debates (4, Fa) Historical perspective for current debates on evolution, investigating the contexts for the emergence and development of evolutionary theory and its subsequent impact on society.

HIST 265g Understanding Race and Sex Historically (4, Sp) To introduce students to historical consideration of the difficult contemporary topics of sexuality and race globally.

HIST 266g Business and East Asian Culture, 1800-Present (4, Sp) Business history of East Asia (China, Japan, Korea, Taiwan, and Hong Kong) as related to culture, politics, and society.

HIST 270g Queens, Witches, Courtesans: Women and Power in Renaissance Europe (4) Exploration of the lives of women who defied the ideals of “wife, mother, widow” and examination of how gender and power were negotiated.

HIST 271g Early Native American Stories (4, Sp) An exploration of the history of Native America peoples and the ways they understood and explained the changes in their lives from 1492 to 1840.

HIST 272g Colonial Latin America (4, Sp) Introduction to Colonial Latin America; native American peoples, themes, issues, and evolution of Spanish and Portuguese colonial rule to ca. 1800.

HIST 275g The Worlds of the Silk Road (4, Sp) Exploration of the two millennia of economic exchanges and cross-cultural interaction between Asia and Europe.

HIST 301g Religions of Ancient Egypt and the Near East (4) (Enroll in REL 302)

HIST 302g From Sappho to Stonewall: Lesbians in History (4, Sp) The cultural, social, and personal meanings of same-sex relations between women in Europe and the United States, from archaic Greece to the 1960s.

HIST 303g Barbarians, Romans, and Christians (4, Fa) Exploration of the dynamic transformation of the social, political, religious, and intellectual landscape of the Mediterranean during Late Antiquity, c. 200 - c. 700 AD.

HIST 304g Archaeology of Egypt and the Near East (4) (Enroll in REL 394)

HIST 305g From Goddesses to Witches: Women in Premodern Europe (4, Sp) Social, cultural and political contexts of women’s spiritualities in Europe from the Paleolithic to the Reformation. Topics include: goddess-worship; Christian and Jewish contexts; male attitudes. (Duplicates credit in former HIST 270.)

HIST 306g The Early Middle Ages (4) Survey of European civilization in the Early Middle Ages.

HIST 307g Women in Medieval Europe, c. 1000-1500 (4, Fa) The influences of cultural, social, economic, familial, religious, and political factors on medieval women, as well as consideration of differences among them.

HIST 308g Britain and Ireland to 1200 C.E. (4, Fa) Anglo-Saxon and Celtic societies from the Iron Age to the Norman Invasions. Topics include: King Arthur, epics, sagas, Christianization, kingship, women, economic development and Viking. (Duplicates credit in former HIST 430.)

HIST 309g Britain and Ireland, 1100-1500 C.E. (4, Sp) English and Irish culture, economics, and politics during the expansion of the Norman-English kingdom, the colonization of Ireland, and subsequent development toward the English nation-state.

HIST 311g The Age of the French Revolution and Napoleon (4, Fa) Europe in the Old Regime; causes and course of the French Revolution; rise of Napoleon; revolutionary impact on Europe, 1715-1815.

HIST 313g France and the French from Napoleon to Mitterrand (4, Irregular) Social, cultural, and political history of France from 1819 to the present.

HIST 316g The Renaissance (4, Irregular) The flowering of arts, literature, and learning at the end of the Middle Ages.

HIST 317g The North American Indians in American Public Life (4, Irregular) (Enroll in ANTH 316g)

HIST 318g Early American Indian History (4, Sp) Relations of European settlers with native Americans from the 16th into the early 19th centuries; cultural contacts, trade and eventual conflicts.

HIST 320g Russian and Soviet Rebels: The Moral Dilemma and the Continuity of Dissent (4, Irregular) The ethical foundations and the intellectual dimensions of philosophical, social, religious, artistic, and political dissent in Russia from the 14th century until the present.

HIST 323g The Holocaust in 20th Century Europe (4, Sp) The origins and development of anti-Jewish persecution in Germany, resulting in the systematic mass murder of Europe’s Jews during World War II.

HIST 324g Islam in Russia and the Soviet Union (4, Sp) Cultural cohesiveness and ethnic diversity of Islam in the UESR; nature and effect of government policies aimed at the integration of Islam into the state.

HIST 325g Early Modern Britain (4, Sp) A survey of one of the most pivotal eras in British history: reform, regicide, and revolutions; new ideas, new religions, and new worlds.

HIST 326g The Victorians (4) Britain in the 19th century, politics, industrialization, and imperialism, change and continuity in social and cultural aspects, especially class, gender, and race relations. (Duplicates credit in the former HIST 433.)

HIST 327g Twentieth Century Britain (4) The rise and decline of modern Britain as a global political and economic force, social and cultural change, emergence of a multiracial and multiethnic society. (Duplicates credit in the former HIST 434.)

HIST 328g Poland and the Western Tradition (4, 2 years, irregular) Polish civilization from the 10th century to the present, with special emphasis upon the participation of Poland in the currents of the European tradition.

HIST 329g The Scottish Enlightenment (4) Scottish thought, religion, and culture under the Stuarts; the golden age of Scottish letters; and the “yuppie.”

HIST 330g The Enlightenment (4) Enlightenment and its impact and dynastic decline; problems of the Chinese Empire; nationalism and communism.

HIST 331g American Social History (4, Irregular) The social history of the American peoples from Colonial times until the 20th century, to include industrialization, urbanization, women, families, workers, immigration, ethnicity, racism, radicalism.

HIST 332g Education in America (4, Irregular) Western thought, religion, and culture; Japan as a modern nation.

HIST 333g The American Revolution (4, Irregular) European intellectual foundations and the intellectual dimensions of philosophical, social, religious, artistic, and political dissent in Russia from the 14th century until the present.

HIST 334g The American City (4, Irregular) Exploration of the two millennia of economic exchanges and cross-cultural interaction between Asia and Europe.

HIST 335g The French Revolution (4, Sp) French history from the 17th century until the present, with special emphasis upon the participation of France in the currents of the European tradition.

HIST 336g Modern France (4, Irregular) The ethical foundations and the intellectual dimensions of philosophical, social, religious, artistic, and political dissent in Russia from the 14th century until the present.

HIST 337g The Holocaust in 20th Century Europe (4, Sp) The origins and development of anti-Jewish persecution in Germany, resulting in the systematic mass murder of Europe’s Jews during World War II.

HIST 338g The French Revolution and Napoleon (4, Fa) Europe in the Old Regime; causes and course of the French Revolution; rise of Napoleon; revolutionary impact on Europe, 1715-1815.

HIST 339g The Age of the French Revolution and Napoleon (4, Fa) Europe in the Old Regime; causes and course of the French Revolution; rise of Napoleon; revolutionary impact on Europe, 1715-1815.

HIST 340g The American City (4, Irregular) Exploration of the two millennia of economic exchanges and cross-cultural interaction between Asia and Europe.

HIST 341g The French Revolution (4, Sp) French history from the 17th century until the present, with special emphasis upon the participation of France in the currents of the European tradition.

HIST 342g The American Revolution (4, Irregular) European intellectual foundations and the intellectual dimensions of philosophical, social, religious, artistic, and political dissent in Russia from the 14th century until the present.

HIST 343g The Enlightenment (4) Enlightenment and its impact and dynastic decline; problems of the Chinese Empire; nationalism and communism.

HIST 344g The American City (4, Irregular) Exploration of the two millennia of economic exchanges and cross-cultural interaction between Asia and Europe.

HIST 345g The French Revolution (4, Sp) French history from the 17th century until the present, with special emphasis upon the participation of France in the currents of the European tradition.

HIST 346g Modern France (4, Irregular) The ethical foundations and the intellectual dimensions of philosophical, social, religious, artistic, and political dissent in Russia from the 14th century until the present.

HIST 347g The American City (4, Irregular) Exploration of the two millennia of economic exchanges and cross-cultural interaction between Asia and Europe.

HIST 348g The French Revolution (4, Sp) French history from the 17th century until the present, with special emphasis upon the participation of France in the currents of the European tradition.
HIST 349 Colonial North America 1600-1760 (4, Fa) Colonial history of United States area, Canada, and Caribbean to 1760; Indians, European migration, plantation complexes, Puritan colonies, African slave migration, creole culture, borders, wars for empire.

HIST 350 American Standard of Living: 1600 to the Present (4, Fa) Socioeconomic history of material life: Indian experience, colonial diet, urbanization and slums, industrial households, 1920s durables revolution, installment credit, Depression, postwar boom, advertising, international comparisons.

HIST 351 The American Revolution (4, Fa) Origins, course and consequences of the American Revolution; the post-war establishment of the Constitution.

HIST 352 The American Civil War (4, Irregular) The causes, course, campaigns, and consequences of the American Civil War, 1861-1865.

HIST 353m Race and Racism in the Americas (4) (Enroll in AMST 253m)

HIST 354 Mexican Migration to the United States (4, 2 years, Fa) Mexican migration from the 1820s to the present, emphasizing labor migrants to the United States.

HIST 355 The African-American Experience (4, Fa) An historical and social analysis of the African-American experience from Colonial times to the present. (Duplicates credit in former HIST 250).

HIST 356 The Old South (4, Irregular) The South from Colonial days to 1860; slavery, the plantation system, politics; important social and economic problems.

HIST 357 The New South (4, Irregular) Economic and political change, racial problems, society, and culture in the American South from 1879 to the present.

HIST 358 U.S. Gay and Lesbian History (4, 5p) (Enroll in SWMS 358)

HIST 360 19th Century U.S. History (4, 5p) The social, political, and economic history of the United States from the formation of the Constitution to 1900.

HIST 361 20th Century U.S. History (4, Fa) Critical turning points in the 20th century; sources of major social and political change. Course materials include primary documents and historic radio/television recordings.

HIST 363 Foundations of American Foreign Policy, 1776 to the Present (4, 5p) Evolution of American principles, roles and policies in international relations from the founding of the republic to the present.

HIST 365 The Second World War (4, 2 years, Sp) Comparative analysis of the Second World War as a major transforming event of the 20th century. Its causes, conduct, and consequences for humanity.

HIST 366 The People's Republic of China (4) Politics, economy, society, and culture from 1949 to the present including the role of the communist party and the experiences of ordinary people.

HIST 369 Aztecs, Mayas, and other indigenous Peoples of the Americas (4) Introduction to Pre-Columbian Mesoamerica and the Andes, the causes and consequences of the Spanish conquest, and the establishment of colonial societies and economies.

HIST 370 Spanish America, 1492-1821 (4, 5p) Topics in Spanish colonialism in Americas, with a focus on how religious, sexual, and racial differences shaped colonial policies and practices.

HIST 372 Modern Latin America (4, 5p) Exploration of major themes and events in Latin American history from independence to the present. Upper-division standing.

HIST 373 History of the Mexican American (4, FaSp) (Enroll in AMST 373)

HIST 374 History of Mexico (4, Fa) The native cultures of Meso-America; colonial government, economy, and society; independence and 19th century liberalism; the Mexican revolution, 1910 to 1920. (Duplicates credit in former HIST 450.)

HIST 375 North Korean History (4, FaSp) History of North Korea from before statehood to the present. Recommended preparation: introductory course of Korean history.

HIST 376 U.S.-Japan Encounters: War, Trade, and Culture (4, Fa) (Enroll in IR 376)

HIST 378m Introduction to Asian American History (4, FaSp) (Enroll in AMST 378m)

HIST 379 Arabs in America (4, FaSp) (Enroll in AMST 379)

HIST 380 American Popular Culture (4, 5p) Rise of popular culture (sports, amusement parks, movies, television) and its significance in American society from mid 19th century to the present. (Duplicates credit in former HIST 255.)

HIST 381 Cinema and History (4, Irregular) Examines film as a means to narrate the past; treats the question of genre: epic, docudrama, the biopic, the music, adaptation, and such issues as authenticity and infotainment.

HIST 382 The Middle East, 500-1500 (4) Major topics, themes, and representative writings in the history and literature of the Arab and Islamic World during the Medieval period.

HIST 383 The Modern Middle East (4, FaSp) Survey of major political, economic, and cultural developments in the Middle East on the basis of documents, literature, and film produced in the region. (Duplicates credit in former HIST 280.)

HIST 384 Popular Culture in the Middle East (4, FaSpSm) Examination of the Middle East through the prism of its popular cultures; emphasis on audio, visual, and literary representations in relation to colonialism, nation-building, and globalization.

HIST 385 Anglo-American Law before the 18th Century (4) The evolution of discourse, practices, and institutions in Anglo-American legal history from the later Middle Ages to the 18th century.

HIST 386 American Legal History (4, 5p) An introduction to the study of law from a historical perspective; explores the interaction of law, culture, and politics from the Revolution through the New Deal.

HIST 388 Women and Gender in North American History through 1920 (4) Roles and relationships of women and men in North America from first contact to the 1920s, with special emphasis on race, marriage, and political culture.

HIST 389 Modern Iran (4, FaSpSm) (Enroll in MDES 313)

HIST 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

HIST 401 The Roman World (4, Fa) Rome at the crossroads of Europe and the Mediterranean; the rise of Rome to world power; social, cultural and political history of Republic and Empire.

HIST 402 Cultural Heritage, Religion, and Politics in the Middle East (4, Fa) (Enroll in REL 402)

HIST 403 Carolingian Europe (4) Political, religious, and intellectual culture of Europe in the 8th and 9th centuries.

HIST 404 Seminar in Korean History (4, Irregular) Exploration of issues and sources in Korean history; work on an individual research paper through an incremental process.

HIST 406 Special Periods in Medieval History (4, Irregular) Intensive study of selected periods.

HIST 407 Europe in the 10th Century (4) Political, religious, and intellectual culture of Europe in the 10th century and beyond.

HIST 408 Everyday Life in Chaucer's England (4, 5p) Readings and research on English social history between 1300 and 1550; emphasis on family structures, demography, gender relations, and class divisions.

HIST 410 The Age of Humanism and Reformation (4, Irregular) The thought, art, politics, and religion of Western Europe in the 16th and 17th centuries; emphasis on the contribution of Christian humanism.

HIST 414 Contemporary Europe (4, European) World War I and its aftermath; challenge of new culture values; World War II; problems of postwar adjustment.

HIST 415 Medieval and Early Modern Russia (4, 2 years, Fa) The politics, society, and culture of medieval and early modern Russia; the emergence of empire and the roots of its Eurasian identity.

HIST 416 History of Imperial Russia: 1689-1917 (4, 5p) The evolution of imperial society, politics and culture from Peter the Great to the Bolshevik Revolution. The dilemmas of identity in a multinational empire.

HIST 417 History of Soviet Russia: 1917-1991 (4, 2 years, Fa) The birth of the totalitarian regime, the emergence of the superpower and the socioeconomic, political and cultural developments that culminate in its demise.

HIST 419 Poland and its Neighbors in the Middle Ages (4, 2 years, 5p) Polish politics, society, and culture in relation to its regional neighbors, especially Bohemia and Hungary, from the 10th to the end of the 15th century.

HIST 421 European Intellectual and Cultural History: The Turn of the Century 1880-1920 (4) Intellectual and cultural trends of turn-of-the-century Europe, including Dadaism, Surrealism, Western Marxism, Fascism, Existentialism and Structuralism.

HIST 422 Family, Work, and Leisure in Russian History (4, 5p) Children and parents, love and marriage, work and leisure in the Russian village and city before and after the Revolution.
HIST 427 The German Question: Nation and identity in Modern Central Europe (4) A seminar on the making, unmaking and remaking of the German nation-state, with particular attention to issues of race, class and gender in German identity.

HIST 428 Life and Death in Nazi Germany (4) Social, cultural and medical history of Nazi Germany, emphasizing the Nazi vision of a racially pure national community. Recommended preparation: some European history.

HIST 429 Street Life: Urban Culture in Modern Europe (4, Sp) The 19th and 20th century European city as social artifact, cultural setting and object of fascination for its contemporary inhabitants.

HIST 430 Britain in the 18th Century (4) Political, social, and cultural aspects of British life from the accession of George I to about 1820.

HIST 431 Seminar in Modern Chinese History (4, max 8, FaSp) A readings and research seminar dealing with one topic in the history of China since 1800. Topics will change each time the course is offered. Recommended preparation: a class in Chinese history.

HIST 432 Street Life: Urban Culture in Modern Europe (4, Sp) The 19th and 20th century European city as social artifact, cultural setting and object of fascination for its contemporary inhabitants.

HIST 433 Race and Religious Wars in Modern World History (4, FaSpSm) Origins of riots against Mexicans, Chinese, Jews and other minority groups in Asia, Europe, Australia and the Americas.

HIST 434 Mass Violence and Comparative Genocide in Modern World History (4) Systematic exploration of origins, developments, forms, and aftermath of mass murder of large population groups, one of the dark elements of modern world history.

HIST 435 Comparative History and Theory of Fascism and Nazism (4, Fa) Analysis and comparison of Italian Fascism and German Nazism in national and international contexts; recent historiographic debates.

HIST 436 Resistance to Genocide (4) Examination of theoretical approaches to and historical accounts of resistance to genocide. Students conduct original research on how people oppose or resist mass atrocities. Recommended preparation: course on the Holocaust or genocide.

HIST 437 The Mexican Revolution (4, 2 years, Sp) The roots, trajectory and outcome of the Mexican revolution of 1910.

HIST 439 Advanced Topics in African-American History (4, Sp) Exploration of African-American history through primary and secondary sources employing a colloquium format with an emphasis on shared responsibility for comprehensive discussion and analysis. Upper-division or graduate standing.

HIST 441 Modern World History (4, Fa) Comparative patterns of historical change around the world, from ca. 1500 to ca. 1800.

HIST 442 The Ethics of Financial and Political Accountability (4) Examination of how kingdoms, empires and great companies have risen and fallen due to good or poor financial and political accountability.

HIST 443 Race and Religious Wars in Modern World History (4, FaSpSm) Origins of riots against Mexicans, Chinese, Jews and other minority groups in Asia, Europe, Australia and the Americas.

HIST 444 Mass Violence and Comparative Genocide in Modern World History (4) Systematic exploration of origins, developments, forms, and aftermath of mass murder of large population groups, one of the dark elements of modern world history.

HIST 445 Comparative History and Theory of Fascism and Nazism (4, Fa) Analysis and comparison of Italian Fascism and German Nazism in national and international contexts; recent historiographic debates.

HIST 446 Resistance to Genocide (4) Examination of theoretical approaches to and historical accounts of resistance to genocide. Students conduct original research on how people oppose or resist mass atrocities. Recommended preparation: course on the Holocaust or genocide.

HIST 448 Beauty and the Body in Historical Perspective (4, Sp) Cultural constructions of the body and beauty from gender, ethnicity, age, and disability perspectives in Europe and the United States from 1800 to the present.

HIST 449 The Age of Emancipation (4) Examines the evolution of racial status law in the long 19th century, with special emphasis on the relationship between slavery, segregation, and citizenship.

HIST 451 Advanced Topics in African-American History (4, Sp) Exploration of African-American history through primary and secondary sources employing a colloquium format with an emphasis on shared responsibility for comprehensive discussion and analysis. Upper-division or graduate standing.

HIST 452 Race, Slavery, and the Making of the Atlantic World (4, Fa) Introduction to the literature of the Atlantic World with a focus on slavery and its role in the emergence of the modern era. Seminar enrollment limited to 15 students.

HIST 453 The American West (4, Irregular) A reading and research seminar dealing with one topic in the history of the United States seen through the lives of individuals, American institutions; constitutional growth, expansion, sectionalism, and the Mexican War; the Compromise of 1850.

HIST 455 Advanced Topics in African-American History (4, Sp) Exploration of African-American history through primary and secondary sources employing a colloquium format with an emphasis on shared responsibility for comprehensive discussion and analysis. Upper-division or graduate standing.

HIST 456 Race, Slavery, and the Making of the Atlantic World (4, Fa) Introduction to the literature of the Atlantic World with a focus on slavery and its role in the emergence of the modern era. Seminar enrollment limited to 15 students.

HIST 457 The American West (4, Irregular) The nation’s westward movement from Colonial times to the present, with emphasis on the frontier’s effect on American life and institutions.

HIST 458 History of California (4, Fa) Exploration, colonization, and development of Hispanic California; coming of the Americans; political, economic, and cultural development of California since its acquisition by the United States.

HIST 460 19th Century American Thought (4, Fa) Major American thinkers from John Dewey and Jane Addams to Martin Luther King and Richard Rorty, with emphasis on race, religion, politics, and gender.

HIST 461 The Constitutional History of the United States (4) Historical influences on changes in the structure, practice, and interpretation of the American Constitution, including debates about institutional powers and civil/political rights and liberties. Recommended preparation: HIST 360 and HIST 361.

HIST 462 20th Century American Thought (4, Fa) Major American thinkers from John Dewey and Jane Addams to Martin Luther King and Richard Rorty, with emphasis on race, religion, politics, and gender.

HIST 463 The Constitutional History of the United States (4) Historical influences on changes in the structure, practice, and interpretation of the American Constitution, including debates about institutional powers and civil/political rights and liberties. Recommended preparation: HIST 360 and HIST 361.

HIST 464 Culture, Money, and Power: Japanese-American Relations since 1853 (4, Sp) Examination of the role of cultural, economic, and military forces in shaping relations between two of the most important nations in the Asia/Pacific regions. Recommended preparation: HIST 365 or appropriate International Relations course.

HIST 465 America in the Cold War World, 1945-1991 (4, Fa) America’s role in the Cold War and the impact of that conflict on its people, society and culture.

HIST 466 The Spanish Inquisition in the Early Modern Hispanic World (4, 2 years, Fa) The Spanish Inquisition in Spain and Colonial Latin America, major theories and interpretations. Junior or senior standing recommended.

HIST 467 Colonial Latin America Seminar (4, Sp) The history of colonial Latin America, focusing on the transformation of native Americans and Europeans into participants in a new colonial tradition. Upper-division standing. (Duplicates credit in former HIST 371.)

HIST 468 America in the Cold War World, 1945-1991 (4, Fa) America’s role in the Cold War and the impact of that conflict on its people, society and culture.

HIST 469 Special Topics (2-4, max 8, Irregular) Intensive study of subjects selected from the
early Middle Ages, emphasizing source material, bibliography, and historiographic problems.

HIST 506 Studies in Later Medieval History (4, Irregular) Intensive study of subjects selected from the later Middle Ages, emphasizing source material, bibliography, and historiographic problems.

HIST 508 Studies in the Renaissance (4) Europe in the Renaissance; sources; secondary bibliography; and historiography.

HIST 509 Studies in the Reformation (4) Readings, reports, and discussions of major problems, issues, and interpretations of the Reformation.

HIST 510 Studies in Early Modern European History (4, Irregular) Readings of major interpretive studies on the 17th and 18th centuries.

HIST 511 Studies in Early Modern British History (4) Readings of major interpretive and historiographical studies on 16th and 17th century British history.

HIST 514 Studies in Modern European History, 1789-1914 (4, Fa) Readings and current bibliography in the history of Europe from the French Revolution to the outbreak of World War 1; emphasis on cultural history approaches.

HIST 515 Studies in Modern European History: Europe’s 20th Century (4, Fa) Readings in the history and historiography of Europe in the 20th century.

HIST 517 Studies in Russian History (4, Irregular) Readings, discussions, and student papers in modern Russian history.

HIST 520 Modernity and its Visual Cultures (4, Sp) Western visual culture 1850-1930: historical background of changes in high and popular culture, technological reproducibility, display and spectacularization; recent literature and theoretical approaches.

HIST 525 Studies in British History (4, Irregular) Selected topics in English and British Empire history with emphasis on the 19th and 20th centuries.

HIST 534 Studies in Modern Japanese History (4) Selected topics and historiography of modern Japan. Open only to doctoral students.

HIST 535 Studies in Japanese History (4, max 8) Selected topics in historical problems dealing with Japan.

HIST 536 Studies in Chinese History (2 or 4, Irregular) Selected topics in historical problems dealing with China. Prerequisite: HIST 340.

HIST 540 Studies in Modern East Asian History (4, max 8, Irregular) Readings and analysis of a particular theme in modern Asian history, focusing on broad comparative issues like cultural identity, colonialism, nationalism, revolution, or interstate relations.

HIST 544 Feminist Theory for Historians (4, Fa) Readings in contemporary feminist theory, focused especially on theories that address the construction, writing, and general practice of history. Open only to graduate students.

HIST 546 Comparative History of Women and Gender in the West to 1800 (4, Fa) Topically-focused readings in the comparative history of women and gender in Europe and the Americas before 1800. Open only to graduate students.

HIST 550 Studies in the History of Women, Gender and Sexuality (4, max 8, Irregular) Readings and current bibliography in the history of women, gender and sexuality.

HIST 554 Readings in Chicano/Latino History (4, FaSp) (Enroll in AMST 554).

HIST 555 Studies in the American West (4) Zones of contact – physical, economic, political, ecological, symbolic, cultural, metaphorical – between peoples “west” of the Eurasian land mass since the rise of capitalist global expansion.

HIST 560 Transpacific History (4) Exploration of the connections and divergences in the Pacific region, 19th century to present. Topics include transnationalism, war, political economy, international relations, immigration, environmentalism, and race.

HIST 561 Historiography of Colonial Mexico (4, Fa) Introduction to the historiography of Colonial Mexico from 1500 to 1821.

HIST 565 Studies in American International History (4, FaSm) Readings and analyses of American policies, roles and principles in their interaction with peoples and nations of the world.

HIST 566 Historical Scholarship on North America to 1800 (4, Fa) Introduction to research in the fields of American Indian, colonial America, Atlantic world, and the early United States. Open only to graduate students.

HIST 567 Historical Scholarship on 19th Century America (4, Sp) Introduction to historiography and research in the political, economic, social, cultural, and intellectual history of the 19th century United States.

HIST 568 Historical Scholarship on 20th and 21st Century America (4, Sp) Introduction to historiography and research in the political, economic, social, cultural, and intellectual history of the 20th and 21st century United States.

HIST 575 Studies in 19th Century United States History (4, max 8, 2 years, Fa) Intensive readings and bibliography in the Early National, Jacksonian, Civil War, and Post-Civil War periods.

HIST 583 Studies in Urban History (4) Readings and analyses in the rise of the city and the impact of urbanization from the colonial era to the present.

HIST 584 Seminar in American Social History (4, Irregular) Creation of communities and societies; industrialization, urbanization, working class life; families, women, ethnicity; immigration; racism; mobility; reform and radicalism, leisure.

HIST 585 Studies in 20th Century American History (4) Readings and analyses in social and political problems, movements, and issues.

HIST 590 Directed Research (1-12, FaSpSm) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

HIST 592 Historiography (4, 5m) Historical criticism; form and mechanics of presenting research; writers of history, their works and philosophies; theories of historical development.

HIST 593 The Art of Historical Writing (4, Sp) An analysis of conventional forms of historical representation and the artistic and scientific challenges to them. Laboratory training in innovative forms of historical writing will be stressed.

HIST 594abz Master’s Thesis (2 or 4, FaSp) Credit on acceptance of thesis. Graded IP/CR/NC.

HIST 595x Practicum in Teaching the Liberal Arts (2, Fa) Basic principles of history pedagogy, with emphasis on practical applications and the importance of career-long skill development. Required for first semester teaching assistants in history. Graded CR/NC.

HIST 602 Seminar in Ancient History (2 or 4, max 8, Irregular) Directed research in historical problems.

HIST 605 Seminar in Medieval European History (2 or 4, max 8, Irregular) Directed research in historical problems.

HIST 608 Seminar on Premodern Europe (4, max 8) Directed research on topics from late antiquity to the 18th century. Students will work with both their faculty advisers and the course instructor.

HIST 610 Seminar in Early Modern European History (2 or 4, max 8, Irregular) Directed research in historical problems concerning the 17th and 18th centuries.

HIST 611 Seminar in Modern European History (2 or 4, max 8, Irregular) Directed research in historical problems dealing with Europe since 1789.

HIST 612 Seminar in Russian History (2 or 4, max 8, Irregular) Directed research in historical problems.

HIST 620 Research Seminar on Modern Visual Culture (4, Fa) A research seminar focusing on Western visual culture since the mid-18th century. Recommended preparation: HIST 520.

HIST 630 Seminar in Japanese History (2 or 4, max 8, Irregular) Directed research in historical problems.

HIST 635 Seminar in Chinese History (2 or 4, max 8, Irregular) Directed research in historical problems. Prerequisite: HIST 340.

HIST 650 Seminar on Women’s and Family History (4, max 8, Sp) Readings, discussions, and directed research on women’s and family histories.

HIST 655 Seminar in Western American History (2 or 4, max 8) Selected topics in the history of the American frontier and the West.

HIST 660 Research Seminar on Transpacific Studies (4, FaSp) (Enroll in AMST 660).

HIST 670 Illness and Healing in the Modern World (4, Sp) Illness and healing in Europe and the Americas since 1492, especially the changing clinical and cultural definitions and responses to disease and ailments.

HIST 673 Seminar in Early North American History (4, max 8) Primary research on issues related to the history of the colonial and early national periods with an emphasis on areas that became the United States.

HIST 675 Seminar in 19th Century United States History (4, max 8, 2 years, Sp) Research in historical problems of the Antebellum, Civil War, and Post-Civil War periods.

HIST 680 Seminar in 20th Century United States History (4, max 8, 2 years, Fa) Directed research in historical problems of the Reform, World War I, interwar, World War II, and Post-War periods.

HIST 700 Historical Explanation and Research Design (4) Designed for all doctoral candidates in their last year of course work, this practicum helps students define a dissertation topic and produce a prospectus. Graded CR/NC. Open only to graduate students.

HIST 710 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.
Interdisciplinary Major

The interdisciplinary major allows students to create an individual, original major. It is a flexible option available when a combination of existing majors and academic minors does not adequately fulfill a student’s educational goals. With close advisement, students can build their own programs of study.

The interdisciplinary major is an intensive research program for students with a focused interest in a topic that requires study from more than one disciplinary perspective. Interdisciplinary majors are usually self-motivated students with good writing skills and an intellectual passion for a particular area of inquiry. Course work is selected to lead to a thesis project integrating the areas of research comprising the interdisciplinary major.

**Admission**

Admission to the interdisciplinary major is by application. Applications, which may be obtained from the program office, are considered by a special admissions committee. Interested students must have a GPA of 3.0 (A – 4.0) or above; those with less than 3.3 are the exception. No one is usually admitted after the end of the first semester of the junior year.

**Program Requirements**

Students in the program must meet all graduation requirements of the college. When admitted, students establish an academic “contract,” which outlines each semester’s course of study through graduation. The contract includes a minimum of nine (four unit) upper-division courses, distributed in at least two fields. The primary focus of the major should be in the USC Dornsife College of Letters, Arts and Sciences. These areas of concentration must then be combined in a senior thesis or project, written under the guidance of a faculty committee.

**Restrictions**

Course prerequisites cannot be waived; admission to courses restricted to majors is subject to availability and direct negotiations; admission to departments and/or schools which have their own admission requirements must be processed separately.

Bachelor of Arts in Narrative Studies

See English for a full description of the major.

Minor in Critical Approaches to Leadership

This minor is offered by faculty from several disciplines whose perspectives are brought to bear on issues and questions that should inform the judgements of capable, ethical leaders. Students are introduced to theoretical and historical models of leadership, engage in case studies of modern leaders, select critical electives that explore ethical and social considerations of leadership, examine professional applications of leadership principles, and integrate what they have learned in a capstone course. The emphasis of the minor is on leadership as expertise in community-building and takes advantage of USC’s programs in community service, including the Joint Educational Project, the Jesse M. Unruh Institute of Politics and other internships available through the Division of Student Affairs.

Five upper-division courses, totaling 20 units, are required.

- **Core Courses**
  - **Choose two:**
    - CLAS 370 Leaders and Communities 4
    - CLAS 375 Alexander the Great: Leadership, Personality and World Conquest 4
    - PHIL 335 Theoretical Models of Leadership 4
    - MDA 355 Case Studies in Modern Leadership 4

- **Critical Electives**
  - **Group A — choose one**
    - PHIL 337 History of Modern Political Philosophy 4
    - PSYC 335 Social Psychology 4
    - REL 341 Ethics in a Technological Society 4
    - REL 360 Ethical Issues in the New Medical Revolution 4
    - REL 375 Conflict and Change and the Ethics of Business 4
    - SOCI 320 Social Psychology 4
  - **Group B — choose one**
    - AMST 465 Leadership in the Community, or MDA 365 The Art and Adventure of Leadership, or MDA 475 The Future of California 4

- **Capstone Course**
  - AMST 465 Leadership in the Community, or MDA 365 The Art and Adventure of Leadership, or MDA 475 The Future of California 4

* **Prerequisite:** IR 210
* **Required Course Work:** 24 units

**Interdisciplinary Minor in International Health, Development, and Social Justice**

This minor is intended for students who wish to understand the challenges associated with health care as an ethical issue in the international context. In doing so, it focuses on the convergence of three large fields of inquiry, raising questions about their intersection. Social justice is concerned with equity, with questions of fairness as they inform (or should inform) access to resources necessary for the survival and well being of people around the globe.

To provide the necessary content, this minor presents an introduction to political economy, to cross-cultural approaches to health and illnesses, and to the ethics of economic development as they relate to health care.

This minor is intended to prepare students for careers and leadership roles in the arenas of international health, medical ethics, overpopulation, economic development, human welfare and principles of social justice.

As with all minors, students should include four courses outside their major, four courses at the upper-division level, and four courses that are not being used to satisfy any other subject requirement. In addition, to satisfy this minor, students must choose courses from at least two different departments.

**Required Course Work:** 24 units

**Lower Division Requirement:** Choose one course (4 units)

**Core Courses**

- **Choose two:**
  - IR 303 Leadership and Diplomacy 4
  - MOR 470 Global Leadership 4
  - POSC 255 World Political Leadership 4
  - POSC 253 Presidents and the Presidency 4

- **Capstone Course**
  - AMST 465 Leadership in the Community, or MDA 365 The Art and Adventure of Leadership, or MDA 475 The Future of California 4

- **Required Course Work:** 24 units

**The courses in this and the following categories provide an understanding of the forces that shape global development.**

- **ECON 210xg** Political Economy and Social Issues 4
- **ECON 340** Economics of Less Developed Countries 4
- **ECON 350** The World Economy 4
- **POSC 425** Politics and the Economy 4

* **Prerequisite:** ECON 203 or 205

**Theories of Development:** Choose one course (4 units)

- IR 235 Rich and Poor States in the World Political Economy 4
- IR 344 Developing Countries in World Politics 4
- IR 454 The International Political Economy of Development 4
- **POSC 255** Cultures, Civilizations and Ethnicities in World Politics 4
- **POSC 450** Political Development 4
- **POSC 456** Women in International Politics 4
- **SOCI 314** Analyzing Social Statistics 4
- **SOCI 362** Global and Transnational Sociology 4
- **SOCI 470** Development and Social Change in the Third World 4

**Cross-cultural Perspectives on Health and...

Emeritus Professor of the Practice: Gary W. Glass, Ph.D.*

* Recipient of university-wide or college award for teaching or research.

Degree Programs

The School of International Relations (SIR) offers a B.A. in international relations; a B.A. in international relations (global business); a B.A. in international relations and the global economy; a progressive degree in international relations; a dual M.A. in international relations/Juris Doctor offered with the USC Gould School of Law; a Master of Public Diplomacy; and a Ph.D. in political science and international relations offered with the Political Science Department. The SIR also offers minors in global communication, international relations and international policy and management.

The SIR encourages undergraduate double majors, especially with economics, environmental studies, geography, history, journalism, foreign languages, political science and sociology. Programs are flexible, allowing students to gain a broad background in international studies and, at the same time, to specialize in a particular area. Minors in international relations; international policy and management; international urban development; and global communication, as well as interdisciplinary minors in nonprofits, philanthropy and volunteerism; and Russian area studies are also offered.

Undergraduate Degrees

Major Requirements for the Bachelor of Arts in International Relations

The International Relations major requires a minimum of 48 units. All majors must complete IR 210 International Approaches to International Relations in the first year. All majors must complete IR 211 International Relations: Approaches to Research and IR 213 The Global Economy in their second year. IR 210 is a corequisite for IR 212, and a prerequisite for IR 211 and IR 213. IR 210 should be completed before attempting 400-level courses.

Four semesters of a single foreign language are required. All majors are encouraged to obtain as much foreign language training as possible either through a major or a minor in a foreign language or through a study abroad program abroad.

Beyond IR 210, IR 211, IR 212 and IR 213, international relations majors are required to take eight additional courses. Majors must choose two, three-course concentrations. One of these should be from the following: Culture, Gender and a Global Society; Foreign Policy Analysis; International Political Economy; International Politics and Security Studies; Regional Studies (Europe; Russia, Eastern Europe and Eurasia; Latin America; the Middle East and Africa; or Pacific Rim). The student may design the second concentration with the support of a regular faculty member and approved by the International Relations Curriculum Committee. Every concentration must include at least one international relations course, typically the introductory course.

International Politics and Security Studies

War and peace are at the heart of relations among nations. These courses investigate defense analysis, arms control, peace-building and strategic studies. The domestic, technological and international factors influencing defense and arms control policies and negotiations are considered. The World Wars, Korea, Vietnam and the numerous crises of the Cold War are the backdrop in these courses. Required course: IR 307 or IR 626.
Additionally, he or she must take at least eight upper single foreign language are required. Foreign language a language appropriate to that region. Four semesters of ECON 336, ECON 430, ECON 450, IR 305, IR 309, IR 332, IR 334, IR 335, IR 326, IR 337, IR 363, IR 364, IR 429, IR 454, POSC 430 and POSC 431.

Foreign Policy Analysis
This area examines the external relations of states, particularly the domestic and international factors that influence the formulation and implementation of national foreign policies. Factors within states (leadership, small group dynamics and domestic lobbying groups) and factors between states are stressed. Required course: IR 341 or IR 343. Additional courses are: IR 303, IR 309, IR 346, IR 365, IR 368, IR 398, IR 403, IR 441, IR 442, IR 445 and IR 465.

Regional Studies
The regional studies field focuses on geographic regions, such as the Pacific Rim, Latin America, Europe, the Middle East and Africa. These courses test general theories of international relations within the framework of a specific region. The economic, political, ethnic and social history of a region are examined to help explain current developments and interstate and domestic policies and issues within a region.

Europe: Required course: IR 369. Additional courses are: ANTH 326, FREN 400, FREN 410, GERM 465, HIST 312, HIST 332, HIST 414, HIST 422, HIST 427, HIST 424, IR 358, IR 369, IR 425, IR 429, POSC 470, POSC 471, POSC 463, SPAN 320 and SPAN 350.

Russia, Eastern Europe and Eurasia: Required course: IR 345. Additional courses are: HIST 320, HIST 328, HIST 416, IR 346, IR 428, IR 439, POSC 464 and SLL 330.

Latin America: Required course: IR 364. Additional courses are: ANTH 328, ANTH 415, GEOL 335, HIST 372, HIST 374, IR 317, IR 365, IR 366, IR 465, IR 466, POSC 450, POSC 452, POSC 460, SPAN 421 and SPAN 461.

The Middle East and Africa: Required course: IR 362 or IR 367. Additional courses are: ANTH 327, ECON 342, IR 362, IR 363, IR 364, IR 463 and POSC 451.

Culture, Gender and Global Society
This field explores identities and interests shaping the politics of intellectual global society. Required course: IR 305 or IR 316. Additional courses are: EALC 375, IR 303, IR 306, IR 309, IR 310, IR 318, IR 344, IR 382, IR 403, IR 406, IR 422, IR 424, IR 428, IR 446, POSC 456, PPD 382, SOCI 335, SOCI 435, SOCI 445, SOCI 460 and SOCI 470.

If a student chooses a regional studies concentration, then his or her foreign language requirement should be in a language appropriate to that region. Four semesters of a single foreign language are required. Foreign language units do not count toward the minimum total of 40 units for the international relations major.

The student must take at least 32 units of international relations courses, including the two 300-level IR courses. Additionally, he or she must take at least eight upper-

division courses from the above curriculum, including at least one regional course and one 400-level course.

Honors Program
The honors program centers around IR 494 Honors Seminar that culminates in a thesis based on original research. In the spring of the junior year, students who have earned a GPA of 3.5 in the major and an overall GPA of 3.3 submit an application, two letters of recommendation and a research proposal that identifies the thesis topic to the student affairs office. Upon admission to the program, the student identifies an appropriate faculty member to co-supervise the thesis and, in the fall of the senior year, enrolls in IR 494. If the program is completed successfully (a B+ or better in IR 494, a major GPA of 3.5 and an overall GPA of 3.3 [A or 4.0]), the transcript will read “With Honors.”

Bachelor of Arts in International Relations (Global Business)
The B.A. in International Relations with an emphasis in Global Business will give students the opportunity to pursue a degree in international relations and acquire specific skills in one of four concentrations in international business: international finance, international financial management, global marketing or global management. Students who have earned a GPA of 3.0 or above and a “B” average in IR 210 International Relations: Introductory Analysis and a second 300-level or above IR course are eligible to apply during their sophomore year. In addition to the IR requirements, students need to complete the following prerequisite courses: ECON 203 Principles of Microeconomics or ECON 352 Microeconomics for Business, ECON 205 Principles of Macroeconomics or ECON 354 Macroeconomics for Business and MATH 118* Fundamental Principles of the Calculus before they can begin this program. The international relations course work consists of 38 units: IR 310, a regional course, a 400-level course, an international political economy course (IR 324, IR 326 or IR 330) and three upper-division electives.

Bachelor of Arts in International Relations and the Global Economy
The B.A. in International Relations and the Global Economy offers students rigorous interdisciplinary training at the intersection of international relations and economics. The major prepares students for careers ranging from foreign policy and international development to international finance and political risk analysis. It is also ideally suited for students who plan to seek advanced degrees in the social sciences.

### REGIONAL STUDY

Choose one course (4 units):
- ECON 434 Economic Development of the Middle East
- ECON 343 Economic Development of East Asia
- IR 364 The Political Economy of Latin American Development
- IR 428 China’s Political Economy
- IR 439 Political Economy of Russia and Eurasia

### SENIOR EMPHASIS

Choose one course (4 units):
- ECON 450 International Trade (pre-req: ECON 303)
- ECON 452 International Finance
- IR 430 The Politics of International Trade
- IR 454 The International Political Economy of Development

Total: 12 courses, 48 units

* Prerequisite required

Bachelor of Science in Global Health Studies

The Bachelor of Science in Global Health Studies is a multidisciplinary degree of the Keck School of Medicine’s Department of Preventive Medicine. Students complete course work in Health Promotion and Disease Prevention Studies. For degree requirements, see Preventive Medicine.

Progressive Degree Program in International Relations

This progressive degree program permits superior students to complete all requirements for both the B.A. and the M.A. degrees in international relations in five years. Students may apply on completion of 64 units of course work, but not later than the end of their junior year (or the completion of 96 units). To be eligible for admission, students must have at least a 3.5 overall GPA.
Minor in International Relations

The minor in international relations allows students to develop a specialty in the field without a full major. Requirements are: IR 210 International Relations: Introductory Analysis and IR 300-400 level course. Students planning to minor in international relations should see the School of International Relations advisers in Von KleinSmid Center 301.

Minor in Global Communication

The rise of global firms and international changes that followed the end of the cold war raise new opportunities and challenges. This minor provides students from fields such as business, journalism, engineering and political science an understanding of the dynamic nature of global relations, communications and technology. The global communication minor consists of six 4-unit courses, three from International Relations and three from Communication.

Graduate Degrees

The School of International Relations offers graduate curricula leading to several different graduate degrees. With courses and faculty renowned for their strengths in a great variety of fields – culture, gender and globalization, political economy, foreign policy and security, regional studies – our graduate international programs generally emphasize training for careers in advanced research and teaching. The school also welcomes professionally oriented students with related interests in fields such as law, communication, economics and business and public policy.

The School of International Relations has programs leading to a professional B.A./M.A. in international relations; a dual M.A. in international relations/Juris Doctor offered with the USC Gould School of Law; a dual M.A. in international relations/Master of Planning and M.A. in International Relations/Master of Public Administration offered with the USC Price School of Public Policy; Master of Public Diplomacy; and a Ph.D. in political science and international relations offered with the political Science Department.

Admission Requirements

The School of International Relations welcomes talented candidates from a variety of academic backgrounds. Admission decisions are based on consideration of applicants’ prior academic performance, as reflected in course grades and letters of recommendation. Applicants also are strongly encouraged to submit a sample of their written work in English, preferably a research-oriented paper. The committee also considers the potential for success in a graduate program based on Graduate Record Examinations scores. Business, government and other practical experiences related to international relations also are taken into account.

It is strongly recommended that master’s and doctoral degree candidates should have completed at least one undergraduate course in statistics or quantitative
methods and at least one course in economics before enrolling for graduate study. A course in social or political theory or international history also is highly desirable. The faculty may admit promising students who lack one or more of these courses. Students with this preparation tend to be more successful in the program and more likely to prosper in an academic or research setting afterwards.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

All graduate students are required to maintain regular contact with the graduate coordinator to assure compliance with departmental regulations.

Foreign Language Requirement

Students in the progressive B.A./M.A. and joint M.A./J.D., M.A./MPl and M.A./MPA master’s programs must show proficiency in at least one foreign language at the fourth semester level, in special instances a doctoral student’s dissertation committee may require a student to show research competence in one or two foreign languages. International students whose native language is not English may satisfy this requirement by submitting proof of their ability to read and understand social science materials in their native language where appropriate, or in another language in which significant social science material is available.

Substantive Paper Requirement

Students in the progressive B.A./M.A. and joint M.A./J.D., M.A./MPl and M.A./MPA master’s programs must submit a substantive paper or alternative project. This requirement is meant to encourage students to polish articles that may ultimately prove suitable for publication, to develop materials that will display their talents for doctoral and graduate school admission committees or prospective employers, and to begin to develop dissertation proposals early in the graduate education process. A student may submit a revised version of a research paper or a detailed policy memorandum along with a copy of the original paper for which he or she received a grade of B+ or better in one international relations graduate class. Students may also submit a paper or project based on other original work. A two-person faculty examining committee, which must consist of School of International Relations faculty members, will evaluate the substantive paper or project and may, at their discretion, call the student for an oral examination on the project. The student may add a third outside member to the committee. They may also choose to examine the student on his or her course work in international relations.

Master of Arts, International Relations

Requirements

Students who have the degree objective of joint M.A. programs (Master of Arts, International Relations/Juris Doctor; Master of Arts, International Relations/Master of Planning; and Master of Arts, International Relations/Master of Public Administration) must apply for an M.A. in International Relations. Students pursuing these joint programs must refer to the specific course requirements outlined for each program.

Advisement

Students should consult with the school’s faculty adviser each semester before registering for courses for the next semester. Students also are encouraged to seek advice from other faculty who work in areas related to their interests. Students may, if they wish and if a faculty member agrees, select a different faculty adviser from among the school’s faculty. Consult with and inform the Office of Student Affairs regarding changes in faculty advisers.

Master of Arts, Political Science and International Relations

Only students who have a degree objective of obtaining the Ph.D. will be admitted into the Political Science and International Relations program. However, interested students can obtain an M.A. degree while pursuing the Ph.D. The degree is awarded upon successful completion of (a) 28 units, including three of the five courses in the program’s theory and methodology sequence, a master’s thesis and registration in POSC 594ab or IR 594ab; and (b) the approval of the master’s thesis by the thesis committee.

Master of Arts, International Relations/Juris Doctor

The USC Gould School of Law and the School of International Relations jointly offer a three-year program leading to the J.D. and M.A. degrees. (Students may extend the dual degree program to four years.) Applicants must apply to both the law school and the School of International Relations and meet requirements for admission to both. In addition to the LSAT, students interested in this program are required to take the Graduate Record Examinations (GRE). Law students may apply to the School of International Relations during their first year at the law school.

In the first year, students take their course work in the law school exclusively. The second and third years include 24 units of courses in international relations and 40 units of law. Students pursuing the dual degree must complete LAW 662 or LAW 764 and one additional international law course. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honors programs.

Students pursuing the dual degree must complete 24 units within the School of International Relations at the 500 level or above. These students are required to successfully complete IR 500 International Relations Theory, either IR 513 Social Science and Historical Research Methods or IR 517 International Policy Analysis, and two domain courses selected from among IR 502 Conflict and Cooperation, IR 509 Culture, Gender, and Global Society, IR 521 Introduction to Foreign Policy Analysis and IR 541 Politics of the World Economy. Like all other international relations master’s degree programs, students in the dual degree program must complete a substantive paper or alternative project. The requirements, standards and evaluation procedure for the substantive paper are identical to those listed above for all M.A. students except that one member of the examining committee must come from the law school.

Master of Public Diplomacy and Master of Public Diplomacy (Practitioner and Mid-Career Professional)

These degrees combine the resources of the USC Annenberg School for Communication and Journalism and USC Dornsife College of Letters, Arts and Sciences’ School of International Relations. The Master of Public Diplomacy is designed for students who already have a substantial undergraduate background in social sciences or relevant professional experience in subjects such as communication, film and media studies, journalism, political science, public relations and international relations. The Master of Public Diplomacy (Practitioner and Mid-Career Professional) is designed for students who have at least five years experience working in public diplomacy. See Annenberg School for Communication and Journalism for degree requirements.

Doctor of Philosophy in Political Science and International Relations

See Political Science and International Relations for degree requirements.

Courses of Instruction

International Relations (IR)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

IR 100x The United States and World Affairs (4) The changing character of contemporary international political issues from the Cold War to the future and U.S. foreign policy options for the future; exploration of competing perspectives. Not available for major credit.

IR 104x International Relations (4) Basic concepts of world affairs for non-majors. Development of competency to understand and critically evaluate global relations and international events, stressing empirical approaches. Not available for major credit.

IR 210 International Relations: Introductory Analysis (4, 5p) Comprehensive introduction to contending theoretical and analytical approaches; development of critical, evaluative, cognitive, and analytical competencies regarding historical and contemporary issues.

IR 211 International Relations: Approaches to Research (4, FaSpSm) Introduction to theoretically oriented research approaches and designs; emphasis on the logics of argumentation.

IR 212 Historical Approaches to International Relations (4, FaSpSm) Introduction to historical research methods with an emphasis on historical texts and modes of discourse.

IR 213 The Global Economy (4, FaSpSm) Economic and political concepts necessary to the understanding of the modern global economy. Topics include international trade, foreign investment and migration.

IR 302 International Relations of the Great Powers in the Late 19th and 20th Centuries (4) Introductory analysis of the interactions of the great powers during the period; initial focus on Europe, with expansion to include global relations.

IR 303 Leadership and Diplomacy (4) The role of leaders, diplomatic leadership and creativity in statecraft, providing a deep understanding of the theoretical and practical dimensions of diplomacy.

IR 304 Espionage and Intelligence (4) The role and evolution of espionage and intelligence as tools of statecraft are examined. Open, covert, clandestine, counterintelligence programs and oversight processes are considered.

IR 305 Managing New Global Challenges (4) Examines strategies for managing global issues in the post Cold War period. Explores ways that international institutions, national governments and non-state actors work separately and together to provide order and control over complex international issues areas. Issues that will receive attention could include financial and monetary
relations, trade and foreign investment, preservation of the environment, the spread of weapons of mass destruction, population and migration, terrorism and ethnic strife.

IR 306 International Organizations (4) The emergence of international organizations as a permanent feature in world politics; role of the United Nations organization as well as regional international organizations.

IR 307 Contemporary International Politics (4) Recent events, forces, and conditions in the international political system. Basic organizing concepts used in the analysis of the data of international politics.

IR 308 Globalization: Issues and Controversies (4) People, money, things, information, and ideas flow across national borders. How can we understand globalization, its consequences, and how to manage it? Multimedia training is provided.

IR 309 Global Governance (4) Introduction to global governance structure and institutions. Exploration of the appropriate role for states, international organizations, civil society and individuals within the global governance structure.

IR 310 Peace and Conflict Studies (4) Interdisciplinary study of the pursuit of peace, including causes of wars, arms races, conflict resolution, peace movements, nonviolent resistance, and peace with justice.

IR 311 Research Design and Methods (4) Exploration of critical scholarship on research design, including case selection, hypothesis testing, and field research techniques.

IR 312 Religions and Political Violence (4) An introduction to debates about the intersection of religion and conflict in politics and international affairs; theoretical, classical, and contemporary issues.

IR 313 Ethnicity and Nationalism in World Politics (4) Ethnic identity and nation formation in the global society of states; nation-states; conflict or political accommodation within multinational states; impact of dispersed nations on interstate relations.

IR 314 Gender and Global Issues (4) An examination of the role women have played in world politics focusing on issues of war and peace, the environment and the global economy.

IR 315 Conflict Resolution and Peace Research (4) Processes of conflict, violence, change, integration, stability, and peace in world society, analyzed primarily through the literature of the peace research movement.

IR 322 Politics of Global Environment (4) Examines the politics of managing the global environment. The nature of ecosystems, common problems, population and resource utilization problems along with biodiversity and global governance are emphasized.

IR 323 Multinational Enterprises and World Politics (4) Political implications of interactions between different types of multinational enterprises and all levels of U.S. government, other international nations, and less-developed countries.

IR 324 Rich and Poor States in the World Political Economy (4) Dynamic inequality in relations between rich and poor; contending views on causes; legacies of imperialism; ameliorative strategies of poor states; responses of richer states.

IR 327 International Negotiation (4) A practical course designed to improve your negotiation skills. Ideas for diagnosing situations and identifying strategies, which you apply in case studies and personal exercises. Recommended preparation: two IR courses.

IR 328 The Evolving Global Economic Architecture: Capital Mobility (4) Exploration of the evolving global economic architecture of the past seventy years; overview of the possible future contours of economic and political globalization. Recommended preparation: introductory economics.

IR 329 The Global Finance and Monetary Regime (4) The international financial and monetary regime, its evolution and the problems facing it today.

IR 330 Politics of the World Economy (4) Introduction to the relationship between political and economic development and ideas concerning the origins and behavior of capitalism and its impact on international relations.

IR 331 The Global Economy 2030 (4, F) Analysis of key ideas from economics, demography and technology. Guest lecturers illuminate possible conditions of the global economy in 2030.

IR 333 China in International Affairs (4) Economic reform, the open door, and China's changing role in the international system. Relations with the United States, Japan, and other key powers in Asia. Tensions between the interests of American business and the human rights community over China policy.

IR 337 The Impact of Remittances on Development in Mexico (4) Examines the nature of remittances and their effects. Can remittances promote development? Explores policymaking focused on improving the quality of remittance expenditures in Mexico. Recommended preparation: working ability with Spanish.

IR 339 Public Health and International Relations (4, Sp) Examination of threats to global security, state sovereignty, and population health posed by infectious diseases, natural disasters, war and civil conflict.

IR 341 Foreign Policy Analysis (4) Basic concepts and analytical approaches in the study of decision-making at the international level. This is a case-based class, requiring participation of students in interactive discussions of decision forcing and retrospective foreign policy cases.

IR 342 The Politics and Strategy of Weapons of Mass Destruction (4) Causes and effects of use and spread of nuclear, biological and chemical weapons; responses to WMD, including deterrence, preventive war, and non-proliferation policies and negotiations.

IR 343 U.S. Foreign Policy since World War II (4) Analysis of U.S. foreign policy since 1945 as a basis for understanding significant new trends. Explanation of contemporary issues in U.S. relations with other nations.

IR 344 Developing Countries in World Politics (4) Origin, concepts, reallities, and ideals of the non-aligned movement, focusing on the United States' role in the developing world.

IR 345 Russian and Soviet Foreign Policy (4) Overview of Soviet and Russian foreign policy in the 20th century. Review of the diplomatic history of the period and introduction to models of foreign policy used to analyze Soviet and Russian behavior.

IR 346 Foreign Policy of Eastern Europe and the Balkans (4) Analysis of contemporary foreign policy issues in East-Central Europe, including inter- and intra-state conflict, peacekeeping, NATO and EU enlargement, cross-border minorities and refugees.

IR 349 International Law and Politics (4) Exploration of international law and international politics, including sovereignty, war, international tribunals, the environment, and human rights.

IR 358 The Asia Pacific in World Affairs (4) The cultural, political, economic, and social aspects of the Asia Pacific’s rise to prominence in world affairs. Reasons for the “successes” of many Asian economies and the environmental and social problems accompanying their rapid transformation. The difficulties of interaction in complex cultural situations illustrated by participation in a computer-assisted simulation.

IR 360 International Relations of the Pacific Rim (4) Political, economic and security relations among the countries in East Asia and the Pacific with the emphasis on the role of the United States, China and Japan.

IR 361 South and Southeast Asia in International Affairs (4) The historical, cultural, and political reasons for Asia's dramatic transformation into a powerful engine of world economic growth. The secondary consequences of economic growth for environmental protection, gender relations, ethnicity, and military tension.

IR 362 The International Relations of the Contemporary Middle East (4) Introduction to problems and issues in the Middle East today: religio-ethnic rivalries, conflicting nationalisms and ideologies, the Arab-Israeli conflict, Middle East oil.

IR 363 Middle East Political Economy (4) Examination of general economic development issues: population, agriculture, industrialization, trade, oil, etc. Several Mid East case study countries are then explored in depth.

IR 364 The Political Economy of Latin American Development (4) The main economic development themes and strategies in Latin America over the past century. The interplay between domestic and international variables, and the resulting dynamic changes.

IR 365 Politics and Democracy in Latin America (4) Examines Latin America’s experience with democracy emphasizing events since the 1980s. Analyzes the roles of interest groups, ideology, domestic politics, bureaucratic processes, perceptions and analogical reasoning.

IR 366 Mexico and its Relations with the United States (4) Analysis of Mexico and U.S.-Mexico relations, both historically and in the present day, to understand better the challenges in this key bilateral relationship.

IR 367 Africa in International Affairs (4) General overview of main historical, political, and economic issues as they affect Africa, focusing on nationalism, development, and superpower competition in Africa.

IR 368 French Foreign Policy: 1945 to the Present (4) Introduction to historical, thematic perspectives of French foreign policy since 1945 including review of external and internal constraints influencing foreign policy. (Paris semester only).

IR 369 Post-War European Relations (4) European interstate conflict and cooperation since 1945: history of Western European integration during the Cold War; the European Union in post-Cold War Europe.

IR 371 Global Civil Society: Non-State Actors in World Politics (4) Examination of diplomatic and moral relationships between sovereign states and transnational non-state actors, both benevolent (humanitarian groups and philanthropies) and malevolent (mercenaries, pirates and terrorists).

IR 376 U.S.-Japan Encounters: War, Trade, and Culture (4) The significance of U.S.-Japan relations is addressed through historical and policy analysis of America, Japan, and the Asia-Pacific region.
IR 381 Introduction to International Security (4)
Alternative conceptions of security; evolution of nuclear strategy; efforts to control the development and spread of nuclear and conventional weapons; current security issues.

IR 382 Order and Disorder in Global Affairs (4)
Modern and post-modern perspectives on changes in the inter-state system, relations among cultures and civilizations, the conditions of ecologically sustainable human development.

IR 383 Third World Negotiations (4)
Origins, intensity, management and/or resolution of regional conflicts in developing countries and the role and intervention of great powers.

IR 384 Introduction to Asian Security (4)
Introduction to key security trends in Asia-Pacific, emphasizing strategic competition between U.S., Russia, and China; regional military capabilities; rise of neutrality politics.

IR 385 European Foreign Policy and Security Issues (4)
Western European foreign policy and defense issues; consensus and trends underscoring political and strategic change in postwar European alliances. Course will rely heavily on case teaching approach.

IR 386 International Terrorism and Liberal Democracy (4)
Examination of the nexus of terrorist threat and governmental response. Specifically, the class analyzes both terrorism’s effectiveness as a means to achieve political change and the challenges faced by the liberal democratic state in responding to international terrorist campaigns.

IR 387 Nature of War (4)
Warfare examined from Western and non-Western perspectives. Theory and theory-into-practice topics include impact of technology, civil-military relations, moral concerns, emerging threats, future forms of warfare.

IR 388 Islam in France (4)
(Parish Semester only) Historical overview of interactions between Muslims and Europeans. Islam: origins, history and circumstances that led to its revival. France’s immigration policy.

IR 389 Special Problems (1-4)
Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

IR 401 The United Nations and World Order (4)
The contribution of the United Nations to world order, focusing on its history, principal organs, relationships with global actors, and prospects for reform.

IR 402 Theories of War (4)
Causes of war: means of prevention and consequences of war.

IR 403 Transnational Diplomacy and Global Security (4)
Explores emerging “diplomatic” relations between nation-states and transnational (non-state) entities, such as non-governmental organizations (NGOs), in the development of global peace and security policies. Recommended preparation: IR 303.

IR 404 International Relations Policy Task Force (4)
Addresses an unfinished question of public policy. Provides experience in interviewing and field research, oral presentation and collective discussion and deliberation. Open to juniors and seniors only.

IR 405 Cultural Heritage, Religion, and Politics in the Middle East (4, Fa) (Enroll in REL 402)
IR 406 Ethics and World Politics (4)
Exploration of the relationship between ethics and politics. Special focus on religion, violence and human rights in international relations.

IR 408 Global Democratization (4)
Exploration of the global experience with democracy. Meaning of the term “democracy,” explanations of the rise and fall of democracy, its current trends and future challenges.

IR 412 Ecological Security and Global Politics (4)
Should environmental issues be treated as threats to security? Survey of recent literature explores global environmental policies using a security framework. Prerequisite: IR 210 and/or environmental studies course work.

IR 424 Citizenship and Migration in International Politics (4)
Changing notions of citizenship in the context of history, and of economic, political and sociological theories of international migration; diaspora and migration case studies.

IR 425 The New Triangle: China, the U.S. and Latin America (4)
China’s rise in the international political economy raises policy research questions, including an analysis of how this trend relates to U.S. and Latin American relations. Recommended preparation: IR 210 and a course in both micro and macroeconomics at the high school or college level.

IR 426 Trade Politics in the Western Hemisphere (4)
Focus on the dynamic process of trade integration that has occurred since the mid-1980s in the Western Hemisphere.

IR 427 Seminar on Economics and Security (4)
Introduction to important economic issue areas that are understood as security-related in the contemporary world: food, trade, debt, etc.

IR 428 China’s Political Economy (4)
Critical issues surrounding China’s economic rise and the implications for international relations; the unique strengths and vulnerabilities of China’s political-economic model; prospects for change. Recommended preparation: IR 210 and a course from International Relations, Political Science, or History with a strong China component.

IR 430 The Politics of International Trade (4)
Economic approaches and political processes are used to explain observed international trade policy choices. Topics covered include globalization, regionalism, labor standards, the environment and sanctions. Recommended preparation: ECON 450, IR 320.

IR 437 Comparative Genocide (4)
An interdisciplinary treatment of the tragic phenomenon of genocide. Subject matter includes historical cases and analysis of contemporary global efforts toward prevention.

IR 438 Nationalism and Ethnic Conflict after Communism (4)
Explores origins and nature of ethnic strife among post-socialist states (ethnicity and national revival, modern histories of East-Central Europe and Russia, problems and conflict resolution).

IR 439 Political Economy of Russia and Eurasia (4)
Interaction of politics and economics in the former Soviet Union and its component republics; the historical planned economy, the politics of reform and the political economy of former Soviet foreign relations.

IR 440 America’s Pacific Century: Dialogues between the U.S. and Asia (4) A hands-on analysis of the contemporary U.S. foreign policy towards East Asia through lectures, policy paper writing, and an exchange visit to Singapore.

IR 441 Comparative Analysis of Foreign Policy (4)
Comparative analysis of foreign policy determinants and decision-making; empirical emphasis.

IR 442 Japanese Foreign Policy (4)
Economic, political, territorial, and security issues; foreign policy decision-making; relations with major powers and neighboring states.

IR 443 Formulation of U.S. Foreign Policy (4)
Critical discussion of alternative approaches explaining the formulation and implementation of U.S. foreign policy: domestic politics, organizational processes, group dynamics, individual personality and perception.

IR 444 Issues and Theories in Global Society (4)
Why the world is organized into sovereign nation-states. The challenges to nation-states in the 21st century from globalization, democratization, revolution, technology, and new forms of cultural identity.

Policies and programs aimed at stopping the spread of weapons of mass destruction. Presentations by executive/legislative officials involved in formulation and implementation of non-proliferation. Junior or senior standing required.

IR 449 International Courts and the Globalization of Law (4)
Research-based analysis of dramatic development of international courts, exploring causes for their development, autonomy and political relations with states, compliance, effects on international relations.

IR 454 The International Political Economy of Development (4)
Provides a critical introduction to scholarship on international political economy (IPE), the interaction of states and markets in a global context.

IR 456 Islam and Arab Nationalism (4)
Historical, sociological and political processes that have shaped the emergence of and relationship between Arab nationalism and political Islam since the early 20th century.

IR 464 U.S. Policy Towards the Middle East: 1950 to the Present (4)
The role of the United States in Middle Eastern affairs after the creation of the state of Israel.

IR 466 Contemporary Issues in United States-Latin America Relations (4)
Examines major issues in the relationship between the United States and the countries of Latin America and the Caribbean, including trade and financial questions, security, immigration, the environment, narcotics, etc. Major bilateral relations (especially with Mexico, Brazil, and the Caribbean Basin countries) are emphasized, as are regional and multilateral relationships.

IR 466 Contemporary Issues in Latin American Politics (4)
Focus on current politics in Latin America. Address a range of themes: electoral democracy, citizenship, political inclusion, human rights, corruption, economic inequality.

IR 468 European Integration (4)
Research on the European Union’s role in European international relations; internal EU developments since 1985 as an actor in the world economy.

IR 470 Comparative Regionalism (4)
Analysis of the factors that provide different forms of regional arrangements in different parts of the world. Prerequisite: IR 210.

IR 473 War and Diplomacy: The U.S. in World Affairs (4)
Perspective on recent American foreign policy; a case study of conflicting literature on the origins, development and legacy of the Cold War.

IR 484 American Religion, Foreign Policy and the News Media (4) (Enroll in JOUR 484)
IR 490 Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

IR 491x Field Study (1-8, max 8) Local, national, and international internships. Not available for graduate credit.
IR 494 Honors Thesis Seminar (4) Preparation and oral defense of senior honors thesis before supervising faculty and fellow honors students. (Duplicates credit in former IR 494b.) Senior status and acceptance to program required. Prerequisite: IR 210, IR 211.

IR 499 Special Topics (2–4, max 8) Selected topics in various special areas within international relations, which may vary from semester to semester or within semesters.

IR 500 International Relations Theory (4) Development of organized knowledge of international relations. Main currents of thought and varieties of current literature.

IR 502 Conflict and Cooperation (4, Fa) Against the background of 20th century history this course introduces the major literatures on the causes, strategy, practice, and future possibilities of war and peace.

IR 503 Theories of Diplomacy (4) Investigation of international relations through the lens of diplomatic theories, considering the limits and potential of diplomacy and how thinking about diplomacy has evolved.

IR 507 Gender and International Relations (4) An examination of gender and culture in world society. Feminist perspectives on and critiques of various approaches to international relations theories.

IR 509 Culture, Gender, and Global Society (4) Cultural and gendered responses to economic globalization; topics include culture and security, identity politics, clashes of and accommodations among civilizations, modernity, post-modernity and world society.

IR 510 Gender, War and Peace (2, Sp) Examination of the extent to which conflict and its resolution have depended on stereotypically gendered associations of men with war and women with peace.

IR 512 Linkage Politics (4) (Enroll in POSC 512)

IR 513 Social Science and Historical Research Methods: Introduction to Research Design (2 or 4) Introduction to problems in philosophy of science, epistemology, historical and historiographical inquiry, leading to development of elementary research design capabilities.

IR 514 Multivariate Analysis (4) Causal inference and modeling in international relations and political science; assumptions and problems of multivariate regression analysis in both cross-sectional and time series cases.

IR 515 Qualitative Research Design (4) A practical seminar in which to develop a dissertation proposal. Covers casual inference and comparative case study designs; single-case designs; selecting cases; interviewing; combining quantitative and qualitative methods. Recommended preparation: IR 513, one course in statistics, and enough substantive study to identify a likely dissertation topic.

IR 516 Advanced Research Methods: Text, Talk and Context (4) Text and discourse analysis methods and strategies. Themes include the roles of ideas, identities, policies and interests in various institutional contexts. Prerequisite: COMM 550, IR 434, IR 513, POSC 500, PUBD 500 or PUBD 502.

IR 517 International Policy Analysis (4) Game theory and other methodologies applied to the study of international relations. Topics include global and regional public goods, collective action, externalities, treaty information, market failures.

IR 519 Field Research Methods in Comparative Politics and International Studies (4) intended for graduate students planning social science research projects in a foreign country. Primary goal is to assist students to prepare the design for their dissertation research.

IR 520 Formulating US Foreign Policy: How Washington Works (4) Analyzes U.S. foreign policy, with emphasis on numerous inputs to the decision-making process - from media to conceptions of the national interest to organizational processes.

IR 521 Introduction to Foreign Policy Analysis (4) Survey of principal theoretical and empirical approaches to foreign policy analysis; bureaucratic politics, cybernetics, game theory and options analysis, comparison, design theory, simulation.

IR 522 United States Diplomacy since 1945: Issues and Decisions (4) An analysis of United States foreign policy with emphasis on the origins and structure of the cold war, decision-making, the role of ideology, containment and imperialism, and issues of the post-bipolar era.

IR 525 State and Society in International Relations (4) A readings seminar that assesses the challenges to nation-states and world order presented by trans-border cultural flows, new technologies, and changing patterns of political participation.

IR 526 Migration and Diaspora in International Politics (4) Examines issues of migration, the relationship between citizen and state, economic factors triggering emigration/immigration, transnationalism, and explores the phenomenon of diasporas.

IR 534 East Asian Security Issues (4) Security politics of China, Japan, ASEAN states, and Southwestern Pacific nations; their strategic relations with the superpowers; regional security initiatives: nuclear-free zone politics, ZDOPFAN, and indigenous military capacities. Prerequisite: IR 531.

IR 539 Seminar in International Politics – Conflict Processes (4) Advanced seminar in international conflict, crisis and war. General perspectives on factors that bring about war and promote peace, with priority given to ethnopolitics. Open only to graduate students.

IR 540 Seminar in International Politics – Religion and Conflict (4) Advanced introduction to how religion has emerged as a powerful force in politics. Conflict resolution, fundamentalism, terrorism, war, American foreign policy and global civil society. Open only to graduate students.

IR 541 Politics of the World Economy (4) Survey of approaches to international political economy. Intellectual roots; the management of collective goods; North-South relations are examined.

IR 542 Foreign Economic Policies of Industrial Capitalist States (4) Seminar comparing policies of Britain, France, Germany, Japan, and the United States; evaluation of alternative research methods and theories; design and execution of an original project.

IR 543 Politics of International Monetary and Trade Relations (4) Political analysis of international monetary and trade relations; emphasis on interactions among industrialized nations.

IR 545 The International Political Economy of Development (4) The political aspects of economic growth, efficiency and distribution are explored for underdeveloped nations in an international relations context.

IR 547 Political Economy of Global Space and Environment (4) Regimes in an anarchic world will be examined to assess ways oceans, atmosphere, outerspace, and other unowned spaces or resources are and can be used.

IR 550 Economic Bargaining Theory and Practice (4) Development of analytical skills and strategies for negotiations over economic and political problems, through study of recent cases and participation in bilateral and multilateral exercises.

IR 551 International Political Economy of the Pacific Rim (4) Introduces issues related to political economy of the Pacific Rim; trade, investment and development strategies of these countries. The role of Japan’s increasing economic power and that of the changing U.S.-Japan relations and their implications to the rest of the Pacific Rim region.

IR 553 Political Economy of Global Telecommunication and Information (4) (Enroll in COMM 553)

IR 555 Democracy and Democratization in Comparative Perspective (4) Seminar generates and tests theories of democratization. Readings will focus on Europe, Latin America, Soviet Eurasia emphasizing core theoretical and methodological aspects. Open only to master’s and doctoral students.

IR 556 Latin America and U.S. Foreign Policy (4) Latin American challenges to U.S. policymakers; U.S. success in achieving its goals; alternative explanations of U.S. behavior.

IR 557 Africa and U.S. Foreign Policy (4) Research problems on international issues arising from the emergence of Africa.

IR 561 Japanese Foreign Policy and International Relations of East and Southeast Asia (4) Research problems in political, economic, and security issues in East and Southeast Asia, with special emphasis on the role of Japan.

IR 563 Chinese Foreign Policy (4) Research problems in political, economic, military, and ideological issues.

IR 581 International Relations of the Middle East (4) Salient issues in regional politics such as colonialism, nationalism, identity, religion, development, and war are examined.

IR 590 Directed Research (1–13) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

IR 591 Field Study (1–12) Study of contemporary institutions in selected regions of the world. Maximum units which may be applied to the degree to be determined by the department.

IR 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

IR 594 Advanced Study (2–12, max 8) Subjects specifically relevant to an international relations field, sometimes conducted as intensive short-courses.

IR 790 Research (1–12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

IR 791 Advanced Studies (2–12, max 12) Subjects specifically relevant to an international relations field;
conducted for Ph.D. students, sometimes conducted as intensive short courses.

IR 794abcdz Doctoral Dissertation (2-3-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NCR.

Joint Educational Project

Joint Educational Project House
801 W. 34th St.
(213) 740-1837
FAX: (213) 740-1825
tanderso@usc.edu
dornsife@usc.edu/jep

Executive Director: Tammara Anderson

The Joint Educational Project (JEP) is one of the oldest and largest service-learning programs in the United States. Established in 1972, JEP places university students in supervised community service assignments as a part of their academic course work. JEP partners with more than 50 local organizations – including neighborhood schools, non-profit organizations, hospitals and health clinics and government agencies – to design service-learning projects that complement students' course work and address a community-identified need. Students serve in many capacities through JEP, such as tutor, mentor, teaching assistant, translator, research assistant or guide. JEP also houses two volunteer programs for pre-law and pre-med students – the Pre-Law Project and Trojan Health Volunteers – that give USC students practical experience in a legal or medical context. In the process, JEP students learn how to develop and apply knowledge, work in diverse social settings, become engaged in civic affairs, explore possible career paths and make professional contacts. “JEP” following a section number indicates that the professor will offer JEP as a course option.

JEP also houses the USC Readers’ Plus work-study program. “Readers” assist K-9 children in USC’s “Family of Schools” in the areas of math and reading, allowing the USC students the opportunity to serve in the community while gaining work experience in an urban school environment.

PLUS work-study program. “Readers” assist K-9 children in USC’s “Family of Schools” in the areas of math and reading, allowing the USC students the opportunity to serve in the community while gaining work experience in an urban school environment.

Judaic Studies

Hebrew Union College - Jewish Institute of Religion
3077 University Ave.
Los Angeles, CA 90007

Chair: Leah Hochman, Ph.D.
Liaison: Carol Sofer

Faculty

Professors: Reuven Firestone, Ph.D.; Bruce Phillips, Ph.D.
Associate Professors: Sarah Benor, Ph.D.; Joshua Garwayne, Ph.D.; Sharon Gillerman, Ph.D.; Leah Hochman, Ph.D.; Joshua Hollo, Ph.D.; Dvora Weisberg, Ph.D.
Assistant Professor: Lynn Kaye, Ph.D.
Adjunct Associate Professor: Yaffa Weisman, Ph.D.

Lecturer: Hagit Ariel-Chai, M.A.Ed.

Judaic Studies is offered by the Louchheim School for Judaic Studies, administrated by the Hebrew Union College-Jewish Institute of Religion, an independent college adjacent to the USC campus. Students registering for classes in the program do so through the regular USC registration process. They receive regular course credit and their degrees from USC. Hebrew courses may be used to fulfill graduation requirements in a foreign language; courses which meet humanities general education requirements may be used as electives or may be used for major or minor credit with the approval of an adviser.

Bachelor of Arts in Religion with Emphasis in Judaic Studies

A Bachelor of Arts in Religion with an area of emphasis in Judaic Studies is offered cooperatively by the School of Religion and Hebrew Union College-Jewish Institute of Religion. Program requirements are listed in this catalogue under Religion.

Bachelor of Arts in Middle East Studies

See the Department of Middle East Studies for a complete listing of requirements.

Minor in Judaic Studies

The minor in Judaic Studies provides the opportunity for in-depth study of Jewish history, literature, politics, culture, religion, sociology and gender studies using approaches developed through multidisciplinary approaches. Courses offered cover a broad time span – the ancient Near East to contemporary America – and they challenge and stimulate students to examine and learn about Jewish culture as a topic of scientific interest.

For the minor, 20 units in Judaic Studies and Religion are required. The following courses are required: REL 301 and JS 180. Three additional courses may be chosen from among JS 310, JS 320, JS 321, JS 322, JS 330, JS 340, JS 341, and REL 312. Successful completion of five 4-unit courses or the equivalent in Jewish American Studies is required to qualify for the minor.

Minor in Jewish American Studies

The minor in Jewish American Studies offers the opportunity to study the experiences and cultures of the American Jewish community in relation to those of other American peoples. For the minor, 20 units of American Studies and Judaic Studies are required.

Courses of Instruction

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

Hebrew (HEBR)

HEBR 100 Hebrew I (4, Fa) Modern spoken and written Hebrew with emphasis on the principles of grammar.

HEBR 150 Hebrew II (4, FaSpSm) Continuation of modern Hebrew I. Prerequisite: HEBR 100.

HEBR 220 Hebrew III (4, Fa) Continuation of Hebrew II; stress on grammar, composition, and conversation. Prerequisite: HEBR 150.

HEBR 315 Modern Hebrew Language (Hebrew IV) (4, Sp) Fostering oral and written fluency in Hebrew language and literature through investigation of Hebrew poetry, short stories, novels and film. Prerequisite: HEBR 220.

Judaic Studies (JS)

JS 100g Jewish History (4, Fa) Major ideas, personalities, and movements in Jewish history from antiquity to the present in the light of the interaction of the Jews with the general culture.

JS 180 Introduction to Judaism (4, Sp) Jewish beliefs, practices, and history from the biblical period to the present; Judaic contributions to Western civilization.

JS 211g The Holocaust (4, FaSp) Historical background and responses to the Holocaust, with special emphasis on ethical implications.

JS 258g Food, Faith and Conflict (4, Sp) Investigates how food and food traditions create and cross religious and social conflicts between Jews, Christians and Muslims by exploring faith, practice, thought and ethics.

JS 300 American Jewish History (4, Fa) Patterns of immigration, acculturation, religious forms, and ethnic expression in America from the colonial period to the present.

JS 314g Holy War And History: Jews, Christians, Muslims (4, Sp) Investigates the engagement in war by Judaism, Christianity and Islam by examining history and theology and looks at religious justifications and condemnations of war.

JS 321 Gender and Judaism (4, FaSp) An investigation into the ways in which gender has structured Jewish religious, social, political and intellectual life from the Biblical period through the present.

JS 320 Jewish Power, Powerlessness, and Politics in the Modern Era (4, FaSp) Explores the relationship between the Jewish people and political powers. Topics include politics in exile, changing relationships to power, and relations with the modern nation-state.

JS 340 Modern Jewish History (4, FaSp) A survey of the major trends and themes of modern Jewish history. Examination of Jewish culture, society and politics from
the Spanish Expulsion to the Second World War. Recommended preparation: JS 100.

JS 342 Reading in Two Directions: Connecting Law and Literature in Jewish Tradition (4) Investigates understandings of law, legal interpretation and the integration of law and narrative in Jewish texts by examining legal and literary texts.

JS 350m Identity, Community, and Service: Jews and Other Americans (4) Examination of relationships between identity, community and service by investigating ethno-religious organizations' attempts to serve members of their group and confront issues of injustice in society.

JS 361 Scripture and Polemic in Judaism, Christianity and Islam (4, FaSp) Origins of Scriptures and their polemical environments in earliest Judaism, Christianity, and Islam. Scripture as polemic and legitimation, and cross-religious/cross-cultural interpretation and argument based on scriptural themes.

JS 362 Terror and Resistance in Literature and the Media (4, Sp) Investigation of the multiple ways that people experience and represent incidents of terror in literature, film, music, and social media.

JS 374 Messiah: The History of an Idea (4, Sp) Exploration of the history of the idea of a messiah in Judaism from antiquity to today.

JS 375 Issues of American Jewish Literature (4) Issues-oriented study of the human experience in America as expressed in the fiction, poetry, drama, memoirs, and literary criticism of America's Jews, using a dual approach incorporating both literary history and specific issues.

JS 378 Jewish Magic in the Ancient World (4, Sp) A cross-cultural examination of different kinds of magical literature that describe miraculous practices in Jewish mainstream and marginal life in the ancient and classical periods.

JS 381 The Jew in American Society (4, FaSp) The changing sociological profile of the American Jew and changing organization of the American Jewish community as they developed over the 19th and 20th centuries.

JS 382 Judaism as an American Religion (4) The development of American expressions of Judaism as part of the American religious context, from the perspective of the social scientific study of religion.

JS 383 Jews in American Popular Culture (4, FaSp) Social and cultural history of American Jewish contributions to the arts, science, literature, economics and politics.

JS 389 Culture and Society in Israel: Inventing the Dream (4, Sp) Examination of the social forces that shaped and continue to shape culture and society in contemporary Israel.

JS 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

JS 415 The American Jewish Experience in Film (4) A survey of American Jewish history through the medium of film, with particular emphasis on the experience of the post-war generation.

JS 428 Blacks and Jews: Conflicts and Alliances (4, Sp) Examination of the relationship between the American Jewish and African-American communities and what it teaches about race and coalition politics in American society.

JS 467 Modern Jewish Thought (4, Sp) Foundations of modern Jewish thought from the Western European Enlightenment to the present.

JS 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

JS 499 Special Topics (4) Selected topics in Judaic Studies.

JS 501abc Bible Texts (4-4-4, FaSp) a: Advanced grammar and reading. An introduction to principles of form criticism as applied to selected narrative and legal portions of the Pentateuch. b: A critical evaluation of the biblical books of Amos and Hosea with a view to gaining an appreciation of the prophets' literary skill, their religious motivations, and the originality of their thought. c: Critical readings in each of the biblical books of Ruth, Lamentations, Ecclesiastes, Esther, and Song of Songs, with a view toward gaining an appreciation of their literary and religious values. Knowledge of Hebrew required.

JS 504 Modern Hebrew Literature (3, Fa) Reading of uncensored texts primarily from modern Hebrew literature. A survey of the development of modern Hebrew literature, with an emphasis on short story and poetry. Knowledge of Hebrew required.

JS 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

JS 680 Boundaries of Jewish Normative Behavior (4, Sp) institutions claiming Jewish authenticity and their treatment of Jews perceived to be deviant.

Kinesiology

Physical Education Building 107

Faculty

See faculty listing for Biological Sciences (Human and Evolutionary Biology)

Academic Program Staff

Director of Instructional Laboratories: MaryAnn Bohland-Matveyenko, Ph.D.

Student Services Adviser: Laura Ames, M.Ed.

The Department of Kinesiology offers undergraduate and graduate degrees in the scientific study of human movement. The undergraduate curriculum is designed to provide a broad and comprehensive understanding of the human body at work. This includes studies of basic underlying parameters, as well as applications relevant to understanding human movement. The course work necessarily derives from a variety of disciplines, including physiology, anatomy, biochemistry, biomechanics, nutrition and psychology. As such, an undergraduate degree in human performance provides excellent training for students wishing to pursue further graduate or professional studies in health-related fields.

At the graduate level students are expected to specialize in one area, i.e., exercise physiology or biomechanics. These represent areas of active research by department faculty. The focus is on preparing individuals who will contribute to research and scholarship in their chosen discipline.

Undergraduate Degrees

Bachelor of Arts in Human Performance

The B.A. in Human Performance offers a degree objective for students pursuing careers in applied kinesiology, coaching, sports management, athletic training and other sport-related professions. While this degree provides a rich scientific foundation in exercise physiology, anatomy, biomechanics and nutrition, undergraduates pursuing a B.A. in Human Performance will concentrate their studies on the practical application of these disciplines within their personal field of interest.

The specific degree requirements include 24 units of required core courses within human biology and 12 units of required collateral course work within the sciences. Students must also complete 8 units from a list of restricted electives to human biology ranging from injury prevention to exercise and metabolic diseases. These electives allow students to tailor the degree to their individual needs. Along with the required core and collateral courses, the elective units allow sufficient flexibility to complete course prerequisites for any of the graduate health-related fields. In addition to specific course work, human performance students have several opportunities to acquire practical experience (athletic training, exercise prescription, etc.) and/or participate in the ongoing research efforts of the human biology faculty.

Additionally, this degree can easily be integrated with other disciplines of study within the university. For example, a student interested in sports management could combine the B.A. in Human Performance with a minor in business. Similarly, a student interested in becoming a sports journalist could double major in human biology and journalism. Academic advisers can provide direction in planning course selections toward specific fields. See the Website for details or email Laura Ames at ames@usc.edu.

Grade Point Average Requirements

Students must obtain a minimum GPA of 2.0 or better (cumulative) for the required core requirements, the required collateral courses, and the 16 units of required electives. In addition, a minimum grade of C- (1.7) will be allowed for each of the courses in the required core courses. This requirement will be effective for incoming students (freshmen or transfers) as well as for graduation from USC.

Minor in Kinesiology

For students who would like to obtain basic knowledge of kinesiology but are majoring in another area, a minor in this field is offered. The minor may be ideal for someone pursuing a career in the management area of health and corporate fitness.

A minor in a health-related science may also be desirable for those in engineering or the physical sciences. Students pursuing a teaching or coaching career at the secondary school level may also benefit from knowledge in this area.

A total of 28 units is required for the minor in kinesiology.

Courses of Instruction

Human Biology (HBIO)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

EXSC 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

EXSC 4300 Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

EXSC 5900 Scientific Integrity (2) Contemporary issues relating to ethics and responsible conduct of research including guidelines instituted by the Federal Government. Course fulfills requirements imposed by national funding agencies.

EXSC 5800d Experimental Studies of Human Performance II (4-4-4-4, 2 years, FaSp) a: Force and kinematics, b: neuromuscular control of multipoint movements, c: kinetics; d: advanced kinetics.

EXSC 587L Seminar: Advanced Exercise Physiology (4) Body at work, energy liberation and transfer, muscular contraction, neuromuscular function, cardiovascular and pulmonary response, energy cost, nutrition and environmental adaptation. Primarily for master’s students. Laboratory, 3 hours. Prerequisite: EXSC 300L.

EXSC 588L Seminar on Lipid Metabolism and Exercise (4) Metabolism and utilization of lipids and fatty acids in skeletal muscles with applications to exercise. Prerequisite: EXSC 405L; recommended preparation: EXSC 300L.

EXSC 5900 Directed Research (1-12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

EXSC 591 Research Seminar (4) Study of research design; critical analysis of specific techniques applied to student interests, including problem rationale, selection, development, organization, and data analysis.

EXSC 592ab Seminar in Exercise Science (2: Fa; b: 2, Sp) Scientific presentations by graduate students and invited speakers on selected topics in the areas of biochemistry, biomechanics, physiology and psychology.

EXSC 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593).

EXSC 594abz Master’s Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

EXSC 595 Seminar: Analysis of Human Motor Performance (4) Application of mechanical principles of motion to the study of sport, exercise, and dance, utilizing cinematographic and related techniques.

EXSC 675 Quantitative Electromyography in Physiology of Exercise (4) Electromyographic techniques for measurement of relaxation and muscle spasm; estimation of strength, fatigue, and muscular endurance from submaximal efforts.

EXSC 680L Neurosensory System in Physiology of Exercise (4) Gross structure and ultrastructure of muscle tissue, nervous system control of muscle function as related to exercise physiology. Laboratory, 3 hours. Prerequisite: EXSC 300L, EXSC 301L; BISC 306L and BISC 312L.

EXSC 690 Directed Readings (1-8, max 8) Graded CR/NC.

EXSC 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

HBIO 2010g The Human Animal (4) Foundations of the human species. Examination of scientific evidence from Darwinian theory, primate behavior, fossils, and the behavior of modern people. Laboratory. (Duplicates credit in former ANTH 201.)

HBIO 201L Individualized Exercise Prescription (2, FaSp) Principles and theories related to exercise prescription; programs of weight-training, circuit-training, aerobics, flexibility, high and low-intensity training guidelines; safeguards and effectiveness. Lecture, 2 hours; laboratory, 2 hours. (Duplicates credit in former EXSC 201L.)

HBIO 205L The Science of Human Performance (4, FaSpSm) The physiological and nutritional basis of human performance. Factors that facilitate and limit athletic achievement. Lecture, 3 hours; laboratory, 2 hours. Not available for major credit. (Duplicates credit in former EXSC 205L.)

HBIO 210 Drugs and Ergogenic Aids in Sport and Weight Control (4, Sp) Evaluation of drugs, nutritional supplements, and ergogenic aids that are purported to enhance human athletic performance to promote weight and fat loss. Lecture, 3 hours; discussion, 1 hour. (Duplicates credit in former EXSC 210.)

HBIO 200 Evolution, Ecology, and Culture (4, FaSpSm) The roles of biology, culture, and the environment in shaping human society, integrating evolutionary biology and cultural theory. (Duplicates credit in former ANTH 200.)

HBIO 301 Human Anatomy (4, FaSp) Major organ systems; functional implications of their relationships; gross and microscopic examination with an emphasis on practical skills in recognizing, dissecting, and differentiating anatomical structures. (Duplicates credit in former EXSC 301.)

HBIO 302 Nutrition and Metabolism (4, Fa) Gastrointestinal physiology and energy metabolism as it relates to macronutrient intake. Theories and principles of nutrition and their impact on metabolic regulation. Graded BISC 220L or BISC 221L. (Duplicates credit in former EXSC 220.)

HBIO 306 Primate Social Behavior and Ecology (4, FaSpSm) Behavior and ecology of living nonhuman primates, with an emphasis on field studies of apes and monkeys. Topics include aggression, communication, reproduction, and cognition. Recommended preparation: HBIO 200Lg. (Duplicates credit in former ANTH 306.)

HBIO 308 Origins and Evolution of Human Behavior (4) Examination of the evidence for and against evolutionary bases of a range of human behaviors. Topics include sex differences, human reproductive strategies, race, IQ, human ecology. (Duplicates credit in former ANTH 308.)

HBIO 310 Sociopsychological Aspects of Sport and Physical Activity (4, FaSp) Examination of the individual in a social environment related to sport and physical activity: personality, motivation, attitude, and group behavior viewed in physical activity contexts. (Duplicates credit in former EXSC 310.)

HBIO 320 Muscle Physiology (4) Analysis of the skeletal muscular system (anatomy, physiology, biochemistry, and development) and its functional properties under both normal and pathological conditions. Lecture, 3 hour; laboratory, 3 hours. Prerequisite: BISC 220L. (Duplicates credit in former EXSC 320.)

HBIO 350 Nutrition and Homeostasis (4, Fa) Principles and regulations of vitamin/mineral metabolism as it relates to homeostasis of organ systems. Lecture, 3 hours; discussion, 1 hour. Prerequisite: HBIO 302L. (Duplicates credit in former EXSC 350.)

HBIO 4000 Motor Control and Learning (4, Fa) Theories of control and learning applied to motor performance; variables affecting performance in exercise, games, sports, and dance. Lecture, 3 hours; laboratory, 3...
HBIO 401 Physiology and Biomechanics of Movement (4, Sp) Terminology, structure and function of muscle, bone and endocrine systems; effects of exercise and training on those systems. Prerequisite: BISC 220L. (Duplicates credit in former EXSC 401.)

HBIO 405 Evolutionary Medicine (4, Sp) Evolutionary, cultural, and environmental factors in the emergence and existence of diseases; a Darwinian examination of illness in the human species. Recommended preparation: HBIO 200LG. (Duplicates credit in former ANTH 405.)

HBIO 406 Theory and Method in Human Evolutionary Biology (4, FaSpSm) Historical and theoretical approaches to major issues in the field of human evolutionary biology. Capstone course in which students will undertake an original independent research project. Prerequisite: HBIO 200LG.

HBIO 407 Endocrinology and Metabolism (4, Sp) Regulation of metabolic pathways and endocrinology in health and metabolic diseases. Lecture, 3 hours; laboratory, 3 hours. Prerequisite: HBIO 320L. (Duplicates credit in former EXSC 404L.)

HBIO 408L Biomechanics (4, Fa) Kinematic and kinetic analysis of human motion. Emphasis on performance enhancement and injury prevention. Lecture, 3 hours; laboratory, 3 hours. Prerequisite: MATH 108, PHYS 135L, HBIO 301L. (Duplicates credit in former EXSC 408L.)

HBIO 409 Metabolic Diseases (4, Fa) Examination of the etiology, prevention and treatments of metabolic disorders such as diabetes mellitus, insulin resistance, metabolic syndrome and obesity as major threats to public health. Prerequisite: BISC 220L, HBIO 302L, or HBIO 320L; recommended preparation: HBIO 203L or HBIO 205LG. (Duplicates credit in former EXSC 409.)

HBIO 420L Applied Systems Physiology (4, Fa) Cardiovascular, pulmonary, and renal systems: impact of work and environmental conditions. Lecture, 3 hours; laboratory, 3 hours. Prerequisite: BISC 220L. (Duplicates credit in the former EXSC 420L.)

HBIO 435 Neurobiology of Feeding Behavior and Obesity (4, Fa) Neurobiological systems that control feeding behavior and energy balance with an emphasis on the determinants of obesity. Prerequisite: BISC 220 and HBIO 302L.

HBIO 439L Human Performance and Bioenergetics (2 or 4, FaSpSm) Application of physiology, biomechanics and perceptual-motor principles to the study of skill acquisition and human performance. Four units – Lecture, 3 hours; laboratory, 3 hours. Two units (kinematic analysis only) – Lecture, 1 hour; laboratory, 3 hours. Prerequisite: HBIO 408. (Duplicates credit in former EXSC 439L.)

HBIO 441L Prevention of Athletic Injuries (4, Fa) Application of scientific principles to conditioning, protecting, and rehabilitating the athlete. Laboratory, 2 hours. Prerequisite: HBIO 301L. (Duplicates credit in former EXSC 441L.)

HBIO 442L Evaluation and Rehabilitation of Athletic Injuries (4, Sp) Application of scientific principles to evaluating and rehabilitating athletic injuries. Prerequisite: HBIO 301L. (Duplicates credit in former EXSC 442L.)

HBIO 491L Laboratory Experience in Kinesiology (2, FaSpSm) Practical laboratory experience in basic and applied exercise physiology, biochemistry, and/or biomechanics. Emphasizing development of laboratory techniques. Prerequisite: HBIO 203, HBIO 301, HBIO 302, HBIO 320. (Duplicates credit in former EXSC 491L)

HBIO 499 Special Topics (2–4, max 8, FaSpSm) Selected topics in Human and Evolutionary Biology.

Learner Centered Curricula

Richard Fliegel, Ph.D.
(213) 740-2961
Email: fliegel@usc.edu

Collaborative Learning Projects (CLP) and Individual Programs of Study (IPoS)

A research university provides many opportunities for undergraduates to learn in settings that suit a wide variety of learning styles, talents and professional aspirations. Beyond the classroom lie opportunities for individual and collaborative research projects, creative literary work, the plastic and performing arts, service learning and internships, distance and distributive learning, overseas study and a range of other activities. To track an idea from its genesis in research to the application as the solution of a contemporary problem, students must be able to take advantage of all these learning modalities.

For that reason, the USC Dornsife College of Letters, Arts and Sciences offers two curricular structures that enable non-traditional learning experiences to be credited across institutions. In both of these options, students work with a faculty committee to create individual learning opportunities suited to their personal academic interests and professional aspirations. The first allows self-motivated, independent learners to combine resources in a particularly rich learning experience, while the second promotes collaborative learning across several aligned modalities.

Collaborative Learning Projects

The USC Dornsife College of Letters, Arts and Sciences offers a curricular construct (MDA 460) designed to promote collaborative learning. Two or more students may propose a research project or other collaborative program, with specified learning objectives; a faculty committee will review each proposal to decide if it comprises a well-conceived educational experience and determine the unit values to be awarded, either collectively or to each student who participates. Collaborative Learning Projects award only credit or no credit grades.

Individual Programs of Study

Individual Programs of Study (IPoS) allow individual students to design a ”curriculum” of 2 to 16 units, including directed research, service learning and internships, creative artistic production and any other educational experiences that might be relevant to the proposed academic program.

An Individual Program of Study (MDA 450) might be created for an entire semester’s work, including directed research, an internship and a distance learning course. Or, a more modest proposal might include 4 units of original artwork plus service learning.

Individual Programs of Study encourage students to design educational experiences that inspire them, prompting a profound engagement with a learning environment ideally suited to their individual talents. Individual Programs of Study may include a wider array of educational contexts, experiences and opportunities for nontraditional learning than are generally available for credit at most institutions of higher education. Individual Programs of Study are letter graded.

Review Process

Students who are interested in proposing either an Individual Program of Study or a Collaborative Learning Project must complete an application that includes:

1. A full description of the project, including information about all courses, internships, and other academic activities that will be involved;
2. A statement explaining why these activities could not be accomplished within the context of existing course work and directed research;
3. A proposal for assessing the work that is to be completed for the project beyond that associated with graded courses;
4. The endorsement of a faculty member who will serve as sponsor for the project. This faculty member will typically lead directed research associated with the project and award the final grade for the entire project;
5. A sign-off from the student’s major department is also required; and
6. The student’s STARS report and transfer credit statement, if transfer courses are relevant.

These materials will be reviewed by three faculty members comprising an independent Study Committee, which will consider the student’s academic record and decide whether to allow the project, how many units to award and other relevant conditions.

Members of the Independent Study Committee are appointed by the vice dean of academic programs of the USC Dornsife College of Letters, Arts and Sciences for an academic year; they consult with a representative of the Registrar’s Office on articulating credits. If a member of the committee wishes to serve as the sponsor for a project, the vice dean will appoint an alternate to serve on the committee and consider that student’s proposal.

Credits count as elective units, unless individual departments choose to apply some or all of the units toward major or minor requirements. A student may count no more than 16 units toward the degree through a combination of Individual Programs of Study and Collaborative Learning Projects. Upon completion of the project, the student’s transcript reads “Individual Program of Study” or “Collaborative Learning Project,” with the units awarded and the titles of any courses included in the program. See Multidisciplinary Activities for MDA 450 and MDA 460 course descriptions.

humanities.

approaches to the study of literature, including formal and

the social sciences, humanities, and natural sciences; the

guaranteed. For the cou

units), are required.

A multidisciplinary degree program, the Master of Liberal Studies (MLS) is designed for motivated, college-
educated individuals who wish to further their intellectual
growth and pursue graduate work part-time or full-time in the

evenings.

The program centers on the major forces that are

revolutionizing the way we conduct our professional lives,

rather than on the individual liberal arts disciplines. In this

way, subjects covered in the program’s courses have

immediate relevance to the problems and challenges of

contemporary society. In particular, the program

emphasizes some of the most fundamental dynamics

shaping the contemporary world: urbanization and

globalization, changing cultural landscape, and

technological and environmental transformations.

The MLS is a year-round program consisting of nine 3-

unit courses. The degree requires a core course and a

summative project. Seven elective courses are chosen in

consultation with the student’s adviser and/or MLS

program director.

Admission Requirements

Admission to the program is based upon possession of a

baccalaureate degree from an accredited college or

university, with a minimum 3.0 GPA. When possible,

interviews will be conducted with applicants. Two letters

of recommendation, a writing sample and a personal

statement of purpose are required.

Degree Requirements

Course and Summative Project Requirements

Nine courses (27 units), including the core course, LBST

500 (3 units), and the summative project, LBST 585 (3

units), are required.

Courses of Instruction

The terms indicated are expected but are not

guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

Liberal Studies (LBST)

LBST 500 Introduction to Liberal Studies: Methods of

Knowing (3, Sp) Introduction to research methods in the

social sciences, humanities, and natural sciences; then

methods for applied interdisciplinary research.

LBST 502 The Anthropology of Popular Culture (4,

FaSpSm) (Enroll in ANTH 600)

LBST 503 Self-Justifying Fictions (3) Theoretical

approaches to the study of literature, including formal and

cultural analysis and the ethics and social impact of the

humanities.

LBST 505 East Asian Humanities: Classics of China,

Korea, and Japan (3) Examination of major themes in East

Asian culture through primary texts in translation.

LBST 507 Great Western Cities (3) Examination of

Western civilization in the urban context, focusing on

great cities in their “golden age” of creativity, accomplishment, and influence.

LBST 510 Cities and Globalization (3) Contemporary

urban theory and comparative urban analysis. Emphasis

on the role of globalization in shaping urban form and

problems.

LBST 512 Language in a Globalizing World (3)

Examination of the relationship between language and

geopolitical change, endangered and minority languages, and the public policy implications of multilingualism and

multiculturalism.

LBST 514 Ideas of Nature in American Culture (3)

Examination of how Americans have used nature to think

about themselves, environmentalism, American identity,
gender/class relations, the American West, and the

mythology of Los Angeles.

LBST 516 Urban Conservation Biology (3) Analysis of

plant and animal distribution in urban landscapes.

Exploration of major threats to urban biodiversity and

nature conservation controversies and successes.

LBST 520 Tradition and the Modern World (3) Studies

the continuing interplays between tradition and novelty;

between locale and globalization; and between heritage

and post-modernity with a focus on a specific locale.

LBST 525 The Revolution That Made America (3) ideas

and politics of the world’s first modern revolution, which

transformed 13 colonies into a nation.

LBST 527 Information Systems From Libraries to the

Internet (3) History and sociology of information systems.

Philosophical and literary implications of writing, archives,

libraries, printing, and publishing from the ancient world
to the internet age.

LBST 530 Portraits of Leadership (3) Analysis of

different forms of cultural leadership in their historical,

literary, and philosophical context.

LBST 531 The Hero/Heroine in History (3) Analysis of

human agency in history and whether individual men and

women are capable of altering the course of history by

their actions.

LBST 532 Ideas on Trial (3) Examination of great trials

in history as indicators of changing social and cultural

attitudes.

LBST 535 Great Works, Great Challenges (3) Analysis of

works of literature, drama, and poetry and their

relationship to their historical contexts.

LBST 537 Empire and Social Reform in America 1890-

1917 (3) Analysis through literary and historical texts of

American public life, culture, and social justice during the

era of U.S. ascendency as a world power.

LBST 540 Hell, Purgatory, and Paradise: Dante’s

Divine Comedy (3) In-depth reading and analysis of Divine

Comedy, in order to develop appreciation for changing

values from medieval, to Renaissance and contemporary

culture.

LBST 541 Opera, Culture, History, and Thought (3)

Analysis of cultural, historic, philosophical, political, and

literary movements and themes through the medium of

opera.

LBST 542 The Culture of Comedy (3) Historical and

synchronic ideas of comedy. Ways in which philosophers,

artists, and everyday individuals adapt in our ever-

changing world.

LBST 544 Representations of Los Angeles (3) Study of

literary, artistic and/or dramatic expressions of Los

Angeles and its inhabitants in modern and historical

literature, art, photography, film, television, and

architecture.

LBST 545 Imagining the American West (3) Explores

Western myths and realities through literature, history,

film, and painting. Examines why American culture places

questions about national pasts and futures in the West.

LBST 547 Acts of Interpretation: Literature, Film, and

Methodology (3) Analysis of literature, film, and

methodologies for approaching issues of interpretation,

readership, and spectatorship. Examination of how

interpretation varies across gender, race, class, and

sexuality.

LBST 548 Contemporary Fiction in Social Context (3,

FaSpSm) Study of novels and short stories to examine how

societal pressures and cultural identity constrain

individual actions, with attention to family, gender, class,

ethnicity, others. Open only to graduate students.

LBST 550 Theories and Methods of Analysis in

Cultural Studies (3) Development of cultural studies as a

fast-growing area of intellectual inquiry. Case study

analysis of race/ethnicity, history and memory, space,

post-modernism, globalization, censorship, and

originality.

LBST 551 Narrative Forms (3, max 6) Study of

narrative in literature, film, sociology, psychology and

history; how narrative conventions shape humans’

experience and understanding of society, past and

present.

LBST 554 Century City: 100 Years of LA Literature

and Culture (3, Fa) The history of Los Angeles since 1910,

using literary, historical, autobiographical, and cinematic

texts to consider issues of geography, economics, race,

class, gender, and sexuality.

LBST 555 Constructions of Childhood (3) Analysis of

the concept of childhood from its 18th-century origins.

Applications of age studies, language, and cultural

construction through fiction, history, film, and other

media.

LBST 560 Effects of Traumatic Life Experiences (3)

Examination of the psychological and emotional effects of

extreme trauma and survivor consequences.

LBST 570 Ecology of Night (3) Explore the world of

night. Human perception of the stars and the role of night in

history. Impact of artificial lighting on non-human

species and habitat.

LBST 571 Food, Fashion and Furniture: Commodities

in the Global Economy (3) Analysis of commodities from

origin to consumption illustrates the global impact of
everyday choices.

LBST 572 Controversies in Science, Medicine and

Ethics (3) Focus on how scientific developments drive

ethical issues in medicine. Exploration of ethical
dimensions of issues such as stem cells, genetic

engineering and reproductive technology.

LBST 574 Advances in Genetics and Evolutionary

Biology (3) How DNA directs an organism’s development

and how our DNA can be “read” to understand human

diversity, diseases, defects, and evolution.

LBST 585ba Master’s Project (1-3,0, FaSpSm) A

summative research project completed in consultation

with the student’s committee. Departmental approval.

Graded IP/CR/NC.

LBST 590 Directed Research (1-12, max 18) Research

leading to the master’s degree. Maximum units which may

be applied to the degree be determined by the

department.

Emeritus Professor: Edward Finegan, Ph.D.*
* Recipient of university-wide or college teaching award.

Degree Programs
The Linguistics Department offers undergraduate (B.A.) and graduate (M.A. and Ph.D.) programs. A wide range of courses allows students to study formal grammar (syntax, morphology, phonology, semantics); phonetics; psycholinguistics (natural language processing, first and second language acquisition, language disorders); sociolinguistics (discourse, quantitative approaches to style, linguistics and law); universals and typology; historical linguistics and Indo-European; East Asian linguistics (Chinese, Japanese, Korean); Germanic linguistics; Hispanic linguistics; Romance linguistics; Semitic linguistics; and Slavic linguistics.

Undergraduate Degrees
The Linguistics Department emphasizes the study of language both as an abstract system and in its psychological and social contexts. In addition to introductory linguistics and courses in linguistic analysis, students take courses in psycholinguistics (language acquisition, processing, and language disorders) and/or sociolinguistics (language and society). The undergraduate major in linguistics focuses on how the human mind structures, processes and acquires language as well as how similar communication goals are met by diverse means in the languages of the world. Students are encouraged to pursue combined majors in Linguistics/Philosophy, Linguistics/Psychology and

Linguistics/East Asian Languages and Cultures, as well as double majors with computer science or a language department. Please contact the department adviser for more information.

Required Courses for the Bachelor of Arts with Honors

The linguistics major with honors requires the student to complete the requirements for the major with a GPA of 3.5 or above and to complete in addition LING 497 Honors Thesis with a grade of B or better. Intent to complete the linguistics major with honors should be registered with the undergraduate adviser no later than the second semester of the junior year.

Requirements for the Bachelor of Arts with a Combined Major in Linguistics and Psychology with Honors

The combined major in linguistics and psychology with honors requires the student to complete the requirements for the major with a GPA of 3.5 or above and to complete in addition LING 497 Honors Thesis or PHIL 444 Senior Thesis with a grade of B or better. Intent to complete the combined major with honors should be registered with the undergraduate adviser no later than the second semester of the junior year.

Requirements for the Bachelor of Arts with a Combined Major in Linguistics and Psychology

For the lower division, LING 210 is required. For the upper division, the following courses are required: LING 301 and LING 302; EALC 470; two courses selected from LING 380, LING 401, LING 402, LING 405, LING 406, LING 407, LING 410, LING 415, LING 422, LING 446 and LING 485; three additional courses selected from LING 406, PSYC 301, PSYC 326, PSYC 336L, PSYC 337L, PSYC 424 and PSYC 433.

Combined Major in Linguistics and Psychology with Honors

For the combined major in linguistics and psychology with honors requires the student to complete the requirements for the major with a GPA of 3.5 or above and to complete in addition either LING 497 Honors Thesis or PSYC 380 Junior Honors Seminar and PSYC 480 Senior Honors Seminar, with a grade of B or better. Intent to complete the major with honors should be registered with the undergraduate adviser no later than the second semester of the junior year.

Requirements for the Bachelor of Arts with a Combined Major in Linguistics and East Asian Languages and Cultures

For the lower division, LING 210 is required. For the upper division, the following courses are required: LING 301 and LING 302; EALC 470; two courses selected from LING 380, LING 401, LING 402, LING 405, LING 406, LING 407, LING 410, LING 415, LING 422, LING 446 and LING 485; two courses selected from EALC 304, EALC 306, EALC 315, EALC 317, EALC 320, EALC 322, EALC 400, EALC 402, EALC 406, EALC 407, EALC 412b, EALC 413, EALC 415, EALC 417, EALC 422, EALC 424 and EALC 426; one EALC literature, civilization or thought course from EALC 333, EALC 335, EALC 340, EALC 342, EALC 345, EALC 350, EALC 352, EALC 354, EALC 355, EALC 356, EALC 380, EALC 386, EALC 452, EALC 455 and EALC 460; two additional EALC courses not listed toward this requirement.

Bachelor of Arts in Interdisciplinary Archaeology

See Religion for a complete listing of requirements.

Bachelor of Arts in Middle East Studies

See the Department of Middle East Studies for a complete listing of requirements.

Linguistics Minor Requirements

Lower Division: LING 210. Upper Division: LING 301 and LING 302, one course in psycholinguistics (LING 405, LING 406 or LING 410) or in sociolinguistics (LING 375), and one additional upper-division course from LING 380, LING 401, LING 402, LING 403, LING 405, LING 466, LING 470, LING 410, LING 415, LING 422, LING 446 and LING 485.

Arabic and Middle East Studies Minor

The undergraduate minor program gives students the opportunity of supplementing their major with an emphasis in Arabic and Middle East Studies. The 20-unit interdisciplinary minor is designed for students who want to explore and develop a critical understanding of Middle East history, culture, religion and global issues as well as acquire excellent knowledge of the Arabic language.

**Graduate Degrees**

The graduate program in linguistics trains individuals to engage in the scientific study of human language. Course work emphasizes the structural aspects of language and the mechanisms of language change. Students work closely with faculty members on problems in linguistic theory, the description of particular languages, and variation across different users and contexts, focusing on their implications for understanding social and cognitive structures.

**Admission Requirements**

Applicants for admission to the graduate program are expected to have a bachelor’s degree in linguistics or other appropriate field and knowledge of at least one foreign language. At the least, applicants are expected to have completed an introductory course in general linguistics. Other requirements for admission include: a detailed statement of purpose with specific information about interests and goals, scores from the General Test of the Graduate Record Examinations (GRE), and at least three letters of recommendation from academic sources.

**Degree Requirements**

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

**Master of Arts in Linguistics (32 units)**

The department does not accept applicants for a Master of Arts degree. All graduate work in Linguistics at USC is taken as part of the Ph.D. program, and the M.A. in Linguistics is intended only as a transitional degree in the process of completing requirements for the Ph.D.

A student admitted to the graduate program may choose later to earn a terminal M.A. degree, or may be invited by the department to attempt a terminal degree.

Students pursuing the Ph.D. program in linguistics are required to complete 32 units of course work toward the M.A. degree. The choice of courses is subject to approval by the Graduate Studies Committee. In addition, students must satisfy one foreign language or research tool requirement. (See Foreign Language/Research Tool Requirement.)

**M.A. Research Paper**

In addition to course work and the foreign language/research tool requirement, students are also required to write one research paper the contents of which represent a distinct area. The completed paper must be submitted to the Graduate Studies Committee no later than the student’s fourth semester of graduate study by the deadline established for that academic year. Following submission of the research paper, each student will conduct an oral defense of his or her work.

**Doctor of Philosophy in Linguistics**

Application deadline: December 1

Students pursuing the Ph.D. in Linguistics are required to complete a minimum of 60 units of course work beyond the baccalaureate. In addition to the 32 units completed toward the M.A., students are required to take three 600-level seminars in linguistics and a minimum of four units of 794ab Doctoral Dissertation. No more than eight units of 794 may be applied toward the Ph.D. degree. A maximum of 30 transfer units, approved by the university and the department may be applied to the Ph.D. degree.

After successfully completing the screening procedure, students will establish a qualifying exam committee to determine a Ph.D. course program in preparation for the dissertation. This course program must be approved by the Graduate Studies Committee.

Students seeking the Ph.D. in linguistics must demonstrate knowledge of two foreign language/research tools with at least one of them falling under Option A. One of these two foreign language/research tools is satisfied as an M.A. requirement. See Foreign Language/Research Tool Requirement.

**Advisement**

The student in his or her first semester will have the option of either selecting a faculty adviser or postponing such a selection until, but no later than, the last day of classes of the first year in the program. The Graduate Studies Committee (GSC) will serve as a provisional adviser until the student makes a selection.

The student has the option of changing advisers at any time without the need to seek the original adviser’s approval. The student should inform the GSC and the previous adviser of the change.

At the beginning of the second year of graduate study, the faculty adviser will assist the student in planning a program of study appropriate to the student’s interests leading to the screening procedure.

**Required Core Courses in Linguistics**

Students pursuing the Ph.D. program in linguistics are required to complete 32 units of course work toward the M.A. degree. See Waiver and Substitution of Course Requirements for possible exceptions.

**Screening Procedure**

Before a doctoral qualifying exam committee can be established for applicants to the Ph.D. program, a student must pass a screening procedure. This procedure consists of a review of the student’s graduate work at USC by Linguistics Department faculty. The review will be based on the following criteria: course work completed, including grades and papers; faculty recommendations; and evaluation of both the student’s M.A. research paper and a Ph.D. screening paper. The M.A. research and Ph.D. screening papers must be in two different sub-areas of linguistics, for example: syntax and psycholinguistics, or phonology and semantics, or sociolinguistics and typology.

The M.A. research paper must be completed and defended prior to the end of the fourth semester of graduate study, and the Ph.D. screening paper must be completed and defended prior to the end of the fifth semester. The set of courses leading to the M.A. research paper and the Ph.D. screening paper are determined through recommendation of the screening committee and approval of the Graduate Studies Committee.

**Qualifying Exam Committee**

Following the successful completion of the screening procedure, the student will establish a five-member qualifying exam committee. The qualifying exam committee is composed of at least five members; a minimum of three, including at least one tenured member, must be from the Linguistics Department and one must be a faculty member from outside the Linguistics Department. The Associate Vice Provost for Graduate Programs is ex officio a member of all qualifying exam committees. (Refer to the Graduate School Policies and Requirements for instructions on forming a qualifying exam committee.)

**Qualifying Examination**

The examination qualifying a student for candidacy for the Ph.D. degree is comprehensive in nature, partly written and partly oral. Prior to taking the qualifying examination, the student must have met all of the departmental requirements for doing so and have the recommendation of the qualifying exam committee. The committee will determine and administer the written examination.

The written examination consists of a limited number of questions in the fields related to the student’s research. Students will receive the written examination two weeks after submitting the qualifying paper and will have 30 days to complete the questions. An oral examination will be scheduled by the qualifying exam committee two weeks after the written examination has been submitted.

The successful completion of the qualifying procedure is represented by the approval by the qualifying exam committee of (1) the prospectus, (2) the original research paper, (3) the written examination, and (4) oral defense.

**Dissertation**

The final stage of the program is the submission and defense of a dissertation that makes an original and substantial contribution to its field of study. Refer to the Graduate School section of the catalogue for the policies and procedures governing the submission of a dissertation.

**Doctor of Philosophy in Linguistics (Specialization in East Asian Linguistics)**

Application deadline: December 1
Students interested in East Asian linguistics take the Doctor of Philosophy in Linguistics with a specialization in East Asian linguistics. In addition to all requirements for the Ph.D. in linguistics, the following courses are required: four courses or 15 units related to East Asian linguistics that are approved by the Graduate Studies Committee (GSC), which may be chosen from the following list: EALC 537, EALC 547, EALC 557, EALC 558, EALC 560, EALC 561, EALC 580, EALC 620 and LING 539. Upon approval by the GSC, other courses may be substituted. In addition, one of the two screening papers, the research paper associated with the qualifying examination and the doctoral dissertation must deal with at least one East Asian language. Students must also take LING 794ab Doctoral Dissertation. Students must pass the reading examination in one East Asian language.

Doctor of Philosophy in Linguistics (Specialization in Slavic Linguistics)

Application deadline: January 1

Students interested in Slavic linguistics take the Doctor of Philosophy in Linguistics with a specialization in Slavic linguistics. In addition to all requirements for the M.A. in Linguistics, the following courses are required: LING 542; SLL 510, SLL 512, SLL 514 and SLL 516; three LING 600-level seminars; and 794ab Doctoral Dissertation. Students must pass reading examinations in one Slavic language and either French or German.

Foreign Language/Research Tool Requirement

The Foreign Language/Research Tool requirement may be satisfied by choosing from the following options:

(A) Demonstrate a working knowledge of a second language by:

1. Passing a departmental written translation examination administered by a qualified faculty member, or

2. Demonstrating native speaker competence in a language other than English.

(B) Demonstrate a working knowledge of statistics and experimental design by passing, with a grade of B or higher, LING 501a (or its equivalent) and a second course, such as LING 502b (or its equivalent), where this knowledge is applied to a linguistic research problem.

The prior approval of the Graduate Studies Committee will be required to complete courses other than those listed above.

(C) Demonstrate the ability to use the computer as a research tool by passing, with a grade of B or higher, LING 585 (or its equivalent) or by completing a programming project related to linguistics; this should be equivalent in scope to a term project for a semester course.

The prior approval of the Graduate Studies Committee will be required to complete a course other than the one listed above.

Courses of Instruction

Linguistics (LING)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

LING 110L In a Word (4, FaSp) Words as a gateway to the human mind. How words are stored, comprehended and retrieved. How words are constructed. Words and concepts. Words and social constructs. The processing and the acquisition of words in normal and atypical children and adults.

LING 155 Language, Society, and Culture (4, FaSp) Discourse patterns among diverse social groups in institutional and interpersonal settings; interrelationships among language practices and gender, socioeconomic status, ethnicity; social structures and cultural values as reflected in language policies and practices.

LING 155 Hindi II (4, Sp) Continuation of LING 125. Reading of simple Hindi prose, practice in pronunciation, the grammar essential for reading comprehension and writing. Lecture, classroom drill and laboratory practice. Prerequisite: LING 125.

LING 210 Introduction to Linguistics (4) Empirical study of the sounds and structures of human language; syntax and semantics; language change; linguistic universals.

LING 255 Hindi III (4, Fa) Continuation of LING 155: intensive work in listening comprehension, oral communication, reading and writing short essays; introduction of readings and periodicals related to Hindi culture and civilization. Prerequisite: LING 125.

LING 265x Hindi IV (4, Sp) Reading of modern Hindi authors, review of grammar, composition, oral conversation, and cultural reading. Prerequisite: LING 255.

LING 275xLg Language and Mind (4, FaSp) Language within cognitive science: speech physiology and acoustics, language acquisition, reading, language disorders, perception and mental representation of words, linguistic diversity and computer analysis of speech.

LING 285xLg Human Language and Technology (4) Study of human linguistic competence and technologies that simulate it. Grammar, parsing, text generation; semantics, pragmatics, sense disambiguation; phonetics, speech synthesis, speech recognition.

LING 295xLg The Ancient Near East: Culture, Archaeology, Texts (4) An investigation of the peoples of the ancient Near East, focusing upon the writings which they produced, their languages and scripts, and their archaeological remains. Concurrent enrollment: MDA 140.

LING 301 Introduction to Phonetics and Phonology (4, Fa) A survey of topics in phonetics and phonology. (Duplicates credit in former LING 401a.) Prerequisite: LING 210.

LING 302 Introduction to Syntax and Semantics (4, Fa) A survey of topics in syntax and semantics. (Duplicates credit in former LING 402a.) Prerequisite: LING 210.

LING 374 Language and Society in East Asia (4) (Enroll in EALC 274)

LING 375 Sociolinguistics (4) Linguistic and cultural pluralism in the U.S.; distributional and structural characteristics of selected urban and minority dialects; the relationship between dialects and "media standard." Prerequisite: LING 210.

LING 380 Languages of the World (4) Introduction to the world’s linguistic diversity; number of languages spoken and where; grammatical structure and social function of selected languages.

LING 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

LING 401 Advanced Phonology (4) Advanced study of topics in phonology. (Duplicates credit in former LING 401b.) Prerequisite: LING 210.

LING 402 Advanced Syntax (4, Sp) Advanced study of topics in syntax. (Duplicates credit in former LING 402b.) Prerequisite: LING 210, LING 302.

LING 403 Advanced Semantics (4) Topics in the theory of meaning in natural language (Duplicates credit in former LING 303.) Prerequisite: LING 302.

LING 405 Child Language Acquisition (4) Universal characteristics of child language; stages of acquisition of phonology, syntax, semantics; processes and dimensions of development; psychological mechanisms; communicative styles. (Duplicates credit in former LING 395.)

LING 406 Psycholinguistics (4) Experimental and theoretical aspects of how spoken and written language is produced and understood, learned during childhood, and affected by brain damage. Prerequisite: LING 210 or PSYC 100.

LING 407 Atypical Language (4) Analysis of atypical language and language pathologies throughout the lifespan and their relevance to current linguistic and cognitive science theory. Prerequisite: LING 210 or PSYC 100.

LING 409 Linguistic Structure of English (3) An overview of the syntactic, semantic, pragmatic structures of English as they relate to the theoretical literature on language acquisition.

LING 410 Second Language Acquisition (4) Theories of second language acquisition in children and adults; comparison of first and second language acquisition including psychological, social, and individual factors. (Duplicates credit in former LING 396.) Prerequisite: LING 210.

LING 411x Linguistics and Education (4) Practical classroom approaches to children’s language; relationships between writing, reading, and speaking; social and regional dialects; traditional, structural, and generative-transformational grammars. Not available for major or minor credit.

LING 412 Linguistic Interpretation of the Law (4) Principles of semantics; analysis of speech acts including informing, promising, threatening, warning, linguistic analysis of consumer contracts and advertisements; readability studies.

LING 415 Phonetics (4) Familiarization with the articulation and transcription of speech sounds. Also vocal tract anatomy, acoustics, speech technology, non-English sounds, perception. Includes laboratory exercises.

LING 422 Language Contact and Language Acquisition (4, Sp) The emergence of new languages, known as Creoles, in socio-historical situations where linguistic input is degraded and insufficient to support the ordinary language acquisition process.

LING 433 Children’s Learning and Cognitive Development (4) (Enroll in PSYC 433)

LING 450 New Horizons in Forensic Speaker Identification (4) Overview of methods used to identify voices on the basis of their characteristic speech patterns.

LING 465 Philosophy of Language (4) (Enroll in PHIL 465)

LING 466 Word and Phrase Origins (4) Introduction to historical-comparative word study; history of ideas concerning language relationships; types of semantic change; hidden metaphors in English word-stock.
LING 480 Linguistic Structures (4) Analysis of grammatical structures of an individual language.

LING 485 Field Methodology (4) Elicitation techniques and methodological principles; recording and analysis of phonological, syntactic, and semantic structures; practical approaches to procedures used in urban, rural, and “primitive” settings.

LING 450x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

LING 497 Honors Thesis (4, FaSp) Writing of the honors thesis. Registration is restricted to honors students.

LING 499 Special Topics (2-4, max 8) Investigation of selected topics in linguistics.

LING 501ab Experimental Methods in Linguistics (3-3) a: Univariate and bivariate statistical methods with applications to linguistic research; introduction to statistical computer packages. b: The application of advanced multivariate statistical methods to linguistic research. (Duplicates credit in former LING 601.) Prerequisite: LING 501a.

LING 505abc Seminar in Linguistics (1-1-1) a: Exploration of the professional world of linguistics for first semester graduate students. b: Preparation and presentation of M.A./Ph.D. screening papers; discussion of student research. c: Colloquium for presentation and discussion of student research paper. Graded CR/NC.

LING 512 Linguistic Variation and Language Changes (3, Fa) Linguistic relationships among various correlates of variation: social, psychological, and chronological. Focus on dialectical, registral, and historical variation; the constraints of production and perception in different modes and situations.

LING 513 Spanish Morphology and Phonology (3, FaSp) (Enroll in SPAN 513)

LING 514 Spanish Syntax (3, FaSp) (Enroll in SPAN 514)

LING 515 Spanish Grammar in Discourse (3, FaSp) (Enroll in SPAN 515)

LING 527 Second Language Acquisition (3, Sp) Concepts and issues in theoretical approaches to the study of non-primary language acquisition; e.g., linguistic and processing universals, language transfer, language learnability, fossilization.

LING 530 Generative Syntax (3) Introduction to syntax; transformational-generative syntax.

LING 531ab Phonology (a: 3, Fa; b: 3, Sp) Traditional views of phonology; generative phonology; current developments in phonological research and theory.

LING 532 Current Issues in Syntactic Theory (3) Original literature, focusing whenever possible on issues in comparative syntax and their implications for universal grammar. Course complements LING 530.

LING 533 Language Universals and Typology (3) Introduction to language universals and typology.

LING 534 Logic and the Theory of Meaning (3) An introduction to logic in preparation for advanced work in semantics and linguistic theory.

LING 535 Syntax and Grammatical Theory (3, Sp) Principles and comparison of modern theories of grammar with special reference to syntax.

LING 536 Semantics (3, Sp) Current linguistic approaches to the semantics of natural language; analysis of concepts of meaning and reference.

LING 537 Advanced Syntax (3, max 9) Topics in advanced formal syntax; current literature leading to open questions in research; survey of important and controversial issues of current theoretical relevance.

LING 538 Selected Topics in Romance Syntax (3, max 9, Sp) Overview of selected topics in Romance Syntax within a comparative perspective and their contribution towards the understanding of a general theory of grammar.

LING 539 Japanese/Korean Syntax and Theoretical Implications (3, max 9) Critical discussion of selected papers and dissertations on Japanese/Korean syntax and consideration of their theoretical implications.

LING 540 Field Methods in Linguistics (3, max 6, Sp) Recording and analysis of a living language as employed by a native speaker of that language.

LING 541 Field Methods in Second Language Acquisition (3) Research design and methodology; data collection, coding, and analysis; ethical considerations.

LING 542 Historical Linguistics (3, 2 years, Sp) Principles of language change; the comparative method; structural and social factors in language change.

LING 546 Comparative Indo-European Linguistics (3) Analysis of the phonological, morphological, and syntactic structures of Proto-Indo-European, and its development in the various branches of Indo-European.

LING 547 Morphology (3, max 12, FaSpSm) Introduction to morphology; words versus sentences, the grammar of words, the various notions of “lexicon,” the architecture of the phonological component. This course is in preparation for advanced work in linguistic theory.

LING 548 Lexical Semantics (3, Sp) Languages group meaning elements together in different ways to form words. Consideration of how to identify these elements and how speakers map them into lexico-syntactic units.

LING 555 Comparative Germanic Linguistics (3) Nature and relationship of changes that led to the differentiation of the individual Germanic languages.

LING 557 Structure of the Chinese Language (4) (Enroll in EALC 557)

LING 561 Topics and Issues in East Asian Linguistics (4, max 12) (Enroll in EALC 561)

LING 573 Sociolinguistics (3) Theoretical approaches to language in social context; discourse analysis, ethnography of communication, variation theory.

LING 574 Advanced Sociolinguistics (3, max 9) Current issues in sociolinguistic theory.

LING 576 Psycholinguistics (3) Theories of acquisition; sentence and discourse processing; language and thought.

LING 579 Child Language Development (3, Sp) Acquisition of grammatical, discourse, and conversational competence; strategies and structures.

LING 580 General Phonetics (3, Sp) Familiarization with articulation, transcription, production, and acoustic analysis of the speech sounds found in the world’s languages. Also speech technology, perception, and disorders. Includes laboratory exercises.

LING 581 Topics in Advanced Phonology (3, max 9) Topics in advanced formal phonology; theoretical issues in the interface of phonology with other areas of linguistics; literature study on themes of current theoretical relevance. Recommended prerequisite: LING 531ab.

LING 582 Experimental Phonetics (3, FaSp) Source-filter theory, acoustic correlates of speaker sounds, vocal tract and auditory physiology, coarticulation and motor coordination, speech technology including synthesis and recognition, experimental design and statistics, and speech perception. Prerequisite: LING 580.

LING 585 Computational Linguistics (3) Using hands-on and research techniques, study of the role of linguistic knowledge and the procedures that implement it in computational systems that process natural language.

LING 586 Advanced Psycholinguistics (3, max 9) Current issues in psycholinguistic theory.

LING 590 Directed Research (1-12, FaSpSm) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

LING 593x Practicum in Teaching the Liberal Arts: Linguistics (2, FaSp) Practical principles for the long-term development of effective teaching within college disciplines. Graded CR/NC. Open only to doctoral students.

LING 595x Directed Readings (1-4, FaSpSm) Maximum units which may be applied to the degree to be determined by the department.

LING 599 Special Topics (2-4, max 8, FaSpSm) Research trends as reflected primarily in the current periodical literature.

LING 602 Seminar in Experimental Methods in Linguistics (3) Topics in quantitative methods in linguistics research, e.g., covariance structure analysis, multi-dimensional scaling, log linear model, meta-analysis.

LING 610 Seminar in Linguistic Theory (3, max 12, Sp)

LING 616 Seminar in Linguistic Structures (3, max 12, 2 years, Fa) Analysis of the synchronic or diachronic phonology, morphology, and syntax of individual languages.

LING 627 Seminar in Second Language Acquisition (3, max 12, FaSp) Readings in second language acquisition as the framework for a discussion and research-oriented seminar.

LING 631 Seminar in Phonological Theory (3, max 12, Fa) Readings in phonetic theory and current research as the framework for a discussion-oriented class. Prerequisite: LING 580.

LING 635 Seminar in Syntax (3, max 12, FaSp)

LING 636 Seminar in Semantics (3, max 12, Fa)

LING 645 Seminar in Language Change (3, max 12, Sp)
Mathematical Finance

Kaprielian Hall 104

Minor in Mathematical Finance

Kaprielian Hall 104
(213) 740-3800

Staff Contact: Cynthia Mata-Flores (Undergraduate)

This interdisciplinary minor was created for students in business, economics, and mathematics, whose majors already require some of the introductory course work. Students in other programs are welcome but should expect the minor to require more units than it does for students in those programs.

As with all minors, students must include at least four upper-division courses and four courses dedicated exclusively to this minor (which may be the same four courses). Finally, students must select four courses outside their major department. Economics majors must choose four courses outside of economics; math majors must choose four courses outside of math; business majors must choose four courses outside of the Marshall School of Business. These may be the same courses used to meet the first two conditions.

### Course Requirements

- **Prerequisite required**

Total requirements, for students with no prior course work: 42-43 units

Students majoring in business administration, economics or mathematics can meet many of these requirements with course work that also satisfies their majors. In addition to those classes, students in those majors must complete the following requirements:

- Business majors satisfy 24 units with course work that is also required for the major and need to complete only 18 units in MATH, ECON and ITP or CSCI
- Economics majors satisfy 30-34 units with course work required for the major (including one major elective), needing only 18-22 units in BUAD, FBE, ITP or CSCI and MATH
- Mathematics majors satisfy 16 units with course work required for the major, needing only 26 units in BUAD, ECON, FBE and ITP or CSCI

### Progressive Degree Programs in Mathematics

See Mathematics for progressive degree requirements.

### Master of Science in Mathematical Finance

The objective of this Master of Science program is to produce graduates with a rigorous foundation in the economic theory and mathematical modeling of financial markets. The program creates an integrated curriculum spanning four disciplines: economics, mathematics, econometrics/statistics and computational/numerical analysis. The program is designed for recent graduates in the fields of applied mathematics, physics and engineering - or for graduates in economics, business and finance with strong mathematical backgrounds - who wish to pursue high-tech finance careers in financial institutions, industry or government.

### Admission Requirements

Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All applicants must take the GRE General Test. Complete transcripts of undergraduate and any graduate level courses are required, as well as a statement of purpose and three recommendation letters. A substantial undergraduate background in mathematics is required, which should include one semester of real analysis or advanced calculus, one semester of linear algebra and one semester of advanced probability/statistics. Candidates with weaker backgrounds may be required to take mathematics classes prior to admission to the program. An undergraduate knowledge of microeconomics and of microeconomics, and partial differential equations is helpful, although it is not required for admission. Some experience in Matlab and C/C++ programming is also useful.

### Foreign Language Requirement

There is no foreign language requirement.

### Course Requirements

Thirty units of course work are required, six core courses and four to five elective courses. Students are required to satisfy a summative experience for degree completion. This will be in the form of registration in 1 unit of MATH 590 Directed Research with a summative report at the end of the term. Topics of research will be determined by the program director. The program consists of:

- **Required Core Courses (6 courses, 18 units)**
  - MATH 530ab Stochastic Calculus and Mathematical Finance 3-3
  - MATH 512 Financial Informatics and Simulation (Computer Labs and Practitioner Seminar) 3
  - MATH 550 Directed Research 1

- **Financial Economics and Econometrics:**
  - ECON 613 Economic and Financial Time Series 4
  - ECON 659 Economics of Financial Markets I 4

- **Elective Courses (4 courses, 12 units)**
  - FBE 555 Applied Finance in Fixed Income Securities 3
  - FBE 556 Trading and Exchanges 3
  - FBE 557 Investment Analysis and Portfolio Management 3
  - FBE 558 Management of Financial Risk 3
  - FBE 589 Mortgages and Mortgage-Backed Securities and Markets 3
  - (FBE 555 highly recommended)

- **Statistics**: 3-3
  - MATH 541ab Introduction to Mathematical Statistics
  - MATH 543l Nonparametric Statistics 3
  - MATH 547 Methods of Statistical Inference 3

- **Numerical/Optimization/Other Methods**: 3-3
  - MATH 501 Numerical Analysis and Computation 3
  - MATH 502ab Numerical Analysis 3-3
  - MATH 503ab Numerical Solution of Ordinary and Partial Differential Equations 3-3
  - MATH 504ab Applied Probability 3-3
  - MATH 506 Filtering Theory 3
  - MATH 508 Stochastic Differential Equations 3
  - MATH 585 Mathematical Theory of Optimal Control 3

- **Computational and Financial Economics**: 4
  - ECON 614 Economic and Financial Time Series II 4
Prerequisites for any of the above courses can be waived based on students’ knowledge of the subject area. Approval from the program director is required.

* The elective courses in statistics/numerical/optimization/other methods and computational and empirical finance have to be approved for each student by the program directors. Other electives, not on this list, may sometimes be approved after consultation with program directors.

Chair: Eric M. Friedlander, Ph.D.
Faculty

University Professor and USC Associates Chair in Natural Sciences: Michael S. Waterman, Ph.D. (Biological Sciences and Computer Science)
University Professor and Andrew and Erna Viterbi Chair in Communications: Solomon Golomb, Ph.D. (Electrical Engineering)
Dean’s Professor of Mathematics: Eric M. Friedlander, Ph.D.
Gabilan Assistant Professor of Mathematics: Sami Assaf, Ph.D.

Professors: Kenneth Alexander, Ph.D.; Richard Arratia, Ph.D.; Peter Baxendale, Ph.D.; Francis Bonahon, Ph.D.*; Susan Friedlander, Ph.D.; Jason Fulman, Ph.D.; Larry Goldstein, Ph.D.; Robert Guralnick, Ph.D.*; Nicolai T.A. Haydn, Ph.D.; Ko Honda, Ph.D.; Edmond A. Jonckheere, Ph.D. (Electrical Engineering); Sheldon Kamien, Ph.D.; Igor Kukavica, Ph.D.; Charles Lanski, Ph.D.; Sergey Lototsky, Ph.D.; Jin Ma, Ph.D.; Feodor Malikov, Ph.D.; Remigijus Mikulevicius, Ph.D.; M. Susan Montgomery, Ph.D.*; Paul K. Newton, Ph.D. (Aerospace and Mechanical Engineering); Wlodzim Proskurowski, Ph.D.; Gary Rosen, Ph.D.; Robert J. Sacker, Ph.D.; Fengzhu Sun, Ph.D. (Biological Sciences); Nicholas P. Warner, Ph.D. (Physics); Chunning Wang, Ph.D.; Jianfeng Zhang, Ph.D.; Mohammed Ziane, Ph.D.

Associate Professors: Jay Bartroff, Ph.D.; Aaron Lauda, Ph.D.

Assistant Professors: Aravind Asok, Ph.D.; Sabina Gautschi, Ph.D.

Professors (Research): Leonid Birger, Ph.D.
Associate Professor (Teaching): Cyrra Haskell, Ph.D.
Assistant Professor (Teaching): Nathaniel Emerson, Ph.D.

Assistant Professors (Non-Tenure Track): Andrea Appel, Ph.D.; Quentin Berger, Ph.D.; Bradley Drew, Ph.D.; Weiwei Hu, Ph.D.; Tobias Johnson, Ph.D.; Daniel Murfet, Ph.D.; Tuan Nguyen, Ph.D.; David Rose, Ph.D.; Brian Rynas, Ph.D.; Anthony Suen, Ph.D.; James Zhao, Ph.D.; Guangbin Zhuang, Ph.D.

Professors Emeriti: Ronald E. Bruck Jr., Ph.D.; Alan Schumitzky, Ph.D.

* Recipient of university-wide or college teaching award.

Degree Programs

The Department of Mathematics has designed its major to give students an understanding of the several areas of mathematics. The program of study allows students to use electives to prepare themselves for a specific field, whether in industry, teaching or advanced graduate research. The faculty is engaged in a wide variety of research activities and offers courses in many areas.

The department offers the B.S., B.A., and minor in mathematics; B.S. and B.A. in applied and computational mathematics; B.S. in mathematics/economics; minor in mathematical finance and minor in statistics; progressive degree programs in mathematics; M.S. in applied mathematics; M.S. in mathematical finance; M.S. in statistics; M.A. in mathematics; M.A. in applied mathematics; M.S. in computational molecular biology; Ph.D. in applied mathematics; and Ph.D. in mathematics.

Undergraduate Degrees

Advanced Placement Examinations in Mathematics

The university grants four units of credit in mathematics for scores of 4 or 5.

Major Requirements for the Bachelor of Arts in Mathematics

Six math courses at the 400 level or above including MATH 410, MATH 425a and either MATH 434 or MATH 435, are required.

Major Requirements for the Bachelor of Science in Mathematics

Pre-major Requirements: MATH 125, MATH 126 or MATH 127, MATH 225 or MATH 245, MATH 226 or MATH 227.

Eight math courses at the 400 level or above, excluding MATH 434 and MATH 450, but including MATH 407, MATH 408, MATH 425a, MATH 425ab, MATH 432, MATH 435, MATH 445, MATH 466, MATH 467, MATH 471.

In Computing: At least one programming course such as CSCI 101L, ITP 109x, ITP 110x, ITP 165x or other programming courses approved by the program advisers.

Electives: At least three additional courses with significant quantitative content, in mathematics, natural sciences, computer science, engineering, economics or other fields approved by the department. At least two of these must be outside the mathematics department; moreover, at least two of these three must be in the same department, one of which must be an upper-division course.

Major Requirements for the Bachelor of Science in Applied and Computational Mathematics

Pre-major Requirements: MATH 125, MATH 126 or MATH 127, MATH 225 or MATH 245, MATH 226 or MATH 227.

In Mathematics: MATH 407, MATH 408, MATH 425a, MATH 450, MATH 466, MATH 467, MATH 471.

In Computing: At least one programming course such as CSCI 101L, CSCI 103, ITP 109x, ITP 115, ITP 165x or other programming course approved by the program advisers.

Electives: At least four additional courses with significant quantitative content in mathematics, natural sciences, computer science, engineering, economics or other fields approved by the department. At least three of the four must be outside the mathematics department; and at least one must be upper-division.

Grade Point Average Requirements

For each undergraduate degree an overall GPA of 2.0 in all upper-division courses taken for the degree is required. In addition, any upper-division course specifically listed as required must be passed with a grade of C (2.0) or better (e.g., MATH 410, MATH 425ab and MATH 471 for the B.S. degree).

Minor in Mathematical Finance

This interdisciplinary minor was created for students in business, economics and mathematics, whose majors already require some of the introductory course work. Students in other programs are welcome but should expect the minor to require more units than it does for students in these programs. For more information, see Mathematical Finance.

Minor in Statistics

Kaprielian Hall 104
(213) 740-2400

This interdisciplinary minor should appeal to students from any discipline who are interested in acquiring a basic understanding of the mathematics underlying modern statistical analysis and inference techniques, in learning how to handle and analyze large data sets, and in gaining insight into the applications of modern statistics. Students who complete this minor should be able to critically interpret statistically based conclusions, should be viable candidates for entry level positions requiring some knowledge of modern statistics and data analysis, and should be prepared to enter a graduate-level program in
applied statistics. The only prerequisite for this minor is one semester of elementary calculus.

As with all minors, students must include at least four upper-division courses and four courses dedicated exclusively to this minor (which may be the same four courses). Finally, students must select four courses outside their major department. These may be the same four courses used to meet the first two conditions. Note that Math B.A. and B.S. economics/mathematics students may complete this minor by taking MATH 407 and MATH 408 and at least 16 additional upper-division units approved by the Department of Mathematics, which are not in their major department and not being used to satisfy a requirement for their major. Note also that if calculus must be taken to satisfy the prerequisite for MATH 307, 20 units would be required to complete the minor.

</tr>
</tbody>
</table>

*Electives may be any upper-division or graduate level classes involving the theory or application of statistics approved by the Department of Mathematics. The department maintains a list of currently pre-approved courses students may choose from. Potential courses include: BISC 478 Computational Genome Analysis (4 units), ECON 318 Introduction to Econometrics (4 units), ECON 419 Advanced Econometrics (4 units), PSYC 421L. Applied Multivariate Statistical Methods (4 units).

Mathematics Minor Requirements

MATH 125, MATH 126 or MATH 127, MATH 225 or MATH 245, MATH 226 or MATH 227 and four math courses at the 400 level or above, one of which must be from MATH 410, MATH 425a, MATH 425, MATH 440 or MATH 471. These four courses at the 400 level or above must total at least 16 units.

Honors Program in Mathematics

Admission to the Program

The honors program is available for mathematics majors. A student must apply to the department for admission. A minimum grade point average of 3.5 is required in the first two years of university work as well as in the lower-division mathematics courses MATH 125, MATH 126 or MATH 127, MATH 225 and MATH 226 or MATH 227.

Requirements

The students must complete all requirements for the degree program in which they are enrolled. MATH 410, MATH 425ab and MATH 471 are required. The remaining courses at the 400 level or higher must be acceptable for the B.S. degree.

In addition, students in the honors program must register for at least four units of MATH 490 Directed Research. The student must have an overall GPA of at least 3.5 in all courses at the 400 level or higher.

Combined Mathematics/Economics Major Requirements for the Bachelor of Science

Students are required to take seven courses in economics, seven courses in mathematics and one course in computer programming languages.

Pre-major Requirement: MATH 125

In Economics: ECON 203, ECON 205, ECON 303, ECON 305, ECON 318 and at least two other ECON courses at the 400-level or above

In Mathematics: MATH 126 or MATH 127; MATH 225 or MATH 245; MATH 226 or MATH 227; MATH 407, MATH 408 and at least two other MATH courses at the 400-level or above

In Computing: At least one course chosen from ITP 110X, ITP 165X, CSCI 101L

Electives must be approved by the program advisers.

Language

Those students intending to go on to graduate school should satisfy the language requirement in French, German or Russian.

Progressive Degree Programs in Mathematics

Outstanding undergraduate students may apply for a master’s degree in any area for which their major is relevant. If accepted into the master’s degree program, the student may work simultaneously toward their bachelor’s degree and the master’s degree. To apply for a master’s degree, a student must have completed at least 64 units, but fewer than 96 units, toward their major. The application requires two letters of recommendation from USC faculty, at least one of whom must be in the department of the student’s major. For more information on progressive degree programs, see here.

Graduate Degrees

Admission Requirements

All applicants must take the Graduate Record Examinations General Test.

Master of Arts and Doctor of Philosophy in Mathematics and in Applied Mathematics

A substantial undergraduate background in mathematics which includes one year of real analysis (MATH 425ab), one semester of abstract algebra (MATH 410) and one semester of upper-division linear algebra (MATH 471) is required. Students enrolled in one of the department’s master of science or arts programs must complete the Ph.D. screening procedure prior to admission to a Ph.D. program.

Master of Science in Applied Mathematics, in Statistics and in Computational Molecular Biology

A substantial undergraduate background in mathematics which includes one semester of real analysis or advanced calculus and one semester of linear algebra is required.

Regular admission pending completion during the first year of graduate studies of prerequisite undergraduate mathematics may be considered for applicants who otherwise qualify for the program.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Science in Applied Mathematics

This program is intended for individuals who are seeking or currently hold positions which involve mathematical applications, or for mid-career people wishing to improve their skills in applied areas. Specific options in the program include: biomedicine, discrete mathematics, economics, finance and business economics, fluid dynamics, numerical analysis and computation, and systems and control. In addition, students may design their own option to suit specific needs.

On admission to the program, each student is assigned an option adviser. The adviser serves on the student’s master’s committee and assists the student in determining the courses of study in the selected option. Courses of instruction are drawn from the Department of Mathematics and other participating departments which include: aerospace engineering, biomedical engineering, civil engineering, computer science, economics, electrical engineering, business administration, mechanical engineering, physiology and biophysics, and preventive medicine.

Requirements for Combined Mathematics/Economics Major

A substantial undergraduate background in mathematics which includes one year of real analysis (MATH 425ab), one semester of abstract algebra (MATH 410) and one semester of upper-division linear algebra (MATH 471) is required. Students enrolled in one of the department’s master of science or arts programs must complete the Ph.D. screening procedure prior to admission to a Ph.D. program.

Master of Science in Mathematical Finance

See Mathematical Finance.

Master of Science in Statistics

The object of this program is to provide academic instruction in statistical theory with a solid mathematical foundation while emphasizing applications to real world problems. Some probability theory is included to provide a rigorous foundation. The program is intended for individuals who are seeking or currently hold positions that involve statistical methodology and practice. A student may orient his or her course of study toward a particular field of application through appropriate selections from the program listings plus elective courses from other disciplines.

Course Requirements

Thirty units of course work are required, including:

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 425ab</td>
<td>3</td>
</tr>
</tbody>
</table>
**Mathematics and Master of Arts in Applied Mathematics**

The objective of the Master of Arts program is to prepare students for research, teaching and other professional careers in mathematics and applied mathematics, respectively. In addition to the algebra requirement and differential geometry/topology option for the Master of Arts in Mathematics, the two programs differ in emphasis: the Master of Arts in Mathematics emphasizes the core courses in pure mathematics, and the Master of Arts in Applied Mathematics emphasizes courses in mathematics and affiliated fields that are fundamental in applied mathematics.

**Requirements for the Master of Arts in Mathematics**

At least 24 units are required, including:

<table>
<thead>
<tr>
<th>Required courses</th>

</tr>
</tbody>
</table>

**Mathematical science track**

Students are required to demonstrate skill in C++, Java or Perl, and to demonstrate knowledge of molecular biology at the level of BISC 520L. A substantial report on the commercial or laboratory internship must be submitted (for which enrollment in MATH 520 is required).

**Biology track**

**Ph.D. Programs in Mathematics and in Applied Mathematics**

The two year M.A. program is an expansion of the first year of graduate studies in the Ph.D. program in mathematics (respectively, the Ph.D. program in applied mathematics). The program provides a rigorous foundation in mathematics (applied mathematics) while affording students additional time for preparatory training. The comprehensive examinations for the M.A. program can serve as the preliminary qualifying examination for either Ph.D. program, and the written Ph.D. qualifying examinations serve as comprehensive examinations for the corresponding Master of Arts degree.

**Requirements for the Master of Arts in Mathematics**

At least 24 units are required, including:

**Doctor of Philosophy in Applied Mathematics**

Application deadline: January 1

The program requires a minimum effort by the student for a minimum of four years of full-time work.

**Screening Procedure**

The screening examination consists of four one-hour examinations covering the subject content of: MATH 520a Numerical Analysis; MATH 525a Applied Probability (or, at the student's discretion, MATH 507a Theory of Probability); MATH 525a Real Analysis; and MATH 541a Introduction to Mathematical Statistics.

The department offers the examinations twice a year, at the end of the fall and at the beginning of the spring semester. All four parts of the screening examination must be attempted by the end of the third semester (not counting summer sessions) and all four must be successfully completed by the end of the sixth semester in the program. The qualifying examination should follow two or three semesters after the successful completion of the screening procedure.

**Qualifying Exam Committee**

No later than at the end of the first semester after passing the screening procedure the student must form a qualifying exam committee consisting of an advisor and four other faculty members, including at least one from another department.

**Qualifying Examination**

The written portion of the qualifying examination consists of a Ph.D. dissertation proposal. This document should include: introduction, statement of the problem, literature survey, methodology, summary of preliminary
The preliminary qualifying exam is a written two-hour examination administered by the department. The student must choose between two options: analysis or algebra. Each option approximately covers the content of two one-semester graduate courses, with the precise list of possible topics made available to the student by the department.

**Course Requirements**

The student must complete, with no grade lower than B, a minimum of 60 units of courses carrying graduate credit and approved by the qualifying exam committee. These must include MATH 794ab and six courses from the following: MATH 502b, MATH 504ab, MATH 505b, MATH 507b, MATH 509, MATH 520, MATH 525b, MATH 530, MATH 532, MATH 541b, MATH 542L, MATH 545, MATH 555a, MATH 565a, MATH 574, MATH 576, MATH 580, MATH 585.

**Transfer of Credit**

No transfer of credit will be considered until the screening examination is passed. A maximum of 30 units of graduate work at another institution may be applied toward the course requirements for the Ph.D. A grade of B- (A - 4.0) or lower will not be accepted and, at most, two grades of B will be accepted. A Ph.D. candidate may petition the department for transfer of additional credit, after he or she passes the qualifying examination.

**Foreign Language Requirement**

The student must demonstrate a reading comprehension of mathematics in one language (other than English) in which there is a significant body of research mathematics (such as Chinese, French, German, Japanese and Russian) by passing a written examination, administered by the Mathematics Department, in translation of mathematical content.

**Dissertation**

Following passage of the screening examination and approval of a dissertation topic by the qualifying exam committee, the student begins research toward the dissertation under the supervision of the dissertation committee. The primary requirement of the Ph.D. is an acceptable dissertation based on a substantial amount of original research conducted by the student.

**Research Areas**

Opportunities for research are offered in the areas of algebraic geometry, arithmetic geometry, combinatorics, complex geometry, control theory, differential equations, differential geometry, dynamical systems, functional analysis, geometric analysis, group theory, K-theory, nonlinear analysis, number theory, numerical analysis, optimization, probabilistic theory, representation theory, ring theory and topology.

**Courses of Instruction**

**Mathematics (MATH)**

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

**MATH 040x Basic Mathematical Skills (4, FaSp)**

Intensive review of arithmetic and algebra. Not available for degree credit. Graded CR/NC.

**MATH 108 Precalculus (4, FaSp)**

Equations and inequalities; functions; graphs; polynomial and rational functions; exponential, logarithmic, and trigonometric functions; analytic geometry. Prerequisite: MATH 040x or passing of placement exam.

**MATH 114x Foundations of Statistics (4, FaSpSm)**

An introduction to the basic tools of statistics. Descriptive statistics; probability; expected value; normal approximation sampling; chance models; tests of significance. Not available for major credit to Math students. Recommended preparation: MATH 040x or math placement exam.

**MATH 116 Mathematics for the Social Sciences (4, FaSp)**

 Finite mathematics with application to the social sciences; elementary set theory and logic; counting techniques; probability; statistics; matrices and systems of linear equations. Selected topics.

**MATH 117 Introduction to Mathematics for Business and Economics (4, FaSp)**

Functions, graphs, polynomial and rational functions, exponential and logarithmic functions, matrices, systems of linear equations. Prerequisite: MATH 040x or math placement exam.
MATH 118x Fundamental Principles of the Calculus (4, FaSp) Derivatives; extrema. Definite integral; fundamental theorem of calculus. Extrema and definite integrals for functions of several variables. Not available for credit toward a degree in mathematics. Prerequisite: MATH 108 or MATH 117 or placement exam in MATH.

MATH 125 Calculus I (4, FaSpSm) Limits; continuity, derivatives and applications; antidifferentiables; the fundamental theorem of calculus; exponential and logarithmic functions. Prerequisite: MATH 108 or math placement exam.

MATH 126 Calculus II (4, FaSpSm) A continuation of 125; trigonometric functions; applications of integration; techniques of integration; indefinite integrals; definite integrals; series. Prerequisite: MATH 125.

MATH 225 Calculus III (4, FaSpSm) Matrices, systems of linear equations, vector spaces, linear transformations, eigenvalues, systems of linear differential equations, vector spaces, linear transformations, Euclidean algorithm, factorization, congruence classes, Rings, RSA algorithm, Chinese remainder theorem, codes, polynomials, fundamental theorem of algebra, polynomial multipication, Fourier transform, and other topics. Prerequisite: MATH 226 or MATH 227, and MATH 225 or MATH 245.

MATH 226 Calculus III (4, FaSpSm) Matrices, systems of linear equations, vector spaces, linear transformations, eigenvalues, systems of linear differential equations, vector spaces, linear transformations, Euclidean algorithm, factorization, congruence classes, Rings, RSA algorithm, Chinese remainder theorem, codes, polynomials, fundamental theorem of algebra, polynomial multipication, Fourier transform, and other topics. Prerequisite: MATH 226 or MATH 227, and MATH 225 or MATH 245.

MATH 227 Enhanced Calculus II (4, FaSpSm) Applications of integration, review of techniques of integration, infinite sequences and series, some beginning linear algebra, ordinary differential equations. Designed for students who earn a score of 4 or 5 on the Advanced Placement Calculus AB Examination, or a score of 3 or 4 on the BC Examination. Admission to course by departmental approval. (Duplicates credit in MATH 126.)

MATH 200 Elementary Mathematics from an Advanced Standpoint (4, FaSpSm) An explication of arithmetic and geometry, including the algebraic operations, number bases, plane and solid figures; and coordinate geometry. Prerequisite: MATH 040x or math placement exam.

MATH 208 Elementary Probability and Statistics (4, FaSpSm) Descriptive statistics, probability concepts, discrete and continuous random variables, mathematical expectation and variance, probability sampling, Central Limit Theorem, estimation and hypothesis testing, correlation and regression. Not available for major credit to mathematics majors. Prerequisite: MATH 118x or MATH 125.

MATH 218 Probability for Business (4, FaSpSm) Basic probability, discrete and continuous distributions, expectation and variance, independence, sampling, estimation, confidence intervals, hypothesis testing. Prerequisite: MATH 118x or MATH 125.

MATH 225 Linear Algebra and Linear Differential Equations (4, FaSpSm) Matrices, systems of linear equations, vector spaces, linear transformations, eigenvalues, systems of linear differential equations. Prerequisite: MATH 126 or MATH 127.

MATH 226 Calculus III (4, FaSpSm) A continuation of 126; vectors, vector valued functions; differential and integral calculus of functions of several variables; Green’s theorem. Prerequisite: MATH 126 or MATH 127.

MATH 227 Enhanced Calculus III (4, FaSpSm) A continuation of MATH 127; vectors and vector spaces functions of several variables, partial differential equations, optimization theory, multiple integration; Green’s Stokes’, divergence theorems. (Duplicates credit in MATH 226.)

MATH 245 Mathematics of Physics and Engineering I (4, FaSpSm) First-order differential equations; second-order linear differential equations; determinants and matrices; systems of linear differential equations; Laplace transforms. Prerequisite: MATH 226 or MATH 227.

MATH 265 Mathematical and Computational Methods for Neuroscience (4, FaSpSm) Differential calculus of multivariable functions, optimization, elementary linear algebra and matrix theory, principal component analysis, elementary differential equations, systems, qualitative theory, numerical methods, scientific computation.

MATH 307 Statistical Inference and Data Analysis I (4, Fa) Probability, counting, independence, distributions, random variables, simulation, expectation, variance, covariance, transformations, law of large numbers, Central limit theorem, estimation, efficiency, maximum likelihood, Cramer–Rao bound, bootstrap. Prerequisite: MATH 118 or MATH 125 or MATH 126.

MATH 308 Statistical Inference and Data Analysis II (4, Sp) Confidence intervals, hypothesis testing, p-values, likelihood ratio, nonparametrics, descriptive statistics, regression, multiple linear regression, experimental design, analysis of variance, categorical data, chi-squared tests, Bayesian statistics. Prerequisite: MATH 307.

MATH 370 Applied Algebra (4, Sp) Induction, Euclidean algorithm, factorization, congruence classes, Rings, RSA algorithm, Chinese remainder theorem, codes, polynomials, fundamental theorem of algebra, polynomial multiplication, Fourier transform, and other topics. Prerequisite: MATH 226 or MATH 227, and MATH 225 or MATH 245.

MATH 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

MATH 395 Seminar in Problem Solving (2, max 8, FaSpSm) Systematic approach to solving non-standard and competition level math problems on inequalities, infinite sums and products, combinatorics, number theory, and games. Recommended preparation: MATH 126 or MATH 127.

MATH 400 Foundations of Discrete Mathematics (4, FaSpSm) Methods of proof, predicate calculus, set theory, order and equivalence relations, partitions, lattices, functions, cardinality, elementary number theory and combinatorics. Prerequisite: MATH 225 or MATH 226 or MATH 227.

MATH 407 Probability Theory (4, FaSpSm) Probability spaces, discrete and continuous distributions, moments, characteristic functions, sequences of random variables, laws of large numbers, central limit theorem, special probability laws. Prerequisite: MATH 226 or MATH 227.

MATH 408 Mathematical Statistics (4, Sp) Principles for testing hypotheses and estimation, small sample distributions, correlation and regression, nonparametric methods, elements of statistical decision theory. Prerequisite: MATH 407.

MATH 410 Fundamental Concepts of Modern Algebra (4, FaSpSm) Sets; relations; groups; homomorphisms; symmetric groups; Abelian groups; Sylow’s theorems; introduction to rings and fields. Not open to students with credit in MATH 470. Prerequisite: MATH 225; recommended preparation: One 400-level Mathematics course, excluding MATH 450.

MATH 425b Fundamental Concepts of Analysis (a) 4, FaSpSm: a: The real number system, metric spaces, limits, continuity, derivatives and integrals, infinite series. b: Implicit function theorems, Jacobians, transformations, multiple integrals, line integrals. Prerequisite: MATH 226 or MATH 227; recommended preparation: One 400-level Mathematics course, excluding MATH 450.

MATH 430 Theory of Numbers (4, Fa) Methods of proof, predicate calculus, set theory, order and equivalence relations, partitions, lattices, functions, cardinality, elementary number theory and combinatorics. Prerequisite: MATH 225 or MATH 227.

MATH 435 Vector Analysis and Introduction to Differential Geometry (4, Sp) Vectors, elements of vector analysis, applications to curves and surfaces, standard material of differential geometry. Prerequisite: MATH 226 or MATH 227.

MATH 445 Mathematics of Physics and Engineering II (4, FaSpSm) Vector field theory; theorems of Gauss, Green, and Stokes; Fourier series and integrals; complex variables; linear partial differential equations; series solutions of ordinary differential equations. Prerequisite: MATH 245.

MATH 450 History of Mathematics (4, Sp) Evolution of mathematical ideas and techniques as seen through a study of the contributions of eminent mathematicians to the formulation and solution of celebrated problems. Prerequisite: MATH 225 or MATH 245; recommended preparation: upper-division MATH course.

MATH 458 Numerical Methods (4, Fa) Rounding errors in digital computation; solution of linear algebraic systems; Newton’s method for nonlinear systems; matrix eigenvalues; polynomial approximation; numerical integration; numerical solution of ordinary differential equations. Prerequisite: MATH 225 or MATH 245.

MATH 466 Dynamic Modeling (4, Fa) Formulation and study of models arising in population dynamics, growth of plankton, pollution in rivers, highway traffic, morphogenesis and tidal dynamics: stability, oscillations, bifurcations, chaos. The lab will consist of computer simulation of models using commercially available software. Prerequisite: MATH 225 or MATH 245.

MATH 487 Theory and Computational Methods for Optimization (4, Fa) Methods for static, dynamic, unconstrained, constrained optimization. Gradient, conjugate gradient, penalty methods. Lagrange multipliers, least squares, nonlinear dynamic programming. Application to control and estimation. Prerequisite: MATH 226 or MATH 227; MATH 225 or MATH 245.

MATH 471 Topics in Linear Algebra (4, Sp) Polynomial rings, vector spaces, linear transformations, canonical forms, inner product spaces. Prerequisite: MATH 225; recommended preparation: MATH 410.

MATH 475 Introduction to Theory of Complex Variables (4, Sp) Limits and infinite series; line integrals; conformal mapping; single-valued functions of a complex variable; applications. Primarily for advanced students in engineering. Prerequisite: MATH 226 or MATH 227.
MATH 490x Directed Research (1-8, max 12, FaSp5m) Individual research and readings. Not available for graduate credit.

MATH 499 Special Topics (2-4, max 8) Lectures on advanced material not covered in regularly scheduled courses. No more than two registrations allowed.

MATH 500 Graduate Colloquium (2) Lectures directed to mathematics graduate students by faculty of the department and by outside speakers. Problem solving workshops. Graded CR/NC.

MATH 501 Numerical Analysis and Computation (3, Sp) Linear equations and matrices, Gauss elimination, error estimates, iteration techniques; contractive mappings, Newton’s method; matrix eigenvalue problems; least-squares approximation, Newton-Cotes and Gaussian quadratures; finite difference methods. Prerequisite: linear algebra and calculus.

MATH 502ab Numerical Analysis (3; Fa: b: 3; Sp: b: 3, Sp) Computational linear algebra; solution of general nonlinear systems of equations; approximation theory using functional analysis; numerical solution of ordinary and partial differential equations. Prerequisite: MATH 425a and MATH 471.

MATH 504ab Numerical Solution of Ordinary and Partial Differential Equations (2; a: 3, Sp; b: 3, Fa) a: Initial value problems; multistep methods, stability; convergence and error estimation, automatic stepsize control, higher order methods, systems of equations, stiff problems; boundary value problems; eigenproblems. Prerequisite: MATH 501 or MATH 502a. b: Computationally efficient schemes for solving PDE numerically; stability and convergence of difference schemes, method of lines; fast direct and iterative methods for elliptic equations. Prerequisite: MATH 501 or MATH 502a.

MATH 505ab Applied Probability (a: 3, Fa: b: 3; Sp) a: Populations, permutations, combinations, random variables, distribution and density functions conditional probability and expectation, binomial, Poisson, and normal distributions; laws of large numbers, central limit theorem. b: Markov processes in discrete or continuous time; renewal processes; martingales; Brownian motion and diffusion theory; random walks, inventory models, population growth, queuing models, shot noise.

MATH 507ab Theory of Probability (a: 3, Fa: b: 3; Sp) a: Probability spaces; distributions and characteristic functions; laws of large numbers, central limit problems; stable and infinitely divisible laws; conditional distributions. Prerequisite: MATH 525a or MATH 570. b: Dependence, martingales, ergodic theorems, second-order random functions, harmonic analysis, Markov processes.

MATH 508 Filtering Theory (3) Theory of random differential equations and stochastic stability; optimum linear and nonlinear filtering, with discussion of asymptotic behavior of filter. Prerequisite: MATH 507a.

MATH 509 Stochastic Differential Equations (3) Brownian motion, stochastic integrals, the Itô formula, stochastic differential equations, analysis of diffusion processes, Girsanov transformation, Feynman-Kac formula, applications. Prerequisite: MATH 505ab or MATH 507ab.

MATH 510ab Algebra (a: 3, Fa: b: 3; Sp) a: Group Theory: isomorphism theorems, group actions, Sylow’s theorems, simple and solvable groups; Field Theory: Galois correspondence, radical extensions, algebraic and transcendental extensions, finite fields. b: Commutative Algebra: integrality, Hilbert basis theorem, Hilbert Nullstellensatz; Modules: modules over PIDs, chain conditions, tensor products; Noncommutative Rings: Jacobson radical, Artin-Wedderburn theorem, Maschke’s theorem. Prerequisite: MATH 410, MATH 471.

MATH 511ab Data Analysis (4-4) (Enroll in PM 511abc) Distribution-free methods for comparisons of two or more samples, tests of randomness, goodness of fit; classification, regression. Comparison with parametric techniques. Includes laboratory. Prerequisite: MATH 226, MATH 208x.

MATH 512 Nonparametric Statistics (3) Distribution-free methods for comparisons of two or more samples, tests of randomness, goodness of fit; classification, regression. Comparison with parametric techniques. Includes laboratory. Prerequisite: MATH 226, MATH 208x.

MATH 544L Multivariate Analysis (3) (Enroll in PM 544L) Multivariate Analysis (3, Fa) Transfer function models; stationary, nonstationary processes; moving average, autoregressive models; spectral analysis; estimation of mean, autocorrelation, spectrum; seasonal time series. Includes laboratory. Prerequisite: MATH 225, MATH 226, and MATH 208x.

MATH 547 Methods of Statistical Inference (3, Fa) Statistical decision theory: game theory, loss and risk functions; Bayes, minimax, admissible rules; sufficiency, invariance, tests of hypotheses, optimality properties. Inference for stochastic processes. Prerequisite: MATH 407 or MATH 408.

MATH 548 Sequential Analysis (3) Sequential decision procedures: sequential probability-ratio tests, operating characteristic, expected sample size, two-stage procedures, optimal stopping, martingales, Markov processes; applications to gambling, industrial inspection. Prerequisite: MATH 407 or MATH 408.

MATH 550 Sample Surveys (3, Sp) Theory of sampling and design of sample surveys; bias and precision; finite populations; stratification; cluster sampling; multistage, systematic sampling; non-sampling errors. Prerequisite: MATH 208x.

MATH 555ab Partial Differential Equations (a: 3, Fa: b: 3; Sp) Second-order partial differential equations of elliptic, parabolic, and hyperbolic type; in particular, potential and wave equations. Prerequisite: MATH 425ab.

MATH 556ab Ordinary Differential Equations (a: 3, Fa: b: 3; Sp) Existence, uniqueness and continuation of solutions; differential inequalities, linear systems, Sturm-Liouville theory, boundary value problems, Poincare-Bendixson theory, periodic solutions, perturbations, stability, fixed point techniques. Prerequisite: MATH 425ab.

MATH 572 Applied Algebraic Structures (3, Fa) Elementary predicate logic, model theory, axiomatic set theory; relations, functions, equivalences; algebraic and relational structures; graph theory; applications of lattices, Boolean algebras; groups, rings, field.
MATH 572ab Computational Molecular Biology Laboratory (a: 2, Sp: b: 2, Fa) (Enroll in BISC 572ab)

MATH 572ab Computational Molecular Biology (3-3, FaSpSm) Applications of the mathematical, statistical and computational sciences to data from molecular biology. a: Algorithms for genomic sequence data: sequence and map assembly and alignment, RNA secondary structure, protein structure, gene-finding, and tree construction. Prerequisite: CSCI 570; recommended preparation: familiarity with the concepts of basic molecular biology as covered in BISC 520. b: Statistics for genomic sequence data: DNA sequence assembly, significance of alignment scores, hidden Markov models, genetic mapping, models of sequence evolution, and microarray analysis. Prerequisite: MATH 505a, MATH 541a.

MATH 585 Mathematical Theory of Optimal Control (3, Fa) Deterministic control: calculus of variations; optimal control; Pontryagin principle; multiplier rules and abstract nonlinear programming; existence and continuity of controls; problem of Mayer; dynamic programming. Prerequisite: MATH 570 and MATH 525a.

MATH 590 Directed Research (1-12, FaSpSm) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MATH 592 Computational Molecular Biology Internship (3) Industrial or genome-centered internship for students in the Computational Molecular Biology master’s program. Real-world experience in applications. Open to M.S., Computational Molecular Biology students only.

MATH 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

MATH 594ab Master’s Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

MATH 595 Practicum in Teaching the Liberal Arts: Mathematics (2, FaSp) Practical principles for the long-term development of effective teaching within college disciplines. Intended for teaching assistants in Dornsife College. Graded CR/NC.

MATH 597 Special Topics (2-4, max 8, FaSpSm) Course content will be selected each semester to reflect current trends and developments in the field of mathematics.

MATH 600 Topics in Numerical Analysis (3, max 12)

MATH 601 Optimization Theory and Techniques (3, SpSm) Necessary and sufficient conditions for existence of extrema with equality constraints; gradient methods; Ritz methods; eigenvalue problems; optimum control problems; inequality constraints; mathematical programming. Prerequisite: MATH 502ab.

MATH 602 Galerkin Approximation Methods in Partial Differential Equations (3) Galerkin methods of approximating solutions of elliptic boundary value problems in one and several dimensions; includes the use of spline functions and triangulations.

MATH 605 Topics in Probability (3, max 12)

MATH 606 Topics in Stochastic Processes (3, max 12, FaSpSm) Theoretic and applied topics of current interest in discrete and continuous time stochastic processes and in stochastic differential equations. Recommended preparation: graduate level course in probability theory or stochastic processes.

MATH 610 Topics in Algebra (3, max 12)

MATH 612 Topics in Commutative Ring Theory (3, max 12) Localization, structure of Noetherian rings, integral extensions, valuation theory, graded rings, characteristic functions, local algebra, dimension theory. Prerequisite: MATH 510ab.

MATH 613 Topics in Noncommutative Ring Theory (3, max 12) Jacobson radical, nil radical, nil rings and nilpotence, chain conditions, polynomial identity and group rings. Goldie theorems, current research. Prerequisite: MATH 510ab.

MATH 620 Topics in Complex Analysis (3, max 12)

MATH 625 Topics in Real Analysis (3, max 12)

MATH 630 Topics in Number Theory (3, max 12)

MATH 635 Topics in Differential Geometry (3, max 12) Topics to be chosen from the following: geometry of complex manifolds, relations between topology and curvature, homogeneous spaces, symmetric spaces, geometry of submanifolds. Prerequisite: MATH 535ab.

MATH 641 Topics in Topology (3, max 12)

MATH 650 Seminar in Statistical Consulting (3)

MATH 655 Seminar in Partial Differential Equations (3, max 12, FaSpSm) Topics to be chosen from the following: Elliptic, Parabolic, Hyperbolic, and Dispersive PDEs, Conservation Laws, Mathematical Fluid Dynamics and Variational Methods. Prerequisite: MATH 525a; recommended preparation: MATH 555a.

MATH 665 Seminar in Ordinary Differential Equations (3, max 12)

MATH 680 Nonlinear Functional Analysis (3) Calculus in Banach spaces, degree theory, fixed point theorems. Study of compact, monotone, accretive and nonexpansive operators. Prerequisite: MATH 580.

MATH 681 Selected Topics in Functional Analysis (3, max 12) Course content will vary with professor and academic year offered. It will include topics of current interest in both linear and nonlinear functional analysis and their applications.

MATH 685 Topics in Mathematical Control Theory (3, max 12)

MATH 689 Topics in Mathematical Physics (3, max 12)

MATH 700 Seminar in Numerical Analysis (3)

MATH 705 Seminar in Probability (3)

MATH 710 Seminar in Algebra (3)

MATH 725 Seminar in Analysis (3)

MATH 730 Seminar in Number Theory (3)

MATH 735 Seminar in Differential Geometry (3)

MATH 740 Seminar in Topology (3)

MATH 761 Seminar in Programming and Computability (3)

MATH 775 Seminar in Ordinary Differential Equations (3)

MATH 780 Seminar in Functional Analysis (3)

MATH 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MATH 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Chair: Laurie A. Brand, Ph.D.

Faculty

Robert Grandford Wright Professor in International Relations: Laurie A. Brand, Ph.D. (International Relations)

Associated Faculty

John Elliott Chair in Economics: M. Hashem Pesaran, Ph.D. (Economics)

Robert Grandford Wright Professor in International Relations: Laurie A. Brand, Ph.D. (International Relations)

Professors: Richard Dekmejian, Ph.D. (Political Science); Jeffrey B. Nugent, Ph.D. (Economics and Business); Azade-Ayse Korlich, Ph.D. (History and Slavic Languages and Linguistics); Bruce Zuckerman, Ph.D. (Religion and Linguistics)

Associate Professors: Sarah Gulati, Ph.D. (History and American Studies and Ethnicity); Ramzi Rouighi, Ph.D. (History)
Assistant Professors: Christelle Fischer-Bovet, Ph.D. (Classics); Olivia Harrison, Ph.D. (French and Italian)

Associate Professor of the Practice of Religion: Lynn Swartz Dodd, Ph.D. (Religion)

Associate Professor (Teaching): Jamal Ali, Ph.D.

Assistant Professor (Teaching): Peyman Nojoumian, Ph.D.

Lecturers: Faez Hammad, Ph.D. (Political Science); Rym Kaki, Ph.D. (Public Policy); Hani Khafipour, Ph.D.; Lina Kohlaki; Suzan Walli

Bachelor of Arts in Middle East Studies

This major is an interdisciplinary degree which draws on courses from the fields of history, international relations, Judaic studies, linguistics, political science and religion. It offers students interested in exploring the richness and complexity of the Middle East, broadly defined as extending from Morocco through Iran, a framework for developing both expertise and wide-ranging critical perspectives on the region’s past, present and future. The variety of courses will allow students to tailor their choices to a range of possible emphases. Two options are also available regarding language study. The first, which is strongly recommended for all students, but especially for those who seek to pursue a career using Middle East studies, stresses the importance of a regional language (at this point, Arabic, Hebrew or Persian), along with other disciplinary offerings. The second allows students to gain an in-depth understanding of the region, but without the requirement of a regional language.

Requirements for the degree are: HIST 180 (an introductory survey course) which is a prerequisite for the major. Students must also take: a) seven more courses, six of which must be upper-division courses, chosen from MDES courses or from the list below; b) an eighth course, which may be either an upper-division course from the MDES courses or from the list below or the fourth semester of Arabic or Hebrew for those studying a regional language.

No more than two courses may be counted toward this major and another major.

* Counts as an upper-division course

Students majoring in Middle East studies are strongly encouraged to study in the Middle East in one of USC’s study abroad programs. USC currently has programs at the American University in Cairo, the Hebrew University (Jerusalem) and Tel Aviv University.

Unlike the other majors offered through the School of International Relations, advisement for the Middle East major is through the Dornsife College Advising Office. Minor in Iranian Studies

The Iranian Studies minor provides students with the foundation for an advanced understanding of Iran, its history, peoples and cultures, from antiquity to the present. Neighboring countries that participated in Persian culture are included, as well as non-Persian Iranian peoples such as the Kurds and Pashtuns. Students finishing this minor will also have at least an intermediate ability in Persian, the official language of Iran, widely used in neighboring countries as well.

The Middle East Studies Program offers a minor in Iranian Studies for students majoring in other disciplines.

Courses of Instruction

MIDDLE EAST STUDIES (MDES)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

MDES 120 Persian I (4) Introduction to contemporary Persian (Farsi), Oral practice, listening and reading comprehension, grammar and vocabulary necessary for simple spoken and written expression.

MDES 122 Arabic I (4, FaSp) Introduction to modern standard Arabic: Development of speaking, listening,
reading, and writing skills in contemporary cultural contexts.

MDES 150 Persian II (4) Continuation of Persian I. Prerequisite: MDES 120.

MDES 152 Arabic II (4, FaSp) Continuation of Arabic I. Prerequisite: MDES 122.

MDES 180g The Middle East (4, FaSpSm) (Enroll in HIST 180g)

MDES 220 Persian III (4) Intermediate Persian (Farsi). Building conversational skills, listening and reading comprehension, grammar and vocabulary necessary for intermediate level spoken and written expression. Prerequisite: MDES 150.

MDES 222 Arabic III (4, FaSp) Intermediate modern standard Arabic. Continued development of speaking, listening, reading, and writing skills. Prerequisite: MDES 152.

MDES 250 Persian IV (4) Continuing Intermediate Persian (Farsi). Building conversational skills, listening and reading comprehension, grammar and vocabulary necessary for intermediate level spoken and written expression. Prerequisite: MDES 220.

MDES 252 Arabic IV (4, FaSp) Continuation of Arabic III. Prerequisite: MDES 222.

MDES 312 Iran in the Middle Ages (4, FaSp) Political and dynastic history of Iran from the Arab conquest in the 7th to the 18th century.

MDES 321 Modern Iran (4, FaSpSm) History and culture of modern Iran from the nineteenth century to present through historical and ethnographic approaches to Iran today, richly contextualizing events and people.

MDES 320 Advanced Persian I (4, FaSp) Advanced verbal and written expression in Persian, including deeper understanding of Persian culture. Prerequisite: MDES 250.

MDES 322 Advanced Arabic I (4, FaSp) Advanced expression in written and spoken Arabic, including reading of original texts, understanding different registers, and exposure to modern Arabic cultures. Prerequisite: MDES 252.

MDES 324 Classical Persian Literature in Translation (4, FaSp) Introduction to literary culture of pre-modern Persia, from about 800-1800 AD. Emphasis on poetry, the most extensive, prestigious, and influential medium of Persian literature.

MDES 325 Modern Persian Literature in Translation (4, FaSp) Modern Persian literature, covering the 19th, 20th, and 21st centuries, including the rise of diasporic literature in Persian. Includes poetry, but focused primarily on prose.

MDES 333 Colloquial Arabic: Regional Dialects (4, max 16, FaSp) Introduction to a regional Arabic dialect, focusing primarily on verbal skills. Prerequisite: MDES 152; recommended preparation: MDES 222 and/or MDES 252.

MDES 334 Media Arabic (4, FaSp) Introduction and development of language skills encountered in print and broadcast media Arabic. Prerequisite: MDES 222.

MDES 349g Ancient Empires (4, FaSpSm) (Enroll in CLAS 349g)

MDES 350 Advanced Persian II (4, FaSp) Continuation of Advanced Persian I. Prerequisite: MDES 320.

MDES 352 Advanced Arabic II (4, FaSp) Continuation of Advanced Arabic I. Prerequisite: MDES 322.

MDES 362 The International Relations of the Contemporary Middle East (4, Fa) (Enroll in IR 362)

MDES 363 Middle East Political Economy (4, Sp) (Enroll in IR 363)

MDES 378 Ptolemaic Egypt (4) (Enroll in CLAS 378)

MDES 382 The Middle East, 500-1500 (4) (Enroll in HIST 383)

MDES 383 The Modern Middle East (4, Sp) (Enroll in HIST 383)

MDES 384 Popular Culture in the Middle East (4, FaSpSm) (Enroll in HIST 384)

MDES 394 Archaeology of Egypt and the Near East (4) (Enroll in REL 394)

MDES 402 Cultural Heritage, Religion, and Politics in the Middle East (4, Fa) (Enroll in REL 402)

MDES 448m Islam in France (4, FaSp) (Enroll in FREN 448m)

MDES 454 Classical Arabic (4, max 20, FaSp) Introduction to reading and interpretation of pre-modern, classical Arabic, including literature from the 6th to 19th centuries. Prerequisite: MDES 252.

MDES 461 Topics in Ancient Iranian Languages and Cultures (4, max 20) Studies and readings in one or more pre-modern Iranian languages and their cultural and historical contexts. Specific topics vary; may be repeated for credit.

MDES 463 Islam and Arab Nationalism (4) (Enroll in IR 463)

MDES 464 U.S. Policy Towards the Middle East: 1950 to the Present (4) (Enroll in IR 464)

MDES 480 Seminar in Middle East History (4, max 8) (Enroll in HIST 480)

MDES 490 Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not for graduate credit.

MDES 499 Special Topics (1-4, max 8, FaSpSm) Selected topics in Middle East studies.

Courses of Instruction

Multidisciplinary Activities (MDA)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

MDA 020 American Popular Culture (0, Sm) Introduction to the popular culture of the United States, including basic history, geography, literature and the arts, as understood by generally well-educated young Americans. Graded CR/NC.

MDA 101ab Introduction to the Health Professions (1-1-1-1, FaSp) An introduction to the health professions, through lectures, discussions, clinical experiences, and visits to health care delivery sites; relationships with other clinicians and the community. Departmental approval required. Graded CR/NC.

MDA 101x Health Professions: Prospects and Preparation (1-1-1, FaSp) Presentations by health professionals, introduced by faculty members from relevant academic units and followed by discussion with the speakers. Not available for degree credit. Graded CR/NC. Recommended preparation: BISC 120L or BISC 220L; CHEM 150A/L.

MDA 105g Cultural Forms and Values I (4, FaSp) Norms and patterns of civilizations associated with the Greco-Roman and European traditions and the legacy of those traditions in North America.

MDA 110 Contemporary Issues and Cases in Health Care (2, FaSp) An introduction to the major areas of health care; the provider’s relationship to choices in professional practice; ethics and historical context. (Duplicates credit in MDA 100abdc.) Graded CR/NC.

MDA 120 American Popular Culture (3, Sm) Introduction to the popular culture of the United States, including basic history, geography, literature, and the arts, as understood by generally well-educated young Americans. Graded CR/NC.

MDA 125lg Scientific Principles (4, FaSp) Fundamental principles underlying a body of scientific knowledge and their evolution; the nature of scientific inquiry; how scientific knowledge is obtained and evaluated. A field experience or practical component required.

MDA 140 Practicum in Multimedia Authorship (2, FaSp) Introduction to the expressive potential of multimedia as a creative and critical tool, supplementing traditional forms of academic work. Graded CR/NC.

MDA 155g Cultural Forms and Values II (4, FaSp) Cultural norms and patterns of civilizations associated with Africa, Asia, Latin America, the Middle East, Native America, and elsewhere, alternative to those of the Greco-Roman and European traditions.

MDA 165g Social Inquiry (4, FaSp) Analyses of compelling local, national, and/or international issues; analytical tools examined systematically in a broad range of social phenomena.

MDA 167g Marginal Groups in America (4, Fa) Sociological and historical analysis of marginal populations in American society, including racial and ethnic minorities, teenage mothers, drug abusers, criminals, and the mentally ill.

MDA 170g La Frontera: The U.S.-Mexico Borderlands (4) Provides student with a multidisciplinary understanding of the U.S./Mexico border region. Topics to be covered include: space and place, internationalization,
physical environment, gender relations and culture.

MDA 175lg Science and Technology (4, FaSp) The nature of science and technology, based on a focused study of a single area of research; scientific principles, their technological applications, and social significance.

MDA 200lg The Cutting Edge: From Basic Science to the Marketplace (4, Sp) An introduction to the basic sciences of physics, chemistry, biology, and geology, examining the fundamental concepts, experimental approaches, and technological applications. Course will show the interrelationships among the fields and societal ramifications of these cutting edge technologies. (Duplicates credit in MDA 125L.)

MDA 205g Cities and Civilization (4, FaSp) Origins of cities, patterns of migration and resettlement, civic identities and the invention of public culture, from ancient Rome to contemporary Los Angeles.

MDA 250 Internship for Liberal Arts: Work and Career – Theory and Practice (1-2, max 4, FaSpSm) Students explore different understandings of work and career in American society while testing theories in an actual work setting.

MDA 260 Opportunities in the Global Marketplace (2-6, max 4, FaSp) Professional opportunities in a changing global system, preparing the successor generation for participation in the private, public, and citizen sectors of our global society. Graded CR/NC.

MDA 310 Peace and Conflict Studies (4, Sp) (Enroll in IR 310)

MDA 320 Global Ethics: Poverty, Health and the Human Condition (4, FaSp) Ethical challenges and moral obligations of the public and private sectors in global development, access to healthcare, and promotion of civil, political, and economic rights.

MDA 335 Case Studies in Modern Leadership (2 or 4, FaSp) Study of a single leader or small set of leaders, including the strengths and weaknesses that distinguish them and the cultural forces that nurture them.

MDA 330 The Armenian Heritage: History, Arts, and Culture (4, FaSp) A multidisciplinary exploration of the Armenian cultural heritage through the ages – folklore, traditions, religious practices, literature, architecture, painting, sculpture, music, theatre, film and dance.

MDA 333 Colloquium in Armenian Studies: Social and Cultural Issues (2, max 4, FaSpSm) Analysis of political, social, and cultural issues by the instructor and visiting lecturers with expertise in specific areas of the Armenian Republic and Diaspora community.

MDA 365 The Art and Adventure of Leadership (4, Sp) Areas of knowledge and kinds of competencies that are fundamental to the study and practice of leadership in a variety of settings.

MDA 399ab Team Research Communities (4-4, FaSp) Cross-disciplinary inquiry in the liberal arts. A: Research methodologies. B: Individual student and group projects contributing to the team’s collaborative report.

MDA 450 Individual Program of Study (4-18, max 18, FaSpSm) An individual educational project approved by a faculty committee, combining directed research with internships, service learning, artistic or literary production, and/or other relevant educational activities. Open only to students with sophomore, junior or senior standing.

MDA 460 Collaborative Learning Project (4-8, max 8, FaSpSm) A project approved by a faculty committee, requiring students to collaborate on research or an original work in the literary, plastic, or performing arts. Open only to students with sophomore, junior or senior standing. Graded CR/NC.

MDA 475 The Future of California (4) Challenges facing California; options for governmental and constitutional reform; opportunities for economic growth; demographic and cultural changes; education, environment, and other policy issues. Recommended preparation: Junior or senior standing.

MDA 476 Policy Research on California (4, Sp) Research and proposed solutions concerning problems, policies, structural and constitutional challenges facing California. Open only to upper division and master’s students. Prerequisite: MDA 475.

MDA 490 Directed Research (1-8, max 12, FaSpSm) Individual research, reading, writing and project development.

MDA 494 Directed Creative Project (2-4, max 4, FaSpSm) Individual research, reading, writing and project development.

MDA 495 Interdisciplinary Honors Seminar (2-4, max 4, Fa) The first part of an eight-unit sequence intended to award academic honors in a thematic area comparable to departmental honors in a single discipline. Open only to juniors and seniors.

MDA 496 Interdisciplinary Honors Thesis (4, Sp) The second part of an eight-unit sequence intended to award academic honors in a thematic area comparable to departmental honors in a single discipline. Open only to juniors and seniors. Prerequisite: MDA 495.

MDA 501 Introduction to Visual Studies: Methods and Debates (4) A critical introduction to the field of visual studies focusing on interdisciplinary approaches to images, objects, and visual technologies as well as key texts and interpretive debates. Students must be enrolled in a Ph.D. program at USC.

MDA 593 Practicum in Teaching the Liberal Arts (2, FaSp) Practical principles for the long-term development of effective teaching within college disciplines. Intended for teaching assistants in Dornsife College. Graded CR/NC.

MDA 599 Special Topics (2-4, max 8, Fa) The multidisciplinary, team-taught seminar addresses issues at the intersection of literary, visual, and material culture. The faculty team and specific topics studied will change each time the course is offered.

Multimedia Scholarship

Honors in Multimedia Scholarship

This program offers qualified undergraduate students an opportunity to approach their discipline(s) of study through the critical application of multimedia expression and scholarship. The student experience will be characterized by smaller classes taught by leading faculty members and enriched by a program of lecture series, visiting scholars, symposia and conferences. For complete program requirements, see the USC School of Cinematic Arts section.

8 core = 4 or 5 elective courses: 48 units

For or five upper-division elective courses (minimum 16 units) from the following list are required. At least one course in the upper-division electives must carry a lab (“L”) designation or be NEUR 490x. No more than 4 units of NEUR 490x may be used to fulfill the upper-division elective requirement.

Honors Program in Neuroscience

An honors program is available to outstanding students who are pursuing a B.A. or B.S. degree in Neuroscience. This program offers students exceptional opportunities to participate in undergraduate research, culminating in the experience of writing an honors thesis summarizing their completed research. Honors students must register for 4 units of Directed Research (NEUR 490x). Honors students are also required to take two semesters of the Honors Seminar (BISC 493x as one of their upper-division electives, 1 unit/semester), in which small groups of students discuss recent findings in neuroscience literature and their own research. After completing the honors seminar, honors students also take one semester of Honors Thesis (BISC 494x, 2 units), in which students write their senior thesis. Students earning honors in neuroscience must have a minimum overall GPA of 3.5 at graduation. This program leads to the designation on the transcript of Bachelor of Arts/Science in Neuroscience with Honors.

Bachelor of Science in Computational Neuroscience

Co-coordinators: Sarah Bottjer, Ph.D., and Irving Biederman, Ph.D.

Graduate Advisers: Eva Hinojoza, hinojoza@dornsife.usc.edu; Briana Weiland, bweiland@dornsife.usc.edu

The computational neuroscience major is designed for those students with an interest in applying mathematical and computational methodologies towards understanding the structure and functioning of the nervous system. The major will provide progressive training in interdisciplinary and inter-faculty aspects of neuroscience, and serve as a foundation for students interested in pursuing post-graduate education in graduate or professional schools or career opportunities in technically advanced occupations. Research is integral to this major and students are encouraged to engage in research with neuroscience faculty as early as possible in their undergraduate years.

Grade Requirements

A grade of C- or higher is required to count toward major requirements.

Undergraduate Advisers: Eva Hinojoza, hinojoza@dornsife.usc.edu; Briana Weiland, bweiland@dornsife.usc.edu

PHYS 151L Fundamentals of Physics II: Electricity and Magnetism 4
Choose one course listed below:

- CSCI 662
- CSCI 574
- CSCI 564
- BME 671
- BME 575L
- CSCI 464
- CSCI 445L
- BME 402
- System Design (4)
- Programming (3)
- Methods (3)

One language course and one application course will be counted toward the major. Only one language course and one application course will be counted toward the major.

Math

Choose one additional course from the courses listed below not already counting for the major:

- MATH 225: Linear Algebra and Linear Differential Equations (4)
- MATH 245: Mathematics of Physics and Engineering I (4)

Minor in Neuroscience

Co-coordinators: Sarah Botteri, Ph.D., and Irving Biederman, Ph.D.

Undergraduate Advisers: Eva Hinojosa, hinojosa@dornsife.usc.edu; Brianna Weiland, bweiland@dornsife.usc.edu

Grade Requirements

A grade of C- or higher is required to count toward minor requirements.

Core Requirements (20 units)

- PSYC 274L: Statistics I (4)
- BME 411**: Neurobiology (4)
- PSYC 408**: Systems Neuroscience: From Synapses to Perception (4)
- PSYC 440**: Introduction to Cognitive Neuroscience (4)
- Electives (300- or 400-level course from the elective list for majors) (4)

* An equivalent course may be substituted with permission

** Prerequisite: BISC 220 or BISC 221

*** Prerequisite: PSYC 100

Recommended but not required: CHEM 103Lx (or CHEM 103LA) plus MATH 125

Students who have not already taken the prerequisites (BISC 220/BISC 221 and PSYC 100) will need to take a total of 28 units to satisfy the requirements of a minor in neuroscience. Thus, the range of units will vary from 20 to 20 depending on a student's background.

Master of Science in Neuroscience

Coordinator: Pat Levitt, Ph.D.

The M.S. degree program in Neuroscience is a terminal degree for students admitted into the Neuroscience Ph.D. program who cannot complete the Ph.D. program for personal or medical reasons. Enrollment of graduate students as master’s degree candidates is not encouraged and is reserved for special circumstances that must be approved by the Executive Committee of the Neuroscience Graduate Program. The master’s curriculum includes all course work required of Ph.D. students for a minimum of 24 units and successful completion of both the written and oral portions of the qualifying examination. Students may opt for a thesis or non-thesis master’s degree. The thesis master’s degree requires presentation of a written thesis based on original research to a Neuroscience thesis committee and submission of the thesis to the Graduate School for publication. The non-thesis master’s degree requires a formal research paper that is approved by three members of the Neuroscience Graduate Program faculty. The qualifying examination will serve as the comprehensive master’s examination for non-thesis master’s degrees. Students must also satisfy residency and other requirements of the Graduate School.

Doctor of Philosophy in Neuroscience

Coordinator: Pat Levitt, Ph.D.

Application deadline: December 15

Breadth of interests and training are major features of the graduate program in neuroscience. Wide and varied skills in many research areas characterize the faculty of the program. Close contact between faculty and students is considered of major importance in this highly interdisciplinary field.

Training is given in several areas of specialization: behavioral and systems neuroscience, cellular and molecular neurobiology, cognitive neuroscience, computational neuroscience, neuroengineering and neuroscience of aging and development.

Applicants should normally have defined an interest in one or two specializations. A final choice of the specialization will be made during the first year.

Admission Requirements

A baccalaureate degree in a field relevant to the student’s graduate goals is required.

Appropriate fields would include neuroscience, biology, chemistry, computer science, linguistics, psychology and many areas of engineering. Undergraduate study should provide evidence of proficiency in mathematics, including statistics. Students planning to enter the specialization in computational and mathematical neuroscience should have taken course work in calculus and, where possible, linear algebra and computer programming. Applicants who are accepted with minor deficiencies are expected to correct these during the first year.

Applications require forms from both the university and the program. These may be obtained from: Coordinator, Graduate Program in Neuroscience, University of Southern California, Los Angeles, CA 90089-2540.

Degree Requirements

These degrees are awarded under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Advisory Committee

The student will be advised during the first year by the Graduate Affairs Committee. As soon as the student has selected a specialization, an Advisory Committee of appropriate faculty will be appointed. This committee will be chaired by the thesis adviser, when chosen. The purpose of the Advisory Committee is to help the student in the selection of courses and research; to monitor the student’s progress; to insure preparation for the qualifying examination; and to administer that examination.
Course Requirements

A minimum of 60 units is required, consisting of formal courses, seminars and research credits. At least 24 of the 60 units are to be formal graduate course work (lecture or seminar courses). During the first year the student is expected to complete the core courses in neuroscience (NSCI 524), one key course, NSCI 538 Neuroscience Ethics and Professionalization, and two semesters of NSCI 539. Other courses in the area of specialization may also be taken in the first year and will be taken in subsequent years.

Core Course: NSCI 524 Advanced Overview of Neuroscience (4 units), will be taken by all students in the fall of their first year to provide an integrated multilevel view of neuroscience. To take the core course, students should have mastered the material currently taught in BISC 421. (Students will be expected to review a detailed syllabus and reading list for BISC 421 to identify their level of knowledge prior to their arrival at USC and will receive advice on Orientation on whether to take BISC 421 or read recommended material to remedy their deficiencies.)

Key Courses: All students will be required to complement their thesis-directed studies within “a breadth with depth” requirement by taking three key courses, one from each of the four tracks listed below. Each key course will be for 3 or 4 units. (At least one of these courses will serve to advance thesis-related study as well.)

Cellular, Molecular and Developmental Neuroscience Track

- NSCI 531 Molecular and Cellular Neurobiology (4 units)
- BISC 426 Principles of Neural Development (4 units)
- Cognitive Neuroscience Track
- PSYC 540 Cognitive Neuroscience (4 units)
- Computational Neuroscience and Neuroengineering Track
- BME 575L Computational Neuroengineering (3 units)
- NEUR 535 Brain Theory and Artificial Intelligence (3 units)
- Systems and Behavioral Neuroscience Track
- NSCI 532 Systems and Behavioral Neurobiology (3 units)

All students are required to take NSCI 538 Neuroscience Ethics and Professionalization (1 unit).

It is required that all neuroscience Ph.D. students demonstrate competence in statistics in fulfillment of their Ph.D. requirements.

Qualifying Examination

The qualifying examination concentrates on the student’s ability to demonstrate a grasp of the major area of interest chosen and its relation to other areas of training offered in the program. The examination is partly written and partly oral and is designed to test the student’s ability to meet the demands of the profession.

Dissertation

An acceptable dissertation based on completion of an original investigation is required. The candidate must defend an approved draft of the dissertation in an oral examination.

Courses of Instruction

Neuroscience (NEUR)

- NEUR 530 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.
- NEUR 408 Systems Neuroscience: From Synapses to Perception (4, Sp) (Enroll in BISC 426)
- NEUR 426 Principles of Neural Development (4, Sp) (Enroll in BISC 426)
- NEUR 440 Introduction to Cognitive Neuroscience (4) (Enroll in PSYC 440)
- NEUR 490 Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.
- NEUR 493X Neuroscience Honors Seminar (1, max 4, FaSpSm) Students attend lectures of distinguished neuroscientists visiting USC and give short, talk-like presentations summarizing the lecture. The presentations are critiqued by the students. Not available for graduate credit. Prerequisite: BISC 220L or BISC 221L; recommended preparation: BISC 421.
- NEUR 494X Honors Thesis (2, FaSpSm) Not available for graduate credit. Programmatic approval.
- NEUR 533 Cognitive Neuroscience (4, Sp) (Enroll in PSYC 540)
- NEUR 534 Computational Neuroengineering (3) (Enroll in BME 575L)
- NEUR 535 Brain Theory and Artificial Intelligence (3) (Enroll in CSCI 564)
- NEUR 542 Hearing and Communication Neuroscience (4, Sp) (Enroll in BISC 531)
- NEUR 599 Special Topics (2-4, max 8) Special topics providing background for instruction and research in neuroscience through lectures, discussions, assigned readings, and student presentations.

Neuroscience (Graduate) (NSCI)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

- NSCI 524 Advanced Overview of Neurosciences (4, Fa) Study of the nervous system at multiple levels through the analysis of four themes: motor control; emotion, motivation, and decision-making; memory and learning; and vision. Prerequisite: BISC 421. Open only to master and doctoral students. (Duplicates credit in former NEUR 524.)
- NSCI 525 Advanced Overview of Neurosciences II (4, Sp) Sensory and motor systems, cognitive neuroscience, behavioral systems, computational neuroscience. Prerequisite: BISC 421. Open only to master and doctoral students. (Duplicates credit in former NEUR 525.)
- NSCI 531 Molecular and Cellular Neurobiology (4, FaSpSm) Introduces fundamental principles of advanced molecular and cellular neuroscience including proteins and nucleic acids, cell biology of neurons and glia, synaptic transmission and neuronal signaling. Open only to master and doctoral students. (Duplicates credit in former NEUR 531.)
- NSCI 532 Systems and Behavioral Neurobiology (3, Fa) Systems and behavioral neurobiology: hierarchical mechanisms controlling behavior, experimental techniques; perceptual (visual, auditory, somatosensory) systems; sensorimotor systems; motivated behavior; learning, memory and adaptation. Open only to master and doctoral students.
- NSCI 538 Neuroscience Ethics and Professionalization (1, FaSpSm) Exposes students to ethical issues in scientific research, especially for neuroscience; scientific integrity and professional roles for the academician and neuroscientist. Open only to master and doctoral students. (Duplicates credit in former NEUR 538.)
- NSCI 539 Seminar in Neurobiology (1, FaSpSm) Seminar in Neurobiology. Open only to master and doctoral students. (Duplicates credit in former NEUR 539.)
- NSCI 541 Neurobiology of Disease (3, Sp) Introduction to the fundamental aspects of common diseases affecting the brain including clinical features, animal models, genetics, neuropathology, synaptic function, and therapeutic targets. Prerequisite: NSCI 524. (Duplicates credit in former NEUR 541.)
- NSCI 599 Special Topics (2-4, max 8) Special topics providing background for instruction and research in neuroscience through lectures, discussions, assigned readings and student presentations.
- NSCI 790 Research (1-6, max 21, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. Open only to neuroscience graduate students and neuroscience majors. (Duplicates credit in former NEUR 790.)
- NSCI 794abcdz Doctoral Dissertation (2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC. Open only to neuroscience graduate students and neuroscience majors. (Duplicates credit in former NEUR 794abcdz.)

Ocean Sciences

Zumberge Hall of Science 117
(213) 740-6106
FAX: (213) 740-8801
Email: waise@usc.edu
oceansciences.usc.edu

Director: Douglas E. Hammond, Ph.D.

Participating Faculty: See Biological Sciences, Earth Sciences and Engineering in this catalogue.

Applications for the Ocean Sciences program should be routed through the affiliated departments and a separate letter sent to the Ocean Sciences Director, Douglas E. Hammond, USC Earth Sciences, Los Angeles, CA 90089-0740.

Degree Programs

The Graduate Program in Ocean Sciences (GPOS) provides interdisciplinary education and training to prepare professional ocean scientists for careers in academia, industry, and state and federal government. Students develop the ability to identify and solve significant problems in ocean sciences by using their training in several disciplines. They develop the ability to formulate and test hypotheses and integrate information and concepts about how the earth-ocean system is structured and how it functions. Training also is provided to develop skills in oral and written communication of technical and scientific information. Both M.S. and Ph.D. degree programs are offered; both require preparation of a thesis (M.S.) or dissertation (Ph.D.).

Admission Requirements

All rules and regulations described in the Graduate School section of this catalogue and Graduate Admission apply to students in the GPOS.
Official acceptance by the GPOS Admissions Committee is based on the recommendation of faculty from an affiliated department. Acceptance depends upon the applicant’s letters of recommendation, research experience, intended area of research, personal interview (whenever possible), and the availability of a faculty member willing to advise and sponsor the applicant.

A B.S. or B.A. degree in an appropriate field of natural science, engineering or mathematics is required for admission.

It is expected that applicants to the GPOS will have attained a scholarship average of at least “B” (3.0 GPA on a 4.0 scale) preferably in the natural sciences or mathematics. Applicants must have taken the GRE aptitude test (verbal and quantitative). Successful applicants typically score in excess of 600 on both verbal and quantitative parts of the exam. Applicants should contact the GPOS office by email or phone for an admission package. The GPOS admits students for both the fall and spring semesters; however, applicants for assistantships are encouraged to apply for the fall semester.

Graduate Degrees

Degree Requirements

Advanced degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Science in Ocean Sciences

The program does not accept applicants for a Master of Science degree in ocean sciences. The M.S. degree is intended only as a transitional degree in the process of completing requirements for the Ph.D. in ocean sciences.

Research Tool Requirements

None required.

Course Requirements

The M.S. degree in Ocean Sciences requires at least 24 units of course work, including two core courses (OS 512 and 582). Four thesis units (OS 594) are also required. At least 16 units of course work must be at the 500-level or higher; no more than six units can be directed research (OS 590); a maximum of four units with superior grades in approved course work may be transferred from an accredited graduate school. Students are required to maintain an overall GPA of 3.0 in all graduate work.

Thesis

Students should arrange for the appointment of a thesis adviser and committee after the first semester, or at the latest, after the first year of graduate work. The thesis committee should consist of the adviser plus two other faculty members, all of whom are generally selected from GPOS faculty. Once the committee is arranged, the student may make formal application to the Graduate School for the M.S. degree.

Doctor of Philosophy in Ocean Sciences

Research Tool Requirements

To be determined by qualifying exam committee.

Course Requirements

The Ph.D. degree in Ocean Sciences requires at least 27 units of formal course work (including seminars) of the 60 total units needed. Two core courses are required (OS 512, OS 582). No more than 15 units of 400-level course work may be applied. A maximum of 30 units may be transferred from an accredited graduate school.

Students are required to maintain an overall GPA of 3.0 in all graduate work.

Students may request permission to take the Ph.D. qualifying examination on completion of 24 units of course work, including two core courses in Ocean Sciences.

Screening Procedure

Students in the Ph.D. program must pass the screening procedure before their 25th unit of graduate credit. Screening consists of a review of the student’s progress and is usually done by the GPOS Review Committee following a written recommendation by the student’s adviser(s). Screening occurs at the end of each semester.

Qualifying Exam Committee

The doctoral qualifying exam committee is formed after the student has passed the screening procedure. The committee is appointed by the department with the advice of the student’s research adviser. The five-member committee consists of the adviser, a minimum of three other members from the GPOS faculty, and one additional tenure-track faculty member. The committee must include faculty members from more than one academic department. A tenure-track faculty member must serve as research adviser or co-adviser. The committee consults with the student, recommends an appropriate program of study and administers written and oral qualifying examinations.

Qualifying Examination

The student may request permission to take the Ph.D. qualifying examination upon completion of 24 units of course work, including two core courses in ocean sciences. The qualifying examination consists of a written and an oral part, both parts prepared, conducted and evaluated by the student’s examination committee. The written examination will consist of a number of questions given on two consecutive days. Questions will be comprehensive in scope with respect to the student’s chosen area of specialization and will be designed to test the student’s conceptual, analytical and integrative ability and preparation.

The written part of the qualifying examination must be taken before the oral examination. The oral examination will be in the area of the student’s intended research and will be based on a research project selected and developed by the student into a written proposition. The oral examination will be conducted and evaluated by the student’s examination committee. The oral examination must be taken within one month of the written examination.

Defense of the Dissertation

After the student has passed the qualifying examination, the qualifying exam committee recommends to the Graduate School that the student be admitted to candidacy for the Ph.D. degree. Following admission to candidacy the student must register for OS 794 Dissertation every semester, except summers, until the degree is awarded.

Once the qualifying examination is passed, the student is required, as soon as possible, to appoint a dissertation committee, using an appointment of committee form which can be found on the Graduate School Website (usc.edu/schools/GraduateSchool). All or some of the qualifying exam committee may be nominated. Until a dissertation committee is appointed, the qualifying exam committee will have responsibility for the student’s program of study. The student must undertake an original investigation of a problem in ocean sciences. The topic must be approved by the student’s dissertation committee and will usually be based on the written proposition presented in the qualifying examination.

A dissertation based on the student’s research must be approved by the student’s dissertation committee. The student must then defend the dissertation. The process for submission of the dissertation to the Graduate School can be found on the Graduate School Website under “Current Students – Thesis and Dissertations.” This process should be started approximately one month before the defense, and the student must allow adequate time after the defense for final copy preparation.

The dissertation must conform to the general regulations described in Regulations for Format and Presentation of Theses and Dissertations, also available from the Graduate School Website. Additional regulations and information on the organization and preparation of the dissertation are provided in Directions for Preparation of Dissertations and Research Reports as Required by the Graduate Program in Ocean Sciences/University of Southern California, available in the GPOS office.

Interdisciplinary Programs

The Graduate Program in Ocean Sciences is designed to be interdisciplinary, reflecting the nature of the field that combines principles of physical, chemical, geological and biological oceanography to solve relevant problems in the ocean environment.

Courses of Instruction

Ocean Sciences (OS)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

OS 512 Introduction to Chemical and Physical Oceanography (3, 2 years, Fa) Principles of physical, chemical, and geological oceanography including discussions of air-sea interaction, biogeochemical cycling and the role of the ocean in modulating climate and atmospheric composition; discussion section will cover formulation of basic calculations that illustrate these principles. Prerequisite: CHEM 105BL, MATH 126.

OS 582 Advanced Biological Oceanography (4, Fa) (Enroll in BISC 582)

OS 590 Directed Research (1-12, FaSpSm) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

OS 594bzbz Master’s Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

OS 599 Special Topics (2-4, max 8, irregular) Course contents each semester will be selected to reflect current trends and new developments in the field of Ocean Sciences.

OS 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

OS 794bcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Director: Scott Soames, Ph.D.

Faculty

Distinguished Professor: Scott Soames, Ph.D.*
Provost Professor of Philosophy and Law: Gary Watson, Ph.D.
Professor of Philosophy and Maurice Jones, Jr. - Class of 1925 Professor of Law: Andrei Marmor, LL.B., Ph.D.
Professors: John Hawthorne, Ph.D.; Robin Jeshion, Ph.D.; Gregory Keating, Ph.D. (Law); Sharon Lloyd, Ph.D.;* Edwin McCann, Ph.D.;* Kevin W. Robb, Ph.D., Ph.D. –* Mark Schroeder, Ph.D. –*; Gabriel Uzquiano Cruz, Ph.D.; James Van Cleve, Ph.D.; Ralph Wedgewood, Ph.D.

Emeritus University Professor and Emeritus Dean of the USC Dornsife College of Letters, Arts and Sciences: S. Marshall Cohen, M.A.*
Emeriti Professors: Frank Lewis, Ph.D.; Dallas Willard, Ph.D. –*
* Recipient of university-wide or college teaching award.

Undergraduate Programs

The School of Philosophy offers courses in most areas of philosophy, including philosophy of mind, philosophy of language, epistemology, metaphysics, logic, philosophy of science, political philosophy, ethics, aesthetics, the history of philosophy, phenomenology and existentialism. The major in philosophy is designed to acquaint students with the fundamental problems of Western thought and introduce them to the concepts and techniques necessary for independent philosophical thinking; it is equally intended to provide a broadening perspective for the various areas of specialization in the natural and social sciences and in literature and the arts. The school also offers minors in: ethics and moral philosophy; philosophy; philosophy for business, law, and the professions; and theories of art.

Graduate Programs

The School of Philosophy offers a Master of Arts in Philosophy, a Master of Arts in Philosophy and Law, a joint degree with the USC Gould School of Law and a Doctor of Philosophy in Philosophy.

Undergraduate Degrees

Major Requirements for the Bachelor of Arts in Philosophy

The School of Philosophy offers three major options: the major in philosophy, the major in philosophy with honors, and the major in philosophy, politics and law.

The major in philosophy requires eight courses in philosophy; six of these courses must be at the upper-division level. One of the eight courses must be a gateway course - PHIL 300, PHIL 315, PHIL 320, PHIL 340, or PHIL 360 - which must be taken before taking any 400-level courses. Students are strongly encouraged to take a course in logic (PHIL 250ab, PHIL 350, PHIL 351 or PHIL 352).

Distribution requirement: Students must take at least one course from each of the three categories listed below:

- History of Philosophy: PHIL 315, PHIL 320, PHIL 345, PHIL 410, PHIL 411, PHIL 415, PHIL 421, PHIL 422, PHIL 423, PHIL 424, PHIL 427, PHIL 434
- Ethics, Law and Value Theory: PHIL 330, PHIL 335, PHIL 337, PHIL 340, PHIL 345, PHIL 430, PHIL 437, PHIL 440, PHIL 442
- Systemsatic Philosophy: PHIL 350, PHIL 351, PHIL 352, PHIL 360, PHIL 385, PHIL 427, PHIL 428, PHIL 460, PHIL 462, PHIL 463, PHIL 485, PHIL 470, PHIL 480, PHIL 485, PHIL 486

During the senior year, students enrolled in one of the three majors’ programs in philosophy can take a capstone seminar. Students who are enrolled in one of the minors in philosophy may enroll in a capstone seminar only with the permission of the instructor. Enrollment in these seminars will not exceed 15 students. Students may enroll in a capstone seminar only if they have satisfied the following requirements: taken a course in logic (PHIL 250ab, PHIL 350, PHIL 351, or PHIL 352) and have a GPA in philosophy of 3.0 or above.

Double Major

Double majors are encouraged but a student must work in close consultation with the undergraduate adviser.

Bachelor of Arts with a Combined Major in Linguistics and Philosophy

See Linguistics.

Bachelor of Arts in Philosophy, Politics and Law

This interdisciplinary major combines, in a systematic and structured way, basic education in philosophy, political theory and elements of law. An interdisciplinary approach to the combination of these three disciplines may be of particular interest to students contemplating post-graduate work in law; those interested in a career in public service or politics; and those attracted by the rigor of philosophy and its attention to foundational issues, who are also interested in politics and law. Students are exposed to a wider range of conceptual and methodological approaches than they would in any single discipline, while learning enough philosophy and political science to leave a choice of options for graduate schools. The major requires nine classes, one of which must be a gateway course - PHIL 300, PHIL 315, PHIL 320, PHIL 340 or PHIL 360 – distributed as follows.

<table>
<thead>
<tr>
<th>REQUIREMENTS</th>
<th>Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>One lower-division class from the following:</td>
<td>5</td>
</tr>
<tr>
<td>PHIL 135 Legal Controversies and Ethical Principles</td>
<td>4</td>
</tr>
<tr>
<td>PHIL 140 Contemporary Moral and Social Issues</td>
<td>4</td>
</tr>
<tr>
<td>PHIL 141 The Professions and the Public Interest in American Life</td>
<td>4</td>
</tr>
<tr>
<td>PHIL 262 Mind and Self: Modern Conceptions</td>
<td>4</td>
</tr>
<tr>
<td>POSC 130 Law, Politics and Public Policy</td>
<td>4</td>
</tr>
</tbody>
</table>

Students who satisfy one of their general education requirements by taking a core, thematic options course of comparable scope and content, can, at the discretion of the director of the School of Philosophy and the philosophy undergraduate adviser for this major, substitute that course for one of the above.

| One course in logic: |
|---------------------|------|
| PHIL 350 Symbolic Logic | 4 |
| PHIL 351 Reasoning and Logic | 4 |
| PHIL 352 Logic and Language | 4 |

One course in philosophy of law:

<table>
<thead>
<tr>
<th>Courses</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL 430 Philosophy of Law</td>
<td>4</td>
</tr>
<tr>
<td>PHIL 431 Law, Society, and Politics</td>
<td>4</td>
</tr>
</tbody>
</table>

Two courses from Categories A, B and C below. The two courses must belong to different categories, and one of these courses must be a gateway course: PHIL 300, PHIL 315, PHIL 320, PHIL 340 or PHIL 360. Students are required to take a gateway course before enrolling in any 400-level course in philosophy.

A. Moral and political philosophy

<table>
<thead>
<tr>
<th>Courses</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL 335 Theoretical Models of Leadership</td>
<td>4</td>
</tr>
<tr>

</tr>
<tr>
<td>POSC 440 Comparative Law and the Judicial Process</td>
<td>4</td>
</tr>
<tr>
<td>POSC 448a The Politics of Peace: Human Rights</td>
<td>4</td>
</tr>
</tbody>
</table>
One course in politics, law, and public policy:  
PHIL 347 Environmental Law 4  
PHIL 345 Directed Governmental and Political Leadership Internship 4  
PHIL 343 Law in Film 4  
PHIL 342 Critical Issues in Law and Public Policy 4  
SWMS 349 Women and the Law 4

One course in law:  
LAW 300 Concepts in American Law 4  

Note: Students in the major may enroll in a capstone seminar in philosophy if they have satisfied the general requirements: a GPA of 2.0 in major course work; a course in logic, and at least one 400-level course in philosophy, taken prior to the capstone seminar.

Philosophy Honors Program

Students who are considering the possibility of continuing their education at a graduate level in philosophy or similar disciplines, or students who wish to undertake a more intensive course of studies in philosophy, which includes original independent research, are strongly encouraged to take the major with honors.

The major with honors requires completion of the requirements for the Bachelor of Arts, with the following additional requirements:

(a) Students must take a capstone seminar, having completed the prerequisites for taking it.

(b) In addition to the required courses for the major, students must take PHIL 494 Senior Thesis during the fall term of their senior year. The senior thesis will be graded by the student’s adviser and another member of the School of Philosophy, following an oral defense. The senior thesis must be completed with a grade of B or higher.

(c) Students must have a GPA of 3.5 or higher in their philosophy courses.

Students who intend to complete the major with honors are encouraged to enroll in the program during their sophomore year (but no later than the end of the first term of their junior year), and should consult about their studies with the faculty adviser for the honors program on a continuous basis.

Minor in Ethics and Moral Philosophy

The aim of the minor is to provide students headed for medicine, biology, psychology and other health care professions with a broad humanistic perspective not found in professional education and the critical tools to deal with the ethical issues that may arise in their professional lives.

Students are required to take five courses in philosophy, at least four of which must be upper-division. Students must take at least one lower-division or 300-level course before taking any 400-level courses.

Students must take at least two courses from category one, and at least one course from category two:

1. Ethics, History of Ethics and Value Theory: PHIL 140, PHIL 141, PHIL 340, PHIL 361, PHIL 420, PHIL 437, PHIL 440, PHIL 442

2. Systematic Philosophy: PHIL 262, PHIL 360, PHIL 385, PHIL 427, PHIL 428, PHIL 460, PHIL 462, PHIL 485, PHIL 470

Minor in Philosophy

The minor in philosophy requires the completion of five philosophy courses, at least four of which are upper-division courses. All minors must take a gateway course – PHIL 315, PHIL 320, PHIL 340, or PHIL 360 – before enrolling in any 400-level course.

Distribution requirement: Students must take at least one course from each of the three categories listed below:

1. History of Philosophy: PHIL 315, PHIL 320, PHIL 345, PHIL 410, PHIL 411, PHIL 415, PHIL 421, PHIL 422, PHIL 423, PHIL 424, PHIL 427

2. Ethics, Law and Value Theory: PHIL 330, PHIL 335, PHIL 337, PHIL 340, PHIL 345, PHIL 430, PHIL 437, PHIL 440, PHIL 442

3. Systematic Topics: PHIL 350, PHIL 351, PHIL 352, PHIL 360, PHIL 385, PHIL 427, PHIL 428, PHIL 460, PHIL 462, PHIL 463, PHIL 465, PHIL 470, PHIL 480, PHIL 485, PHIL 486

Minor in Theories of Art

Theorizing about the arts takes place in the discipline of philosophy (aesthetics) as well as in all the individual disciplines concerned with the individual arts. Some of the issues involved (is perspective a matter of convention?; how does acting differ in cinema and in theatre?) are specific to a particular discipline or disciplines, but their discussion typically involves very general issues (in the cases mentioned, issues about the nature of convention or of artistic media) and many of the issues manifest themselves in all these disciplines (the relation of intention to interpretation; the epistemological and moral status of the arts; the nature of evaluative judgments). The understanding of these issues can be greatly enhanced by studying them as they arise in different arts and in different theoretical traditions. The minor should be of interest to students with an interest in philosophy, or students in any of the arts who are interested in their theoretical dimensions.

There are no entrance requirements for the minor, which requires six courses (24 or 24 units, depending on course selection).

All students must take PHIL 242 Theories of Art (4 units) and select five courses from the following:

- AHS 250 Modernity and Difference: Critical Approaches to Modern Art 4
- ARCH 314 Theory and Criticism: Recent Trends and Developments 3
- COLT 391 Literary Criticism from Plato to Postmodernism 4
- COLT 454 Aesthetic Philosophy and Theory 4
- ENGL 477 History of Literary Criticism 4
- ENGL 480 Modern Literary Criticism: Theory and Practice 4
- PHIL 445 Philosophy of the Arts 4
- PHIL 446 Aesthetics and the Film 4
- THTR 404 Acting Theory 4

Minor in Critical Approaches to Leadership

See Interdisciplinary Studies.

Minor in Philosophy for Business, Law, and the Professions

The aim of the minor is to provide students headed for business, law or the professions a strong set of critical, analytic and expository skills, while providing them with a broad humanistic perspective not found in professional education.

Students are required to take five courses, at least four of which must be upper-division. They must take one course from each of the following categories (1–4), and one additional course from either category 2 or 3.

Students must take at least one lower-division or 300-level course before taking any 400-level courses.

Logic: PHIL 350, PHIL 351, PHIL 352

Law, Leadership, and the Professions: PHIL 410, PHIL 430, PHIL 433, PHIL 443

Ethics, History of Ethics, and Value: PHIL 140, PHIL 340, PHIL 345, PHIL 351, PHIL 440, PHIL 442

Systematic Philosophy: PHIL 262, PHIL 360, PHIL 385, PHIL 427, PHIL 428, PHIL 460, PHIL 462, PHIL 485, PHIL 470

Graduate Degrees

The objective of the graduate program in philosophy is to equip suitably prepared and talented students to function effectively as teachers, thinkers and writers on philosophical topics in the Western tradition. The program provides for a wide range of studies within philosophy, but emphasizes the history of philosophy, both classical and modern, along with the traditional core disciplines: ethics, epistemology, metaphysics and logic.

Because philosophy is as much a special manner of intellectual activity as it is a special subject matter, the graduate student is expected not only to master major works in the historical and contemporary literature of philosophical thought, but also to develop the ability to engage in the ongoing process of philosophical research and dialogue.

Admission Requirements

An applicant for admission normally has an undergraduate major in philosophy, but programs may be arranged for promising students who do not. At least three letters of recommendation from the student’s undergraduate teachers should be sent to the chair of graduate admissions of the School of Philosophy. All applicants are required to take the verbal and quantitative General Tests of the Graduate Record Examinations.

Degree Requirements

These degrees are awarded under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Arts in Philosophy

The department does not accept applicants for a Master of Arts degree in philosophy. The M.A. degree is intended only as a transitional degree in the process of completing requirements for the Ph.D. in philosophy.

A student may obtain an M.A. in philosophy by fulfilling the following requirements: a minimum of 36 units in the USC philosophy school, at least 24 of which must be at the 500 level. Requirements include: PHIL 500, PHIL 503 and a 500-level course in each of the following three areas: metaphysics and epistemology, ethics and other value theory, and history of philosophy. Of the remaining four required (4-unit) courses, only four units of PHIL 590 are applicable to the degree. A publishable research paper is also required.

Progressive Degree Program in Philosophy and Law

The progressive degree program permits exceptional undergraduate students with a major or minor in philosophy to receive both an undergraduate degree and the Master of Arts in Philosophy and Law within five years.
A minimum GPA of 3.5, two letters of recommendation and outstanding performance in philosophy courses are required for admission to this program. For other requirements of the progressive degree program, see here.

Master of Arts in Philosophy and Law

A total of 36 units are required for the degree, including at least 24 units in philosophy. Twelve of these must concern the specialization and breadth requirements. The former requires students to take a 4- unit, 500-level course in philosophy on a topic spanning philosophy and law. The latter requires students to take PHIL 500 or PHIL 503, plus another 4-unit, 500-level course in philosophy on a topic that does not span philosophy and law, including but not limited to topics in metaphysics, epistemology, philosophy of language, philosophy of science, ethics, aesthetics and history of philosophy. Students must also demonstrate a basic proficiency in symbolic logic, typically by passing, at a sufficiently high level, one of a specified range of 4-unit courses in logic offered by the School of Philosophy. The law requirement for this degree consists of two courses in the USC Gould School of Law. The first must be either LAW 503 Contracts or LAW 509 Torts I. The second must be either LAW 504 Criminal Law or LAW 508 Constitutional Law. Students who select to take LAW 504 would normally also take LAW 509 as an accompaniment. Degree candidates must also write a master’s thesis on some subject in legal philosophy. At least one of the thesis advisers must have an appointment in the School of Philosophy.

Juris Doctor/Master of Arts, Philosophy

Students must complete 24 units in the USC School of Philosophy and 69 units in the USC Gould School of Law.

First Year: Required law school curriculum.

Second and Third Years: The School of Philosophy prefers that students take at least one philosophy course each semester. During the four semesters, students must take at least 16 units at the 500-level, including PHIL 450 Intermediate Symbolic Logic or PHIL 510 Philosophical Logic and PHIL 500, and PHIL 503, one 400- or 500-level course in ethics or social/political philosophy or aesthetics or philosophy of law; one 400- or 500-level course in metaphysics or epistemology or philosophy of language or philosophy of science or philosophy of mind; one 400- or 500-level course in the history of ancient or early modern philosophy; passage of the second year review that shall include a research paper based on a completed seminar paper and completion of a publishable research paper. Students must also complete 36 additional law units.

Doctor of Philosophy in Philosophy

Application deadline: January 1

Course Requirements

The minimum number of course credits required for the Ph.D. is 60 units. No more than 8 of these units may be from 500-level courses and no more than 8 of these units may be from 400-level courses in the School of Philosophy. PHIL 450 does not count toward this maximum of 8 units of 400-level courses (in the School of Philosophy). More than eight of these units may be earned in 794 Doctoral Dissertation. Each student must pass PHIL 450 with a grade of B or better and must pass both PHIL 500 and PHIL 503 with a grade of A or better. PHIL 450 and both PHIL 500 and PHIL 503 must be satisfactorily completed by the end of the second year.

The student may take up to two courses in a field of study related to philosophy. The Ph.D. dissertation may be written in any area of philosophy for which adequate supervision is available from within the university. Ph.D. students are also required to show evidence of practical or editorial training, or their equivalent.

Foreign Language/Research Tool Requirement

A foreign language examination, specified by the school, in French, German, Latin or classical Greek is required. The faculty may approve a replacement of the language requirement by a research tool requirement, consisting of an approved course or examination in a subject essential to the student’s research program. The course or examination must be passed before the qualifying examination is attempted.

There are three levels of evaluation in the Ph.D. program prior to the dissertation:

Distribution Requirement

There is a distribution requirement of six courses at the 500 level in the School of Philosophy, two each representing breadth within each of the following three areas: (1) metaphysics and epistemology (broadly construed, including philosophical logic; philosophy of science; philosophy of math, mind, and language), (2) value theory (broadly construed, including aesthetics, political philosophy, and the philosophy of law), and (3) pre-1879 history of philosophy. PHIL 500, PHIL 503 and PHIL 590 courses cannot count toward this requirement. Up to two 400-level courses may count by petition toward this requirement, provided that the departmental standards for graduate-level course work are met. Courses straddling two areas (for example, history of ancient philosophy and metaphysics; history of modern philosophy and ethics), instructors will indicate on the syllabus which requirement the course will satisfy. Courses dealing with subject matter within more than one of the areas listed may be used to satisfy any of the areas encompassed by the course although no single course may be used to satisfy two requirements at once. The two courses within each distribution area must represent breadth, as determined in advance by the graduate adviser and in accordance with departmental guidelines. All distribution requirements must be completed by the end of the fifth semester.

Screening Procedure

Students in the Ph.D. program must pass a screening procedure before undertaking their 25th unit (seventh semester), and generally keep track of the student’s progress in the program. At the appropriate time, the student’s dissertation committee (see Graduate Advisement), defined area in philosophy, and must give evidence of the student’s ability to do research, which will be subject to faculty review, and may not be allowed to continue in the program.

Doctoral Dissertation

When the student passes the qualifying examination, a dissertation committee (see Graduate Advisement), replacing the qualifying exam committee, is appointed by the director of the school in consultation with the student and the philosophy faculty. Normally, the qualifying exam committee simply becomes the dissertation committee. This committee and the candidate will then agree upon how the dissertation is to be developed and written. The dissertation must be an original contribution to some well-defined area in philosophy, and must give evidence of the student’s ability to do respectable, large-scale research, thinking, and writing in the field. The school requires the defense oral when the research and writing of the dissertation is substantially complete. Attendance at this oral examination is open to all members of the university faculty, but the examination is conducted and evaluated by the candidate’s dissertation committee. The faculty normally works with the dissertations only in the fall and spring semesters, and the student should plan accordingly.

Graduate Advisement

In addition to the departmental graduate adviser, who has the formal role in graduate advising, each student will be subject to faculty review of the submitted papers and consideration of the student’s total record.

For the review following the sixth semester of study, students are to select one from a list of pre-designated areas in philosophy and master the material on a pre-assigned reading list of important works in that area. At the beginning of the sixth semester, each student will take a written examination, designed by the faculty of the School of Philosophy, on the materials covered in the relevant reading list followed by an oral examination exploring their knowledge of the field. This examination must be passed by the end of the sixth semester. The examining committee for each student will consist of faculty conversant with the field and appointed by the school.

Qualifying Examination

This examination consists of a written prospectus of the proposed dissertation and an in-depth oral examination on the form and subject matter of the proposed dissertation. All faculty members may inspect the prospectus and be present at the oral, but evaluation of the qualifying examination is the responsibility of the student’s qualifying exam committee. The examination is not passed if two or more members of the qualifying exam committee find it unsatisfactory.

The qualifying examination is not offered in the fall and spring semesters. Those who intend to take this examination must meet all the conditions specified in the section on general requirements for the Ph.D. Students are expected to pass the qualifying exam by the end of the seventh semester. Students who have not passed the qualifying exam by the end of the seventh semester will be subject to faculty review, and may not be allowed to continue in the program.
Courses of Instruction

Philosophy (PHIL)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

PHIL 101G Philosophical Foundations of Modern Western Culture (4) The influence on modern Western culture of philosophical thought about reality, knowledge and morality as developed by such philosophers as Descartes, Leibniz and Kant.

PHIL 115G Ancient Greek Culture and Society (4) Focus on the literary achievement from the beginning of Greek literature to the fourth century with a special emphasis on the philosophers.

PHIL 135G Legal Controversies and Ethical Principles (4) Philosophical theories of law and applications to controversies of importance to society and our legal system, such as free speech, civil disobedience, and self-defense.

PHIL 137GM Social Ethics for Earthlings and Others (4, FaSpSm) A systematic study of contemporary issues in social and political philosophy engaging multimedia works of science fiction to illuminate classic Western moral and political theories.

PHIL 140G Contemporary Moral and Social Issues (4, FaSpSm) Critical study of controversial social issues such as abortion, euthanasia, the death penalty, war and terrorism, pornography, and economic justice.

PHIL 141G The Professions and the Public Interest in American Life (4) The study of the nature and role of professionals in life and society, forces that shape and direct them, foundations and applications of professional ethics.

PHIL 155G Modern Philosophy and the Meaning of Life (4) Modern philosophical treatments of the problem of the meaning or purpose of human life; special attention to Existentialism.

PHIL 225G Love and Its Representations in Western Literature, Philosophy, and Film (4, FaSp) Key works that have shaped the European and American cultural inheritance, with a special focus on the nature of love (and marriage or domesticity). Concurrent enrollment: MDA 120.

PHIL 242 Theories of Art (4) An introduction to general theories of art and to issues concerning particular arts such as literature and drama, photography and film, painting, architecture and music.

PHIL 250AB Elementary Formal Logic (2-2, FaSp) Critical reasoning skills and their many everyday applications; theory of logically correct reasoning and its associated formal techniques.

PHIL 262G Mind and Self: Modern Conceptions (4) Philosophical problems about the nature of mind associated with the rise of modern science; topics include the mind/body relation, personal identity, rationality and freedom.

PHIL 281LG Knowledge, Explanation, and the Cosmos (4, FaSpSm) The nature and limits of knowledge and explanation, and challenges in understanding the origin of the universe and the place of intelligent life within it.

PHIL 286LG Issues in Space and Time (4) Examining the nature of space and time, how they relate, and how material objects relate to them. Some included topics: substantivalism, temporal directionality, persistence, hyperspace.

PHIL 300 Introduction to the Philosophical Classics (4) An examination of philosophical works which have had a profound impact on the nature of Western thought.

PHIL 315 History of Western Philosophy: Ancient Period (4) Major figures in the history of Western philosophical thought from the pre-Socratics to the Hellenistic period; emphasis on Plato and Aristotle.

PHIL 317 History of Western Philosophy: Medieval Period (4) Central themes in Jewish, Christian and Islamic philosophy from late antiquity through the scholastic period.

PHIL 320 History of Western Philosophy: Modern Period (4) The development of philosophy from the 16th to the 19th centuries; emphasis on Continental Rationalism, British Empiricism, and the philosophy of Kant.

PHIL 320 Theories of Law (4) Examination of some of the major classical and contemporary theories of the nature and functions of law and of its relation to morality.

PHIL 335 Theoretical Models of Leadership (4, FaSp) Political philosophers and social theorists on leadership: political obligation; the art of government; leadership in civil society and counter-cultural dissent; models of cosmopolitan leadership.

PHIL 337 History of Modern Political Philosophy (4) Analysis of some of the main political philosophies of the modern era; emphasis on the ethical and metaphysical foundations of political philosophy.

PHIL 338 Political Economy and Social Issues (4, Sp) (Enroll in ECON 339)

PHIL 340 Ethics (4, FaSpSm) Study of major philosophical theories of moral right and wrong, such as utilitarianism, Kantianism, egoism, virtue ethics, and theological ethics.

PHIL 345 Greek Ethics (4) Examination of the progress of the ethical thought and legal and political institutions of ancient Greece with an emphasis on the Nichomachean Ethics of Aristotle.

PHIL 347 Philosophy in Literature (4) Philosophical content in representative European and American literature; philosophical problems about literature such as the nature of truth and meaning in fiction.

PHIL 350 Symbolic Logic (4) Introduction to basic techniques of propositional and quantificational logic, and elements of probability. Especially useful to philosophy, mathematics, science, and engineering majors.

PHIL 351 Reasoning and Logic (4) Study of reasoning as a strategy for arriving at knowledge in dependence upon logical theory. Logical theories are developed alongside historically influential strategies of reasoning. Not open to freshmen.

PHIL 352 Logic and Language (4) Introduction to modern symbolic logic, with applications to the philosophy of language, plus meta-logical and philosophical results about its scope and limits.

PHIL 353 Existentialism (4) A critical survey of major 19th and 20th century existentialist writers, including Kierkegaard, Dostoevsky, Tolstoy, Kafka, Nietzsche, Camus, and Sartre.

PHIL 356 Epistemology and Metaphysics (4) Examination of problems in metaphysics and/or epistemology. Conducted at the intermediate level.

PHIL 356 Philosophy of Religion (4) The existence of God; mysticism, miracles and the possibility of disembodied existence; the problem of evil; religion and morality; the meaning of religious language.

PHIL 363 Philosophy of Perception (4) Philosophical investigation of sense perception as it relates to issues in epistemology, metaphysics, the philosophy of mind, and the philosophy of science.

PHIL 385 Science and Rationality (4) Examination of the rationality of the scientific enterprise, and of the relation between science and human values.

PHIL 390 Special Problems (-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

PHIL 410 Early Greek Thought (4) A study of the Greek thinkers from Homer to the age of Socrates; emphasis on the pre-Socratic philosophers.

PHIL 411 Plato (4) Detailed study of the evolution of Plato’s thought as revealed in selected dialogues.

PHIL 415 Aristotle (4) Intensive study of selected topics taken from Aristotle’s writings in natural philosophy, in metaphysics, and in other areas of philosophy.

PHIL 421 Continental Rationalism (4) Development of philosophy on the continent from the 17th to the 19th centuries; emphasis on the philosophical works of Descartes, Leibniz, and Spinoza.

PHIL 422 British Empiricism (4) Development of philosophy in Great Britain from the 17th to the 19th centuries; emphasis on Locke, Berkeley, and Hume.

PHIL 423 The Critical Philosophy of Kant (4) Intensive study of the philosophical works of Kant.

PHIL 424 19th Century Philosophy (4) Leading figures and movements in 19th century philosophy; works of such philosophers as Hegel, Schopenhauer, Mill, Nietzsche, and Bradley.

PHIL 426 20th Century European Philosophy (4) Main philosophers and movements from 1900, including the major developments within phenomenology and existentialism, the emergence of structuralism and hermeneutics.

PHIL 427 20th Century Anglo-American Philosophy (4) The nature and function of analysis as a philosophical method; the development of major metaphysical, epistemological, and ethical views; Russell, Wittgenstein, Carnap, Quine and others.
PHIL 428 Anglo-American Philosophy Since 1950 (4) The maturing of the analytic tradition from the later Wittgenstein through Ryle, Strawson, Hare, Austin, Grice, Quine, Davidson, Kripke, and beyond.

PHIL 430 Philosophy of Law (4) Philosophical theories about the nature of law, relations between law and morality, and analysis of normative concepts central to law, such as responsibility, punishment, negligence.

PHIL 431 Law, Society, and Politics (4, Fa) A systematic presentation of the main philosophical perspectives on the interactions between law and the social-political aspects of our lives.

PHIL 437 Social and Political Philosophy (4) The nature of man and society, the nature and justification of state and government, political rights and political obligation, justice and equality.

PHIL 440 Contemporary Ethical Theory (4) Ethical theories in the 20th century; contemporary theories of value and obligation; metaethical theories; intuitionism, naturalism, and non-cognitivism; concepts of justice, human rights, and freedom.

PHIL 442 History of Ethics to 1900 (4) An historical and critical study of the great moral philosophers, including Plato, Aristotle, Aquinas, Kant, and the British moralists.

PHIL 443 Value Theory (4) The evaluation of individual and social ends; consideration of such topics as values and rational choice, the good of a person, hedonism, welfare, ideals, and utopias.

PHIL 445 Philosophy of the Arts (4) Principal theories of the nature of, and response to, art; examination of form and content in various arts; consideration of the role of criticism.

PHIL 446 Aesthetics and the Film (4) Problems in the philosophy of art raised by film, such as the notion of “cinematic”; the nature of interpretation of films; criteria for evaluating films.

PHIL 450 Intermediate Symbolic Logic (4) Systematic study of the metatheory of quantificational logic, with applications to questions of decidability and completeness of formal systems including Gödel’s incompleteness Theorems.

PHIL 452 Modal Logic (4) Elements of propositional and quantified modal logic and the logic of counterfactual conditionals with an eye to some of their applications in contemporary philosophy. Prerequisite: PHIL 350, or PHIL 351, or PHIL 352.

PHIL 460 Metaphysics (4) Systematic introduction to basic concepts, including identity, difference, existence, individuals, substance, quality, and relation; emphasis on idealism, materialism, and the ontology of intentionality.

PHIL 462 Philosophy of Mind (4) Examination of contemporary theories of mind and its place in the natural world.

PHIL 463 Theories of Action (4) Systematic investigation of action, the mental states involved in action, the reasoning processes that lead to action, and related concepts including intentionality and free will.

PHIL 465 Philosophy of Language (4) The nature of communication, meaning, reference, truth, necessity, speech acts, convention, and language.

PHIL 470 Theory of Knowledge (4) Examination of contemporary accounts of the nature, scope, sources – and value – of human knowledge and justified belief.

PHIL 471 Metaphysics and Epistemology (4) Classic issues in epistemology and the philosophy of language, leading up to the application of context-sensitivity in language to the problem of skepticism. Open only to philosophy majors. Prerequisite: PHIL 250B or PHIL 350 or PHIL 351 or PHIL 352: recommended preparation: at least one 400-level PHIL course.

PHIL 472 Moral Philosophy (4) In-depth study of some important work from the last few decades concerning the nature and status of moral reasons, moral obligations, and moral discourse. Open only to philosophy majors. Prerequisite: PHIL 250B or PHIL 350 or PHIL 351 or PHIL 352: recommended preparation: at least one 400-level PHIL class.

PHIL 473 Wittgenstein (4) A detailed study of the philosophical works of Ludwig Wittgenstein.

PHIL 480 Philosophy of Mathematics (4) The nature of mathematical truth and the nature of mathematical entities.

PHIL 485 Development of Physical Science (4) Concepts central in the advance of physical science such as the concepts of space, time, mass, force; philosophical problems concerning quantum mechanics.

PHIL 486 Methodologies of the Sciences (4) Comparison of the methodologies of the natural, social, and/or behavioral sciences; consideration of such topics as the concept of scientific law, prediction, explanation, confirmation.

PHIL 490 Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

PHIL 494 Senior Thesis (4) Independent studies for philosophy majors, and guidance in the preparation of the senior thesis for students who wish to graduate with honors in philosophy. Not open to graduate students.

PHIL 499 Special Topics (2-4, max 8) Selected topics in various specialty areas within philosophy.

PHIL 500 Introduction to Contemporary Philosophical Literature (4, Fa) Analysis of selected philosophical problems and themes of current interest; explication of major contemporary papers and/or books is emphasized.

PHIL 501 Seminar in Recent Philosophy (4, max 16, Sp) Contemporary philosophical issues and literature.

PHIL 503 Introduction to Contemporary Philosophical Literature on Value (4, Sp) Analysis of selected philosophical problems and themes of current interest; explication of major contemporary papers and/or books is emphasized.

PHIL 504 Pro-Seminar in Central Topics in Contemporary Philosophy (4, Irregular) Key developments in central areas of philosophy are used to provide training in philosophical analysis, criticism, and the writing of precise philosophical prose.

PHIL 510 Philosophical Logic (4, Sp) Applications of logical theory to contemporary philosophical research. Elements of model theory, recursion theory; Gödel’s incompleteness results; modal logic and its interpretations. Recommended preparation: PHIL 350.

PHIL 515 Studies in Ancient and Medieval Philosophy (4, max 16) Problems in research in selected portions of ancient and medieval philosophy.

PHIL 520 Studies in Modern Philosophy (4, max 16) Problems in research in selected portions of modern philosophy.

PHIL 525 Seminar in Phenomenology (4) The origin, principles, and development of the phenomenological movement from Brentano to Merleau-Ponty.

PHIL 530 Seminar in Philosophy of Law (4, max 12) Theories of the nature of law; emphasis on recent writing; legal concepts such as rights, powers, liability, legal responsibility, law, and morality.

PHIL 537 Seminar in Social and Political Philosophy (4, max 16) Advanced literature on selected topics in social and political philosophy, including the nature of law, man, and society; ideals such as justice and freedom.

PHIL 540 Seminar in Ethics (4, max 16) Advanced topics and literature in ethical theory.

PHIL 545 Seminar in Aesthetics (4) Advanced topics in the philosophy of the arts. Contemporary views on such problems as the nature of art and the role of criticism.

PHIL 550 Advanced Topics in Formal Logic (4) Consistency and completeness of the predicate calculus; truth and validity; rudiments of model logic. Prerequisite: PHIL 450.

PHIL 551 Seminar in the Philosophy of Logic (4) Advanced topics in logic and/or philosophy of logic.

PHIL 560 Seminar in Metaphysics (4, max 16, Fa) Advanced topics in metaphysics.

PHIL 565 Philosophy of Language (4, max 12, FaSp) Philosophical issues in the empirical study of language concerning the relationship between linguistic meaning and the use of sentences to assert and convey information.

PHIL 570 Seminar in Epistemology (4, max 16) Advanced topics in epistemology.

PHIL 585 Seminar in Philosophy of Science (4, max 16) Advanced topics in the philosophy of science.

PHIL 589 Writing for Publication in Philosophy (4, max 8, Sp) Intensive writing seminar in which students read cutting-edge philosophy and take supervised steps towards crafting critical essays for publication. Prerequisite: PHIL 510, PHIL 555.

PHIL 590 Directed Research (1-12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PHIL 593x Teaching Philosophy (4, Fa) Basic principles of philosophical pedagogy, with emphasis on practical applications and the importance of career-long skill development. Required for first-semester teaching assistants in philosophy. Not available for major credit. Open only to philosophy doctoral students. Graded CR/NC.

PHIL 594abz Master’s Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

PHIL 599 Special Topics (2-4, max 8) Major trends of current thought; specific topics to be announced.

PHIL 636 Seminar in Semantics (3, max 12) (Enroll in LING 636)

PHIL 700x Dissertation Seminar (2, max 12) A focused environment in which to present and evaluate dissertation work in-progress. Focus on peer and faculty feedback, developing professional presentation skills, improving critical communication skills. Graded CR/NC. Open only to philosophy doctoral students.
**PHIL 790 Research (1-12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**PHIL 794abcdz Doctoral Dissertation (2-1-2-1-0)** Credit on acceptance of dissertation. Graded IP/CR/NC.

### Physical Education

**Physical Education Building 108**

(213) 740-2488

Fax: (213) 821-1058

Email: phed@dornsife.usc.edu

dornsife.usc.edu/phed

**Director:** Steve VanKanegan, M.S.

**Administrative Coordinator:** Amber Harris, MPW

**Faculty**

**Master Lecturer:** Steve VanKanegan, M.S.

**Senior Lecturers:** Daniel M., M.S.; Danielle M., M.S.; Stephanie Eggert, M.S.; Steve Hsu, M.S.; John Jesses, M.S.; Isabelle Pilliere Mazumdar, B.A.

The physical education program provides a variety of offerings in fitness and activities classes designed to promote health and general fitness based upon individual goals and needs. Fitness classes focus primarily on development of muscle strength, muscle endurance, cardiorespiratory endurance, flexibility, general wellness principles and nutritional guidelines. Activities classes stress fundamental techniques, tactics, rules, etiquette and the importance of leisure time activities to physical, mental and social well being.

**General Requirements**

No more than four units of physical education activity courses may be applied to a student’s overall unit requirement, toward his or her USC degree.

Registration in courses PHED 102ab-160 is contingent upon assessment of students’ knowledge and competence in performance during the first two class meetings. Students who wear glasses while participating in vigorous activities must secure departmental approval of provisions made for eye protection in courses PHED 140. Course PHED 165 is reserved for students who are reporting for regular freshman or varsity athletic squads.

To obtain a prerequisite waiver to take a b class before having taken the a section, the instructor’s approval and signature are needed. Students should be aware that in the future they cannot take the prerequisite course in the activity for credit after having it waived.

### Courses of Instruction

**PHYSICAL EDUCATION (PHED)**

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

**PHED 102ab Weight Training (1-1, FaSp) a:** Improvement of body shape, muscle endurance, and muscle strength; understanding of weight training and nutrition principles that can be utilized for future weight training development. b: Training techniques and application of advanced weight training principles through weekly workouts; personal trainer certification exam preparation.

**PHED 104ab Self-Defense (1-1, FaSp) a:** Basic instruction of self-defense for beginners; strategies for standing and ground fighting situations with or without weapons. b: Intermediate instruction involving more advanced fighting strategies and techniques.

**PHED 106ab Physical Conditioning (1-1, FaSp) a:** Improvement in cardiorespiratory endurance, body composition, muscle endurance and flexibility; running, circuit training, resistance exercises; fitness principles and nutrition to develop individualized program. b: Advanced training methods focusing on continuing gains in fitness level.

**PHED 108 High Stress Physical Conditioning (1) Rigorous physical conditioning with emphasis on distance running and development of cardiovascular and upper body strength. A challenging regimen to enhance stamina and endurance. Prerequisite: PHED 160b or permission of instructor.

**PHED 110ab Swimming (1-1, FaSp) a:** Instruction and practice in basic strokes for beginners and intermediate swimmers; elementary springboard diving; water safety techniques; endurance training as a fitness program. b: Advanced instruction and practice of strokes; advanced endurance training.

**PHED 114 Lifesaving (1) American Red Cross Senior Lifesaving. Prerequisite: PHED 110ab or ability to pass Skills Test II.

**PHED 115 Surfing (1, FaSp) Fundamental instruction of surfing skills; water safety and etiquette; wave recognition and forecast interpretation; surf culture; board selection; surf related strengthening and stretching.

**PHED 120ab Yoga (1-1, FaSp) a:** Introduction to meditation, breathing techniques and postures as a means towards relaxation; increase muscle flexibility; understanding of basic anatomy and nutritional guidelines. (Duplicates credit in former PHED 120.) b: A continuing study of intermediate and advanced yoga postures, breathing techniques and meditation as a means toward relaxation and stress-reduction.

**PHED 121 Yoga for Athletic Performance (1, FaSpSm) Skills and strategies for injury prevention and recovery from athletic training; application of yoga principles to improve posture, strength, flexibility, core stability and concentration. Prerequisite: PHED 120a.

**PHED 124 Walking for Fitness (1, FaSp) Develop a strong fitness foundation through walking; fitness assessment and individualized programs; gait biomechanics and power walking; injury prevention; strategies for special populations.

**PHED 129ab Aerobic Fitness (1-1, FaSpSm) a:** Aerobic exercise focusing on cardiorespiratory endurance encompassing a variety of training methods such as high/low impact aerobics, body sculpting, circuit training and nutritional guidelines. b: Group exercise teaching techniques and application of fitness principles through weekly workouts; group fitness certification exam preparation.

**PHED 131 Step Aerobics (1, FaSp) Development of physical fitness components through step aerobics; total body workout utilizing step movements and body sculpting exercises.

**PHED 133 Rock Climbing (1, FaSp) Acquisition of basic rock climbing skills, muscle strength, endurance and balance, climbing safety, ethics and environmental considerations; understanding equipment, problem solving.

**PHIL 138 Beach Volleyball (1, FaSpSm) Fundamental instruction of skills and tactics specific to sand volleyball and related physical conditioning; rules and strategies; history and culture.

**PHED 139ab Volleyball (1-1, FaSp) a:** Introduction to beginning and intermediate volleyball skills, rules, game tactics, and strategies. Emphasis on the development of: passing, setting, hitting, serving, blocking, and digging. b: Advanced techniques; focus on offenses and defenses used in game situations.

**PHED 140abc Tennis (1-1-1, FaSp) a:** Fundamental instruction of basic strokes for beginners and intermediate players; rules, scoring, court etiquette, strategies; singles and doubles; practice and match play. b: Reinforcement of basic strokes and instruction of advanced strokes; advanced strategies; singles and doubles; practice and match play. c: Development of strokes and strategies for advanced tournament players; drills and matches.

**PHED 142ab Racquetball (1-1, FaSp) a:** Instruction of basic stroke technique for beginners and intermediate players; rules, scoring, game tactics; practice of strokes and competition. b: Development of advanced skills and strategies; singles and doubles practice and competition.

**PHED 150 Table Tennis (1, FaSp) Fundamental instruction of basic strokes for beginning and intermediate players; rules, scoring strategies; singles and doubles; practices and match play.

**PHED 154ab Soccer (1-1, FaSp) a:** Development of basic skills for beginners, intermediate and advanced players; rules, positioning elements of play, small group and team tactics; full field scrimmages. b: Advanced development of skills, positioning, tactics and conditioning.

**PHED 155 Golf (1, FaSp) Basic skills development and knowledge in stance, grip and swing mechanics; course strategy; use of woods, irons and putting; history rules and etiquette.

**PHED 156ab Basketball (1-1, FaSp) a:** Basic skill development in dribbling, passing, shooting, rebounding and defense; rules, history, and etiquette; drills and full court games. b: Development of advanced skills; team strategy; offenses and zone defenses; drills and full court games.

**PHED 160 Stress Management for Healthy Living (2, FaSp) Instruction on the effects of stress as it relates to work, sport and academics; coping strategies are discussed and applied through physical conditioning interventions.

**PHED 161 First Aid (1) First Aid safety education and infant, child, and adult CPR; demonstrated proficiency and successful completion of exam prepares students for Red Cross certification. (Duplicates credit in former PHED 171.)

**PHED 162 Principles of Athletic Coaching (2, FaSpSm) Introduction to coaching strategies; team management; philosophy; ethics; leadership.

**PHED 163 Varsity Athletics (1, max 4) Participation in the university’s inter-collegiate programs as sanctioned and governed by the PAC-10 Conference and/or the NCAA. Graded CR/NC.

### Physics and Astronomy

Seeley G. Mudd Building 408
Main: (213) 740-0840; Undergraduate: (213) 740-1140;
Bachelor of Science in Physics

This program is intended primarily for students who are interested in a career in physics.

Bachelor of Science in Biophysics

This program is intended for students with an interest in the interdisciplinary field of biophysics. The degree program provides the physics and biology background necessary for the field while simultaneously fulfilling medical school entrance requirements.

Department Requirements for a Minor in Astronomy

The astronomy minor is open to all students. A minimum of three courses taken toward the minor must be unique to the minor.

Grade Point Average in Major Subject

A GPA of C (2.0) or higher is required in all upper-division courses taken in the department for all of the above major degree programs. A grade of C (2.0) or higher is required in all courses in the department specifically listed as subject requirements.

Advisement

Advisement is required for all B.S. and B.A. degree candidates in the department. Students should meet with their departmental academic adviser at least once a semester to review the direction of their academic programs. Students who have not met with an adviser should contact the director of undergraduate affairs. Students are also encouraged to seek the advisement of faculty members whose specializations are appropriate to their intended field of graduate study.

Undergraduate Research Opportunities

Students are encouraged to become familiar with the research programs of the faculty in the department. Students who intend to pursue a Ph.D. and a career in research in physics or astronomy following graduation are strongly encouraged to become involved directly in one of the research programs, whether as summer research assistants or as part-time laboratory assistants during the academic year. Specific research opportunities will depend upon individual faculty research programs.

Graduate Degrees

The Department of Physics and Astronomy offers graduate study at the master’s and doctoral degree levels. The graduate program prepares students for professional careers in research, teaching and developmental applications of physics.

Entering students spend time in intensive course work providing a broad background in advanced physics regardless of degree objective. Subsequent study involves a mix of course work, practical training and independent research (depending on degree objective). The doctoral program affords exceptionally close collaboration between students and faculty.
Research Areas: Experimental, Theoretical and Computational

Opportunities for research are offered in atomic, molecular and optical/laser physics, astrophysics, elementary particle theory, string theory, quantum field theory, earthquake physics, heliosismology, condensed matter physics, quantum electronics/nonlinear optics, space physics and ultraviolet temperature physics.

Degree Requirements

Graduate degrees in the Department of Physics and Astronomy are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Graduate study in physics is divided into three degree objectives:

Master of Science and Master of Arts in Physics

Admission Requirements

The prerequisite for admission for a master’s degree in the Department of Physics and Astronomy is a bachelor’s degree in physics or a related field. All applicants for admission must take the Graduate Record Examinations, including the Physics Subject Test. Transcripts of undergraduate records as well as transcripts of any graduate-level courses are required. The TOEFL or IELTS is required of international students applying for a teaching assistantship as well as for those applying for admission only. Applicants may be admitted as a degree candidate at the beginning of fall or spring semester.

Residence

All M.S. and M.A. degree students normally take at least three courses for each of two semesters. A total of 24 units of credit is required for graduation. Admitted students may transfer a maximum of 4 units of credit to apply toward the degree requirements.

Foreign Language Requirement

There is no foreign language requirement for the M.S. or M.A.

Course Requirements

Option A M.S. in Physics: The M.S. degree requires satisfactory completion of seven courses (exclusive of PHYS 500 and PHYS 594), of which no more than one course may be PHYS 590 Directed Research. In addition, satisfactory completion of a thesis (and 4 units of PHYS 594) is required.

Option B M.A. in Physics: The M.A. degree requires satisfactory completion of eight courses (exclusive of PHYS 500 and PHYS 590) plus a high level of performance on the comprehensive examination.

The required courses for either option are PHYS 504, PHYS 508a and PHYS 558a. For either option at least five courses must be at the 500 level or higher and remaining courses at the 400 level or higher; at least five courses must be in physics. All required physics courses must be passed with a grade of B- or better. No upper-division courses required for the B.A. in physics at USC may be counted toward the M.A. or M.S. degree.

Comprehensive Examination

All master’s degree candidates are required to take the departmental screening examination not later than during their second semester (excluding summer). This examination serves as the required comprehensive examination for the M.A. degree. A high level of performance is required for the M.A. degree, and a superior level is required for admission to (or continuation in) the Ph.D. program.

Master of Science in Physics for Business Applications

Admission Requirements

The prerequisite for admission to the Master of Science in Physics for Business Applications is a bachelor’s degree in physics, chemistry, mathematics, engineering or related field. Applicants should have previous upper-division course work in electricity and magnetism and quantum mechanics/modern physics. All applicants for admission must take the Graduate Record Examinations general test and are encouraged to take the Physics Subject Test. Transcripts of undergraduate records as well as transcripts of any graduate-level courses are required. The TOEFL or IELTS is required of international students applying for a teaching assistantship as well as for those applying for admission only. Applicants may be admitted to the program at the beginning of fall or spring semester.

Residence

All full-time M.S. degree students are expected to take three courses toward the degree for each of the first three semesters. Part-time students are expected to complete at least three courses per calendar year. A total of 36 units of credit is required for graduation. Admitted students may transfer a maximum of 8 units of credit to apply toward degree requirements.

Foreign Language Requirement

There is no foreign language requirement for the M.S. degree.

Computer Language Requirement

By the end of the first semester in residence, students are required to demonstrate a skill level in programming in C or C++. This skill may be demonstrated by a practical exam or by passing a relevant computer language course.

Course Requirements

The M.S. in Physics for Business Applications degree requires completion of 36 units of course work plus satisfactory submission of a final technical report. The physics requirement is 17 units of courses, including PHYS 516, PHYS 518, PHYS 520, PHYS 556a, PHYS 650 and PHYS 692. The business requirement is 12 units of courses. Business courses may be selected from one of three tracks: Corporate Finance (GSBA 510, GSBA 548 and one of GSBA 518 or GSBA 543 are required with electives chosen from FBE 529, FBE 531, FBE 532 and FBE 582); Information Systems (GSBA 518 or GSBA 543 required with electives chosen from IOM 533 and IOM 540); or Operations Management (GSBA 518 or GSBA 543 required with electives chosen from DSO 525, DSO 527, DSO 531, DSO 582 and DSO 583). Alternative business tracks can be taken with departmental approval. An additional 6 units of technical electives are required, to be chosen from PHYS 408b, PHYS 440, PHYS 504, PHYS 510, PHYS 556a, MATH 407 or MATH 410. Alternative technical electives can be taken with departmental approval. All required courses must be passed with a grade of B- or better.

Comprehensive Examination

Final Technical Report

All students in physics are required to submit a final technical report within one semester of completion of the internship PHYS 692. This report will be reviewed by the department to establish both its technical merit and the quality of written communication skills of the master’s student. A grade will be registered for PHYS 692 upon satisfactory review of the final report.

Qualifying Exam Committee

All students in physics for business applications are required to submit a final technical report within one semester of completion of the internship PHYS 692. This report will be reviewed by the department to establish both its technical merit and the quality of written communication skills of the master’s student. A grade will be registered for PHYS 692 upon satisfactory review of the final report.

Doctor of Philosophy in Physics

Application deadline: January 1

Admission Requirements

The prerequisite for admission to the doctoral program in the Department of Physics and Astronomy is a bachelor’s or master’s degree in physics or related field. All applicants for admission must take the Graduate Record Examinations, including the Physics Subject Test. Transcripts of undergraduate records as well as transcripts of any graduate-level courses are required. The TOEFL or IELTS is required of international students applying for a teaching assistantship as well as for those applying for admission only. Applicants may be admitted to the program at the beginning of fall or spring semester.

Residence

Ph.D. students in physics normally enroll in three courses for each of the first four semesters in graduate school. A total of 60 units of credit is required for graduation. Students admitted to the Ph.D. program may transfer a maximum of 30 units of credit to apply toward degree requirements. For students admitted with Advanced Standing (entry with an appropriate completed graduate degree from an accredited institution), a minimum of 36 units of course work beyond that graduate degree, exclusive of PHYS 794, will be required.

Foreign Language Requirement

There is no foreign language requirement for the Ph.D.

Course Requirements

The student is expected to have prepared for understanding all branches of physics. A minimum of 11 graduate courses in physics, excluding graduate colloquium, dissertation and directed research courses, taken at this university and elsewhere, is required. The required courses for the Ph.D. are PHYS 504, 508ab, PHYS 510, PHYS 518 and PHYS 558ab plus four elective graduate courses in physics. In addition, four units of PHYS 500 and PHYS 794 are required. All required physics courses (except 500 and 794) must be passed with a grade of B- or better. After passing the qualifying examination the student must register for PHYS 794 Doctoral Dissertation each fall and spring semester.

Screening Procedure

Any student proceeding toward the Ph.D. in physics must pass the departmental screening examination at a superior level. The exam must be taken not later than during the second semester (excluding summers, but including time in the M.A./M.S. program) in the department. New advanced students who have passed an equivalent comprehensive examination at a well-recognized research university with superior grades may apply to the departmental examination committee for an oral interview in order to be exempted from the written screening examination. A faculty member who supervises the research of such a student in the department must support this application.
The graduate adviser serves as advisor to incoming students and assists in the appointment of the qualifying exam committee, which is formed after the screening examination has been passed. After the student passes the qualifying examination and a dissertation topic is approved, the five-member qualifying exam committee becomes known as the dissertation committee and is responsible for monitoring the candidate’s progress and approving the final content and form of the dissertation.

Qualifying Examination

The qualifying examination must be attempted not later than during the fifth semester (or in the case of advanced students, the third semester) in the department (excluding summer). The Ph.D. qualifying examination contains a written part and an oral part. The written part consists of a critical review by the student of a published work selected by the qualifying exam committee and of a research proposal prepared by the student on the area in which the student intends to do a doctoral dissertation. The oral part expands on the written part.

Dissertation

A doctoral dissertation in physics is expected to be an extensive description of original research carried out by the student. A complete discussion of reported research in relation to previous work by others is essential.

Defense of the Dissertation

The dissertation must be defended in a final oral examination. The candidate must be prepared to answer general questions in the field as well as specific questions regarding the dissertation.

Courses of Instruction

Astronomy (ASTR)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

ASTR 100Lxg The Universe (4, FaSpSm) Survey of the universe: planets, satellites, comets, stars, nebulae, galaxies. Practical component includes planetary observations and dark-sky field trip. Not available for major credit.

ASTR 104L Special Laboratory (1, FaSpSm) Laboratory component for ASTR 100Lxg for transfer students with equivalent lecture credit from another institution. For transfer students only. Graded CR/NC.

ASTR 200Lxg Earth and Space (4) Study of earth as a physical object and an object in space. Topics include seismic events, earth interior, other planets, formation of the sun and earth. Not available for major credit.

ASTR 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

ASTR 400 The Solar System (4, 2 years, Fa) Earth’s motions; planets and their satellites; comets; meteorites; interplanetary matter; elementary celestial mechanics. Prerequisite: MATH 226.

ASTR 422 Galaxies and Large-Scale Structures in the Universe (4, 2 years, Sp) Galaxies and clusters of galaxies: their content, structure, dynamics, distribution, and motions; the cosmic microwave background: theory and observation; elements of observational cosmology. Prerequisite: PHYS 153L or PHYS 163L.

ASTR 424 Cosmology (4, 2 years, Sp) Concepts of space-time, general relativity applied to an homogeneous and expanding universe. Universe’s content and thermal history. Introduction to current observational tests of cosmology. Prerequisite: PHYS 153L or PHYS 163L.

ASTR 450 Stellar Astrophysics (4, 2 years, Fa) Observation and theory of stellar atmospheres and stellar interiors. Theory of stellar evolution. Physical and astronomical significance of the end states of stellar evolution. Prerequisite: PHYS 153L or PHYS 163L.

ASTR 490 Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit. Prerequisite: one upper-division course in astronomy and departmental approval.

ASTR 540 Advanced Cosmology (3) Perturbed Einstein’s and Bohr’s equation. Universe’s content, anisotropies: initial conditions, linear evolution, comparison with observations. Prerequisite: PHYS 504, PHYS 508AB, PHYS 510, PHYS 518.

ASTR 740 Selected Topics in Astrophysics (3, max 6) Selected topics in cosmology. Course content includes dark matter, dark energy, gravitational lensing, the cosmic microwave background, inflation, galaxy and galaxy cluster surveys. Prerequisite: ASTR 540.

Physics (PHYS)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

PHYS 05X Problem Solving in Mechanics and Thermodynamics (1) Intensive practice in solving elementary problems within a student-centered learning environment. Not available for degree credit. Graded CR/NC. Concurrent enrollment: PHYS 151L.

PHYS 100Lxg The Physical World (4, FaSpSm) The fundamentals of physics presented with emphasis on the structure and beauty of physical laws. Practical component will relate these laws to commonly encountered events. Not available for major credit.

PHYS 125L Physics for Architects (4, Sp) Fundamental laws and principles of physics with emphasis on the application of physical principles to the problems of architecture. Lecture, 4 hours; laboratory, 3 hours. (Duplicates credit in PHYS 135L.) Prerequisite: Passing of Math Placement Exam or MATH 108 or MATH 125 or MATH 126 or MATH 226.

PHYS 135L Physics for the Life Sciences (4-4, FaSpSm) Fundamentals of physics emphasizing areas related to life sciences; prerequisite for biological sciences, medicine, dentistry, and pharmacy. Lecture, 4 hours; laboratory, 3 hours. (Duplicates credit in PHYS 152L.) Prerequisite: Passing of Math Placement Exam or MATH 108 or MATH 125 or MATH 126 or MATH 226.

PHYS 141L Special Laboratory I (1, FaSpSm) Laboratory component for PHYS 125L for transfer students with equivalent lecture credit from another institution. For transfer students immediately after matriculation. Graded CR/NC.

PHYS 142L Special Laboratory II (1, FaSpSm) Laboratory component for PHYS 135L for transfer students with equivalent lecture credit from another institution. For transfer students immediately after matriculation. Graded CR/NC.

PHYS 152Lg Fundamentals of Physics I: Mechanics and Thermodynamics (4, FaSpSm) Gateway to the majors and minors in Physics and Astronomy. Statics and dynamics of particles and rigid bodies, conservation principles, gravitation, simple harmonic oscillators, thermodynamics, heat engines, entropy. Lecture, 3 hours; laboratory, 3 hours. Prerequisite: MATH 125 or MATH 126 or MATH 226.

PHYS 152L Fundamentals of Physics II: Electricity and Magnetism (4, FaSpSm) Electrostatics, magnetostatics, electrical circuits, wave motion, sound waves, electromagnetic waves. Lecture, 4 hours; laboratory, 3 hours. Prerequisite: PHYS 151L, MATH 126; corequisite: MATH 226.

PHYS 153L Fundamentals of Physics III: Optics and Modern Physics (4, FaSpSm) Geometrical optics, interference, diffraction, special relativity, quantum mechanics, atomic physics, solid state physics. Lecture, 3 hours; laboratory, 3 hours. Prerequisite: PHYS 152L.

PHYS 161L Advanced Principles of Physics I (4, Sp) Gateway to the majors and minors in Physics and Astronomy. Introductory treatment intended for well-qualified students. Dynamics of particles and rigid bodies, conservation laws, wave motion, thermodynamics, heat engines, entropy. Lecture, 3 hours; laboratory, 3 hours. Prerequisite: PHYS 152L.

PHYS 162L Advanced Principles of Physics II (4, Fa) Electrostatics, magnetostatics, electrical circuits, electrical and magnetic properties of matter, Maxwell’s equations, electromagnetic waves, propagation of light. Lecture, 4 hours; laboratory, 2 hours. Corequisite: MATH 226; recommended preparation: PHYS 161L.

PHYS 163L Advanced Principles of Physics III (4, Sp) Interference and diffraction of waves, special relativity, quantum mechanics, atomic physics, nuclear physics, condensed matter physics, elementary particles. Lecture, 3 hours; laboratory, 3 hours. Prerequisite: PHYS 162L.

PHYS 190 Physics Discovery Series (1, FaSpSm) Introduction to current research activities of the faculty of the department; topics of current and popular interest among the wider community of physicists. Graded CR/NC.

PHYS 200Lxg The Physics and Technology of Energy: Keeping the Motor Running (4, FaSpSm) Investigation of energy technologies, including development and implementation issues. Topics include the industrial revolution, electromagnetic induction, power transmission, combustion engines, fission and fusion. Not available for major credit.

PHYS 304 Mechanics (4, FaSpSm) Dynamics of particles, kinematics of rotations, rigid body motion, Lagrangian and Hamiltonian formalism, theory of small vibrations. Prerequisite: PHYS 151L or PHYS 161L, MATH 245.

PHYS 316 Thermodynamics and Statistical Mechanics (4, 2 years, Sp) First, second, and third thermodynamic laws; thermodynamic potentials, applications; distribution laws, kinetic theory, transport phenomena, specific heats. Prerequisite: PHYS 152L or PHYS 161L, MATH 226.

PHYS 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

PHYS 408L Electricity and Magnetism (4, Fa; b: 4, Sp) a: Electrostatics; thermal, chemical, magnetic effects of steady currents; DC circuits. b: Electromagnetic induction; AC circuits; Maxwell’s equations. Prerequisite: PHYS 152L or PHYS 161L; Corequisite: MATH 245 (for PHYS 408A), MATH 244 (for PHYS 408B).

PHYS 430 General Relativity and Gravitation (4, Sp) Geometry of the Universe, special relativity, curved metrics, black holes, equivalence principle, cosmology,
quantum interference devices, scanning tunneling microscopy, and laser cooling and trapping of single atoms.

**PHYS 720 Selected Topics in Theoretical Physics (3, max 6)** Course content will vary with current interest. Topics covered may include field theory, many body theory, Green’s functions, dispersion theory, and group theory.

**PHYS 730 Selected Topics in Particle Physics (3, max 6)** Various advanced phases of particle physics. Content will vary yearly; emphasis on superstring theories, advanced topics in quantum gravity, and field theory. Recommended preparation: PHYS 679.

**PHYS 740 Selected Topics in Condensed Matter Physics (3, max 6)** Course content will vary yearly with current interest. Topics covered may include theory of superconductivity, high temperature superconductivity, Green’s functions in condensed matter physics, magnetism and transport in disordered metals.

**PHYS 7500 Off Campus Studies (3, max 9)** Course work taken on campus at Caltech as part of the Caltech-USC cross-registration program. Graded CR/NC.

**PHYS 790 Research (1-15)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**Political Science**

**Von KleinSmid Center 327**

**FAX:** (213) 740-2893

**Email:** posc@dornsife.usc.edu
dornsife.usc.edu/politicalscience

**Chair:** Dennis Chong, Ph.D.

**Faculty**

Carmen H. and Louis Warschaw Chair in Practical Politics and Professor of the Practice of Political Science: Robert M. Shrum, Ph.D.

Professors: Dennis Chong, Ph.D.; Terry Cooper, Ph.D. (Public Policy); Ann Crigler, Ph.D.**; Richard H. Dekmejian, Ph.D.; Mary Dzubia, Ph.D. (Law); Susan Estrich, J.D. (Law); Philip Ethington, Ph.D. (History); James Ferris, Ph.D. (Public Policy); Elizabeth Garrett, J.D. (Law); Elizabeth Graddy, Ph.D. (Public Policy); Thomas Hollihan, Ph.D. (Communication); Jane Junn, Ph.D.; Sharon Lloyd, Ph.D. (Philosophy); Nancy Lukhehas, Ph.D. (Anthropology); John Matsusaka, Ph.D. (Finance and Business Economics); Dan Mazmanian, Ph.D. (Public Policy); Edward McCaffrey, J.D. (Law); Glenn Melnick, Ph.D. (Public Policy); Robert Rasmussen, J.D. (Law); Alison D. Renteln, Ph.D.**; Stanley Rosen, Ph.D.**; Eliz Sanasarian, Ph.D.**; Edwin Smith, J.D. (Law); Shui Yan Tang, Ph.D. (Public Policy); Ernest J. Wilson III, Ph.D. (Communication); Priscilla Wohlghetter, Ph.D. (Education)

Associate Professors: John E. Barnes, Ph.D.**; Christian Grose, Ph.D.; Ange-Marie Hancock, Ph.D.; Juliet Musso, Ph.D. (Public Policy); Michael H. Saito, Ph.D. (Sociology); Jefferey M. Sellers, Ph.D.

Assistant Professors: Morris Levy, Ph.D.; Nicholas Wellar, Ph.D.

**Professor of the Practice:** Bill Lockyer, J.D.

**Assistant Professors (Teaching):** Arthur Auerbach, Ph.D.; Anthony Kammas, Ph.D.; Andrew Manning, Ph.D. (International Relations)

**Assistant Professor of the Practice:** Daniel Schnur, B.A.

**Adjunct Assistant Professors:** William Fahey, J.D.; Kerman Maddox, M.P.A.; George Newhouse Jr., J.D.; Olu K. Orange, J.D.; William Simon Jr., J.D.; Darry Sragow, J.D.

**Professor Emeritus of Political Science and History and Associates Chair Emeritus in Social Science:** Mark Kann, Ph.D.

**Emeritus Professors:** Carl Q. Christol, Ph.D.; LL.B., LL.D. (Hon.)*; Nora Hamilton, Ph.D.; Michael B. Preston, Ph.D.*; John R. Schmidhauser, Ph.D.

**Emeritus Associate Professor:** Joseph L. Nymarkay, Ph.D.*

*Recipient of university-wide or college teaching award.

The Department of Political Science divides political science into four broad fields: American politics, political thought, comparative politics, and law and public policy. The department offers regional specialization in six areas: Latin America, East Asia, Western Europe, Russia and Eastern Europe, the Middle East, and Africa. The Jesse M. Unruh Institute of Politics provides local internships for students as part of their course work or as independent study.

**Degree Programs**

The Department of Political Science offers: the B.A.; minors in political science; law and society; race, ethnicity and politics; human rights; and political organizing in the digital age. The department also offers M.A. and Ph.D. degrees under the jurisdiction of the Graduate School, as well as a dual Ph.D. in Political Science and International Relations/Juris Doctor with the USC Gould School of Law.

**Undergraduate Degrees**

**Advisement**

The department has faculty and staff advisers who provide academic advisement, career counseling and advisement to pre-law students and those wishing to go on to graduate study. All majors are encouraged to see their adviser.

**Major Requirements for the Bachelor of Arts in Political Science**

Department majors are required to take nine courses (36 units) in political science. At least two of the nine courses must be selected from the four 100-level core courses: POSC 100 Theory and Practice of American Democracy, POSC 110 Ideology and Political Conflict, POSC 120 Comparative Politics, POSC 130 Law, Politics and Public Policy. In addition, at least six of the nine courses must be at the 300-level or above, including at least one course in each of the following four fields: American politics, political thought, comparative politics, and law and public policy. No more than one course (or four units) of POSC 395 or POSC 490x may be counted toward the 36 unit departmental requirements.

Students who have a double major in political science and in another department in the social sciences, may, with prior permission of the department undergraduate adviser, substitute one upper-division course from the second major for one upper-division political science course. In the development of an undergraduate program, students should consult periodically with the political science undergraduate adviser and/or with departmental faculty.

**Area Specialization**

While majoring in political science and fulfilling the department requirements, a student may elect to emphasize a particular regional area in the fields of comparative government, diplomatic and international politics. Regional specializations are offered in six areas: East Asia, Western Europe, Latin America, Middle East, Africa, Russia and Eastern Europe. With the approval of the faculty, a student may organize an academic program in such a way as to fulfill the general education language requirements with the language or languages of the regional area specialization. In addition, it is assumed the student will fulfill other social sciences and humanities requirements with the language or languages of the regional area of specialization. Such a pattern of courses at the undergraduate level will strengthen a student’s qualifications for graduate-level area programs, as well as for various forms of foreign service.

**Bachelor of Arts, Philosophy, Politics and Law**

This interdisciplinary program consists of nine courses chosen from PHIL, POSC, LAW and ANTH. See Philosophy.

**Political Science Minor**

Students who minor in political science must take five courses, 20 units, in political science. Students can either pursue course work in a traditional subfield (American politics, comparative politics, law and public policy, or political thought) or in a specific issue area of concentration (civil liberties and human rights, race, ethnicity, and gender, urban political problems, Asian politics, etc.).

Those who focus their studies on a traditional subfield must take the lower-level introductory course in that subfield: POSC 100 Theory and Practice of American Democracy (American politics); POSC 110 Ideology and Political Conflict (political theory); POSC 120 Comparative Politics (comparative politics) or POSC 130 Law, Politics and Public Policy (law and public policy).

Students pursuing the minor also must take four upper-division courses, three of which must be in the chosen subfield. Students choose from a predetermined list of courses divided by subfield in consultation with and approval of the department’s undergraduate adviser.

Those who pursue a specific issue area of concentration are required to take the department’s designated gateway course, POSC 120 Comparative Politics, and at least three upper-division courses in the issue area of concentration. A fourth upper-division course must be taken in the issue area of concentration or a complementary area. The upper-division courses are chosen in consultation with and approval of the department’s undergraduate student adviser.

**Human Rights Minor**

The protection of human rights has become a matter of international concern. Despite widespread media coverage of violations, flagrant abuses occur daily throughout the world. The human rights minor provides students with in-depth knowledge about various human rights issues.

Drawing together classes from a range of departments in and outside the USC Dornsife College of Letters, Arts and Sciences, this interdisciplinary minor will cover the theoretical foundations of human rights, historical and current developments, case studies and policies. Students
At least four classes must be unique to the minor. Political science majors must take upper-division courses only from categories 1, 6 and 7. Non-political science majors must take at least one upper-division course from 5, 6 or 7.

Race, Ethnicity and Politics Minor

The interdisciplinary minor in race, ethnicity and politics helps students analyze and critically evaluate contemporary race relations and how race matters in politics today.

Requirements: Five Courses (20 Units)*

All students are required to take POSC 421 Ethnic Politics. In addition, students must also take one course from each category: Race and Gender in a Global Context, Comparative Racial Politics, Social/Historical (Racial Perspective) and Racial Formation. The following is a list of courses that fulfill each category.

* Political science majors are required to take seven courses (28 units).

Political science majors must take four courses (at least three must be upper-division) from the Social/Historical and the Racial Formation categories. At least four classes must be unique to the minor and not taken for additional major, minor or general education credit.

Political Organizing in the Digital Age Minor

The digital environment is changing the face of political organization, both in domestic American electoral politics and in the methods used by transnational social movements to call attention to problems around the globe. Howard Dean’s use of the Internet to fund his 2004 presidential campaign has made other candidates aware of the political power of the Web in fundraising and grassroots orchestration of local (and “global”) events.

This minor should be of interest to students majoring in international relations, political science or other programs who plan to use technology to affect contemporary national and international affairs. As with all minors, students must choose four courses dedicated exclusively to this minor and four courses outside their major departments. These may, but need not be, the same four courses.

This minor is intended to help students engage in domestic and international political organizing by creating Websites, podcasting and using other new technologies. It should help students secure internships and jobs with political and international organizations, and generally improve their abilities to change the world.

Course Requirements Units

Choose one class from each of the following five lists:

1. Domestic Political Organizing:
   - POSC 301 Regulation of Elections and Political Finance
   - POSC 302 Political Parties, Campaigns, and Elections
   - POSC 303 Political Attitudes and Behavior
   - POSC 304 Political Participation and American Diversity
   - POSC 432 Mass Media and Politics

2. International Relations:
   - POSC 301 Regulation of Elections and Political Finance
   - POSC 302 Political Parties, Campaigns, and Elections
   - POSC 303 Political Attitudes and Behavior
   - POSC 304 Political Participation and American Diversity
   - POSC 432 Mass Media and Politics

3. Political Economy:
   - POSC 301 Regulation of Elections and Political Finance
   - POSC 302 Political Parties, Campaigns, and Elections
   - POSC 303 Political Attitudes and Behavior
   - POSC 304 Political Participation and American Diversity
   - POSC 432 Mass Media and Politics

4. Policy Analysis:
   - POSC 301 Regulation of Elections and Political Finance
   - POSC 302 Political Parties, Campaigns, and Elections
   - POSC 303 Political Attitudes and Behavior
   - POSC 304 Political Participation and American Diversity
   - POSC 432 Mass Media and Politics

5. Political Science:
   - POSC 301 Regulation of Elections and Political Finance
   - POSC 302 Political Parties, Campaigns, and Elections
   - POSC 303 Political Attitudes and Behavior
   - POSC 304 Political Participation and American Diversity
   - POSC 432 Mass Media and Politics

Political Science Honor Societies

The second honor society is Blackstonians. This is a pre-law honor society for undergraduate students designed to recognize academic excellence, assist the student in his or her preparation for law school, and expand the knowledge of the legal profession. Membership is restricted to students who have completed at least 32 units (90% of which must be from USC), but not more than 118 units, and have maintained at least a 3.5 grade point average.

Mock Trial Team

The department hosts the USC Mock Trial Team. This trial advocacy training program is designed to develop students’ knowledge of substantive areas of civil law, criminal law and evidence. Additionally, public speaking skills are honed and societal mores are explored. Legal concepts, sociocultural theory and presentation skills are then applied through participation in courtroom advocacy competitions nationwide and local public interest advocacy assignments. Academic credit is earned through POSC 398. Membership on the team is required to enroll.

Graduate Degrees

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School.

All graduate students are required to maintain regular contact with the graduate coordinator to assure compliance with departmental regulations.

Master of Arts in Political Science and International Relations

Only students who have a degree objective of obtaining the Ph.D. will be admitted into the Political Science and International Relations program. However, interested students can obtain a M.A. degree while pursuing the Ph.D. The degree is awarded upon successful completion of (a) 28 units, including three of the five courses in the program’s core theory and methodology sequence, a master’s thesis and registration in POSC 594ab or IR 594ab; and (b) the approval of the master’s thesis by the thesis committee.

Juris Doctor/Doctor of Philosophy in Political Science and International Relations

Application deadline (for Ph.D.): December 1

The Political Science and International Relations program and the USC Gould School of Law jointly offer a dual degree program leading to the J.D./Ph.D. degree. Applicants must apply to the Political Science and International Relations program and the law school and meet the requirements for admission to both. In addition to the LSAT, students interested in this program are required to take the Graduate Record Examinations (GRE).

In the first year students take their course work in the law school exclusively. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law honors programs. The second and third years include a total of 40 units of courses in political science and international relations and 40 units of law. Students must complete a five-course core theory and methodology sequence. They must include a classics-oriented, two-semester political, social, comparative and international theory sequence (currently POSC 530 and IR 500), a multivariate statistics course (such as IR 514 or POSC 600) and a philosophies/methodologies in social inquiry course (IR 513 or POSC 500). Finally in their second, third or fourth year, they must take an approved advanced research methods course.

To obtain a Ph.D. in Political Science and International Relations, students must pass the screening process. After the completion of required field course work with a grade of B or better, a substantive paper or USC M.A. thesis relevant to the program, students must take a Ph.D. qualifying examination in two of their three fields of concentration. The third field will be completed by taking at least three courses and passing each with a grade of B or better. The final requirement, following successful completion of the qualifying examination, is a doctoral dissertation.

Courses of Instruction

Political Science (POSC)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

POSC 110 Ideology and Political Conflict (4) Modern political ideologies; their assumptions, perceptions, and prescriptions regarding political stability and social injustice: anarchism, communism, socialism, liberalism, conservatism, and fascism.

POSC 120 Comparative Politics (4) Gateway to the major in political science. Comparative analysis of political institutions and processes in selected industrial, developing and socialist countries, in terms of contrasting ideologies, parties, elites, and economies.

POSC 130 Law, Politics and Public Policy (4) Interaction between law and politics; overview of the American legal system; value conflicts and public policy questions which arise within it.

POSC 165 Modern Times (4) Explores the current major social and political issues that confront scholars, leaders, and citizens in today’s modern world.

POSC 190ab Politics and Society (4-4) a: Honors seminar for freshmen and sophomores. b: Continuation of work begun in first semester. Open only to freshman and sophomores Political Science majors only.

POSC 201x Law and Politics: Electing a President (4) (Enroll in LAW 201x)

POSC 210gm Social Issues in Gender (4) (Enroll in SWMS 210gm)

POSC 220g Critical Issues in American Politics (4) Examination of enduring political issues, as well as the political processes and institutions.

POSC 248g International Human Rights (4, FaSpSm)

Overview of human rights controversies across the globe. Introduction to techniques of analysis for social issues, interdisciplinary research methods, and interpretation of complex political problems.
Introduction to interest group and elite views of the American system, including recent interest group theory and findings and the general critiques of power distribution in American society.

POSC 325 Political Parties, Campaigns, and Elections (4) Organization and function of political parties, nominations and elections, strategy and tactics of campaigning, professional candidate management finance, political machines, voting behavior.

POSC 340 Constitutional Law (4) Development of constitutional law by the courts; leading cases bearing on major constitutional issues; the federal system; powers of government; civil liberties.

POSC 345 International Law (4) Nature, origin, and development of international law; basic principles analyzed and illustrated with cases.

POSC 347 Environmental Law (4) Introduces students to central concepts and theories in environmental law and regulation; analyzes present environmental laws and regulations.

POSC 349 Women and the Law (4, Fa) (Enroll in SWMS 349)

POSC 350 Politics of Latin America (4) Theories of development and nation-building; revolutionary and evolutionary modernization; role of history, culture, socioeconomic conditions in affecting political structures and functions.

POSC 351 Middle East Politics (4) Political development in the Middle East, emphasizing historical, cultural, and socioeconomic conditions affecting political structures and functions; modernization and countervailing social, economic, and religious forces.

POSC 352 Politics of Southeast Asia (4) Theories of development and nation-building; revolutionary and evolutionary modernization; role of history, culture, socioeconomic conditions in affecting political structures and functions.

POSC 355 Politics of East Asia (4) Institutions and processes of advanced societies; political culture, interest articulation and aggregation, the governmental process.

POSC 356 Politics in the People’s Republic of China (4) The Chinese revolution; social, political, and economic developments in post-1949 China; China after Mao Zedong (Mao Tse-tung).

POSC 358 Politics of Sub-Saharan Africa (4) Theories of development and nation-building; revolutionary and evolutionary modernization; role of history, culture, socioeconomic conditions in affecting political structures and functions.

POSC 360 Comparative Political Institutions (4, FaSpSm) Institutions and processes of advanced industrial societies; political culture, interest articulation and aggregation, the governmental process.

POSC 363 Cities and Regions in World Politics (4) Cities and the rise of states; globalization and localization; federalism and decentralization; comparative politics of urban regions in developed and developing countries. Recommended preparation: comparative or urban politics.

POSC 365 World Political Leadership (4) Comparative analysis of theories of power and leadership; application to leaders from western democracies, Third World, and socialist countries. Societal consequences of their policies.

POSC 366 Terrorism and Genocide (4) Comparative analysis of the determinants of political violence, terrorism, and genocide and their social and moral consequences; application of theories to contemporary case studies.

POSC 370 European Political Thought I (4) Basic concepts of Western political thought from Plato through the contract theorists.

POSC 371 European Political Thought II (4) Western political thought since the French Revolution. Rise of Marxist socialism, communism, anarchism, fascism, National Socialism, other doctrines; the democratic tradition; new theories of the state.

POSC 374 The American Founders: Visions, Values and Legacy (4) Analysis of the political thought of the American Founders; consideration of alternative visions of patriarchalism, republicanism, and liberal democracy; exploration of Founders’ core values and their impact on issues of race, class, and gender.

POSC 375 American Political Thought (4) Historical and topical review of American political philosophy from the Puritans to the present. Special emphasis on such recurrent themes as equality, democracy, and racism.

POSC 377 Asian Political Thought (4) Major systems of political thought in Chinese, Japanese, and other Asian cultural traditions. Confucianism, Buddhism, Islam, and other classical systems and their present-day adaptations under the impact of communism and democracy.

POSC 380 Political Theories and Social Reform (2 or 4) Political theories and philosophies in modern times and their relation to public policy and social reform.

POSC 381 Sex, Power, and Politics (4) An evaluation of the ways in which different ideologies, institutions, and policies contribute to differences in political power between men and women.

POSC 385 Population, Society, and Aging (4) (Enroll in SOCI 385)

POSC 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

POSC 391 Honors I: Undergraduate Seminar (4, Fa) Selected topics in designated area of political science. Discussion of readings and presentation of papers.

POSC 392 Honors II: Undergraduate Thesis (4, Sp) Thesis written under supervision, based on research begun in Honors I.

POSC 395 Directed Governmental and Political Leadership Internship (1-8, max 8) Intensive experience in governmental and political offices. Minimum time requirement; evaluation by office and intern report required. Permission of the Director of the Institute of Politics and Government required.

POSC 398L Trial Advocacy: Theory and Practice (1, 2, 4, max 8, FaSp) Course covering substantive law, evidence, public speaking and use of societal mores in courtroom advocacy. Open only to Mock Trial team members.

POSC 420 Practicum in the American Political Process (4, max 12, FaSpSm) Fieldwork in governmental institutions and processes.

POSC 421 Ethnic Politics (4) Analysis of the political behavior and roles of ethnic and racial groups in the American political system; public policy issues and patterns of political action are examined.
POSC 422 Political Attitudes and Behavior (4) The citizen’s political world; political socialization, opinion formation and dissemination; development of political cultures and subcultures; political mobilization; personality and politics.

POSC 423 Presidents and the Presidency (4) Presidential coalition; sources of presidential power; recent leadership styles; decision-making within the presidency.

POSC 424m Political Participation and American Diversity (4, Fa) Examines how diverse groups in the U.S. interact with the American political system.

POSC 425 Legislative Process (4) Individual behavior and decision-making within legislatures; changing executive-legislative functions; legislative functions; relationships to political systems in comparative perspective.

POSC 426 The United States Supreme Court (4) Role of the court in American politics: overview of major decisions; the politics of appointment; the process of decision-making; impact of judicial decisions. Recommended preparation: POSC 340.

POSC 427 Black Politics in the American Political System (4) The effects of the organization of the American political system and its operations on blacks and other minorities.

POSC 428 Latino Politics (4, Fa) Analysis of the historic and contemporary roles of Latinos in the American political system; patterns of political participation and representation are examined.

POSC 430 Political Economy of Mexico (4) Examination of contemporary Mexico: the role of the state in the Mexican economy; development of the government party and opposition groups.

POSC 431 Political Economy of Central America (4) Focus on economic, social, and political structures and processes in the region and in specific countries, especially Guatemala, El Salvador, and Nicaragua.

POSC 432 Politics of Local Criminal Justice (4) Roles and behavior of major legal and political participants in the criminal justice system including the police, the legal profession, judges, and the public.

POSC 435 Politics and the Economy (4) Major techniques, politics, and values involved in the allocation of social and economic resources. Includes such topics as determination of priorities in budgetary processes, economic regulation, control of environmental change, and policies for science.

POSC 436 Environmental Politics (4) The political realities of selected environmental issues; resolving and implementing social priorities; interests, attitudes, strategies, and tactics of pressure groups; institutional biases and opportunities.

POSC 437 Mass Media and Politics (4) Analysis of political content of mass media. Audience response to alternative sources of political information. Consideration of the institutional and economic as well as political aspects of the mass media.

POSC 439 Critical Issues in American Politics (4, max 12, FaSpSm) Intensive examination of critical issues of particular interest in the field of American politics.

POSC 441m Cultural Diversity and the Law (4) Jurisprudential approach to the study of cultural differences. Consideration of circumstances under which law should accommodate cultural diversity in the United States and abroad.

POSC 442m The Politics of Human Differences: Diversity and Discrimination (4) A comparative perspective on social and cultural forces that affect American laws and policies concerning discrimination on the basis of race, gender, sexual orientation, age, and disability.

POSC 443 Law in Film (4) Analysis of the depiction of law in film; use of film to explore topics in jurisprudence and the politics of law and courts. Recommended preparation: POSC 130.

POSC 444 Civil and Political Rights and Liberties (4) An examination of debates and controversies surrounding the nature and scope of civil rights and civil liberties. Recommended preparation: POSC 340 or POSC 440.

POSC 448ab The Politics of Peace (4-4) Issues of social justice, large-scale social change, high technology, impacts on human survival, and uses of national and international institutions. a: Human rights. b: Arms limitation, control, and disarmament.

POSC 449 Political Psychology (4) Psychological forces shaping politics and persons, processes and interactions; emphasis on political socialization and cognitive and affective orientations to politics.

POSC 450 Political Development (4) Choice of models in nation-building; party and other means of mass mobilization; elite recruitment and differentiation; peculiarities of cultures and subcultures; integration of ethnic and other minorities; political socialization and secularization; legitimization.

POSC 451 Politics of Resources and Development (4) Comparison of relationships between rich and poor countries involving political and economic resources and prospects for development; impact on industrialized states; interdependence; new international economic order.

POSC 452 Critical Issues in Law and Public Policy (4, max 12, FaSpSm) Intensive examination of special topics in the field of law and public policy.

POSC 453 Political Change in Asia (4) Modernization and political development in China and Japan; Asia’s economic “miracles” (Taiwan, Japan, Korea, etc.); nationalism and communist movements in East and Southeast Asia.

POSC 456 Women in International Development (4) How various developmental theories analyze the role of women as producers and how Third World women are increasing their role in development.

POSC 463 European Politics (4) Institutions, cultures and politics of Western Europe, Eastern Europe, and Russia; internationalization; historical and contemporary political, economic, and social change.

POSC 464 Politics of Russia and Eastern Europe (4) Culture, society, and politics in Russia and in Eastern Europe. Contemporary political institutions and processes.

POSC 465 Critical Issues in Comparative Politics (4, max 12, FaSpSm) Intensive examination of critical issues of particular interest in the field of comparative politics.

POSC 475 The Future of California (4) (Enroll in MDA 475)

POSC 476 Contemporary Political Thought (4) 20th century political philosophy dealing with major movements in psychological, existential, socialist, and nationalistic thought as they bear upon the crisis of political authority in our time.

POSC 479 Critical Issues in Public Thought (4, max 12, FaSpSm) Intensive examination of critical issues of particular interest in the field of public thought.

POSC 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

POSC 499 Special Topics (2-4, max 8)

POSC 500 Methods of Political Science (4) Empirical political research: social science logic; theory construction; measurement; research design; sampling; data generation; secondary analysis; report and proposal writing; research ethics.

POSC 512 Linkage Politics (4) Empirical and theoretical investigations of the points at which subnational, national, and international politics converge, overlap, or are otherwise interdependent.

POSC 519 Field Research Methods in Comparative Politics and International Studies (4) (Enroll in IR 519)

POSC 525 Cities, Regions and Global Society (4) Comparative and historical examination of cities and regions as political settings, as elements of states and international relations, and as sites of transnational economic and social change.

POSC 535 Seminar in North African and Middle Eastern Politics (4) Comparative and area study approaches, nation-building; political cultures; mobilization of human and natural resources; political recruitment, integration, socialization, and conflict.

POSC 539 Political Economy and Public Policy (4) (Enroll in FEP 539)

POSC 540 Law and Public Policy (4) National and comparative approaches to law and politics in organized societies; law as a policy science; administration of justice; political forces influencing legal change.

POSC 545 Critical Issues in Politics and Policy (4, Fa) Selected topics in politics and policy; focus on current issues shaping the U.S. and the world.

POSC 546 Seminar in Environmental Policy (4) Issues and theories involved in the formulation, implementation, and effectiveness of different environmental policies.

POSC 547 Women in Global Perspective (4) (Enroll in SWMS 547)

POSC 556 Seminar in Disability and Rehabilitation Policy (4) Examination of physical disability as a policy issue from a cross-national and multidisciplinary perspective; attitudes toward disability; income maintenance, health care, and related programs.

POSC 560 Feminist Theory (4) (Enroll in SWMS 560)

POSC 590 Directed Research (1-12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

POSC 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

POSC 594ab Master’s Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

POSC 599 Special Topics (2, 4, 8, max 8, FaSpSm) Subjects in one or more fields in Political Science.
POSC 600 Seminar in Advanced Research Methods (4) Multivariate analysis of data; computer applications, and research report preparation; multiple regression; analysis of variance; factor analysis and related techniques; time series analysis. Prerequisite: POSC 540.

POSC 610 Seminar in Political Parties (4) Parties and the political system; formal and informal organization and roles; comparative party systems.

POSC 611 Seminar in the Executive and Legislative Processes (4) Selected research topics; comparative analyses.

POSC 612 Seminar in Urban Politics (4) Problems of government and politics in urban, county, and metropolitan areas. Comparative community politics.

POSC 618 Seminar in Problems of American Politics (4) Theoretical and methodological problems in American politics with emphasis on emerging research paradigms.

POSC 619 Seminar in Supreme Court Politics (4) Role of the Supreme Court in the American political system. Influences on judicial decision making; appointment and decision making processes; scope of judicial power. Recommended preparation: POSC 540.

POSC 621 Seminar in Public Law (4) Problems and research in American constitutional and administrative law and in modern jurisprudence.

POSC 622 Seminar in Political Attitudes and Behavior (4) Determinants, nature, and consequences of political attitudes and behavior exploring psychological-sociological models, political socialization and learning, and factors affecting trends in attitudes and behavior.

POSC 623 Seminar in American Constitutional Development (4) Evolution of American constitutional law; the influence of social, economic, and political changes on constitutional interpretation. Prerequisite: POSC 510 or POSC 540.

POSC 624 Seminar in American Constitutional Law and Theory (4) Contemporary debates and research on the nature of constitutional interpretation, separation of powers, federalism, civil and political rights and liberties.

POSC 630 Seminar in European Politics (4) Selected research topics in comparative European politics; political culture, socialization, parties, legislative and executive processes.

POSC 631 Seminar in Latin-American Politics (4) Comparative analysis of the political structure and institutions of Latin America; participation and alienation; democracies and dictatorships; political forces.

POSC 632 Seminar in East Asian Politics (4) Comparative analysis of revolutionary and evolutionary modernization; the roots of political thought and behavior; peripheral area relationships; present-day political processes.

POSC 634 Seminar in Southeast Asian Politics (4) Comparative analysis of political forces, ideologies, processes, and institutions.

POSC 636 Seminar in African Politics (4) Comparative analysis of political forces, ideologies, and institutions in African nations south of the Sahara.

POSC 637 Seminar in Chinese Politics (4) Guided research and discussion on the governmental process in the People’s Republic of China including leadership, ideology, and popular participation.

POSC 640 Seminar in Problems of Comparative Politics (4) Theoretical and methodological problems in comparative politics; approaches to comparative analysis; problems and trends.

POSC 641 Seminar in Comparative Judicial Policies, Processes, and Behavior (4) Cross-national and intranational comparative analysis of judicial policies and processes; legal and judicial elites.

POSC 648 International Human Rights Law and Policy (4) Historical and contemporary consideration of human rights issues in world politics. Examination of the philosophical foundations of human rights and the institutions that enforce international standards.

POSC 650 Seminar in Western Political Philosophy (4) Research and special problems.

POSC 651 Seminar in Non-Western Political Philosophy (4) Research and special problems.

POSC 652 Seminar in American Political Philosophy (4) Research and special problems.

POSC 660 Seminar in Problems of Contemporary Political Thought (4) Research and special problems.

POSC 670 Seminar in International Law (4) Topics and cases illustrating general principles and problems. Special research.

POSC 695 Social Science Theory (4) Philosophic foundations of social science, empirical theories current in social science; the relationship between empirical theory and social research.

POSC 790 Research (1-2) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Political Science and International Relations

POSC 611 Seminar in the Executive and Legislative Processes (4) Theoretical and methodological problems in American politics with emphasis on emerging research paradigms.

POSC 612 Seminar in Urban Politics (4) Problems of government and politics in urban, county, and metropolitan areas. Comparative community politics.

POSC 618 Seminar in Problems of American Politics (4) Theoretical and methodological problems in American politics with emphasis on emerging research paradigms.

POSC 619 Seminar in Supreme Court Politics (4) Role of the Supreme Court in the American political system. Influences on judicial decision making; appointment and decision making processes; scope of judicial power. Recommended preparation: POSC 540.

POSC 621 Seminar in Public Law (4) Problems and research in American constitutional and administrative law and in modern jurisprudence.

POSC 622 Seminar in Political Attitudes and Behavior (4) Determinants, nature, and consequences of political attitudes and behavior exploring psychological-sociological models, political socialization and learning, and factors affecting trends in attitudes and behavior.

POSC 623 Seminar in American Constitutional Development (4) Evolution of American constitutional law; the influence of social, economic, and political changes on constitutional interpretation. Prerequisite: POSC 510 or POSC 540.

POSC 624 Seminar in American Constitutional Law and Theory (4) Contemporary debates and research on the nature of constitutional interpretation, separation of powers, federalism, civil and political rights and liberties.

POSC 630 Seminar in European Politics (4) Selected research topics in comparative European politics; political culture, socialization, parties, legislative and executive processes.

POSC 631 Seminar in Latin-American Politics (4) Comparative analysis of the political structure and institutions of Latin America; participation and alienation; democracies and dictatorships; political forces.

POSC 632 Seminar in East Asian Politics (4) Comparative analysis of revolutionary and evolutionary modernization; the roots of political thought and behavior; peripheral area relationships; present-day political processes.

POSC 634 Seminar in Southeast Asian Politics (4) Comparative analysis of political forces, ideologies, processes, and institutions.

POSC 636 Seminar in African Politics (4) Comparative analysis of political forces, ideologies, and institutions in African nations south of the Sahara.

POSC 637 Seminar in Chinese Politics (4) Guided research and discussion on the governmental process in the People’s Republic of China including leadership, ideology, and popular participation.

POSC 640 Seminar in Problems of Comparative Politics (4) Theoretical and methodological problems in comparative politics; approaches to comparative analysis; problems and trends.
The student is required to demonstrate intermediate proficiency in a language other than English if the student’s primary field requires it. Students should consult the guidelines and the program director.

**Substantive Paper**

To show evidence of the capacity to conduct original research and before taking the qualifying exam, each student will submit a substantive paper. The student will submit the draft of his or her substantive paper to the chair of the qualifying exam committee one month prior to the qualifying examinations. After consultation with the chair and necessary revisions, the student is to distribute the paper to all members of the qualifying exam committee at least 14 days prior to the oral defense. The substantive paper should be presented and defended in the oral component of the qualifying examination as a viable journal submission to a peer-reviewed professional journal. It is strongly encouraged that the paper should be submitted to a professional journal approved by the student’s adviser within one year of the defense.

**Qualifying Examinations**

Ordinarily, students will take the qualifying exams no later than the fifth semester in the Ph.D. program. Students will be examined in two of their three fields of concentration. The third field will be completed by taking at least four courses and passing them with an average grade consistent with university and program requirements. The qualifying exam committee will evaluate the quality of these two written exams as evidence of the capacity to define complete a Ph.D. dissertation.

The written examinations are closed book and will be administered over two days at least once per academic year. Examination questions will be written by a committee of the tenure track faculty in each field. The director of the program studies (program director), in consultation with the chair of the Department of Political Science and the director of the School of International Relations, will appoint one faculty member from each field to coordinate the writing of the relevant field exam. The field exam coordinators will then seek assistance from other faculty in their field, including those with whom the student has studied, to compose the written examination questions.

The oral portion of the student’s qualifying examination will be administered by his or her qualifying exam committee. The oral examination will be based on the student’s two written field exams and the substantive paper. The qualifying exam committee will be made up of five members. In consultation with his or her principal adviser, the student will select two members, one from each standing field in which he or she will be examined, and the other two field examiners and the outside member of the qualifying exam committee. Final approval of the qualifying exam committee requires the signature of the program director.

Students will pass the qualifying examinations if no more than one member of the qualifying exam committee dissents after reviewing the student’s record at USC and performance on the written and oral parts of the qualifying exams. At the discretion of the qualifying exam committee, students who do not pass the exams may be allowed to retake the qualifying exams the next time they are offered. Students are admitted to candidacy for the Ph.D. when they have completed the university residency requirement, passed the written and oral portions of the Ph.D. qualifying examinations, and defended their dissertation proposal.

**Dissertation**

Upon completion of the qualifying examinations, the student, in consultation with the principal adviser, selects a dissertation committee in accordance with university rules. Within six months of completing the qualifying examinations, students should have a formal defense of the dissertation proposal before their dissertation committee. The Ph.D. is earned upon the submission of the written dissertation and its successful defense before the dissertation committee.

Consult the Requirements for Graduation section and the Graduate School section of this catalogue regarding time limitations for completion of the degree and other Graduate School requirements.

All graduate students considering an academic career should generally have research, teaching and advisement experiences as part of their program of study.

**Courses of Instruction**

**Political Science and International Relations (POIR)**

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

- **POIR 590 Directed Research (1–12)** Research leading to the master’s degree in units which may be applied to the degree to be determined by the department. Graded CR/NC.
- **POIR 593 Practicum in Teaching Politics and International Relations (2, FaSpSm)** Practical principles for the long-term development of effective teaching within political science and international relations disciplines. Intended for teaching assistants in Dornsife College. Graded CR/NC. Open only to doctoral students.
- **POIR 599 Special Topics (2–6, max 8)** Subjects in one or more fields in political science.
- **POIR 600 Political Theory (4)** Survey of literature: examination of approaches, concepts, and issues in the field of political theory. Open only to doctoral students. (Duplicates credit in former POSC 530.)
- **POIR 610 Research Design (4)** The course will cover the design of experimental and observational research. We will examine both quantitative and qualitative approaches to social science research. Open only to doctoral students.
- **POIR 611 Introduction to Regression Analysis (4)** The course will introduce students to regression analysis and its application to social science research. Open only to doctoral students.
- **POIR 612 Topics in Quantitative Analysis (4)** Introduces statistical models beyond the standard linear regression model. Topics include maximum likelihood estimation, generalized linear models, and advanced methods. Open only to doctoral students.
- **POIR 614 Experimental Political Science (4, FaSpSm)** Introduction to experimental techniques and applications of experiments in political science. Addresses both the advantages and disadvantages of experiments in political science research. Open only to doctoral students.
- **POIR 620 American Politics and Policy Processes (4)** Survey of literature: examination of approaches, concepts, and issues in the field of American politics and policy processes. Open only to doctoral students. (Duplicates credit in former POSC 510.)
- **POIR 621 American Politics Field Seminar Part II (4, FaSp)** A theoretical and empirical overview of the American politics field. Theoretical topics include behavioralism, rational choice, political psychology, empirical topics include causality. Open only to doctoral students.
- **POIR 640 Comparative Politics (4)** Survey of literature: examination of approaches, concepts, and issues in the field of comparative politics. Open only to doctoral students. (Duplicates credit in former POSC 520.)
- **POIR 650 Comparative Politics of East and Southeast Asia (4, FaSp)** Comparison of significant political phenomena between the countries in the East and Southeast Asia region and the long-term consequences of such comparisons. Open only to doctoral students.
- **POIR 660 Introduction to International Relations Theory (4)** The primary objective of this course is to introduce Ph.D. students to theoretical and empirical issues related to the study of international relations. Open only to doctoral students.
- **POIR 661 International Relations Theory: Advanced (4)** Examines the specialized nomenclature of international relations and the varied interpretations of basic concepts of international theory; conceptual analysis and criticism. Open only to doctoral students. (Duplicates credit in former IR 501.)
- **POIR 662 Norms in International Relations (4)** Norms structure international relations in political, security, and economic domains. This seminar assesses major theoretical perspectives and empirical research on international norms. Open only to doctoral students.
- **POIR 670 International Political Economy (4)** Survey of approaches to international political economy. Intellectual roots; the management of collective goods; North-South relations are examined. Open only to doctoral students.
- **POIR 680 International Security and Foreign Policy (4)** Examination of the interconnected fields of international security and foreign policy, including decision making and patterns of interaction regarding international conflict. Open only to doctoral students.
- **POIR 790 Research (1–12)** Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.
- **POIR 794abcdz Doctoral Dissertation (2–2–2–2–0)** Credit on acceptance of dissertation. Graded CR/NC.

**Jesse M. Unruh Institute of Politics**

Von KleinSmid Center 263
(213) 740-8964
FAX: (213) 740-3167
Email: unruhins@usc.edu
dornsife.usc.edu/unruh

Director: Dan Schnur, B.A.
Chief of Staff: Kerstyn Olson, M.A.

The Jesse M. Unruh Institute of Politics sponsors events designed to introduce students to the world of practical politics. Each semester, the institute facilitates internships with government, political and advocacy offices in the Los Angeles metropolitan area and beyond. The institute also sponsors numerous discussion series that bring prominent political and governmental leaders to USC to speak to small groups of students in an informal setting. In the spring, the institute organizes the Cerrell Seminar in Political Leadership – a trip to Sacramento at which USC students meet with legislators, lobbyists and
members of the media to discuss important issues in state politics.

Political Student Assembly

The Unrgh Institute of Politics works closely with the Political Student Assembly (PSA). PSA was formed in January 2006 as a division of the Student Affairs Program Board and seeks to actively involve students in campus, state and national political issues.

Directed Government and Political Leadership Internship

Students volunteer to work in one of over 500 political and governmental offices throughout the Los Angeles area, in Sacramento and in Washington, D.C., enabling them to gain firsthand political experience. As interns, students acquire basic political understanding and skills in government, campaign, media or advocacy organizations. Through their assignments, students have the opportunity to develop an understanding of the many ways in which people are important to politics and politics to people.

By gaining hands-on experience in government and politics, student interns develop real-world political and job skills, assisting them in their future careers. Many talented interns are fortunate enough to secure full-time employment based upon their internship experience.

Students enroll in POSC 395 Directed Governmental and Political Leadership Internship, for two to eight units. Students can enroll in POSC 395 during the fall, spring or summer. In the summer, students can apply for institute-sponsored fellowships to help defray tuition and living expenses.

Professional Writing Program

Director: Brighde Mullins, MFA
Professor of the Practice: Brighde Mullins, MFA
Assistant Professors (Teaching): Prince Gomolivillas, MFA; Dinah Lenney, MFA
Senior Lecturer: M.G. Lord
Lecturer: Gina B. Nahai, MPW

Master of Professional Writing Program

The Master of Professional Writing Program develops students’ mastery of craft across multiple genres and prepares students for writing careers. It is designed for students who want to explore a range of writerly possibilities, and aims to develop writing and writers across genre, including fiction, nonfiction, poetry, new media, and writing for stage and screen. Program faculty are working writers who bring their expertise to seminars, lectures and workshops.

The academic curriculum includes a range of courses that focus on all aspects of the writing life, as well as one-on-one tutorials geared to the completion of a professional quality final project. Although students will ultimately focus in one genre, the degree is specifically intended for writers interested in exploring the connections to be found in literature, entertainment and art. Program graduates include television writers, screenwriters, writers and teachers of literary fiction and poetry, Web content providers and designers, editors, publishers, and technical writers.

Admission Requirements

Admission to the program is competitive and is based on the following: possession of a baccalaureate degree from an accredited college or university with a minimum 3.0 GPA; respectable scores on the General Test of the Graduate Record Examinations; three letters of recommendation; a writing sample including at least 20 original pages. Applicants focusing in poetry or writing for stage and screen must also submit a short prose sample of at least five original pages; this may be a college paper, essay or excerpt of short fiction. Campus visits during regularly scheduled open-houses are encouraged, but not required.

Degree Requirements

Thirty units of work are required to earn the MPW degree. MPW 500 Survey of Professional Writing (3 units) is required and should be taken in the first semester. Fifteen additional units must be earned in the student’s major genre (fiction, nonfiction, poetry, or writing for stage and screen), including MPW 593ab Professional Writing Project or MPW 594abz Master’s Thesis. While taking Professional Writing Project or Master’s Thesis, with advisement from their faculty mentors, students will generate their master’s professional projects in their respective genres. These projects may be a full length novel, a collection of short stories, a nonfiction manuscript, a collection of essays, a collection of poems, or a full length screenplay or stageplay. The remaining 11 units consist of electives from the MPW curriculum, and students are encouraged to choose widely.

Progressive Degree Program in Master of Professional Writing

The progressive degree program permits exceptional undergraduate students to receive both a Bachelor of Arts and a Master of Professional Writing within five years. It is intended for students with extraordinary MPW preparation and performance who demonstrate a superior level of overall scholarship.

Admission

Applicants may apply after the completion of 64 units of course work applicable to their undergraduate degree since graduating from high school. (AP units, IB units and course work taken prior to high school graduation are excluded). Applicants must submit their applications before completing 66 units of coursework. Normally, the application is submitted in the fall semester of the second year of enrollment at USC. The application for admission to a progressive degree program must be accompanied by a departmentally approved course plan proposal and two letters of recommendation from USC faculty members in the Master of Professional Writing program.

Awarding of Degrees

Progressive degree program students must fulfill all of the requirements for both the bachelor’s degree and the master’s degree, including a professional writing project or a master’s thesis. The unit requirement for the master’s degree can be reduced by as much as one-third. The degrees may be awarded separately, but the master’s degree will not be awarded before the undergraduate degree.

Time Limits

The time limit for completing a progressive degree program is 12 semesters.

Further details about progressive degrees can be found on the Requirements for Graduation page.

Courses of Instruction

Professional Writing Program (MPW)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

MPW 500 Survey of Professional Writing (3) Analysis of genres, characteristics of narration, stylistic editing, and the role of the writer in contemporary society. Required of all MPW majors. (Duplicates credit in former MPW 900.)

MPW 510 Writers and their influences (3) Exploration of the notion of influence and its effect on generating new writing.

MPW 511 Oral History: Witness and Writing (1, max 3) Transforming oral history into works of fiction and nonfiction, with emphasis on honoring the source material in the construction of an original narrative.

MPW 512 Writer’s Marketplace (3) A cross-genre investigation of publishing and the marketplace, with the goal of familiarizing students with the practical aspects of writing and selling creative work. (Duplicates credit in former MPW 510.)

MPW 515 Functional Writing for the Marketplace (3) Practical writing and editing skills, language mechanics, and document development techniques that can be applied to reports, grants/proposals, brochures, resumes, and other workplace materials. (Duplicates credit in former MPW 515.)

MPW 520 Writing Humor: Literary and Dramatic (3) Analysis of the specifics of humor – wit, irony, satire, parody and farce – through examples taken from various genres; discussion/workshop on incorporating humor in students’ work. (Duplicates credit in former MPW 915.)

MPW 525 Nonfiction Strategies in Poetry and Prose (3) A workshop devoted to shared concerns and possibilities in poems and essays, and to the development of skills as enhanced by nonfiction techniques.

MPW 526 Writing the Review (1, max 3) An investigation of the evolving role of the critic, focused on reviews as essays, and criticism as essential to a rich popular culture and conversation.

MPW 527 Mash-Ups: New Ways to Tell Stories (1, max 3) An examination of innovative storytelling, in which old and new media in tandem can extend our narrative capabilities, and connect us across the world.

MPW 530 Techniques of Fiction Writing (3) A nuts and bolts approach to craft, aiming to identify the requisite tools, and to develop skills necessary for writing vivid and convincing fiction.

MPW 535 Literature and Approaches to Writing the Novel (3) Discussion and analysis of literary classics and their influences as applicable to the writing of today’s novel; development of book-length fiction. (Duplicates credit in former MPW 940.)

MPW 537 Fiction Writing Workshop (2, max 3) Development and analysis of book-length fiction; concentration on narration, characterization, point of view, and clarity of style. (Duplicates credit in former MPW 960.)

MPW 538 Approaches to Writing the Novel (1, max 3) A survey of literary classics, focusing on recurring
techniques, with the goal of identifying strategies to inform the student’s approach to narrative and craft.

MPW 540 Nonfiction Writing (3, max 6) The investigation of various forms in the genre, with attention to the literary value of thinking and making connections on the page.

MPW 541 The Nonfiction Experience (3, max 6) Introduction to nonfiction from reviewing to reporting to the personal essay, with a view towards creating the community essential in the solitary writer’s life.

MPW 542 Writing About Place (3, max 6) An exploration of environment as it informs literature, fiction and nonfiction, with the understanding that a vivid evocation of place will enrich prose across genres.

MPW 543 Writing Science (2, max 6) Introduction to science writing with a view towards broadening approaches to story-telling in all genres.

MPW 544 News Media: Writing Online (3, max 6) An examination of literary forms online. Students will emulate great print stylists, shaping narrative and cultivating voice with the possibilities of new media in mind.

MPW 545 Memoir Writing (3, max 6) A workshop designed to hone voice, and determine the best way to approach personal narrative in cultural and historical contexts.

MPW 546 The Personal Essay (3, max 6) A look at first-person narrative, from memoir to criticism, with a view towards cultivating favorite writerly strategies, and then trying less comfortable forms.

MPW 547 Selling the Nonfiction Book (3, max 6) From the proposal to the outline, a comprehensive look at selling a book-length work of nonfiction, including the completion of a first chapter and promotional précis.

MPW 552 Principles of Poetic Techniques (3, max 6) Beginning analysis and practice of poetic technique, including language and imagery; forms, devices, and conventions; developing voice; use of both traditional and open forms. (Duplicates credit in former MPW 570.)

MPW 554 Poetry Hybrids (3, max 6) Writing and reading poetry in combination with other genres. Forms may include prose poem, verse drama, verse novel, and epic.

MPW 557 Advanced Poetry Writing (3, max 6) Advanced topics in poetry, including wide reading in contemporary poets. Emphasis on the development of the individual voice and subject matter. (Duplicates credit in former MPW 980.)

MPW 560 Principles of Dramatic Structure (3, max 6) Analysis of techniques in preparing scripts for various media; practice in adapting materials from non-dramatic forms. (Duplicates credit in former MPW 520.)

MPW 561 Writing for Stage and Screen (3, max 6) A workshop that examines the art and craft of writing for stage and screen.

MPW 562 Story Conference (3, max 6) Writing the play, teleplay or screenplay, focusing on character development and scene structure, in collaboration with the workshop. (Duplicates credit in former MPW 920.)

MPW 567 Screenplay Workshop (3, max 6) Reading and viewing films with an eye toward the development and completion of the first 45-60 pages of an original screenplay.

MPW 568 Screenwriting across Genres (3, max 6) An investigation of varieties of storytelling through creative responses to both screenplay and non-screenplay forms.

MPW 575 In the Room: The Craft of Television Writing (1, 3, max 6) Introduction to television writing, from pitching to polishing, with all the responsibilities of a staff writer.

MPW 585 Seminar in Professional Writing (1 or 3, max 6) Seminar and workshop with adjustable focus on aspects of professional and creative writing in relation to the literary marketplace.

MPW 589 Internship: Writers in the Field (1-3, max 3) Practical experience in the writing world. Enables students to acquire skills and knowledge that cannot be gained in the classroom. Graded CR/NC.

MPW 590 Directed Research (1-3, max 9) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the program director. Graded CR/NC.

MPW 592ab Professional Writing Project (3-3-0) Supervised preparation of a full-length manuscript in student's major concentration: fiction, nonfiction, poetry, or writing for stage and screen. Credit upon completion of project. Graded IP/CR/NC.

MPW 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded CR/NC.

MPW 599 Special Topics (2-4, max 8) Studies in specific genres, techniques or aspects of the writing craft.

Chair: JoAnn M. Farver, Ph.D.

Faculty

University Professor and Dana Dornsife Chair in the Dornsife College of Letters, Arts and Sciences: Hanna Damasio, M.D.

University Professor and David Dornsife Chair in the Dornsife College of Letters, Arts and Sciences: Antonio Damasio, M.D., M.D., Ph.D.

Harold Dornsife Chair in Neurosciences: Irving Biederman, Ph.D.

Provost Professor of Psychology and Business: Wendy Wood, Ph.D.

Provost Professor of Psychology and Marketing: Norbert Schwarz, Ph.D.

Provost Professor of Social Work, Preventive Medicine, Psychiatry, Family Medicine and Gerontology: William Vega, Ph.D.

Dean’s Professor of Psychology, and Professor of Psychology, Education, and Communication: Daphna Oyserman, Ph.D.

Professors: Michael A. Arlib, Ph.D. (Computer Science and Biological Sciences); Laura A. Baker, Ph.D.; Antoine Bechara, Ph.D.; Sarah W. Bottjer, Ph.D. (Biological Sciences); John Briefer, Ph.D. (Psychiatry); Peter Carnevale, Ph.D. (Business); Gerald C. Davison, Ph.D.; Michael E. Dawson, Ph.D.; JoAnn M. Farver, Ph.D.; Caleb E. Finch, Ph.D. (Gerontology and Biological Sciences); Margaret Gatz, Ph.D.; Ernest Greene, Ph.D.; Andrea Hollingshead, Ph.D. (Communication); Bob G. Knight, Ph.D. (Gerontology); David G. Lavond, Ph.D.; Pat Levitt, Ph.D. (Cell and Neurobiology); Steven Lopez, Ph.D.; Thomas D. Lyon, J.D.; Ph.D. (Law); Franklin R. Manis, Ph.D.; Gayla Margolin, Ph.D.; Marsa Mather, Ph.D. (Gerontology); John J. McAdirle, Ph.D.; Beth E. Meyerowitz, Ph.D.; Lynn Miller, Ph.D. (Communication); Shirkanth (Shri) Narayanan, Ph.D. (Engineering); Carol A. Prescott, Ph.D.; Stephen J. Read, Ph.D.; Robert Rueda, Ph.D. (Education); Elyn R. Saks, J.D. (Law); Dan Simon, S.J.D (Law); Steven Yale Sussman, Ph.D. (Institute for Prevention Research, Medicine); Larry Swanson, Ph.D. (Biological Sciences); Penelope K. Trickett (Social Work); Suzanne Wenzel (Social Work); Rand Wilcox, Ph.D.; Elizabeth Zelinski, Ph.D. (Gerontology)

Associate Professors: Giorgio Coricelli, Ph.D. (Economics); Stanley J. Huey, Jr., Ph.D.; Laurent Itti, Ph.D. (Computer Science); Richard S. John, Ph.D.; Stephen A. Madigan, Ph.D.; Bartlett Mel, Ph.D. (Biomedical Engineering); Toben Mintz, Ph.D.; John Monterosso, Ph.D.; Joseph Priester, Ph.D. (Business); David Schwartz, Ph.D.; Bosc S. Tjan, Ph.D.; David A. Walsh, Ph.D.; Jason D. Zevin, Ph.D.

Assistant Professors: Cleopatra Abdou, Ph.D. (Gerontology); Morteza Dehghani, Ph.D.; Jesse Graham, Ph.D.; Tara Grunewald, Ph.D. (Gerontology); Mary Helen Immordino-Yang, Ph.D. (Education); Adam Leventhal, Ph.D. (Institute for Prevention Research, Medicine); Henrike Möll, Ph.D.; Daniel Nation, Ph.D.; Darby Saxbe, Ph.D.; Scott Witternuth, Ph.D., (Business); Justin Wood, Ph.D.

Clinical Professors: A. Steven Frankel, Ph.D.; Ernest R. Katz, Ph.D.; Jonathan S. Kellerman, Ph.D.

Clinical Assistant Professor: Marian Williams, Ph.D.

Professor of the Practice: Ellen Leggitt, Ed.D.

Associate Professor (Research): Jonathan Gratck, Ph.D. (Computer Science); Susan Luczak, Ph.D.; Stacy Marsella, Ph.D. (Computer Science)

Associate Professor (Teaching): Ann Renken, Ph.D.

Associate Professor of the Practice: Robert Chernoff, Ph.D.

Assistant Professors (Research): Karen M. Hennigan, Ph.D.; Jonas Kaplan, Ph.D.

Assistant Professor (Teaching): C. Miranda Barone, Ph.D.

Assistant Professor of the Practice: Shannon Couture, Ph.D.

Lecturers: William Breland, Ph.D.; Clayton Stephenson, Ph.D.; Alex Yukik, J.D., Psy.D.

Adjunct Professors: Lynne Bernstein, Ph.D.; Elizabeth Susman, Ph.D.

Adjunct Professor (Research): Nancy Pedersen, Ph.D.

Adjunct Associate Professor: Joanne Steuer, Ph.D.

Adjunct Assistant Professor: Jasmine Tehrani, Ph.D.

Adjunct Assistant Professor (Research): Kaspar Meyer, Ph.D.

Professor Emeritus of Psychology and Mendel B. Silberberg Professor Emeritus of Social Psychology: Norman Miller, Ph.D.

Emeritus Professors: Kathleen Chambers, Ph.D.; Norman Ciff, Ph.D.; William W. Grings, Ph.D.; Albert R. Marston, Ph.D.; Samoff A. Mednick, Ph.D.; Norman Miller, Ph.D.

Academic Program Staff

Undergraduate Degrees

Major Requirements for the Bachelor of Arts in Psychology

Grade Requirement

A grade of C- or higher is required to count a class toward major requirements.

<table>
<thead>
<tr>
<th>Required courses, Lower-division</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 114x** Foundations of Statistics</td>
<td>4</td>
</tr>
<tr>
<td>PSYC 100* Introduction to Psychology</td>
<td>4</td>
</tr>
<tr>
<td>PSYC 274L** Statistics I</td>
<td>4</td>
</tr>
</tbody>
</table>

* At least one math course of 2.67 units or more is required. MATH 114x (or MATH 208x, MATH 218, or MATH 265) is required. Students with a strong math background may profit from a more advanced class.

Thirty-two upper-division psychology units are required, including:

<table>
<thead>
<tr>
<th>Required courses, Upper-division</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 314L** Research Methods</td>
<td>4</td>
</tr>
<tr>
<td>PSYC 316L Non-Experimental Research Methods</td>
<td>4</td>
</tr>
</tbody>
</table>

* It is recommended that no more than two upper-division psychology courses be taken prior to the completion of PSYC 274L and PSYC 214.

One course from each of four of the following five lists is also required:

<table>
<thead>
<tr>
<th>Cognitive</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 301L Cognitive Processes</td>
<td>4</td>
</tr>
<tr>
<td>PSYC 305 Learning and Memory</td>
<td>4</td>
</tr>
<tr>
<td>PSYC 440 Introduction to Cognitive Neuroscience</td>
<td>4</td>
</tr>
</tbody>
</table>

Two 400-level psychology courses other than PSYC 404L totaling eight units are also required. PSYC 404L and PSYC 420 may not count toward this requirement if used to satisfy the biological category above.

An additional psychology course, either upper or lower-division of at least 2.67 units is required.

Bachelor of Arts, Social Sciences, with an Emphasis in Psychology Requirements

The required courses are: PSYC 100, MATH 114*, PSYC 274L and eight upper-division courses in departments in the social sciences, including five in the Department of Psychology and three outside the department but within the division. These may be any 300- or 400-numbered courses.

* MATH 208, MATH 218 or MATH 265 may substitute for MATH 114.

Requirements for the Bachelor of Arts with a Combined Major in Linguistics and Psychology

For the lower division: LING 210, PSYC 100 and PSYC 274L are required. For the upper division the following courses are required: LING 301 and LING 302; PSYC 314L; two courses selected from LING 380, LING 401, LING 402, LING 403, LING 405, LING 406, LING 407, LING 410, LING 415, LING 466 and LING 483; three additional courses selected from LING 406, PSYC 301L, PSYC 326, PSYC 326L, PSYC 337L, PSYC 424 and PSYC 433. See Department of Linguistics.

Bachelor of Arts in Cognitive Science

**Director: Toben Mintz, Ph.D.**

Cognitive science is an interdisciplinary major that focuses on the mind and cognition from a variety of perspectives and approaches. The core and electives sample from courses from computer science, human and evolutionary biology, linguistics, mathematics, philosophy and psychology.

The major consists of four fixed core courses, plus two tiers of flexible core courses. The first tier generally consists of more introductory courses and the second tier of more advanced courses, although there are exceptions, and some courses satisfy either tier. Students must take two courses from the first tier and three courses from the second. The purpose of the flexible tiers is to structurally implement interdisciplinary breadth with some degree of flexibility. The flexible core is a subset of the electives, from which students can choose in order to complete the required number of units.

Students may elect to focus their curriculum from one of three tracks, which are suggested courses of study for focusing on a particular theme in cognitive science. This may be accomplished through individual advisement: language, reasoning and decision-making, and the computational mind.

Total required units for major: 43-48 units. Consisting of 16 core units, 18-20 flexible core units and 9-12 elective units.

**Four courses from:**

- CSCI 455 Introduction to Programming Systems Design
- LING 210 Introduction to Linguistics
- LING 301 Introduction to Phonetics and Phonology
- LING 303 Introduction to Syntax and Semantics
- PHIL 250ab Elementary Formal Logic
- PHIL 262 Mind and Self: Modern Conceptions
- PSYC 304L Sensation and Perception
- PSYC 316L Developmental Psychology
- PSYC 460 Introduction to Artificial Intelligence
- HBIO 306 Primate Social Behavior and Ecology
- HBIO 308 Origins and Evolution of Human Behavior
- LING 405 Child Language Acquisition
- LING 406 Psycholinguistics
- LING 407 Atypical Language
- PHIL 350 Symbolic Logic
- PHIL 412 British Empiricism
- PHIL 462 Philosophy of Mind
- PHIL 465 Philosophy of Language
- PSYC 304L Sensation and Perception
- PSYC 339L Developmental Psychology
- PSYC 401 Evolutionary Psychology
- PSYC 420 Animal Behavior
- PSYC 422 Human Judgment and Decision Making
- PSYC 432 Children’s Learning and Cognitive Development
- PSYC 450L Neural Network Models of Social and Cognitive Processes
- PSYC 454 Social Cognition
- CSCI 455 Introduction to Programming Systems Design
- CSCI 460 Introduction to Artificial Intelligence
- HBIO 300 The Human Animal
- HBIO 306 Primate Social Behavior and Ecology
- HBIO 308 Origins and Evolution of Human Behavior
- HBIO 406 Theory and Method in Human Evolutionary Biology
- LING 210 Introduction to Linguistics

Minor in Psychology

The minor requires six courses: PSYC 100 and five additional courses:

One course is required in each of three of the five topic areas listed under Major Requirements. PSYC 314L may be used to fulfill one of these topic areas.

Two elective PSYC courses. One must be upper-division, 300-level or higher.

Limitations:
1. Students must complete at least 16 upper-division PSYC units.
2. No more than four units of PSYC 430X is applicable to the minor.
3. Each of the six courses must be at least 2.67 units.

Minor in Psychology and Law

This interdisciplinary minor brings together courses in psychology that focus on the social, clinical, cognitive and societal aspects of psychology and how it relates to law. This knowledge is augmented with courses from the USC Gould School of Law that identify the relationship between mental health, social psychology and law.

Twenty-four units are required for the minor. A minimum of four courses (16 units) must be unique to the minor. Psychology majors and students majoring in social sciences with an emphasis in psychology may "double count" up to two courses toward the major and minor; however, they must take a minimum of four courses that do not apply to the major.

Required Courses

PSYC 100 or LAW 200 (PSYC 100 is a prerequisite to upper-division PSYC classes). Psychology majors must take both courses.

Elective Requirements

At least two upper-division courses in Psychology taken from the following list: PSYC 301, PSYC 304, PSYC 355, PSYC 360, PSYC 454, PSYC 463, PSYC 465.

At least two upper-division Law classes from the following list: LAW 402, LAW 403, LAW 404.

No more than one course from the following list may be used to complete the four unique courses requirement: ANTH 353, ANTH 371, LING 412, LING 450, SOCI 350, SOCI 351, SOCI 353.

Minor in Critical Approaches to Leadership

See the Department of Interdisciplinary Studies.

Honors Program

The department offers an honors program for outstanding students in the B.A., Psychology major who desire advanced research training in preparation for graduate work in the social sciences or in professional schools. The primary focus of the honors program is the completion of a research study under the guidance of a faculty adviser. Students are admitted to the program in the fall semester of their junior year and enter the program in the spring of their junior year by enrolling in PSYC 380. To be eligible for admission, a student must have an overall GPA of at least 3.5 at the time of application to the program. This program is not available to students majoring in Social Sciences with an emphasis in Psychology. Students in the honors program complete all major requirements, including PSYC 380 Junior Honors Seminar during the spring semester of their junior year and PSYC 480 Senior Honors Seminar during the spring semester of their senior year. Students complete an honors thesis proposal as part of the Junior Honors Seminar and must submit a completed senior honors thesis by April 1 of the senior year. Students are also expected to have an overall GPA of at least 3.5 at the time of graduation. For further information, contact the undergraduate adviser or the director of the program, Dr. JoAnn M. Farver.

Progressive Degree Program in Psychology

This progressive degree program permits superior students to complete all requirements for both the B.A. and the M.A. degrees in psychological science in five years. Students may apply on completion of 64 units of course work applicable to their undergraduate degrees since graduating from high school (AP units, IB units and course work taken prior to high school graduation are excluded), but not later than the end of their junior year (or the completion of 96 units). To be eligible for admission, students must have at least a 3.5 overall GPA and must have completed PSYC 241L Statistics and PSYC 314 Research Methods with at least a B+ in each. The application for admission to a progressive degree program must be accompanied by an approved course plan proposal and letters of recommendation from two USC faculty members (at least one in the Department of Psychology who agrees to mentor the student). The requirements for both the B.A. and M.A. degrees must be satisfied. Further details about progressive degrees can be found on the Requirements for Graduation page.

Psi Chi

Psi Chi is the national honor society in psychology. Membership is open to graduating and undergraduate men and women who meet the minimum qualifications. Psi Chi is a member of the Association of the College Honor Societies and is an affiliate of the American Psychological Association and the American Psychological Society.

Graduate Degrees

The Department of Psychology offers an M.S. in Applied Psychology as well as a variety of programs leading to the Ph.D. degree. Programs leading to the Ph.D. degree fall within five major groupings: (1) clinical science, including specializations in adult clinical, clinical-aging and child and family; (2) developmental psychology, including child and adolescent development and adult development and aging; (3) brain and cognitive science, including cognitive neuroscience, behavioral neuroscience, clinical neuroscience and behavioral genetics; (4) quantitative methods; and (5) social psychology.

All five specialty Ph.D. areas provide training for careers in research, teaching and applied work.

Admission Requirements

Psychology courses required for admission to the Ph.D. program are an introductory course, a course in statistics, a course in research methods or experimental psychology and at least one course from each of the following lists: (1) one or more of comparative psychology, physiological psychology, sensation and perception, learning and memory, motivation, and emotion; and (2) one or more of developmental psychology, social psychology, abnormal psychology, personality, and history of psychology. Additional courses are desirable, as is work in the biological, physical and social sciences, in mathematics and in philosophy. Students with less background in psychology but outstanding undergraduate records in related fields are also encouraged to apply.

Students are selected on the basis of undergraduate records, scores on the Graduate Record Examinations General Test, course background, letters of evaluation, personal statement of interests and goals and evidence of research skills or interests (e.g., publications or participation in research projects).

The faculty of each specialty area select the students to be admitted in that area. Because of this procedure, applicants should designate the specialty area to which they seek admission.

Application for admission in psychology requires submission of two sets of material: special departmental forms and university application forms. Students are admitted only for study beginning in the fall semester; both sets of completed application forms must be submitted by December 1 for admission the following fall.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of
this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Arts in Psychology

The department does not admit students whose objective is this master's degree. However, if a student accepted in the doctoral program does not have a master's degree, the department strongly recommends completion of the requirements for the M.A. in Psychology in the course of work toward the Ph.D. degree. This involves 24 units of course work and a thesis.

Master of Science in Applied Psychology

Seeley G. Mudd, Room 706
(213) 740-2282
Fax: (213) 740-9082
Email: appliedpsychology@usc.edu
dornsife.usc.edu/map

Program Director: Ellen L. Leggett, Ed.D.

The Master of Science in Applied Psychology program (MAP) is designed for individuals who wish to pursue or advance a career in a non-academic field where knowledge of human behavior is essential to effective job performance. The program stresses practical applications of psychological principles related to social influence, human motivation, interpersonal dynamics, decision-making, and performance improvement.

The program is especially appropriate for those who have majored in a behavioral science field, e.g., psychology, sociology, political science or anthropology. These applicants must have received their baccalaureate degree by the semester in which they begin the program.

Applicants must apply for admission to the Graduate School, and satisfy all requirements for admission. Details on the method for applying, admission criteria and deadlines can be found at dornsife.usc.edu/map.

Thirty-four units of course credit is required for the MAP degree. These units are taken from an inventory of courses that are specified for the MAP program. All students are required to take PSYC 240x, PSYC 250x, PSYC 251x, PSYC 252x, PSYC 255x, 4 to 8 units of PSYC 191x, and 2 units of PSYC 592. The specific number of PSYC 591 units taken in a given semester will depend in part on what options are available from internship sponsors. In addition, students choose from the following courses to focus on either organizational psychology or on consumer psychology: PSYC 513x, PSYC 517x, PSYC 556x, PSYC 622. MAP students may take up to 4 units of PSYC 590.

Based on the student's academic background, work experience and career goals, substitutions of up to two courses may be made from other courses eligible for graduate credit.

The program for a given cohort of students begins in the fall semester. The normal expectation is that full-time students will complete the program in two semesters plus the summer. Part-time students will generally take one or two courses per semester, and must complete the program within five years.

The Master of Science in Applied Psychology program is also available as a part-time, online degree. Students may enter this program in fall, spring or summer terms.

Doctor of Philosophy in Psychology

Residency Requirement

A minimum of 24 graduate units at USC is required for the doctoral degree.

Course Requirements

Each student must take at least 36 substantive units in psychology at USC during the first three years. Students must complete one statistics and/or research methods course as well as a set of core courses that cover topics in brain and cognitive sciences and clinical, developmental and social areas, the specifics of which are provided in the department's handbook for graduate students. Additional course requirements vary according to specialty area.

Research Requirement

During the first and second year, students work on either a master's thesis or a research report of comparable scope and quality. A research project done at USC is required of all students (by the conclusion of the sophomore's second year), regardless of prior graduate work.

Screening Procedure

The student’s ability to master graduate-level course material is first evaluated after completion of no more than 24 units and not later than the third semester of graduate work at USC. The final screening procedure is the successful completion of a second-year project requirement. This evaluation is based on the student’s performance in courses taken and on an evaluation of the student’s research competence as reflected in the second year research project. The project is evaluated by a committee of three faculty, including the student’s primary adviser.

Additionally, students are evaluated each year based on course work and research progress.

Qualifying Exam Committee

In preparation for the qualifying examination, each student assembles a five-person qualifying exam committee to direct the student’s program of studies and evaluate research competence. The committee continues to serve until after the qualifying examination has been passed, the dissertation topic approved, and the student admitted to candidacy for the Ph.D. At that time the student assembles a dissertation committee of four or more members (usually consisting of members of the qualifying exam committee, one of whom must be a faculty member from outside the department), who advise on and evaluate the dissertation.

Qualifying Examination

The qualifying examination evaluates the student's ability to conduct independent scholarly research and writing. The student is evaluated based on oral and written presentation of two elements: a written review paper or written exam and the dissertation proposal. The qualifying examination is planned, administered and evaluated by the student’s qualifying exam committee. It should be taken no later than during the fifth semester.

Doctoral Dissertation

A student is expected to engage in research activity throughout his or her graduate career, leading up to and culminating in the Ph.D. dissertation. The dissertation is based on an original investigation, usually involving empirical data.

Defense of the Dissertation

The student's doctoral dissertation is defended at either a defense oral, based on an approved preliminary copy of the dissertation, or a final oral, based on the final version of the dissertation.

Advisement

Each student has a major adviser who usually in the specialty area. The qualifying exam committee should be formed at least one semester before the student takes the qualifying examination. Advisement concerning graduate school requirements may also be sought from the staff graduate adviser and the faculty member serving as director of graduate studies.

Internship Requirement

Students in the clinical science Ph.D. program need a minimum of three full-time in-residence academic years of graduate study plus one full year of internship at a facility approved by the clinical faculty.

Doctor of Philosophy in Psychology (Clinical) and Master of Public Health (Health Promotion)

The Ph.D./MPH dual degree combines knowledge of clinical psychology research and practice with an understanding of health from a population perspective. The student enrols primarily in the clinical science doctoral program, while taking additional course work for the MPH. During the second and subsequent years, course work is taken in both programs. The dissertation is undertaken through the Department of Psychology.

Courses of Instruction

Psychology (PSYC)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

PSYC 101 Introduction to Psychology (4, FaSpSm)
Factors that influence human behavior, including learning, thinking, perception, motivation, and emotion; analysis of determinants of development, adjustment, and maladjustment.

PSYC 185xLg Drugs, Behavior and Society (4, Irregular) An integrative systems perspective of drugs; including their historical, economic, and cultural importance, psychopharmacology, addiction, relationship to crime, and therapeutic use in treating psychological disorders.

PSYC 201xLg The Science of Happiness (4) Evaluates scientific research on human happiness, integrates research from psychology, economics, and neuroscience in the evaluation of personal and public policy choices.

PSYC 210x Social Issues in Gender (4) (Enroll in SWMS 210xG)

PSYC 240x Scientific Inquiry and Reasoning (4) Critical analysis and reasoning skills required to solve scientific problems in human behavior, including presentation of data, logic of research design, statistics, and research ethics. Not for major credit for psychology majors.

PSYC 274L Statistics I (4, FaSpSm) Introduction to the use of statistics in psychology; basic ideas in measurement; frequency distributions; descriptive statistics; concepts and procedures in statistical inference. Prerequisite: MATH 114x, MATH 208, MATH 218, or MATH 265; recommended preparation: PSYC 101.

PSYC 275Lg Language and Mind (4, FaSp) (Enroll in LING 275Lg)
PSYC 301L Cognitive Processes (4, Irregular)  
Experimental and theoretical aspects of human memory, perception, thinking, and language. Lectures, demonstrations, and individual experiments. Prerequisite: PSYC 100.

PSYC 304L Sensation and Perception (4, Irregular)  
Receptor processes and stimulus organization; traditional topics in the perception of objects, space, time. Laboratory demonstrations and exercises. Prerequisite: PSYC 100.

PSYC 305 Learning and Memory (4, Irregular)  
Principles involved in classical and operant conditioning. Concentration on basic causes of behavior; consideration of the relevance of simple behavioral laws to complicated human behavior. Prerequisite: PSYC 100.

PSYC 314L Research Methods (4, FaSpSm)  
Experimental research methods in psychology; nature and concepts of scientific method. Lab exercises, data analysis and preparation of APA style empirical report. Prerequisite: PSYC 100 and PSYC 274L.

PSYC 316L Non-Experimental Research Methods (4, FaSpSm)  
Non-experimental research methods in psychology. Observational, survey and data analysis exercises. Prerequisite: PSYC 100 and PSYC 314.

PSYC 320 Principles of Psychobiology (4, Irregular)  
The integrative study of bio-behavioral systems: Evolutionary, developmental, ecological, social, ethnological, and physiological factors mediating representational behavioral and psychological phenomenon are examined in detail. Prerequisite: PSYC 100.

PSYC 326 Behavioral Neuroscience (4, FaSpSm)  
Neural bases of behavior. Concentration on sensory and motor processes and the interaction of neural, chemical, and hormonal systems. Prerequisite: PSYC 100.

PSYC 336L Developmental Psychology (4, FaSpSm)  
Child and adolescent behavior and associated theories; exploration of the continuity between child and adult behavior. Laboratory projects. Prerequisite: PSYC 100.

PSYC 337L Adult Development and Aging (4)  
Genetic, physical, and social influences during adult years on perception, learning and memory, intelligence, personality, social roles, and normal and deviant behavioral patterns. Laboratory demonstrations and exercises. Prerequisite: PSYC 100.

PSYC 339L Origins of the Mind (4, Sp)  
Exploration of ancient philosophical questions concerning the origins of human knowledge through empirical studies of infants, animals, and adults from diverse cultures.

PSYC 355 Social Psychology (4, FaSpSm)  
Theoretical and experimental analysis of human behavior. Social processes involved in attitudes, conformity, compliance, interpersonal perception, liking, affiliation, aggression, altruism, and group dynamics. Prerequisite: PSYC 100.

PSYC 359 Interpersonal Relations (4, FaSpSm)  
Theories and research on person perception, attribution processes, interpersonal attraction and romantic love, friendship and causality, social comparison phenomena. Prerequisite: PSYC 100.

PSYC 360 Abnormal Psychology (4, FaSpSm)  
The commonly diagnosed behavior pathologies; biological, social, cultural, and developmental antecedents of abnormal behavior; principles of learning, perception, and motivation, as they relate to psychopathology. Prerequisite: PSYC 100.

PSYC 361 Introduction to Clinical Psychology (4, Irregular)  
Introduction to the scientist-practitioner model of clinical psychology, including research methods, psychological assessment and diagnosis, psychotherapeutic interventions, and treatment of special populations. Prerequisite: PSYC 100.

PSYC 367 Health Psychology (4, Fa)  
Introduction to psychological, biological, and behavioral processes affecting physical health, including stress, coping with disease, health behaviors, and socioeconomic and cultural influences on health. Prerequisite: PSYC 100.

PSYC 372 Human Sexuality (4)  
Psychological and physiological base of sexuality; gender identity, childbearing, birth control, venereal diseases; dysfunctions and treatments.

PSYC 380 Junior Honors Seminar (2-4, max 8, Sp)  
Advanced study of scientific inquiry in psychology with in-depth analysis of current research by faculty in the Psychology Department. Preparation for senior honors thesis research. Corequisite: PSYC 334L.

PSYC 390 Special Problems (1-4)  
Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

PSYC 391 Directed Field Experience in Psychology (1-4, max 4, FaSpSm)  
Individual field experience and independent study supervised by an on-site professional and UUC faculty sponsor. Open only to psychology majors and minors. Prerequisite: PSYC 100; recommended preparation: minimum of three courses completed in psychology.

PSYC 401 Evolutionary Psychology (4)  
Evolutionary and genetic basis of human behavior, including intelligence, sexual behavior, criminal behavior, and violence. Ethology of human diversity, including sex, race, and individual differences. Prerequisite: PSYC 100; recommended preparation: PSYC 274L.

PSYC 404L Psychophysiology of Emotion (4, Irregular)  
Introduction to the scientific study of emotional behavior. Emphasizes research into relations between physiological and psychological variables underlying emotional experience. Demonstrations and laboratory. Prerequisite: PSYC 100, PSYC 274L, and PSYC 314.

PSYC 405 Child Language Acquisition (4) (Enroll in LING 405)  
Study of language development in children.

PSYC 406 Psycholinguistics (4) (Enroll in LING 406)  
Study of language development in children.

PSYC 407 Atypical Language (4) (Enroll in LING 407)  
Study of language development in children.

PSYC 415L Psychological Measurement (4)  
Classical and modern approaches to psychological measurement; scaling; test construction; true score reliability model; generalizability theory; validity; decision theoretic selection; item analysis; item response theory. Prerequisite: PSYC 314L.

PSYC 418 Experimental Exploration into the Origins of Cognition (4)  
Exploration of the origins of cognition via the basics of experimental design, 3D computer modeling, data analysis, and scientific presentation. Recommended preparation: PSYC 314 or background in experimental research.

PSYC 420 Animal Behavior (4)  
Exploration of human nature through studies of nonhuman animals, including topics of navigation, culture, object representation, social cognition, music, and morality. Prerequisite: PSYC 100.

PSYC 421L Data Analysis for Psychological Research (4, max 8)  
Multivariate analysis emphasizing model estimation and testing; topics vary, e.g., multiple regression, logistic regression, factor analysis, multilevel linear modeling, structural equation modeling, multivariate frequency analysis. Prerequisite: PSYC 314L.

PSYC 422 Human Judgment and Decision Making (4)  
Descriptive and normative models of decision making; topics include probability judgments, inference, correlation, emotion, mental accounting, decision analysis, lens model, equity, social dilemmas, time, risk. Prerequisite: PSYC 314L.

PSYC 424 Neuropsychology (4, Irregular)  
Effects of brain damage on human behavior and abilities, particularly language, memory, and emotion. Open only to junior standing or higher. Prerequisite: PSYC 100.

PSYC 425 Functional Imaging of the Human Brain (4)  
Introduction to the physical and physiological bases of Magnetic Resonance Imaging (MRI), and principles of functional MRI, safety, design and analysis of experiments, and operation. Prerequisite: PSYC 100, PSYC 274.

PSYC 430 Social Development of Infants, Children and Adolescents (4)  
An analysis of selected topics and issues in child social development. Prerequisite: PSYC 100; recommended preparation: PSYC 274L, PSYC 314L, PSYC 336L.

PSYC 432 Children’s Learning and Cognitive Development (4)  
Principles of cognitive development, learning, and motivation applied to the development of literacy; includes tutoring a child two hours per week. Prerequisite: PSYC 336L.

PSYC 434 Intelligence, Problem Solving and Creativity (4)  
Psychometric and experimental approaches to the study of intelligence, problem solving, reasoning and creativity, including analysis of mental test construction and validity. Prerequisite: PSYC 100 and PSYC 274L.

PSYC 437 Adolescent Development (4, FaSpSm)  
The adolescent years from both an applied and a research-oriented perspective. Topics include physical, cognitive, and moral development; socialization; and sexual and sex-role development. Prerequisite: PSYC 100.

PSYC 438 Behavioral Genetics (4, Irregular)  
Inheritance and evolution of behavioral characteristics in man and other species. Prerequisite: PSYC 274L.

PSYC 440 Introduction to Cognitive Neuroscience (4, Sp)  
Introduction to using neural network or connectionist models to simulate cognitive processes. Inheritance and evolution of behavioral characteristics in man and other species. Prerequisite: PSYC 100.

PSYC 450L Neural Network Models of Social and Cognitive Processes (4)  
Introduction to using neural network or connectionist models to simulate cognitive processes. Inheritance and evolution of behavioral characteristics in man and other species. Prerequisite: PSYC 100.

PSYC 451L Data Analysis for Psychological Research (4, max 8)  
Multivariate analysis emphasizing model estimation and testing; topics vary, e.g., multiple regression, logistic regression, factor analysis, multilevel linear modeling, structural equation modeling, multivariate frequency analysis. Prerequisite: PSYC 314L.

PSYC 452 Intergroup Relations (4)  
Examining the nature of relations between human groups and the psychological mechanisms relating to intergroup conflict, war, genocide, stereotyping, prejudice, and discrimination. Prerequisite: PSYC 355.

PSYC 454 Social Cognition (4, Irregular)  
Theory and research on cognitive processes in social behavior, to include social inference, cognition and emotion, the Self, social categorization, person memory, and attribution processes. Prerequisite: PSYC 100; PSYC 355 recommended.

PSYC 456 Conservation Psychology (4, Fa)  
Examination of theories, research, interventions regarding psychology of environmental sustainability including cognition, emotion, behavior, attitudes, persuasion,
values, social identity, consumerism, and science of happiness. Prerequisite: PSYC 100.

PSYC 459 Industrial/Organizational Psychology (4) I/O Psychologists develop and apply scientifically supported solutions to the workplace. “Industrial” deals with human resource functions, and “Organizational” with psychological aspects of the organization. Prerequisite: PSYC 100; recommended preparation: PSYC 316.

PSYC 462m Culture and Mental Health (4, Irregular) The influence of culture, ethnicity, race and gender on human behavior. Mental health issues relevant to ethnic minorities in the U.S. Recommended preparation: sophomore standing or higher; PSYC 100.

PSYC 463 Criminal Behavior (4, FaSp) Genetic, biological, psychological, and sociological characteristics of those who evidence criminal behavior; theoretical formulations to be reviewed and appraised. Prerequisite: PSYC 100.

PSYC 464 Psychology of Marriage and the Family (4) Theories and research on family relationships across the life span, including research methods, cultural and developmental perspectives, communication, conflict, attachment, individual psychopathology and family violence. Prerequisite: PSYC 100.

PSYC 465 Introduction to Forensic Psychology (4, FaSp) Survey of current topics, technologies and techniques. Students acquire a basic understanding of how forensic psychologists contribute their unique expertise to the American legal system. Prerequisite: PSYC 100.

PSYC 469 Schizophrenia Research (4, Irregular) Current research on possible causes of schizophrenia. Topics: History, diagnosis, genetics, neural development, obstetrics, psychosocial factors, brain imaging, psychopharmacology, premorbid signs and aging. Prerequisite: PSYC 100; recommended preparation: read current professional journals related to schizophrenia.

PSYC 480x Senior Honors Seminar (2-4, max 8, Sp) Advanced study of empirical approaches in psychology. Progress presentations and evaluations of Senior Honors Thesis research. In-depth exploration of issues in science. Not available for graduate credit. Prerequisite: senior standing in Psychology Undergraduates Honors Program.

PSYC 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

PSYC 499 Special Topics (2-4, max 8, FaSp) Selected topics in the various specialty areas within psychology. Topic will vary from semester to semester. Prerequisite: PSYC 100.

PSYC 500L An Overview of Quantitative Methods in Psychology (4) Team taught introduction to analysis of variance, regression analysis, multivariate measurement, and significance testing. Computer laboratory linked to class material using SAS, SPSS, and R. Open to psychology majors.

PSYC 501L Statistics in Psychological Research (4, Fa) Basic statistical principles and techniques as well as modern improvements on classic inferential methods.

PSYC 502L Analysis of Variance and Experimental Design (4, Sp)ANOVA, including three-way and within groups designs, multiple comparisons, ANCOVA, plus related methods based on robust smoothers and multivariate techniques. Prerequisite: PSYC 501L.

PSYC 503L Regression and the General Linear Model (4, Fa) Multiple regression as a tool in experimental and non-experimental data; analysis of variance and covariance as regression on coded variables. Computer applications Laboratory exercises. Prerequisite: PSYC 501.

PSYC 504 Research Design (4, Sp) Intensive review of research methods in the behavioral sciences. Problem analysis, formulation of research propositions, and procedures for research inference.

PSYC 505 Research Methods in Applied Social Psychology (4, FaSpSm) Various research techniques that are useful in a variety of different real world settings, such as business, governmental agencies and charities. Open only to Master of Science, Applied Psychology students.

PSYC 506 Learning and Cognition (4, Irregular) Survey of learning theory and research, including conditioning and information-processing approaches with human and animal subjects.

PSYC 508 Historical Foundations of Psychology (4, Irregular) History of psychology: clinical, cognitive, developmental, experimental, quantitative, and social; epistemology and philosophy of science as applied to psychology.

PSYC 510 Visual Cognition (4, Irregular) The behavioral, neural, and computational aspects of real-time shape recognition will be examined, along with implications for imagery, reading, concepts, and attention.

PSYC 512 Seminar in Social Psychology (4, max 8, Fa) Problems and theories of the person in the social context. Person perception, interpersonal relations, attitude dynamics, social systems.

PSYC 513 Attitudes and Social Influence (4, FaSpSm) Current theories of attitudes and behavior, measurement, attitudes as predictors of behaviors, effects on changing attitudes and behavior. Open only to Master of Science, Applied Psychology students.

PSYC 514 Psychopathology (4, Fa) Study of psychopathology: in-depth survey of theory and research concerning psychological disorders; introduction of diagnosis. (One of three clinical psychology core courses: PSYC 514, PSYC 515, PSYC 619.)

PSYC 515 Clinical Assessment (4, Fa) Study of clinical assessment: test construction, measurement and prediction of behavior, major cognitive and personality assessment instruments. (One of three clinical psychology core courses: PSYC 514, PSYC 515, PSYC 619.)

PSYC 517 Group Dynamics and Leadership (4, FaSpSm) Theory and research on effective teams and characteristics of strong leaders. Negotiation, morale-building, managing expectations, utilization of cultural diversity as a strength. Open only to Master of Science, Applied Psychology students.

PSYC 520 Fundamentals of Psychological Measurement (4) Factor analysis; latent variable scaling; test construction; classical true score reliability model; generalizability theory; validity; decision theoretic approaches to selection; item analysis; item response theory.

PSYC 524 Research Design in Developmental Psychology (4, Irregular) Review and practice in the analysis and design of experimental and quasi experiential paradigms for research on ontogenetic age changes and generational differences in behavior.

PSYC 525 Cognitive Development in Children (4, Sp) Review of theories of cognitive development. Analysis of research on brain functioning, perception, memory, language, reasoning and academic skills from birth to adolescence. Open to graduate students in psychology.

PSYC 534 Social and Emotional Development in Children (4, Fa) Theories of social and emotional development, including sociocultural perspectives. Analysis of research on temperament, social relationships, individuation and moral development from birth to adolescence. Open to graduate students in psychology.

PSYC 538 Origins of Human Nature (4) Exploration of the evolutionary and developmental origins of human nature. Topics include navigation, object and number cognition, culture, sexual behavior, cooperation, language, and morality.

PSYC 540 Cognitive Neuroscience (4, Sp) An examination of the major components of cognition (e.g., perception, memory, intelligence) in terms of the neural coding characteristic of the relevant brain areas.

PSYC 544 Psychopharmacology (4, max 8, Irregular) Recent research on relations between basic psychological states (e.g., cognition, learning, emotion) and physiological response processes (e.g., autonomic responses, covert muscle activity).

PSYC 545 Neuropsychology (4, Irregular) Brain mechanisms underlying perceptual and cognitive functioning: brain damage, loss of function, and clinical assessment.

PSYC 546 Current Topics in Cognitive Neuroscience (4, max 8) Analysis of selected, recent advances of perception, memory, attention, and conceptualization, as revealed by neuroimaging; behavioral, drug, primate single-unit studies; cognitive deficits and evolutionary perspectives. Recommended preparation: some background in behavior science, neuroscience, or computational science.

PSYC 547 Functional Neuroanatomy (4, Irregular) Regional organization and systems of the mammalian nervous system and their functions.

PSYC 550ab Proseminar in Human Behavior (4, FaSpSm) The nature of the human mind, social interactions, conflicts, cooperative behavior, mutual influence and effectiveness. Application of psychological principles to the dynamics of commercial entities. Open only to Master of Science, Applied Psychology students.

PSYC 551 Decision Neuroscience (4) Neuroscientific studies attempting to understand the neural basis of judgment and decision-making, social behavior, and market economies. Recommended preparation: PSYC 547.

PSYC 552 Principles of Consumer Psychology (4) Examination of the attitudes and decisions of consumers, and how to effectively reach consumers by using persuasion and proper positioning in the marketplace. Open only to Master of Science, Applied Psychology students.

PSYC 555 Introduction to Functional Magnetic Resonance Imaging (4, FaSp) The physical and physiological bases of fMRI and fMRI. Design and analysis of fMRI experiments. Operation of a magnetic resonance imaging system.

PSYC 556 Psychology of Interactive Media (4) Examination of the diverse methods of communicating with a target audience with a special emphasis on the newest computer-based tools for providing information and influence. Open only to M.A., Communication; M.C.M.; and Master of Science, Applied Psychology students.

PSYC 565 Organizational Psychology (4, FaSpSm) Examination of the psychological factors that impact employee motivation, job satisfaction, teamwork, leadership, and organizational development. Open only to Master of Applied Psychology students. Not available for major credit for GSBA majors.

PSYC 575 Multivariate Analysis of Behavioral Data (4, Irregular) Multivariate statistical models and contemporary computer methods in multiple regression, multivariate analysis of variance, factor analysis,
PSYC 576 Psycholinguistics (3, Fa) (Enroll in LING 576)

PSYC 577 Analysis of Covariance Structures (4, Irregular) Multivariate analysis of non-experimental data, including structural equation modeling, path analysis, and confirmatory factor analysis. Computer applications using variety of optimization routines and purpose-written software. Prerequisite: PSYC 502.

PSYC 578 Workshop in Quantitative Methods (4, max 8) Practical, hands-on experience in the application of selected quantitative methods to empirical data. Includes training in use of relevant computer software. Prerequisite: PSYC 501 and either PSYC 502 or PSYC 503.

PSYC 586 Advanced Psycholinguistics (3, max 9) (Enroll in LING 586)

PSYC 590 Directed Research (1-12, FaSp) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PSYC 591 Applied Psychology Internship (2-8, max 8, FaSpSm) Internship in a non-university setting, such as business, governmental agency, or NGO. Graded CR/NC. Open only to M.S., Applied Psychology students.

PSYC 592 Applied Psychology Treatise (3, FaSpSm) Requires a research paper of substantial length and high quality that integrates the internship experience with concepts and principles of human behavior. Graded CR/NC. Open only to M.S., Applied Psychology students.

PSYC 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

PSYC 595 Practicum in Clinical Psychology (1-4, max 12, FaSp) Supervised experience in investigating skills and assessment, including psychological test administration and the preparation of reports. Graded CR/NC.

PSYC 599 Special Topics (1-4, max 8) Selected topics in the various speciality areas within psychology at the graduate level. Topic will vary from semester to semester.

PSYC 606 Seminar in Learning and Memory (4, max 8, Irregular) Basic problems and experimental data related to understanding the nature of learning processes.

PSYC 607 Seminar in Behavioral Neuroscience (4, max 8, Irregular) Selected topics considered in the contexts of recent experimental developments and current theoretical trends.

PSYC 610 Seminar in Information Processing in the Nervous System (4, max 8, Irregular) Current issues in research on short term retention, recognition, and recall; sensory filtering and attention; information processes in human skill; limits of capacity.

PSYC 612 Seminar in Advanced Social Psychology (4, max 16, Irregular) An intensive consideration of selected concepts, theories, and research problems in social psychology. Prerequisite: PSYC 512.

PSYC 616 Research Techniques for Non-Experimental Social Science (4, Irregular) Quasi-experimental designs; causal inference from correlational research, techniques for evaluating measures of attitude, personality, and social motives: observational methods; content analysis; sampling and survey techniques.

PSYC 619 Psychological Intervention (4, Sp) Study of clinical psychological treatment: research and theory about major psychological approaches to intervention. (One of three clinical psychology core courses: PSYC 514, PSYC 515, PSYC 619.)

PSYC 621 Seminar in Quantitative Psychology (4, max 12, Irregular) Selected topics in mathematical psychology.

PSYC 622 Decision Analysis and Behavioral Decision Theory (4, Irregular) Normative and descriptive theories and research on human decision-making, with special emphasis on applications to real social decision problems.

PSYC 626 Seminar in Clinical Psychology (4, max 8, Irregular) Selected topics in clinical psychology.

PSYC 663 Computational and Cognitive Neuroscience (4) (Enroll in CSCI 663)

PSYC 676 Seminar in Psycholinguistics (3, max 12) (Enroll in LING 676)

PSYC 680 Seminar in Psychopathology (4, max 8, Irregular) Selected topics in psychopathology.

PSYC 691ab Internship in Clinical Psychology (0-0, FaSp) Supervised clinical work in an approved mental health setting. Graded CR/NC. Prerequisite: good standing in clinical program and departmental approval.

PSYC 695 Advanced Practicum in Clinical Psychology (1-4, max 12, FaSp) Didactic practicum combining theory and research on psychological intervention with clinical practice in assessment and treatment, focused on particular client groups or disorders. Graded CR/NC.

PSYC 790 Research (1-12, FaSp) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PSYC 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Faculty

Myron and Marian Casden Directorship of the Casden Institute for the Study of the Jewish Role in American Life and Professor of Religion: Bruce Zuckerman, Ph.D.*

King Faisal Chair in Islamic Thought and Culture and Professor of Religion and American Studies and Ethnicity: Sherman Jackson, Ph.D.*

Knight Chair in Media and Religion: Diane Winston, Ph.D. (Communication and Religion)

John R. Tansey Chair in Christian Ethics and Professor of Religion: Rev. Cecil (Chip) Murray, Rev.D.

Alton M. Brooks Professor of Religion: James Heft, Ph.D.

Leonard K. Firestone Professor of Religion: Donald Miller, Ph.D.

Ruth Ziegler Early Career Chair in Jewish Studies: Jessica Marglin, Ph.D.

Professors: Lisa Marie Bitel, Ph.D. (History); Ronald R. Garet, Ph.D., J.D. (Law); Paul LICHTERMAN, Ph.D. (Sociology)

Associate Professors: Sheila Briggs, M.A.; James McHugh, Ph.D.; Lori Rachelle Meeks, Ph.D.; Duncan Williams, Ph.D.

Assistant Professors: David Albertson, Ph.D.; *Cavan W. Concannon, Ph.D.; Jessica Marglin, Ph.D.; (Lei Kwan) Rondgao Lai, Ph.D.

Associate Professor of the Practice: Lynn Swartz Dodd, Ph.D.

Adjunct Professors: Stephen Smith, Ph.D.; Varun Soni, Ph.D.

Emeriti Professors: Robert Ellwood, Ph.D.; Gerald A. Larue, Th.D.; John B. Orr, Ph.D.; J. Wesley Robb, Ph.D., LHD*

Emeriti Associate Professors: John P. Crossley, Jr., Th.D.; William W. May, Ph.D.; Alvin S. Rudisill, Ph.D.

* Recipient of university-wide or college teaching award.

The School of Religion offers undergraduate courses in biblical studies; ancient near eastern religion, east and south Asian religions, including Hinduism, Buddhism and Taoism; religions in Latin America; contemporary North American religions; the histories of Judaism, Christianity and Islam; the sociology of religion; religion and gender; and topics in religious ethics. Courses are designed to facilitate a critical and comparative understanding of religious traditions in the light of the most current scholarship.

Students also have the opportunity to receive regular USC course credit for courses taken at Hebrew Union College. Students have the option to take occasional courses at Hebrew Union College or to declare an emphasis in Judaic Studies (see the requirements indicated below for more information).

Degree Programs

The School of Religion offers the Bachelor of Arts in Religion, the Bachelor of Arts in Interdisciplinary Archaeology, a Bachelor of Arts with an emphasis in Judaic Studies, a minor in religion and a minor in interdisciplinary archeology.

Undergraduate Degrees

Major Requirements for the Bachelor of Arts in Religion

The department major requires REL 301 Introduction to the Study of Religion (preferably taken at the beginning of the student's major courses) and REL 401 Seminar in Religious Studies. Further, students will select one or two lower-division courses and four or five additional upper-division courses from the lists below. The total unit requirement for the major is 32 units (at least 24 to 28 units must be upper-division).

Lower-division Options: REL 111, REL 112, REL 121, REL 125, REL 131, REL 132, REL 133, REL 134, REL 135X, REL 136X, REL 137, REL 140, REL 150

Students who intend to do graduate work in some area of religious studies are encouraged to concentrate their course selections in the area of their preference and to begin learning the languages that are essential for study in that area. This includes modern languages such as French, German, Chinese or Japanese, and perhaps an ancient language.

Religion Major with Honors

Majors who wish to graduate from the university with honors in religion must achieve a minimum 3.5 grade point average in the major at the time of graduation. In addition to completing the required 32 units listed above, candidates for honors must register for REL 495x Undergraduate Honors Research, in which they must complete an acceptable senior honors project in religion. The total unit requirement to graduate with honors is 36 upper-division units.

Honor Society

Theta Alpha Kappa is a national honor society for those involved in the study of religion at the undergraduate and graduate level. It is open to declared majors who have completed at least three semesters of college and at least 12 units of religion courses. Students must have a GPA of at least 3.5 in major courses and an overall GPA of at least 3.0.

Judaic Studies Emphasis Major

A Bachelor of Arts in Religion with an emphasis in Judaic Studies is offered cooperatively with the School of Religion and Hebrew Union College-Jewish Institute of Religion. Students will complete all requirements for the bachelor of arts in religion. In fulfilling these requirements, students who choose the Judaic Studies emphasis will select any three of the following courses: REL 312; JS 321, JS 361, JS 382, JS 467.

As a prerequisite for participation in the Judaic Studies emphasis, students must enroll in either JS 100 Jewish History or JS 180 Introduction to Judaism. In addition, students who elect the Judaic Studies emphasis must complete HEBR 120, HEBR 150, and HEBR 220, which may be used to fulfill the college’s language requirement.

The total number of units to graduate with the Judaic Studies emphasis major is 36 units. This does not include the Hebrew language requirement.

Bachelor of Arts in Interdisciplinary Archaeology

Director: Lynn Swartz Dodd, Ph.D.

Archaeology deepens our understanding of peoples and societies across space and time, in all parts of the world, while expanding our knowledge of issues relevant in contemporary society. Archaeologists interpret material culture and action in our shared human past using a range of tools and approaches.

Archaeology majors strengthen their skills in critical thinking, assessing evidence, and formulating clear and persuasive arguments, both oral and written. Students from a wide range of disciplines will gain perspective on their own intellectual and professional interests through the study of the past.

In addition to the general education requirements, the following courses are required:

<table>
<thead>
<tr>
<th>Lower Division Requirements (8 units)</th>

One course from the following specializations (4 units):

- AHIS 120: Foundations of Western Art
- AHIS 125: Arts of Asia: Antiquity to 1500
- AHIS 126: Introduction to Asian Art: 1500 to present
- AHIS 127: Arts and Civilizations of Ancient Middle and South America
- AHIS 128: Arts of Asia: Antiquity to 1500
- CHEM 105B*: General Chemistry
- CLAS 150: The Greeks and the West
- CLAS 151: Civilization of Rome
- ENST 100: Introduction to Environmental Studies

One course from the following three lists (20 units):

- Culture/History
  - AHIS 321: Greek Art and Archaeology
  - AHIS 322: Roman Art and Archaeology
  - AHIS 381: Visual Culture of Asia
  - AHIS 384: Early Chinese Art
  - ANTH 310: Archaeology of the Americas
  - ANTH 311: Old World Archaeology
  - ANTH 314G: The Nature of Maya Civilization
  - CLAS 322: Ancient Archaeology
  - CLAS 324: Late Antique Art and Archaeology
  - CLAS 328: Archaeology of Religion in the Greco-Roman World
  - REL 302: Religions of Ancient Egypt and the Near East
  - REL 394: Archaeology of Egypt and the Near East

- Topical/Thematic
  - AHIS 420: Studies in Ancient Art
  - ANTH 304: Prehistoric Archaeology
  - ANTH 339: Archaeology and Global Cultural Heritage
  - ANTH 337: Anthropology of Warfare
  - CLAS 338: Warfare, State, and Society in the Ancient World
  - CLAS 349: Ancient Empires
  - JS 378: Jewish Magic in the Ancient World
  - REL 402: Cultural Heritage, Religion and the Middle East
  - REL 475: Religion, Material Culture and the Senses
  - REL 493: The Art and Archaeology of Religion

- Applied/Analytical
  - ANTH 376: Scientific Analysis in Archaeology
  - ANTH 481L*: GIS for Archaeologists
  - CHEM 300L*: Analytical Chemistry
  - ENST 220B: Water and Soil Sustainability: Introduction to Environmental Geology
  - GEOL 205L: Surficial Processes and Stratigraphic Systems
  - GEOL 412: Oceans, Climate and the Environment
  - HBI 300: Evolution, Ecology, and Culture
  - HBI 308: Origins and Evolution of Human Behavior
  - SSCI 301L: Maps and Spatial Reasoning
  - SSCI 382*: Principles of Geographic Information Science
  - SSCI 481L*: Spatial Science Practicum
  - Two courses from Theory and Methods (8 units):
    - AHIS 325: Roman Archaeological Excavation: Methods and Practice
    - AHIS 415: Object-Worlds: Historiography and Theories of Things
    - AHIS 425: Interdisciplinary Studies in Classical Art and Archaeology: Research and Methodology
    - AHIS 427: AR Asia; Ancient Languages, Methods, and Practice
    - REL 494: Lab Methods and Theories in Archaeology
    - REL 495: Field Methods and Theories in Archaeology

* Prerequisite required

Upper Division Requirements (28 units) | Unit
--- | ---
Five courses from the following three lists (20 units):
- Culture/History
- Topical/Thematic
- Applied/Analytical

Total requirements: 10 courses (40 units)

Minor in Interdisciplinary Archaeology

The minor in interdisciplinary archaeology is available to students in all schools and departments.

Archaeologists interpret material culture and action in our shared human past using a range of tools and approaches. Archaeology deepens our understanding of peoples and societies across space and time, in all parts of the world, while expanding our knowledge of issues relevant in contemporary society.

Archaeology minors strengthen their skills in critical thinking, assessing evidence, and formulating clear and persuasive arguments, both oral and written. Students from a wide range of disciplines will gain perspective on their own intellectual and professional interests through the study of the past.

Lower-division Requirements (4 units)

Choose one course (4 units) from:

- AHIS 120, AHIS 125, AHIS 130, AHIS 127, AHIS 128, AHIS 201, AHIS 202, CHEM 105B*, CLAS 150, CLAS 151, CLAS 212L, ENST 100, ENST 150X, HBI 300L, HIST 101, LING 295, MASC 110L, REL 111, REL 112, REL 113, REL 394, SSCI 265L

Upper-division Requirements (16 units)

- All students shall be required to take at least one Archaeological Theories and Methods course. Beyond this, students may elect to take either:
  - A: one additional upper-division course from the Theories and Methods list and two upper-division courses from the Interdisciplinary Perspectives list, or
  - B: one upper-division course from the Interdisciplinary Perspectives list and two upper-division courses from the Interdisciplinary Applications list.

Theories and Methods Courses: AHIS 325, AHIS 415, AHIS 415, AHIS 477, REL 494, REL 495

Interdisciplinary Perspectives Courses: AHIS 321, AHIS 322, AHIS 381, AHIS 384, AHIS 420, ANTH 304, ANTH 310, ANTH 311, ANTH 314G, ANTH 328, ANTH 337, CLAS 232, CLAS 328, CLAS 349, CLAS 465, HBI 300, HBI 308, JS 378, REL 394, REL 402, REL 475, REL 493
Religion Minor

Students taking the religion minor must enroll in REL 301 Introduction to the Study of Religion. In addition, they must complete one lower-division course and three upper-division courses selected from those listed in the religion major requirements. The total unit requirement for the minor is 20 units; 16 of those units must be upper-division.

Students who wish to focus their minor in Jewish studies must minor in Judaic Studies.

Judaic Studies Minor

See Judaic Studies for a full description of the minor.

Critical Approaches to Leadership Minor

See the Department of Interdisciplinary Studies for a full description of the minor.

Courses of Instruction

Religion (REL)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

REL 111g The World of the Hebrew Bible (4) The Hebrew Bible in the cultural setting of the Ancient Near East; the formation of theological and ethical concepts which have shaped Western culture.

REL 112g Religions of Egypt and the Ancient Near East (4) Religions, cultures, and values of ancient Egypt and Near East (Iran, Iraq, Israel, Syria, Lebanon, Arabia, Turkey) and their legacies in contemporary society.

REL 112l The World of the New Testament (4) Historical investigation of New Testament characters, events, ethics and theology in relation to its social, intellectual, and religious contexts in the Jewish and Greco-Roman world.

REL 125g Introduction to Christianity (4) Survey of the changing beliefs and practices of the Christian religion from obscure origins to globalized present, with special attention to the varieties of Christian literature.

REL 131g Religions of Asia (4) Traces the development of religious thought in India, China and Japan, from earliest times to the present, paying attention to certain recurrent themes or motifs.

REL 132g Religions of the West (4) Examination of Judaism, Christianity, and Islam in their origins and their development in relation to Western civilization.

REL 133g Religions of Latin America (4) Examines the diverse and complex religious traditions of Latin America.

REL 134g Introduction to Buddhist Literature (4) Focus primarily on works of Buddhist literature written in a variety of genres. Introduction of basic teachings that link Buddhist traditions across time and space.

REL 135gx Religions of China (4) Historical and thematic survey of Chinese religious history from earliest times to the present.

REL 136gx Sense and Sensuality in Indian Religious Literature (4) Exploration of the senses and the technologies of pleasure in India, relating this material to some fascinating examples of Hindu, Jain, and Buddhist literature. Not for major credit for Religion or Religion (Judaic Studies) majors.

REL 137g Introduction to Islam (4) Introduction to Islam, emphasizing its historical and cultural development since the seventh century C.E., and the basic teachings of Islam.

REL 140g Religion and Ethical Issues (4) How major Western religious orientations affect deliberation concerning issues such as reproductive technologies and abortion, physician-assisted death, civil disobedience, homosexuality, economic justice, and just war.

REL 146g American Spirituality: Radicals, Rebels and Freethinkers (4) Examination of the historical continuities and disjunctions between “spiritual but not religious” Americans; the relationship between spirituality, politics, social change, and the role of media.

REL 150g Religion and Immigration (4) Study of social and cultural consequences of immigration through the lens of religion.

REL 301 Introduction to the Study of Religion (4, Fa) Analysis of alternative paths to spirituality, survey of major critics and interpreters of religious commitment. Majors should take at beginning of major course work.

REL 302g Religions of Ancient Egypt and the Near East (4) Religious experience and values of ancient Egypt and Near East through material culture, literature, art, and cultic practices; and their legacies in contemporary society.

REL 311 The Bible in Western Literature (4) Comparative analysis of biblical works and how they were employed by various writers in major works of Western literature.

REL 312 Biblical Wisdom Literature (4) Survey of and inquiry into the biblical wisdom literature; emphasis on the Book of Job.

REL 314 Introduction to Shishism (4) Examination of the major branches of Shisism, the second largest articulation of Islam, both historically and in the world today.

REL 315 Thought and Life of Islam (4) History, thought, institutions, and religious practices of Islam.

REL 316 Women and the Islamic Tradition (4, Fa) Overview of social and legal status of women in Islamic society, past and present. Examination of social roles established both for and by Muslim women.

REL 317 Ancient Near Eastern Myth and Literature (4) A close consideration of ancient Near Eastern myths--especially those from Mesopotamia and Canan--with special attention to their influence on the Bible.

REL 319 Religious and Ethical Issues in Death and Dying (4) Analysis of religious and ethical approaches to death and dying, including refusal of treatment for competent and incompetent patients, voluntary and involuntary euthanasia, and resuscitation.

REL 323 Aegean Archaeology (4) (Enroll in CLAS 323)

REL 325 Religious Experience in the Greco-Roman World (4) Varieties of religious experience as reflected in the literature, art, and cultic practices of the Hellenistic world.

REL 328 Archaeology of Religion in the Greco-Roman World (4) (Enroll in CLAS 328)

REL 329 Themes in the Religions of China (4) A study of selected themes in the history of Chinese religions and culture. Compares cases and materials from several historical periods and religious traditions.

REL 330 Introduction to the Religions of India (4, FaSpSm) History, teaching, and practice of Hinduism, Buddhism, and other religious traditions of India.

REL 331 Religions of East Asia (4) History, teaching, and practice of the religions of China, Tibet, and Japan.

REL 332 Religions of Japan (4) The development of religious thought and practice in the Japanese islands, with Buddhism and Shinto being the most prominent.

REL 333 Religion in the Borderlands (4) Survey of religious history of U.S./Mexico borderlands. Emphasis is given to definitions of place and transformations in culture and forms of belief.

REL 335 Gender, Religion, and Sexuality (4) The construction of gender and sexuality in Western religious traditions; its continued impact on contemporary intellectual, cultural, and social life.

REL 336 Re-viewing Religion in Asian America (4) Interdisciplinary analysis of the religions traditions, institutions, and experiences of Asians and Pacific Islanders in the U.S.

REL 337 Islam in Black America: From Slavery to Hip Hop (4) (Enroll in AMST 337)

REL 338 Mysticism and Religious Desire (4) How human appetites for sex, food, community or immortality are articulated as mystical desires in different religions, either within institutional structures or working against them.

REL 339 Studies in the History of Christianity (4) In-depth exploration of one of the pivotal moments in the history of Christianity and Western society.

REL 340 Introduction to Indian Philosophy (4) An introduction to Indian philosophy, including major schools of thought in Hindu, Buddhist, and Jain philosophies. No previous knowledge of Indian religions or philosophy required.

REL 341 Technology, Culture, and Ethics (4) Examination of value questions arising from the impact of technology on individuals, social institutions, and culture.

REL 344 Islamic Law and American Society (4) (Enroll in AMST 344)

REL 350 Ethical Issues in the New Medical Revolution (4) Multimedia-oriented analysis of issues; definition of life and death; research on human subjects, health care delivery, euthanasia, abortion, genetic counseling, behavior control.

REL 354 Religion and Ethics (4) Traces the development of how religious ideas have informed ethics, or accounts of the good life, including notions of justice, righteousness, virtue, duty, charity and happiness.

REL 356 Religion and Social Change (4) Empirical and theoretical analysis of social change and its effect on...
REL 370 Religion and Visuality (4) Examination of the deep connections between visuality and religion, including visions, controversies over religious images, and other connections between religion and visual art.

REL 375 Conflict and Change and the Ethics of Business (4) Impact of recent events and developments on the ethics of business, such as civil rights, affirmative action, professionalism, consumerism, ecology, changing life styles, and government regulation.

REL 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

REL 394 Archaeology of Egypt and the Near East (4) Study of archaeology and excavated artifacts from Egypt and the Near East.

REL 401 Seminar in Religious Studies (4, Sp) Survey of methods and selected issues in the field of religious studies; required of all majors during their junior or senior year. (Duplicates credit in former REL 299.) Recommended preparation: REL 301.

REL 402 Cultural Heritage, Religion, and Politics in the Middle East (4, Fa) In-depth exploration of archaeology and heritage issues in the Middle East and their implications for politics and practice in modern Islam, Judaism, and Christianity.

REL 414 History of Islamic Law (4, Sp) Examines legal methods and religious sources used in Islamic law. Emphasis is placed on the way cultural developments affect legal thought and the administration of justice.

REL 415 Seminar in Buddhism (4) Seminar on selected aspects of the Buddhist tradition.

REL 417 Seminar in South Asian Religions (4) Exploration of particular themes and/or traditions in South Asian religions.

REL 425 Communicating Religion (4) (Enroll in COMM 425)

REL 426 Religion, Media and Hollywood: Faith in TV (4) (Enroll in COMM 426)

REL 431 The Taoist Tradition (4) (Enroll in EALC 431)

REL 435 Religious Thought After the Enlightenment (4) Changes in religious thought between the late 18th and early 20th centuries in the wake of the emergence of modernity in the West.

REL 440 Christian Thought in the 20th Century (4) Examination of dynamic new directions taken by Christian understandings of self, God, and salvation in response to the novel conditions of modern culture, politics and philosophy.

REL 441 Origins of Modern Theology (4) 19th century liberal, rationalist, and historical theology.

REL 442 Religion and Science (4) Explores whether religion and science offer competing or complementary models for understanding the world and the human place within it.

REL 443m Islam in France (4, FaSp) (Enroll in FREN 443m)

REL 455 Philosophy of Religion: Bases of Belief and Disbelief (4) Rational and empirical foundations for religious faith and for skepticism.

REL 460 Senior Seminar: Medical Ethics (4) Analysis of ethical problems related to new developments in medical science. Graded CR/NC.

REL 461 Business and Society (4) Theories of corporate social responsibility from contrasting points of view and the relation of social responsibility to theories of management ethics, utilizing case studies.

REL 462 Religion and Violence (4) Religious and moral perspectives on war, pacifism, violent and non-violent protest, and religion-based terrorism and militia.

REL 465 Archaeology and Society (4, FaSpSm) (Enroll in CLAS 465)

REL 468 Sociology of Religion (4) The role of religion in modern society from the standpoint of sociological theory and research.

REL 469 Black Religion in America (4) Historical, sociological, and theological analysis of the nature and role of black religion in the American setting.

REL 471 Jesus (4) A study of major interpretations of the figure of Jesus, with focus on the interaction between religious traditions and culture.

REL 473 Advanced Hebrew Bible Studies (4) Consideration of specific topics in Old Testament studies; particular topics determined each semester.

REL 475 Religion, Material Culture and the Senses (4) A comparative study of the role of material culture in the senses in religions based on a number of case studies and problem sets.

REL 479 Seminar in Christian Thought (4) Studies a theme, period, or problem from the history of Christian thought within its intellectual and social context.

REL 481 History of Religion in America (4) Intellectual, institutional, and social history of religion in America from colonial times to the present.

REL 482 Jesus in American History and Culture (4) (Enroll in HIST 482)

REL 484 American Religion, Foreign Policy and the News Media (4, Sp) (Enroll in JOUR 484)

REL 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

REL 491x Undergraduate Honors Research (4) Individual research for honors in the major leading to a substantial project. Open only to religion majors at the junior or senior level.

REL 493 Art and Archaeology of Religion (4, FaSp) The history of religion through its material expression: art, architecture and artifact. Exploration of different themes and time periods.

REL 494 Lab Methods and Theories in Archaeology (4) Archaeological research design, data recovery, artifact analysis, interpretation and analogy, publication and ethics.

REL 495 Field Methods and Theories in Archaeology (4, max 12, FaSpSm) Archaeological field study emphasizing current paradigms of data collection and evaluation; social scientific study of material culture and its relationship to religious expression.

REL 499 Special Topics in Religion (2-4, max 8) Selected topics in religious studies.

REL 500 History of Theological Ethics (4) The ethical thought of major theological thinkers in the patristic, medieval, Reformation, and modern periods.

REL 590 Directed Research (1-12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

REL 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

REL 599 Special Topics (2-4, max 8)

REL 626 Seminar in Jewish Ethics (4) (Enroll in JS 626)

REL 790 Directed Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

REL 794abc DcDc Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Undergraduate Programs

The Department of Slavic Languages and Literatures offers a major in Russian at the undergraduate level and minors in Russian and Russian Area Studies. The major combines thorough preparation in the Russian language with the study of Russian literature, art and culture. Particular emphasis is placed on developments in
contemporary Russia. Students are required to study four semesters of Russian language as a prerequisite to the major. The major itself requires an additional three semesters of language study, three semesters of an advanced seminar on Russian culture (with varying content), and two elective courses, either in Russian literature and culture (in translation or Russian, depending on course scheduling) or in Russian area studies.

Graduate Programs

The Department of Linguistics offers, under the jurisdiction of the Graduate School, the Doctor of Philosophy in Linguistics (Specialization in Slavic Linguistics).

The Department of Comparative Studies in Literature and Culture offers, under the jurisdiction of the Graduate School, the Master of Arts and the Doctor of Philosophy in Comparative Studies in Literature and Culture (Slavic Languages and Literatures).

And two elective courses approved by the undergraduate adviser.

Minor in Russian

Lower-division requirements for the major plus three upper-division elective courses chosen from the following (at least two of the areas must be represented): Russian language (SLL 310, SLL 340, SLL 420); Russian literature and culture taught in Russian (SLL 321, SLL 465); Russian literature, art and culture taught in translation (SLL 330, SLL 344, SLL 345, SLL 348, SLL 378).

Minor in Russian Area Studies

Lower-division Requirements

Four semesters of Russian language (SLL 120, SLL 150, SLL 220 and either SLL 250 or SLL 255), or its equivalent.

Upper-division Requirements

The core course, SLL 330 Russian Thought and Civilization; one course outside the Slavic department, from among the following: HIST 324, HIST 328, HIST 415, HIST 416, HIST 417, HIST 422; IR 345, IR 346, IR 439, IR 483; POSC 464; and one elective, to be chosen from among: any upper-division SLL course in Russian literature, art or culture; HIST 320, HIST 324, HIST 415, HIST 416, HIST 417, HIST 422; IR 345, IR 346, IR 439, IR 483; POSC 464.

Note: the course taken to fulfill the requirement outside the Slavic department cannot also count as an elective.

Graduate Degrees

Master of Arts in Comparative Studies in Literature and Culture (Slavic Languages and Literatures)

See Comparative Studies in Literature and Culture in this catalogue.

Doctor of Philosophy in Comparative Studies in Literature and Culture (Slavic Languages and Literatures)

See Comparative Studies in Literature and Culture in this catalogue.

Doctor of Philosophy in Linguistics (Specialization in Slavic Linguistics)

Application deadline: January 1

See Linguistics in this catalogue.

Certificate in Foreign Language Teaching

The Certificate in Foreign Language Teaching provides certification in the theory and practice of second or foreign language teaching for student language teachers concurrently enrolled in graduate degree programs in foreign languages or related graduate programs at USC; for graduates of such programs who are teaching languages; for external candidates concurrently enrolled in similar programs at accredited colleges or universities; or for graduates of such programs who are teaching languages. The certificate is meant to supplement graduate study in the literature or linguistics of foreign languages. It is also meant to supplement classroom teaching. Refer to the Department of Spanish and Portuguese for course work requirements.

Courses of Instruction

Slavic Languages and Literatures (SLL)

For the courses offered during any given term, consult the Schedule of Classes.

SLL 020 Course in Reading Russian (2) For graduate students wishing to use Russian as a scholarly tool. Emphasis on basic grammar and reading skills. Graded CR/NC.

SLL 025 Course in Reading Russian (3) Continuation of SLL 020. Reading of authentic materials from Russian press and students’ areas of interest. For graduate students only. Graded CR/NC. Prerequisite: SLL 020.

SLL 120 Beginning Russian I (4) Introduction to the Russian language with emphasis on basic conversational skills, major points of grammar, and reading.

SLL 122 Elementary Polish I (4) Structure of the language, pronunciation, basic communication, and reading in modern Polish.

SLL 130ab Elementary Czech (4-4) a: Structure of the language, basic grammar, pronunciation, and oral communication. Readings in Czech; discussion of Czech history and culture. b: Continuation of SLL 130a. Prerequisite: SLL 130a.

SLL 150 Beginning Russian II (4) Continuation of SLL 120. Prerequisite: SLL 120.

SLL 152 Elementary Polish II (4) Continuation of SLL 122. Prerequisite: SLL 122.

SLL 199 Chess and Critical Thinking (2) Analysis of significant chess games, reflecting societal attitudes toward science, competition, art, gender, psychology, politics, and technology. Graded CR/NC.

SLL 200 Russian Moral Dilemmas in the 20th Century (4) Examines the primary moral experiences of Russian society in its transition from tsarism through communism and beyond.

SLL 201 Contemporary Russian Culture and Society (3-3) (SS only) Introduction to the culture, politics, and economics of contemporary Russia. Offered only as part of the International Summer Session in Russia. Prerequisite: SLL 120.

SLL 210 Masterpieces of the Russian Short Story (4) Critical reading of selected masterpieces of the Russian short story; works by Gogol, Turgenev, Dostoevsky, Tolstoy, Babel, Pasternak, Solzhenitsyn, and others. In English.

SLL 220 Intermediate Russian I (4) Development of thematic conversational skills with emphasis on extended dialogue. Review of basic morphology with special attention to verbs of motion. Reading of authentic material is emphasized. Prerequisite: SLL 120, SLL 150.

SLL 222 Readings in Polish Literature I (4) Continuation of elementary Polish and introduction to outstanding works in Polish literature. Prerequisite: SLL 122 and SLL 152.

SLL 250 Intermediate Russian II (4) Continuation of SLL 220. Development of proficiency in conversation skills, reading, and writing. Prerequisite: SLL 220.

SLL 252 Readings in Polish Literature II (4) Continuation of SLL 222. Prerequisite: SLL 222.

SLL 255 Business Russian (4) Language and culture course for intermediate Russian level students interested in business. Prepares students to communicate in Russian-speaking business settings in a linguistically sensitive manner. Prerequisite: SLL 220.

SLL 260x The Trans-Siberian Experience (2, Sp) Introduction to Russian language and culture by means of a study-tour on the Trans-Siberian Railway.

SLL 270a Introduction to Russian for Native Speakers (4-4) a: For native Russian speakers who cannot read or write Russian. Emphasis on essentials of grammar, vocabulary, and orthography, and the reading and writing of simple texts in Russian. b: Continuation of SLL 270a.

SLL 299 Chess – Advanced Thinking Techniques (2) Development of advanced understanding of the game of chess. Critical analysis of games and of the problem-solving techniques applicable in various game situations. Graded CR/NC. Prerequisite: SLL 199.

SLL 300 The Russian Novel (4) The rise of the novel as the dominant form in Russian literature of the 19th century. Major works by Gogol, Turgenev, Dostoevsky, Tolstoy, and others. In English.

SLL 301 Russian Literary Avant-Garde (4) Russian modernism and the avant-garde: development of modern sensibility in literature and the arts from 1880 to 1930. Readings in Chekhov, Sholokhov, Bely, Mayakovsky, and others. Conducted in English.

SLL 302 Modern Russian Literature (4) Survey of the major developments in Russian literature during the 20th century.
century, from modernism to the post-Soviet era. Readings in English.

SLL 303 Contemporary Russian Literature (4)
Developments in Russian Literature from the 1960s to the present. Literature of moral resistance directed against official cultural models. In English.

SLL 310 Advanced Russian in Popular Culture (4)
Advanced conversation topics, readings and analysis of Russian press, films and other popular materials. Advanced grammar. Conducted in Russian. Prerequisite: SLL 250; recommended preparation: SLL 120, SLL 150, SLL 220.

SLL 321 Russian Culture (4)
Survey of Russian civilization from the beginnings to the Soviet period focusing on major cultural and artistic trends. Lectures and readings in Russian. Prerequisite: four semesters of Russian.

SLL 329 Russian Thought and Civilization (4)
Russian cultural identity from its beginnings until today. The Eastern Orthodox tradition, its traumatic confrontation with Western culture, and their continuous interaction. Concurrent enrollment: MDA 140.

SLL 340 Intercultural Communication in Russian (4)

SLL 344 Tolstoy: Writer and Moralist (4) Tolstoy’s major works in the context of his ethical views. Readings and lectures in English.

SLL 345 Literature and Philosophy: Dostoevsky (4)
Dostoevsky’s novels as psychological and philosophical analyses of modern alienated man. Readings in Dostoevsky and selections from Gide, Kafka, Camus, and Sartre. Conducted in English.

SLL 346 Russian Drama and the Western Tradition (4)
Representative plays from the 19th century to the present. Development of the Russian theater in the European context. Conducted in English.

SLL 348 Nabokov’s Novels: Art and Exile (4)
Survey of Vladimir Nabokov’s novels written in Europe and America from the 1920s-1960s. Primary focus on the structure of the novels and their themes of art and emigration. Readings in English.

SLL 370 Advanced Russian for Native Speakers (4)
For students with basic oral proficiency in Russian who need to develop native fluency in an array of genres and situations. Emphasis on advanced grammar, reading (literary and scholarly texts), written expression (scholarly, administrative, and business genres), spelling, and punctuation.

SLL 378 Modern Russian Art (4)
Changing concepts of aesthetic value as expressed in the development of 19th and 20th century Russian art (painting and architecture).

SLL 390 Special Problems (1-4)
Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

SLL 397 Literature and Film in Eastern European Historical Experience (4)
Exploration of key moments in the recent historical experience of Eastern Europe through close readings of literature and film. Taught in English.

SLL 420 Seminar in the Russian Language (4)
Survey and detailed analysis of selected topics in the Russian language. Prerequisite: SLL 310 or SLL 340.

SLL 465 Seminar in Russian Studies (4, max 12)
Readings and discussion in Russian of current topics in Russian culture, politics and society. Content varies each time offered. Prerequisite: SLL 250.

SLL 490 Directed Research (1-8, max 12)
Individual research and readings. Not available for graduate credit.

SLL 499 Special Topics (2-4, max 8)

SLL 500 Topics in Advanced Russian (2, max 8)
Study of Russian required for graduate work and professional activities. Prerequisite: four years of college Russian.

SLL 501 Proseminar in Russian Literature (3)
Introduction to graduate study of Russian literature: research methods, bibliography, transliteration, development of critical writing skills.

SLL 510 Old Church Slavonic (3)
Study of the earliest recorded Slavic language; linguistic interpretation of original texts; knowledge of a Slavic language or general linguistics will be helpful.

SLL 512 History of the Russian Language (3)
Phonetic, morphological, syntactical changes from common Slavic to the present. Russian literary language; influence of 19th century Russian authors and old church Slavonic on contemporary Russian.

SLL 514 Structure of Modern Russian: Phonology (3)
Articulatory phonetics, phonemics, morphophonemics, and intonational patterns of modern Russian. Prerequisite: three years of college Russian.

SLL 516 Structure of Modern Russian: Morphology (3)
Essential issues in current linguistic description of the syntax and morphology of modern Russian. Considers word order, negation, verbal aspect.

SLL 530 Early Russian Literature and Culture (11th-17th Centuries) (3) Major monuments of medieval Russian literature examined in their cultural, literary, and theological context, with special emphasis on issues of genre. Focus on problems of Russian cultural identity and Russia’s complex relationship to Byzantine and Western traditions. Prerequisite: SLL 510 and SLL 514.

SLL 532 19th Century Russian Literature (3) Major works and genres of the 19th century. The development of a “modern” literary tradition, focusing on problems of Russia’s indigenization of Western literary movements (classicism and sentimentalism).

SLL 541 Symbolism (3) Russian symbolist literature; cultural and philosophical background of this late 19th and early 20th century movement. Prerequisite: three years of college Russian.

SLL 544 Russian Short Story (3) Pushkin, Gogol, Dostoevsky, Turgenev, Tolstoy, Chekhov. Prerequisite: three years of college Russian.

SLL 545 19th Century Russian Poetry (3) Analysis of major works of 19th century Russian poetry in the context of developing aesthetic principles and cultural history. Prerequisite: SLL 351.

SLL 546 The Russian Novel (3) Genre of the novel as exemplified in the works of one or more Russian authors. Readings from Gogol, Turgenev, Tolstoy, Dostoevsky, and others. Prerequisite: three years of college Russian.

SLL 548 History of Russian Literary Criticism (3)
History and principles of literary criticism in Russia with attention to major periods and movements from the early 19th century through the Formalists.

SLL 555 Soviet Literature I (1917-1953) (3) The course surveys the major writers and literary schools of Soviet literature in the crucial period from the Revolution to the death of Stalin.

SLL 557 Soviet Literature II (1953-present) (3) Development of Soviet literature, the reappropriation of Russia’s literary past, and new directions in contemporary literature.

SLL 575 Socialist Realism (3) Emphasis on the origins, doctrine, and ideology of socialist realism, the predominant, and officially prescribed, aesthetic of Soviet literature.

SLL 584 Russian Fiction and the West (3) A survey of major Russian fiction in the context of Western European literary movements from the late 19th through late 19th centuries. The course presumes the students’ basic acquaintance with the major monuments.

SLL 585 20th Century Russian Literary Criticism (3)
Relationship between practical and theoretical literary criticism: Formalism and Structuralism, Sociological school, and Bakhtin; theoretical approaches applied to specific literary texts.

SLL 590 Directed Research (1-12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SLL 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

SLL 599 Special Topics (2-4, max 8)

SLL 650 Seminar in Russian Literature (3, max 9)
Detailed study of single literary period, movement or genre; two or more selected authors; specific school of literary criticism. May be repeated, with departmental permission, if content of the seminar is different. Prerequisite: three years of college Russian; recommended preparation: one year of graduate study.

SLL 660 Seminar on a Single Author or Work (3, max 9) Theme varies from year to year. An author or major work will be selected for intensive study; research paper required. May be repeated, with departmental permission, if content of the seminar is different. Prerequisite: three years of college Russian; recommended preparation: one year of graduate study.

SLL 665 Seminar in Russian Culture and the Arts (3, max 9) Subject varies from year to year. A trend or major figure will be studied in its cultural and artistic contexts. May be repeated, with departmental permission, if content of the seminar is different. Prerequisite: three years of college Russian; recommended preparation: one year of graduate study.

SLL 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SLL 794abcDz Doctoral Dissertation (2.2-2.2-2.0)
Credit on acceptance of dissertation. Graded IP/CR/NC.

Degree Programs

The Department of Sociology offers bachelor’s degrees in sociology as well as in non-governmental organizations and social change. The Department of Sociology also offers a number of minors and the Doctor of Philosophy in Sociology.

Undergraduate Degrees

Students of sociology examine the patterns of social life, focusing on the relationship of individuals to society and the interaction of culture, economy and politics in shaping social life. The greater Los Angeles area provides a natural laboratory for students to explore such sociological themes as race relations, work and workplace, immigration, the family in a changing society, population trends, globalization, religion, and the criminal justice system.

Matching the special strengths of our faculty and cutting-edge research in the discipline, USC’s sociology program offers two central areas of concentration – social inequality, and social change and public policy. Many of our undergraduate courses include opportunities to engage actively with the community and to pursue multifaceted independent research projects.

Honors Program

Seniors with 3.5 GPAs in the major and 3.25 overall are encouraged to participate in the sociology honors program consisting of two intensive senior honors seminars (SOCI 494 and SOCI 495). Under faculty guidance, honors students design and complete a significant piece of original sociological research.

Juniors and seniors who have made substantial progress toward completion of the program and have achieved a 3.3 GPA in sociology and a 3.0 GPA overall are eligible for the Alpha Kappa Delta International Sociology Honors Society.

Major Requirements for the Bachelor of Arts in Sociology

Nine courses (36 units) are required to complete the major.

All sociology majors must complete the four core courses of sociology:

<table>
<thead>
<tr>
<th>Core courses</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOCI 300</td>
<td>4</td>
</tr>
<tr>
<td>SOCI 315</td>
<td>4</td>
</tr>
<tr>
<td>SOCI 314</td>
<td>4</td>
</tr>
<tr>
<td>SOCI 370</td>
<td>4</td>
</tr>
</tbody>
</table>

Five additional courses are required for the major. These are to be chosen from the elective upper-division sociology courses grouped into two theme areas:

- Theme Area I: Social Inequality
- Theme Area II: Social Change and Public Policy

All students are required to take at least one course from each of the two theme areas.

All students must achieve an overall average of C (2.0) or better in the nine courses required for completion of the major.

Theme Areas and Theme Area Specialization

Students who complete four upper-division courses in a single theme area will receive departmental recognition and documentation of their “expertise” in the chosen area of specialization – social inequality, or social change and public policy.

Social inequality – courses address the character, causes and consequences of social inequality, paying particular attention to immigration, race, ethnicity, gender, sexualities and/or class. These courses include:

Social Inequality courses

Note: Honors students may substitute SOCI 495 Honors Seminar I for one social change and public policy course.

Bachelor of Arts in Non-Governmental Organizations and Social Change

This interdisciplinary program focuses on the roots of social conflict, on theories and methods for understanding them, and on the non-governmental organizations (NGOs) and nonprofits that address them. To remedy social problems, we need to examine their economic, political and social roots, as well as the varied forms of organizations that aim to fix them. Students will engage in various methods of analysis, from investigations of everyday interactions to explorations of larger economic, political and social structures. In classrooms and internships, students will learn how people in NGOs and nonprofits promote new forms of citizenship and governance, aiming to protect the environment and to lessen the suffering of people around the world.

The major requires nine courses (36 units) chosen from the specific lists of requirements below. As with all interdisciplinary majors, students may double-count no more than three courses from this degree to satisfy any other major.

Course Requirements

A. Lower Division Requirement

Choose one course (4 units) from the following list:

- AMST 262 Black Social Movements in the U.S.
- COMM 201 Rhetoric and the Public Sphere
- ECON 238X Political Economy and Social Issues
- ENST 150X Environmental Issues in Society
- ENST 255 American Environmentalism
- ENST 270 Introduction to Environmental Law and Politics
- GEOL 108L Crises of a Planet
- IR 124 International Relations
- IR 210 International Relations:
  - Introductory Analysis
- PHIL 141 The Profession of the Public
- POSC 248 International Human Rights
- POSC 255 Civilizations, Cultures and Ethnicities in World Politics
- POSC 265 Environmental Challenges
- SOCI 100 Los Angeles and the American Dream
- SOCI 150 Social Problems
- SOCI 200 Introduction to Sociology
- SOCI 225 Sociology of Health and the Body: Social Perspectives
- SOCI 255 Sociology of Globalization
- SWMS 210 Social Issues in Gender
- SWMS 215 Gender Conflict in Cultural Contexts

B. Core Methods

Choose one course (4 units) from the following two:

- SOCI 313 Sociological Research Methods
- SOCI 314 Analyzing Social Statistics
- C. Core Theory

Choose one course (4 units) from the following four:

- PHIL 357 History of Modern Political Philosophy
- PHIL 473 Social and Political Philosophy
- POSC 380 Political Theories and Social Reform

2-4
Choose at least two courses (6 units) from the following areas:

**Sociology Minor Requirements**

- **Five courses (20 units) are required to complete the minor in sociology.**

All minors are required to take at least two of the core courses in sociology:

**Core courses**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOCI 200</td>
<td>Introduction to Sociology</td>
</tr>
<tr>
<td>SOCI 313</td>
<td>Sociological Research Methods</td>
</tr>
<tr>
<td>SOCI 314</td>
<td>Analyzing Social Statistics</td>
</tr>
<tr>
<td>SOCI 370</td>
<td>Sociological Theory</td>
</tr>
</tbody>
</table>

The remaining three courses may be chosen from

- upper-division courses in the two theme areas: second, inequality, and social change and public policy (see sociology theme areas listed above)

**Minor in Forensics and Criminality**

The interdisciplinary minor in forensics and criminality was designed for students interested in the study of law, deviant behavior, and careers in the criminal justice system. This program, students study psychological and/or ethical issues related to criminal behavior, consider criminality in the context of social class analysis, and learn about the American system of criminal justice. Twenty units are required, 4 at the division level, and 6 at the division level. Contact Dornsife College Advising for further details.

**Friends of Business, SOCI 350 Social Exclusion, Social Power, and Deviance, PHIL 340 Philosophy of Law and PPD 342 Crime and Public Policy.**

Those who are interested in the criminal justice system might choose LAW 300X Law and Society, REL 341 Ethics in a Technological Society, SOCI 351 Public Policy and Juvenile Justice, POSC 340 Constitutional Law and POSC 432 The Polioce of Local Criminal Justice.

Those interested in individual and social determinants of deviancy might take PSYC 100 Introduction to Psychology, PSYC 260 Abnormal Psychology, or PSYC 463 Criminal Behavior, or PSYC 465 Introduction to Forensic Psychology. SOCI 360 Social Inequality: Class, Status, and Power, LAW 402 Psychology and Law and SOCI 353 Public Policy and Criminal Justice.

**Choose one course from each group below:**

**Unit requirements**

Choose at least two courses (8 units): AMST 357 Latino Social Movements, BAEP 491 Introduction to Social Entrepreneurship, BUCC 485 Business Communication Management for Nonprofits, COMM 322 Argumentation and Advocacy, COMM 366 Designing Media and Communication Projects for Social Advocacy.

**Ethics of Business, SOCI 350 Social Exclusion, Social Power, and Deviance, PHIL 340 Philosophy of Law and PPD 342 Crime and Public Policy.**

Those who are interested in the criminal justice system might choose LAW 300X Law and Society, REL 341 Ethics in a Technological Society, SOCI 351 Public Policy and Juvenile Justice, POSC 340 Constitutional Law and POSC 432 The Politics of Local Criminal Justice.

Those interested in individual and social determinants of deviancy might take PSYC 100 Introduction to Psychology, PSYC 260 Abnormal Psychology, or PSYC 463 Criminal Behavior, or PSYC 465 Introduction to Forensic Psychology. SOCI 360 Social Inequality: Class, Status, and Power, LAW 402 Psychology and Law and SOCI 353 Public Policy and Criminal Justice.

**Choose one course from each group below:**

**Unit requirements**

Choose at least two courses (8 units): AMST 357 Latino Social Movements, BAEP 491 Introduction to Social Entrepreneurship, BUCC 485 Business Communication Management for Nonprofits, COMM 322 Argumentation and Advocacy, COMM 366 Designing Media and Communication Projects for Social Advocacy.

**Ethics of Business, SOCI 350 Social Exclusion, Social Power, and Deviance, PHIL 340 Philosophy of Law and PPD 342 Crime and Public Policy.**

Those who are interested in the criminal justice system might choose LAW 300X Law and Society, REL 341 Ethics in a Technological Society, SOCI 351 Public Policy and Juvenile Justice, POSC 340 Constitutional Law and POSC 432 The Politics of Local Criminal Justice.

Those interested in individual and social determinants of deviancy might take PSYC 100 Introduction to Psychology, PSYC 260 Abnormal Psychology, or PSYC 463 Criminal Behavior, or PSYC 465 Introduction to Forensic Psychology. SOCI 360 Social Inequality: Class, Status, and Power, LAW 402 Psychology and Law and SOCI 353 Public Policy and Criminal Justice.

**Choose one course from each group below:**

Minor in Managing Human Relations

College Academic Services Building
(313) 740-3534

This interdisciplinary minor is intended for students in all schools with an interest in human relations as a subject of study or professional goal. In addition to course work in organizational behavior, social psychology and management, this minor includes attention to questions of ethics and leadership.

As with all minors, students must include at least four upper-division courses and four courses dedicated exclusively to this minor (not used for credit toward a major, another minor or general education requirements). Finally, students must select four courses outside their major department. Students seeking the Bachelor of Arts in Sociology must choose four courses outside of sociology; those seeking the Bachelor of Science in Business Administration must choose four courses outside the USC Marshall School of Business.

**Lower-division Requirement**

Minor in Photography and Social Change

This minor explores the potential of photography as an instrument of social change that allows individuals to document their circumstances, share their stories and change their lives. Students have the opportunity to examine the impact of images and the power of storytelling both in the classroom and in the field and study the issues raised by this kind of social exploration and commentary.

Students learn techniques of digital photography and theories of culture to help them understand diverse cultural phenomena and navigate their own cultural biases. In the field, students apply these techniques and theories by developing their own body of work. In addition, students can mentor individuals in the community to use photography and digital media to share their personal narratives, thus empowering community members to reflect critically upon their circumstances and to participate in their visual representation.

This interdisciplinary minor brings together students from schools and majors across the USC campus, allowing them to interact with one another and with scholars, artists and professionals associated with key organizations such as the Institute for Photographic Empowerment and Venice Arts.

Minor in Science, Technology, and Society

The beginning of the 21st century has witnessed a growing recognition of the role of science, technology and society in contemporary life. Over the next decades many of the most crucial challenges we face will require the integration of societal values with scientific and technological developments — whether in managing ends of life care, preserving the environment, or continuing to nurture scientific innovation. This minor introduces students to a number of approaches to these questions, taking advantage of the diverse offerings in this area at USC.

* CE 469 and CE 473 are 3-unit courses; choosing one of these courses requires students to take six total courses for the minor.

Total requirements: five or six courses (minimum 20 units)

University Requirements for All Minors

To satisfy the university’s minor requirements, students must choose at least four courses (16 units) outside their major department and at least four courses (16 units) of upper-division course work. In addition, at...
least four courses (16 units) must be dedicated to the
minor (not counting for credit toward a major, another
minor or USC core requirements).

Interdisciplinary Minors
American Studies and Ethnicity (see American Studies
and Ethnicity).
Law and Society (see Political Science).
Race, Ethnicity and Politics (see Political Science).

Graduate Degrees
The Department of Sociology offers programs of study
leading to the Doctor of Philosophy degree. The Ph.D. is
directed toward the training of theoretically and
methodologically sophisticated sociologists who have an
enduring commitment to the practice and teaching of
sociology.

Deadline
Applicants must complete their applications by
December 1. Consideration for university fellowships is
possible as early as November for students whose
applications are complete.

Prerequisites
All applicants must have a bachelor’s degree, a GPA of
at least 3.0, and one or more courses in either
undergraduate statistics or college algebra.

Criteria
Admission to regular graduate status ordinarily
requires possession of a bachelor’s degree, a GPA of
at least 3.0, one or more courses in undergraduate statistics
and/or college algebra, and three letters of
recommendation. The GRE is also required; scores of 550
or better on each of the verbal, quantitative and analytic
portions of the GRE are preferred. International applicants
must also submit their score on the Test of English as a
Foreign Language (TOEFL) or International English
Language Testing System (IELTS). Approximately 6-8
students enroll each year from the available pool of
applicants. Each application receives careful attention
and is judged in terms of the full set of criteria.

A limited number of graduate course units taken
elsewhere may be considered for transfer into the
graduate program. These units are transferred in on a
course-by-course basis.

Application Procedures
The following materials should be submitted to apply
for graduate study:
1. an online USC application form (available at
usc.edu/admission/graduate) plus a check for the
admission fee;
2. official transcripts of all undergraduate and
course work;
3. the official results of the general aptitude scores of
the Graduate Record Examinations (verbal, quantitative,
and analytical);
4. for international students, a TOEFL or IELTS score;
5. a completed Sociology Department Graduate
Application form (please save and upload);
6. one example of written work (normally a paper
written for a course) of no more than 20 pages;
7. three letters of recommendation from persons who
can write about your academic performance and your
potential as a social scientist;
8. a personal statement describing (1) your present
sociological interest, (2) the instructors, books, and/or
journals that have had the greatest influence on your
interests in sociology, and (3) what you hope to be doing
in the field of sociology 10 years after you receive your
degree. Please include any other aspect of your
experience that you want to include.

Degree Requirements
These degrees are under the jurisdiction of the
Graduate School. Refer to the Requirements for
Graduation section and the Graduate School section of
this catalogue for general regulations. All courses applied
toward the degrees must be courses accepted by the
Graduate School.

Residence
All graduate students must be in residence and must
take at least eight units of graduate work each semester
(except during Advanced and Qualifying Examinations),
prior to work on the dissertation.

Master of Arts in Sociology
The department does not admit students whose
objective is a master’s degree. However, if a student
accepted in the program does not have a master’s degree,
the department strongly recommends completion of the
requirements for the M.A. in the course of work toward
the Ph.D. degree.

Doctor of Philosophy in Sociology

Course Requirements
A minimum of 60 graduate units is necessary for the
Ph.D., among which are the following required courses:
SOCI 510, SOCI 520, SOCI 521, SOCI 523 or SOCI 524, SOCI
610, and SOCI 621. In addition, each student must
specialize in two subareas of sociology and must take at
least 8 units in each area such as: urban sociology,
complex organizations, stratification, ethnic relations,
sociology of aging, medical sociology, communication and
culture, deviance, sociology of gender, demography, and
so on.

Screening Procedure
Normally, students must complete the screening
procedure during the third semester of enrollment.
Students will have completed two full semesters of work
by this point and, hence, will have taken no fewer than 16
and no more than 24 units, including at least three of
the following: SOCI 510, SOCI 521, SOCI 523 or SOCI 524, SOCI
610, and SOCI 621. Students are evaluated on subject
matter competence and satisfactory progress. When the
screening procedure is successfully completed, the
student has one semester in which to form a qualifying
exam committee.

Empirical Paper
Each student is required to complete an independent
empirical research project which is approved by two
members of his or her qualifying exam committee. In some
instances, this requirement may be met by acceptance of
a satisfactory master’s thesis from some other university.

Foreign Language Requirement
The department does not generally require proficiency
in a foreign language; however, as with other courses
outside the department, a student’s qualifying exam
committee may in some cases require proficiency in a
foreign language.

Qualifying Examinations
Following the completion of their empirical papers and
most of their course work, students are required to take a
written and oral examination in their two specialty areas.
If the written examination is passed, the oral part of the
examination can be devoted to a preliminary discussion of
dissertation plans. When these are completed
successfully, the student is advanced to Ph.D. candidacy.

Dissertation
After the dissertation is completed, the student and the
dissertation committee, in conjunction with the
department chair, may elect either a defense oral or a
final oral examination in defense of the dissertation. The
defense oral is normally chosen in sociology.

Courses of Instruction
Sociology (SOCI)
The terms indicated are expected but are not
guaranteed. For the courses offered during any given
term, consult the Schedule of Classes.

SOCI 100gm Los Angeles and the American Dream
(4) Los Angeles as a metaphor for the American Dream,
exploring the city’s history and potential futures, including
economic opportunity, social justice, spatial organization,
and environmental sustainability. (Duplicates credit in the
former AMST 100gm and GEOG 100gm.)

SOCI 142gm Diversity and Racial Conflict (4, FaSp)
Introduction to the causes and effects of contemporary
race relations in a diverse U.S. society. Exploration of
racial conflict at the personal and institutional levels.

SOCI 150gm Social Problems (4, Fa)
Analysis of factors in current American social problems: crime,
delinquency, prostitution, family, social problems, race
relations, mental illness.

SOCI 155gm Immigrant America (4, FaSp)
Examination of the immigrant experience in the United
States. Comparative analysis of social context of
migration, formation of immigrant communities, and
social integration of immigrants.

SOCI 169gm Changing Family Forms (4, FaSp)
The peculiarity of the “modern” Western family system in
historical and cross-cultural perspective; focus on the
“postmodern” family crisis in the United States.

SOCI 200m Introduction to Sociology (4) Basic
criteria of sociology with special reference to group life,
social institutions, and social processes.

SOCI 210g Science, Technology, and Social Conflict
(4) Science and technology change society and how we
understand ourselves. In turn, social struggles influence
science. We will explore the interplay between these
forces.

SOCI 220g Questions of Intimacy (4, FaSp)
Analysis of conditions of intimacy and intimate personal
relationships as lenses for understanding social
inequalities of race, social class, gender, sexuality, and
ation.

SOCI 225g Sociology of Health and the Body: Social
Perspectives (4, FaSp) Investigation of health as a social
category and the varied ways that social and cultural
factors shape bodies and health.

SOCI 464 Sociology of Gender and Work (4, FaSp)
Examination of gender inequality in the U.S. labor market; work-family conflict; employer remedies; comparative social policy.

SOCI 468 Sociology of Religion (4) (Enroll in REL 468)

SOCI 470 Development and Social Change in the Third World (4) Theories and case studies on social, economic, political, and cultural development and change in the Third World: Latin America, Asia, or Africa.

SOCI 475 Medical Sociology (4) Social and cultural factors in causation of disease, health care utilization and health care delivery.

SOCI 480 The Sociology of Risk and Disaster (4, FaSp) Is there such a thing as a "natural" disaster? Examination of both natural and technical disasters, and exploration of the centrality of risk in industrialized societies.

SOCI 490 Special Topics (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

SOCI 494 Sociology Honors Seminar I (4, Fa) Advanced seminar involving extensive reading, research and discussions. Selected subjects; offered in fall only and restricted to honors students. Acceptance into the Honors Program.

SOCI 495 Sociology Honors Seminar II (4, Sp) Seminar in workshop form to accompany completion of Senior Honors Thesis under faculty guidance. Acceptance into Honors Program. Prerequisite: SOCI 312, SOCI 484.

SOCI 499 Special Topics (2-4, max 8) An interdisciplinary examination of selected emerging issues.

SOCI 510 Sociological Theory I (4, Fa) Developments in sociological theory from the discipline’s 19th century origins to World War II.

SOCI 520 Qualitative Research Methods (4, Fa) Seminar in epistemologies, ethics, and techniques of qualitative research. Critical reading and practice in social observation, interviewing, fieldwork, and research design. Preparation of IRB proposal.

SOCI 521 Quantitative Methods and Statistics (4, Fa) Introduction to the logic and methods of quantitative analysis in sociology; covers the basic elements of designing and conducting research, summarizing and exploring patterns in data, and making generalizations about populations based on characteristics of samples.

SOCI 522 Advanced Methods – Quantitative Research (4, Sp) Advanced research methodology in survey technique, evaluation research, instrument construction, and demographic analysis.

SOCI 524 Advanced Methods – Qualitative Research (4, Sp) Seminar and practicum in conducting and interpreting original qualitative research. Prerequisite: SOCI 520.

SOCI 525 Sociology Proseminar: Approaches to Sociological Research (4, FaSp) Graduate students begin their customized literature reviews and develop a paper that will frame the research they pursue in the empirical paper requirement. Open only to Sociology doctoral students.

SOCI 530 Sociology of Gender and Sexuality (4, FaSp) Approaches to gender and sexuality within sociology and social theory, highlighting contemporary research on sexualities. Open only to master and doctoral students.

SOCI 532 Seminar in Science and Technology Studies (4, max 8, FaSp) Introduction to key concepts and theories in the interdisciplinary field of science and technology studies.

SOCI 535 Sociology of Culture (4, FaSp) Cultural theories and forms of cultural analysis appropriate for sociological research; critical examination of theory and research on how culture relates to social structure, social inequality, politics, institutions, and everyday interaction. Recommended preparation: SOCI 510 or prior undergraduate or graduate course work in social science or communication studies.

SOCI 537 Political Sociology: Politics, Symbols and Everyday Life (4, FaSp) Political power, conflict and apathy; public symbols, debate and discourse; nationalism; relations between politics, provision of social services and economics in comparative and historical perspective.

SOCI 540 Methods of Population and Ecological Analysis (2-4, Sm) Measures of population; ecological structure and change; life table methods; population estimates, projections, forecasts; distributional analysis and evaluation of demographic and ecological data. Prerequisite: SOCI 521.

SOCI 545 Seminar in World Population Problems (4) Demographic characteristics of the major regions of the world; social, economic, and political implications of population trends and methods of demographic analysis. Prerequisite: SOCI 332.

SOCI 548 Fertility Control Policies (4, Sm) Fertility control policies, and their consequences, including family planning and other pronatalist and antinatalist programs.

SOCI 549 Migration Policies (4) Analysis of migration and population redistribution; policies affecting such migration and redistribution.

SOCI 550 Seminar in Organizational Analysis (4) Literature evaluation, theory building, and research in the area of large-scale organizations and other types of institutionalized groups. Prerequisite: graduate standing.

SOCI 551 Seminar in Social Stratification (4) Critique of research literature and research methods in the area of social class and social stratification; major theories and theoretical implications of current research.

SOCI 552 Sex and Gender in Society (4, Fa) The social organization of gender in the contexts of work, families, intimacy, sexuality, reproduction, violence. Variations by race, ethnicity, social class. Processes of social change.

SOCI 554 Women in Global Perspective (4) (Enroll in SWMS 554)

SOCI 555 Seminar in Race Relations (4, Sp) Current racial problems in the United States and other countries; critiques of race relations literature.

SOCI 560 Feminist Theory (4) (Enroll in SWMS 560)

SOCI 566 Seminar in Social Deviance (4) Deviance and social rules in groups and communities; contemporary social policies involving ethnic, cultural, and social factors.

SOCI 571 Urban Sociology (4, FaSp) Examination of theories and research on cities in the United States, examining issues such as politics, race, development, and inequality. Open only to master’s, professional, or doctoral students.

SOCI 575 Seminar in Immigration (4, FaSp) Survey of key theoretical approaches and relevant issues in immigration studies. Themes include: transnationalism, globalization, gendered migration, segmented assimilation, immigrant labor markets, social incorporation and citizenship. Open to Ph.D. in Sociology students only.

SOCI 580 Seminar in Aging (4) Research seminar to review identification of problems, issues of theory, and methodology and implications for research designs.

SOCI 590 Directed Research (1-12, FaSpSm) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SOCI 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

SOCI 594abz Master’s Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

SOCI 599 Special Topics (2-4, max 8, FaSp) Seminar in selected topics in sociology.

SOCI 610 Sociological Theory II (4, Sp) Developments in sociological theory from World War II to the present.

SOCI 611 Quantitative Methods and Statistics II (4, Sp) Casual modeling and the inter-relationships among social phenomena: covers the basic elements of causal inference and generalizability, linear regressions analysis, and categorical data analysis. Prerequisite: SOCI 521.

SOCI 628 Theories of Aging (4) (Enroll in GERO 628)

SOCI 635 Seminar in Social Structure (4) Research and theory development on the interrelations among the various structures that comprise social systems. An examination of large societal units. Prerequisite: advanced graduate standing.

SOCI 650 Topical Issues in Crime and Delinquency (2-4) Seminar in selected topics in criminology.

SOCI 664 Seminar in Advanced Methodology (4, max 8) Issues and problems in advanced research design and data analysis.

SOCI 790 Research (1-12, FaSp) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SOCI 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Sophomore Seminars

Sophomore Seminars focus on topics of current interest in research and scholarship. They are small classes that encourage close interaction between faculty and students.

During the fall and spring semesters, sophomores earn 2 units of credit through participation in these weekly seminars. During intensive special sessions, sophomores earn 1 unit of credit. These courses emphasize active exploration of the life of the mind through a variety of classroom activities and assignments.

To encourage a relaxed interchange of information and ideas, each seminar is graded credit/no credit and limited in enrollment to 18 students.

Sophomore Seminars will be offered for the fall and spring semesters in a variety of subjects. They will also be...

Chair: Erin Graff Zivin, Ph.D.
Interim Chair: Sherry Velasco, Ph.D.

Faculty
Professors: Mario Saltarelli, Ph.D.; Sherry Marie Velasco, Ph.D.*
Associate Professors: Roberto Ignacio Díaz, Ph.D.*; Erin Graff Zivin, Ph.D.; Julián Daniel Gutiérrez-Albilla, Ph.D.; Teresa McKenna, Ph.D. (English)
Assistant Professors: Brenno Kenji Kaneyasu-Maranhao, Ph.D.; Samuel Steinberg, Ph.D.
Associate Professor (Teaching) and Director of Spanish Language Program: Gabriela Zapata, Ph.D.
Associate Professor (Teaching): Marianna Chodorowska-Pilch, Ph.D.
Assistant Professors (Teaching): Gayle Fiedler Vierma, Ph.D.; Anahit Hakoussian, Ph.D.; Ana Teresa Martinez-Queiruga, Ph.D.; Andrea Parra, Ph.D.; Charles Paus, Ph.D.; Consuelo Sigüenza-Ortiz, Ph.D.; Liana Stepanyan, Ph.D.; David Zarazua, Ph.D.
Senior Lecturer: Lorena Gallego, M.A

Lecturers: Vianey Cano Brito Cabrera, Ph.D.; Carolina Castillo Larrea, M.A.; Jaclyn Cohen-Steinberg, Ph.D.; Maura Crowley, Ph.D.; Marie Enright, Ph.D.; María Fages Agudo; Ivette M. Gómez, Ph.D.; Leah Kemp, Ph.D.; Lori Mesrobian, Ph.D.; Ellen Oliveira, Ph.D.; Sarah Portnoy, Ph.D.

Emeriti Professors: Paul Ilie, Ph.D.; Carmen Silva-Corvalán, Ph.D.*
Emeritus Associate Professor: J. Ramón Araluce, Ph.D.

* Recipient of university-wide or college teaching award.

Undergraduate Programs

The Department of Spanish and Portuguese offers both a major and a minor in Spanish, emphasizing the language, linguistics and culture of Spain and Latin America.

With an intellectual commitment to multiculturalism and interdisciplinarity, the undergraduate program actively explores the transnational intersection of various aspects of Spanish and Latin American culture, including literature, folklore, cinema, art, music and architecture. While living and studying in 21st century Los Angeles – the ideal site for thinking about the planet’s increasingly transcultural condition – students are challenged to consider and reconsider a number of important issues: the growing importance of popular culture in Iberia, Latin America and Latino USA; the role of race, class and gender within Spanish and Latin American society; the crucial impact of diasporas and migrations on our contemporary cultural landscape; among many others.

The department encourages students to combine a Spanish major with a double major or minor in another discipline either within the USC Dornsife College of Letters, Arts and Sciences or other schools at USC. Faculty undergraduate advisers are available to help provide information and assistance to students wishing to explore these various options.

The department also offers basic language instruction in both Spanish and Portuguese through which students can satisfy their foreign language requirement.

Graduate Programs

The Ph.D. in Linguistics (Hispanic Linguistics) is offered through the Linguistics Department. See here for degree requirements. The M.A. and Ph.D., Comparative Studies in Literature and Culture (Spanish and Latin American Studies) are offered through the Comparative Studies in Literature and Culture program. See here for degree requirements.

Spanish Undergraduate Students Association (SUSA)

Students majoring or minoring in Spanish are eligible to join USA, the Spanish Undergraduate Students Association. Each year USA sponsors a variety of activities which enrich the cultural, intellectual and academic experience of the undergraduate student.

Undergraduate Degrees

General Information

Spanish Language Proficiency Examination

Students with previous exposure to Spanish are required to take a placement test, administered by the Center for Testing and Assessment. Students with no record of previous exposure to Spanish are not required to take the placement examination and should contact the department for assistance.

Courses in Spanish

All courses at the 200, 300 and 400 levels are conducted in Spanish unless otherwise noted in the course descriptions that follow. Courses are kept small to allow for maximum interaction between students and professors.

Advisement

A college undergraduate adviser is assigned to provide academic advisement prior to registration and throughout the academic year.

Electives (16 units):

Four other upper-division SPAN courses.

Only one section of SPAN 316x may be taken for major or minor credit.

Honors Program

The B.A. in Spanish with Honors is available to students who have a GPA of at least 3.5 in courses counted for major credit and an overall GPA of 3.0 (by the time of graduation). Desire to complete the major with honors typically should be approved by a department faculty member no later than the second semester of the junior year. To complete the honors program the student must write an honors thesis in Spanish in conjunction with a 400-level course. The thesis, in the range of 25-30 pages (6,250-7,500 words), must be endorsed by a departmental honors committee by April 1 of the senior year.

* Majors and minors may request a waiver of one or both courses (SPAN 260 and/or SPAN 261) if they meet one or more of the following prerequisites: a) a score of 5 on the Spanish language or literature advanced placement (AP) exam; b) a score of 6 or 7 on the Spanish International Baccalaureate Higher-Level exam (IBHL); c) a score of 800 in the Spanish SAT subject exam; or d) demonstrate advanced proficiency in spoken and written Spanish. Departmental approval is required in every case.

** SPAN 260 and SPAN 261 may be taken concurrently. The second of these courses may be taken concurrently with a 300-level course.

Minor in Spanish

* The second 260-type course may be taken concurrently with upper-division courses.
Majors and minors may request a waiver of one or both courses (SPAN 265 and/or SPAN 266) if they meet one or more of the following prerequisites: a) a score of 5 on the Spanish language or literature advanced placement (AP) exam, b) a score of 6 or 7 on the Spanish International Baccalaureate Higher-Level exam (IBHL), c) a score of 800 in the Spanish SAT subject exam or d) demonstration of advanced proficiency in spoken and written Spanish. Departmental approval is required in every case.

SPAN 265 and SPAN 266 may be taken concurrently. The second of these courses may be taken concurrently with a 300-level course.

Minor in Latin American Studies

The Latin American Studies minor recognizes the lasting importance of U.S.-Latin American relations. The overriding goal is to encourage students to learn more about Latin America by combining conceptual, area and language studies during their time at USC. The purpose of this 20-unit minor is to deepen students’ knowledge of Latin America by offering courses from multiple disciplines within a context of close faculty guidance. The gateway requirement of one 4-unit course provides the student with options in both humanities and the social sciences, and the designated electives are similarly meant to allow students to blend these specialties.

For fulfillment of the requirements for the minor a student must choose four classes outside of his or her major department dedicated exclusively to the minor (which may be the same four courses). After the gateway course, these elective courses must be spread across at least two disciplines and/or departments.

Required Courses

One of the following 4-unit gateway introductory courses: REL 123, COLT 250, HIST 273, HIST 372, IR 364, IR 367, POSC 350

if the student has chosen a lower-division (100- or 200-level) course among the introductory choices, all area electives must be at the upper-division (300- or 400- level).

Elective Requirements

Four courses (16 units) from the following list: AHIS 127, AHIS 128, AHIS 318, AHIS 319, AHIS 411, AMST 448, ANTH 442, COLT 250, ECON 340, GEOG 335, HIST 273, HIST 370, HIST 371, HIST 372, HIST 461, HIST 465, HIST 470, HIST 471, HIST 474, IR 364, IR 365, IR 408, IR 428, IR 454, IR 465, IR 466, PORT 250, POSC 350, POSC 430, POSC 431, SOCI 366, SOCI 420, SPAN 320, SPAN 321, SPAN 372, SPAN 450, SPAN 495

Graduate Degrees

The Ph.D. in Linguistics (Hispanic Linguistics) is offered through the Linguistics Department. See here for degree requirements. The M.A. and Ph.D., Comparative Studies in Literature and Culture (Spanish and Latin American Studies) are offered through the Comparative Studies in Literature and Culture program. See here for degree requirements.

Certificate in Foreign Language Teaching

The Certificate in Foreign Language Teaching provides certification in the theory and practice of second or foreign language teaching for student language teachers concurrently enrolled in graduate degree programs in foreign languages or related graduate programs at USC; for graduates of such programs who are teaching languages; for external candidates concurrently enrolled in similar programs in accredited colleges or universities; or for graduates of such programs who are teaching languages. The certificate is meant to supplement graduate study in the literature or linguistics of foreign languages. It is also meant to supplement classroom teaching. Therefore all candidates for this certificate are required to have taught a second or foreign language for at least one academic year at USC or elsewhere. At USC, this requirement and the course work requirements can be fulfilled concurrently, but external candidates are required to show proof of such teaching experience as a condition of admission.

In addition to teaching, certificate candidates must complete a minimum of four courses (minimum of 12 units) in four areas of study – linguistics, language acquisition, language teaching methodology, and the teaching of literacy or the literature or culture of a second or foreign language.

Requirements for Completion

The program consists of a practicum and a minimum of four courses: one each in linguistics, language acquisition, language teaching methods, and the teaching of literacy, literature or culture. Linguistics: (minimum of 3 units) LING 441 Linguistics and Education or, with permission of instructor, an appropriate course in the linguistics of a particular language. Language Acquisition: (minimum of 3 units) LING 527 Second Language Acquisition or an appropriate alternative course. Language Teaching Methods: (minimum of 3 units) MDA 593 Practicum in Teaching the Liberal Arts or EALC 562 Teaching of the East Asian Languages or SPAN 511 Techniques and Procedures of Teaching Spanish as a Second Language or an appropriate alternative course. Literacy/Literature/Culture: (minimum of 3 units) An appropriate course in teaching of the literature or culture of a particular language.

Courses of Instruction

Spanish and Portuguese

Spanish (SPAN)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

SPAN 2020 Spanish for Reading Knowledge (0)
Preparation for the ETS standardized examination, with readings related to the student’s major area. Offered upon sufficient demand. Not available for degree credit. Graded CR/NC.

SPAN 120 Spanish I (4)
For students with limited proficiency in Spanish. Practice in listening comprehension, oral communication, elementary reading and writing. Prerequisite: SPAN 100.

SPAN 150 Spanish II (4)
Continuation of SPAN 120; increased emphasis on listening comprehension, oral communication, reading, and writing. Prerequisite: SPAN 120.

SPAN 220 Spanish III (4)
Continuation of SPAN 150; intensive work in listening comprehension, oral communication, reading and writing, with emphasis on free expression; readings related to Hispanic culture and civilization. Prerequisite: SPAN 150.

SPAN 231X Spanish for Business Communication: The Job Search (2)
Four-skills language and culture course. Culminating tasks executed in Spanish; professional dossiers, simulated job search, formal face-to-face job interview, and telephone job interview. Not open to Spanish majors. Not available for major credit to Spanish majors. (Duplicates credit in SPAN 250.) Prerequisite: SPAN 220.

SPAN 232X Spanish for Business Communication: The Business (2)
Four-skills language and culture course. Culminating tasks executed in Spanish; written company profiles and a critical analysis of an NGO presented orally to the class. Not open to Spanish majors. Not available for major credit to Spanish majors. (Duplicates credit in SPAN 250.) Prerequisite: SPAN 220.

SPAN 233X Spanish for Business Communication: The Case Study (2)
Four-skills language and culture course. Culminating tasks executed in Spanish; case studies analyzed and presented in writing and orally. Not open to Spanish majors. Not available for major credit to Spanish majors. (Duplicates credit in SPAN 250.) Prerequisite: SPAN 220.

SPAN 240 Spanish IV (4, FaSpSm)
Intensive review of Spanish grammar with emphasis on four skills. Audiovisual materials and readings related to Hispanic culture and civilization. Prerequisite: SPAN 220.

SPAN 245 Spanish Through Social Issues in Costa Rica (4, Sm) (Costa Rica Summer Program only), Intensive review of Spanish grammar with emphasis on four skills. Audiovisual materials, guest speakers, and readings related to the history and culture of Costa Rica. Concurrent enrollment: SPAN 220.

SPAN 250X Spanish for Business Communication (4)
Four-skills language and culture course for intermediate-high Spanish students interested in Business/Communications. Prepares students to communicate in the Spanish-speaking commercial market in a linguistically sensitive manner. Not available for credit to Spanish majors and minors. Prerequisite: SPAN 240.

SPAN 260 Advanced Spanish: Arts and Sciences (4, FaSpSm)
Development of students’ oral and writing skills using literary and scientific materials; grammar review. (Duplicates credit in the former SPAN 266.) Prerequisite: SPAN 220.

SPAN 261 Advanced Spanish: Society and the Media (4, FaSpSm)
Analysis of cultural issues in the Spanish-speaking world. Discussions, presentations, writing assignments, and grammar instruction designed to improve students’ proficiency in Spanish. (Duplicates credit in the former SPAN 266.) Prerequisite: SPAN 220.

SPAN 270 Spanish for Native Speakers (4, FaSpSm)
For speakers with an advanced level of oral proficiency, but no previous formal study of Spanish. Focus on grammar, spelling and punctuation, reading, and writing.

SPAN 280x Conversational Spanish (2, max 4, FaSpSm)
Discussions of short films, cultural and literary texts and other activities designed to improve conversational skills. Not for credit for Spanish majors. Prerequisite: SPAN 220.

SPAN 301 Introduction to Hispanic Literature and Film (4, FaSpSm)
Introduction to critical reading and interpretation of poetry, narrative fiction, drama, and film from Spain and Latin America. Prerequisite: SPAN 260, SPAN 261.

SPAN 302 Survey of Film (4, FaSpSm)
A survey of Spanish and Latin American cinema from the silent film era to the present, acquainting students with various critical and theoretical approaches to cinema studies.
Prerequisite: SPAN 260, SPAN 261; recommended preparation: SPAN 301.

SPAN 304 Survey of Fiction (4, FaSp) A survey of Spanish and Latin American fiction from the Middle Ages to the present, acquainting students with various critical and theoretical approaches to narrative. Prerequisite: SPAN 260 and SPAN 261.

SPAN 306 Survey of Drama (4, FaSp) A survey of Spanish and Latin American plays from the Middle Ages to the present, acquainting students with various critical and theoretical approaches to drama. (Duplicates credit in former SPAN 305.) Prerequisite: SPAN 260 and SPAN 261.

SPAN 308 Survey of Poetry (4, FaSp) A survey of Spanish and Latin American poetry from the Middle Ages to the present, acquainting students with various critical and theoretical approaches to verse. (Duplicates credit in former SPAN 309.) Prerequisite: SPAN 260 and SPAN 261.

SPAN 310 Structure of Spanish (4, FaSp) A systematic study of the structure of Spanish. Topics include fundamental aspects of the sound system; word classes; sentences and their meaning; linguistic change and variation; standard and colloquial usage. Prerequisite: SPAN 260 and SPAN 261.

SPAN 311 Advanced Spanish Through Contemporary Issues: Oral Emphasis (4, Sm) (Summer sessions abroad) Advanced Spanish with emphasis on grammar and oral communication. Recommended preparation: SPAN 260 or SPAN 261.

SPAN 312 Spanish and Latin American Cultures: Readings on Society (4, FaSp) Contrasting study of Spanish and English structures designed to explore the similarities and differences between the two languages and to familiarize students with translation techniques. Emphasis on a variety of text types with the aim of increasing linguistic and cultural appreciation of the Spanish language. Prerequisite: SPAN 260 and SPAN 261.

SPAN 316X Spanish for the Professions (4, max 8, FaSp) The language and culture of a particular area of study or profession, such as medicine and healthcare, political and social sciences, business and the law. Limited to 4 units for major or minor credit. Prerequisite: SPAN 260 and SPAN 261.

SPAN 320 Iberian and Latin American Cultures: Readings on Literature (4, FaSp) An exploration of the rich cultural diversity of the Iberian Middle Ages in the symbiosis of Christian, Moslem and Jewish traditions. (Duplicates credit in former SPAN 377 and former SPAN 379.) Prerequisite: SPAN 260 and SPAN 261.

SPAN 321 Iberian and Latin American Cultures: Readings on the Arts (4, FaSp) An exploration of the rich cultural diversity of the Iberian Middle Ages in the symbiosis of Christian, Moslem and Jewish traditions. (Duplicates credit in former SPAN 377 and former SPAN 470.) Prerequisite: SPAN 260 and SPAN 261.

SPAN 322 Advanced Conversation and Culture (4) (Madrid Summer Program) Conversation based on study of Spanish art and architecture. Field trips.

SPAN 350 Cultural Cross-Currents of the Iberian Middle Ages (4, FaSp) Selected readings from 1100 to 1499 examining the rich cultural diversity of the Iberian Middle Ages in the symbiosis of Christian, Moslem and Jewish traditions. (Duplicates credit in former SPAN 377 and former SPAN 470.) Recommended preparation: SPAN 304 or SPAN 306 or SPAN 308.

SPAN 351 The Transatlantic Golden Age: New Worlds Real and Imagined (4, FaSp) Selected readings from 1500 to 1700 exploring Renaissance and baroque visions of the classical and new worlds. Recommended preparation: SPAN 304 or SPAN 306 or SPAN 308.

SPAN 352 Modern and Contemporary Latin American Fiction (4, FaSp) Study of major trends in Latin American fiction from the 1930s to the present with a focus on narrative experimentation. Recommended preparation: SPAN 304 or SPAN 306 or SPAN 308.

SPAN 353 Modern and Postmodern Spanish Fiction (4, FaSp) An exploration of the literary and filmic narratives of contemporary Spain focusing on the major historical and cultural movements of the 20th century. (Duplicates credit in former SPAN 378.) Recommended preparation: SPAN 304 or SPAN 306 or SPAN 308.

SPAN 355 Latin American Cultural and Literary Theory (4) (Enrol in COLT 375) A study of the rich cultural diversity of the Iberian Middle Ages (4, FaSp) A survey of Spanish and Latin American plays from the Middle Ages to the present, acquainting students with various critical and theoretical approaches to drama. (Duplicates credit in former SPAN 305.) Prerequisite: SPAN 260 and SPAN 261.

SPAN 380 Literature of Mexico (4) Principal writers and their works from Colonial times to the present. Non-majors may write assignments in English. Recommended preparation: advanced comprehension of oral and written Spanish.

SPAN 385 The Culture of Food in Hispanic Los Angeles (4, FaSp) Experiential learning and project-based course designed to familiarize students with the food culture of Hispanic Los Angeles. Students create Spanish language blogs about their experiences. Prerequisite: SPAN 260 and SPAN 261.

SPAN 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

SPAN 391 Introduction to Contemporary Spanish Literature (4) Readings in contemporary Spanish literature. Includes lectures by recognized Spanish writers and scholars.

SPAN 401 History of the Spanish and Portuguese Languages (4) Development of sounds, forms, words, meanings and structures from their origins to modern Spanish and Portuguese. Prerequisite: SPAN 310 or SPAN 316.

SPAN 412 Spanish Rhetoric and Style (4, FaSp) Close grammatical and rhetorical analysis of a variety of text types (general, literary, technical, journalistic) as the basis for practice in advanced written and oral expression as well as translation. Prerequisite: SPAN 310 or SPAN 315.

SPAN 413 Social and Geographic Varieties of Spanish (4, FaSp) Historical, social, and cultural elements represented in the dialectal diversity of the Spanish language; fieldwork in bilingual communities in the United States. Majors prepare assignments in Spanish, non-majors in English. Conducted in Spanish and English. Prerequisite: reading knowledge of Spanish.

SPAN 420 Spanish Language Acquisition (4, FaSp) A study of the bilingual acquisition of Spanish and English by children, and of Spanish as a second language by adults; focus on linguistic, psychological and social factors. Prerequisite: SPAN 310 or SPAN 315.

SPAN 425 Picaros and the Picaresque Novella (4, FaSp) A study of the picaresque novel in Spain and Latin America as a medium of social, political, and cultural criticism. Recommended preparation: SPAN 304 or SPAN 306 or SPAN 308.

SPAN 444 Introduction to Contemporary Spanish Theatre (4) (Madrid Center only) Historical evolution of the contemporary Spanish theatre; readings of dramatic texts supported by attendance at live stage performances. Recommended preparation: SPAN 304 or SPAN 306 or SPAN 308.

SPAN 445 Introduction to Contemporary Spanish Theatre (4) (Madrid Center only) Historical evolution of the contemporary Spanish theatre; readings of dramatic texts supported by attendance at live stage performances. Recommended preparation: SPAN 304 or SPAN 306 or SPAN 308.

SPAN 446 Cultural Perspectives of the Iberian Peninsula (4, Sm) (Madrid Summer Program) Study of cultural plurality in the Iberian Peninsula. Recommended preparation: SPAN 260 or SPAN 261.

SPAN 447 Argentina, Society and the Arts (4, Sm) Study of the arts in the cultural landscape of Argentina and in the context of developments in Europe, Latin America and the United States. Recommended preparation: SPAN 260 or SPAN 261.

SPAN 455 Immigration in Spain (4, Sm) Sociopolitical issues of immigration in Spain, including economic impact, legal evolution, history, geographic location, and culture. Prerequisite: SPAN 260 or SPAN 261.

SPAN 470 Literature and Media in Latin America (4) (Enrol in COLT 470) An examination of popular culture and literary genres with an emphasis on the evolving canons and identities of Latin America and Spain. Recommended preparation: SPAN 304 or SPAN 306 or SPAN 308.

SPAN 482 Literature and the City (4, FaSp) An examination of the literary representations of urban spaces and cultures within the context of Iberian, Latin American, and U.S. Latino societies. Recommended preparation: SPAN 304 or SPAN 306 or SPAN 308.

SPAN 483 Literature and Gender (4, FaSp) An examination of gender, sexuality, and power in Iberian and Latin American literatures and cultures. Recommended preparation: SPAN 304 or SPAN 306 or SPAN 308.

SPAN 484 Studies in Visual and Material Culture (4, FaSp) An examination of the role of visual and material culture in cultural and social context in the Hispanic world, focusing on a selected time period and geographical region. Recommended preparation: SPAN 260 and SPAN 261 if taken for Spanish major credit.

SPAN 490 Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

SPAN 495 Seminar for Majors and Minors (2) Two options: (1) Study of a major work or writer, a principal literary theme or movement; or (2) a selected topic in Spanish language and linguistics. Recommended preparation: two courses in the upper division in the same area as the seminar topic (e.g., language or literature).

SPAN 499 Special Topics (2-4, max 8)

SPAN 500 Cultural Narratives of Spain and Latin America (4) Theoretical and methodological approaches to cultural narratives in Spanish and Latin American literary and cultural studies.

SPAN 511 Techniques and Procedures of Teaching Spanish as a Second Language (3) Practical classroom application of language teaching methods; evaluation of available textbooks; critique of master classes.

SPAN 513 Spanish Morphology and Phonology (3, FaSp) A survey of research on the interaction between Spanish morphology and phonology in light of critical readings and discussion of selected studies as contributions to the general theory of grammar. (Duplicates credit in former SPAN 512.)
SPAN 514 Spanish Syntax (3, FaSp) A survey of Spanish syntax in the light of critical readings and discussion of selected studies and their comparative contribution to grammatical theory.

SPAN 515 Spanish Grammar in Discourse (3, FaSp) Semantic and pragmatic approaches to the analysis of the structure of Spanish sentences and discourse.

SPAN 516 Historical Aspects of Spanish and Portuguese (3, FaSp) Processes of language change in the development of the Spanish and Portuguese languages from their origin in spoken Latin to their modern stage.

SPAN 518 Spanish Sociolinguistics (3, FaSp) Principles of sociolinguistics and dialectology: sociolinguistic patterns in the Hispanic languages.

SPAN 522 Medieval and Early Modern Spanish World (4, max 8) Study of literature and other cultural artifacts pertaining to the Middle Ages in Spain and the early modern world in both Spain and the Americas.

SPAN 523 The Transatlantic 19th Century (4, max 8) Study of authors, texts and literary and cultural currents in Spain and Latin America in the 19th century.

SPAN 524 20th and 21st Century Spanish Literature and Culture (4, max 8) Study of cultural currents, authors, literary texts, films and other media in Spain in the 20th and 21st centuries.

SPAN 525 20th and 21st Century Latin American Literature and Culture (4, max 8) Study of cultural currents, authors, literary texts, films and other media in Latin America in the 20th and 21st centuries.

SPAN 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SPAN 592 Practicum in Teaching Spanish (2) Approaches and techniques in the teaching of Spanish and/or Portuguese as a second language. Open only to Master and Doctoral students in Comparative Literature, Comparative Culture in Literature and Studies (Spanish and Latin American Studies), Linguistics (Hispanic Linguistics) and Spanish.

SPAN 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

SPAN 594ab Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

SPAN 596 Research Methods in Spanish Linguistics (3) Examination of various research methods as applied to the study of the Spanish language; mechanics of organizing, conducting and presenting research in Spanish linguistics.

SPAN 602 Seminar in Spanish and Latin American Critical Theory (4, max 8) Major developments in literary criticism in Spain and Latin America from the early modern period to the present.

SPAN 603 Seminar in the Cultural History of Spain and Latin America (4, max 8) Literary and cultural currents in Spain and Latin America, with varying focus on genres, periods, movements and problems.

SPAN 604 Seminar in Gender and Sexuality in Spain and Latin America (4, max 8) Construction and representation of gender and sexuality in Spanish and Latin American literature and culture.

SPAN 606 Seminar in Visual Culture in Spain and Latin America (4, max 8) Major currents in film and other media in Spain and Latin America.

SPAN 650 Topics in Spanish and Latin American Literature and Culture (4, max 8) Study of topics in Spanish and Latin American literature and culture across periods, genres and nations.

SPAN 652 Seminar on a Major Topic in Hispanic Linguistics (3, max 9, FaSp) Analysis of selected topics of current interest as reflected primarily in the most recent literature.

SPAN 672 Seminar in Spanish Morphophonology (3, max 9, FaSp) Selected topics in Spanish morphology and phonology.

SPAN 674 Seminar on Spanish Syntax and Semantics (3, max 9, FaSp) Detailed analysis of topics in modern Spanish syntax and semantics.

SPAN 700 Colloquium in Hispanic Literature and Linguistics (1, max 3) Discussion and presentation of papers on a variety of topics in the areas of Hispanic language and literature. Graded CR/NC. Prerequisite: any 600 level Spanish seminar.

SPAN 790 Directed Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SPAN 794abcd Doctoral Dissertation (2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Portuguese (PORT)

PORT 120 Portuguese I (4, FaSp) For students with no proficiency in Portuguese. Practice in listening comprehension, oral communication, elementary reading and writing.

PORT 150 Portuguese II (4, FaSp) For students with some language proficiency in Portuguese; increased emphasis on listening, comprehension, oral communication, reading, and writing. Students will be required to take a Portuguese placement exam in the Spanish and Portuguese Department.

PORT 220 Portuguese III (4, FaSp) Intensive work in listening comprehension, oral communication, reading and writing, with emphasis on free expression; readings related to Portuguese culture and civilization. Prerequisite: PORT 150.

PORT 240 Portuguese IV (4) Four-skills course with review of grammar. Writing and reading intensive. Authentic materials related to Lusobrazilian culture and civilization. Prerequisite: PORT 220.

PORT 250g Cultures of Brazil and Lusophone Africa (4, FaSp) Comparative study of Brazil in the context of the Lusophone (Portuguese-speaking) world, especially Portugal's former colonies in Africa. Materials drawn from literature, visual culture, music and cultural theory.

PORT 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

PORT 590 Directed Research (1-12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Spatial Sciences Institute

Allen Hancock Foundation Building 855
(213) 740-5310
FAX: (213) 740-9687
Email: spatialsciences@dornsife.usc.edu

Director: John P. Wilson, Ph.D.

Faculty

Professor: John P. Wilson, Ph.D.*

Professor of the Practice of Spatial Science: Karen K. Kemp, Ph.D.

Associate Professor (Research): Travis R. Longcore, Ph.D.

Assistant Professor (Teaching): Jennifer N. Swift, Ph.D.

* Recipient of university-wide or college teaching award.

The programs and courses affiliated with the Spatial Sciences Institute explore the various ways in which space is used to acquire, represent, organize, analyze, model and visualize information. They seek to engage students enrolled in a range of academic programs in the natural and social sciences, the humanities and the professional schools.

The Bachelor of Science in GeoDesign is an interdisciplinary major offered by the Dornsife College of Letters, Arts and Sciences, the USC School of Architecture and the USC Price School of Public Policy. This degree prepares students for professional careers and/or graduate study.

The undergraduate minor in spatial studies explores how maps and related geospatial techniques may be used to describe, explore and interpret specific places and the natural and human processes.

The M.S. in Geographic Information Science and Technology provides state-of-the-art training in the core geographic information technologies (GIS, GPS and remote sensing, among others) and the underlying scientific principles and concepts that guide their design and use. This is an online program and may be taken by undergraduate students majoring in other disciplines as a progressive master's degree.

The Graduate Certificate in Geographic Information Science and Technology incorporates the same online core courses and electives as the master’s degree and may be taken by master’s and doctoral students majoring in other disciplines.

Undergraduate Program

Bachelor of Science in GeoDesign
The Bachelor of Science in GeoDesign is an interdisciplinary major offered by the Dornsife College of Letters, Arts and Sciences, the USC School of Architecture, and the USC Price School of Public Policy. This degree prepares students for professional careers and/or graduate study by engaging them in the acquisition, representation, analysis, modeling and visualization of spatial information set in the context of the built environment and policy. The underlying spatial principles, methods and tools can be used to support sustainable planning, facility and infrastructure management, the design of livable and healthy communities, and a series of regional planning applications to address pollution, water and energy needs, and the impact of population growth on the environment. The major electives provide students with opportunities to explore one or more facets of the built environment and a series of complementary analytical and visualization tools in more detail. Finally, the major is structured to provide students with sufficient elective credits to explore minors or other programs at USC so they can broaden their education to better prepare themselves for the next stage of their lives.

General Education Requirements

The university’s general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core.

Major Requirements

A minimum grade of C, 2.0 (A = 4.0) must be earned in each of the core courses and the capstone course. In addition, a minimum grade point average of C (2.0) or higher must be achieved in the major to earn the geodesign degree. No more than 16 units of core courses may be taken prior to the successful completion of the geodesign pre-major requirements.

Pre-major Requirements

Both pre-major requirements must be taken for a letter grade and a minimum grade of C, 2.0 (A = 4.0), must be earned in each of the pre-major courses.

Pre-major Courses (8 Units)

Capstone Course

All students will take four units of a capstone experience during their senior year. This may be fulfilled by taking SSCI 412L GeoDesign Practicum (4 units) which may be offered by any of the three units cross-listed (SSCI, ARCH, PPD) and will require students to use their knowledge and skills on a real project with a real client.

Major Electives (24 Units)

A suite of courses that further the development of practical, theoretical, and field knowledge and skills, including computer graphics, drawing, policy analysis, public finance, and statistics. Choose additional electives from the two lists equal to at least six courses (24 units) in all. At least two courses must come from Group A and two courses from Group B.

HONORS

Candidates for the B.S. in GeoDesign can receive an honors degree by meeting these requirements: a 3.7 GPA in department courses at the time of graduation; completion of an honors research project or thesis under the guidance of a faculty member (SSCI 412L). Admission to the program is granted by the departmental undergraduate advisor in the semester preceding enrollment in SSCI 412L; students should have a 3.7 GPA in the major at this time.

Minor in Spatial Studies

The spatial studies minor requires a minimum of 20 units, consisting of one lower-division elective, three required courses and an upper-division elective. The minor offers students an opportunity to examine some of the major challenges of the 21st century (climate change, human health and sustainability, urbanization and cultural homogenization, among others) through a spatial lens.

Graduate Degrees

Master of Science in Geographic Information Science and Technology

AHF 85X8

[213] 740-8289

Email: klebey@dornsife.usc.edu

Director: John P. Wilson, Ph.D.

The online M.S. in Geographic Information Science and Technology requires 28 units of graduate work and provides state-of-the-art training in the core geographic information technologies (geographic information systems, global positioning systems and remote sensing, among others) and the underlying scientific principles and concepts that guide their design and use. The individual courses incorporate multiple curricular pathways tailored to the increasingly diverse backgrounds, occupations and applications that rely on geospatial data, analysis and visualization.

Course Requirements

Twenty-eight units of graduate work are required.

All electives are chosen in direct consultation with the student’s academic adviser based on background, academic interests, etc.

The courses in this program are open to students living in the core geographic information science and technology and offer the option of working from home or working anywhere, including students at USC’s Los Angeles, Orange County, Sacramento and Washington, D.C. centers. The master’s program can be completed in

336
two to three years as long as students take one or two courses in each of the fall, spring and summer semesters. Continuous enrollment in the fall, spring and summer terms is required in this program, including SSCI 594AB summer registration.

Admission Requirements

Four groups of students are served by this program:

1. New students who wish to apply directly to the geographic information science and technology master’s program.
2. Students currently enrolled in the geographic information science and technology graduate certificate program since this certificate program may serve as a possible “stepping stone” toward the master’s program.
3. Students currently matriculated in a USC master’s or doctoral degree program.
4. USC undergraduate students who want to stay for a fifth year and earn both bachelor’s and master’s degrees.

Candidates for admission among the first two groups of students must have: (1) a B.A. or B.S. degree or its international equivalent; (2) a minimum 3.0 GPA (A = 4.0). All course work taken at the undergraduate level is used to calculate the GPA. Exceptions will be made in cases of very high GRE scores or some other compelling evidence of potential to excel in graduate studies (e.g., outstanding letters of recommendation). Preference will be given to candidates with significant professional experience working with geographic information systems and related geospatial technologies.

Application Procedures

Applicants are required to submit the following documents: (1) completed application for admission, which can be found online at usc.edu/admission/graduate; (2) statement of purpose; (3) a writing sample; (4) official transcripts from all schools previously attended; (5) two letters of recommendation; and (6) results of the GRE General Test. International students must submit TOEFL scores with a minimum score of 100 on the Internet-based examination, or an IELTS score of 7.

The statement of purpose should be uploaded into the online application. This statement should: (1) describe the student’s motivation, field of interest and career goals; and (2) identify potential projects that the student might pursue for the master’s thesis project.

The master’s program utilizes rolling admissions and enrollment based on the standard academic calendar. This means that students may start the program in either the fall, spring or summer semesters.

Those interested in learning more about this program should contact Kate Kelsey, University of Southern California, 3616 Trousdale Parkway, AHF B55B, Los Angeles, CA 90089-0374.

Graduate Certificate in Geographic Information Science and Technology

AHF B55B
(213) 740-8298
Email: kkelsey@usc.edu
Director: John P. Wilson, Ph.D.

The online Graduate Certificate in Geospatial Intelligence requires 16 units of graduate work and provides state-of-the-art training in some of the core geographic information science technologies and the underlying scientific principles and concepts that guide their design and use.

Course Requirements

Sixteen units of graduate work are required.

The courses in this program are open to students living and/or working anywhere, including students at USC’s Los Angeles, Orange County, Sacramento and Washington, D.C. centers. The certificate program can be completed in as few as two and no more than four semesters depending on the numbers of courses taken in each of the fall, spring and summer semesters.

Admission Requirements

Two groups of students are served by this program:

1. New students who wish to apply directly to one of the spatial sciences graduate certificate program.
2. Students currently matriculated in a USC master’s or doctoral degree program (other than the M.S. in geographic information science and technology).

Candidates for admission among the first group of students must have: (1) a B.A. or B.S. degree or its international equivalent; (2) a minimum 3.0 GPA (A = 4.0) undergraduate GPA. All course work taken at the undergraduate level is used to calculate the GPA. Exceptions will be made in cases of very high GRE scores or some other compelling evidence of potential to excel in graduate studies (e.g., outstanding letters of recommendation). Preference will be given to candidates with significant professional experience working with geospatial information systems and related geospatial technologies.

Application Procedures

Applicants are required to submit the following documents: (1) completed application for admission, which can be found online at usc.edu/admission/graduate; (2) statement of purpose; (3) official transcripts from all schools previously attended. International students must submit TOEFL scores with a minimum score of 100 on the Internet-based examination, or an IELTS score of 7.
The graduate certificate program utilizes rolling admissions and enrollment based on the standard academic calendar. This means that students may start the program in either the fall, spring or summer semesters.

Those interested in learning more about this program should contact Kate Kelsey, University of Southern California, 3616 Trousdale Parkway, AHF B118, Los Angeles, CA 90089-0374.

Sustainable Cities Graduate Certificate

This multidisciplinary certificate program provides USC master’s and doctoral students with a specialization in urban sustainability problems resulting from the growth of cities caused by natural population increase and massive rural-to-urban population flows. See the USC Price School of Public Policy.

Courses of Instruction

Spatial Sciences Institute (SSCI)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

SSCI 101 Workshop in Spatial Analysis (2, FaSp) Introduction to geospatial technologies and data as creative tools for supplementing traditional forms of academic work across the sciences, social sciences, and the humanities.

SSCI 265L The Water Planet (4, FaSpSm) An exploration of earth’s water, ranging from water properties, chemistry, and pollution, to groundwater dynamics, watershed processes, and oceanic-atmospheric circulation. Implications for past and future societies. Lecture and laboratory. (Duplicated credit in the former GEOG 265L.)

SSCI 301L Maps and Spatial Reasoning (4, Fa) Role of maps and spatial reasoning in the production and use of geographic information for representing and analyzing human and environmental activities and events.

SSCI 382L Principles of Geographic Information Science (4, Sp) The various ways in which geography can be used to acquire, represent, organize, analyze, model and visualize information. Laboratories are organized around ArcGIS software suite. Recommended preparation: SSCI 301L.

SSCI 382L Principles of Geographic Information Science (4, Sp) The various ways in which geography can be used to acquire, represent, organize, analyze, model and visualize information. Laboratories are organized around ArcGIS software suite. Recommended preparation: SSCI 301L.

SSCI 581L Seminar in Geospatial Technology Project Management (4, Sp) Concepts, principles, and role of project management tools and the people issues encountered running GIS projects. (Duplicated credit in the former GEOG 581L.) Recommended preparation: SSCI 581L.

SSCI 587 Remote Sensing for GIS (4, Sp) Principles of remote sensing, satellite systems, and role of remote sensing data in GIS applications. (Duplicated credit in the former GEOG 587L.) Recommended preparation: SSCI 581L.

SSCI 588 Web GIS (4, FaSpSm) Design, implementation, and technological building blocks (including GML) for distributed web-based services. (Duplicated credit in the former GEOG 581L.) Recommended preparation: SSCI 581L.

SSCI 593 Geospatial Data Integration (4, SpSm) Role of crowdsourcing, volunteered geographic information, spatial data infrastructures, and web portals in helping with the collection, storage, curation, and distribution of geospatial data assets. Recommended preparation: SSCI 587.

SSCI 594L Directed Research (1-4, max 12, FaSpSm) Research leading to the master’s degree in cognate fields. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SSCI 599 Special Topics (2-4, max 8) Seminar in selected topics in the spatial sciences.

The Writing Program

Jefferson Building 150 (JEF 150, mc 1292)

FAX: (213) 740-4100
Email: writprog@usc.edu

Director: John Holland
Professors (Teaching): James Brecher, Ph.D.; Geoffrey Middlebrook, Ph.D.

David Tomkins, Ph.D.

Lecturers: Jennifer Sopocko-Chankai Bankard, Ph.D.; Jessica Wells Cantello, Ph.D.; James Clements, Ph.D.; Carlos Delgado, Ph.D.; Elizabeth Durst, Ph.D.; William Gorski, Ph.D.; Farida Habeeb, Ph.D.; Amanda Hobmeier, Ph.D.; Ashley Karlin, Ph.D.; Rory Lukins, Ph.D.; Philip McNiff, MPW; Sarah Mesel, Ph.D.; Amy Meyerson, MPW; Samantha Noda, Ph.D.; Daniel Pecchenino, Ph.D.; DeAnna Rivera, J.D.; Deborah Sims, Ph.D.; Brandon Som; John James Strong, MPW; Ellen Wayland-Smith, Ph.D.

Writing Program courses are designed to help students develop practices of writing, writing and critical reasoning that are necessary for success in academic and professional discourse. Writing Program pedagogy emphasizes small classes and frequent conferences in order to provide the highly individuated instruction and careful feedback necessary to extend the writing process and enhance the rhetorical judgment of each student. To meet the university’s writing requirement, students must complete WRIT 150 (or its equivalent) and an advanced writing course, WRIT 340.

Lower-Division Requirement

WRIT 150 Writing and Critical Reasoning - Thematic Approaches focuses on the rhetorical principles and techniques necessary for successful college-level writing. Special attention is paid to critical thinking and reading, sentence-level fluency, research techniques, and the elements of academic argument and reasoning. WRIT 150 will not satisfy the lower-division writing requirement if taken on a Pass/No Pass basis.

Advanced Writing Requirement

All students at USC, except those who satisfy their general education requirements through the Thematic
Option Program, must complete WRIT 340 Advanced Writing, an upper-division course designed to help students write on topics related to their disciplinary or professional interests. Students usually enroll in WRIT 340 in their junior year, and may not take the course earlier than their sophomore year. Different schools within the university offer sections of this course. Students should consult their major departments to determine which version of WRIT 340 best complements their program of study. WRIT 340 will not satisfy the university’s advanced writing requirement if taken on a Pass/No Pass basis.

All classes that meet the university’s advanced writing requirement teach students to write clear, grammatical, well-structured prose; to discover and convey complex ideas critically; and to appreciate the nuances of effective argumentation. The principal aim of the requirement is to develop a student’s capacity to formulate thoughtful and compelling writing for specific academic, professional and public audiences.

Preparatory Course Work
Some students are better served by taking a preparatory course before they enroll in WRIT 150. Entering freshmen who score below a specified level on the verbal portion of the SAT take the University Writing Examination. Based on the results of this examination, certain students enroll in WRIT 120 Introduction to College Writing or WRIT 121 Introduction to College Writing in a Second Language during their first semester at USC.

International students take the University Writing Examination after having completed any course work required by the American Language Institute.

Transfer Credit
Students may complete the lower-division requirement by completing an equivalent second-semester composition course that is taken for a letter grade option (not Pass/No Pass) at another institution after high school graduation and prior to enrolling at USC. Equivalent transfer credit is determined by the university’s articulation officer. The advanced writing requirement must be completed at USC.

Time Limits
Students should complete the lower-division writing course requirement by the end of their first year at USC and must complete it before they enroll in their sixty-fifth unit. Transfer students who have not completed the lower-division requirement prior to entering USC should enroll in WRIT 150 during their first semester at USC, and must enroll in WRIT 150 no later than their nineteenth unit (second semester) at USC.

Courses of Instruction

Writing (WRIT)

The terms indicated are expected but are not guaranteed. For courses offered during any given term, consult the Schedule of Classes.

WRIT 095x Writing Tutorial (1, FaSpSm)
Individualized instruction in writing to support instruction in WRIT 130 or WRIT 150. Graded CR/NC. Not available for degree credit. Concurrent enrollment: WRIT 130 or WRIT 150.

WRIT 120 Introduction to College Writing (4, FaSpSm)
Intensive instruction and practice in the writing process. Focuses upon the formal conventions and conceptual expectations of college writing, with emphasis upon the grammatical, stylistic, and rhetorical techniques required in successful writing. Graded CR/NC. Limited to and required of students who score below specified level on the USC Writing Examination.

WRIT 121 Introduction to College Writing in a Second Language (4, FaSp)
Intensive instruction and practice in the writing process for non-native speakers of English. Focuses on the formal and conceptual conventions of college writing, with emphasis upon the grammatical, stylistic, and rhetorical techniques required in successful writing. Graded CR/NC. Limited to and required of students who score below specified level on the USC Writing Examination.

WRIT 130 Analytical Writing (4, Sp)
Focuses on analytical and argumentative writing skills requisite to academic and professional writing. Emphasizes logical analysis of texts and other data, effective use of evidence, ethical argumentation, and stylistic and grammatical fluency. Enrollment limited to specified groups of students. Students must achieve a satisfactory score on the verbal portion of the SAT, the USC Writing Examination, or credit for WRIT 120 or WRIT 121 before enrolling in WRIT 130.

WRIT 133 College Writing for International Students (4)
College writing for International Students, emphasizing the expectations of academic discourse in U.S. higher education while drawing upon a context informed by cross-cultural perspectives. Recommended preparation: International Academy course work.

WRIT 150 Writing and Critical Reasoning-Thematic Approaches (4, FaSpSm)
Academic writing, emphasizing analysis and argumentation, rhetorical judgment, critical reasoning, creative insight, the careful use of evidence, ethical perspectives, logical organization, stylistic and grammatical fluency. (Duplicates credit in WRIT 130 and former WRIT 140.)

WRIT 340 Advanced Writing (3-4, FaSpSm)
Instruction in writing for various audiences on topics related to a student’s professional or disciplinary interests, with some emphasis on issues of broad public concern. Prerequisite: WRIT 130 or WRIT 150.

WRIT 440 Writing in Practical Contexts (4, FaSpSm)
Advanced training in analytical and argumentative writing for particular purposes, in professional and practical contexts. Prerequisite: CORE 112 or WRIT 340.

WRIT 503AB Theory and Practice in Teaching Expository Writing (1-1, Fa)
Pedagogical application of rhetorical and linguistic theory to teaching university-level expository writing. Accompanied supervised teaching. Limited to assistant lecturers and teaching assistants. Graded CR/NC.

Thematic Option

The thematic option teaches students to formulate ethical questions, to analyze and understand the reasons behind views that differ from their own, to recognize the roles that historical, political and social forces play in matters of personal choice, and to express their views coherently in writing. Thematic Option can be arranged to fit any major.

To maintain small classes and allow for extensive discussion, Thematic Option is limited to 200 students each year. Students must be highly motivated, with a record of academic achievement. The average Thematic Option student has cumulative SAT scores above 2200 and an “A” high school GPA. The program is rigorous and requires extensive reading and writing.

Program Requirements

The Thematic Option honors curriculum consists of four interdisciplinary core classes taught around distinct themes: CORE 101 Symbols and Conceptual Systems; CORE 102 Culture and Values; CORE 103 The Process of Change in Science; and CORE 104 Change and the Future. CORE 111 Writing Seminar I and CORE 112 Writing Seminar II make up the eight units of writing to meet the university requirement. The classes are accompanied by individual bi-weekly tutorials, which require concurrent enrollment with an affiliated CORE 102, focuses on critical thinking and analysis, focusing on argument and reasoning through close reading of primary texts. CORE 112 teaches students to convey complex ideas and to advance sophistication of essay structure, grounded argument, and to identify and address specific audiences persuasively in academic discourse.

The core curriculum is supplemented by two theme courses – one in the natural sciences and the other in either the humanities or the social sciences – chosen in consultation with a Thematic Option advisor.

Liberal Arts Modules

Liberal Arts Modules are a college-wide honors opportunity that bring together students with substantial training in their respective disciplines to study a common subject area using multiple approaches while participating in a cross-disciplinary dialogue.

Liberal Arts Modules provide a unique opportunity for interdisciplinary study with peers and faculty from different disciplines. The themes and topics change each semester depending on faculty participation. Students are exposed to different approaches to societal issues, gain experience working collaboratively with peers from other academic areas, apply their knowledge to new subject areas and focus sustained critical attention on disciplinary methods of inquiry.

A typical module includes four classes: three small seminars and one CORE 498 course. The program requires simultaneous enrollment in one of the three seminars and in CORE 498, for a total of 8 units.

Students with at least junior standing and a major/minor GPA of at least 3.0 are eligible to apply. Preference is given to students pursuing double majors or other major/minor combinations in the liberal arts. Students graduating with a B.A. or USC Dornsife College of Letters, Arts and Sciences B.S. degree who complete a module and maintain a cumulative GPA of 3.5 will have "Distinction in Liberal Arts" listed on their USC Transcript.

Requirements (8 units)

Simultaneous registration in CORE 498 and a Special Topics 499 class that is part of the Liberal Arts Module.

Thematic Approaches to Humanities and Society Minor

The interdisciplinary minor in Thematic Approaches to Humanities and Society allows students to examine a range of thematic and theoretical approaches to
understanding culture and society from multiple standpoints in the humanities. The minor is rich in course and schedule options, enabling students with an interest in the humanities to continue their studies. It also includes co-curricular events and advisement from Thematic Option staff. Thematic approaches to humanities and society builds on the intellectual community developed in the Thematic Option honors program and is open to all interested students.

The minor focuses on themes such as interdisciplinary perspectives and modes of inquiry; approaches to criticism and history; reification, ideology, contextualization; and knowledge, human diversity and social relations. Students choose six 4-unit classes, including one lower-division elective, one upper-division Thematic Option class (CORE 301 Modes of Inquiry), and four upper-division electives. Students also complete a 2-unit reading salon (CORE 200 Liberal Arts Reading Salon).

Requirements, lower-division (choose one, 4 units)

CLAS 150, CLAS 151, CORE 103, HIST 101, HIST 102, PHIL 115, REL 132

Course requirements (6 units) units

CORE 200 Liberal Arts Reading Salon 2
CORE 301 Modes of Inquiry 4

Requirements, upper-division (16 units)

Enroll in four of the following, at least one from List A, one from List B and not more than one from List C. Not more than two may count from any one department. Courses must be chosen in consultation with a Thematic Option adviser.

List A

Early: CLAS 310, CLAS 320, CLAS 333, CLAS 470, EALC 340, EALC 345, EALC 350, EALC 355, EALC 365, PHIL 345, REL 311, REL 315, REL 317

Modern: Colt 426, Colt 445, EALC 332, EALC 335, EALC 342, EALC 353, EALC 354, FREN 446, GERM 370, GERM 372, PHIL 337, PHIL 355, PHIL 437, REL 340, SLL 330, SLL 344

List B

Humanities and Society: CBST 428, Colt 475, ENGL 473, ENGL 474, FREN 370, ITAL 340, REL 366, REL 462, SLL 345, SLL 348

Critical Approaches: CLAS 380, COLT 391, COLT 401, COLT 454, ENGL 472, ENGL 479, ENGL 480, LING 466, PHIL 361, PHIL 445

List C

Social Science Approaches: ANTH 372, HIST 201, HIST 329, IR 325, POSC 381, POSC 476, SOCI 350, SOCI 360

Courses of Instruction

Thematic Option (CORE)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

CORE 101 Symbols and Conceptual Systems: Thematic Option Honors Program (4, FaSp) Study of the structures through which we shape our experience in religion, philosophy, literature, music, and the visual arts, and of competing theories of interpretation. Students may not take this course on a P/NP basis.

CORE 102 Culture and Values: Thematic Option Honors Program (4, Fa) Systematic reasoning about values and ways of living; close reading of major texts within the Western tradition; Biblical and classical through contemporary sources. Students may not take this course on a P/NP basis.

CORE 103 The Process of Change in Science: Thematic Option Honors Program (4, FaSp) Critical problems in the development of scientific thought, studied as vehicles for understanding the content and structure of the sciences. Specific subject matter in selected scientific disciplines will be presented. Students may not take this course on a P/NP basis.

CORE 104 Change and the Future: Thematic Option Honors Program (4, FaSp) Analysis of historical change; social and political theory and revolutionary thought; introduction to competing images of future states of affairs; the continuing process of change. Students may not take this course on a P/NP basis.

CORE 111 Writing Seminar I: Thematic Option Honors Program (4, Fa) Students may not take this course on a P/NP basis.

CORE 112 Writing Seminar II: Thematic Option Honors Program (4, Sp) Students may not take this course on a P/NP basis.

CORE 192 Summer Seminar (3, SM) An honors course for high school students in summer; each section focuses on a topic in the arts or humanities, social or natural sciences.

CORE 200 Liberal Arts Reading Salon (2, FaSp) Critical readings of a series of texts in the liberal arts designed to promote discussion of important themes, theoretical approaches, research directions, and interdisciplinary connections. Graded CR/NC.

CORE 221 Modes of Inquiry (4, FaSp) Modern tools of cultural and discursive analysis which seek to demystify the “natural,” as it appears in the formation of cultures, their institutions, and individuals.

CORE 248 Honors in Liberal Arts (4, FaSp) Advanced interdisciplinary course on the development of a general theme or topic. Critical analysis of the relation between modes of inquiry and objects of study. Students must be simultaneously enrolled in a selected special topics 499 course that has been approved as part of the College’s Liberal Arts Modules project.

CORE 499 Special Topics (2-4, max 12) Intensive interdisciplinary exploration of a selected theme, problem process, or period.

CORE 601 Teaching Analytical Writing Through Readings in the Humanities (1, max 4, Fa) Theories and practices in the university-level teaching of close-reading and analytical writing, using texts central to Western tradition. Graduate student professionalism through topical workshops and discussions. Open to assistant lecturers and teaching assistants only. Graded CR/NC.

Communication and Journalism

The USC Annenberg School for Communication and Journalism is a national leader in education and scholarship in the fields of communication, journalism, public diplomacy and public relations. The school offers a comprehensive curriculum emphasizing the core skills of leadership, innovation, service and entrepreneurship and drawing upon the resources of a networked university located in the media capital of the world. USC Annenberg’s commitment to the converged practice of communication and journalism, interdisciplinary studies, and collaboration makes it unique among peer institutions. Students learn from theory and practice, and the school’s programs put it at the crossroads of media, entertainment technology, and globalization.

The school’s nationally accredited journalism program provides experience for students in all media platforms, with a digital newsroom, state-of-the-art editing equipment for radio and television news production and the opportunity to work at on-campus media outlets. The school’s public relations program prepares students to thrive in advocacy communication, learning to write and communicate targeted messages across media platforms. The School of Communication’s multidisciplinary curriculum explores how human interaction and technology affect communities, businesses, nations and the world, preparing students for careers in communication, persuasion and leadership. USC Annenberg’s active internship program and study abroad opportunities give students the broad, global perspective required to be successful professionals.

USC Annenberg alumni fill top posts in the communication and media industries, and remain an invaluable resource to students and faculty. USC Annenberg’s more than 100 faculty members have been recognized in diverse fields, and their expertise challenges students to become communication leaders.

Administration

Ernest James Wilson III, Ph.D., Dean, Walter H. Annenberg Chair in Communication
Larry Gross, Ph.D., Vice Dean, Professor of Communication
Margaret McLaughlin, Ph.D., Senior Associate Dean, Faculty Affairs and Research, Professor of Communication

Norman Lear Chair in Entertainment, Media and Society: Martin H. Kaplan, Ph.D.
Provost Professor of Communication, Journalism and Cinematic Arts: Henry Jenkins, Ph.D.

Professors: Jonathan D. Aronson, Ph.D.; Sandra Ball-Rokeach, Ph.D.; Sarah Banet-Weiser, Ph.D.*; Manuel Castells, Ph.D.; Peter Clarke, Ph.D.; Michael J. Cody, Ph.D.; Geoffrey Cowan, LL.B.*; Nicholas Cull, Ph.D. (Director, Public Diplomacy Master’s Program); Janet Fulk, Ph.D.; G. Thomas Goodnight, Ph.D.; Larry Gross, Ph.D.; Thomas A. Hollifin, Ph.D.; Andrea Hollingshead, Ph.D.; Henry Jenkins, Ph.D.; Doe Mayer, M.A. (Cinematic Arts); Margaret McLaughlin, Ph.D.; Lynn C. Miller, Ph.D.; Peter R. Monge, Ph.D. (Director, Doctoral Program)*; Sheila T. Murphy, Ph.D.; Ernest J. Wilson III, Ph.D.

Associate Professors: Francois Bar, Ph.D.; Joshua Kun, Ph.D.; Randall Lake, Ph.D.; Andrew Lakoff, Ph.D. (Dornsife, Anthropology and Sociology); Stephen O’Leary, Ph.D.; Kwan Min Lee, Ph.D.; Patricia Riley, Ph.D. (Director, Global Communication Master’s Program); Kenneth K. Sereno, Ph.D.*; Stacy Smith, Ph.D.; Douglas Thomas, Ph.D.; Dimitri Williams, Ph.D.

Assistant Professors: Michael Ananny, Ph.D.; Taj Frazier, Ph.D.; Yu Hong, Ph.D.; Lian Jian, Ph.D.; Kjerstin Thorson, Ph.D. (Journalism)

Clinical Professors: Daniel Derbin, Ph.D.; Colleen M. Keough, Ph.D.; Ben Lee, Ph.D.; Karen North, Ph.D. (Director, APOC Master’s Program); Susan Resnick West, Ph.D.; Robert Scheer; Christopher Smith, Ph.D.; Gordon Stables, Ph.D. (Assistant Dean, Student Affairs; Director, Trojan Debate Squad); Jonathan Taplin; Alison Trope, Ph.D. (Director, Undergraduate Studies); Rebecca Weintraub, Ph.D. (Director, Communication Management Master’s Program)

Clinical Associate Professors: Daniela Baroffio, Ph.D.; Mathew Curtis, Ph.D.

Clinical Assistant Professors: David Craig, Ph.D.; Marcia Dawkins, Ph.D.; Dorine Lawrence-Hughes, J.D., Ed.D; Brad Shipley, Ph.D.; Paolo Sigismondi, Ph.D.; Kimberlie Stephens, Ph.D.

Research Professor: Jeffrey Cole, Ph.D. (Director, Center for the Digital Future)

Adjunct Faculty: Vincent Brook, Ph.D.; Anne Framroze; Michael Overing, J.D.; Paula Patnoe-Woodley, M.A.; Jillian Pierson, Ph.D.; Kelton Rhoads, Ph.D.; Michael Robinson, Ph.D.; Clinton Schaff

Emeritus Professor: Walter R. Fisher, Ph.D.

* Recipient of university-wide or school teaching award.

Degree Programs

The School of Communication offers programs of study leading to a B.A. in Communication; minors in Sports Media Studies, Communication and the Entertainment Industry, Communication Technology Practices and Platforms, Global Communication, Health Communication, Media Economics and Entrepreneurship, Professional and Managerial Communication, Communication Law and Media Policy, Cultural Studies and Interdisciplinary Law and Society; a progressive degree in Master of Communication Management; a Master of Science in Digital Social Media; an M.A. and Ph.D. in Communication; M.A. in Global Communication (in conjunction with the London School of Economics); a Master of Communication Management and a Master of Public Diplomacy. The Master of Public Diplomacy combines the resources of the Annenberg School for Communication and Journalism and the USC Dornsife College of Letters, Arts and Sciences’ School of International Relations. The Communication Management Program has established dual degree programs with the USC Gould School of Law and Hebrew Union College.

Undergraduate Degrees

The School of Communication offers programs of study leading to a B.A. degree and minors in Communication and the Entertainment Industry, Communication Technology Practices and Platforms, Global Communication, Health Communication, Media Economics and Entrepreneurship, Professional and Managerial Communication, Communication Technology Practices and Platforms, Global Communication, Health Communication, Media Economics and Entrepreneurship, Professional and Managerial Communication, Communication Law and Media Policy. Many communication majors pursue, with the school’s encouragement, a double major with another discipline or a minor to complement the major. Through careful planning, students can complete these options within four years.

Students must consult with an undergraduate academic advisor at least once each semester to explore course selections within the major, the minor, general education offerings and electives.

Admission

Admission is competitive. Fall 2013 incoming freshmen had an average GPA of 3.69 with an SAT score of 1440-2150 (middle 50%). Transfer students had an average college GPA of 3.66. For application instructions and deadlines, refer to the USC Admission Website. All transfer applicants must review the transfer admission application guidelines on the Annenberg Website. Contact the Annenberg Admissions Office for more information. USC exclusively uses the Common Application for freshman and transfer admission. Applicants must submit the Common Application and USC Supplement, both of which can be accessed at commonapp.org.

Students currently enrolled at USC who wish to change their major to communication must file a formal application with all supporting documents through the Annenberg Student Services Office. Students who entered USC as freshmen must have 32 units completed with a minimum GPA of 3.0. Students who entered USC as transfers must have 16 units completed at USC with a minimum GPA of 3.0. The 3.0 GPA is a minimum standard and does not guarantee admission.

Upon admission to the School of Journalism, students will lose transfer credits earned in journalism and public relations course work completed at another college or university.

For current USC students, the application period is the first week of classes each fall and spring semester. No applications will be accepted after the first week of classes.

Students who have not been admitted to the communication major or one of the minors may complete a maximum of 20 communication (COMM) units at USC. No further communication course work may be taken until the student is admitted. Students who complete the maximum number of units without gaining admission to the school will be advised to select another major. Students are encouraged to contact the Annenberg Student Services Office, ASC 140, (213) 740-0900, for advisement on change of major criteria and major requirements. In certain cases, students may be referred to Dornsife College Advising, CAS 120, (213) 740-2534, to consult with an advisor to select another major.

Bachelor of Arts in Communication

General Education Requirements

The university’s general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing, foreign language and diversity requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

Students must maintain a minimum 2.0 overall GPA in upper division course work applied toward the major. Further, no more than 16 upper division elective units may be taken prior to completion of the entire core. No more than 4 units of COMM 380 may be counted toward the department major. The School of Communication is committed to ensuring that all declared communication majors follow the necessary requirements. Mandatory advisement is required of all communication majors each semester prior to registration. All students taking

communication classes are held to the highest academic integrity standards and may be denied admission or have admission revoked as a result of conduct violations.

Qualified non-majors (generally, students with junior/senior status, a minimum 3.0 GPA and a declared major elsewhere at the university) with appropriate academic preparation may be permitted to enroll in communication electives without fulfilling prerequisite requirements. Application for a waiver should be made to an undergraduate adviser.

Academic Integrity Policy

The School of Communication maintains a commitment to the highest standards of ethical conduct and academic excellence. Any student found responsible for plagiarism, fabrication, cheating on examinations, or purchasing papers or other assignments will be reported to the Office of Student Affairs and Computation and may be dismissed from the School of Communication. There are no exceptions to the school’s policy.

Curriculum Areas of Study

By design, the courses in the curriculum tend to cluster into different areas of study. These areas represent important foci in the communication discipline and are areas in which the school’s faculty possess special expertise. Four such areas of study are described below. They are not mutually exclusive, nor do they exhaust the curriculum; rather, they represent partially overlapping areas of unusual depth. Students may specialize in one of these areas or may design individual programs of study by choosing other combinations of electives that best meet their needs and career objectives. Relevant courses for the clusters are posted on the Annenberg School for Communication and Journalism Website.

Media, Law and Politics Option: This option is designed for students who are interested in careers in government and public service, the law, and political and legal consulting, as well as advanced graduate study. Students examine communication processes in the public sphere and learn how to participate competently in these practices. Courses emphasize: the role of persuasion in the political and legal processes; the techniques used by individuals, institutions and social movements to influence public affairs; the history, design, implementation and evaluation of political campaigns; the role of public opinion; ethical issues in public communication, including the influence of media in the political and justice systems, the role of the First Amendment and the changing nature of freedom of expression in a mass-mediated environment, and problems of public participation.

Organizational and Interpersonal Communication Option: This option is most relevant to students interested in careers in business, management, human resources and development, corporate communication, and consulting, as well as advanced graduate study. Courses emphasize: interpersonal communication processes that affect and reflect personality, motives, beliefs, attitudes and values; communication’s role in the development, maintenance and disintegration of social, family and intimate relationships; managing interpersonal conflict; communication between superiors and subordinates and in teams; communication’s role in determining organizational culture; managing information in organizations; and the role of information technology in processes of globalization.

Communication and Culture Option: This option will be attractive to a broad range of students whose careers have an international or multicultural dimension, from those interested in foreign service, travel and consulting to those seeking careers in the arts. In addition, students taking this option will be well prepared for advanced graduate study. Courses emphasize: communication as an essential component of culture and cultural production; cultural forces that shape communication practices; cultural barriers to communication; gender and diversity issues in human and mass communication and cultural production; media representations of race, ethnicity and gender; the production of meaning in diverse modes such as art, religion, popular culture and technology; and cultural criticism.

Entertainment, Communication and Society Option:

This option is for students who wish to pursue careers in the entertainment industry, as well as students interested in the relationship of communication and entertainment to popular culture, globalization, cultural studies, marketing, advertising and ethics. Students taking this option will be well prepared for graduate study; they will also be able to enter the entertainment industry with a grounding in the theory, roles, issues and effects of entertainment. Courses emphasize: the theoretical underpinnings of entertainment studies; the historical context of entertainment; the roles and effects of entertainment concepts in “high art” and popular culture; the impact of entertainment on politics; advertising in an entertainment society; the blurring of marketing and entertainment and the effects of this on culture; the effects of entertainment in general and specifically on constructions of race and childhood; issues in the blurring of fact and fiction; ethical dilemmas; and the globalization of entertainment industries.

Progressive Degree Program

This progressive degree program allows USC students to complete a bachelor’s degree and a Master of Communication Management in as little as five years. Students with a 3.0 overall GPA or higher in all classes taken at the university level are eligible to apply for admission to the degree program during their junior year, however a 3.0 GPA does not guarantee acceptance.

Current students must attend a mandatory information session conducted by Annenberg Admissions before initiating the application process. Students admitted into the progressive degree program begin taking master’s level courses in their senior year and may complete the master’s degree in year five. For information on the application process, refer to the Annenberg Website, annenberg.usc.edu/currentstudents. Click on progressive degree. For further details on progressive degree programs, see the Requirements for Graduation page.

Minor in Communication and the Entertainment Industry

This minor offers courses that examine the theory, social impact and economics of the music, film and television industries. Students will learn strategies for analyzing popular culture texts; management and public relations in the entertainment field; and social, cultural and political issues related to entertainment. USC provides a broad array of courses that equip students with tools to evaluate the marketing of entertainment and the cultural products of the film, television, theatre and music industries. This minor is intended to encourage students in a variety of majors to draw upon these properties in preparation for different careers in the entertainment industry.

Admission requirements are a minimum 3.0 grade point average and completion of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

Minor in Sports Media Studies

USC has a unique historical relationship to sports and sports media, and is near the center of the current sports media capital of Los Angeles. The courses examine the role of sports and sports media in culture, how the presentation of sports in media has evolved, has been shaped by cultural issues and, itself, impacted culture. This 24-unit minor will enhance students’ skills in working and interacting with, sports media.

Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing).

Minor in Communication Technology Practices and Platforms

Students in this 20-unit minor trace the roots and dynamics of contemporary networked technologies and learn how to participate and excel within media cultures, online networks and organizational workplaces. The minor focuses on three areas: cultures (connecting communication technologies to histories, values, and ethics of social relationships and civic communities); networks (developing qualitative and quantitative skills to model, explain and influence relationships among media and people at local and global scales); institutions (tracing the legal, organizational, economic and interpersonal contexts that produce and transform communication technologies). The field of communication technology requires individuals who can critique, cultivate, build and influence new relationships among people, platforms and practices. Whether starting careers in strategic consulting, medical informatics, nonprofit management, social media design, public sector service or new media entrepreneurship, students are encouraged to utilize skills and foundational concepts underlying 21st century communication technologies.

Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

Required Core Communication Courses

- COMM 320 Small Group and Team Communication
- COMM 375 Business and Professional Communication
- COMM 385 Survey of Organizational Communication

Electives — Choose three from the following:

- COMM 303 Persuasion
- COMM 304 Interpersonal Communication
- COMM 308 Communication and Conflict
- COMM 316 Health Communication
- COMM 321 Communication in the Virtual Group
- COMM 322 Argumentation and Advocacy
- COMM 324 Intercultural Communication
- COMM 345 Social and Economic Implications of Communication Technologies
- COMM 388 Ethics in Human Communication
- COMM 431 Global Strategy for the Communications Industry
- COMM 486 Human and Technological Systems in Organizations
- COMM 487 Communication and Global Organizations

Total units: 24

Minor in Communication Law and Media Policy

The rapid advance in information and communication technologies raises serious questions about the limits of free speech, censorship, and the impact of present and emerging communication policies on domestic and international industries. To address these developments, this 24-unit cross-departmental minor combines courses from communication, law, economics, political science and sociology. This minor not only enables students to understand what is occurring in the communication revolution, it also prepares them to participate in the movement as critics and advocates. Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing).

Required Core Communication Courses

- COMM 371 Censorship and the Law: From the Press to Cyberspace
- COMM 372 Argumentation and Advocacy
- COMM 421 Legal Communication

Elective Courses — Choose three from the following:

- COMM 320 Small Group and Team Communication
- COMM 375 Business and Professional Communication
- COMM 385 Survey of Organizational Communication

Total units: 24

Minor in Media Economics and Entrepreneurship

In recognition of the dislocation and restructuring underway in contemporary media and information industries, this 24-unit minor introduces students to the microeconomics and trends of the sector and gives them an understanding of the role that entrepreneurship plays in the new economy. Students with professional media industry aspirations will learn basic economic literacy and develop the entrepreneurial skills required to build successful careers and ventures in the media and information sector. Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing). A minimum of 24 units is required for completion of the minor.

Required Courses (8 units)

- BAEP 450 Fundamentals of Entrepreneurship
- BAEP 540 The Management of New Enterprises
- BAEP 450 Economic Thinking for Enterprises
- BAEP 450 The Entrepreneurial Mindset - Taking the Leap

Elective Courses — Choose 16 units from the following

- ECON 434 Economic Analysis of Law
- JOUR 373 Journalism Ethics Goes to the Movies
- JOUR 460 Social Responsibility of the News
- LAW 200x Law and Society
- LAW 201x Law and Politics: Electing a President
- POSC 441 Cultural Diversity and the Law
- POSC 442 The Politics of Human Differences: Diversity and Discrimination

Total units: 24
Minor in Global Communication

The rise of global firms and international changes that followed the end of the cold war raise new opportunities and challenges. This minor provides students from fields such as business, journalism, engineering and political science an understanding of the dynamic nature of global relations, communications and technology. The global communication minor consists of six 4-unit courses, three from international relations and three from communication. Students are required to complete IR 305 Managing New Global Challenges; two additional IR upper division courses, at least one of which must be a course which focuses on a specific region; COMM 487 Communication and Global Organizations; and two elective courses relevant to global communication. See the School of International Relations for complete course requirements.

Minor in Health Communication

This minor is designed to appeal to students with a wide range of interests, including those with a general interest in promoting healthy lifestyle practices through communication. These students will be prepared to seek future job opportunities from various areas including the managed care industry, hospitals, wellness programs, broadcast and cable companies, private and governmental agencies as well as other organizations looking for experts with demonstrated knowledge in health-related fields.

For degree requirements or to apply to this minor, contact the Department of Preventive Medicine, Keck School of Medicine.

Minor in Cultural Studies

See the Department of English.

Minor in Law and Society

See the Department of Political Science.

Minor in Photography and Social Change

See the Department of Sociology.

Other Programs

Debate Squad

The Trojan Debate Squad provides an opportunity for outstanding students (3.0 GPA or better), both communication majors and non-majors, to compete in an intense intercollegiate laboratory setting. Whatever the student's intended career, the skills he or she develops in research, critical thinking and oral advocacy will be invaluable. The team has an excellent record in team policy debate and is now also offering British parliamentary (worlds format) debating. The team competes at both regional and national competitions.

Honors Program

The School of Communication offers an 8-unit honors program for exceptional students. To qualify, students must have a 3.5 GPA both overall and in the COMM major after completing the core courses (16 units from COMM 200, COMM 201, COMM 202, COMM 203, COMM 206, COMM 207 and COMM 208 and two of COMM 204, COMM 301L and COMM 302). To graduate with School of Communication honors, a student must maintain a 3.5 overall and COMM major GPA and receive at least a B+ or higher in the two honors courses. Students either take COMM 455 Honors Seminar or work with a professor to customize a 400-level COMM course for honors status (4 units). All honor students complete COMM 497X Honors Thesis (4 units). Contact an undergraduate adviser for further information and application forms.

Honor Society

Lambda Pi Eta is a national communication/journalism honor society that is open to declared communication, journalism and public relations majors. Honors in Multimedia Scholarship

This program offers qualified undergraduate students an opportunity to approach their discipline(s) of study through the critical application of multimedia expression and scholarship. The student experience will be characterized by smaller classes taught by leading faculty members and enriched by a program of lecture series, visiting scholars, symposia and conferences. For complete program requirements, see the School of Cinematic Arts.

Annenberg Career Development and International Programs

Semester in Amsterdam

Through the Council on International Education Exchange, students study at the University of Amsterdam. The first week students spend in orientation sessions which include an overview of the academic program, an introduction to Amsterdam and to Dutch society and culture, as well as excursions in and around the city. Students enroll in the offerings taught in English at the University of Amsterdam. Such courses include communication, art, history, economics, environmental sciences, computer science, history, philosophy, literature, social science and theology. Students may earn a maximum of 12 USC units of upper-division COMM elective credit.

Spring Semester in Australia

This semester program offers students the chance to study at one of Australia’s premier universities, in one of the country’s most exciting cities. Students take communication courses that count for major credit at USC at the University of New South Wales (UNSW) and can choose from a wide variety of elective courses. UNSW is located in Kensington, just south of the center of Sydney and its commercial hub. The program gives students the chance to explore mass media and communication in a challenging environment with a distinct world view, very different from that of the United States. Students may earn a maximum of 12 USC units of upper-division COMM elective credit.

Fall Semester in Buenos Aires

This semester program offers students the opportunity to study Latin American culture and study at the Universidad de San Andrés, a small liberal arts college in the suburbs of Buenos Aires. Students will live and learn in this vibrant metropolis while taking communication courses that count toward major credit at USC. Buenos Aires is one of the largest cities in Latin America and will give students the chance to explore the world view of Latin America and how it relates to communication, mass media and the world at large. The program will immerse students in South American culture. With classes being taught exclusively in Spanish, this program requires a high degree of proficiency in Spanish, both written and oral (2.5 years of college-level Spanish or the equivalent required).

Semester in Hong Kong

The semester program offers students the opportunity to learn about Chinese culture at the Chinese University in Hong Kong, a bilingual institution. The program also gives students the opportunity to live in Hong Kong where they can witness the “one country, two systems” experiment. Courses in English are offered in fine arts, literature, history, Japanese studies, intercultural studies, music, philosophy, computer science, anthropology, economics, international relations, as well as journalism and communication. For students interested in Chinese language, courses are offered in Putonghua (Mandarin) or Cantonese. Extracurricular activities include the opportunity to teach English in rural China, monthly dinner talks with Asian studies specialists and excursions to local areas of interest. Students may earn a maximum of 12 USC units of upper-division COMM elective credit.

Summer in Ireland

This summer program offers Annenberg undergraduate students the chance to participate in a formal international internship program in Dublin for nine weeks during the summer. The aim of the program is to provide students with theoretical as well as practical experiences working, living and navigating within the international global communications environment. The program is designed around a summer-long online Annenberg course and a nine-week full-time unpaid internship in Dublin. Students will receive one unit of credit for JOUR 390S.

Semester in London

The semester program offers students the opportunity to study communication in London, the most important center of media in Europe. Many of the communication courses offered include British media guest lecturers and site visits. The program includes one-day visits to such places as Stonehenge, Stratford, Oxford, Cambridge and Windsor. Planned activities within London include theatre and museum visits and a reception with USC alumni residing in the London area. Students may earn 16 units of upper-division COMM elective credit.

Spring Semester in New Zealand

Annenberg’s New Zealand program offers students the opportunity to travel to the Southern Hemisphere. Each spring, students can study at the Auckland University of Technology (AUT), a world-class institution which offers students the chance to take communication courses that count toward major credit at USC, all the while exploring the beautiful city of Auckland and the surrounding countryside. The AUT program offers communication students an exciting way to broaden their understanding of media and mass communication in a challenging environment with an outlook distinctly different from that of the United States and Southern California. Students may earn 12 units of upper-division COMM elective credit.

The International Communication Studies program (ICCS) allows undergraduate students to study a range of approaches to public communication media across Europe.

Students divide the five-week course into stays in Los Angeles, London, Paris and Istanbul. In addition to
regular class meetings, students discuss the interplay of current world issues and international media practices with communication practitioners from international news and public relations media, government institutions, private industry and global organizations.

Students enroll in JOUR 482 Comparative Media in Europe (4 units), which will count as 4 units of upper-division COMM elective credit.

International Communication Studies China — Beijing, Hong Kong and Shanghai

The International Communication Studies China program allows undergraduate students to study a range of approaches to public communication media in China.

Students divide the four-week course into stays in Los Angeles, Beijing, Hong Kong and Shanghai. In addition to regular class meetings, students discuss the interplay of current world issues and international media practices with communication practitioners from international news and public relations media, government institutions, private industry and global organizations.

Students enroll in COMM 499 (4 units, for summer 2013), which will count as 4 units of upper-division COMM elective credit.

For further information, contact Annenberg Career Development and International Programs at (213) 821-2777, email ascind@usc.edu or visit annenberg.usc.edu/international.

Graduate Degrees

Degree Programs

The School of Communication offers programs of study leading to a professional Master of Communication Management, an M.A./M.Sc. in Global Communication in collaboration with the London School of Economics, a Master of Science in Digital Social Media, a Master of Public Diplomacy and research-oriented Master of Arts and Doctor of Philosophy degrees in Communication. The Master of Public Diplomacy combines the resources of the Annenberg School for Communication and Journalism and the USC Dornsife College of Letters, Arts and Sciences’ School of International Relations. In addition, special programs enable students to earn dual degrees in communication management and law (USC Gould School of Law) and in communication management and Jewish nonprofit management (Hebrew Union College).

The degree programs are designed to ensure that students are educated in substantive studies that constitute the discipline of communication and provide a basis for competing effectively in the job market.

All students seeking the degrees in communication management and global communication will take a range of courses that prepare them for successful professional management careers in communication-related businesses, organizations and fields.

All students pursuing the research-oriented degree (Ph.D in Communication) are required to take two theory courses that introduce them to inquiry in human communication and two research methods courses that acquaint them with the historical/critical and social scientific techniques available to conduct scholarly research. These requirements strengthen the student’s appreciation of the intellectual bases of human communication study and further the concept of a community of scholars and practitioners in the profession. Students specialize in one of five available tracks: rhetoric and political communication; media, culture and community; interpersonal and health communication; organizational communication; or information and society. In addition, students are encouraged to sample courses in the remaining tracks, thus obtaining an education of unparalleled breadth and depth.

Admission Requirements

Master of Communication Management, Master of Arts in Global Communication, Master of Science in Digital Social Media, Master of Public Diplomacy and Master of Public Diplomacy (Practitioner and Mid-Career Professional)

The school accepts students from a broad range of academic backgrounds in social sciences, humanities, physical sciences or professional schools. Some are employed or have work experience in communication-related fields. Others apply immediately after completing baccalaureate degrees.

Criteria: The faculty admission committees consider program must apply to admission process: not only the academic record, but also professional and work-related accomplishments are taken into account. The minimum criteria are the equivalent of a U.S. bachelor’s degree and a 3.0 GPA for all undergraduate and graduate work completed. The Master of Arts in Global Communication requires a minimum 3.5 (on a 4.0 scale) cumulative GPA or international equivalent for admission. For admission to the communication management practicum, digital social media and public diplomacy, scores on the General Test of the Graduate Record Examinations (GRE) are required. Applicants to the communication management degree program may submit Graduate Management Admissions Test (GMAT) scores in lieu of the GRE. Scores on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required for applicants whose native language is not English. Letters of recommendations from those persons familiar with the applicant’s work—preferably academically—are required also. In addition, applicants must submit a statement of purpose, transcripts of all previous college and university work attempted, résumé and writing samples.

Applicants to the global communication degree program must submit to USC and the London School of Economics (LSE). Participation in this degree program requires that students simultaneously gain admission to LSE and USC. GRE or GMAT scores are not required for admission. All students will begin their studies in London at the LSE.

Procedure: Refer to the Annenberg Website for application guidelines, deadlines and filing periods.

Doctor of Philosophy

Students may enter from a variety of academic fields and majors. Applicants whose undergraduate work was in fields other than communication may be admitted on the condition that adequate preparation in directly relevant areas is evident. Completion of a master’s degree in communication is not required for admission to the Doctor of Philosophy.

Criteria: All applicants must submit the online USC Graduate Admission Application and Annenberg Supplemental Form with three letters of recommendation from faculty qualified to comment on their capacities for a rigorous program of study. Completion of a basic descriptive statistics course is recommended. In addition, a personal statement, transcripts from all colleges/universities attended, a résumé and a sample of scholarly writing are required. The M.A. in Communication is earned as part of the Ph.D. program.

Procedure: Admission is granted for the fall semester only; the application deadline is November 1. Applicants are strongly encouraged to take the Graduate Record Examinations prior to October 1. Refer to the Annenberg Website for application guidelines.

Degree Requirements

The Global Communication, Master of Arts in Communication and Doctor of Philosophy in Communication are awarded under the jurisdiction of the Graduate School. Refer to the Graduate School section of this catalogue for the Requirements for Graduation section for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Communication Management

Each student chooses an area of focus and follows the course of study for that track for depth and a second track for breadth. A faculty academic adviser assists students to build on their academic and work experience in order to achieve desired professional goals.

Residence

Students may pursue the Master of Communication Management on either a full- or part-time basis. Full time, the degree can be finished in one year and four months (across four terms, including the summer session); part time, all degree work can be finished in two to three years. With permission from a School of Communication committee, a maximum of 4 graduate units may be transferred from another accredited institution.

Foreign Language Requirement

There are no foreign language requirements for this degree.

Course Requirements

Thirty-two units (usually nine courses) in approved graduate-level course work are required.

Students will take a required 4-unit research methods course in their first semester, in their second semester, students will take a required 4-unit core conceptual foundation course. In their penultimate and final semesters, students will take the capstone Communication Research Practicum (CMGT 597a and CMGT 597b respectively, total 4 units). The capstone practicum requires the student to pass the research methods and the core conceptual foundation courses.

A maximum of two courses may be taken in the first semester. In the second and subsequent semesters, with approval from the Director of the Master of Communication Management program, students may take up to three courses.

Among the remaining courses, at least 12 units must be from Communication Management elective areas of focus. Up to 8 may be taken at USC outside the Communication Management program; these courses must be approved by the Director of the Master of Communication Management program, and may be selected from a variety of disciplines, depending upon academic and career interests.

Any given course may be taken at most three times, after which the student is no longer eligible to take the course.

Master of Science in Digital Social Media

The School of Communication in the Annenberg School for Communication and Journalism is offering a Master of Science in Digital Social Media degree, which is an intensive program focused on leadership and management of digital and social media, and online communities. Students learn to be digital and social media executives,
leaders and entrepreneurs through a sequence of classes that teach conceptualization, management of development and analytics, creation of content, and implementation of digital products. Students take 32 units over the course of one calendar year including a funded, final project in which teams receive a budget to develop and launch a working, dynamic, social media product. An internship is highly recommended as students are expected to gain relevant, professional experience while enrolled in the program. No engineering skills are required, but the program provides instruction in collaborating with, and managing, developers.

The program is taught over a single calendar year beginning with spring semester, and includes courses during summer and fall. Students applying for this program are required to take the Graduate Record Examinations (GRE).

The completion of this degree program requires 32 units including the successful development and launch of a digital social media product. Core courses are taught in the School for Communication and Journalism. With approval of the program director, students may select electives from the entire USC graduate curriculum.

Digital and Social Media Core Requirements (12 Units)

- **DSM 510** Introduction to Digital Social Media 4
- **DSM 520** Managing Technologies for Digital Media 4
- **DSM 596** Final Project Capstone 4
- **DSM 550** Research and Practicum Required Courses (8 units) 4
- **DSM 560** Digital Media Policy, Law, Practices, and Regulation 4

Specialization Classes 4-8 Units

Students choose one to three classes (4-8 units) that help them specialize their area of expertise within the realm of digital social media. Approval from the director is required for these classes. Students may choose from the director’s list or request approval for other classes.

Electives — Communication or Other 4-8 Units

Students may elect to take classes in related topics within the Annenberg School for Communication and Journalism, or from engineering, business, cinema, music, or other area related to digital and social media or related to the sector of implementation that interests the students. Students are strongly encouraged to acquire relevant experience through an internship and may earn degree credit by enrolling in CMGT 531 Communication Internship. With the permission of the program director, students may take up to 8 elective units within the Annenberg School, or from other USC programs.

Graduate Certificate in Health Communication Management

This certificate program is for students holding master’s degrees who wish to pursue or expand careers in health communication. Students will study the latest developments in health communication and how this information can be used to improve public health as well as individual behavior.

Students take 16 units of graduate course work beyond the master’s degree, of which 4 units may be cognate courses. A partial list of courses includes:

- **CMGT 510** Communication, Values, Attitudes, and Behavior 4
- **CMGT 511** Health Communication 4
- **CMGT 520** Social Roles of Communication Media 4
- **CMGT 541** Integrated Communication Strategies 4
- **CMGT 578** Non-profit Advocacy 4
- **CMGT 581** Media in Social Services: Design and Evaluation of Campaigns 4
- **CMGT 583** Social Marketing and Entertainment Education 4
- **CMGT 584** Communication and the Multicultural Marketplace 4
- **CMGT 587** Audience Analysis 4

Graduate Certificate in International and Intercultural Communication Management

This certificate program is for students holding master’s degrees who wish to pursue or expand careers in international and intercultural communication management. Students will study the latest developments in information and communication technologies, markets and cultures, and industry practices within cross-nation, cross-cultural contexts.

Students take 16 units of graduate course work beyond the master’s degree, of which 4 units may be cognate courses. A partial list of courses includes:

- **CMGT 531** Communication and the International Economy 4
- **CMGT 545** Communication and Global Competition 4
- **CMGT 556** Global Marketing Communication 4
- **CMGT 558** The International Entertainment Marketplace 4
- **CMGT 559** Global Hollywood 4
- **CMGT 580** Chinese Media and Society 4
- **CMGT 582** Communication for International Development 4
- **CMGT 584** Communication and the Multicultural Marketplace 4
- **COMM 559** Globalization, Communication and Society 4
- **COMM 561** Leading and Communicating Change in Global Organizations 4

Graduate Certificate in Marketing Communication Management

This certificate program is for students holding master’s degrees who wish to pursue or expand careers in marketing communication. Students will study the latest developments in marketing communication research and theory and the application to marketing communication issues.

Students take 16 units of graduate course work beyond the master’s degree, of which 4 units may be cognate courses. A partial list of courses includes:

- **CMGT 510** Communication, Values, Attitudes, and Behavior 4
- **CMGT 541** Integrated Communication Strategies 4
- **CMGT 544** Creating Organizational Identity: Meaning Through Messages 4
- **CMGT 554** Copywriting and Creativity 4
- **CMGT 555** Online Marketing Communication Development and Analysis 4
- **CMGT 556** Global Marketing Communication Development and Analysis 4
- **CMGT 578** Non-profit Advocacy 4
- **CMGT 581** Media in Social Service: Design and Evaluation of Campaigns 4
- **CMGT 583** Social Marketing and Entertainment Education 4
- **CMGT 584** Communication and the Multicultural Marketplace 4
- **CMGT 587** Audience Analysis 4

Graduate Certificate in Media and Entertainment Management

This certificate program is for students who have already earned master’s degrees and who wish to pursue or expand careers in the entertainment industry. Students will study the latest areas of entertainment-related research, theory and application. They will have a strong grounding in the theory, roles, issues and effects of entertainment as well as the impact of entertainment and new entertainment technologies on society, behavior and the entertainment industry.

Students take 16 units of graduate course work that may not be used or have been used for any other degree or certificate program, of which 4 units may be cognate courses. A partial list of courses includes:

- **CMGT 537** The Industry, Science and Culture of Video Games 4
- **CMGT 542** Business Strategies of Communication and Entertainment Firms 4
- **CMGT 543** Managing Communication in the Entertainment Industry 4
- **CMGT 545** Sports Media and Society 4
- **CMGT 546** Distribution of Recordings: Media, Retail and Online Channels 4
- **CMGT 547** Case Studies in Digital Entertainment 4
- **CMGT 549** Hollywood 3.0 - Entertainment Industry in the Convergence Age 4
- **CMGT 550** Communicating Entertainment Media Identities 4
- **CMGT 551** The International Entertainment Marketplace 4
- **CMGT 552** Global Hollywood 4
- **CMGT 559** Tele-Media: Strategic and Critical Analysis 4
- **CMGT 574** Media in Social Services: Design and Evaluation of Campaigns 4
- **CMGT 583** Social Marketing and Entertainment Education 4
- **CMGT 586** Entertainment Media: Content, Theory and Industry Practices 4
- **COMM 570** Economics of the Communication Industries 4
- **COMM 579** Entrepreneurship in the New Media 4

Graduate Certificate in New Communication Technologies

This certificate program is for students holding master’s degrees who wish to pursue or expand careers in communication technologies. Students will study the latest developments in new communication and media technologies and their application in a variety of organizational and social contexts.

Students take 16 units of graduate course work beyond the master’s degree, of which 4 units may be cognate courses. A partial list of courses includes:

- **CMGT 515** Innovation and the Information Economy 4
- **CMGT 516** Social Dynamics of Communication Technologies 4

Graduate Certificate in Strategic Corporate and Organizational Communication Management

This certificate program is for students holding master’s degrees who wish to pursue or expand careers in corporate communication and communication consulting. Students will study the latest developments in organizational communication research and theory and the application to business communication issues.

Students take 16 units of graduate course work beyond the master’s degree, of which 4 units may be cognate courses. A partial list of courses includes:

Master of Arts in Global Communication

The USC Annenberg School for Communication and Journalism collaborates with the London School of Economics and Political Science (LSE) to provide the course work necessary for students to become fully engaged with the phenomenon of global communication through this dual master’s degree program. Upon satisfaction of all program requirements, students will be awarded a Master of Arts (M.A.) in Global Communication by USC as well as a Master of Science (M.Sc.) in Global Media and Communications by the LSE.

Residence

This is a two-year program during which students spend their first year at the LSE and their second year at USC.

Foreign Language/Research Tool Requirements

There are no foreign language requirements. Students take a one-term research methods course as part of their course work at the LSE.

Course Requirements

The Master of Arts in Global Communication requires 42 units; the equivalent of 18 units earned at the LSE and 24 units earned at USC.

Year One at LSE: The LSE academic year has three terms. Students will complete classes approved by faculty at the LSE. Students must earn at least 3 units at the LSE, which articulates as 18 units at USC.

Year Two at USC: Students must complete COMM 589 as well as 20 elective units (5 courses) from the School of Communication graduate curriculum, excluding COMM 525, COMM 526, COMM 550 and COMM 552.

Students may choose one of their elective courses from a department outside Annenberg with the approval of their advisers.

Students will produce a final research project on global communication that will be the product of work done both at the LSE and Annenberg. Students complete a research project during the summer after their year at the LSE for which grades are awarded by LSE faculty. A passing grade is required. They will continue to develop this project during the year at Annenberg in COMM 588 and must earn a grade of B minus or higher.

Master of Arts in Communication

Individuals seeking the Master of Arts in Communication are expected to acquire and demonstrate a general knowledge of human communication, including humanistic and social scientific approaches.

The program, arranged in consultation with the school’s coordinator of doctoral studies, provides two options: degree with comprehensive examination requires a total of 32 units (normally eight courses), including core courses COMM 525, COMM 526, COMM 550 and COMM 552 and four electives; or degree with thesis requires successful completion of core courses, three electives and 4 units of COMM 594ab Master’s Thesis.

Not more than two approved 400-level courses may be applied to a student’s program and a maximum of 4 semester units with grades of B or better may be accepted by transfer from another institution of higher learning. The minimum acceptable GPA for successful completion of this program is 3.0.

The majority of students choose the comprehensive examination option. The examination consists of six hours of writing, taken on two different days. Permission to take an M.A. degree with thesis can be obtained only by application to the school screening committee.

Master of Public Diplomacy

The Master of Public Diplomacy combines the resources of the Annenberg School for Communication and Journalism and the USC Dornsife College of Letters, Arts and Sciences’ School of International Relations. This program is designed for students who already have a substantial undergraduate background in social sciences or relevant professional experience in subjects such as communications, film and media studies, journalism, political science, public relations and international relations. Students in the program may decide to emphasize public diplomacy training most appropriate for a career in public service, the corporate world or in a nongovernmental organization (NGO) working in the ever-expanding global civil society. USC is a member of the Association of Professional Schools of International Affairs (APSIA).

Requirements for the completion of this degree program are 32 units including a substantive paper or alternative project. Core courses are taught in the School of Communication and the School of International Relations, USC Dornsife College of Letters, Arts and Sciences. With approval of the program director, students may select electives from the entire USC graduate curriculum.

Doctor of Philosophy in Communication

Students in the doctoral program learn theories that guide research into communication processes and effects and into institutions and technologies that lend pattern to communication. Applicants for the Ph.D. are expected to acquire and demonstrate humanistic and behavioral knowledge of communication while acquiring skills requisite to scholarly research in the discipline.

Screening Procedures

Student progress is carefully monitored by the School of Communication faculty. Students are normally screened...
at the end of their first year of graduate study. At that time they must have completed no fewer than 16 and no more than 24 units, including COMM 525, COMM 526, COMM 550 and COMM 552. Students are evaluated on subject matter competence, teaching potential and their ability to conduct independent research. Upon successful passage of the screening procedures, the student has 30 days in which to form a qualifying exam committee.

Course Requirements

The student is required to take a minimum of 76 units and write an approved dissertation. Four core courses – COMM 525, COMM 526, COMM 550 and COMM 552 – and COMM 594ab Doctoral Dissertation are required for all students.

Students specialize in one of five tracks by completing a minimum of three courses (12 units) in one of the following:

2. Media, Culture and Community: CMGT 587, COMM 516, COMM 519, COMM 534, COMM 544, COMM 575, COMM 580, COMM 584, COMM 599, COMM 605, COMM 618, COMM 620, COMM 629, COMM 633, COMM 654, COMM 660, COMM 662;
3. Interpersonal and Health Communication: CMGT 587, COMM 504, COMM 514, COMM 562, COMM 599, COMM 602, COMM 615, COMM 620, COMM 625, COMM 650;
5. Information and Society: COMM 546, COMM 553, COMM 570, COMM 582, COMM 595, COMM 605, COMM 620, COMM 630, COMM 631, COMM 635, COMM 645, COMM 647, COMM 660, COMM 662.

In addition, students must take at least two courses in one other track outside their specialization (8 units total). Students also pursue an approved cognate elective program of study in which at least two courses (normally 8 units) are taken in a field outside the Annenberg School. Students entering the School of Communication with a master’s degree may, with permission, apply part of their previous graduate course work to the cognate requirement. Students in the organizational communication track are required to take at least two methods classes in addition to the core courses, COMM 550 and COMM 552. If taken in a department or unit other than the School of Communication, these courses cannot also be counted toward the student’s cognate requirement.

Research Tool Requirement

Doctoral students are expected to demonstrate methodological competence in an area of specialization prior to taking the qualifying examination. Such competence is usually demonstrated through course work (the successful completion, with grade B or better, of selected course work in addition to their content courses that is approved by the Ph.D. qualifying exam committee taken in the school and/or related departments), and by completion of a preliminary research project. Under special circumstances, students with an exceptional prior background in research methods may demonstrate their competence by successfully passing a research tool examination designed and administered by the Ph.D. qualifying exam committee.

Qualifying Exam Committee

This committee is composed of five USC faculty members, at least three of whom are from the School of Communication. Students are expected to work closely with the members of their qualifying exam committee, especially their committee chair, in selecting advanced coursework and shaping areas of interest and research. In addition to helping the student plan a program, the committee administers the oral portion of the qualifying examination and approves the dissertation committee.

Qualifying Examination

Qualifying examinations for the Ph.D. usually are taken in the third year of study following completion of all required courses and a preliminary research paper. The examination includes both written and oral portions. The written portion is composed by committees of faculty in the relevant areas of study; the oral portion is administered by the student’s qualifying exam committee. Students must pass both portions to be advanced to candidacy. Students must confer with their qualifying exam committee chair, not later than the second week of the semester during which the examinations are to be taken, regarding distribution of written examination hours among subject matter areas.

Doctoral Dissertation

The dissertation is an original research project contributing to knowledge about human communication and should demonstrate a high level of competence in methodologies of scholarly inquiry.

Defense of Dissertation

Dissertations are defended in a formal meeting with the three member dissertation committee. The school prefers that the defense oral be taken prior to final typing so that recommended changes can be made in the final manuscript.

Dual Degree in Law (J.D.) and Master of Communication Management

Academic training in law and in communication management provides a powerful background for careers in business, entertainment or government life. The USC Gould School of Law and the School of Communication collaborate in a program that enables these educational opportunities. Students complete both the J.D. and the Master of Communication Management in three years, the time normally required for the law degree alone.

Students must complete 20 units (five courses) of communication courses at the School of Communication; one required research methods course; one required core conceptual foundation course; two courses from approved CMGT elective areas of focus; the capstone practicum (CMGT 597a and CMGT 597b, total 4 units).

To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean of the USC Gould School of Law may make exceptions to this rule for students enrolled in law school honors programs.

First Year: Required law school courses.

Second and Third Years: 20 units of communication courses, including the 4-unit required research methods course in the first semester of the second year, and the 4-unit required core conceptual foundation course in the second semester of the second year; 18 units of law courses, of which 4 units must be earned as appropriate for acceptance by the School of Communication toward its degree.

All students take CMGT 597a and CMGT 597b in the third year penultimate and final semesters respectively.

Application to pursue the dual degree should be made before completion of 15 units of work in law or 8 units toward the Master of Communication Management degree. Admission by the law school to its J.D. degree will be evaluated as a substitute for GRE scores.

Dual Degree in Master of Communication Management/Jewish Nonprofit Management

The dual degree program, Communication Management/Jewish Nonprofit Management, offers students the opportunity for advanced study of sophisticated communication processes and technologies in the context of the nonprofit arena. The program has been developed by the Annenberg School for Communication and the Gould School of Jewish Nonprofit Management (formerly the HUC-JIR School of Jewish Communal Service) to combine the study of communication theory, processes and technologies with postgraduate education in Jewish nonprofit management and leadership. The goal of this program is for graduates to perform more effectively in the nonprofit sector, having received specific training in areas such as organizational communication, media impacts and policy.

Students of this program are admitted separately to each school. Four of the 52 required credits of graduate course work at Hebrew Union College are used to fulfill the School of Communication’s cognate option.

In addition, the student will complete 24 credits of the school’s course work including the capstone practicum CMGT 597a and CMGT 597b (total 4 units) in the penultimate and final semesters, as well as the School of Jewish Nonprofit Management’s thesis requirements. Of the remaining 20 units (five courses) at the School of Communication, the student must take the following: one required research methods course in the first semester; one required core conceptual foundation course in the second semester; three courses from approved CMGT elective areas of focus.

Those interested in this program should contact the Office of Admissions, Hebrew Union College-Jewish Institute of Religion, 3077 University Avenue, Los Angeles, CA 90007-2796 for comprehensive information about the application process.

Courses of Instruction

Annenberg school for communication and journalism (ASCJ)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

ASCJ 200x Annenberg Skills (1) Intensive skills boot camps teach the verbal, written, and digital skills needed for "real world" jobs. Not available for degree credit.

ASCJ 100 The Changing World of Communication and Journalism (2, Fa) Survey of major themes in media and communication; exploring what it means to be a professional in the fields of communication, journalism, and public relations.

ASCJ 220x Annenberg Experimental (0-2, max 6) Cutting-edge, experimental, experiential, interdisciplinary, results-based classes taught in new ways and places.

ASCJ 420x Annenberg Collaboratory (0-4, max 8) Collaborative, cutting-edge, experimental, experiential, interdisciplinary, results-based classes taught in new ways and places. Recommended preparation: ASCJ 220.
Communication (COMM)

COMM 200 Communication and Social Science (4, FaSp)
Social scientific inquiry into human communication; core theories of message production and reception in interpersonal, group and organizational contexts.

COMM 201 Rhetoric and the Public Sphere (4)
Humanistic approaches to inquiry in communication; qualitative research techniques; core theories of message production and reception in social, political, cultural and mediated contexts.

COMM 202 Communication and Technology (4)
Survey of cultural, social, political, and economic impacts of new communication technologies, including written language, the printing press, the telephone, television, and cyberspace.

COMM 203 Communication and Mass Media (4)
Survey of mass communication research; history, content, effects, theories and policy implications of various media.

COMM 204 Public Speaking (4)
Principles and practices of effective oral communication; analysis of the speaking-listening process; selection and organization of speech materials; use of new presentation technologies.

COMM 205X Communication Practice (1, 2, max 4)
Students address communication issues in a field setting. They will evaluate communication practices using appropriate methodology. Projects are jointly evaluated by internship supervisor and professor. Sophomore standing. Not for major credit for communication majors. Graded CR/NC.

COMM 206 Communication and Culture (4, FaSpSm)
Examinations of cultural institutions, ideologies, artifacts, and productions; role of culture in everyday life; cultural studies as methodology; culture and power.

COMM 207 Economic Thinking for Communication and Journalism (2) Introduction to microeconomic and macroeconomic principles; analysis of contemporary issues in media, communication and journalism industries from an economic perspective.

COMM 208 Media Economics: Perspectives on Communication Industries (2) Application of economic principles in the areas of media ownership, market structure, industry regulations, media convergence, and entrepreneurship in new media. Prerequisite: COMM 207.

COMM 300 Foundations for the Study of Entertainment, Communication and Society (4)
Theoretical foundation for understanding the construction, consumption, and consequences of entertainment from classical to contemporary times; situates entertainment within the ecology of information and communication. Recommended preparation: COMM 200, COMM 201.

COMM 301L Empirical Research in Communication (4)
Experimental and survey methods for communication study; basic statistical concepts, procedures, and tests. Prerequisite: COMM 200.

COMM 302 Persuasion (4)
Theories and research in social influence; strategies and tactics of persuasive communications in such settings as politics, public relations, advertising, business.

COMM 303 Learning from Case Studies in Communication (4)
Case study approaches to communication research; reliability, validity, generalizability, and ethics in qualitative social research; cases in communication policy and practices.

COMM 304 Interpersonal Communication (4)
Analysis of face-to-face interaction; role of communication in the development, maintenance and destruction of relationships; communication processes in managing interpersonal conflict.

COMM 305 Understanding Social Science Research (4)
Students learn to become consumers rather than creators of social science research. Examines the challenges and opportunities of communicating research through mass media.

COMM 306 Innovation, Entertainment, and the Arts (4, FaSpSm)
Explorations of innovation in the entertainment business. The effects of digital mobile media on TV, movies, music, advertising, social networks and art.

COMM 307 Sound Clash: Popular Music and American Culture (4) Music as inter-cultural communication and method for exploring race and ethnicity in the constitution of American culture and American self, role of music industry.

COMM 308 Communication and Conflict (4)
Nature and functions of communication in human conflict; development of communication skills for managing conflict productively in interpersonal, organizational and intercultural contexts.

COMM 310 Media and Society (4)
Interplay between media and society, including family and children's socialization, inter-group relations and community, pornography and violence, gender and race, media ethics, conduct of politics.

COMM 315 Health Communication (4)
Behavioral approaches to health education; communication competencies in health care settings; theories of risky behaviors, and behavioral change programs; special emphasis on AIDS-related issues. Recommended preparation: COMM 301L.

COMM 320 Small Group and Team Communication (4)
Group process theories relevant to communicative behavior in small group/team settings, including information exchange, decision making, leadership, and meetings; student team projects testing theoretical propositions.

COMM 321 Communication in the Virtual Group (4)
Communication processes in global computer networks; formation, maintenance, and decline of virtual groups; privacy and access; introduction to computer networks for communication students and researchers.

COMM 322 Argumentation and Advocacy (4)
Basic argumentation theory including analysis, research and evidence, case construction, refutation; discursive and visual argument; diverse fields of advocacy including law, politics, organizations, interpersonal relations.

COMM 323 Public Deliberation (4)
Introduction to deliberative democracy in culture and governance; examines historical and contemporary institutions of democratic discourse and emerging communication norms.

COMM 324M Intercultural Communication (4)
Cultural variables and social psychological processes that influence intercultural interaction; relationship between communication and culture in diverse settings including business, medicine, and education.

COMM 325 Intercultural Britain: Media, History and Identity (4)
Examines the interplay between media, culture, and politics in the United Kingdom. It covers participatory journalism and communication strategies. Focuses on pioneering digital journalism, social media, and community organizing initiatives.

COMM 330 Rhetoric in Classical Culture (4)
Theories of communication and persuasion in ancient Greece and Rome; cultural and social contexts of classical rhetorical theory; major historical figures and concepts. Recommended preparation: COMM 201.

COMM 335 Rhetoric in Contemporary Culture (4)
Theories of communication and persuasion in contemporary society; cultural and social contexts of contemporary rhetorical theory; major theorists, concepts and controversies. Recommended preparation: COMM 201.

COMM 339 Communication Technology and Culture (4)
Examination of philosophies and popular representations of technology from the origins of western culture to the present and identifies the complex attitudes toward technology.

COMM 340 The Cultures of New Media (4)
Cultural implications of computer-mediated communication and related media. Ideological responses to media innovation; debates over artificial intelligence, virtual communities, and virtual reality. Recommended preparation: COMM 239.

COMM 345 Social and Economic Implications of Communication Technologies (4) Social and economic impacts of information and communication technologies; social factors that shape technological change; issues include access, privacy, freedom of expression, productivity, democratic control.

COMM 350 Video Games: Content, Industry, and Policy (4)
Introduction to the medium; history of video games; video games as aesthetic products, cultural products, economic outputs; policy issues, effects, and sites of community.

COMM 355 Advertising and Communication (4)
Advertising as a mode of communication; U.S. advertising history and institutions; economic and policy contexts (domestic and global); critical analysis of advertising texts.

COMM 360 The Rhetoric of Los Angeles (4)
Representations of Los Angeles communicated in diverse media; the city as a rhetorical text; analysis of cultural identities, art, architecture, and representations in popular culture.

COMM 363 Media Consumption (4)
Theoretical approaches to the study of media consumption and audiences; examines international media and consumption practices; explores new media’s impact on consumption.

COMM 364 Comparative Media: United States and the United Kingdom (4) Cross-national approaches to the study of U.S. and U.K. media; focuses on news and entertainment media products; examines content, industries, technologies and audiences.

COMM 365 The Rhetoric of London (4, FaSpSm)
Examination of the modern city as a communicative text with London as the case study.

COMM 366 Designing Media and Communication Projects for Social Change (4, FaSpSm) Students explore the theoretical and practical issues involved in designing effective media and communication projects for social change in international contexts.

COMM 370 The Rhetoric of Ideas: Ideology and Propaganda (4) Techniques of propaganda in public discourse; communication strategies through which ideas become ideologies; case studies in wartime and corporate propaganda, imperialism, and cultural colonialism.

COMM 371 Censorship and the Law: From the Press to Cyberspace (4) The study of current and historical battles over the limits of free expression from press and
COMM 372 The Image of the Journalist in Popular Culture (4) (Enroll in JOUR 375)

COMM 375 Business and Professional Communication (4, FasSm) Oral and written communication skills demanded in the workplace including informative and persuasive speeches; interviewing, team communication; and training material preparation. Recommended preparation: COMM 204.

COMM 380 Forensics Laboratory (1-4, max 8) Directed individual research studies of contemporary problems. Supervised laboratory experience. Open only to members of the University debate squad.

COMM 381 Issues in Contemporary Sport (4) Explores social, political and ethical issues in elite sports and how issues are addressed through popular media; examination includes the relationship between sports and politics.

COMM 382 Sports, Business and Media in Today's Society (4) (Enroll in JOUR 380)

COMM 383m Sports, Communication and Culture (4) Rhetorical and critical approaches to sports and public discourse; application to sports organizations, the news and popular media; representations of gender and race in sports.

COMM 384 Interpreting Popular Culture (4) Popular culture as an indicator of cultural values, a producer and reflection of cultural meaning, and a means of communication; theory and case studies.

COMM 385 Survey of Organizational Communication (4) The role of information, persuasion, and meanings in organizations. Topics include organizational culture, leadership, decision-making, networks, power, diversity and the global workplace.

COMM 387 Sports and Social Change (4) Application of critical, sociological and rhetorical theories to sports events and sport media; examination of the role of sports in enacting social change.

COMM 388 Ethics in Human Communication (4) Value perspectives on communication in varied settings: interpersonal, organizational, and public. Issues of truth and responsibility in family and social interactions, advertising, and governmental communication.

COMM 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

COMM 395m Gender, Media and Communication (4) Issues of gender in communication, including: media representations of femininity and masculinity; and gender’s role in communication at the interpersonal, public, and cultural levels.

COMM 396 Fashion, Media and Culture (4) Fashion as a form of communication and culture; fashion’s role in identity, body politics, art, nationhood, celebrity and Hollywood culture, youth cultures and subversive practices.

COMM 400 Seminar in Communication (4, max 12) Advanced readings in communication theory and research (broadly defined); specialized interest areas of individual faculty on the frontiers of knowledge; seminar topics change each semester.

COMM 401 Audience Analysis (4) Examines audience analysis methodologies including focus groups, shadow juries, surveys, test marketing and content analysis; application of statistical sampling procedures, data analysis, interpretation and presentation. Prerequisite: COMM 301L.

COMM 402 Public Communication Campaigns (4) Theory and research in public health communication campaigns; design, implementation, and evaluation; extensive discussion of historical case studies and reasons for success or failure.

COMM 411 Communication Criticism (4) Methods and functions of criticism in forms of public communication; historical-contextual, textual, and interpretive procedures; diverse theoretical approaches including formalism, dramatism, genre, and ideology. Prerequisite: COMM 201.

COMM 413 Propaganda, Ideology and Public Controversy (4) Seminar examining the relationship between propaganda, ideology, critical thinking and rhetoric; application to contemporary controversies, both domestic and global; role of public argument. (Duplicates credit in COMM 370.)

COMM 414 Communication and Social Change in China (4) Examines social, political, and cultural implications of media and communication on Chinese society; regulations relevant to Chinese communication; market reforms, telecommunication, internet and creative industries.

COMM 415m African American Rhetoric and Image (4) Interactive course addresses how people of color use symbols to construct identities and communities and disrupt networks through media, politics, entertainment and technology. Recommended preparation: COMM 201.

COMM 421 Legal Communication (4) Analytical and communicative aspects of judicial argument; philosophy and techniques of jury trials, cross examination, and appellate advocacy; research, preparation, and presentation of case briefs. Prerequisite: COMM 322.

COMM 422 Legal Issues and New Media (4) Examines laws and regulatory policies shaping new media, especially the Internet; impact of regulation on development and use of communication technology.

COMM 425 Communicating Religion (4) Genres of religious communication, including sermon, prayer, ritual, polemic, and revival. Impact of technological and cultural change on religious advocacy, beliefs, and practices.

COMM 426 Religion, Media and Hollywood: Faith in TV and Film How religion, ethics and spirituality are embedded, embodied and emplotted in television drama; how secular texts represent “lived religion” to increasingly diverse audiences.

COMM 430 Global Entertainment (4) Survey of economic, political, and cultural dimensions of the global entertainment marketplace; focuses on the international production and distribution of media products and services.

COMM 431 Global Strategy for the Communications Industry (4) Addresses the practical and theoretical aspects of the international economy that are most relevant to management strategy in the communications industry.

COMM 432 American Media and Entertainment Industries (4) Examines the history, technology, regulations and business practices of American broadcast and entertainment industries.

COMM 433 Home Entertainment (4) History and impact of television and ancillary home entertainment (pay television, cable television, home video, DVD, DVR, video-on-demand, etc.) on media industries and consumer experience.

COMM 440 Music as Communication (4) Examines music’s unique characteristics as a communicative form and the cultural, economic, political and social influences in music interpretation and production.

COMM 443 Communicating Health Messages and Medical Issues (4) How communication – interpersonal, mass media, and information technologies – shapes health behavior. Topics: doctor-patient consults; public campaigns; health issues in entertainment, news, and on the Internet.

COMM 444 Critical Theories of Sport (4) Focuses on critical theories that examine social and political roles of sport in society and how these roles play out in media and broadcast platforms.

COMM 450 Visual Culture and Communication (4) Examines issues of visual images in communication related to history, modernity, cityscapes, news media, advertising, evidence, science, digital technology, and globalization. Recommended preparation: AHS 100, COMM 201, FA 150.

COMM 451 Visual Communication and Social Change (4) Analysis of photography’s evolution; new strategies for the photographic image, photo documentary work and global social issues; analysis of images on blogs and Websites.

COMM 454 Media, Money, and Society (4) Money as communication; social scientific analysis of money and financial markets; money and popular culture; the business press; representations of Wall Street in Hollywood cinema.

COMM 455 Advertising and Society (4) Examination of the role of advertising in contemporary society as an economic force and a cultural form of representation. Recommended preparation: COMM 200, COMM 201.

COMM 456 Entertainment, Marketing and Culture (4) Explores construction of “entertainment” in media and popular culture, including television, movies, video games, toys, magazines, and music. Examines children as a unique audience. Prerequisite: COMM 300; recommended preparation: COMM 200, COMM 201.

COMM 457 Children and Media (4) Explores construction of “childhood” in media and popular culture, including television, movies, video games, toys, magazines, and music. Examines children as a unique audience. Prerequisite: COMM 300; recommended preparation: COMM 200, COMM 201.

COMM 458m Race and Ethnicity in Entertainment and the Arts (4, FassSm) Explores how race and ethnicity as social categories are shaped by communication media; focuses on how race and ethnicity sustain entertainment and media industries. Prerequisite: COMM 206.

COMM 459 Fact and Fiction: From Journalism to the Docudrama (4) (Enroll in JOUR 459)

COMM 460 Collaboration and Group Decision Making (4) Advanced seminar examining the theoretical,
COMM 463M Gender in Media Industries and Products (4) Examination of the effect of gender stratification in media industries upon the cultural products they create, especially gender and gender/race role portrayals.

COMM 466M People of Color and the News Media (4) (Enroll in JOUR 466M)

COMM 467 Gender and the News Media (4) (Enroll in JOUR 467)

COMM 468 Cross-Cultural Negotiations: Communication and Strategy (4) Application of intercultural communication theories and negotiation theories in the preparation and execution of global negotiations; strategies for creating mutual gains and sustained partnerships.

COMM 470 Information and Communication Technologies Strategic Analysis (4) Frameworks for strategically analyzing information and communication technologies; issues of regulation, control and social impacts of evolving ICTs; original research project of ICT strategy. (Duplicates credit in COMM 345.)

COMM 473 Advanced Issues in Communication and Technology (4) Advanced level readings into human-computer interfaces; social interaction with artifacts; concept of presence, and emerging social and psychological issues of new communication and computer technologies. Prerequisite: 301L.

COMM 475 Environmental Communication (4) Communication about environmental controversies in the public sphere: history of environmentalism; forms of citizen participation; media coverage; advocacy campaigns and movements; scientific and industrial discourses.

COMM 480 Nonverbal Communication (4) Theory and research; examination of the influence of environmental factors, physical behavior, and vocal cues on human communication.

COMM 482 Comparative Media in Europe (4, 5m) (Enroll in JOUR 482)

COMM 486 Human and Technological Systems in Organizations (4) How communication and information technologies are linked to organizational control, design, cultures; technology and competitive advantage; ethics and policy issues; technology-mediated work. Recommended preparation: COMM 385.

COMM 487 Communication and Global Organizations (4) The role of communication in global organizations; information, networks, and communication technologies for global organizing; computer-based collaborative work and virtual organizations. Recommended preparation: COMM 385.

COMM 488 Communication Research in Organizations (4) Seminar in application of communication research tools; diagnosis and analysis of communication problems; current topics in organizational communication scholarship; students complete original research projects. Recommended preparation: COMM 385.

COMM 489 Campaign Communication (4) Problems in political communication: creating an informed electorate, use of mass media, factors in voter persuasion. Guest experts in political analysis, opinion polling, communication evaluation.

COMM 490X Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

COMM 494X Research Practicum (2-4, max 4) Students gain research experience in the design, implementation, analysis, and reporting of communication research. Students serve as research assistants to faculty members. Not available for graduate credit.

COMM 495 Honors Seminar (4, max 8) Advanced study of issues in communication; recent developments in communication and rhetorical theories. Open only to students in COMM Honors Program. Recommended for seniors. Recommended preparation: COMM 301L.

COMM 497X Honors Thesis (4, FaSp) Writing of the honors thesis. Not available for graduate credit. Open only to COMM honors students; seniors only.

COMM 498 Ethical Issues in Entertainment and Communication (4, FaSpSm) Examines social and political controversies over conflicting ethical standards for communication in a variety of media: mass-media, communication technology, and entertainment. Prerequisite: COMM 310.

COMM 499 Special Topics (1-4, max 8) Selected topics in communication.

COMM 504X Interpersonal Communication (4) Theories of communication behavior in relatively unstructured, face-to-face situations; examination of decoder-encoder, message, channel, and situational variables. Not available for Master of Communication Management students.

COMM 508X Power, Politics and Conflict in Communication (4) Human communicative behavior involving the creation and resolution of conflict in interpersonal, small group, and formal organizational settings. Not available for Master of Communication Management students.

COMM 511X Contemporary Rhetorical Theory (4) Theories of rhetoric from the 18th century to the present; emphasis on Perelman, Burke, Habermas, Grassi, and Booth. Not available for Master of Communication Management students.

COMM 512X Rhetorical Criticism (4) Theories and methods of assessing popular persuasive art forms such as contemporary drama, music, poetry, and journalism as well as traditional forms of public address. Not available for Master of Communication Management students.

COMM 513X Neoclassical Rhetorical Theory (4) Theories of rhetoric from the fifth century A.D. through the 18th century; emphasis on dictamin, praedicandi, poetriae, Alquim, Ramus, Port-Royalists, Bacon, Campbell, Blair, and Whately. Not available for Master of Communication Management students.

COMM 514X Social Movements as Rhetorical Form (4) Study of the rhetoric of social change; methodologies for analysis and appraisal; investigation of specific collective protest and reform movements. Not available for Master of Communication Management students.

COMM 515X Postmodern Rhetorical Theory (4) Implications of postmodernity for rhetorical theory and criticism; issues of textuality, agency, and subjectivity in communication; study of selected postmodern figures. Not available for Master of Communication Management students.

COMM 516X Feminist Theory and Communication (4) Implications of feminist theory for communication; topics include epistemology, technology, women and language, feminist approaches to media and film, women and the workplace. Not available for Master of Communication Management students.

COMM 517X Rhetorical Theory and Culture (4) Issues of culture in recent rhetorical theory; in-depth examination of representative idealist, pragmatist, structuralist, critical, and post-modern accounts of the symbolic construction of cultural forms. Not available for Master of Communication Management students.

COMM 518X American Public Address (4) History and criticism of major American speakers and speeches with reference to the social, political, and intellectual background of their times. Not available for Master of Communication Management students.

COMM 519X Cultural Studies in Communication (4) Theoretical foundations, history, and development of cultural studies in communication; implications of issues of nationalism, colonialism, technologies, popular culture, and politics of bodies for communication. Not available for Master of Communication Management students.

COMM 521X Argumentation (4) Foundation of critical deliberation: the nature of informal reasoning; logical and ethical problems; analysis and appraisal of naturalistic argument. Not available for Master of Communication Management students.

COMM 522X Kenneth Burke's Dramatic Theory (4) Studies the contributions of Kenneth Burke, among the most significant figures in the development of contemporary rhetorical theory and criticism. Not available for Master of Communication Management students.

COMM 523X Small Group Process (4) Contemporary theoretical models; problems in determination and measurement of variables in small group communication environments; assessment of recent research. Not available for Master of Communication Management students.

COMM 525X Humanistic and Social Scientific Approaches to Human Communication I (4) Overview of the humanistic and social scientific approaches to the study of communication; emphasis on rhetorical/critical and macro social scientific perspectives. Not available for Master of Communication Management students.

COMM 526X Humanistic and Social Scientific Approaches to Human Communication II (4) Overview of the humanistic and social scientific approaches to the study of communication; emphasis on macro and micro social scientific, symbolic and structural perspectives. Not available for Master of Communication Management students.

COMM 534 The Culture of New Technologies (4) In-depth approach to cultural impact of the Internet, multimedia, digital imaging, CD-ROM and virtual reality in context with photographic realism, artificial intelligence and virtual communities.

COMM 544 The Arts and New Media (4) Organization, economics, and policy of arts as affected by new technologies. Architecture, design, advertising, and fashion as context. Implications for arts promotion, management, and funding.

COMM 546 Diffusion Theory and Research (4) Diffusion of new ideas over time among the members of a system. Emphasis upon the spread and adoption of new communication technologies.

COMM 550 Quantitative Research Methods in Communication (4) Epistemological assumptions, design,

COMM 555 Qualitative Research Methods in Communication (4) Developing expertise in qualitative methods, including participant-observation, ethnography, discourse analysis and historiography in communication research. Not open to Master of Communication Management students.

COMM 553 Political Economy of Global Telecommunications and Information (4) The political, economic, regulatory, and technological changes that are together creating a new world information economy. The politics of international telecommunications is emphasized.

COMM 554 Regression and Multivariate Communication Research (4) Advanced analysis of variance, regression models, path analysis, MANOVA, and discriminant analysis. Not open to Master of Communication Management students.

COMM 559 Globalization, Communication and Society (4) Comparative analysis of social, cultural and political impacts of communication technology and media; emphasis given to communication’s influence in the social dimensions of globalization.

COMM 560 Critical Approaches to Global Media and Communication (4) The characteristics of global communication in global capitalism and the political economic processes within which policies, interests, and implications of global communication are embedded.

COMM 561 Leading and Communicating Change in Global Organizations (4) Communication perspectives on the process and outcomes of globalization; role of large media organizations in the global flow of information; and leadership and multiculturalism.

COMM 574x Social and Communication Issues in the Workplace (4) Examines the management and implementation of communication in the workplace.

COMM 570 Economics of the Communication Industries (4) The economic forces that determine the structure and outputs of communication and media industries, including newspapers, broadcasting, cable, and telecommunications.

COMM 575 Advocacy and Social Change in Entertainment and the Media (4) Examines how diverse groups (i.e., governmental agencies, advertisers, health organizations, advocacy groups, actors, social scientists) attempt to influence audiences through entertainment and traditional media channels.

COMM 578 New Media Literacies (4) Examines intersection of education and participatory culture, literacy and media change, the participation gap, informal learning and knowledge communities, emerging social skills and cultural competencies.

COMM 579 Entrepreneurship in the New Media (4) Examination of how the digital revolution is creating news media entrepreneurs, and changing the way news is disseminated by journalists and heard by consumers.

COMM 580 Media and Politics (4) Mass media in American political life, including political reporting, election campaigns, non-electoral politics, and the media as a political issue.

COMM 582 International Communication: National Development (4) Roles of media institutions and communications behavior in national development, including political, economic, and social spheres; Western and non-Western conceptions of development processes.

COMM 584x Interpreting Popular Culture (4) The use of semiotic, literary, psychoanalytic, and other approaches for describing and interpreting popular cultural phenomena, including television, advertising, film, music, and fashion.

COMM 585x Organizational Communication (4) Theory and research; field experience in analyzing and solving communication problems in organizations. Not available for Master of Communication Management students.

COMM 590 Directed Research (1-12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the school. Graded CR/NC. (Duplicates credit in former COMM 590.)

COMM 598 Practicum in Global Communication Research (4) Development and assessment of research into global communication; selection of appropriate research methodologies; and production of scholarly research. Open to M.A. in Global Communication students only.

COMM 599 Special Topics (2-4, max 8)

COMM 602 Seminar in Persuasion (4) Classical and contemporary theories of persuasion, attitude formation and change; impact of cognition, affect and emotions; cultural and group influences; message strategies and framing. Not open to Master of Communication Management students.

COMM 605 Advanced Macro Theories of Communication I (4) Advanced macro theories of communication and culture creation/change; emphasis on structural-functionnalism, neo-Marxism, critical theory, symbolic interactionism, phenomenology, poststructuralism, deconstruction.

COMM 610 Studies in Rhetorical Theory (4, max 12) Problems in rhetorical theory and criticism; advanced, specialized interest area of individual faculty on the frontiers of knowledge.

COMM 615 Health Communication (4) Evaluation of research about communication in patient care, health campaigns for diverse publics, tools for disease management, and outreach to producers in mass media.

COMM 616 Health Communication for Prevention (4) Examination of health communication efforts for the prevention of diseases or other adverse physical or mental health outcomes by the promotion of behavior change.

COMM 618 Mass Media Effects (4) Theoretical and research questions about mass communication effects; criticism and interpretation of current research and theory, and formulation of new theory.

COMM 620 Studies in Communication Theory (4, max 12) Current problems in communication theory and research; advanced, specialized interest areas of individual faculty on the frontiers of knowledge.

COMM 623 Theory Construction in Communication (4) The nature of theories; conceptual and methodological problems in theory construction; application to contemporary issues in communication research.

COMM 629 Global Culture (4) Examines the relationship of culture to globalization, ranging from nationalism and colonialism to global cultural products, multinational cultural production, diasporic cultures, global media, and cosmopolitanism.

COMM 630 Communication Technology and Social Change (4) Impact of technological advances on human communication practices and theories; trends, forecasts, implications.

COMM 631x Minds and Media (4) Sociopsychological consequences of human interaction with media and computers; evolution of minds; effects of media forms and contents on cognition and affection; concept of presence. Not available for Master of Communication Management students.

COMM 635 Economics of Information (4) Applications of macro and microeconomic principles: economic role of the information sector; production, distribution, and pricing of information products; information in the functioning of markets.

COMM 636 Interpretive and Cultural Approaches in Organizational Communication (4) Interpretive, critical and cultural research in organizational communication; emphasis on narrative approaches to ethnographic studies, critical essays, and quantitative intercultural research in organizational communication.

COMM 637 Current Readings in Organizational Communication (4) Recent developments in organizational communication theory and research; emerging issues and methodologies; future directions.

COMM 638 Global, International and Intercultural Communication in Organizations (4) Communication processes in global organizational transformation; influences of information technology, intercultural variables, and globalization on decision-making, operations and practices of international and transnational organizations.

COMM 640 Communication and Organizational Change (4) Analysis of communication and information networks in organizations and their relationships with communication technologies, organizational behavior, and management.

COMM 641 Organizations and Communication Technologies (4) Communication technology impacts on organizations; organizational influence on technology development and deployment; methods for organizational communication technology studies; critiques and implications for theory and research.

COMM 645 Communication Networks (4) Conceptual and analytic issues in network perspectives; emphasis on communication patterns, processes, content, influences and impacts.

COMM 646 Negotiating Boundaries in Environmental Research (2) Examines how environmental disciplines are discursively constructed; explores problems of utilizing scientific/technical results in policy-making arenas; and introduces strategic communication skills.

COMM 647x Network Society (4) Advanced research seminar examining the interaction between communication technology, society, economy, politics and culture from interdisciplinary and cross-cultural perspectives. Not available for Master of Communication Management students.

COMM 648 Online Communities and Networks (4) Examination of academic research on the social, cultural, political, and economic effects of online communities; policy implications of this research; mobile technology’s role in community building. Not open to Master of Communication Management students.
COMM 650 Survey Construction and Validation (4) Principles of survey construction and validation; format selection, sampling, question wording, adaptation for international audiences, response option formats, order, and avoiding acquiescence bias and breakoffs.

COMM 652 Field Research in Communication (4) Examines quantitative and qualitative field methods in communication research; survey development and scaling, content analysis, ethnographic study; quasi-experimental design; time series analysis.

COMM 653 Research, Practice and Social Change (4) Examination of theoretical models and best practices of academic research and advocacy relationships; students conduct a community-based research project using a model of community-based participatory research.

COMM 654 Art, Artists and Society (4) Cultural and temporal differences in defining arts, artists and audiences; transmitting cultural beliefs through art; understanding aesthetic experiences; responses of alienation and incomprehension with art.

COMM 660 Entertainment and Games (4) Contemporary meaning of “entertainment,” historical and cultural developments of entertainment; entertainment as psychological process of responding to/interacting with various media. Not open to Master of Communication Management students.

COMM 662 Video Games Research (4) History and content, motivation and selection, reception and reaction processes, and effects of video games; students conduct original research into video game usage and effects. Not open to Master of Communication Management students.

COMM 675 Independent Study (1-4) A supervised course tailored to specific student interests. The professor and student develop a syllabus that permits exploration of advanced or specialized topics. Graded CR/NC.

COMM 694 Preliminary Research Paper (2) Independent research designed to demonstrate the student’s ability to conceptualize, conduct, and present scholarly research. Parallel to COMM 794. Graded CR/NC.

COMM 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the school. Graded CR/NC.

Communication management (CMGT)

CMGT 500 Managing Communication (4) Production and distribution of information within large organizations; information networks, organization structure, control and decision-making functions. Resources necessary for effective organizational communication systems.

CMGT 501 Communication Management Pro-Seminar (4) Central issues of theory and practice in the management of communication; broad introduction to all areas of the program. Open to Master of Communication Management students only.

CMGT 502 Strategic Corporate Communication (4) Roles, responsibilities and requirements of communication functions within corporations; design and implementation of communication plans; strategic message production for internal and external audiences.

CMGT 503 Strategic Communication Consulting (4) Communication consulting skills including facilitation, training, presentation coaching, benefits writing, speech writing, and communicating organizational change; consulting basics, proposals, cost estimating, and final reports.

CMGT 504 Writing for Strategic Communication (4) Writing skills necessary for an organizational communicator; review of strategic writing fundamentals; development of portfolio of diverse media applications based on strategic corporate communication requirements.

CMGT 505 Communication in Work Settings (4) How work settings determine communication: basic structures of communication, influence of technology, social contexts, and physical space. Applications to management.

CMGT 506 Images and Image Management (4) Examines images and image manipulation in communication, management and social control. Synthesizes work ranging from cognition and interpersonal behavior to mass media and popular culture.

CMGT 507 Information Management (4) Develops conceptual frameworks for understanding information, uncertainty, ambiguity, and knowledge. Principles for decision-making, awareness of biases, mathematics of risk-taking, and practices for sense-making. (Duplicates credit in former COMM 507.)

CMGT 508 Communicating Strategy and Change (4) Examination of role of communication in developing and implementing business strategy; critical assessment and practice with models, tools, and techniques for communicating change.

CMGT 509 Influential Communication in the Marketplace (4) Promotional messages as both creative expressions and agents for behavioral change; application of social science theories of persuasion and compliance in interpersonal and mass-media venues.

CMGT 510 Communication, Values, Attitudes and Behavior (4) Theory and research on value and attitude formation and change; consequences for communication and behavior.

CMGT 511 Health Communication (4) Connections between health providers’ communication and patients’ well-being; consultation language, nonverbal behavior, physical settings, design of media messages, information technologies in patient education and care.

CMGT 512 Unintended Consequences of Communication (4) A multidisciplinary examination of the unintended consequences of interpersonal, mass media, political, commercial, and social communication by analyzing tactical and strategic errors in communication campaigns.

CMGT 515 Innovation and the Information Economy (4) Analysis of the innovation dynamics fueled by the information and communication technology revolution; economic, technological, institutional and personal underpinnings of innovation and entrepreneurship.

CMGT 520 Social Roles of Communication Media (4) How mass media shape public images of groups, channel political power, promote consumption of goods. Social and political theories as tools in evaluating media impact.

CMGT 528 Web Designs for Organizations (4) Students learn to assess organizations’ online needs, to examine the use of the Internet in terms of electronic commerce and global pressures, and to design Web page strategies.

CMGT 530 Social Dynamics of Communication Technologies (4) Impact of television, satellites, computers, and other new technologies; competing theories about the role of technology in society; historical effects of introducing new technologies.

CMGT 531 Communication and the International Economy (4) Examines the impact of global economic changes on communications industries, the political and economic forces shaping these industries and the roles of its managers.

CMGT 533 Emerging Communication Technologies (4) Basics of multimedia; new forms of audio and video interactive technologies; computer communication networks; social, political, cultural, interpersonal, organizational issues related to emerging communication technologies. (Duplicates credit in former COMM 533.)

CMGT 535 Online Communities for Organizations (4) How Web-based technologies affect organizational communication, including issues related to collaboration, innovation and knowledge management, forecasting, and networking. (Duplicates credit in former COMM 535.)

CMGT 536 Team Communication and Leadership (4) Theories of effective team communication and leadership; case studies of effective and ineffective teams and leaders; teamwork and communication development; and distributed work teams.

CMGT 537 The Industry, Science and Culture of Video Games (4) History, social dynamics, and cultural impact of video games; developments in technology and design; issues confronting the video game industry and organizations.

CMGT 540 Uses of Communication Research (4) Applications of data and interpretation in communications management. Topics include: audience ratings, surveys, experimental tests of programs and campaigns, formative evaluation, secondary data sources.

CMGT 541 Integrated Communication Strategies (4) Communication strategies for product marketing and advertising; communication’s role in developing domestic and international markets; practical applications of persuasion theory.

CMGT 543 Managing Communication in the Entertainment Industry (4) Examination, application and critique of traditional and contemporary organizational communication theory as it applies to the entertainment industry’s unique internal and external environments.

CMGT 544 Creating Organizational Identity: Meaning Through Messages (4) Use of rhetorical theories and communication models to create organizational identification with internal and external audiences; the role of values and ethics in creating identities.

CMGT 545 Communication and Global Competition (4) How communication technologies are used to secure competitive advantage; how firms use communication systems to sustain effective positioning in an industry; convergence of communication industries.

CMGT 546 Sports Media and Society (4) History and evolution of sports media industry; traditional, new and alternative sports media; globalization of sports; sports promotions and personalities.

CMGT 547 Distribution of Recordings: Media, Retail and Online Channels (4) Cultural and critical analyses of radio and recording industry development and business strategy; influence of legal and regulatory institutions, impact of new forms of distribution.
## CMGT 548 Issues in Children’s Media (4)
Historical review of children’s programming; programming genres; ethical and business issues of marketing to children; children’s uses of various media.

## CMGT 549 Case Studies in Digital Entertainment (4)
Explores foundation of U.S. media policy in the digital age; students prepare White Papers on an urgent issue of contemporary digital media and entertainment policy.

## CMGT 550 Hollywood 3.0 – Entertainment Industry in the Convergence Age (4)
In-depth analysis of the challenges confronting the entertainment industry in the wake of media convergence including a survey of media convergence history and theories.

## CMGT 551 Communicating Entertainment Media Identities (4)
Understanding dynamics in entertainment markets enabled by emerging digital technologies; broad and niche strategies to target appropriate audiences, building audience engagement with entertainment content identities.

## CMGT 552 Visual Storytelling: Production, Management and Culture (4)
Focuses on management, production and distribution of scripted film, television and web stories to understand visual storytelling as a communicative strategy for advertising and education.

## CMGT 554 Copywriting and Creativity (4)
Foundational and advanced practices for copywriting and related design in communication; integrated analysis of concepts and pragmatics surrounding creativity for communication effectiveness.

## CMGT 555 Online Marketing Communication Development and Analysis (4)
Analysis and development of online communication and marketing campaigns; exploration of current Internet best practices in social media, SEM, privacy, location-based marketing, and online measurement.

## CMGT 556 Global Marketing Communication (4)
Communication strategies in a global marketing environment; analysis of global-local challenges and opportunities; effective global integrated communication to create and sustain competitive advantage.

## CMGT 557 Communication Policy in the Global Marketplace (4)
Comparative analysis of various countries’ communication and information technology policies; examines developments in telecommunications, broadcasting, and entertainment industries and policy questions for global media marketplace.

## CMGT 558 The International Entertainment Marketplace (4)
Global influences on entertainment industries (broadcasting, film, telecommunications, Internet, video games, and music); case analyses of specific organizations and geographic regions; impact on local cultures.

## CMGT 559 Global Hollywood (4)
Examines the influence of the transglobal flow of media between the U.S. entertainment industries and other national media industries.

## CMGT 560 Communications Policy (4)
Evolving regulation of telephone, radio, television, cable, print, and other media. Major policy-makers and decision points in policy-making at local, state, national, and international levels.

## CMGT 565 Communication Law and Broadcasting (4)
History and present status of broadcast regulations; emphases on First Amendment, character of regulatory agencies, impact of court decisions, influence of technological advances.

## CMGT 566 Communication Law and New Technologies (4)
Development of law in newer technologies. Cases include cable television, low power television, direct broadcast satellites, teletext, video cassettes, telephone, data networks, computer regulation.

## CMGT 567 Internet Policy, Practice and Regulation (4)
Examines how legal decisions impact commercial and personal uses of the internet; regulatory responses to court decisions.

## CMGT 571 Communications Technologies (4)
Basic technological concepts necessary to understand the workings of modern communications products and services, to include frequency, bandwidth, electricity, modulation, and digital conversion.

## CMGT 572 Evaluating Communication Needs (4)
Participation as consultants in field projects. Use of organizational, interpretive, and statistical methods to design organizational communication systems is emphasized.

## CMGT 574 Tele-Media: Strategic and Critical Analysis (4)
Strategic and critical analyses of emerging and new communication technologies from historical, business, financial, consumer, and policy perspectives.

## CMGT 576 Communication Strategies for Conflict Management (4)
Communication strategies for effective negotiation, mediation and facilitation of disputes; structures for public interventions; emergence of online dispute resolution systems.

## CMGT 577 Communicating Corporate Social Responsibility (4)
Evolution, models, metrics and communication impact.

## CMGT 580 Chinese Media and Society (4)
The political economy of communications and information in China’s broader process of development and reentry into global capitalism; particular media and communication conditions and policies.

## CMGT 581 Media in Social Services: Design and Evaluation of Campaigns (4)
Theory and research issues in the use of media for changing behavior in health, public safety, welfare, and other areas of social services. (Duplicates credit in former CMGT 581.)

## CMGT 582 Communication for International Development (4)
Comparison of traditional communication programs and newer information and communication technologies for analyzing needs of international communities; design, implementation, monitoring, and evaluation of development-related projects.

## CMGT 583 Social Marketing and Entertainment Education (4)
Theoretical foundations of social marketing and entertainment education; uses of dramatic serials, telenovelas and animation to promote human rights; program design, evaluation.

## CMGT 584 Communication and the Multicultural Marketplace (4)
Popular culture and marketing communication; race, gender, sexual orientation and consumer culture; consumption patterns and identity, loyalty and self-actualization; cultural marketing campaigns and sociopolitical conflict.

## CMGT 585 Communication Leadership in the Entertainment Industry (4)
Examination of the communicative elements of leadership in entertainment products and processes; the role of communication experts in supporting, coaching and facilitating entertainment leadership.

## CMGT 586 Entertainment Media: Content, Theory, and Industry Practices (4)
Examination of social scientific theory and research on patterns of media content; effects of mass media exposure on individuals and society; and industry practices.

## CMGT 587 Audience Analysis (4)
Fundamental principles of audience research; critique of existing methodologies; implications for global audiences and mass media markets.

## CMGT 590 Directed Research (1-12)
Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the school. Graded CR/NC. (Duplicates credit in former COMM 590.)

## CMGT 591 Communication Internship (1-3, max 3, FaSpSm)
Field experience in applying communication principles to settings in organizations, campaigns, or other contexts; analysis and assessment of issues and problems. Open to master’s degree students in the School of Communication.

## CMGT 592 Theory and Practice of Professional Presentations (2)
Application of communication and persuasion theories in the creation of oral presentations; critical assessment of the role of new technologies for professional presentations. Not available for students in the M.A. and Ph.D. programs in communication. Graded CR/NC.

## CMGT 597 Communication Research Practicum (2, FaSpSm)
Students design and produce an original project appropriate for their emphasis area within the Master of Communication degree. Open to Master of Communication Management students only. Prerequisite: CMGT 591 and CMGT 540. (Duplicates credit in former CMGT 597.)

## CMGT 599 Special Topics (2-4, max 8)

### Digital Social Media (DSM)

## DSM 510 Introduction to Digital Social Media (4, Sp)
Explores the sector of digital social media and online communities, with a focus on user experience, social impact, strategic content creation, and models for success. (Duplicates credit in former CMGT 534.) Open only to digital social media majors.

## DSM 520 Managing Technologies for Digital Media (4, Sp)
Students learn strategy and decision-making for the technical development and management of online sites and mobile apps, including management of platforms, languages, products, and tools. (Duplicates credit in former CMGT 528.) Open only to digital social media majors.

## DSM 550 Analytics and Research Methodology (4, Sm)
Teaches the use and interpretation of digital analytics as well as the use of research design, methodology, and basic statistics for digital sites and apps. Prerequisite: DSM 510 and DSM 520. Open only to digital social media majors.

## DSM 560 Digital Media Policy, Law, Practices, and Regulation (4, Fa)
Explores laws, policies, and regulations affecting digital social media, including intellectual property, finances, digital content, and gaming. Prerequisite: DSM 550. Open only to digital social media majors.

## DSM 595 Final Project Capstone (4, Fa)
Teams of students develop working sites or apps. Development includes pitching, conceptualizing, developing, and launching of funded, final projects. Prerequisite: DSM 510.
Public Diplomacy (PUBD)

PUBD 500 Introduction to the Advanced Study of Public Diplomacy (4) Introduction to the advanced academic study of public diplomacy from multidisciplinary perspectives; including media and communication, international relations and history.

PUBD 503 Historical and Comparative Approaches to Public Diplomacy (4) Examines historical and comparative approaches to public diplomacy. Explores public diplomacy operations in public and private settings, by individuals and institutions. Reviews traditional, critical, war, and peace perspectives.

PUBD 504 Global Issues and Public Diplomacy (4) Focuses on critical global issues/challenges that require some form of intervention from the international community. Taught with active leading strategies: case studies and “problem-based learning.”

PUBD 508 The Rhetoric of War and Peace (4) Special exercise in “Think Tank” procedure that explores rhetorics of war and peace from a 21st century perspective.

PUBD 509 Advocacy in Public Diplomacy: Argumentation and Debate (4) Skills and theory based approach to the criticism and development of public diplomacy campaigns. Emphasizes the instruction of advocacy skills to assess the utility of specific campaigns.

PUBD 510 Technologies and Public Diplomacy (4) Explores relationship between diplomacy and technological change. Emphasis on question of how new media may force us to rethink traditional frameworks of public diplomacy.

PUBD 512 Cultural Diplomacy (4) Provides overview of formal cultural diplomacy and concentrates on ways in which non-governmental entities communicate across international boundaries and the effects of those interchanges.

PUBD 514 Corporate Diplomacy (4) Provides basic public diplomacy and public relations tools for global organizations and their foreign publics.

PUBD 515 Transnational Diplomacy and Global Security (4) Examination of the historical and theoretical basis of diplomatic relationships between states, international organizations, and transnational non-state actors in developing global peace and security policies.

PUBD 516 International Broadcasting (4) History, context and practice of global international broadcasting strategies; technological and financial parameters that shape future international broadcasting strategies; use of radio, television, and internet.

PUBD 518 International Exchanges and Public Diplomacy (4) Examination of educational and cultural exchanges; variety and experience of participants, flagship exchange programs, economic and social implications of the programs, and measurement of outcomes.

PUBD 519 News Media and the Foreign Policy Process (4) Analysis of news media’s role in contemporary diplomacy; historical context; consideration of the professional practices of journalists and those who devise and implement foreign policy.

PUBD 520 Regional Studies in Public Diplomacy (4, max 16) In-depth examination of historical, political, economic, cultural factors that influence public diplomacy efforts within specific geographic regions.

PUBD 522 Hard Power, Soft Power and Smart Power (4) Institutional and cultural perspectives on instruments of state power; military, intelligence, trade, and traditional diplomacy; strategic analyses for determining proper use; desirability of combining resources.

PUBD 524 The Public Diplomacy of Trade (4) Public diplomacy’s role in shaping ideas about trade and development and in creating trade agreements, and the use of trade agreements as public diplomacy.

PUBD 526 Public Diplomacy Evaluation (4) Critical examination of challenges and benefits of measuring public diplomacy’s impact; terminology and mechanics of evaluation, the measurement community, and varying approaches for evaluation.

PUBD 590 Directed Research (1-12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the school. Graded CR/NC.

PUBD 596 Practicum in Public Diplomacy Research (4) Development and production of original research-based project in the area of public diplomacy. Graded CR/NC.

PUBD 599 Special Topics (2-4, max 8) Special topics in the area of public diplomacy.

School of Journalism

USC Annenberg School for Communication and Journalism 303

Director: Willow Bay, MBA
Associate Director, Operations and Finance: Debra Lawler, M.A.
Faculty
Walter H. Annenberg Chair in Communication: Ernest J. Wilson III, Ph.D.
University Professor and Annenberg Family Chair in Communication Leadership: Geoffrey Cowan, LL.B.
Knight Chair in Media and Religion: Diane Winston, Ph.D.
 Provost Professor of Communication, Journalism and Cinematic Arts: Henry Jenkins, Ph.D.

Associate Professors: K.C. Cole, B.A.; Geoffrey Cowan, LL.B.;* Henry Jenkins, Ph.D.; Judy Muller, B.A.; Tim Page, B.A.; Michael Parks, B.A.; Joe Saltzman, M.S.;* Philip Seib, J.D.; Roberto Suro, M.S.
Associate Professors: William Celis, M.S., Jonathan Kotler, J.D.;* Joshua Kun, Ph.D.; Larry Pryor, M.S.; Sandy Tolan, BFA; Jan Wang, Ph.D.; Diane Winston, Ph.D.
Assistant Professors: Mike Ananny, Ph.D.; Daren C. Brabham, Ph.D.; Kjerstin Thorson, Ph.D.; Aimei Yang, Ph.D.

Professors of Professional Practice: Willow Bay, MBA; Daniel Birman, M.A.; Laura Castañeda, Ed.D.; Serena Cha, M.S.; Jennifer Floto, M.A.;* Gabriel Kahn, B.A.; Willa Seidenberg, B.A.; Erna Smith, B.J.; Gerald Swerling, M.S.

Associate Professors of Professional Practice: Amara Aguilar, M.A.; Sasha Anawalt, B.A.; Peggy Bustamante, M.A.; Marc Cooper; Robert Hernandez, B.A.; Matthew LeVeque, B.A.; Alan Mittelstaedt, B.A.; Stacy Scholder, B.A.; Burghardt Tenderich, Ph.D.

Senior Lecturers: Jeff Fellenzer, M.A.; Mary Murphy, B.A.; Richard Reeves, M.E.

Lecturers: Alan Abrahamson, J.D.; Dana Chinn, MBA; Vince Gonzales, M.A.; Rebecca Haggerty, M.S.

Visiting Professor and Wallis Annenberg Chair in Communication and Journalism: Mark Lloyd, J.D.

Emeritus Professors: Ed Cray, B.A.; Murray Framson; Felix Gutierrez, Ph.D.; A.J. Langguth, B.A.; Bryce Nelson, M.Phil.; Clancy Sigal, B.A.

Emeritus Associate Professor: William Robert Faith, Ph.D.

* Recipient of university-wide or college teaching award.

Degree Programs

The School of Journalism offers Bachelor of Arts degrees in Broadcast and Digital Journalism, Print and Digital Journalism and Public Relations. It also offers minors in News Media and Society and in Advertising. The school stresses a broad-based liberal arts education to enhance writing and reporting and encourages undergraduate students to pursue double majors or minors in disciplines outside the school.

At the graduate level, a Master of Science degree is offered in Journalism and Master of Arts degrees are available in Specialized Journalism, Specialized Journalism (The Arts) and Strategic Public Relations. The M.S. in Journalism degree is designed for students who have some journalism experience. The program emphasizes multi-platform journalism, but also allows students to build on the specialty of their choice including long-form video, news video, audio, text or digital. The Specialized Journalism degree is designed for experienced professionals and recent journalism graduates interested in developing specialized reporting expertise. The Strategic Public Relations degree emphasizes the requisite skills of that discipline, with an emphasis on strategic problem solving, public relations theory and techniques, writing, research-based planning and analysis, case studies, and the application of the discipline to specific industry categories.

Students seeking to learn journalism principles and improve their multimedia skills should write and report for neontommy.com (Annenberg Digital News), atvn.org (Annenberg TV News), annenbergradio.org (Annenberg Radio News), intersectionsouthla.org (Intersections South LA) and impact.uscannenberg.org (Impact newsmagazine program). Journalism majors are also encouraged to write and report for the independent student newspaper, the Daily Trojan, at dailytrojan.com.

The school offers several international study programs to undergraduate and graduate students. It also advises its students to participate in at least two internships before graduation. The Annenberg Career Development Office has listings for paid and unpaid internships from around the country.

Undergraduate Degrees

The School of Journalism offers Bachelor of Arts degrees in Print and Digital Journalism, Broadcast and Digital Journalism and Public Relations. The school also offers minors in Advertising and News Media and Society. Journalism students are encouraged to pursue double majors or minors in other areas of study. They must consult with an undergraduate journalism adviser at least once each semester to receive academic advisement covering major course selection and university degree requirements.
To meet accrediting guidelines, a minimum of 72 units must be completed outside the major area of Journalism. A maximum of 16 units of course work taken prior to high school graduation and a combined 32 units of AP, IB and pre-high school graduation course work will count toward this requirement. Journalism and public relations majors can take up to a maximum of 48 journalism units; however, the major unit total (44 units) cannot be exceeded, unless the student has fulfilled the accreditation requirement.

A grade point average of at least C (2.0) on all baccalaureate units attempted at USC, as well as on the combined USC-transfer GPA, is required for undergraduate degrees. A minimum cumulative grade point average of 2.0 in all upper division courses applied toward the major is also required. Students must complete each journalism class with at least a grade of C in order to count the course toward a major requirement. Journalism courses with a grade of D- or below must be repeated; courses may only be retaken once.

Admission Requirements

Admission is competitive. Fall 2013 incoming freshmen had an average GPA of 3.69 with an SAT score of 1940-2130 (middle 50%). Transfer students had an average college GPA of 3.66. For admission information and deadlines, refer to the USC Admission Website. All transfer applicants must review the transfer admission application guidelines on the Annenberg Website; contact the Annenberg Admissions Office for more information. USC exclusively uses the Common Application for freshman and transfer admission. Applicants must submit the Common Application and the USC Supplement, both of which can be accessed at commonapp.org. In addition to the university writing samples, a 250-word statement of intent is required; instructions are included with the USC Supplement. Upon admission to the School of Journalism, students will lose transfer credits earned in journalism and public relations course work completed at another college or university.

Students currently enrolled at USC who wish to change their major to journalism must fill a formal application with all supporting documents through the Annenberg Student Services Office. Students must have 16 units completed at USC with a minimum GPA of 3.0 in order to be eligible to apply. The 3.0 GPA is a minimum standard and does not guarantee admission.

General Education Requirements

The university’s general education program provides coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by others) a generally well-educated person. This program requires six courses in different categories, plus writing, foreign language and diversity requirements, which together comprise the USC Core. See the USC Core and the General Education Program for more information.

Core Curriculum

The School of Journalism’s core curriculum prepares students to write and report for print, broadcast and online media. Print and digital journalism, and broadcast and digital journalism students are required to complete both print and broadcast news writing and print and broadcast reporting classes. Print and digital journalism majors must complete a newspaper editing and design class; broadcast and digital journalism majors must complete a broadcast production class. In addition to the online media elements integrated into the news writing and reporting classes, print and digital journalism and broadcast and digital journalism majors must complete an introduction to online media course.

Grammar, Spelling and Punctuation (GSP) Requirement

Journalism majors enrolled in JOUR 202 and public relations majors enrolled in JOUR 209 are required to complete the Grammar, Spelling and Punctuation (GSP) online tutorial before the end of the semester. This test must be taken and passed by the last day of class. Students who do not pass the test will be allowed to retake it once. Students who fail to complete the GSP tutorial within the allotted time frame will not be allowed to progress in the program and will be dismissed from the major.

Note: Students with disabilities may register with the Disabilities Services and Programs office (DSP) so the DSP staff can assess the nature of the students’ disabilities and recommend the appropriate accommodations to be provided for each student.

Advertising Minor

The advertising minor is designed for students interested in building a career in, or developing a better understanding of, the field of advertising. It explores the key role played by advertising in today’s global economy. At no time has advertising been more successful or more controversial than it is today, and this program will explore both the positives and the negatives. Emphasis is placed throughout the program on both the practical skills required to meet the demands of the marketplace and the theoretical underpinnings of those practices. Program content includes: the history of advertising; creation of written and visual advertising elements; the measurement, selection and analysis of media; the concept of “branding;” the role of advertising in creating and maintaining successful brands; the analysis of advertising campaign case studies; and the creation of integrated marketing communications campaigns.

Total units: 24

News Media and Society Minor

News media and society is a journalism minor that explores the responsibilities, the influence, the ethics and the diversity of the news media. It explores the myths about news media in the United States and explains what the news media are, how they work, what they do wrong and what they do right, and why they are important to a society whose citizens depend on the free and unfettered flow of information. This minor will help all students in all majors to understand one of the most important and misunderstood forces in American society: the news media.

News media and society benefits every student at the university because it gives students a new appreciation and understanding of the news media that so much influence their lives on a daily basis.

Minors in Media Economics and Entrepreneurship

The interdisciplinary minor in media economics and entrepreneurship is available to students in all schools and departments. It introduces students to the trends of the contemporary media and information industries and gives them an understanding of the role that entrepreneurship plays in the new economy. Students with professional media industry aspirations will learn basic economic literacy and discover the key factors that shape competition in information markets. Further, the minor fosters an entrepreneurial mindset in students and helps them to develop the entrepreneurial skills required to build successful careers and ventures in the media and information sector. For more details see the School of Communication.

Minor in Nonprofits, Philanthropy and Volunteerism

This four course minor enables students to learn about the nonprofit sector – its organizations, philanthropy and voluntary action. See complete description in the USC Price School of Public Policy section.

Annenberg International Programs

Spring Semester in London (Journalism)

The semester program offers students the opportunity to study at City University in London. Participants will be close observers of the British media and will have an opportunity for personal and direct comparison between the more structured and governmentally controlled media system of the United Kingdom and the laissez faire approach to media regulation in the United States. Students earn 8 USC journalism elective units and 8 social sciences units.

Spring Semester in London (Public Relations)

In the spring of their junior year, USC Annenberg public relations students can spend a spring semester at the University of Westminster in London, one of the leading British institutions for the academic and professional study of public relations and media, culture and society. Students will be integrated into the University of Westminster, and will take courses across the four Westminster campus locations around central London. Students will live in the central London district of Marylebone, and will be immersed into the public relations and media hub that is London.

Students earn a total of 16 units at Westminster; up to 8 USC upper division journalism elective units toward their public relations major and 8 general electives units.

Spring Semester in New Zealand (Journalism and Public Relations)

The summer program offers students the opportunity to study at the Auckland University of Technology in New Zealand, a leading southern hemisphere school of journalism and media studies. Fully integrated into the university and its vibrant urban surroundings with strong connections to the nation’s indigenous heritage, the program allows students to earn 8 units that fulfill journalism electives and 8 units of general electives.

Summer Internship in South Africa (Advanced Journalism Majors)

Students participating in this three-week program will report extensively on the National Arts Festival in Grahamstown, South Africa. The festival is the largest of its kind on the continent and attracts performers from all over the world. Students report for Cue Magazine, a publication managed and run by Rhodes University. Students will receive one unit of internship credit.

The International Communication Studies program (ICS) allows undergraduate students to study a range of approaches to public communication media across Europe.

Students divide the five-week course into stays in Los Angeles, London, Paris, Prague and Rome. In addition to regular class meetings, students discuss the interplay of current world issues and international media practices with communication practitioners from international news and public relations media, government institutions, private industry and global organizations.

Students enroll in JOUR 482 Comparative Media in Europe (4 units).

For further information, contact Annenberg International Programs at (213) 821-3405 or visit annenberg.usc.edu/ics.

Honor Society

Lambda Pi Eta is a national communication/journalism honor society that is open to declared communication, journalism and public relations majors who have completed (or are currently registered for) at least 60 units, at least 12 of which are in the major. To be eligible, students must have a USC GPA and a major GPA of 3.5 or higher.

Academic Integrity Policy

Since its founding in 1971, the USC School of Journalism has maintained a commitment to the highest standards of ethical conduct and academic excellence. Any student found plagiarizing, fabricating, cheating on examinations, and/or purchasing papers or other assignments faces sanctions ranging from an “F” on the assignment to dismissal from the School of Journalism.

Graduate Degrees

The School of Journalism offers one Master of Science degree program in Journalism, one certificate in Journalism and three Master of Arts degree programs in Specialized Journalism, Specialized Journalism (The Arts) and Strategic Public Relations. Students enrolling in the M.S. in Journalism will be given a list of recommended courses to take if they are interested in specific careers such as Long-Form Video, News Video, Audio, Text or Digital. Long-Form Video is for students interested in video documentary production. News Video is for students interested in television news and other video news environments including the Web. Audio is for students interested in radio production, both news and long-form, or any other audio news environments. Text is for students interested in any form of print or electronic publication including newspapers and magazines, or any other text news environment. The Specialized Journalism degree is designed for experienced professionals and recent journalism graduates interested in developing specialized reporting expertise.

The professionally oriented Strategic Public Relations degree is designed to train both recent graduates interested in the PR/communication field and young professionals considering transitions into, or seeking to advance their careers in that field, for management-level positions in all types of organizations. In their first year all students take a core group of courses focusing on strategic problem-solving, research-based actionable insight, business acumen and skills, and in their second year they choose from a wide variety of highly specialized electives.

Admission Requirements

Prerequisites

An applicant must have the equivalent of a four-year bachelor’s degree from an accredited college or university for the M.S. or M.A. degree. This is not required for the graduate journalism certificate.

Criteria

Minimum recommended criteria are a 3.0 GPA for undergraduate work and a valid Graduate Record Examinations (GRE) General Test scores; the GMAT is not accepted in lieu of the GRE. International applicants are required to take the Test of English as a Foreign Language (TOEFL) and should receive a score of at least 115 on the Internet-based exam; or the International English Language Testing System (IELTS). All completed applications are reviewed by the faculty admission committee even if the applicant’s academic quality is below the minimum recommendations. Applicants are strongly encouraged to take the Graduate Record Examinations one month prior to the application deadline. GRE scores are valid for five years; TOEFL and IELTS are valid for two years.

In addition, applicants are judged on a statement of purpose, résumé, writing sample and three letters of recommendation submitted on their behalf. Professional journalism or internship experience is expected for the M.S. in Journalism and required for the nine-month degree program in Specialized Journalism. A professional work bibliography and samples must be uploaded to the online application. No professional public relations work experience is required for the M.A. in Strategic Public Relations.

Procedure

Applicants must complete and submit the online USC Graduate Admission Application. Refer to the Annenberg graduate application guidelines on the Annenberg Website for details before initiating the application. In addition, international students must submit official TOEFL or IELTS scores for admission consideration and, after submitting the online graduate admission application, a Confidential Statement for Financing Studies at USC.

Applicants must upload the following supporting materials to the online USC Graduate Admission Application: statement of purpose, unofficial copy of all transcripts, writing sample and résumé. Letters of recommendation must be submitted online. Official GRE and TOEFL or IELTS scores must be reported electronically from the Educational Testing Service (ETS) to USC (institution code 4852). Paper copies of score reports are not required or accepted in lieu of the official ETS report. Official transcripts must be mailed to USC Graduate Admission.

The Annenberg School admits new students to the M.A. in Strategic Public Relations degree programs for the fall semester only. Refer to the Annenberg Website for application filing dates.
New students are admitted to the M.S. in Journalism, the M.A. in Specialized Journalism and the M.A. in Specialized Journalism (The Arts) for the summer session only. Refer to the graduate application guidelines on the Annenberg Website for application filing dates.

Degree Requirements

All course work applied toward a degree must be approved by the School of Journalism and the Graduate School.

Master of Science in Journalism and the Master of Arts in Specialized Journalism require 36 units of prescribed courses and approved electives in the student’s field of study. Studies toward the Master of Arts in Strategic Public Relations require 40 units of prescribed courses and approved electives in the student’s field of study. Students may take, with prior approval, two of their electives outside the school. No more than 12 units of 400-level course work may be applied toward the Master of Science in Journalism and the Master of Arts in Strategic Public Relations. Studies toward the Master of Arts in Specialized Journalism require 34 units of prescribed courses and approved electives. No more than 10 units of 400-level course work may be applied toward the Master of Arts in Specialized Journalism. Students who earn a GPA of below 3.0 will be placed on academic probation and must improve according to established terms if they are to remain in the school. In the case of courses offered on Credit/No Credit (CR/NC) basis, faculty review of competence will be substituted for grades.

Residence

The School of Journalism will accept only 4 units of approved transferred graduate credit. Normally, full-time students in the Master of Science in Journalism can complete the program in two semesters, plus the three-week summer immersion before classes start. Normally, full-time students in the Master of Arts in Strategic Public Relations can complete the program in four semesters. The Master of Arts in Specialized Journalism can be completed in a nine-month enrollment cycle that includes the three-week summer session, plus the fall and spring semesters. These programs may be attended on a part-time basis.

Foreign Language/Research Tool Requirements

There is no foreign language or research tool requirement for the master’s degree.

Course Requirements

A master’s degree in journalism requires 36 units and a master’s degree in strategic public relations requires 40 units. To graduate, journalism students must complete a professional capstone project. To graduate, strategic public relations students may elect the thesis or comprehensive examination option. Students electing the professional project must enroll in JOUR 598 Journalism Capstone Project (2 units). Students electing the thesis option must secure approval of the professional project thesis prior to enrollment in JOUR 594a. Students who elect the thesis option are required to enroll in JOUR 594ab (2-2 units), normally during their second year of study. The 4 units will count toward the approved elective units. Specialized journalism students normally enroll in JOUR 594ab (2-2 units) in their single year of study.

The comprehensive examination option allows students to complete the degree by passing a comprehensive examination in their last semester of course work. The comprehensive examination option is not available to students in the journalism or specialized journalism degree program.

Journalism Curriculum

Students enrolled in the Master of Science in Journalism are required to take 4 units in the summer and 16 units of required journalism courses in the spring and fall. These courses provide intensive preparation considered necessary for graduate studies in journalism at USC. In the 21st century, it is imperative that all journalists understand the basic techniques of writing, reporting and production for text, video, audio and digital media. Upon graduation, students will be routinely expected to function in all news media whether it be in traditional media such as television, radio, newspapers and magazines, or whether it be in new media such as electronic publications, Websites and new video and audio environments. The four required journalism courses in the summer and fall are:

- JOUR 528 Summer Digital News Immersion enables students in a three-week intensive course to learn the basics of newswriting, news judgment and technology skills for text, video, audio, and digital environments. Students also learn the fundamentals of journalism ethics, law and covering a diverse society.

- JOUR 531 Fall Digital News Immersion gives students a more in-depth experience in digital journalism by providing direct instruction about reporting and writing across multiple platforms and placing them in Annenberg’s Converged Media Center to produce professional stories and packages.

JOUR 535 The Practice: Journalism’s Evolution as a Profession gives students an appreciation for and an understanding of the relationship between journalism’s past and the present, linked by the evolution of journalism as a profession. Special emphasis will be placed on ethics and changing standards and practices in the digital age.

JOUR 560 Seminar in Mass Communication Law gives students the opportunity to study the key legal issues facing journalists today. Students are expected to learn the basic workings of the legal system in the United States, the legal rules that apply to journalists in the United States, how to avoid being sued, and how to write clearly about legal issues.

The three required journalism courses in the spring are:

- JOUR 547 The Business of News teaches how the business model of news organizations has evolved over time and how it is being reinvented for the future. The course also explores different strategies for monetizing content.

- JOUR 548 News and Numbers provides an overview of the basic quantitative analysis tools and techniques essential to give perspective to a story or to put it in context.

- JOUR 588 Journalism Capstone Project guides students through the production of a journalism capstone project with multimedia elements for a master’s degree. Projects can be single stand-alone pieces, or series of pieces.

Grammar, Spelling and Punctuation (GSP)

Journalism and strategic public relations graduate students are required to complete an online tutorial about Grammar, Spelling and Punctuation (GSP) and pass the GSP test before the end of the fall semester of their first year. Students who fail to complete the GSP tutorial and pass the test within the stated time frame will not be allowed to progress in the program and will be dismissed from the School of Journalism. Specialized journalism graduate students are not required to take this online tutorial or the GSP test.

Note: Students with disabilities may register with the Disabilities Services and Programs office (DSP) so the DSP staff can assess the nature of the students’ disabilities and recommend the appropriate accommodations to be provided for each student.

Thesis/Comprehensive Examination

The thesis option will take two forms: (1) a professional project presenting the results of an extensive public relations project completed by the student; or (2) a research thesis presenting the results of primary research undertaken by the student. In either case, students must establish a guidance committee of three faculty members. The chair must be a full-time faculty member in the School of Journalism. The second member will usually be a full-time Journalism faculty member but may be a person connected with USC in other positions who has specific knowledge of the student’s topic. In the latter case, the chair of the committee or the director of the department must approve a detailed presentation of the qualifications of the proposed committee member that justify his or her inclusion. In exceptional circumstances, this committee member may come from outside USC. A detailed presentation of qualifications will be required. The third committee member should be a full-time USC faculty member from outside the School of Journalism. The committee is ultimately subject to the approval of the school dean.

Students must secure approval of the professional project or thesis prior to enrollment in JOUR 594a. Students who elect the thesis option are required to enroll in JOUR 594ab (2-2 units), normally during their second year of study. The 4 units will count toward the approved elective units. Specialized journalism students normally enroll in JOUR 594ab (2-2 units) in their single year of study.

The comprehensive examination option allows students to complete the degree by passing a comprehensive examination in their last semester of course work. The comprehensive examination option is not available to students in the journalism or specialized journalism degree program.
The certificate program requires students to complete a three-week, four-unit course in August, and then complete 16 units during the fall semester, for a total of 20 units.

*One elective course must be taken from an Annenberg School program in JOUR, COMM, CMGT or PUBD.

The Master of Arts in Specialized Journalism is a program geared toward experienced professionals who are choosing to specialize in a field of journalism that requires advanced reporting skills and subject matter expertise. The program is also open to recent journalism school graduates with records of excellence in their university classes and internships and to other outstanding applicants with demonstrated aptitude and expertise in journalism.

Students must begin the program in early August, enrolling in a required 2-unit intensive session course focused on journalism and society and on new media. In addition to the formal classes, the course includes multimedia skills workshops as integral parts. This gateway course provides the master’s students with a working knowledge of the specialized journalism background and the multimedia storytelling skills necessary for study in the program. It sets the stage for two semesters of access to courses as substantively broad as a major research university such as USC makes available and for advanced courses in the School of Journalism’s graduate program.

In the fall semester, students will enroll in two courses in the School of Journalism, including a research methods course for journalists and typically a specialized reporting course. With the advice of their faculty mentors, students will select elective course work totaling 8 units appropriate to their fields of specialization. These courses will be drawn from regular graduate and 400-level courses taught across the arts schools and will require approval of a three-member committee composed of the faculty mentor in the School of Journalism, another member of the journalism faculty and a faculty member from the relevant discipline. Students also will begin research for their master’s professional project. These projects may be full-length magazine (print or broadcast) treatments of issues in their field or similar professional work.

In the spring semester, students will enroll in a journalism course focused on the reporting and analysis of decision-making and an arts criticism and commentary course. Students will enroll in elective course work totaling 8 units, chosen again from offerings across the arts schools and in consultation with the mentors and approved by a three-member committee. Finally, students will complete their master’s professional project.

The nine-month program has been designed for a fall and spring semester enrollment cycle; however, students also may elect to complete the program on a part-time basis with the approval of the director of the School of Journalism.

Annenberg International Programs

Graduate Journalism Internships — China (Hong Kong or Shanghai), South Africa or United Kingdom

Journalism master’s degree students may spend eight weeks at internships in Cape Town, Hong Kong, London or Shanghai during the summer after their first year of graduate study at USC. Students apply to Annenberg International Programs in the fall semester of their first year. From mid-May to mid-July, they then enroll in JOUR 540 International Journalism Seminar I and JOUR 545 International Seminars in the Media while working full-time at internships with prominent media organizations.
Strategic Public Relations master's degree students may spend eight weeks at internships in Cape Town, Hong Kong, London or Shanghai during the summer after their first year of graduate study at USC. Students apply in the fall semester of their first year. From mid-May to mid-July, they then enroll in JOUR 540 International Journalism Seminar I and JOUR 545 International Internships in the Media while working full-time at internships with prominent public relations organizations.

For further information, contact Annenberg International Programs at (213) 821-1276, email ascinfo@usc.edu or visit annenberg.usc.edu/international.

Academic Integrity Policy

Since its founding in 1971, the USC School of Journalism has maintained a commitment to the highest standards of ethical conduct and academic excellence. Any student found plagiarizing, fabricating, cheating on examinations and/or purchasing papers or other assignments faces sanctions ranging from an "F" on the assignment to dismissal from the School of Journalism.

Courses of Instruction

Annenberg school for communication and journalism (ASCJ)

ASCJ 100 The Changing World of Communication and Journalism (2, Fa) Survey of major themes in media and communication; exploring what it means to be a professional in the fields of communication, journalism, and public relations.

Journalism (JOUR)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

JOUR 190 Introduction to Journalism (2, Fa) Survey of all media and outlets including print, broadcasting, public relations and online journalism, plus analysis of what it means to be a professional journalist.

JOUR 201 History of News in Modern America (4, FaSp) Understanding news today. A survey of how news is gathered, weighed, and disseminated and how historical events have shaped news in the 20th century.

JOUR 205 Journalism Practicum (1-2, max 2, FaSpSm) Field experience in journalism, public relations, or related field. Graded CR/NC.

JOUR 209 Effective Writing for Strategic Public Relations (4, FaSp) Focus on the unique writing requirements of social, online, broadcast, print and other media in public relations/strategic communication; emphasis on judgment, context and audience understanding.

JOUR 210X Basics of News Production for Non-Majors (2, max 6, FaSp) Introduction to television, radio, and/or digital news production. Examination of issues in journalism. Graded CR/NC.

JOUR 250 Strategic Public Relations: An Introduction (4, FaSp) Strategies and practices in the growing field of public relations/strategic communication, including landmark cases; special emphasis on historical roots, evolution, current and future practice. (Duplicates credit in former JOUR 350.)

JOUR 253 Theoretical Foundations of Strategic Public Relations (4, FaSp) Emphasis on conceptual, intellectual and analytical skills; knowledge of applied theory for the changing field of public relations/strategic communication. (Duplicates credit in former JOUR 353.) Prerequisite: JOUR 250.

JOUR 302 Reporting: Print (3, Sp) Introduction to basic reporting techniques, public records reporting and beginning investigative journalism. Social responsibility and ethical framework for print journalists. Prerequisite: JOUR 202, JOUR 203; concurrent enrollment: JOUR 203.

JOUR 303 Reporting: Broadcast (3, Sp) Introduction to field reporting, audio and visual media. Social responsibility and ethical framework for broadcast journalists. Prerequisite: JOUR 202, JOUR 203; concurrent enrollment: JOUR 302.

JOUR 306 Production: Broadcast (3, Fa) Studio and field production for audio and visual media. Social responsibility and ethical framework involving broadcast non-fiction production. Prerequisite: JOUR 302, JOUR 303.

JOUR 309 Introduction to Online Media (3, FaSp) Convergence journalism and online skill sets. Blogs and Web content production. Social responsibility and ethical framework in digital information technology. Prerequisite: JOUR 302, JOUR 303.

JOUR 310 Investigative Reporting (4, FaSp) Reportorial and analytical skills and techniques required for portraying and evaluating contemporary news events; lectures, discussions. Prerequisite: JOUR 302, JOUR 303.

JOUR 320 Photojournalism (4, FaSp) Emphasis on fundamental skills necessary for photojournalism including camera techniques, story ideas and digital darkroom.

JOUR 340 Introduction to Advertising (4, FaSp) History and development of advertising; basic advertising campaigns showing relationships of marketing, creative, print and electronic media.

JOUR 341 Advertising Copywriting (4, Fa) Writing and editing for advertising and commercial copy for all media. Prerequisite: JOUR 340.

JOUR 342 Advertising Media and Analysis (4, Fa) Selling, planning, buying for the media; advertising’s relationship to society and business; media choice. Prerequisite: JOUR 340.

JOUR 343 Advertising Design and Production (4, Sp) Production of advertising materials; emphasis on the creation and design of advertising elements. Prerequisite: JOUR 340.

JOUR 350ab Strategic Public Relations Media and Content (4-4, FaSp) a: Introduction to media relations, social media and influencer engagement; intensive writing and creating multimedia content for traditional, emerging and social media. Prerequisite: JOUR 209 and JOUR 250. b: Advanced course in writing, digital content and multimedia creation; production of communications collateral for social and owned media channels targeting an array of audiences.

JOUR 371 Censorship and the Law: From the Press to Cyberspace (4) (Enroll in COMM 371)

JOUR 373 Journalism Ethics Goes to the Movies (4, FaSp) Ethical issues facing journalists in the complex world of legacy media, social media and the Internet as dramatized in the movies and in the newsroom.

JOUR 380 Sports, Business and Media in Today’s Society (4, FaSp) An inside look at the symbiotic relationship of sports and the media — from the independence of sports and media, to the coverage of sports in newspapers, magazines, radio and television. The economic and ethical issues involved, the conflicts of interest, the history and current status of sports coverage in American media today.

JOUR 390 Special Problems (1-4, Irregular) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

JOUR 400 Interpretive Writing (4) Weekly assignments in the shorter forms of newspaper and magazine writing: essays, reviews, editorials, opinion-page articles, profiles; analyses of major 20th century journalists. Prerequisite: JOUR 302, JOUR 303.

JOUR 401 Online Site Management and Production for Journalists (4, FaSp) Work as executive producers and manage NeonTommy.com, a major website; operate its content management system, produce, curate and aggregate journalism.

JOUR 402 Advanced Television Reporting (4, FaSp) Role of the broadcast journalism reporter; similarities and differences between print and electronic media; application of audio-video equipment; analysis and practical experience. Prerequisite: JOUR 306.

JOUR 403 Television News Production (4, FaSp) Production of television news programs: preparation and treatment of form and content; procedures, problems, and practice in planning and producing broadcast news materials. Prerequisite: JOUR 306.

JOUR 405 Non-Fiction Television (4, FaSp) Presentation and selection in non-fiction television programs including documentaries, electronic magazines and news series; ethical problems, field research, reporting, interviewing, pre-production. Prerequisite: JOUR 306.

JOUR 407 Newsradio (4) Production of radio news: research, reporting, writing, preparation and treatment of form and content: procedures, problems and practice in producing radio news programs.

vocal delivery. Study of standards, content and ethics. Prerequisite: JOUR 202, JOUR 203.

JOUR 410 Radio Documentary (4) In-depth reporting for public radio news: writing, editing, advanced vocal delivery. Production of long-form radio features and short documentaries. Prerequisite: JOUR 409.

JOUR 412 Introduction to Online Publishing (4) Introduction to the methods, theory and production of news publishing on the World Wide Web including basic HTML, graphics production and news design.

JOUR 413 Introduction to Online Journalism (4) An introduction to the methods and theory of news publishing on the World Wide Web, with an emphasis on journalism skills and techniques. (Duplicates credit in JOUR 412.) Prerequisite: ITP 101x or ITP 105x.

JOUR 420 Advanced Photojournalism (4) Emphasis on advanced photojournalism techniques for complex photo storytelling; focus on style, content, design, expression and ethics. Prerequisite: JOUR 320.

JOUR 421 Photo Editing for News Media (4) Emphasis on understanding the composition and power of photographs; how they work in concert with words and graphics to inform the public.

JOUR 422 Visual Journalism (4) Emphasis on photographic storytelling in print, video and Web-based media; understanding of visual thinking and imagery techniques.

JOUR 428 Social, Legal and Ethical Foundations of Public Relations (4, FaSp) Covers the complex intersection of legal standards and regulations, ethical practices and decision making, and social responsibilities for public relations/strategic communication practitioners. Prerequisite: JOUR 250.

JOUR 429 Business and Economic Foundations of Public Relations (4, FaSp) Relationship between public relations/strategic communication and other organizational disciplines; understanding business goals and objectives; economic literacy; financial/investor relations; how PR/communication agencies are built and managed. Prerequisite: JOUR 250.

JOUR 430 Writing the Film Review (4, Sp) Techniques of writing the film review; preparation and treatment of form and content; problems, responsibilities and ethics of film reviewing. Prerequisite: JOUR 302, JOUR 303.

JOUR 431 Feature Writing (4, FaSp) Techniques of writing newspaper feature stories, including the profile, the light feature, the news feature, the in-depth story; the art of narrative writing. Prerequisite: JOUR 302, JOUR 303.

JOUR 432 Sports Commentary (4, Fa) Techniques of reporting and writing sports columns and commentary for print, video, radio and Web-based media.

JOUR 433 Writing About Science (4, Sp) Techniques of writing about science, including news, profiles, features and commentary.

JOUR 435 Writing Magazine Non-Fiction (4, FaSp) A seminar in “how to” interview, research, write – and place – professional quality articles for a full range of magazines/newspapers including women’s, sports, ethnic, and national. Prerequisite: JOUR 302, JOUR 303.

JOUR 436 Magazine Production (4) Publishing and production technologies; economics of magazine publishing including cost analysis, marketing, advertising, and circulation. Prerequisite: JOUR 302, JOUR 303.

JOUR 440 Environmental Journalism (4, Sp) Techniques of reporting and writing about the environment. Includes both theory and practice needed for reporters specializing in this area of journalism. Prerequisite: JOUR 302, JOUR 303.

JOUR 441 Sports Reporting (2, Sp) News and feature coverage of sporting events, including social and economic factors influencing sports in America. Prerequisite: JOUR 302, JOUR 303.

JOUR 443 Business Reporting (3) Techniques of reporting and writing about business, economics and finance. Prerequisite: JOUR 302, JOUR 303.

JOUR 444 Reporting on Religion (4) Provides print, online and broadcast journalists with basic tools for reporting on the religion angle of news stories. Prerequisite: JOUR 302, JOUR 303.

JOUR 446 Entertainment Reporting (2, Sp) Techniques of reporting and writing about the entertainment business, economics and finances. Analysis of the skills and background needed for reporters specializing in this area of the news. Prerequisite: JOUR 302, JOUR 303.

JOUR 447 Arts Reporting (2, Sp) Techniques of reporting and writing about the arts, including television, film, theatre, music, graphic arts, architecture and design. Prerequisite: JOUR 302, JOUR 303.

JOUR 448 Government and Public Affairs Reporting (4, Fa) Techniques for covering beats that are the foundation of daily newspaper reporting, including crime, education, immigration and local government. Prerequisite: JOUR 302, JOUR 303.

JOUR 449 Reporting Los Angeles (2, FaSp) Specialized reporting class focused on Los Angeles that requires intensive fieldwork in the neighborhoods, ethnic communities, and/or among local institutions. Prerequisite: JOUR 301, JOUR 303.

JOUR 450 Advanced Strategic Public Relations (4, FaSp) In-depth study of methods for planning, managing and evaluating strategic communication campaigns; critical analysis of contemporary cases; development of campaigns for real world clients. Prerequisite: JOUR 351b, JOUR 483.

JOUR 451 Promotional Public Relations (4) Principles and practices of public relations as a basic component in the promotion and marketing of goods and services; regulatory considerations; consumerism. Prerequisite: JOUR 250.

JOUR 452 Public Relations in Entertainment (4, Sp) Public relations in the design, promotion, and presentation of popular entertainment, including films, broadcasting, music, exhibitions, amusement parks, resorts and arenas.

JOUR 454 Sports Public Relations (2, FaSp) Introduction to the field of sports information and promotion, including lectures, media assignments, role-playing, and presentations by sports professionals. Junior standing.

JOUR 455 Public Relations for Non-Profit Organizations (4, FaSp) Introduction to the specialized field of public relations for non-profit and non-governmental organizations; emphasis on case studies, strategic and critical thinking, and campaign development. Prerequisite: JOUR 302.

JOUR 456 Public Relations for Diverse Audiences (4, FaSp) Researching, planning, executing and evaluating communications campaigns aimed at audiences segmented by culture, lifestyle and other factors. Prerequisite: JOUR 250.

JOUR 457 The Role of Celebrity in Public Relations (4) Understanding of the history and application of celebrity in public relations, focusing on the entertainment industry and the notoriety attached to politics and the media.

JOUR 458 Public Relations in Politics and Political Campaigns (4, Fa) Application of public relations principles to the context of political campaigns; emphasis on message development and delivery; relationship between candidate, news media, and electorate.

JOUR 459 Fact and Fiction: From Journalism to the Docudrama (4) Historical, legal and ethical limitations to the misrepresentation of fact. Includes print and broadcast journalism, books, theatre, cinema and new technology.

JOUR 460 Social Responsibility of the News Media (4, Sp) News media as instruments of constructive social change; standards of ethics and aesthetics; interactions between news media and cultural settings; social responsibility of news media personnel.

JOUR 463 Strategic Public Relations Research, Analysis and Insights (4, FaSp) Identification of key strategic insights that drive successful communication campaigns, based on research techniques including surveys, content evaluation and social media monitoring.

JOUR 465m Latino News Media in the United States (4, Fa) History and growing importance of Latino print and broadcast news media in covering immigration, discrimination, culture, social differences and other aspects of U.S. Latino life.

JOUR 466m People of Color and the News Media (4, Sp) Reporting and portrayal of people of color in the United States; impact of racial diversity on media, employment and access, and development of media for individuals and communities of color. Open to non-majors.

JOUR 467 Gender and the News Media (4) Gender and news media evolving images of women and men in print and electronic media. Impact of gender in content and style of news, television and cinema. Open to non-majors.

JOUR 468m The American Press and Issues of Sexual Diversity (4, Fa) Examines the history and evolution of LGBTQ/lesbian issues; raises critical issues of contemporary sexuality and gender; applies critical historical-contemporary context analysis; arms students to bypass rhetoric and knowledgeably evaluate facts.

JOUR 469 Money, Markets and Media (4, Sp) Practical approach to understanding and writing about economic concepts through current events, case studies and historical examples.

JOUR 470 Community Journalism (2, FaSp) Survey of how local journalism functions in a community. Students work as editors/mentors to high school students, writing for school newspaper and other media. Prerequisite: JOUR 302, JOUR 303.

JOUR 471 Advanced Multimedia Storytelling (2, Sp) Students create and manage advanced online story packages with multiple digital elements including text, visuals (videos, photos, graphics, etc.), audio, interactivity and navigation. Recommended preparation: JOUR 309.

JOUR 473 Emerging Media Strategies for Communication and Public Relations (4, Sp) In-depth, hands-on study of emergingtradigital, social and owned
promote and manage a personal brand through critical Crowdsourcing. Open only to seniors and master students in strategic PR/Communication (4, Sp)

Individual research exploration into graphic design, visual branding, design techniques available to convey messages and experiences; digital design techniques to create digital images and layouts.

Digital Design Tools (2, Sp)
online content and personal brands; social media trends and platforms; development and management of media channels; Emphasis on the evaluation of such forms.

Media Lab (2, Fa)
society; provides a social, economic and ethical perspective.

JOUR 492 Personal Branding (4, Fa)
Learn to build, promote and manage a personal brand through critical analysis, case study, interactive interpretation and creative problem solving.

JOUR 494 Transmedia, New Media and Strategic Communication (4) Examines nature of consumption and storytelling within a networked culture and how participatory culture, transmedia branding, and spreadsheet media are changing strategic communication practice.

JOUR 498 Honors Seminar (2, Sp) Intensive study of a subject of contemporary relevance or of professional importance to journalists. Prerequisite: admission to Honors Program.

JOUR 499 Special Topics (2-4, max 8, FaSpSm) Selected topics in journalism.

JOUR 500 Media and Society (3, Fa) Analysis of major theories on the role of communication media and society with special emphasis on the role and responsibility of the news media.

JOUR 504 Strategic Public Relations Research, Evaluation and Insights (3) Covers use of primary and secondary research, web monitoring and analytics, pre- and post-campaign testing, and other techniques in program planning and evaluation. Prerequisite: JOUR 508.

JOUR 505 The Practice: Journalism's Evolution as a Profession (2, Fa) Analyzes the history, ethics and evolution of journalism; Students will be introduced to key innovations and innovations in journalism history as well as multimedia platforms. Open only to journalism majors.

JOUR 508 Introduction to Strategic Public Relations (3, Fa) A survey of the profession, focusing on the key role of strategic public relations in today's information-based society; provides a social, economic and political context for the program.

JOUR 510 Legal, Ethical and Social Foundations of Strategic Public Relations (3, FaSp) Explores the origins, effects of, and processes for adhering to the complex network of legal, ethical and social responsibilities of the contemporary PR practitioner.

JOUR 512 Advanced Interpretive Writing (3, Sp) Analysis and writing of editorials, essays. Op-Ed page articles, profiles, and other shorter forms of journalism, combined with study of historic practitioners of those forms.

JOUR 513 Advanced Newswriting and Reporting (3) Reportorial and analytical skills and techniques required in searching out and evaluating newsworthy events. Research and publication of stories.

JOUR 514 multimedia Journalism II: Text (2, Sp) Reporting and writing daily news and feature stories on deadline for text. Beat reporting, interviewing, sourcing, research, fact checking, Web aggregation, blogging, search optimization skills. Prerequisite: JOUR 506; concurrent enrollment: JOUR 516, JOUR 518.

JOUR 516 Multimedia Journalism II: Video and Audio (2, Sp) Reporting and writing for television, radio and Internet. Pitch, shoot, write, and produce video and audio news packages, incorporating standups and creative visual storytelling techniques. Prerequisite: JOUR 507, concurrent enrollment: JOUR 514, JOUR 518.

JOUR 517 Advanced Investigative Reporting (3, Fa) Advanced reportorial and analytical skills and techniques required for evaluating newsworthy events. Group research and publication of stories on important current topics.

JOUR 518 Multimedia Journalism II: Digital (2, Sp) Online story packages with multiple elements including text, visuals, audio, interactivity and navigation. Online ethics and basics of copyright law, design, typography, color, photo usage. Prerequisite: JOUR 509; concurrent enrollment: JOUR 514, JOUR 516.

JOUR 519 Advanced Magazine Writing (3, Fa) Reporting and preparation of articles for publication; analysis of magazine non-fiction markets; research and writing, techniques, and analysis of magazine markets.

JOUR 520 Advanced Broadcast Newswriting (3) Writing for broadcast, preparation and presentation. Responsibility and ethics of broadcast newswriting. Form and content of broadcast news presentation. Similarities and differences between media.

JOUR 521 Documentary Pre-Production (3, Fa) Pre-production of video documentary including selection of topic, diversity, ethical and legal problems, research and reporting techniques, interviewing, writing, balanced presentation, visual and audio literacy. Open only to journalism majors.

JOUR 522 Video Documentary Production (4, Sp) Production of video documentary including research and reporting techniques, writing, interviewing, field work, editing, legal issues, economics, aesthetics, balanced presentation, ethics, diversity and production problems.

JOUR 523 Public Radio Reporting (2, Fa) Reporting for public radio-style news: writing, newsgathering, editing, vocal delivery. Techniques applicable for broadcast on Web audio stories. Open only to journalism majors.

JOUR 524 Advanced Broadcast Reporting (4) Reporting and writing broadcast news; analysis and practical experience; role of the broadcast journalism reporter; similarities and differences between media; application of audio-visual equipment.

JOUR 525 Public Radio Documentary (4, Sp) Advanced production techniques for public radio-style reports: writing, sound, editing, narrative voice. Techniques applicable for broadcast features or Web audio documentaries. Prerequisite: JOUR 522.

JOUR 526 Advanced Broadcast News Production (3) Production of television news programs; preparation and treatment of form and content; procedures, problems and practice in planning and producing broadcast news materials.

JOUR 527 Multimedia Content Creation for Strategic Public Relations (3, FaSpSm) Covers the conceptualization and creation of strategy-based, engaging, primarily web-based multimedia content for use by organizations of all types. Prerequisite: JOUR 508 and JOUR 525.

JOUR 528 Summer Digital News Immersion (4, Sm) Three-week journalism immersion experience oriented and familiarizes students with the best practices and standards of cutting edge multimedia, multi-platform
fact-gathering, reporting and storytelling. Open only to journalism majors.

JOUR 549 International Journalism and Public Relations Seminar (2) Preparatory course for Annenberg's summer international internships programs. Introduction to the history, politics, culture and media landscape of the internship country.

JOUR 550 Strategic Public Relations Management (3, Sp) An analytical, case study-based approach to strategic campaign planning, management and execution, with heavy emphasis on problem solving and the role of research.

JOUR 551 Fall Digital News Immersion (8, Fa) Tweet about, photograph, report and write/produce weekly news stories with audio and/or video and/or digital elements for publication via Annenberg's converged news lab. Open only to journalism majors. Prerequisite: JOUR 528.

JOUR 552 International Public Relations (3) Public information policies and practices of national and supranational government units and national and multinational corporations involved in international relations.

JOUR 553 Web Journalism and Editorial Site Management (4, Fa) Report, edit, and manage a major news Website while operating its content management system; understand best standards and practices in online site management. Open only to journalism majors.

JOUR 554 Case Studies in Public Relations (3, Sp) Analysis of landmark and contemporary public relations cases; evaluation of current literature, programs, and professional personnel; identification of emerging issues.

JOUR 555 Writing for Strategic Public Relations (3, Fa/Sp) Intensive focus on the specialized writing requirements of online, broadcast, print and other public relations media; includes content analysis of strategic public relations materials.

JOUR 556 Digital, Social and Mass Media Public Relations Strategies (3, Fa/Sp) Analysis of shifting media environment; development and execution of multi-platform campaigns based on organizational goals and audience characteristics.

JOUR 557 Public Relations and Branding (3, Fa) Concept of branding, including brand definition, brand engagement, brand management and the role of public relations in creating brand value.

JOUR 558 Advanced Entertainment Public Relations (3, Sp) In-depth study of the creation and protection of reputations for entertainment properties of all types and the characteristics that distinguish it from other disciplines.

JOUR 559 Introduction to Investigative Reporting (2) Focus on basic investigative reporting; understand its history, how to access records, identify sources, use computer assisted reporting, report in a fair and ethical manner. Open only to journalism majors.

JOUR 560 International Journalism Seminar I (3) Historical perspective of foreign correspondence; examination of the working conditions, problems and consequences of reporting from abroad.

JOUR 561 Foreign Reporting (3) News stories analyzed, researched, and critiqued for validity and background; projects to include editorials, news stories, magazine articles or broadcast reports.

JOUR 562 Intensive Internships in the Media (1, 2, 3) Intensive field experience at international news media and public relations organizations. Graded CR/NC.

JOUR 546 News and Numbers (2, Fa) An overview of the basic quantitative analysis tools and techniques essential to give perspective to a journalistic story or to put it in context. Open only to journalism majors.

JOUR 547 The Business of News (2, Fa) Analysis of how the business model of news organizations has evolved over time and, more importantly, how it is being reinvented for the future. Open only to journalism majors.

JOUR 550 Introduction to Online Publishing (3) Methods, theory and publishing of online news; HTML skills, graphics production and design theory.

JOUR 551 Intermediate Online Publishing (4, Sp) Advanced concepts in online publishing; focus on databases, editing, scripting and authoring applications for news Websites.

JOUR 552 Television Reporting and Production (2, Fa) Writing, reporting and producing content for video and digital platforms; similarities and differences between media; application of audio-visual and digital equipment. Open only to journalism majors.

JOUR 553 Coding and Programming for Storytelling (2, Fa) Sketch, design and code a website from scratch, using HTML, CSS and jQuery plug-ins to tell a rich multimedia story. Open only to journalism majors.

JOUR 555 Multimedia and Graphics in Online Publishing (4, Sp) Focuses on the process of creating multimedia, images and graphics for news storytelling on the Web; integration of interactive content, animation and video. Prerequisite: JOUR 551.

JOUR 556 Online Journalism Seminar (3, Sp) Writing and reporting for the Internet and other technology platforms; computer-assisted reporting; multimedia storytelling. Prerequisite: JOUR 551.

JOUR 560 Seminar in Mass Communication Law (2, Fa) Analysis of major elements of mass communication law, legal issues in contemporary mass communication, and the impact of legal trends on professional journalists. Open only to journalism majors.

JOUR 563 Promotional and Product Public Relations (3, Sp) Planning, managing and evaluating integrated communications campaigns utilizing public relations strategies in concert with advertising and other marketing disciplines; emphasis on research, case studies and campaign development.

JOUR 565 Corporate Public Relations and Reputation (3, Fa) Planning, managing and evaluating strategic public relations campaigns that achieve corporate business goals by effectively communicating with key constituencies and managing organizational reputation.

JOUR 566 Public Relations for Multicultural and Niche Audiences (3) Developing, managing and evaluating campaigns designed to reach audiences segmented by culture, lifestyle and other factors.

JOUR 568 Crisis Management in Strategic Public Relations (3, Fa/Sp) Focuses on theories, concepts and practices in risk assessment, issues monitoring, and crisis anticipation/management in a wide variety of organizational contexts, from multiple perspectives.

JOUR 569 Ethics in Public Relations (3) Application of public relations principles to ethical conduct in a business, government agency, non-profit organization or consulting entity; emphasis on applicable cases and dialogue.

JOUR 571 Advanced Sports Reporting (3, Fa) Seminar in how to report and write sports: news, previews, profiles, features, columns.

JOUR 572 Reporting on Entertainment and Popular Culture (3, Fa) Reporting about entertainment, popular culture and their impact on American society; survey of past media coverage and current practices.

JOUR 573 Graduate Journalism Practicum (4, Sm) Developing work experience through the M.S. in Journalism practicum. Open only to journalism majors.

JOUR 574 Sports and Society (3) Develop and refine print and multimedia skills to work as a sports journalist. Gain perspective, context and background in how sports intersect with society.

JOUR 575 Converged Media Center (4, Sp) Advanced multimedia news production; preparation and treatment of form and content; procedures, problems, ethics, and practice in operating a daily, 24-7 news outlet.

JOUR 576 The Image of the Journalist in Popular Culture Seminar (2, Sp) Study and analysis of the conflicting images of the journalist in popular culture and its impact on the public's perception of the media and news gatherers.

JOUR 577 Monetization and the New Media (3) Understanding new media through an economic lens. Applying knowledge by creating, reporting and delivering a communications or business strategy model.

JOUR 578 Reporting on Globalization (3) Understanding globalization, its origins, history and major characteristics. Developing skills in reporting, describing, analyzing, and responding to globalization.

JOUR 579 Journalism Internship (1-2, max 2, Fa/Sp) Field experience in journalism, public relations, or related field.

JOUR 580 Introduction to Specialized Journalism (2, Fa/Sp) Understanding the role of specialized journalism and its changing role in U.S. news media; audience interest in areas of specialized coverage.

JOUR 581 Specialized Journalism: Research Methods (3, Fa) Advanced skills in the use of expert sources, scholarly resources, computer-assisted and investigative reporting in specialized journalism; social and ethical issues in specialized reporting.

JOUR 582 Specialized Journalism: Reporting Decisions (3, Fa/Sp) Reporting and analysis of decision making; case studies and analytical tools in dissecting decisions for readers, listeners and viewers.

JOUR 583 Managing Communication in the Entertainment Industry (4, Fa) (Enroll in CMGT 543)

JOUR 584 Specialized Reporting: Education, Youth and Learning (3, Fa) Reporting and writing on education; survey of historical and contemporary issues affecting children, families and public education.

JOUR 585 Specialized Reporting: Religion (3, Sp) Reporting and writing on religion; survey of world religion, religion and public life – including politics, gender and science.

JOUR 586 Specialized Reporting: Science (3, Fa) Reporting and writing on science; survey of scientific research fields and evaluation of evidence and claims.

JOUR 587 Audience Analysis (4, Fa) (Enroll in CMGT 587)

JOUR 588 Cities, Climate and Risk (3, Fa/Sp) Reporting and writing on urbanization, climate change and environmental harm.

JOUR 589 Specialized Reporting: The Changing U.S. Population (3, Fa) Reporting and writing on immigration and other forms of demographic change; survey of
immigration, the journalism it has generated and the impact of coverage.

JOUR 590 Directed Research (1-12, FaSpSm)
Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

JOUR 591 Arts Writing Practicum (3, Fa) Intensive writing workshop on the craft of arts criticism and persuasive writing of different art genres.

JOUR 592 Specialized Journalism: Reporting the Arts (3, Fa) Reporting and writing on the arts; strategies for arts journalism in the digital era; survey of essays and reviews by great critics.

JOUR 593 Arts Criticism and Commentary (3, Sp) Writing workshops and independent fieldwork; development of critical skills to write socially valuable criticism and commentary about art, entertainment and culture. Prerequisite: JOUR 590.

JOUR 594b Arts and Business (1-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

JOUR 595 Critical Thinking: The Art and Science of Not Getting Fooled (3, Fa) Researching and writing about how not to get fooled as a journalist; includes research, writing and discussion. Open only to journalism and specialized journalism majors.

JOUR 595 Follow the Money: Business and Economics Reporting (3, Fa) Reporting and writing on business, economics and public finance; students produce a series of professional projects for publication. Open only to journalism and specialized journalism majors.

JOUR 597 Financial and Investor Communications (3, Fa) Provides a practical, working understanding of financial communications, concerned primarily with articulating a company’s value. This applies to matters of corporate image and financial/investment environment. Open only to public relations and strategic public relations majors. Prerequisite: JOUR 528.

JOUR 598 Journalism Capstone Project (3, Sp) Production of a journalism capstone project with multimedia elements for a master’s degree. Projects can be single stand-alone pieces, or series of pieces. Open only to Journalism majors.

JOUR 599 Special Topics (1-4, max 8, FaSpSm) Seminar in selected topics in journalism.

**USC Kaufman School of Dance**

Established in 2012, the USC Kaufman School of Dance offers students a rigorous curriculum with a conservatory environment and opportunities for collaboration with world-renowned artists in Los Angeles. The Kaufman School welcomes its inaugural cohort of BFA candidates in fall 2015.

The USC Glorya Kaufman School of Dance is the newest school to debut at the University of Southern California. Founded in 2012 by a transformational gift from Glorya Kaufman, a visionary Los Angeles philanthropist whose commitment to dance is celebrated nationwide, the Kaufman School offers a wide variety of classes in a multitude of dance styles from hip hop to ballroom to ballet. These classes are open to all USC students. The Kaufman School offers minors in dance as supplements to major fields of specialization in other departments and schools. Students may minor in dance or dance in popular culture: hip hop, urban and social dances. Information about how to apply for any dance minor is available at kaufman.usc.edu. Candidates for minors offered by the Kaufman School will be counseled by an academic and faculty adviser in the school.

Beginning in the fall of 2015, the Kaufman School will offer a Bachelor of Fine Arts degree to a very select number of undergraduates who wish to pursue dance as their major. This four-year degree will be housed in the Glorya Kaufman International Dance Center, which is now under construction. Applications for the BFA will be accepted in the fall of 2014.

The BFA curriculum is designed to prepare the artist, innovator and the entrepreneur. The hallmark of USC Kaufman is the development of a new movement model for dance, intersecting dance techniques and creating a hybrid form that will be expressed in new media, scholarship, studio practice and choreography for the 21st century. USC Kaufman provides foundational insight, intellectual and artistic development, a robust performance repertory, exposure to world-renowned practicing artists, interdisciplinary projects, conditioning for dancers and strategic career venture skills. With opportunities for interdisciplinary study integrated into the curriculum, students are able to explore collaborations and innovations with established partners.

As one of the world’s creative capitals, Los Angeles offers a wealth of opportunity for students to intern, perform and collaborate with artists across the city. Students of USC Kaufman will have unprecedented access to visiting dance companies in residence at the Los Angeles Music Center as part of Glorya Kaufman Presents Dance at the Music Center. As the preeminent school of dance in the western United States, USC Kaufman combines a conservatory environment and the academic rigor of a major private research institution, along with a robust non-major program.

USC Kaufman School of Dance offers a four-year intensive program in preparation for a career in dance, choreography for stage and cinematic arts, music and/or related fields of pursuit. With core curriculum courses, advised electives and a wide variety of media from which to choose, the BFA provides ample opportunity to explore and develop a strong personal vision in dance.

**Curriculum Requirements**

The BFA requires a total of 130 units. All BFA students will be introduced to courses in dance performance, music and choreography for stage and cinematic arts as part of the core curriculum. In addition to required courses, BFA students are encouraged to explore an area of dance performance, choreography for stage and cinematic arts or dance and music in greater depth. Students should select electives based on their personal and professional goals and in consultation with introductory courses focus on technique, performance and composition, while building a solid grounding in history and critical theory. Advanced students continue work in technique and performance and also pursue individual interests under the guidance and mentoring of individual faculty members. Emphasis in the last year is on the development of a professional quality production in performance, choreography, music, media, scholarship or entrepreneurial enterprise.

In the junior and senior years, USC Kaufman students will explore one of three concentrations: Dance Performance, Choreography for Stage and Cinematic Arts, or Dance and Music. They will be mentored by faculty and assisted by academic advisers in selecting electives that support their personal and professional goals.

**Dance Performance Concentration**

The Dance Performance concentration is designed for students who are interested in a career as a professional dancer or in other performance mediums. This emphasis will provide students with the skills needed to succeed in a variety of entertainment positions. Students will work with artists and scholars in the field, learning essential tools needed for a successful career in dance performance.

**Dance and Music Concentration**

The Dance and Music concentration provides students with a unique perspective on dance by combining dance training with substantial study in music. Courses in songwriting and music history, as well as instrumental and vocal lessons, will equip students interested in choreography or dance performance with the knowledge to explore careers in the music and larger entertainment industries.

**Choreography for Stage and Cinematic Arts Concentration**

The Choreography for Stage and Cinematic Arts concentration is designed to guide students who are interested in the field of dance for the stage, motion pictures, television, digital media and animation. Students will also be mentored in experimental types of new dance media both as individual performers and in collaboration with other visual and performing artists.

**General Requirements**

Dance training in one or more dance styles at an intermediate or advanced level of technique. Dance styles recommended are ballet, classic modern, hip-hop, classic jazz and contemporary. Proficiency in ballet and/or hip-hop dance is recommended.

Applicants must submit the Kaufman School of Dance Supplementary Application, which includes a video recording and detailed dance resume. All final applicants will also complete a live audition and interview. Specific audition requirements, along with other entrance requirements, are reviewed on an annual basis and published in the Admission section online at kaufman.usc.edu.

A more detailed video recording may be submitted in lieu of a live audition for international students.
faculty and academic advisers. Electives are typically clustered in a particular field, but may be spread across different areas.

<th>General Education Requirements</th>
</tr>
</thead>
</table>

The university’s general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

<table>
<thead>
<tr>
<th>Entrance to the Degree Program</th>
</tr>
</thead>
</table>

Admission to a degree program is granted through USC’s admission process, described in the Admission section of this catalogue. A supplementary application form is also required for students seeking admission to the Kaufman School of Dance, which can be obtained from the School of Dance Office of Admission.
Minors in Dance

Minor in Dance in Popular Culture: Hip Hop, Urban and Social Dance

Dance in Popular Culture delves into the historical, social and aesthetic issues of dance in the contemporary settings of entertainment, concert, vernacular and recreational forms. This minor is designed to explore the foundations and structures of hip hop, urban and social dances and to introduce and orient non-major students to the language of dance in contemporary society. In the hip hop culture dance has become a major avenue of expression, acceptance and power. This minor will address issues of race and politics within the parameters of dance as an art form, entertainment and personal expression.

This minor consists of one lower-division course, two upper-division courses and four units of elective courses. Students must be in good academic standing to be admitted. No previous dance experience is required.

REQUIRED LOWER DIVISION COURSES (4 UNITS) UNITS
DANC 280 Dance as an Art Form 4

REQUIRED UPPER DIVISION COURSES (8 UNITS) UNITS
DANC 402 Urban Folk and Street Dance: History and Culture 4
DANC 412 African American Dance 4

ELECTIVE COURSES (4 UNITS) UNITS
DANC 107 World Perspective on Dance Performance 2
DANC 212 Dance in Popular Culture 2
DANC 283L Elements of Dance Production 4
DANC 380 Historical Approaches to Dance 4
DANC 383L Choreography and Performance 4
DANC 388 Senior Seminar in Dance 4
DANC 432 Creativity, Culture, Commerce and Community 4
DANC 452 Dancing with Words 4
DANC 462 Dancing on the Screen 2
DANC 482 Choreography for Television 4
DANC 483 Dance Performance 2

* Up to 6 units of technique courses may be applied toward the minor.

**Students may only apply one technique course from this list toward the minor.

Minor in Dance

The minor in dance presents undergraduate students with a broad yet deep foundation in dance. The program offers a variety of courses in dance technique, history, culture, critical theory, choreography and performance.

The minor is open to all undergraduates. A minimum of 20 units are required to complete the program. Students applying to this minor must have a minimum GPA of 2.0.

REQUIRED LOWER DIVISION COURSES (4 UNITS) UNITS
DANC 280 Dance as an Art Form 4
inform class discussions. Prerequisite: DANC 101. Open only to Dance majors.

DANC 210 Dance Technique II (3, max 12, FaSpSm) Intermediate technique studies in a studio setting. Concentration on classical ballet, hip hop and its derivatives, partnering and contemporary techniques essential to the dancers’ development. Prerequisite: DANC 110; recommended preparation: Ballet, hip hop, pointe, modern dance, and/or jazz studies. Open only to dance majors.

DANC 212 Dance in Popular Culture (2, max 4, FaSpSm) Examination of the role of dance in popular culture in a studio setting. Practical studies in styles and their evolution in recreational and professional settings.

DANC 218 Introduction to Dance for the Camera: New Media and Editing (2, FaSpSm) Effective navigation and utilization of ubiquitous, portable digital technologies in film to create an individualized archive and portfolio of their choreographic projects and performances.

DANC 220 Repertory and Performance II (2, max 4, FaSpSm) Continued studies and guided practice of choreographic repertory. Investigation of choreographic vocabulary, intention, stylistic approaches, and performance technique for group work. Prerequisite: DANC 120; recommended preparation: Ballet, hip hop, pointe, modern dance, and/or jazz studies. Open only to dance majors.

DANC 230 Improvisation and Composition III: Intermediate (2, FaSpSm) Expansion of improvisation and composition skills for the creative processes of dancing, dance-making and performance. Prerequisite: DANC 131; recommended preparation: Extensive Ballet Training. Open only to dance majors.

DANC 231 Improvisation and Composition IV: Intermediate (2, FaSpSm) Further development of improvisation and composition skills for the creative processes of dancing, dance-making and performance. Prerequisite: DANC 230; recommended preparation: Extensive Ballet Training. Open only to dance majors.

DANC 280 Dance as an Art Form (4, FaSpSm) Gateway to the minor in dance. Concepts of art exemplified in dance; origins and evolution of classical and contemporary dance forms; elements of art criticism applied to dance productions. Required attendance at dance concerts and art exhibits. (Duplicates credit in former THTR 280.)

DANC 282 Activities for Professional Preparation: Dance (1) Fundamental movements and composition in modern and aerobic dance; study of popular social dance forms; teaching and evaluation methodologies; course and class planning. (Duplicates credit in former THTR 282.)

DANC 283 Elements of Dance Production (4) Theoretical aspects of creativity, choreography, accompaniment, dance notation, and production; application in individual and group composition. Lecture, 2 hours; performance laboratory, 6 hours. (Duplicates credit in former THTR 283.)

DANC 301 Colloquium: The Role of the Dance Artist in Society (1, max 2, FaSpSm) Examination of the role of the artist in society. Development of an individual understanding and guiding philosophy for professional development in the dance field. Prerequisite: DANC 201. Open only to dance majors.

DANC 310 Dance Technique III (3, max 12, FaSpSm) Advanced technique studies in a studio setting. Concentration on classical ballet, hip hop and its derivatives, partnering and contemporary techniques essential to the dancers’ development. Prerequisite: DANC 210; recommended preparation: Ballet, hip hop, pointe, modern dance, and/or jazz studies. Open only to dance majors.

DANC 320 Repertory and Performance III (2, max 4, FaSpSm) Study and guided practice of new works and developing roles. Emphasis on the dancer as collaborator in the creative process. Prerequisite: DANC 220; recommended preparation: Ballet, hip hop, pointe, modern dance, and/or jazz studies. Open only to dance majors.

DANC 330 Improvisation and Composition V: Advanced (2, max 4, FaSpSm) Students will learn a series of intermediate improvisational and compositional systems for generating and modifying movement. Prerequisite: DANC 231; recommended preparation: Extensive Ballet Training. Open only to dance majors.

DANC 331 Improvisation and Composition VI: Advanced (2, max 4, FaSpSm) Further development in a series of advanced improvisational and compositional systems for generating and modifying movement. Prerequisite: DANC 330; recommended preparation: Extensive Ballet Training. Open only to dance majors.

DANC 345 Artist in Residence (1-4, max 8, FaSpSm) Investigation and development of choreographic methods and practices through observation and active participation with the guest artist. Prerequisite: DANC 110, DANC 120, DANC 131. Open only to Dance majors.

DANC 347 Artist Collaborative (1-4, max 8, FaSpSm) Development of an artistic work of two or more media, working with colleagues and/or a faculty in allied disciplines. Open only to Dance majors.

DANC 355 Solo/Partnering and Performance (2, max 4, FaSpSm) Intermediate and advanced partnering techniques in classical and contemporary repertory. Solo work and acting techniques studied, developing character and style through gesture and movement. Prerequisite: DANC 110, DANC 120, DANC 131. Open only to Dance majors.

DANC 362 Pilates Mat Training (2, max 4, FaSpSm) Mat exercises designed to promote healthy movement practices, develop strength, balance, flexibility and coordination.

DANC 380 Historical Approaches to Dance (4) Role of dance in pre-technological societies; development of classical and romantic ballet from medieval, baroque, and renaissance periods to contemporary forms. (Duplicates credit in former THTR 380.)

DANC 382 Choreography and Performance (4) Aesthetic concepts in dance and related arts; integration of concepts in choreography, performance, and production; philosophical bases of dance criticism; critical analysis of performances. Lecture, 3 hours; performance laboratory, 3 hours. (Duplicates credit in former THTR 382.)

DANC 388 Senior Seminar in Dance (4) Synthesis of principles, philosophy, and history of dance, culminating in senior individual project. (Duplicates credit in former THTR 388.)

DANC 402 Urban Folk and Street Dance: History and Culture (4, max 8, FaSp) Introduction to the history and practice of Urban Folk Dance including hip hop, freestyle, street dance and the relevant social dances of the 20th century.

DANC 410 Dance Technique IV (2, max 12, FaSpSm) Pre-professional technique studies in a studio setting with concentration on classical ballet, hip hop and its derivatives, and contemporary techniques essential to the dancers’ development. Prerequisite: DANC 310; recommended preparation: Ballet, hip hop, pointe, modern dance, and/or jazz studies. Open only to dance majors.

DANC 412 African American Dance (4, max 8, FaSp) Exploration of the discursive foundations, political motivations, and aesthetic strategies of dance writers and artists whose works have enabled the category of “Black dance.”

DANC 420 Repertory and Performance IV (2, max 4, FaSpSm) Study and guided practice of significant roles in new and existing choreography. Emphasis on refinement of partnering, solo and group performance technique. Prerequisite: DANC 320; recommended preparation: Ballet, hip hop, pointe, modern dance, and/or jazz studies. Open only to dance majors.

DANC 430 Improvisation and Composition VIII: Upper Level (2, max 4, FaSpSm) Delving into complex strategies for creating and analyzing choreographic composition, as well as processing and composing embodied information in real-time at the upper level. Prerequisite: DANC 331; recommended preparation: Extensive Ballet Training. Open only to dance majors.

DANC 431 Improvisation and Composition VIII: Upper Level (2, max 4, FaSpSm) Continued studies of complex strategies for creating and analyzing choreographic composition, as well as processing and composing embodied information in real-time at an upper level. Prerequisite: DANC 430; recommended preparation: Extensive Ballet Training. Open only to dance majors.

DANC 432 Creativity, Culture, Commerce and Community (4, FaSpSm) Exploration of artistic entrepreneurial mechanisms to initiate innovative endeavors in the professional dance world which are relevant to today’s culture, communities, customs, and business landscape.

DANC 4420 International and Historical Perspectives in Dance (4-4, FaSpSm) Exploration of dance as an art form in its artistic, political, and socio-cultural climate. Studies of the continuum of dance within its historical context.

DANC 452 Dancing with Words (4, FaSpSm) Development of descriptive and analytical skills for dance writing (journalism, education, scholarship, audience development, marketing) and refinement of social-media expertise to connect with relevant audiences.

DANC 462 Dancing on the Screen (2, max 4, FaSpSm) The study of dance in movies, television, Internet, mobile devices and new media. Examining dance on screen, influenced by storytelling, camera technology and editing.

DANC 470 Dance Leadership (2, FaSpSm) Preparation for leadership in the dance world including structuring companies, marketing choreography, obtaining financing as a dance-maker, collaborating dance initiatives, and leading in dance education.

DANC 480 Advanced Performance Studies: Senior Seminar (1, FaSpSm) Seminar and studio course in preparation of the senior project to be presented in spring semester, in performance, choreography, scholarship or entrepreneurship. Recommended preparation: DANC 218, DANC 301, DANC 310, DANC 320, DANC 370. Open only to senior Dance majors.

DANC 482 Choreography for Television (4) Creative choreography of theatrical dance for television. Emphasis on rhythm, structure, composition, notation, and styling. (Duplicates credit in former THTR 482.)

DANC 483 Dance Performance (2, max 8, FaSpSm) Preparation, rehearsal, and performance of experimental
Herman Ostrow
School of Dentistry
of USC

Herman Ostrow School of Dentistry DDS students care for a patient in the Norris Dental Science Center. Under the supervision of expert faculty, dental students and residents provide a wide range of oral health care services to patients, from routine checkups and cleanings to fitting braces and treating oral diseases.

Since 1897, the Herman Ostrow School of Dentistry of USC has provided students with unique, intensive clinical experiences using the most advanced techniques and technologies in the field. Graduates form a tightly knit community of proud alumni, provide top-notch patient care, conduct world-class research and lead the oral health field.

The school’s strength is its educators. Their world-renowned expertise, combined with innovative curricula, gives students the strong clinical education they need to become great oral health professionals. The curricula include the Doctor of Dental Surgery program, the baccalaureate in dental hygiene program and postdoctoral advanced and specialty programs: endodontics, general practice residency, operative dentistry, oral and maxillofacial surgery, orofacial pain, oral medicine, orthodontics, pediatric dentistry, periodontology and prosthodontics. Other programs include an advanced standing program for international dentists; a Master of Science degree in dental hygiene; online Master of Science degrees in geriatric dentistry, orofacial pain and oral medicine; an online graduate certificate program in geriatric dentistry, and master’s and Ph.D. degrees in craniofacial biology.

The Herman Ostrow School of Dentistry’s celebrated status as a well-funded dental and craniofacial research unit allows students to enrich their education through laboratory activities and bolster their clinical skills with strong scientific foundations.

Through community service, the Herman Ostrow School of Dentistry provides valuable clinical experiences to the students while helping disadvantaged individuals improve their oral health. Serving the surrounding community, whether at the school’s dental clinics or at community outreach sites throughout Los Angeles and Southern California, helps students develop clinical competency and learn to treat all members of diverse communities with care and compassion.

Administration
Avishai Sadan, DMD, Dean
Mahvash Navazesh, DDS, Associate Dean of Academic Affairs and Student Life
Douglas Sowol, DDS, MBA, Associate Dean of Clinical Affairs
Roseann Mulligan, M.S., DDS, Associate Dean of Community Health Programs and Hospital Affairs and Chair, Division of Dental Public Health and Pediatric Dentistry
ilan Rotstein, DDS, Associate Dean of Continuing Education and Chair, Division of Endodontics, Oral and Maxillofacial Surgery and Orthodontics
Yang Chai, DDS, Ph.D., Associate Dean of Research
Malcolm Sneed, DDS, Ph.D., Chair, Division of Biomedical Sciences
Mark Urata, M.D., DDS, FACS, FAAP, Chair, Division of Oral and Maxillofacial Surgery
Casey Chen, DDS, Ph.D., Chair, Division of Periodontology, Diagnostic Sciences and Dental Hygiene
Sillas Duarte, Jr., DDS, Ph.D., Chair, Division of Restorative Sciences
James Gordon, M.A., M.Ed., Ed.D., Associate Dean and Chair, Division of Biokinesiology and Physical Therapy
Florence Clark, M.S., Ph.D., Associate Dean and Chair, Division of Occupational Science and Occupational Therapy

Faculty
G. Donald and Marian James Montgomery Professor in Dentistry: Avishai Sadan, DMD
George and Mary Lou Boone Chair in Craniofacial Molecular Biology: Yang Chai, DDS, Ph.D.
Don and Sybil Harrington Foundation Chair in Esthetic Dentistry: Pascal Magne, DDS, Ph.D.
Sykes Family Chair in Pediatric Physical Therapy, Health and Development: Linda Fetters, Ph.D.
Ralph W. and Jean L. Bleak Professor of Restorative Dentistry: Winston Wan-Li Chee, BDS

Charles M. Goldstein Professor of Community Dentistry: Roseann Mulligan, DDS, M.S.

USC Associates Professor of Dentistry: Michael L. Paine, DDS, Ph.D.

Professors: Yang Chai, DDS, Ph.D., Chih-Kuang (Casey) Chen, DDS, Ph.D., Glenn Clark, M.S., DDS, Paul C. Denny, Ph.D., Tina F. Jaskoll, Ph.D., Michael Melnick, DDS, Ph.D., Cedric Minkin, Ph.D., Roseann Mulligan, M.S., DDS, Mahvash Navazesh, DMD; Janet Moradian-Oldak, Ph.D., Michael Paine, BDS, Ph.D., Pragna Patel, Ph.D., Ian Rotstein, DDS, Avishai Sadan, DMD, Michael L. Schneir, M.S., Ph.D., Songtao Shi, DDS, Ph.D., Harold C. Slavkin, DDS, Jorgen Slots, MBA, DDS, Ph.D., MD, Malcolm L. Sneed, DDS, Ph.D.

Associate Professors: Winston Wan-Li Chee, DDS, George C. Cho, DDS, Sillas Duarte, Jr., DDS, Ph.D., Robert G. Keim, DDS, Ed.D., Ralph L. Leung, M.S., DDS, Pascal Magne, DDS, Ph.D., Glenn Sameshima, DDS, Ph.D., Arnold Tiber, DDS, Ph.D., Homayoun V. Zadeh, DDS, Ph.D.

Associate Professor (Librarianship): John P. Glueckert, MLS

Assistant Professors of Dentistry: Ruchi Bajpai, Ph.D.; Amy Merrill-Bruggger, Ph.D.; Ramiro Murata, DDS, Ph.D., Parish P. Sedgihzadeh, DDS, Jian Xu, Ph.D.

Professors of Clinical Dentistry: Jane Forrest, RDH, Ed.D., Michael Jorgensen, DDS; Diane Melrose, BSDH, M.A.; Michael J. Mulvihill, III, DDS, MBA; Douglas Sowol, DDS, MBA

Associate Professor (Clinical Scholar): Stephen Yen, DMD, Ph.D.

Associate Professors of Clinical Dentistry: Loris Abedi, DDS; Gardner Bealle, DDS, Reyes Enciso, Ph.D.; Richard Furuchi, DDS, Joyce Galligan, R.N., DDS; Richard Green, M.S., Ed.D., DDS, Ph.D., Michelle Iokoma, DDS; Kian Kar, M.S., DDS, Thomas Allen Levy, M.S., Niel Nathanson, M.PH., M.A.; Saravanam Ram, DDS, MD, Raman Rogers, DDS; Eddie Sheh, DDS; Donna Smith, RDH, M.S.Ed.; Joyce Suni, RDH; Richard Udin, DDS; Mark Urata, DDS, MD

Assistant Professors of Clinical Dentistry: Michelle Aek, Ph.D., Tae Ahn, DDS*, Lupe Arevalo, RDH* Kim Austin, DDS; Nissim Benbassat, DDS, Jucheng Chen, DDS, Ph.D., Nam Cho, DDS, MD, Laura Elizondo, DDS, Sharon Faust, DDS; Alon Friedman, DDS, Dan Grauer, DDS, Ph.D., Ripsik Guksayan, DDS; Tran Han, DDS, Heila Hooshangi, DDS; Julie Jenks, M.S., MPH, DDS, Boris Keselbrener, DDS, Tae Kim, DDS, Janet Lent, DDS, Richard S. Lin, DDS, W. Michael Madden, DDS; Ali Ostadi-Mahalabaf, DDS; John Morzov, DDS, Jose Polido, DDS, Ehsan Radaan, DMD, M.S.C.; Rafael Rogers, DDS, Neimar Sartori, DDS, M.S., Ph.D., Piedad Suarez, DDS, Santosh Sundaresan, Marlene Talley, DDS; Thomas Tanbonliong, Jr., DDS; Antonia Tenuel, DDS, Ph.D.; Anita Tourah, DDS, Christina Wong, DDS

Research Assistant Professors: Matthew K. Lee, M.D.; Alireza Moshevarinia, DDS, Ph.D., Yan Zhou, Ph.D.

Clinical Professors: Ralph B. Allman, M.S., DDS; David Good, DDS, John J. Lytle, DDS, M.D.; Gayle Macnold, Ph.D., Dennis Duke R. Yamashita, DDS, Margarita Zeichner-David, Ph.D.

Clinical Associate Professors: Barbara D. Edwards, RDH; Mina Habibian, DMD, Ph.D., John Kishibay, DDS, Ph.D.; Bach Le, DDS, M.D., Michael Padilla, DDS, Anthony Park, DDS, Hovhannes Shnorhokian, DMD, Ph.D., Ann Spolarich, Ph.D., James W. Tom, DDS, M.S.; Arman Torbati, DDS; Leon Unterman, DDS

Clinical Assistant Professors: Mainul Ahsan, Ph.D.; Alexander Alcaraz, DMD; Juan Camarena, DDS; Gabriela Anderson, DDS; Vartuhi Avanesian, DDS; Nasrin Bahari;
The Grading System

Grades are issued by members of the faculty to indicate to students their level of achievement and to provide information to committees given the responsibility of reviewing a student’s total academic record and assigning honor or deficient status.

Newly admitted students to the Doctor of Dental Surgery (DDS) program, the Advanced Standing Program for International Dentists and Bachelor of Science in Dental Hygiene (B.S.) students are bound by the university grading system (excluding plus/minus grades), which is detailed in the Academic Standards section of this catalogue.

Grades used by course directors of required advanced specialty classes are: "CR" - credit, "CRIH" - credit with honors and "NCRIH" - no credit. Other notations appearing on the transcript are: "IPII" - indicates that the course is a complete course; "ICWI" - incomplete clinical work; "MG" - missing grade; "W" - withdraw. Students pursuing a Master of Science or Doctor of Philosophy in Craniofacial Biology and students in dental hygiene, dental, and international classes should refer to the Academic Standards section of this catalogue.

Probation and Disqualification

A student evaluation policy has been developed that outlines methods by which the faculty can recognize outstanding achievements by students and identify those who have difficulty meeting the school’s academic standards.

In this policy, the procedures dealing with the assignment and consequences of academic status, including academic probation and disqualification, are outlined in detail. It is hoped that the development of specific guidelines will eliminate confusion and minimize the amount of time spent in determining the student’s status, thus allowing faculty and students to concentrate on their primary responsibility - the training of dental health professionals. Copies of student professional performance evaluation committee guidelines are available online on the dental school Website intranet.

DDS (includes Advanced Standing Program for International Dentists)

A student will be placed on academic warning if (1) a grade of "F" is received in any of the graded categories of group practice performance, or if this recommendation is made by the group practice director, probation is warranted by other factors related to the delivery of health care or clinical accomplishment.

A student will be placed on academic probation if a grade of "F" is received in any of the graded categories of group practice performance, or if this recommendation is made by the group practice director, probation is warranted by other factors related to the delivery of health care or clinical accomplishment.

A student will be placed on academic warning if (1) the GPA of a given Academic Time Unit (ATU) falls below 2.0; (2) a failing grade is received in a 1–unit (or less) course; (3) a grade of "D" is received in a 3-, 4-, or 5-unit course. A student will be placed on academic probation if 2 units or more of failure are recorded at the end of any trimester; if a second consecutive academic warning is warranted; or, if in the judgment of the Student Professional Performance Evaluation Committee, probation is warranted.

A student will be placed on clinical probation if a grade of "F" is received in any of the graded categories of group practice performance, or if this recommendation is made by the group practice director, probation is warranted by other factors related to the delivery of health care or clinical accomplishment.

A student will be placed on academic warning if (1) a probaion is warranted at the end of any trimester; (2) a failing grade is not reconciled; (3) at the end of the academic year the grade point average for the preceding year is below 2.0; (4) academic probation is warranted while repeating a trimester on probation; and (5) a deficiency in any area is determined by the Student Professional Performance Evaluation Committee to be insurmountable. In addition to the Dental School evaluation policy (which evaluates courses taken in the Dental School), students in the Dental Hygiene Program are also bound by the university’s academic status requirements.

Advanced Specialty Students

A student will be placed on academic probation if a grade of "F" is received in any of the graded categories of group practice performance, or if this recommendation is made by the group practice director, probation is warranted by other factors related to the delivery of health care or clinical accomplishment.

A student will be placed on academic warning if (1) the GPA of a given Academic Time Unit (ATU) falls below 2.0; (2) a failing grade is received in a 1–unit (or less) course; (3) a grade of "D" is received in a 3-, 4-, or 5-unit course. A student will be placed on academic probation if 2 units or more of failure are recorded at the end of any trimester; if a second consecutive academic warning is warranted; or, if in the judgment of the Student Professional Performance Evaluation Committee, probation is warranted.

A student will be placed on clinical probation if a grade of "F" is received in any of the graded categories of group practice performance, or if this recommendation is made by the group practice director, probation is warranted by other factors related to the delivery of health care or clinical accomplishment.

A student will be placed on academic warning if (1) a probaion is warranted at the end of any trimester; (2) a failing grade is not reconciled; (3) at the end of the academic year the grade point average for the preceding year is below 2.0; (4) academic probation is warranted while repeating a trimester on probation; and (5) a deficiency in any area is determined by the Student Professional Performance Evaluation Committee to be insurmountable. In addition to the Dental School evaluation policy (which evaluates courses taken in the Dental School), students in the Dental Hygiene Program are also bound by the university’s academic status requirements.

Honor Status

The Herman Ostrow School of Dentistry recognizes excellence in achievement by assigning special honor status during the course of study and by presentation of awards upon graduation.

Dean’s List

Students who complete all course work by a prescribed deadline and earn a grade point average of 3.5 or above for a trimester are placed on the Dean’s List. Students shall not be placed on the Dean’s list if they are on deficient academic status during that trimester (i.e., academic warning, academic probation and continued academic probation).
The local chapter of Omicron Kappa Upsilon (OKU), a national dental honor fraternity recognizes the top 10 percent of each doctoral dental class at the end of each academic year (August) by including these students on the OKU Honor List. The determination of the top 10 percent is based on a yearly GPA. It should be noted that placement on the OKU Honor List has no relationship to membership and professional development.

Graduation Awards

There are numerous awards made each year at graduation to recognize excellence in members of the graduating doctoral, dental hygiene and ASPIID classes. A complete listing is available at the Herman Ostrow School of Dentistry.

Voluntary Withdrawal/Leave of Absence

The Herman Ostrow School of Dentistry recognizes that in some special instances it may be necessary or beneficial for a student to interrupt or discontinue dental education. A student wishing to withdraw from school or request a leave of absence must contact the Office of Academic Affairs for procedures to be followed. An approved leave of absence will not be granted for more than one year.

Students at the School of Dentistry who have not been formally dropped by the school, are considered enrolled each term unless they have submitted a letter of intent to withdraw. A student's verbal indication that he or she intends to withdraw or failure to settle a fee bill are not sufficient to eliminate the student from class rosters. Final course grades will be collected for students who do not have a letter of intent to withdraw on file with the Office of Academic Affairs.

A student who withdraws at any time during the first three weeks of a trimester will receive no grades for enrolled courses. A student who withdraws after three full weeks of an Academic Time Unit (ATU) will receive a mark of "W" for all enrolled courses not completed. Withdrawal is not permitted after the 12th week of a trimester.

Family Educational Rights and Privacy Act

The University of Southern California recognizes and acts in full compliance with regulations set in accordance with the Family Educational Rights and Privacy Act of 1974 (The Buckley Amendment). A student may have access to all records about him or her maintained by the university except those considered confidential under the act. Students of the School of Dentistry wishing to review records or to appeal for a change in those records should contact the Herman Ostrow School of Dentistry of USC Registrar. A small charge may be made to cover the time and costs of duplication of the record.

Tuition and Fees (Estimated)

Tuition at the Herman Ostrow School of Dentistry is charged on a flat fee basis for enrollment in the regular degree and advanced certificate programs of the school. Exceptions do not apply to students who have courses waived based on their prior education. In such cases, students are charged the standard flat fee for the program in which they are enrolled.

Auditors pay the regular tuition rate. Auditors are not required to participate in class exercises (discussions and examinations); they receive no grades or credit.

The information outlined here is for Herman Ostrow School of Dentistry fees and tuition deposits only. For information about Herman Ostrow School of Dentistry tuition and university fees, refer to the Tuition and Fees section of this catalogue. The university reserves the right to assess new fees or charges as it may determine.

Financial Aid

Detailed information concerning financial aid programs available to dental students can be obtained by contacting the Herman Ostrow School of Dentistry of USC Office of Financial Aid at (310) 740-2841, uscsdfa@usc.edu or visit dentistry.usc.edu/admission.

Undergraduate Degree

Bachelor of Science in Dental Hygiene

The mission of the USC Department of Dental Hygiene is to educate and prepare dental hygiene leaders for careers in a diverse and changing health care environment. Implicit in this is a desire to provide a liberal education as well as outstanding clinical experiences. The baccalaureate dental hygiene program is a combination of dental and dental hygiene sciences, supporting sciences and general education.

The curriculum reflects the core values of the profession in private and public health settings. The program is committed to creating a humanistic, educational environment that will facilitate the development of responsible, ethical, oral health professionals who are sensitive to the patient needs and competent in the dental hygiene process of care.

Educational and clinical services provided by dental hygiene students include dental health education, patient assessment, disease prevention and non-surgical periodontal therapy for a diverse population of patients. The program strives to produce graduates who will advance the profession of dental hygiene and improve dental health care through evidence-based research and practice.
scholarly activities. Finally, graduates are competent in self-assessment and scientific methodology in preparation for lifelong learning.

The Bachelor of Science degree in Dental Hygiene requires two academic years of pre-dental hygiene courses followed by two additional years of enrollment in the dental hygiene program.

Admission

Two applications are required, one for the USC Undergraduate Admission Office and one for the School of Dentistry. See the Undergraduate Education Admission section of this catalogue.

Admission to the dental hygiene program of the Herman Ostrow School of Dentistry of USC is granted through the ADEA Dental Hygiene Centralized Application Service (DHCAS) is the centralized application service for applicants to dental hygiene programs. Please review the instructions for the application at adeadcas.org. All applicants must select the “Entry Level Bachelor’s” as a designation.

In order to begin the ADEA DHCAS application, every applicant will need an email address and a DentPin. The DentPin is a personal identification number used in place of the social security number. To receive a DentPin visit dentpin.

At the same time, applicants must apply and gain admission to the University of Southern California, which is granted through the USC Office of Admission.

Applications for the Bachelor of Science in Dental Hygiene should be filed well in advance of February 1 of the year in which the student wishes to be admitted. The program begins in the fall.

Although students may transfer to USC at any time and begin prerequisite course work, the dental hygiene curriculum begins in the junior year. Admission to the university does not guarantee admission to the dental hygiene program.

The Committee on Admissions examines credentials and bases its decision on the objective evaluation of these factors: preprofessional training, evidence of scholarship and personal evaluation of the student.

Minimum entrance requirements include: graduation from an accredited secondary school and completion of the following courses which may be transferred in from another college or university or taken at USC prior to being admitted to the dental hygiene program.

**General Biology**
- One semester with lab is required.

**Anatomy**
- One semester with lab is required.

**General Chemistry with Lab**
- One year is required.

**English Composition**
- One year is required. Must include course work equivalent to WRIT 150 and one semester of any transferable English course.

**General Physiology Lab**
- One semester is required.

**General Microbiology**
- One semester is required.

**Nutrition**
- One semester is required.

**Introduction to Sociology**
- One semester is required.

**General Psychology**
- One semester is required.

**Public Speaking**
- One semester is required.

**General Education Requirements**

The university’s general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

All dental hygiene students must follow the university’s general education requirements.

There is no minimum number of transfer units you must complete before applying to admissions. No foreign course work will be accepted. Dental hygiene prerequisites and lower division general education categories must be completed or in progress by the time of application to the dental hygiene program. All prerequisite course work including required general education course work must be completed with a grade of “C” or better.

The following courses are not transferable: dental assisting, dental technology, secretarial science (typing, shorthand, etc.), or other technically or vocationally related courses.

All entrance requirements must be completed by June 15 preceding the September of admission, and completion of all final credits must be on file in the Herman Ostrow School of Dentistry of USC and the USC Office of Admission by July 15 preceding enrollment. Notification of conditional acceptance will be sent by the Ostrow Office of Admission and Student Affairs after May 1.

**Orientation**

Students who have been accepted into the program and who have reserved their place in the class by paying the appropriate tuition deposit will be forwarded orientation materials by July 15.

Orientation is traditionally scheduled during the week before the first week of classes. The purpose of the program is to acquaint incoming students with the School of Dentistry, its policies, programs, faculty and facilities. Incoming students receive financial counseling and purchase their initial equipment issue as part of orientation activities.

**Graduation Requirements**

A student is eligible for the Bachelor of Science in Dental Hygiene after attaining the qualitative and quantitative level expected in the dental hygiene curriculum. This specifically includes: no marks of “F,” “IN,” “ICW,” “IP” or “MG”; no conditions existing at the termination of the final trimester that would result in academic probation, clinical probation or academic disqualification. In addition, each student must have demonstrated the characteristics expected of a health professional and have fulfilled the financial and other obligations required for graduation.

In addition to meeting the academic requirements indicated above, students must have a completed administrative clearance form on file in the Office of Academic Affairs before a degree can be conferred. This administrative clearance indicates that the student has met financial and other obligations to the university and to the student’s patients.

**Curriculum**

Courses listed are required for completion of the degree. Course listings are current as of 2013-2014 and are subject to change without notice by action of the Herman Ostrow School of Dentistry and the university.

Progressive Degree Programs

The following progressive degrees are available for students enrolled in the Dental Hygiene program: MPH at the Keck School of Medicine, M.A. in Gerontology from the Davis School of Gerontology, and a MSDH from the Herman Ostrow School of Dentistry. Applicants to the program must have completed 64 units of course work and must submit their applications prior to completion of 96 units of course work. Applicants do not have to submit GRE scores, but are expected to have a minimum GPA of 3.0 at the time of application. The application for admission to a progressive degree program must be accompanied by an approved course plan proposal and letters of recommendation from two USC faculty members. The requirements for both the bachelor’s degree and the progressive degrees must be satisfied. For further details on progressive degree programs, see the Requirements for Graduation page.

Minor in Craniofacial and Dental Technology

The Herman Ostrow School of Dentistry, the Viterbi School of Engineering Department of Biomedical Engineering and the Dornsife College of Letters, Arts and Sciences Department of Biological Sciences jointly offer a minor in craniofacial and dental technology. This minor is designed to prepare engineering, pre-dental, pre-medical and biological sciences undergraduates to enter the dental biotechnology industry as well as to introduce them to recent innovations in craniofacial sciences and therapeutics. The course work introduces students to concepts in craniofacial histology and embryology, head-and-neck anatomy, genetics, biochemistry and biotechnology as well as applications to dental diagnostics, imaging and dental therapies (dental implants, restorative dentistry, craniofacial genetics).

This minor requires 16 core units and a minimum of 4 units of electives. Students who have not fulfilled prerequisite requirements for core or elective courses will have to take additional units, depending on their major. In addition, students must take at least 16 units not used for their major or offered by their major department.

Please see a biomedical engineering, biological sciences or Herman Ostrow School of Dentistry adviser for specific program requirements.

For a complete list of current courses, please see the following:

*DMAT 316L Dental Materials and Clinical Procedures
*DPHR 410 Principles of Pharmacology
*GSPD 504 Dental Treatment of the Geriatric and Special Patient
*HNBV 310 Interactional Skills in Dental Hygiene
*MBIO 310 Principles of Microbiology and Immunology
*OCC 310 Fundamentals of Dental Morphology
*OMOD 306 Infection Control
*PEDO 310 Principles of Dentistry for Children
*PERI 310a Introduction to Periodontal Diseases
*PERI 415 Basic Periodontal Therapy
*PERI 504 Advanced Periodontics
*PHTL 312ab Medicine and Pathology

Professional Degrees

Doctor of Dental Surgery

The Doctor of Dental Surgery (DDS) program covers 11 consecutive 14-week trimesters. The course of study maximizes the interrelationship of all basic sciences and clinical detail sciences required by the Commission on Dental Accreditation of the American Dental Association.

USC’s reputation for excellence in preparation of graduates for private practice has been enhanced by curriculum changes that permit students to begin clinical experience in their first year. At the same time, opportunity and encouragement are given to those who might elect to pursue careers in teaching and research.

Admission

The Herman Ostrow School of Dentistry admits 144 students each year for the curriculum leading to the Doctor of Dental Surgery. Admission to the school is granted through the Office of Admission and Student Affairs which receives and processes all applications, evaluates credentials and notifies applicants who qualify for entrance by forwarding letters of acceptance. Students are selected by the Admissions Committee, a professional team whose decision on consideration of an applicant’s personal qualities, aptitude and superior scholarship necessary for the successful study and practice of dentistry. Candidates who have received or will receive a baccalaureate or higher degree will be considered more favorably than applicants who have fulfilled only minimum requirements. As a precondition of enrollment, accepted students must undergo a background screening and provide evidence of sound health and meet the school’s health requirements.

Admission information may be obtained by mail, online or in person. Address inquiries to: Herman Ostrow School of Dentistry of USC, Office of Admission and Student Affairs, 925 W. 34th Street, Room 201, Los Angeles, CA 90089-0641, (213) 740-2841, email: uscdadm@usc.edu or access the school’s Website at dentistry.usc.edu.

Admission Requirements

Minimum entrance requirements include: (1) graduation from an accredited secondary school, with a minimum of 16 core units, or the equivalent completed or in progress, at the time of application, in an accredited college or university in the United States or Canada. A baccalaureate or higher degree is preferred. No more than 60 semester hours earned at a community college will be accepted and preference is given to candidates who complete the science prerequisites at a four year institution. (2) required courses, semester hours with laboratory required: 8 units each – one year’s completed course – of general biology (zoology), inorganic chemistry, organic chemistry, physics; other courses: English composition (8 units or one year), philosophy, history or fine arts (8 units or one year). All prerequisite course work must be completed with a grade of “C” or better; (4) it is strongly suggested that students take additional upper division courses. Biochemistry, human or comparative anatomy, embryology, histology, genetics, physiology, psychology, sociology and economics are examples of recommended courses; (5) all students who apply for admission to the School of Dentistry are required to take the Dental Admission Test (DAT), given under the auspices of the Council on Dental Education of the American Dental Association. The Dental Admission Test must be taken no later than February 1 of the year for which formal application is made.

To expedite the admissions process, it is recommended that the DAT be taken during a testing period before filing formal application through the Associated American Dental Schools Application Service (AADSAS). Test scores more than two years old will not be accepted. Applicants should check with the Dental Admissions Office for all information about the test is sent to all applicants upon request, or can be obtained from the Division of Educational Measurements, Council on Dental Education, American Dental Association, 211 East Chicago Avenue, Chicago, IL 60611. No action can be taken on the application until DAT scores have been received.

(6) An interview at the School of Dentistry may be required of all applicants who appear qualified for consideration as determined by the Office of Admission and Student Affairs, although this interview may be waived for exceptionally qualified candidates as determined by the Dental Admissions Committee; a manual dexterity test may be required as part of an interview process; (7) complete transcripts of undergraduate and graduate work, including degree notations, must be on file in the Admission Committee; a manual dexterity test required that the application be received by AADSAS no later than February 1 of the year in which enrollment is anticipated. Early application and file completion is recommended. Do not send the application form to USC directly. In addition to submitting the ADEA AADSAS application, applicants must submit DAT scores and one official transcript from every college/university attended directly to AADSAS. Application evaluation cannot begin until these items are received by ADEA AADSAS. (8) Applicants are required to pay a nonrefundable $185 processing fee, which should be forwarded directly to the Ostrow Office of Admissions (international students requiring a student visa must submit a $145 processing
fee). (4) Notification from the Office of Admissions and Student Affairs will be sent, indicating that the application has been received in time for the initial tuition by July 1. (5) A non-refundable commitment fee of $1,500 is required from admitted students by the deadline indicated in the acceptance letter to hold a place in the entering class. A second commitment fee of $3,000 is required by May 1. Application accepted after May 1 must pay a flat fee of $3,000 within 15 days from the date of their acceptance letter to hold a place in the entering class; applicants accepted after July 1 are required to pay a $2,000 commitment fee within two days. These non-refundable fees will be applied toward tuition upon enrollment. (8) Preregistration for the first year dental class is held before orientation. (9) All entering students are required to prepay $3,000 toward enrollment. (8) Preregistration for the first year dental class is held before orientation. (9) All entering students are required to prepay $3,000 towar

### Orientation

Students who have been accepted into the predoctoral dental program and who have reserved their place in the class will receive information on orientation during the first two weeks in July.

Orientation takes place prior to the first week of classes. The purpose of the orientation program is to acquaint accepted students with the school’s policies, programs, faculty and facilities. Incoming students receive financial counseling and receive their initial equipment issue during this orientation period.

### Graduation Requirements

A student is eligible for the Doctor of Dental Surgery degree after successful attainment of the qualitative and quantitative level expected in the doctoral curriculum, specifically: has met the 2.0 GPA requirement for graduation; has no conditions existing at the termination of the final academic time unit that would qualify him or her for academic probation, clinical probation or academic disqualification; has no marks of “F,” “IN” or “MG”; has passed Part I and Part II of the National Dental Examinations; has demonstrated the personal characteristics expected of a professional; has fulfilled his or her financial obligations as well as all other obligations and requirements for graduation.

In addition to meeting the academic requirements indicated above, students must have completed an administrative clearance form on file in the Office of Academic Affairs before a degree can be conferred. This administrative clearance indicates that the student has met financial and other obligations to the university and to the student’s patients.

### Curriculum

The curriculum leading to the Doctor of Dental Surgery degree undergoes constant change to meet the challenges of modern dental practice. Course listings are current as of 2013-2014 and are subject to change without notice by action of the Herman Ostrow School of Dentistry and the university.

### Orientation Program

The orientation program is designed to help students understand the policies, programs, faculty and facilities. Incoming students receive financial counseling and receive their initial equipment issue during this orientation period.
Items directly to the School of Dentistry: (a) $85 application and essay to the Ostrow School of Dentistry of USC, (b) two letters of recommendation from high school science teachers, (c) copies of SAT scores and high school transcripts, and copy of acceptance letter from USC.

For additional information and an application, contact: Herman Ostrow School of Dentistry of USC, Office of Admission and Student Affairs, 325 W. 24th Street, Room 201, Los Angeles, CA 90089-0641, (213) 740-2841, email: uscsdadm@usc.edu or access the school’s Website at dentistry.usc.edu.

Advanced Standing Program for International Dentists

This program is designed to teach qualified dentists from other countries the knowledge and skills available in the United States. Time necessary to complete the program depends upon the doctor's ability; a minimum of two years is usually required. About eight months will be devoted to fundamental, technical and academic procedures. The remaining time is devoted to clinical training as necessary to achieve graduation qualifications. Graduation from the Advanced Standing Program for International Dentists leads to a DDS degree but does not give automatic licensure to practice dentistry. However, graduates are eligible to take the State Board Dental Examinations in most of the United States. (A few states still require U.S. citizenship.)

Additional information may be requested from the Herman Ostrow School of Dentistry of USC, Office of Admission, 325 W. 24th Street, Room 201, Los Angeles, CA 90089-0641, (213) 740-2841, email: uscsdadm@usc.edu or access the school’s Website at dentistry.usc.edu.

Admission

Prospective students must apply to the Advanced Standing Program for International Dentists through the ADEA Centralized Application for Advanced Placement for International Dentists (ADEA CAAPIDSM). The application is available online only. You can access the ADEA CAAPIDSM application at https://portal.caapid.org.

Selected applicants will be interviewed and tested in October and accepted based on the following requirements: (1) completion of the formal application (before August 15 for admission to the program in April). A $145 processing fee must accompany the application. (2) Successful completion of the National Board Part I examination of the American Dental Association (ADA). A score of 75 percent must be attained in each category. Higher scores are advantageous in evaluation of the candidate's academic level. (3) Applicants are strongly encouraged to submit scores from the National Board Part II and competitive scores on both the quantitative and verbal sections of the Graduate Record Examinations. For information about the GRE test visit ets.org/gre. (4) Applicants for the Advanced Standing Program for International Dentists must demonstrate English-language proficiency by submitting either Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores. Competitive applicants should submit an Internet Based TOEFL (iBT) score of 100, with no less than 20 on each section, or an IELTS score of 7, with at least 6 on each band. Official scores must be received directly from the testing service and dated no earlier than two years (24 months) prior to the start of the student's intended first term at USC. For TOEFL, the institution code for USC is 4826 (no department code is required). To submit IELTS scores, please choose USC from the list of available institutions. Additional information about these exams can be found at ets.org for the TOEFL and at ielts.org for the IELTS. (5) A small group problem-based interview evaluation session with members of the School of Dentistry. (6) Two letters of recommendation from dental school faculty submitted with the CAAPID application. (7) A brief but accurate account of clinical experience and a personal statement submitted with the CAAPID application. (8) Documentary proof of license to practice from a Ministry of Health or proper governing body. (9) Satisfactory completion of and competence in the following academic and artistic entrance examinations to be given to invited applicants in October: (a) fixed prosthodontics (practical); (b) operative dentistry (practical), in addition, a separate written examination may be administered. (10) Complete official documents (transcripts) of all college and university course work, including dental education in the original language accompanied by certified English translation when necessary. (11) Certification of dental degree. Candidates chosen will be those who demonstrate the best qualifications in all academic and practical skills. (12) Submit a course-by-course World Education Services evaluation. (13) As a condition of enrollment, accepted students must undergo a background screening conducted by CertiFile Screening, Inc. to help ensure patient safety and compliance with state laws and regulations and all students must provide evidence of sound health and meet the school’s health requirements.

Student Visas

The I-20 Student Visa is issued to the applicant only after complete admission and acceptance has been granted. Before the papers can be processed, the applicant must present a copy of the 1-94 form (white sheet in the passport) and a notarized statement of financial support for tuition and expenses for one year ($120,000) to the Advanced Standing Program for International Dentists. These materials must be submitted at the time of application. The International Admission Office will issue the I-20 visa upon receipt and approval of these documents.

Financial Assistance

The United States government requires all international applicants to provide proof of ability to pay tuition and living expenses before a formal letter of admission or the forms needed to obtain a visa will be issued.

International students are not eligible to participate in U.S. federal financial aid programs. Please contact the Herman Ostrow School of Dentistry of USC Office of Financial Aid to discuss other financing options at (213) 740-2841, uscsdfa@usc.edu or visit usc.edu/admission/fa/loans/private.html.

Curriculum

Each candidate for the DDS degree should complete the course of instruction in two years, however, some individuals may need more time. The first four to eight months will be spent in preclinical courses to acquaint the student with the fundamental technical procedures used at USC. The balance will be used for clinical procedures related to diagnosis and treatment of patients.

Grade Point Average Standards

Since this is a short program and highly concentrated, a GPA of 2.0 (A = 4.0) must be maintained each trimester. Therefore, each applicant will be provisionally accepted. If a doctor is unable to maintain an average GPA of 2.0, he or she will be asked to resign.

Each trimester Advanced Standing Program for International Dentists students are evaluated by the student professional performance evaluation committee. From these meetings, recommendations are made regarding advancement, special programs and disqualification.

Graduation Requirements

In order to receive the Doctor of Dental Surgery (DDS) degree, students in the Advanced Standing Program for International Dentists must: (1) successfully complete all
the required courses and clinical patient care assigned in trimesters VI, VII, VIII, IX, X and XI of the Problem Based Learning DDS curriculum; (2) pass Part I and Part II of the National Dental Board Examinations; and (3) achieve all of the competencies defined for the DDS curriculum and complete all required clinical performance evaluations. All assessments of progress to degree completion will be equivalent for all students seeking the DDS degree.

In addition to meeting the academic requirements indicated above, students must have a completed administrative clearance form on file in the Office of Academic Affairs before a degree can be conferred. This administrative clearance indicates that the student has met financial and other obligations to the university and to the student's patients.

Advanced Programs in Dental Education

The Herman Ostrow School of Dentistry offers advanced dental education programs in dental hygiene, general dentistry, endodontics, general practice residency, operative dentistry, orofacial pain, oral medicine, oral and maxillofacial surgery, pediatric dentistry, periodontology and prosthodontics, all leading to a certificate. The Ostrow School of Dentistry in conjunction with the Graduate School also offers combined programs in operative dentistry and craniofacial biology, in orthodontics and craniofacial biology, in pediatric dentistry and craniofacial biology, and in periodontology and craniofacial biology leading to a Master of Science degree and a certificate. In conjunction with the Keck School of Medicine, the Herman Ostrow School of Dentistry offers a combined program leading to an M.D. degree and certificates in oral and maxillofacial surgery, orofacial pain, and oral medicine. The Herman Ostrow School of Dentistry also offers an online master’s degree in orofacial pain and oral medicine and geriatric dentistry. In addition to clinical seminars and clinical experience, students take basic science courses with advanced students from other departments.

The certificate curriculum consists of a core of basic science subjects plus clinical seminars and clinical experience. Elective subjects may also be selected by the student with the approval of the program director.

The estimated length of programs are as follows:

- Dental Hygiene, 16 months
- Endodontics, 24 months
- General Dentistry, 12 months
- General Practice Residency, 12 months
- Operative Dentistry, 24 months
- Oral and Maxillofacial Surgery, 48 months
- Oral and Maxillofacial Surgery/M.D., 72 months
- Orofacial Pain, 24 months
- Oral Medicine, 24 months
- Orofacial Pain and Oral Medicine (online), 36 months
- Orthodontics, 36 months
- Pediatric Dentistry, 24 or 36 months
- Periodontology, 36 months
- Prosthodontics, 36 months

All programs will begin in June (date to be determined).

Admission Requirements

Applicants must hold the Doctor of Dental Surgery or Doctor of Medical Dentistry degree (or equivalent degree if educated overseas) and must present the appropriate degrees, approved transcripts and affidavits as prescribed by the Office of Dental Admissions and Student Affairs.

Admission Procedures

Prospective students must apply through the Postdoctoral Application Support Service (PASS) at a.dea.org/dental_education_pathways/pass/Applicants/Pages/default.aspx. The ADEA PASS application requires the submission of an essay, one or more Professional Evaluations, one Personal Potential Index (PPI) evaluation, an Institution Evaluation from the dental school dean, and official dental school transcripts. The application cannot be processed until all required documents are submitted.

Applicants for the integrated M.D. degree/oral and maxillofacial surgery certificate program must apply through the American Medical College Application Service (AMCAS) at amcas.com.

For selection and admission to the operative/CBY, periodontics/CBY, orthodontics/CBY, and pediatrics/CBY dentistry programs, applicants are required to take the Aptitude Section of the Graduate Record Examinations; and submit competitive scores on both the quantitative and verbal sections of the examination. Likewise, all applicants for the pediatric dentistry program must take and submit competitive GRE scores. Information about this examination can be found at gre.org. The last acceptable test date is in September of the year preceding desired admission.

The following material is also required to complete the application: (1) payment of an $85 processing fee (graduates of foreign dental schools or students requiring a visa must submit a $145 processing fee) directly to the Herman Ostrow School of Dentistry Office of Admissions and Student Affairs; (2) applicants for General Dentistry, General Practice Residency, Orthodontic, Pediatric Dentistry and Oral Surgery programs must submit applicant agreement forms to the Postdoctoral Dental Matching Program. Information and forms can be obtained online at natmatch.com/dentres; (3) board scores Part I and Part II for all programs with the exception of the operative dentistry certificate and operative dentistry/CBY programs; MCATs are required for the Integrated M.D. degree/oral maxillofacial surgery certificate. GRE scores are required for operative dentistry/CBY, orthodontics, periodontics/CBY and pediatric/CBY programs. International students are required to take GREs for the two-year certificate program. These requirements may be waived at the discretion of the program director; (4) a biographical statement; (5) applicants may be asked to be available for an interview. If one is necessary, applicants will be contacted by the director of the individual advanced program; (6) applicants will be required to pay a non-refundable $1,500 tuition deposit upon notification of acceptance. (7) As a precondition to enrolment, accepted students must undergo a background screening conducted by Certiphi Screening, Inc. to help ensure patient safety and compliance with state laws and regulations and all students must provide evidence of sound health and meet the school’s health requirements.

Timetable for Applications

Applications for admission to advanced programs must be received as follows:

- Endodontics, Sept. 1
- General Practice Residency, Oct. 15
- Geriatric Dentistry (online graduate certificate), Jan. 31
- Geriatric Dentistry (online Master of Science), Jan. 31
- Master of Science in Dental Hygiene, Feb. 1
- Operative Dentistry, Nov. 1
- Oral and Maxillofacial Surgery, Oct. 1
- Orofacial Pain, Oct. 1
- Oral Medicine, Oct. 1
- Orofacial Pain and Oral Medicine (online Master of Science), Oct. 1
- Orthodontics, Oct. 1
- Pediatric Dentistry, Nov. 1
- Periodontology, Sept. 1
- Prosthodontics, Nov. 1

Completed applications and related information are reviewed first by the faculty of the department of interest. In selecting applicants for admission the faculty considers academic records and personal qualifications. Final approval for admission rests with the advanced education coordinating committee. Responsibility for advising the student after admission rests with the department chair.

Orientation

A departmental orientation session is usually held the first week of classes, beginning in late June. Incoming students are acquainted with the Herman Ostrow School of Dentistry, its policies, procedures, faculty and facilities.

Student Issue — Advanced Programs

Dental units in the school’s clinics are equipped with Midwest Company type tubing and couplers for low and high speed air hand pieces. Advanced students must provide their own adapters to fit the school’s couplers unless the students’ present hand pieces are already so modified. The Dental Bookstore will assist in such
Advanced Endodontics

The advanced endodontics curricular program is a 24-month course of study. This program provides students with background information and clinical experience necessary for a specialist in the practice of endodontics, and also offers activities in research and teacher-training for students interested in academic endodontics.

Students are prepared for certification examination by the American Board of Endodontists.

Emphasis is placed on the interaction of this specialty with other specialties and with general dentistry.

The program in endodontics is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education.

Advanced Operative Dentistry

The advanced program in operative dentistry offers a 24-month, 143-unit course culminating in a Certificate in Operative Dentistry or a combined 36-month, 162-unit program leading to a Certificate in Operative Dentistry and Master of Science in Craniofacial Biology.

The objective of the program is to produce skilled dental professionals with in-depth knowledge, technical and scientific background to become cutting-edge clinicians, professors and researchers. The program is structured to provide proficiency in scientific methodology and clinical expertise in mastering the most advanced techniques in preventive, operative, digital (CAD/CAM), esthetic, and adhesive dentistry.

The curriculum provides a solid foundation and proficiency in diagnosis, prognosis, prevention, treatment, restoration, management of developmental defects and discoloration, and rehabilitation of severely damaged dentition using a myriad of restorative techniques customized for the patient needs. Strong emphasis will be placed on meeting the patient’s biological, functional and esthetic wishes.

Research is an integral part of the program. A strong, clinically relevant and fundamental research component is provided for long-term evaluation of restorative techniques and materials. Residents must perform and complete original research projects. The program encourages the residents to present their research in renowned scientific meetings and to submit for publication. The residents of the combined operative dentistry certificate/Master of Science in craniofacial biology are required to defend a master’s thesis to fulfill the thesis requirements.

Additionally residents will gain teaching experience through assisting in the DDS teaching program. The experience gained in clinical dentistry, research and teaching will provide graduates the skills and the background needed to pursue academic careers.

Advanced Oral and Maxillofacial Surgery

The advanced education program in oral and maxillofacial surgery is a continuous 48-month course of study that prepares the graduate for the practice of oral and maxillofacial surgery. The program in oral surgery is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. The program also meets the requirements of the American Association of Oral and Maxillofacial Surgeons.

The program is conducted at the Herman Ostrow School of Dentistry and at the LAC-USC Medical Center. The course provides graduates with the necessary background for certification by the American Board of Oral and Maxillofacial Surgery. Certificates are awarded upon successful completion of the 48-month course.

Integrated M.D. Degree/Oral and Maxillofacial Surgery Certificate Program

The Herman Ostrow School of Dentistry of USC and the Keck School of Medicine of USC offer a continuous 72-month integrated course leading to a medical degree in addition to a certificate in oral and maxillofacial surgery that prepares the graduate for the practice of oral and maxillofacial surgery. The program is fully integrated and will include advanced placement into the established medical school curriculum.

During the first three years, the student will function in the capacity of a medical student as well as a resident in the oral and maxillofacial surgery program. After the completion of the medical school curriculum, the M.D. degree will be awarded. This is required before the student can continue in the general surgery internship portion of the program. At the completion of the surgical internship, the student is qualified for medical licensure. During the fourth through sixth year, all required rotations and surgical training will be completed to fulfill the educational requirements of the Commission on Dental Accreditation of the American Dental Association and the American Association of Oral and Maxillofacial Surgeons.

The program is conducted at the Schools of Dentistry and Medicine and at the LAC-USC Medical Center. The course of study provides the graduates with the necessary background for certification by the American Board of Oral and Maxillofacial Surgery. The oral and maxillofacial surgery certificates are awarded upon successful completion of the entire 72-month course.

Advanced Oral Medicine

The Herman Ostrow School of Dentistry’s 24-month, certificate residency program in advanced oral medicine trains one to two residents per year to be expert clinicians in oral medicine with an emphasis on orofacial pain. The program is fully accredited by the Commission on Dental Accreditation (CODA) of the American Dental Association (ADA). The certificate curriculum is designed with a series of didactic courses where students will gain knowledge about the diagnosis, pathobiology and treatment of various salivary, neurogenic, osseous, and odontogenic diseases, as well as diseases including bisphosphonate osteonecrosis, salivary gland disorders and dysfunction, pharmacologic-related and systemic disorders that cause oral disease. The courses and clinical experiences covered in the intensive two-year program are listed below.

Advanced Orofacial Pain

The Herman Ostrow School of Dentistry’s 24-month, certificate residency program in advanced orofacial pain trains one to two residents per year to be expert clinicians in orofacial pain with an emphasis on oral medicine. The program has received initial accreditation from the Commission on Dental Accreditation (CODA) of the American Dental Association (ADA). The certificate curriculum is designed with a series of didactic courses where students will gain knowledge about the diagnosis, pathobiology and treatment of different oral diseases in the field of orofacial pain. The field of orofacial pain encompasses masticatory musculoskeletal pain, neurogenic oral pain, sleep disturbances related to orofacial pain, temporomandibular disorders, bruxism, intraoral, extracranial, and systemic disorders that cause orofacial pain. The courses and clinical experiences covered in the intensive two-year program are listed below.

## Advanced Orofacial Pain and Oral Medicine

### Master of Science, Advanced Orofacial Pain and Oral Medicine

The Master of Science degree in orofacial pain and oral medicine program consists of a 36-month hybrid program (online and face-to-face) leading to a master’s degree in orofacial pain and oral medicine (OFOPM). The curriculum is designed to provide practicing dentists with advanced knowledge and training in the areas of orofacial pain and oral medicine including sleep medicine.

The program consists of a series of 14 online didactic courses where the students will gain knowledge about the underlying science as well as the diagnosis, pathobiology and treatment of different oral and maxillofacial diseases and disorders. In addition to these courses, the student will attend USC for two weeks each summer during the three-year period for an additional three face-to-face assessment courses where they will be tested for knowledge acquisition using a set of objective standardized clinical examinations, oral interviews and written examinations. They will also be required to prepare a final portfolio of cases and conduct present a research project report. During their visits to USC, the residents will gain experience diagnosing and treating patients in the USC OFOPM center.

During the year, the residents will attend weekly video conferences where online students are required to analyze, diagnose and prepare treatment plan cases that are posted for analysis. These cases will cover the following diseases: temporomandibular disorders; infectious, dysplastic, neoplastic proliferative, erosive and ulcerative oral and pharyngeal mucosal diseases. Students will also learn about and work with patients who have various salivary, neurogenic, osseous, and odontogenic infections, tumors and diseases including oral neoplastic diseases, oral spasticity, migraine, tension type and chronic daily headache and sleep apnea disorders.
Advanced Orthodontics

The advanced orthodontics certificate program is a 34-month course of study leading to a certificate in orthodontics and a Master of Science degree in craniofacial biology. The program in orthodontics is accredited by the Commission on Dental Accreditation of the American Dental Association, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. Upon completion of all requirements, the graduate is eligible for examination and certification by the American Board of Orthodontics.

The program has as its primary mission the preparation and training of residents for clinical practice in the specialty of orthodontics. This is achieved through a broad, in-depth curriculum designed to develop proficiency in clinical orthodontics with a solid foundation in fundamental and advanced biological and mechanical principles. Graduate-level courses in the basic sciences are the core didactic component of the program. Research is also an integral part of the program, and each resident must complete an original research project to fulfill a thesis requirement.

* Students will be re-enrolled in CBY 594 until completion of the thesis. Tuition will be charged in each trimester of enrollment beyond Summer Session II.

Advanced Pediatric Dentistry

The advanced pediatric dentistry certificate program is a 24-month course of study designed to provide students with the background information and clinical experience necessary for the practice of pediatric dentistry. The program in pediatric dentistry is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. The program also meets the educational requirements of the American Board of Pediatric Dentistry.

First-year studies emphasize advanced pediatric dentistry theory and clinical treatment of the “healthy” child. Students develop a sound basis in genetics, growth and development, nonpharmacologic and pharmacologic behavior management, physical evaluation, research methodology, statistics, interceptive orthodontics, prevention and a review of pediatric dental literature. Second-year studies concentrate on dental care of children with physical, medical, intellectual and emotional disabilities. The second year student serves as a hospital-based resident at Children’s Hospital Los Angeles, Long Beach Memorial Medical Center or Children’s Hospital of Orange County. Residents also rotate to Rancho Los Amigos National Rehabilitation Center. Students gain experience in performing operating room procedures, oral conscious sedation, participating on interdisciplinary teams, providing emergency treatment and treating children with medical disabilities and pathologies in the hospital environment.

In addition to the two-year program, opportunities are available to combine the basic certificate program with a master’s or doctoral degree in Craniofacial Biology (CBY). A Master’s in Craniofacial Biology and Advanced Pediatric Dentistry would submit a simultaneous application to the Herman Ostrow School of Dentistry and the Graduate School. See the Craniofacial Biology section of this catalogue for further information. The first year of the program would be spent in craniofacial biology and the second and third years spent in the pediatric dentistry program. After successful completion of the craniofacial biology program the student would be reviewed by the Pediatric Dentistry Admissions Committee and admitted into the certificate program. The student must satisfactorily complete the Master of Science program to be eligible for the Pediatric Dentistry Certificate.

Advanced Periodontology

The advanced periodontology program offers two options: (1) a 36-month, 183-unit course of study leading to a certificate in periodontology, or (2) a dual 36-month, 183-unit program leading to both a certificate and a Master of Science in Craniofacial Biology. The program in periodontology is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation, and the United States Department of Education. The program also meets the educational requirements of the American Board of Periodontology. Preparation for the certification process is an integral part of the curriculum, and all graduates are expected to become diplomates.

The curriculum provides a sound foundation in those basic sciences and medical subjects which are directly to clinical periodontics. Emphasis is placed on the interaction of periodontics with other specialties and
general dentistry. The central theme of the curriculum is that periodontology is the scientific basis to all of clinical dentistry.

The program is structured to produce skilled periodontists with the technical and scientific abilities to provide periodontal services to the community and to prepare students for teaching careers. This program also provides a portion of the requirements necessary for an advanced degree in a basic science.

A core oral biology curriculum combined with fundamentals of physical diagnosis, anatomy, pathology, microbiology, research interpretation and design, and pharmacology constitute the biological foundation upon which the advanced postdoctoral student builds his or her skills. The program provides knowledge and clinical expertise in all types of periodontal treatment required for the practice of oral health care including the placement and care of dental implants. Clinical experience in pharmacosadation and treatment of special care patients is available for those who are interested in these fields.

The program faculty believe that graduates should be dedicated to the concept of being a continuous student and should contribute to periodontics and to dentistry by practice, education, publication and/or research.

Advanced Prosthodontics

The program in advanced prosthodontics is a 36-month course of study designed to teach didactic and clinical skills leading to competency in the specialized practice of prosthodontics. The program provides a basic science foundation, incorporating studies in physical diagnosis, anatomy, oral pathology, pharmacology and oral biology. Proiciency in fixed, removable and implant prosthodontics will be developed during the course of study from a practical and didactic aspect. There is a strong emphasis on applying principles of esthetics toward oral reconstructions and implant prosthodontics. Periodontally compromised patients are frequently encountered, so the program is closely allied with the advanced program in periodontology. Treatment planning and integrated care with allied specialties is a strength of the program.

In addition to developing clinical skills, the program requires a research methodology course and a research project.

Clinical experience in implant placement and didactic study in maxillofacial prosthetics are offered: students who want more experience in clinical care may devote more time to treating these patients. The program in advanced prosthodontics is accredited by the Commission on Dental Accreditation, a special accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. The program also meets the requirements of the American Board of Prosthodontics. A certificate is awarded upon successful completion of the program.

General Practice Residency

The general practice residency program is a 12-month, full-time residency program designed in conformance with the guidelines of the Council on Dental Education and the Commission on Dental Accreditation of the American Dental Association. The program is structured to increase diagnostic acumen, general knowledge and clinical ability in dentistry.

The program is conducted primarily at the Los Angeles County-USC Medical Center, one of the nation’s largest
teaching hospitals, and at the Veterans Administration Los Angeles Ambulatory Care facility in downtown Los Angeles. Some of the training is also conducted at Rancho Los Amigos Medical Center, West L.A. Veterans Administration Hospital, the Herman Ostrow School of Dentistry of USC and other community facilities.

Under supervision of the faculties of the Herman Ostrow School of Dentistry of USC, the Greater Los Angeles V.A. and the Keck School of Medicine of USC, the residents rotate through oral surgery, emergency medicine, anesthesia, operating room dentistry, care for the handicapped and other disciplines. Approximately 80 percent of the resident’s time is devoted to delivery of oral health care and its management to the medically compromised patient.

The program emphasizes the treatment of a wide range of oral health disorders, medical considerations related to dental care, the ability to treat medically compromised and handicapped patients and teaches how to provide dental care in a hospital environment interacting with health care providers of various disciplines. Inherent in the year of training, a philosophy of practice addresses the medical psychosocial and oral health care needs of the patient.

Along with patient treatment, the residents are required to take courses in physical evaluation and anesthesia, endodontics, periodontics, dental implants, dental technology, maxillofacial prosthetics, oral pathology and practice management. The residents are also required to present patient cases to the faculty.

Residents receive a monthly stipend during their training program and are granted a certificate upon satisfactory completion of the program.

The program in general practice is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education.

Graduate Degrees

Craniofacial Biology

Director: Michael L. Paine, BDS, Ph.D.

Faculty

Professors: Yang Chai, DDS, Ph.D.; Casey Chen, DDS, Ph.D.; Cheng-Ming Choung, M.D., Ph.D. (Medicine); Glenn Clark, DDS, Ph.D.; Paul Denny, Ph.D.; Tina Jaskoll, Ph.D.; Michael Melnick, DDS, Ph.D.; Cedric Minkin, Ph.D.; Mahwash Navazesh, DMDS; Janet Moradian-Oldak, Ph.D.; Michael Paine, BDS, Ph.D.; Pragna Patel, Ph.D.; Michael Schneir, Ph.D.; Songtao Shi, DDS, Ph.D.; Jorgen Slots, DDS, Ph.D.; Mark Solini, Sneed, DDS, Ph.D.; David Warrburton, M.D. (Medicine)

Associate Professors: Winston Chee, DDS; George Cho, DDS; Roger De Filippis, M.D. (Medicine); Kian Kar, DDS, MS; Robert Keim, DDS, Ph.D.; Saravanam Ram, DDS; Glenn Sameshima, DDS, Ph.D.; Wei Shi, MD, Ph.D. (Medicine); Arnold Tiber, DDS, Ph.D.; Stephen Yen, OMD, Ph.D.; Honayoun Zadeh, DDS, Ph.D.

Assistant Professors: Ruchi Bajpai, M.S., Ph.D.; Ahmed El-Hashash, Ph.D.; Denise Al-Alma, Ph.D.; Reyes Enciso, Ph.D.; Mark Frey, Ph.D. (Medicine); Dan Grauer, DDS, Ph.D.; Ching-Ling Lien, Ph.D., (Medicine); Amy Merrill-Brugger, Ph.D.; Ramiro Murata, DDS, Ph.D.; Laura Perin, Ph.D., (Medicine); Parish P. Seligfahzadeh, M.S., DDS; Mark Urata, M.D., DDS; Yan Zhou, Ph.D.

Craniofacial biology is concerned with the evolution, growth, structure and function of oral tissues and the oral region; and with the etiology and pathogenesis of numerous diseases and malformations. These involve studies at various levels of biological organization, from the molecular and subcellular to the organismic. Craniofacial biology comprises a large, rapidly increasing body of knowledge that has both clinical and academic importance. The objective of the program is primarily, but not exclusively, to prepare health science graduates for entry into careers in academic environments as clinical scholars or as members of multidisciplinary teams of health professionals in academic centers of clinical and basic health science research.

Admission Requirements

The graduate program in craniofacial biology offers academic graduate training to individuals with a Doctor of Dental Surgery, Medical Doctor or equivalent degree. Applicants with Bachelor of Science degrees in areas such as biology and chemistry are also encouraged to apply.

Applications

Formal application to the USC Office of Graduate Admission and the graduate program in craniofacial biology is required for Master of Science and Doctor of Philosophy objectives. All postgraduate transcripts are required and must be forwarded to the Office of Graduate Admission for application to either Master of Science or Doctor of Philosophy objectives. An undergraduate grade point average (GPA) of 3.0 or better, a verbal score of 153 or better, and quantitative score of 144 or better on the Graduate Record Examinations general test are required. Three letters of recommendation describing academic abilities and personal attributes must be submitted on behalf of the applicant. Personal interviews may be required.

Master of Science in Craniofacial Biology

This degree is under the jurisdiction of the Graduate School. Students should also refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School. The Master of Science degree in craniofacial biology offers the clinician (DDS, M.D. or equivalent) the opportunity to obtain clinical research knowledge and skills in the area of craniofacial biology. Such training will include research into the causes of craniofacial diseases and anomalies, as well as normal development and function. The course of study is particularly directed toward those clinicians committed to pursuing a career in research and teaching.

Degree Requirements

A total of 32 units is required that includes eight courses in craniofacial biology, four units of 5934 Thesis and necessary units of 593 Thesis Research. All students must achieve a 3.0 grade point average in the craniofacial biology courses. Four core courses in craniofacial biology are required for all students: CBY 574, CBY 575, CBY 576, CBY 579L, CBY 585, CBY 588, CBY 672, CBY 673, CBY 674. The credit received for these classes may be applied toward either the M.S. or Ph.D. in Craniofacial Biology should the student decide later to pursue an advanced degree.

Admissions Criteria

Only residents enrolled in advanced dental education and specialty programs will be eligible for the completion of the Certificate in Craniofacial Biology. Residents accepted into the following programs will be eligible: General Practice Residency, Endodontics, Orofacial Pain/Oral Medicine, Oral and Maxillofacial Surgery, Orthodontics, Pediatric Dentistry, Periodontology, Prosthodontics. These residents must complete all the requirements for admission to the dental advanced education programs and have been accepted to these programs by the criteria established by the advanced dental education program faculty.

Doctor of Philosophy in Craniofacial Biology

The Doctor of Philosophy degree in craniofacial biology is awarded under the jurisdiction of the Graduate School. Students should also refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School. This program is designed to provide health science-oriented training for the professional with interests in academic, as well as clinical, aspects of craniofacial biology.

New Student Orientation Committee

All new students seeking Master of Science and/or Doctor of Philosophy degree objectives will be assigned to an orientation committee. This committee will function to advise and guide new students through their first semester. Thereafter, each student will identify a mentor and assemble a qualifying exam committee.

Qualifying Exam Committee

During the second semester of each graduate student should take a qualifying exam committee. The qualifying exam committee must include five faculty members who will be of assistance in the student’s education. The student’s mentor will serve as chair of the qualifying exam committee. One committee member must be a USC faculty member from outside the program. The
Defence of the Dissertation

An oral examination on a rough or final copy of the dissertation is conducted within one month following submission of the manuscript to the committee.

Master of Science in Geriatric Dentistry

The Master of Science in Geriatric Dentistry online program consists of a 36-credit program leading to a master's degree in geriatric dentistry. The curriculum is designed to prepare students to work in the area of geriatric dentistry. The program consists of a series of didactic courses where the students will gain in-depth knowledge about older adults from a variety of perspectives that will include learning about the aging process and how it affects and is affected by social, behavioral and health factors commonly seen with aging. The program will focus on the most common medical and oral health conditions seen in older adults and their treatments, as well as cognitive changes, mental disorders, and social factors that will impact and thus require adjustments to oral health care delivery.

There are seven required courses (6 online and one residential) and no electives. As part of the required curriculum, all students will attend USC for a two-week period during the summer trimester following completion of the didactic courses for a knowledge assessment course (GDEN 716). This course will consist of reviews, practical demonstrations and assessment activities.

Master of Science in Dental Hygiene

The Master of Science in Dental Hygiene is designed as a 16-month full-time program, but can be taken as a part-time program. The program is designed to train graduate dental hygiene students to become leaders in the field who will help to advance the art and science of the discipline of dental hygiene. Students will learn how to integrate research findings into the dental hygiene process of care to form strategies to decrease oral disease risks and promote oral health among individuals, families and communities. The first three trimesters are devoted to work that progressively leads to the formation and acceptance of a project plan for implementation in the field in the final trimester. All students will complete 26 units of required core course work, plus four additional units of elective studies in an area of emphasis, which support their interests and future career plans. Emphasis areas include education, geriatric dentistry and pediatric dentistry. Courses in education will be offered through the Department of Dental Hygiene, while electives in geriatric dentistry and pediatric dentistry will be offered through existing graduate programs at the Herman Ostrow School of Dentistry. Students will learn program planning, advanced research methodology and statistical data management, and apply these skills into the design and implementation of their project as the basis for their scholarly capstone project. Students will demonstrate active learning through interactive classes, peer teaching, and the design and use of educational technology. Courses include traditional lecture, case studies, and student written and oral presentations.

Admission Requirements

All applicants to the Master of Science in Dental Hygiene program must satisfy the following general criteria:

- Successfully graduated from an accredited dental hygiene program in North America.
- Possess a baccalaureate degree in dental hygiene or related area from an accredited university.
- Minimum GPA: 3.0
- Scores for the Graduate Record Examinations (GRE);
- Submit three letters of recommendation: one from the undergraduate dental hygiene director and the other two from individuals who can attest to general character. These letters may be from professors, and/or an employer, a representative from a service...
Degree Requirements

Completion of the degree requires satisfactory completion of a minimum of 30 credits of course work at the 500 level or above including a capstone project, which consists of a comprehensive written scholarly report suitable for publication and a defended oral presentation.

A minimum grade point average of 3.0 on all graduate work is required.

Progressive Degree Program

Applicants for a progressive degree program must have completed 64 units of course work applicable to their undergraduate degree since graduating from high school. (AP units, IB units and course work taken prior to high school graduation are excluded.) Applicants must submit their application before completing 96 units of course work. Normally, the application is submitted in the fall semester of the third year of enrollment at USC. Applicants do not have to submit GRE scores but are expected to have at least a 3.0 GPA at the time of application. The application for admission to a progressive master’s program must be approved by the deans of the bachelor’s and the master’s degree-granting schools at USC and submitted to the Degree Progress Department. An approved course plan proposal and letters of recommendation from two USC faculty members must be submitted with the application, with at least one of the recommendations coming from a faculty member in the student’s bachelor’s degree major department.

Continuing Education

The Office of Continuing Education provides education courses, participation programs and national and international symposia in many areas of the dental profession. These educational activities are designed to offer updated and innovative concepts to dentists, dental hygienists, dental technicians and auxiliary personnel, and to provide the dental community with the opportunity for lifelong learning from outstanding scholars. In addition, the courses fulfill continuing education requirements of the California Board of Dental Examiners for relicensure of dentists and auxiliaries. The Herman Ostrow School of Dentistry of USC is a recognized American Dental Association (ADA) and a Continuing Education Recognition Program (CERP) provider.

Courses are given at regular intervals in the various subjects of dentistry: oral health, dental esthetics, oral medicine, physical diagnosis, dental materials, dental laboratory techniques, dental management, endodontics, periodontics, implants, oral surgery, restorative dentistry, fixed and removable prosthodontics, instrumentation, occlusion, oral pathology, dental hygiene, dental auxiliary education, patient education, pharmacology, principles of dental practice, radiology, sedation and emergencies.

Information on schedules of classes may be obtained by writing to: Herman Ostrow School of Dentistry of USC, Office of Continuing Education, Room 201J, University Park, Los Angeles, CA 90089-0915, (213) 821-2177, FAX: (213) 740-3373, email: cedental@usc.edu or refer to the school’s Website at uscdentalce.org.

Courses of Instruction

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

Courses:

- Dentistry (DENT)
- Advanced Dental Education Conjoint Program (ADNT)
- Anatomy (ANAT)
- Anesthesia and Medicine (AMED)
- Biochemistry (DBIO)
- Craniofacial Biology (CBY)
- Community Dentistry (CMDT)
- Dental Hygiene (DHYG)
- Oral Diagnosis and Radiology (DIAG)
- Dental Materials (DMAT)
- Dental Problem Based Learning (DPBL)
- Endodontics (ENDO)
- Fixed Prosthodontics (FPRO)
- Geriatric and Special Patient Dentistry (GSPD)
- Geriatric Dentistry (GDEN)
- Histology (DHIS)
- Human Behavior (HBHV)
- Interdisciplinary — Basic Sciences (NINT)
- Interdisciplinary — Developmental Dentistry (INDD)
- Interdisciplinary — Practice Dynamics (INTP)
- Interdisciplinary — Restorative Dentistry (INTR)
- Interdisciplinary — Surgical Sciences (INTS)
Interdisciplinary — Diagnostic Sciences (INTX)
Microbiology and Immunology (MBIO)
Occlusion (OCCI)
Oral Medicine Oral Diagnosis (OMOD)
Operative Dentistry (OPER)
Orthodontics (ORTH)
Pathology (PTHL)
Pediatric Dentistry (PEDO)
Periodontics (PERI)
Pharmacology (DFHR)
Restorative Dentistry (REST)
Removable Prosthodontics (RPRO)
Oral Surgery (SURG)

Dentistry (DENT)
DENT 221 Introduction to Dentistry (1) History and current role of dental science in the health services field; review of research; overview of dental procedures with laboratory experience and observation.
DENT 405 Formal Science-Writing (s) A scientist-taught, lecture-workshop-tutorial format for developing skills in formal science-writing (e.g., abstracts, journal articles, grants). Not open to students in the School of Dentistry. Prerequisite: upper division standing in science and preprofessional majors.
DENT 412 Fundamentals of Craniofacial and Dental Technology (3, 5p) Biomedical engineering and technology applied to oral health professions. Dental biomaterials, CAD-CAM, digital dental technology and tissue engineering applications to craniofacial diseases, disorders, and enhancements. Junior standing. (Duplicates credit in former BME 412.)

Advanced Dental Education Conjoint Program (ADNT)
ADNT 710 Internship: Dental Education (1-5) Practical experience teaching predoctoral students. Units and hours variable.

Anatomy (ANAT)
ANAT 321 Head and Neck Anatomy (2) Anatomy of the head and neck with lecture and laboratory demonstration for dental hygienists.
ANAT 501 Functional Neuroanatomy-Neurophysiology (3) Structure and function of the human nervous system. Includes participation in neurology clinics at LAC-USC Medical Center.
ANAT 521 Head and Neck Anatomy (2, Fa) Detailed morphology of the head and neck emphasizing considerations applicable to dentistry; morphology of the thorax; osteology of the skull.
ANAT 532 Systemic Human Anatomy (3) Structure and function of the human body; organ systems and morphology of the abdomen and pelvis; axilla and arm; osteology of the skull.
ANAT 533 Head and Neck Dissection (1) Laboratory experience in dissection of the structures of the human head and neck with emphasis on the osteology and morphology of the face.
ANAT 701 Advanced Head and Neck Anatomy (1) Detailed study of structure and function of the orofacial region including recent research and advances in dentistry.
ANAT 722 Advanced Head and Neck Anatomy Laboratory (1) Dissection of the head and neck with emphasis on the osteology and morphology of the face. Prerequisite: ANAT 701 enrollment.

Anesthesia and Medicine (AMED)
AMED 421 Seminar: Teaching Local Anesthesia (1) Techniques of teaching local anesthesia to dental hygiene students.
AMED 502 Emergency Medicine (2) Recognition and management of life-threatening emergencies, including unconsciousness, altered consciousness, respiratory distress, convulsions, drug-related emergencies, and chest pain.
AMED 523 Pharmacosedation II (1) Introduction to intravenous sedation; evaluation of patient, selection of technique and procedure; prevention of complications, recognition and management of complications; introduction to general anesthesia.
AMED 534 Pain and Anxiety Control (2, 5p) Theory and techniques for pain control, anxiety includes: local anesthetics; drugs, adjunctive premedication, techniques in oral, rectal, intramuscular, inhalation sedation, prevention, management of complications. (Duplicates credit in the former AMED 531 and AMED 532.)
AMED 610 Physical Diagnosis/Cardiology (1) Participation in the Cardiac Clinic at LAC-USC Medical Center; experience in cardiac auscultation, abnormal breath sounds, use of cardiac drugs, and prosthetic valve management.
AMED 750abc Physical Evaluation and Anesthesia (2-3-1) In-depth examination of physical evaluation, emergency medicine, basic life support, inhalation sedation, intravenous sedation, local anesthesia, and patient monitoring; includes clinical experience.

Biochemistry (DBIO)
DBIO 310 Oral Biochemistry (2, Fa) Biochemical insight into oral tissues and saliva — emphasizing antimicrobial protection (systemic and therapeutic) and anti-inflammatory mechanisms.
DBIO 501 Biochemistry and Molecular Biology (2) Biochemical properties of carbohydrates, lipids, amino acids, proteins, and nucleic acids — emphasizing molecular structure-function interrelatedness, integrated metabolism, and molecular biology of the cell.

Craniofacial Biology (CBY)
CBY 561 Molecular Biology (4, Fa) (Enroll in INTD 561)
CBY 564 Biochemistry (4, Fa) (Enroll in INTD 571)
CBY 572 Molecular Embryology (4) Principles of developmental biology; emphasis on molecular genetics and cell and molecular mechanisms of tissue interaction and morphodifferentiation.
CBY 574 Statistical Methods in Bioexperimentation (3) Experimental design and analysis as applied to all levels of biologic organization; hypothesis construction; probability; univariate and multivariate analysis; statistical epidemiology.
CBY 575 Biological Basis of Oral-facial Disease (2, FaSpSm) Cell and molecular biology of oral tissues in disease; emphasis on immunopathology. (Duplicates credit in former CBY 575a.)
CBY 576 Biochemical Aspects of Periodontal Disease (2, FaSpSm) Cell and molecular biology of oral tissues in disease; emphasis on molecular oral pathology. (Duplicates credit in former CBY 575b.)
CBY 578 Pathological Conditions of the Craniofacial Complex (3, FaSpSm) Acquired and inherited, systemic and local disease resulting in clinical craniofacial morbidity: cellular and molecular expression as related to etiology, diagnosis, treatment, and prognosis.
CBY 579I Craniofacial Molecular Genetics (4) Principles and methodologies of mammalian molecular genetics; laboratory exercises applied to pre- and postnatal craniofacial growth and development.
CBY 580ab Seminars in Craniofacial Biology (2-3) Seminars presented by recognized researchers in the various disciplines relating to craniofacial biology; selected readings in preparation for discussion. Graded CR/NC.
CBY 581 Laboratory Methods (3) Contemporary methods of laboratory analysis, including theoretical and practical exposure to procedures and equipment in the research laboratory.
CBY 583 Craniofacial Clinical Genetics (4) Principles of human genetics; clinically oriented normal and abnormal human embryology; diagnosis and natural history of human craniofacial birth defects; genetic counseling and bioethics.
CBY 585 Systematic Research Writing (3, FaSpSm) Enhancement of critical research thinking by fulfilling anticipated conceptual components of the journal article;
perfection of writing skills by correcting inter- and intrasentence flaws.

CBY 586x Scientific Writing Practicum (3) Development of writing skill while completing a discipline-required project (proposal, dissertation, journal article). Seminar and tutorial format. Not for graduate credit. Prerequisite: CBY 585 or DENT 402.

CBY 597 Cell and Molecular Biology of Craniofacial Tissues (3) Contemporary cell and molecular biology as applied to the development, structure, and function of craniofacial tissues.

CBY 590 Directed Research (1-12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

CBY 594abc Master’s Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

CBY 599 Special Topics (2-4, max 8) Seminars on craniofacial biology in subject areas of special interest to faculty and students.

CBY 671 Epistemology and Ethos of Bioscience (3) Classical and contemporary thought on knowledge acquisition, truth, and method as applied to bioscience; characteristic spirit, beliefs, and moral assumptions of biologists in modern history.

CBY 672 Advances in Development and Differentiation (3) Integration of recent advances in cell and molecular developmental biology into classical and emerging thematic frameworks.

CBY 673 Biomimeralization (3) Fundamental principles and mechanisms of matrix mediated biomimeralization in model systems from bacteria to humans.

CBY 674 Advanced Oral Microbiology (2) Cell and molecular aspects of microbiology as applied to oral infections: microbial physiology and genetics; oral microbial ecology; host resistance factors in oral infections.

CBY 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Community Dentistry (CMDT)

CMDT 501 Introduction to Community Dentistry Programs (1) Lectures and practical field experiences introducing the role of the dentist in a variety of organized public health programs.

CMDT 502ab Contemporary Dental Practice (2-2) Economic, legal, and professional aspects of dental practice; alternative careers in dentistry.

CMDT 507abc Ethical Issues in the Practice of Dentistry (0-0-0) Examination of the major ethical issues in the current practice of dentistry; study of effective and proper methods of addressing the issues.

CMDT 601 Mobile Clinic (1) Clinic experience in provision of dental care for children of low income agricultural workers through use of mobile dental clinic on location.

CMDT 603 Multiphasic Experiences in Extramural Dentistry (1) Community responsibilities of dentists in a dynamic society. Practical experiences include consultations and visitations to private offices, group practices, hospitals, and neighborhood health clinics.

CMDT 606 Business Principles in Dentistry (2) Overview of basic business administration principles, including economics, accounting, marketing, finance, entrepreneurship, and strategic planning as relevant to the practice of dentistry.

Dental Hygiene (DHYG)

DHYG 311ab Fundamentals of Clinical Dental Hygiene Practice (3-3) Principles and techniques of clinical dental hygiene with emphasis on preventive dentistry; laboratory and preclinical experience in techniques of complete oral prophylaxis services; and clinical application thereof.

DHYG 3141 Dental Morphology Laboratory (1) Fundamentals of tooth morphology and characteristics of the deciduous and permanent dentition. Laboratory, 3 hours.

DHYG 316 Patient Education in Preventive Dental Care (1) Principles and methods for teaching and motivating patients to practice effective oral care.

DHYG 318 Dental Specialties (3) Procedures performed in selected dental specialty areas with emphasis on the role of the dental hygienist.

DHYG 320 Preventive Dental Therapy (2, 5p) Study of etiology, risk factors and preventive management of periodontal disease and dental caries. Setting up community and individual preventive oral health care programs.

DHYG 401 Introduction to Advanced Dental Hygiene (3) Principles and techniques of advanced dental hygiene with emphasis on advanced root instrumentation and dental hygiene treatment planning.

DHYG 410abc Clinic: Dental Hygiene (2-7 each) Application of advanced techniques with emphasis on increased proficiency in skills: principles of prevention; periodontal examination; root planing; soft tissue curettage; local anesthesia; inhalation sedation.

DHYG 411ab Dental Literature Review (2-2) Seminar-discussion and analysis of current dental literature in selected topics related to dental hygiene practice.

DHYG 412 Preventive Dental Care Programs (1) Methods for development and implementation of programs involved with the delivery of preventive dental care.

DHYG 413ab Dental Hygiene Educational Concepts (2-2) Educational concepts for development of dental hygiene curriculum, including teaching and learning strategies, curriculum design, course development and evaluation methods.

DHYG 414ab Advanced Dental Hygiene (2-2) Advanced dental hygiene techniques: treatment, referral and maintenance of the advanced periodontist patient emphasizing treatment planning and patient management.

DHYG 415ab Directed Clinical Teaching (2-2) Experience in clinical teaching with supervision and evaluation of undergraduate dental hygiene and doctoral dental students engaging in patient care.

DHYG 417 Issues in Dental Health Care Delivery (1) Study of current trends in public health care delivery, manpower, finance mechanisms, and quality assurance.

DHYG 422 Essentials of Dental Hygiene Practice (1) A review of the moral, legal, and ethical responsibilities of the dental hygienist. Other topics: securing a position, dental economics, taxes, insurance, and human relationships in the dental office. Lecture, 1 hour.

DHYG 424abcd Research Methods (1-1) Critical evaluation of scientific literature; techniques of writing and coordinating scientific information for research papers; techniques for preparation of scientific table clinics. Graded IP.

DHYG 430 Seminar: Initial Periodontal Therapy (2) Presentation of selected clinical cases with documentation of clinical findings, diagnosis, treatment planning, and therapy.

DHYG 431 Seminar: Periodontal Treatment Planning (2) Periodontal treatment planning; case presentations of uncomplicated periodontitis progressing to complex treatment involving multidisciplinary approach.

DHYG 460abcd Clinic: Advanced Dental Hygiene (2-2-1) Clinical experience in advanced dental hygiene; preventive and therapeutic skills with emphasis on advanced periodontal instrumentation and expanded functions for the registered dental hygienist.

DHYG 502 Dental Hygiene Seminar I (3, Fa) Ethical principles guiding research and practice in the health care setting, with an emphasis on the rights and protection of human subjects. Concurrent enrollment: DHYG 501.

DHYG 504 Dental Hygiene Theory and Science II (3, Sp) Issues related to oral health promotion and disease prevention, and health services research. Includes epidemiology, health disparities, quality assurance, literacy and cultural competency. Concurrent enrollment: DHYG 505.

DHYG 505 Dental Hygiene Seminar II (1, Sp) Design of community health programs and health research. Includes project and study design, and applying methodological and statistical knowledge to project development. Concurrent enrollment: DHYG 504.

DHYG 506 Dental Hygiene Theory and Science III (3, Fa) Process and fundamentals of research protocol design and statistical methods. Includes research design and methods, scientific database searching and evidence-based resources.

DHYG 507 Dental Hygiene Theory and Science III (2-2, 5m) Analysis of disease diagnoses, medical complications, pharmacologic interventions and therapeutic treatment modalities associated with a variety of system diseases. Concurrent enrollment: DHYG 508.

DHYG 508 Dental Hygiene Seminar III (1, 5m) Strategies for project data management and analysis, and dissemination of scholarly information through journal publications and oral and poster scientific presentations. Concurrent enrollment: DHYG 507.

DHYG 510 Capstone Project (4, Fa) Students will complete independent field work to implement planned scholarly activities in their professional area of interest, culminating in a written paper and an oral defense.

DHYG 511 Classroom and Clinical Instruction Design (2, 5p) Apply teaching and learning theories to the development of educational interventions to teach clinical dental hygiene skills in both clinical and laboratory classroom settings.

DHYG 512 Student Teaching (2, 5m) Applied study of dental hygiene education, with practical experience teaching in the classroom and laboratory settings, and
teaching in the dental hygiene clinic. Prerequisite: DHYG 517.

Oral Diagnosis and Radiology (DIAG)

DIAG 415 Radiographic Techniques (1) Clinical application of radiographic chairside and darkroom techniques and quality control.

DIAG 531 Principles of Oral Radiology (3) Introduction to ionizing radiation and its use in the health professions; radiation biology, physics and hygiene; descriptive terms used in radiography, with illustrations; documentation.

DIAG 532 Radiographic Techniques (1) Clinical applications of radiographic chairside and darkroom techniques; quality control and evaluation of the radiograph.

DIAG 533 Oral Maxillofacial Imaging (2, 5M) Clinical application of intraoral and extraoral radiographic techniques; emphasis upon radiation physics, biology, safety, film and digital imaging and image interpretation.

DIAG 615 Digital and Oral Maxillofacial Imaging (2-4, FaSp) Introduction to computer based imaging in dentistry. Student will learn to use video cameras, scanners, intraoral sensors and advanced imaging technology, Open to dentistry and dental hygiene majors only. Prerequisite: DIAG 531, DIAG 532.

DIAG 621 CAD/CAM in Dentistry (1) Modern principles of dental Computer Assisted Design/Computer Assisted Manufacturing and will fabricate such restorations in the laboratory.

Dental Materials (DMAT)

DMAT 316L Dental Materials and Clinical Procedures (2) Biomechanical principles, properties, and manipulation of dental materials; armamentarium for various dental procedures.

DMAT 505 Dental Materials Update (1) Biocompatibility of dental materials, restorative materials and techniques update, critical analysis of published literature. Includes specific laboratory testing research methodology and design of clinical trials.

DMAT 521b Dental Materials (2-3) Properties, biomechanical function, manipulation, and clinical application of dental materials. Correlates restorative, biological, and materials sciences.

DMAT 701 Advanced Biomaterials (2) Fundamental principles of materials science and clinical dentistry relative to proper selection and manipulation of dental materials.

Dental Problem Based Learning (DPBL)

DPBL 501abc Dental Problem Based Learning – Human Structure I (1-3-3, FaSpSm) Problem based learning presentation of normal and abnormal structures including anatomy, cell biology, embryology, histology, pathology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. Acceptance to DDS program required.

DPBL 502abc Dental Problem Based Learning – Human Structure II (1-2-2, FaSpSm) Problem based learning presentation of normal and abnormal structures including anatomy, cell biology, embryology, histology, pathology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. Acceptance to DDS program required.

DPBL 504abc Dental Problem Based Learning – Human Structure III (1-4-4, FaSpSm) Problem based learning approach to the delivery of dental health care. Didactic, preclinical and clinical principles of endodontics, geriatrics, oral diagnosis, oral pathology, oral radiology, oral surgery, orthodontics, pediatric dentistry, periodontics, prosthodontics and restorative dentistry will be presented with a direct relationship to a well-characterized human clinical case. Acceptance to DDS program required.

DPBL 511abc Dental Problem Based Learning – Human Structure I (2-2-2, FaSpSm) Problem based learning presentation of normal and abnormal structures including anatomy, cell biology, embryology, histology, pathology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. Prerequisite: DPBL 502c.

DPBL 512abc Dental Problem Based Learning – Human Structure II (2-5-5, FaSpSm) Problem based learning presentation of normal and abnormal structures including chemistry, endocrinology, genetics, immunology, microbiology, nutrition, pharmacology, physiology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. Prerequisite: DPBL 502c.

DPBL 513abc Dental Problem Based Learning – Human Structure III (2-5-5, FaSpSm) Problem based learning presentation of normal and abnormal structures including chemistry, endocrinology, genetics, immunology, microbiology, nutrition, pharmacology, physiology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. Prerequisite: DPBL 502c.

DPBL 514abc Dental Problem Based Learning – Human Clinical Dentistry I (7-7-8, FaSpSm) Problem based learning approach to the delivery of dental health care. Didactic, preclinical and clinical principles of endodontics, geriatrics, oral diagnosis, oral pathology, oral radiology, oral surgery, orthodontics, pediatric dentistry, periodontics, prosthodontics and restorative dentistry will be presented with a direct relationship to a well-characterized human clinical case. Prerequisite: DPBL 502c.

DPBL 515abc Dental Problem Based Learning – Human Clinical Dentistry III (11-11, FaSpSm) Problem based learning presentation of normal and abnormal behavior including communication, ethics, multiculturalism, patient management, phobias associated with treatment of patients with and without special needs. All material discussed with direct relationship to a well-characterized human clinical case. Prerequisite: DPBL 512c.

DPBL 516abc Dental Problem Based Learning – Human Clinical Dentistry III (11-11, FaSpSm) Problem based learning approach to the delivery of dental health care. Didactic, preclinical and clinical principles of endodontics, geriatrics, oral diagnosis, oral pathology, oral radiology, oral surgery, orthodontics, pediatric dentistry, periodontics, prosthodontics and restorative dentistry will be presented with a direct relationship to a well-characterized human clinical case. Prerequisite: DPBL 502c.

DPBL 517abc Dental Problem Based Learning – Human Clinical Dentistry IV (13-13, FaSpSm) Problem based learning approach to the delivery of dental health care. Didactic, preclinical and clinical principles of endodontics, geriatrics, oral diagnosis, oral pathology, oral radiology, oral surgery, orthodontics, pediatric dentistry, periodontics, prosthodontics and restorative dentistry will be presented with a direct relationship to a well-characterized human clinical case. Prerequisite: DPBL 502c.

Endodontics (ENDO)

ENDO 501 Clinical Endodontics (1) Diagnosis and treatment procedures for basic clinical endodontics, including management of endodontic emergencies; relationship of endodontics to the various dental disciplines.

ENDO 502 Advanced Endodontics (1) Theoretical principles for the treatment of advanced endodontic cases; alternative methods of endodontic therapy; introduction to intersepsis mysteries.

ENDO 521 Preclinical Endodontics (3) Theoretical principles of endodontic therapy related to pulpal and
periapical disease; training in procedures of localizing, preparing, and filling the root canal of human teeth.

ENDO 562abdc Clinic: Concentrated Early Endodontics (0-0-0-1) Early clinical experience including assigned clinic demonstration block.

ENDO 563ab Clinic: Endodontic Therapy (0-2) Clinical experience emphasizing diagnosis, treatment planning, and endodontic patient management.

ENDO 610 Clinical Advanced Endodontics (2) In-depth discussion of endodontic surgery, retreatment, and hemisection cases; includes clinical experience in advanced endodontic cases.

ENDO 701abcd Seminar: Biological Basis of Endodontic Therapy (1-1-1-3) Investigation of the theoretical and biological bases of clinical endodontic procedures.

ENDO 702 Seminar: Advanced Clinical Endodontics (5) Course designed to train students in the management of simple and complex endodontic cases.

ENDO 702abcd Seminar: Review of Endodontic Literature (1-1-1-1) Critical review and analysis of classical and current endodontic literature.

ENDO 704ab Seminar: Surgical Endodontics (2-2) Indications, principles, and techniques of surgical endodontics.

ENDO 705ab Seminar: Endodontic Case Presentation (4-4) Student presentation of cases for critique and analysis.

ENDO 711 Alternatives in Endodontics (4) Alternative endodontic techniques presented by guest clinicians. Emphasis on endodontics and its relationship with periodontal, restorative, and surgical disciplines.

ENDO 761abcd Clinic: Advanced Endodontics (1-9 each) Advanced clinical experience emphasizing the diagnosis and management of complicated endodontic cases.

ENDO 790 Directed Research: Endodontics (1-12) Principles of planning, organizing, and executing a clinical or educational research project. Graded CR/NC.

Fixed Prosthodontics (FPRO)

FPRO 520 Preclinical Fixed Prosthodontics (ISP) (2) Basic fundamentals of fixed prosthodontics; preparation for clinical procedures in posterior PFM's, posterior mandibular PFO's and in restoring endodontically treated teeth.

FPRO 521 Preclinical Fixed Prosthodontics I (3) Fundamentals and principles of posterior prosthodontic procedures, including diagnosis, biomechanical principles, and construction of fixed prosthodontic restorations.

FPRO 522 Preclinical Fixed Prosthodontics II (3) Fundamentals of aesthetic restorations; fabrication of posterior and anterior porcelain-fused-to-metal restorations and anterior porcelain jacket crown; restoration of endodontically treated teeth.

FPRO 561abcd Clinic: Fixed Prosthodontics I (0-0-0-3) Clinical application of fixed prosthodontic principles in patient treatment.

FPRO 562ab Clinic: Fixed Prosthodontics II (0-3) Clinical application of fixed prosthodontic principles in patient treatment.

FPRO 601 Advanced Fixed Prosthodontics (a) Critical review and evaluation of the fixed prosthodontic literature; guided experience in the laboratory and clinical phases of fixed prosthodontic therapy.

Geriatric and Special Patient Dentistry (GSPD)

GSPD 504 Dental Treatment of the Geriatric and Special Patient (5) Social, psychological, economic and health factors which influence dental care for the geriatric and special patient; specific considerations and modifications of conventional dental treatment.

GSPD 562abc Clinic: Geriatric Dentistry (0-0-1) Clinical experience in dental treatment of geriatric patients at an extramural site.

GSPD 563abc Clinic: Special Patient Care (0-0-1) Clinical experience in treatment of the physically, medically, or mentally disabled patient.

GSPD 610 Clinical Gerontology (5) Clinical application of principles of geriatric dentistry. Evaluation, treatment planning, and clinical care of elderly patients at residential and skilled-nursing care facilities.

GSPD 612 Special Patient Care Clinic (5) Clinical experience in the evaluation, diagnosis, treatment planning and management of oral problems in special needs patients.

Geriatric Dentistry (GDEN)

GDEN 710 Knowledge Assessment for GDEN Students (1, Sm) Review of topics explored in the first two years of the program, including lectures and practical demonstrations or simulations and examinations of overall discipline knowledge. Open only to GDEN students. Graded CR/NC. Prerequisite: ADNT 701, GDEN 713, GDEN 714, OFPM 710, OFPM 725 and OFPM 726.

GDEN 711abcd Case Portfolio Preparation for GDEN Students (1.5-1.5-1.5-1.5, FaSpSm) Examination of clinical cases of geriatric patients through online conferences. Development and defense of portfolio of multiple cases. Open only to master's and professional dental students.

GDEN 712abcd Capstone Research Project for GDEN Students (1.5-1.5-1.5-1.5, FaSpSm) Production and defense of a research plan that demonstrates significant understanding of a topic in geriatric dentistry. Credit on acceptance of capstone project. Open only to GDEN students. Graded IP/CR/NC. Prerequisite: ADNT 701.

GDEN 713 Common Systemic Conditions in Older Patients (2, FaSpSm) Lectures on topics pertinent to the aging patient that highlight the differences between aging physiologic changes and disease-caused conditions most common to this demographic. Open only to master's and professional dental students.

GDEN 714 Topics in Gerontology (2, FaSp) Gerontology topics for dentists including clinical assessment tools for aging patients, policy issues, myths, social supports, and consent and communication issues in the clinical setting. Open only to master's and professional dental students.

GDEN 715 Geriatric Dentistry Issues (2, FaSpSm) Common geriatric dentistry topics including epidemiology of oral diseases, common dental diseases, their management and prevention protocols for older adult patients. Open only to master's and professional dental students.

GDEN 716 Knowledge Assessment for GDEN Certificate Students (1, Sm) Review of topics explored in the certificate program, including lectures and practical demonstrations or simulations and examinations of overall discipline knowledge. Open only to certificate in Geriatric Dentistry students. Prerequisite: GDEN 711ab, GDEN 713, GDEN 714, GDEN 715, OFPM 722, OFPM 725.

GDEN 721 Internal Medicine and Systemic Disease for Dental Residents (2, Sp) (Enroll in OFPM 722)

GDEN 725 Epidemiology, Nutrition and Aging for Dental Residents (2, Sp) (Enroll in OFPM 725)

Gerontology topics for dentists including clinical assessment tools for aging patients, policy issues, myths, social supports, and consent and communication issues in the clinical setting. Open only to master’s and professional dental students.

Histology (DHS)

DHS 501 Basic Tissues and Histology and Embryology (2, Fa) Histology of basic tissues, oral histology, orofacial embryology, orofacial clefts and functional correlates.

DHS 701 Advanced Oral Histology (5) Microscopic anatomy, ultrastructure and histochimistry of developing and functional oral tissues; based on recent advanced in oral LM, TEM, and SEM histology.

Human Behavior (HBHV)

HBHV 510 Interpersonal Skills in Dental Hygiene (1) Training in the application of behavioral and communication skills.

HBHV 501 Behavioral Skills in Dentistry (1) Introduction to key personal, interpersonal, and professional factors that shape the doctor-patient relationship; ways interactional skills influence the effectiveness, durability, and satisfaction of the doctor-patient relationship.

HBHV 502 Interactional Skills (1) Introduction to purpose, objectives, and principles of clinical interviewing.

HBHV 504 Patient Education and Management (1) Management of difficult patients; psychology and behavioral treatment of pain; patient education of treatment planning; smoking cessation program.

HBHV 550 Communications in Clinical Dentistry (1) Verbal and nonverbal communication in clinical dentistry; clinical experience in use of manual, verbal, and nonverbal communication skills during a traumatic injection procedure.

HBHV 671abcd Clinic: Behavioral Dentistry (0-0-0-1) Clinical application of behavioral dentistry principles. Data collection, case presentation, fear reduction (iatrosedation), and tobacco cessation.

HBHV 601 Understanding Stress in Dental Practice (2) Investigation of the approaches to understanding and managing stress, especially the stress issues in dentistry.

Interdisciplinary — Basic Sciences (INTB)
INTB 504 Human Craniofacial Development and Genetics (3) Principles of human embryology and genetics; craniofacial developmental biology; molecular genetics, cytogentic, clinical orofacial genetics, genetic counseling; bioethics.

INTB 521 Basic and Medical Microbiology (3) Fundamentals of microbial structure, growth and physiology; major bacterial, viral and fungal diseases, symptoms, course, control and treatment; emphasis on diseases related to dental management.

INTB 601 Advances in Oral Biology (2) Review of basics of scientific methodology; comparison between and indications for scientific studies and case reports; critical review of current dental literature.

INTB 603 Systematic Approach to Scientific Writing (2) Study of dental research publication and review of writing principles; focus on logical arrangement of information, avoidance of common writing flaws, attainment of syntactical fluency.

INTB 604 Clinics in Craniofacial Malformations (2) Diagnosis, treatment, and rehabilitation of craniofacial malformations; principles of health care of craniofacial malformation patients. Includes hospital clinical observation.

INTB 60abcd Dental Research Participation (1-6 each) Assist in research in basic science, biomedical, or clinical dental areas. Experience in research strategy, design and methods using practical scientific problem solving.

INTB 61abcd Experience in Dental Teaching (1-6 each) Practical teaching experience in dental laboratory and clinic settings under faculty supervision. Includes instruction in effective methods.

INTB 625 Externship (1-6) Dental experience at an off-site location – not limited to clinical experience. Student participation must be approved by Associate Dean for Student and Academic Life.

INTB 60abcd Directed Dental Research (1-12 each) Dental clinical and/or basic science research under faculty guidance; proposal developed, research conducted, conclusion drawn, paper written. Units determined by extent of research. Graded CR/NC.

Interdisciplinary — Practice Dynamics (INTP)

INTP 501 Behavioral Strategies in Dentistry (2) Improvement of time and stress management and effectiveness in working with others; establishment of goals in dentistry; effective presentation of ideas. For Advanced Standing Program for International Dentists.

INTP 502ab Human Relations in Dental Practice (2-2) Introduction to behavioral concepts related to pain, fear, sedation; interviewing, treatment planning; care of geriatric and handicapped patients; patient education; includes principles of clinical application.

INTP 503ab Evaluation of Scientific Information in Clinical Practice (0-1) Practical guidelines for critically appraising scientific information applicable to the clinical practice of dentistry. Seminars will complement lectures with examples.

INTP 650 Dental Research Participation (1-6) Assist in research in basic science, biomedical, or clinical dental areas. Experience in research strategy, design and methods using practical scientific problem solving.

INTP 651 Experience in Dental Teaching (1-6) Practical teaching experience in dental laboratory and clinic settings under faculty supervision, includes instruction in effective methods.

INTP 652 Externship (1-6) Dental experience at an off-site location – not limited to clinical experience. Student participation must be approved by Associate Dean for Student and Academic Life.

Interdisciplinary — Surgical Sciences (INTS)

INTS 65abcd Experience in Dental Teaching (1-6 each) Practical teaching experience in dental laboratory and clinic settings under faculty supervision. Includes instruction in effective methods.

INTX 50abcd Directed Dental Research (1-12 each) Dental clinical and/or basic science research under faculty guidance; proposal developed, research conducted, conclusion drawn, paper written. Units determined by extent of research. Graded CR/NC.

Interdisciplinary — Diagnostic Sciences (INTX)

INTX 50abcdgfc Integrated Basic and Applied Science I (1-1-2-2-2-2-2) Principles of anatomy, histology, physiology, pathology applied to patient evaluation and management. Focuses on cell and connective tissue biology, neuromuscular, blood, endocrine and cardiovascular systems.

MBIO 310 Principles of Microbiology and Immunology (3) Fundamental concepts of microbiology and immunology. Bacterial, viral and fungal diseases are correlated with host responses; oral manifestations of infectious disease. Emphasis on sanitation and sterilization.

MBIO 350 Immunology (3) Fundamentals of immunology: basic immunopathology, especially concerning the oral cavity, including immunogenetics;
Orofacial pain Oral medicine (OFPM)

**OFPM 701 CPR, Blood and Airborne Infections and Common Emergencies for Dental Residents (1, Sm)** CPR training, review of common dental emergencies, and blood and airborne pathogens in dental patients.

**OFPM 702ab Soft Tissue Disease for Dental Residents (a: 1, Sm; b: 2, Fa)** Seminars on the various mucosal, cutaneous, gingival and salivary diseases and lesions in the oral and maxillofacial region.

**OFPM 703 Local Anesthesia, Minor Surgery and Biopsy Procedures for Dental Residents (1, Sm)** Seminars on local anesthesia methods and minor surgical procedures appropriate for the oral and maxillofacial region.

**OFPM 704 Bony Pathology, Radiology and Advanced Imaging for Dental Residents (1, Sm)** Review of the oral and maxillofacial region osseous and odontogenic pathologies and the various imaging methods used to examine this anatomic region.

**OFPM 705 Neurologic Based Oral and Facial Pains for Dental Residents (2, Sp)** Seminars on the diagnostic and therapeutic procedures appropriate for chronic neurogenic based pain disorders that occur in the orofacial region.

**OFPM 706 TMD, Orthopedics, Rheumatology and Physical Therapy for Dental Residents (2, Fa)** Seminars on various topics relating to the diagnosis and management of temporomandibular disorders.

**OFPM 707 Pharmacology Series for Dental Residents (2, Fa)** Seminars on common medications used in the practice of oral medicine and chronic orofacial pain.

**OFPM 709 Headaches for Dental Residents (1, Sp)** Seminars on the diagnosis, prevention and management (including pathophysiologic mechanisms) of episodic and chronic headache disorders.

**OFPM 710ab Knowledge Assessment for ODPOM Residents (1-1, Sm)** Assessment and feedback summarizing knowledge base acquired in online courses. Open only to master’s students. Recommended preparation: OFPM 702, OFPM 703, OFPM 704, OFPM 705, OFPM 706, OFPM 707, and OFPM 721.

**OFPM 721 Neurosciences for Dental Residents (2, Fa)** Seminars on the neurophysiologic and neuroanatomical bases of chronic orofacial pain disorders.

**OFPM 722 Internal Medicine and Systemic Disease for Dental Residents (2, Sp)** Seminars on common systemic diseases and the potential interactions with oral disease and treatment.

**OFPM 723 Systems Physiology, Motor Disorders and Sleep Apnea for Dental Residents (2, Fa)** Seminars on various topics relating to motor oral disorders and sleep disordered breathing (as it relates to the mandible and tongue.)

**OFPM 724 Psychological and Psychometric Assessment for Dental Residents (2, Sm)** Seminars on various topics relating to biobehavioral diagnosis and, where appropriate, psychological management of patients with chronic illness in the orofacial region.

**OFPM 725 Epidemiology, Nutrition and Aging for Dental Residents (2, Sm)** Seminar on the epidemiology of oral disease and nutritional topics as related to the aging patient.

**OFPM 726 Immunology and Immunosuppression for Dental Residents (2, Fa)** Seminar course on immunology and immunosuppression as it relates to diseases in the oral and maxillofacial region.

**OFPM 727 Infectious Disease, Oral Microbiology and Virology for Dental Residents (2, Sm)** Seminar organized around infectious diseases in the oral, pharyngeal and nasal region.

**OFPM 728 Case Presentations by OFPOM Residents (2, Sp)** Case presentations by Orofacial Pain/Oral Medicine residents in which each resident presents and defends the diagnostic and treatment methods selected for a particular case.

**OFPM 729abcd Case Portfolio Project for OFPOM Residents (3.5-5.5-5.5-5.5, Fa)** In the first three trimesters (OFPM 729abc) students will present their progress towards the final trimester (OFPM 729d) goal of defending their capstone research reports. Graded IP/NC/CR, with full credit on acceptance of the capstone research report. Open only to master’s students.

**OFPM 730abcd Case Portfolio Preparation by Online OFPOM Residents (3.5-5.5-5.5-5.5, Sm)** In the first four trimesters (OFPM 730abcd) students will present their progress towards the final trimester (OFPM 730e) goal of defending a portfolio of 18 clinical cases. Graded IP/NC/CR with full credit on acceptance of final case portfolio. Open only to master’s students.

**Oral Medicine Oral Diagnosis (OMOD)**

**OMOD 501 Emergency Dental Treatment (1)** Dental emergencies in a general dental practice; emphasis on diagnosis of pain, trauma, infections, abscesses, myofacial problems, pulp consideration, restorative goals; interrelationship of these areas.

**OMOD 502 Chronic Orofacial Pain (2)** Current concepts of pain mechanisms; application to differential diagnosis, treatment, and management of chronic head, neck, and dental pain.

**OMOD 503 Oral Medicine (2)** Detection, recognition, assessment, management and treatment modification of medical conditions presented by dental patients.

**OMOD 504 Infectious Control (1)** Infection control and clinical asepsis in the dental office; ethical and legal aspects; specific agents of disease; epidemiology.
ORTH 512 abcdefg Seminar: Advanced Operative Dentistry II (1-3 each, FaSpSm) Advanced clinical and laboratory treatment of patients in need of complex multidisciplinary treatment, with special emphasis on esthetic and bonded restorations. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

ORTH 701 Seminar: Seminar: Advanced Operative Dentistry III (1-1-1-1, FaSpSm) Advanced studies, technical, and scientific background of esthetic bonded restorative techniques; development and evaluation of new composite resins; clinical and laboratory validation of esthetic restorative materials. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

ORTH 702 Seminar: Seminar: Advanced Operative Dentistry IV (1-1-1, FaSpSm) In-depth study, analysis, and treatment involved in the management of discolored and developmental defects of the teeth. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

ORTH 704 abc Seminar: Advanced Operative Dentistry VI (2-2-2, FaSpSm) Advanced studies of restorative techniques of severely damaged teeth, selection and use of different post systems, core build-up, and bonding to the root canal. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

ORTH 705 abcdef Seminar: Advanced Operative Dentistry VII (1-1-1-1, FaSpSm) Proficiency in advanced esthetic indirect restorations for anterior and posterior teeth, including preparation designs, material selection, cementation and bonding procedures, and alternative resin-bonded fixed-partial dentures. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

ORTH 706 abcdef Seminar: Scientific Investigation in Operative Dentistry (1-3, max 14, FaSpSm) Enhancement of critical research thinking by development and experimentation of different scientific methodologies in operative dentistry, journal article writing and submission for publication. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

ORTH 707 abcdef Seminar: Treatment Planning in Operative Dentistry (2-2-2-2, FaSpSm) Seminars led by students and invited guests to discuss, analyze and propose a treatment sequence for esthetic challenge clinical cases involving complex multidisciplinary treatment. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

ORTH 708 abcdef Seminar: Clinic: Advanced Operative Dentistry (1-3, max 14, FaSpSm) Advanced clinical and laboratory treatment of patients in need of complex multidisciplinary treatment, with special emphasis on esthetic and bonded restorations. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

ORTH 712 Seminar: Seminar: Orthodontics (2-2-2-2, FaSpSm) Seminar led by students and invited guests to discuss, analyze and propose a treatment sequence for esthetic challenge clinical cases involving complex multidisciplinary treatment. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

ORTH 704 Seminar: Orthodontics in Theory and Practice (2-2-2) Review of various approaches to orthodontic treatment; includes presentation of cases.

ORTH 703 Seminar: Orthodontic Practice Management (2-2-2, FaSpSm) Office management and patient relations in orthodontic practice.

ORTH 706 Seminar: Orthodontics (3) Diagnosis, treatment, prognosis, and management of orthognathic problems. Lecture and demonstration, 2 hours.

ORTH 707 Seminar: Interdisciplinary Aesthetic Treatment (2, Sg) Commonly encountered interdisciplinary aesthetic problems. Communication and teamwork between orthodontists and general dentists, as well as other specialists will be emphasized.

ORTH 708 Seminar: Information Technology in Orthodontic Practice (2, Fa) Practical applications of information technology in contemporary orthodontics. Topics include office management systems, videophotogrammetry, and video imaging in orthodontic practice.

ORTH 709 Seminar: Advanced Information Technology in Orthodontic Practice (2, Sm) Follows ORTH 708 and is designed to provide background and up-to-date information on advanced technologies in orthodontic practice.

ORTH 721 Seminar: Biomechanics and Orthodontic Technic (8) Primary orthodontic techniques and basic diagnostic procedures. Typodont treatment of malocclusion, record taking, retention appliances, and beginning biomechanics.

ORTH 751 Seminar: Clinic: Advanced Orthodontics (1-10 each, FaSpSm) Clinical orthodontics; clinical techniques, diagnostic procedures, and applied clinical therapy to selected cases of malocclusion with emphasis on therapy and supervised treatment.

ORTH 701 Seminar: Research (1-6) Organized literature searching and compiling of published data for purposes of developing writing and investigative skills.

ORTH 722 Seminar: Medicine and Pathology (1-3-2, FaSpSm) An integrated approach to clinical, gross and microscopic study of basic disease processes, systemic pathology, oral pathology, internal medicine, pathophysiology, physical evaluation and emergency medicine for significant organ systems. Clinical-pathologic correlation stressed. Evaluation, classification, and differential diagnosis of oral lesions; disease recognition and dental treatment modification.

ORTH 500 Seminar: Oral Pathology (4, Sm) Clinical radiographic, gross and microscopic characteristics of mucosal, skin, fibrous and salivary gland diseases; odontogenic tumors and cysts; benign and malignant neoplasms and iatrogenic conditions.

ORTH 540 Seminar: Oral Pathology (0-0) Clinical-pathologic discussion of oral pathology cases. A variety of "unclassified" pathologic conditions are analyzed. Etiology, pathogenesis, clinical/radiographic features, therapy and prognosis are stressed.

ORTH 601 Seminar: Advanced Oral Pathology Seminar (2) Detailed discussion and analysis of many cases representing a wide variety of oral pathologic conditionsstresssing differential diagnosis and clinical-pathologic correlations.

ORTH 701 Seminar: Clinical Pathologic Conference (3-12) Clinicopathologic correlation of diseases of the head and neck. Seminar. 1 hour. Presented at LAC-USC Medical Center.

Pediatric Dentistry (PEDO)

PEDO 501 Seminar: Clinical Pediatric Dentistry (1) Scientific principles underlying contemporary pediatric dentistry, including prevention of disease; dental anomalies; habits and other problems in occlusal development; behavior management; child abuse.

PEDO 521 Seminar: Preclinical Pediatric Dentistry (2) Principles and techniques of cavity preparations in primary teeth; pulpal therapy; stainless steel crowns; space maintenance; diagnosis, treatment planning.

PEDO 531 Seminar: Dentistry for Children I (0-0-3) Structured clinical experience in caring for the dental needs of the child patient. Includes special case seminars.

PEDO 561 Seminar: Diet for Children II (0-0-1) Dental treatment of the child patient; preventive and restorative dentistry; space maintenance and interceptive orthodontic procedures.

PEDO 702 Seminar: Comprehensive Review of Pediatric Dentistry (5-7 each, FaSpSm) Critical analysis of current pediatric dentistry literature and case conferences related to the application of contemporary issues in dentistry for the complex child patient.

PEDO 703 Seminar: Interceptive Orthodontics (2-5 each) Recognition, evaluation, and treatment of developing orthodontic problems appropriate to the pediatric dentist; emphasis on diagnosis; laboratory experience included.
Periodontics (PERI)

PERI 701ab Introduction to Periodontal Diseases (1-1, FaSp)
Introduction to periodontal disease; emphasis on identification of normal periodontium, distinguishing of gingival and periodontal diseases; includes data collection and classification of gingival and periodontal diseases.

PERI 705 Basic Periodontal Therapy (1) Basic therapeutic modalities of periodontal treatment; general principles and methods of surgical periodontal treatment.

PERI 705 Periodontal Diseases and Elements of Therapeutic Judgment (1) Periodontal pathologic processes; pathogenesis, classification and clinical features of gingivitis; periodontitis; other related diseases of periodontium including diagnosis and initial phases of treatment.

PERI 704 Advanced Periodontics (1) Periodontics as related to endodontics, orthodontics, and restorative dentistry; bone induction, osseous grafting, splinting, management of furcation lesions; maintenance, recall, and referral.

PERI 721 Periodontal Surgery (1) General principles and methods of surgical periodontal treatment; includes laboratory exercises.

PERI 720ab Clinic: Introductory Periodontal Therapy (1-1) Laboratory and clinical development of periodontal therapy procedures; basic instrumentation principles.

PERI 710abcd Clinic: Periodontal Therapy I (1-0-0-0-1) Supervised treatment of periodontal disease at all levels of complexity.

PERI 720ab Clinic: Periodontal Therapy II (0-2) Supervised treatment of periodontal disease at all levels of complexity.

PERI 602 Current Controversies in Periodontology (1) Examination of the major controversies in the field of periodontology; emphasis on the efficacy of current treatment modalities and future trends.

PERI 702ab Seminar: Periodontal Treatment Procedures (2-2) Presentation of various techniques in current periodontal treatment.

PERI 702ab Seminar: Periodontal Case Presentation (1-2) Formalized presentation and discussion of clinical cases treated by advanced students.

PERI 704abcddefg Seminar: Periodontal Therapy (1-2) Presentation and discussion of treatment of clinical cases involving soft tissue and osseous management; rationale for the therapy; surgical wound healing; dental implant surgery.

PERI 708 Seminar: Clinical Basis of Periodontics (4) Evaluation of the literature dealing with various types of therapy including the objectives of treatment.

PERI 710 Clinical Periodontal Photography (1) Demonstration of techniques used in intraoral photography for periodontal purposes, emphasis on proper clinical case documentation in seminar presentation and Specialty Board Certification.

PERI 711 Occlusal Therapy in Periodontics (2) Anatomy of the TMJ mandibular movements; occlusal anatomy and their interrelationships; methods of occlusal correction using anatomy and mandibular movements as a guide.

PERI 712abdefgh Treatment Planning in Periodontics (2 each) Presentation of clinical findings, diagnoses, and plan of treatment of clinical cases by advanced students.

PERI 715 Treatment of Special Care Patients (3) Periodontal care and treatment of older population groups, handicapped patients, and other types of special patients, settings, and situations.

PERI 715ab Seminar: Special Topics in Periodontal Disease (3-3) Discussion of topics of immediate importance and controversy. Experts in the field are invited to participate as guest speakers.

PERI 750 Advanced Periodontal Instrumentation (3) Advanced root preparation techniques including design and manufacturing characteristics of various instruments, sharpening techniques, and root morphology as it relates to advanced instrumentation principles.

PERI 752 Interdisciplinary Treatment: An Orthodontic Perspective (2) Effective recognition, evaluation and understanding of the orthodontic treatment phase required in interdisciplinary treatment plans; includes laboratory and clinical experience; applicable to orthodontics, periodontology, prosthodontics.

PERI 761abdefghj Clinic: Advanced Periodontics (1-10 each) Clinical experience in the treatment of patients with all types and degrees of involvement of periodontal disease. Includes placement of dental implants. Graded CR/NC.

PERI 771ab Periodontal Therapy in the Hospital (1-1) Role of the periodontist in hospital therapy. Treatment of complex cases in the hospital environment.

PERI 790ab Directed Research: Periodontics (1-6 each) Research in clinical and experimental periodontology. Graded CR/NC.

Pharmacology (DPHR)

DPHR 410 Principles of Pharmacology (3) Basic principles of drug action; application of drugs in the prevention and treatment of disease; harmful effects of drugs on biological systems. Lecture, 2 hours.

DPHR 501 Pharmacology (3) General principles of drug action: prescription writing; toxicology; pharmacology of drugs affecting cardiovascular, autonomic, endocrine, and central nervous systems; drug control of pain, anxiety, infection.

DPHR 601 Clinical Drug Therapy in Dentistry (2) Clinical pharmacology of drug therapy important to dental practice using case history disease signs and symptoms and attendant drug therapy.

DPHR 701 Advanced Pharmacology (1) Pharmacologic principles and practice of drug use to control anxiety, pain, and infection. Treatment of drug and medical emergencies as they relate to dental specialty practice.

Restorative Dentistry (REST)

REST 314 Physiology of Occlusion for Hygienists (2) Biology and function of the gnathostatic system. Role of the hygienist in diagnosis and treatment of occlusal dysfunctions.

REST 501 Preclinical Operative and Fixed Prosthodontics (Conjoint) (3) Fundamental concepts of restoring an individual tooth with a cast restoration; principles of cavity preparation; casting fabrication and cementation.

REST 503ab Clinical Restorative Dentistry (1-1) Application of pre-clinical procedures in operative
dentistry, fixed prosthodontics, removable prosthodontics, and dental materials.

REST 504 Diagnosis and Treatment Planning (1)
Utilizing a restorative approach, enhance students’ knowledge and ability to choose treatment best suited for existing dental conditions, patients’ requests and their financial ability.

REST 521 Preclinical Operative/Fixed Prosthodontics Laboratory (2)
Experience in cavity preparation; casting fabrication and cementation on extracted teeth and plastic dentiforms.

REST 522 Aesthetics in Dentistry (1)
Definition and relationship of elements of aesthetics; application in patient motivation and care.

REST 602ab Participation in Advanced Dental Care (0-2)
Participation in advanced dental treatment in Faculty Private Practice Clinic, techniques of difficult case presentation and efficiency in practice. Clinic and seminar.

REST 701 Orientation to Advanced Prosthodontics (2)
Preclinical overview of materials, techniques, instrumentation, and treatment procedures necessary for providing advanced prosthodontic care in the clinical environment.

REST 702abcd Seminar: Treatment Planning (2 each)
Seminars led by students with case presentations of complex multidisciplinary treatment plans, completed therapy and staff conferences.

REST 703abcd def Seminar: Review of the Prosthodontic Literature – Fixed (1 each)
Weekly two hour seminars devoted to review of the historic, classic, and current literature in fixed prosthodontics.

REST 704abcd def Seminar: Review of the Prosthodontic Literature – Removable (1 each)
Weekly two hour seminars devoted to review of the historic, classic, and current literature in removable prosthodontics.

REST 705 Advanced Fixed Prosthodontics Techniques (1)
Tooth preparation and advanced laboratory techniques necessary to implement full mouth rehabilitation.

REST 706 Advanced Complete Denture Techniques (1)
Advanced laboratory and clinical skills for a specialty prosthodontic practice.

REST 708ab Dental Ceramics, Color, and Aesthetics (2-5)
Theory of color and dental aesthetics; history and development of dental ceramics; design and techniques in fabrication of ceramo-metal restaurations.

REST 709ab Seminar: Removable Partial Dentures (1-2)
Diagnosis, treatment planning, and design of removable partial dentures using extraoral and intracranial retainers.

REST 710abcd Implant Dentistry (1-1.1-1)
Implant modalities and types; basis for selection; techniques of placement and of supervision of prosthodontic restoration. Includes a review of classic implant literature.

REST 711 Maxillofacial Prosthodontics (2)
Theory and techniques for fabrication of prostheses to correct maxillofacial deformities including cleft palate.

REST 712ab Principles of Occlusion (2-3)
Application of current occlusal concepts in removable prosthodontics. Techniques of occlusal adjustment and additive waxing for development of occlusal morphology.

REST 713abcd efghl Seminar: Advanced Prosthodontics (1-10 each)
Students treat patients with complex interdisciplinary problems. A minimum of five full mouth reconstructions and 10 sets of complete dentures will be completed.

REST 781 Clinic: Maxillofacial Prosthetics (1-8)
Clinical experience in fabrication of prostheses to correct maxillofacial deformities.

REST 782abcd Clinic: Implant Prosthodontics (1-10 each)
Clinical procedures in implants for prosthodontic rehabilitation.

REST 790 Directed Research: Prosthodontics (1-12)
Opportunities for research in clinical and experimental prosthodontics. Graded CR/NC.

Removable Prosthodontics (RPRO)

RPRO 501 Preclinical Removable Complete Prosthodontics (1)
Fundamental theory for the fabrication of removable complete dentures.

RPRO 502 Removable Complete Prosthodontics (1)
Complete denture treatment: phases, clinical procedures, philosophy, concept, rationale, and need.

RPRO 503ab Preclinical Removable Prosthodontics and implants (2-1)
Introduction to disciplines of removable complete and partial dentures and implants, including classification and progress of edentulism, support sources and principles, design, fabrication and evaluation.

RPRO 510 implant Dentistry (1)
Principles and use of implants in dentistry: includes history, biological basis, types, diagnosis and treatment planning, surgical and restorative procedures, and limitations.

RPRO 511 Preclinical Removable Partial Prosthodontics I (1)
Partial denture diagnosis and treatment planning: basic principles of partial denture design, fabrication, and function.

RPRO 512 Preclinical Removable Partial Prosthodontics II (1)
Partial denture design, fabrication, and function; repair; patient education.

RPRO 513 Removable Partial Prosthodontics (1)
Clinical removable partial prosthodontic treatment including diagnosis, treatment planning and clinical techniques.

RPRO 521 Preclinical Removable Complete Prosthodontics Laboratory (1)
Fundamental theory for the fabrication of removable complete dentures.

RPRO 522 Preclinical Removable Prosthodontics and implants Laboratory (1-1)
Laboratory experience in the fabrication of removable complete and partial dentures and implants.

RPRO 532 Preclinical Removable Partial Prosthodontics Laboratory (2)
Laboratory experience in fabrication of removable partial dentures.

RPRO 550 Removable Complete Prosthodontics Clinic I (1)
Clinical demonstration with supervised clinic experience in construction, repair, and evaluation of the removable complete denture.

RPRO 561abcd Clinic: Removable Complete Prosthodontics I (0-0-0-0-2)
Diagnosis, treatment planning, and care of edentulous patients. Complex cases involving temporomandibular joint dysfunction, surgical and congenital defects; seminars on clinical treatment.

RPRO 562ab Clinic: Removable Complete Prosthodontics II (0-3)
Diagnosis, treatment planning, and care of edentulous patients. Complex cases involving temporomandibular joint dysfunction, surgical and congenital defects; seminars on clinical treatment.

RPRO 572abcd Clinic: Removable Partial Prosthodontics (0-0-0-0-2-3)
Clinical experience in diagnosis, treatment planning, and laboratory procedures necessary for the treatment of the partially edentulous patient. Includes seminars related to clinical treatment.

RPRO 602 Advanced Removable Prosthodontics (4)
Critical review and evaluation of the removable prosthetic literature; guided experience in the laboratory and clinical phases of removable prosthodontic therapy. (Duplicates credit in 604abc.)

RPRO 603 The Edentulous Patient – Conventional or Implant Prosthesis (1)
Effective management of the edentulous patient who is unable to adapt to a prosthesis; includes a review of implant dentistry with a hands-on session.

RPRO 604abcd Advanced Removable Prosthodontics (0-0-4)
Critical review and evaluation of the removable prosthetic literature; guided experience in the laboratory and clinical phases of removable prosthodontic therapy. (Duplicates credit in 602.)

RPRO 605 Removable Prosthodontics Seminar: Removable Partial Prosthodontics (1)
Provides fourth year dental students with an advanced didactic foundation for treating the partially edentulous patient with a removable partial.

Oral Surgery (SURG)

SURG 501 Oral Surgery (3)
Introduction to surgical dentistry, armamentarium and procedures; exodontics; infection; post operative care; repair of bone and soft tissue; acute injury; cysts, sinuses, nerve injury, biopsy.

SURG 562abc Clinic: Oral Surgery I (0-o-1)
Supervised clinical experience in health history, surgical evaluation, extraction of teeth, and minor oral surgery procedures. Includes special case seminars.

SURG 604abc Clinic: Oral Surgery II (0-o-1)
Supervised clinical experience in health history, surgical evaluation, extraction of teeth, and minor oral surgery procedures. Includes special case seminars.

SURG 654abc Clinic: Hospital Oral Surgery (0-0-0-1)
Observation of inpatient and outpatient oral and maxillofacial surgery, participation in clinic care of patients with dento-alveolar pathology, introduction to management of medically compromised patient.

SURG 661abc Oral and Maxillofacial Surgery (0-o-0-4)
More advanced instruction in oral and maxillofacial surgery and related diseases as appropriate to the practice of general dentistry; extensive clinical experience.

SURG 702ab Seminar: Advanced Oral Surgery (2-3)
Problems in advanced oral surgery and hospital oral surgery including student presentations and critique of clinical cases.

SURG 702ab Seminar: Review of the Oral Surgery Literature (2-3)
Critical analysis of recent oral surgery and other related literature.

SURG 704ab Orthognathic Surgery (a: 2, Fa; b: 2, Sp)
Surgical planning and treatment of patients with skeletal deformities.

SURG 721 Surgical Anatomy (2)
Intensive review of anatomy relevant to the practice of oral surgery. Includes dissections and animal surgery.
The USC School of Dramatic Arts

Velina Haasu Houston, Ph.D., Associate Dean

Faculty

Professors: Sharon M. Carnicke, Ph.D.; Velina Haasu Houston, Ph.D.

Associate Professors: Meiling Cheng, DFA; Oliver Mayer, MFA

Assistant Professors: Luis Alfaro; Takeshi Kata, MFA; Tom Ontiveros, MFA; Sibyl Wickersheimer, MFA

Professors of Theatre Practice: Andrei Belgrader, MFA; Natsuko Ohama; Andrew J. Robinson

Associate Professors of Theatre Practice: Paul Backer, Ph.D.; Brent Blair, Ph.D.; David Bridel; Elisabeth M. Collins; Anita Dashashi-Sparks, MFA; Christina Haatainen-Jones; Joseph Hacker, MFA; Duncan Mahoney; Mary-Joan Negro; Louie Fiday, MFA; Jack R. Rowe; Stephanie Shroyer, MFA; Eric Trules

Assistant Professors of Theatre Practice: Philip G. Allen; John De Mita, MFA; Randy Mell; David Warshofsky, MFA

Adjunct/Part-Time Faculty of Theatre Practice: Tony Abatemarco; Rob Adler; Michael Arabian; Patricia Bahia, M.M.; Robert Bailey; Corbett Barklie; Joe Bays, MFA; Andrew Borba, MFA; Jason Robert Brown; Tom Buscher; Anne Burk, MFA; Frank Catalano, MPW; Julian S. Cha, Ph.D.; Paula Cizmar; Jennifer Cool, Ph.D.; Anastasia Coon, MFA; Eugene Cordero; Debra Deliso, MFA; Kathleen S. Dunn-Muzingo, MFA; Frank Dayer, M.A.; Kirsten Eggers; Dan Fishbach; Laura Flanagan, MFA; Jeff Flowers, MFA; Parmer Fuller, Ph.D.; Terry Gordon, MFA; Andrew Henkes, Ph.D.; Elizabeth Hogan, MFA; Paula Holt, M.A.; Michael Keenan; Mary K Klinger; Shashir Kurup, MFA; Edgar Landa; Vicki Lewis; Helene Lorenz, Ph.D.; Heather Lyle, M.M.; Susan Main; Marjo-Riikka Makela, MFA; Babette Markus; Kevin McCorkle; Laura Meade, MFA; Lauren Murphy, MFA; Ntare Guma Mbaho Mwine, MFA; Shawn Nelson; Patrick Parker; Leah Pesh, MFA; John Rubinstein; Mady Schutzman, Ph.D.; Colin Sieburg; Ella Turenne, MSW; Laura Vena, MFA; Matt Walker; Julie Welch

Courtesy Joint Appointments: Thomas G. Cummings, Ph.D.; Larry E. Greiner, Ph.D.; Bruce Smith, Ph.D.

Emeritus Professors: Don Llewellyn Jr., MFA; Eva Roberts, MFA; Robert R. Scales, Ph.D.; James Wilson, MFA

General Information

Degree Programs

The School of Dramatic Arts offers professional and academic degrees at the Bachelor and Master of Fine Arts levels as well as a Master of Arts in Applied Theatre Arts. USC offers two degree programs to undergraduate students interested in the study of theatre arts. The professional degree programs, the Bachelor of Fine Arts (BFA) in Acting, Design/Technical Direction, Sound Design, and Stage Management, offer a conservatory approach to training for students committed to pursuing careers in the professional theatre, film and television industries. The Bachelor of Arts degree program (B.A.) incorporates a broad, general education in addition to a thorough study of drama. The Bachelor of Arts in Visual and Performing Arts Studies provides students with a broad understanding of the various disciplines. The School of Dramatic Arts also offers minor programs in applied theatre arts, theatre, musical theatre, performing arts studies and playwriting.

Bachelor of Arts

The Bachelor of Arts (B.A.) degree is ideal for students who want a broad education in addition to production and performance experience. The degree is offered in cooperation with the USC Dornsife College of Letters, Arts and Sciences.
flexible and encourages students to develop a primary interest for upper-division course work. All minor students are eligible to participate in performance and production projects.

*Applied Theatre Arts* The minor in applied theatre arts addresses the theory and practice of applying theatre arts in non-traditional settings with emphases that include education, therapy and social change.

Musical Theatre The minor in musical theatre, interdisciplinary in nature, is a 27-unit program incorporating the study of acting, dance or movement, vocal arts and related musical subjects presented in association with the Thornton School of Music.

Performing Arts Studies The minor in performing arts provides an interdisciplinary inquiry into the nature and aesthetics of the performing arts. It combines the disciplines of cinematic arts, dance, music and theatre. The minor is a unique course of study that looks at how the performing arts contribute to a culturally literate society.

Playwriting The minor in playwriting presents undergraduate students who are not theatre majors with a concentration in the discipline of playwriting as a means for broadening and deepening expression using the literary and performing arts. This minor offers a foundation for extended expression in dramatic writing and creative writing genres in general.

Master of Fine Arts

The Master of Fine Arts with a major in theatre requires 48-44 units of coursework at the 400 or 500 level. The areas of emphasis include acting, theatrical design, dramatic writing and directing. These programs provide a high level of practical experience. To ensure this, the number of students accepted in each area of emphasis is strictly limited. An interview is required for admission.

Master of Arts, Applied Theatre Arts

The Master of Arts in Applied Theatre Arts explores the intersection of theatre arts and cultural fieldwork, encompassing the fields of theatre and therapy, theatre in education and theatre for social change/community-based theatre. Practitioners of applied theatre arts supplement their work as classroom teachers, therapists, social workers, case managers, community organizers and social activists.

Auditions and Entrance to the Degree Programs

Admission to the various degree programs is granted through the university’s regular admission procedures in conjunction with the School of Dramatic Arts supplementary application procedure. See the Admission section of this catalogue, Undergraduate and Graduate.

Admission to the B.A. program is determined by academic record, experience in theatre, and information required on the USC application for admission and the School of Dramatic Arts supplementary application. Students applying for the B.A. program must contact the School of Dramatic Arts directly to obtain the supplementary application.

In addition to submitting a USC application for admission, a dramatic arts supplementary application and an in-person audition are required for the BFA and MFA programs. Auditions are held during January and February. Applicants should contact the School of Dramatic Arts directly to obtain supplementary application materials and to arrange for their audition.

The acting audition requires two monologues: one contemporary and one classical (preferably verse).

Auditions and interviews for all programs are held in major cities around the country including Los Angeles, Chicago and New York.

Students wishing to transfer from a community college or another four-year college or university into the Bachelor of Fine Arts curriculum must present training equivalent to their level of transfer or be prepared to take remedial work in acting, voice, movement, dramatic literature and stagecraft.

Admission to the BFA and MFA Design/Technical Direction, Stage Management and Sound Design programs is based on a personal interview and/or review of a portfolio. In addition, the student must submit a USC application for admission and a dramatic arts supplementary application.

Applicants for the design programs must present a portfolio of their work at the time of their interview with the design faculty.

Interviews are held beginning in January for the following fall semester.

Admission to full graduate standing will be granted after the satisfactory completion of one semester. A satisfactory test score on the Graduate Record Examinations and a satisfactory grade point average are also required.

Application materials and details about audition dates and locations may be obtained from the Office of Admissions and Recruitment, School of Dramatic Arts, University of Southern California, Los Angeles, CA 90089-0791, (213) 740-1286.

International Study

In conjunction with Sarah Lawrence College and the British American Drama Academy, USC students have the opportunity to study theatre in London. For additional information, see International Study Options.

Degree Requirements

Bachelor of Arts

The Bachelor of Arts with a major or minor in theatre is a comprehensive theatre degree offered in cooperation with the USC Dornsife College of Letters, Arts and Sciences. Candidates for the degree must complete the university general education requirements in addition to the courses in the major prescribed by the School of Dramatic Arts. A total of 128 units is required for completion of the degree.

General Education Requirements

The university’s general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing, foreign language and diversity requirements, which together comprise the USC Core. See the USC Core and the General Education Program for more information.

School Majors

Students who choose the school major are required to complete a minimum of 32 units in theatre as specified:

<table>
<thead>
<tr>
<th>Required courses</th>
<th>Units</th>

The Bachelor of Fine Arts provides four years of intensive training at the undergraduate level in performance studies including acting, design, sound design, stage management and technical direction. A total of 128 units of course work is required for this degree, including a minimum range of 75-84 theatre units depending on the requirements of each program.

All BFA Theatre majors are required to earn a grade point average of 2.75 (A = 4.0) in their theatre courses each semester. BFA students who fail to earn a GPA of 2.75 in their theatre courses will be placed on probation for a consecutive second semester will be disqualified from the BFA program.

A student disqualified from continued study in the BFA program for failing to meet the GPA standards outlined above will be given the option of transferring into the B.A. program.

General Education Requirements

The university’s general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. Bachelor of Fine Arts

The Bachelor of Fine Arts provides four years of intensive training at the undergraduate level in performance studies including acting, design, sound design, stage management and technical direction. A total of 128 units of course work is required for this degree, including a minimum range of 75-84 theatre units depending on the requirements of each program.

All BFA Theatre majors are required to earn a grade point average of 2.75 (A = 4.0) in their theatre courses each semester. BFA students who fail to earn a GPA of 2.75 in their theatre courses will be placed on probation for a consecutive second semester will be disqualified from the BFA program.

A student disqualified from continued study in the BFA program for failing to meet the GPA standards outlined above will be given the option of transferring into the B.A. program.

General Education Requirements

The university’s general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

The Bachelor of Arts in Visual and Performing Arts Studies is an interdisciplinary degree offered jointly by the Kaufman School of Dance, the School of Dramatic Arts, the School of Cinematic Arts, the Roski School of Art and Design, the Thornton School of Music, and the Dornsife College of Letters, Arts and Sciences. Candidates for the degree must complete the university general education requirements in addition to the courses in the major. Students in this major complete a core of required courses that provides them with a broad understanding of the various disciplines. The work in the major is completed by choosing courses from a wide array of course offerings from all the participating schools. A total of 128 units is required for completion of the degree.

- **DANC 380:** Historical Approaches to Dance
- **FACS 150:** Visual Culture and Literacy
- **MUHL 315X:** Music and Culture
- **THTR 125:** Text Studies for Production
Minor in Theatre

This general minor in theatre invites students to explore the many facets of this exciting field. Students have the opportunity to take a variety of classes in acting, playwriting, literature, stage management, directing, costume design and production. The curriculum is very flexible and encourages students to develop a primary interest for upper-division course work. All minor students are eligible to participate in performance and production projects.

Required upper-division THTR electives: 14

Required theatre units: 24

Minor in Musical Theatre

The minor in musical theatre, interdisciplinary in nature, is a 27-unit program incorporating the study of acting, dance or movement, vocal arts and related musical subjects. Admission to the minor requires an audition for music but not for theatre. See the Thornton School of Music for requirements.

Minor in Performing Arts Studies

The minor in performing arts provides an interdisciplinary inquiry into the nature and aesthetics of the performing arts. It combines the disciplines of cinematic arts, dance, music and theatre. The minor is a unique course of study that looks at how the performing arts contribute to a culturally literate society. The minor in performing arts studies is a 20-unit program.

THTR 553a Seminar in Lighting Design 3

Two continuing courses from:
THTR 550b Seminar in Scene Design 3
THTR 552b Seminar in Costume Design 3
THTR 553b Seminar in Lighting Design 3

One remaining course from: Units
THTR 550a Seminar in Scene Design 3
THTR 552a Seminar in Costume Design 3
THTR 553a Seminar in Lighting Design 3

All of the following: Units
THTR 407ab Drawing and Rendering for the Theatre 2-2
THTR 435 Advanced Theatrical Drafting 3
THTR 491ab Periods and Styles 2-2
THTR 593 MFA Project 4

Two seminars, one of which must be Units
THTR 528 Seminar in Dramatic Analysis (4) 8

400- or 500-level electives by advisement, 5 units of which must be at the 500 level 48

Electives 10

A minimum of 72 units of graduate course work must be completed prior to the degree being granted. Thesis Requirement: The student is required to complete a thesis portfolio consisting of four theatre projects: (1) a full-length original play, (2) a full-length original play or adaptation, (3) a full-length screenplay, (4) a project that is either a play of any length, or a short subject or feature length script, a set of television speculative scripts (either in three half-hour short form of drama from the same TV program or a set of characters; or one-hour long form) or an interdisciplinary/multimedia project (approved in advance by the dramatic writing faculty.) An oral defense and review by program faculty and the developing portfolio is required when the student has completed two-thirds of the program, generally in the fall term of the student’s third year.

Master of Arts, Applied Theatre Arts

The Master of Arts in Applied Theatre Arts explores the intersection of theatre and cultural fieldwork, encompassing the fields of theatre and therapy, theatre and education and theatre for social change/community-based theatre. This combined area of study weaves all three disciplines together under the aegis of training practitioners in the art of popular theatre with primarily marginalized communities. Practitioners of applied theatre arts supplement their work as classroom teachers, therapists, social workers, case managers, community organizers and social activists to engage public groups to obtain their goals and desires by using the tools of theatre to expedite dialogue and foster an atmosphere of greater critical consciousness and increased agency. A written and oral examination is required upon completion of course work.

International Study

All students will participate in an international externship during the summer following their academic year. This externship takes place in an approved overseas site where the practice of applied theatre arts is well established, with whom the university has a contractual agreement for supervised observation. This externship intends to provide a supervisory, logistical and theoretical container for students to explore cultural fieldwork in the international arena.

Curricula for the Master of Arts Degree

APPLIED THEATRE ARTS UNITS
THTR 505 Staging Community-based Theatre 3
THTR 521 Engaging Community Narratives 3
THTR 544 Embodied Poetics 2
THTR 568 Popular Theatre for Education and Development 3

THTR 577 Theatre and Therapy for Cultural Fieldwork 3
THTR 578 Theatre of the Oppressed Theory, Games, and Techniques 4
THTR 579 Writing Culture 3
THTR 59a Applied Theatre Arts: Los Angeles Residency 2-2
THTR 587 Liberation Arts and Community Engagement — Theory 4
THTR 588 Liberation Arts and Community Engagement — Praxis 3
THTR 593a Participatory Action Research for Community-based Theatre 2-2
THTR 598 Applied Theatre Arts: International Externship 38

Courses of Instruction

Theatre (THTR)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

THTR 101 Introduction to Acting (4, FaSp) Study of genres, terminology, and disciplines of acting; fundamental techniques necessary for performance; scene study from contemporary plays.

THTR 110 Dramatic Analysis (5, Fa) Actors work on the text: analysis in rehearsal of scripts drawn from contemporary realism for dramatic characterization. Corequisite: THTR 115, THTR 120a, THTR 140a.

THTR 115 Movement I (2, Fa) Basic training for the actor’s body for expression and communication. Awareness and control through mind-body techniques. Corequisite: THTR 110, THTR 120a, THTR 140a.

THTR 120ab Acting I (2-2, 5p) Basic principles and techniques of acting through theatre games and improvisation. Introduction to contemporary texts, basic characterization and cold reading techniques. Open to BFA majors only. Corequisite: a: THTR 110, THTR 115, THTR 140a; b: THTR 140b.

THTR 121abx Fundamentals of Acting (2-2, FaSp) a: The elements of the actor’s imaginative skills. b: Continuation of THTR 121a. Not available for credit to theatre majors.

THTR 122 Improvisation and Theatre Games (2, max 4, FaSp) Individual and group exercise to free the actor physically and emotionally and to stimulate creativity, imagination, and self-expression.

THTR 127ab Character Acting (2-2, FaSp) a: Concentration of imaginative processes which develop the individual characteristics of a dramatic role. b: Continuation of THTR 127a. Not available for credit to theatre majors.

THTR 129 Text Studies for Production (4, Fa) Focuses on the questions, artistic choices, methodologies, and approaches of an actor/director/designer in the preparation of a production score prior to rehearsal.

THTR 130 Introduction to Theatrical Production (2, max 4, FaSp) Introduction to the non-performance areas of theatrical production (administrative, design, and technical fields) through hands-on participation in USC productions.

THTR 132ab Art of Theatrical Design (2-2, FaSp) a: A guided student exploration of the fundamentals of applied design elements and their use as creative tools in the design process; b: Development of the artistic process and theatrical design vocabulary of the individual within the environment of collaborative storytelling.

THTR 140ab Voice I (2-2, FaSp) Physiological mechanism of voice: breath control, phonation, resonance, articulation of language for the stage; expressive use of stress, intonation and rhythm. Corequisite: a: THTR 110, THTR 115, THTR 120a; b: THTR 120b.

THTR 152 Introduction to Scene Study (2, FaSp) Application and consolidation of the skills, knowledge and techniques acquired in the study of fundamentals of acting encountered in THTR 101. Prerequisite: THTR 101.

THTR 195 Theatre on Film (4, FaSp) Introduction to the theatre and its relationship to society through major plays in film versions. Separate screenings to be arranged.

THTR 201 Introduction to the Theatre (4, 5p) Gateway to the majors and minors in theatre. Introduction to and exploration of the creative elements of theatre art: playwriting, acting, directing, and design of scenery.
THTR 210 Theory and Practice of World Theatre I (4, Fa) A multicultural and transnational examination of the history, theory and practice of theatre from its origins to the age of Shakespeare and Zeami. Recommended preparation: THTR 125.

THTR 211 Theory and Practice of World Theatre II (4, Sp) A multicultural and transnational examination of the history, theory and practice of theatre from the Renaissance to the 19th Century. (Duplicates credit in former THTR 311.) Recommended preparation: THTR 125.

THTR 212 Theory and Practice of World Theatre III (4, Sp) A multicultural and transnational examination of the history, theory and practice of theatre from the late 19th century to the present date. Recommended preparation: THTR 125.

THTR 215ab Movement II (a: 2, Fa; b: 2, Sp) a: Training of the actor's body with focus on development of precision and strength. Prerequisite: THTR 115; corequisite: THTR 220a. THTR 240a: b: Training of the actor's body with focus on mask work for the development of precision, strength and expressiveness. Prerequisite: THTR 215a; corequisite: THTR 220b, THTR 240b.

THTR 216 Movement for Actors (2, FaSp) Training and practice in the coordination of the physical apparatus of the actor utilizing various movement techniques through improvisation.

THTR 220ab Intermediate Acting I (2-2, FaSp) Continuing development of improvisation leading to an increased range of dramatic expression through the formalized text of William Shakespeare. Prerequisite: THTR 120b.

THTR 222 Stage Make-up (2, FaSp) Principles of stage make-up materials and skills allowing the actors to enhance their features and techniques for moderate and extreme aging, injuries, and character roles.

THTR 230 Communicating Theatrical Design Concepts (3, FaSp) The visualization and communication of design ideas through free-hand and mechanical drawing, including orthographics, isometrics, perspective, shades and shadows, plans, sections and elevations.

THTR 231ab Costume Construction (3-3, FaSp) Historical survey, theory and practice in construction of costume, emphasis on period and style. Recommended preparation: THTR 125, THTR 201.

THTR 232 Stage Lighting (3, FaSp) Theory and practice of theatrical lighting design including electricity, radiant energy, refraction, reflection, absorption, chromatic variation, and electronic controls. Prerequisite: THTR 131.

THTR 236 Stage Sound (2, FaSp) Basic audio engineering science, how sound is measured, basic transducers and signal flow. Operation of recording and playback equipment used in theatrical sound design/mixing.

THTR 240ab Voice II (2-2, FaSp) Development of the voice using material which explores the techniques of Shakespeare and his contemporaries. Prerequisite: THTR 140b; corequisite: a: THTR 215a, THTR 220a; b: THTR 215b, THTR 220b.

THTR 241 Methods and Materials (2, FaSp) Cutting-edge and traditional methods and materials that enhance both the planning stages and realization of the theatrical design.

THTR 252ab Intermediate Acting II (2-2, FaSp) a: Polishing the actor’s skills through analysis and class performance of scenes from plays. b: Continuation of THTR 252a.

THTR 295 Theatre in America (2, max 8, FaSp) Current state of American theatre, through a study of acting, playwriting, criticism, stage design, lighting, and dramatic styles.

THTR 300 Introduction to Modern Drama (4, Fa) An investigation of the ideas, forms, genres, and thematic concerns of modern drama. Equal emphasis is placed on the plays and their historical contexts. (Duplicates credit in former THTR 200.)

THTR 301 Greek and Roman Theatre (4, Fa) Examines the function of theatre, production and acting conventions, and the drama of classical Greece and Rome. (Duplicates credit in former THTR 213.) Recommended preparation: THTR 125, THTR 201.

THTR 302 Shakespeare in His World (4, Sp) The plays and theatre of Shakespeare, the influences on his work and his contemporary world. (Duplicates credit in former THTR 214.) Recommended preparation: THTR 201, THTR 210, THTR 211.

THTR 305ab Directing (4-4, FaSp) Examination of basic directorial principles. Pre-production analysis and rehearsal procedures; relationship of the director to actor; integration of technical aspects of production. Prerequisite: THTR 305a before b.

THTR 313 Comedy of Manners (4, Fa) Study of the development of Comedy of Manners, with primary focus on Restoration Comedy of Manners. Recommended preparation: THTR 201, THTR 210, THTR 211.

THTR 314 Advanced Topics in Modern Drama (4, Sp) 20th century realism and the avant-garde. Recommended preparation: THTR 201, THTR 210, THTR 211.

THTR 315ab Physical Theatre I (2-2, FaSp) Actor training anchored by rigorous physical movements. Activities include comedy, clowning, juggling, and mask work. Open to BFA Acting majors only.

THTR 316 Advanced Movement for Actors (2, FaSp) Advanced physical training for the B.A. actor utilizing various movement techniques through improvisation. For B.A., Theatre (Acting) students only. Prerequisite: THTR 216.

THTR 320ab Intermediate Acting II (2-2, FaSp) Further development of range and breadth of performance skills with emphasis on texts of heightened language and style. Open to BFA Acting majors only. Prerequisite: THTR 220b; corequisite: a: THTR 310a, THTR 340a; b: THTR 310b, THTR 340b.

THTR 330 Scene Design I (4, Fa) Historical styles, methods, and dramatic analysis for scene design as applied in contemporary practice. Recommended preparation: THTR 130ab.

THTR 331 Costume Design I (4, Sp) Historical styles, methods, and dramatic analysis for costume design as applied in contemporary practice. Execution of costume designs for assigned works. Recommended preparation: THTR 231.

THTR 332 Lighting Design I (4, FaSp) Historical styles, methods, and dramatic analysis in lighting design as applied in contemporary practice.

THTR 333 Stage Management I (3, Fa) Basic skills, including assembly of prompt book, blocking notation, and organizational and communication procedures applied in theatre production.

THTR 335 Scenic Construction (2, FaSp) Technology, organization, and operation of the theatrical scenic shop centered around the proper and safe use of tools, the choosing of materials, and methods of construction. (Duplicates credit in former THTR 131.)

THTR 336 Introduction to Sound Design (3, FaSp) The art and techniques of theatrical sound design. The use of music and ambient sound in theatrical presentations. Design elements as metaphor.

THTR 340ab Intermediate Voice (2-2, FaSp) Extended development of vocal freedom and range, acquisition of articulate speech. Enhancement of vocal power and resonance, techniques for performing with a dialect. Open to BFA Acting majors only. Concurrent enrollment: THTR 315ab, THTR 320ab.

THTR 341x Voice for the Non-Theatre Major (2, Fa) Designed for the non-theatre major focusing on the range, color, texture, and projection of the human voice in a variety of situations. Not available for credit to theatre majors.

THTR 342ab Basic Voice (2-2, FaSp) a: Examination of the individual voice centering on resonance, tone, flexibility, and support through dramatic selections for transmitting meaning and emotion of character. b: Continuation of THTR 342a.

THTR 343 Musical Theatre Audition (3, FaSp) Designed to give students confidence and integrity for auditions in musical theatre. Choosing appropriate material and preparation for the audition and performance. Audition required.

THTR 352ab Intermediate Acting II (2-2, FaSp) a: Building and sustaining character in drama. b: Continuation of world drama. Class performance and critique. Prerequisite: THTR 252b.

THTR 354 Acting Shakespeare (2, FaSp) Basic approach to the acting and analysis of the highly formalized texts of William Shakespeare. Prerequisite: THTR 101; recommended preparation: THTR 252b.

THTR 365 Playwriting I (4, FaSp) Essential elements of playwriting through weekly assignments, students’ initiative, occasional productions of scenes, and extensive classroom analysis.

THTR 366 Playwriting II (4, FaSp) Continuation of the work begun in THTR 365. Prerequisite: THTR 365.

THTR 370 Special Problems (1-4, FaSp) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

THTR 385m Drama as Human Relations (4) A focus on American ethnic and multicultural diversity from the perspectives of gender, race, and myth as revealed in plays, film, and other performance media.

THTR 396 God, Drama and Entertainment (4, FaSp) An exploration of music, power, sex and love in relation to secular and spiritual values represented by contemporary theatre media.

THTR 397 Theatre Practicum I (1-4, max 12, FaSp) Substantive participation in productions sponsored by the school and supervised by the faculty.

THTR 403 The Performing Arts (4, FaSp) An interdisciplinary inquiry into the aesthetics of the performing arts. Examines a dramatic classic and its adaptation into musical theatre, opera, ballet, and film. (Duplicates credit in the former THTR 303.)

THTR 404 Acting Theory (4, FaSp) Examination of the theoretical foundations of acting as an art form through the reading of primary historical texts.

THTR 405m Performing Identities (4, FaSp) This course explores the live performance medium as a creative means of social redress and personal expression. (Duplicates credit in the former THTR 393m.)
THTR 406 Theatre on the Edge (4, FaSp) An exploration of the art of theatre at the edge of possibilities.

THTR 407ab Drawing and Rendering for the Theatre (2, FaSp) Drawing and rendering techniques appropriate for theatre designers. a: Drawing and drawing theory. b: Drawing and rendering. (Duplicates credit in former FA 407ab.)

THTR 408ab Dialects (2, FaSpSm) a: The study of standard American stage dialect using the international phonetic alphabet. b: The study of accents and regional dialects. Prerequisite for b: THTR 408a.

THTR 415ab Physical Theatre II (2, FaSp) Advanced Physical Acting focusing on principles of verbal/non-verbal improvisation and communication. Elements of textual analysis, including development of character mask and of the ensemble. Open to BFA Acting majors only. Prerequisite: THTR 415a.

THTR 417 Stage Combat (2, FaSp) Introduction to safe and effective portrayals of violence for the stage. Training and practice of unarmed stage combat skills. Recommended preparation: THTR 216.

THTR 419 Alexander Technique for Performers (2, FaSp) Training and practice in the work of F.M. Alexander. A clear and systematic look into the underlying principles that govern human movement.

THTR 420ab Advanced Acting (2, FaSp) Contemporary material from plays and screenplays with an emphasis on individual challenges and problems. Open to BFA acting majors only. Prerequisite: THTR 320b; corequisite: a: THTR 415a, THTR 440a; b: THTR 415b, THTR 440b.

THTR 421 Public Speaking as Performance: A Course for Non-Actors (2, FaSpSm) Public speaking approached as performance, using acting techniques to communicate with confidence, clarity and charisma.

THTR 430 Stage Management II (3, Sp) Application of stage management procedures required in the professional theatre. Prerequisite: THTR 332.

THTR 431 Seminar in Theatre Design (2, FaSp) Research into the application of contemporary topics relevant to theatrical design within the diverse cultural environment of the greater Los Angeles area.

THTR 432ab Scene Design II (3-3, FaSp) Continuation of THTR 330. Evolution of scene design through analysis of script, environmental factors, and styles. Prerequisite: THTR 330.

THTR 433ab Costume Design II (3, FaSp) Evolution of costume design through analysis of script, environmental factors, and styles. Prerequisite: THTR 332.

THTR 434ab Lighting Design II (3, FaSp) Continuation of THTR 333. Evolution of lighting design through analysis of script, environmental factors, and styles. Prerequisite: THTR 332.

THTR 435 Advanced Theatrical Drafting (3) Drafting style and complex graphic communication. Emphasis on creating professional plates, developing an individual style and graphic problem solving.

THTR 436 Sound for Theatre (3, Fa) Introduction to electronic sound and sound reinforcement, including basic equipment, recording, editing, and show operation.

THTR 437 Scene Painting (3, Sp) Techniques, materials, and equipment of the scenic artist, including both historic and modern methods. Recommended preparation: paint and drawing experience.

THTR 438 Technical Theatre (3, Sp) Theory and practice of technical theatre. Emphasis is on technical problem solving and graphic solutions to technical theatre. Prerequisite: THTR 220.

THTR 439 Stage Properties (3, Sp) Organization, management, and construction of properties for the theatre.

THTR 440ab Advanced Voice (2, FaSp) Continuation of exercises related to the individual student for the stage. Open to BFA students only. Prerequisite: THTR 340a.

THTR 441 Advanced Sound Design (3, Sp) Advanced exploration of theatrical sound design theory and related technology; creative uses of music, sound effects, and audio equipment in modern theatres. Prerequisite: THTR 426.

THTR 442 Voice-over Acting (2, FaSp) Acting techniques, recording studio technology and editing for the field of voice acting and voice-overs. Prerequisite: THTR 342a or THTR 408a.

THTR 444 Applied Voice: Speech and Text (3, Fa) Intensive study of speech and voice regarding text, context, environment, dynamics, range, and accent. Recommended preparation: THTR 342b.

THTR 452ab Advanced Acting (4-4, FaSp) Intensive investigation and performance of audition techniques. Scene study skills developed, including cold readings, first readings, rehearsal procedure, performance process, camera/taping. Prerequisite: THTR 352ab.

THTR 454 Acting Shakespeare II (2, FaSp) A continuation and deeper investigation of the analysis and performance of the highly formalized texts of William Shakespeare. Prerequisite: THTR 354.

THTR 458 Visiting Artist Workshop (2, max 4, FaSp) A workshop course taught by the visiting artist holding the George Burns chair. Course topics will be determined by the instructor.

THTR 459 Songwriting for the Musical Theatre (2, FaSp) Structure, character and intention in songwriting for the musical theatre. Writing for the voice and examination of how form follows content. Portfolio submission required.

THTR 465 Playwriting III (4) Analysis of a full-length play or its equivalent with continued production opportunity. Prerequisite: THTR 366.

THTR 466 Playwriting IV (4) Continuation of the work begun in THTR 465. Prerequisite: THTR 465.

THTR 470 Sketch Comedy for Theatre (2) A writing-performance workshop in which the students create, rehearse, and perform original sketch comedy material.

THTR 471 Senior Showcase (2) Designed to provide the graduating students with an opportunity to select, prepare and perform for agents, directors and producers in film, television and theatre. Audition required. Open to Theatre majors only.

THTR 472 Professional Preparation for Actors (2, FaSp) Introduction to the skills, knowledge, and promotional materials that will enable the student to manage an independent career in the performing arts. Open only to theatre majors at the senior level. Recommended preparation: THTR 101, THTR 252ab.

THTR 475 Acting on Camera: The Collaborative Process (4, max 8) Acting students will learn to develop on-camera acting skills and to collaborate with student directors and cinematographers from the School of Cinematic Arts. Recommended preparation: 300-level acting course.

THTR 476m African American Theatre, Dance, and Performance (4) A survey of African American theatre and cultural performance traditions as a reflection of both African American culture and American history.

THTR 477 Theatre and Therapy (4, Fa) Explores theatre as a healing art form. Techniques include games, improv, playback theatre, Boal’s and Moreno’s drama therapy, and Jungian dream theatre to name a few. Work with incarcerated youth, gay/lesbian/bi teens, elderly, disabled and other populations.

THTR 478ab Theatre for Youth (2-2) a: Theory and practice of youth theatre, including development and rehearsal of mainstage productions. Emphasis on multimedia and multicultural pieces. Enroll by audition or interview only. b: Continuation of a, bringing developed pieces into production for regional K-12.

THTR 479 Solo Performance (4, Fa) A writing-performance workshop in which students write, develop, and rehearse original, autobiographical and character monologues and perform them at the end of the semester.

THTR 480ab Performance for Camera (2-2, FaSpSm) a: Structured to address the dynamics of acting in relation to film/television. Refining the students’ understanding of the similarities/differences between acting on stage/film. (Duplicates credit in former THTR 480.) b: Continued exploration of acting for film/television. Furthering the student’s understanding of the similarities/differences between acting on stage/film.

THTR 481 From the Border to Broadway (4, Fa) An investigation of the role that Latina/o plays and performances have played in creating and documenting a contemporary American experience of the theatre.

THTR 484 Acting in Television Commercials (2, FaSpSm) An on-camera, workshop-style introduction to techniques, perspectives and theories unique to performing in television commercials. Recommended preparation: 300-level acting or voice class.

THTR 485 Advanced Solo Performance (4, Sp) An advanced writing and performance workshop. Students will write and rehearse an extended personal monologue to be presented at the end of the semester. Prerequisite: THTR 479.

THTR 486 Creating Characters (4) A writing workshop devoted to the creation of living, breathing characters, exploring a range of techniques designed to develop authenticity.

THTR 487 Promotion for the Performing Arts (4, Fa) Introduction and overview of all aspects of marketing the arts including both non-profit and commercial organizations.

THTR 488m Theatre in the Community (4, Fa) Research and actively develop the theory of theatre as a moving political, social, economic and spiritual force of change within the local community.

THTR 489 Theatre Internship (2-6, max 12, FaSpSm) Practical experience in the entertainment industry.
THTR 490x Directed Research (1-8, max 12, FaSpSm)

Individual research and readings. Not available for graduate credit.

THTR 491 Theatre Organization and Administration (4, Fa) Budgets, contracts, box-office procedures, public relations; personnel and executive policies of the school, community, and professional theatre.

THTR 492 Producing Theatre (4, Sp) Analysis of all procedures involved in producing theatre (commercial or non-profit) including legal and business guidelines and contracts. Prerequisite: THTR 491.

THTR 493ab Periods and Styles (2-2, FaSp) A survey of the influence of historical and cultural events on the evaluation of theatrical styles. a: Classical to Jacobean. b: Restoration to 20th century.

THTR 494 Raising Money for the Arts (4, Sp) Overview of fundraising techniques for non-profit theatre including grantsmanship, board development, direct mail soliciting, and money raising activities and events.

THTR 495 Experimental Theatre Workshop I (4, max 8, FaSp) Continuation of THTR 493ab. Enrollment by audition only.

THTR 496 Experimental Theatre Workshop II (4, max 8, FaSp) Intensive participation in a production sponsored by the school and supervised by the faculty, to increase and develop artistic growth. Prerequisite: THTR 397.

THTR 498 Production Analysis and Performance (4) Investigation and analysis of the work of a major dramatist and his milieu; production of one of his plays.

THTR 499 Special Topics (2-4, max 8, FaSp) Studies in selected areas of theatre art. Intensive practice in role and script interpretation and its psychological relationship to the audience.

THTR 501 Poetry and Prose into Drama (4, Sp) Plays for the stage shall be written using public-domain poetry and prose as inspiration and source material, complemented with exploring poetry, prose, and varied dramas as context for the student writer. Students should be well-versed in literature, and have written in one or more genres. Recommended preparation: reading poetry and novels.

THTR 504 The Art of Collaboration and Ensemble (2, FaSp) An investigation of the role that collaboration plays in making ensemble work. MFA Actors will collaborate with MFA Dramatic Writers in creating an ensemble company.

THTR 505 Staging Community-based Theatre (3, Sp) Explores the theory and practice of staging community-based popular theatre, including Theatre of the Oppressed, street theatre, witness theatre, agit-prop and festival theatre events.

THTR 510 Writing the Short Drama (2, FaSp) The art and craft of dramatic writing. In particular exploring its dimensions with regard to character and story development in the ten minute play.

THTR 512 Studies in Dramatic Analysis (2, FaSp) A skill-based workshop that uses a historical survey of theatre texts to develop critical reading skills along two different tracks: Acting and Dramatic Writing.

THTR 513 Seminar in History of the Theatre (4) Bibliography, historical evolution, patterns, and techniques of the theatre from primitive to modern times.

THTR 515abcd Advanced Movement (2-2-2-2-2-2, FaSp) Advanced exercises in movement for the use of the body in relation to the stage. Corequisite for e: THTR 496, THTR 540e, THTR 555, THTR 575; corequisite for f: THTR 520e, THTR 540f, THTR 537f.

THTR 520abcd Advanced Acting (4-4-2-4-2, FaSp) Advanced training in acting skills; emphasis upon individual needs. Corequisite for e: THTR 515f, THTR 540f, THTR 571f, THTR 537f.

THTR 521 Engaging Community Narratives (3, Fa) Provides training for actor/artist partners with non-actors in community-based theatre projects.

THTR 525 Seminar in Contemporary Theatre (4, SpSm) Analysis of trends, problems, and the work of major figures in the contemporary theatre.

THTR 526 Seminar in Dramatic Literature (4) Study and analysis of world drama best representing changes in philosophies, aesthetics, and tastes of audiences.

THTR 528 Seminar in Dramatic Analysis (4, Fa) Drama as a living art; reading, analysis, and discussion of plays which best illustrate principles of effective playwriting.

THTR 530 Seminar in Dramatic Criticism (4) Dramatic criticism from the classical Greek period to the modern.

THTR 531 Seminar in the American Theatre (4, 2 years, SpSm) History and literature of the American theatre from its beginning to the present day.

THTR 533 Seminar in Aesthetics of the Theatre (4) Aesthetic theories which apply to the art of the theatre; emphasis upon acting and play direction.

THTR 540abcd Advanced Voice Diction (2-2-2-2-2-2, FaSp) Advanced individual vocal development and application to a variety of professional and performance circumstances. Corequisite for e: THTR 515e, THTR 575, THTR 480, THTR 555, corequisite for f: THTR 515f, THTR 520e, THTR 571f, THTR 537f.

THTR 541 Diction and Dialects (2, Fa) Fundamentals of speech, diction, dialects and accents, including work in the International Phonetic Alphabet.

THTR 544 Embodied Poetics (2, Fa) Explores the relationship between vocal and physical expression and the spontaneity of human impulse within the community-based context.

THTR 545 Visiting Artists Master Seminar (4, Sp) A workshop taught by a master visiting artist, concentrating on his/her specific expertise in relation to dramatic writing. Course topics determined by the instructor. Recommended preparation: reading or viewing the work of the visiting master artist.

THTR 550ab Seminar in Scene Design (1-3, FaSp) Theory and practice of scene design; an intensive investigation into the relationship of a script to the visual statement.

THTR 552ab Seminar in Costume Design (3-2, FaSp) Theory and practice of costume design; intensive investigation into the relationship of a script to the visual statement.

THTR 553ab Seminar in Lighting Design (3-2, FaSp) Theory and practice of lighting design; intensive investigation into the relationship of a script to the visual statement.

THTR 554 Visual and Spatial Relationship (2, FaSp) The illustration and understanding of how space can be used to add emotional undertone, contextual information and strong staging ideas to a production.

THTR 555 Directed Fundamentals (2) To provide the basic foundations for the conceptualization and execution of works for the stage.

THTR 556ab Directing (2-2) A seminar/workshop in developing and testing directorial skills: text, design, acting, producing, and communication with an audience. Prerequisite: a: THTR 555; b: THTR 556a.

THTR 558ab Design for Directors (2-2) Basic elements of scenic, costume, props, lighting, sound, and make-up design, as they apply to the art of directing. Prerequisite: a: THTR 555; b: THTR 558a.

THTR 572ab Studies in Playwriting (4-4) a: Extensive examination of playwriting, dramaturgical development process, and readings of work toward the completion of professionally promising plays. b: Continued extensive examination of playwriting, dramaturgy, development, and readings of work toward the completion of professionally promising plays.

THTR 588 Popular Theatre for Education and Development (3, Sp) Theory and practice of Theatre in Education and Theatre for Development as resources for conscientization and liberation of communities at the margins of power.

THTR 570 Acting on Camera: The Collaborative Process (3) Study of acting methods and techniques for the camera, focusing on collaboration with directors in the realization of screenplays.

THTR 571 Professional Seminar (2, Sp) Introduction to the world of the professional actor.

THTR 572 Global Dramatic Writing (4, FaSp) “Tour” of non-European and non-European American cultures with regard to their dramatic subject matter and traditions.

THTR 574 Dramatic Writing Across Media for the Playwright (4, FaSp) Intensive overview of career paths for playwrights in a wide array of media as they exist now, and as new opportunities arise.

THTR 575 Creative Production Projects (6) Advanced creative projects for production with emphasis on theatre as a synthesis of the performing arts.

THTR 576 Creative Process for Dramatic Writers (4, Sp) An advanced writing workshop that focuses on critical and deep development of plays that are the centerpieces of student’s thesis portfolios.

THTR 577 Theatre and Therapy for Cultural Fieldwork (3, Sp) Explores the theory and practice of theatre and therapy in the cultural fieldwork and community development settings. Recommended preparation: THTR 587.

THTR 578 Theatre of the Oppressed: Theory, Games, and Techniques (4, FaSpSm) Basic theoretical foundations of game playing for populations at the margins of power. Recommended preparation: THTR 521, THTR 544.

THTR 579 Writing Culture (3, FaSpSm) Borrowers from anthropology, popular/community-based theatre, cultural studies, and literature to provide an array of methodologies and approaches to artistic collaboration across cultures and difference.

THTR 586ab Applied Theatre Arts: Los Angeles Residency (2-2, FaSp) a: Academic and group process context for students’ work in their chosen local internships to help students engage with communities as
cultural fieldworkers. b: Supervisory, logistical, and theoretical container for THTR 586a. Engages students in their curricular experiences in the cultural field in partnership with their community-based organizations.

THTR 587 Liberation Arts and Community Engagement – Theory (4, Fa) Historical foundations of liberatory movements using expressive arts towards community-based goals of reciprocal and collaborative empowerment, civil rights, psychological or political freedom and justice.

THTR 588 Liberation Arts and Community Engagement – Praxis (3, Sp) Theory and practice of developing liberatory and Theatre of the Oppressed events, from first community contact to staged public event. Prerequisite: THTR 587.

THTR 590 Directed Research (1-12, FaSpSm) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

THTR 591 Seminar in Producing Theatre (4) A seminar in the theories and processes of producing theatre (commercial and non-profit).

THTR 592ab Participatory Action Research for Community-based Theatre (a: 2, FaSpSm; b: 2, Sm) a: Examination of theories and practices of Participatory Action Research (PAR) to better understand its various forms in community-based contexts using theatre as the research mode. b: Implements the theories and practices of THTR 592a towards the creation of a summative research paper on the local and international applied theatre arts experience.

THTR 593 MFA Project (3, max 4, FaSpSm) Credit awarded upon completion of project. Graded CR/NC.

THTR 594ab Master’s Thesis (2-0, FaSpSm) Credit upon acceptance of thesis. Graded CR/NC.

THTR 595ab Graduate Playwrights’ Workshop (4-4) a: Development of thesis plays utilizing faculty dramaturgical support and involvement of student actors/directors. Includes readings with/without audiences. Simulates professional development process. b: Continued development of thesis plays in a simulated professional development workshop process utilizing dramaturgy and involvement of student actors/directors. Culminates in staged readings.

THTR 597 Theatre Practicum (1-4, max 12, FaSpSm) Preparation, rehearsal, and performance of dramatic works in main stage repertoire.

THTR 598 Applied Theatre Arts: International Internship (2) Supervisory, logistical and theoretical container for students exploring cultural fieldwork in international settings. Prerequisite: THTR 598.

THTR 599 Special Topics (2-4, max 8) Studies in selected areas of theatre art.

USC Rossier School of Education

The USC Rossier School of Education is one of the world’s premier centers for the study of urban education. The school is committed to preparing teachers, researchers, counselors, administrators and curricular specialists for leadership positions. The mission of the USC Rossier School of Education is to improve learning in urban education locally, nationally and globally. Urban areas often face challenges associated with equity and access, poverty, density, mobility and immigration, environmental degradation and strained social conditions around housing, healthcare and crime. Urban education takes place in many contexts including pre-kindergarten through high school, human services, higher education and workplace settings.

We seek to transform urban education by:

- Leading the search for innovative, efficacious and just solutions by engaging in collaborative translational research.
- Preparing and developing educational leaders who are change agents committed to urban education and who possess the competencies needed to address complex educational and social issues.
- Creating mutually beneficial partnerships to ensure our work is field-based and incorporates a diversity of perspectives and experiences.

Our vision is a world where every student, regardless of personal circumstance, is able to learn and succeed. We believe that USC Rossier, as a top tier research institution, has the responsibility and the ability to train the education leaders and to develop the innovative practices inclusive of equity and access that will help realize this vision.

The School of Education is committed to our four academic themes of leadership, diversity, learning and accountability that guide all academic, research and service efforts within our school.

Stephen Crocker Professor of Education: Robert Rueda, Ph.D.

Leslie Wilbur and Norma Lash Wilbur-Evelyn Kellett Professor of Higher Education: William G. Tierney, Ph.D.

University Professors: Lloyd Armstrong, Jr., Ph.D.; William G. Tierney, Ph.D.

Professors: Ron Astr Astr, Ph.D. (Social Work); Estela Mara Bensimon, Ed.D.; Henry Jenkins, Ph.D. (Arensberg); Adrianna Kezar, Ph.D.; Franklin Manis, Ph.D. (Dornsife); Harold F. O’Neill, Jr., Ph.D.; Daphna Oyerman, Ph.D. (Dornsife); Gary Painter, Ph.D. (Price); Lawrence O. Picus, Ph.D.; Robert Rueda, Ph.D.; Gail Sinatra, Ph.D.; John B. Slaughter, Ph.D. (Engineering)

Associate Professors: Patricia Burch, Ph.D.; Darnell Cole, Ph.D.; Alicia Dowd, Ph.D.; Mary Helen Immordino-Yang, Ph.D.; Robert G. Keim, Ed.D. (Dentistry); Julie Ann Marsh, Ph.D.; Tatiana Melguizo, Ph.D.; David Schwartz, Ph.D. (Dornsife); Katharine O. Strunk, Ph.D.; Brendesha Tynes, Ph.D.

Assistant Professors: Morgan Polikoff, Ph.D.; Jamy Stillman, Ph.D.

Professor of the Practice: Marlene Pugach, Ph.D.

Associate Professors of Clinical Education: Mary Andres, Ph.D.; Ruth Gim Chung, Ph.D.; Ginger Clark, Ph.D.; Robert Fillback, Ph.D.; Frederick W. Freking, Ph.D.; Alan G. Green, Ph.D.; Angela Hasan, Ph.D.; Kimberly Hirabayashi, Ph.D.; Charles Lagreco, MFA (Leventhal); Eugenia Mora-Flores, Ph.D.; Julie Slayton, Ph.D.; Kathy Stowe, Ed.D.; Tracy Poon Tambascia, Ed.D.; Patricia Tobeey, Ph.D. (Student Affairs); Kristian M. Venegas, Ph.D.

Associate (Teaching) Professor of Clinical Education: Michael Genzuk, Ph.D.

Research Professors: Jerome Lucido, Ph.D.; Allen Munro, Ph.D.

Research Assistant Professor: Zoe Corwin, Ph.D.

Executives in Residence: Michael Escalante, Ed.D.; Maria Ott, Ph.D.

Emeritus Professor of Clinical Education: Stuart E. Gothold, Ed.D.

Emeritus Professor of Clinical Psychology: Rodney K. Goodear, Ph.D.

Emeritus Professor of Education: Guilbert C. Hentschke, Ph.D.

Emeritus Associate Professor of Clinical Education: William Maxwell, Ph.D.

Degree Programs

The Rossier School of Education offers the following degree programs: Master of Arts, Teaching: Master of Arts, Teaching: Teaching English to Speakers of Other
Graduate Degrees

Admission

Applicants for admission to graduate degree programs must have a bachelor’s degree or its equivalent from an accredited institution. Admission to graduate programs in the Rossier School of Education is highly selective and competitive. A grade point average of 3.0 (A = 4.0) is usually expected as well as satisfactory scores on the Graduate Record Examinations (GRE) General Test and three letters of recommendation. Specific testing and recommendation requirements vary by program. For specific information on admission and application procedures, contact the Office of Admission and Recruitment, (213) 740-0224.

Satisfactory Academic Progress

Students must maintain a grade point average of 3.0 (A = 4.0) or better to stay in good academic standing. Consistent with USC’s overall policies for graduate students, factors other than satisfactory grades may also be taken into consideration in decisions regarding a student’s continuation in a graduate degree program. These factors include satisfactory performance in fieldwork or credentialing requirements, or meeting program-defined professional standards, which are communicated to students at the beginning of the program.

Students who do not earn or maintain a 3.0 (A = 4.0) grade point average in an academic term will be given an academic warning. The academic warning provides notification that the student is subject to dismissal. A student who is not in good academic standing is subject to dismissal, and may be dismissed from a program whenever, in the judgment of the associate dean for the program director of the program in question, it is unlikely that the student will successfully complete his or her program.

Time Limit for Degree Completion

The time limit for completing a master’s degree is five years. The time limit for completing a doctoral degree is eight years. For students who earned an applicable master’s degree within five years prior to admission to the doctoral, the time limit for completion is six years.

The time limit begins with the first course at USC applied toward a specified degree and ends the semester during which all requirements are met.

A primary consideration of the setting of time limits is the currency of the course work and research with respect to the date the degree is to be conferred. Equally important is the concern that the faculty members serving as advisers or committee members be available to the student for the duration of graduate studies at USC.

Occasionally a student finds it impossible to comply with prescribed time limits for completion of a degree. If a significant delay is likely to occur, the student must make arrangements in advance by petitioning for an extension of time. Such petitions will be considered when there is clear justification based on sound academic or critical personal reasons. An academic department may grant an extension of up to one year at a time for a maximum of two years.

Master’s Degrees

Master of Arts in Teaching, Multiple Subject, Single Subject and Single Subject (Music Education)

The Master of Arts in Teaching is designed for individuals who wish to complete requirements for a California preliminary teaching credential or to strengthen their ability to facilitate learning for all students in a K-12 environment (non-credential). Three programs are available: Multiple Subject, Single Subject and Single Subject (Music Education).

Multiple Subject

The MAT Multiple Subject is designed for those interested in teaching at the elementary level. The non-credential option requires a minimum of 30 units; the credential option requires a minimum of 32 units.

Single Subject

The MAT Single Subject is designed for those interested in teaching at the secondary level. The emphasis offers specializations in English, science, mathematics, and social science. The non-credential option requires a minimum of 30 units; the credential option requires a minimum of 32 units.

Single Subject (Music Education)

The MAT Single Subject (Music Education) offers two tracks: choral/general and instrumental. A minimum of 35 units is required.

The Multiple Subject and Single Subject emphases are available online.

Master of Arts in Teaching, Teaching English to Speakers of Other Languages

The MAT, Teaching English to Speakers of Other Languages is designed to prepare aspiring English language teachers, domestic and international, to successfully provide instruction for children, youth or adults in the United States or abroad. This is a non-credential option. A minimum of 30 units is required. The program may be completed on campus or online.
Master of Education, Teacher Leadership

The Master of Education in Teacher Leadership provides current teachers with an in-depth exposure to pedagogy and teacher leadership development. The curriculum is designed to challenge experienced teachers to utilize technology in student-centered ways to improve learning outcomes, provide access to advanced interdisciplinary pedagogical practice, develop their capacity to initiate leadership with peers around improving instruction, and increase their understanding of successful instruction for learners with diverse needs.

Applicants to the program should have significant teaching experience. Public school teachers must hold a current teaching credential; private school teachers without a credential must be able to demonstrate at least three years of full-time teaching experience. Two letters of recommendation are required.

There are five areas of concentration in the Teacher Leadership program: (1) Teaching Science, Technology, Engineering, and Mathematics (STEM) in Elementary Schools to support teachers interested in fostering enthusiastic, confident and creative learning; (2) Differing Abilities, which focuses on understanding the range of learner needs in today's classrooms; (3) Education Specialist Credential, for graduates of the Rostier MAT program seeking to add a Mild/Moderate Disabilities authorization; (4) Secondary Curriculum concentration provides Social Studies and English teachers with methods for integrating the arts, literacy and civics; and (5) Teaching Science, Technology, Engineering, and Mathematics (STEM) in Secondary Schools provides an opportunity for secondary teachers to engage in an advanced, interdisciplinary study of instruction in STEM.

Degree Requirements

The Teacher Leadership program requires a minimum of 32 units including required core courses and completion of a concentration area.

### Concentration Areas

Students select a concentration area from one of the following:

- Teaching Science, Technology, Engineering, and Mathematics (STEM) in Elementary Schools
- Differentiating Abilities
  - Establishing and Maintaining an Effective Classroom
  - Action Research Project
- Education Specialist Credential
  - Differentiated Curriculum and Pedagogy for Gifted Students
  - Assessment and Curriculum for Students with Disabilities
  - Establishing and Maintaining an Effective Classroom
  - Guided Practice: Mild/Moderate Disabilities
- The Secondary Curriculum
  - Literacies in the Content Area
  - Civics Education
  - Integrating the Arts into the Secondary Curriculum
- Teaching Science, Technology, Engineering, and Mathematics (STEM) in Secondary Schools
  - STEM Education in Secondary Classrooms
  - Discourse Analysis and Technology in STEM Classrooms
  - Transforming STEM Education into Teaching Science

### Master of Education, Educational Counseling

The Master of Education degree in Educational Counseling is designed for individuals seeking a career in advancement opportunities in postsecondary education and training. The degree includes a theoretical and practical background in student affairs and counseling.

The program meets current requirements for postsecondary counseling positions in the California state system, particularly for those who wish to work in the public community college system. A minimum of 48 units is required.

### Master of Education, Learning Design and Technology

The Master of Learning Design and Technology program is designed for people who want to significantly improve learning and performance outcomes within their organization. Graduates will be prepared to design, implement, and evaluate learning environments and outcomes for various formal (e.g., corporate, military and government organizations) and informal settings (e.g., museums, science centers and public spaces). The program draws from learning and motivation research, as well as knowledge of how to leverage technology, to design face-to-face, technology-enabled, and blended learning experiences. Through the project-based capstone, students will gain practical experience by designing a learning experience or evaluating an existing learning design. The program consists of 30 units and is delivered online only.

Required electives: 9

### Master of Education, School Leadership

School leadership matters. The Master of Education in School Leadership prepares educational leaders with the knowledge and skills to lead effectively in urban school settings and to accelerate student achievement. Graduates will demonstrate that they can create a high achievement school culture and solve complex performance problems in K-12 schools by being able to advocate for a shared community-driven vision; create a high performance school culture and educational goals; collect data to diagnose causes of achievement gaps; plan appropriate research-based solutions; gather and manage resources; effectively communicate the plan to school administration, faculty, staff and community; and provide support for implementing, monitoring and evaluating progress toward achieving school improvement. All courses are taught through field-based experiences where problems are solved in real work settings, applying research to practice. Students who graduate from the program will be ready to work within the constantly evolving educational landscape of California and other states. A national trip is integrated into the program's curriculum.

The program is open to teachers, counselors, psychologists and other school-based personnel who have worked for a minimum of two years in such positions. Two letters of recommendation are required.

The program is only available online.

Aligned with USC Rossier’s mission to serve high-need students in urban centers, the Certificate in Gifted Education provides graduates of the Master of Arts in Teaching program with the competencies to respond to the needs, interests and abilities of gifted students in either heterogeneous regular classrooms or specific magnet school classrooms defined for gifted and high-ability students.

The Certificate in Gifted Education enables graduates to recognize the manifestations of giftedness among cultural, linguistic and economically diverse students in urban schools, to facilitate the identification of underrepresented students as gifted and to provide differentially appropriate curriculum for them.

*Internal Applicants are students enrolled in the MAT Program
**External Applicants are students not admitted to USC or enrolled in the MAT Program who wish to complete the certificate.

Certificate in Special Education

The Certificate in Special Education provides graduates of the Rossier School of Education with the competencies to respond to the needs, interests and abilities of special needs students in either regular classrooms or specific school classrooms defined for students with documented learning differences. It widens the range of the graduates’ knowledge about teaching and learning allowing them to compete in the contemporary professional marketplace. A certificate in special education is mandatory in some states, and in other states, it is a criterion for consideration to teach special needs students in any type of learning environment. The certificate may be completed concurrently with requirements for the MAT or the M.E. in Teacher Leadership. It is also available online.

Dual Degree Program

Doctor of Education/Master of Business Administration

The Rossier School of Education and the USC Marshall School of Business jointly offer a dual degree program that emphasizes educational leadership and management competencies across the wide variety of education-related organizations in the public, non-profit and for-profit sectors and is designed to prepare students to assume executive leadership positions in these organizations, including schools, universities, educating businesses, regional, state and federal education agencies, education research institutions, and private foundations with education missions. Graduates of the Ed.D./MBA program will be prepared to significantly improve the scope and quality of educational services to targeted populations through the application of management skills to the field of education and of education principles to business enterprises.

A total of 90 units is required for the dual degree: 48 units in the Marshall School of Business and 42 units in the Rossier School of Education.

Students must apply to both the Marshall School of Business and the Rossier School of Education.

Doctoral Degrees

The Rossier School of Education offers the Doctor of Philosophy in Urban Education Policy (Ph.D.) and the Doctor of Education (Ed.D.). Both doctoral programs place strong emphasis on the acquisition of inquiry skills and on the collaborative and interdisciplinary study of issues mutually engaging to both students and the Rossier School of Education faculty members. Both degrees emphasize the acquisition of appropriate research and inquiry skills, but the application of these skills is expected to differ. The Ed.D. student is trained to use educational inquiry skills to solve contemporary educational problems, while the Ph.D. student is trained to contribute to the general and theoretical knowledge about educational issues. The Ed.D. is administered by the Rossier School of Education; the Ph.D. is administered by the Graduate School.

Ph.D. students must also consult the Graduate School section of this catalogue for regulations and requirements pertaining to the degree.
Doctor of Education (Ed.D.)

The Doctor of Education (Ed.D.) is a three-year degree program that equips practitioner-scholars with the skills needed to lead high-performing organizations, connect research with practice and help all students to learn. The program is geared toward working professionals who aspire to be leaders in urban education. Admission requires a master’s degree and a minimum of three years of work experience in a related field.

Admission to Candidacy

Admission to candidacy is a formal action taken by the faculty of the Rossier School of Education. That action is based upon passing the qualifying examination.

Doctoral Dissertation

A dissertation based upon original research is required. An acceptable dissertation must show technical mastery of a special field, capacity for independent research and scholarly ability. The student must be enrolled in 794 Doctoral Dissertation each fall and spring semester after admission to candidacy until the dissertation has been approved. A minimum of two semesters (4 units) is required. Enrollment in 794 prior to admission to candidacy is not permitted and such registration is invalid.

Ed.D. in Organizational Change and Leadership

The Education Doctorate in Organizational Change and Leadership is a three-year degree program that prepares current and future leaders to create conditions that foster continuous improvement in themselves and their organizations. It emphasizes how learning occurs informally and formally in workplaces and serves as a mechanism for change and innovation in organizations and systems. Arranged by four topical streams—problem solving, leadership, dispositions of leaders and reflection—the program seeks to attract a diverse student body of current and emerging leaders who are interested in fostering learning that leads to systemic improvement in their workplaces. The primary emphasis will be on those individuals who currently hold or are seeking leadership positions within colleges/universities, traditional and non-traditional K-12 environments, chief learning officers and their related human resources staff, non-profits and governmental organizations. The degree is not linked to the credentials typically needed to become an administrator in a K-12 environment, including becoming a principal or superintendent. The degree requires a minimum of 60 units. Students with a prior master’s may enter with Advanced Standing, reducing their units to 43. It is delivered only online.

Areas of Concentration

There are four areas from which students must select a specialization: K-12 Leadership in Urban School Settings, Educational Psychology, Higher Education Administration and Teacher Education in Multicultural Societies.

Unit Requirement

The Ed.D. requires completion of 60 units of course work. A maximum of 4 dissertation units (794 Doctoral Dissertation) may be applied toward the degree. Students admitted with Advanced Standing complete a minimum of 43 units.

Core Program

Ed.D. students are required to complete 13 units of core course work: EDUC 605 Framing Educational Leadership, EDUC 523 Challenges in Urban Education: Accountability, EDUC 524 Challenges in Urban Education: Diversity, EDUC 523 Challenges in Urban Education: Leadership, and EDUC 523 Challenges in Urban Education: Learning.

Methods

All Ed.D. students must complete EDUC 532 Inquiry Methods I and EDUC 536 Inquiry Methods II for a total of 6 units.

Research

Students must complete 6 units of research course work (EDUC 792 Critique of Research in Education and EDUC 796 Research).

Electives

In consultation with assigned advisers, students take 14 units of elective course work.

Admission to Candidacy

Admission to Candidacy is a formal action taken by the faculty of the Rossier School of Education. That action is based upon passing the qualifying examination.

Global Executive (Ed.D.)

The Global Executive Ed.D. prepares tomorrow’s transformational educational leaders, policy makers, administrators and change agents for their challenging task of improving individual and national educational outcomes. The curriculum is designed to enhance the professional experience of senior educational leaders and policy makers by:

- Increasing their understanding of global trends and the implications of those trends for their work;
- Challenging them to utilize evidence and theory-based approaches in problem solving;
- Developing their capacity to effectively use complex data in decision making; and
- Providing access to key leaders and leading education scholars.

The program will focus on achieving large-scale improvements across educational systems through strategic use of policy, innovative practice and assessment. The curriculum stresses the examination of educational solutions from around the world as participants work with their own, local challenges.

Classes are delivered in Los Angeles and in Hong Kong. The total units required for the degree is 60. A maximum of 4 project units (EDUC 764 Consulting Project) may be applied toward the degree. Students admitted with advanced standing complete a minimum of 50 units.

Additional course work to be approved by 10
program faculty

Doctor of Philosophy in Urban Education Policy
(Ph.D.)

Program Requirements
The Ph.D. program requires a minimum of 63 units of course work, comprising the following elements: Core Block (16 units), Concentration Block (15 units), Research Block (15 units), Cognate Block (12 units) and Dissertation Proposal and Dissertation Block (5 units).

Core Block
The core represents the essential knowledge that serves as the groundwork for later course work and for other research and scholarly activities within the program and beyond with a particular focus on urban education. This work is completed in the first year of full-time study.

Concentration Block
Courses in this block are linked to two or the four areas of concentrations available in the Rossier School of Education (higher education/community college; for leadership and leadership in urban education settings). Courses in this block permit students to consider applied problems in collaboration with advanced Ed.D. students.

Research Block
Courses in this block provide the basic tools to pursue systematic, programmatic, empirical investigation. It includes qualitative and quantitative elements with the understanding that complex educational problems require a variety of investigative approaches. Areas required include research design, analysis of variance/multiple regression, qualitative methods, and one elective in measurement, advanced qualitative or quantitative analysis, or a related area. Courses may be taken inside or outside the Rossier School of Education.

Cognate Block
This block is designed for students to pursue interdisciplinary approaches to educational issues, and may consist of courses inside or outside the Rossier School of Education. The specific courses are determined in conjunction with the adviser.

Dissertation Block
This block includes preparation for the qualifying examination and initial dissertation proposal. It is taken during the semester of the qualifying examination and involves intensive collaboration with the adviser and the qualifying exam committee.

Transfer of Course Work
The maximum number of transfer credits that can be applied toward the degree is 20 units. The faculty of the student’s degree program determines whether transfer credit is applicable toward a specific graduate degree.

Faculty Adviser
A designated faculty member provides the academic advisement for entering graduate students at the point of admission. A faculty member is appointed to serve as the adviser until an approved qualifying exam committee is established.

Screening Process
When students have completed the core course work, the doctoral screening committee assesses their performance and makes a decision about their readiness to continue in the program. Students are notified of the results by the Ph.D. program chair. If the decision is to continue, a formal program of studies and a qualifying exam committee is established.

Qualifying Exam Committee
The qualifying exam committee is composed of at least five members. A minimum of three, including the chair, must be from the Rossier School; one must be a faculty member from outside the Rossier School. Normally, all members of the qualifying exam committee are regular faculty with the rank of assistant professor or above in departments offering the Ph.D.

Qualifying Examinations
As a prerequisite to candidacy for the Ph.D., students must pass written and oral qualifying examinations. The written qualifying examination is designed to assess a student’s readiness to undertake dissertation research and to assess the student’s ability to critically analyze and synthesize theoretical and methodological knowledge. The oral portion consists, in part, of a teaching and research portfolio. The teaching portfolio documents and reflects the student’s development and productivity in thinking about course content and instructional delivery. The research portfolio documents and reflects the student’s development of productivity in research and writing from the point of entry into the program.

Admission to Candidacy
Admission to candidacy is a formal action taken by the faculty that is based upon passing the qualifying examination and completing all Ph.D. course requirements (with the exception of 794A Doctoral Dissertation). Notification of admission or denial of admission to candidacy is by letter from the associate vice provost for graduate programs.

Dissertation Committee
After admission to candidacy and approval of the dissertation proposal, the Ph.D. qualifying exam committee is known as the dissertation committee and is usually reduced to three members. The committee will include one faculty member from outside the Rossier School of Education and will be chaired by a tenure track faculty member.

Doctoral Dissertation
After the qualifying examination is passed, students must enroll in 794 Doctoral Dissertation each semester, except summer sessions. After admission to candidacy until all degree requirements have been completed. A minimum of two semesters (4 units) is required. A maximum of 4 dissertation units may be applied to satisfy the degree requirement. While enrolled in 794A, students will develop a dissertation proposal in collaboration with the adviser. The dissertation committee grants final approval for the proposal. Credit for 794A and permission to enroll in 794B will only be given after the dissertation proposal is approved. IRB (Human Subjects Institutional Review Board) approval is required for all dissertation studies.

Credential Programs
A credential is a license issued by the California Commission on Teacher Credentialing (CCTC) to persons wishing to legally teach or perform certain other professional services in California’s public schools. USC is one of several institutions authorized to recommend qualified persons to the CCTC for receipt of credentials.

There are two categories of credentials offered in the Rossier School: teaching and service. Requirements for these credentials may be obtained by calling the appropriate phone number listed below. Credential requirements may change due to state law. Students are advised to consult periodically with the Rossier School of Education for current credential requirements.

Teaching Credentials
California has a two-tier credential structure. A five-year preliminary credential is the first credential issued after an individual meets basic credential requirements. A clear credential is issued when all credential requirements have been completed.

Multiple Subject Teaching (MST) authorizes the holder to teach in a self-contained classroom such as the classrooms in most elementary schools. A teacher authorized for multiple subject instruction may be assigned to teach in any self-contained classroom (preschool, grades K-12 or many subjects within a self-contained classroom). This classroom situation is generally found in preschool and elementary grades or in classes organized primarily for adults. In addition, the holder of a Multiple Subject Teaching Credential may serve in a core or team teaching setting.

Single Subject Teaching (SST) authorizes the holder to teach a specific subject(s) named on the credential in departmentalized classes such as those in most middle schools academic area. This classroom situation is generally found in middle and senior high schools. A teacher authorized for single subject instruction may be assigned to teach any subject on his or her authorized fields at any grade level: preschool, grades K-12 or in classes organized primarily for adults.

All teacher candidates must meet the following requirements in order to be recommended/endorsed for a teaching credential: successful evidence of completion and passing of the TPA (Teaching Performance Assessment) and verification of training in cardiopulmonary resuscitation (CPR) that covers infant, child and adult CPR skills.

Teacher certification rules and requirements vary greatly by state. Completion of a CCTC-approved program does not guarantee certification or licensure in another state. Prospective teacher candidates are strongly advised to learn about their state’s requirements and to review the following accreditation statements:

Indiana
Accredited in Indiana by the Indiana Commission on Proprietary Education (CPE).

Minnesota

The University of Southern California is registered as a private institution with the Minnesota Office of Higher Education pursuant to sections 136.A.61 to 136A.71. Registration is not an endorsement of the institution. Registration does not mean that credits earned at the institution can be transferred to all other institutions.

Washington

University of Southern California is authorized by the Washington Student Achievement Council and meets the requirements and minimum educational standards established for degree-granting institutions under the Degree-Granting Institutions Act. This authorization is subject to periodic review and authorizes University of Southern California to offer specific degree programs. The Council may be contacted for a list of currently authorized programs. Authorization by the Council does not carry with it an endorsement by the Council of institution or its programs. Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the Council at P.O. Box 43430, Olympia, WA 98504-330.

Prospective Washington state students are advised to contact the Office of the Superintendent of Public Instruction at (360) 725-6320 or profed@k12.wa.us to determine whether this education program is approved for teacher certification or endorsements in Washington state. In addition, teachers are advised to contact their individual school district as to whether this program may qualify for salary advancement.

Missouri

USC is approved by the Missouri Coordinating Board for Higher Education to deliver its online program to residents.

Tennessee

USC is authorized by the Tennessee Higher Education Commission. This authorization must be renewed each year and is based on an evaluation by minimum standards concerning quality of education, ethical business practices, health and safety, and fiscal responsibility.

If a complaint is not settled at the institutional level, the student may contact the Tennessee Higher Education Commission, Nashville, TN 37243-0830, (615) 741-5293. If the institution uses a mediation clause in its enrollment agreement, the catalogue must describe the steps required of the student and/or the institution to initiate the mediation process.

For inquiries, contact the MAT@USC office at (213) 743-2127.

Services Credentials

The Administrative Services Credential authorizes the holder to provide a variety of services in grades 12 and below, including preschool, and in classes organized primarily for adults. USC recommends candidates for the Clear Preliminary Administrative Services Credential. A prerequisite for admission to this program is admission to the Ed.D. program.

For inquiries, contact the Ed.D. Program Office, (213) 740-9323.

The Pupil Personnel Services: School Counseling Credential allows the holder to provide the following services:

- Techniques for facilitating individual growth and development to achieve academic success
- Human assessments
- Problem prevention and early intervention
- Consultation services
- Psychological education
- Coordination and development of school services
- Legal enablement and constraints
- Referral and utilization of services

USC recommends candidates for the School Counseling Credential that also authorizes the holder to perform the following duties:

- Develop, plan, implement and evaluate a school counseling and guidance program that includes academic, career, personal and social development.
- Advocate for the high academic achievement and social development of all students.
- Provide schoolwide prevention and intervention strategies and counseling services.
- Provide consultation, training and staff development to teachers and parents regarding students’ needs.
- Supervise a district-approved advisory program as described in California Education Code, Section 44060.

For inquiries, contact the Master’s Program Office, (213) 740-2355.

Special Programs

Professional Development

The Office of Professional Development Programs offers a variety of non-degree and certificate programs for the education professional.

Certificate programs include: Professional Preparation for Reading, Differentiated Curriculum for Gifted and High-Ability Learners, School Business Management, and School Business for Site Professionals.

Professional Development also offers the two-day Summer Gifted Institute and Teacher Demonstration School intended for teachers of gifted and high-ability learners. Additionally, workshops are provided to new teachers who are in the induction phase of their practice.

The Office of Professional Development Programs provides fully customized programs as well as customized versions of their open enrollment programs. Some key areas of expertise include adult learning; teaching and learning with technology; differentiated curriculum; school district leadership development; and data-driven decision-making. In tandem with the USC Language Academy, the office also supports short-term programming for international students who desire an immersive experience in the education profession.

For further information, contact the Office of Professional Development Programs at (213) 740-7775.

Courses of Instruction

The terms listed are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

- Education (EDUC)
- Education Counseling (EDCC)
- Curriculum, Teaching and Special Education (CTSE)
- Educational Policy, Planning and Administration (EDPA)
- Educational Psychology and Technology (EDPT)
- Higher and Postsecondary Education (EDHP)

Courses of Instruction

The terms listed are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

Education (EDUC)

EDUC 140 Mind, Behavior and Development: Learning in a Diverse World (4, FaSpSm) Examination of current research about learning and motivation in the context of human diversity.

EDUC 200 Introduction to the Teaching Profession (3) Identification and discussion of current issues and trends in schools and the teaching profession. Introduction to the development of a professional portfolio.

EDUC 204 Sociology of Education (3, FaSp) Introduction to the sociological foundations of education through focused study of schools, teacher-student relations, and classroom processes as they relate to social stratification.

EDUC 205 Child Development and Learning in Schools (3, FaSp) Introduction to processes of development and learning in school aged children, with an emphasis on school contexts.

EDUC 342 Undergraduate Research Methods (2, 5p) (Enroll in AMST 392)

EDUC 409 Foundations of Language Education (3, FaSp) Overview of research and current theories in bilingual, second language, and foreign language instruction.

EDUC 410 Teaching of Reading and Writing (4, FaSp) Analysis of reading/writing processes; methods/materials for teaching literacy in elementary schools; issues in biliteracy and instruction; classroom observation/participation in small group instruction. Admission to the major.

EDUC 413 Methods and Models of Instruction for Language Minority Students (2, FaSp) Curriculum materials and teaching strategies for use in successfully teaching language minority students in both elementary and secondary schools.

EDUC 415 Content to Pedagogy: Mathematics in the Elementary School (2, FaSp) Bridging college-level mathematics content and elementary school curricula to design developmentally appropriate mathematics instruction. Concurrent enrollment: EDUC 424a or EDUC 424b.
EDUC 416 Content to Pedagogy: Art in the Elementary School (2, 3p) Transformation of content in art to curriculum in the elementary classroom. Corequisite: EDUC 424b.

EDUC 417 Content to Pedagogy: From Science Content to Science Curriculum (3, FaSpSm) An overview of the goals and content of science instruction at the elementary level coupled with appropriate science curricular and pedagogical models. Concurrent enrollment: EDUC 424a or EDUC 424b.

EDUC 418 Content to Pedagogy: From Social Sciences to Social Studies (2, FaSpSm) Content, concepts, methods, and values for integrating the social sciences in the social studies. Concurrent enrollment: EDUC 424a or EDUC 424b.

EDUC 419 Content to Pedagogy: P.E. for Elementary Students (2, 3p) Transformation of content in Physical Education to curriculum in the elementary classroom. Corequisite: EDUC 424b.

EDUC 422ab Curriculum and Methods in Elementary Education (2-2, FaSpSm) Curriculum materials and teaching procedures in the elementary school. Prerequisite: EDUC 410; concurrent enrollment: a: EDUC 423a; b: EDUC 423b.

EDUC 424ab Observation and Directed Teaching in Elementary Schools (3-3, FaSpSm) Observation and experience in teaching under supervision in elementary schools (one semester at the kindergarten-primary level and one semester in the intermediate or upper grades). Concurrent enrollment: a: EDUC 424a; b: EDUC 424b.

EDUC 490 Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

EDUC 499 Special Topics (2-4, max 8, FaSpSm) Seminar in selected topics in education. Specific topics to be determined at the time seminar is offered.

EDUC 500 The Counseling Process (3) Theoretical foundations, models, values, and assumptions underlying psychological counseling; cross-cultural perspectives, ethical and legal considerations. (Duplicates credit in former EDCO 500.) Concurrent enrollment: EDUC 507.

EDUC 501 Instruction for Teaching English as a New Language (3, FaSpSm) Teaching linguistically and culturally responsive to linguistic minority students. Topics include learning theories, sociocultural contexts of language development, and assessment of language and non-language competencies. (Duplicates credit in EDUC 542ab) Open only to MAT and MAT (online) students.

EDUC 502ab Teaching Secondary School Science (3-4, FaSpSm) Strategies, methods, and materials for teaching science to all learners in secondary classrooms. (Duplicates credit in EDUC 519.) Open only to MAT Single Subject and Single Subject (online) students.

EDUC 503 Learning and Motivation (3, FaSpSm) Design and advancement of learning and motivation outcomes in various environments through a systematic examination and application of current research.

EDUC 504 Foundations of Literacy Development and Instruction (2-2, FaSpSm) Application of a balanced, integrated, interactive perspective to teaching reading in an elementary classroom. Foundational skills needed in the developmental phase of learning to read. Open only to MAT Multiple Subject and Multiple Subject (online) students.

EDUC 505 Integrating Literacy in Secondary Content Instruction (2, FaSpSm) Facilitation, mediation and intervention in the development of literacy and language integrated within the content areas. Connection between language and literacy to developing content knowledge. Open only to MAT Single Subject and Single Subject (online), TESOL and TESOL (online) students.

EDUC 506 New Media Literacies in High Needs Schools (2, FaSpSm) Instructional procedures and resources for encouraging secondary students’ interests in communications, cultural studies, media production, and literacy education. Open only to MAT Single Subject, Single Subject (online), TESOL and TESOL (online) students.

EDUC 507 Professional Identity, Law and Ethics for Counselors (3) History of the field of counseling and professional identity development for counselors are addressed. Examination of current legal, ethical, and other professional issues in counseling. Concurrent enrollment: EDUC 509.

EDUC 508 Creating Communities of Interest (2, FaSpSm) Framing the graduate experience for master’s students. Establishing a professional foundation and philosophy as educators.

EDUC 509ab Teaching Mathematics in Secondary Classrooms (2-4, FaSpSm) Strategies, methods, and materials for teaching mathematics to all learners in secondary classrooms. (Duplicates credit in EDUC 545.) Open only to MAT Single Subject and Single Subject (online) students.

EDUC 510 Foundations of Learning for the TESOL Classroom (3, FaSpSm) Relationship of learning theories to second language learning and to student assessment, motivation, self-regulation, and classroom management in the TESOL classroom. Open only to MAT TESOL and TESOL (online) students.

EDUC 511 Introduction to Counseling (3, FaSpSm) The role of the school counselor. An overview of key elements in increasing access to and equity for primary and secondary education for all students.

EDUC 512 Reading and Writing Methods for Secondary Teaching (2, FaSpSm) Analysis of reading/writing processes; methods for teaching literacy in grades 9-12; issues in biliteracy and instruction.

EDUC 513ab Teaching English Language Arts in Secondary Classrooms (2-4, FaSpSm) Strategies, methods, and materials for teaching English to all learners in secondary classrooms. (Duplicates credit in EDUC 553.) Open only to MAT Single Subject and Single Subject (online) students.

EDUC 514 School Counseling Seminar (3, 5p) Current issues and problems in school counseling; emphasis is on K-12 learning and achievement.

EDUC 515 Theories of Marriage and Family Therapy (3) Major psychotherapeutic orientations relating to family systems, marital relationships, and communications theory applied to the family unit. (Duplicates credit in former EDCO 515.) Prerequisite: EDUC 500, EDUC 507, EDCO 541.

EDUC 516 Framing the Social Context of High Needs Schools (3, FaSpSm) Introduction to the Master of Arts in Teaching Program. Relationship between the actions of the teacher and student learning in the classroom and school context. (Duplicates credit in EDUC 517ab) Open only to MAT and MAT (online) students.

EDUC 517ab Understanding the Social Context of Urban Schools (2-2, FaSpSm) Examination of critical issues in diverse contemporary classrooms (social class, language, race, ethnicity, and ability); includes practices in relation to schools and community. Open only to MAT and MAT (online) students.

EDUC 518 Application of Theories of Learning to Classroom Practice (3, FaSpSm) Learning theories and instructional practices for teaching. Procedures involved in curriculum development, planning, evaluation, and practical application. Open only to MAT and MAT (online) students.

EDUC 519 Human Differences (3) Equity and diversity in learning environments. Issues in teaching special populations. Beliefs about how people learn. Inclusive environment for special population research in the general classroom. Open only to MAT and MAT (online) students.

EDUC 520 Counseling for College and Career Readiness (2, FaSpSm) Theoretical foundations of individual and systemic characteristics that impact college and career choices. Consideration of economic, political, social, and policy issues.

EDUC 521 Assessment and Instruction for Diverse English Learners (3, FaSpSm) Assessment practices and strategies in English language instruction with special attention to learner differences (social, cultural, physical, intellectual) that influence academic performance. Open only to MAT TESOL and TESOL (online) students.

EDUC 522 Challenges in Urban Education: Accountability (3, 5p) Issues related to accountability theory and practice in urban education settings. Open only to Ed.D. students.

EDUC 523 Challenges in Urban Education: Diversity (3, Fa) Diversity issues in urban educational settings. Open only to Ed.D. students.

EDUC 524 Challenges in Urban Education: Leadership (3, 5p) Theories, principles, and concepts of leadership in urban K-12 schools and institutions of higher education. Open only to Ed.D. students.

EDUC 525 Challenges in Urban Education: Learning (3, Fa) Theory and research in learning, motivation, and instruction for diverse educational settings. Open only to Ed.D. students.

EDUC 526ab Capstone in Teaching English Learners (2-2, FaSpSm) The culminating experience for in-service teachers in the Master of Arts in Teaching, Teaching English to Speakers of Other Languages Program. Open only to MAT TESOL and TESOL (online) students. Graded CR/NC.

EDUC 527 Assessment in the Language Classroom (2, 5m) Introduces students to relevant research in language assessment, reviews concepts of reliability and validity and examines assessment practices in the classroom.

EDUC 528 Course Proposal Project (2, 5m) Using a framework of course development, students present a course proposal, linking the theoretical, methodological and practical principles gained from all course work in the program.

EDUC 529 Political and Academic Issues Affecting Gifted Students (3, FaSpSm) Examination of the political and academic issues affecting gifted and high-ability students. Psychosocial reasons contributing to achievement and underachievement. Institutional and personal factors inhibiting potential. Open only to MAT students.

EDUC 530 Differentiated Curriculum and Pedagogy for Gifted Students (3, FaSpSm) Recognizing the talent and potential of gifted and high ability students. How gifted education can be generalized to affect the education of all students. Open only to MAT students.

EDUC 531 Student Disability Issues in Higher Education (3, Fa) History of the disability movement; current research on the success of students with disabilities in higher education; legal and management issues.
EDUC 532 Inquiry Methods (3, Sp) Logic and methods of quantitative data analysis in the examination of educational issues and the framing of solutions for them. Open only to E.D. students.

EDUC 533 School Leadership: Theory and Practice (3, Fa) Theories and principles of leadership and the application of principles to solve authentic problems in elementary and secondary schools.

EDUC 535 Teaching Secondary English and Language Arts (4, FaSpSm) Instructional procedures, techniques, strategies, and resources for teaching English in secondary classrooms. Open only to MAT students.

EDUC 536 Inquiry Methods II (3, Sp) Logic and methods of qualitative data analysis in the examination of educational issues and the framing of solutions for them. Open only to Ed.D. students. Prerequisite: EDUC 532.

EDUC 537 Leading with the Community and Culture in Context (3, Sp) Creating a positive culture of learning to promote student success. Strategies to engage diverse communities.

EDUC 538 Entrepreneurial School Leadership (3, Fa) Entrepreneurial opportunities in education. Developing the skills and knowledge for entrepreneurial leadership to improve educational outcomes.

EDUC 539 Teaching Secondary Science (4, FaSpSm) Instructional procedures, techniques, strategies, and resources for teaching science in secondary classrooms. Open only to MAT students.

EDUC 540ab Practicum in Teaching English as a Second or Foreign Language (1) The culminating experience for beginning teachers in the Master of Arts in Teaching, English Teaching to Speakers of Other Languages Program. Open only to MAT TESOL and TESOL (online) students. Graded CR/NC.

EDUC 541ab Teaching Social Studies in Secondary Classrooms (3) Strategies, methods, and materials for teaching social studies to all learners in secondary classrooms. a: (Duplicates credit in former EDUC 541b.) b: Open only to MAT Single Subject and Single Subject (online) students.

EDUC 542 Teaching Secondary Social Studies (4, FaSpSm) Instructional procedures, techniques, strategies, and resources for teaching social studies in secondary classrooms. Open only to MAT students.

EDUC 543ab Methods in Teaching English as a New Language (1) Teaching linguistically and culturally responsive to linguistic minority students. Topics include learning theories, sociocultural contexts of language development, and assessment of language and non-language competencies. Open only to MAT students. (Duplicates credit in former EDUC 543a.)

EDUC 544 Measurement Procedures for Counselors (3) Educational and psychological instruments; psychometric concepts and the rationale for the use of psychological instruments in the counseling relationship. (Duplicates credit in former EDCO 544.)

EDUC 545 Teaching Secondary Mathematics (4, FaSpSm) Instructional procedures, techniques, strategies, and resources for teaching mathematics in secondary classrooms. Open only to MAT students.

EDUC 546 Psychopathology for Marriage and Family Therapy (3) Theories of psychological impairment emphasizing diagnosis of child and family dysfunction. Practice in utilizing DSM-IV classification of case studies. (Duplicates credit in former EDCO 546.)

EDUC 547 Career Development: Theory and Process (3) Theories and process of career development; principles of career and leisure planning and counseling applicable throughout life. (Duplicates credit in former EDCO 548.)

EDUC 548 Data-Driven Leadership for Schools (3, Sm) Analyzing, interpreting, and using data to increase effectiveness of instruction and programs, improve student learning, and reduce or eliminate the achievement gap.

EDUC 549 Supervising Instruction for Optimal Learning (3, Sm) Application of adult learning theory to evaluate instruction. Appropriate professional development to improve student achievement.

EDUC 550 Multimedia Literacy (3, FaSpSm) Applying new technology in the classroom. Exploration of the use of multimedia tools to increase literacy. Examination of multiple forms of technology to facilitate learning. Open only to MAT and Gifted Education Certificate students.

EDUC 551 Teaching Physical Education (1, FaSpSm) Instructional approaches for integrating physical education content across the elementary curriculum. Open only to MAT students.

EDUC 552 Literacies in the Content Area (3, FaSpSm) Literacy and language within content areas. Developing reading, writing, speaking and listening skills for real audiences. Academic language.

EDUC 553 Psychopharmacology and the Effects of Substance Abuse (3, Sp) Focus on the effects of psychotropic medication, alcohol, and other substances on behavior. The professional and ethical issues for marriage and family therapists.

EDUC 554 Visual and Performing Arts in Elementary Subjects (2, FaSpSm) Instructional approaches for integrating visual and performance arts content across the elementary curriculum. Open only to MAT students.

EDUC 555 STEM Education in Secondary Classrooms (3, FaSpSm) Developing innovative practices in designing inquiry-based lesson plans to facilitate integrating the STEM disciplines as a foundation for teaching.

EDUC 556 Integrating English Language Arts and Social Studies (5, FaSpSm) Strategies and methods for integrating English language arts in social studies classrooms. Reinforces the concept of social studies as a conduit to further student learning. (Duplicates credit in EDUC 567.) Open only to MAT Multiple Subject and Multiple Subject (online) students.

EDUC 557 Civics Education (3, FaSpSm) Uses of pedagogical practices for increasing student engagement in the study of history and civics. Becoming critical thinkers, problem solvers, and effective citizens.

EDUC 558 Culture Learning in Schools: Latino (3) History, values, beliefs, and the demography of Spanish-speaking people; implications for the American classroom. Conducted in Spanish.

EDUC 559 Discourse Analysis and Technology in STEM Classrooms (3, FaSpSm) Using multiple assessment strategies and technology to assess mathematical and scientific thinking and performance.

EDUC 560 Primary Language Instruction in a Bilingual Setting (3, Fa) Bilingual programs, their goals, personnel, teaching methods, and materials.

EDUC 561 Teaching English to Speakers of Other Languages Pedagogy I (3) Overview of approaches in Teaching English to Speakers of Other Languages and methods for teaching reading, writing, listening, speaking, along with grammar, vocabulary, and pronunciation. Open only to MAT TESOL and TESOL (online) students.

EDUC 562 Teaching English to Speakers of Other Languages Pedagogy II (4) Introduction to micro-components of effective teaching, including curriculum and lesson planning, lesson sequencing and delivery, and creating a classroom environment conducive to English language learning.

EDUC 563 Teaching from a Comparative and International Perspective (3, FaSpSm) Examines the social context of schooling from a comparative and international perspective, connections between cultural beliefs and societal values; issues of social stratification and marginalization.

EDUC 564 Teacher Leadership (2, FaSpSm) Strategies of leadership that lead from influencing learning in the classroom to influencing learning across an entire school. Becoming an instructional leader.

EDUC 566 Teaching Mathematics and Science (4, FaSpSm) Instructional approaches for integrating mathematics and science with other content areas in elementary and secondary classrooms. Open only to MAT students.

EDUC 567 English and Language Arts in Elementary Social Studies (4, FaSpSm) Integrating English and language arts development with learning in elementary social studies classrooms. Factors affecting the teaching and learning of social studies and language arts. Open only to MAT students.

EDUC 568ab Guided Practice (3-6) Supervised practicum in observation and teaching. Focus on planning, implementing, and assessing instruction for whole classes and individual students. Open only to MAT students. Graded CR/NC. (Duplicates credit in former EDUC 568.)

EDUC 569ab Capstone Portfolio in Learning and Instruction (2-3) The culminating experience in the Master of Arts in Teaching Program for students in the non-credit track. Open only to MAT students. (Duplicates credit in former EDUC 569.)

EDUC 570 Research Methods and Data Analysis (3, FaSpSm) Various research designs and their appropriateness for addressing different research questions. Threats to validity and other challenges in research. Basic statistical methods and their use. Recommended preparation: beginning statistics course.

EDUC 571 Systems of the English Language (3) Exploration of English language systems including words, sounds, sentence structure, and discourse and application of this knowledge to teaching English as second or foreign language.

EDUC 572ab Teaching in an International and Intercultural Context (2-3, Fa) Examines social context of education from an international and intercultural perspective, linkages between societal values, culture, and schooling, and implications for the role of teachers.

EDUC 573 Introduction to Special Education (3, FaSpSm) Effective and appropriate educational settings for students with disabilities. Legal and professional responsibilities. Components for an inclusive classroom.

EDUC 574 Collaboration, Families and Case Management (3, FaSpSm) Planning and implementing effective educational services for students receiving special education services. Potential interventions for family support. Coordination of services.

EDUC 576 Establishing and Maintaining an Effective Classroom Environment (3, FaSpSm) Environmental and personal factors affecting student achievement. Intervention methodologies. Creating an effective learning environment.
EDUC 577 Guided Practice: Mild/Moderate Disabilities (3, FaSpSm) Supervised practicum in observation and teaching. Focus on planning, implementing, and assessing instruction for whole classes and individual students with mild/moderate disabilities.

EDUC 578 Integrating the Arts into the Secondary Curriculum (3, FaSpSm) Methods for integrating the arts into secondary classroom instruction. Critical and creative thinking, aesthetic education.

EDUC 579 Media Selection and Evaluation (2, FaSpSm) Selection and evaluation of media and technologies in support of instructional design based on a survey of current research and recommendations.

EDUC 580 Transforming STEM Education into Teaching Science (3, FaSpSm) The convergence of science, technology, engineering, and mathematics (STEM) as a foundation for teaching science.

EDUC 581 STEM Education from a Project-Based Learning Approach (3, FaSpSm) Model-based reasoning and inquiry as a means of integrating STEM disciplines.

EDUC 582 Assessment and Evaluation (1, FaSpSm) Overview of the concepts and procedures for assessment and evaluation of individual and overall performance in various learning environments.

EDUC 583 Counseling through the Lifespan (3) Developmental issues and life events from infancy to old age and their effect upon individuals, couples, and family relationships.

EDUC 584 Facilitating Creativity and Innovation in STEM Classrooms (3, FaSpSm) The role of creativity in STEM education. Theories and approaches to facilitating creative and innovative thinking.

EDUC 585 Action Research Project (3, FaSpSm) Design and implementation of a STEM-based project.

EDUC 586 Design of Learning Environments (3, FaSpSm) Design of learning environments through application of design principles; project-based practice in aligning instructional design, media selection, and the features of learning spaces.

EDUC 587 Master’s Studio A (2, FaSpSm) Students propose and design a capstone project that applies knowledge and skills learned throughout the program and prepare a coursework portfolio.

EDUC 588 Master’s Studio B (4, FaSpSm) Students implement the capstone project and submit a portfolio that integrates program coursework.

EDUC 589 Human Lifespan Development (3, FaSpSm) Fundamentals of human physical, motor, mental, social, and emotional development; spanning the prenatal period through late adulthood. (Duplicates credit in the former EDPT 530.)

EDUC 590 Directed Research (1-12, FaSpSm) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded Cr/NC.

EDUC 591 Diversity: Power, Equity and Inclusion (3, FaSpSm) Appraises practices that maintain power; creates strategies to empower individuals and marginalized groups by intervening to achieve equitable outcomes in education, professions and communities.

EDUC 592ab Master’s Seminar (2) An examination and analysis of research and literature in the student’s area of focus. Graded IP/CR/NC. (Duplicates credit in former EDGC 593ab.)

EDUC 594abz Master’s Thesis (3-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

EDUC 595 Instructional Design (3, FaSpSm) Formulation and design of effective instruction; emphasis on analysis of media characteristics and instrumentation requirements. (Duplicates credit in the former EDPT 520.)

EDUC 599 Special Topics 1-2, max 3, FaSpSm) Selected topics in various areas of education.

EDUC 600 Counseling for College and Career Readiness II (2, Fa) Planning and implementing theoretical foundations of college and career counseling. The application of contextually relevant strategies for assisting in college and career choices.

EDUC 604 National Perspective on School Leadership (1, Sm) Students will examine the cultural, political, and economic issues pertinent to urban education within the national context to prepare them to be effective school leaders.

EDUC 605 Framing Educational Leadership (1, Fa) Critical analysis and creative expression applied to problems of practice. Supported and unsupported assertions. Evidence-based decision-making. The quality of evidence used to support arguments. Graded Cr/NC. Open only to doctoral students.

EDUC 606 International Studies Seminar (1, FaSpSm) Analyzing educational challenges and opportunities in international and global contexts. Understanding the global context of international education and issues facing international and global urban education. Course includes an overseas trip. Open only to doctoral students. Graded Cr/NC.

EDUC 607 Role of School Counselors in Student Learning and Motivation (3, FaSpSm) The process of identifying and assessing learning and motivational issues in schools, the application of research-based interventions, and the evaluation of effectiveness of these interventions.

EDUC 608 School Connectedness, Climate, and Classroom Management (2, Fa) Prevention, education, and training for achievement. Data collection for assessment and evaluation of school climate, crisis and classroom management conducive to learning and success.

EDUC 609 Academic Advising in Postsecondary Education (3, Fa) Contemporary issues in academic advising in postsecondary education. Examines and analyzes relevant theories, policies, and practices related to academic advising.

EDUC 610 Higher Education Administration in China (3, Sm) Examination of student affairs and higher education administration practices in the People’s Republic of China. Course concludes with a trip to China.

EDUC 611 Athletic Administration (3, Sp) Analysis and discussion of critical issues in intercollegiate athletics. Student-athlete academic and social accountability; challenges of NCAA policies; commercialization, marketing, and fundraising in college athletics.

EDUC 612 Application of Human Development Theory in School Counseling (3, FaSpSm) A theoretical perspective of human development across the lifespan. Issues and challenges faced by school counselors.

EDUC 613 Gender Issues in Athletic Administration (3, Sp) Overview of Title IX and gender issues in institutions of higher education and implications for public schools.

EDUC 614 Research and Assessment in Higher Education (3, Sm) Theory and practice of outcomes assessment, program evaluation, and research design in postsecondary educational administration.

EDUC 615 Ethics in Athletic Administration (3, Fa) Ethical concerns in intercollegiate athletics. Review, analysis, and discussion of ethical and moral conduct in sports. Relevance of social justice to ethical behaviors.

EDUC 616 Higher Education Seminar (3, FaSpSm) Capstone seminar course focused on the future of student affairs and higher education.

EDUC 617 The Student Athlete in Higher Education (3, Fa) Examination of student athletes in higher education. Effective strategies for counseling and advising college student athletes; issues and challenges of athletic amateurism.

EDUC 618 School Counseling Professional Portfolio (2, Fa) Preparation of an electronic resource portfolio that addresses a field based practice. The culminating experience for the M.Ed., School Counseling program.

EDUC 619 Framing Educational Leadership in a Global Context (4, Sm) Globalization as a distinct phenomenon. Assessment of impact of globalization on educational systems and institutions. Open only to doctoral students.

EDUC 620 Fundamentals of Creativity, Innovation, and Entrepreneurship (2, Sm) The genesis and facilitation of creative ideas in educational practice. The transformation of creativity into innovation and entrepreneurship. Open only to doctoral students.

EDUC 621 Measurement and Evaluation for School Counselors (3, Fa) The use of formal and informal assessments to improve student achievement and well-being. Use of assessment data for intervention and evaluation.

EDUC 623 Understanding Research That Informs Leadership (3, Fa) Understanding, interpreting, and applying education research. Open only to doctoral students.

EDUC 624 Educational Organizations: Governance and Finance I (2, Fa) Overview of economic concepts of education. Linkages between economic growth, development, and education. Impact of globalization. Open only to doctoral students.

EDUC 625ab Induction Plan and Assessment of Candidate Competence (1-1, FaSpSm) The development of an individualized induction plan and assessment of competence for meeting requirements for the Clear Administrative Services Credential. (EDUC 625a duplicates credit in former EDUC 555; EDUC 625b duplicates credit in former EDUC 556.) Graded Cr/NC.

EDUC 626 Fostering Entrepreneurship in Educational Systems (2, Fa) The role of entrepreneurship in education and conditions that support entrepreneurship within an educational organization. How social entrepreneurship partnerships improve educational outcomes. Open only to doctoral students.

EDUC 627 Education Performance Problems: Role of Learning (3, Sp) Contemporary perspectives on learning and motivation. Strategies and tools for identifying, diagnosing, and solving learning and motivation challenges and opportunities. Open only to doctoral students.

EDUC 628 Educational Organizations: Governance and Finance II (2, Sp) Diversification and differentiation of educational institutions globally. The finances of higher education. Open only to doctoral students. Prerequisite: EDUC 624.
EDUC 624 Consulting Practicum Context Analysis (3, Sm) Preparation, design, and analysis of an education-related problem.

EDUC 630 Organizations and Policy: Current Issues (4, FaSp) Study of contemporary issues in educational organizations, policy and change in K-12 and higher education with an explicit focus on the improvement of urban education. Open to students admitted to the Ph.D. only.

EDUC 631 Locating Educational Performance Problems (3, Sp) Development and implementation of strategies for locating, solving and evaluating solutions to performance problems in educational organizations. Open only to doctoral students.

EDUC 652 Technology in Higher Education (2, Sm) The integration of technology in higher education and the relationship to quality of teaching, access to learners, and cost-effectiveness for universities and colleges.

EDUC 653 Child and Elder Abuse and Domestic Violence (2) A review of laws governing mandated reporting of child and elder abuse, the procedures involved, as well as etiology, effects, and treatment interventions.

EDUC 654 Couples Counseling (3) Examines relational development and change, strategies for intervention with couples, and selected issues in couples relationship functioning. Prerequisite: EDUC 500, EDUC 507, EDCO 541.

EDUC 655 Psychotherapy with Children and Adolescents (3) Training in unique diagnostic considerations in working with children and adolescents. Exposure to empirically supported treatment modalities for children and adolescents. (Duplicates credit in former EDCO 544.) Prerequisite: EDUC 500, EDUC 507, EDCO 541.

EDUC 656 Perspectives on Human Sexuality (3) The physiological-psychological and socio-cultural variables associated with sexual identity and sexual behavior with an emphasis upon sexual dysfunctions. (Duplicates credit in former EDCO 516.) Prerequisite: EDUC 507.

EDUC 657 Group Counseling: Theory and Process (3) Theory, research, and practice of group counseling. Includes laboratory experience. (Duplicates credit in former EDCO 542.) Prerequisite: EDUC 500, EDUC 507, EDCO 541.

EDUC 658 Cross-Cultural Counseling: Research and Practice (3) An examination of the cultural, socioeconomic, and language factors that may affect culturally differentiated populations; alternative cross-cultural counseling approaches. (Duplicates credit in former EDCO 551.)

EDUC 640 The Research University in the 21st Century (4, FaSp) An examination of the current transformation of the American research university with a focus on key issues that confront academics who work in research universities. Open to students admitted to the Ph.D. only.

EDUC 641 Human Capital and School Organization (3, Fa) School leadership, organization, management and development of school personnel. Capitalizing on school resources to meet school goals.

EDUC 642 Controversies in Learning and Instruction (4, FaSp) An introduction to learning research and theory, issues in learning and educational psychology situated in the context of diverse, urban settings. Open to students admitted to the Ph.D. only.

EDUC 643 Advancing Community Support through Social Media (2, Fa) Use of social media to communicate school vision. Incorporating objectives, strategies, assessment, and accountability measures in communication plans.

EDUC 644 Practicum in Counseling (3) Supervised clinical work with clients, including adults, couples, children, and families. (Duplicates credit in former EDCO 560.) Prerequisite: EDUC 500, EDUC 507, EDUC 546, EDCO 541.

EDUC 645ab Fieldwork in Counseling (2-3) Supervised field experience in a clinical setting. Graded CR/NC. (Duplicates credit in former EDCO 561.) Prerequisite: EDUC 644.

EDUC 646ab Marriage and Family Therapy Capstone: Leadership Project (1-1, FaSp) An evidence-based leadership project, designed to enhance fieldwork site functioning. Includes needs assessment, literature review, project design, implementation, and evaluation.

EDUC 647 School Leadership Seminar (2, Sp) Planning, design, and development of an action research plan for school improvement using multiple measures of project assessment.

EDUC 648ab Apprenticeship in School Administration and Leadership (2-2, FaSp) Supervised field experience in administrative areas of K-12 schools. Development of Administrative Services Portfolio.

EDUC 650 Globalization and the Nation-State: Theories of Change (4, FaSp) The impact of globalization on educational public policies and practices: an examination of technology, information and communications, and their influence on transnational and national policies. Open to students admitted to the Ph.D. only.

EDUC 651 Introduction to Qualitative Research Methods (3, FaSpSm) Introduces qualitative methodologies, qualitative data collection and analysis techniques, support in drafting research proposals, and paradigms on how to critically think about inquiry.

EDUC 653 Advanced Qualitative Research (3, Sp) Interactive seminar that explores the theoretical underpinnings and practicalities of interviews, portraiture, focus groups, life histories, and cultural biographies. Recommended preparation: introductory statistics.

EDUC 654 Advanced Qualitative Research Methods II (3, FaSpSm) Designed to follow Advanced Qualitative Research, focuses on data analysis in the qualitative research tradition, writing and publishing from qualitative data.

EDUC 655 Social Foundations of Research (3, Fa) Foundations in social science research with exposure to broad cross-section of research methods, design, and analytical techniques. Open only to doctoral students.

EDUC 658 Hierarchical Linear Models (3, Fa) Application of two- and three-level multilevel models in educational settings, fixed and random effects, growth models. Recommended preparation: a working understanding and knowledge of regression analysis and related Stata software.

EDUC 659 Fiscal Support and Expenditure in Higher Education (3, Sp) Analyses of private and public financial support and expenditure patterns; includes recent trends in state and federal legislation related to higher education.

EDUC 701 Pedagogy in Teacher Education (3) A critical examination of pedagogical practices in teacher education. The design of pedagogical approaches and programs for diverse and underserved students in urban schools.

EDUC 702 Curriculum, Teacher Preparation, and Student Learning (3) The process and role of curriculum in a variety of urban settings, teacher preparation, and professional growth. The philosophical and psychological foundations of curriculum development. Open to doctoral students only.

EDUC 703 Examining Literacy Theories and Practice (3) Literacy theories as practiced in urban, teacher education and professional development settings using an inquiry approach to examine best practice. Open to doctoral students only.

EDUC 706 Prospective in Higher Education (3) Critical issues in urban higher education from historical and philosophical perspectives.

EDUC 708 Advanced Student Development Theory (3, Fa) Examination of traditional and emergent student development theories.

EDUC 709 Finance in Higher Education (3) Local, national, and global economic and policy environments and their effect on institutional policies and practices.

EDUC 710 Assessment, Organizational Learning and Performance (3) The role of assessment in higher education. An analysis of the purpose and value of particular assessment approaches and instruments, in particular those addressing classroom learning and institutional effectiveness.

EDUC 711 Social Factors Influencing Learning and Motivation (3) Social psychological principles and research techniques applied to educational problems; school environment, group behavior, teacher effectiveness, teacher-student interaction, behavioral change. Open to doctoral students only.

EDUC 712 Issues in Human Motivation (3) Analysis of motivational principles; diagnosis and solutions to motivation gaps in learning environments; and motivation and efficacy theories and principles. Open to doctoral students only.

EDUC 713 Issues in Lifespan Development (3) An examination of issues related to the development of diverse students and the development of environments that promote motivated behavior. Open to doctoral students only.

EDUC 714 Measurement and Evaluation for Decision-Making (3, Sm) Collecting, analyzing, and using quantitative data to solve problems of practice and in evaluating educational institutions, programs, and policies. Open only to doctoral students.

EDUC 715 Current Research in Learning (3) Current research in the application of learning theories, and the applicability of this research across a variety of contexts. Open to doctoral students only.

EDUC 716 Instructional Leadership (3, Sm) Examines the role of instructional leaders in improving student performance; current issues in curriculum design and implementation; and effective instructional leadership approaches for school improvement. (Duplicates credit in former CTSE 688.) Open only to doctoral students.
EDUC 717 Schooling as an Economic Enterprise (3, Fa) Applying economic theory to the study of education. Applicable to marketing theory to education, partnerships, allocation of resources, and the examination of educational enterprises. (Duplicates credit in former EDPA 615.) Open only to doctoral students.

EDUC 718 Maximizing Human Resources in Education (3, Sm) Strategically understanding the management of human capital to ensure high student performance. How to attract and retain top quality teachers. (Duplicates credit in former EDPA 610.) Open only to doctoral students.

EDUC 719 The Politics and Policies of Education Governance (3, Fa) Major issues facing educators in the 21st century. Emphasis on how educational policy can focus on incentives for schools to improve student learning. (Duplicates credit in former EDPA 613.) Open only to doctoral students.

EDUC 720 Leadership for Principals (3, Sm) The role of the principal as an instructional leader with a focus on improving student achievement. (Duplicates credit in former EDPA 600.) Open only to doctoral students.

EDUC 721 Leadership for Superintendents (3, Sm) The role of the superintendent in establishing a focus on student achievement and holding school sites accountable. How superintendents support student learning through leadership. (Duplicates credit in former EDPA 618.) Open only to doctoral students.

EDUC 722 Evaluating and Assessing Educational System Outcomes (3, Sm) Evaluating impact. Examination of key assessment theories; planning and implementation of learning and program effectiveness. Open only to doctoral students.

EDUC 724 Creating Policy Alternatives for Educational Settings (3, Sm) Effective policy-making and constructing alternatives. Open only to doctoral students.

EDUC 725 Analyzing Effectiveness of Educational Systems (3, Fa) Organizational change and development in the context of educational settings. How change and reform occur. How to foster change and transformation. Open only to doctoral students.

EDUC 726 Making Choices: Deciding Among Policy Alternatives (4, Fa) Models of decision making including cost-benefit analysis, risk-benefit analysis, and decision analysis. Ethical considerations and the political environment. Open only to doctoral students.

EDUC 727 Implementing Policy in Educational Systems (3, Sp) Effective policy-making. Human and financial resources to support implementation. Targeting resources to support implementation to attain policy goals. Open only to doctoral students.

EDUC 728 Global Trends: Emerging Ideas, Emerging Markets (3, Sp) Examination of a range of emerging markets in education. Global efforts of institutions of higher education to access new markets through collaborations and offshore endeavors. Open only to doctoral students.

EDUC 729 Assessing Policy Impact in Educational Settings (3, Sp) Theory and practice of educational policy evaluation. Limits of rationality and the political forces that shape policy. Preparation of an evaluation design. Open only to doctoral students.

EDUC 730 Using Communication to Facilitate Organizational Change (3, FaSpSm) Addresses communication strategies that leaders use to facilitate positive change in their organization. Reinforces written, non-verbal, and verbal communication skills through leadership situations.

EDUC 731 Economics of Organizational Change and Learning Environments (3, FaSpSm) Leadership, problem solving, communication, research, reflection, and professional dispositions will concurrently expand. Candidates will acquire the knowledge and skills to identify and implement economic change.

EDUC 732 Building Capacity for Organizational Change (3, FaSpSm) Focuses on learning issues related to building organizational capacity for change through leadership and development of personnel within an organization.

EDUC 734abcd Consulting Project (1-1-1-1-0, FaSpSm) Credit on acceptance of consulting project. Prerequisite: EDUC 629.

EDUC 735 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

EDUC 737 Proposal for Doctoral Dissertation (1, FaSpSm) Preparation of initial dissertation proposal. Graded CR/NC.

EDUC 738 Critique of Research in Education (3, FaSpSm) A survey and critical analysis of selected research and literature. Graded CR/NC. Open to students admitted to the Ed.D. only.

EDUC 739abcd Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

EDUC 740 Theories in Counseling (3, FaSpSm) Explores the theoretical processes involved in paraprofessional counseling with specific application to issues faced by young adults. Graded CR/NC.

EDUC 741 Theories in Counseling (3, FaSpSm) Applied research in cognitive psychology and motivation theory to improve students’ learning in different academic disciplines.

EDUC 742 Theories in Counseling (3, FaSpSm) Basic principles and theories of child development and learning with emphasis on parent-child, parent-school, and child-school relationships.

EDUC 743 Theories in Counseling (3, FaSpSm) Theory and research in learning, development, and individual differences, and social psychology related to education or training contexts.

EDUC 744 Theories in Counseling (3, FaSpSm) Survey of theories, concepts, and procedures for assessing interpretative and non-interpretative characteristics and for evaluating individual and program performances.

EDUC 745 Theories in Counseling (3, FaSpSm) Application of statistical techniques in education; emphasis on underlying principles and concepts coupled with selected inferential techniques using desk-top computer software.

EDUC 746 Theories in Counseling (3, FaSpSm) Development and scope of instructional technology and its role in modern
Higher and postsecondary education (EDHP)

EDHP 500 Foundations of Higher, Adult, and Professional Education (3, Fa) Contemporary issues in higher, adult, and professional education in the United States; analytic perspectives from various disciplines (history, philosophy, sociology); implications for policy and practice.

EDHP 503 Curriculum, Teaching, and Learning in Higher, Adult, and Professional Education (3, Sp) Curriculum, teaching, and learning strategies for general, vocational, and professional education; planning for lifelong learning; theories, policies, and practices for higher, adult, and professional education.

EDHP 551 Applied Educational Ethnography (3, Fa) Research for improving leadership in higher, adult, and professional education. Ethnographically motivated field designs, observations, focused and unstructured interviews and unobtrusive techniques.

EDHP 552 The Politics of Difference (3) Explores strategies for restructuring institutions of higher education to improve student support and achievement among historically marginalized groups.

EDHP 560 Feminist Theory (4, FaSpSm) (Enroll in SWMS 560)

EDHP 563 Student Affairs Work in College (3, Fa) Principles, services, and organizational patterns of student affairs programs and services for two-year, four-year and professional higher education institutions.

EDHP 565 Intervention Strategies in College Student Development (3, Sp) Exploration of current campus issues such as violence, diversity and academic remediation, and their related intervention strategies (policy-based, programmatic, and counseling-based).

EDHP 580 The Community College (3, SpSm) The community college movement; history; aims; curriculum; types of administrative organization; teaching procedures; relation to lower and higher institutions; profiles of faculty and students; evaluation.

EDHP 587 Fieldwork in Higher, Adult, and Professional Education (1-8, max 8, FaSpSm) Structured participation in supervised teaching or administrative activities. Assignments matched with student's goals, training, experience. Graded CR/NC. Recommended preparation: EDHP 563, EDHP 565.

EDHP 592ab Master's Seminar (2, FaSpSm) An examination and analysis of research and literature in the student's area of focus. Required for all master's candidates who do not enroll in the Master's Thesis (594ab). Graded CR/NC.

EDHP 594abz Master's Thesis (2-20, FaSpSm) Required for all master's candidates who do not enroll in the Master's Seminar (592ab). Credit on acceptance of thesis. Graded IP/CR/NC.

EDHP 657 Management of Student Services in Higher Education (3, Sp) Delivery of student services and programs in higher education, organizational behavior, management systems, administrative procedures, and alternative leadership styles.

EDHP 679 Legal Issues in the Administration of Higher Education (3, Sm) Analysis of legal issues related to the administration of higher education; emphasis on relations with students, faculty, staff, alumni, and campus communities. Prerequisite: EDHP 500 or appropriate experience.

EDHP 687 Student Development in Higher Education (3, Sp) Theories of college student development and application of developmental models to program design, interventions, outreach, and research programs.

USC Viterbi School of Engineering

Faculty and undergraduates from the USC Viterbi School of Engineering show their spirit in the Plaza Trilussa in Trastevere, Rome as part of the school's summer European program. While taking two major-related courses and exploring the local environs, students learn more about other cultures as well as gain perspective on technology issues in other countries. As evidenced in this photo, a growing number of women are entering the engineering field; 38 percent of the Viterbi School's 2013 freshman class was female, which is almost exactly twice the national average for undergraduate engineering enrollments.

Courses in engineering were first offered at USC in the 1905-06 academic year in the basement of one of the oldest buildings on campus. Today, 202 full-time, tenure track faculty (and more than 310 total full-time faculty) serve about 2,800 undergraduates in major and minor programs and almost 4,900 graduate students, utilizing extensive and technically advanced laboratories, classrooms and live interactive high-speed internet broadcast systems. Government and industry annually fund nearly $181 million worth of research.

USC Viterbi is innovative, elite and internationally recognized for creating new models of education, research and commercialization that are firmly rooted in real world needs. The school's first priorities are the education of outstanding students and the pursuit and publication of new research.

As the school's faculty and students extend the frontiers of engineering knowledge through their research, they also apply engineering and technology to address societal challenges. The school stimulates and encourages qualities of scholarship, leadership, ambition and character that mark the true academic and professional engineer – to serve California, the nation and the world. At USC Viterbi, we call this the enabling power of Engineering +.

Viterbi undergraduate support programs complement and strengthen the academic experience, enhancing both depth and scope. Viterbi graduate education is outstanding preparation for advanced research and professional careers. The Ph.D. program is built around fellowships, teaching assistantships and research appointments, and produces a steadily growing core of doctoral graduates across the disciplines. The master's and professional programs are national and global leaders in advanced training for professional engineers.

Administration

Yannic C. Yortsos, Ph.D., Dean
John O'Brien, Ph.D., Executive Vice Dean
Maja Mataric’, Ph.D., Vice Dean
James E. Moore II, Ph.D., Vice Dean
Prem Natarajan, Ph.D., Vice Dean
Timothy Pinkston, Ph.D., Vice Dean
S. Joe Qin, Ph.D., Vice Dean
Cauligi Raghavendra, Ph.D., Vice Dean
Linda Rock, M.A., Vice Dean
Herbert Schorr, Ph.D., Vice Dean
Kelly Goulis, M.S., Senior Associate Dean
Louise A. Yates, M.S., Senior Associate Dean
David Murphy, Chief Financial Officer

Degrees and Requirements

The Viterbi School of Engineering offers the following undergraduate curricula leading to the Bachelor of Science in: Aerospace Engineering; Applied Mechanics; Astronautical Engineering; Biomedical Engineering; Chemical Engineering; Civil Engineering; Computer Engineering and Computer Science; Computer Science; Computer Science/Business Administration (with the Marshall School of Business); Computer Science (Games); Electrical Engineering; Environmental Engineering; Industrial and Systems Engineering; Mechanical Engineering; and Physics/Computer Science (with the Dornsife College of Letters, Arts and Sciences).

Minor programs are offered in: Applied Computer Security; Astronautical Engineering; Computer and Digital Forensics; Computer Programming; Computer Science; Construction Planning and Management (with the Price School of Public Policy); Craniofacial and Dental Technology (with the Herman Ostrow School of Dentistry and the Dornsife College of Letters, Arts and Sciences); Engineering Management; Enterprise Information Systems; Environmental Engineering; Innovation: The Digital Entrepreneur (with the Marshall School of Business); Materials Science; Mobile App Development; Petroleum Engineering; 3-D Animation; Technology Commercialization (with the Marshall School of Business); Video Game Design and Management; Video Game Programming; Web Technologies and Applications.
Graduate curricula leading to the Master of Science in: Aerospace Engineering; Aerospace and Mechanical Engineering (Computational Fluid and Solid Mechanics); Aerospace and Mechanical Engineering (Dynamics and Control); Analytics; Astronautical Engineering; Biomedical Engineering; Biomedical Engineering (Medical Imaging and Informatics); Chemical Engineering; Civil Engineering; Civil Engineering (Transportation Engineering); Civil Engineering (Transportation Systems); Civil Engineering (Water and Waste Management); Computer Engineering; Computer Science; Computer Science (Computer Networks); Computer Science (Computer Security); Computer Science (Data Science); Computer Science (Game Development); Computer Science (High Performance Computing and Simulations); Computer Science (Intelligent Robotics); Computer Science (Multimedia and Creative Technologies); Computer Science (Scientists and Engineers); Computer Science (Software Engineering); Data Informatics; Electrical Engineering; Electrical Engineering (Computer Networks); Electrical Engineering (Power); Electrical Engineering (Multimedia and Creative Technologies); Electrical Engineering (Telecommunications); Electrical Engineering (VLSI Design); Electrical Engineering (Wireless Technology); Electrical Engineering (Wireless Networks); Engineering Management; Environmental Engineering; Financial Engineering; Global Supply Chain Management (with the Marshall School of Business); Green Technologies; Health Systems Management Engineering (with the Price School of Public Policy, not currently accepting applications); Industrial and Systems Engineering; Manufacturing Engineering; Materials Engineering; Materials Science; Mechanical Engineering; Mechanical Engineering (Energy Conversion); Mechanical Engineering (Nuclear Power); Medical Device and Diagnostic Engineering; Operations Research Engineering; Petroleum Engineering; Petroleum Engineering (Geoscience Technologies); Petroleum Engineering (Smart Oilfield Technologies); Product Development Engineering; and Systems Architecting and Engineering.

Graduate curricula leading to the Master of Construction Management and Master of Cyber Security.

Graduate curricula leading to dual degrees in: Master of Science Aerospace Engineering / Master of Science Engineering Management, Master of Science Electrical Engineering / Master of Science Engineering Management, Master of Science Industrial and Systems Engineering / Master of Business Administration and Master of Science Mechanical Engineering / Master of Science Engineering Management.

Graduate curricula leading to the Engineer degree in: Aerospace Engineering; Astronautical Engineering; Chemical Engineering; Civil Engineering; Civil Engineering; Industrial and Systems Engineering; Materials Science; Mechanical Engineering; and Petroleum Engineering.

Through the Graduate School, graduate curricula leading to the Doctor of Philosophy in: Aerospace Engineering; Astronautical Engineering; Biomedical Engineering; Chemical Engineering; Civil Engineering; Computer Engineering; Computer Science; Electrical Engineering; Engineering (Environmental Engineering); Industrial and Systems Engineering; Materials Science; Mechanical Engineering; and Petroleum Engineering.

Graduate certificates in: Astronautical Engineering; Health, Technology and Engineering (with the Keck School of Medicine); Network Centric Systems; Smart Oilfield Technologies; Software Architecture; Systems Architecting and Engineering; and Transportation Systems.

Undergraduate Program Accreditation

The Bachelor of Science degrees in aerospace engineering, astronautical engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering and computer science, electrical engineering, environmental engineering, industrial and systems engineering, and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET, abet.org. The Bachelor of Science degrees in computer engineering and computer science and in computer science are accredited by the Computing Accreditation Commission of ABET, abet.org.

Undergraduate Program Student Outcomes

By the time of graduation from Bachelor of Science degree programs accredited by the Engineering Accreditation Commission of ABET, students will develop at least the following abilities and knowledge:

- an ability to apply knowledge of mathematics, science and engineering
- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multidisciplinary teams
- an ability to identify, formulate and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context
- a recognition of the need for, and an ability to engage in life-long learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills and modern engineering tools necessary for engineering practice
- an ability to design and develop systems in a way that demonstrates comprehension of the trade-offs involved in design choices
- an ability to apply design and development principles in the construction of software systems of varying complexity

Undergraduate Degrees

Change of Major to Engineering

USC undergraduate students who have not been admitted to the Viterbi School of Engineering may apply to add an engineering major with the approval of the Associate Dean for Admission for the Viterbi School. Students seeking approval to add an engineering major must complete required prerequisite courses and submit a Request to Change Major to Engineering form to the Admission and Student Affairs Office in Ronald Tutor Hall 110. Approval is granted on the basis of academic performance at USC and in the required prerequisite courses in the Viterbi School within a specific number of semesters.

Non-engineering students may complete a maximum of four engineering courses. No further engineering courses may be taken unless admission has been approved.

Common Requirements

Certain general requirements are common to all undergraduate curricula for Bachelor of Science degrees in Engineering. These are as follows:

Total Units

A minimum total of 128 acceptable units is required to earn the Bachelor of Science in Engineering. Exceptions are: aerospace engineering, 130 units; biomedical engineering with an emphasis in electrical engineering, 133 units; biomedical engineering with an emphasis in mechanical engineering, 132 units; chemical engineering, 129 units; chemical engineering with an emphasis in biochemical engineering, 132 units; chemical engineering with an emphasis in environmental engineering, 132 units; chemical engineering with an emphasis in nanotechnology, 128 units; chemical engineering with an emphasis in petroleum engineering, 133 units; chemistry engineering with an emphasis in polymer/materials science engineering, 133 units; civil engineering, 131 units; civil engineering with an emphasis in building science, 135-136 units; civil engineering with an emphasis in environmental engineering, 129-130 units; civil engineering with an emphasis in structural engineering, 131 units; electrical engineering, 131 units; environmental engineering, 131-134 units.

Not more than a units may be physical education activity courses, provided the department allows it in the program.

General Education Requirements

The university’s general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated
person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

The provost has allowed an exception to the rules governing the general education program for students in the Viterbi School of Engineering, who may elect to satisfy the requirement for Category IV with a "wild card", course, which may be a second course in Categories I, II or VI, or with a score of 4 or 5 on the Advanced Placement U.S. History exam.

Students in the engineering "3-2" program are not required to satisfy general education requirements or the lower-division writing requirement for USC; these students are understood to have satisfied USC's general education requirements when they have satisfied the general education requirements and lower level writing requirement at their previous institution. All students must, however, complete the WRIT 340 requirement.

Students in aerospace, astronautical and mechanical engineering complete Social Issues and the lower-division writing requirement in different semesters.

In all other respects, students in the Viterbi School of Engineering must satisfy the general education requirements as described on The USC Core page and the General Education Program page.

Mathematics (16 units minimum)

Sixteen units or more, including three semesters of calculus, are required.

Basic Sciences (12 units minimum)

Twelve units or more of biology, chemistry or physics are required.

Residence Requirement

All students must complete a minimum of 64 units at USC in order to receive a USC degree. In addition, the Viterbi School of Engineering requires that students complete all upper division units required for the major in residence.

For students in the Viterbi School of Engineering "3-2" Program, at least 48 units must be earned in courses taken at USC.

Scholarship Requirement in Major Subject

For graduation with a bachelor's degree, a grade point average of C (2.0) or higher is required in all upper division courses applied toward the major including any approved substitutes for these courses taken at USC. Additional scholarship requirements for the various majors are listed under the departmental headings.

Grade Point Requirement

A grade point average of at least 2.0 is required on all course work attempted at USC.

Transfer students must meet these averages, both on residence work attempted and on combined transferred and residence courses attempted.

Probation/Disqualification

A student whose overall GPA falls below 2.0 is placed on academic probation. Continued enrollment requires clearance from an academic review counselor.

Each semester, students on academic probation are required to receive academic advisement. Proof of advisement must be filed with the Academic Review Department before any registration requests will be processed. The only acceptable proof of advisement is an official academic review advisement record signed by the student's academic advisor and a representative from the Viterbi Admission and Student Affairs Division. Academic review advisement forms may be obtained from Tutor Hall of Engineering (RTH) 110 or John Hubbard Hall 113.

Students on probation are encouraged to utilize the academic services (advisement and free tutoring) provided by the Viterbi Admission and Student Affairs Division.

Students on academic probation who do not raise their overall GPA to 2.0 after two semesters of enrollment (excluding summers) will be academically disqualified from the university. However, if a student earns a minimum semester GPA of 2.3 in the second or any subsequent probation semester but has not yet reached an overall 2.0 GPA, the student will not be disqualified and will be allowed to enroll an additional semester.

Petitions for readmission after academic disqualification are initiated by the student through the Academic Review Department. All grade issues (IN, MG, etc.) must be resolved prior to the submission of such a petition. Before petitioning for readmission, a student must complete a minimum of 12 semester units of transferable course work (applicable to USC degree requirements) with a minimum 3.0 GPA. University residency requirements will determine whether these units are accepted as transfer credit.

As readmission to the university is never guaranteed, any indication of strong academic performance beyond the 12 unit minimum would strengthen a readmission petition.

Students must petition for readmission by December 30 for the spring semester, by May 1 for the summer session and by August 15 for the fall semester. Late petitions will not be accepted. A non-refundable fee determined by the Academic Review Office must accompany all readmission petitions.

Special Educational Opportunities

Viterbi Admission and Student Affairs Division

The Viterbi Admission and Student Affairs Division, located in Ronald Tutor Hall of Engineering (RTH) 110, begins to assist students as soon as they express an interest in engineering and continues working with them until, and in some cases after, they graduate.

The office is not only responsible for working with prospective students, but with continuing students as well. It directs special services and programs, provides a variety of support services, sponsors student organizations, is involved with student government and acts as a liaison with other university offices.

The Viterbi Admission and Student Affairs Division enables engineering students to have a successful experience at USC.

Center for Engineering Diversity and Women in Engineering Office (WE)

The Center for Engineering Diversity (CED) provides a variety of services for historically underrepresented students in engineering (African-American, Hispanic and Native American students, including women). Prior to their first semester in Viterbi, freshmen can participate in a four-week summer residential program (Summer Institute).

Contact the Center for Engineering Diversity at (213) 740-1999 for more information.

The Women in Engineering Office (WIE) offers professional, academic and co-curricular support to the women of the Viterbi School. The goal of the Women in Engineering Office is to recognize the unique challenges that female engineering students will face, provide resources and overall support to address these challenges, and allow our female students to find academic and personal success during their Viterbi career and beyond.

Klein Institute for Undergraduate Engineering Life

The Klein Institute for Undergraduate Engineering Life (KIUEL) was established to provide Viterbi undergraduates with a variety of personal and professional activities designed to enhance undergraduate engineering student life experiences outside the classroom. The KIUEL Programming Board implements programs around leadership, service learning and globalization, and cross-disciplinary learning. Past KIUEL events have included the KIUEL Weekend for Leaders, the KIUEL Showcase and the Senior Design Expo. For more information, visit viterbi.usc.edu/kiuel.

Merit Research Program

Every year, a select group of promising incoming freshmen are invited by faculty to work on projects in their research laboratories. These student researchers actively participate in the development of new technology throughout their undergraduate careers.

In addition to giving students excellent first-hand experience, this program can help offset the cost of education since each participant earns wages for his or her work. This renewable award is separate from other financial assistance offered by the university.

The student must apply for renewal of his or her award by March 1 of each year. Continuing students can use the same application form to apply for the award starting in their sophomore year.

First Year Excellence

The First Year Excellence (FYE) program helps first-year students develop strong connections to the university and the Viterbi School of Engineering. FYE promotes academic exploration and success through its co-curricular programs, support services and resources during students' first year. Freshman academics, introductory courses and the Viterbi Spotlight Series help guide students as they explore engineering. Academic advisers work with all freshman students to ensure they are on track academically and to assist with acclimating to college life and USC. Free tutoring, group-led supplemental instruction sessions, workshops and seminars on time management and networking with faculty are available to students to assist them in accomplishing their goals.

Viterbi Career Services

The Viterbi School of Engineering provides extensive career services to all students. Students are encouraged to register with Viterbi Career Services their first year at USC. By doing so, they will be kept informed of all career-related events such as company information sessions, career preparation workshops, industry luncheons and career fairs. In addition, students are eligible to participate in the school's extensive on-campus interview program.

USC’s Viterbi School of Engineering attracts employers not only from Southern California, but from across the country. A few of the many companies that have recently hired Co-ops, interns and permanent employees from the Viterbi School include: Accenture, Amgen, Aon Corporation, Alcon Laboratories, Inc., Chevron Corporation, Cisco Systems, Inc., Clark Construction, Google, Hewlett-Packard Development Company, L.P., IBM, Intel, Jet Propulsion Laboratories, Inc., Kleinwallstadt, Inc., Loma Linda University, Lockheed Martin, National Ignition Facility, Northrop Grumman, Pacific Aerospace, Patriot HealthCare, Packard Electric, Raytheon and Boeing. The Viterbi School of Engineering offers a variety of services for historically underrepresented students in engineering (African-American, Hispanic and Native American students, including women). Prior to their first semester in Viterbi, freshmen can participate in a four-week summer residential program (Summer Institute). Contact the Center for Engineering Diversity at (213) 740-1999 for more information.
Laboratory, Kiewit Corporation, Lockheed Martin Corporation, Microsoft Corporation, Morley Builders, NASA, Northrop Grumman Corporation, Parsons Corporation, Raytheon, Turner Construction Company, Walt Disney Imagineering and Yahoo.

Cooperative Education

By participating in the Co-op Program, students can earn degree credit and industry work experience before they graduate. Co-op improves students’ understanding of the relationship between theory and practice, helps them fine tune their career goals and aids in the acquisition of important engineering skills. Students’ work assignments are closely related to their specific degree program and are appropriate to their current academic level.

Participation in the program is open to all full-time undergraduate engineering majors. Students are eligible to apply for Co-op the second semester of their sophomore year. Though the sequence may vary, students typically have one summer work experience in addition to one semester immediately preceding or following one of the summer sessions. While on assignment, students enroll in a 1-1.5-unit course (ENGR 395) that aids in the integration of both on-campus and off-campus learning. With departmental approval, credit toward a degree may be earned upon completion of this course.

3-2 Program

For those students wishing greater depth and breadth in the liberal arts, the Viterbi School of Engineering has developed agreements with more than 20 liberal arts colleges nationwide in which a student attends a liberal arts institution for his or her first three years of college, pursuing pre-engineering courses in addition to a solid program in the liberal arts. At the end of the three years, upon recommendation from the liberal arts college, the student applies to the Viterbi School of Engineering as a junior and, if admitted, completes the remaining requirements for a B.S. degree typically within two years. After degree requirements for both schools are complete, the student will receive two degrees—a B.A. from the liberal arts college and a B.S. from USC.

Engineering Overseas Programs

Every summer the Viterbi School of Engineering sponsors a seven-week academic program in either Florence, London, Paris, Madrid, Rome or another location that provides students with the opportunity to enroll in engineering and humanities courses, as well as participate in a directed studies project. This program is open to all engineering majors.

International Exchange Programs

The Viterbi School of Engineering International Exchange Program gives undergraduate students the opportunity to broaden their exposure to the global context of engineering theory and practice by spending a semester abroad in a challenging academic environment at an international host institution. The International Exchange Program allows students to satisfy technical electives and/or approved degree requirements by attending approved partner institutions. This program is open to students entering their junior or senior year. Students apply at the Viterbi Student Affairs Office. Candidates must meet all admission requirements of both the Viterbi School of Engineering as well as those of the international host institution. Contact the Admission and Student Affairs Office for a complete list of international exchange partners.

Honor Societies

The Viterbi School of Engineering has established a variety of honor societies to recognize academic excellence, creativity and service. These are: Alpha Pi Mu (industrial and systems engineering), Chi Epsilon (civil engineering);Eta Kappa Nu (electrical engineering), Omega Chi Epsilon (chemical engineering), Omega Rho (industrial and systems engineering), Pi Tau Sigma (mechanical engineering), Sigma Gamma Tau (aerospace engineering), Tau Beta Pi (nationwide honor society), and Upsilon Pi Epsilon (computer science).

Minor in Technology Commercialization

This interdisciplinary minor includes courses from both the business and engineering schools and provides education in the economic, technological and entrepreneurial aspects of commercializing new technologies. The minor is designed for students from a range of backgrounds (e.g., majors in engineering, life sciences or business) who are interested in starting their own technology-based ventures, working for technology-based start-up companies or pursuing corporate careers that may involve the commercialization of new technologies. In the minor, students learn about conceptualizing, developing, and managing new, technology-based ventures and projects.

To enroll, students must have completed a minimum of 32 units of college-level course work and have a minimum overall GPA of 2.75. To complete the minor, students are required to complete two required courses (7 units) and enough elective courses to achieve a total of 16 units outside of their major. Business majors thus require 23 total units and other majors 16 total units to complete the minor.

Graduate Degrees

General Requirements

The Viterbi School of Engineering recommends candidates for the Master of Science degree in: aerospace engineering, astronautical engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering, computer science, data informatics, electrical engineering, engineering management, environmental engineering, financial engineering, green technologies, health systems management engineering, industrial and systems engineering, manufacturing engineering, materials engineering, materials science, mechanical engineering, medical device and diagnostic engineering, operations research engineering, petroleum engineering, product development engineering, sustainable infrastructure systems, and systems architecting and engineering; and the Master’s degree in construction management and in cyber security. Several areas of emphasis and specialization are available within these disciplines.

All graduate work in the Viterbi School of Engineering is under the jurisdiction of the Viterbi School except the Doctor of Philosophy degree, which is under the jurisdiction of the USC Graduate School. All prospective graduate engineering students should apply to the USC Office of Graduate Admission.

Admission

Two classes of students are admitted to take courses for graduate credit: admitted and conditionally admitted students. These classifications are determined by the Office of Graduate Admission on the recommendations of the appropriate department in the Viterbi School of Engineering.

Admitted Students

This is the status of a graduate student pursuing work leading toward an advanced degree. The student has been accepted into the degree program without any conditions.

Conditionally Admitted

The chair of a major department in the Viterbi School of Engineering may recommend that a student be admitted under certain conditions. Conditional admission is granted when a student’s admission records are incomplete or when deficiency courses must be taken but the student appears to otherwise be admissible. The conditions must be met before the completion of two semesters of enrollment or 12 units of course work, whichever comes first. If the conditions on admission are not met within the given time period, the student may not be allowed to register for course work in subsequent semesters. When the conditions have been met, the academic department will remove the restrictions that have been placed on the student’s registration.

Criteria

To qualify for admission, applicants are expected to present strong academic records and show superior accomplishment in their engineering and related courses. Admission decisions will be based on Graduate Record Examinations test scores and transcripts of previous school work. Individual departments may set higher admission standards than the Graduate School. Some programs also require letters of recommendation and a statement of purpose. Doctor of Philosophy applicants who have published professional papers in their field may forward copies to the department, and they will be considered together with the other credentials submitted.

Procedure

Applicants to graduate programs must present credentials to the Office of Graduate Admission showing that they have completed an acceptable curriculum for the bachelor’s degree. In some departments, students with outstanding records will be admitted for the doctoral program without first receiving the Master of Science degree. If the previous degree is not in the field in which the student wishes to pursue graduate study, it may be necessary to make up undergraduate deficiencies in the area of the desired specialty. Applicants must take the
Graduate Record Examinations. Satisfactory scores on the general test are required for admission to full graduate standing in most programs. Consult the department office for further information.

Once the application for admission has been sent, arrangements should be made immediately to have official transcripts of all previous undergraduate and graduate school work forwarded directly to the Office of Graduate Admission from the schools attended. If the Graduate Record Examination is not taken, official scores must be sent to the Office of Graduate Admission by arrangement with the Educational Testing Service. If the tests have not been taken, the applicant should register to take them on the earliest available date. The departments will review the application files and select for admission those students offering the greatest promise for completing graduate studies.

**Progressive Degree Programs**

The progressive degree program allows qualified undergraduate students the opportunity to complete an integrated program of study joining a bachelor’s degree program and a master’s degree program in the same or different departments. Applicants for a progressive degree program must have completed 64 units of course work applicable to their undergraduate degree since graduating from high school. (Credit by exam and course work taken prior to high school graduation are excluded.) Applicants must submit their application prior to completion of 36 units of course work. Normally, the application is submitted in the fall semester of the third year of enrollment at USC. The application for admission to a progressive master’s program must be accompanied by a departmentally approved course plan proposal and two letters of recommendation. All application materials can be obtained from the Viterbi Admission and Student Affairs Office (RT 710, viterbi.usc.edu/pdp).

Progressive degree program students must fulfill all the requirements for the bachelor’s degree and the master’s degree. The total number of units for the master’s degree, however, may be reduced by a maximum of one-third. A minimum of two-thirds of the units required for the master’s degree must be at or above the 500 level, excluding any 590 courses.

Students will be subject to undergraduate academic progress standards and policies while in undergraduate status and master’s academic progress standards and policies while in graduate status. The degrees may be awarded separately, but the master's degree will not be awarded before the undergraduate degree. The time limit for completing a progressive degree program is 12 semesters. For more information, refer to the Requirements for Graduation page.

**General Requirements for the Master of Science**

Residence Requirements

Viterbi students are allowed up to five years to earn a master’s degree. Depending on the specific degree, the typical program time varies from between one and one-half to two years for students in M.S. programs on-campus to three years for M.S. students completing their degrees online via DEN@Viterbi. Master’s degrees other than the Master of Science typically require more course work, and may take more time to complete.

Students entering the Viterbi School of Engineering with course or credit deficiencies require a correspondingly longer period. A candidate must complete the last four semester units of course work at USC. Up to four transferred units will be accepted from another engineering school upon verification by the Office of Degree Progress and the approval of the major department.

**Prerequisites**

Prerequisite is a bachelor’s degree in engineering, allied fields or science. If the graduate field is different from the field of the bachelor’s degree, there may be undergraduate deficiencies assigned by the major department, and these must be made up by taking and passing the assigned courses before proceeding with the graduate courses.

**Deficiency Courses**

New students may be required to demonstrate satisfactory preparation for the graduate program with previously completed course work. In cases where preparation is not demonstrated, up to 9 units of deficiency course work may be required in addition to the normal degree requirements.

Credit for deficiency courses may not be applied toward a graduate degree. A deficiency course within the same discipline taken after the higher level course has been passed will not be available for unit or grade point credit.

**Placement Examinations**

Enrollment in certain 500- and 600-level courses in the disciplines of computer engineering and electrical engineering will require a student to either take and pass the corresponding 400-level prerequisite at USC, or pass a placement exam in the corresponding course.

Not all 400-level prerequisite courses taken instead of a placement exam are available for degree credit. No unit or grade point credit is given for placement exams. Please consult with an academic adviser or refer to the department website for information on specific courses and placement exam details.

**Grade Point Average Requirements**

A grade point average (GPA) of 3.0 (A = 4.0) is required for the master’s degree in all engineering programs. The minimum GPA must be earned on all course work applied toward the master’s degree and on all 400-level and above course work attempted at USC beyond the bachelor’s degree. A minimum grade of C- (2.0) is required in a course to receive graduate credit. Work graded C- or below is not acceptable for subject or unit credit toward any graduate degree. Transfer units count as credit (CR) toward the master’s degree and are not computed in the grade point average.

**Course Selection**

There are two program options for the master’s degree, one with a thesis and the other without. Courses are selected to fit the special needs of individual students, must form an integrated program leading to a definite objective and must be approved in advance by the department. Only courses numbered 400 and above may be applied for degree credit.

**Program without Thesis**

The minimum requirement is 27 units; 18 of these units must be at the 500 level and at least 18 units must be in the major department and closely related departments. Prior department approval is required for all non-major courses. Specific requirements are listed under each department.

**Program with Thesis**

The minimum requirement is 27 units; four of these units are to be thesis. At least 16 units, not including thesis, must be at the 500 level or higher, and at least 18 units must be in the major department. A total of not less than four nor more than eight units of 590 Directed Research and 594ab Master’s Thesis must be included in the program. The minimum thesis requirement in 594a is two units; in 594b, two units.

**Master’s Thesis**

The thesis, when it is required, is regarded as an important part of the work of the candidate for a master’s degree. It is not intended to be a piece of highly recondite research, but it must be a serious, considerable and publishable piece of work demonstrating the writer’s power of original thought, thorough grasp of the subject matter and ability to present material in a scholarly manner and style.

The thesis presents the results of an investigation of an approved subject in the major department. It is supervised throughout by a thesis committee, appointed by the chair of the student’s major department. The committee is usually composed of two members of the major department and one other member of the faculty.

The student will register in courses 594a and b respectively during the final two semesters of the master’s program as determined by discussion with an adviser. (Concurrent registration in 594a and b during the same semester is permitted when a student’s progress makes completion of all requirements in the fall semester impossible.) The thesis has not been completed within these two semesters, the candidate must register for 594e each semester until the thesis has been accepted but no additional unit credit will be earned. Units of 594ab Master’s Thesis may not be converted to units of 590 Directed Research.

A student readmitted to candidacy by petition to the Graduate School must reregister for 594a and 594b. Final acceptance of the thesis is based upon the recommendation of all members of the thesis committee. For requirements concerning format of master’s thesis see the Graduate School section of this catalogue.

Candidates who find it necessary to be excused from registration in 594a or 594b for a semester must formally report before the beginning of the semester to the Viterbi Office of Graduate and Professional Programs that they will be inactive during that semester and request a leave of absence. During a leave of absence a candidate will not be entitled to assistance from the thesis committee or to the use of university facilities. The granting of a leave of absence does not change the candidate’s responsibility for meeting the time schedule for the completion of degree requirements. Leave will be granted only under exceptional circumstances.

**Progress Toward the Degree**

Graduate students are expected to make regular progress toward their degrees as defined by the faculty of their respective departments and within the time limits allowed. Graduate students’ progress and performance are reviewed each semester. Students making unsatisfactory progress receive a formal written warning and are placed on a semester of academic warning with specific conditions to be met for continuation in the program. Please refer to catalogue sections Academic Warning and Dismissal of Graduate Students; Grade Point Average Requirements; and the Website of the Office of Graduate and Professional Programs (GAPP) at viterbi.usc.edu/gapp.

**Department Approval for Non-major Courses**

Prior departmental approval is required for non-major courses to be taken and applied toward a graduate degree. Students must consult with the faculty adviser for formal written permission to take courses outside the major department for degree credit.
A copy of the faculty adviser’s written approval must be kept in the department file and retained by the student until graduation.

Time Limit
It is expected that work for a Master of Science in engineering will be completed within a maximum of five calendar years. An academic department may grant an extension of up to one year at a time for a maximum of two years. Courses taken more than seven years prior to the date upon which the degree is to be awarded cannot be included for the degree.

Admission to Candidacy
Application for admission to candidacy for the Master of Science is a separate step from admission to graduate standing. The requirements for admission to candidacy are: (1) the applicant must be admitted to regular graduate standing and must have removed all undergraduate deficiencies, and (2) the applicant must submit a complete program approved by the major department showing the course work, research and thesis (if required).

Application for graduation should be made at the beginning of the semester in which the requirements for the master’s degree are to be completed. Students are strongly advised to file for graduation as soon as the registration process has been completed so that their names may appear in the printed Commencement program and so that any discrepancies in their records may be resolved. Late filing may delay conferment of the degree.

Application forms for graduation with the master’s degree may be obtained from the student’s academic department. This application should be returned to the student’s academic department. Changes in the program after admission to candidacy are made by petition to the student’s academic department.

Second Master’s Degree
A graduate student who already holds a master’s degree from USC may apply a limited number of previously earned units toward the second master’s degree.

The maximum number of units allowed for transfer is: 4 units in degree programs requiring 34-32 units; 8 units in programs requiring 33-40 units; 12 units in programs requiring 41 or more units. In all cases, permission of the chair of the major department is required. All credit, including the units from the first master’s degree, must be earned within seven calendar years.

For students who earned their first master’s degree at another institution, no course work may be repeated from the first program of study and no unit credit from the first program of study may be counted toward the second master’s degree.

General Requirements for the Master of Engineering Degree
The Viterbi School does not currently offer degree programs with the Master of Engineering designation.

General Requirements for the Engineer Degree
The Engineer degree is awarded under the jurisdiction of the Viterbi School of Engineering. This degree is granted upon completion of a comprehensive curriculum beyond the general course requirements for the Master of Science and after successfully passing an engineer’s qualifying examination. The required curriculum is intended to give students broad preparation in two areas of engineering, together with a minimum number of units in these areas to prepare them for the interdisciplinary nature of the many complex problems they will encounter in practice today. The degree is also intended to fulfill a growing need in industry for students with comprehensive advanced engineering training, but not necessarily with the research orientation developed by the Ph.D. student.

The Engineer degree is a terminal degree. Students who complete the Engineer degree will not be considered for admission to the Ph.D. program.

The Engineer degree is offered in aerospace engineering, astronautical engineering, chemical engineering, civil engineering, electrical engineering, environmental engineering, industrial and systems engineering, materials science, mechanical engineering and petroleum engineering.

Prerequisites
There are three basic prerequisites for the Engineer Degree Program: a Master of Science degree or completion of 27 units of acceptable course work, application for admission to the Viterbi School of Engineering and acceptance to the program by the appropriate department.

Course Requirements
The Engineer degree requires a minimum of 30 units of graduate course work beyond the Master of Science degree; up to 6 units at the 400 level may be counted at the discretion of the student’s qualifying exam committee if the committee finds them necessary for the student’s program. The course work must form a balanced program of study leading to a definite concentration in two fields of engineering, a minimum of 12 units in one field, nine in another; nine units are elective and may be taken outside the Viterbi School of Engineering, but must be acceptable for graduate credit. The distribution of course work will be governed by the student’s qualifying exam committee and should be considered in conjunction with the course work done for the Master of Science degree. A candidate for the Engineer degree may substitute a project under the supervision of a faculty member for 6 units of course work. To have the project credited toward the degree, the student must register in 690 Directed Research during the course of the project; total 690 Directed Research registration should be 6 units. A student wishing to work on a project must make arrangements with a member of the faculty to supervise and evaluate work, and obtain the approval of the committee chair prior to completing more than 15 units of course work. In many cases the project may be related to the candidate’s work outside the university but must still be supervised by a faculty member. Distribution of the course work should take into account the nature of the project.

Grade Point Average Requirement
A minimum grade point average of 3.0 must be earned on all course work applied toward the Engineer degree. This average must also be earned on all 400-level and above course work attempted at USC beyond the bachelor’s degree. A minimum grade of C (2.0) is required in a course to receive graduate credit. Work graded C- or below is not acceptable for subject or unit credit toward any graduate degree. Transfer units count as credit (CR) toward the Engineer degree and are not computed in the grade point average.

Residence Requirements
A candidate must complete the last four units of course work at USC. At least 26 units must be taken in residence at USC. A maximum of four transfer units not counted toward a previous degree may be allowed with adviser approval.

Guidance Committee
After being granted graduate standing the student must form a guidance committee. The committee is made up of three full-time faculty members who are specialists in the student’s areas of concentration, with at least two from the major department. Forms for appointment of the committee are available from the student’s academic department. The student is responsible for finding a faculty member from one area of concentration who will act as the chair of the guidance committee. The chair will assist in selection of the other members. Advancement of the student after formation of the committee will be by the committee chair.

Qualifying Examination
The student must satisfactorily complete an engineer’s qualifying examination administered by his or her guidance committee. This examination will cover both areas of concentration and will consist of at least one written and one oral examination. This examination is normally taken during the last semester of course work toward the degree. Students who choose to take the examination in the semester following the completion of course requirements may do so up until the end of the third week of classes without registering. After that date they must register for GRSC 810 to maintain continuous enrollment in the program. Results of the examination are reported to the Viterbi Office of Graduate and Professional Programs and forwarded to the Office of Academic Records and Registrar.

Transfer Credits
Up to four units of graduate course work may be transferred from an accredited institution to be applied toward the Engineer degree. Transfer work must have been done after receipt of the Master of Science degree and must be approved by the qualifying exam committee.

Reserving Course Credit
A student who receives the Master of Science degree at USC may reserve a limited number of units taken prior to the receipt of the Master of Science degree for credit toward the Engineer degree. To reserve credit, the course must have been taken during the last semester as a Master of Science candidate, not used toward the Master of Science degree, be acceptable to the student’s committee, and approved by the Office of Degree Progress.

Time Limit
The student must complete all requirements within five calendar years.

Admission to Candidacy
After satisfactorily completing the qualifying examination, and no later than the beginning of the last semester of course work, the student must file for candidacy. This is a separate and distinct step which sets forth the entire academic program fulfilling the degree requirements and is used as a working basis for awarding the degree.

General Requirements for the Doctor of Philosophy
This degree is granted under the jurisdiction of the USC Graduate School. Students should also refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School.
Thirteen Doctor of Philosophy (Ph.D.) programs are offered: aerospace engineering, aeronautical engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering, computer science, electrical engineering, engineering (environmental engineering), industrial and systems engineering, materials science, mechanical engineering and petroleum engineering.

Deficiency Courses

New students may be required to demonstrate satisfactory preparation for the graduate program with previously completed course work. In cases where preparation is not demonstrated, up to 9 units of deficiency course work may be required in addition to the normal degree requirements.

Credit for required deficiency courses may not be applied toward a graduate degree. A deficiency course within the same discipline taken after the higher level course has been passed will not be available for unit or grade point credit.

Placement Examinations

Enrollment in certain 500- and 600-level courses in the disciplines of computer engineering and electrical engineering will require a student to either take and pass the corresponding 400-level prerequisite at USC, or pass a placement exam in the corresponding course.

Not all 400-level prerequisite courses taken instead of a placement exam are available for degree credit. No unit or grade point credit is given for placement exams. Please consult with an academic adviser or refer to the department website for information on specific courses and placement exam details.

Foreign Language Requirements

There is no foreign language requirement for engineering majors.

Course Requirements

Satisfactory completion of at least 60 units of approved graduate level course work with a cumulative grade point average of at least 3.0 is required of all Ph.D. students in engineering. A minimum grade of C (2.0) is required in a course to receive graduate credit. Work graded C- or below is not acceptable for subject or unit credit toward any graduate degree. Undergraduate prerequisites and graduate course work will be required in accordance with the regulations of the major department or program and the recommendations of the student’s qualifying exam committee. Transfer units are subject to approval by the Office of Degree Progress (for course work taken at institutions in the United States) or by the Office of Graduate Admission (for course work taken at institutions outside the United States) and by the qualifying exam committee.

Screening Procedure

The original admission decision admitting a student to the Ph.D. program is based on the student’s previous academic records, Graduate Record Examinations scores and other evidence of scholastic abilities indicating promise for completing graduate studies. It is also a prerequisite that all Ph.D. students successfully complete the screening procedures designated by the department. These usually consist of a written and an oral examination administered by the faculty. Students who fail the screening procedure will be advised that they are not recommended to continue in the Ph.D. program and that any additional work may not be counted toward the degree.

Qualifying Exam Committee

The Ph.D. student’s program of study is supervised by the qualifying exam committee, which is formed immediately after passing the screening examination. The committee consists of five tenure-track faculty members, four from the major department and one from outside the department. Reporting the screening procedures and forming the qualifying exam committee are accomplished by filling the appropriate forms obtained from the Graduate School Website. usc.edu/schools/GraduateSchool.

Qualifying Examinations

The qualifying examinations are taken during the last semester of the second year of graduate study or, at the latest, in the fifth semester or equivalent. The Request to take the Qualifying Examinations must be filed in the semester prior to taking the examinations and at least 30 days before beginning the examinations. The examinations are intended to determine the extent of the student’s knowledge in basic science and engineering areas as well as the ability to do original and scholarly research. The qualifying exam committee decides the nature of the qualifying examinations (both oral and written portions) according to the policies applicable in each department.

If not otherwise enrolled, a student must enroll in GRSC 803 during the semester in which the qualifying examination is to be taken. Students are strongly encouraged to take the qualifying examination during the first semester in which they are enrolled in GRSC 800, and should not enroll in more than two semesters of GRSC 800 before taking the qualifying examination.

The examinations may be scheduled at any time during the semester provided that all members of the committee are available to administer them. All portions of the examinations must be completed within 60 days. After passing the qualifying examinations the Ph.D. student is admitted to candidacy by the Graduate School and the dissertation committee is established. After this step students will normally engage in at least one year of full-time graduate study and research on campus.

Doctoral Dissertation

An acceptable dissertation based on original investigation and supervised directly by the dissertation committee is required. The dissertation must show mastery of a special field, capacity for independent research and a scholarly result. Candidates are expected to keep all members of the dissertation committee informed of their progress at all stages of the dissertation.

Defense of the Dissertation

After satisfactorily meeting all other requirements and after the research and writing of the dissertation are substantially complete, the Ph.D. candidate must pass a general final oral examination devoted to the major field and to the topic of the dissertation. The examination will be conducted in such a manner as to determine to the satisfaction of the dissertation committee that the candidate has attained the stage of scholarly advancement and power of investigation demanded by the profession of engineering. Ethical, practical and societal consequences of engineering are intended to determine the extent of the student’s knowledge in basic science and engineering areas as well as the ability to do original and scholarly research. The qualifying exam committee decides the nature of the qualifying examinations (both oral and written portions) according to the policies applicable in each department.

If not otherwise enrolled, a student must enroll in GRSC 803 during the semester in which the qualifying examination is to be taken. Students are strongly encouraged to take the qualifying examination during the first semester in which they are enrolled in GRSC 800, and should not enroll in more than two semesters of GRSC 800 before taking the qualifying examination.

The examinations may be scheduled at any time during the semester provided that all members of the committee are available to administer them. All portions of the examinations must be completed within 60 days. After passing the qualifying examinations the Ph.D. student is admitted to candidacy by the Graduate School and the dissertation committee is established. After this step students will normally engage in at least one year of full-time graduate study and research on campus.

For more information about the Viterbi School graduate programs and DEN@Viterbi, visit viterbi.usc.edu/gapp.

Progress Toward the Degree

Graduate students are expected to make regular progress toward their degrees as defined by the faculty of their respective departments and within the time limits allowed. Graduate students' progress and performance are reviewed each semester. Students making unsatisfactory progress receive a formal written warning and are placed on a semester of academic warning with specific conditions to be met for continuation in the program. Please refer to catalogue sections Academic Warning and Dismissal of Graduate Students; Grade Point Average Requirements; and the Website of the Office of Graduate and Professional Programs (GAPP) at viterbi.usc.edu/gapp.

Special Educational Opportunities

DEN@Viterbi

Established in 1972, DEN@Viterbi, the USC Viterbi School of Engineering’s online delivery system is a pioneer in the distance learning arena, using cutting-edge technology to enable professional engineers to take USC engineering courses for graduate degree credit without coming to the campus. DEN@Viterbi students enrolled around the world are pursuing over 40 graduate degree programs online – more choices than at any other research university. DEN@Viterbi breaks down geographical and scheduling barriers, allowing students to take classes anytime and anywhere, with the option for live interactivity. DEN@Viterbi students receive support from administrative and technical staff, and enjoy access to all services the Viterbi School has to offer.

The Viterbi School has made it possible for all on-campus students enrolled in the school’s graduate courses to receive free access to the archived lectures of courses offered via DEN@Viterbi. This valuable study aid enables students to review lectures throughout the semester.

For more information about the Viterbi School graduate programs and DEN@Viterbi, visit viterbi.usc.edu/gapp.

Engineering

The courses listed in the following section have been designed for specific groups of students for various purposes as indicated in the course descriptions. Certain courses have restrictions related to their applicability for degree credit. Students should consult the academic adviser in the major department for further information.

Courses of Instruction

Engineering (ENGR)

ENGR 100abcd Engineering Honors Colloquium (1-1-1-1) Recent developments in a highly technological society with emphasis on selected topics. Enrollment limited to members of the Viterbi School of Engineering Honors Program. Graded CR/NC.

ENGR 101 Introduction to Engineering (3, Fa) Gateway to the majors and minors in engineering. Introduction to engineering disciplines. Historical and current trends in engineering; ethical and societal factors in engineering solutions; hands-on design experiences; field trips; USC laboratory tours.

ENGR 102 Engineering Freshman Academy (2, Fa) Introduction to the profession of engineering. Ethical, political and societal consequences of engineering innovations and the impact of engineering on everyday
life. Team project and guest lectures. Open to freshmen only. Graded CR/NC.

ENGR 150L Engineering Science and Systems: From Humans to Robots (3, Fa) Hands-on multidisciplinary engineering course that uses robotics as a theme to cover material from all areas of engineering, Laboratory; programming; team projects; end-of-semester exhibition. Open only to freshmen. Recommended preparation: Basic programming experience (e.g., C, C++, C#, Java, Python).

ENGR 301 Technical Entrepreneurship (3) (Enroll in BUAD 301)

ENGR 305 Engineering Biology Matters (3, Fa) Engineering students will learn biological phenomena in the context of engineering principles and explore biological mechanisms and processes as analogies for designing engineered systems. Recommended preparation: CHEM 105aL, MASC 110L.

ENGR 345 Principles and Practices of Global Innovation (3, Sp) Learner-centered, cross-cultural, technology-enabled approaches to principles and industrial practices leveraging cultural diversity to inspire innovations for competitive global markets. Requires an extended semester of 22 weeks, including 2-week overseas project in early summer.

ENGR 393abcdx Cooperative Education Work Experience (1 or 2, max 3) Supervised work experience in a professional environment related to a specific degree program, academic level, and career objective. Acceptance into Cooperative Education Program required. Graded IV/CR/NC. Degree credit by departmental approval.

ENGR 400 Engineering Honors Project (1-3, max 12, FaSpSm) Supervised interdisciplinary studies and projects. Enrollment limited to members of the Viterbi School of Engineering Honors Program. Graded CR/NC.

ENGR 401x Communicating Science and Engineering to Children (3, max 6, FaSpSm) Engineering students communicate their knowledge, collaborate constructively with peers, and inspire underserved children to develop a curiosity and persistence for science and engineering. Open only to junior and senior engineering students.

ENGR 493x Dean’s Seminar in Entrepreneurship (1, 2, max 4) Overview of starting and developing a new business. Discussion of successful business leaders and entrepreneurs. Not available for students admitted to the Entrepreneur Program. Open only to seniors or graduate students in business or engineering. Graded CR/NC. (Duplicates credit in former BUAD 493x.)

ENGR 499 Special Topics (2-4, max 9) Current developments in the field of engineering; topics to be selected each semester.

Chair: Geoffrey R. Spedding, Ph.D.*

Faculty
Chooong Hoon Cho Chair in Aerospace and Mechanical Engineering: Michael Kassner, Ph.D.

Philip and Cayley MacDonald Early Career Chair: Andrea Hodge, Ph.D.

William E. Leonhard Professor of Engineering: Fokion Egolfopoulos, Ph.D.

Gordon S. Marshall Professor of Engineering Technology: Roger Ghanem, Ph.D. (Civil and Environmental Engineering)

Zohrab A. Kaprielian Fellow in Engineering: Eva Kanso, Ph.D.

Professors: Charles Campbell, Ph.D.; Julian Damaradzki, Ph.D.; Fokion Egolfopoulos, Ph.D.; Henryk Flashner, Ph.D.; Roger Ghanem, Ph.D. (Civil and Environmental Engineering); Yan Jin, Ph.D.; Michael E. Kassner, Ph.D. (Materials Science); Paul K. Newton, Ph.D.; Larry G. Redekopp, Ph.D.; Paul Romney, Ph.D.; Satwinder S. Sadhal, Ph.D.; Geoffrey Spedding, Ph.D.; Firdaus E. Udwaadla, Ph.D. (Civil and Environmental Engineering, Data Science and Operations, Systems Architecting and Engineering and Mathematics); Bingen Yang, Ph.D.

Associate Professors: Andrea Hodge, Ph.D.; Eva Kanso, Ph.D.; Geoffrey R. Shifflett, Ph.D.*

Assistant Professors: Veronica Eliasson, Ph.D.; Nestor Perez-Aranobia, Ph.D.

Associate Professor of Engineering Practice: M. Oussama Safadi, Ph.D.*

Senior Lecturers: Oliver Franke, Ph.D.; Takahiro Sakai, Ph.D.

Lecturers: Charles Radiovich, Ph.D.; Yann Staehens, Ph.D.; David Wilcox, Ph.D.

Research Associate Professor: Adam Fincham, Ph.D.

Research Associate: Anita Penkova, Ph.D.

Joint Appointments: Young Chen, Ph.D. (Industrial and Systems Engineering); Daniel Erwin, Ph.D.* (Astronautics); Mike Gruntman, Ph.D. (Astronautics); Petros Ioannou, Ph.D. (Electrical Engineering - Systems); Berok Khosnevish, Ph.D. (Industrial and Systems Engineering); Joseph Kunc, Ph.D. (Astronautics, Physics); Stephen C-Y Lu, Ph.D. (Industrial and Systems Engineering); Sami F. Maari, Ph.D. (Civil and Environmental Engineering); Steven Nett, Ph.D. (Materials Science); Constantinos Sioutas, Ph.D. (Civil and Environmental Engineering); Francisco Valero-Cuevas, Ph.D. (Biomedical Engineering)

Emeritus Professors: Ron Blackwelder, Ph.D.*; Fred Browand, Ph.D.; Clarke Howatt, M.S.; Lampert, Ph.D.; Robert Mannes, M.S., F.E.; Donald E. Shemansky, Ph.D.

Degree Requirements

Educational Mission

The degree programs of the Department of Aerospace and Mechanical Engineering provide the educational foundation for success in all walks of life whether or not one’s career path includes employment as a professional engineer, work in a field outside of engineering, or pursuit of further education.

Undergraduate Program Educational Objectives

Graduates of the undergraduate programs in Aerospace and Mechanical Engineering are expected to attain the following objectives within a few years after graduation:

- Work as professionals within engineering or a related area in both small- and large-scale businesses;
- Pursue further education through graduate school or professional development courses; and
- Become leaders within their chosen profession whether it be industry, academia or service.

Undergraduate Program Criteria
The program leading to a Bachelor of Science in Aerospace Engineering prepares graduates to have a knowledge of aerodynamics, aerospace materials, structures, propulsion, flight mechanics, and stability and control. The program also prepares graduates to have design competence that includes integration of aeronautical topics.

The program leading to a Bachelor of Science in Mechanical Engineering requires students to apply principles of engineering, basic science and mathematics (including multivariate calculus and differential equations); to model, analyze, design and realize physical systems, components or processes; and prepares students to work professionally in both thermal and mechanical systems areas.

**Aerospace Engineering Degrees**

**Bachelor of Science in Aerospace Engineering**

The requirement for this degree is 130 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees section.

**General Education**

- **General education+**
  - English composition/writing requirement
    - WRIT 130 Analytical Writing 4
    - WRIT 340 Advanced Writing 3

**Pre-major requirements**

- **Math Requirement**
  - MATH Calculus I 4
  - MATH Calculus II 4
  - MATH Calculus III 4
  - MATH Mathematical Physics and Engineering I 4

**Physics Requirement**

- PHYS Fundamentals of Physics I: Mechanics and Thermodynamics 4
- PHYS Fundamentals of Physics II: Electricity and Magnetism 4
- PHYS Fundamentals of Physics III: Optics and Modern Physics 4

**Chemistry Elective**

- CHEM General Chemistry, or CHEM Advanced General Chemistry, or MASC Materials Science 4

**Major requirements**

- **Aerospace and Mechanical Engineering**
  - AME 105 Introduction to Aerospace Engineering 4
  - AME 150L Introduction to Computational Methods 4
  - AME 201 Statics 3
  - AME 204 Strength of Materials 3
  - AME 212L Mechanical Behavior of Materials 3
  - AME 261 Basic Flight Mechanics 4
  - AME 301 Dynamics 3
  - AME 302 Dynamic Systems 3
  - AME 308 Computer-Aided Analysis for Aerodynamic Design 3
  - AME 309 Dynamics of Fluids 4
  - AME 310 Engineering Thermodynamics I 3
  - AME 321L Mechatronics Laboratory I and II 3
  - AME 404 Computational Solutions to Engineering Problems 3
  - AME 426 Energy and Propulsion 3
  - AME 441L Senior Projects Laboratory 3
  - AME 451 Linear Control Systems I 3
  - AME 481 Aircraft Design 4

**Technical electives**

- **Electrical Engineering**
  - AME 505 Advanced Electromagnetism 3
  - AME 515 Energy and Propulsion 3
  - AME 521L Digital Signal Processing 3
  - AME 535A Introduction to Photonic Engineering 3
  - AME 535B Finite Element Analysis 3
  - AME 536 Computational Fluid Dynamics 3

**Mechanical Engineering**

- AME 541L Computational Fluid Dynamics 3
- AME 546 Computational Solid Mechanics 3
- AME 552 Finite Element Analysis 3
- AME 559 Mechanics 3
- AME 560 Advanced Engineering Mechanics 3
- AME 565 Advanced Structures Engineering 3

**Astronautics**

- ASTE 280 Foundations of Astronautics Engineering 3

**Major Electives**

- AME core electives** 3
- Technical electives*** 6

**Total units**: 130

* Satisfies GE Category III requirement.

** Any upper division AME courses.

*** Technical electives consist of (1) any upper division course in engineering except CE 404, CE 412 and ISE 440, or (2) an upper division course in chemistry, physics or mathematics and MATH 245. No more than 3 units of 490 Directed Research course work can be used to satisfy the technical elective requirement.

+ The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

**Master of Science in Aerospace Engineering**

In addition to the general requirements listed in this catalogue, the department has identified requirements in the following areas of specialization: aerodynamics/fluid dynamics; aerospace controls; aerospace design; aerospace structures; computational fluid dynamics; hypersonics/kinetics of gases and plasmas; propulsion; and space science. Core requirements and elective requirements are defined for each area of specialization. Information on the current approved courses that comprise these core and elective requirements is available from the department.

**Master of Science, Aerospace and Mechanical Engineering (Computational Fluid and Solid Mechanics)**

The program prepares students for professional careers in engineering companies that develop products using computational tools of fluid and solid mechanics. The program also provides the necessary background for pursuing higher degrees, Engineer and Ph.D., in aerospace and mechanical engineering with specializations in computational fluid mechanics, computational solid mechanics and computational heat transfer. The degree course work provides a necessary background in basic aerospace and mechanical engineering disciplines (solid mechanics, fluid mechanics, heat transfer), engineering mathematics and numerical methods. The advanced computational technical electives provide practical examples using existing numerical programs to simulate structures, heat transfer and fluid flows as well as commercial mathematical packages for analyzing data and simulations.

Admission requirements follow the general admission rules for aerospace and mechanical engineering graduate programs. The program requires completion of a minimum of 27 units and a cumulative GPA of at least 3.0 for graduation. The program with thesis requires 28 units, four of which are thesis units.

One core class requirement may be waived at the discretion of a graduate adviser if a student documents that he or she completed or is enrolled in an equivalent course. The waived class must be replaced by a technical elective. Credit for one course of not more than 4 units from another accredited institution may be approved by a
graduate adviser. The Master’s Thesis (4 units) may be substituted for a technical elective class (3 units).

Master of Science in Product Development Engineering

See the listing under Product Development Engineering

Master of Science in Systems Architecting and Engineering

See the listing under Systems Architecting and Engineering.

Master of Science in Aerospace Engineering/Master of Science in Engineering Management

The department of Aerospace and Mechanical Engineering in conjunction with the Daniel J. Epstein Department of Industrial and Systems Engineering offers programs leading to the degree of Master of Science in Aerospace Engineering/Master of Science in Engineering Management. This program is designed for graduate aerospace engineers whose career objectives lead to increasing technical management responsibilities. In addition to the general requirements of the Viterbi School of Engineering, the dual degree of Master of Science in Aerospace Engineering/Master of Science in Engineering Management is also subject to the following requirements:

All applicants must meet the admission requirements of both the Department of Aerospace and Mechanical Engineering and the Department of Industrial and Systems Engineering;

A minimum of 48 units is required;

A minimum of 18 units must be graduate-level course work in AME, approved by an AME graduate student adviser;

A minimum of 18 units must be graduate level course work in ISE, approved by the ISE Engineering Management graduate student adviser and chosen from the course list under Master of Science in Engineering Management;

A minimum additional 12 units of acceptable course work must be chosen with the consent of the ISE Engineering Management graduate student adviser to form a coherent program.

Engineer in Aerospace Engineering

Requirements for the Engineer in aerospace engineering are the same as the general requirements. Three to 6 of the units required for the degree must be AME 690. Prior approval must be obtained from the qualifying exam committee before registration in AME 690.

Doctor of Philosophy in Aerospace Engineering

The Doctor of Philosophy with a major in aerospace engineering is also offered. See general requirements for graduate degrees.

Mechanical Engineering Degrees

The department offers a Bachelor of Science degree in Mechanical Engineering. Additionally, petroleum engineering exists as an emphasis within the mechanical engineering program. An area of emphasis appears in parenthesis after the primary major name on the transcript.

Bachelor of Science in Mechanical Engineering

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees section.

Bachelor of Science in Mechanical Engineering

Emphasis in Petroleum Engineering

The requirement for the degree with an emphasis in petroleum engineering is 128 units. A cumulative GPA of 2.0 or higher is required for all upper division course work in engineering, science and mathematics. See the common requirements for undergraduate degrees section.

### Minor in Music Recording

A minor in music recording is offered through the USC Thornton School of Music to provide undergraduate students with the background necessary to enter the field of recording engineering and to familiarize them with the design needs of modern recording equipment. The minor is recommended to mechanical engineering majors with extensive musical training who would like to combine their technical and musical abilities while learning the engineering applications of physical and mathematical principles to the art of music recording. See the listing under the USC Thornton School of Music.

**Requirements:** The minor is recommended to mechanical engineering students with the background necessary to enter the field of recording engineering and to familiarize them with the background necessary to enter the field of recording engineering. However, students with a physics or chemistry background can be accommodated with the completion of certain prerequisites.

* Satisfies GE Category III requirement.
** Any upper division course in AME.

### Master of Science in Mechanical Engineering

**Requirements:** The Master of Science in mechanical engineering are the same as set forth in the general requirements. Six of the required units must be in AME 525 and AME 526 or courses in engineering analysis approved in advance in writing by the Department of Mechanical Engineering.

The specific sequence of courses that constitutes an acceptable program must be approved in advance.

**Requirements for Graduation Without Thesis:** 27 units total with 3.0 GPA: AME 525 and AME 526 or approved mathematics (5); 500 level courses in major department (12); approved 400 or 500 level courses (4).

With Thesis, 27 units total with 3.0 GPA: AME 525 and AME 526 or approved mathematics (5); 500 level courses in major department (12) not including thesis; maximum AME 534ab – thesis (4); approved 400 or 500 level units (5) (a maximum total of 8 units combining AME 590 and AME 594ab).

**Recommended Programs of Study**

The program of study depends upon the student’s interest and background. During the first semester at USC, students must consult with a departmental adviser about an area of concentration and draw up a plan of study, which must be approved by the adviser. Besides the common requirements, listed below are several areas in mechanical engineering with specific courses identified as core and core electives. Groups of courses in other combinations and from other departments within the university may be approved if a particular coordinated interest can be demonstrated. In some instances students whose background is not in mechanical engineering may be required to take additional course work.

**Core Requirements**

**Engineering Analysis (6 units):** AME 525, AME 526

Engineering electives (1-6 units): Approved 400-500 or 600-level courses

**Engineering Design**

Core courses (3 units): AME 503, AME 505, AME 509

Core electives (6 units): Two courses from AME 504, AME 527, AME 541, ASTE 520, ASTE 523, CE 529, SAE 549

**Thermal and Fluid Sciences**

Core courses (12 units): Four courses from one of the selected areas:
- Combustion: AME 436, AME 513, AME 514, AME 530A
- Fluid Dynamics: AME 457, AME 511, AME 530A, AME 530A
- Heat Transfer: AME 457, AME 515, AME 516, AME 517

Core electives (6 units): Take two courses from the following list, not duplicating the above selection: AME 436, AME 457, AME 511, AME 513, AME 514, AME 515, AME 516, AME 517, AME 530A, AME 533, AME 535A, AME 535B, AME 537

**Mechanics and Materials**

Core courses (12 units): AME 509, AME 559, AME 560, AME 584

Core elective (3 units): One of AME 543, AME 588, CE 529A

**Microelectromechanical Systems (MEMS)**

**Core courses (12 units):** AME 545, AME 537, BME 551, EE 607

Core elective (3 units): One of AME 535A, ASTE 501A, ASTE 545

**Dynamics and Control**

Students interested in this area may follow the M.S., Aerospace and Mechanical Engineering (Dynamics and Control) described below.

**Master of Science in Mechanical Engineering (Nuclear Power)**

The program offers the degree of Master of Science in mechanical engineering with specialization in nuclear power. It is structured so that students who have all the prerequisites can complete the entire program through distance education. It is intended for students with an undergraduate degree in engineering. However, students with a physics and/or chemistry background can be accommodated with the completion of certain prerequisites.

**Master of Science in Mechanical Engineering (Energy Conversion)**

**See Sustainable Infrastructure Systems.**

**Master of Science in Aerospace and Mechanical Engineering (Dynamics and Control)**

The Master of Science with emphasis in dynamics and control educates and trains multidisciplinary professionals in the modeling, analysis, simulation and
control of complex time-evolutionary systems. It is a program of study that encompasses advanced analytical dynamics, nonlinear dynamical systems, linear and nonlinear dynamics and vibrations, and linear and nonlinear control. The program equips students to apply their knowledge to a variety of complex systems encountered in nature and society, especially those in civil, mechanical and aerospace engineering and applied mechanics.

Students will be given advisement in the first semester of their study. In addition to AME 525 and AME 526, students are required to take the following core courses: AME 531, AME 532, AME 534, AME 541, AME 552. Elective courses can be chosen in areas of specific interest to the student such as orbital dynamics, spacecraft control, aircraft dynamics and control, chaos and chaotic dynamics, random vibrations, computer control of mechanical systems and robotics. The program provides the graduate student with a broad, well-rounded, advanced education that can be applied to many specific, technologically advanced fields in which dynamics and control play a pivotal role.

Master of Science in Aerospace and Mechanical Engineering (Computational Fluid and Solid Mechanics)

See listing under Aerospace Engineering Degrees.

Master of Science in Mechanical Engineering/Master of Science in Engineering Management

The department of Aerospace and Mechanical Engineering in conjunction with the Daniel J. Epstein Department of Industrial and Systems Engineering offers programs leading to the degree of Master of Science in Mechanical Engineering/Master of Science in Engineering Management. This program is designed for graduate mechanical engineers whose career objectives lead to increasing technical management responsibilities.

In addition to the general requirements of the Viterbi School of Engineering, the dual degree of Master of Science in Mechanical Engineering/Master of Science in Engineering Management is also subject to the following requirements:

All applicants must meet the admission requirements of both the Department of Aerospace and Mechanical Engineering and the Department of Industrial and Systems Engineering;
A minimum of 48 units is required;
A minimum of 18 units must be graduate level course work in AME, approved by an AME graduate student adviser;
A minimum of 18 units must be graduate level course work in ISE, approved by the ISE Engineering Management graduate student adviser and chosen from the course list under Master of Science in Engineering Management;
A minimum additional 12 units of acceptable course work must be chosen with the consent of the ISE Engineering Management graduate student adviser to form a coherent program.

Doctor of Philosophy in Mechanical Engineering

The Doctor of Philosophy in mechanical engineering is also offered. See general requirements for graduate degrees.

Courses of Instruction

Aerospace and Mechanical Engineering (AME)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

AME 101 Introduction to Mechanical Engineering and Graphics (3, Fa) Gateway to the bachelor of science degree in mechanical engineering. Introduction to mechanical engineering disciplines and practice; graphical communication and layout of machine parts; introduction to computer-aided drafting and drawing.

AME 105 Introduction to Aerospace Engineering (4, Fa) Gateway to the Aerospace Engineering major. Introduction to flight vehicle performance and propulsion. Elements of the physics of gases. Laboratory: computers and graphics; model rocket and glider test flights.

AME 150 Introduction to Computational Methods (4, Sp) Computer programming; organization of problems for computational solution; introduction to software for computation and graphics; applications to engineering problems. Corequisite: MATH 125.

AME 201 Statics (3, FaSp) Analysis of forces acting on particles and rigid bodies in static equilibrium; equivalent systems of forces; friction; centroids and moments of inertia; introduction to energy methods. Prerequisite: MATH 125; recommended preparation: AME 101, PHYS 151L.

AME 204 Strength of Materials (3, FaSp) Stress, strain and deflection of mechanical elements due to tension, shear, bending, or torsion; combined loads; energy methods, statically indeterminate structures; strength-based design. Prerequisites: AME 201 or CE 205.

AME 222 Fundamentals of Audio Engineering (3, Fa) (Enroll in EE 222)

AME 231L Mechanical Behavior of Materials (3, Sp) Material properties of metals, ceramics, and composites; stress-strain relationships; microstructural characteristics; fracture, fatigue, and creep; effects of processing. Corequisite: AME 204.

AME 261 Basic Flight Mechanics (4, Sp) Performance of flight vehicles; maximum speed, rate-of-climb, range, and endurance; basic stability and control, weight, and balance; computer exercises. Recommended preparation: AME 150L.

AME 291 Undergraduate Design Projects I (1, max 4, FaSp) Analysis, design, fabrication, and evaluation of devices intended for entry in local and national design competitions. Intended for lower division students or those with little prior project experience. Graded CR/NC.

AME 301 Dynamics (3, FaSp) 2-D and 3-D kinematics and dynamics of particles and rigid bodies; systems of particles and rigid bodies; coupled rigid bodies; introduction to vibrations. Prerequisites: AME 201 or CE 205; recommended preparation: PHYS 151L.

AME 302 Dynamic Systems (3, FaSp) Modeling of lumped parameter elements and systems; free and forced response of first and second order systems; design oriented approach to dynamic systems. Prerequisite: MATH 245; recommended preparation: AME 309 or CE 309; AME 501 or CE 325.

AME 303 Dynamics of Machinery (3, FaSpSm) Kinematics and dynamics of machines; balancing of rotating and reciprocating machinery; gyroscopic effects; critical speeds; energy variation in machinery; introduction to mechanism design. Prerequisite: AME 301 or CE 325.

AME 305 Mechanical Design (3, Fa) Design and analysis of mechanical elements including shafts, bearings, springs, screws, belts and gears; strength, fatigue and deflection considerations in machine design. Prerequisite: AME 204 or CE 225.

AME 308 Computer-Aided Analyses for Aero-Mechanical Design (3, FaSpSm) Introduction to the finite element method; practical application of computer analysis tools for structural analysis and design. Prerequisite: AME 204; corequisite: AME 301.

AME 309 Dynamics of Fluids (4, FaSp) Fluid statics; conservation of mass, momentum, and energy in integral and differential form; applications. Laminar and turbulent pipe flow; compressible flow; potential flow over bodies. Recommended preparation: AME 310.

AME 310 Engineering Thermodynamics I (3, FaSpSm) Fundamentals of thermodynamics applied to actual and perfect gases and vapors; energy concepts, processes, and applications. Prerequisite: MATH 226; recommended preparation: PHYS 151L, high-level programming language.

AME 312 Engineering Thermodynamics II (3, Sp) Application of thermodynamic principles to fluid flow, power cycles, and refrigeration. Prerequisite: AME 310; recommended preparation: high-level programming language.

AME 331 Heat Transfer (3, Sp) General principles underlying heat transfer by conduction, convection, and radiation; steady and transient conditions; heat exchangers. Prerequisite: AME 310; corequisite: AME 309 or CE 309.

AME 341L Mechatronics Laboratory I and II (3, FaSpSm) A coordinated laboratory and lecture sequence on mechatronic instrumentation and device control stressing the symbiotic integration of mechanical, optical and electronic components. Prerequisite: PHYS 152L, MATH 126.

AME 355 Aerospace Structures I (3, Irregular) Shear and bending in symmetrical and unsymmetrical sections; torsion, column, and thin sheet analysis and design, including plastic failures and open section crippling.

AME 360 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

AME 403 Stress Analysis (3, Sp) Theories of failure, shear center, unsymmetrical bending, curved beams, torsion of non-circular sections; cylinders, rotating discs, thermal stresses, inelastic strains, energy methods. Prerequisite: AME 204.

AME 404 Computational Solutions to Engineering Problems (3, Fa) Mathematical aspects of the solutions to typical advanced mechanical engineering problems. Modeling, simulation, computational aspects, computer solutions, and computational tools. Recommended preparation: FORTRAN, MATLAB and Maple.

AME 408 Computer-Aided Design of Mechanical Systems (2, FaSp) Design of mechanical systems using advanced graphics techniques; computer-aided drafting, design optimization, elements of computer graphics, solids modeling; introduction to computer-aided
manufacturing. Prerequisite: AME 204 or CE 225; recommended preparation: AME 308.

AME 409 Senior Design Project (4, Sp) Modeling, analysis, integration, layout and performance analysis of a mechanical system to meet specified design requirements. Prerequisite: senior standing.

AME 412 Molecular Theory of Gases (3, Irregular) Molecular structure; intermolecular potentials; molecular processes in gases; molecular interpretation of concepts of classical thermodynamics; radiative transport phenomena in gases. Prerequisite: AME 310.

AME 415 Turbine Design and Analysis (3, Fa) Physics of turbine operation; design and analysis for the development of turbine hardware for propulsion and power generation. Recommended preparation: familiarity with Matlab.

AME 420 Engineering Vibrations I (3, Fa) Theory of free and forced vibrations with and without damping; systems of single and multiple degrees of freedom; iteration; methods; vibration isolation; instrumentation. Prerequisite: MATH 245.

AME 423 Loudspeaker and Sound-System Design (3, Sp) (Enroll in EE 423L)

AME 428 Materials of Mechanical Design (3) (Enroll in CE 428)

AME 430 Thermal Systems Design (3, Fa) Design methodology for thermal systems; boilers, condensers, air conditioning, power generation, air pollution control, combustion and alternative fuels. Prerequisite: AME 310; recommended preparation: AME 312.

AME 441L Senior Projects Laboratory (3-5, FaSp) Individual engineering projects designed and constructed to model and test a physical principle or system. Prerequisite: AME 341L.

AME 443 Control Systems Laboratory (3, Sp) Vibration measurement and analysis; simulation, design, and experimental verification of mechanical control systems; identification of system parameters, implementation of controllers, verification of closed-loop performance via experimentation and simulation. (Duplicates credit in former AME 442L.) Prerequisite: AME 420 or AME 451 or EE 482.

AME 451 Linear Control Systems I (3, FaSp) Transform methods, block diagrams; transfer functions; stability; root-locus and frequency domain analysis and design; state space and multiloop systems. Prerequisite: MATH 245.

AME 453 Engineering Dynamics (3, Sp) Principles of dynamics applied to mechanical and aerospace problems. Introduction to gyroscopic motion and rigid body dynamics. Prerequisite: MATH 245.

AME 455 Introduction to MEMS (3, Sp) Introduction to micro-electro-opto-mechanical systems; scaling effects on material properties, fluid flows, dynamical behavior; fabrication methods; design considerations for MEMS sensors and actuators. Recommended preparation: AME 301, AME 309 and AME 310.

AME 457 Engineering Fluid Dynamics (3, Fa) Laminar and turbulent boundary layer flow with and without heat transfer; boundary layer separation, stability, transition and control; introduction to compressible fluid flow. Prerequisite: AME 310; AME 309 or CE 308.

AME 458 Theory of Structures II (3) (Enroll in CE 458)

AME 459 Flight Mechanics (3, Fa) Applications of basic aerodynamics to aircraft and missile performance, power and thrust, stability and control, compressibility effects. Recommended preparation: AME 309.

AME 460 Aerodynamic Theory (3) Basic relations describing the inviscid flow field about bodies and wings moving at subsonic and supersonic speeds. Prerequisite: AME 309.

AME 461 Formation Evaluation (3) (Enroll in PTE 461)

AME 462 Economic, Risk and Formation Productivity Analysis (4) (Enroll in PTE 462)

AME 463L Introduction to Transport Processing in Porous Media (3) (Enroll in PTE 463L)

AME 464L Petroleum Reservoir Engineering (3) (Enroll in PTE 464L)

AME 465L Drilling Technology and Subsurface Methods (3) (Enroll in PTE 465L)

AME 481 Aircraft Design (4, Sp) Aircraft design and analysis, design requirements and specifications; integration of structure, propulsion, control system, and aerodynamic configuration; performance analysis and prediction. Recommended preparation: AME 309, AME 353.

AME 490X Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

AME 491 Undergraduate Design Projects II (1, max 4, FaSp) Analysis, design, fabrication, and evaluation of devices intended for entry in local and national design competitions. Intended for students with prior project experience. Upper division standing. Graded CR/NC.

AME 499 Special Topics (2-4, max 8, FaSp) Course content to be selected each semester from recent developments in mechanical engineering and related fields.

AME 502 Modern Topics in Aerospace Design (3, Fa) Current topics in Aerospace Engineering are addressed by a number of industry panelists. Students, under panelists' supervision and guidance, complete independent research reports and briefings. Recommended preparation: AME 261, AME 441, AME 481 or equivalents. Genuine interest in design of flight vehicles. Open only to senior, master, and doctoral students.

AME 503 Advanced Mechanical Design (3, Fa) Specific problems and methods of analysis in mechanical systems design.

AME 505 Engineering Information Modeling (3, Sp) Symbolic and object-oriented modeling, product and process modeling for design and manufacturing, information models for computer integrated and collaborative engineering, information modeling for life-cycle engineering.

AME 507 Mechanics of Solids I (3) (Enroll in CE 507)

AME 509 Applied Elasticity (3, Sp) Condensed treatment dealing with engineering applications of the principles of elasticity, using the theories of elasticity, elastic stability, and plates and shells. Prerequisite: AME 403.

AME 511 Compressible Gas Dynamics (3, Sp) Thermodynamics, kinetic theory, compressible flow equations, shock and expansion waves, similarity, shock-expansion techniques and linearized flow applied to bodies, characteristics, theory of boundary layers.

AME 515 Principles of Combustion (3, Fa) thermochemistry, equilibrium, chemical kinetics, flame temperature, flame velocity, flame stability, diffusion flames spray combustion, detonation. Equations of motion including reaction, heat transfer, and diffusion.

AME 514 Applications of Combustion and Reacting Flows (3, Sp) Advanced topics and modern developments in combustion and reacting flows including ignition and extinction, pollutant formation, microscale and microgravity combustion, turbulent combustion and hypersonic propulsion. Recommended preparation: AME 513.

AME 516 Convection Processes (3, Sp) Analysis of isothermal and nonisothermal boundary layers. Exact and approximate solutions of laminar and turbulent flows. Variable-property and high-speed effects; dimensional analysis. Prerequisite: AME 457; recommended preparation: AME 526, AME 331.

AME 517 Radiation Heat Transfer (3, Fa) Radiation properties; black body radiation; shape factors of radiation network analysis and solar radiation. Prerequisite: AME 231; corequisite: AME 525 or AME 526.

AME 522 Nonlinear Dynamical Systems, Vibrations, and Chaos (3, Fa) Lagrange equations; nonlinear maps and differential equations; fixed points; periodic motion; qualitative/quantitative and local/global analysis; higher order systems; stability; bifurcations; chaos; fractals.

AME 523 Random Vibrations (3, Irregular) Random processes, ergodic theory, Ito calculus. Linear systems under stationary and nonstationary excitations. Fokker-Planck equations. Failure analysis and first passage problems. Prerequisite: AME 420, basic probability (or MATH 420), AME 451 recommended.

AME 525 Engineering Analysis (3, FaSp) Typical engineering problems discussed on a physical basis. Vector analysis, functions of complex variables, infinite series, residues.

AME 526 Engineering Analytical Methods (3, FaSp) Typical engineering problems discussed on a
physical basis. Fourier series; Fourier integrals; Laplace transform; partial differential equations; Bessel function.

AME 527 Elements of Vehicle and Energy Systems Design (3, Irregular) Design synthesis of aero/hydro/mechanical systems; techniques of design; conceptual thinking; problem definition, configurational development, analytic engineering approximation, oral briefings and group problem solving. Graduate standing.

AME 529 Aircraft Structures Analysis (3, Sp) The direct stiffness (finite element) method for analysis of semimonocoque structures; energy methods; elasticity, plates and shells, vibration, and stability; system identification.

AME 530ab Dynamics of Incompressible Fluids (3-3, FaSp) A unified discussion of low-speed fluid mechanics including exact solutions; approximation techniques for low and high Reynolds numbers; inviscid flows; surface waves; dynamic stability; turbulence.

AME 551 Multi-Phase Flows (3, Sp) Physics of the interaction between phases, empirical and analytical methods of solution to relevant technological problems. Prerequisite: AME 457.

AME 554 Nuclear Thermal-Hydraulics (3, Fa) Thermal-fluid phenomena for nuclear power stations. Heat generation by nuclear reactions, conduction in fuel rods, and transport of generated heat by convection, boiling, and condensation. Open only to master’s and doctoral students. Prerequisite: AME 457 or AME 530a; and AME 526 and AME 541; recommended preparation: undergraduate degree in engineering.

AME 554ab Introduction to Computational Fluid Mechanics (3-3, FaSp) a: Convergence, consistency, stability: finite difference, finite element, and spectral methods; direct and iterative procedures for steady problems; linear diffusion and advection problems; nonlinear advection problems. Recommended preparation: AME 526. b: Generalized curvilinear coordinates; grid generation; numerical techniques for transonic and supersonic inviscid flows; boundary layer flows; reduced Navier-Stokes equations; compressible and incompressible viscous flows. Recommended preparation: AME 511 or AME 520a, AME 523a.

AME 557 Microfluidics (3, Fa) Introduction to fluid dynamics in the microscale. Scaling parameters, dynamic, thermodynamic, electroosmotic and electrochemical forces. Flow in microdevices, external flow measurement and control, microvalves and micropumps. Limited to students with graduate standing. Recommended preparation: AME 309, MATH 445.

AME 559 Multi-body Dynamics (3, Sp) Kinematics and kinetics of rigid body motion, quaternions; elastic vibrations of continua; geometric and material nonlinearities; Galerkin methods; meshless finite elements; complex dynamical systems; computational methods.

AME 541 Linear Control Systems II (3, Fa) State space representation, linearization, solution of state equations; controllability and observability; state feedback, state observers; optimal control; output feedback. Prerequisite: AME 451.

AME 542 Theory of Plates (3) (Enroll in CE 520)

AME 543 Stability of Structures (3) (Enroll in CE 543)

AME 544 Computer Control of Mechanical Systems (3, Sp) Computer control as applied to machine tools, mechanical manipulators, and other mechanical machinery; discrete time controller design; microprocessor implementation of motion and force control servos. Prerequisite: AME 451.

AME 545 Modeling and Control of Distributed Dynamic Systems (3, Sp) Modeling and analysis of complex flexible mechanical systems; distributed transfer function synthesis; frequency-domain control methods; smart structure design; applications in vibration and noise control. Prerequisite: AME 521 and AME 541.

AME 548 Analytical Methods in Robotics (3, Irregular) Homogeneous transformations; formal description of robot manipulators; kinematic equations and their solution; differential relationships; dynamics; control; static forces; compliance. Prerequisite: EE 545; EE 482 or AME 451; knowledge of linear algebra.

AME 549 Systems Architecting (3, FaSm) (Enroll in SAE 549)

AME 550ab Seminar in Aerospace and Mechanical Engineering (1-1, FaSp) Recent developments and research in aerospace and mechanical engineering and related fields. Oral and written reports. Graded CR/NC. Only open to graduate students.

AME 551 Mechanical Behavior of Engineering Materials (3) (Enroll in MASC 551)

AME 552 Nonlinear Control Systems (3, Sp) Phase plane, describing functions, applications to mechanical and aerospace systems. Lyapunov direct and indirect methods, applications; Popov circle criteria applications. Prerequisite: AME 541.

AME 553ab Digital Control Systems (3-1) (Enroll in EE 543abc)

AME 559 Creep (3, Fa) Behavior of engineering materials at elevated temperatures; thermal stresses; creep mechanisms; interpretation of creep data; methods of predicting long-term strains.

AME 560 Fatigue and Fracture (3, Sp) Behavior of materials under cyclic and static fatigue; plastic instability; life-time predictions; brittle and ductile fracture; crack propagation and plastic blunting.

AME 561 Dislocation Theory and Applications (3) (Enroll in MASC 561)

AME 567 Collaborative Engineering Principles and Practice (3, Sp) (Enroll in ISE 567)

AME 571 Experimental Engineering Projects (3) Experimental methods appropriate to engineering research, emphasizing interdisciplinary investigations, individual projects.

AME 573 Aerosol Physics and Chemistry (3, Sp) Examination of the fundamentals of aerosol formation and evolution, aerosol effects on health and climate, and the principles of aerosol measurement. Open only to master’s and doctoral students.

AME 575 Advanced Engineering Analysis (3, Fa) Solution of engineering problems by methods of calculus variations, integral equations, asymptotic expansions. Prerequisite: CE 525ab or AME 525 and AME 526.

AME 576 Advanced Engineering Analytical Methods (3, Sp) Solution of engineering problems by methods of linear and nonlinear partial differential equations of first and second order; perturbations. Prerequisite: AME 515 or AME 526 or CE 525 or CE 526.

AME 577 Survey of Energy and Power for a Sustainable Future (3, FaSp) Power production includes conventional fossil fuels, synthetic fuels, hydroelectric, solar, wind, geothermal, biomass and nuclear. The environmental consequences of various energy sources are discussed. (Duplicates credit in CHE 510.)

AME 578 Modern Alternative Energy Conversion Devices (3, FaSp) Alternative energy/power conversion including fuel cells, photovoltaic, batteries, and biologically inspired energy processes; biomass conversion and utilization; Environmental Implications of alternative energy processes.

AME 581 Introduction to Nuclear Engineering (3, Fa) Review of basic nuclear physics, binding energy, reactor kinetics, thermal transport in reactor systems, radioactivity, shielding, reactor safety and health effects of radiation, risk assessment. Open only to graduate students. Recommended preparation: Undergraduate degree in engineering; AME 310, MATH 245, PHYS 121.

AME 582 Nuclear Reactor Physics (3, Sp) Neutron-induced fission chain reactions, reactor criticality. Neutron transport and diffusion in nuclear reactors. Mathematical/computational foundation for diffusion theory and transport calculations for fission reactor design/analysis. Open only to master’s and doctoral students. Prerequisite: AME 526 and AME 581; recommended preparation: undergraduate degree in engineering and PHYS 152.

AME 583 Effects of Radiation on Health (3, Sp) Nuclear physics relevant to human health. Biological effects of radiation, quantification and measurement of different types of radiation affecting living tissue, radiation protection, nuclear accidents. Open only to master’s and doctoral students. Prerequisite: AME 526 and AME 581; recommended preparation: undergraduate degree in engineering and PHYS 152.

AME 584 Fracture Mechanics and Mechanisms (3, Fa) Failure modes, stress concentrations, complex stress analysis, linear elastic fracture mechanics, yielding fracture mechanics, experimental methods, environmental assisted fracture and fatigue. Prerequisite: AME 403.

AME 590 Directed Research (1-12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

AME 594ab Master’s Thesis (1-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

AME 599 Special Topics (2-4, max 9, FaSp) Course content will be selected each semester to reflect current trends and developments in the field of mechanical engineering.

AME 621 Stability of Fluids (3) Linear and nonlinear stability analysis applied to free shear layers, boundary layers and jets; Rayleigh-Brandt convective instabilities
and centrifugal instability of rotating flows. Recommended preparation: AME 530b.

AME 623 Dynamics of Stratified and Rotating Flows
(3) Fluid motions in which density gradients and/or rotation are important, including internal wave motions with rotation, flow past obstacles, viscous effects, singular perturbations. Recommended preparation: AME 530b.

AME 624 The Fluid Dynamics of Natural Phenomena
(3) Application of the basic concepts of rotating, stratified fluid motion to problems in meteorology, oceanography, geophysics and astrophysics.

AME 626 Singular Perturbation Methods (3)

AME 620 Transition to Chaos in Dynamical Systems
(3) Bifurcation theory and universal routes to chaos in deterministic systems; application to maps and differential flows; characterization of strange attractors. Recommended preparation: AME 526.

AME 630 Uncertainty Modeling and Stochastic Organization (3) (Enroll in CE 640)

AME 645 Advanced Theory of Elasticity (3) (Enroll in CE 645)

AME 647 Multiscale Methods in Mechanics (3) (Enroll in CE 647)

AME 651 Statistical Theories of Turbulence (3)
Stationary stochastic processes, isotropic turbulence; governing equations for the velocity correlation and spectrum functions. Turbulent diffusion; scalar fluctuations in a turbulent field. Recommended preparation: AME 526.

AME 690 Directed Research (1-4, max 8) Laboratory study of specific problems by candidates for the degree in Engineering in Mechanical Engineering. Graded CR/NC.

AME 694abz Thesis (2-2-0) Required for the degree in Aerospace Engineering. Credit on acceptance of thesis. Graded IP/CR/NC.

AME 790 Research (1-2) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Chair: Daniel A. Erwin, Ph.D.*

Professors: Daniel A. Erwin, Ph.D.* (Aerospace Engineering); Mike Gruntman, Ph.D. (Aerospace Engineering, Systems Architecting and Engineering); Darrell L. Judge, Ph.D. (Physics and Astronomy); Joseph A. Kunc, Ph.D. (Physics and Astronomy, Aerospace Engineering, Systems Architecting and Engineering); F. Stan Settles, Ph.D. (Industrial and Systems Engineering, Systems Architecting and Engineering)

Associate Professor: Joseph Wang, Ph.D.

Professors of Engineering Practice: George Friedman, Ph.D. (Systems Architecting and Engineering); Azad Madni, PhD. (Systems Architecting and Engineering)

Adjunct Professors: Robert Brodsky, Ph.D.; Gerald Hintz, Ph.D.; James Wertz, Ph.D.

Adjunct Professor: William Tobiska, Ph.D.

Adjunct Associate Professor: Michael Kezirian, Ph.D.

Research Professors: Herbert Schorr, Ph.D. (Computer Science), Vice Dean for Engineering, Executive Director Emeritus, Information Sciences Institute; Elliot Axéll, Ph.D.

Research Associate Professor: Sergey Gimelshein, Ph.D.

Research Assistant Professor: Jo Ann Lane, Ph.D.

*Recipient of university-wide or school teaching award.

Aerospace Engineering Honor Society: Sigma Gamma Tau

Degree Requirements

Undergraduate Program Educational Objectives

The Bachelor of Science degree program in Astronautical Engineering has the following objectives:

- Graduates will apply technical skills in mathematics, science and engineering to solve complex problems of modern astronautical engineering practice.
- Graduates will use advanced tools and techniques of engineering, and will innovate to advance the state of the art when needed.
- Graduates will design and build complex engineering systems according to specifications and subject to technical as well as economic constraints.
- Graduates will communicate with skill as members and leaders of multidisciplinary teams.
- Graduates will make engineering decisions using high professional and ethical standards, taking into account their global, environmental and societal context.
- Graduates will learn continuously throughout their careers in order to adapt to new knowledge and discoveries and to meet future challenges.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Astronautical Engineering prepares graduates to have a knowledge of orbital mechanics, space environment, attitude determination and control, telecommunications, space structures and rocket propulsion. The program also prepares graduates to have design competence that includes integration of astronautical topics.

Bachelor of Science in Astronautical Engineering

The Bachelor of Science in Astronautical Engineering prepares students for engineering careers in the space industry, for research and development in industry and government centers and laboratories, and for graduate study. The program combines a core in the fundamentals of engineering, specialized work in astronautics and space technology, and technical electives to broaden and/or deepen the course work.

The requirement for this degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken. See also the common requirements for undergraduate degrees section.

government research and development centers, and degrees in science and engineering who wish to work in technology. The program is designed for those with B.S.

**Total minimum units:**

480

ASTE 480 Spacecraft Dynamics 3
Elective Technical elective** 12

Total units: 138

* Satisfies GE Category III requirement.

** Technical electives consist of (1) any upper division course in engineering except CE 404, CE 412 and ISE 440, or (2) an upper division course in chemistry, physics or mathematics and MATH 225. No more than 3 units of 400 course work can be used to satisfy the technical elective requirement.

+ The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

**Minor in Astronautical Engineering**

This program is for USC students who wish to work in the space industry and government space research and development centers and who are pursuing bachelor’s degrees in science, mathematics or engineering with specializations other than in astronautical engineering.

The space industry employs a wide variety of engineers (electrical, mechanical, chemical, civil, etc.); scientists (physicists, astronomers, chemists); and mathematicians. These engineers participate in development of advanced space systems but they usually lack the understanding of basic fundamentals of astronautics and space systems. The minor in astronautical engineering will help overcome this deficiency and provide unique opportunities for USC engineering, science and mathematics students, by combining their basic education in their major field with the industry specific minor in astronautical engineering.

**Required course work consists of a minimum of 18 units. including prerequisites, the minor requires 46 units. Three courses, or 9 units, at the 400 level will be counted toward the minor degree. The course work is a balanced program of study providing the basic scientific fundamentals and engineering disciplines critically important for contributing to development of complex space systems.**

Prerequisite courses: MATH 245, MATH 126, MATH 226 and MATH 245; PHYS 151L, PHYS 152L, and PHYS 153L.

Required courses units
ASTE 280 Foundations of Astronautical Engineering 3
ASTE 281 Thermal and Statistical Systems I 3
ASTE 301A Introduction to Spacecraft Systems and the Space Environment 3
ASTE 330 Spacecraft Dynamics 3
451X Spacecraft Propulsion 3
470 Aerospace Dynamics 3
ASTE Total minimum units: 18

**Master of Science in Astronautical Engineering**

This degree is in the highly dynamic and technologically advanced area of astronautics and space technology. The program is designed for those with B.S. degrees in science and engineering who wish to work in the space sector of the defense/aerospace industry, government research and development centers, and laboratories and academia. The program is available through the USC Distance Education Network (DEN).

The general portion of the Graduate Record Examinations (GRE) and two letters of recommendation are required.

**Required courses: 27 units**

**Technical elective requirement (6 units)**

Two 3-unit courses. Students are advised to select these two elective courses from the list of core electives or from other courses in astronautical engineering or from other science and engineering graduate courses, as approved by the faculty adviser. No more than 3 units of directed research (ASTE 590) can be applied to the 27-unit requirement. New courses on emerging space technologies are often offered; consult the current semester’s course offerings, particularly for ASTE 599 Special Topics.

**Engineering mathematics requirement (choose one course: 3 units)**

<table>
<thead>
<tr>

</tbody>
</table>

At least 21 units must be at the 500 or 600 level.

**Areas of Concentration:**

Students choose core elective and technical elective courses that best meet their educational objectives. Students can also concentrate their studies in the desired areas by selecting corresponding core elective courses. Presently, ASTE faculty suggest the following areas of concentration:

**Spacecraft propulsion**

Choose two core electives from:

<table>
<thead>
<tr>
<th>Required courses</th>
<th>units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASTE 501ab</td>
<td>Physical Gas Dynamics</td>
</tr>
<tr>
<td>ASTE 570</td>

<td>ASTE 572</td>
<td>Advanced Spacecraft Propulsion</td>
</tr>
<tr>
<td>ASTE 584</td>
<td>Spacecraft Power Systems</td>
</tr>
</tbody>
</table>

**Spacecraft systems**

Choose two core electives from:

<table>
<thead>
<tr>
<th>Required courses</th>
<th>units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASTE 523</td>
<td>Design of Low Cost Space Missions</td>
</tr>
<tr>
<td>ASTE 527</td>
<td>Space Studio Architecting</td>
</tr>
<tr>
<td>ASTE 557</td>
<td>Spacecraft Structural Strength and Materials</td>
</tr>
<tr>
<td>(SAE 549 System Architecting I, 3 units, is also suggested as a technical elective for this area of concentration.)</td>
<td></td>
</tr>
</tbody>
</table>

**Space applications**

Choose two core electives from:

<table>
<thead>
<tr>
<th>Required courses</th>

</tr>
</thead>
<tbody>
<tr>
<td>ASTE 552</td>
<td>Spacecraft Thermal Control</td>
</tr>
<tr>
<td>ASTE 553</td>
<td>Systems for Remote Sensing from Space</td>
</tr>
<tr>
<td>ASTE 554</td>
<td>Spacecraft Sensors</td>
</tr>
<tr>
<td>ASTE 584</td>
<td>Spacecraft Power Systems</td>
</tr>
</tbody>
</table>

**Engineer in Astronautical Engineering**

Requirements for the Engineer degree in Astronautical Engineering are the same as set forth in the general requirements. See the general requirements for Viterbi graduate degrees.

**Doctor of Philosophy in Astronautical Engineering**

The Ph.D. in Astronautical Engineering is awarded in strict conformity with the general requirements of the USC Graduate School. See general requirements for graduate degrees. The degree requires a concentrated program of study, research and a dissertation. Each student wishing to undertake a doctoral program must first be admitted to the program and then take the screening examination. This examination will emphasize comprehension of fundamental material in the graduate course work. Further guidance concerning admission, the screening exam and the full completion of courses,
including those given outside the Department of Astronautical Engineering, can be obtained from the ASTE student adviser and program coordinators.

Certificate in Astronautical Engineering

The Certificate in Astronautical Engineering is designed for practicing engineers and scientists who enter space-related fields and/or want to obtain training in specific space-related areas. Students enroll at USC as limited status students; they must apply and be admitted to the certificate program after completion of no more than 9 units of required course work. The required course work consists of 12 units; students will choose four 3-unit courses from the following:

<table>
<thead>
<tr>
<th>Required courses (choose four)</th>
<th>units</th>
</tr>

Most classes are available through the USC Distance Education Network (DEN).

Credit for classes may be applied toward the M.S., Engineer or Ph.D. in Astronautical Engineering, should the student decide later to pursue an advanced degree. In order to be admitted to the M.S. program, the student should maintain a B average or higher in courses for the certificate and must satisfy all normal admission requirements. All courses for the certificate must be taken at USC. It is anticipated that other classes on emerging space technologies will be added to the list of the offered classes in the future.

Courses of Instruction

Astronautics and space technology (ASTE)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

ASTE 101I. Introduction to Astronautics (4, Fa) Gateway to the Astronautical Engineering major. Introduction to space, space exploration and the space business. Elements of orbits, spacecraft systems, rocket propulsion, and communications. Laboratory: introduction to graphics, computation and simulation.

ASTE 291 Team Projects I (1, max 4, FaSp) Participation in ASTE undergraduate student team projects. Intended for division students or those with little prior project experience.

ASTE 301ab Thermal and Statistical Systems (3-3, FaSp) Thermodynamics and statistical mechanics: kinetics of atoms, molecules, and photons; compressible fluid dynamics. (Duplicates credit in former AME 311ab.) Prerequisite: MAT 245, PHYS 153L.

ASTE 310 Introduction to Spacecraft Systems and the Space Environment (3, Fa) Spacecraft systems: attitude determination and control, power, thermal, command and data handling, telecommunication, structures and mechanisms, propulsion. Space environment: atmosphere, gravity gradients, radiation. Prerequisite: ASTE 280 and PHYS 153.

ASTE 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

ASTE 421X Space Mission Design (3, Sp) Space systems engineering process: requirements definition; trade studies; system integration; technical reviews; cost and schedule development; case studies; ethics. Capstone design experience. Open only to seniors. Not for graduate credit. Prerequisite: ASTE 330.

ASTE 445 Molecular Gas Dynamics (3) Physical description of kinetic nature of gas flows; distribution function; introduction to the Boltzmann equation; free-molecule flow; surface and molecular reflection properties; Monte Carlo flow calculations. (Duplicates credit in former AME 485.) Recommended preparation: AME 109 or ASTE 301b.

ASTE 470 Spacecraft Propulsion (3) Introduction to rocket engineering. Space missions and thrust requirements. Compressible gas dynamics. Propellant chemistry and thermodynamics. Liquid- and solid-fueled rockets. Nuclear and electric propulsion. Prerequisite: senior or graduate standing.

ASTE 480 Spacecraft Dynamics (3) Two-body motion, rigid-body motion, attitude dynamics and maneuvers, spacecraft stabilization: gravity gradient, reaction wheels, magnetic torques, thruster attitude control. Prerequisite: senior standing.

ASTE 492 Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

ASTE 491 Team Projects II (1, max 4, FaSp) Participation in ASTE undergraduate student team projects. Intended for students with prior project experience.

ASTE 499 Special Topics (2-4, max 8) Course content to be selected each semester from current developments in astronautics, space technology, and related fields.

ASTE 501ab Physical Gas Dynamics (3-3, FaSp) a: Molecular structure; radiative processes; microscopic description of gas phenomena; translational, rotational, vibrational, and electronic freedom degrees; particle energy distributions; microscopic representation of thermodynamic functions. Prerequisite: graduate standing or departmental approval. b: Kinetic concepts in gas physics; thermal non-equilibrium; intermolecular potentials; transport of radiation and particles in high-temperature gas; dissociation and ionization equilibrium; energy relaxation. Prerequisite: ASTE 501a.

ASTE 520 Spacecraft System Design (3) System components: vehicle structure, propulsion systems, flight dynamics, thermal control, power systems, telecommunication. Interfaces and tradeoffs between these components. Testing, system reliability, and integration.

ASTE 533 Design of Low Cost Space Missions (3, Sp) Reviews all aspects of space mission design for practical approaches to reducing cost. Examines 'LightSat'; mission experience and potential applicability to large-scale missions. Graduate standing in engineering or science. Recommended preparation: ASTE 520 or some experience in space engineering.

ASTE 537 Space Studio Architecting (3, Sp) Programmatic/conceptual design synthesis/choice creation methods for complex space missions. Aerospace system engineering/architecture tools to create innovative projects. Evaluated by faculty/industry/NASA experts. Graduate standing in engineering or science. Recommended preparation: ASTE 520 or experience in space industry.

ASTE 539 Safety of Space Systems and Space Missions (3) Engineering methodology and analysis techniques for safety certification and mission assurance of robotic and human space systems and space missions by government and commercial industry. Recommended preparation: ASTE 520 or some experience in space engineering. Open only to Engineering graduate students.

ASTE 533 Space Environments and Spacecraft Interactions (3) Space environments and interactions with space systems. Vacuum, neutral and ionized species, plasma, radiation, micrometeoroids. Phenomena important for spacecraft operations.

ASTE 552 Spacecraft Thermal Control (3, Sp) Spacecraft and orbit thermal environments; design, analysis, testing of spacecraft thermal control system and components; active and passive thermal control, spacecraft and launch vehicle interfaces. Graduate standing in engineering or science.

ASTE 553 Systems for Remote Sensing from Space (3) The operation, accuracy, resolution, figures of merit, and application of instruments which either produce images of ground scenes or probe the atmosphere as viewed primarily from space. Graduate standing in engineering or physics.

ASTE 554 Spacecraft Sensors (3, Fa) Spacecraft sensors from concept and design to building, testing, interfacing, integrating, and operations. Optical and infrared sensors, radiometers, radars, phased arrays, signal processing, noise reduction. Graduate standing in engineering or science.

ASTE 556 Spacecraft Structural Dynamics (3) Applied analytical methods (vibrations of single and multi-degree of freedom systems, finite element modeling, spacecraft applications); requirements definition process; analytical cycles; and design verification. Graduate standing in engineering or science.

ASTE 557 Spacecraft Structural Strength and Materials (3) Spacecraft structural strength analysis and design concepts overview; spacecraft material selection; analysis of composite materials; finite element method; spacecraft configuration; structural testing; bond joint design. Open only to master’s, professional, and doctoral students.

ASTE 570 Liquid Rocket Propulsion (3, Sp) Liquid-propelled rocket propulsion systems. Capillary devices for gas-free liquid acquisition in zero gravity. Ground and in-
orbit operations. Propellant life predictions and spacecraft end-of-life de-orbiting strategies. Prerequisite: ASTE 470.

ASTE 580 Orbital Mechanics I (3) Physical principles: two-body and central force motion; trajectory correction maneuvers; position and velocity in conic orbits; Lambert’s problem; celestial mechanics; orbital perturbations.

ASTE 581 Orbital Mechanics II (3, Fa) Theory of perturbations of orbits; numerical methods in orbital mechanics; satellite dynamics; averaging methods; resonance; mission analysis. Prerequisite: ASTE 580.

ASTE 583 Space Navigation: Principles and Practice (3, Sp) Statistical orbit determination: (weighted) least squares, batch and sequential (Kalman) filtering, illustrative examples; online ephemeris generation; potentially hazardous asteroids, comets, satellites; launch: vehicles, payloads, staging. Graduate standing in engineering or science. Recommended preparation: ASTE 580.

ASTE 585 Spacecraft Attitude Control (3, SpSm) Review of attitude dynamics, gravity gradient stabilization, attitude stabilization with a spin, attitude maneuvers, control using momentum exchange devices, momentum-biased stabilization, reaction thruster control. Prerequisite: AEG 451 or EE 482; recommended preparation: a course in dynamics.

ASTE 586 Spacecraft Attitude Dynamics (3) Dynamics of systems of particles and rigid bodies; spacecraft attitude systems; attitude maneuvers (spin, precession, nutation, etc.); attitude stabilization and attitude determination; simulation methods. /pgkt;

ASTE 590 Directed Research (1-12, FaSpSm) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the division. Graded CR/NC.

ASTE 59a Master’s Thesis (2-20, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

ASTE 599 Special Topics (2-4, max 9) Course content to be selected each semester from current developments in aeronautics, space technology, and related fields.

ASTE 690 Directed Research (1-4, max 8, FaSpSm) Laboratory studies of specific problems by candidates for the degree Engineer in Astronautical Engineering. Graded CR/NC.

ASTE 69a Thesis (2-20, FaSpSm) Required for the degree Engineer in Astronautical Engineering. Credit on acceptance of thesis. Graded IP/CR/NC.

ASTE 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the division. Graded CR/NC.

ASTE 794abcdfz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Chonette Chair in Biomedical Technology: David Z. D’Argenio, Ph.D.

David Packard Chair in Engineering: Theodore W. Berger, Ph.D.

Cornelius J. Pings Chair in Biomedical Sciences: Mark Humayun, Ph.D. (Ophthalmology)

Provost Professor of Biological Sciences, Biomedical Engineering, Physics and Biophysics, Stem Cell Biology and Regenerative Medicine, Pediatrics, Radiology and Ophthalmology: Scott Fraser, Ph.D. (Biological Sciences)

Dean’s Professor in Biomedical Engineering: Kirk Shung, Ph.D.

Provost Associate Professor of Biomedical Engineering, Neurology, Biokinesiology, and Physical Therapy: Terence D. Sanger, M.D., Ph.D.

WISE Jr. Gabilian Assistant Professor of Biomedical Engineering: Stacey D. Finley, Ph.D.

WISE Jr. Gabilian Assistant Professor of Biomedical Engineering: Megan McCain, Ph.D.

Professors: Michael D. Arbib, Ph.D. (Computer Science, Neurobiology); Terrence W. Berger, Ph.D. (Neurobiology); Roberta D. Brinton, M.D. (Molecular Pharmacology and Neurobiology); Stuart D. Bross, M.D. (Otolaryngology); Eun Jin Lee, Ph.D. (Chemical Engineering and Materials Science); Zhong-Lin Lu, Ph.D. (Psychology); Bartlett W. Mei, Ph.D.; Krishna Nayak, Ph.D. (Electrical Engineering); Alapakkam P. Sampath, Ph.D. (Physics and Biophysics); Terence D. Sanger, M.D., Ph.D. (Neurology, Biokinesiology); Stefan Schaal, Ph.D. (Computer Science); Nicolas Schweighofer, Ph.D. (Biokinesiology); Pin Wang, Ph.D., (Chemical Engineering and Materials Science); James D. Welland, Ph.D. (Ophthalmology); Jesse T. Yen, Ph.D.

Assistant Professors: Andrea Armani, Ph.D. (Chemical Engineering and Materials Science); Greg D. Field, Ph.D. (Cell and Neurobiology); Stacey D. Finley, Ph.D.; Radha Kalluri, Ph.D. (Otolaryngology); Jason Kutch, Ph.D. (Biokinesiology); Noah Malmstadt, Ph.D. (Chemical Engineering and Materials Science); J. Andrew MacKay, Ph.D. (Pharmacology and Pharmaceutical Sciences); Meghan McCain, Ph.D.

Associate Professor of Engineering Practice: Jean-Michel I. Maarek, Doc.Ing.

Research Professors: Daniel L. Farkas, Ph.D. (Cedars-Sinai Medical Center); Jonathan G. Lasch, Ph.D. (AMI-USC); Alfred E. Mann, M.S. (AMI-USC); Donald J. Marsh, M.D.; Robert V. Shannon, Ph.D. (House Ear Institute); Qifa Zhou, Ph.D.

Research Associate Professors: Qian-Jue Fu, Ph.D. (House Ear Institute); John J. Granacki, Ph.D. (Electrical Engineering-Systems/IS); Eun Jin Lee, Ph.D.; Dong Song, Ph.D.

Research Assistant Professors: Jean-Marie Boutellier, Ph.D.; Raham Dwocki, Ph.D.; Alireza Dibazar, Ph.D.; Arkadivsz Gercy, Ph.D. (Cedars-Sinai Medical Center); Hyung Ham (David) Kim, Ph.D.; Clara Lajonchere, Ph.D.; Rongsong Li, Ph.D.

Associate Professors of Research: Stefan Blum, Ph.D. (Radiology); Brent J. Liu, Ph.D. (Radiology); Tieh-Yu A. Wren, M.D., Ph.D. (Orthopaedics/Pediatrics Children’s Hospital and Radiology)

Assistant Professors of Research: Stephan G. Erberich, Ph.D. (Radiology); Tracy C. Griksgt, M.D. (Surgery and Children’s Hospital); Bo Han, Ph.D. (Surgery); Natasha Lepore, Ph.D. (Radiology and Children’s Hospital); Parag Malik, Ph.D. (Pathology, Radiology); Greg T. Mogel, M.D. (Radiology); John C. Wood, Ph.D. (Pediatric Cardiology, Children’s Hospital)

Adjunct Professor: Joseph H. Schulman, Ph.D. (Alfred E. Mann Foundation)

Adjunct Associate Professors: Samuels Landsberger, Sc.D. (Rancho Los Amigos); Shirin Towfigh, M.D. (Cedars Sinai)

Adjunct Associate Professors: Leonid Litzk, Ph.D. (Advanced Bionics Corp.); Philip Requejo, Ph.D. (Rancho Los Amigos Medical Center and Kinesiology)

Emeritus Professors: George A. Bekey, Ph.D. (Electrical Engineering, Computer Science and Speech Science); Edward K. Blum, Ph.D. (Mathematics, Computer Science); H. K. Huang, D.Sc. (Radiology)

*Recipient of university-wide or school teaching award.

Degree Requirements

Undergraduate Program Educational Objectives

Graduates of the undergraduate program in Biomedical Engineering are expected to attain the following objectives within a few years after graduation:

• engage in a professional career in the biomedical or other related industries, or enroll in advanced graduate studies including medical school;

• obtain an advanced degree or certification in a related biomedical or engineering discipline;

• become effective communicators, both orally and in writing, and effective team participants;

• develop professional judgment and integrity in decision making, and the ability to communicate their judgment and decisions effectively;

• demonstrate an understanding of the social, ethical, legal, professional, and environmental implications of engineering or biomedical discipline;

• become life-long learners and engaged citizen.
Undergraduate Program Criteria

The program leading to a Bachelor of Science in Biomedical Engineering provides both breadth and depth across the range of engineering topics implied by the title. The program prepares graduates to have an understanding of biology and physiology, and the capability to apply advanced mathematics (including differential equations and statistics), science and engineering to solve the problems at the interface of engineering and biology. The curriculum prepares graduates with the ability to make measurements on and interpret data from living systems, addressing the problems associated with the interaction between living and non-living materials and systems.

Bachelor of Science in Biomedical Engineering

The Department of Biomedical Engineering offers a Bachelor of Science degree in Biomedical Engineering. Additionally, there are three possible areas of emphasis within this biomedical engineering program major. These are biochemical engineering, electrical engineering, and mechanical engineering. An area of emphasis appears in parenthesis after the primary major name on the transcript. The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken.

The requirement for the degree with an emphasis in biochemical engineering is 132 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied towards the major, regardless of the department in which the courses are taken. See General Education and additional common requirements for undergraduate degrees.

Bachelor of Science in Biomedical Engineering Emphasis in Biochemical Engineering

The requirement for the degree with an emphasis in biochemical engineering is 132 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied towards the major, regardless of the department in which the courses are taken. See General Education and additional common requirements for undergraduate degrees.

Bachelor of Science in Biomedical Engineering Emphasis in Electrical Engineering

The requirement for the degree with an emphasis in electrical engineering is 131 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied towards the major, regardless of the department in which the courses are taken. See common requirements for undergraduate degrees.
**Bachelor of Science in Biomedical Engineering**

Emphasis in Mechanical Engineering

The requirement for the degree with an emphasis in mechanical engineering is 132 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied towards the major, regardless of the department in which the courses are taken. See common requirements for undergraduate degrees.

Master of Science in Biomedical Engineering

The Master of Science in Biomedical Engineering is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. At least 28 approved units must be satisfactorily completed, of which at least 19 units must be at the 500 level or above. Four of these units may be thesis BME 594abz.

The master's degree program provides students with a broad background, linking physiology with engineering science, necessary for entering interdisciplinary careers in medical technology or pursuing further graduate studies in a related field.

Master of Science in Medical Device and Diagnostic Engineering

This program is designed to provide the knowledge and skills needed for the development of medical devices and diagnostic techniques, including aspects of medical product regulation and product development. The course of study requires successful completion of 28 units of course work and has been designed to be completed in three semesters of full-time study. Students in the program will complete a 19-unit core as well as selecting a 6-unit specialization (or "track") and one elective from a list provided by the department.

Technical Elective (one course)
Applicable courses include: AME 503, BME 511, BME 535, BME 551, ISE 507, ISE 508, ISE 544, MPTX 517, RSCI 528 and courses listed in alternate tracks to that chosen. Other courses may be applicable; please see an adviser for approval.

Doctor of Philosophy in Biomedical Engineering
The objective of the Doctor of Philosophy is to produce independent investigators who can make original scholarly contributions and apply advanced engineering concepts and techniques to the understanding and solution of biomedical problems. This program is intended to prepare the student for a career in academic research and teaching, or as an independent investigator in industrial or government laboratories.

The requirements listed are special to this department and must be read in conjunction with the general requirements of the Graduate School.

This program is designed to be normally completed in four years of full-time work beyond the Bachelor of Science degree (including summers). The first two years are devoted primarily to formal course work and the last two to research. In view of the flexible program, each student is assigned an adviser who will guide him or her in the selection of courses. By the end of the third semester of graduate study the student must have completed the Ph.D. screening examination. Subsequently, he or she is required to make a tentative major field selection (e.g., biomedical imaging, signal processing, neural engineering) and pass a qualifying examination. In accordance with the requirements of the Graduate School, at least 60 units of credit beyond the Bachelor of Science degree are required, with a minimum grade point average of 3.0. Students are required to take BME 533, the graduate biomedical engineering seminar course, for three semesters during their studies.

Requirements for Admission
Bachelors of Science degree in engineering or a natural science and satisfactory scores on the Graduate Record Examinations. Undergraduate work should include a basic course in biology, physics, organic chemistry, biochemistry, differential equations and digital computation. Students lacking any of these will be required to make up the deficiency during the first two years of graduate work.

Students who have completed all requirements for the Master of Science degree offered in this department may apply for admission to the Ph.D. program. In this case, all courses taken in the M.S. program may be applied toward the requirements of the doctoral degree.

Screening Examination Process
By the end of the third semester of graduate study, all students must have completed the screening examination process to determine whether or not they will be allowed to continue in the Doctor of Philosophy program. Those who fail will be dropped from the program, although they may be permitted to complete the additional requirements necessary to obtain the Master of Science degree.

Qualifying Exam Committee
During the third semester, the student must make a tentative major field selection as described above and form a qualifying exam committee. The latter administers the qualifying examination.

Qualifying Examination
The qualifying examination will normally be taken during the fourth semester of full-time academic study. The examination requires the preparation of a comprehensive written research proposal that presents a research question, critically reviews the pertinent literature and outlines the proposed experimental, analytical and computational procedures required to answer the question. The proposal must be defended in an oral examination.

Graduate Certificate in Health, Technology and Engineering (HTE@USC)
Academic Director: Terry Sanger, M.D., Provost Associate Professor of Biomedical Engineering, Neurology, Biokinesiology, and Physical Therapy
Administrative Director: George Tolomiczenko, Ph.D., Assistant Professor, Neurology

This program offers current second-year USC Ph.D. engineering students and first-year M.D. students an opportunity to learn about and gain experience in medical device and process innovation. Through project-based and interdisciplinary collaboration, students will augment their current programs with a set of courses and lab experiences linking medical and engineering research groups. By applying design-informed approaches toward problem identification and solution prototyping, students will be involved in all the steps of medical device or process innovation from conception to commercialization. The program aims to create interdisciplinary, boundary-spanning, inventive entrepreneurs seeking early practical experience with device and method innovation in health care. Program participants will form bonds with a group of like-minded medical students and engineers who will be their mentors, colleagues and contacts as they advance in their careers.

The courses unique to the program include a seminar sequence (Topics in Health, Technology and Engineering), which must be taken during the first two years of involvement with the HTE@USC program, a case studies sequence taken during the second year and a research course to earn project-related credits:
courses Units
BME 566abcd Topics in Health, Technology and Engineering 2-2-2
BME 567ab Case Studies in Health, Technology and Engineering 1-1
BME 790 Research (in the student’s major department) 2-8

Other required courses that are part of the M.D. curriculum (Ph.D. students enroll in INTD course versions of the same courses open only to HTE students on CR/NC basis):
INTD 621ab Introduction to Clinical Medicine (CMD) 3-
INTD 621L Technology and Engineering 5
Candidates interested in applying should contact HTE@USC via email at hte@usc.edu.

Courses of Instruction

Biomedical Engineering (BME)
The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

BME 101 Introduction to Biomedical Engineering (3, Fa) Historical development and survey of major areas comprising biomedical engineering: theoretical neurobiology and systems physiology, biomedical instrumentation, artificial organ and prosthetic devices, biomedical computer applications.

BME 201 Biomedical Engineering Practice (2, Fa) Examination of the technical and practical challenges involved in the development of medical devices, including neural implants, in industry and the clinical setting. Recommended preparation: BME 101.

BME 302L Medical Electronics (4, Sp) Electronic design and measurements for medical applications. Use of integrated circuits, biopotential measurements, static and dynamic calibration of physiological transducers. Prerequisite: EE 202L.

BME 350 Biomedical Engineering Industrial Project (3, Sp) Training in specific skills relevant to biomedical industry. Placement in summer internship following successful completion of the course. Junior standing. Prerequisite: BME 210.

BME 390 Special Problems (1-4) Supervised, individual studies. More than one registration permitted. Enrollment by petition only.

BME 402 Control and Communication in the Nervous System (3, Sp) An introduction to the structural and functional elements common to nervous systems, with emphasis on cellular dynamics, interneuronal communication, sensory and effector systems. Prerequisite: BISC 220L, BME 210, MATH 245.

BME 403 Physiological Systems (3, Fa) A thorough bioengineering treatment of the physiological properties of various mammalian organ systems: e.g., cardiovascular, respiratory, renal, and musculoskeletal. Prerequisite: BISC 220L, MATH 245; corequisite: EE 202L.

BME 404 Biomechanics (3, Fa) Mechanical properties of biological tissues and fluid transport in physiological systems: blood rheology; bioisocelastic solids and fluids; gas flow and mixing; prosthesis design. Prerequisite: PHYS 151L; MATH 245; AME 201.
CHE 489) recommended preparation: Basic biology and electronics.

BME 552 Neural Implant Engineering (3, Sp) Advanced studies of the basic neuroscience, engineering design requirements and technological issues associated with implantable neural prostheses, with particular emphasis on retinal and cortical function.

BME 566abcd Topics in Health, Technology and Engineering (a: 2, Fa; b: 2, Sp; c: 3, Fa; d: 2, Sp) Interdisciplinary approach to impart the skills, knowledge and familiarity with stages of collaborative projects related to medical device and methods innovation in health care settings. Open only to health, technology and engineering majors. c: Concurrent enrollment: BME 567a. d: Concurrent enrollment: BME 567b.

BME 567ab Case Studies in Health, Technology and Engineering (a: 1, Fa; b: 1, Sp) Learning from cases illustrating paths from health care problems to solutions. Faculty, students and invited guests will provide examples of both successful and unsuccessful innovation attempts. Open only to health, technology and engineering students. a: Concurrent enrollment: BME 566c. b: Concurrent enrollment: BME 566d.

BME 571L Computational Neuroengineering (3, Sp) Introduction to computational modeling in neuroengineering, anchored in examples of brain function. Topics include transduction, synapses, spiking, networks, normalization, learning, Bayesian models, and Kalman filtering. Prerequisite: BME 502.

BME 599 Special Topics (2–4, max 9) Current trends and developments in the field of biomedical engineering.

BME 620L Applied Electrophysiology (4, Fa) The theoretical basis and applied design principles for medical devices and instrumentation that interact with electrically excitable tissues of the body. Prerequisite: BME 502.

BME 650 Biomedical Measurement and Instrumentation (3, Sp) Design of measurement systems and biomedical instrumentation; architecture of electronic instruments used to measure physiological parameters, analysis of major process functions integrated in these instruments. Open to M.S., Medical Device and Diagnostic Engineering and biomedical engineering Ph.D. students only. Recommended preparation: BME 513.

BME 670 Early Visual Processing (4, Fa) Interdisciplinary topics in biological and artificial low-level visual processing. Retina, lateral geniculate nucleus; computer vision; neurophysiology, retinal prostheses; molecular biology; phototransduction; edge detection; movement. Open to graduate students only. Prerequisite: NSCI 534 or BME 502 or CSSI 574.

BME 671L Late Visual Processing (4, Sp) Interdisciplinary topics in biological and artificial high-level visual processing. Visual cortex; computer vision; neurophysiology; psychophysics; MRI; computational models; orientation selectivity; stereopsis; motion; contours; object recognition; shape to graduate students only. Prerequisite: NSCI 534 or BME 502 or CSSI 574.

BME 680 Modeling and Simulation of Physiological Systems (2, Irregular) Mathematical theories and computational techniques for modeling physiological systems, with emphasis on cardiorespiratory, metabolic-endocrine, and neuronal functions.
Faculty

Zohrab A. Kaprielian Dean’s Chair in Engineering and Chester F. Dolley Chair in Petroleum Engineering: Yannis C. Yortsos, Ph.D.

Dean’s Chair in Chemical Engineering and Materials Science: Priya Vashista, Ph.D. (Computer Science, Physics)

Flour Early Career Chair in Engineering: Andrea M. Armani, Ph.D. (Electrical Engineering, Chemistry, Biomedical Engineering)

H.C. Gill Chair in Composite Materials: Steven R. Nutt, Ph.D. (Aerospace and Mechanical Engineering)

Omar B. Milligan Chair in Petroleum Engineering: Iraj Ershaghi, Ph.D., P.E.

Jack Munushian Early Career Chair: Malancha Gupta, Ph.D.

N.I.O.C. Chair in Petroleum Engineering: Muhammad Sahimi, Ph.D.

Robert E. Vivian Chair in Energy Resources: Theodore T. Tsotsis, Ph.D.

Flour Professor in Process Engineering: S. Joe Qin, Ph.D. (Electrical Engineering and Industrial and Systems Engineering)

Kenneth T. Norris Professor of Engineering: Anuqam Madhukar, Ph.D. (Physics and Biomedical Engineering)

Judge Widney Professor of Chemical Engineering and Chemistry: Ray R. Iranizadeh, Ph.D. (Chemistry)

Zohrab A. Kaprielian Fellow in Engineering: Pin Wang, Ph.D.

Professors: Edward Crandall, Ph.D., M.D. (Medicine); P. Daniel Dapkus, Ph.D. (Electrical Engineering); Martin Gunderson, Ph.D. (Electrical Engineering); Raj K. Kalia, Ph.D. (Physics and Computer Science); Michael Kassner, Ph.D. (Aerospace and Mechanical Engineering); Terence G. Langdon, Ph.D., D.Sc. (Aerospace and Mechanical Engineering, Earth Sciences); Alichiro Nakano, Ph.D. (Computer Science, Physics, Biomedical Engineering); George Olah, Ph.D. (Chemistry); Richard Roberts, Ph.D. (Chemistry); Richard Stegemeier, M.S. Eng.; Armand R. Tanguay Jr., Ph.D. (Electrical and Biomedical Engineering); Mark E. Thompson, Ph.D. (Chemistry); Priya Vashista, Ph.D. (Physics, Computer Science); Pin Wang, Ph.D.; Chongwu Zhou, Ph.D. (Electrical Engineering)

Associate Professors: Andrea M. Armani, Ph.D. (Electrical Engineering, Chemistry and Biomedical Engineering); Edward Goo, Ph.D.; Behnam Jalalpour, Ph.D.; Kristian Jessen, Ph.D.; C. Ted Lee Jr., Ph.D.; Grace Lu, Ph.D. (Physics and Electrical Engineering); Noah Malmstad, Ph.D.; Katherine S. Shing, Ph.D.*

Assistant Professors: Andrea M. Armani, Ph.D. (Electrical Engineering, Chemistry, Biomedical Engineering); Malancha Gupta, Ph.D.; Andrea Maria Hodge, Ph.D. (Aerospace and Mechanical Engineering); Jongseung Yoon, Ph.D.

Research Professors: Fred Aminzadeh, Ph.D.; Don Zhang, Ph.D. (Civil and Environmental)

*Recipient of university-wide or school teaching award.

Chemical Engineering Honor Society: Omega Chi Epsilon

Degree Requirements

Undergraduate Program Educational Objectives

Chemical engineering is the only engineering discipline that makes extensive use of chemical transformations (reactions) in addition to physical transformations (refining, molding or machining) to achieve added value. Chemical engineers are employed in virtually all manufacturing industries, from the basic chemical, biochemical, materials, energy, food, pharmaceutical and microelectronics industries to the myriad consumer product industries. Our various curricula are designed to produce graduates who are broadly educated as well as highly adaptable.

Graduates of the undergraduate program in Chemical Engineering are expected to attain the following objectives within a few years after graduation:

- To obtain employment and succeed in organizations where physical, chemical or biochemical transformations are utilized to produce products and services that benefit society.
- To pursue graduate or professional education in a variety of related fields.
- To engage in continuous personal and professional development through lifelong learning.
- To assume leadership roles in their employment organization or community.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Chemical Engineering provides a thorough grounding in the basic sciences including chemistry, physics and/or biology, with some content at an advanced level, as appropriate to the objectives of the program. The curriculum includes the engineering application of these basic sciences to the design, analysis and control of chemical, physical and/or biological processes, including the hazards associated with these processes.

Bachelor of Science in Chemical Engineering Degree

The Mark Family Department of Chemical Engineering offers a Bachelor of Science degree in Chemical Engineering. Additionally, there are five possible areas of emphasis within this chemical engineering program major. These are: biochemical engineering (133 units); environmental engineering (133 units); nanotechnology (128 units); petroleum engineering (113 units); and polymer/materials science (113 units). An area of emphasis appears in parentheses after the primary major name on the transcript.

Sample student schedules are located on the department Web page (chems.usc.edu).

Common Requirements for the B.S. Degree and All Areas of Emphasis (108 units)

See also common requirements for undergraduate degrees.
* GE Category VI is taken concurrently with WRIT 150.

** Diversity course must double count as a GE course in calculating the total unit count for the degree.

*** Satisfies GE Category III requirement.

- The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

Additional Requirements for Individual Degrees

Bachelor of Science in Chemical Engineering

The requirement for the degree in the absence of an area of emphasis is 129 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied toward the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses:

**CHEMISTRY TECHNICAL ELECTIVE**

Bachelor of Science in Chemical Engineering Emphasis in Petroleum Engineering

The requirement for the degree with an emphasis in petroleum engineering is 133 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied toward the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses:

**CHEMISTRY COURSES**

Graduate Degrees
Master of Science in Chemical Engineering

The Master of Science in chemical engineering is awarded in strict conformity with the general requirements of the USC Viterbi School of Engineering with the exception that the minimum unit requirement is 28. Registration in either CHE 550a or CHE 590 is required.

Engineer in Chemical Engineering

Requirements for the Engineer in chemical engineering are the same as set forth in the general requirements. See general requirements for graduate degrees. Only available to graduate students currently enrolled.

Doctor of Philosophy

The Doctor of Philosophy (Ph.D.) degree in chemical engineering is awarded in conformity with the general requirements of the Graduate School. See general requirements for graduate degrees.

Departmental Policies and Requirements

In addition to the general requirements for the Ph.D. described in this catalogue, candidates in chemical engineering are required to demonstrate proficiency in the following fields: thermodynamics, fluid flow, heat and mass transfer, and chemical engineering kinetics. Registration in CHE 550a is required of all students. More detailed statements of the departmental requirements may be found in a brochure available upon request from the School of Engineering.

Chemical Engineering Three-Two Plan

A special curriculum is available for obtaining a Bachelor of Science degree in chemical engineering and a Bachelor of Science or Bachelor of Arts degree in letters, arts and sciences major in five years. For further information see departmental advisers.

Similar programs are available in cooperation with certain liberal arts colleges. Such programs are particularly suited for obtaining a Bachelor of Science in chemistry at the liberal arts college and a Bachelor of Science in chemical engineering at USC.

Courses of Instruction

Chemical Engineering (CHE)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

CHE 120 Introduction to Chemical Engineering (3, Sp) Problem-solving techniques in chemical engineering using graphics and computers. Mass and heat balances. Corequisite: MATH 125, CHEM 105aL or CHEM 115aL.

CHE 205 Numerical Methods in Chemical Engineering (3, Sp) Computational tools for solving numerical problems in Chemical Engineering. Prerequisite: MATH 125.

CHE 230 Chemical Engineering Thermodynamics (3, Fa) Elements of chemical engineering thermodynamics, including generalized correlations of properties of materials, phase behavior, physical and chemical equilibria. Corequisite: MATH 226.

CHE 350 Introduction to Separation Processes (3, Sp) Use of equilibrium phase relations and principles of material and energy balance for design, operation, and optimization of separation procedures such as distillation, absorption, etc. Prerequisite: CHEM 105bL or CHEM 115bL; recommended preparation: CHE 230.

CHE 350 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

CHE 351 Introduction to Nanotechnology Research (2) Planning and execution of an experiment, and presentation of findings through oral presentations and a written report. Application of the scientific method learned through immersion in a lab environment. Graded CR/NC.

CHE 405 Applications of Probability and Statistics for Chemical Engineers (3, Fa) Principles of probability and statistics, random variables and random functions. Application to chemical engineering problems, including process design, process safety, heterogeneous materials and processes. Prerequisite: MATH 245.

CHE 410 Introduction to Biomaterials and Tissue Engineering (3, Fa) (Enroll in BME 410)

CHE 442 Chemical Reactor Analysis (3, Fa) Basic concepts of chemical kinetics and chemical reactor design. Prerequisite: MATH 245.

CHE 444abL Chemical Engineering Laboratory (3-3, FaSp) Resolution of chemical engineering problems that require original planning, observations, and data interpretation. Written and oral reports. Prerequisite: CHE 350, CHE 350, CHE 442; corequisite: CHE 443.

CHE 445 Heat Transfer in Chemical Engineering Processes (3) Phenomenological rate laws, differential and macroscopic equations, and elementary kinetic theory of heat transfer processes with emphasis on conduction and convection. (Duplicates credit in AME 311.) Prerequisite: CHE 443, MATH 245.

CHE 446 Mass Transfer in Chemical Engineering Processes (2, Sp) Molecular and continuum approaches to diffusion and convection in fluids and multicomponent mixtures; simultaneous mass, heat and momentum transfer; steady-state and time-dependent diffusion; Maxwell-Stefan equations. Prerequisite: MATH 245, CHE 443, CHE 445.

CHE 450L Chemical Process Dynamics and Control (3, Sp) Simulation, stability, and automatic control of chemical processes. Open and closed loop control schemes and introduction to optimal control theory. Computer implementation and laboratory application. Prerequisite: CHE 120; corequisite: MATH 245.

CHE 451 Formation Evaluation (1) (Enroll in PTE 461)

CHE 452 Economic, Risk and Formation Productivity Analysis (4) (Enroll in PTE 462)

CHE 453L Introduction to Transport Processes in Porous Media (2) (Enroll in PTE 463L)

CHE 454L Petroleum Reservoir Engineering (1) (Enroll in PTE 464L)

CHE 455L Drilling Technology and Subsurface Methods (1) (Enroll in PTE 465L)

CHE 476 Chemical Engineering Materials (3, Sp) Chemical and physical properties of solid materials used by chemical engineers, including polymers, metals, and ceramics. Materials design for industrial applications. Prerequisite: CHEM 322aL.

CHE 480 Chemical Process and Plant Design (3, Sp) Applications of unit operations, thermodynamics, kinetics, and economic balance; energy conservation in heat exchanger networks and in sequencing of separational devices. Safety aspects. Prerequisite: senior standing.

CHE 485 Computer-Aided Chemical Process Design (3, Fa) Use and optimization of modern computer software for chemical process design. Prerequisite: CHE 442, CHE 443.

CHE 486 Design of Environmentally Benign Process Plants (3, Sp) Process Plants interact with the environment as an integrated system. This course discusses design procedures to minimize unwanted effluents to air, water and solid wastes. Corequisite: CHE 480 or CHE 485.

CHE 489 Nanotechnology and Nanoscale Engineering through Chemical Processes (3) Properties and processing of nanomaterials including polymeric, metallic, and ceramic nanoparticles, composites, colloids, and surfactant self-assemble for templated nanomaterial production. Prerequisite: CHEM 105aL or CHEM 115aL or MASC 110L.

CHE 489 Molecular and Cellular Bioengineering (3, Fa) Design, synthesis, and analysis of biological molecules; routes to understand and engineer living systems at the molecular and cellular level; systems and synthetic biology. Prerequisite: BISC 320.

CHE 489 Biochemical Engineering (3, Sp) Application of chemical engineering principles to biological and biochemical processes and materials. Design of biochemical reactors and of processes for separation and purification of biological products. Prerequisite: CHEM 320; BISC 320L.

CHE 490 Directed Research (1-4, max 8) Individual research and readings. Not available for graduate credit.

CHE 491 Nanotechnology Research for Undergraduates (1, max 4) Independent research in nanotechnology. Research project selected by the student in close consultation with a research adviser. Open only to juniors and seniors. Prerequisite: CHEM 391L.

CHE 499 Special Topics (2-4, max 8) Course content to be selected each semester from recent developments in chemical engineering and related fields.

CHE 501 Modeling and Analysis of Chemical Engineering Systems (3, Fa) Application of mathematics to problems in chemical engineering; mathematical modeling, differential and integral equations, linear
systems analysis and stability, asymptotic and numerical methods. Graduate standing.

CHE 510 Energy and Process Efficiency (3, Sp) Management and engineering strategies utilized to improve energy efficiency. Open only to master and doctoral students. (Duplicates credit in AME 577.)

CHE 533 Principles of Combustion (3) (Enroll in AME 513)

CHE 533 Principles of Electrochemical Engineering (3) (Enroll in PTE 523)

CHE 534 Thermodynamics for Chemical Engineers (3, Sp) Application of thermodynamics to chemical engineering systems. Recommended preparation: CHE 330.

CHE 531 Enhanced Oil Recovery (3) (Enroll in PTE 531)

CHE 532 Vapor-Liquid Equilibrium (3) Thermodynamics of phase relations; prediction and correlation of phase behavior. Prerequisite: CHE 330.

CHE 540 Viscous Flow (4) Fluid mechanical problem of interest to chemical engineers involving laminar flows of incompressible fluids, viscous-dominated creeping flows, and motion of bubbles and drops. Prerequisite: CE 309 or AME 309 or CHE 443.

CHE 541 Mass Transfer (3) Fundamentals of mass transfer within a single phase and between phases; applications to separation processes. Recommended preparation: CHE 445.

CHE 542 Chemical Engineering Kinetics (3, Sp) Reaction kinetics applied to problems of engineering design and operation. Recommended preparation: CHE 447.

CHE 550b Seminar in Chemical Engineering (0-1, max 2, FaSpSm) Seminars to cover recent developments in the field of chemical engineering given by invited speakers. Master's students must register for two semesters; Ph.D. students must register for four semesters. Graded IP/CR/NC. Recommended preparation: graduate standing.

CHE 554 Principles of Tissue Engineering (3, Fa) Advanced scientific and engineering principles of tissue engineering including stem cell biology, biomaterial scaffolds, protein–surface interaction, biomechanics, and selected bioartificial organs (e.g., kidney, bone, skin). Recommended preparation: CHE 476, CHE 498.

CHE 560 Advanced Separation and Bioseparation Processes (3, Sp) Experimental techniques for separation and bioseparation processes and theoretical and computational techniques for modeling them. Graduate standing.

CHE 572 Advanced Topics in Polymer Kinetics and Rheology (3, Fa) Kinetics of polymer synthesis reactions and rheology of polymer solutions. Recommended preparation: CHE 442, CHE 472.

CHE 582 Fluid Flow and Transport Processes in Porous Media (3) (Enroll in PTE 582)

CHE 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

CHE 594ab Master's Thesis (2-6, max 8, FaSpSm) Laboratory study of specific problems by candidates for the degree Engineer in Chemical Engineering. Graded CR/NC.

CHE 594abcdz Doctoral Dissertation (2-3-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Master of Science in Materials Science

In addition to the general requirements for the Master of Science degree, add the following required courses: CHE 501; EE 477; MASC 501, MASC 503, MASC 504, MASC 506.
505 and MASC 561. The six remaining units for the degree may be electives chosen with departmental approval.

### Engineer in Materials Science

Requirements for the Engineer in materials science degree are the same as set forth in the general requirements for graduate degrees.

### Master of Science in Materials Engineering

Students with an interest in the characterization, selection and processing of engineering materials, and in materials problems related to engineering design may work toward a Master of Science in materials engineering. This degree is awarded in conformity with the general requirements of the Viterbi School of Engineering. Students may elect to work for this degree in either the Materials Science or Aerospace and Mechanical Engineering curriculum. The specific courses that constitute an acceptable program must be approved in advance by the department.

### Doctor of Philosophy in Materials Science

The Doctor of Philosophy with a major in materials science is awarded in strict conformity with the general requirements of the USC Graduate School. It includes the course requirements for the Master of Science degree. See general requirements for graduate degrees.

### Courses of Instruction

#### Materials Science (MASC)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

**MASC 110L Materials Science (4, FaSp)** Chemical bonding and structure in crystalline, amorphous, and molecular solids; tendency and mechanisms for chemical change; homogeneous and heterogeneous equilibria. Prerequisite: high school chemistry.

**MASC 310 Materials Behavior and Processing (3)** Principles of mechanical behavior and processing of materials. Relationships between mechanical properties, microstructure, and processing methods. Composites and nonmetals included.

**MASC 344L Mechanical Behavior of Materials (3)** (Enroll in CE 334L)

**MASC 350L Nanostructured Materials: Design, Synthesis, and Processing (3, Sp)** Structure, properties, synthesis, processing and design of metallic, ceramic, polymeric, electronic, photonics, composite, nanophase and biomaterials; nanostuctures, microfabrication and smart materials. Prerequisite: CHEM 105a or CHEM 115a or PHYS 152.

**MASC 443L Processing for Microelectronics (3)** (Enroll in EE 443L)

**MASC 438L Principles of Semiconductor Processing (3)** Principles relevant to semiconductor processing are covered. Topics include bulk and epitaxial crystal growth, photolithography, vaporization, sputtering, etching, oxidation, alloying, and ion implantation. Prerequisite: MASC 440L, EE 338.

**MASC 440 Materials and the Environment (3, Sp)** Interactions of metals, alloys and composite materials with liquid and gaseous corrosive environments; corrosion protection by alloying and application of inhibitors and metallic or organic coatings.

**MASC 471 Applied Quantum Mechanics for Engineers (3)** (Enroll in EE 471)

**MASC 472 Polymer Science and Engineering (3)** (Enroll in CHE 472)

**MASC 475 Physical Properties of Polymers (3)** (Enroll in CHE 475)

**MASC 476 Chemical Engineering Materials (3)** (Enroll in CHE 476)

**MASC 499 Special Topics (1-4, max 9)** Course content will be selected each semester to reflect current trends and developments in the field of materials science.

**MASC 502 Advanced Solid State (3, Fa)** Semiconductors, dielectrics and metals, thermoelectric effects, magnetism, magnetic resonance and superconductivity. Prerequisite: MASC 501.

**MASC 503 Thermodynamics of Materials (3, Fa)** Classical thermodynamics, chemical potential, phase diagrams, mass transfer; electrochemical thermodynamics and electrode processes. Prerequisite: MASC 503.

**MASC 504 Diffusion and Phase Equilibria (3, Sp)** Phase equilibria; phase diagrams; diffusion; planar defects; nucleation and growth; spinodal decomposition; phase transformation. Prerequisite: MASC 503.

**MASC 505 Crystals and Anisotropy (3, Fa)** Stereographic projection; Laue back reflection method; crystal orientation; line and planar crystalline defects; tensors; susceptibility; permeability and permittivity; stress and strain; piezoelectricity; elasticity.

**MASC 506 Semiconductor Physics (3, Fa)** (Enroll in EE 506)

**MASC 511 Materials Preparation (3)** Principles and techniques of materials preparation: purifcation, crystal growth from liquid and vapor phases, sintering. Prerequisite: MASC 504.

**MASC 514L Processing of Advanced Semiconductor Devices (3, Fa)** Statistical design of experiments, vapor deposition of thin film dielectrics, plasma etching, advanced lithography, in-situ sensors, process monitoring, quality control, assurance/reliability. Prerequisite: EE 458.

**MASC 515 Principles of Electrochemical Engineering (3)** Electrochemical techniques; mass, charge, and heat transfer; electrochemical thermodynamics and electrode kinetics; electrochemical reactors; optimization; materials and corrosion; experimental modeling of industrial processes.

**MASC 524 Techniques and Mechanisms in Electrochemistry (3)** Modern electrochemistry; in-situ techniques; in-situ probes of the near-electrode region; ex-situ emersion techniques; cyclic voltammetry, electrooxidation, electrochemical reduction, reactive film formation, enzyme electrochemistry.

**MASC 534L Spectroscopy and Spectroscopic Techniques (3)** Methods for determination of structure and composition of solids, liquids, and gases; techniques include infrared, ultraviolet, visible, near-infrared, magnetic resonance, nuclear magnetic resonance, x-ray, and neutron diffraction.

**MASC 535 Materials Characterization (3, Fa)** Characterization of solids by optical microscopy, electron microscopy, (TEM, SEM) and elemental and structural analysis (EPMA, ESCA, AES, SIMS, HEED, LEED, SED).

**MASC 539 Engineering Quantum Mechanics (3)** (Enroll in EE 539)

**MASC 548 Rheology of Liquids and Solids (3)** (Enroll in CHE 548)

**MASC 551 Mechanical Behavior of Engineering Materials (3, Sp)** Mechanical properties of materials; macroscopic mechanical behavior related to structure and microstructure of the material; elementary dislocation theory related to basic strengthening mechanisms; fatigue and fracture; nanomaterials. Recommended preparation: MASC 510.

**MASC 559 Creep (3)** (Enroll in AME 559)

**MASC 560 Fatigue and Fracture (3)** (Enroll in AME 560)

**MASC 561 Dislocation Theory and Applications (3, Sp)** Elasticity theory; types, sources, motion, interaction of dislocations; stress fields and strain energies; partial dislocations and stacking faults; principles of work-hardening.

**MASC 570 Introduction to Photovoltaic Solar Energy Conversion (3)** Introduction to the physical principles, implementation materials, devices, and manufacturing costs of solar cells and panels for photovoltaic conversion of solar radiation to electricity.

**MASC 575 Basics of Atomic Simulation of Materials (3, Fa)** Building a parallel computer from components: molecular dynamics method; computation of structural, thermodynamics and transport properties; simulation projects. Prerequisite: Undergraduate course in thermodynamics or statistical physics; recommended preparation: Fortran, Unix/Linux.

**MASC 576 Molecular Dynamics Simulations of Materials and Processes (3, Sp)** Molecular dynamics method for atomistic simulations of materials and processes, simulations using parallel computing, correlation functions for structural and dynamical properties plus simulation project. Prerequisite: MASC 575.

**MASC 583 Materials Selection (3)** (Enroll in AME 588)

**MASC 584 Fracture Mechanics and Mechanisms (3)** (Enroll in AME 584)

**MASC 590 Directed Research (1-15)** Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

**MASC 594ab Master’s Thesis (2-10)** For the master’s degree. Credit on acceptance of thesis. Graded IP/CR/NC.

**MASC 598 Materials Science Seminar (1)** Seminar in Materials Science research. To be taken only once for graduate credit. Graded CR/NC.

**MASC 599 Special Topics (1-6, max 9)**

**MASC 601 Advanced Semiconductor Device Physics (3)** (Enroll in EE 601)

**MASC 606 Nonequilibrium Processes in Semiconductors (3, Sp)** (Enroll in EE 606)

**MASC 610 Molecular Beam Epitaxy (3)** Basic principles, ultra high vacuum, machine considerations, source purity and calibrations temperature.

Faculty

Zohrab A. Kaprielian Dean’s Chair in Engineering and Chester F. Dollby Chair in Petroleum Engineering: Yannis C. Yortsos, Ph.D.

Omar B. Milligan Chair in Petroleum Engineering: Iraj Ershaghi, Ph.D., P.E.

William M. Keck Professor of Energy Resources: Donald M. Paul, Ph.D.

Associate Professors: Behnam Jafarpour, Ph.D.; Kristian Jessen, Ph.D.

Adjunct Associate Professors: Stephen Cheung, Ph.D.; Robert Ehrlich, Ph.D.; Donald G. Hill, Ph.D.; Victor M. Ziegler, Ph.D.

Adjunct Assistant Professors: Andrei Popa, Ph.D.; Ehsan Tajer, Ph.D.

Lecturers: Jincai, Chang, Ph.D.; George Chilingar, Ph.D.; Donald Gautier, Ph.D.; Martin Karranbach, Ph.D.; Keith Millheim, Ph.D.; Bradford Pierce, M.S.; Wenlong Xu, Ph.D.; Ke-Tiai Yao, Ph.D.

Research Professors: Fred Aminzadeh, Ph.D.; Dongxiao Zhang, Ph.D.

Emeritus Professor: Elmer L. Dougherty, Ph.D.

Petroleum Engineering Honor Society: Pi Epsilon Tau

Degree Requirements

Bachelor of Science in Chemical Engineering

Emphasis in Petroleum Engineering

See the listing under Chemical Engineering.

Bachelor of Science in Mechanical Engineering

Emphasis in Petroleum Engineering

See the listing under Aerospace and Mechanical Engineering.

Minor in Petroleum Engineering

A minor in petroleum engineering consisting of 16 required units is available to undergraduate majors in various fields of engineering and applied science. Besides preparing for graduate study in petroleum engineering, the program will prepare students for careers in areas of national need such as the exploration, recovery and production of subterranean resources, and the underground disposal of hazardous wastes.

Prerequisite courses:

- MATH 225, MATH 126, MATH 226, MATH 245, PHYS 151L and CHEM 105aL

Master of Science in Petroleum Engineering

The Master of Science in petroleum engineering is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. A student may be permitted to elect the program without thesis upon approval from the department. Course requirements are similar to the existing M.S. degree in petroleum engineering in terms of core requirements.

Students without a B.S. in Petroleum Engineering will normally be required to complete prerequisite courses before beginning the M.S. program. Specific prerequisite courses are decided upon consultation with the department adviser. Units from these courses cannot be applied toward the degree.

Certificate in Smart Oilfield Technologies

The certificate in smart oilfield techniques is designed for practicing engineers and scientists who enter petroleum engineering related fields and/or who wish to obtain training in the specific smart oilfields area. The applicants may enroll at USC as limited status students. They must apply and be admitted to the program before they complete 3 units of the required course work. The certificate program is open to applicants with an undergraduate degree in engineering or sciences who meet the admission criteria as limited students. Students without a B.S. in Petroleum Engineering will normally be required to complete prerequisite courses before beginning the certificate program. Specific prerequisite courses are decided upon consultation with the department adviser. Units from these courses cannot be applied toward the certificate.

The required courses consist of the following 11 units:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PTE 581</td>
<td>Intelligent and Collaborative Oilfield Systems Characterization and Management</td>
<td>3</td>

<td>Smart Oilfield Data Mining</td>
<td>3</td>
</tr>
<tr>
<td>PTE 584</td>
<td>Advanced Oilfield Operations with Remote Visualization and Control</td>
<td>3</td>
</tr>
</tbody>
</table>

These classes will be available through the USC Distance Education Network (DEN@Viterbi). The credit for classes may be applied toward the M.S. or Ph.D. in petroleum engineering should the student decide later to pursue an advanced degree. In order to be admitted to the M.S. program, the student should maintain a B average or higher in courses for the certificate program and must
satisfy all normal admission requirements. All courses for the certificate must be taken at USC.

Engineer in Petroleum Engineering

Requirements for the Engineer degree in petroleum engineering are the same as set forth in the general requirements. See general requirements for graduate degrees.

Doctor of Philosophy

The Doctor of Philosophy with a major in petroleum engineering is also offered. See general requirements for graduate degrees.

Courses of Instruction

Petroleum Engineering (PTE)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

PTE 202x Energy and Society (4, Irregular) Study of the impact of the development, production, and global distribution of energy on societal, political, and economic behavior. Not available for major credit to engineering majors. Prerequisite: pass Math Skill Level.

PTE 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

PTE 411x Introduction to Transport Processes in Porous Media (3, Fa) Properties of porous rocks; capillary effect, single phase and multiphase flow through porous media; diffusion and dispersion, miscible displacement, heat transfer. Lecture, 3 hours. Not available for credit to Petroleum Engineering majors. Prerequisite: MATH 243, CHEM 105aL or CHEM 115aL, PHYS 151L, CE 309.

PTE 412x Petroleum Reservoir Engineering (3, Fa) Properties of reservoir fluids, volumetric and material balances for gas and oil reservoirs; reservoir modeling concepts. Lecture, 3 hours. Not available for credit to Petroleum Engineering majors.

PTE 461x Formative Evaluation (3, Fa) Concepts of petroleum geology, interpretation of downhole surveys and measurements including well logs, MWD, mud logs and samples. Corequisite: PTE 463L.

PTE 462 Economic, Risk and Formulation Productivity Analysis (4, Sp) Principles of economic evaluation, risk analysis, reserve estimates, decline curves, energy prices, and well transients for flow prediction. Prerequisite: PTE 461.

PTE 463Lx Introduction to Transport Processes in Porous Media (3, Fa) Properties of porous rocks; capillary effect, single-phase and multiphase flow through porous media; diffusion and dispersion, miscible displacement, heat transfer. Lecture, 3 hours; laboratory, 3 hours. Prerequisite: MATH 243, CHEM 105aL or CHEM 115aL, PHYS 151L.

PTE 464x Petroleum Reservoir Engineering (3, Sp) Properties of reservoir fluids, volumetric and material balances for gas and oil reservoirs; reservoir modeling concepts. Lecture, 3 hours; laboratory, 3 hours. Prerequisite: PTE 463L.

PTE 465x Drilling Technology and Subsurface Methods (3, Fa) Theory and practice in drilling technology; mechanical properties of reservoir rocks; well completion; acidizing and fracturing, oil production technology. Lecture, 3 hours; laboratory, 3 hours. Prerequisite: PTE 464L.

PTE 466 Petroleum Geology (3, Sm) Introductory topics of physical and historical geology will be focused on the components that relate to the formation of oil and gas accumulations.

PTE 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

PTE 499 Special Topics (2-4, max 8) Course content to be selected each semester from recent developments in petroleum engineering and related fields.

PTE 500 Computational Reservoir Modeling (3, Fa) Introduction to mathematical and computational methods in characterization, modeling, and describing the subsurface flow and transport phenomena. Recommended preparation: Familiarity with basic calculus, differential equation, and MATLAB programming. Open only to Engineering students.

PTE 502 Advanced Reservoir Characterization (3, Irregular) Sources of data for reservoir characterization; cross-disciplinary integration; geologic models; sequence stratigraphic, tectonic weight and geophysical models; 4-D seismic; compartmentalized and fractured reservoirs; error and risk analysis. Graduate standing in PTE. Prerequisite: PTE 411x, PTE 461.

PTE 503 Technology of Unconventional Oil and Gas Resources Development (3, Fa) Geology of unconventional resources; exploration, development, laboratory testing, drilling, formation evaluation, design and monitoring of hydraulic fracturing, forecasting, technology of oil sand and environmental issues. Open only to graduate students. Recommended preparation: PTE 507, standing graduate in petroleum engineering.

PTE 504 Geophysics for Petroleum Engineers (3, Sm) Geosciences concepts and technologies with applications in petroleum engineering: 2D; 3D; seismic borehole geophysics, passive seismic, controlled source electromagnetic, geophysical and geological modeling and inversion. Open only to engineering graduate students. Recommended preparation: familiarity with Matlab.

PTE 505 Inverse Modeling for Dynamic Data Integration (3, Sp) Introduction to fundamentals of deterministic and stochastic inverse modeling; integration of dynamic data into predictive reservoir models, reservoir parameterization, derivation of adjoint models. Open only to engineering graduate students. Recommended preparation: PTE 508, basic knowledge of calculus, linear algebra and probability/statistics.

PTE 506 Geothermal Reservoirs (3, Fa) Geothermal reservoirs, heat and mass flow in fracture network, enhanced geothermal systems (EGS), exploration methods, exploitation of hydrothermal and EGS fields, stimulation, forecasting, power generation. Open only to engineering and geological sciences graduate students. Recommended preparation: familiarity with Matlab.

PTE 507 Engineering and Economic Evaluation of Subsurface Reservoirs (3, Fa) Studies, data and methods for estimating size of underground fluid deposits for predicting physical and economic behavior of designed flow schemes, and for quantifying uncertainty. Prerequisite: PTE 464L.

PTE 511 Advanced Phase Behavior of Petroleum Reservoir Fluids (3, Irregular) From classical thermodynamics to engineering application; equations of state based calculations; PVT experiments; reservoir fluid characterization; PVT-flash calculations and stability analysis; compositional grading; transport properties. Open only to graduate students. Recommended preparation: CHE 330, MATH 226.

PTE 512 Gas Injection Processes – Analytical Solutions and Analysis (3, Fa) Gas injection and enhanced oil/gas recovery; conservation equations; flow and phase behavior; displacement efficiency; dispersion; method of characteristics; development of multi-contact miscibility in multicomponent systems. Open only to graduate students. Recommended preparation: CHE 330, MATH 226 and MATH 245 (or similar).

PTE 514 Drilling Engineering (3, 2 years, Fa) Rock mechanics; rotary drilling processes; bit selection; optimizing bit and rotational speed; well hydraulics and control; casing design and cementing; directional and offshore drilling.

PTE 517 Testing of Wells and Aquifers (3, Sp) Principles of well testing; down hole device, Aquifer tests; slug tests; DST; pressure transient modeling in homogeneous and heterogeneous systems; parameter estimation; computer aided techniques. Prerequisite: PTE 464L.

PTE 519 Integrated Physical and Cyber Security for Oil and Gas Operations (3, Fa) Infrastructure Security, Resilience and Management of Digital Oil Fields, Process Control Networks in exploration and production, refining and chemical plants, Asset Integrity principles, case histories. Open only to graduate students.

PTE 531 Enhanced Oil Recovery (3, 2 years, Sm) Survey of current enhanced oil recovery processes, including water-flooding, miscible displacement, and thermal oil recovery. Prerequisite: PTE 464L; recommended preparation: PTE 507.

PTE 542 Carbonate Rocks (2, Irregular) Classification; porosity development; source rocks; wettability; capillary pressure curves; compressibility; surface areas; relative permeabilities; various petrophysical properties; formation evaluation; overpressures; thin section analysis.

PTE 545 Corrosion Control in Petroleum Production (2, Irregular) Types of corrosion encountered in petroleum production; methods for practical control including use of inhibitors, coatings, and cathodic protection. Prerequisite: CHEM 430A.

PTE 555 Well Completion, Stimulation, and Damage Control (3, Sm) This course reviews current practices related to well completion methods, wellbore stimulation, and damage control. Formation damage prevention and stimulation methods are emphasized. Prerequisite: graduate standing.

PTE 578 Advanced Production Engineering (2, 2 years, Sp) Principles of oil well and gas well production; design of artificial lift systems and surface operations; field problems of enhanced oil recovery operations.

PTE 581 Environmental Technology in the Petroleum Industry (3, Irregular) This course examines engineering and scientific principles necessary for understanding, assessing, and remediating environmental problems in the petroleum industry including drilling, production,
transportation and refining operations. Graduate standing.

PTE 582 Fluid Flow and Transport Processes in Porous Media (3, 2 years, Fa) Principles of single and multiphase flow through porous media; mechanisms of immiscible and miscible displacement; momentum, heat and mass transport in porous media.

PTE 586 Intelligent and Collaborative Oilfield Systems Characterization and Management (3, Fa) Review of soft computing methods such as neural networks, fuzzy logic, problem solving in reservoir characterization, dynamic reservoir modeling, oilfield data integration and analysis of uncertainty in prediction. Limited to students with graduate standing. Recommended preparation: prerequisites for non-majors.

PTE 587 Smart Completions, Oilfield Sensors and Sensor Technology (3, Sp) Intelligent Wellbore completion technology, subsurface and surface sensors, deployment and data acquisition, telemonitoring and feedback, reliability of sensors, data transmission, systems network. Recommended preparation: prerequisites for non-majors.

PTE 588 Smart Oilfield Data Mining (3, Fa) Methods for oilfield data mining, data preparation mining images, prediction and knowledge discovery, subset selection, pattern recognition. Limited to students with graduate standing. Recommended preparation: prerequisites for non-majors.

PTE 590 Advanced Oilfield Operations with Remote Immersive Visualization and Control (3, Sp) Immersive subsurface and surface environments, web based monitoring and feedback, visualizing risk, unattended operation. Limited to students with graduate standing. Recommended preparation: prerequisites for non-majors.

PTE 590 Directed Research (1-12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PTE 594abz Master’s Thesis (2-12, max 12) Course content will be selected each semester to reflect current trends and developments in the field of petroleum engineering.

PTE 611 Stochastic Modeling and Simulation (3) (Enroll in CE 611)

PTE 690 Directed Research (1-4, max 8, FaSpSm) Laboratory study of specific problems for candidates for the degree engineer in petroleum engineering. Graded CR/NC.

PTE 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Chair: Lucio Soilebalm, Ph.D.
Associate Chair: Erik Johnson, Ph.D.

Director, Environmental Engineering: Amy Childress, Ph.D.
Associate Director, Environmental Engineering: Massoud Pirbazari, Ph.D.

Faculty

John and Dorothy Shea Early Career Chair in Civil Engineering: Patrick Lynett, Ph.D.

Fred Champion Professor of Civil and Environmental Engineering: Constantinos Sioutas, Sc.D.

Gordon S. Marshall Professor of Engineering Technology: Roger Ghanem, Ph.D. (Aerospace and Mechanical Engineering)

Professors: James C. Anderson, Ph.D.*; Amy Childress, Ph.D.; Roger Ghanem, Ph.D. (Aerospace and Mechanical Engineering); Ronald C. Henry, Ph.D.; Jian-Jen Lee, Ph.D., P.E.*; Vincent W. Lee, Ph.D.; Sami F. Masri, Ph.D. (Aerospace and Mechanical Engineering); Najmedin Meshkati, Ph.D., CPE (Industrial and Systems Engineering); Massoud Pirbazari, Ph.D.; Constantinos Sioutas, Sc.D.; Lucio Soilebalm, Ph.D.; Costas Synolakis, Ph.D. (Aerospace Engineering); Mihailo Trifunac, Ph.D.; L. Carter Welford, Ph.D.; Hung Leung Wong, Ph.D.*

Associate Professors: Erik A. Johnson, Ph.D.; Patrick Lynett, Ph.D.
Assistant Professors: George Ban-Weiss, Ph.D.; Burcin Becerik-Gerber, D.Des.; Felipe delBarros, Ph.D.; Kelly Sanders, Ph.D.; Ketan Savla, Ph.D.

Professors of Engineering Practice: Gregg E. Brandow Jr., Ph.D., P.E.; Geraldine Knatz, Ph.D. (Public Policy); Henry M. Koffman, P.E.

Associate Professor of Engineering Practice: Amy Rechenmacher, Ph.D.

Senior Lecturer: Dana Sherman, Esq.* (Industrial and Systems Engineering)

Joint Appointments: David J. Gerber, D.Des. (Architecture); Genevieve Giuliani, Ph.D. (Public Policy); Behrokh Khoshnevis, Ph.D. (Industrial and Systems Engineering); James Moffett, Ph.D. (Marine Environmental Biology); James Moore, Ph.D. (Industrial and Systems Engineering, Public Policy); Faridus E. Udawadia, Ph.D. (Aerospace and Mechanical Engineering); John P. Wilson, Ph.D. (Sociology)

Research Professor: Michael Orosz (Information Sciences Institute)

Research Assistant Professor: Scott Fruin, Ph.D. (Environmental Health, Keck School of Medicine)

Adjunct Associate Professor: Le Dam Hanh-Griffin, Ph.D.

Adjunct Assistant Professor: Navid Nastar, Ph.D.

Adjunct Research Professors: Maria I. Todorovska, Ph.D.; Yan Xiao, Ph.D., P.E.; Dongxiao Zhang, Ph.D.

Adjunct Research Assistant Professors: Jose C. Borrero, Ph.D.; John Caffrey, Ph.D.; Mohammad R. Jahanbhai, Ph.D.; Mazen Wahrabeh, Ph.D.

Emeritus Professors: Milian S. Aghabian, Ph.D., P.E.; George V. Chillingar, Ph.D.; Joseph S. Devinin, Ph.D.; Geoffrey Martin, Ph.D.

*Recipient of university-wide or school teaching award.

Chi Epsilon Civil Engineering Honor Society

Chi Epsilon is dedicated to the purpose of maintaining and promoting the status of civil engineering as a profession. Chi Epsilon was organized to recognize the characteristics of the individual civil engineer deemed to be fundamental to the successful pursuit of an engineering career and to aid in the development of those characteristics in the civil engineering student. To contribute to the improvement of the profession, Chi Epsilon fosters the development and exercise of sound traits of character and technical ability among civil engineers.

Chi Epsilon is based on broad principles of scholarship, character, practicality and sociability. Civil engineering students who rank in the upper one-third of the junior or senior class are eligible for membership. These qualifications will make one eligible but not necessarily acceptable. Each member must be well skilled in all four of the basic principles.

Degree Requirements

Undergraduate Program Educational Objectives

Fulfiling the vision of the Sonny Astani Department of Civil and Environmental Engineering, the Viterbi School of Engineering and the University of Southern California, our graduates will:

Be successful in their professional careers, become leaders in industry, academia, government or service, while adapting their technical, collaborative and managerial skills for the benefit of Society’s built and natural environments.

Support the advancement of the practice of science and engineering, while maintaining professional standards and moral and legal obligations to society, while being active in professional organizations and obtaining professional licensure when appropriate.

Be prepared to pursue graduate studies in engineering or other disciplines, while continuously broadening their abilities and enhancing their technical skills to maintain their relevance with technological change.

Be successful in their professional careers, become leaders in industry, academia, government or service, while adapting their technical, collaborative and managerial skills for the benefit of Society’s built and natural environments.

Support the advancement of the practice of science and engineering, while maintaining professional standards and moral and legal obligations to society, while being active in professional organizations and obtaining professional licensure when appropriate.

Be prepared to pursue graduate studies in engineering or other disciplines, while continuously broadening their abilities and enhancing their technical skills to maintain their relevance with technological change.
Undergraduate Program Criteria

The program leading to a Bachelor of Science in Civil Engineering prepares graduates to apply knowledge of mathematics through differential equations, calculus-based physics, chemistry and at least one additional area of basic science, consistent with the program educational objectives: apply knowledge of four technical areas appropriate to civil engineering; conduct civil engineering experiments and analyze and interpret the resulting data; and design a system, component, or process in more than one civil engineering context. The program also explains basic concepts in management, business, public policy, and leadership; and explains the importance of professional licensure.

The program leading to a Bachelor of Science in Environmental Engineering prepares graduates to be proficient in mathematics through differential equations, probability and statistics, calculus-based physics, general chemistry; an earth science, e.g., geology, meteorology, soil science, relevant to the program of study; a biological science, e.g., microbiology, aquatic biology, toxicology, relevant to the program of study; fluid mechanics relevant to the program of study; and an introductory level knowledge of environmental issues associated with air, land, and water systems and associated environmental health impacts. The program prepares graduates to be proficient at conducting laboratory experiments and critically analyzing and interpreting data in more than one major environmental engineering focus area, e.g., air, water, land, environmental health; performing engineering design by means of design experiences integrated throughout the professional component of the curriculum; and to be proficient in advanced principles and practice relevant to the program objectives; including understanding of concepts of professional practice and the roles and responsibilities of public institutions and private organizations pertaining to environmental engineering.

Undergraduate Degree Programs

Bachelor of Science in Applied Mechanics

The requirement for this degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees section.

* GE Category VI and WRIT 150 are taken concurrently.

** The choice of free electives in the fourth year requires approval of the administering department.

The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

Bachelor of Science in Civil Engineering (131-132 Unit Program)

The department offers a Bachelor of Science degree in Civil Engineering. Additionally, there are three possible areas of emphases within this civil engineering program major. These are building science, environmental engineering and structural engineering. An area of emphasis appears in parentheses after the primary major name on the transcript.

Bachelor of Science in Civil Engineering

The requirement for the degree is 131-132 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied toward the major, regardless of the department in which the courses are taken. In addition, a minimum grade of C must be earned in each of the following courses: CE 205, CE 225, CE 309 and CE 215. See also common requirements for undergraduate degrees.

Elective

Civil Engineering Design Knowledge 6

Kernel*** Course 6
Total units: 131-132

* GE Category VI is taken concurrently with WRIT 150.

** Satisfies GE Category III requirement.

*** Design kernel courses must be selected from the following list of design courses: CE 437, CE 463, CE 466, CE 476, CE 479, CE 482, CE 484 and CE 485.

The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

Tracks

In addition to the core courses, students are required to select one of the following tracks: General, Construction or Water Resources.

General Track

Choose one of the following: CE 480 as the capstone course and CE 482 as a required design kernel course; or CE 465 as the capstone course and CE 466 or CE 476 as a required design kernel course.
The civil engineering electives may be chosen freely.

**Construction Track**

Select CE 480 as the capstone course and CE 482 as a required design kernel course. Replace CE 453 with CE 412. CE 640 is a required elective. The other civil engineering elective must be chosen from the following list: CE 461, CE 462, CE 469 and CE 470.

**Water Resources Track**

Select CE 465 as the capstone course and select one of the following as a required design kernel course: CE 466 or CE 479. The civil engineering electives must be selected from the following list: CE 456, CE 476 and CE 490.

All curricula leading to a degree must be approved by the Astani Department of Civil and Environmental Engineering; please note this includes transfer credit and units for courses waived for subject credit only, which have been approved through the Degree Progress department.

**Bachelor of Science in Civil Engineering**

**Emphasis in Structural Engineering**

The requirement for the degree with an emphasis in structural engineering is 131-132 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied towards the major, regardless of the department in which the courses are taken. In addition, a minimum grade of C must be earned in each of the following courses: CE 205, CE 225, CE 309 and CE 235. See also common requirements for undergraduate degrees.

* GE Category VI is taken concurrently with WRIT 150.

** Satisfies GE Category III requirement.

** Kernels must be selected from the following list of design courses: CE 443, CE 446, CE 476, CE 482, CE 484, ENE 486.

- The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

Minor in Environmental Engineering
Minor in Construction Planning and Management

This program covers the most current theories and practice of construction planning and management. The program provides a valuable adjunct credential to professional school students pursuing careers in business administration, public administration, architecture, environmental studies, and other areas; and a unique opportunity for professional focus to students in the USC Dornsife College of Letters, Arts and Sciences.

Construction activities are complex. In contemporary society, effective planning and management of these activities requires specialized knowledge of the technical, economic and policy environment. This program couples the knowledge of how construction activities are organized with a broader understanding of the urban system in which construction projects are embedded. With the exception of statistics, all of the required courses are within the Astani Department of Civil and Environmental Engineering and the USC Price School of Public Policy.

Any USC undergraduate who has completed the equivalent of two full-time semesters in good standing is eligible to pursue the minor program. This minor program is rigorous enough to serve as an introductory credential for students subsequently electing to pursue advanced studies in development, urban planning, construction management, architecture or allied fields.

Courses Required

Seven courses consisting of at least 23 units are required for the minor.

Statistics

Students must complete an adviser approved course in statistics. Candidate courses include ECON 317, EE 364, ISE 220, MATH 208, PPD 303, PSYC 274L, SOCI 314 and similar courses. The statistics course must be at least three units.

Graduate Programs

Master of Science in Civil Engineering

The Master of Science in Civil Engineering is awarded in strict conformity with the general requirements of the USC Viterbi School of Engineering. A student may receive the Master of Science in Civil Engineering with a special option by specializing in one of the following courses of study: construction engineering; structural engineering; and transportation engineering. Students specializing in the transportation option and completing a thesis must include in their program 4 units of CE 594ab.

A general Master of Science in Civil Engineering without special designation is also given. Students pursuing this program will choose between the following special options: general, earthquake engineering, structural mechanics, water resources or ocean and coastal engineering.

A student who wishes to pursue the Master of Science in Civil Engineering without special designation and who has an interest in public works may take a selected sequence of 12 units in the USC Price School of Public Policy. For further information, see the Public Administration Professional Sequence section in the USC Price School of Public Policy.

Master of Science in Civil Engineering (Transportation Systems)

See Sustainable Infrastructure Systems.

Master of Science in Civil Engineering (Water and Waste Management)

See Sustainable Infrastructure Systems.

Master of Science in Environmental Engineering

Students with a bachelor’s degree in engineering or science may work toward the Master of Science in Environmental Engineering. Students with degrees in fields other than engineering or science may be admitted on the recommendation of a program adviser and program director. Selection of courses will be determined through consultation with a program adviser to provide a maximum of training in the student’s area of interest in environmental problems.

Master of Construction Management

Students possessing a bachelor’s degree and with sufficient training in capital management and statistics may pursue the Master of Construction Management. The purpose of the Master of Construction Management program is to educate and train multidisciplinary professionals to understand and execute the broad array of technical and non-technical activities associated with construction management. The program provides special attention to the function of the contractor in real estate development. The program is drawn from the M.S. Civil Engineering program in construction engineering and management, and from the USC Marshall School of Business.

Applicants to the program are expected to have completed undergraduate course work in engineering economy or business finance.

Total minimum units | 33

*Prerequisite required.

The minimum requirement for the Master of Construction Management degree is 33 units. At least three elective courses totaling at least 9 units are required for this degree. These may be taken from the USC Astani Department of Civil and Environmental Engineering, other engineering departments, the USC Price School of Public Policy, the USC School of Architecture, the USC Davis School of Gerontology, the USC Gould School of Law or the USC Marshall School of Business subject to adviser approval. Admission to some classes requires advanced prerequisites and is subject to availability and approval of the instructor.

General Requirements

Residence and Course Load

The normal time required for earning the Master of Construction Management is three semesters, including
one summer semester beginning in June and continuing through the spring semester ending in May. Students are expected to participate in extracurricular activities associated with the Master of Construction Management program, including the speaker series and field trips. A candidate must complete the last four semester units of course work at USC.

Students who wish to take a leave of absence for a semester or longer must request it from the chairman of the Astani Department in writing. Such leaves may be granted for up to one year.

### Engineer in Civil Engineering

Requirements for the Engineer in Civil Engineering are the same as set forth in the general requirements.

### Doctor of Philosophy in Civil Engineering and Doctor of Philosophy in Engineering (Environmental Engineering)

The Doctor of Philosophy with a major in civil engineering and the Doctor of Philosophy with a major in engineering (environmental engineering) are also offered. See general requirements for graduate degrees.

Areas of specialization for Doctor of Philosophy level students are: structural engineering, structural mechanics, earthquake engineering, coastal engineering, water resources engineering, construction engineering and management, soil mechanics and foundation engineering, hydrology, hydraulics, and transportation.

### Graduate Certificate in Transportation Systems

The graduate certificate in Transportation Systems is an interdisciplinary program administered by the USC Astani Department of Civil and Environmental Engineering. The certificate program allows students to specialize in transportation applications, while simultaneously receiving a degree in their home department. The certificate in transportation systems combines elements of transportation engineering with transportation policy, planning, and project management. The program is especially appropriate for students intending to pursue careers as developers of transportation technologies, or as implementors of technologies within government agencies.

Students electing the certificate program apply to the USC Astani Department of Civil and Environmental Engineering. Course prerequisites for the program are:

- one course in statistics or uncertainty, equivalent to ISE 225, PPD 404x or CE 460;
- one course in engineering economy, equivalent to ISE 460;
- one course in microeconomics, equivalent to ECON 203; and
- one course in a contemporary high level programming language.

These prerequisites may be satisfied after enrollment in the certificate program by taking the indicated courses or their equivalent. Graduate students cannot receive credit for courses numbered below 400. Detailed admissions requirements are published by the USC Astani Department of Civil and Environmental Engineering.

Courses taken for the certificate may be applied later to the Master of Science in Civil Engineering, transportation option.

### Courses of Instruction

#### Civil Engineering (CE)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

CE 106 Design and Planning of Civil Engineering Systems (2, Fa) History of civil engineering; introduction to the synthesis and design of systems dependent upon civil engineering technology; the structuring, modeling, and simulation of such systems.

CE 107 Introduction to Civil Engineering Graphics (3, Sp) Graphic communication and drawing; use of instruments, lettering, dimensioning, and detailing of engineering drawing; free-hand sketching, drafting, and modeling.

CE 108 Introduction to Computer Methods in Civil Engineering (2, Sp) Computer programming, organization of problems for computational solution, flow charts, programming; numerical methods; analysis and solution of civil engineering problems.

CE 110 Introduction to Environmental Engineering (3, Fa) Basic concepts of environmental engineering. Air, water, and soil pollution control technologies; pollution prevention strategies. Design of simple water distribution and treatment systems.

CE 205 Statics (2, FaSp) Statics of particles and rigid bodies; equivalent force systems; distributed forces; applications to trusses, frames, machines, beams, and cables; friction; moments of inertia. Prerequisite: PHYS 151L.

CE 207L Introduction to Design of Structural Systems (2, Sp) Structural materials, components and systems; gravity and lateral forces; structural performance and failures; introduction to structural plans and analysis; computer applications, case studies, design project. Prerequisite: CE 205; corequisite: CE 107 and CE 225.

CE 210L Introduction to Environmental Engineering Microbiology (3, Fa) Principles of environmental microbiology; waterborne pathogens; microorganisms and air pollution; microorganisms in soil; water pollution microbiology; biodegradation of hazardous chemicals; eutrophication. Corequisite: CHEM 120aL or CHEM 124aL; recommended preparation: CE 106 or CE 110.

CE 225 Mechanics of Deformable Bodies (3, Sp) Analysis of stress and strain; axial, flexural, and torsional behavior of slender bars; elastic deflections; combined stresses; introduction to elastic stability and energy methods. Prerequisite: CE 205.

CE 235 Dynamics (3, Sp) Elements of vector algebra; dynamics of particles, systems of particles and rigid bodies; kinematics; momentum relations, energy methods; vibrations; Euler’s equations of motion. (Duplicates credit in CE 325.) Prerequisite: CE 205.

CE 250 Fluid Mechanics (3, Fa) Fluid statics; relative velocity field; total acceleration; divergence theorem; conservation of mass, energy, and momentum applied to engineering problems in laminar and turbulent flow. Prerequisite: MATH 226; corequisite: CE 235.

CE 334L Mechanical Behavior of Materials (3, Fa) Measurement of stress and strain; tensile, impact, creep, and fatigue behavior; statistical methods, brittle fracture; properties of structural materials. Prerequisite: CE 225 or AME 204, CHEM 120aL or CHEM 124aL and PHYS 151L.

CE 358 Theory of Structures I (3, Fa) Deformations and deflections of elastic systems; statically indeterminate beams, arches, and frames; statically applied forces. Prerequisite: CE 225.

CE 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

CE 402 Computer Methods in Engineering (3, Sp) Fundamentals of analog and digital computers; simulation of nonlinear physical systems; numerical analysis and solution of engineering problems. Prerequisite: CE 108 and MATH 245.

CE 404 Business and Intellectual Property Law for Engineers (3, Fa) An examination of legal issues confronting the professional engineer. Topics include the legal system, contracts, risk management, forms of doing business, capital formation and intellectual property rights, upper division standing.

CE 408 Risk Analysis in Civil Engineering (3, Fa) Realization of nondeterministic problems in civil engineering; quantitative analysis of structural and system reliability; optimal design and design with specified risk. Prerequisite: CE 225, MATH 226.

CE 409B1 Computer-Aided Design (3-3) Applications of interactive computer graphics to design problems; automated drafting; 3-D graphic algorithms. Analysis of design process from information processing viewpoint. Prerequisite: CE 225.

CE 412 Construction Law and the Property Development Process (3, Sp) Legal aspects of property development and construction: land use, construction practices and specifications, architecture and engineering contracts, agency, subcontracting, professional registration, liability, insurance, liens, and bonds. Recommended preparation: CE 404 or a general business law course.

CE 428 Mechanics of Materials (3) Analysis of stress and deformation; equations of elasticity; bending of beams; elastic instability; torsion problems; introduction to plates and shells; elastic wave propagation; numerical methods. Prerequisite: CE 225.

CE 433 Environmental Chemistry (3, Fa) Chemistry of water, gas, liquid and solid wastes. Chemical principles applicable to environmental engineering. Prerequisite: CHEM 105L or CHEM 115L.

CE 435 Water Resources Engineering (3, Sp) Discussion of broad perspectives on control and utilization of water, quantitative hydrology, ground water, probability concept, economic study, hydraulic structures, multi-purpose water resources projects. Prerequisite: CE 309 or ENE 410.

CE 453 Water Quality Control (3, Fa) Water quality criteria and fundamental of acceptability. Natural purification of surface waters. Processes employed in the
treatment of waste waters for disposal or re-use. Prerequisite: CHEM 105aL or CHEM 115aL; corequisite: CE 309 or ENE 410.

CE 456 Design of Steel Structures (3, Fa) Fundamentals of analysis and design of steel structures; structural elements; simple and eccentric connections; design project. Prerequisite: CE 207L, CE 225; corequisite: CE 358.

CE 457 Reinforced Concrete Design (3, Sp) Strength and deformation of reinforced concrete; beams in flexure and shear; bond and development of bars; deflections; columns; slabs; footings; introduction to prestressed concrete. Prerequisite: CE 207L, CE 225; corequisite: CE 358.

CE 458 Theory of Structures II (3, Sp) Matrix algebra; stiffness method; force method; computer analysis of planar structures. Prerequisite: CE 108 and CE 358 or AME 150L and AME 353.

CE 459 Introduction to Structural Dynamics (3, Fa) Response of single and multiple degree of freedom systems to dynamic excitation; structural modeling and approximate solutions; introduction to earthquake resistant design. Corequisite: CE 459.

CE 460 Construction Engineering (3, FaSp) Introduction to the construction processes; estimating and bidding, construction administration, planning and scheduling, equipment and methods, labor relations, cost control systems, and safety.

CE 462 Construction Methods and Equipment (3, Sp) Current procedures in selected fields of construction; organization and planning; equipment economics; machinery.

CE 463L Water Chemistry and Analysis (3, Sp) Chemistry of water purification technology and water pollution control. Chemical processes in natural and engineering aquatic environments; physical/chemical and biological characterization of water and wastewater. Prerequisite: CE 453, CHEM 105a or CHEM 115aL.

CE 464 Geotechnical Engineering (3) Fundamentals of soil mechanics and foundation engineering; soil classification, seepage, stress-strain behavior, shear strength, consolidation, design of retaining structures and foundations, and slope stability.

CE 465 Water Supply and Sewerage System Design (3) Design of water supply systems, storm drains, sanitary sewers, and lift stations. Prerequisite: CE 453.

CE 466 Design of Free-Surface Hydraulic Systems (3, Sp) Hydrological and hydraulic design for uniform and non-uniform flows, channel transition, sedimentation controls, design discharge for tributary watersheds, flood routing, flood detention, computer aided design. Prerequisite: CE 309.

CE 467 Geotechnical Engineering (4, Sp) Fundamentals of geotechnical engineering; soil classification, seepage, stress-strain behavior, shear strength, consolidation, design of retaining structures and foundations, and slope stability. Soil testing. (Duplicates credit in CE 464.) Prerequisite: CE 235.

CE 469 Sustainable Design and Construction (3, FaSp) Leadership in Energy and Environmental Design (LEED); Green Building strategies; Carbon Footprinting; calculating the embodied energy of building materials; cyclical processes in design and construction.

CE 470 Building Information Modeling and Integrated Practice (3, Fa) Building information modeling, current BIM technologies; coordination of design and construction; information management throughout building lifecycle; project delivery systems and technologies for integrated practice.

CE 471 Principles of Transportation Engineering (3, Fa) Planning, design, construction, maintenance, and operation of facilities for air, water, rail, and highway transit systems. Junior or senior standing.

CE 472 Engineering Law, Finance and Ethics (3, Fa) An examination of the legal, financial and ethical issues regularly considered by all practicing engineers. Upper division standing.

CE 475 Design of Pressurized Hydraulic Systems (3, Sp) Application of hydraulic principles to the engineering design of hydraulic structure with pressurized flow, piping network, water hammer, surge suppression, pumps and turbines, manifold hydraulic design. Prerequisite: CE 309.

CE 478 Timber and Masonry Design (3, Fa) Characteristics and properties of wood; beams, columns, trusses, connectors, and diaphragms. Properties of masonry, working stress and strength design, seismic design requirements. Prerequisite: CE 207, CE 225.

CE 480 Structural Systems Design (3, Sp) Evaluate, design and analyze buildings. Organize and perform calculations for vertical loads, wind loads, and seismic loads on building projects. Prerequisite: CE 456 or CE 457 or CE 478; CE 258, CE 479L, CE 473, CE 482.

CE 482 Foundation Design (3, Fa) Analysis and design principles of building foundations; including spread footings, piles, drilled shafts, sheet pile walls and retaining structures. Prerequisite: CE 467.

CE 484 Water Treatment Design (3, Fa) Predesign studies, precipitation softening, coagulation and flocculation, sedimentation, filtration, sludge handling, chlorination, chlorination, ozonation, plant hydraulic flow measurement, pumps, instrumentation and control, tertiary treatment. Prerequisite: CE 451.

CE 485 Wastewater Treatment Design (3, Sp) Process kinetics, mass balance, reactor design, pretreatment, clarification, chemical treatment, biological treatment (aerobic and anaerobic), disinfection, sludge treatment, nitrogen and phosphorus removal, carbon adsorption. Prerequisite: CE 451, CE 453L, CE 473.

CE 490X Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

CE 495 Seminars in Civil Engineering (1, FaSp) Information necessary for successful transition to engineering practice with emphasis on substantive engineering topics, employee rights and responsibilities, communication skills, ethic and lifelong learning. Graded CR/NC. Open only to upper division engineering majors.

CE 499 Special Topics (2-4, max 8) Course content to be selected each semester from recent developments in civil engineering and related fields.

CE 501 Functions of the Constructor (3, Fa) Systems, processes, and constraints governing the initiation, direction, engineering, and delivery of major construction projects. Professional construction management, responsibilities, and practice.

CE 502 Construction Accounting and Finance (3, Fa) Cost control, finance, and engineering economy for construction operations.

CE 503 Microbiology for Environmental Engineers (3) Basic microbiology of water, air, and soil. Application of microbiology to the practice of environmental pollution control.

CE 504 Solid Waste Management (3) Characterization, production, storage, collection, and transportation of solid wastes; alternative disposal methods; design principles and environmental impact; management of radiological solid wastes.

CE 507 Mechanics of Solids (3, Fa) Analysis of stress and strain; constitutive equations for elastic materials; plane stress and strain; torsion; introduction to plates and shells; energy methods.

CE 508 Mechanics of Solids II (3) Thermal stresses; introduction to elastic stability; yield criteria; constitutive equations for elastoplastic materials; elastoplastic stress analysis; viscoelasticity and creep. Prerequisite: CE 507 or CE 418.

CE 509 Mechanics of Solids III (3) Advanced topics in mechanics of solids; complex variable methods for plane problems; three-dimensional problems; introduction to fracture mechanics. Prerequisite: CE 507.

CE 510 Groundwater Management (3) Groundwater hydrology, aquifer testing technology, groundwater quality and contamination, geophysical method, well design and development, basin water balance, computer modeling, legal aspects, groundwater management system.

CE 511 Flood Control Hydrology (3) Flood frequency, storm characteristics, net rain; surface drainage, peak discharge, flood runoff.

CE 514 Advanced Sanitary Engineering Design (3-3) Design of water and waste treatment works. Prerequisite: CE 453.

CE 515 Sustainable Infrastructure Systems (3) Explores broad issues and mitigation measures involved in the analysis and design of complex, uncertain, interacting infrastructure systems needing to be resilient and sustainable.

CE 516 Geohydrology (3) Principles of groundwater motion; aquifer characteristics, prospecting, practical engineering problems, well design, maintenance and rehabilitation; hydrodynamic dispersion, field testing essentials and procedures, groundwater quality, artificial recharge.

CE 517 Industrial and Hazardous Waste Treatment and Disposal (3, 2 years, 5m) Physical, chemical, and biological treatment processes for industrial and hazardous wastes; pretreatment systems, biodegradation of toxic chemicals; groundwater and soil decontamination; bioterrorists for air decontamination. Prerequisite: CE 463L.

CE 518 Carbon Capture and Sequestration (3) The needs for carbon capture and sequestration (CCS) and systematic introduction to CCS technologies. Main topics include: introduction to global change, world energy consumption, greenhouse gases control, carbon capture and separation, and carbon sequestration.

CE 520 Ocean and Coastal Engineering (3-3) Linear and nonlinear wave theories with engineering applications; wave spectra; wave interactions with marine structures; ship mooring, harbor resonance; sediment transport; diffusion processes. Prerequisite: a: CE 309 or EN 410.
CE 522 Groundwater Hydrologic Modeling (3)
Simulation of groundwater hydrologic processes through mathematical, analog, and physical models.

CE 523 Process Kinetics and Dynamics in Environmental Engineering (3)
Concepts and application of processes that determine water quality in natural and engineered systems. Major processes include: flocculation, sedimentation, filtration, oxidation, adsorption and membrane processes. Prerequisite: CE 453 or CE 463L.

CE 525 Engineering Mathematical Analysis (3, 5p)
Engineering problems discussed on a physical basis with solutions via mathematical tools: Vector analysis; functions of complex variables, infinite series, residues and conformal mappings. (Duplicates credit in the former CE 552a.)

CE 526 Engineering Mathematical Methods (3)
Engineering problems discussed on a physical basis with solutions via mathematical tools: Fourier series; Fourier and Laplace transforms; partial differential equations, wave and Laplace equations. (Duplicates credit in the former CE 552b.) Recommended preparation: undergraduate multivariable calculus and ordinary differential equations.

CE 528 Seismic Analysis and Design of Reinforced Concrete Bridges (3, 5p)
Fundamental concepts, methods and current codes used in the analysis and design of reinforced concrete bridge structures. Experimental and earthquake observations of bridge performance. Prerequisite: CE 457; recommended preparation: CE 528.

CE 529a Finite Element Analysis (a: 3, Fa; b: 3, Sp)
Basic concepts; stiffness method; variational methods; displacement method; isoparametric formulation; plane stress and strain; plates and shells; dynamics; stability; nonlinear analysis, heat transfer; computer applications.

CE 530 Nonlinear Mechanics (3)
Nonlinear problems in structural dynamics; elastic-plastic response; approximate methods of nonlinear analysis; stability theory; periodicity of nonlinear oscillations; Liapunov's method; nonlinear buckling problems.

CE 531 Soil Mechanics (3)
Soil formation; clay mineralogy; steady state seepage; mechanical coupling between interstitial water and soil skeleton; experimental soil behavior and its modeling with constitutive equations. Prerequisite: CE 464.

CE 533 Principles of Foundation Engineering (3)
Fundamental methods in foundation engineering; plastic collapse, limit equilibrium, bearing capacity, slope stability; soil-structure interaction; application of numerical methods, finite differences and finite elements. Prerequisite: CE 464.

CE 534 Geotechnical Earthquake Engineering (3)
Provides a design-oriented understanding of the “state-of-the-practice” of soil mechanics and foundation engineering aspects of earthquake engineering.

CE 534 Design of Earth Structures (3)
Designed to provide a thorough understanding of the analytical and design principles underlying the construction of a broad range of earth structures.

CE 535 Earthquake Engineering: Strong Motion Studies (3, Fa)
Earthquake source mechanisms; wave propagation, scattering, diffusion and amplification; empirical scaling of strong ground motion; seismic hazard analysis for earthquake resistant design codes and mapping. (Duplicates credit in former CE 535b.)

CE 535 Structural Design for Dynamic Loads (3)
Earthquake resistant design criteria with application to steel reinforced concrete and timber structures. Design of blast resistant structures and structures subject to impact loads. Prerequisite: CE 459 or CE 541a.

CE 537 Advanced Reinforced Concrete (3, Fa)
Behavior of reinforced concrete members in terms of strength and deformation; relationship between behavior and building code requirements.

CE 538 Prestressed Concrete (3, Sp)
Fundamental principles of prestressing by pre- and post-tensioning; elastic and time dependent losses; stress analysis and design of prestressed and precast concrete structures.

CE 539 Advanced Steel Structures (3, Sp)
Design of tubular members and plate girders; design for torsional and seismic loads; general flexural theory; introduction to plastic design; connections.

CE 540 Limit Analysis of Structures (3)
Plastic analysis and design of frames. Fundamental theorems of plastic analysis; general methods of plastic analysis, design requirements, minimum weight design theories and applications, shakedown theories.

CE 541b Dynamics of Structures (a: 3, Fa; b: 3, Sp)
a: Forced vibrational systems; modal analysis; energy methods; analytical dynamics; vibration of continuous systems; wave propagation; computational techniques; application of commercial software tools. b: Continuous system responses; approximate methods; introduction to structural control; random vibration concepts; response of continuous systems to random excitation; nonlinear systems (geometric theory), (approximate methods). Prerequisite: CE 541a.

CE 542 Theory of Plates (3)
Theory of plate bending: rectangular and circular plates; anisotropic plates; energy methods; numerical methods; large deformations; sandwich plates. Prerequisite: CE 418 or CE 597.

CE 543 Stability of Structures (3)
Critical loads of columns, beams, thin-wall bars, plates, shells; stability of frames and trusses; effect of inelastic behavior of materials; effect of dynamic loading.

CE 544 Theory of Shell Structures (3)
General bending theory of shells; membrane theory; shells of revolution; numerical methods; dynamic response. Prerequisite: CE 428 or CE 507.

CE 545b Advanced Finite Element Method in Structural and Continuum Mechanics (3-3)
a: Finite elements in nonlinear mechanics, elasticity, plasticity, viscoelasticity; advanced finite element applications in fracture mechanics, heat transfer, fluid mechanics; computational implementation of finite element method. Prerequisite: CE 529a; b: Mathematical aspects of the finite element method; correctness of discretizations for elliptic, parabolic, and hyperbolic equations; accuracy and convergence considerations; stability of time dependent algorithms. Prerequisite: CE 545a.

CE 546 Structural Mechanics of Composite Materials (3)
Applications and manufacturing of composites: anisotropic materials; laminated composite plates and shells; buckling and dynamics; strength and failure; interlaminar stresses; delamination; thermal properties; design considerations.

CE 547 Earthquake Engineering: Response of Structures (3, Sp)
Solutions of seismic structural response: vibrational vs. wave methods, spectral superposition, probabilistic response estimation, nonlinear response; soil-structure interaction; identification and structural health monitoring; experimental methods. (Duplicates credit in former CE 553b.)

CE 549 Building Design Project (3, Sp)
Integrated design project following design office procedures. A building will be designed in detail using the team approach. Capstone for M.Eng. in Structural Design. Prerequisite: CE 459 or CE 541a, CE 458 or CE 529a, CE 537; corequisite: CE 539.

CE 550 Computer-Aided Engineering (3)
Basic concepts of computer-aided engineering. Modeling; simulation; visualization; optimization; artificial intelligence; manufacturing; information management. Organization and management of computer-aided engineering projects.

CE 551 Computer-Aided Engineering Project (3)
Computer-aided engineering in a project environment. Responding to RFPs; conceptual design; preliminary analysis; overall and detailed analysis and design; trade-off studies; project management; project presentation.

CE 552 Managing and Financing Public Engineering Works (3, FaSp)
Tools for improving the efficiency and effectiveness of public engineering works, taking into account the political and policy context. Graduate standing. Recommended preparation: microeconomic theory.

CE 553 Chemical and Biological Processes in Environmental Engineering (3)
Chemistry of softening, coagulation, disinfection, oxidation, corrosion control, dry and wet combustion and ion exchange; aerobic and anaerobic processes and the ecology of liquid and solid waste treatment. Prerequisite: CE 453.

CE 554 Risk and Reliability Analysis for Civil Infrastructure Systems (3, 5p)
Elements of feasibility, reliability, and risk analysis of civil infrastructure systems, simulation, optimization, life-cycle cost, evaluation and decision making.

CE 555 Underwater Structures (3)
Loads on underwater structures; stress analysis of typical structural elements; buckling problems; dynamic response. Prerequisite: CE 507.

CE 556 Project Controls – Budgeting and Estimating (3, FaSp)
Fundamental principles and practices of cost estimating, budgeting, and cost control of construction projects. Case studies and software exercises based on project data. (Duplicates credit in the former CE 556.) Open only to graduate students in engineering, architecture, business, or urban and regional planning.

CE 557 Advanced Building Estimating (3, Sp)
Processes in compiling a bid for construction of non-residential building.

CE 558 International Construction and Engineering (3, 5p)
Business development and project management in international markets. Topics include marketing, planning, contracts and negotiations, procurement, logistics, personnel and financing. Construction operations in adverse environments. Graduate standing in engineering, architecture, business, or urban planning required.

CE 559 Strategic Planning in Construction Engineering (3, 5p)

CE 560 Simulation of Civil Infrastructure Systems Performance (3)
Time-space and frequency/variable number domain analysis, spectral representation of wind, earthquake and other natural loads, FEM techniques for system response simulation.

CE 561 Uncertainty Quantification (3)
Methods of quantifying uncertainty in civil engineering and related fields. Basic uncertainty modeling; advanced topics such
as reliability analysis, Bayesian updating, random processes, random fields.

CE 563 Chemistry and Biology of Natural Waters (3)
Chemical and biological limnology; cycles of carbon, nitrogen, phosphorous, sulfur, and other biologically-mediated chemical transformations; effect of pollution on biology and chemistry of natural waters. Prerequisite: CE 443 and CE 453.

CE 565 Wave Propagation in Solids (3)
Elastic waves in infinite and semi-infinite regions; plates and bars; steady-state and transient scattering; dynamic stress concentration; viscoelastic and plastic bodies.

CE 566 Project Controls – Planning and Scheduling (3, FaSp)
Fundamental principles and practices of planning, CPM scheduling, and resource management. Development of project schedules using CPM theory applied to current and emerging software applications. (Duplicates credit in the former CE 556b.) Open only to graduate students in engineering, architecture, business, or urban and regional planning. Recommended preparation: CE 556.

CE 567 Smart Infrastructures (3)
Examination of smart infrastructures relating to energy, water, waste and transportation drawing from the fields of engineering, sustainability, communications, sociology, and psychology.

CE 570 Building Information Modeling for Collaborative Construction (3, 5p)
Multidisciplinary and geographically distributed virtual project teams used to simulate engineering and construction problems for projects selected in collaboration with industry partners. Open only to Master’s and Doctoral students. Prerequisite: CE 470; recommended preparation: CE 556, CE 566.

CE 571 Nuclear Safety and Security: Human Performance and Safety Culture (3)
Provides an overview of human-systems integration considerations, human performance and safety culture in the nuclear power operations.

CE 572 Construction Labor Management (3)
Unionism in construction. Craft tradition, objectives, regulation, motivation, labor force economics, productivity, and technical change. Hiring systems, supervision of project labor operations, jurisdictional administration.

CE 577 Introduction to Transportation Planning Law (3)
Federal and state statutory and regulatory requirements affecting California transportation systems, including transportation planning and funding law; and government contracting, environmental, and civil rights requirements.

CE 580 Law and Finance for Engineering Innovation (3)
(Enroll in ISE 580)

CE 581 Negotiation For Engineering Management (3, 5p)
(Enroll in ISE 581)

CE 583 Design of Transportation Facilities (3)
Planning, design, staging, construction, test, and maintenance of the public works and facilities for land, water, and air transportation. Recommended preparation: CE 471 and CE 457; probability and statistics on the level of CE 408.

CE 584 Intelligent Transportation Systems (3)
Fundamentals of intelligent transportation systems, automated vehicles, communication systems, connected vehicle technologies, mobile devices, policy and planning, international research, standards, architecture, and economics of ITS.

CE 585 Traffic Engineering and Control (3, 5p)
Conceptual engineering geometric design, installation, and calibration of vehicular storage and traffic controls; safe flow optimization of vehicles on various thoroughfares. Recommended preparation: CE 471.

CE 586x Management for Engineers (4)
(Enroll in AME 586x)

CE 587 Transportation Energy Analysis (3)
Energy consumption and socioeconomic impacts of past, present, and future transportation systems; analysis of alternatives between energy-intensive and low-cost transportation modes.

CE 588 Railroad Engineering (3)
Railroad infrastructure including passenger and freight operations, track alignment (horizontal and vertical) design, basic components and terminology used in rail design and an understanding of this mode of transportation. Recommended preparation: CE 471.

CE 589 Port Engineering: Planning and Operations (3, Fa)
Physical and operational characteristics of marine ports; impact analysis of modern logistics on port operation, planning and management; optimization and efficiency solutions for container terminals.

CE 590 Directed Research (1-12)
Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

CE 594abz Master’s Thesis (2-2-0)
Credit on acceptance of thesis. Graded IP/CR/NC.

CE 595 Special Topics (2-4, max 9)
Course content will be selected each semester to reflect current trends and developments in the field of civil engineering.

CE 611 Stochastic Modeling and Simulation (3)
Stochastic methods for modeling and simulating physical, chemical and biological processes. Topics include: Stochastic partial differential equations, Monte Carlo simulations, moment equation methods, stochastic expansions. Open only to graduate students.

CE 633 Urban Transportation Planning and Management (4, 2 years, Fa)
(Enroll in PDD 633)

CE 634 Institutional and Policy Issues in Transportation (4, 5p)
(Enroll in PDD 634)

CE 638 Stochastic Optimization (3, FaSp)
(Enroll in ISE 638)

CE 640 Advanced Theory of Elasticity (3)
Curvilinear tensors; equations of nonlinear elasticity; elementary solutions; small deformations superimposed on large deformations; bifurcation of equilibrium states; nonlinear shell theory. Prerequisite: CE 507.

CE 645 Uncertainty Modeling and Stochastic Optimization (3)
Introduction to the mathematical foundations, numerical algorithms, and computational tools necessary for solving problems of optimization under uncertainty. Open only to graduate students.

CE 647 Multiscale Methods in Mechanics (3)
Behavior of man-made and natural materials at different scales; experimental methods to characterize behavior; governing equations, interscale coupling, information exchange; probabilistic representations; error analysis. Open only to master’s, doctoral, and professional students. Prerequisite: AME 525 or AME 526 or CE 525 or CE 526.

CE 650 Directed Research (1-4, max 8)
Laboratory study of specific problems by candidates for the degree Engineer in Civil Engineering. Graded CR/NC.

CE 652 Transportation and the Environment (4)
(Enroll in PDD 652)

CE 694abz Thesis (2-2-0)
Required for the degree Engineer in Civil Engineering. Credit on acceptance of thesis. Graded IP/CR/NC.

CE 790 Research (1-12)
Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

CE 794abcdz Doctoral Dissertation (2-2-2-0-0)
Credit on acceptance of dissertation. Graded IP/CR/NC.

Environmental Engineering
— Sonny Astani Department of Civil and Environmental Engineering

Chair: Lucio Soibelman, Ph.D.
Associate Chair: Erik Johnson, Ph.D.
Director, Environmental Engineering: Amy Childress, Ph.D.
Associate Director, Environmental Engineering: Massoud Pirbazari, Ph.D.

Faculty
John and Dorothy Shea Early Career Chair in Civil Engineering: Patrick Lynett, Ph.D.
Fred Champion Professor of Civil and Environmental Engineering: Constantinos Sioutas, Sc.D.
Gordon S. Marshall Professor of Engineering Technology: Roger Ghanem, Ph.D. (Aerospace and Mechanical Engineering)

Professors: James C. Anderson, Ph.D.; Amy Childress, Ph.D.; Roger Ghanem, Ph.D. (Aerospace and Mechanical Engineering); Ronald C. Henry, Ph.D.; Jiin-Jen Lee, Ph.D., P.E.; Vincent W. Lee, Ph.D.; Sami F. Masri, Ph.D. (Aerospace and Mechanical Engineering); Najmedin Meshkati, Ph.D., CPE (Industrial and Systems Engineering); Massoud Pirbazari, Ph.D.; Constantinos Sioutas, Sc.D.; Lucio Soibelman, Ph.D.; Costas Synolakis, Ph.D. (Aerospace Engineering); Mihailo Trifunac, Ph.D.; L. Carter Wellford, Ph.D.; Hung Leung Wong, Ph.D.*

Associate Professors: Erik A. Johnson, Ph.D.; Patrick Lynett, Ph.D.
Assistant Professors: George Ban, Ph.D.; Burcin Becerik-Gerber, D. Des.; Felipe de Barros, Ph.D.; Kelly Sanders, Ph.D.; Ketan Savla, Ph.D.

Professors of Engineering Practice: Gregg E. Brandow Jr., Ph.D., P.E.; Geraldine Knatz, Ph.D. (Public Policy);
Henry M. Koffman, P.E.
Associate Professor of Engineering Practice: Amy Rechenmacher, Ph.D.
Undergraduate Program Educational Objectives

Fulfilling the vision of the Sonny Astani Department of Civil and Environmental Engineering, the Viterbi School of Engineering and the University of Southern California, our graduates will:

- Be successful in their professional careers, become leaders in industry, academia, government or service, while adapting their technical, collaborative and managerial skills for the benefit of Society's built and natural environments.

- Support the advancement of the practice of science and engineering, while maintaining professional standards and moral and legal obligations to society, while being active in professional organizations and obtaining professional licensure when appropriate.

- Be prepared to pursue graduate studies in engineering or other disciplines, while continuously broadening their abilities and enhancing their technical skills to maintain their relevance with technological change.

- Be successful in their professional careers, become leaders in industry, academia, government or service, while adapting their technical, collaborative and managerial skills for the benefit of Society’s built and natural environments.

Support the advancement of the practice of science and engineering, while maintaining professional standards and moral and legal obligations to society, while being active in professional organizations and obtaining professional licensure when appropriate.

- Be prepared to pursue graduate studies in engineering or other disciplines, while continuously broadening their abilities and enhancing their technical skills to maintain their relevance with technological change.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Civil Engineering prepares graduates to apply knowledge of mathematics through differential equations, calculus-based physics, chemical engineering, chemistry, science, e.g., geology, meteorology, soil science, relevant to the program of study; a biological science, e.g., microbiology, aquatic biology, toxicology, relevant to the program of study; fluid mechanics relevant to the program of study; and an introductory level of knowledge of environmental issues associated with air, land, and water systems and associated environmental health impacts. The program prepares graduates to be proficient at conducting laboratory experiments and critically analyzing and interpreting data in more than one major environmental engineering focus area, e.g., air, water, land, environmental health; performing engineering design by means of design experiences integrated throughout the professional component of the curriculum; and to be proficient in advanced principles and practices relevant to the program objectives; including understanding of concepts of professional practice and the roles and responsibilities of public institutions and private organizations pertaining to environmental engineering.

Bachelor of Science in Environmental Engineering

See Civil Engineering.

Minor in Environmental Engineering

A minor in environmental engineering provides students with a basic knowledge of our environment, potential causes for its deterioration, methods to prevent or mitigate environmental hazards, and the means to improve its quality at reasonable costs. Students will learn how to control water pollution, maintain air quality, treat and properly dispose of wastes, and remediate sites contaminated due to improper disposal of hazardous waste. This minor also enhances students' employment opportunities in the field of environmental engineering. The program provides the necessary infrastructure for the pursuit of graduate studies in environmental engineering.

The minor in environmental engineering is offered to undergraduates in various fields of engineering and natural sciences.

Prerequisite Courses

CHEM 105bL or CHEM 115bL; MATH 125, MATH 126 and MATH 226, and PHYS 15L.

Bachelor of Science in Civil Engineering

Emphasis in Environmental Engineering

See Civil Engineering.

Master of Science in Environmental Engineering

See Civil Engineering.

Engineer in Environmental Engineering

Requirements for the Engineer in Environmental Engineering are the same as set forth in the general requirements. See General Requirements for the Engineer Degree.

Ph.D. in Engineering (Environmental Engineering)

See listing under Civil Engineering.

Sustainable Cities Graduate Certificate

See the listing in the USC Price School of Public Policy section.

Courses of Instruction

ENVIRONMENTAL ENGINEERING (ENE)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

ENE 201 Introduction to Applied Environmental Science and Engineering (4) Gateway to B.S. in Civil Engineering (Environmental Engineering), B.S., Environmental Engineering, and Minor in Environmental Engineering. Fundamental concepts of environmental science and engineering. Pollution control and remediation for air, water and soil. Pollution remediation for developing countries.

ENE 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

ENE 400 Environmental Engineering Principles (3, 5p) Analysis of water, air, and land pollution, including hazardous waste and engineering of mitigation measures. Water and waste water treatment analysis. Prerequisite: CHEM 105L or CHEM 115L; MATH 226; PHYS 15L.

ENE 410 Environmental Fluid Mechanics (3) Equation of motion; continuity, momentum, energy principles; dimensional analysis, similitudes; groundwater flows; transports in conduits and channels; mixing, dispersion in environments; manifold diffusers; hydraulic transients. (Duplicates credit in CE 309 and AME 309.) Prerequisite: MATH 245.

ENE 428 Air Pollution Fundamentals (3, 5a) Air pollution effects on man, vegetation, materials; pollutant sampling and analysis; air quality standards and criteria; meteorological factors and dispersion modeling. Prerequisite: MATH 245, PHYS 15L, CHEM 105L or CHEM 115L; recommended preparation: ENE 400 or CHE 350.
**Undergraduate Program Criteria**

The program leading to a Bachelor of Science in Computer Engineering and Computer Science provides both breadth and depth across the range of engineering topics implied by the title. The curriculum includes probability and statistics, including appropriate applications; mathematics, including discrete mathematics through differential and integral calculus; sciences (defined as biological, chemical or physical science) to develop an understanding of the scientific method and provide students with an opportunity to experience this mode of inquiry in courses for science or engineering majors that provide some exposure to lab work; and engineering topics (including computing science) necessary to analyze and design complex electrical and electronic devices, software and systems containing hardware and software components.

The computer science portion of the curriculum covers the fundamentals of algorithms, data structures, software design, concepts of programming languages and computer organization and software; provides an exposure to a variety of programming languages and systems, including at least one higher-level language; and includes advanced course work that builds on the fundamental course work to provide depth.

**Bachelor of Science in Computer Engineering and Computer Science**

Students attaining the bachelor of science degree in computer engineering and computer science would possess the scientific and engineering skills and knowledge that would enable them to design and efficiently integrate developing hardware and software systems. This degree is administered jointly by the departments of Computer Science and Electrical Engineering.

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken.

---

**Computer Engineering**

**Undergraduate Degree**

Undergraduate Program Educational Objectives

Graduates of the Computer Engineering and Computer Science program are expected to attain the following educational objectives within a few years of graduation:

- Graduates will apply analytical and critical thinking principles of both computer engineering and computer science to their chosen professions.
- Graduates will successfully engage in life-long learning to continue to be contributing members of their communities in fields within and outside the traditional scope of computer engineering.
- Graduates will exhibit high professional and ethical standards to become productive leaders in society.

---

**Course Descriptions**

- **EN 429** Air Pollution Control (3, Sp) Emmission surveys; engineering controls of aerosol and gaseous contaminants at emission sources, disposition of contaminants. Field trips. Senior standing. Prerequisite: EN 418; CE 309 or EN 410.

- **EN 443** Environmental Chemistry (3) (Enroll in CE 443)

- **EN 453** Water Quality Control (3) (Enroll in CE 453)

- **EN 461L** Water Chemistry and Analysis (3) (Enroll in CE 461L)

- **EN 465** Water Supply and Sewerage System Design (3) (Enroll in CE 465)

- **EN 486** Design of Solid and Hazardous Waste Engineering Systems (3, Fa) Engineering design of solid and hazardous waste facilities such as waste minimization, secured landfill, and hazardous waste treatment. Prerequisite: EN 400.

- **EN 487** Environmental Biotechnology and Bioremediation (3) Understanding and designing microbial processes for environmental protection; learning how processes in environmental biotechnology work; emerging applications for bioremediation of hazardous chemicals in the environment. Prerequisite: CE 300L, BISC 320L.

- **EN 495** Seminars in Environmental Engineering (1, FaSp) Waste management, biodegradation of environmental pollutants, groundwater problems, waste minimization, energy resources, and air pollution control.

- **EN 499** Special Topics (2-4, max 8, FaSp) Course content to be selected each semester from recent developments in environmental engineering and related fields.

- **EN 502** Environmental and Regulatory Compliance (3) Federal and state environmental laws; environmental impact assessment techniques; permitting for industrial facility construction and operation. Prerequisite: graduate standing.

- **EN 503** Microbiology for Environmental Engineers (3) (Enroll in CE 503)

- **EN 504** Solid Waste Management (3) (Enroll in CE 504)

- **EN 505** Energy and the Environment (3, Fa) Environmental effects of energy development using fossil and fissile fuels, geothermics, photosynthesis, and other sources. Relationship of elemental cycles to the life supporting systems.

- **EN 506** Ecology for Environmental Engineers (3, Fa) The role of environmental engineering in maintaining stability of freshwater, marine, and terrestrial ecosystems; macroscopic plant and animal forms as indicators of water quality.

- **EN 510** Water Quality Management and Practice (3, Fa) Surface and ground water quality and resource management; water pollution in aquatic environment; water/wastewater infrastructure systems and management.

- **EN 514ab Advanced Sanitary Engineering Design (3-3) (Enroll in CE 514ab)

- **EN 516** Hazardous Waste Management (3) Standards and regulations for the management of hazardous waste: identification, transportation, monitoring, storage, treatment, and disposal practices.

- **EN 517** Industrial and Hazardous Waste Treatment and Disposal (3) (Enroll in CE 517)

- **EN 518** Environmental Systems Engineering and Management (3) Evaluating, implementing and managing effective environmental systems to prevent pollution; conserve energy and resources, reduce risks and achieve sustainability in business and industries.

- **EN 523** Process Kinetics and Dynamics in Environmental Engineering (3) (Enroll in CE 523)

- **EN 526** Particulate Air Pollutants: Properties/Behavior/Measurement (3) Gaseous and particulate air pollutants, their measurement and instrumentation methods, and their effects on the environment and human health; studies on toxicity and risk assessment of selected pollutants.

- **EN 533** Air Pollution Management: Exposure, Health Effects and Risk (3, Sp) Pollutant sampling; occupational, community, and personal exposures; receptor modeling; data analysis; health effects of air pollutants.

- **EN 553** Chemical and Biological Processes in Environmental Engineering (3) (Enroll in CE 553)

- **EN 560** Environmental Aspects of Oil and Gas Production (3) Environmental aspects of drilling for and producing oil and gas, and the necessary safety practices. Attention is given to the urban areas.

- **EN 565** Chemistry and Biology of Natural Waters (3) (Enroll in CE 565)

- **EN 580** Applied Environmental Engineering Biotechnology (3) Fundamentals of bioremediation processes; bioremediation technologies for decontamination of air, water, and soil; global applications of bioremediation techniques.

- **EN 590** Directed Research (1-12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

- **EN 594abz** Master’s Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

- **EN 596** Chemical Reactions in the Atmosphere (3, Fa) Chemical reactions and scavenging processes important in urban air pollution. Effects of solar irradiation on vehicle exhaust gases, oxides of nitrogen and sulfur.

- **EN 599** Special Topics (2-4, max 9, FaSp) Course content will be selected each semester to reflect current trends and developments in the field of environmental engineering.

- **EN 790** Research (1-2) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

- **EN 794abcdz** Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

In addition to giving each student a fundamental background in digital logic, computer architecture and operating systems, a wide variety of elective courses allows for study in the following specialized areas: artificial intelligence; computer architecture; computer networks; computer system performance; design automation; fault-tolerant computers; microprocessors; parallel processing; real-time systems; robotics; and VLSI design.

Master of Science in Computer Engineering

The Master of Science in Computer Engineering is earned by completing an integrated program of at least 27 units of approved course work in computer engineering and computer science. No more than three courses (maximum 12 units) may be counted at the 400 level – at least 18 adviser-approved units must be taken at the 500 or 600 level.

All applicants must have taken the entrance requirement courses (or equivalent in other institutions) in order to be admitted to the program. Entrance requirement course credit cannot be applied toward the degree. A fundamental course may be waived by taking a placement exam. In case a placement exam is not offered, a fundamental course may be waived by a designated faculty member. At least 18 units must be taken at the 500-level or above. At least 18 units must be taken in electrical engineering, 15 of which must be taken at USC. Units taken outside of electrical engineering or computer science must be approved in advance by a computer engineering adviser and must be substantive in content and related to the degree objective. Up to 3 units of Directed Research (EE 590) with a computer engineering faculty member may be applied toward the degree.

Course Requirements

- The following course work must be completed; these courses can be included in the 60-unit course work requirement:
  - Take two courses from theory area and four courses from the other three areas (hardware, software and systems), including at least one course from each area to total six courses.

Theory Area Courses

- CSCI 557 Analysis of Algorithms 3
- EE 445 Probabilistic Methods in Computer Systems Modeling, or EE 503 Probability for Electrical and Computer Engineers, or EE 549 Queuing Theory for Performance Modeling 3
- EE 562a Random Processes in Engineering 3
- EE 563a Information Theory 3
- MATH Fundamental Concepts of Modern Algebra, or MATH Fundamental Concepts of Analysis 4
- EE 445a Applied Combinatorics, or EE 442 Combinatorial Analysis and Algebra 4
- EE 503 Software Area Courses CSCI Compiler Design, or CSCI 557a Advanced Compiler Design 4
- CSCI 557 Software Engineering 4
- CSCI 585 Database Systems 3
- Systems Area Courses CSCI 551 Computer Communications 3
- CSCI 555 Advanced Operating Systems 3
- CSCI 588 Foundations of Artificial Intelligence 3
- EE 543a Digital Control Systems 3
- EE 564 Real Time Computer Systems 3
- EE 550 Design and Analysis of Computer Communication Networks, or EE 555 Broadband Network Architectures 3
- EE 569 Introduction to Digital Image Processing 3

Graduate Degrees

The graduate program in computer engineering, offered through the Department of Electrical Engineering, is designed to provide students with an intensive background in the analysis, structure, design and function of digital computers and information processing systems. In addition to giving each student a fundamental background in digital logic, computer architecture and operating systems, a wide variety of elective courses allows for study in the following specialized areas: artificial intelligence; computer architecture; computer networks; computer system performance; design automation; fault-tolerant computers; microprocessors; parallel processing; real-time systems; robotics; and VLSI design.

A minimum grade point average of 3.0 (A = 4.0) must be earned on all course work applied toward the master’s degree in computer engineering. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor’s degree. Transfer units which count as credit (CR) toward the master’s degree are not computed in the grade point average. All other Viterbi School of Engineering requirements for the Master of Science apply.

Doctor of Philosophy in Computer Engineering

The requirements for the Doctor of Philosophy (Ph.D.) in Computer Engineering are in strict conformity with the requirements of the Graduate School. Program requirements for the Ph.D. in Computer Engineering are the same as those for the Ph.D. in Electrical Engineering except that the major field is computer engineering. See general requirements for graduate degrees.

Screening and qualifying examinations are administered by the computer engineering faculty. Students should contact the Electrical Engineering Systems Department Office for further information.

A minimum grade point average of 3.0 (A = 4.0) must be earned on all course work applied toward the master’s degree in computer engineering. Faculty

Chair: Gaurav Sukhatme, Ph.D.

Chan Soon-Shiong Chair: Maja Mataric, Ph.D. (Neuroscience Center)

Dean’s Chair in Chemical Engineering and Materials Science: Priya Vashishtha, Ph.D. (Computer Science, Physics)

Fletcher Jones Chair in Computer Science: Michael A. Arbib, Ph.D.

Viterbi Early Career Chair: Jernej Barbic, Ph.D.

Gordon S. Marshall Chair in Engineering: Aristides A.G. Requicha, Ph.D.

Jack Munisihan Early Career Chair: Fei Sha, Ph.D.

Northrup Grumman Chair in Engineering: Ramesh Govindan, Ph.D.

David Packard Chair in Manufacturing Engineering: Stephen C-Y Lu, Ph.D. (Mechanical Engineering, Industrial and Systems Engineering)

Charles Lee Powell Chair in Engineering: Viktor Prasanna, Ph.D. (Electrical Engineering)

Charles Lee Powell Chair in Electrical Engineering and Computer Science: Melvin Breuer, Ph.D. (Electrical Engineering)

Henry Salvatori Chair in Computer Science: Leonard M. Adleman, Ph.D.

Dean’s Professor of Computer Science: Kevin Knight, Ph.D.

Dean’s Professor of Computer Science: Gaurav Sukhatme, Ph.D.

Helen N. & Emmett J. Jones Professorship in Engineering: Milind Tambe, Ph.D. (Industrial and Systems Engineering)

Seely G. Mudd Professor of Engineering: Shanghua Teng, Ph.D.

TRW Professor of Software Engineering: Barry Boehm, Ph.D.

WISE Jr. Gabilian Chair in Computer Science: Nora Ayanian, Ph.D.

Professors: Leonard Adleman, Ph.D. (Molecular Biology); Michael Arbib, Ph.D. (Biomedical Engineering, Electrical Engineering); Barry Boehm, Ph.D. (Industrial and Systems Engineering); Leana Golubchik, Ph.D. (Electrical Engineering); Ramesh Govindan, Ph.D.; Elias Horowitz, Ph.D. (Electrical Engineering); Ming-Deh Huang, Ph.D.; Laurent Itti, Ph.D. (Neuroscience Center); Svend Koenig, Ph.D.; Kevin Knight, Ph.D.; Maja Mataric, Ph.D. (Neuroscience Center); Dennis McLeod, Ph.D.; Gerard Medioni, Ph.D. (Electrical Engineering); Neno Medvidovic, Ph.D.; Alichiro Nakano, Ph.D. (Biomedical Engineering, Materials Science, Physics); Ulrich Neumann, Ph.D. (Electrical Engineering); Ramakant Nevatia, Ph.D. (Electrical Engineering); Aristides Requicha, Ph.D. (Electrical Engineering); Paul Rosenbloom, Ph.D.; Stefan Schaal, Ph.D. (Neuroscience Center); Cyrus Shabahi, Ph.D.; Gaurav Sukhatme, Ph.D. (Electrical Engineering); Milind Tambe, Ph.D. (Industrial and Systems Engineering); Shanghua Teng, Ph.D.

Associate Professors: Shahram Ghandeharizadeh, Ph.D.; David Kempe, Ph.D.; Fei Sha, Ph.D.

Assistant Professors: Nora Ayanian, Ph.D.; Jernej Barbic, Ph.D.; Shaddin Dughmi, Ph.D.; William GJ Halfond, Ph.D.; Hao Li, Ph.D.; Wyatt Lloyd, Ph.D.; Ethan Katz-Bassett, Ph.D.; Yan Liu, Ph.D.; Minlan Yu, Ph.D.

Joint Professors: Murali Annavarapu, Ph.D. (Electrical Engineering); Irving Biederman, Ph.D. (Psychology); Melvin Breuer, Ph.D. (Electrical Engineering); Todd Brun, Ph.D.; Tim Ting Chen, Ph.D. (Biological Sciences); Michael Crowley, Ph.D. (Information Technology Program); Kai Huang, Ph.D. (Electrical Engineering); Rajiv Kalia, Ph.D. (Physics); Carl Kesselman, Ph.D. (Industrial and Systems Engineering); Bhaskar Krishnamachari, Ph.D. (Electrical Engineering); C-C Jay Kuo, Ph.D. (Signal and Image Processing); Stephen Lu, Ph.D. (Industrial and Systems Engineering); Urbashi Mitra, Ph.D. (Electrical Engineering); Shrikanth (Shri) Narayanan, Ph.D. (Electrical Engineering); Hamid Nazerzadeh, Ph.D. (Data Sciences and Operations); Viktor Prasanna, Ph.D. (Electrical Engineering); Konstantinos Pouzos, Ph.D.; C.S. RagHAVendra, Ph.D. (Electrical Engineering); Benjamin Reichardt, Ph.D. (Electrical Engineering); Remo Rohs, Ph.D. (Computational Biology); Nicola Schweghofer, Ph.D. (Biokinesiology and Physical Therapy); Mark S. Seidenberg, Ph.D. (Psychology, Linguistics); Francisco Valero-Cuevas (Biomedical Engineering); Priya Vashishtha, Ph.D. (Chemical Engineering and Materials Science, Physics); Michael Waterman, Ph.D. (Mathematics, Biological Sciences); Richard Weinberg, Ph.D. (Cinematic Arts); John Wilson, Ph.D. (Geography); Xianghong Zhou, Ph.D. (Biological Sciences)

Adjunct Professors: Danny Cohen, Ph.D.; Mary Hall, Ph.D.; Rick Selby, Ph.D.

Adjunct Associate Professors: Steve Chien, Ph.D.; Larry Matthews, Ph.D.; Chris Mattmann, Ph.D.; Zhengyou Zhang, Ph.D.

Adjunct Assistant Professors: Aude Billard, Ph.D.; Auke Ijspeert, Ph.D.; Marco Papa, Ph.D.; Sethu Vijayakumar, Ph.D.; Roger Zimmermann, Ph.D.

Professor of Engineering Practice: Michael Zdya, Ph.D.

Associate Professor of Engineering Practice: Jeffrey Miller, Ph.D.; Michael Zdya, Ph.D.

Lecturers: Claire Bono; William Cheng, Ph.D.; Aaron Cote, Ph.D.; Scott Easley, B.A.; Massoud Ghaem-Magh, Ed.D.; Jeffrey Miller, Ph.D. (Associate Professor of Engineering Practice); Shawn Shamsian, Ph.D.; Sheila Tejada, Ph.D. (Senior Lecturer); Michael Zdya, Ph.D. (Professor of Engineering Practice)

Emeritus Professor: George Bekey, Ph.D. (Electrical Engineering, Biomedical Engineering)

Bachelor of Science

Undergraduate Program Educational Objectives

Graduates of the undergraduate program in Computer Science are expected to attain the following objectives within a few years of graduation:

(1) Graduates apply the computational and analytical approaches of computer science to their chosen professions.

(2) Graduates successfully engage in life-long learning to continue to be contributing members of their communities in fields within and outside the traditional scope of computer science.

(3) Graduates exhibit high professional and ethical standards to become productive leaders in society.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Computer Science includes at least one and one-third years of computer science that covers the fundamentals of algorithms, data structures, software design, concepts of programming languages and computer organization and software; provides an exposure to a variety of programming languages and systems, including at least one higher-level language; and includes advanced course work that builds on the fundamental course work to provide depth.

The program includes at least one year of science and mathematics, including at least one-half year of mathematics, including discrete mathematics. Additional mathematics might consist of calculus, linear algebra, numerical methods, probability, statistics, number theory, geometry, or symbolic logic. The science component develops an understanding of the scientific method and provides an opportunity to experience this mode of inquiry in courses for science or engineering majors that provide some exposure to laboratory work.

Bachelor of Science in Computer Science

The undergraduate program in computer science is an interdisciplinary program leading to the Bachelor of Science in Computer Science. The program is designed to provide both an academic and professional orientation.

General admission requirements for the undergraduate program are the same as those of the university and the USC Viterbi School of Engineering and include 3 to 5 units of mathematics and one unit of science (biology, chemistry or physics) together with satisfactory scores on the Scholastic Aptitude Test and Achievement Tests. The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied towards the major, regardless of the department in which the courses are taken. Candidates must complete general education requirements; see The USC Core and the General Education Program.

* WRIT 340 Advanced Writing (Communication for Engineers) is strongly recommended for CSCI majors

** Satisfies general education requirement.

*** Any course in physics, biology or chemistry beyond the basic science requirement or in another scientific discipline. See adviser for a list of approved electives.

++ The university allows engineering students to replace GE Category IV with a second course in Categories I, II or VI.

++ Applicable courses include: CSCI 300, CSCI 351, CSCI 352, CSCI 353, CSCI 420, CSCI 445L, CSCI 459, CSCI 464, CSCI 485, CSCI 490x, CSCI 499, EE 450, EE 454L, EE 459L, EE 477L, EE 490x, EE 499; MATH 458. Students may also choose one adviser-approved course from the 300- and 400-level ITP offerings. Other courses may be applicable; please see an adviser for approval.

Bachelor of Science in Computer Science (Games)

The goal of the B.S. in Computer Science (Games) program is to graduate students with a solid grounding in computer science and a cross-disciplinary background in game development. Topics covered in the cross-disciplinary game development portion of the degree program include game production, visual design for games and interactivs, computer animation, video game
programming, game hardware architectures, game engine programming, serious game development, introductory and intermediate game design, and two semester-long final game projects. Students graduating from this program will be capable of engineering next-generation games and simulations and their technologies in the entertainment and serious game fields. Additionally, graduates from this program will be able to further their education in graduate programs in game development and computer science.

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper-division courses applied toward the major, regardless of the department in which the courses are taken.

Bachelor of Science in Computer Science/Business Administration

The combined Bachelor of Science degree program in computer science/business administration offers qualified students the opportunity to gain an educational foundation in both areas. The degree is administered by the Computer Science Department.

The minimum requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied toward the major, regardless of the department in which the courses are taken.

* Satisfies GE requirement.

Physics/Computer Science Major Requirements for the Bachelor of Science

This program is intended for students with dual interests in physics and computer science who wish to complete the essential courses for both majors within their normal four year career. See the Physics and Astronomy Department section for course requirements.

Bachelor of Science in Computer Engineering and Computer Science

See the listing under Computer Engineering.

Minor in Computer Science

The computer science minor introduces the concepts, tools and techniques that are involved in the programming of computers. The minor prepares students to achieve mastery in several current programming languages. In addition, the student will learn about creating effective user interfaces and how to build applications that are available on the Internet.

Total units 30

Minor in 2-D Art for Games

This interdisciplinary minor integrates three major disciplines (fine arts, computer science and interactive media) to develop the 2-D visual skills necessary to conceptualize and illustrate images for games. For more information, see USC Roski School of Art and Design.

Minor in 3-D Art for Games

The focus of the 3-D Art for Games minor is a trans-disciplinary approach that incorporates the creative, technological and team-based communication skills necessary to develop 3-D art skills for video games. For more information, see USC Roski School of Art and Design.

Graduate Degrees

The requirements listed below are special to this department and must be read in conjunction with the general requirements of the USC Viterbi School of Engineering for master’s degrees and the general requirements of the USC Graduate School for Ph.D. degrees. The graduate program in computer science provides intensive preparation in the basic concepts and techniques related to the design, programming and application of digital computers. Both the Master of Science and Doctor of Philosophy degrees are offered.

A Master of Science degree with specialization in software engineering is also offered. The program seeks to prepare students for an industrial leadership career in software engineering. It also serves as an introduction to this area for students who wish to pursue advanced studies and research leading to a Ph.D.

A Master of Science degree with specialization in intelligent robotics is also offered. This program seeks to prepare students for an industrial career in the development of computer systems for CAD/CAM (Computer-Aided Design and Manufacturing) and robotics. It also serves as an introduction to this area for students who wish to pursue advanced studies and research leading to a Ph.D. The emphasis is on the domain of mechanical, electromechanical and mechatronic products. (CAD for digital systems is covered by a separate program offered by the Electrical Engineering Systems department.)

A Master of Science degree with a specialization in computer networks is offered. This specialization prepares students in the areas of computer communications, networks and distributed processing.

A Master of Science in Computer Science (Multimedia and Creative Technologies) is also offered.

A Master of Science in Computer Science (High Performance Computing and Simulations) is also offered.
Admission and Prerequisites

Admission is determined by the Office of Admission and the Viterbi School of Engineering, in consultation with the Computer Science Department. The applicant is required to have a bachelor’s degree or its equivalent from an accredited college or university; satisfactory scores on the verbal and quantitative portions of the aptitude test of the Graduate Record Examinations (one advanced test from computer science, mathematics or engineering is recommended); and a substantial background in computing constitutes a minimum requirement. Foreign students must earn a satisfactory score on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS).

Master of Science in Computer Science

Requirements for Graduation without a Thesis

A minimum grade point average of 3.0 must be earned on all course work applied toward the master’s degree in computer science. This average must also be earned on all graduate courses completed at USC (400-level and above). Transfer units count as credit (CR) toward the master’s degree and are not computed in the grade point average. The required courses are as follows: CSCI 570 and one course from each of the following two categories: I. CSCI 521, CSCI 555, CSCI 571, CSCI 577a, CSCI 585, EE 557, II. CSCI 545, CSCI 561, CSCI 584, CSCI 574, CSCI 580, CSCI 582. A maximum of 4 units may be taken at the 400 level from approved courses in either electrical engineering or computer science; the remaining units must be approved courses at the 500 or 600 level. CSCI 580 and ENGR 586 may be counted for a maximum of 6 units. Total units required for the degree is 27. No examination is required for the degree. Other requirements for the Master of Science in computer science are the same as set forth in the general requirements for Viterbi School of Engineering master’s degrees.

A maximum of 4 units may be taken at the 400 level from approved courses in either electrical engineering or computer science; the specialization “Game Development”; allows for up to 7 units at the 400 level. The remaining units must be approved courses at the 500 or 600 level.

Thesis Option

With the approval of a supervising professor, qualified students may be allowed to pursue a thesis option. Students pursuing the thesis option must satisfy all of the policies and course requirements for the master’s degree with the following exceptions: A maximum of 4 units from approved courses may be taken at the 400 level in either electrical engineering or computer science; and CSCI 580 and ENGR 586 may be counted for a maximum of 2 units. In addition, these students must enroll in a minimum of two semesters of CSCI 594AB for a maximum of 4 units. Total units required for the degree is 27. The thesis must comply with all requirements set by the Graduate School. The thesis option is available to students pursuing degrees in the following programs: M.S. in computer science and M.S. in computer science with specializations in computer networks, software engineering, intelligent robotics, multimedia and creative technologies, computer security and high performance computing simulations.

Master of Science in Computer Science (Data Science)

The Master of Science in Computer Science (Data Science) provides students with a core background in computer science and specialized algorithmic, statistical and systems expertise in acquiring, storing, accessing, analyzing and visualizing large, heterogeneous and real-time data associated with diverse real-world domains including energy, the environment, health, media, medicine and transportation. Students must satisfy all the requirements for the Master of Science degree in Computer Science. The following additional requirements must be met to obtain an M.S. in Computer Science with a specialization in Data Science.

Master of Science in Computer Science (Game Development)

The goal of the M.S. in Computer Science (Game Development) program is to graduate students with a core in computer science, an engineering-oriented game development core and a concentration in one of the key research directions in game development infrastructure, cognition and games, immersion and serious games. Infrastructure is researching and developing the software and hardware infrastructure necessary for the development of the future of interactive games and large-scale simulations; massively multiplayer online games (MMOGs) and simulation networks; game engines and tools; instant games; wireless and mobile games and infrastructures; and next generation consoles. Cognition and games is developing theories for modeling and simulating computer characters and story; developing methods for modeling, simulating and displaying human emotion; analyzing large-scale game play; and developing theories for infusing pedagogy with game play. Immersion is researching and developing the techniques to engage the mind of the game player via sensory stimulation; reading the human emotional state and providing that as an input to the game; and emotionally adaptive game software architectures. Serious games and simulations is developing a theory for the deployment of games and simulations for purposes of education and training, health, public policy and strategic communication; game evaluation; serious game development; and human performance engineering. Students graduating from this program will be capable of engineering next generation games and simulations and their required technologies immediately upon graduation in the entertainment and serious game fields. Additionally, graduates from this program will be able to further their education in graduate programs in game development and computer science. The long-term goal with this M.S. degree is to establish research and development directions that create a science of games and an accompanying archival literature that improves game development for both serious and entertainment purposes.

Master of Science in Computer Science (Computer Networks)
Under the networks option students must satisfy the requirements for the Master of Science in Computer Science and the following courses must be included in the program:

- At least two of the following courses: CSCI 580, CSCI 599 or CSCI 694a or CSCI 694b; EE 549, EE 550 and EE 555. Total units required for the degree is 27. Students who can demonstrate that they have already taken these courses (or equivalent) may be waived out of the requirement by a memo from their faculty adviser. All courses must be approved by a faculty adviser. A list of suggested electives is available from the department office.

Master of Science in Computer Science (Computer Security)
Completion of this program satisfies all the requirements for the Master of Science in computer science.

*Courses offered through the Distance Education Network (DEN).

**Topics must be pre-approved by an adviser. Course must be a minimum of 3 units.

Master of Science in Computer Science (High Performance Computing and Simulations)

Students in the MSCS-HPCS program must satisfy the current core requirements for the Master of Science in computer science and the following elective courses must be included in the program:

- Required Core course
  - CSCI 520 Scientific Computing and Visualization 3
  - CSCI 520 Computer Animation and Simulation 3
  - CSCI 525b* Introduction to Computational Fluid Dynamics 3
  - CSCI 535a* Introduction to Computational Fluid Dynamics 3
  - CSCI 535b** Introduction to Convective Transport 3
  - CSCI 553* Computational Solution of Optimization Problems 3
  - MATH 575* Materials 3
  - MATH 578a* Computational Molecular Biology 3
  - PHYS 516 Methods of Computational Physics 3
  - PTE 585* Fluid Flow and Transport Processes in Porous Media 3
  - Adviser approved remainder of elective units 6

- Technical Elective courses
  - Three of the following courses — students must take courses from both the computer science track and the computational science/engineering application track.

Master of Science in Computer Science (Software Engineering)

Students must satisfy all requirements for the Master of Science in Computer Science. In addition, they must take the following courses: CSCI 510, CSCI 577a, and CSCI 578, plus three of the following six courses: CSCI 520, CSCI 511, CSCI 555, CSCI 581, CSCI 588, and EE 557. EE 557, CSCI 555, CSCI 577a, and CSCI 585 may be used to satisfy both the general master’s degree requirements and the specialization requirements. Students may also include research for an optional master’s thesis in their programs.

Master of Science in Computer Science (Intelligent Robotics)

Students must take CSCI 545 and three of the following courses: CSCI 445L, CSCI 547, and CSCI 584. Other requirements are the same as for the Master of Science degree in computer science, described above. (CSCI 561 and CSCI 545 may be used to help satisfy both the general master’s degree requirements and the specialization requirements.) Students may include in their programs research for an optional master’s thesis conducted in collaboration with industry.

Master of Science in Computer Science (Scientists and Engineers)

Designed for students with engineering or science bachelor’s degree but limited background in computer science, this comprehensive, two-year, 37-unit program combines an introductory sequence of undergraduate preparatory and foundational course work with all the graduate breadth requirements necessary to satisfy the traditional master’s degree. Applicants to this program
Courses of Instruction

Computer Science (CSCI)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

</tbody>
</table>
CSCI 459 Computer Systems and Applications Modeling Fundamentals (3, Sp)
Techniques and tools needed to construct/evaluate models of computer systems and applications. Analytical and simulation methods, capacity planning, performance/reliability evaluation, and decision-making. Prerequisite: MATH 225.

CSCI 460 Introduction to Artificial Intelligence (3, FaSp)
Concepts and algorithms underlying the understanding and construction of intelligent systems. Agents, problem solving, search, representation, reasoning, planning, communication, perception, robotics, neural networks. Prerequisite: CSCI 104.

CSCI 464 Foundations of Exotic Computation (3, Sp)
Introduction to new approaches to computation: quantum – inspired by quantum mechanics; neural – inspired by the study of the brain; and molecular – inspired by the genome. Prerequisite: MATH 225 or MATH 245 or EE 241.

CSCI 465 Probabilistic Methods in Computer Systems Modeling (3) (Enroll in ITP 465)

CSCI 476 Cryptography: Secure Communication and Computation (4) introduction to modern Cryptography; mathematical/algoristmic studies of methods for protecting information in computer and communication systems: Public-Key Cryptosystems, zero-knowledge proofs, data privacy. Prerequisite: CSCI 270.

CSCI 477ab Design and Construction of Large Software Systems (2-1, FaSpSm)
Programming methodologies; intra-group and inter-group communication; software life-cycle; software economics. A large software project is a central aspect of the course. Prerequisite: CSCI 201. Open only to seniors.

CSCI 485 File and Database Management (3, FaSpSm)
File input/output techniques, basic methods for file organization, file managers, principles of databases, conceptual data models, and query languages. Prerequisite: CSCI 201.

CSCI 487 Programming Game Engines (4, FaSpSm)
(Enroll in ITP 485)

CSCI 490x Directed Research (1-8, max 12) individual research and readings. Not available for graduate credit.

CSCI 491ab Final Game Project (4-2, FaSpSm): a: Design, iterative prototyping, and development of a 1st playable level. Open only to seniors. b: Design, iterative stage 2 prototyping and development of a refined game.

CSCI 492 Immersive Game Development (2, Sp)
Design/develop 3D immersive games using advanced input devices, including sensors, video cameras, Wii-motes, accelerometer/inertial-magnetic sensor combinations, Microsoft Kinect systems, Sony Move, etc. Recommended preparation: CSCI 488, CSCI 490, and significant participation in a prior game development effort.

CSCI 495 Senior Project (3) (Enroll in PHYS 495)

CSCI 499 Special Topics (2-4, max 8) Selected topics in computer science.

CSCI 501 Numerical Analysis and Computation (3) (Enroll in MATH 501)

CSCI 502ab Numerical Analysis (1-3) (Enroll in MATH 502ab)

CSCI 503 Parallel Programming (3) Exploration of parallel programming paradigms, parallel computing architectures, hands-on parallel programming assignments, contemporary and historical examples and their impact, context with parallel algorithms. Recommended preparation: CSCI 104 or CSCI 485; EE 453 or EE 457.

CSCI 504ab Numerical Solutions of Ordinary and Partial Differential Equations (3) (Enroll in MATH 504ab)

CSCI 505ab Applied Probability (1-3) (Enroll in MATH 505ab)

CSCI 510 Software Management and Economics (3, Fa)
Theories of management and their application to software projects. Economic analysis of software products and processes. Software cost and schedule estimation, planning and control. Prerequisite: graduate standing.

CSCI 511 Personal Software Process (PSp) and Project (3, Sp) Individual analysis, planning, development and maintenance of a software product or development artifact, using the principles and practices of PSp. Analysis of project’s lessons learned.

CSCI 520 Computer Animation and Simulation (3) Fundamental techniques of computer animation and simulation, knowledge and/or experience in the design, scripting, production and post-production stages of computer animation. Recommended preparation: CSCI 420 or equivalent.

CSCI 521 Optimization: Theory and Algorithms (3, Fa) (Enroll in ISE 520)

CSCI 522 Game Engine Development (4, FaSpSm)
The principles of developing game engines targeted at modern PC and game console hardware.

CSCI 523 Networked Games (3, FaSpSm)
Design and implementation of networked games, from the origins of the supporting technologies in distributed systems, virtual simulations, networked virtual environments, and shipped games. Recommended preparation: CSCI 420 or CSCI 580 or an equivalent course in graphics.

CSCI 524 Networked Artificial Intelligence (3, FaSpSm)
Networked game communication architectures, protocol development, architecting networked game AI clients/services. Character following, knowledge representation and reasoning, dynamic play strategies, search, learning, and planning. Recommended preparation: CSCI 420 or CSCI 580 or an equivalent course in graphics.

CSCI 525 Advanced Game System Development (2, Sp)
Topics include: game engine/level development, AI/autonomous character interaction, game networking, performance measurement/enhancement, character animation systems, mobile devices, game consoles, next generation gameplay. Prerequisite: CSCI 522 or CSCI 523 or CSCI 524 or CSCI 526 or CSCI 528; recommended preparation: significant participation in a prior game development effort.

CSCI 526 Advanced Mobile Devices and Game Consoles (3, FaSpSm)
Explore the complex engineering process required to design and build a real-time graphics engine to support physical realism on mobile devices. Recommended preparation: CSCI 420 or CSCI 580 or an equivalent course in graphics.

CSCI 529ab Advanced Game Projects (4-3, FaSpSm): a: Team projects intended to address the multifaceted technical and creative challenges that are inherent to comprehensive game development. Recommended preparation: CSCI 522 or CSCI 523 or CSCI 526 or CSCI 528; b: This course provides students in various areas of game specialization the practice of design, iterative stage 2 prototyping and development of a refined game.

CSCI 530 Security Systems (4, FaSpSm)
Protecting computer networks and systems using cryptography, authentication, authorization, intrusion detection and response. Includes analysis of practical experience working with such systems. Prerequisite: CSCI 402.

CSCI 531 Applied Cryptography (3, FaSpSm)
Intensive overview of cryptography for practitioners, historical perspective on early systems, number theoretic foundations of modern day cryptosystems and basic cryptanalysis.

CSCI 532 Combinatorial Analysis and Algebra (3) (Enroll in MATH 532)

CSCI 534 Affective Computing (3, Sp)
Overview of the theory of human emotion, techniques for recognizing and synthesizing emotional behavior, and design application. Prerequisite: CSCI 561.

CSCI 536 Linear Programming and Extensions (3, Fa) (Enroll in ISE 536)

CSCI 540 Self-Organization (3) Massively distributed systems whose global behavior emerges from local interactions of components. Global to local computation; robot swarms; formation of shapes/spatial patterns; self-assembly; programmable matter. Recommended preparation: Graduate standing in science or engineering.

CSCI 542 Neural Computation with Artificial Neural Networks (3, Sp) (Enroll in ITP 542)
Mathematical/neural-inspired models of the brain; and molecular – inspired by the genome. Prerequisite: MATH 225 or MATH 245 or EE 241.

CSCI 544 Applied Natural Language Processing (3, Sp) Introduction to key components of human language technologies, including: information extraction, sentiment analysis, question answering, machine translation. Recommended preparation: proficiency in programming, algorithms and data structures, basic knowledge of linear algebra.

CSCI 545 Robotics (3, Sp)
Fundamental skills for modeling and controlling of dynamic systems for robotic applications and graphics animations; control theory; kinematics; dynamics; sensor processing; real-time operating systems; robot labs. Prerequisite: CSCI 420 or CSCI 580 or an equivalent course in graphics.

CSCI 546 Intelligent Embedded Systems (3, Sp) Survey of techniques for the design of large-scale, distributed, networked, embedded systems. Examples include sensor/actoruator networks, wearable computing, distributed robotics and smart spaces.

CSCI 547 Sensing and Planning in Robotics (3, Fa)
Introduction to software methods in robotics including sensing, sensor fusion, estimation, fault tolerance, sensor planning, robot control architectures, planning and learning.

CSCI 548 Information Integration on the Web (3, Sp) Foundations and techniques in information integration as it applies to the Web, including view integration, wrapper learning, record linkage, and streaming dataflow execution. Prerequisite: CSCI 561, CSCI 580; recommended preparation: CSCI 571, CSCI 572.

CSCI 549 Nanorobotics (3, Sp) Introduction to nanotechnology. Nanorobotic systems: sensing, actuation and propulsion; control; communication; power; programming and coordination of robot swarms. Nanomanipulation and nanoassembly with atomic force microscopes. Graduate standing in science or engineering.

CSCI 550 Advanced Data Stores (3) Selected topics on highly available, elastic data stores. Topics include non-relational data models, simple interfaces and query languages, weak consistency and benchmarking techniques. Prerequisite: CSCI 485 or CSCI 580.

CSCI 551 Computer Communications (3, FaSpSm)
Protocol design for computer communication networks.
network routing, transport protocols, internetworking. Prerequisite: CSCI 402, EE 430 and C-language programming.

CSCI 552 Asynchronous VLSI Design (3) (Enroll in EE 553)

CSCI 553 Computational Solution of Optimization Problems (3) (Enroll in EE 553)

CSCI 554 Real Time Computer Systems (3) (Enroll in EE 554)

CSCI 555 Advanced Operating Systems (3, FaSp) Advanced issues in computer organization, naming, kernel design, protection mechanisms and security policies, reliable computing, data base OS, secure networks, systems specification, decentralized systems, real-time systems. Prerequisite: CSCI 402.

CSCI 556 Introduction to Cryptography (3, Sp) Modern secret codes. Public key cryptosystems of Rivest-Shamir-Adelman, Diffie-Hellman and others. The underlying number theory and computational complexity theory. Prerequisite: CSCI 570 or CSCI 581.

CSCI 557 Computer Systems Architecture (3) (Enroll in EE 557)

CSCI 558LI Internetworking and Distributed Systems Laboratory (3, FaSp) Students complete laboratory exercises in operating system and network management, distributed systems, TCP/IP, SNMP, NFS, DNS, etc. Term project required. Prerequisite: CSCI 450 and EE/CSCI 420; recommended preparation: CSCI 551 and CSCI 555.

CSCI 559 Mathematical Pattern Recognition (3) (Enroll in EE 559)

CSCI 560L Advanced Microcomputer-Based Design (3) (Enroll in EE 560L)

CSCI 561 Foundations of Artificial Intelligence (3, FaSp) Foundations of symbolic intelligent systems, search, logic, knowledge representation, planning, learning. Recommended preparation: good programming and algorithm analysis skills.

CSCI 564 Brain Theory and Artificial Intelligence (3, Fa) Introduces neural modeling, distributed artificial intelligence and robotics approaches to vision, motor control and memory. Prerequisite: graduate standing.

CSCI 565 Compiler Design (4, Sp) Formal grammar; parsing methods and lexical analysis; code generation; local and global code optimization; and dynamic allocation. Prerequisite: CSCI 455.

CSCI 567 Machine Learning (3, Fa) Statistical methods for building intelligent and adaptive systems that improve performance from experiences; focus on theoretical understanding of these methods and their computational implications. Recommended preparation: Undergraduate level training or course work in linear algebra, multivariate calculus, basic probability and statistics; an undergraduate level course in Artificial Intelligence may be helpful but is not required.

CSCI 568 Requirements Engineering (3, Fa) Techniques for successful requirements analysis and requirements engineering (RE) of software-intensive systems. Systematic process of developing requirements through cooperative problem analysis, representation, and validation.

CSCI 570 Analysis of Algorithms (3, FaSpSm) Explores fundamental techniques such as recursion, Fourier transform ordering, dynamic programming for efficient algorithm construction. Examples include arithmetic, algebraic, graph, pattern matching, sorting, searching algorithms.

CSCI 571 Web Technologies (3, FaSpSm) Advanced study of programming languages with application to the Web. Languages for client-side and server-side processing. Examples taken from: HTML, Java, JavaScript, Perl, XML and others. Recommended preparation: knowledge of at least two programming languages.

CSCI 572 Information Retrieval and Web Search Engines (3, Sp) Examines key aspects of information retrieval as they apply to search engines; web crawling, indexing, querying and quality of results are studied. Prerequisite: CSCI 551, CSCI 485.

CSCI 573 Probabilistic Reasoning (3, Fa) Reasoning under uncertainty, statistical directed and undirected graphical models, temporal modeling, inference in graphical models, parameter learning, decisions under uncertainty. Recommended preparation: An undergraduate level course in probability theory.

CSCI 574 Computer Vision (3, Fa) Description and recognition of objects, shape analysis, edge and region segmentation, texture, knowledge based systems, image understanding. Prerequisite: CSCI 455.

CSCI 575 Wireless and Mobile Networks Design and Library (3) (Enroll in EE 579)

CSCI 576 Multimedia Systems Design (3, FaSp) State-of-the-art technology for networked multimedia systems such as: system design, I/O technologies, data management, data compression, networking and telecommunications. Design of real-world multimedia solution. Recommended preparation: familiarity with C or C++.

CSCI 577A Software Engineering (4-4, FaSp) A. Software life cycle processes; planning considerations for product definition, development, test, implementation, maintenance. Software requirements elicitation and architecture synthesis. Team project: b: Software development, test, implementation, and maintenance methods. CASE tools and software environments. Software product engineering, configuration management, quality engineering, documentation. Application via projects. Prerequisite: a: graduate standing; b: CSCI 577A.

CSCI 578 Software Architectures (3, Sp) Study of concepts, principles and scope of software system architectures, including architectural styles, languages, connectors, middleware, dynamism, analysis, testing and domain-specific approaches.

CSCI 579A Computational Molecular Biology (3-3, FaSp) (Enroll in MATH 579AB)

CSCI 580 Introduction to 3-D Graphics and Rendering (3, Fa) The process of creating images from 3-D models. Includes transformations, shading, lighting, rasterization, texturing, and other topics.

CSCI 581 Logic and its Applications (3) Formal systems, first order logic, truth, completeness, compactness, Godel incompleteness, recursive functions, undecidability. Selected applications, e.g., theorem proving, artificial intelligence, program verification, databases, computational complexity. Prerequisite: CSCI 410 and MATH 470.

CSCI 582 Geometric Modeling (3, Sp) Mathematical models and computer representations for three-dimensional solids; underlying topics from set theory, geometry, and topology. Fundamental algorithms; applications to CAD and robotics. Prerequisite: EE 441 and CSCI 102 or equivalent knowledge of linear algebra and data structures.

CSCI 584 Control and Learning in Mobile Robots and Multi-Robot Systems (3, Fa) Survey of robot control and learning methods from technical papers. Control architectures, adaptation, learning, cooperation, distributed vs. centralized approaches, cooperative and competitive systems. Prerequisite: CSCI 443L or CSCI 460 or CSCI 547 or CSCI 561.

CSCI 585 Database Systems (3, FaSpSm) Database system architecture; conceptual database models; semantic, object-oriented, logic-based, and relational databases; user and program interfaces; database system implementation; integrity, security, concurrency and recovery.

CSCI 586 Database Systems Interoperability (3, Sp) Federated and multi-database systems, database networking, conceptual and schematic diversity, information sharing and exchange, knowledge discovery, performance issues. Prerequisite: CSCI 586.

CSCI 587 Geospatial Information Management (3, Fa) Techniques to efficiently store, manipulate, index and query geospatial information in support of real-world geographical and decision-making applications. Prerequisite: CSCI 485 or CSCI 588.

CSCI 588 Specification and Design of User Interface Software (3, Fa) The design and implementation of user interface software. Study of issues relating to human/computer interaction. Visual design and real-time interfaces.

CSCI 589 Software Engineering for Embedded Systems (3) Software engineering methods and techniques for embedded, resource constrained, and mobile environments. Applications to real-time operating systems and wireless networking systems. Class project. Prerequisite: CSCI 577A.

CSCI 590 Directed Research (1-12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

CSCI 594BZ Master’s Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

CSCI 596 Scientific Computing and Visualization (3, Fa) Hands-on training on the basics of parallel computing and scientific visualization in the context of computer simulations in science and engineering. Prerequisite: CSCI 101L or CSCI 455X; CSCI 102L; MATH 458.

CSCI 597 Seminar in Computer Science Research (1, max 4, FaSpSm) Introduction of Ph.D. students to a broad range of computer science research. Two semesters registration required. Open to Computer Science doctoral students only.

CSCI 599 Special Topics (2-4, max 9) Course content to be selected each semester from recent developments in computer science.

CSCI 652 Low-Power Wireless Networks (3, Fa) (Enroll in EE 653)

CSCI 653 High Performance Computing and Simulations (3, Sp) Advanced high-performance computer simulation techniques; multiscale deterministic and stochastic simulation algorithms on parallel and distributed computing platforms; immersive and interactive visualization of simulation data. Prerequisite: CSCI 596 or CSCI 580.

CSCI 658 Diagnosis and Design of Reliable Digital Systems (3) (Enroll in EE 658)
CSCI 662 Advanced Natural Language Processing (3, Fa) Computational models of natural language. Formalisms for describing structures of human language, and algorithms for learning language structures from data. (Duplicates credit in former CSCI 562.) Recommended preparation: proficiency in programming, algorithms and data structures, discrete math, probability theory, and calculus.

CSCI 664 From Action to Language (3, Sp) Analysis of neurocomputational processes linking action, perception, emotion and language within an evolutionary framework integrating data from neuroscience, primatology, human psychology and linguistics. Recommended preparation: graduate standing with background or strong interest in one of linguistics, computational neuroscience (e.g., CSCI 564), robotics, or emotion.

CSCI 670 Advanced Analysis of Algorithms (3, FaSp) Fundamental techniques for design and analysis of algorithms. Topics include: dynamic programming; network flows; theory of NP-completeness; linear programming; approximation, randomized, and online algorithms; basic cryptography. Prerequisite: CSCI 570: recommended preparation: familiarity with algorithms and discrete mathematics.

CSCI 671 Randomized Algorithms (3, Sp) Standard techniques in the design and analysis of randomized algorithms and random structures. Topics include tail bounds, Markov Chains, VC-dimension, probabilistic method. Prerequisite: CSCI 570 or CSCI 670: recommended preparation: basic background in probability.

CSCI 672 Approximation Algorithms (3, Sp) Algorithmic techniques include combinatorial algorithms and rounding of linear and semi-definite programs. Applications include network design, graph cuts, covering problems, and approximation hardness. Prerequisite: CSCI 570 or CSCI 670: recommended preparation: basic background in probability and linear algebra.

CSCI 673 Structure and Dynamics of Networked Information (3, Sp) Algorithms for analyzing network data and spreading information over networks. Focuses on broadly applicable mathematical tools and techniques, including spectral techniques, approximation algorithms and randomization. Prerequisite: CSCI 570 or CSCI 670: recommended preparation: basic background in probabilities, linear algebra.

CSCI 674ab Advanced Topics in Computer Vision (3-3) Selected topics from current active research areas including image segmentation, shape analysis and object recognition, inference of 3-D shape, motion analysis, knowledge-based system, neural nets. Prerequisite: CSCI 574.

CSCI 675 Convex and Combinatorial Optimization (3) Topics include: Convex sets and functions; convex optimization problems; geometric and Lagrangian duality; simplex algorithm; ellipsoid algorithm and its implications; matroid theory; submodular optimization. Prerequisite: CSCI 570 or CSCI 670: recommended preparation: Mathematical maturity and a solid grounding in linear algebra.

CSCI 676 Multimodal Probabilistic Learning of Human Communication (3, Fa) Computational models of human communicative behaviors. Linguistic, acoustic and visual modalities during social interaction. Multimodal machine learning and pattern recognition, including generative and discriminative models. Recommended preparation: CSCI 542 or CSCI 567 or CSCI 570 or equivalent; proper academic background in probability, statistics and linear algebra; previous experience in machine learning is suggested but not obligatory. This course is not a replacement for CSCI 567.

CSCI 685 Advanced Topics in Database Systems (3, Sp) Advanced topics in database management. Topics include optimization, cache management, data mining and knowledge discovery, decision support, spatial indexes, parallel and distributed systems, extensible storage. Prerequisite: CSCI 485 or CSCI 585.

CSCI 686 Advanced Big Data Analytics (3) Advanced statistical inference and data mining techniques for data analytics, including: topic modeling, structure learning, time-series analysis, learning with less supervision, and massive-scale data analytics. Recommended preparation: CSCI 557, CSCI 573 or EE 558.

CSCI 694ab Topics in Computer Networks and Distributed Systems (3-3) Current topics in network and distributed systems; verbal and written presentation skills, effective critiquing, and evaluation. Prerequisite: CSCI 551 or CSCI 555.

CSCI 750 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree is determined by the department. Graded CR/NC.

Electrical Engineering Honor Society: Eta Kappa Nu

Degree Requirements

Undergraduate Program Educational Objectives

The electrical engineering program objectives are designed to promote technical competence, professional development, and citizenship in the global community.

Technical Competence

Graduates will apply their technical skills in mathematics, science and engineering to the solution of complex problems encountered in modern electrical engineering practice.

Graduates will model, analyze, design and experimentally evaluate components or systems that achieve desired technical specifications subject to the reality of economic constraints.

Professional Development

Graduates will compete effectively in a world of rapid technological change and assume leadership roles within industrial, entrepreneurial, academic or governmental environments in the broad context of electrical engineering.

Some graduates who choose to redirect their careers will be employed in diverse fields such as healthcare, business, law, computer science, multimedia and music through graduate-level studies and the process of lifelong learning.

Citizenship in the Global Community

Graduates will use their communication skills to function effectively both as individuals and as members of multidisciplinary and multicultural teams in a diverse global economy.

Graduates will engage in highly ethical and professional practices that account for the global, environmental and societal impact of engineering decisions.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Electrical Engineering provides both breadth and depth across the range of engineering topics implied by the title. The curriculum includes probability and statistics, including appropriate applications; mathematics through differential and integral calculus, and advanced mathematics, such as differential equations, linear algebra, complex variables and discrete mathematics; sciences (defined as biological, chemical or physical science); and engineering topics (including computing science) necessary to analyze and design complex electrical and electronic devices, software and systems containing hardware and software components.

Bachelor of Science in Electrical Engineering

The requirement for the degree is 131 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied towards the major, regardless of the department in which the courses are taken. See also the common requirements for undergraduate degrees section.

* GE Category IV is taken concurrently with WRIT 150.

** Satisfies GE Category III requirement.

*** Students enrolled in the progressive degree program may take EE 505 (4) to satisfy this requirement.

The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.
Requirements for Graduation: Engineering Electives

Entry-Level Electives

Students are required to take four entry-level electives from the following list: EE 241 (3), EE 322 (3), EE 337L (3), EE 338 (3), EE 348L (4), EE 357 (3).

Advanced Electives

Students must fulfill a minimum requirement of three 400-level elective courses in electrical engineering. Of these, one must be a capstone design course from the following list: EE 422x (3), EE 423Lx (3), EE 434Lx (4), EE 447Lx (4), EE 450Lx (3), EE 484x (3).

Free Electives

Free elective courses that complete the 37-unit elective requirement are to be chosen in consultation with the student’s academic adviser. Students are encouraged to pursue minor options when satisfying this requirement.

Bachelor of Science in Computer Engineering and Computer Science

See the listing under Computer Engineering.

Minor in Music Recording

A minor in music recording is offered through the USC Thornton School of Music to provide undergraduate students with the background necessary to enter the field of recording engineering and to familiarize them with the design needs of modern recording equipment. The minor is recommended to electrical engineering majors with extensive musical training who would like to combine their technical and musical abilities while learning the engineering applications of physical and mathematical principles to the art of music recording. See the listing under the Thornton School of Music.

Master of Science in Electrical Engineering

A minimum grade point average of 3.0 must be earned on all course work attempted toward the master’s degree in electrical engineering. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor’s degree and through an accumulation of no more than 45 units. Transfer units count as credit toward the master’s degree and are not computed in the grade point average.

In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in electrical engineering is also subject to the following requirements: (1) a total of at least 27 units is required; (2) every non-EE course for graduate credit requires prior written adviser approval recorded each semester on a special request form in the student’s department file; (3) no more than three courses (maximum 12 units) may be counted at the 400 level - at least 18 adviser-approved units must be taken at the 500 or 600 level; (4) at least 18 units must be taken in electrical engineering, those not in EE require written adviser approval and must be technical in nature; (5) to achieve a degree of breadth in their program, students are encouraged to take two technical courses outside their area of specialization but within EE; (6) at least 21 of the 27 units must be taken in the Viterbi School of Engineering; (7) units to be transferred (maximum with adviser approval) must have been taken prior to taking classes at USC – interruption of residency is not allowed.

The aerospace controls option is available as an area of emphasis for MSE students interested in learning to apply innovative control techniques to aerospace control problems. In addition to 18 approved units of electrical engineering courses, students in this option will take at least three of the following aerospace and mechanical engineering courses: AME 453 Engineering Dynamics (3); AME 521 Aerodynamics of Wings and Bodies (3); AME 520b Flight Vehicle Stability and Control (2-3); AME 526 Engineering Analysis (3); AME 526 Engineering Analytical Methods (3); ASTE 580 Orbital Mechanics I (3).

Master of Science in Electrical Engineering (Computer Networks)

Under the computer networks option students must satisfy the M.S., Electrical Engineering requirements with the exception that only 15 units of EE are required. It is expected that each student in this program will take or have taken the equivalent of three of the four following fundamental courses: CSCI 402x, EE 450, EE 457Lx, and EE 463 or EE 503. With the exception of EE 503, the fundamental courses may also be satisfied by having passed EE placement exams. Three of the following courses are required: CSCI 557, EE 550, EE 555 and EE 597. If a fourth required course is taken it can be counted toward elective credit. Suggested elective courses include: CSCI 530, CSCI 555, CSCI 585L, CSCI 570, CSCI 694a, CSCI 695b, EE 512, EE 532, EE 535, EE 540, EE 554, EE 557, EE 558, EE 579, EE 643, EE 650, EE 652, EE 653. Any other course must be approved by a faculty adviser. Total units required for the degree is 27.

Master of Science in Electrical Engineering (Electric Power)

See listing in the Sustainable Infrastructures Systems section.

Master of Science in Electrical Engineering (Multimedia and Creative Technologies)

Students may earn a specialization in multimedia and creative technologies by completing the general requirements for the Master of Science in Electrical Engineering and the following additional requirements:

- At most four units of electives can be taken outside of the Viterbi School of Engineering with adviser approval. Some examples are CTAN 452 Introduction to 3-D Computer Animation (3 units) and CSCI 481 Introduction to Game Development (4 units).

- Computer science courses that are cross-listed with EE can (but do not have to) count toward the 18 EE units. Up to nine units of other CSCI courses that either are or are not cross-listed can also be used. Multimedia and creative technologies draws heavily on concepts and techniques from computer science.

- Students must include the following three courses in their program:
  - EE 483 Introduction to Digital Signal Processing (3)
  - EE 519 Speech Recognition and Processing for Multimedia (3)
  - EE 569 Introduction to Digital Image Processing (3)

- A course can be waived if a student can demonstrate equivalent knowledge of the material and if the course instructor will certify it.

- Students must include six courses from the following list of courses in their programs for a total of 18 units.

Master of Science in Systems Architecting and Engineering

See the listing under Systems Architecting and Engineering.

Master of Science in Electrical Engineering (VLSI Design)

The Master of Science in Electrical Engineering (VLSI design) is earned by successfully completing the normal
requirements for the Master of Science in electrical engineering, with the following additional required courses: EE 520; EE 577c; EE 577b or EE 536b; and EE 553, if a student chooses to take EE 536b as well as EE 577b, the student may either count EE 536b as one of the courses for Area 2 or EE 577b as one of the courses for Area 1 or Area 3. No more than three courses (maximum 12 units) may be counted at the 400 level − at least 18 adviser-approved units must be taken at the 500 or 600 level.

The students must also take two courses from one of the following areas and one course from a second area:

- Area 1: CSCI 455x, EE 560, EE 577b (see above), EE 658, EE 680 and EE 681.
- Area 2: EE 448L, EE 504L, EE 536b (see above), EE 537 and EE 630.
- Area 3: CSCI 455x, CSCI 570, EE 557, EE 560, EE 577b (see above), EE 658 and EE 677.

With explicit approval of a faculty adviser, EE 599 Special Topics and/or 3 units of EE 590 Directed Research may be used to meet requirements for any of the approved areas.

The remaining courses must be technical electives approved by the adviser, and including the following: EE 501, EE 502, EE 504L, EE 506, EE 540, EE 554, EE 560, EE 590, EE 601 and EE 677.

Master of Science in Electrical Engineering (Wireless Health Technology)

The Master of Science in Electrical Engineering (Wireless Health Technology) reflects a partnership between the Viterbi School of Engineering, the Keck School of Medicine, and other institutions engaged in health care research. The program of study features targeted engineering courses, a rigorous exposure to general medicine, and relevant internship practice (a total of 29-32 units).

**Required Courses (20 units)**

Students are expected to have a background in linear algebra equivalent to EE 441 and experience with a programming language such as C or C++. Admitted students who do not meet prerequisites by placement examination will be assigned courses to complete the deficiencies.

Master of Science in Electrical Engineering (Wireless Networks)

The Master of Science in Electrical Engineering (Wireless Networks) is a unique interdisciplinary degree program that prepares graduates for the design and improvement of future wireless networks such as the "Internet of Things ". The program combines courses related to radio hardware, transmission techniques, the medium-access control layer, networking, applications and standards.

Master of Science in Financial Engineering

The objective of this program is the training of graduate students with engineering, applied mathematics or physics backgrounds in the application of mathematical and engineering tools to finance. Financial engineering is a multidisciplinary education program that involves the Viterbi School of Engineering, the USC Marshall School of Business and the USC Dornsife College of Letters, Arts and Sciences (Department of Economics). Financial engineering uses tools from finance and economics, engineering, applied mathematics and statistics to address problems such as derivative securities valuation, strategic planning and dynamic investment strategies, and risk management, which are of interest to investment and commercial banks, trading companies, hedge funds, insurance companies, corporate risk managers and regulatory agencies.

A minimum grade point average of 3.0 must be earned on all course work applied toward the master’s degree in financial engineering. Transfer units count as credit (CR) toward the master’s degree and are not computed in the grade point average. In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in financial engineering is also subject to the following requirements: (1) a total of at least 30 units is required; (2) every plan of study requires prior written approval by the contact faculty of the program; (3) units to be transferred (maximum of four with adviser approval) must have been taken prior to taking classes at USC; interruption of residency is not allowed.

**Curriculum**

The degree requirements include six required courses and two courses from each of two lists of electives for a minimum total of 30 units.

Courses of Instruction

Electrical Engineering (EE)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

EE 101 Introduction to Digital Logic (3, FaSp) Boolean algebra; number systems; Boolean function synthesis; binary arithmetic; codes; combinatorial logic devices; sequential circuits; state machine design and implementation. (Duplicates credit in EE 154.)

EE 105 Introduction to Electrical Engineering (3, Fa) Gateway to the majors in Electrical Engineering. An overview of modern electrical engineering: communications, computers, circuits, components, controls, electromagnetics, microelectronics; principles of commercial products such as FAX, modem, copier, CD-ROM, ATM networks.

EE 106L Introduction to Computer Engineering/Computer Science (3, Fa) Examination of key disciplines of computing systems: architecture, operating systems, digital logic, VLSI, networks, AI, robotics, graphics, and algorithms. Includes hardware/software laboratory tours and exercises. Open only to B.S., Computer Engineering and Computer Science and B.S., Computer Science majors.

EE 109L Introduction to Embedded Systems (3, Fa) Information representations, embedded C language constructs, assembly programming, state machines, and fundamental circuit analysis. Embedded topics will include digital I/O, serial I/O, protocols, analog-to-digital conversion and interrupt mechanisms. Recommended preparation: Knowledge of C or C++.

EE 154 Fundamentals of Digital Logic (2) Logic function synthesis, Boolean algebra, sequential devices, state-machine synthesis, combinational and sequential data-path components. Prerequisite: EE 109L. (Duplicates credit in EE 101.) Open only to Computer Engineering and Computer Science and Electrical Engineering majors.

EE 201L Linear Circuits (4, FaSpSm) Lumped circuit elements; network equations; zero-input and zero-state responses; sinusoidal steady-state analysis; impedance; resonance; network functions; power concepts; transformers; Laplace transforms. Prerequisite: PHYS 154L; corequisite: MATH 245.

EE 222 Fundamentals of Audio Engineering (3, Fa) Introduction to basic audio engineering principles and techniques, with emphasis on practical sound-system analysis and design. Sound measurements, microphones, amplifiers, loudspeakers, and system integration.

EE 241 Applied Linear Algebra for Engineering (3, FaSp) Introduction to the theory of matrices, vector spaces, least-squares approximation and MATLAB. Applications to communications, control and signal processing. Prerequisite: MATH 146.

EE 254L Introduction to Digital Circuits (4, FaSpSm) Digital system design and implementation: synchronous design of datapath and control; schematic/Verilog-based design, simulation, and implementation in Field Programmable Gate Arrays; timing analysis; simple CPU design; semester-end project. Prerequisite: EE 101 or EE 154. (Duplicates credit in former EE 201.)

EE 277L Introduction to Digital Integrated Circuits (3) Physical principles and circuit theory used to analyze and design digital integrated circuits. Introduction to digital abstractions that bridge the gap between basic circuit theory and VLSI. Prerequisite: EE 109. (Duplicates credit in EE 328.)

EE 301L Linear Systems (4, FaSp) Representation and analysis of linear time-invariant systems primarily for the continuous time case. Convolution, Fourier series and transform, Laplace transform, controls and communications applications. Prerequisite: EE 202L.

EE 322 Introduction to Digital Audio (3, Fa) Fundamentals of sound, acoustics and digital audio signal processing.

EE 325Lx Essentials of Electrical Engineering (4) Network analysis and theorems; transient analysis; transistors; semiconductor physics and circuits; power amplifiers, modulation and demodulation, and pulse, digital, and switching circuits. Introduction to instrumentation. Not available for credit to electrical engineering majors. Prerequisite: PHYS 152L, MATH 126.

EE 328Lx Circuits and Electronics for Computer Engineers (3, Fa) Introduction to the physical principles of governing analog circuits for data conversions and data communications. Elementary device behavior for digital systems. Not available for credit to electrical engineering majors. Prerequisite: PHYS 152L.

EE 330 Electromagnetics I (3, FaSp) Basic static and dynamic electromagnetic field theory and applications; electrostatics, magnetostatics, Maxwell’s equations, energy flow, plane waves incident on planar boundaries, transmission lines. Prerequisite: EE 202L, MATH 245, PHYS 152L.

EE 337L Engineering Nano-Systems (3, Sp) Methods to control and exploit the phenomena of nano-science, and the integration of nano-technology into systems. Development of fundamental concepts through a series of experimental modules. (Duplicates credit in former EE 238L.) Prerequisite: PHYS 152L.

EE 338 Physical Electronics (3) Semiconductor device characteristics and applications. Physical models of electronic conduction in solids, p–n junctions, bipolar and field effect transistors and other solid-state devices. Prerequisite: EE 202L, PHYS 152L.

EE 351 Programming and Multimedia on the World Wide Web (3, FaSpSm) (Enroll in CSCI 351)

EE 352L Computer Organization and Architecture (3) Computer organization and architecture. Concepts include: computer evolution and performance, system buses, cache memory, interrupt circuitry, external memory, input/output, operating system support, computer arithmetic. Prerequisite: CSCI 104.
EE 355X Software Design for Electrical Engineers (3)
Object-oriented programming techniques, basic data structures, and elementary complexity analysis for the modeling, simulation, and solution of engineering problems. Not available for credit for CSCI, CSGM, CSBA, or CICS majors. (Duplicates credit in former CSCI 355X.) Prerequisite: EE 150.

EE 357 Basic Organization of Computer Systems (3, FaSp)
Organization and operation of the processor, memory and I/O of a microcomputer at the machine language level; assembly language programming: data representation and computer arithmetic. Prerequisite: EE 254; recommended preparation: a high level programming language.

EE 364 Introduction to Probability and Statistics for Electrical Engineering and Computer Science (3, FaSp)
Introduction to concepts of randomness and uncertainty: probability, random variables, statistics. Applications to digital communications, signal processing, automatic control, computer engineering and computer science. Prerequisite: MATH 255 or MATH 245.

EE 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

EE 401 Transform Theory for Engineers (3, Fa)
Complex variables, Cauchy Riemann conditions, contour integration and residue theory; Fourier transform; Laplace transform; sampling theory. Discrete time filters, discrete and fast Fourier transform. Prerequisite: EE 301L and MATH 445.

EE 415 Introduction to MEMS (3) (Enroll in AME 455)

EE 422X Electromagnetic Systems Design (3, FaSp)
Applied electromagnetics for large- and small-scale electromechanical systems. Comprehensive design project. Capstone design experience. Open only to seniors. Not available for graduate credit. Prerequisite: EE 330.

EE 423LX Loudspeaker and Sound-System Design (3, Sp)
Project-based design of loudspeaker drivers, filters, and enclosures. Measurement of transfer functions, acoustic performance, distortion, Thiele-Small parameters, and power handling. Listening evaluations. Capstone design experience. Open only to seniors. Not available for graduate credit. Prerequisite: EE 301L or AME 302; PHYS 152L; recommended preparation: EE 330.

EE 434LX Digital Signal Processing Design Laboratory (4) Experiments and design project in digital signal processing (e.g., real-time DSP, acoustic, video) including: systems specification, preliminary analysis, trade-off studies, implementation, presentation. Capstone design experience. Open only to seniors. Not available for graduate credit. Prerequisite: EE 483.

EE 436 Introduction to Condensed Matter Physics (4, Irregular, Sp) (Enroll in PHYS 440)

EE 438L Processing for Microelectronics (3)
Applications and electrical evaluation of selected processes used in electronic microfabrication. (Duplicates credit in former MASC 428L.) Prerequisite: EE 338.

EE 439 Principles of Semiconductor Processing (3)
(Enroll in MASC 439)

EE 441 Applied Linear Algebra for Engineering (3, FaSp5m)
Introduction to linear algebra and matrix theory and their underlying concepts. Applications to engineering problems. Prerequisite: MATH 445.

EE 443 Introduction to Power Systems (3)
Components of power systems. Analysis techniques in electrical power generation, transmission and utilization. Environmental and economic considerations in system operations and planning.

EE 444 Power Systems Technology (3, Fa)
Comprehensive assessment of the technical, environmental, and regulatory challenges that affect the future delivery and utilization of electric power. Case-study analysis. Prerequisite: EE 202L.

EE 445 Introduction to Robotics (4) (Enroll in CSCI 445L)
EE 447LX Mixed Signal Electronic Circuits (4)
Application of solid-state electronic devices to the design of linear and mixed-signal systems. Laboratory experiments and projects involving the design of electronic hardware. Capstone design experience. Open only to seniors. Not available for graduate credit. Prerequisite: EE 348L.

EE 448L Communication Electronics (4, FaSp)
Analysis, design, and experimental evaluation of transistor-level communication circuits and microsystems. Transistor modeling, noise, distortion, tuned amplifiers, mixers, oscillators, phase-locked loops. Prerequisite: EE 348L.

EE 450 Introduction to Computer Networks (3, FaSp5m)
Network architectures; layered protocols, network service interface; local networks; long-haul networks; internet protocols; link protocols; addressing; routing; flow control; higher level protocols. (Duplicates credit in CSCI 352.) Prerequisite: Junior standing.

EE 451 Parallel and Distributed Computing (3)
Architectural principles underlying modern processors; introduction to parallel programming techniques, software performance optimization strategies, and application mapping to multi-core, accelerator and cloud platforms. Prerequisite: EE 352; recommended preparation: knowledge of C/C++.

EE 453L Game Hardware Architectures (3, Fa)
Architectural principles underlying modern game console hardware design; introduction to the programming techniques, optimization strategies, and hardware insights to create powerful games. Prerequisite: EE 352L.

EE 454L Introduction to System Design Using Microprocessors (4, FaSp5m) Operation and timing of 8/16/32-bit microprocessors; asynchronous and synchronous SRAM interface; burst and pipelined bus cycles, parallel and serial I/O, interrupt controller, DMA controller, bus protocols; hardware/simulation labs. Prerequisite: EE 453L.

EE 455X Introduction to Programming Systems Design (4) (Enroll in CSCI 455X)

EE 457 Computer Systems Organization (3, FaSp5m)
Register Transfer level machine organization; performance; arithmetic; pipelined processors; exceptions, out-of-order and speculative execution, cache, virtual memory, multi-core multi-threaded processors, cache coherence. Prerequisite: EE 254L.

EE 459LX Embedded Systems Design Laboratory (3, FaSp5m)
Specification, design, implementation, testing and documentation of a digital system project using embedded processors, programmable logic, analog I/O interfaces and application specific hardware. Capstone design experience. Prerequisite: EE 357; recommended preparation: knowledge of C programming. Open only to seniors.

EE 460 Introduction to Artificial Intelligence (3)
(Enroll in CSCI 460)

EE 464 Probability Theory for Engineers (3, FaSp5m)
Axiomatic foundations of probability, random variables, functions of several random variables, introduction to statistics, sequences of random variables. Prerequisite: EE 301L and MATH 445.

EE 465 Probabilistic Methods in Computer Systems Modeling (3, FaSp5m) Review of probability; random variables; stochastic processes; Markov chains; and simple queueing theory. Applications to algorithm analysis; computer systems performance and reliability modeling. Prerequisite: MATH 407 or EE 364.

EE 467 Introduction to Communication Systems (3)
Analog and digital communication systems. (De)modulation and (de)multiplexing of AM/FM/PM, noise, digital data formats, error rates, and spectral analysis. Review of wireless, networking, and optical systems. Prerequisite: EE 301L.

EE 470 Electromagnetics II (3) Dynamic field theory and elementary solutions to Maxwell’s equations. Introduction to propagation and radiation of electromagnetic fields. Prerequisite: EE 310.

EE 471 Applied Quantum Mechanics for Engineers (3, Sp)
Introductory quantum mechanics and applications. Schroedinger equation, atomic and molecular processes, time-dependent perturbation theory. Applications to lasers, solid-state devices and gaseous devices. Prerequisite: EE 330 or graduate standing.

EE 472 Introduction to Lasers and Laser Systems (3, FaSp)
Electric dipole transitions; traveling wave and resonant amplifiers; laser pumping and rate equations; threshold, frequency, and power output of lasers; holography; laser communication systems. Corequisite: EE 470.

EE 473 Lasers and Optics Laboratory (3, Sp)
Introductory design/research laboratory in lasers and optics, which typically includes fiber optics, photonics, electro-optics, optical sensors, optical communication, optical signal processing and computing. Corequisite: EE 470.

EE 474 Introduction to Photonics (3, Sp)
Photonic system requirements; waveguide modes and dispersion; optical fiber modes, loss and dispersion; principles of operation of lasers, optical amplifiers, detectors and modulators; noise. Prerequisite: EE 330, EE 339.

EE 475 Wireless Communication Technology (3, Fa)
Fundamentals of wireless communication from a device point of view. Lab experiments and design project. Recommended preparation: EE 241, EE 483.

EE 476 Chemical Engineering Materials (3, Sp) (Enroll in CHE 476)

EE 477L MOS VLSI Circuit Design (4, FaSp5m)
Analysis and design of digital MOS VLSI circuits including area, delay and power minimization. Laboratory assignments including design, layout, extraction, simulation and automatic synthesis. Prerequisite: EE 277L or EE 338.

EE 478LX Digital Electronic Circuit Design (4, Sp)
Design of digital electronic circuits. Laboratory experiments and an extensive term project using digital hardware. Capstone design experience. Open only to seniors. Not available for graduate credit. Prerequisite: EE 348L.

EE 479 Analog and Non-Linear Integrated Circuit Design (3, Fa)
Analysis and design techniques for CMOS analog and non-linear integrated circuits. Frequency and noise characteristics of bipolar and CMOS amplifiers. Feedback, oscillators, and phase-locked loops. Prerequisite: EE 348L.

EE 480 Introduction to Nanoscience and Nanotechnology (3, Fa) Next-generation nanoscale research.
materials and electronic devices: nanoscale fabrication and characterization, nanomaterials, nano-electronics, and nanobiotechnology. Prerequisite: EE 338.

EE 481L Control Systems Laboratory (3, 5p) (Enroll in AME 442L)

EE 483 Linear Control Systems (3, FaSp) Analysis of linear control systems; continuous and sampled-data systems, various stability criteria; frequency response and root locus compensation techniques. Prerequisite: EE 310L or graduate standing.

EE 485 Introduction to Digital Signal Processing (3, FaSp) Fundamentals of digital signal processing covering: discrete time linear systems, quantization, sampling, Z-transforms, Fourier transforms, FFTs and filter design. Prerequisite: EE 301L.

EE 484X Communication System Design (3, Sp) Design and analysis of analog and digital communication systems. System models, requirements, development, performance analysis and component selection techniques. Comprehensive system design project. Capstone design experience. Open only to seniors. Not available for graduate credit. Prerequisite: EE 364, EE 475; recommended preparation: EE 487.

EE 485 Telecommunications Technology (3) Technical development of the telecommunications industry and the accompanying regulatory environment. Case-study analysis. Prerequisite: EE 301.

EE 490 Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

EE 499 Special Topics (1-4, max 8) Course content will be selected each semester from current developments in the field of electrical engineering.

EE 500 Neural and Fuzzy Systems (3, FaSpSm) Neural networks and fuzzy systems, including: neuron structure and dynamics, unsupervised and supervised learning, network models and architectures, network stability and learning convergence. Recommended preparation: EE 464 or EE 503.

EE 501 Solid State (3) (Enroll in MASC 501)

EE 502 Advanced Solid State (3) (Enroll in MASC 502)

EE 503 Probability for Electrical and Computer Engineers (4, FaSp) Rigorous coverage of probability, discrete and continuous random variables, functions of multiple random variables, covariance, correlation, random sequences, Markov chains, estimation, and introduction to statistics. (Duplicates credit in EE 464 and EE 465.)

EE 504L Solid-State Processing and Integrated Circuits Laboratory (3) Laboratory oriented with lectures key to practical procedures and processes. Solid-state fabrication and analysis fundamentals; basic device construction techniques.

EE 507 Micro- and Nano-Fabrication Technology (3) Physical basis of technologies for the fabrication of micro- and nano-scale devices. Thin-film deposition, etching, and material modification processes; pattern-transfer methods. Recommended preparation: graduate standing in engineering, physics, or chemistry.

EE 508 Nano-Fabrication Lithography (3) Physical basis of lithography methods for nano-scale devices. Photons-, electron-, and ion-based systems, advanced processes; resolution enhancement techniques; directed self assembly.

EE 509 Electromagnetics for Semiconductor Photonics (3) Overview of electromagnetics needed to understand and design photonic devices. Includes discussion of waveguides and resonant cavities and an introduction to photonic crystals.

EE 512 Stochastic Processes (3) Probability theory and stochastic processes, including renewal theory, Markov chains, Brownian motion, martingales, and stochastic calculus. Applications in communication networks, queueing theory, and financial systems. Prerequisite: EE 441 and EE 464, EE 465 or EE 503.

EE 513 Solid State Energy Devices (3) Design and operation of solar photovoltaic energy converters, thermoelectric energy converters, thermoelectric energy converters, and solid state light emitters; their roles in renewal and conservation of energy. Recommended preparation: EE 501L.

EE 514 Quantum Error Correction (3) A comprehensive introduction to quantum error correction and decoherence control, from the basics to the cutting edge, enabling students to delve into current research topics. Recommended preparation: EE 450.

EE 515 High-Voltage Technology (3) High voltage engineering basic concepts; theoretical, design, and practical aspects of overvoltages, travelling-waves, insulation, and aging; breakdown mechanisms; insulation coordination.

EE 516 High-Voltage DC Transmission Systems (3) AC/DC conversion processes, converter technologies, and design; harmonics, controls, and protection; AC/DC interactions and system performance; modeling, application, and installation; current-source versus voltage-source converters. Prerequisite: EE 443.

EE 517 Statistics for Engineers (3, FaSpSm) Presents statistics with engineering emphasis. Topics include confidence intervals, hypothesis testing, estimation, regression, nonparametric tests, analysis of variance, quality control, and experimental design. Recommended preparation: EE 454 or EE 503.

EE 518 Mathematics and Tools for Financial Engineering (4) Students will build a mathematical background for studying financial engineering. Emphasis is on analysis, proofs and examples. Mathwork’s financial toolbox will be introduced.

EE 520 Introduction to Quantum Information Processing (3, FaSpSm) Introduces the basics of quantum computation and quantum information theory: quantum bits and registers, unitary gates, algorithms, error correction, and quantum cryptography. Recommended preparation: EE 441 and EE 464 or EE 503.

EE 521 Power Systems Analysis and Design (3) Power system planning, studies, and design; time-domain modeling and analysis of power-system networks; power flow, stability, fault, and economic dispatch analysis; symmetrical components. Prerequisite: EE 443.

EE 523 Advanced Biomedical Imaging (3) (Enroll in BME 523)

EE 525 Power System Protection (3) Theory of system and equipment protection, characteristics of relays, relay coordination, and system considerations. Prerequisites: EE 443.

EE 527 Net-Centric Power System Control (3, FaSpSm) Control and stability of large-scale systems such as the electric power grid. Integration with information networks. Corequisite: EE 521; recommended preparation: EE 482.

EE 529 Optics (3) Basic graduate level optics including wave optics, foundations of geometric optics, optical elements, aberration theory, Hermite-Gaussian beams, multilayer structures, and matrix techniques. Recommended preparation: EE 470 or graduate standing.

EE 530 Optical Materials, Instruments and Devices (3) Anisotropic materials and devices; properties of metals; design and theory of selected optical instruments; properties of electrooptic, acoustooptic, and spatial light modulators; optical detectors. Prerequisite: EE 529.

EE 532 Wireless Internet and Pervasive Computing (3, Fa) Wireless Internet access technologies, 3G cellular systems, WAP and PKI protocols, mobile computing devices, network security for mobile E-commerce, software and middleware for pervasive, cluster, grid, and Internet computing. Prerequisite: EE 450; recommended preparation: EE 457.

EE 533 Network Processor Design and Programming (3, 5p) Understanding of network processor architecture, applications, and other relevant issues. Program network processor and test under realistic network environment. Design and deploy custom network processor. Prerequisite: EE 457; recommended preparation: EE 450.

EE 534 Materials Characterization (3) (Enroll in MASC 534)

EE 535 Mobile Communications (3, FaSpSm) The mobile communication channel; techniques used to combat the channel; cellular communications; multiple-access techniques; example mobile communication systems. Prerequisite: EE 503.
geometrical and physical optics, reflectors, arrays. Required: EE 470.

EE 574 Computer Vision (3, Fa) (Enroll in CSCI 574)

EE 577ab VLSI System Design (a: 3, FaSp; b: 3, FaSp)
a: Integrated circuit fabrication; circuit simulation; basic device physics; simple device layout; structured chip design; timing; project chip; MOS logic; system design silicon compilers. Prerequisite: EE 477; b: VLSI design project; chip level design issues: power and clock distribution, packaging, I/O; design techniques; testability; chip fabrication and test.

EE 578 Reflectant Antennas (3) Introduction to the analytical and numerical techniques used in the analysis and design of modern reflector antenna systems, including physical optics, asymptotic techniques, shaping and feeds. Required: EE 470.

EE 579 Wireless and Mobile Networks Design and Laboratory (3, Sp) Mobile ad hoc networks: ad hoc and geographic routing, resource discovery, medium access control, IP-mobility, mobility modeling, wired-wireless networks. Lab: wireless LAN measurement, mobile IP, ad hoc routing. Prerequisite: CSCI 531 or EE 550 or EE 555; recommended preparation: programming, network simulation.

EE 580 Optical Communications (3, Sp) Analysis and design of optical and fiber optical systems; direct detection, heterodyning, laser modulation formats; receiver analysis and fiber modeling; digital error probabilities. Prerequisite: EE 562a.

EE 585 Linear System Theory (3, FaSpSm) Analysis of linear dynamical systems by state-space techniques; controllability, observability, stability, passivity. Application of feedback control and network synthesis. Prerequisite: EE 441.

EE 586 Advanced DSP Design Laboratory (4) Real-time adaptive signal processing design projects using special purpose DSP processors. Suitable project areas include acoustics, speech, arrays, image compression and biomedical signal processing. Prerequisite: EE 583 or EE 569.

EE 588 Linear Quadratic Control (3, Sp) Linear systems with quadratic cost, Riccati equations, observers, Kanam-Bucy filters, separation principle, discrete linear optimal control systems. Prerequisite: EE 585; recommended preparation: EE 492, EE 562a.

EE 590 Directed Research (1-12, FaSpSm) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

EE 591 Magnetic Resonance Imaging and Reconstruction (3, FaSpSm) Principles of magnetic resonance imaging. Spin physics, Fourier-based acquisition and reconstruction, generation of tissue contrast, fast imaging, artifact correction, advanced image reconstruction. Prerequisite: EE 483. Recommended preparation: EE 441, EE 464, or EE 503. Familiarity with MATLAB is required.

EE 592 Computational Methods for Inverse Problems (3, FaSpSm) Vector-space methods for solving inverse problems. Existence and uniqueness of solutions; conditioning and regularization; iterative algorithms; constrained optimization; applications in signal and image processing. Prerequisite: EE 483 and EE 441. Recommended preparation: EE 503.

EE 593 Multivariable Control (3, Fa) Feedback performance analysis; robustness and stability margins; sensitivity; disturbance attenuation; design tradeoffs; singular value, characteristic locus, and inverse Nyquist array design methods. Prerequisite: EE 492 and EE 585.

EE 594a Lowband Master’s Thesis (2-2, FaSpSm) For the master’s degree. Credit on acceptance of thesis. Graded IP/CR/NC.

EE 595 Algebraic Coding Theory (3, FaSpSm) Finite field theory; Reed Solomon codes; algebraic codes; algebraic decoding methods; examples. Prerequisite: EE 441, EE 464 or EE 503.

EE 596 Wavelets (3, Fa) The theory and application of wavelet decomposition of signals. Includes subband coding, image compression, multiresolution signal processing, filter banks, and time-frequency tilings. Prerequisite: EE 441, EE 483; recommended preparation: EE 456, MATH 570a.

EE 597 Wireless Networks (3, Fa) Introduction to wireless networking technologies; fundamental architectural and design principles used at all protocol layers; optimization and performance evaluation using mathematical analysis and simulations. Prerequisite: EE 450, EE 464 or EE 465 or EE 503; recommended preparation: EE 487, familiarity with MATLAB and C programming.

EE 598 Electrical Engineering Research Seminar (1, max 2) Introduction to research in electrical engineering. Topics vary by semester. May be repeated for up to one unit of credit for M.S. students, two units of credit for Ph.D. students. Open only to master’s and doctoral students. Graded CR/NC.

EE 599 Special Topics (2-4, max 9) The course content will be selected each semester to reflect current trends and developments in the field of electrical engineering.

EE 606 Nonequilibrium Processes in Semiconductors (3) Non-equilibrium processes in modern semiconductor devices. Carriers lifetime and trapping; luminescence; hot carrier and high field effects.

EE 607 Microelectromechanical Systems (3, FaSpSm) Exploration of the technology methods and physical principles of MEMS, and survey various MEMS of current interest. Prerequisite: EE 504.

EE 608 Microelectromechanical Systems Laboratory (3, Fa) Lab fabrication and analysis of several MEMS applications, including diaphragm-based sensors and actuators, microfluidic components, and deformable mirror array.

EE 612 Science and Practice of Nanotechnology (3, Fa) In-depth discussions of important topics in nanotechnology, including both the implementation and the underlying theory. Prerequisite: EE 530 or EE 470.

EE 619 Advanced Topics in Automatic Speech Recognition (3, FaSpSm) Advanced topics in automatic speech recognition, speaker recognition, spoken dialogue, conversational multimedia interfaces. Recommended preparation: EE 519 and CSCI 544 and EE 464 or EE 503.

EE 620 Advanced Topics in Applied Stochastic Models (3, FaSpSm) (Enroll in ISE 620)

EE 623 Integrated Communication Systems (3) Analysis and design of high-speed integrated communication systems at circuit and system levels. Emphasis on broadband wireless applications. Transceiver architectures, amplifiers, oscillators, frequency synthesizers. Prerequisite: EE 536a.

EE 635 Advanced Wireless Communications (3) Fundamentals of advanced wireless systems, including multi-antenna, cognitive, and cooperative systems as well as exploration of current standards in wireless networks in use today. Prerequisite: EE 535; recommended preparation: basic programming course.

EE 642 Advanced Geometrical Optics (3) First order design of optical systems; origin of aberrations and their effects on wave propagation and imaging based on geometrical and physical optics. Prerequisite: EE 529.

EE 645 Uncertainty Modeling and Stochastic Optimization (3) (Enroll in CE 645)

EE 648 Network Economics and Games (3) Economics of networks; game theory, mechanism design and auctions in networks; spectrum sharing mechanisms in communications; pricing of differentiated services; network security. Prerequisite: EE 450 and EE 464 or EE 465 or EE 503.

EE 649 Stochastic Network Optimization (3, FaSpSm) Optimization of wireless and ad-hoc mobile networks; opportunistic scheduling, flow control; backpressure routing; queue stability; energy-delay and utility-delay tradeoffs. Prerequisite: EE 464 or EE 465 or EE 503.

EE 650 Advanced Topics in Computer Networks (3, Irregular) Protocol modeling; flow and congestion control, dynamic routing, distributed implementation; broadcast communication media and multiple access protocols; local networks, satellite networks, terrestrial radio networks. Prerequisite: EE 450 and EE 465 or EE 503; recommended preparation: EE 550 or CSCI 551.

EE 652 Low-Power Wireless Networks (3, Fa) Implementation of low-power wireless protocols for medium access, scheduling, multi-hop routing, congestion control, localization, synchronization. IP stack for the Internet of Things. Wireless sensor network applications. Prerequisite: EE 450; recommended preparation: CSCI 402, strong programming skills, and experience with Linux.

study of specific problems by candidates for the degree in Electrical Engineering. Graded CR/NC.

EE 759 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

EE 754abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Green Technologies

Office of Graduate and Professional Programs

Moore, II, Ph.D. (Industrial and Systems Engineering, Civil and Environmental Engineering, Public Policy); Priya Vashishta (Chemical Engineering and Materials Science, Computer Science)

Associate Professors: Mansour Rahimi, Ph.D. (Industrial and Systems Engineering); Geoffrey R. Shiflett, Ph.D. (Aerospace and Mechanical Engineering)*

Assistant Professors: Burcin Becerik-Gerber, D. Des. (Civil and Environmental Engineering)

Professors of the Practice: Edward Maby, Ph.D. (Electrical Engineering); Aazad Madni, Ph.D. (Astronautical Engineering, Systems Architecting and Engineering)

Research Associate: Julie Albright, Ph.D.

*Recipient of university-wide or school teaching award.

Master of Science in Green Technologies

Green Technologies is a highly interdisciplinary degree program that emphasizes green systems and the environment, energy technology and efficiency, and sustainability and society. The discipline seeks opportunities for alternative sourcing, conservation, efficiency and repurposing through an understanding of product life cycles from origins to recycling or inevitable disposal. Green technologies will design products, processes and complex infrastructure systems to promote sustainable attributes of importance to the environment and the global community.

The Green Technologies program requires a minimum of 27 units (typically nine courses). At least 18 units must be at the 500-level or above, and at least 18 units must be completed in the Viterbi School of Engineering. These 18 units may reflect courses offered by other schools if cross-listed in a department in the Viterbi School. Students with B.S. degrees in engineering and science disciplines can be accepted into the program.

Chair: Julia L. Higle, Ph.D.

Faculty

Daniel J. Epstein Chair in Industrial and Systems Engineering: Sheldon M. Ross, Ph.D.
Epstein Family Professor of Industrial and Systems Engineering: Jong-Shi Pang, Ph.D.

IBM Chair in Engineering Management: F. Stan Settles, Ph.D. (Astronautical Engineering)

Gordon S. Marshall Early Career Chair in Engineering: Qiang Huang, Ph.D.

David Packard Chair in Manufacturing Engineering: Stephen C-Y Lu, Ph.D. (Aerospace and Mechanical Engineering, Computer Science)

Helen N. & Emmett H. Jones Professorship in Engineering: Milind Tambe, Ph.D. (Computer Science)

TRW Professor of Software Engineering: Barry Boehm, Ph.D. (Computer Science)

Professors: Barry Boehm, Ph.D. (Computer Science); Maged Dessouky, Ph.D. *; Randolph Hall, Ph.D.; Julia Higle, Ph.D.; Carl F. Kesselman, Ph.D. (Computer Science); Behrokh Khoshnevis, Ph.D. (Civil and Environmental Engineering; Aerospace and Mechanical Engineering); Stephen C-Y Lu, Ph.D. (Aerospace and Mechanical Engineering, Computer Science); Najmedin Meshkati, Ph.D. (Civil and Environmental Engineering)*; James E. Moore II, Ph.D. (Civil and Environmental Engineering; Public Policy); Jong-Shi Pang, Ph.D.; Sheldon M. Ross, Ph.D.; Suvaheet Sen (Electrical Engineering; Computer Science); F. Stan Settles, Ph.D. (Astronautical Engineering); Milind Tambe, Ph.D. (Computer Science); Detlef von Winterfeldt (Public Policy)

Associate Professors: Yong Chen, Ph.D.; Qiang Huang, Ph.D.; Mansour Rahimi, Ph.D.

Adjunct Professors: Paul J. Kern; Michael Mann, Ph.D.; Neil Siegel, Ph.D.

Adjunct Associate Professors: Tasos Sioukas, Ph.D.; Marilee Wheaton, M.S.

Research Associate Professor: Yigal Arens, Ph.D.

Research Associate Professor: Fernando Ordonez, Ph.D. (Computer Science)

Research Assistant Professor: Greg Placencia, Ph.D.

Adjunct Research Professors: Wanda M. Austin, Ph.D.; Mohamed I. Dessouky, Ph.D.

Associate Professors of the Practice of Industrial and Systems Engineering: Geza Bottlik, Engineer, P.E.; Nitin Kale, M.S. (Information Technology Program); Kurt Palmer, Ph.D.*

Senior Lecturers: Dana Sherman, Esq. (Civil and Environmental Engineering); Richard Vaawter, M.S. (Information Technology Program)

Emeritus Professors: Gerald A. Fleischer, Ph.D., P.E.; Homer H. Grant, M.S.; Ralph Kenney, Ph.D. (Data Sciences and Operations); Peter Will, Ph.D. (Astronautical Engineering, Chemical Engineering)

*Recipient of university-wide or school teaching award.

Honor Societies
Alpha Pi Mu

Alpha Pi Mu is the industrial engineering honor society. Qualifications for election are: juniors in the upper one-fifth of their class; seniors in the upper one-third of their class; master’s degree students who have completed at least one-third of the courses required for their degree and rank among the top 10 students in all IE master’s degree programs; and doctoral students recommended by the department chair. The adviser is Kurt Palmer, Associate Professor of the Practice of Industrial and Systems Engineering, (213) 740-5360.

Omega Rho

Omega Rho is the operations research honor society to recognize academic excellence in operations research and encourage study of operations research, management science and closely associated disciplines. Election is by nomination only during the spring semester.

Undergraduate Degree Requirements

Undergraduate Education Program Mission

The mission of the Daniel J. Epstein Department of Industrial and Systems Engineering undergraduate program is to:

• Provide students: the skills and knowledge to obtain employment and achieve leadership with the industrial and systems engineering profession or to proceed with graduate education; the intellectual resources to continue life-long learning; and the knowledge of professional ethics and critical reasoning skills necessary for contributing to society.

• Provide employers of industrial and systems engineering professionals with candidates who are technically competent, business aware, collaborative, able to communicate effectively, and ethically grounded.

• Maintain and enhance the reputation of the Epstein department within the engineering, business and academic communities.

Undergraduate Program Educational Objectives

Graduates of the Bachelor of Science in Industrial and Systems Engineering program are prepared to achieve any of the following accomplishments:

• Obtain employment in an organization that values people who demonstrate both technical competence and business awareness.

• Pursue graduate or professional education.

• Assume a leadership role in their employment organization or community.

• Utilize critical reasoning, collaboration and creativity to contribute to society.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Industrial and Systems Engineering prepares graduates to design, develop, implement, and improve integrated systems that include people, materials, information, equipment and energy. The curriculum includes in-depth instruction to accomplish the integration of systems using appropriate analytical, computational, and experimental practices.

For additional information, visit usc.edu/dept/ise.

Bachelor of Science in Industrial and Systems Engineering

The Epstein Department of Industrial and Systems Engineering offers a Bachelor of Science degree in Industrial and Systems Engineering. Additionally, information systems engineering exists as an emphasis within this industrial and systems engineering program major. An area of emphasis appears in parentheses after the primary major name on the transcript.

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied towards the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees.

Bachelor of Science in Industrial and Systems Engineering

Emphasis in Information Systems Engineering

The requirement for the degree with an emphasis in information systems engineering is 128 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied towards the major, regardless of the department in which the courses are taken. Students must choose either the computer science track or the information and operations management track. See the common requirements for undergraduate degrees.

During the freshman year, students in either track enroll in a common set of required courses. By the sophomore year, students enroll in required and elective courses for one track or the other.

** GE Category III is fulfilled by PHYS/CHM requirement.

** Electives in the CSCI/ITP/DSO or approved engineering elective lists are geared so that students can take courses in an area of interest. Courses not listed may be petitioned for approval through the department.

The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

Computer Science Electives: CSCI 351, CSCI 377, CSCI 415, EE 450

ITP/DSO Electives: ITP 251LX, ITP 252LX, ITP 325X, ITP 454X, ITP 457X, ITP 486, ITP 487, DSO 428

Approved Engineering Electives: Any of the courses listed below that are not specifically required in a student’s program may be selected to satisfy the approved engineering elective requirement. Substitutions of a graduate level ISE course will be considered upon petition.

Graduate Degree Requirements

Analytics Program

Ethel Percy Andrus Gerontology Center 240 (213) 740-4892

The Master of Science in Analytics is designed to satisfy the growing demand for professionals equipped with significant technical and quantitative training in the fundamentals of analytics for solving engineering and management problems in today’s data-intensive digital world.

Analytics is a multidisciplinary field that relates the application of engineering approaches and methods to the analysis and management of engineering and enterprise processes based on data. Learning objectives of this

Minor in Engineering Management

This minor is designed to provide students who have a sound foundation in mathematics and the sciences with tools and skills for managerial analysis and problem solving.

Science and technology are driving significant portions of American and global economies. Individuals, companies and governments are demanding products, services and systems, which is why more complicated every day. Suppliers are forced by competition to provide goods and services efficiently and economically.

Scientists and engineers are trained in scientific and technical subjects which form an excellent base for building complex, technical products, services and systems. But more and more, scientists and engineers are managing the financial, material and human resources required to turn abstract ideas into physical and virtual reality, often without any formal management training. This minor provides that training, a complement to any science or technology degree.

Application Procedures

Applicants must be upper division students in good standing and complete the Change/Addition of Major, Minor or Degree Objective form. The minor is not open to industrial and systems engineering majors.

Graduate Degree Requirements
program involve data collection, cleansing, fusing and curating, for the purpose of analyzing trends, discovering patterns and building decision models for well-reasoned decision support. Rigorous mathematical modeling and computational methods tools are at the heart of the program.

Graduates of this program will be prepared to convert data into meaningful information, embedded in decision support systems that can help organizations make important operational decisions and help set strategic direction and policy.

Master of Science in Analytics

The core of the M.S. in Analytics program consists of six foundational courses, and four elective courses, totaling 30 units. The foundational courses cover the basic topics of data science and management, statistical methods, optimization, simulation and other operations research tools. The elective courses allow students to deepen their technical skills and expose them to the applied domains where analytics is much needed; some of these domains include electricity markets, supply chains, and health care systems, and transportation.

Total units for the degree: 30

Engineering Management Program

Ethel Percy Andrus
Gerontology Center 240
(213) 740-4893

Program Director: Geza Bottlik, Engineer, P.E.

This program is designed primarily, but not exclusively, for graduate engineers whose career objectives lead to an increasing technical management responsibilities. Students interested in the engineering management objectives may also want to consider the M.S., Industrial and Systems Engineering/MBA dual degree program.

Master of Science in Engineering Management

A total of 30 units is required for the degree. A minimum of 18 units must be taken in the Epstein Department of Industrial and Systems Engineering. A total of 21 units must be at the 500 level or above. The program is available via distance education.

Applicants to the program are expected to have a degree in engineering or the equivalent.

Four courses for at least 12 units chosen to form a coherent program with the consent of the adviser.

Health Systems Management Engineering Program

This program is jointly sponsored by the Epstein Industrial and Systems Engineering Department and the USC. This degree is in revision, and applications are currently being accepted. Interested students should consider the Master of Health Administration program in the USC Price School of Public Policy.

Master of Science in Industrial and Systems Engineering

The Master of Science in industrial and systems engineering is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. This program enhances the technical capabilities of the industrial engineer. The program is available via distance education.

The M.S. program is for students who want to become technical leaders in the field of industrial and systems engineering. Applicants to the program are expected to have a bachelor’s degree in an engineering discipline with undergraduate coursework in computing, probability and statistics, and engineering economy. Admitted students who do not meet prerequisites will be assigned courses to complete the deficiencies.

A total of 30 units is required for the degree, of which at least 18 units must be completed in the Epstein Department of Industrial and Systems Engineering. Of the 30 units, 20 must be at the 500 level or above.

Health Systems Management Engineering Program

Operations Research Engineering Program

Ethel Percy Andrus
Gerontology Center 240
(213) 740-4893

Program Director: Magdalena Dessouky, Ph.D.

Master of Science in Operations Research Engineering

The Master of Science in operations research engineering is conferred upon candidates who hold bachelor's degrees in engineering, mathematics, science or related fields who successfully complete an integrated program (with departmental approval in advance) of not less than 30 units. The program must include not less than 21 units of industrial and systems engineering courses related to operations research and 9 units of approved electives. Students will be required to make up deficiencies in mathematics and statistics. Additional courses or examinations may be required at the discretion of the department before full admission to the program. The General Test of the Graduate Record Examinations (GRE) is required. Additional information is available from the department. This program is available via distance education.

Doctor of Philosophy in Industrial and Systems Engineering

The degree Doctor of Philosophy in industrial and systems engineering is also offered. See general requirements for graduate degrees.

Graduate Certificates

Graduate Certificate in Health Systems Operations

This 17-unit graduate certificate is jointly sponsored by the Epstein Industrial and Systems Engineering Department and the USC Price School of Public Policy (Master of Health Administration program), and administered by the Epstein ISE Department. This certificate is designed for students with bachelor’s degrees in applied social science, engineering or the sciences, who are interested in operations management and health care applications. The courses taken for the certificate may be applied later to the Epstein ISE Department’s Master of Science in Engineering Management degree, the USC Price School of Public Policy’s Master of Health Administration degree or the jointly sponsored M.S. in Health Systems Management. Engineering program subject to approval of the appropriate academic unit. This program is available via distance education.

Required Courses

ISE Six-Sigma Methods and Applications 3
ISE Health Care Operations Improvement 3
ISE Problems and Issues in the Health Field 4
ISE Legal Issues in Health Care Delivery, and Compliance 2
ISE Concepts and Practices in Managing 2
ISE Health Care Organizations, or 2
ISE Economic Concepts Applied to Health 4
ISE Modeling and Operations Research (4), 4
ISE Optimization Methods for Analytics (3), 3
ISE Value and Decision Theory (3) 3-4
ISE Value and Decision Theory (3) 3

Graduate Certificate in Network Centric Systems

See listing under Systems Architecting and Engineering. The program is available via distance education.

Graduate Certificate in Optimization and Supply Chain Management

This abbreviated interdisciplinary program is offered jointly with the Department of Operations Research.

Graduate Certificate in Systems Architecting and Engineering

See listing under Systems Architecting and Engineering. The program is available via distance education.

Graduate Certificate in Transportation Systems

Requirements for the Engineer in industrial and systems engineering are the same as set forth in the general requirements.

Applications for this program are not currently being accepted.

Courses of Instruction

Industrial and Systems Engineering (ISE)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

ISE 105 Introduction to Industrial and Systems Engineering (3, FaSp) A combination of plant tours, laboratory experiences, and lecture are used to introduce the philosophy, subject matter, aims, goals, and techniques of industrial and systems engineering.

ISE 220 Probability Concepts in Engineering (3, FaSp) Techniques for handling uncertainties in engineering design: discrete and continuous random variables; expectations, probability distributions and transformations of random variables; limit theorems; approximations and applications. Prerequisite: MATH 126.

ISE 235 Engineering Statistics I (3, 3p) Sampling distributions; parameter estimation, hypothesis testing; analysis of variance; regression; nonparametric statistics. Prerequisite: ISE 220.

ISE 240 Manufacturing Processes (3, Fa) Basic manufacturing processes including casting, machining, forming and welding; current trends in manufacturing processes including polymer, ceramic and composite material processing, and electronic device fabrication; introduction to numerical control and computer integrated manufacturing. Recommended preparation: MASC 110L or CHEM 115aL.

ISE 241 Manufacturing Processes (3, Fa) Facilities layout and design: material handling and transportation; site selection and sourcing; supply chain management. Prerequisite: ISE 330 and ISE 460.

ISE 330 Introduction to Operations Research: Deterministic Models (3, Fa) Introduction to linear programming; transportation and assignment problems; dynamic programming; integer programming; nonlinear programming. Prerequisite: MATH 235.

ISE 311 Introduction to Operations Research: Stochastic Models (3, 3p) Stochastic processes; Markov chains; queuing theory and queuing decision models; probabilistic inventory models. Prerequisite: ISE 220; recommended preparation: ISE 330.

ISE 344 Engineering Management (3) Examine team formation and team dynamics including organizational behavior, group dynamics, psychology, and business management, all in the context of engineering development; decision-making and negotiation. Open only to juniors and seniors.

ISE 370L Human Factors in Work Design (4, Fa) Physiological systems and psychological characteristics; ergonomics; anthropometry; effects of the physical environment on humans; occupational safety and health; work methods.

industry applications. Designing and implementing robust databases. Querying databases to extract business intelligence; Global Enterprise Resource Planning with databases.

ISE 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

ISE 404 Business and Intellectual Property Law for Engineers (3) (Enroll in CE 404)

ISE 410 Production II: Planning and Scheduling (3, FaSp) Production planning, forecasting, scheduling, and inventory; computer integrated decision systems in analysis and control of production systems. Prerequisite: ISE 320.

ISE 422L Configuring Enterprise Resource Planning Systems (3, FaSp) (Enroll in ITP 422L)

ISE 426 Statistical Quality Control (3, Fa) Quantitative aspects of statistical quality control (process control, acceptance sampling by attribute and by variable, rectifying inspection), quality assurance and the management of QC/QA functions. Prerequisite: ISE 225.

ISE 435 Discrete Systems Simulation (3, FaSp) Model design to simulate discrete event systems with basic input/output analysis using high order languages, applied to industrial systems analysis and design problems. Prerequisite: CSCI 101L and ISE 225.

ISE 440 Work, Technology, and Organization (3, Sp) Impact of technology on work and organizational design; effects of automation; design of improvement programs; information infrastructures; teams; individual behavioral outcomes. Upper division standing.

ISE 455LX Enterprise Information Portals (3, Sp) (Enroll in ITP 455LX)

ISE 460 Engineering Economy (3, FaSpSm) Utilizing principles of economic analysis for choice of engineering alternatives and engineering systems. Pre-tax and after-tax economy studies. Upper division standing.

ISE 470 Human/Computer Interface Design (3, Sp) Essentials of human factors and computer interface for the design, development, implementation, and evaluation of integrated media systems.

ISE 482 Engineering Database Applications (3) (Enroll in ITP 482)

ISE 487Lx Data Warehouses and Business Intelligence (3) (Enroll in ITP 487)

ISE 488X Managing Supply Chains with Advanced Planning and Optimization (3) (Enroll in ITP 488X)

ISE 490 Directed Research (1-8, max 12, FaSp) Individual research and readings. Not available for graduate credit.

ISE 495A/495B Senior Design Project (2-2, FaSp) a: Preparation and development of the senior project proposal. Not available for graduate credit. Senior standing in industrial and systems engineering. Prerequisite: ISE 225 and ISE 310 and IOM 435 or ISE 382. b: Group work on an industrial engineering design problem in an organization. Not available for graduate credit. Senior standing in industrial and systems engineering. Open only to industrial and systems engineering majors. Prerequisite: ISE 435 and ISE 370 or ISE 470.

ISE 499 Special Topics (2-4, max 8) Course content to be selected each semester from recent developments in industrial and systems engineering and related fields.

ISE 500 Engineering Management Decisions and Statistics (3, FaSpSm) Case-based decision and statistical analysis. Framing engineering management situations with statistical methods. Experiments, regression, ANOVA, hypothesis, factor analysis. Open only to fifth-year seniors and master’s students.

ISE 502 Construction Accounting and Finance (3) (Enroll in CE 502)

ISE 507 Six-Sigma Methods and Applications (3, FaSpSm) Comprehensive study of Six Sigma and Lean metrics, methods, and systems with their applications to manufacturing, services, quality improvement and management.

ISE 508 Health Care Operations Improvement (3, Sp) Improving operations, patient flow, quality and processes. Students will become familiar with methods for implementing change in health care settings such as hospitals or clinics.

ISE 510 Advanced Computational Design and Manufacturing (3) Study advanced concepts behind computational representations, algorithms, and mathematical foundations, and their applications in computer-aided design and manufacturing. Develop hands-on computational skills in team projects. Recommended preparation: bachelor’s degree in industrial engineering; programming experience, C++ preferred.

ISE 511L Mechatronic Systems Engineering (3, Sp) Use of mechanical, electrical, and computer engineering, math, and computer science to design of high performance and sophisticated products and processes and systems involving mechatronic. Recommended preparation: bachelor’s degree in engineering or physical sciences, and preliminary knowledge of programming in C.

ISE 512 Software Management and Economics (3, Fa) (Enroll in CSCI 512)

ISE 513 Inventory Systems (3, Sp) Deterministic and stochastic demand systems with static/dynamic models. Practice in inventory management, computerized procedures, materials requirement planning, just-in-time production, Kanban systems.

ISE 514 Advanced Production Planning and Scheduling (3, FaSp) Advanced concepts in production planning and scheduling including resource allocation, lot sizing, flow shop and job shop scheduling, workforce scheduling and assembly line balancing. Recommended preparation: prior knowledge of operations research and probability theory.

ISE 515 Engineering Project Management (3, FaSpSm) Applying industrial and systems engineering skills to problems drawn from industry, while working in teams of 3-4 students. Teach project management skills and provide direct experience in managing and executing a group project.

ISE 517 Modern Enterprise Systems (3, FaSp) Managing the process design, interfaces and resources of service and manufacturing systems, based on the state of their processes.

ISE 520 Optimization: Theory and Algorithms (3, Fa) Conditions for optimality. Nonlinear programming algorithms for constrained and unconstrained problems. Special problems such as quadratic, separable, fractional, geometric programming. Prerequisite: MATH 225 or EE 441.

ISE 524 Design of Experiments (3, FaSp) Planning data collection to investigate relationships between product/process design choices (materials, temperatures, etc.) and performance, empirical modeling to predict performance, identification of the best design choices. Recommended preparation: ISE 225.

ISE 527 Quality Management for Engineers (3, FaSp) Principles of quality management, quality philosophies and frameworks, quality leadership and strategic planning, process management, and performance measurements.

ISE 528 Advanced Statistical Aspects of Engineering Reliability (3) Advanced statistical methods applied to reliability engineering. Experimental design analysis and interpretation of multifactor reliability problems.

ISE 529 Engineering Data Analytics (3, FaSp) Theory and methods of data analytics emphasizing engineering applications: multivariate statistics, supervised learning, classification, smoothing and kernel methods, support vector machines, discrimination analysis, unsupervised learning. Prerequisite: DSO 528.

ISE 536 Linear Programming and Extensions (3, Fa) Linear programming models for resource allocation; simplex and revised simplex methods; duality; sensitivity; transportation problems; selected extensions to large scale, multibjective, and special structured models. Prerequisite: MATH 225 or EE 441.

ISE 538 Elements of Stochastic Processes (3, Sp) Random variables, stochastic processes, birth-and-death processes, continuous and discrete time Markov chains with finite and infinite number of states, renewal phenomena, queueing systems.

ISE 539 Stochastic Elements of Simulation (3, Sp) Simulation techniques combined with probabilistic analysis for solving problems in inventory theory, queuing theory, financial engineering, decision analysis, and other fields having a stochastic element. Corequisite: ISE 538.

ISE 543 Case Studies in Systems Engineering (3, FaSp) (Enroll in SAE 543)

ISE 545 Technology Development and Implementation (3, Fa) Principles and practices of technology development and implementation, with application to products and systems in manufacturing and services.

ISE 549 Systems Architecting (3, FaSp) (Enroll in SAE 549)

ISE 554 Innovation and the Engineering Enterprise (3) Examination of innovation in engineering enterprises including human behavior and human resources, organizational development, engineering management, business structures, financing the enterprise and intellectual property.

ISE 555 Invention and Technology Development (3, Sp) This project-oriented course elaborates on the process of engaging creative thought, tools and techniques for invention, and issues involved in bringing inventions to the production phase. Graded CR/NC.

ISE 556 Stochastic Systems (3, Sp) (Enroll in EE 556)
ISE 560 Analysis of Algorithms (3, FaSp) (Enroll in CSCI 570)

ISE 561 Economic Analysis of Engineering Projects (3, FaSp) Economic evaluations of engineering systems for both government and private industry; quantitative techniques for evaluating non-monetary consequences; formal treatment of risk and uncertainty. Prerequisite: ISE 460.

ISE 562 Value and Decision Theory (3, Fa) Decision making under risk and uncertainty; utility theory; sufficient statistics; conjugate prior distributions; terminal and pre-posterior analysis; Bayesian statistics versus classical statistics.

ISE 563 Financial Engineering (3, Sp) Concepts underlying the economic analysis of engineering projects; applications to call and put options; utility theory and mathematical optimizations models and simulation. Recommended preparation: ISE 220 or an equivalent course in probability.

ISE 565 Law and Finance for Engineering Innovation (3) Students will identify, formulate and resolve legal, financial and ethical issues affecting innovation in engineering organizations including legal structures, financing and intellectual property rights. Open only to graduate students.

ISE 566 Financial Accounting Analysis for Engineering (3, Sp) Identification, formulation and solution of financial accounting problems in engineering enterprises. Legal context of financial decisions, process cost determination and allocation, financial reports, and reporting systems. Open only to graduate students.

ISE 567 Collaborative Engineering Principles and Practice (3, Sp) Scientific principles and industrial practices defining how a team of stakeholders should collaboratively work together to reach agreement on complex engineering tasks. Open only to graduate students in engineering.

ISE 568 Machine Learning (3, Fa) (Enroll in CSCI 569)

ISE 570 Human Factors in Engineering (3, Fa) Psychological and physiological characteristics of humans; how they limit engineering design of machines and human-machine systems.

ISE 573 Work Physiology (3) Survey of metabolic processes in the performance of physical work, study of individual and environmental factors affecting these processes.

ISE 574 Probabilistic Reasoning (3, Fa) (Enroll in CSCI 573)

ISE 576 Industrial Ecology: Technology-Environment Interaction (3) Concepts and methods to analyze the environmental impacts of industrial systems, including lifecycle assessment, material flow analysis, design for environment and sustainable consumption.

ISE 580 Performance Modeling and Simulation (3, FaSp) Introduction to modeling and analysis of stochastic systems, with an emphasis on analytic methods for Markovian systems and discrete-event simulation of non-Markovian systems. Recommended preparation: probability and statistics, including hypothesis testing and introductory computer programming.

ISE 581 Negotiation For Engineering Management (3, Sp) Decision making techniques for the engineering manager including negotiation principles, contract negotiation, dispute resolution, auctions, bidding, voting and coalition formation.

ISE 582 Web Technology for Industrial Engineering (3, Fa) A fast-paced, project-based introduction to designing and implementing interactive Web applications. Emphasizes skills for building engineering and market research applications requiring information gathering, analysis, representation. Prerequisite: ISE 382.

ISE 583 Enterprise Wide Information Systems (3, FaSp) The role of enterprise resource planning systems (ERPs) in an organization and the task of implementing and managing the IS function.

ISE 585 Strategic Management of Technology (3, FaSp) Management skills and tools for technology intensive enterprises. Life cycle analysis of technology from planning through exploitation, obsolescence and renewal.

ISE 587 Risk Analysis (4) (Enroll in PPD 589)

ISE 589 Port Engineering: Planning and Operations (3, Fa) (Enroll in CE 589)

ISE 590 Directed Research (1-12) Research leading to the master’s degree; maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

ISE 594ab Master’s Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

ISE 599 Special Topics (2-4, max 9, Fa) Course content will be selected each semester to reflect current trends and developments in the field of industrial and systems engineering.

ISE 630 Foundations of Optimization (3, Sp) Convex sets, convex functions, structures of optimization problems, Lagrangian and conjugate duality. First and second order optimality conditions; applications in engineering and management. Recommended preparation: Calculus III and Linear Algebra.

ISE 632 Network Flows and Combinatorial Optimization (3, Sp) Combinatorial optimization, particularly graph problems. Shortest paths, max flow, minimum cost flows, spanning trees, matroids, submodular functions, Bipartite and general matchings, polyhedral combinatorics, total unimodularity. (Duplicates credit in ISE 532.) Prerequisite: ISE 536: recommended preparation: familiarity with the theory of linear programming and with mathematical proofs; knowledge of linear algebra.

ISE 638 Stochastic Optimization (3, FaSp) Stochastic linear and integer programming, multi-stage stochastic programming, application, models and algorithms. Recommended preparation: A first graduate course in optimization and the ability to program in a high level language are essential.

ISE 645 Uncertainty Modeling and Stochastic Optimization (3, Sp) (Enroll in CE 645)

ISE 651 Seminar in Industrial and Systems Engineering (1, max 4, FaSp) Current research, guest speakers in the field; review papers; guidance in preparing research proposals and special projects. (Duplicates credit in the former ISE 650abc.) Open only to fifth-year seniors and master’s students. Graded CR/NC.

ISE 670 Advanced Analysis of Algorithms (3, Fa) (Enroll in CSCI 670)

ISE 671 Randomized Algorithms (3, Fa) (Enroll in CSCI 671)

ISE 690 Directed Research (1-4, max 8, FaSpSm) Laboratory study of specific problems by candidates for the degree Engineer in Industrial and Systems Engineering. Graded CR/NC.

ISE 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Informatics Program

Ethel Percy Andrus
Gerontology Center

Information Program

Assistant Director: Winnie Callahan, Ed.D.

Faculty

Professors: Barry Boehm, Ph.D. (Computer Science, Industrial and Systems Engineering); Ramesh Govindan, Ph.D. (Computer Science, Electrical Engineering); Julia Higel, Ph.D. (Industrial and Systems Engineering); Carl Kesselman, Ph.D. (Industrial and Systems Engineering, Computer Science); Neno Medvidovic, Ph.D. (Computer Science); Shri Narayanan, Ph.D. (Electrical Engineering, Computer Science, Linguistics, Psychology); Viktor Prasanna, Ph.D. (Electrical Engineering); Suraj Sen, Ph.D. (Industrial and Systems Engineering, Electrical Engineering, Computer Science); Cyrus Shahabi, Ph.D. (Computer Science); Gaurav Sukhatme, Ph.D. (Computer Science, Electrical Engineering); Milid Tambe, Ph.D. (Computer Science, Industrial and Systems Engineering); Priya Vashishtha, Ph.D. (Physics, Computer Science, Biomedical Engineering)

Assistant Professor: Yan Liu, Ph.D. (Computer Science)

Research Professors: Herbert Schorr, Ph.D. (Computer Science); William Swartout, Ph.D. (Computer Science)

Research Associate Professor: Clifford Neuman, Ph.D. (Computer Science)

Professor of the Practice: Roger Schell, Ph.D.

Senior Lecturer: Blaine Burnham, Ph.D.

Lecturer: Lyndon Pierson

Master of Cyber Security

Program Director: Blaine Burnham, Ph.D.

The Master of Cyber Security (MCBS) is intended for graduate students who desire to: obtain jobs in which knowledge and skills for the creation and analysis of trustworthy systems and networks are required and continue an education path toward a doctorate degree with focus on information security. It is also for individuals who are in degree programs or job fields that have some

Assistant Professor: Yan Liu, Ph.D. (Computer Science)

Research Professors: Herbert Schorr, Ph.D. (Computer Science); William Swartout, Ph.D. (Computer Science)

Research Associate Professor: Clifford Neuman, Ph.D. (Computer Science)

Professor of the Practice: Roger Schell, Ph.D.

Senior Lecturer: Blaine Burnham, Ph.D.

Lecturer: Lyndon Pierson
responsibility with information security and who desire enhanced knowledge and skills.

Upon completion of this program, students will have learned the fundamental theory and practices for designing, engineering and operating high assurance secure information systems. They will be well versed in the challenges and problems of secure operating systems, secure aware applications, secure networking, use of cryptography and key management. They will understand how to develop and formally model a security policy, and how sound policy taxonomy drives technology decisions. Students will gain the knowledge and concepts necessary to administer environments that require high levels of information security. Students will understand the value of these systems, the business model of threat, the distinct threat categories from user abuse to malicious subversion and mitigation strategy. They will understand that a foundation of sound principles critically influences why some information security plans succeed and why others fail. Students will have hands-on experience in situations that simulate real-world scenarios with all technical and theoretical situations through extensive laboratory work, which will be designed by current and former information security practitioners.

Master of Science in Data Informatics

Program Director: Herb Schorr, Ph.D.

The social emergence of large data environments and infrastructures (Big Data) in diverse domains and uses has spawned a requirement for analysis of the information contained. Past experience has shown that extracting value from large information stores can often be difficult due to the intrinsic nature of data, and the limits on ability to intelligently mine the information to add value to the organization.

The USC Viterbi Master of Science in Data Informatics provides students with the knowledge and skill to: a) understand and contribute toward the significant technical challenges created by large data environments, including architecture, security, integrity, management, scalability, artificial intelligence topics, and distribution; b) understand the principles and application of informatics, and the goals of enterprise intelligence; and c) utilize technical/engineering skills coupled with informatics capabilities to provide enterprise-centric solutions to stakeholders. The degree features application of knowledge and skill in hands-on type experiences, with the goal of having students leave the program having "lived in the data."

Students will understand the overall field of data analytics, the role of the analyst and/or data scientist, and the domains where informatics skills can be applied to critical organization missions. They will understand how data management, data visualization, data mining, and artificial intelligence techniques (specifically machine learning) are critical to the analysis process, and how these can be applied to real world challenges. Through an extensive elective track, they can find the specializations that will help them better prepare themselves for the area(s) of analytics in which they hope to contribute. Finally, students will participate in a unique professional practicum that will focus on real world challenges, brought in by external customers.

Courses of Instruction

INFORMATICS PROGRAM (INF)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

INF 520 Foundations of Information Security (3) Threats to information systems; technical and procedural approaches to threat mitigation; secure system design and development; mechanisms for building secure security services; risk management. Recommended preparation: Background in computer security preferred. Recommended previous courses of study include computer science, electrical engineering, computer engineering, management information systems, and/or mathematics.

INF 521 Application of Cryptography to Information Security Problems (3) Application of cryptography and cryptanalysis for information assurance in secure information systems. Classical and modern cryptography. Developing management solutions. Recommended preparation: Previous degree in computer science, mathematics, computer engineering, or informatics; understanding of number theory and programming background are helpful.

INF 522 Policy: The Foundation for Successful Information Assurance (3) Policy as the basis for all successful information system protection measures. Historical foundations of policy and transition to the digital age. Detecting policy errors, omissions and flaws. Recommended preparation: Background in computer science, or a strong willingness to learn. Recommended previous courses of study consist of: steps in computer science, electrical engineering, computer engineering, management information systems, and/or mathematics.

INF 523 Assurance in Cyberspace Applied to Information Security (3) Assurance as the basis for believing an information system will behave as expected. Approaches to assurance for fielding secure information systems that are fit for purpose. Recommended preparation: Prior degree in computer science, electrical engineering, computer engineering, management information systems, and/or mathematics. Some background in computer security preferred.

INF 524 Distributed Systems and Network Security (3) Fundamentals of information security in the context of distributed systems and networks. Threat examination and application of security measures, including firewalls and intrusion detection systems. Recommended preparation: Prior degree in computer science, mathematics, computer engineering, or informatics. It is recommended that students have a working understanding of communication networks and computer architecture, and some programming facility.

INF 525 Trusted System Design, Analysis and Development (3) Analysis of computer security and why systems are not secure. Concepts and techniques applicable to the design of hardware and software for Trusted Systems. Recommended preparation: Prior degree in computer science, mathematics, computer engineering, or informatics; advanced knowledge of computer architecture, operating systems, and communications networks will be valuable.

INF 526 Secure Systems Administration (3) The administrator’s role in information system testing, certification, accreditation, operation and defense from cyber attacks. Security assessment. Examination of system vulnerabilities. Policy development. Recommended preparation: Previous degree in computer science, mathematics, computer engineering, or informatics. Knowledge and skill in programming.

INF 527 Secure Systems Engineering (3) The process of designing, developing and fielding secure information systems. Developing assurance evidence. Completion of a penetration analysis. Detecting architectural weaknesses. Case studies. Recommended preparation: Previous degree in computer science, mathematics, computer engineering, or informatics. Some backgrounds in computer science, computer engineering, and/or information security undergraduate program. Also, it is highly recommended that students have successfully completed course work involving policy and network security.

INF 528 Computer and Network Forensics (3) Preservation, identification, extraction and documentation of computer evidence stored on a computer. Data recovery: cryptography: types of attacks; steganography; network forensics and surveillance. Recommended preparation: Previous degree in computer science, mathematics, computer engineering, or informatics; a working understanding of number theory and some programming knowledge will be helpful.
INF 550 Overview of Data Informatics in Large Data Environments (3, FaSp)
Fundamentals of big data informatics techniques. Data lifecycle; the data scientist; machine learning; data mining; NoSQL databases; tools for storage/processing/analytics of large data set on clusters; in-data techniques. Recommended preparation: Basic understanding of engineering and/or technology principles; basic programming skills; background in probability, statistics, linear algebra and machine learning.

INF 551 Foundations of Data Management (3, FaSp)
Function and design of modern storage systems, including cloud; data management techniques; data modeling; network attached storage, clusters and data centers; relational databases; the map-reduce paradigm. Recommended preparation: INF 550 taken previously or concurrently; understanding of operating systems, networks, and databases; experience with probability, statistics, and programming.

INF 552 Machine Learning for Data Informatics (3, FaSp)
Practical applications of machine learning techniques to real-world problems. Uses in data mining and recommendation systems and for building adaptive user interfaces. Recommended preparation: INF 550 and INF 551 taken previously or concurrently; knowledge of statistics and linear algebra; programming experience.

INF 553 Foundations and Applications of Data Mining (3, FaSp)

INF 554 Information Visualization (3, FaSp)
Graphical depictions of data for communication, analysis, and decision support. Cognitive processing and perception of visual data and visualizations. Design and effective visualizations. Implementing interactive visualizations.

INF 555 User Interface Design, Implementation, and Testing (3, FaSp)
Understand and apply user interface theory and techniques to design, build and test responsive applications that run on mobile devices and/or desktops. Recommended preparation: Knowledge of data management, machine learning, data mining, and data visualization.

INF 556 User Experience Design and Strategy (3, FaSp)
The practice of User Experience Design and Strategy principles for the creation of unique and compelling digital products and services. Open only to Data Informatics majors. Recommended preparation: Basic familiarity with web development and/or graphic design using a digital layout tool.

INF 560 Data Informatics Professional Practicum (3, FaSp)
Student teams working on external customer data analytic challenges; project/presentation based; real client data, and implementable solutions for delivery to actual stakeholders; capstone to degree. Recommended preparation: Knowledge of data management, machine learning, data mining, and data visualization.

INF 590 Directed Research (1-12, FaSpSm)
Research leading to the master’s degree; maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

ITP 360x Information Technology Practicum
CTAN Introduction to 3-D Computer Animation
Minor in Applied Computer Security

The minor in applied computer security combines both theoretical concepts and practical skills to prepare students for a career in information security while incorporating their major field of work. Students will study various areas of computer security, including hacking, ethics, forensics, networking and security management. Electives are available depending on the students’ academic and professional goals.

Requirements for completion (five core courses plus one elective)

Minimum units: 18

REQUIRED COURSES (14 UNITS)

ITP From Hackers to CEOs: Introduction to Information Security
312lx Information Security
325x Network Security
345lx Advanced Digital Forensics
475x Cyber Law and Privacy

ELECTIVE (4 units)

ITP Web Application Security
425x
ITP Computer Programming
445x
ITP Information Technology Practicum
475x

Minor in Computer and Digital Forensics

The computer and digital forensics minor combines both theoretical concepts and practical skills to prepare students for a career as a digital forensics investigator. Students will study various areas of cyber-forensics, including forensic methodologies and processes, digital evidence-gathering and preservation, investigations and examinations, and court presentation. Electives are available depending on the students’ academic and professional goals.

Requirements for completion (core courses plus electives)

Minimum units: 18

REQUIRED COURSES (4 COURSES, 12 UNITS)

ITP From Hackers to CEOs: Introduction to Information Security
312lx Information Security
325x Network Security
345lx Advanced Digital Forensics
475x Cyber Law and Privacy

FORENSIC ELECTIVES (CHOOSE two, 6 UNITS)

ITP Information Technology Practicum
325x Network Security
445x Cyber Breach Investigations

Information Technology Program

Olin Hall 412
(413) 740-4542
Minor in Computer Programming

The minor in computer programming focuses on the practical programming skills necessary to solve problems in a variety of domains including on desktops, laptops, mobile devices, the Web, the cloud and for video games. Upon completion of the minor, students will have strong experience with the application of programming languages in several different contexts.

Students with a declared major in computer science, computer science and computer engineering, computer science (games), or computer science and business administration are not eligible for this minor. Students with a declared minor in computer science are likewise not eligible.

Requirements for completion (two core courses plus 12 units of electives)

Minimum units: 17

Minor in Enterprise Information Systems

The 21st century has seen tremendous growth in global enterprises, which has required robust and integrated information systems to support streamlined business processes. These Enterprise Information Systems, also known as Enterprise Resource Planning (ERP) systems, have continued to mature and dominate the information systems of corporations. Most Fortune 500 companies have adopted ERP systems. This minor combines business process management and information technology to prepare students for technical careers as well as business consulting in the ERP domain. Students will study various areas of ERP implementation, configuration, business intelligence, security and supply chain management. Electives are available depending on the students’ academic and professional goals.

Minor in Innovation: The Digital Entrepreneur

The Minor in Innovation: The Digital Entrepreneur is jointly sponsored by the Information Technology Program in the Viterbi School of Engineering and the Lloyd Greif Center for Entrepreneurial Studies in the USC Marshall School of Business. The minor is designed for students from a range of backgrounds who are interested in starting their own digital ventures, working for start-up companies, or pursuing traditional jobs with large corporations and consulting firms that may involve launching new digital business units. Students will learn all major elements of launching a digital venture including ideation, feasibility analysis, high-tech product management, online customer acquisition, technology implementation, online business models and monetization. Students will work on launching a digital venture in a team-based environment in the capstone class.

The Information Technology Program in the Viterbi School of Engineering handles advising and admissions relating to the minor, consulting as needed with the Grief Center for Entrepreneurial Studies in the Marshall School of Business.

Requirements for completion (six core courses plus minimum 6 units of electives)

Minor in Mobile App Development

Students will study and gain experience with the technologies, tools, frameworks and languages that are most commonly used in developing apps for mobile devices such as smartphones and tablets. They will learn the basics of the programming languages, how to design mobile interfaces, how to use the libraries to build apps that have the proper look and feel, how to design and handle user input, and other aspects. Students will go through the process of building a mobile app from idea to product. Students will learn the fundamental principles of mobile apps, so that they will be prepared for the new technologies and frameworks that are constantly being developed.

Students should meet the regular admissions standards and have a declared USC major. Students will complete an application for the minor with the Viterbi School of Engineering. For specific information on admission and application procedures, contact the Information Technology Program at (213) 740-4542.

Minor in Video Game Design and Management

The video game design minor integrates theoretical concepts and practical skills to prepare students for a career in interactive entertainment, specifically the video game industry. Students will be exposed to a variety of design concepts related to creating video games including level design, game play control, user interface, multiplayer, game mechanics, and storytelling. As opposed to the video game programming minor where students will be writing code and programming game engines, students in the video game design and management minor will apply design concepts to different game genres and use game design software tools to create a working demo of a video game during the course of the minor program.

* It is recommended to take an introductory programming course before taking CTIN 483. Suggested courses: ITP 109, ITP 115, ITP 165.

** CTIN 483 and CTIN 488 are prerequisites; enrollment in CTIN 484L and CTIN 489 is concurrent.

Minor in Video Game Programming

The video game programming minor integrates the theoretical concepts and practical skills to prepare students for a career in interactive entertainment, specifically the video game industry. Through integration of two major disciplines (computer science and information technology), students will be exposed to a variety of programming concepts related to creating video games including: 3-D graphics, artificial intelligence, particle systems, rendering, collision detection, game algorithms, physics concepts, and math formulas. In contrast to the video game design minor where the focus is applying design concepts and using software design tools, students in the video game programming minor will evaluate, write and debug code, in addition to creating a game engine during the course of the minor.

This minor features an optional capstone that is a team-based, year-long game development project. Students are only eligible for the capstone after having completed all the required courses as well as the required three ITP elective units. The capstone must be taken in both the fall and spring semesters of a single academic year.

Requirements for completion (four core courses plus 6 units of electives)

Minimum units: 19

Core courses (13 units)

</tbody>
</table>

* ITP 165x and ITP 360x can be waived for students who have taken CSCI 103 and CSCI 104. However, these students must take an additional elective course in order to have the appropriate number of upper-division units.

** Optional capstone. See details above for requirements.

Recommended preparation: MATH 118x or MATH 123.
ITP 204x Coding I: Web Publishing and Programming (4) Introduction to the fundamentals of programming through the lens of interactive websites. Covers both HTML/CSS layout as well as the JavaScript programming language.

ITP 209x Object Oriented Programming Using Java (3) Basic object-oriented concepts and object-oriented analysis and design as they relate to Java technology. Object-oriented programming for developing applications with Java technology. Prerequisite: ITP 109x.

ITP 214x Coding II: Electronic Prototyping (4) Fundamentals of creating electronic prototypes. Covers both software (including Python, object-oriented programming, and Linux) as well as hardware (including electrical theory and hardware design). Prerequisite: ITP 204x.

ITP 216x Web Animation and Interactivity (2, FaSp) 2-D vector graphics for web and animation. Scripting techniques for interactivity. Action Script syntax, logic and control. Recommended preparation: basic computer knowledge.

ITP 230x Video Game Quality Assurance (4, FaSp) Survey game software development through quality assurance and in-depth analysis of the development cycle with a focus on bug testing systems and methodologies. Not available for major credit in electrical engineering.

ITP 240x Internet Technologies (4) Overview of emerging technologies on the Internet including multimedia components, networking, security tools, web-based databases, and wireless systems.

ITP 280 Video Game Production (4, FaSp) History of video games; overview of game genres; phases of video game development (concept, preproduction, production, post-production); roles of artists, programmers, designers, and producers.

ITP 300x Database Web Development (3, Fa) Fundamental theory and technologies for creating dynamic, database-driven Websites: Structured Query Language. Prerequisite: ITP 104x; Recommended preparation: ITP 204x.

ITP 301x Interactive Web Development (4, Sp) Design, programming techniques for creating interactive, dynamic Web pages. Web development technologies and techniques include scripting fundamentals, Javascript, dynamic HTML, Actionscript, and Flash. Not available for major credit in engineering. Prerequisite: ITP 104x.

ITP 302x Advanced Web Publishing (2) Advanced topics in Web Publishing including HTML5, CSS3, and jQuery. Concept and theory of responsive design. Miscellaneous Webmaster topics including analytics, podcasting and search engine optimization. Prerequisite: ITP 104x.

ITP 304x Technologies for Building Online Political Campaigns (4) Key technology components necessary in building a successful online political campaign. Fundamentals of implementing and managing a online political campaign.

ITP 305x Advanced 3D Modeling, Animation, and Special Effects (3, Sp) Advanced modeling, surfacing, and animation techniques as well as dynamics, scripting, and other advanced 3D animation procedures. Not available for major credit in engineering. Prerequisite: ARCH 207x or ITP 215Lx.

ITP 309x Developing Enterprise Applications Using Java (3) Java architecture and key logic for business components; Servlets, Server Pages and Enterprise Java Beans technologies. Design and construct secure and scalable n-tier applications.

ITP 310x Design for User Experience (3) Fundamental concepts, techniques, practices, workflows, and tools associated with the practice of user experience and interaction design in web and mobile applications.

ITP 315x 3D Character Animation (3) Advanced exploration of the process of bringing 3D characters to life from concept to model, and through production to finished performance. Not available for major credit in electrical engineering. Prerequisite: ITP 215Lx.

ITP 333x Computer Graphics and Animation Scripting (4) Applications of the Python programming language to create tools for computer graphics and animation. Topics include linear algebra for graphics, exporters, and procedural asset generation. Prerequisite: ITP 214x.

ITP 340x Mobile App Design (3) Fundamental concepts, techniques, practices, workflows, and tools associated with the practice of user experience design for mobile apps. Prerequisite: ITP 140x.

ITP 341x App Development for Phones and Tablets (3) Develop phone and tablet applications for open-source platforms such as Android that utilize the core functionality of mobile devices such as GPS, accelerometers, touch gestures. Prerequisites: CSCI 104L, ITP 365x or ITP 367x.

ITP 342 Mobile Application Development (3) Develop applications for mobile devices such as iPhones and iPads (iOS) and other smart phones (Android). Build a mobile application from start to finish. Prerequisite: CSCI 104 or ITP 365x or ITP 367x.

ITP 343 Mobile Development for Content and Media (1) Creating media-focused mobile applications. Topics include recording/playback, audio synthesis, stream mixing, and positional audio. Corequisite: ITP 342.

ITP 344x Advanced Topics in Mobile App Development (3) Advanced topics in mobile app development such as using REST services, security, cloud integration, NFC (near field communication), wireless networking for mobile apps, monetizing apps, and the latest frameworks to create advanced apps. Prerequisite: ITP 342L.

ITP 360x 3D Compositing and Visual Effects (3) Advanced techniques for 3D animation and visual effects development including 3D pre-visualization, match moving, dynamics, multi-pass rendering, and digital compositing. Not available for major credit in engineering. Prerequisite: ITP 215Lx.

ITP 365x Managing Data in C++ (3) Overview of basic data structures and algorithms including linked lists, stacks, queues, binary trees, and hash tables. Prerequisite: ITP 104x or ITP 113x or ITP 165x.

ITP 367x Advanced Coding (4) Accelerated introduction to the C++ programming language. Advanced programming concepts including memory allocation, data structures, and the Standard Template Library. Prerequisite: ITP 214.

ITP 368x Programming Graphical User Interfaces (3) Programming applications with dynamic graphical user interfaces. Topics include events, controls, resources, data bindings, styles, and user experience. Prerequisite: CSCI 104 or ITP 365x.

ITP 375x Digital Forensics (3, Fa) Forensic science techniques. Digital evidence preservation and presentation. Processes and methodologies for digital analysis. Not available for major credit in engineering. Prerequisite: ITP 121Lx.

ITP 380 Video Game Programming (4, FaSp) Underlying concepts and principles required for programming video games (topics include vectors, transformations, 3-D math, geometric primitives, matrices). Prerequisites: CSCI 104x or ITP 365x.

ITP 382x Mobile Game Programming (3) Concepts and techniques required to develop games for smartphones and tablets. Topics include sprites, collision detection, mobile input, artificial intelligence, and augmented reality games. Prerequisite: CSCI 104x or ITP 365x.

ITP 387x Cloud Architecture and Applications (4) Survey of "infrastructure as a Service"; and online application development. Concepts include online storage, computation, virtualization, messaging, and monetization. Prerequisite: CSCI 104x or ITP 365x or ITP 367x.

ITP 391x Video Game Project Management (4-12) Project management basics for the video game industry, focusing on external development. Examine the role of the producer, managing development and coordinating with various stakeholders. Prerequisite: ITP 280; ITP 280 is Project management for the video game industry, focusing on internal development. Creating ROIs, P&Ls, managing internal creative personnel, and coordinating with internal and external stakeholders.

ITP 393x Video Game Design Documents (2) Creation of design documents, from treatment to Game Design Document (GDD). Structure documents for a game of use by team members who will create the game. Prerequisite: ITP 280.

ITP 404x Modern Technologies of Web Development (3, Fa) Provide students with the necessary skills to build web applications using modern techniques, frameworks, libraries, and tools that are used among developers within the industry. Prerequisite: ITP 301Lx or CSCI 351.
ITP 455x Professional Applications and Frameworks in Web Development (3) Provide students with the necessary skills to build, maintain, scalable, and testable web applications using frameworks, tools, and techniques common in the industry. Prerequisite: CSCI 351 or ITP 300.

ITP 411x Multimedia and Video Production (3, FaSp) Visual communication and storytelling are essential skills, especially in the digital age. Overview of techniques and software necessary to create, edit, and deliver compelling images and video. Not available for major credit in engineering. Prerequisite: ITP 315L and ITP 305x or ITP 310x or ITP 360x.

ITP 413x 2-D Design and Prototyping (3) Explore the range of 2-D printing and prototyping technologies, and their application in modern industrial, design, and creative fields.

ITP 421x Advanced Programming for Enterprise Information Systems (3) Object-Oriented Programming for enterprise information systems. Working with classes, objects, database tables, SQL. Designing reports and graphical user interfaces. Leveraging service oriented architecture. Not available for credit for engineering majors. Prerequisite: ITP 320x; recommended preparation: object oriented programming.

ITP 422l Configuring Enterprise Resource Planning Systems (3) Business process integration is the core advantage of using ERP systems. Analyze, configure, and test business processes for a company from the ground up. (Duplicates credit in former ITP 322.) Prerequisite: ITP 320Lx or ISE 583.

ITP 425x Web Application Security (4) Web application security techniques, eCommerce vulnerabilities. Online fraud. Solutions to spam and identity theft. Not available for major credit in Engineering. Prerequisite: CSCI 321 or ITP 301Lx or ITP 325x.

ITP 435x Professional C++ (4, Sp) Applications of advanced concepts in C++ including lambda expressions, template metaprogramming, secure coding, parallel programming techniques, and the boost library. Prerequisite: CSCI 104x or ITP 365x.

ITP 437x Secure Programming (3) Practical techniques for prevention, assessment, and resolution of security vulnerabilities in software. Prerequisite: CSCI 104x or ITP 365x.

ITP 438x Graphics Shader Programming (3, Fa) Implementation of advanced graphical effects with shaders in a production environment. Topics include math for shaders, lighting, mapping techniques, procedural generation, and global illumination. Prerequisite: ITP 165x.

ITP 439x Compiler Development (3) Practical applications of techniques used to develop a programming language compiler. Prerequisite: ITP 435x.

ITP 440x Enterprise Data Management (3) Advanced concepts in database management; design, customization, maintenance and management of a database in an enterprise environment. Prerequisite: IOM 435 or ITP 310.

ITP 442x Mobile App Project (4) Capstone course for Mobile App Development minor. Work in project teams to develop new mobile app from start to finish. Meet with client, create app design, develop, test, and demonstrate app to client. Prerequisite: ITP 140.

ITP 444 Social Game Development Workshop (2) Hands-on development of video games for social media; realities of the social games market; development tools and processes. Prerequisite: ITP 101.

ITP 445 Macintosh, OSX, and iOS Forensics (3) Digital forensics. Digital evidence. Apple Mac, Macintosh, OSX, iOS. iPhone. iPad. Prerequisite: ITP 375x.

ITP 454x Enterprise Resource Planning, Design, and Implementation (3) Process and requirements to implement an Enterprise Resource Planning System (ERP). Set up server, implement ERP system, then transfer and configure database for case company. Not for major credit for Electrical Engineering students. Prerequisite: ITP 320x.

ITP 454Lx Information Enterprise Portals (3) Enterprise Information Portals for various case companies will be explored. Students will design, install, configure and administer core functionalities of a basic portal solution. Prerequisite: ITP 320Lx.

ITP 457 Network Security (4) Network policy and mechanism, firewalls, malicious code, intrusion detection, prevention, response; cryptographic protocols for privacy; risks of misuse, cost of prevention, and societal issues. Prerequisite: ITP 357x.

ITP 460x Web Application Project (4, Sp) Skills to plan, analyze, build, and launch professional Web sites with actual clients. Includes project management, documentation, technology assessment, security, UI/Q/A, and various methodologies. Recommended preparation: One 300-level Web minor course.

ITP 466 Building the High Tech Startup (4) Teach students the basic technologies and processes involved in building web and mobile startups. Students will be introduced to the different aspects of building a web startup including online business models; product management, Agile development processes, technology platforms and operations, customer development and online marketing.

ITP 470x Information Technology Practicum (1-4, max 8, FaSpSm) Independent technology project related to specific topics under the direction of a faculty member. Not available for graduate credit in Engineering. Recommended preparation: appropriate 300-level course work to topic of study.

ITP 476 Technologies for Interactive Marketing (4) Designed to introduce students to technologies, concepts and strategies in the emerging online advertising ecosystem. Through lectures, discussions, and projects, students learn strategies and tactics to drive traffic to a website. They learn how to analyze and measure the efficacy of their plans. Lastly, they will work with a real client and with a real budget to craft and execute an online marketing plan.

ITP 479 Cyber Law and Privacy (3) Cyber legal issues, search and seizure, 4th amendment and digital evidence, private searches, case law relating to search and seizure.

ITP 480x Information Technology Internship (1-4, max 8) Practical experience in applying information technology skills in real-world settings. Supervised internship at companies and start-ups. Balancing academic rigor with corporate challenges and deadlines. Not available for graduate credit. Graded CR/NC. Recommended preparation: knowledge of chosen function area.

ITP 482x Engineering Database Applications (3) Planning and implementation of engineering information systems that interface with a large database. Emphasis is placed on web-based data entry and retrieval. Prerequisite: CSCI 101L or IOM 435 or ISE 382.

ITP 484x Multiplayer Game Programming (3) Techniques for developing networked multiplayer games. Topics include Internet protocols, network topology, data streams, object sharing, client prediction, latency, and back-end databases. Prerequisite: ITP 310.

ITP 485x Programming Game Engines (4, FaSp) Techniques for building the core components of a game engine; 2-D/3-D graphics, collision detection, artificial intelligence algorithms, shading, programming input devices. Prerequisite: ITP 380.

ITP 486 Securing and Auditing Enterprise Resource Planning Systems (3) Management and technical issues related to the security of ERP systems. Students will audit ERP systems and apply appropriate security controls. Prerequisite: ITP 320x.

ITP 487 Data Warehouses and Business Intelligence (3) Rigorous modeling process leading from data to decisions. Explores theory and practice of Data Warehouses. Deriving Business Intelligence for strategic enterprise management. Prerequisite: ITP 320x.

ITP 488x Managing Supply Chains with Advanced Planning and Optimization (3) Drivers and obstacles to the process of coordinating the flow of material/information along the logistics chain. Optimize the supply network, from raw materials to sales. Not available for major credit in engineering except toward undergraduate and graduate programs offered by the Department of Industrial and Systems Engineering. Prerequisite: ITP 320x.

ITP 489 In-Memory Database Systems for Real Time Analytics (3) Examines the design, architecture, and capabilities of in-memory database and their application to real-time analytics. Prerequisite: ITP 320x or ITP 482.

ITP 491x Level Design and Development for Video Games (4) Theories and practices of defining, prototyping, testing, and refining a video game level, development of game level documents, and production of game level assets. Prerequisite: ITP 320x.

ITP 496 The Startup Launchpad Lab (3) A real world, hands-on learning experience on what it’s like to actually start a high-tech company. Students will work in teams to design, prototype and implement version 1.0 of a high tech web or mobile startup. Prerequisite: BAEP 451, BAEP 452, ITP 466 and ITP 476; corequisite: BAEP 456.

ITP 499x Special Topics (1-4, max 8) Recent developments in computers and data processing.

ITP 555 Functionality of Enterprise Resource Planning Systems (1) The functionality of Enterprise Resource Planning Systems (ERPs); the methods of implementation and the integration of information throughout an organization are discussed and analyzed.
Manufacturing Engineering

Program Director: B. Khesnevish, Ph.D.

Master of Science in Product Development Engineering

Manufacturing engineering at USC is a multidisciplinary program that confers the degree of Master of Science and is designed to produce graduates capable of responding to the needs of modern, up-to-date manufacturing. These graduates should be able to design, install and operate complex manufacturing systems made up of people, materials, automated machines and information systems. The Departments of Computer Science, Electrical Engineering, Industrial and Systems Engineering, Materials Science, Mechanical Engineering, and Entrepreneurship participate in the Manufacturing Engineering Program.

Course work in the program will train students in traditional manufacturing engineering topics, such as materials selection and process design. Additional courses will include the more modern, system-level concepts of integrated product and process design, applications of modern information technology to design and manufacturing, hands-on laboratories using advanced manufacturing equipment and commercial software, and entrepreneurship.

Curriculum

A total of 30 units is required beyond the B.S. degree. A minimum of 21 units must be at the 500 level or above. A maximum of 6 units of electives may be taken from non-engineering departments. At least three courses must be taken in the student’s selected area of specialization.

Curriculum

The Master of Science in Product Development Engineering

The Master of Science in Product Development Engineering (MS PDE) is an interdisciplinary graduate degree program at USC jointly offered by the Aerospace and Mechanical Engineering and the Daniel J. Epstein Industrial and Systems Engineering (ISE) departments. The Aerospace and Mechanical Engineering department manages this joint degree program. Students can enter this program in either the fall or spring semesters, and it is available to full-time and part-time students.

Admission

The program has the following admission requirements:

- A bachelor’s degree in an area of engineering or science;
- An undergraduate cumulative GPA of 3.0 or above; and
- Satisfactory general GRE scores of at least 146 verbal and 151 quantitative.

The MS PDE program requires a minimum of 27 units to complete. Although it is mainly a course work-based program, students can choose to complete the program with or without a thesis requirement. For the thesis option, 4 of the 27 units are to be thesis. At least 16 units, not including thesis, must be at the 500 level or higher, and at least 18 units must be from the AME and ISE departments. For the non-thesis option, 18 of the 27 units must be at the 500 level or higher from the AME and ISE departments, and/or closely related departments. As well, students can choose to take up to 6 units of directed research (e.g., AME 590 or ISE 590). Students must maintain a minimal cumulative GPA of 3.0 in USC course work to graduate.

The program’s prerequisite is a minimum of one 400 level course in either engineering design or engineering economy. Admitted students who do not meet this prerequisite will be assigned appropriate USC course(s) to complete the deficiencies. Deficiency courses, if taken at the 400 level, may be counted toward 27 units as general electives with adviser approval.

Depending on the academic background and career interests of students, the program offers two areas of specialization, product development technology and product development systems. The product development technology specialization will prepare students for a career as future product development engineers, while the product development systems specialization will prepare students as future product development managers. Students entering this program must declare their choice of an area of specialization and follow the requirements of each area of specialization to graduate.

Curriculum

The required 27 units are grouped into four categories of courses for each area of specialization as follows:
Sustainable Infrastructure Systems

The Sustainable Infrastructure Systems program prepares students for immediate and effective participation in the modern infrastructure workforce through a common core that includes smart-system design for sustainable infrastructures, the societal and regulatory context of infrastructure engineering decisions, and construction management. Five plans of study for the Master of Science degree allow for specialization based on background and interest.

Master of Science in Civil Engineering (Transportation Systems)

Faculty

**IBM Chair in Engineering Management:** F. Stan Settles, Ph.D. (Astronautical Engineering, Industrial and Systems Engineering)

**David Packard Chair in Manufacturing Engineering:** Stephen C-Y Lu, Ph.D. (Computer Science, Aerospace and Mechanical Engineering, Industrial and Systems Engineering)

**Gordon S. Marshall Professor of Engineering Technology:** Roger Ghannem, Ph.D. (Aerospace and Mechanical Engineering, Civil and Environmental Engineering)

**TRW Professor of Software Engineering:** Barry Boehm, Ph.D. (Computer Science, Industrial and Systems Engineering)

Professors: Barry Boehm, Ph.D. (Computer Science, Industrial and Systems Engineering); John Choma, Ph.D. (Electrical Engineering)*; Daniel Erwin, Ph.D. (Aerospace and Mechanical Engineering, Astronautical Engineering)*; Roger Ghannem, Ph.D. (Aerospace and Mechanical Engineering, Civil and Environmental Engineering); Mike Gruntman, Ph.D. (Aerospace and Mechanical Engineering, Astronautical Engineering); Petros Ioannou, Ph.D. (Electrical Engineering); Yan Jin, Ph.D. (Aerospace and Mechanical Engineering); Behrokh Khoshnevis, Ph.D. (Aerospace and Mechanical Engineering, Civil and Environmental Engineering, Industrial and Systems Engineering); Stephen C-Y Lu, Ph.D. (Computer Science, Aerospace and Mechanical Engineering, Industrial and Systems Engineering); James E. Moore, II, Ph.D. (Civil and Environmental Engineering, Industrial and Systems Engineering, Public Policy); F. Stan Settles, Ph.D. (Astronautical Engineering, Industrial and Systems Engineering); Cyrus Shahabi, Ph.D. (Computer Science); Firdaus E. Udawatta, Ph.D. (Aerospace and Mechanical Engineering, Civil and Environmental Engineering, Data Science and Operations, Mathematics)

Assistant Professor: Ketan Savla, Ph.D. (Civil and Environmental Engineering)

Professors of Engineering Practice: George Friedman, Ph.D. (Astronautical Engineering); Azad M. Madni, Ph.D. (Astronautical Engineering)

Research Professor: Elliot Axelband, Ph.D.

*Recipient of university-wide or school teaching award.

**Recipient of university-wide or school research award.

Honor Societies

**Omega Alpha Association**

Omega Alpha Association is the systems engineering honor society. The adviser is Professor Stan Settles, (213) 740-9263.

Degree Requirements

Master of Science in Systems Architecting and Engineering

This program is recommended to graduate engineers and engineering managers responsible for the conception and implementation of complex systems. Emphasis is on the creative processes and methods by which complex systems are conceived, planned, designed, built, tested and certified. The architecture experience can be applied to defense, space, aircraft, communications, navigation, sensors, computer software, computer hardware, and other aerospace and commercial systems and activities.

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in systems architecting and engineering. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average.

In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in systems architecting and engineering is also subject to the following requirements:

- a total of at least 30 units is required, consisting of at least three units in the technical management area, three units in the general technical area, and 9 units in the technical specialization area;
- every plan of study requires prior written approval by the director of the systems architecting and engineering program recorded on the student's file;
- no more than nine units of Special Topics courses (499 or 599) may be taken at the 400 level; no more than nine units at the 400 level may be taken at the 500 or 600 level;
- at least 24 of the 30 units must be taken in the Viterbi School of Engineering;
- units to be transferred (maximum of four with adviser approval) must have been taken prior to taking classes at USC; interruption of residency is not allowed;
- no more than 6 units of Special Topics courses (499 or 599) may be counted for this degree;
- thesis and directed research registrations may be allowed to individual students only by special permission of the supervising faculty member and the program director;
- a bachelor's degree in an engineering field and a minimum of three years systems experience are recommended prior to taking Systems Architecting and Design Experience courses. This program is not recommended for recent bachelor's degree graduates.

Technical Management Area: Take one course (3 units) from the following:

*USC Marshall School of Business course.

Technical Specialization Area: Nine units are required, usually in the student's present or intended technical specialty. Courses are intended to complement the student's prior education and experience toward becoming a well-rounded systems architect-engineer or architect-manager. With a few exceptions, the courses should come from the recommended list, and usually all from a single specialization.

The student may choose from a large variety of technical specializations spanning all departments in the Viterbi School of Engineering. Flexibility is emphasized in this choice; the program director is expected to work closely with the student in choosing the best set of courses to meet the student's need.

Several sample specializations are listed below but are not intended to be complete.

Recommended Courses

**Aerospace and Mechanical Systems:** AME 503, AME 521, AME 533a, AME 544, AME 548, AME 560, AME 588

**Artificial Intelligence/Neural Networks:** CSCI 450, CSCI 545, CSCI 561, CSCI 564, CSCI 587, CSCI 574; EE 547

**Automation and Control Systems:** EE 543a, EE 547, EE 585, EE 587, EE 588, EE 593

**Technical Management Area:**

Graduate Certificate in Systems Architecting and Engineering

The graduate certificate in systems architecting and engineering is designed for practicing engineers engaged in the creation and design of complex innovative systems, in aerospace and commercial fields. Entering students are expected to have a bachelor’s degree in engineering or a related field from an accredited institution. Three years of industry experience are recommended. Students are required to earn a cumulative G average or higher in courses taken for the certificate. The courses taken for the certificate may be applied later to the Master of Science in Computer Science, Electrical Engineering or Systems Architecting Engineering with departmental approval.

Graduate Certificate in Systems Architecting and Engineering

All programs of study will be approved by the director of the Systems Architecting and Engineering program.

Graduate Certificate in Network Centric Systems

This 15-unit graduate certificate is jointly sponsored by the Epstein Industrial and Systems Engineering, Hsieh Electrical Engineering and Computer Science departments, and administered by the Epstein ISE Department. This certificate is designed for practicing engineers engaged in the creation and design of complex innovative network-centric systems in aerospace and commercial fields. Entering students are expected to have a bachelor’s degree in engineering or a related field from an accredited institution. Three years of industry experience are recommended. Students are required to earn a cumulative G average or higher in courses taken for the certificate. The courses taken for the certificate may be applied later to the Master of Science in Computer Science, Electrical Engineering or Systems Architecting Engineering with departmental approval.

Courses of Instruction

Systems Architecting and Engineering (SAE)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

SAE 496 Systems Engineering Through Motorsports (3, FaSp) Applied systems architecting, engineering and management to motorsports from design to validation and verification: venues include drag racing, grand prix Formula SAE racing, DARPA Challenges.

SAE 499 Special Topics (2-4, max 8, FaSpSPr) Course content to be selected each semester from recent developments in Systems Architecting and Engineering and related fields.

SAE 541 Systems Engineering Theory and Practice (3, FaSp) Integration of engineering problem solving methodologies based on systems concepts. Application to complex, large scale technical systems and problems faced by engineering managers. Case studies. (Duplicates credit in former ISE 547.)

SAE 542 Advanced Topics in Systems Engineering (3, FaSp) Advanced topics in integration software management and systems engineering, probabilistic foundations of decision-based theory, quantitative risk management, decision-based design, and safety aspects of systems engineering. (Duplicates credit in former ISE 542.) Prerequisite: SAE 541.

SAE 543 Case Studies in Systems Engineering and Management (3, FaSp) Real-world case studies in DoD, NASA, and commercial arenas, employing new methodologies to cover the fundamental positive and negative development learning principles of systems engineering.

SAE 547 Model-Based Systems Architecting and Engineering (3) Approaches for modeling systems using software such as SysML: modeling system, requirements, structure, behavior, and parameters; mapping to hardware description language and behavioral code generation. Recommended preparation: Modeling and simulation courses.

SAE 549 Systems Architecting (3, FaSp) Introduction to systems architecture in aerospace, electrical, computer, and manufacturing systems emphasizing the conceptual and acceptance phases and using heuristics. Prerequisite: B.S. degree in a related field of engineering.

SAE 550 Systems Architecting and the Political Process (3) Analysis of risks inherent in managing high-tech/high-cost government-funded engineering programs; tools and techniques for coping with the impacts of politically-driven budgets on the engineering design process. (Duplicates credit in former ISE 550.) Recommended preparation: two years of work experience.

SAE 551 Lean Operations (3, Sp) Study of lean principles and practices as applied to automotive, aerospace and other industries.

SAE 560 Economic Considerations for Systems Engineering (3, Sp) Impact of economic factors for systems architects and engineers, tools for understanding these factors, fundamental quantitative analysis of cash flow, life-cost estimating for systems and software engineering.

SAE 574 Net-Centric Systems Architecting and Engineering (3, FaSp) In-depth examination of the technical design approaches, tools, and processes to enable the benefits of net-centric operations in a networked systems-of-systems.
SAE 590 Directed Research (1-12, Fa,SPrSm) Research leading to the master’s degree. Maximum units which may be applied to the degree are determined by the department. Graded CR/NC.

SAE 594ABZ Master’s Thesis (2-2-0, Fa,SPrSm) Credit on acceptance of thesis. Graded IP/CR/NC.

SAE 599 Special Topics (2-4, max 9, Fa,SPrSm) Course content will be selected each semester to reflect current trends and developments in the field of systems architecting and engineering.

USC Davis School of Gerontology

At the USC Davis School of Gerontology, students study the human lifespan by exploring all dimensions of adult life. They enhance their learning through volunteer work, research opportunities and internships with local organizations, national institutes and international partners.

The USC Davis School of Gerontology explores all aspects of human development and aging. Course work and research opportunities in biology, psychology, sociology, policy and aging services make up its multidisciplinary curriculum.

Founded in 1975, USC Davis is not only the nation’s premier school of gerontology, it is also the first. Named in honor of Leonard Davis, a philanthropist and businessman who pioneered insurance plans for the elderly through his involvement in AARP and his own business—Lifelock Insurance (now the guard system of the same name)—the school is the first. Named in honor of Leonard Davis, a philanthropist and businessman who pioneered insurance plans for the elderly through his involvement in AARP and his own company Colonial Penn Life Insurance, the school provides ground-breaking solutions to issues facing an aging population.

USC Davis is committed to providing students with a broad theoretical understanding of lifespan development as well as dynamic post-graduate career placement. Students on all levels often enroll in semester-long internship programs. Working with our internship director, students can apply their gerontological knowledge to an array of industries such as health, medicine, business, finance, policy, direct services, program development, counseling and many other fields.

USC Davis School’s Bachelor of Science degree can be pursued with a health science, a social science or a global emphasis. The school also offers four master’s degrees, seven dual master’s programs, a graduate certificate, and Ph.D. programs in gerontology as well as in the biology of aging.

The school’s research and services arm is the Ethel Percy Andrus Gerontology Center. The center houses the California Center for Long Term Care Integration, the Fall Prevention Center of Excellence, the Long Beach Longitudinal Study, the Society for the Study of Social Biology, the USC/UCLA Center on Biodemography and Population Health, and the Los Angeles Caregiver Resource Center.

Administration

Pinchas Cohen, M.D., Dean and Executive Director of the Ethel Percy Andrus Gerontology Center

Kelvin J.A. Davies, Ph.D., D.Sc., Vice Dean and Director of the Ethel Percy Andrus Gerontology Center

Maria Henke, M.A., Associate Dean, USC Davis School of Gerontology

Faculty

William and Sylvia Kugel Dean’s Chair in Gerontology: Pinchas Cohen, M.D.

AARP University Chair in Gerontology: Eileen Crimmins, Ph.D. *

ARCO/William F. Kieschnick Chair in the Neurobiology of Aging: Caleb E. Finch, Ph.D. *

James E. Birren Chair in Gerontology: Kelvin J.A. Davies, Ph.D., D.Sc.*

The Golden Age Association/Frances Wu Chair in Chinese Elderly: Iris Chi, Ph.D. (Social Work)

Edna M. Jones Chair in Gerontology: Valter D. Longo, Ph.D.

Rita and Edward Polusky Chair in Education and Aging: Elizabeth M. Zelinski, Ph.D. *

UPS Foundation Chair in Gerontology: Jon Pynoos, Ph.D.*

Mary Pickford Foundation Professor of Gerontology: Kathleen W. Wilber, Ph.D. *

Albert L. and Madelyne G. Hanson Family Trust Assistant Professor: Susan H. Enguidanos, Ph.D.*

Professors: Kathleen Chambers, Ph.D. (Psychology); Margaret Gatz, Ph.D. (Psychology); Martin Levine, Ph.D. (Law, Psychiatry and the Behavioral Sciences); Maria Mathur, Ph.D.; John J. McArdo, Ph.D. (Psychology);

Michal Mor-Barak, DSW (Social Work); Roseann Mulligan, DDS (Dentistry); Robert C. Myrtle, DPA (Public Policy); Mike Nichol, Ph.D. (Pharmacy and Public Policy); Christian Pike, Ph.D.; Victor Regnier, M.Arch. (Architecture); Edward L. Schneider, M.D.; Lon Schneider, M.D. (Psychiatry and Neurology); John Tower, Ph.D. (Biological Sciences); Bradley R. Williams, Pharm.D. (Clinical Pharmacy)

Associate Professors: Maria Aranda, Ph.D. (Social Work); Loren G. Lipson, M.D. (Medicine); Jeffrey McCombs, Ph.D. (Pharmacy); John P. Walsh, Ph.D.*

Assistant Professors: Cleopatra Abduw, Ph.D.; Sean Curran, Ph.D.*; Tara Lynn Gruenewald, Ph.D.; Natalie Leland, Ph.D. (Occupational Therapy); Ana Marie Yamada, Ph.D. (Social Work)

Research Professors: Todd Morgan, Ph.D.; Albert Rizzo III, Ph.D.

Research Associate Professors: Gennady Ermak, Ph.D.; Roseann Giarrusso, Ph.D.; Jung Ki Kim, Ph.D.

Research Assistant Professors: Donna Benton, Ph.D.; Thomas Parsons, Ph.D.

Adjunct Professors: Neal Cutler, Ph.D.; Fernando Torres-Gil, Ph.D.*

Adjunct Associate Professors: Joanna Davies, Ph.D.; Monika White, Ph.D.

Adjunct Research Professor: Larry Rubenstein, Ph.D.

Adjunct Research Assistant Professor: Tracy Armstrong, Ph.D.

Adjunct Clinical Professor: Robert M. Tager, M.D.

Clinical Associate Professors: Raquel D. Arias, M.D.; Michael Gillewski, Ph.D.; Carl Renold, Ph.D.; Debra Sheets, Ph.D.

Clinical Assistant Professors: Aaron Hagedorn, Ph.D.; Freddi Segal-Gidan, Ph.D.

Emeritus Professors: Vern Bengtson, Ph.D.; James E. Birren, Ph.D.; Gerald A. Larue, Ph.D.

Emeritus Associate Professor: Pheobe Liebig, Ph.D.

* Recipient of university-wide or college teaching award.

Programs

The USC Davis School of Gerontology offers a Bachelor of Science in Human Development and Aging, a Bachelor of Science in Lifespan Health, undergraduate classes through the health and humanity major in the USC Dornsife College of Letters, Arts and Sciences, two minors in aging and a progressive Master of Science in Gerontology open to all undergraduate students.

The School of Gerontology offers several graduate degrees including: a Master of Science in Gerontology; a Master of Aging Services Management; a Master of Arts in Gerontology; a Master of Long Term Care Administration (with the Marshall School of Business and the Price School of Public Policy). All master’s degrees are offered online and onsite. The School of Gerontology offers the premiere Ph.D. in Gerontology program in the nation. The program is not offered online. The school also offers a Ph.D. in the Biology of Aging. Non-degree graduate students may complete 16 units of gerontology and be awarded a graduate level certificate in gerontology (also available online).

Master’s degree students may pursue one of several dual degrees, which are jointly offered with other professional schools. These are the Master of Science in Gerontology and the Master of Business Administration (M.S./MBA) with the Marshall School of Business; the Master of Science in Gerontology and the Juris Doctor (M.S./J.D.) with the Gould School of Law; the Master of Science in Gerontology and the Master of Public Administration (M.S./MPA), the Master of Science in Gerontology and the Master of Health Administration (M.S./MHA), and the Master of Science in Gerontology and the Master of Planning (M.S./MPR) with the Price School of Public Policy; the Master of Science in Gerontology and the Master of Social Work (M.S./MSSW) with the School of Social Work; and the Master of Science in Gerontology and the Doctor of Pharmacy (M.S./Pharm.D.) with the School of Pharmacy.

In addition to the degree and minor programs, overview courses in aging are offered for undergraduates enrolled in other units of the university. Many gerontology courses can be credited as elective units.

Honor Society

The student honor society is Sigma Phi Omega, the national honor society founded in 1920 to recognize the excellence of those who study gerontology. The organization seeks to promote scholarship and professionalism, and to recognize exemplary attainment in the field of aging. Undergraduates must have a GPA of at least 3.4 and graduate students a GPA of at least 3.5. Sigma Phi Omega is administered by the Association for Gerontology in Higher Education, an educational unit of the Gerontological Society of America.

Ethel Percy Andrus Gerontology Center

The Andrus Gerontology Center initiates, designs and executes basic and applied research on the many phases of development and aging, and provides for graduate and post-graduate training in the biological, social, behavioral...
and policy sciences. Specific areas of study include neurobiology, cognitive science, biology, social organization behavior, human service delivery, biodemography and social policy.

The Andrus Center offers a multidisciplinary research training program in gerontology. It is directed toward graduate students pursuing the Ph.D. as well as a limited number of post-doctoral fellows who develop research and academic careers in specialized areas of gerontology. Research training is carried out within individual disciplines.

Undergraduate Programs

Bachelor of Science in Human Development and Aging

The Bachelor of Science in Human Development and Aging is an undergraduate degree offered at the USC Davis School of Gerontology in the social sciences. Students in this program often pursue careers related to older adults in business, law, the nonprofit sector or government agencies.

Students may also specialize in a health science track. The health science track combines the core gerontology curriculum with the prerequisites for admission to medical school and other health-related fields including: dentistry, pharmacy, occupational/physical therapy, physician assistant programs and others. In addition, students will participate in a supervised practicum experience in which they will become directly involved with aging clients in a health care setting.

Students planning to pursue a B.S. are urged to notify the school of this intent as early as possible during their undergraduate study. This will help ensure that the student receives proper advisement and that the student is alerted to any special requirements or program modifications.

During the freshman and sophomore years, students enroll primarily in general education required courses as specified by the university and the Human Development and Aging gateway course (GERO 200).

During their junior and senior years, students enroll in required and elective courses in the School of Gerontology as well as other courses throughout the university. These courses are selected in consultation with an advisor and reflect the personal and professional interests of the students.

The honors program is available to juniors who maintain a GPA of 3.5 in gerontology and a GPA of 3.3 in other USC course work. The honors program includes mentorship training in research and course work relevant to research methodology and statistics.

A grade point average of at least C (2.0) on all units attempted at USC is required for undergraduate degrees. The School of Gerontology requires a minimum 2.0 grade point average in upper division courses applied toward the major.

General Education Requirements

The university’s general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to be considered a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

Foreign Language or Programming Skills (12 Units)

Students must satisfy the skill level requirement in one language or complete ITP 101x and additional ITP 100-level programming courses to total 12 units. Students in the health science track are required to complete only ITP 101x.

Health Science Track in Human Development and Aging

Requirements for Admission

The listed requirements for admission to the health science track in human development and aging will not differ from existing requirements for admission to the Bachelor of Science in Human Development and Aging. However, because health professional schools are very competitive, USC students interested in this program will be expected to have achieved at least a 3.0 grade point average (A - 4.0). Students entering the program from high schools or transferring from community colleges will also be expected to meet the minimum admission standards.

Honors Program in Human Development and Aging

USC Davis offers an honors program to outstanding students already pursuing studies for the B.S. in Human Development and Aging degree. This program offers students an opportunity to participate in mentored undergraduate research, taking course work in research methods and statistics in aging, and experience in writing an honors thesis that summarizes the research project. Honors students are required to complete GERO 479abc for a total of 6-8 units, beginning in the fall or spring of the junior year. In the senior year, they must complete GERO 593 Research Methods with a minimum grade of B. GERO 593 is offered only in the fall semester. Completion of the program requires a minimum GPA of 3.5 in gerontology and 3.3 in other courses. The program leads to the designation on the transcript of Bachelor of Science in Human Development and Aging with Honors.

The student takes 2 units of GERO 479a in the fall or spring of the junior year as a mentored research course to begin the process of developing an honors thesis. This would be in lieu of elective units. If the fall of the junior or senior year the student would complete GERO 593 for 4 units and 2 units of GERO 479b, both in lieu of elective units. Also during the fall semester, the research design and methods for the honors thesis are finalized and the research project begun. In the spring, the student would register for 2-4 units of GERO 479c in lieu of elective units. The goal for that semester is to complete the research and write the honors thesis.

** Prerequisite required.

** GERO 437 must be taken for 4 units of credit

Bachelor of Arts in Health and Humanity

The USC Davis School of Gerontology offers undergraduate classes through the Health and Humanity major in the USC Dornsife College of Letters, Arts and Sciences (see the Health and Humanity page).

Progressive Degree in Gerontology/Master of Science in Gerontology

The progressive degree program allows high-performing students to integrate their current undergraduate major with a Master of Science in Gerontology. Students with at least a 3.0 overall GPA may apply for admission to the degree program in their junior year.

Students will meet with the gerontology student adviser to develop a course plan that must be approved by the School of Gerontology and the student’s home department. Students admitted into the progressive degree program begin taking master’s level courses in their senior year and will complete the master’s degree in year five. For more information on the admission process, see the gerontology student adviser. For further details on progressive degree programs, see the Requirements for Graduation page.

Minors in Aging

The undergraduate minor program gives students the option of combining their major with an emphasis in gerontology, the study of aging. The minors provide students with the opportunity to supplement their education with a life course perspective of aging processes.

The minor programs, which are multidisciplinary in nature, allow the student to survey the sociological, psychological, and biological aspects of aging; to gain an understanding of the current services available to older persons; and to examine the contemporary policy issues facing the field.

Individuals, Societies and Aging

This minor is a fit for students in business, engineering, communication, cinematic arts, or arts and sciences interested in developing a broad knowledge of issues in aging. Based largely on disciplines in the behavioral and social sciences, students learn how aging will impact their lives, families and careers. Upon completion of 20 units and graduation, the minor is noted on the student’s transcript.

Graduate Degrees

Master’s Degrees in Gerontology

The Master of Science in Gerontology prepares graduates to assume major leadership roles in the field of aging, primarily in the planning, administration and evaluation of programs in the private and public sectors, as well as executive positions in the delivery of direct services to older people and their families and in the instruction of older adults and service providers. The Master of Science in Gerontology requires 44 units of course work. This includes 32 units of required courses and 12 units of electives. As part of this curriculum, a field practicum assures that these skills can be applied in agencies and institutional settings.

All students take core courses in physiological, psychological, sociological, social policy and professional issues relating to aging, as well as research methods and the capstone course.
The course work includes instruction on the processes of aging and professional courses designed to develop the skills needed for practice. The field practicum includes one or two semesters of practical experience working in an organizational setting.

Continuous registration in the program is required. There is a five year completion time limit for the degree. Leaves of absence are available for limited times and are excluded from the total time limit. A maximum of two absences (one year each) is allowed. Most courses are offered on campus and online.

Prerequisites for Admission

Students applying for admission to the Master of Science in Gerontology program must have a bachelor’s degree from an accredited college or university. In selecting applicants for admission, the School of Gerontology considers both academic potential (as reflected in undergraduate study or scores on the Graduate Record Examinations) and professional potential (as reflected in experience, references and career goals). The school requests information from applicants to supplement that supplied by the USC Application for Graduate Admission. Such supplemental information usually includes a resume, statement of interest in gerontology and letters of reference. Interviews may be required.

Probation and Disqualification

Probation and Warning: Any graduate student whose cumulative or semester grade point average in the university falls below 2.0 (3.0) will be asked to increase the student's grade point average to 2.0 (3.0) in order to remain in good standing. A graduate student whose semester average falls below 2.0 (3.0) but whose cumulative grade point average in the university is 3.0 (A - 4.0) or higher will be placed on academic probation. A graduate student whose semester average falls below B (3.0) but whose cumulative grade point average in the university is 3.0 (A - 4.0) or higher will be placed on academic probation.

Disqualification: A graduate student on academic probation will be disqualified if his or her cumulative record accumulates more than 12 units of C work. A graduate student on academic probation who is enrolled in GERO 591 Field Practicum will be subject to disqualification if the Student Affairs Committee of the USC Davis School at any time determines deficiency in academic achievement.

Common Requirements

All candidates for the Master of Science degree must complete the following common requirements:

<table>
<thead>
<tr>
<th>Required Courses</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERO 510 Physiology of Development and Aging</td>
<td>4</td>
</tr>

Capstone Course

GERO 555 Integrating Gerontology: A Multidisciplinary Approach 4

Suggested Electives (12 Units)

GERO 521 Counseling Older Adults and Their Families 4
GERO 543 Continuum of Care: A Systems Perspective 4
GERO 550 Administration and System Management in Programs for Older Adults 4
GERO 551 Applied Policy Skills in Aging 4
GERO 554 Evaluation: Incorporating Evidence-Based Practices 4
GERO 591 Field Practicum 4

Common requirements for all programs include the 28 required units and GERO 555, totaling 32 units. In addition, each candidate must complete the 12 units of electives chosen from the complete list of electives approved by the student’s adviser.

Field Practicum

The field practicum provides the opportunity for the student to gain valuable experience and develop needed skills by working in a community agency or institution. It involves a minimum of 240 hours of involvement. Students may elect to take an additional 4 units of GERO 591 Field Practicum as an elective.

Field placement assignments are made by the internship coordinator of the school in consultation with the student and in accordance with the resources available in the community. Every effort is made to secure placement which will reflect the student’s capacity to assume the responsibilities of a professional in gerontology. Evaluations of the student’s performance are sent to the school by the community agency; the student receives a grade of credit/no credit in GERO 591 Field Practicum.

Master of Science with Specialization in the Health Service Area and Ambulatory Care Certificate

In addition to the 32 units of common requirements for the M.S. in Gerontology, the following courses are required to earn the certificate.

<table>
<thead>
<tr>
<th>Core courses</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPD 509 Problems and Issues in the Health Field</td>

GERO 553 Research Methods 4

GERontology skill requirements 12

GERontology electives 4

Program Adaptation

Three of the following courses, GERO 510, GERO 520, GERO 530 and GERO 540, will be waived for students in the advanced placement track. Advanced placement students admitted to dual degree programs must meet curriculum requirements for the respective programs.

Progressive Degree in Gerontology

A progressive degree program allows qualified undergraduate students to complete an integrated program of study joining a bachelor’s degree and a master’s degree in the same or different departments.

The progressive degree program in gerontology allows students in their junior year to apply for the Master of Science in Gerontology program and complete both degrees in five years. Students must fulfill all the requirements for both the bachelor’s degree and the master’s degree. The total number of units for the master’s degree, however, may be reduced by a maximum of 12 units. Students must obtain permission from both the bachelor’s degree granting program and the USC Davis School of Gerontology. This program may be particularly attractive to students majoring in biology, psychology, policy and sociology. For more information on progressive degrees, see the entry under Undergraduate Programs or Graduate and Professional Education.

Master of Aging Services Management

The Master of Aging Services Management provides an opportunity for those seeking careers in the aging services industries to acquire skills and knowledge related to management of services, products and programs for older persons. The program requires a minimum of 12 units of core courses (three courses) and 20 units of electives (five courses). All graduate level courses are offered on campus and via the Internet. Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time.

In order to participate in online courses, students will be required to have access to a computer with multimedia capability including a modem, printer and CD-ROM drive; an internet provider with email and an internet browser; and word processing software. Specific details regarding the computer requirements will be provided by the department. This program is available as a progressive degree (see Progressive Degree in Gerontology).

Students applying to the Master of Aging Services Management must have a bachelor’s degree from an accredited college or university with a GPA of 3.0. If the applicant’s GPA falls below 3.0, the GRE will be required.

Students must choose a minimum of 12 units of core courses from the following:

<table>
<thead>
<tr>
<th>Core Courses (minimum of 12 Units)</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERO 500 Perspectives on a Changing Society</td>
<td>4</td>
</tr>
<tr>
<td>GERO 501 An Introduction to Aging of one third</td>
<td>4</td>
</tr>
<tr>
<td>GERO 502 Marketing and Shifts in Consumer Decision Making</td>
<td>4</td>
</tr>
<tr>
<td>GERO 504 Current Issues in Aging Services Management</td>
<td>4</td>
</tr>
<tr>
<td>GERO 589 Case Studies in Leadership and Change Management</td>
<td>4</td>
</tr>
</tbody>
</table>

Students must select up to five courses (for a total of 20 units) from the following courses or any other adviser-approved elective:
Master of Arts in Gerontology

The M.A. in Gerontology provides an opportunity to acquire skills and formal training in gerontology. The online program requires 28 units of course work. Most courses are offered online and on campus.

Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time limit.

In order to participate in the online courses, students will be required to have access to a multimedia computer with modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. Specific details regarding the computer requirements will be provided by the department.

Admission standards and prerequisites are the same as listed for the Master of Science in Gerontology with the exception that students in the online M.A. program are expected to have a significant amount of experience working in human services, health care, business or similar settings. Students are not required to have taken an approved additional course.

Graduate Level Certificate in Gerontology

The residential graduate certificate in gerontology program provides an opportunity for those who have completed a bachelor’s degree in another profession or discipline and are employed in the field of aging to acquire a greater understanding of gerontology theory and research. The program consists of 16 units of gerontology content designed to familiarize the student with several areas of the field which relate to professional practice.

In addition to three of the four required core course areas for the certificate program (GERO 510, GERO 520 or GERO 530, GERO 585, GERO 540), each student will have the option to choose one elective course which meets his or her particular area of interest.

Certificate students do not take a field practicum. Students admitted to the non-degree certificate program are expected to enroll each semester until the program is completed.

Online Graduate Level Certificate in Gerontology

The online graduate certificate in gerontology program provides an opportunity for those with a bachelor’s degree in another profession or discipline who are employed in the field of aging to acquire a greater understanding of gerontology theory and research. The program consists of 16 units of gerontology courses designed to familiarize the student with several areas of the field which relate to professional practice.

Students complete the introductory course, GERO 500, two of the four required core course areas (GERO 508 or GERO 510 or GERO 530 or GERO 532, GERO 520 or GERO 585, and GERO 540), and one elective course in a particular area of interest.

The required courses are delivered via the internet. The courses are offered in sequential order and are restricted by availability. Continuous registration in the non-degree program is required. Leaves of absence are available for limited times and are excluded from the total time limit. Entering students are encouraged to begin their course of study by taking GERO 500.

In order to participate in the online courses, students will be required to have access to a multimedia computer with modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. The department will provide specific details regarding the computer requirements.

Master of Long Term Care Administration

The Master of Long Term Care Administration provides an opportunity for professionals who are currently working in a long term care profession to acquire skills and formal training in long term care administration. The online program requires 28 units of course work.

The required courses are in sequential order and are restricted by availability. Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time limit.

In order to participate in the online courses, students will be required to have access to a multimedia computer with modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. Specific details regarding the computer requirements will be provided by the department.

Admission standards are the same as for the Master of Science in Gerontology.

Transfer Credits

An admission credit evaluation is prepared for graduate students with previous graduate level course work. This review indicates which courses the university will approve but it is the relevant school (Gerontology, Business, or Public Policy) that determines if any of these courses are appropriate for this degree. A maximum of 4 units may be used toward the master’s degree.

Graduate transfer credit will not be granted for life experience, credit by examination, non-credit extension courses, correspondence courses or thesis supervision. Graduate transfer credit will not be granted for any course work taken elsewhere after the student has been admitted and enrolled at USC unless the student receives prior written approval from the department.

Pharm.D./Graduate Certificate in Gerontology

This integrated program in pharmacy and gerontology prepares students with an interest in geriatric pharmacy to assume leadership roles at academic, administrative or policy levels within the profession.

The program involves the completion of 16 units of core courses in pharmacy, physiology, sociology and social policy aspects of aging offered by the School of Gerontology. In addition, students are required to complete 8 units of approved elective courses in gerontology or geriatric pharmacy to be credited toward the requirements for the Pharm.D. and the Graduate Certificate in Gerontology.

GERO 540 Social Policy and Aging 4

Electives in gerontology and geriatric pharmacy (8 Units)

GERO 564 Evaluation: Incorporating Evidence-Based Practices 4

GERO 565 Integrating Gerontology: A Multidisciplinary Approach 4

PHRD 651 Geriatric Pharmacy I 3
PHRD 655 Geriatric Pharmacy II 3
PHRD 703 Long Term Care Clerkship 6
PHRD 706 Geriatrics Clerkship 6
PHRD 730 Acute Care Geriatrics Clerkship 6
PHRD 731 Advanced Geriatrics APPE 6

It is expected that the program can be successfully completed by candidates taking electives in geriatric pharmacy or gerontology during the regular semester and completing one core course in gerontology during each summer in the four year Pharm.D. program.

Admission Requirements

Students who have a baccalaureate degree from an accredited college or university must submit separate applications to the USC School of Pharmacy and the USC Davis School of Gerontology. All requirements for admission to the regular Pharm.D. program must be fulfilled by the candidate. GRE scores are not required for admission to the certificate program.

Graduate Degrees

Dual Degree Programs

The USC Davis School of Gerontology cooperates with six other professional schools at USC in offering programs in which the student receives two master’s degrees. These degrees provide the student with the knowledge and skills of gerontology as well as those of the other professional field. The dual degrees require more course work than the M.S. alone, but offer the graduate greater breadth of education and employment options.

Dual degrees currently available are the Master of Science in Gerontology and the Master of Business Administration (M.S./MBA) with the Marshall School of Business; the Master of Science in Gerontology and the Juris Doctor (M.S./J.D.) with the Gould School of Law; the Master of Science in Gerontology and the Master of Public Administration (M.S./MPA) with the Price School of Public Policy; the Master of Science in Gerontology and the Master of Social Work (M.S./MSW) with the School of Social Work; and the Master of Science in Gerontology and the Doctor of Pharmacy (M.S./Pharm.D.) with the School of Pharmacy. Students must apply to both schools simultaneously and, if accepted to both, participate in specially designed programs combining the courses of each school.

Admission to Dual Degree Programs

Applicants to any of the dual degree programs must submit two application forms to the Office of Admissions: one indicating gerontology as the major and one indicating the other degree as the major. Each of the schools must accept the student for admission. Acceptance into one school’s degree program does not imply acceptance into the dual degree program.

Gerontology and Business Administration

The M.S./MBA dual degree combines knowledge of the older population with the skills of business management. The program prepares graduates for a number of roles in both public and private sector organizations including the marketing of products or services to seniors, human resource development with older workers and retirement benefits.

Gerontology Requirements

The Master of Science in Gerontology requires 30 units of course and fieldwork which covers the core content of the M.S. program.

Required courses

GERO 510  Physiology of Development and Aging 4
GERO 520  Life Span Developmental Psychology 4
GERO 530  Life Span Developmental Sociology 4
GERO 540  Social Policy and Aging 4
GERO 555  Integrating Gerontology: A Multidisciplinary Approach 4
GERO 591  Field Practicum 4
Gerontology electives 6

30

Business Administration Requirements

The Master of Business Administration will require 48 units of credit. Required courses include: all required courses in an MBA program; MOR 548 Competitive Advantage Through People (3); one marketing elective chosen from among MKT 512 Marketing and Consumer Research, MKT 530 Consumer Behavior and MKT 560 Marketing Strategy and Policy (3); and additional graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students may not count courses taken outside the School of Business toward the 48 units.

Program Adaptation

The USC Davis School of Gerontology will waive 18 units of electives, plus GERO 593 Research Methods (4 units) and GERO 589 Case Studies in Leadership and Change Management (4 units), which are required in the regular Master’s program. Students will be exposed to research and professional issues in business administration course work.

Gerontology and Pharmacy

The emerging impact of the elderly on the health care system has created a need for health care providers who understand the unique needs of the elderly. As drug therapy remains the primary therapeutic option for chronic disease, the demand for prescription drugs will continue to rise. There is a demand for pharmacists who are equipped to meet the pharmaceutical care needs of this population. Geriatric pharmacy is recognized as a specialty, with board certification through the Commission for Certification in Geriatric Pharmacy. The Pharm.D. (M.S.), Gerontology program will provide extensive education and training in the unique health care needs of older adults. It will allow student pharmacists with a career interest in geriatrics or gerontology to work with health care planning or delivery organizations to develop and implement progressive pharmaceutical care programs for the elderly.

Application and Admissions Requirements

Students who intend to pursue the dual Pharm.D./M.S. degree must be accepted by both programs. This includes having completed a baccalaureate degree from an accredited college or university with a minimum G.P.A. of 3.0 and a minimum equivalent GRE score of 1000. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual Pharm.D./M.S. degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both programs. Students, who elect this approach, must identify themselves on both applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the Pharm.D. and will be offered admission to the dual degree program. Second, students can apply to the dual degree by submitting an application to the M.S. in Gerontology program during their first year of enrollment in the Pharm.D. Prior to the M.S., Gerontology published an application deadline. Students, who elect this approach, must apply through the School of Pharmacy. Students admitted to the M.S. program using this approach will be offered admission to the dual degree contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 G.P.A. Students accepted to the dual degree program must maintain a minimum 3.0 G.P.A. in their gerontology and Pharm.D. courses.

Graduation Requirements

Students must complete all requirements for the Pharm.D. and M.S. degrees as listed in the catalogue with a minimum cumulative 3.0 G.P.A. Students must complete 32 Gerontology units as indicated. The Pharm.D. degree course requirements are listed in the School of Pharmacy section.

Gerontology requirements

GERO 520 Life Span Developmental Psychology 4
GERO 530 Life Span Developmental Sociology 4
GERO 540 Social Policy and Aging 4
GERO 555 Integrating Gerontology: A Multidisciplinary Approach 4

* Choose four of the following (16 units): GERO 475, GERO 494, GERO 518, GERO 519, GERO 522, GERO 543, GERO 550, GERO 554 or GERO 591.

Gerontology and Public Administration

The M.S./MPA dual degree offers the student interested in management of agencies and institutions the opportunity to gain in-depth knowledge of the administrative and organizational processes and management skills necessary for the effective delivery of services to older persons. See the Price School of Public Policy for course requirements.

Gerontology and Health Administration

Students can specialize in health care administration (profit and non-profit) through the dual degree with the Price School of Public Policy’s Health Administration Program. See the Price School of Public Policy, for course requirements.

Gerontology and Planning

The M.S./MPI dual degree is one of few in the nation which combines the knowledge of the older population with the skills needed to plan services for older people. The MPI prepares the graduate for the responsibilities involved in development of public and private institutions and programs. The M.S. indicates a special focus on the older person and the skills to analyze and design programs for this growing population. See the Price School of Public Policy for course requirement.
Gerontology and Law

The M.S./J.D. dual degree combines the knowledge of the older population with understanding of the legal system. The program prepares graduates for a number of roles in both public and private sector organizations. Students are required to complete 110 units of course work, 74 from the Gould School of Law and 36 from the Davis School of Gerontology. The first year is devoted to required law courses, and the second, third and fourth years combine gerontology and law courses. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to the rule for students enrolled in the law school honors program. See the Gould School of Law for course requirements.

Gerontology and Social Work

The M.S./MSW dual degree offers the student interested in direct service or community organization the credentials most valued in clinical and therapeutic practice. Taken in connection with the social work degree, the M.S. focuses course and fieldwork on the older person and prepares the student for social work with older persons and their families.

In the M.S./MSW dual degree program, the student enrolls primarily in the first year program of the USC School of Social Work. During the summer session, courses are taken in the USC Davis School of Gerontology. Second year courses are taken in both schools and fieldwork during the second year is taken in the School of Gerontology. The research course is taken through the School of Social Work in the student’s concentration area. The School of Gerontology will waive GERO 593 Case Studies in Leadership and Change Management (4 units) and GERO 555 Integrating Gerontology: A Multidisciplinary Approach (4 units) because students enrolled in this program have a primary professional focus on social work.

Course selection is done only with an academic adviser’s approval.

**Program Adaptations**

The School of Gerontology waives 12 units. The research course is taken through the School of Social Work in the student’s concentration area, and GERO 593, the research course, and GERO 555 are waived as well as one elective. The School of Social Work waives 12 units.

Doctor of Philosophy in Gerontology

The purpose of the Ph.D. in Gerontology is to provide research training in the multidisciplinary field of aging. The program is designed to enhance the potential of able students to make scholarly and professional contributions to the field of gerontology through research and teaching. To obtain this goal, the Ph.D. in Gerontology provides (1) high level rigorous research training, (2) the acquisition and application of scientific knowledge in the field of aging and (3) the development of leadership skills.

**Admission Requirements**

Applicants for admission to the doctoral program must meet the following requirements:

1. Graduate from a baccalaureate degree, or a baccalaureate degree and a minimum of 2 years of professional experience in an aging-related field.

2. Complete a minimum of 60 units of course work (with at least 24 of these units being completed in residence at USC), as evidenced by above average performance in gerontology and indicating a potential for leadership in the field. This includes a strong commitment to developing a scientific research program. Applicants to the Ph.D. program must submit a resume of professional and academic experience, three letters of reference (academic and professional), a statement of objectives and examples of written work.

3. Satisfactory performance on the Graduate Record Examinations – existing test scores may be submitted if the GRE has been completed more than five years prior to the date of application. A satisfactory score on the Verbal and Quantitative GRE is required. Students should also provide scores from the Analytic exam.

4. Submission of application materials as required. Instructions for application to the Doctor of Philosophy in Gerontology may be obtained by contacting the Davis School of Gerontology.

Research Core
A second core area focuses on development of research skills. For social scientists this includes research design, methods and statistics. Biologists will learn methods appropriate to biological sciences as well as research design and statistics. Students in the social, behavioral and policy track are required to take GERO 593 and GERO 640 and at least one additional statistics course – generally from another department – on the student’s research focus. Students in the biology of aging track are required to take GERO 593 and GERO 590 (2 semesters of 4 units).

Students in both tracks are also required to take two semesters of GERO 592, a research seminar in which participants will develop and carry out their own research. This course is generally taken after the first year.

Elective Core
A third core involves electives that allow students to create a concentration in a particular area of focus or analytic field of inquiry. Students should select courses in consultation with their advisor. Courses should be selected to provide in depth knowledge in the specialized area or general knowledge in the field of gerontology. A number of gerontology courses can be taken as electives.

Students should note that Gerontology courses at the 600 level are usually offered only every second year. Students are encouraged to review the course schedule to determine how to best complete these courses in a timely manner. Successful completion of the required coursework does not complete the educational experience of the student. Students are expected to enhance their exposure to research by attending the colloquium lecture series, working on research with a faculty member and presenting original research at the annual meeting of the Gerontological Society of America and other professional meetings.

Foreign Language Requirements
There are no foreign language requirements for the Ph.D. program.

Transfer Credits
Students with master’s degrees or prior graduate course work in gerontology can petition to apply the credit toward required courses. Petition for credit will be based on the Graduate School’s policies and requirements for transfer of credit and on approval by the doctoral advisory committee. Transfer credits toward the Ph.D. requirements will be limited to 20 units and must be credits taken within 10 years of entering the program.

Time Limit
The normal time for completing the Ph.D. is four to five years (without a prior master’s degree). The first two years will consist of required and elective courses. The third year will consist of electives, the Ph.D. qualifying exams and completion of the dissertation proposal. The final year(s) will involve the completion of the dissertation. The maximum time to complete all requirements for the Ph.D. degree is eight years from the first course at USC applied toward the degree.

Students who have completed an applicable master’s degree at USC or elsewhere within five years of the proposed enrollment in the Ph.D. program must complete the Ph.D. in six years.

Screening Procedures
When students have completed a minimum of 16 but not more than 24 units of doctoral coursework, the doctoral advisory committee assesses their performance through a screening process and makes a decision regarding their ability to continue in the program. If the student is granted permission to continue, a guidance committee is established.

Qualifying Exam Committee
The qualifying exam committee is composed of five faculty members, at least three from the School of Gerontology. The function of the qualifying exam committee is to oversee the development of the student’s academic progress through the qualifying examination, including the preliminary dissertation proposal.

Qualifying Examination
As a prerequisite for candidacy for the Ph.D., students must pass a qualifying examination, which is multidisciplinary and comprehensive in nature and that necessitates independent study beyond course requirements. Students must have completed at least 28 units of coursework in the doctoral program with a GPA of at least 3.50 before attempting the qualifying exam. The exam is designed to test mastery of knowledge and scholarly skills and to test readiness to undertake independent research. If the student fails this exam, it may be repeated once. When the exam is successfully completed, the student then must develop and have a dissertation proposal approved before the student is officially admitted to candidacy for the Ph.D. degree.

Doctoral Dissertation
Upon admission to candidacy, a dissertation committee is established which consists of three members of the faculty, some of whom may be from the qualifying committee.

The dissertation committee has responsibility for providing guidance and consultation during the research process, approving the dissertation, conducting the final oral examination, and recommending the candidate for the Ph.D. degree. The doctoral dissertation should make an original contribution to the development of knowledge and theory in gerontology.

Final Oral Examination
Upon approval of the final draft of the dissertation by all members of the dissertation committee, the candidate must pass a final oral examination. Upon successful completion of this final examination, the committee recommends the candidate to the Graduate School for award of the Ph.D. degree.

Degree Requirements
The Ph.D. in the Biology of Aging will provide each student with detailed knowledge and expertise in the biology of aging. The Ph.D. in the Biology of Aging requires the following courses (GERO 519, GERO 600, GERO 601, GERO 602, GERO 603, plus 8-10 units from the list of suggested electives or other department approved courses). A minimum of 60 units is required, consisting of formal courses, seminars and research credit. At least 24 of the minimum 60 total units required are to be formal graduate course work (lecture or seminar courses).

Screening Examination
After completion of the core Biology of Aging course work (GERO 519, GERO 600, GERO 601, GERO 602 and GERO 603) during the first year, the student’s degree progress is discussed and evaluated by a screening committee composed of members of the gerontology faculty and the Buck Institute as well as the student’s faculty adviser. The purpose of this written and oral evaluation is to determine competence to continue graduate study and identify areas to be strengthened prior to the qualifying examination.

Qualifying Examination
By the end of the third semester, students should choose a guidance committee consistent with the requirements of the graduate school composed of gerontology faculty, Buck Institute faculty and one outside member. This committee will conduct the qualifying exam and provide guidance during dissertation research. The chair of the committee will serve as the principal adviser. Students should consult extensively with each committee member regarding subjects to be covered in the exam.

The qualifying exam consists of written and oral parts. Both parts must be finished before the end of the fifth semester. For the written exam, the adviser will consult with each of the members of the qualifying exam committee. The written part will incorporate evaluation and synthesis of existing knowledge related to the topic areas, creation of a set of experiments to test a relevant hypothesis, and interpretation of anticipated results. The oral exam consists of an oral defense of the written part and will be conducted with a month of the written part of the qualifying exam.

Doctoral Dissertation
The dissertation is based on original, publishable and significant research conducted independently by the student under the guidance of the dissertation committee. Upon admission to candidacy, a dissertation committee is established which consists of three members of the faculty, one of whom may be from the guidance committee, one of whom must hold his or her primary appointment outside of the Davis School of Gerontology.

The dissertation committee is responsible for providing guidance and consultation during the research process, approving the dissertation, conducting the final oral examination, and recommending the candidate for the Ph.D. degree.

Foreign Language Requirements
There are no foreign language requirements for the Ph.D. in the Biology of Aging program.
Transfer Credits

Students with a master’s degree of prior graduate course work in biology can petition to apply the credit toward required courses. Petition for credit will be based on the Graduate School’s policies and requirements for transfer of credit and on approval by the doctoral advisory committee. Transfer credits toward the Ph.D. requirements will be limited to 20 units and must be taken within 10 years of entering the program.

Courses of Instruction

Gerontology (GERO)

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

GERO 200 Gerontology: The Science of Adult Development (4, FaSpSm) Introduction to adult development through the lifespan; biological, psychological, and social processes; gerontology as a career for the future.

GERO 310 Physiology of Aging (4, Fa) Effects of normative aging processes on homeostatic mechanisms and how these changes relate to development of disorder and disease in later life. Lecture and discussion. Prerequisite: BISC 220L or BISC 221L.

GERO 320 Psychology of Adult Development (4, FaSpSm) How psychologists study thinking, memory, emotions, personality, and behavior, and how people change in these throughout adulthood to old age. Recommended preparation: PSYC 100.

GERO 330 Society and Adult Development (4, FaSpSm) How social relationships affect adults of different ages; the changing contract across generations; interaction of culture, race, family and social values with adult development.

GERO 350 Administrative Problems in Aging (2 or 4, Fa) Analysis of the skills, approaches and issues involved in the planning, development, and implementation of programs directed at meeting the needs of older persons.

GERO 380M Diversity in Aging (4) Exploring diversity in the older population and variability in the human aging process.

GERO 385 Transitions in Adulthood (2 or 4) An exploration of the critical issues and transitions in the adult years, including careers, relationships, parenthood, and major turning points for personal development.

GERO 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

GERO 392 Housing for the Elderly: Policy, Programs, and Design (2) An overview of housing policies, programs and design for the elderly, including analysis and evaluation of past, current and proposed government programs.

GERO 412L Exercise and Aging: Principles and Programs (2 or 4) Physiological, psychological, and sociological aspects of exercise. Laboratory involvement in assessment and evaluation of fitness.

GERO 413 Exercise and Aging: Principles and Programs (2 or 4) Physiological, psychological, and sociological aspects of exercise. Laboratory involvement in assessment and evaluation of fitness.

GERO 414 Neurobiology of Aging (4, Fa) Age-related changes in nervous system structure and function; relationship of brain changes to changes in cognitive function and perception; Alzheimer’s and Parkinson’s diseases. Lecture and discussion. Prerequisite: BISC 220L or BISC 221L.

GERO 415 Neuroaffective Disorders of Aging (4, Sp) Methods of studying, evaluating, and treating cognitive, psychiatric, and behavioral problems associated with medical conditions of old age.

GERO 416 Health Issues in Adulthood (4, Sp) Physiological, psychological, and social health problems of adults as they are impacted by health choices throughout life.

GERO 421 Managed Care for an Aging Society (4, FaSpSm) Examines key legislation, policies, practice, and outcomes of managed care and how population aging affects health care delivery.

GERO 423 Psychological Development through Autobiography (4) Introduction to autobiography as a source of individual psychological development, with emphasis on integration of cognitive, emotional, and decision processes.

GERO 453M Women and Aging: Physiological, Social and Political Implications (4, FaSpSm) Problems and resources of the middle-aged and older woman in a changing society; including discrimination, stereotypes, employment, social interaction, etc.

GERO 460 Biodynamics of Aging (4) Consideration of the biological and social-cultural factors that govern the evolution of life spans and the life of humans and selected animal models. Prerequisite: BISC 112 or BISC 113 or BISC 120 or BISC 121; recommended preparation: statistics.

GERO 451 Policy and Program Development in Aging (4) Policy trends and changing roles of local, state, and federal agencies in planning, managing, and evaluating programs in comprehensive, coordinated systems of service for older persons.

GERO 452 Economic Issues and the Aged (2 or 4) Analysis of economic factors associated with the aged; implications for individuals, society, and the economy; lifecycle economics, retirement, income maintenance, and social security.

GERO 461 Seminar in Molecular and Computational Biology (2, FaSpSm) (Enroll in BISC 461).

GERO 470 Aging and Business (4, Fa) An introduction to the dynamic roles of business in an aging society focusing on workplace issues, marketing to mature consumers, and careers for business gerontologists.

GERO 475 Ethical Issues in Geriatric Health Care (4) Biomedical ethical issues that are encountered in working with geriatric patients. Examination of ethical theory and the application of theory to clinical settings.

GERO 481 Case Management for Older Adults (4, Fa) Overview of the concepts, characteristics, skills, and clinical issues of case management in a variety of settings serving older persons.

GERO 482 Global Health and Aging (4, Fa) Overview of the impact aging populations will have on global institutions from a variety of perspectives. Examination of public health policy issues.

GERO 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

GERO 491 Practicum (2-8, max 8, FaSpSm) Supervised experience in one or more community agencies. Graded CR/NC.

GERO 492 Seminar (4, Sp) An in-depth integration of major research and professional themes in the study of human development and aging.

GERO 493 Longevity and Death among Ancient and Modern European Populations (Italy) (2, SpSm) The discoveries of ancient humans and bodies that have been preserved illuminate the connection between diet, health, and disease.

GERO 495 Practicum in Geriatric Care (4, FaSpSm) Supervised experience in a geriatric health care setting which allows students to put theories and ideas into practice. Graded CR/NC. Lecture, discussion, and fieldwork.

GERO 496 Introduction to Clinical Geriatrics (4) Medical problems of older adults emphasizing common geriatric syndromes, chronic illness, and alternative approaches to primary health care of older persons and their families. Upper division standing. Prerequisite: BISC 220L or BISC 221L.

GERO 497abc Honors Seminar (2, 2, 2-4, FaSpSm) Advanced study of empirical approaches in gerontology. Preparation, progress, presentation, and evaluation of Senior Honors Thesis research. Prerequisite: standing in Gerontology Honors Program.

GERO 498 Nutrition, Genes, Longevity and Diseases (4, Sm) Examines the role of nutrition and genes and the impact each has on longevity and diseases, particularly diseases related to aging. Offered in Genoa, Italy.

GERO 499 Special Topics (2-4, max 8, FaSpSm) Examination of special topics in the area of gerontology.

GERO 500 Perspectives on a Changing Society: An Introduction to Aging (4, Fa) Analysis of physical, mental, and social age-related changes as well as implications of population aging trends for individuals and society.

GERO 502 Marketing and Shifts in Consumer Decision Making (4, Fa) Branding, marketing, and consumer behavior through examination of established, transitioning and emerging aging services and organizations.

GERO 504 Current Issues in Aging Services Management (4, Sp) Basic skills needed for an executive working in an aging services environment. Recommended for entry level administrators and managers.

GERO 505 Behavioral and Social Consequences of Design and Environment (4, Fa) Examination of the behavioral and social consequences of design and the environment to create a more satisfying physical environment for both frail and active older adults.

GERO 506 Technological Innovations in Aging (Gerontechnology) (4, Sp) Reflections on shifts in preferences for aging in place and the market ramifications of innovations in science and technology on older consumers and service providers.
USC Independent Health Professions at the Herman Ostrow School of Dentistry

Ranked No. 1 by the U.S. News & World Report in its 2013 rankings, the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy integrates innovative research, education and clinical practice into its curriculum for all students.

The USC Division of Biokinesiology and Physical Therapy and the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy are administered by the Herman Ostrow School of Dentistry of USC. Both of these divisions offer outstanding education at either the graduate or undergraduate level.

The USC Division of Biokinesiology and Physical Therapy was established in 1944. For those entering the physical therapy profession, the division offers the Doctor of Physical Therapy. For practicing physical therapists, the division offers a Master of Science. In addition, the division offers the nation’s longest-standing Ph.D. degree program in Physical Therapy, now a Ph.D. in Biokinesiology. Experienced clinicians with a master’s degree in physical therapy may be eligible for the Doctor of Physical Therapy in an Advanced Standing program. Clinicians specializing in a specific area of practice may enter the Clinical Residency Program. The division is headquartered on the Health Sciences Campus.

The USC Chan Division of Occupational Science and Occupational Therapy opened in 1942 and is headquartered on the Health Sciences Campus. More than 50 percent of the recipients of the American Occupational Therapy Association’s highest awards have been USC graduates. The division offers a professional degree program allowing students to earn a B.S. degree and, in one additional year, an M.A. in occupational therapy. These graduates are eligible to sit for the National Board for Certification in Occupational Therapy® examination. The division offers three graduate degrees: the Master of Arts, the Master of Science and the Doctor of Physical Therapy. Additionally, the division offers a Ph.D. in Biokinesiology, one of the nation’s first Ph.D. degrees in physical therapy education, as well as a Ph.D. in Biokinesiology and Physical Therapy. The graduate curricula for the Master of Science and Doctor of Philosophy degrees are open to all qualified students who are or are not physical therapists.

Master of Science

Graduate study for the Master of Science in Biokinesiology is open to individuals who have a bachelor’s degree and who have a strong interest in movement science.

Admission Requirements

Admission requirements include a superior grade point average in cumulative undergraduate and graduate course work (if applicable). Applicants should score at least 600 in each area of the Graduate Record Examinations. Applicants are to provide the department with three letters of recommendation. The faculty may request a personal interview before making a decision on admission. Admission will be considered for the fall semester only. The application deadline is November 1. All applicants should contact the Division of Biokinesiology and Physical Therapy for advisement.

Prerequisites

The prerequisite for applicants to the Master of Science program in biokinesiology is either: (a) a bachelor’s degree or higher with a science major or equivalent; or (b) a bachelor’s or master’s degree in physical therapy with appropriate basic science content. Courses completed at the time of application must include work (with appropriate laboratory study) in chemistry, physics, calculus and biology. Highly recommended is course work in anatomy, physiology, histology, kinesiology, trigonometry, neuroscience, analytical geometry, exercise physiology, biochemistry and computer programming. Applicants with no background in cellular or molecular biology may be required to take PT 509 in the entry-level DPT program. Candidates should have some degree of computer literacy. International applicants will be considered on a special evaluation of credentials.

Degree Requirements
Completion of the degree requires satisfactory completion of a minimum of 32 credits of course work at the 500 level or above, a research project (BKN 559 and BKN 560), and a comprehensive examination administered with the chair of the Biokinesiology Committee acting as the examination adviser.

Students must complete the three biokinesiology core courses (BKN 550, BKN 551, BKN 552) before sitting for their comprehensive examination. Substituting a course for one of the core courses may be allowed after receiving approval from the Biokinesiology Program Committee prior to the beginning of the course.

In order to fulfill the research project requirement, the following plan is suggested; however, each plan can be individualized based on the needs of the student and/or adviser:

1. Select a research professor (from the department) whose work interests them. This should be done by the end of the first year of study.

2. After receiving the professor’s approval, sign up for BKN 559 (4 units) and complete a semester reading the literature pertinent to the professor’s work.

3. The following semester, sign up for BKN 560 (4 units) and participate in an ongoing research project that is being conducted by the professor. The research paper must be completed within the semester for which BKN 559 units are being given.

See the Doctor of Philosophy in Biokinesiology section for a list of courses available to M.S. students.

Doctor of Philosophy in Biokinesiology and Physical Therapy

The graduate program leading to the Doctor of Philosophy in Biokinesiology and Physical Therapy offers an opportunity for highly qualified students to prepare for careers in academic health care. The curriculum is designed for individuals who envision a career that combines training for physical therapy practice and scholarly research.

Admission Requirements

Applicants must have earned a bachelor’s degree with a superior grade point average as well as Graduate Record Examinations scores. A personal interview with program faculty is required. Prerequisite course work must include: four courses in the biological sciences with labs (including human anatomy, human physiology and cell or molecular biology); one year of college physics with lab; one year of college chemistry with lab; one semester of college mathematics; two courses in psychology; one course in composition and writing; one course in literature or history. Courses that are highly recommended include: biochemistry, calculus, kinesiology, exercise physiology, neuroscience, genetics and a cross-cultural course in sociology.

Application for admission to the Division of Biokinesiology and Physical Therapy requires submission of two sets of materials: special division application and university application forms. Students are admitted for study in the Ph.D. in Biokinesiology and Physical Therapy program beginning in the fall semester of each academic year. Both sets of applications must be submitted by December 1 of the previous year. At the time of admission to the program, the student must identify a faculty member who will serve as an adviser throughout each phase of study.

Degree Requirements

This degree is under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations.

A minimum of 116 units is required for completion of this program.

Estimated Calendar of Study

Basic and Clinical Science Foundation Courses (Years 1, 2)

The student will enroll in all required course work and clinical experiences excluding BKN 790, BKN 794abcdz, PT 630, PT 631, PT 632, PT 660 and PT 665.

Qualifying Exam (Year 3)

The student will select a qualifying exam committee and begin preparing a research proposal (register for BKN 790). During this time, the student is encouraged to enroll in key elective courses, both inside and outside the division, which will enhance research proposal development. The expectation is that the student will sit for the qualifying exam and achieve doctoral candidacy at the end of year three.

Research and Dissertation Preparation (Years 4, 5)

The student will complete the research project and prepare a dissertation (register for BKN 790 and BKN 794). The expectation is that the student will successfully defend the dissertation by the end of year five.

Completion of Internship Requirement (Year 6)

The student will complete the required internships to achieve clinical competency (register for PT 630, PT 631, PT 632, PT 660 and PT 665).

Doctor of Philosophy in Biokinesiology

The graduate program leading to the Doctor of Philosophy in Biokinesiology is designed to prepare candidates for research and teaching at the university level. Actual programs of study will be designed with a degree of flexibility directed toward individual students who seek to become independent scholars.

Admission Requirements

Applicants must meet all general admission requirements of the university. Admission requirements include a superior grade point average in cumulative undergraduate and graduate course work (if applicable). In addition, applicants should score at least 600 in each area of the Graduate Record Examinations (GRE) and have some research experience. Students admitted for the Master of Science degree are not automatically admitted to the Doctor of Philosophy program. The Master of Science is not required as a prerequisite to the Ph.D. but may be advised.

Applicants must have a personal interview with the program faculty. A student can be considered for admission only when a member of the full-time Ph.D. faculty has agreed to serve as the student’s Ph.D. adviser. Three letters of recommendation and duplicate transcripts must be sent to the division for preliminary evaluation, although final acceptance is based upon the official USC application procedure.

Prerequisites (Ph.D. Program)

The prerequisite for applicants to the Ph.D. program in biokinesiology is either: (a) a bachelor’s degree or higher with a science major or equivalent; or (b) a bachelor’s or master’s degree in physical therapy with appropriate basic science content. Courses completed at the time of application must include work (with appropriate laboratory study) in chemistry, calculus, physics and biology. Highly recommended is course work in anatomy, physiology, histology, cell biology, exercise physiology, kinesiology, biochemistry, neuroscience, trigonometry, analytical geometry and computer programming.
Candidates should be computer literate. International applicants will be considered upon evaluation of credentials by the USC Office of Admission.

Students deficient in certain prerequisites may be admitted subject to completion of requirements within two years after admission. An additional year may be granted upon review of the student’s program by a faculty committee. Work in any prerequisite subject will not be part of the required 60 units for the Doctor of Philosophy.

Screening Procedure

A screening procedure will be offered twice each year for qualified students. It must be taken prior to the completion of 24 units at the 500-level or higher. The purpose of the screening procedure is to assess the progress of the Ph.D. student and to determine whether that progress is sufficient to continue in the Ph.D. program. Passing the procedure is a prerequisite for continuation in the Ph.D. program.

Course Requirements

A minimum of 60 units is required for the Doctor of Philosophy degree.

* Or equivalent graduate ethics course.
** Or equivalent graduate level statistics.

Ph.D. students must complete three core courses (BKN 550, BKN 551, BKN 552) before participating in the screening procedure. Substituting a course for one of the core courses may be allowed after receiving approval from the Biokinesiology Program Committee prior to the beginning of the course.

Other course requirements (to complete 60 units) will vary according to the specific needs of the student. Course work other than departmental offerings is encouraged and may be required by the student’s qualifying exam committee.

Foreign Language Requirement

There is no foreign language requirement.

Qualifying Exam Committee

Upon successful completion of the screening examination the student and the major adviser will select a qualifying exam committee for continuing course work and independent study. The qualifying exam committee comprises five members: three to four full-time faculty from the Division of Biokinesiology and Physical Therapy, one whom serves as committee chair, and one or two faculty members outside the division.

The qualifying exam committee will recommend course work, independent study and readings in the major and cognate areas.

Qualifying Examination

The Ph.D. qualifying examination is offered during the fall or spring semesters. The qualifying examination concentrates on the student’s ability to demonstrate knowledge in the major academic area chosen and its relation to other areas of study offered in the department. The qualifying examination has both written and oral components. A student failing any part of the examination may be allowed one additional opportunity to pass that portion at the discretion of the qualifying exam committee, within the regulations of the Graduate School governing the repetition of qualifying examinations.

Dissertation Committee

After the qualifying examination has been passed and a dissertation topic approved, the qualifying exam committee shall be known as the dissertation committee and may be reduced to three members upon unanimous recommendation to the dean of graduate studies. One of the three members must be from outside the major division. The chair of the dissertation committee will be the principal research adviser.

Dissertation and Oral Defense

An acceptable dissertation based on original investigation is required. The dissertation must show technical mastery of a special field, capacity for independent research and scholarly ability.

The dissertation and the defense or final oral must have the unanimous approval of the dissertation committee. The dissertation should be complete within three years of the date the proposal is approved.

Capstone Project (PT 592)

This required project provides the student with the opportunity to synthesize the learning experiences of the DPT program. It can take the form of a case study, a learning module for students or patients, a business plan for a unique form of health care delivery, or some other innovative concept. Work toward the completion of the project is done under the guidance of a single faculty member or a committee, depending on the magnitude and scope of the project. The primary faculty adviser will determine the unit value of the project.
A clinical residency is also available as part of the post-professional DPT program.

Certificate in Neurologic Physical Therapy

Clinical Residency Program

This program is directed at practicing clinicians who seek post-professional clinical residency education in neurologic physical therapy and wish to obtain an academic credential for its completion.

Admission Requirements, Prerequisites and Degree Requirements

Admission requirements such as grade point average, GRE scores and P.T. licensure are the same as those for the post-professional DPT. In addition to the above listed requirements, experience as evidenced by the years in practice and post-graduate course work taken will be assessed in the applicant’s portfolio. The faculty may request a personal interview. Admission will be considered for fall semester only. Deadline for application is four months prior to the proposed starting date. All applicants should contact the Division of Biokinesiology and Physical Therapy for advisement. Completion of the certificate requires satisfactory completion of a minimum of 15 units.

Doctor of Physical Therapy and Master of Public Health

The Post Professional Doctor of Physical Therapy (DPT) and the Master of Public (MPH) dual degree program offers the opportunity for physical therapy clinicians to pursue a doctoral-level education in combination with an integrated approach to health care. The program spans four years. Students begin the first one to two years completing MPH core and elective course work in the Department of Preventive Medicine. The remaining years are devoted to program requirements in physical therapy.

Professional Entry-Level Doctor of Physical Therapy Program

This program comprises six semesters and two summer courses for completion of the required 115 units. Clinical experience (clerkship) is part of the curriculum during all three years. The Division of Biokinesiology and Physical Therapy awards the DPT to enrolled students who have satisfactorily completed the three-year curriculum. For successful completion, students must complete all course work with a minimum cumulative GPA of 2.75, meet all professional standards and pass all clinical clerkships.

Admission Requirements (Entry-Level)

Applicants are required to complete the equivalent of a U.S. baccalaureate degree at an accredited college or university prior to matriculation. Prerequisite course work must include: four courses in the biological sciences (including human anatomy, human physiology and either cell or molecular biology); one year of college physics; one year of college chemistry; one semester of college mathematics; two courses in psychology; one course in composition and writing; and one course in either literature or history. Human anatomy, human physiology, physics and chemistry must include laboratories. The following courses are highly recommended: biochemistry, calculus, kinesiology, exercise physiology, neuroscience, genetics and a cross-cultural course in sociology. Applicants should be computer literate.

Students from foreign countries must have completed one year of study in the United States prior to application. Credits from foreign institutions must be approved by the USC Office of Admission.

Graduate Record Examinations (GRE)

The GRE is required of all applicants. In general, minimum scores of 500 are required on each of the general test measures of verbal, quantitative and analytical ability.

Applications

Applications are available in September for the class entering in September of the following year. The deadline for receipt of applications is December 1 of each year. Only one class is admitted each year.

The Admissions Committee reviews all information submitted. Applicants may be requested to appear for a personal interview. It is highly recommended that all applicants make an appointment to visit the division’s office located on the Health Sciences Campus and talk with students and members of the faculty.

Notice of Acceptance

Notice of acceptance will be sent to successful candidates no earlier than late January and continually thereafter until the class is filled. In no case will an acceptance be offered earlier than one year before anticipated enrollment.

Candidates should reply to an offer of acceptance within three weeks enclosing a $1,000 deposit (nonrefundable) which is credited to tuition at the time of registration. A letter of withdrawal is required if applicants wish to relinquish their place in the class; release is granted automatically upon receipt of the letter.

Degree Requirements (Entry-Level)

The DPT is awarded to enrolled students who have completed satisfactorily the three-year curriculum of 115 credits (depending on electives chosen). The minimum number of credits required for graduation is 115. Clinical experience (clerkship) is part of the curriculum during all three years.

The Division of Biokinesiology and Physical Therapy uses a system of student evaluation and grading that is designed to encourage self-reliance, to stimulate the student’s independent quest for knowledge and to promote excellence in clinical and academic achievement.

Faculty of the program are responsible for establishing evaluation criteria appropriate to the objectives of each course and for specifying the manner in which evaluative information is to be gathered. For clinical evaluation, descriptive comments based on the student’s performance are submitted by faculty and clinical instructors to the student’s permanent file.

</tr>
</tbody>
</table>
BKN 557l Functional Neuroanatomy with Lab Dissection (3, FaSpSm) Comprehensive survey of regional neuroanatomy in lecture and laboratory format with dissection. In-depth consideration is given to neuroanatomical basis of sensory and motor function. Topics include neuroanatomical basis of cellular function, somatosensation, neural signals, movement and distributed motor control, and homeostasis regulation.

BKN 559 Readings in Biokinesiology (1-4, max 8, FaSpSm) Independent review and synthesis of papers appearing in the current literature.

BKN 563 Biomechanics (2, 2 years, 5p) Advanced study of the biomechanics of human motion. Emphasis on the inverse dynamics solution to qualify forces and moments of force. Lecture and demonstration.

BKN 566 Neurobiology of Locomotion (2) Topics include developmental biology of embryonic motility, central pattern generators, descending neural regulation, sensory modulation, and perception/action influences on the motor control of locomotion. Prerequisite: BISC 524, BISC 525. Recommended preparation: BKN 550.

BKN 567 Advanced Topics in Biomechanics (2, 5p) Advanced examination of motion-analysis techniques, applications and data interpretation. Magnetic tracking techniques, upper-extremity kinematics, energy/work/impulse concepts, intersegmental dynamics, and EMG muscle modeling are examined. Prerequisite: BKN 563.

BKN 575 Principles of Musculoskeletal Imaging (2, 5m) Basic principles of musculoskeletal imaging as it relates to biomechanics research. Topics include MRI physics, variable imaging parameters and selection of pulse sequences.

BKN 578 Classic Readings in Biokinesiology (2) A seminar course in which students read and discuss classic scientific papers that have shaped the development of the movement sciences over the past 150 years.

BKN 585 Systematic Research Writing (3, 5m) Development of analytical journal reading skills and proficiency in scientific writing. Lecture and tutorial format.

BKN 587ab Physiological Correlates of Therapeutic Exercise (4-4, FaSpSm) A: Responses of the physically handicapped to exercise. Emphasis on muscle, energy metabolism, body temperature, environment, endocrine considerations. Strengthening, training, endurance, and evaluation of performance. B: Responses of the physically handicapped to exercise, with emphasis on cardiovascular and respiratory adaptations and pathology.

BKN 588 Physiology and Biomechanics of Resistance Exercise (2, 5p) Science of resistance-exercise prescription, adaptation, and outcome assessment. Topics include periodization, neuromuscular and connective-tissue adaptation, special populations, and biomechanical considerations.

BKN 590 Directed Research (1-12, FaSpSm) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

BKN 593 Behavioral Basis of Motor Control and Learning (3, Fa) Seminar in movement science dealing with the behavioral basis of motor control and learning from an information-processing perspective. Recommended preparation: statistics; psychology.

BKN 594abz Master’s Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

BKN 599 Special Topics (2-4, max 8, FaSpSm) Studies of scientific theory in physical therapy.

BKN 615 Principles of Skeletal Adaptation (4, 2 years, 5m) Introduction to the integrative physiology of skeletal adaptation to mechanical loading. Emphasis on mechanical and chemical regulation of bone mass.

BKN 617 Modeling the Motor System: An Introduction (2, 2 years, 5p) Introduction of basic principles and models of the primate motor system. Emphasis on arm control.

BKN 618L Modeling the Motor System: Laboratory (1, 2 years, 5p) Introduction of computer programming and implementation of computational models in a laboratory setting.

BKN 621 Electromyography in Research and Practice (3, 2 years, Fa) Physiology and electrophysiology of muscular contraction, how it is collected, quantified and processed. Uses of electromyographic information for research and clinical assessments. Recommended preparation: human anatomy, skeletal muscle physiology.

BKN 623 Neuroplasticity and Neural Repair (3, 2 years, Fa) Integration of basic research on neuroplasticity and clinical research on central nervous system reorganization after brain injury. Implication for neurorecovery and rehabilitation.

BKN 624 Advanced Independent Study in Biokinesiology (1-4, max 8, FaSpSm) Examination of selected mechanisms underlying normal movement and pathological movement. Ph.D. students only.

BKN 730 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

BKN 748abcd Doctoral Dissertation (2-2-2-2, 5a) Credit on acceptance of dissertation. Graded IP/CR/NC.

Physical Therapy (PT)

PT 507 Professional Practice: Therapist Perspective (2, Fa) Identification of personal values, attitudes and beliefs and their relationship to personal development into a health care provider. Emphasis on communication skills, ethics, and professional guidelines, laws and regulations.

PT 509 Cellular and Systems Physiology (3, Fa) Selected subjects in cellular and systems physiology. Emphasis on molecular and cellular aspects of neuromuscular function; also renal and endocrine physiology.

PT 516 Principles of Disease (2, 5m) Principles and mechanisms of genetics, immunology, infection, wound healing, and oncology. Lecture.

PT 521L Basics of Patient Management (4, Fa) Development of basic decision-making skills, professional behaviors and impairments assessment in patients with musculoskeletal neurologic and/or cardiopulmonary dysfunction. Lecture, laboratory.

PT 529 Life Span Motor Control (3, 5m) Introduction to sensorimotor systems, overview of current perspectives in motor control from fetus through late adulthood, and clinical tests of motor proficiency. Lecture, limited laboratory.

PT 530ab Therapeutic Exercise (a: 2, 5p; b: 2, 5m) a: Theoretical and practical principles for evaluation of exercise need and prescription of exercise programs. Emphasis on approaches for patients with musculoskeletal deficits. (Duplicates credit in former PT 530.) b: Examination of needs analysis and prescription of exercise programs for special patient populations and assessment of current community trends in exercise and wellness.

PT 534l Neuroanatomy (3, Fa) Organized approach to structures in the brain, spinal cord and peripheral nervous systems that subserve motor, sensory, and integrative functions, memory, cognitive and special senses. Lecture, laboratory.

PT 536 Pathology of Cardiopulmonary Disease and General Medical Conditions (2, Fa) Pathology and pathophysiological mechanisms in disease of the cardiovascular, pulmonary and circulatory systems; examination of diabetes, burns, and other disabling medical disorders. Lecture. Prerequisite: PT 509, PT 514L, PT 516, PT 521L, PT 529.

PT 539 Clinical Pharmacology (1, Fa) Effects of commonly used drugs in patients with physical disability; side effects that alter physical performance or responses to exercise.

PT 546 Neuropathology (3, 5p) Pathology in the central and peripheral nervous systems that alter motor and sensory performance. Emphasis on loss of motion, excessive and involuntury movement disorders. Lecture. Prerequisite: PT 516, PT 534L.

PT 547 Professional Practice: System Perspective (2, 5m) Analysis of the integration of physical therapy practice into the national health care system; administration, budgeting and reimbursement for physical therapy services.

PT 548l Clinical Exercise Physiology (4, Fa) Adaptation of the human body to exercise and the use of exercise to modify human function. Lecture and laboratory.

PT 551l Therapeutic Application of Physical Agents (2, 5m) Physiologic responses to the application of thermal, mechanical, electromagnetic and hydrodynamic therapeutic procedures. Evaluation procedures and intervention planning. Lecture, laboratory. Prerequisite: PT 521L.

PT 554l Analytical Anatomy (2, 5p) Detailed kinesiologic analysis of axial, spine, head, neck, face and bulbar muscles. Lecture, laboratory and clinical demonstration. Prerequisite: PT 514l.

PT 557 Professional Practice: Patient Perspective (2, 5p) Examination of issues related to professional-patient relationships, culture, lifestyles, ethnicity, gender and age. Emphasis on communication within a patient care model.

PT 561abcd Evidence for Physical Therapist Practice (2-2-2-2-2) a: Introduction to a patient-centered Evidence Based Practice model with emphasis on professional communication skills, ethics, professional guidelines, laws and regulations; b: introduction to acquiring, appraising and integrating research evidence; c: advanced critical analysis and application of research of evidence; d: advanced integration of patient values as influenced by culture, ethnicity, lifestyles, gender, and age into patient-centered clinical decision making; e: analysis of the integration of physical therapist practice into the national health care system; administration, budgeting and reimbursement for physical therapist services.

PT 566 Disorders of the Musculoskeletal System (3, 5p) Regional description of pathology and
pathophysiological mechanisms of disorders of bone, connective tissue, and joints. Lecture, demonstration.

PT 549 Fundamentals of Neuroscience (4, 5p) Detailed analysis of neurophysiologic mechanisms underlying normal and abnormal motor and sensory function. Lecture. Prerequisite: PT 529, PT 516, PT 529, PT 534L.

PT 571L Clinical Management of Cardiopulmonary Dysfunction (4, Fa) Physical therapy evaluation and intervention in the care of patients with circulatory, cardiac, or pulmonary dysfunction. Lecture, case presentations, laboratory. Prerequisite: PT 521L.

PT 573 Physical Examination and Differential Diagnosis in Patients with Medical Disorders (2, Fa) Physical assessment and differential diagnosis in common medical conditions. Emphasis on factors that influence physical therapy or require referral back to the physician.

PT 574 Clinical Biomechanics (2, 5p) Introduction to the principles of biomechanics (statics, dynamics) as they apply to physical therapy practice. Emphasis on tissue mechanics, joint function and gait. Lecture. Prerequisite: PT 524L.

PT 581L Clinical Management of the Patient with Neurological Dysfunction (5, 5p) Physical therapy theory and methods for intervention in neurological dysfunction. Lecture, laboratory. Neuroanatomy lab available. Prerequisite: PT 509, PT 516, PT 521L, PT 529, PT 534L.

PT 582 Mechanics of Human Gait (2, Fa) Introduction to both normal and pathological gait. Emphasis on the basic components of normal ambulation including temporal-spatial factors, joint motion, kinetics, kinematics, and muscle activity. Lecture.

PT 583L Clinical Electrophysiology (3, 5p) Use of electrical currents to evaluate and treat musculoskeletal, neurological and wound disorders. Theory and practice. Lecture, laboratory. Prerequisite: PT 514L, PT 554L.

PT 585 Physical Examination and Differential Diagnosis in Patients with Orthopedic Disorders (4, Fa) Physical examination and differential diagnosis in orthopedic disorders. Emphasis on factors that influence physical therapy or require referral back to the physician.

PT 591 Physical Examination and Differential Diagnosis in Patients with Orthopedic Disorders (2, 5p) Physical examination and differential diagnosis in orthopedic disorders. Emphasis on factors that influence physical therapy or require referral back to the physician.

PT 592 Capstone Project (1-6, max 6, FaSpSm) Synthesis of knowledge gained in the pursuit of D.P.T. degree through a case study, a learning module for students or patients, a business plan for a unique form of health care delivery, or some other innovative concept. The primary faculty advisor will determine the unit value of the project.

PT 592abcd Residency in Advanced Clinical Physical Therapy (1-4 each, FaSpSm) Residency open to students pursuing a Graduate Certificate in Orthopedic Physical Therapy or Neurologic Physical Therapy or the post-professional D.P.T. program. Graded CR/NC. P.T. Licensure required.

PT 600abcdeg Clinical Clerkship (1-31±1-30, FaSpSm) a: Practical experience in two- or six-week physical therapy manual skills, decision making and professional behaviors. b: Practical experience in six-week physical therapy manual skills, decision making and professional behaviors. c: Practical experience in two-week physical therapy psychomotor skills, decision making and professional behaviors. d: Practical experience in two-week physical therapy psychomotor skills, decision making and professional behaviors. e: Practical experience in six-week physical therapy psychomotor skills, decision making and professional behaviors. Graded CR/NC.

PT 605 Orthopedic Radiology (2, Fa) Study of normal and pathologic skeletal radiographic examinations.

PT 606 Clinical Imaging (2, 5p) Elements of reading roentgenographs, CAT and MRI scans for the physical therapist. Lecture, demonstration, practical experience. Open only to Biokinesiology and Physical Therapy graduate students.

PT 607 Clinical Scanning (2, 5p) Survey of diagnostic imaging for orthopedic and neurologic disorders seen in physical therapy practice.

PT 608 Pharmacotherapeutics (2, Fa) Indications, contraindications, physiologic mechanisms, and side-effects of pharmacologic agents. Analysis of interactions between drugs and physical therapy interventions.

PT 612L Physical Therapy Management of Spinal Disorders (2, FaSpSm) Advanced evaluation and treatment skills for the management of individuals with spinal disorders. Lecture, laboratory. Prerequisite: PT 600d.

PT 613L Physical Therapy Management of the Foot and Lower Quarter (2, Fa) Advanced evaluation and treatment skills for management of individuals with lower extremity disorders. Lecture, laboratory. Prerequisite: PT 600d.

PT 614L Evaluation and Management of Hand Dysfunction (2, 5p) Pathology, evaluation, differential diagnosis and treatment of hand and wrist dysfunction. Lecture, laboratory. Prerequisite: PT 600d.

PT 618L Seminar in Advanced Neurological Rehabilitation (2, 5p) Advanced evaluation treatment, and problem solving skills for the individual with neurological dysfunction. Lecture, laboratory. Prerequisite: PT 600d.

PT 619L Clinical Biomechanics (2, Fa) Advanced evaluation and treatment of individuals with peripheral nerve disorders using electrotherapy. Lecture, laboratory. Prerequisite: PT 600d.

PT 621L Clinical Management of the Patient with Musculoskeletal Dysfunction (5, 5p) Physical therapy theory and methods of evaluation and treatment of orthopedic dysfunction. Lecture, demonstration, laboratory. Dissection lab available. Prerequisite: PT 514L, PT 521L.

PT 624abc Evidence Based Practice (2-2-2, a: 5m, b: Fa, c: 5p) a: Practical considerations of evidence-based practice including patient interviews and search methods. b: Development of critical analysis skills of evidence to enhance critical thinking. c: Focus on evidence-based decision making using patient perspectives to effect optimal functional outcomes.

PT 650 Differential Diagnosis in Physical Therapy (2, 5m) Consideration of principle of differential diagnosis with emphasis on mastering this skill. Open only to Biokinesiology and Physical Therapy graduate students. Recommended preparation: completion of years 1 and 2.

PT 654 Physical Therapy Intervention in Pediatrics (2, 5m) Physical therapy management of commonly encountered pediatric diagnoses. Seminar, clinical laboratory. Open to students enrolled in physical therapy degree programs only.

PT 660 Advanced Clerkship with Academic Integration (5, FaSpSm) A 16-week clerkship consisting of a minimum of 24 hours per week in a part-time setting. Emphasis on the care of orthopedic, neurologic, pediatric or complicated medical conditions. Graded CR/NC. Prerequisite: PT 600c.

PT 665 Advanced Clinical Clerkship (5, FaSpSm) A 16-week clerkship consisting of a minimum of 36 hours per week in a full-time setting. Emphasis on care of orthopedic, neurologic, pediatric or complicated medical conditions. Graded CR/NC. Prerequisite: PT 600c.

Faculty

Mrs. T.H. Chan Professorship in Occupational Science and Occupational Therapy, Associate Dean and Chair: Florence A. Clark, Ph.D., OTR/L, FAOTA

Associate Chair: Ann Neville-Jan, Ph.D., OTR/L, FAOTA

Professors: Sharon Cermak, Ed.D., OTR/L, FAOTA; Florence A. Clark, Ph.D., OTR/L, FAOTA; Gelya Frank, Ph.D.; Mary Lawlor, Sc.D., OTR/L, FAOTA; Cheryl Mattingly, Ph.D.; William Morgan, Ph.D.

Associate Professors: Lisa Aziz-Zadeh, Ph.D.; Ann Neville-Jan, Ph.D., OTR/L, FAOTA

Assistant Professors: Natalie Leland, Ph.D., OTR/L, BCG (Gerontology), FAOTA; Elizabeth Pyatk, Ph.D., OTR/L; Shawn Roll, Ph.D., OTR/L, CWCE, RMSK; Olga Solomon, Ph.D.; Barbara Thompson, Ph.D.

Professor of Clinical Occupational Therapy: Linda Fazio, Ph.D., OTR/L, FAOTA

Associate Professors of Clinical Occupational Therapy: Erna Blanche, Ph.D., OTR/L, Katie Jordan, OTR/L;
Assistant Professors of Clinical Occupational Therapy: Amanda Aaron, OTR, OTL; Sarah Bream, OTR, OTL; Elizabeth Carley, OTR, OTL; Carlin Daley, OTR, OTL; Celso Delgado Jr., OTR, OTL; Camille Dieterle, OTR, OTL; Michelle Farmer, OTR, OTL; Joan Forry, Ph.D.; Don Gordon, Ph.D., OTR; Ashley Halle, OTR, OTL; Kiley Hanish, OTD, OTL; Jess Holguin, OTD, OTL; Michelle Hsi, OTR, OTL; Karrie Kingsley, OTR, OTL; John Margetis, OTR, OTL; Jenny Martinez, OTR, OTL; Michael McNulty, OTR, OTL; Jayne Meyer, OTR, OTL; Helen Mirsaiedi, OTR, OTL; Stacey Morikawa, OTR, OTL; Phuong Nguyen, OTD, OTR, OTL; Shannon O'Brien, OTD, OTL; Emily Ochi, OTR, OTL; Jazminne Orozco, OTD, OTL; Daniel Park, OTR, OTL; Joanne Park, OTD, OTR, OTL; Kimberly Perring, OTR, OTL; Elsey Peterson, OTD, OTL; J. Deborah Pitts, Ph.D., MBA, OTR, OTL; BCCH (Mental Health); Lyndsay Price, OTR, OTL; Samia Rafeedie, OTR, OTL; Chantelle Rice, OTD, OTR, OTL; Kimberly Rice, OTD, OTL; Clarissa Saunders-Newton, Ph.D., OTR, OTL; Shelby Surfas, OTR, OTL; Ashley Ueyehiro, OTR, OTL; Myka Winder, OTR, OTL.

Instructors of Clinical Occupational Therapy: Aimee Aguillon, OTR/L; Mahjabeen Af kar, OTR/L; Catherine Crowley, OTR, OTL; Kim Eggleston, M.A., OTR/L; Kathleen Gross, OTR, OTL; Heather Kitching, OTR, OTL; Stephanie Mielke, OTR, OTL; Tessa Milman, OTD, OTL; Scott Orr, M.A., OTR/L; Whitney Pike, B.S., OTR/L; Lindsay Pugh, M.S., CCC-SLP; Janice Rocker, M.S., OTD, OTL; Carey Sokol, M.A., OTR/L; Joan Vartanian, B.S., OTR/L

Research Professor: Michael Carlson, Ph.D.

Research Adjunct Professors: Barbara Gage, Ph.D.; Susan Lipton Garber, Ph.D.

Research Associate Professor: Sarah Jeanne Salvy, Ph.D.

Research Assistant Professors: Stefanie Bodison, OTR/L; Jesus Diaz, OTR, OTL; Stacey Schepens, Ph.D., OTL; Derek Snyder, Ph.D.; Cheryl Vigen, Ph.D.

Adjunct Assistant Professor of Clinical Occupational Therapy: Susanne Roley, OTR, OTL

Adjunct Instructors of Clinical Occupational Therapy: Susan Bowles, OTR, OTL; Cynthia Burt, M.A., OTR/L; Remy Chu, B.S., OTR/L; Lisa Deshaies, M.A., OTR/L; Heidi Dombish, M.S., OTR/L; Colette Nagami, OTR/L, HTC; Anna Nguyen, OTR, OTL; Karen Park, OTR, OTL; Tammy Richmond, M.A., OTR/L; Pamela Roberts, M.A., OTR/L; FAOTA: Joan Surfas, M.A., OTR/L

Distinguished Emeritus Professor: Elizabeth J. Yerxa, Ed.D., LHD (Hon.), FAOTA

Emeritus Professor: Ruth Zemke, Ph.D., FAOTA

Degrees Offered

The USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy offers a Bachelor of Science in Occupational Therapy, a minor in Occupational Science, and a Master of Arts in Occupational Therapy. The Master of Arts in Occupational Therapy is offered for students continuing their education following their undergraduate degree in occupational therapy, for students whose first degree is in another field and also for certified occupational therapists seeking a post-professional degree. The division also offers the professional courses you must have completed a minimum of 24 full-time weeks of clinical fieldwork, sit for the National Board Certification in Occupational Therapy® (NBCOT) exam and apply for a license (in most states including California).

Pi Theta Epsilon

Pi Theta Epsilon is the national honor society for occupational therapy students and alumni. This society recognizes and encourages superior scholarship among students enrolled in entry-level graduate programs of occupational therapy across the United States.

The Alpha Eta Chapter of Pi Theta Epsilon (PTE) at the University of Southern California selects candidates early in the spring semester of each year based on National PTE guidelines related to academic standing and students' potential for leadership in the profession.

Bachelor of Science

The undergraduate curriculum leads to the Bachelor of Science with a major in Occupational Therapy. Although professional study begins during the junior year, most students apply to the major as incoming freshmen. Students may apply any time prior to May 15 of the sophomore year. Students majoring in occupational therapy can earn a USC master's degree in occupational therapy with just one additional year instead of the traditional two years, substantially reducing their overall cost of education and preparing them sooner for the National Board Certification in Occupational Therapy® (NBCOT) examination. Successful completion of the Master of Arts degree and successful completion of a minimum of 24 full-time weeks of clinical fieldwork are required for eligibility to sit for the NBCOT examination. Certification from the board and licensure (most states) are required to practice as an occupational therapist. (See here for a description of the M.A. degree program.)

Admission Criteria and Application Procedures for Incoming Freshmen

See the Undergraduate Admission section of this catalogue for admission criteria and application procedures for the university.

Admission Criteria for Current USC Students

After admission to USC, students wishing to add or change their major to occupational therapy should contact the division. Requirements for admission are:

1. an autobiographical statement that demonstrates strong potential to be an occupational therapist as well as an understanding of occupational therapy as a career choice
2. a cumulative grade point average of 3.0 or higher in undergraduate course work
3. a plan for completion of all USC Dornsife College of Letters, Arts and Sciences general education requirements and foreign language requirements by the beginning of the senior year
4. a plan for completion of pre-professional course work by specified deadlines

Application Procedures for Current USC Students

Applications will be reviewed after the application deadline, and once the following materials have been received by the USC Chan Division of Occupational Science and Occupational Therapy:

1. Completed division application form
2. Current copy of the student’s STARS report
3. A personal statement (600 words or less) in response to the following prompt: Please describe a significant experience, achievement or personal characteristic that demonstrates why you would be an effective occupational therapist. Please include your understanding of occupational therapy in your essay.
4. Three letters of recommendation from professors, employers or other professionals, not related to the applicant, sent directly to the division or delivered in a sealed envelope. One letter should be from a professor.

Deadlines for Current USC Students

Sophomores may apply by May 15 to apply for admission to begin the program in the fall of their junior year. The junior year entry option has very limited admissions availability each year and available spaces are not guaranteed.

Program Requirements

A total of 128 units is required for the Bachelor of Science degree. An occupational therapy major cannot count any 300-level OT course toward the B.S. degree.

General Education Requirements

The university’s general education program provides a coherent, integrated introduction to the breadth of knowledge needed to become a well-educated person. This program requires six courses in different categories, plus writing, diversity and foreign language requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

Required Pre-Professional Courses

We recommend that you meet with an admissions counselor within the division in order to determine course work that can be taken at USC or could be transferred and substituted for required course work. Before taking the advanced professional courses you must have completed the pre-professional required courses:

• Within the last five years
• With a minimum GPA of 3.0 (pass/fail or grades below a C are not accepted)
• From an accredited junior college, four-year college or university
• Either in a classroom setting or online; however, anatomy must be completed in a classroom setting (refer to Course Work Taken Elsewhere)
• For a total of three or four semester units each (with the exception of medical terminology, which may be 1 or 2 units)

Required Pre-Professional Courses (USC course numbers are noted)

• Students who wish to transfer credit for courses taken at another institution must gain university approval:
Four-week intensive courses are offered by the division in human anatomy (OT 260) and human physiology (OT 261) from mid-May to mid-June (just prior to the start of summer professional courses) for those students who have been unable to complete those courses earlier. These courses are also offered fall and spring semesters.

Students may take OT 405L, OT 406L, OT 440L and OT 441L in the junior year, after having completed Human Anatomy and Lifespan Development. Human Physiology must be completed by fall of the junior year. The remaining pre-professional courses must be completed by the start of the senior year.

Required Professional Courses

Enrollment in professional occupational therapy courses is limited to junior and senior occupational therapy majors only.
