CHE 476 Chemical Engineering Materials (3, Sp) Chemical and physical properties of solid materials used by chemical engineers, including polymers, metals, and ceramics. Materials design for industrial applications. *Prerequisite:* CHEM 322aL.

CHE 477 Computer Assisted Polymer Engineering and Manufacturing I (3, Sp) Estimation of physical, mechanical, chemical and processing properties of thermal plastics. Major molding processes. Mold flow simulation and residual stresses analysis. Case studies. *Prerequisite:* junior class standing.

CHE 480 Chemical Process and Plant Design (3, Sp) Applications of unit operations, thermodynamics, kinetics, and economic balance; energy conservation in heat exchanger networks and in sequencing of separational devices. Safety aspects. *Prerequisite:* senior standing.

CHE 485 Computer-Aided Chemical Process Design (3, Fa) Use and optimization of modern computer software for chemical process design. *Prerequisite:* CHE 442, CHE 443.

CHE 486 Design of Environmentally Benign Process Plants (3, Sp) Chemical Process Plants interact with the environment as an integrated system. This course discusses design procedures to minimize unwanted effluents to air, water and solid wastes. *Corequisite:* CHE 480 or CHE 485.

CHE 487 Nanotechnology and Nanoscale Engineering through Chemical Processes (3) Properties

and processing of nanomaterials including polymeric, metallic, and ceramic nanoparticles, composites, colloids, and surfactant self-assembly for templated nanomaterial production. *Prerequisite:* CHEM 105aL or CHEM 115aL or MASC 110L.

CHE 488 Molecular and Cellular Bioengineering (3, Fa) Design, synthesis, and analysis of biological molecules; routes to understand and engineer living systems at the molecular and cellular level; systems and synthetic biology. *Prerequisite:* BISC 320.

CHE 489 Biochemical Engineering (3, Sp) Application of chemical engineering principles to biological and biochemical processes and materials. Design of biochemical reactors and of processes for separation and purification of biological products. *Prerequisite:* CHE 330, BISC 320L.

CHE 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

CHE 491 Nanotechnology Research for Undergraduates (2, max 4) Independent research in nanotechnology. Research project selected by the student in close consultation with a research adviser. Open only to juniors and seniors. *Prerequisite:* CHE 391L.

CHE 499 Special Topics (2-4, max 8) Course content to be selected each semester from recent developments in chemical engineering and related fields.

CHE 501 Modeling and Analysis of Chemical Engineering Systems (3, Fa) Application of mathematics to problems in chemical engineering; mathematical modeling, differential and integral equations, linear systems analysis and stability, asymptotic and numerical methods. Graduate standing.

CHE 502 Numerical Methods for Diffusive and Convective Transport (3, Sp) Numerical solution of ordinary and partial differential equations describing fluid flow, diffusion with chemical reaction, and conduction in heterogeneous media. Graduate standing.

CHE 510 Energy and Process Efficiency (3, Sp) Management and engineering strategies utilized to improve energy efficiency. Open only to master and doctoral students. (Duplicates credit in AME 577.)

CHE 513 Principles of Combustion (3) (Enroll in AME 513)

CHE 523 Principles of Electrochemical Engineering (3) (Enroll in MASC 523)

CHE 530 Thermodynamics for Chemical Engineers (3, Sp) Application of thermodynamics to chemical engineering systems. *Recommended preparation:* CHE 330.

CHE 531 Enhanced Oil Recovery (3) (Enroll in PTE 531)

CHE 532 Vapor-Liquid Equilibrium (3) Thermodynamics of phase relations; prediction and correlation of phase behavior. *Prerequisite:* CHE 330.

CHE 540 Viscous Flow (3) Fluid mechanical problem of interest to chemical engineers involving laminar flows of incompressible fluids, viscous-dominated creeping flows, and motion of bubbles and drops. *Prerequisite:* CE 309 or AME 309 or CHE 443.

CHE 541 Mass Transfer (3) Fundamentals of mass transfer within a single phase and between phases; applications to separation processes. *Recommended preparation:* CHE 445.

CHE 542 Chemical Engineering Kinetics (3, Sp) Reaction kinetics applied to problems of engineering design and operation. *Recommended preparation:* CHE 442.

CHE 544 Heat Transmission (3) Principles of conduction, radiation, and convection of heat; application to chemical and related industries. *Recommended preparation:* CHE 330, CHE 445.

CHE 550ab Seminars in Chemical Engineering (0-1, max 2, FaSp) Seminars to cover recent

developments in the field of chemical engineering given by invited speakers. Master's students must register for two semesters; Ph.D. students must register for four semesters. Graded IP/CR/NC. *Recommended preparation:* graduate standing.

CHE 554 Principles of Tissue Engineering (3, Fa) Advanced scientific and engineering principles of tissue engineering including stem cell biology, biomaterial scaffolds, protein-surface interaction, bioreactor, and selected bioartificial organs (e.g., kidney, bone, skin). *Recommended preparation:* CHE 476, CHE 489.

CHE 560 Advanced Separation and Bioseparation Processes (3, Sp) Experimental techniques for separation and bioseparation processes and theoretical and computational techniques for modeling them. Graduate standing.

CHE 572 Advanced Topics in Polymer Kinetics and Rheology (3, Fa) Kinetics of polymer synthesis reactions and rheology of polymer solutions. *Recommended preparation:* CHE 442, CHE 472.

CHE 582 Fluid Flow and Transport Processes in Porous Media (3) (Enroll in PTE 582)

CHE 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

CHE 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

CHE 596 Chemical Reactions in the Atmosphere (3) (Enroll in ENE 596)

CHE 599 Special Topics (2-4, max 9) Course content will be selected each semester to reflect current trends and developments in the field of chemical engineering.

CHE 611 Stochastic Modeling and Simulation (3) (Enroll in CE 611)

CHE 690 Directed Research (1-4, max 8, FaSpSm) Laboratory study of specific problems by candidates for the degree Engineer in Chemical Engineering. Graded CR/NC.

CHE 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

CHE 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Viterbi School of Engineering

Materials Science — Mork Family Department of Chemical Engineering and Materials Science

Master of Science in Materials Science

In addition to the general requirements for the Master of Science degree, add the following required courses: CHE 501, EE 471, MASC 501, MASC 503, MASC 504, MASC 505 and MASC 551. The six remaining units for the degree may be electives chosen with departmental approval.

Engineer in Materials Science

Requirements for the Engineer in materials science degree are the same as set forth in the general requirements for graduate degrees.

Master of Science in Materials Engineering

Students with an interest in the characterization, selection and processing of engineering materials, and in materials problems related to engineering design may work toward a Master of Science in materials engineering. This degree is awarded in conformity with the general requirements of the Viterbi School of Engineering. Students may elect to work for this degree in either the Materials Science or Aerospace and Mechanical Engineering departments. The specific courses that constitute an acceptable program must be approved in advance by the administering department.

Doctor of Philosophy in Materials Science

The Doctor of Philosophy with a major in materials science is awarded in strict conformity with the general requirements of the USC Graduate School. It includes the course requirements for the Master of Science degree, which are required courses CHE 501, EE 471, MASC 501, MASC 503, MASC 504, MASC 505 and MASC 551. See general requirements for graduate degrees.

Viterbi School of Engineering

Materials Science — Mork Family Department of Chemical Engineering and Materials Science

Courses of Instruction

MATERIALS SCIENCE (MASC)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MASC 110L Materials Science (4, FaSp) Chemical bonding and structure in crystalline, amorphous, and molecular solids; tendency and mechanisms for chemical change; homogeneous and heterogeneous equilibria. *Prerequisite:* high school chemistry.

MASC 310 Materials Behavior and Processing (3) Principles of mechanical behavior and processing of materials. Relationships between mechanical properties, microstructure, and processing methods. Composites and nonmetallics included.

MASC 334L Mechanical Behavior of Materials (3) (Enroll in CE 334L)

MASC 350L Nanostructured Materials: Design, Synthesis, and Processing (3, Sp) Structure, properties, synthesis, processing and design of metallic, ceramic, polymeric, electronic, photonic, composite, nanophase and biomaterials; nanostructures, microfabrication and smart materials. *Prerequisite:* CHEM 105a or CHEM 115a or MASC 110L, PHYS 152.

MASC 438L Processing for Microelectronics (3) (Enroll in EE 438L)

MASC 439 Principles of Semiconductor Processing (3) Principles relevant to semiconductor processing are covered. Topics include bulk and epitaxial crystal growth, photolithography, evaporation, sputtering, etching, oxidation, alloying, and ion implantation. *Prerequisite:* MASC 110L, EE 338.

MASC 440 Materials and the Environment (3, Sp) Interactions of metals, alloys and composite materials with liquid and gaseous corrosive environments; corrosion protection by alloying and application of inhibitors and metallic or organic coatings.

MASC 471 Applied Quantum Mechanics for Engineers (3) (Enroll in EE 471)

MASC 472 Polymer Science and Engineering (3) (Enroll in CHE 472)

MASC 475 Physical Properties of Polymers (3) (Enroll in CHE 475)

MASC 476 Chemical Engineering Materials (3) (Enroll in CHE 476)

MASC 499 Special Topics (2-4, max 8) Course content will be selected each semester to reflect current trends and developments in the field of materials science.

MASC 501 Solid State (3) Atomic structure, bonding in covalent, ionic and Van der Waals crystals, Brillouin zones, lattices, diffraction, electronic states, lattice vibrations, specific heat, electrical conductivity, and magnetism. *Prerequisite:* EE 471 or EE 539.

MASC 502 Advanced Solid State (3, Fa) Semiconductors, dielectrics and metals, thermoelectric effects, magnetism, magnetic resonance and superconductivity. *Prerequisite:* MASC 501.

MASC 503 Thermodynamics of Materials (3, Fa) Classical thermodynamics, chemical potential, pure phases and mixtures; interphase relationships; binary and ternary solutions; free energy and activity; galvanic cell, electrochemical potential and Pourbaix diagram.

MASC 504 Diffusion and Phase Equilibria (3, Sp) Phase equilibria; phase diagrams; diffusion; planar defects; nucleation and growth; spinodal decomposition; phase transformation. *Prerequisite:* MASC 503.

MASC 505 Crystals and Anisotropy (3, Fa) Stereographic projection; Laue back reflection method; crystal orientation; line and planar crystalline defects; tensors; susceptibility; permeability and permittivity; stress and strain; piezoelectricity; elasticity.

MASC 511 Materials Preparation (3) Principles and techniques of materials preparation; purification, crystal growth from liquid and vapor phases, sintering. *Prerequisite:* MASC 504.

MASC 514L Processing of Advanced Semiconductor Devices (3, Fa) Statistical design of experiments, vapor deposition of thin film dielectrics, plasma etching, advanced lithography, in-situ sensors, process monitoring, quality control, assurance/reliability. *Prerequisite:* EE 504.

MASC 523 Principles of Electrochemical Engineering (3) Electrochemical techniques; mass, charge, and heat transfer; electrochemical thermodynamics and electrode kinetics; electrochemical reactors; optimization; materials and corrosion; experimental modeling of industrial processes.

MASC 524 Techniques and Mechanisms in Electrochemistry (3) Modern electrochemistry; in-situ techniques; in-situ probes of the near-electrode region; ex-situ emersion techniques; cyclic voltammetry, electrooxidation, electrochemical reduction, reactive film formation, enzyme electrochemistry.

MASC 534 Materials Characterization (3, Fa) Characterization of solids by optical microscopy, electron microscopy, (TEM, SEM) and elemental and structural analysis (EPMA, ESCA, AES, SIMS, HEED, LEED, SED).

MASC 535L Transmission Electron Microscopy (4) Transmission electron microscopy and techniques. Specimen-electron beam interaction, electron diffraction and image formation. X-ray microanalysis. Laboratory involves hands-on training on the transmission electron microscope. (Duplicates credit in former MASC 536L.) *Recommended preparation:* MASC 505.

MASC 539 Engineering Quantum Mechanics (3) (Enroll in EE 539)

MASC 548 Rheology of Liquids and Solids (3) (Enroll in CHE 548)

MASC 551 Mechanical Behavior of Engineering Materials (3, Sp) Mechanical properties of materials; macroscopic mechanical behavior related to structure and microstructure of the material; elementary dislocation theory related to basic strengthening mechanisms; fatigue and fracture; nanomaterials. *Recommended preparation:* MASC 310.

MASC 559 Creep (3) (Enroll in AME 559)

MASC 560 Fatigue and Fracture (3) (Enroll in AME 560)

MASC 561 Dislocation Theory and Applications (3, Sp) Elasticity theory; types, sources, motion, interaction of dislocations; stress fields and strain energies; partial dislocations and stacking faults; principles of work-hardening.

MASC 570 Introduction to Photovoltaic Solar Energy Conversion (3) Introduction to the physical

principles, implementation materials, devices, and manufacturing costs of solar cells and panels for photovoltaic conversion of solar radiation to electricity.

MASC 575 Basics of Atomistic Simulation of Materials (3, Fa) Building a parallel computer from components; molecular dynamics method; computation of structural, thermodynamics and transport properties; simulation projects. *Prerequisite:* Undergraduate course in thermodynamics or statistical physics; *recommended preparation:* Fortran, Unix/Linux.

MASC 576 Molecular Dynamics Simulations of Materials and Processes (3, Sp) Molecular dynamics method for atomistic simulations of materials and processes, simulations using parallel computing, correlation functions for structural and dynamical properties plus simulation project. *Prerequisite:* MASC 575.

MASC 583 Materials Selection (3) (Enroll in AME 588)

MASC 584 Fracture Mechanics and Mechanisms (3) (Enroll in AME 584)

MASC 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MASC 594abz Master's Thesis (2-2-0) For the master's degree. Credit on acceptance of thesis. Graded IP/CR/NC.

MASC 598 Materials Science Seminar (1) Seminar in Materials Science research. To be taken only once for graduate credit. Graded CR/NC.

MASC 599 Special Topics (2-4, max 9)

MASC 601 Advanced Semiconductor Device Physics (3) (Enroll in EE 601)

MASC 606 Nonequilibrium Processes in Semiconductors (3, Sp) (Enroll in EE 606)

MASC 610 Molecular Beam Epitaxy (3) Basic principles, ultra high vacuum, machine considerations, source purity and calibrations temperature measurements, surface morphology and chemistry, growth procedures, III-V, II-VI and silicon MBE. *Prerequisite:* MASC 501, MASC 503.

MASC 690 Directed Research (1-4, max 8) Laboratory study of specific problems by candidates for the degree Engineer in Materials Science. Graded CR/NC.

MASC 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MASC 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Petroleum Engineering Honor Society: Pi Epsilon Tau

Viterbi School of Engineering

Petroleum Engineering — Mork Family Department of Chemical Engineering and Materials Science

Degree Requirements

Bachelor of Science in Chemical Engineering

Emphasis in Petroleum Engineering

See the listing under Chemical Engineering.

Bachelor of Science in Mechanical Engineering

Emphasis in Petroleum Engineering

See the listing under Aerospace and Mechanical Engineering.

Minor in Petroleum Engineering

A minor in petroleum engineering consisting of 16 required units is available to undergraduate majors in various fields of engineering and applied science. Besides preparing for graduate study in petroleum engineering, the program will prepare students for careers in areas of national need such as the exploration, recovery and production of subterranean resources, and the underground disposal of hazardous wastes.

Prerequisite courses:

MATH 125, MATH 126, MATH 226, MATH 245, PHYS 151L and CHEM 105aL

REQUIRED COURSES		UNITS
PTE 461	Formation Evaluation	3
PTE 462	Economic, Risk and Formation Productivity Analysis	4
PTE 463L	Introduction to Transport Processes in Porous Media	3
PTE 464L	Petroleum Reservoir Engineering	3
PTE 465L	Drilling Technology and Subsurface Methods	3
		16

Master of Science in Petroleum Engineering

The Master of Science in petroleum engineering is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. Electives vary according to the area of interest. A student may be permitted to elect the program without thesis upon approval from the department.

Master of Science in Petroleum Engineering (Geoscience Technologies)

The Master of Science in Petroleum Engineering (Geoscience Technologies) is a unique degree that emphasizes recent developments in the field of unconventional oil and gas resources and modern techniques for mapping and monitoring of subterranean resources. The program may be completed via the USC Viterbi School's Distance Education Network (DEN). All courses for the degree must be taken at USC.

Students without a B.S. in Petroleum Engineering will normally be required to complete prerequisite courses before beginning the M.S. program. Specific prerequisite courses are decided upon consultation with the department adviser. Units from these courses cannot be applied toward the degree.

A minimum of 34 units is required to earn the M.S. in Petroleum Engineering (Geoscience Technologies).

CORE REQUIRED COURSES (18 UNITS)		UNITS
PTE 507	Engineering and Economic Evaluation of Subsurface Reservoirs	3
PTE 508	Numerical Simulation of Subsurface Flow and Transport Processes	3
PTE 517	Testing of Wells and Aquifers	3
PTE 531	Enhanced Oil Recovery	3
PTE 555	Well Completion, Stimulation, and Damage Control	3
PTE 582	Fluid Flow and Transport Processes in Porous Media	3

TAKE 4 OUT OF 5 COURSES SHOWN BELOW (12 UNITS)		UNITS
PTE 502	Advanced Reservoir Characterization	3
PTE 503	Technology of Unconventional Oil and Gas Resources Development	3
PTE 504	Geophysics for Petroleum Engineers	3
PTE 505	Inverse Modeling for Dynamic Data Integration	3
PTE 572	Geostatistics	3

Elective from a group of approved PTE courses: 4

Master of Science in Petroleum Engineering (Smart Oilfield Technologies)

The Master of Science in petroleum engineering (smart oilfield technologies) is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. A student may be permitted to elect the program without thesis upon approval from the department. Course requirements are similar to the existing M.S. degree in petroleum engineering in terms of core requirements.

Students without a B.S. in Petroleum Engineering will normally be required to complete prerequisite courses before beginning the M.S. program. Specific prerequisite courses are decided upon consultation with the department adviser. Units from these courses cannot be applied toward the degree.

Certificate in Smart Oilfield Technologies

The certificate in smart oilfield techniques is designed for practicing engineers and scientists who enter petroleum engineering related fields and/or who wish to obtain training in the specific smart oilfields area. The applicants may enroll at USC as limited status students. They must apply and be admitted to the program before they complete 9 units of the required course work. The certificate program is open to applicants with an undergraduate degree in engineering or sciences who meet the admission criteria as limited students. Students without a B.S. in Petroleum Engineering will normally be required to complete prerequisite courses before beginning the certificate program. Specific prerequisite courses are decided upon consultation with the department adviser. Units from these courses cannot be applied toward the certificate.

The required courses consist of the following 12 units:

REQUIRED COURSES		UNITS
PTE 586	Intelligent and Collaborative Oilfield Systems Characterization and Management	3
PTE 587	Smart Completions, Oilfield Sensors and Sensor Technology	3
PTE 588	Smart Oilfield Data Mining	3
PTE 589	Advanced Oilfield Operations with Remote Visualization and Control	3

These classes will be available through the USC Distance Education Network (DEN@Viterbi). The credit for classes may be applied toward the M.S. or Ph.D. in petroleum engineering should the student decide later to pursue an advanced degree. In order to be admitted to the M.S. program, the student should maintain a B average or higher in courses for the certificate program and must satisfy all normal admission requirements. All courses for the certificate must be taken at USC.

Engineer in Petroleum Engineering

Requirements for the Engineer degree in petroleum engineering are the same as set forth in the general requirements. See general requirements for graduate degrees.

Doctor of Philosophy

The Doctor of Philosophy with a major in petroleum engineering is also offered. See general requirements for graduate degrees.

Viterbi School of Engineering

Petroleum Engineering — Mork Family Department of Chemical Engineering and Materials Science

Courses of Instruction

PETROLEUM ENGINEERING (PTE)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PTE 202x Energy and Society (4, Irregular) Study of the impact of the development, production, and global distribution of energy on societal, political, and economic behavior. Not available for major credit to engineering majors. *Prerequisite:* pass Math Skill Level.

PTE 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

PTE 411x Introduction to Transport Processes in Porous Media (3, Fa) Properties of porous rocks; capillary effect, single phase and multiphase flow through porous media; diffusion and dispersion, miscible displacement, heat transfer. Lecture, 3 hours. Not available for credit to Petroleum Engineering majors. *Prerequisite:* MATH 245, CHEM 105aL or CHEM 115aL, PHYS 151L, CE 309.

PTE 412x Petroleum Reservoir Engineering (3, Fa) Properties of reservoir fluids, volumetric and material balances for gas and oil reservoirs; reservoir modeling concepts. Lecture, 3 hours. Not available for credit to Petroleum Engineering majors.

PTE 461 Formation Evaluation (3, Fa) Concepts of petroleum geology, interpretation of downhole surveys and measurements including well logs, MWD, mud logs and samples. *Corequisite:* PTE 463L.

PTE 462 Economic, Risk and Formation Productivity Analysis (4, Sp) Principle of economic evaluation, risk analysis, reserves estimation, decline curves, energy prices, and well transients for flow prediction. *Prerequisite:* PTE 461.

PTE 463L Introduction to Transport Processes in Porous Media (3, Fa) Properties of porous rocks; capillarity effect, single-phase and multiphase flow through porous media; diffusion and dispersion, miscible displacement, heat transfer. Lecture, 3 hours; laboratory, 3 hours. *Prerequisite:* MATH 245, CHEM 105aL or CHEM 115aL, PHYS 151L.

PTE 464L Petroleum Reservoir Engineering (3, Sp) Properties of reservoir fluids, volumetric and material balances for gas and oil reservoirs; reservoir modeling concepts. Lecture, 3 hours; laboratory, 3 hours. *Prerequisite:* PTE 463L.

PTE 465L Drilling Technology and Subsurface Methods (3, Fa) Theory and practice in drilling technology; mechanical properties of reservoir rocks; well completion; acidizing and fracturing, oil production technology. Lecture, 3 hours; laboratory, 3 hours. *Prerequisite:* PTE 464L.

PTE 466 Petroleum Geology (3, Sm) Introductory topics of physical and historical geology will be focused on the components that relate to the formation of oil and gas accumulations.

PTE 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

PTE 499 Special Topics (2-4, max 8) Course content to be selected each semester from recent developments in petroleum engineering and related fields.

PTE 500 Computational Reservoir Modeling (3, Fa) Introduction to mathematical and computational methods in characterizing, modeling, and describing the subsurface flow and transport phenomena. *Recommended preparation:* Familiarity with basic calculus, differential equation, and MATLAB programming. Open only to Engineering students.

PTE 502 Advanced Reservoir Characterization (3, Irregular) Sources of data for reservoir characterization; cross-disciplinary integration; geologic models; sequence stratigraphic, lithologic, well test and geophysical models; 4-D seismic; compartmentalized and fractured reservoirs; error and risk analysis. Graduate standing in PTE. *Prerequisite:* PTE 411x, PTE 461.

PTE 503 Technology of Unconventional Oil and Gas Resources Development (3, Fa) Geology of

unconventional resources, exploration, development, laboratory testing, drilling, formation evaluation, design and monitoring of hydraulic fracturing, forecasting, technology of oil sand and environmental issues. Open only to graduate students. *Recommended preparation:* PTE 507, graduate standing in petroleum engineering.

PTE 504 Geophysics for Petroleum Engineers (3, Sm) Geosciences concepts and technologies with applications in petroleum engineering: 2D-3D-4D seismic, borehole geophysics, passive seismic, controlled source electromagnetics, geophysical and geological modeling and inversion. Open only to engineering graduate students. *Recommended preparation:* familiarity with Matlab.

PTE 505 Inverse Modeling for Dynamic Data Integration (3, Sp) Introduction to fundamentals of deterministic and stochastic inverse modeling, integration of dynamic data into predictive reservoir models, reservoir parameterization, derivation of adjoint models. Open only to engineering graduate students. *Recommended preparation:* PTE 508, basic knowledge of calculus, linear algebra and probability/statistics.

PTE 506 Geothermal Reservoirs (3, Fa) Geothermal reservoirs, heat and mass flow in fracture network, enhanced geothermal systems (EGS), exploration methods, exploitation of hydrothermal and EGS fields, stimulation, forecasting, power generation. Open only to engineering and geological sciences graduate students. *Recommended preparation:* familiarity with Matlab.

PTE 507 Engineering and Economic Evaluation of Subsurface Reservoirs (3, Fa) Studies, data and methods for estimating size of underground fluid deposits for predicting physical and economic behavior of designed flow schemes, and for quantifying uncertainty. *Prerequisite:* PTE 464L.

PTE 508 Numerical Simulation of Subsurface Flow and Transport Processes (3, Sp) Formulation and solution of the equations describing the underground flow of fluids through porous media. Includes mass (contaminant) transport in single and multiphase flow. *Recommended preparation:* PTE 507.

PTE 511 Advanced Phase Behavior of Petroleum Reservoir Fluids (3, Irregular) From classical thermodynamics to engineering application; equations of state based calculations; PVT experiments; reservoir fluid characterization; PT-flash calculations and stability analysis; compositional grading; transport properties. Open only to graduate students. *Recommended preparation:* CHE 330, MATH 226.

PTE 512 Gas Injection Processes – Analytical Solutions and Analysis (3, Fa) Gas injection and enhanced oil/gas recovery; conservation equations; flow and phase behavior; displacement efficiency; dispersion; method of characteristics; development of multicontact miscibility in multicomponent systems. Open only to graduate students. *Recommended preparation:* CHE 330, MATH 226 and MATH 245 (or similar).

PTE 514 Drilling Engineering (2, 2 years, Fa) Rock mechanics; rotary drilling processes; bit selection; optimizing bit weight and rotational speed; well hydraulics and control; casing design and cementing; directional and offshore drilling.

PTE 517 Testing of Wells and Aquifers (3, Sp) Principles of well testing; down hole device; Aquifer tests; slug tests; DST; pressure transient modeling in homogeneous and heterogeneous systems; parameter estimation; computer aided techniques. *Prerequisite:* PTE 464L.

PTE 519 Integrated Physical and Cyber Security for Oil and Gas Operations (3, Fa) Infrastructure Security, Resilience and Management of Digital Oil Fields, Process Control Networks in exploration and production, refining and chemical plants, Asset Integrity principles, case histories. Open only to graduate students.

PTE 531 Enhanced Oil Recovery (3, 2 years, Sm) Survey of current enhanced oil recovery processes, including water-flooding, miscible displacement, and thermal oil recovery. *Prerequisite:* PTE 464L; *recommended preparation:* PTE 507.

PTE 542 Carbonate Rocks (2, Irregular) Classification; porosity development; source rocks; wettability; capillary pressure curves; compressibility; surface areas; relative permeabilities; various petrophysical properties; formation evaluation; overpressures; thin section analysis.

PTE 545 Corrosion Control in Petroleum Production (2, Irregular) Types of corrosion encountered in petroleum production; methods for practical control including use of inhibitors, coatings, and cathodic protection. *Prerequisite:* CHEM 430a.

PTE 555 Well Completion, Stimulation, and Damage Control (3, Sm) This course reviews current practices related to well completion methods, wellbore stimulation, and damage control. Formation damage prevention and stimulation methods are emphasized. *Prerequisite:* graduate standing.

PTE 572 Geostatistics (3, Irregular) Use of geostatistical methods for exploration and development of mineral and petroleum resources, application of semivariogram, kriging, cokriging, nonlinear and parametric estimation and conditional stimulation. Graduate standing. *Recommended preparation:* knowledge of statistics.

PTE 574 Optimization Methods for Subsurface Energy Resources Development (3, Sp) Optimization algorithms for oilfield development, including well control optimization, well placement, open-loop and closed-loop model predictive control, and robust optimization. *Prerequisite:* PTE 500; *recommended preparation:* Familiarity with linear algebra, vector calculus, general reservoir engineering and MATLAB programming language. Open only to Engineering graduate students.

PTE 578 Advanced Production Engineering (2, 2 years, Sp) Principles of oil well and gas well production; design of artificial lift systems and surface operations; field problems of enhanced oil recovery operations.

PTE 581 Environmental Technology in the Petroleum Industry (3, Irregular) This course examines engineering and scientific principles necessary for understanding, assessing, and remediating environmental problems in the petroleum industry including drilling, production, transportation and refining operations. Graduate standing.

PTE 582 Fluid Flow and Transport Processes in Porous Media (3, 2 years, Fa) Principles of single and multiphase flow through porous media; mechanisms of immiscible and miscible displacement; momentum, heat and mass transport in porous media.

PTE 586 Intelligent and Collaborative Oilfield Systems Characterization and Management (3, Fa) Review of soft computing methods such as neural networks, fuzzy logic, problematic reasoning in reservoir characterization, dynamic reservoir modeling, oilfield data integration and analysis of uncertainty in prediction. Limited to students with graduate standing. *Recommended preparation:* prerequisites for non-majors.

PTE 587 Smart Completions, Oilfield Sensors and Sensor Technology (3, Sp) Intelligent Wellbore completion, technology of subsurface and surface sensors, deployment and data acquisition, telemonitoring and feedback, reliability of sensors, data transmission, systems networks. *Recommended preparation:* prerequisites for non-majors.

PTE 588 Smart Oilfield Data Mining (3, Fa) Methods for oilfield data mining, data preparation mining images, prediction and knowledge discovery, subset selection, pattern recognition. Limited to students with graduate standing. *Recommended preparation:* prerequisites for non-majors.

PTE 589 Advanced Oilfield Operations with Remote Immersive Visualization and Control (3, Sp) Immersive subsurface and surface environments, web based monitoring and feedback, visualizing risk, unattended operation. Limited to students with graduate standing. *Recommended preparation:* prerequisites for non-majors.

PTE 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PTE 594abz Master's Thesis (2-2-0) For the master's degree. Credit on acceptance of thesis. Graded IP/CR/NC.

PTE 599 Special Topics (2-4, max 9) Course content will be selected each semester to reflect current trends and developments in the field of petroleum engineering.

PTE 611 Stochastic Modeling and Simulation (3) (Enroll in CE 611)

PTE 690 Directed Research (1-4, max 8, FaSpSm) Laboratory study of specific problems for candidates for the degree engineer in petroleum engineering. Graded CR/NC.

PTE 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PTE 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Chi Epsilon Civil Engineering Honor Society

Chi Epsilon is dedicated to the purpose of maintaining and promoting the status of civil engineering as a profession. Chi Epsilon was organized to recognize the characteristics of the individual civil engineer deemed to be fundamental to the successful pursuit of an engineering career and to aid in the development of those characteristics in the civil engineering student. To contribute to the improvement of the profession, Chi Epsilon fosters the development and exercise of sound traits of character and technical ability among civil engineers.

Chi Epsilon is based on broad principles of scholarship, character, practicality and sociability. Civil engineering students who rank in the upper one-third of the junior or senior class are eligible for membership. These qualifications will make one eligible but not necessarily acceptable. Each member must be well skilled in all four of the basic principles.

Viterbi School of Engineering

Civil Engineering — Sonny Astani Department of Civil and Environmental Engineering

Degree Requirements

Undergraduate Program Educational Objectives

Fulfilling the vision of the Sonny Astani Department of Civil and Environmental Engineering, the Viterbi School of Engineering and the University of Southern California, our graduates will:

1. Be successful in their professional careers, become leaders in industry, academia, government or service, while adapting their technical, collaborative and managerial skills for the benefit of Society's built and natural environments.
2. Support the advancement of the practice of science and engineering, while maintaining professional standards and moral and legal obligations to society, while being active in professional organizations and obtaining professional licensure when appropriate.

3. Be prepared to pursue graduate studies in engineering or other disciplines, while continuously broadening their abilities and enhancing their technical skills to maintain their relevance with technological change.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Civil Engineering prepares graduates to apply knowledge of mathematics through differential equations, calculus-based physics, chemistry and at least one additional area of basic science, consistent with the program educational objectives; apply knowledge of four technical areas appropriate to civil engineering; conduct civil engineering experiments and analyze and interpret the resulting data; and design a system, component, or process in more than one civil engineering context. The program also explains basic concepts in management, business, public policy, and leadership; and explains the importance of professional licensure.

The program leading to a Bachelor of Science in Environmental Engineering prepares graduates to be proficient in mathematics through differential equations, probability and statistics, calculus-based physics, general chemistry; an earth science, e.g., geology, meteorology, soil science, relevant to the program of study; a biological science, e.g., microbiology, aquatic biology, toxicology, relevant to the program of study; fluid mechanics relevant to the program of study; and an introductory level knowledge of environmental issues associated with air, land, and water systems and associated environmental health impacts. The program prepares graduates to be proficient at conducting laboratory experiments and critically analyzing and interpreting data in more than one major environmental engineering focus area, e.g., air, water, land, environmental health; performing engineering design by means of design experiences integrated throughout the professional component of the curriculum; and to be proficient in advanced principles and practice relevant to the program objectives; including understanding of concepts of professional practice and the roles and responsibilities of public institutions and private organizations pertaining to environmental engineering.

*GE Category VI and WRIT 150 are taken concurrently.

**The choice of free electives in the fourth year requires approval of the administering department.

+The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

Bachelor of Science in Civil Engineering (131–132 Unit Program)

The department offers a Bachelor of Science degree in Civil Engineering. Additionally, there are three possible areas of emphases within this civil engineering program major. These are building science, environmental engineering and structural engineering. An area of emphasis appears in parentheses after the primary major name on the transcript.

Bachelor of Science in Civil Engineering

The requirement for the degree is 131–132 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied towards the major, regardless of the department in which the courses are taken. In addition, a minimum grade of C must be earned in each of the

following courses: CE 205, CE 225, CE 309 and CE 235. See also common requirements for undergraduate degrees.

UNITS

Elective	Civil Engineering	6
Design Kernel***	Civil Engineering Design Kernel Course	6
Total units:		131-132

*GE Category VI is taken concurrently with WRIT 150.

**Satisfies GE Category III requirement.

***Design kernel courses must be selected from the following list of design courses: CE 457, CE 465, CE 466, CE 476, CE 478, CE 482, CE 484 and CE 485.

+The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

Tracks

In addition to the core courses, students are required to select one of the following tracks: General, Construction or Water Resources.

General Track

Choose one of the following: CE 480 as the capstone course and CE 482 as a required design kernel course; or CE 465 as the capstone course and CE 466 or CE 476 as a required design kernel course.

The civil engineering electives may be chosen freely.

Construction Track

Select CE 480 as the capstone course and CE 482 as a required design kernel course. Replace CE 453 with CE 412. CE 460 is a required elective. The other civil engineering elective must be chosen from the following list: CE 461, CE 462, CE 469 and CE 470.

Water Resources Track

Select CE 465 as the capstone course and select one of the following as a required design kernel course: CE 466 or CE 476. The civil engineering electives must be selected from the following list: CE 466, CE 476 and CE 490.

All curricula leading to a degree must be approved by the Astani Department of Civil and Environmental Engineering; please note this includes transfer credit and units for courses waived for subject credit only, which have been approved through the Degree Progress department.

Bachelor of Science in Civil Engineering

Emphasis in Structural Engineering

The requirement for the degree with an emphasis in structural engineering is 131–132 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied towards the major, regardless of the department in which the courses are taken. In addition, a minimum grade of C must be earned in each of the following courses: CE 205, CE 225, CE 309 and CE 235. See also common requirements for undergraduate degrees.

UNITS

Design kernel***		3
Total (Track I):		131-132
Total (Track II):		133-134

*GE Category VI is taken concurrently with WRIT 150.

**Satisfies GE Category III requirement.

***Kernels must be selected from the following design courses: CE 443, CE 466, CE 476 or CHE 442.

+The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

Minor in Environmental Engineering

See Environmental Engineering.

Minor in Construction Planning and Management

This program covers the most current theories and practice of construction planning and management. The

program provides a valuable adjunct credential to professional school students pursuing careers in business administration, public administration, architecture, environmental studies, and other areas; and a unique opportunity for professional focus to students in the USC Dornsife College of Letters, Arts and Sciences.

Construction activities are complex. In contemporary society, effective planning and management of these activities requires specialized knowledge of the technical, economic and policy environment. This program couples the knowledge of how construction activities are organized with a broader understanding of the urban system in which construction projects are embedded. With the exception of statistics, all of the required courses are within the Astani Department of Civil and Environmental Engineering and the USC Price School of Public Policy.

Any USC undergraduate who has completed the equivalent of two full-time semesters in good standing is eligible to pursue the minor program. This minor program is rigorous enough to serve as an introductory credential for students subsequently electing to pursue advanced studies in development, urban planning, construction management, architecture or allied fields.

Courses Required

Seven courses consisting of at least 23 units are required for the minor.

Statistics

Students must complete an adviser-approved course in statistics. Candidate courses include ECON 317, EE 364, ISE 220, MATH 208, PPD 303, PSYC 274L, SOCI 314 and similar courses. The statistics course must be at least 3 units.

CORE COURSES		UNITS
CE 460	Construction Engineering	3
CE 461	General Construction Estimating	3
CE 462	Construction Methods and Equipment, or	
CE 469	Sustainable Design and Construction, or	
CE 470	Building Information Modeling and Integrated Practice	3

Theme Requirement: Two courses, both from Theme 1 or Theme 2 or Theme 3

Theme 1

PPD 358	Urban and Regional Economics	4
PPD 362	Real Estate Fundamentals for Planning and Development	4

Theme 2

FBE 400x	Introduction to Real Estate Finance and Development	4
FBE 466	Management of Real Estate Development: Feasibility Studies	4

Theme 3

PPD 357*	Government and Business	4
PPD 435	Analyzing Real Estate Markets	4
		17

ELECTIVES (SELECT ONE)		UNITS
CE 404	Business and Intellectual Property Law for Engineers	3
CE 412	Contracts and Specifications	3
PPD 437*	Advanced Finance and Investment for Planning and Development	4

**Prerequisite required.*

Advisement is provided by the Astani Department of Civil and Environmental Engineering. Students will

normally complete statistics before enrolling in CE 461 but can be permitted to complete statistics as a corequisite subject to adviser approval. Students are advised to take CE 460 and CE 461 before taking CE 462. Students electing PPD 437 must have completed PPD 362.

Viterbi School of Engineering

Civil Engineering — Sonny Astani Department of Civil and Environmental Engineering

Graduate Programs

Master of Science in Civil Engineering

The Master of Science in Civil Engineering is awarded in strict conformity with the general requirements of the USC Viterbi School of Engineering. A student may receive the Master of Science in Civil Engineering with a special option by specializing in one of the following courses of study: construction engineering; structural engineering; and transportation engineering. Students specializing in the transportation option and completing a thesis must include in their program 4 units of CE 594ab.

A general Master of Science in Civil Engineering without special designation is also given. Students pursuing this program will choose between the following special options: general, earthquake engineering, structural mechanics, water resources or ocean and coastal engineering.

A student who wishes to pursue the Master of Science in Civil Engineering without special designation and who has an interest in public works may take a selected sequence of 12 units in the USC Price School of Public Policy. For further information, see the Public Administration Professional Sequence section in the USC Price School of Public Policy.

Master of Science in Civil Engineering (Transportation Systems)

See Sustainable Infrastructure Systems.

Master of Science in Civil Engineering (Water and Waste Management)

See Sustainable Infrastructure Systems.

Master of Science in Environmental Engineering

Students with a bachelor's degree in engineering or science may work toward the Master of Science in Environmental Engineering. Students with degrees in fields other than engineering or science may be admitted on the recommendation of a program adviser and program director. Selection of courses will be determined through consultation with a program adviser to provide a maximum of training in the student's area of interest in environmental problems.

Master of Construction Management

Students possessing a bachelor's degree and with sufficient training in capital management and statistics may pursue the Master of Construction Management. The purpose of the Master of Construction Management program is to educate and train multidisciplinary professionals to understand and execute the broad array of technical and non-technical activities associated with construction management. The program provides special attention to the function of the constructor in real estate development. The program is drawn from the M.S., Civil Engineering program in construction engineering and management, and from the USC Marshall School of Business.

Applicants to the program are expected to have completed undergraduate course work in engineering economy

or business finance.

CORE CURRICULUM		UNITS
ARCH 511L	Building Systems: Materials and Construction	4
CE 501	Functions of the Constructor	3
CE 502	Construction Accounting and Finance, or	3
ACCT 509	Concepts of Financial and Management Accounting, or	4
ISE 566	Financial Accounting Analysis for Engineering	3
CE 556	Project Controls — Budgeting and Estimating	3
CE 566	Project Controls — Planning and Scheduling	3
TRACK REQUIREMENT: TWO COURSES, BOTH FROM TRACK 1, TRACK 2, OR TRACK 3		UNITS
<i>Track 1: Finance Track</i>		
FBE 400x*	Introduction to Real Estate Finance and Development	4
FBE 489	Real Estate Capital Markets	4
FBE 570*	Advanced Topics in Real Estate Finance	3
FBE 589*	Mortgages and Mortgage-Backed Securities and Markets	3
FBE 591*	Real Estate Finance and Investment	3
<i>Track 2: Real Estate Development Track</i>		
FBE 466*	Management of Real Estate Development: Feasibility Studies	4
FBE 470*	Advanced Real Estate Analysis	4
FBE 565	Economics of Urban Land Use: Feasibility Studies	3
FBE 566	Real Estate Finance, Investments and Development	3
<i>Track 3: Architecture, Engineering and Construction (AEC) Technology Track</i>		
CE 470	Building Information Modeling and Integrated Practice	3
CE 469	Sustainable Design and Construction, or	
CE 570	Building Information Modeling for Collaborative Construction	3
Additional adviser-approved technical and advanced electives		10-11
Total minimum units		33

*Prerequisite required.

The minimum requirement for the Master of Construction Management degree is 33 units. At least three elective courses totaling at least 9 units are required for this degree. These may be taken from the USC Astani Department of Civil and Environmental Engineering, other engineering departments, the USC Price School of Public Policy, the USC School of Architecture, the USC Davis School of Gerontology, the USC Gould School of Law or the USC Marshall School of Business subject to adviser approval. Admission to some classes requires advanced prerequisites and is subject to availability and approval of the instructor.

General Requirements

Residence and Course Load

The normal time required for earning the Master of Construction Management is three semesters, including one summer semester beginning in June and continuing through the spring semester ending in May. Students are expected to participate in extracurricular activities associated with the Master of Construction Management program, including the speaker series and field trips. A candidate must complete the last four semester units of course work at USC.

Students who wish to take a leave of absence for a semester or longer must request it from the chairman of the Astani Department in writing. Such leaves may be granted for up to one year.

Engineer in Civil Engineering

Requirements for the Engineer in Civil Engineering are the same as set forth in the general requirements.

Doctor of Philosophy in Civil Engineering and Doctor of Philosophy in Engineering (Environmental Engineering)

The Doctor of Philosophy with a major in civil engineering and the Doctor of Philosophy with a major in engineering (environmental engineering) are also offered. See general requirements for graduate degrees.

Areas of specialization for Doctor of Philosophy level students are: structural engineering, structural mechanics, earthquake engineering, coastal engineering, water resources engineering, construction engineering and management, soil mechanics and foundation engineering, hydrology, hydrodynamics and transportation.

Graduate Certificate in Transportation Systems

The graduate certificate in Transportation Systems is an interdisciplinary program administered by the USC Astani Department of Civil and Environmental Engineering. The certificate program allows students to specialize in transportation applications, while simultaneously receiving a degree in their home department. The certificate in transportation systems combines elements of transportation engineering with transportation policy, planning and project management. The program is especially appropriate for students intending to pursue careers as developers of transportation technologies, or as implementors of technologies within government agencies.

Students electing the certificate program apply to the USC Astani Department of Civil and Environmental Engineering. Course prerequisites for the program are:

- one course in statistics or uncertainty, equivalent to ISE 225, PPD 404x or CE 408;
- one course in engineering economy, equivalent to ISE 460;
- one course in microeconomics, equivalent to ECON 203; and
- one course in a contemporary high level programming language.

These prerequisites may be satisfied after enrollment in the certificate program by taking the indicated courses or their equivalent. Graduate students cannot receive credit for courses numbered below 400. Detailed admissions requirements are published by the USC Astani Department of Civil and Environmental Engineering.

The courses taken for the certificate may be applied later to the Master of Science in Civil Engineering, transportation option.

Qualified students holding a bachelor's degree also have the option of enrolling in the certificate program without receiving a separate graduate degree.

The curriculum consists of five graduate courses for a total of 17 units.

CERTIFICATE REQUIREMENTS

		UNITS
CE 471	Principles of Transportation Engineering, or	
CE 519	Transportation Engineering	3
CE 583	Design of Transportation Facilities, or	
CE 585	Traffic Engineering and Control	3
ISE 515	Engineering Project Management	3
PPD 633	Urban Transportation Planning and Management	4
PPD 634	Institutional and Policy Issues in Transportation	4

Courses of Instruction

CIVIL ENGINEERING (CE)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

CE 106 Design and Planning of Civil Engineering Systems (2, Fa) History of civil engineering; introduction to the synthesis and design of systems dependent upon civil engineering technology; the structuring, modeling, and simulation of such systems.

CE 107 Introduction to Civil Engineering Graphics (3, Sp) Graphic communication and drawing; use of instruments, lettering, dimensioning, and detailing of engineering drawing; free-hand sketching, drafting, and modeling.

CE 108 Introduction to Computer Methods in Civil Engineering (2, Sp) Computer programming, organization of problems for computational solution, flow charts, programming; numerical methods; analysis and solution of civil engineering problems.

CE 110 Introduction to Environmental Engineering (3, Fa) Basic concepts of environmental engineering. Air, water, and soil pollution control technologies; pollution prevention strategies. Design of simple water distribution and treatment systems.

CE 205 Statics (2, FaSp) Statics of particles and rigid bodies; equivalent force systems; distributed forces; applications to trusses, frames, machines, beams, and cables; friction; moments of inertia. *Prerequisite:* PHYS 151L.

CE 207L Introduction to Design of Structural Systems (2, Sp) Structural materials, components and systems; gravity and lateral forces; structural performance and failures; introduction to structural plans and analysis; computer applications, case studies, design project. *Prerequisite:* CE 205; *corequisite:* CE 106L and CE 225.

CE 210L Introduction to Environmental Engineering Microbiology (3, Fa) Principles of environmental microbiology; waterborne pathogens; microorganisms and air pollution; microorganisms in soil; water pollution microbiology; biodegradation of hazardous chemicals; eutrophication. *Corequisite:* CHEM 105aL or CHEM 115aL; *recommended preparation:* CE 106 or CE 110.

CE 225 Mechanics of Deformable Bodies (3, Sp) Analysis of stress and strain; axial, flexural, and torsional behavior of slender bars; elastic deflections; combined stresses; introduction to elastic stability and energy methods. *Prerequisite:* CE 205.

CE 235 Dynamics (3, Sp) Elements of vector algebra; dynamics of particles, systems of particles and rigid bodies; kinematics; momentum relations, energy methods; vibrations; Euler's equations of motion. (Duplicates credit in CE 325.) *Prerequisite:* CE 205.

CE 309 Fluid Mechanics (3, Fa) Fluid statics; relative velocity field; total acceleration; divergence theorem; conservation of mass, energy, and momentum applied to engineering problems in laminar and turbulent flow. *Prerequisite:* MATH 226; *corequisite:* CE 235.

CE 334L Mechanical Behavior of Materials (3, Fa) Measurement of stress and strain; tensile, impact, creep, and fatigue behavior; statistical methods, brittle fracture; properties of structural materials. *Prerequisite:* CE 225 or AME 204, CHEM 105aL or CHEM 115aLg and PHYS 152L.

CE 358 Theory of Structures I (3, Fa) Deformations and deflections of elastic systems; statically indeterminate beams, arches, and frames; secondary stresses. *Prerequisite:* CE 225.

CE 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

CE 402 Computer Methods in Engineering (3, Sp) Fundamentals of analog and digital computers; simulation of nonlinear physical systems; numerical analysis and solution of engineering problems. *Prerequisite:* CE 108 and MATH 245.

CE 404 Business and Intellectual Property Law for Engineers (3, Fa) An examination of legal issues confronting the professional engineer. Topics include the legal system, contracts, risk management, forms of doing business, capital formation and intellectual property rights. Upper division standing.

CE 408 Risk Analysis in Civil Engineering (3, Fa) Realization of nondeterministic problems in civil engineering; quantitative analysis of structural and system reliability; optimal design and design with specified risk. *Prerequisite:* CE 225, MATH 226.

CE 409abL Computer-Aided Design (3-3) Applications of interactive computer graphics to design problems; automated drafting; 3-D graphic algorithms. Analysis of design process from information processing viewpoint. *Prerequisite:* CE 225.

CE 412 Construction Law and the Property Development Process (3, Sp) Legal aspects of property development and construction: land use, construction practices and specifications, architecture and engineering contracts, agency, subcontracting, professional registration, liability, insurance, liens, and bonds. *Recommended preparation:* CE 404 or a general business law course.

CE 428 Mechanics of Materials (3) Analysis of stress and deformation; equations of elasticity; bending of beams; elastic instability; torsion problems; introduction to plates and shells; elastic wave propagation; numerical methods. *Prerequisite:* CE 225.

CE 443 Environmental Chemistry (3, Fa) Chemistry of water, gas, liquid and solid wastes. Chemical principles applicable to environmental engineering. *Prerequisite:* CHEM 105bL or CHEM 115bL.

CE 451 Water Resources Engineering (3, Sp) Discussion of broad perspectives on control and utilization of water, quantitative hydrology, ground water, probability concept, economic study, hydraulic structures, multi-purpose water resources projects. *Prerequisite:* CE 309 or ENE 410.

CE 453 Water Quality Control (3, Fa) Water quality criteria and fundamental of acceptability. Natural purification of surface waters. Processes employed in the treatment of waste waters for disposal or re-use. *Prerequisite:* CHEM 105aL or CHEM 115aL; *corequisite:* CE 309 or ENE 410.

CE 456 Design of Steel Structures (3, Fa) Fundamentals of analysis and design of steel structures; structural elements; simple and eccentric connections; design project. *Prerequisite:* CE 207L, CE 225; *corequisite:* CE 358.

CE 457 Reinforced Concrete Design (3, Sp) Strength and deformation of reinforced concrete; beams in flexure and shear; bond and development of bars; deflections; columns; slabs; footings; introduction to prestressed concrete. *Prerequisite:* CE 207L, CE 225; *corequisite:* CE 358.

CE 458 Theory of Structures II (3, Sp) Matrix algebra; stiffness method; force method; computer analysis of planar structures. *Prerequisite:* CE 108 and CE 358 or AME 150L and AME 353.

CE 459 Introduction to Structural Dynamics (3, Fa) Response of single and multiple degree of freedom systems to dynamic excitation; structural modeling and approximate solutions; introduction to earthquake resistant design. *Corequisite:* CE 458.

CE 460 Construction Engineering (3, FaSp) Introduction to the construction processes; estimating and bidding, construction administration, planning and scheduling, equipment and methods, labor relations, cost

control systems, and safety.

CE 461 General Construction Estimating (3, Fa) Theory of estimating. Quantity surveying; unit cost synthesis and analysis. Bid organization and preparation; competitive simulations and exercises.

CE 462 Construction Methods and Equipment (3, Sp) Current procedures in selected fields of construction; organization and planning; equipment economics; machinery.

CE 463L Water Chemistry and Analysis (3, Sp) Chemistry of water purification technology and water pollution control. Chemical processes in natural and engineering aquatic environments; physical/chemical and biological characterization of water and wastewater. *Prerequisite:* CE 453, CHEM 105b or CHEM 115bL.

CE 464 Geotechnical Engineering (3) Fundamentals of soil mechanics and foundation engineering; soil classification, seepage, stress-strain behavior, shear strength, consolidation, design of retaining structures and foundations, and slope stability.

CE 465 Water Supply and Sewerage System Design (3, Sp) Design of water supply systems, storm drains, sanitary sewers, and lift stations. *Prerequisite:* CE 453.

CE 466 Design of Free-Surface Hydraulic Systems (3, Sp) Hydrological and hydraulic design for uniform and non-uniform flows, channel transition, sedimentation controls, design discharge for tributary watersheds, flood routing, flood detention, computer aided design. *Prerequisite:* CE 309.

CE 467L Geotechnical Engineering (4, Sp) Fundamentals of geotechnical engineering; soil classification, seepage, stress-strain behavior, shear strength, consolidation, design of retaining structures and foundations, and slope stability. Soil testing. (Duplicates credit in CE 464.) *Prerequisite:* CE 225.

CE 469 Sustainable Design and Construction (3, FaSp) Leadership in Energy and Environmental Design (LEED); Green Building strategies; Carbon Footprinting; calculating the embodied energy of building materials; cyclical processes in design and construction.

CE 470 Building Information Modeling and Integrated Practice (3, Fa) Building Information Modeling, current BIM technologies; coordination of design and construction; information management throughout building lifecycle; project delivery systems and technologies for integrated practice.

CE 471 Principles of Transportation Engineering (3, Fa) Planning, design, construction, maintenance, and operation of facilities for air, water, rail, and highway transit systems. Junior or senior standing.

CE 473 Engineering Law, Finance and Ethics (3, Fa) An examination of the legal, financial and ethical issues regularly considered by all practicing engineers. Upper division standing.

CE 476 Design of Pressurized Hydraulic Systems (3, Sp) Application of hydraulic principles to the engineering design of hydraulic structure with pressurized flow, piping network, water hammer, surge suppression, pumps and turbines, manifold hydraulic design. *Prerequisite:* CE 309.

CE 478 Timber and Masonry Design (3, Fa) Characteristics and properties of wood; beams, columns, trusses, connectors, and diaphragms. Properties of masonry, working stress and strength design, seismic design requirements. *Prerequisite:* CE 207, CE 225.

CE 480 Structural Systems Design (3, Sp) Evaluate, design and analyze buildings. Organize and perform calculations for vertical loads, wind loads, and seismic loads on building projects. *Prerequisite:* CE 456 or CE 457 or CE 478; CE 358, CE 467L, CE 473, CE 482.

CE 482 Foundation Design (3, Fa) Analysis and design principles of building foundations, including spread footings, piles, drilled shafts, sheetpile walls and retaining structures. *Prerequisite:* CE 467.

CE 484 Water Treatment Design (3, Fa) Predesign studies, precipitation softening, coagulation and flocculation, sedimentation, filtration, sludge handling, chlorination, chloramination, ozonation; plant hydraulics, flow measurement, pumps, instrumentation and control, tertiary treatment. *Prerequisite:* CE 451.

CE 485 Wastewater Treatment Design (3, Sp) Process kinetics, mass balance, reactor design, pretreatment, clarification, chemical treatment, biological treatment (aerobic and anaerobic), disinfection, sludge treatment, nitrogen and phosphorus removal, carbon adsorption. *Prerequisite:* CE 451, CE 463L, CE 473.

CE 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

CE 495 Seminars in Civil Engineering (1, FaSp) Information necessary for successful transition to engineering practice with emphasis on substantive engineering topics, employee rights and responsibilities, communication skills, ethic and lifelong learning. Graded CR/NC. Open only to upper division engineering majors.

CE 499 Special Topics (2-4, max 8) Course content to be selected each semester from recent developments in civil engineering and related fields.

CE 501 Functions of the Constructor (3, Fa) Systems, processes, and constraints governing the initiation, direction, engineering, and delivery of major construction projects. Professional construction management, responsibilities, and practice.

CE 502 Construction Accounting and Finance (3, Fa) Cost control, finance, and engineering economy for construction operations.

CE 503 Microbiology for Environmental Engineers (3) Basic microbiology of water, air, and soil. Application of microbiology to the practice of environmental pollution control.

CE 504 Solid Waste Management (3) Characterization, production, storage, collection, and transport of solid wastes; alternative disposal methods; design principles and environmental impact; management of radiological solid wastes.

CE 506 Heavy Construction Estimating (3, Fa) Methods engineering, work analysis and pricing for route construction. Grading, draining, paving, haul economy, plant-materials production, pipeline and bridge building.

CE 507 Mechanics of Solids I (3, Fa) Analysis of stress and strain; constitutive equations for elastic materials; plane stress and strain; torsion; introduction to plates and shells; energy methods.

CE 508 Mechanics of Solids II (3) Thermal stresses; introduction to elastic stability; yield criteria; constitutive equations for elastoplastic materials; elastoplastic stress analysis; viscoelasticity and creep. *Prerequisite:* CE 507 or CE 428.

CE 509 Mechanics of Solids III (3) Advanced topics in mechanics of solids; complex variable methods for plane problems; three-dimensional problems; introduction to fracture mechanics. *Prerequisite:* CE 507.

CE 510 Groundwater Management (3) Groundwater hydrology, aquifer testing technology, groundwater quality and contamination, geophysical method, well design and development, basin water balance, computer modeling, legal aspects, groundwater management system.

CE 511 Flood Control Hydrology (3) Flood frequency, storm characteristics, net rain; surface drainage, peak discharge, flood runoff.

CE 514ab Advanced Sanitary Engineering Design (3-3) Design of water and waste treatment works. *Prerequisite:* CE 453.

CE 516 Geohydrology (3) Principles of groundwater motion; aquifer characteristics, prospecting, practical engineering problems, well design, maintenance and rehabilitation; hydrodynamic dispersion, field testing essentials and procedures, groundwater quality, artificial recharge.

CE 517 Industrial and Hazardous Waste Treatment and Disposal (3, 2 years, Sm) Physical, chemical, and biological treatment processes for industrial and hazardous wastes; pretreatment systems, biodegradation of toxic chemicals; groundwater and soil decontamination; biofilters for air decontamination. *Prerequisite:* CE

CE 518 Carbon Capture and Sequestration (3) The needs for carbon capture and sequestration (CCS) and systematic introduction to CCS technologies. Main topics include: introduction to global change, world energy consumption, greenhouse gases control, carbon capture and separation, and carbon sequestration.

CE 519 Transportation Engineering (3) Principles of analysis and planning. Characteristics of transportation systems. Urban and regional systems. Relationship between environment and transportation systems. Estimating the impact of decisions.

CE 520ab Ocean and Coastal Engineering (3-3) Linear and nonlinear wave theories with engineering applications; wind waves; wave spectra; wave interactions with marine structures; ship mooring, harbor resonance; sediment transport; diffusion processes. *Prerequisite: a: CE 309 or ENE 410.*

CE 522 Groundwater Hydrologic Modeling (3) Simulation of groundwater hydrologic processes through mathematical, analog, and physical models.

CE 523 Physiochemical Processes in Environmental Engineering (3) Concepts and applications of processes that affect water quality in engineered and natural systems, including coagulation, sedimentation, filtration, adsorption, air stripping, and membrane processes. *Prerequisite: CE 453 or CE 463.*

CE 525 Engineering Mathematical Analysis (3, Sp) Engineering problems discussed on a physical basis with solutions via mathematical tools: Vector analysis; functions of complex variables, infinite series, residues and conformal mappings. (Duplicates credit in the former CE 525a.)

CE 526 Engineering Mathematical Methods (3) Engineering problems discussed on a physical basis with solutions via mathematical tools: Fourier series; Fourier and Laplace transforms; partial differential equations, wave and Laplace equations. (Duplicates credit in the former CE 525b.) *Recommended preparation:* undergraduate multivariable calculus and ordinary differential equations.

CE 528 Seismic Analysis and Design of Reinforced Concrete Bridges (3, Sp) Fundamental concepts, methods and current codes used in the analysis and design of reinforced concrete bridge structures. Experimental and earthquake observations of bridge performance. *Prerequisite: CE 457; recommended preparation: CE 538.*

CE 529ab Finite Element Analysis (a: 3, Fa; b: 3, Sp) Basic concepts; stiffness method; variational methods; displacement method; isoparametric formulation; plane stress and strain; plates and shells; dynamics; stability; nonlinear analysis, heat transfer; computer applications.

CE 530 Nonlinear Mechanics (3) Nonlinear problems in structural dynamics; elastic-plastic response; approximate methods of nonlinear analysis; stability theory; stability of periodic nonlinear oscillations; Liapounov's method; nonlinear buckling problems.

CE 531 Soil Mechanics (3) Soil formation; clay mineralogy; steady state seepage; mechanical coupling between interstitial water and soil skeleton; experimental soil behavior and its modeling with constitutive equations. *Prerequisite: CE 464.*

CE 532 Principles of Foundation Engineering (3) Fundamental methods in foundation engineering; plastic collapse, limit equilibrium, bearing capacity, slope stability; soil-structure interaction; application of numerical methods, finite differences and finite elements. *Prerequisite: CE 464.*

CE 533 Geotechnical Earthquake Engineering (3) Provides a design-oriented understanding of the "state-of-the-practice" of soil mechanics and foundation engineering aspects of earthquake engineering.

CE 534 Design of Earth Structures (3) Designed to provide a thorough understanding of the analytical and design principles underlying the construction of a broad range of earth structures.

CE 535 Earthquake Engineering: Strong Motion Studies (3, Fa) Earthquake source mechanisms; wave propagation, scattering, diffraction and amplification; empirical scaling of strong ground motion; seismic hazard

analysis for earthquake resistant design codes and mapping. (Duplicates credit in former CE 535a.)

CE 536 Structural Design for Dynamic Loads (3) Earthquake resistant design criteria with application to steel reinforced concrete and timber structures. Design of blast resistant structures and structures subject to impact loads. *Prerequisite:* CE 459 or CE 541a.

CE 537 Advanced Reinforced Concrete (3, Fa) Behavior of reinforced concrete members in terms of strength and deformation; relationship between behavior and building code requirements.

CE 538 Prestressed Concrete (3, Sp) Fundamental principles of prestressing by pre- and post-tensioning; elastic and time dependent losses; stress analysis and design of prestressed and precast concrete structures.

CE 539 Advanced Steel Structures (3, Sp) Design of tubular members and plate girders; design for torsional and seismic loads; general flexural theory; introduction to plastic design; connections.

CE 540 Limit Analysis of Structures (3) Plastic analysis and design of frames. Fundamental theorems of plastic analysis; general methods of plastic analysis, design requirements, minimum weight design theorems and applications, shakedown theorems.

CE 541ab Dynamics of Structures (a: 3, Fa; b: 3, Sp) *a:* Forced vibrations of discrete MDOF systems; modal analysis; energy methods; analytical dynamics; vibration of continuous systems; wave propagation; computational techniques; application of commercial software tools. *b:* Continuous system responses; approximate methods; introduction to structural control; random vibration concepts; response of continuous systems to random excitation; nonlinear systems (geometric theory), (approximate methods). *Prerequisite:* CE 541a.

CE 542 Theory of Plates (3) Theory of plate bending; rectangular and circular plates; anisotropic plates; energy methods; numerical methods; large deformations; sandwich plates. *Prerequisite:* CE 428 or CE 507.

CE 543 Stability of Structures (3) Critical loads of columns, beams, thin-wall bars, plates, shells; stability of frames and trusses; effect of inelastic behavior of materials; effect of dynamic loading.

CE 544 Theory of Shell Structures (3) General bending theory of shells; membrane theory; shells of revolution; numerical methods; dynamic response. *Prerequisite:* CE 428 or CE 507.

CE 545ab Advanced Finite Element Method in Structural and Continuum Mechanics (3-3) *a:* Finite elements in nonlinear mechanics, elasticity, plasticity, viscoelasticity; advanced finite element applications in fracture mechanics, heat transfer, fluid mechanics; computational implementation of finite element method. *Prerequisite:* CE 529a. *b:* Mathematical aspects of the finite element method; correctness of discretizations for elliptic, parabolic, and hyperbolic equations; accuracy and convergence considerations; stability of time dependent algorithms. *Prerequisite:* CE 545a.

CE 546 Structural Mechanics of Composite Materials (3) Applications and manufacturing of composites: anisotropic materials; laminated composite plates and shells; buckling and dynamics; strength and failure; interlaminar stresses; delamination; thermal properties; design considerations.

CE 547 Earthquake Engineering: Response of Structures (3, Sp) Solutions of seismic structural response: vibrational vs. wave methods, spectral superposition, probabilistic response estimation, nonlinear response; soil-structure interaction; identification and structural health monitoring; experimental methods. (Duplicates credit in former CE 535b.)

CE 549 Building Design Project (3, Sp) Integrated design project following design office procedures. A building will be designed in detail using the team approach. Capstone for M.Eng. in Structural Design. *Prerequisite:* CE 459 or CE 541a, CE 458 or CE 529a, CE 537; *corequisite:* CE 539.

CE 550 Computer-Aided Engineering (3) Basic concepts of computer-aided engineering. Modeling; simulation; visualization; optimization; artificial intelligence; manufacturing; information management. Organization and management of computer-aided engineering projects.

CE 551 Computer-Aided Engineering Project (3) Computer-aided engineering in a project environment. Responding to RFPs; conceptual design; preliminary analysis; overall and detailed analysis and design; trade-off studies; project management; project presentation.

CE 552 Managing and Financing Public Engineering Works (3, FaSpSm) Tools for improving the efficiency and effectiveness of public engineering works, taking into account the political and policy context. Graduate standing. *Recommended preparation:* microeconomic theory.

CE 553 Biological Processes in Environmental Engineering (3) Fundamentals and design of aerobic and anaerobic biological treatment processes with a focus on removing organic and inorganic pollutants and recovering resources. *Prerequisite:* CE 453.

CE 554 Risk and Reliability Analysis for Civil Infrastructure Systems (3, Sp) Elements of feasibility, reliability, and risk analysis of civil infrastructure systems, simulation, optimization, life-cycle cost, evaluation and decision making.

CE 555 Underwater Structures (3) Loads on underwater structures; stress analysis of typical structural elements; buckling problems; dynamic response. *Prerequisite:* CE 507.

CE 556 Project Controls – Budgeting and Estimating (3, FaSp) Fundamental principles and practices of cost estimating, budgeting, and cost control of construction projects. Case studies and software exercises based on project data.

CE 557 Advanced Building Estimating (3, Sp) Processes in compiling a bid for construction of non-residential building.

CE 558 International Construction and Engineering (3, Sp) Business development and project management in international markets. Topics include marketing, planning, contracts and negotiations, procurement, logistics, personnel and financing. Construction operations in adverse environments.

CE 559 Strategic Planning in Construction Engineering (3, Sp) Elements and techniques of strategic planning for construction engineering. Fundamentals of engineering as a service sector enterprise. Assessment of markets (including international issues), competitors, and technology. Aspects of overseas engineering business. Management of technology and the role of R&D. Emphasis on concepts. *Recommended preparation:* CE 502.

CE 560 Simulation of Civil Infrastructure Systems Performance (3) Time/space and frequency/wave number domain analysis, spectral representation of wind, earthquake and other natural loads, FEM techniques for system response simulation.

CE 561 Uncertainty Quantification (3) Methods of quantifying uncertainty in civil engineering and related fields. Basic uncertainty modeling; advanced topics such as reliability analysis, Bayesian updating, random processes, random fields.

CE 563 Chemistry and Biology of Natural Waters (3) Chemical and biological limnology; cycles of carbon, nitrogen, phosphorous, sulfur, and other biologically-mediated chemical transformations; effect of pollution on biology and chemistry of natural waters. *Prerequisite:* CE 443 and CE 453.

CE 565 Wave Propagation in Solids (3) Elastic waves in infinite and semi-infinite regions; plates and bars; steady-state and transient scattering; dynamic stress concentration; viscoelastic and plastic bodies.

CE 566 Project Controls – Planning and Scheduling (3, FaSp) Fundamental principles and practices of planning, CPM scheduling, and resource management. Development of project schedules using CPM theory applied to current and emerging software applications. *Recommended preparation:* CE 556.

CE 567 Smart Infrastructures (3) Examination of smart infrastructures relating to energy, water, waste and transportation drawing from the fields of engineering, sustainability, communications, sociology, and psychology.

CE 570 Building Information Modeling for Collaborative Construction (3, Sp) Multidisciplinary and

geographically distributed virtual project teams used to simulate engineering and construction problems for projects selected in collaboration with industry partners. Open only to Master's and Doctoral students.
Prerequisite: CE 470; *recommended preparation:* CE 556, CE 566.

CE 571 Nuclear Safety and Security: Human Performance and Safety Culture (3) Provides an overview of human-systems integration considerations, human performance and safety culture in the nuclear power operations.

CE 572 Construction Labor Management (2) Unionism in construction. Craft tradition, objectives, regulation, motivation, labor force economics, productivity, and technical change. Hiring systems, supervision of project labor operations, jurisdictional administration.

CE 579 Introduction to Transportation Planning Law (3) Federal and state statutory and regulatory requirements affecting California transportation systems, including transportation planning and funding law; and government contracting, environmental, and civil rights requirements.

CE 580 Law and Finance for Engineering Innovation (3) (Enroll in ISE 565)

CE 581 Negotiation For Engineering Management (3, Sp) (Enroll in ISE 581)

CE 583 Design of Transportation Facilities (3) Planning, design, staging, construction, test, and maintenance of the public works and facilities for land, water, and air transportation. *Recommended preparation:* CE 471 and CE 457; probability and statistics on the level of CE 408.

CE 584 Intelligent Transportation Systems (3) Fundamentals of intelligent transportation systems, automated vehicles, communication systems, connected vehicle technologies, mobile devices, policy and planning, international research, standards, architecture, and economics of ITS.

CE 585 Traffic Engineering and Control (3, Sp) Conceptual engineering geometric design, installation, and calibration of vehicular storage and traffic controls; safe flow optimization of vehicles on various thoroughfares. *Recommended preparation:* CE 471.

CE 586x Management for Engineers (4) (Enroll in AME 589x)

CE 587 Transportation Energy Analysis (3) Energy consumption and socioeconomic impacts of past, present, and future transportation systems; analysis of alternatives between energy-intensive and low-cost transportation modes.

CE 588 Railroad Engineering (3) Railroad infrastructure including passenger and freight operations, track alignment (horizontal and vertical) design, basic components and terminology used in rail design and an understanding of this mode of transportation. *Recommended preparation:* CE 471.

CE 589 Port Engineering: Planning and Operations (3, Fa) Physical and operational characteristics of marine ports; impact analysis of modern logistics on port operation, planning and management; optimization and efficiency solutions for container terminals.

CE 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

CE 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

CE 599 Special Topics (2-4, max 9) Course content will be selected each semester to reflect current trends and developments in the field of civil engineering.

CE 611 Stochastic Modeling and Simulation (3) Stochastic methods for modeling and simulating physical, chemical and biological processes. Topics include: Stochastic partial differential equations, Monte Carlo simulations, moment equation methods, stochastic expansions. Open only to graduate students.

CE 633 Urban Transportation Planning and Management (4, 2 years, Fa) (Enroll in PPD 633)

CE 634 Institutional and Policy Issues in Transportation (4, Sp) (Enroll in PPD 634)

CE 638 Stochastic Optimization (3, FaSp) (Enroll in ISE 638)

CE 640 Advanced Theory of Elasticity (3) Curvilinear tensors; equations of nonlinear elasticity; elementary solutions; small deformations superimposed on large deformations; bifurcation of equilibrium states; nonlinear shell theory. *Prerequisite:* CE 507.

CE 645 Uncertainty Modeling and Stochastic Optimization (3) Introduction to the mathematical foundations, numerical algorithms, and computational tools necessary for solving problems of optimization under uncertainty. Open only to graduate students.

CE 647 Multiscale Methods in Mechanics (3) Behavior of man-made and natural materials at different scales; experimental methods to characterize behavior; governing equations, interscale coupling, information exchange; probabilistic representations; error analysis. Open only to master's, doctoral, and professional students. *Prerequisite:* AME 525 or AME 526 or CE 525 or CE 526.

CE 690 Directed Research (1-4, max 8) Laboratory study of specific problems by candidates for the degree Engineer in Civil Engineering. Graded CR/NC.

CE 692 Transportation and the Environment (4) (Enroll in PPD 692)

CE 694abz Thesis (2-2-0) Required for the degree Engineer in Civil Engineering. Credit on acceptance of thesis. Graded IP/CR/NC.

CE 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

CE 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Chair: Lucio Soibelman, Ph.D.

Associate Chair: Erik Johnson, Ph.D.

Director, Environmental Engineering: Amy Childress, Ph.D.

Associate Director, Environmental Engineering: Massoud Pirbazari, Ph.D.

Faculty

Stephen Schrank Early Career Chair in Civil and Environmental Engineering: Burcin Becerik-Gerber, D.Des.

John and Dorothy Shea Early Career Chair in Civil Engineering: Patrick Lynett, Ph.D.

Fred Champion Professor of Civil and Environmental Engineering: Constantinos Sioutas, Sc.D.

Gordon S. Marshall Professor of Engineering Technology: Roger Ghanem, Ph.D. (Aerospace and Mechanical Engineering)

Professors: James C. Anderson, Ph.D.; Amy Childress, Ph.D.; Roger Ghanem, Ph.D. (Aerospace and Mechanical Engineering); Erik A. Johnson, Ph.D.; Jiin-Jen Lee, Ph.D., P.E.; Vincent W. Lee, Ph.D.; Patrick Lynett, Ph.D.; Sami F. Masri, Ph.D. (Aerospace and Mechanical Engineering); Najmedin Meshkati, Ph.D., CPE (Industrial and Systems Engineering); Massoud Pirbazari, Ph.D.; Constantinos Sioutas, Sc.D.; Lucio Soibelman, Ph.D.; Costas Synolakis, Ph.D. (Aerospace Engineering); Mihailo Trifunac, Ph.D.; L. Carter Wellford, Ph.D.; Hung Leung Wong, Ph.D.**

Assistant Professors: George Ban-Weiss, Ph.D.; Burcin Becerik-Gerber, D.Des.; Felipe de Barros, Ph.D.; Kelly Sanders, Ph.D.; Ketan Savla, Ph.D.

Professors of Engineering Practice: Gregg E. Brandow Jr., Ph.D., P.E.; Geraldine Knatz, Ph.D. (Public Policy); Henry M. Koffman, P.E.

Associate Professor of Engineering Practice: Amy Rechenmacher, Ph.D.

Senior Lecturer: Dana Sherman, Esq. (Industrial and Systems Engineering)*

Joint Appointments: David J. Gerber, D.Des. (Architecture); Genevieve Giuliano, Ph.D. (Public Policy); Behrokh Khoshnevis, Ph.D. (Industrial and Systems Engineering); James Moffett, Ph.D. (Marine Environmental Biology); James Moore, Ph.D. (Industrial and Systems Engineering, Public Policy); Firdaus E. Udwadia, Ph.D. (Aerospace and Mechanical Engineering); John P. Wilson, Ph.D. (Sociology)

Research Professor: Michael Orosz (Information Sciences Institute)

Research Assistant Professor: Scott Fruin, Ph.D. (Environmental Health, Keck School of Medicine)

Adjunct Associate Professor: Le Dam Hanh-Griffin, Ph.D.

Adjunct Assistant Professor: Navid Nastar, Ph.D.

Adjunct Research Professors: Maria I. Todorovska, Ph.D.; Yan Xiao, Ph.D., P.E.; Dongxiao Zhang, Ph.D.

Adjunct Research Assistant Professors: Jose C. Borrero, Ph.D.; John Caffrey, Ph.D.; Mohammad R. Jahanshahi, Ph.D.; Mazen Wahbeh, Ph.D.

Emeritus Professors: Mihran S. Agbabian, Ph.D., P.E.; George V. Chilingar, Ph.D.; Joseph S. Devinny, Ph.D.; Geoffrey Martin, Ph.D.

**Recipient of university-wide or school teaching award.*

Degree Requirements

Undergraduate Program Educational Objectives

Fulfilling the vision of the Sonny Astani Department of Civil and Environmental Engineering, the Viterbi School of Engineering and the University of Southern California, our graduates will:

1. Be successful in their professional careers, become leaders in industry, academia, government or service, while adapting their technical, collaborative and managerial skills for the benefit of Society's built and natural environments.
2. Support the advancement of the practice of science and engineering, while maintaining professional standards and moral and legal obligations to society, while being active in professional organizations and obtaining professional licensure when appropriate.
3. Be prepared to pursue graduate studies in engineering or other disciplines, while continuously broadening

their abilities and enhancing their technical skills to maintain their relevance with technological change.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Civil Engineering prepares graduates to apply knowledge of mathematics through differential equations, calculus-based physics, chemistry and at least one additional area of basic science, consistent with the program educational objectives; apply knowledge of four technical areas appropriate to civil engineering; conduct civil engineering experiments and analyze and interpret the resulting data; and design a system, component, or process in more than one civil engineering context. The program also explains basic concepts in management, business, public policy, and leadership; and explains the importance of professional licensure.

The program leading to a Bachelor of Science in Environmental Engineering prepares graduates to be proficient in mathematics through differential equations, probability and statistics, calculus-based physics, general chemistry; an earth science, e.g., geology, meteorology, soil science, relevant to the program of study; a biological science, e.g., microbiology, aquatic biology, toxicology, relevant to the program of study; fluid mechanics relevant to the program of study; and an introductory level knowledge of environmental issues associated with air, land, and water systems and associated environmental health impacts. The program prepares graduates to be proficient at conducting laboratory experiments and critically analyzing and interpreting data in more than one major environmental engineering focus area, e.g., air, water, land, environmental health; performing engineering design by means of design experiences integrated throughout the professional component of the curriculum; and to be proficient in advanced principles and practice relevant to the program objectives; including understanding of concepts of professional practice and the roles and responsibilities of public institutions and private organizations pertaining to environmental engineering.

Bachelor of Science in Environmental Engineering

See Civil Engineering.

Minor in Environmental Engineering

A minor in environmental engineering provides students with a basic knowledge of our environment, potential causes for its deterioration, methods to prevent or mitigate environmental hazards, and the means to improve its quality at reasonable costs. Students will learn how to control water pollution, maintain air quality, treat and properly dispose of wastes, and remediate sites contaminated due to improper disposal of hazardous waste. This minor also enhances students' employment opportunities in the field of environmental engineering. The program provides the necessary infrastructure for the pursuit of graduate studies in environmental engineering.

The minor in environmental engineering is offered to undergraduates in various fields of engineering and natural sciences.

Prerequisite Courses

CHEM 105aLbL or CHEM 115aLbL; MATH 125, MATH 126 and MATH 226, and PHYS 151L.

REQUIRED COURSES

		UNITS
CE 443	Environmental Chemistry	3
CE 453	Water Quality Control	3
CE 463L	Water Chemistry and Analysis	3
ENE 201	Introduction to Applied Environmental Science and Engineering	4
ENE 410	Environmental Fluid Mechanics	3
ENE 428	Air Pollution Fundamentals, or	
ENE 429	Air Pollution Control	3
ENE 495	Seminars in Environmental Engineering	1
		minimum 20

Bachelor of Science in Civil Engineering

Emphasis in Environmental Engineering

See Civil Engineering.

Master of Science in Environmental Engineering

See Civil Engineering.

Engineer in Environmental Engineering

Requirements for the Engineer in Environmental Engineering are the same as set forth in the general requirements. See General Requirements for the Engineer Degree.

Ph.D. in Engineering (Environmental Engineering)

See listing under Civil Engineering.

Sustainable Policy and Planning Graduate Certificate

See the listing in the USC Price School of Public Policy section.

Courses of Instruction

ENVIRONMENTAL ENGINEERING (ENE)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ENE 200 Environmental Engineering Principles (3, FaSpSm) Analysis of water, air, and land pollution, including hazardous waste, and engineering of mitigation measures. Water and wastewater treatment systems. *Prerequisite:* CHEM 105*b* or CHEM 115*b* and MATH 226, PHYS 152.

ENE 201 Introduction to Applied Environmental Science and Engineering (4) Gateway to B.S. in Civil Engineering (Environmental Engineering), B.S., Environmental Engineering, and Minor in Environmental Engineering. Fundamental concepts of environmental science and engineering. Pollution control and remediation for air, water and soil. Pollution remediation for developing countries.

ENE 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

ENE 410 Environmental Fluid Mechanics (3) Equation of motion; continuity, momentum, energy principles; dimensional analysis, similitudes; groundwater flows; transports in conduits and channels; mixing, dispersion in environments; manifold diffusers; hydraulic transients. (Duplicates credit in CE 309 and AME 309.) *Prerequisite:* MATH 245.

ENE 426 Particulate Air Pollutants: Properties/Behavior/Measurement (3, FaSpSm) Particulate air pollutants, their measurement and instrumentation methods, and their effects on the environment and human health; optical properties and visibility degradation. *Prerequisite:* ENE 200 or ENE 400. (Duplicates credit in former ENE 526.)

ENE 428 Air Pollution Fundamentals (3, Fa) Air pollution effects on man, vegetation, materials; pollutant sampling and analysis; air quality standards and criteria; meteorological factors and dispersion modeling. *Prerequisite:* MATH 245, PHYS 151*L*, CHEM 105*bL* or CHEM 115*bL*; *recommended preparation:* ENE 400 or CHE 350.

ENE 429 Air Pollution Control (3, Sp) Emission surveys; engineering controls of aerosols and gaseous contaminants at emission sources, disposition of contaminants. Field trips. Senior standing. *Prerequisite:* ENE 428; CE 309 or ENE 410.

ENE 443 Environmental Chemistry (3) (Enroll in CE 443)

ENE 453 Water Quality Control (3) (Enroll in CE 453)

ENE 463L Water Chemistry and Analysis (3) (Enroll in CE 463L)

ENE 465 Water Supply and Sewerage System Design (3) (Enroll in CE 465)

ENE 486 Design of Solid and Hazardous Waste Engineering Systems (3, Fa) Engineering design of solid and hazardous waste facilities such as waste minimization, secured landfill, and hazardous waste treatment. *Prerequisite:* ENE 400.

ENE 487 Environmental Biotechnology and Bioremediation (3) Understanding and designing microbiological processes for environmental protection; learning how processes in environmental biotechnology work; emerging applications for bioremediation of hazardous chemicals in the environment. *Prerequisite:* CE 210L, BISC 320L.

ENE 495 Seminars in Environmental Engineering (1, FaSp) Hazardous waste management, biodegradation of environmental pollutants, groundwater problems, waste minimization, energy resources, and air pollution control.

ENE 499 Special Topics (2-4, max 8, FaSp) Course content to be selected each semester from recent developments in environmental engineering and related fields.

ENE 502 Environmental and Regulatory Compliance (3) Federal and state environmental laws; environmental impact assessment techniques; permitting for industrial facility construction and operation. *Prerequisite:* graduate standing.

ENE 503 Microbiology for Environmental Engineers (3) (Enroll in CE 503)

ENE 504 Solid Waste Management (3) (Enroll in CE 504)

ENE 505 Energy and the Environment (3, Fa) Environmental effects of energy development using fossil and fissile fuels, geothermics, photosynthesis, and other sources. Relationship of elemental cycles to the life supporting systems.

ENE 506 Ecology for Environmental Engineers (3, Fa) The role of environmental engineering in maintaining stability of freshwater, marine, and terrestrial ecosystems; macroscopic plant and animal forms as indicators of water quality.

ENE 510 Water Quality Management and Practice (3, Fa) Surface and ground water quality and resources management; water pollution in aquatic environment; water/wastewater infrastructure systems and management.

ENE 514ab Advanced Sanitary Engineering Design (3-3) (Enroll in CE 514ab)

ENE 516 Hazardous Waste Management (3) Standards and regulations for the management of hazardous waste: identification, transportation, monitoring, storage, treatment, and disposal practices.

ENE 517 Industrial and Hazardous Waste Treatment and Disposal (3) (Enroll in CE 517)

ENE 518 Environmental Systems Engineering and Management (3) Evaluating, implementing and managing effective environmental systems to prevent pollution, conserve energy and resources, reduce risks and achieve sustainability in business and industries.

ENE 523 Physiochemical Processes in Environmental Engineering (3) (Enroll in CE 523)

ENE 535 Air Pollution Management: Exposure, Health Effects and Risk (3, Sp) Pollutant sampling; occupational, community, and personal exposures; receptor modeling; data analysis; health effects of air pollutants.

ENE 553 Biological Processes in Environmental Engineering (3) (Enroll in CE 553)

ENE 560 Environmental Aspects of Oil and Gas Production (3) Environmental aspects of drilling for and producing oil and gas, and the necessary safety practices. Attention is given to the urban areas.

ENE 563 Chemistry and Biology of Natural Waters (3) (Enroll in CE 563)

ENE 580 Applied Environmental Engineering Biotechnology (3) Fundamentals of bioremediation processes; bioremediation technologies for decontamination of air, water, and soil; global applications of bioremediation techniques.

ENE 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

ENE 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

ENE 596 Chemical Reactions in the Atmosphere (3, Fa) Chemical reactions and scavenging processes important in urban air pollution. Effects of solar irradiation on vehicle exhaust gases, oxides of nitrogen and sulfur.

ENE 599 Special Topics (2-4, max 9, FaSp) Course content will be selected each semester to reflect current trends and developments in the field of environmental engineering.

ENE 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

ENE 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Viterbi School of Engineering

Computer Engineering

Undergraduate Degree

Undergraduate Program Educational Objectives

Graduates of the Computer Engineering and Computer Science program are expected to attain the following educational objectives within a few years of graduation:

- Graduates will apply analytical and critical thinking principles of both computer engineering and computer science to their chosen professions.
- Graduates will successfully engage in life-long learning to continue to be contributing members of their communities in fields within and outside the traditional scope of computer engineering.
- Graduates will exhibit high professional and ethical standards to become productive leaders in society.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Computer Engineering and Computer Science provides both breadth and depth across the range of engineering topics implied by the title. The curriculum includes probability and statistics, including appropriate applications; mathematics, including discrete mathematics through differential and integral calculus; sciences (defined as biological, chemical or physical science) to develop an understanding of the scientific method and provide students with an opportunity to experience this mode of inquiry in courses for science or engineering majors that provide some exposure to lab work; and engineering topics (including computing science) necessary to analyze and design complex electrical and electronic devices, software and systems containing hardware and software components.

The computer science portion of the curriculum covers the fundamentals of algorithms, data structures, software design, concepts of programming languages and computer organization and software; provides an exposure to a variety of programming languages and systems, including at least one higher-level language; and includes advanced course work that builds on the fundamental course work to provide depth.

Bachelor of Science in Computer Engineering and Computer Science

Students attaining the bachelor of science degree in computer engineering and computer science would possess the scientific and engineering skills and knowledge that would enable them to design and implement computer systems that effectively and efficiently integrate developing hardware and software technologies. This degree is administered jointly by the departments of Computer Science and Electrical Engineering.

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken.

++Technical Electives (11 units) Applicable courses include: CSCI 300, CSCI 310, CSCI 360, CSCI 420, CSCI 445L, CSCI 459, CSCI 460, CSCI 464, CSCI 476, CSCI 477ab, CSCI 485, CSCI 490x, CSCI 491ab, CSCI 499; EE 454L, EE 465, EE 477L, EE 459L, EE 477L, EE 490x, EE 499; MATH 458. Students may also choose one adviser-approved course from the 300- and 400-level ITP offerings. Other courses may be applicable; please see an adviser for approval.

Graduate Degrees

The graduate program in computer engineering, offered through the Department of Electrical Engineering, is designed to provide students with an intensive background in the analysis, structure, design and function of digital computers and information processing systems. In addition to giving each student a fundamental background in digital logic, computer architecture and operating systems, a wide variety of elective courses allows for study in the following specialized areas: artificial intelligence; computer architecture; computer networks; computer system performance; design automation; fault-tolerant computers; microprocessors; parallel processing; real-time systems; robotics; and VLSI design.

Master of Science in Computer Engineering

The Master of Science in Computer Engineering is earned by completing an integrated program of at least 27 units of approved course work in computer engineering and computer science. No more than three courses (maximum 12 units) may be counted at the 400 level — at least 18 adviser-approved units must be taken at the 500 or 600 level.

All applicants must have taken the entrance requirement courses (or equivalent in other institutions) in order to be admitted to the program. Entrance requirement course credit cannot be applied toward the degree. A fundamental course may be waived by taking a placement exam. In case a placement exam is not offered, a fundamental course may be waived by a designated faculty member. At least 18 units must be taken at the 500-level or above. At least 18 units must be taken in electrical engineering, 15 of which must be taken at USC. Units

taken outside of electrical engineering or computer science must be approved in advance by a computer engineering adviser and must be substantive in content and related to the degree objective. Up to 3 units of Directed Research (EE 590) with a computer engineering faculty member may be applied toward the degree.

ENTRANCE REQUIREMENT COURSES		UNITS
CSCI 455x	Introduction to Programming Systems Design	4
EE 357	Basic Organization of Computer Systems	3

Students must take or waive all four of the following fundamental courses (with the option of EE 450 or EE 465 or EE 503):

FUNDAMENTAL COURSES		UNITS
CSCI 402x	Operating Systems	3
EE 450	Introduction to Computer Networks, or	
EE 465	Probabilistic Methods in Computer Systems Modeling	3
EE 457	Computer Systems Organization	3
EE 477L	MOS VLSI Circuit Design	4
EE 503	Probability for Electrical and Computer Engineers	4

Students must take at least two of the following core courses (with the option of EE 550 or EE 555):

CORE COURSES		UNITS
EE 550	Design and Analysis of Computer Communication Networks, or	
EE 555	Broadband Network Architectures	3
EE 557	Computer Systems Architecture	3
EE 577a	VLSI System Design	3

Students must take at least 6 units from the following list of elective courses (cannot overlap with the core courses):

Computer Science: CSCI 545, CSCI 546, CSCI 547, CSCI 551, CSCI 555, CSCI 558L, CSCI 561, CSCI 565, CSCI 570, CSCI 584, CSCI 585, CSCI 595

Electrical Engineering: EE 532, EE 536ab, EE 549, EE 550, EE 552, EE 554, EE 555, EE 557, EE 558, EE 560, EE 577ab, EE 579, EE 630, EE 650, EE 652, EE 653, EE 657, EE 658, EE 659, EE 677, EE 680, EE 681

A minimum grade point average of 3.0 (A = 4.0) must be earned on all course work applied toward the master's degree in computer engineering. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree. Transfer units which count as credit (CR) toward the master's degree are not computed in the grade point average. All other Viterbi School of Engineering requirements for the Master of Science apply.

Doctor of Philosophy in Computer Engineering

The requirements for the Doctor of Philosophy (Ph.D.) in Computer Engineering are in strict conformity with the requirements of the Graduate School. Program requirements for the Ph.D. in Computer Engineering are the same as those for the Ph.D. in Electrical Engineering except that the major field is computer engineering. See general requirements for graduate degrees.

Screening and qualifying examinations are administered by the computer engineering faculty. Students should contact the Electrical Engineering Systems Department Office for further information.

COURSE REQUIREMENTS		UNITS

The following course work must be completed; these courses can be included in the 60-unit course work requirement:

Take two courses from theory area and four courses from the other three areas (hardware, software and systems), including at least one course from each area to total six courses.

Theory Area Courses

CSCI 570	Analysis of Algorithms	3
EE 465	Probabilistic Methods in Computer Systems Modeling, or	
EE 503	Probability for Electrical and Computer Engineers, or	
EE 549	Queuing Theory for Performance Modeling	3-4
EE 562a	Random Processes in Engineering	3
EE 565a	Information Theory	3
MATH 410	Fundamental Concepts of Modern Algebra, or	
MATH 425a	Fundamental Concepts of Analysis	4
MATH 432	Applied Combinatorics, or	
MATH 533	Combinatorial Analysis and Algebra	4

Hardware Area Courses

EE 536a	Mixed Signal Integrated Circuit Design	3
EE 552	Asynchronous VLSI Design	3
EE 557	Computer Systems Architecture	3

Software Area Courses

CSCI 565	Compiler Design, or	
CSCI 595	Advanced Compiler Design	4
CSCI 577a	Software Engineering	4
CSCI 585	Database Systems	3

Systems Area Courses

CSCI 551	Computer Communications	3
CSCI 555	Advanced Operating Systems	3
CSCI 561	Foundations of Artificial Intelligence	3
EE 543a	Digital Control Systems	3
EE 554	Real Time Computer Systems	3
EE 550	Design and Analysis of Computer Communication Networks, or	
EE 555	Broadband Network Architectures	3
EE 569	Introduction to Digital Image Processing	3

Chair: Gaurav Sukhatme, Ph.D.

Faculty

Chan Soon-Shiong Chair: Maja Matarić, Ph.D. (Neuroscience Center)

Dean's Chair in Chemical Engineering and Materials Science: Priya Vashishta, Ph.D. (Computer Science, Physics)

Fletcher Jones Chair in Computer Science: Michael A. Arbib, Ph.D.

Viterbi Early Career Chair: Jernej Barbic, Ph.D.

Gordon S. Marshall Chair in Engineering: Aristides A.G. Requicha, Ph.D.

Jack Munishian Early Career Chair: Fei Sha, Ph.D.

Northrup Grumman Chair in Engineering: Ramesh Govindan, Ph.D.

David Packard Chair in Manufacturing Engineering: Stephen C-Y Lu, Ph.D. (Mechanical Engineering, Industrial and Systems Engineering)

Charles Lee Powell Chair in Engineering: Viktor Prasanna, Ph.D. (Electrical Engineering)

Charles Lee Powell Chair in Electrical Engineering and Computer Science: Melvin Breuer, Ph.D. (Electrical Engineering)

Henry Salvatori Chair in Computer Science: Leonard M. Adleman, Ph.D.

Dean's Professor of Computer Science: Kevin Knight, Ph.D.

Dean's Professor of Computer Science: Gaurav Sukhatme, Ph.D.

Helen N. & Emmett H. Jones Professorship in Engineering: Milind Tambe, Ph.D. (Industrial and Systems Engineering)

Seeley G. Mudd Professor of Engineering: Shanghua Teng, Ph.D.

TRW Professor of Software Engineering: Barry Boehm, Ph.D.

WISE Jr. Gabilan Chair in Computer Science: Nora Ayanian, Ph.D.

Professors: Leonard Adleman, Ph.D. (Molecular Biology); Michael Arbib, Ph.D. (Biomedical Engineering, Electrical Engineering); Barry Boehm, Ph.D. (Industrial and Systems Engineering); Leana Golubchik, Ph.D. (Electrical Engineering); Ramesh Govindan, Ph.D.; Ellis Horowitz, Ph.D. (Electrical Engineering); Ming-Deh Huang, Ph.D.; Laurent Itti, Ph.D. (Neuroscience Center); Sven Koenig, Ph.D.; Kevin Knight, Ph.D.; Maja Matarić, Ph.D. (Neuroscience Center); Dennis McLeod, Ph.D.; Gerard Medioni, Ph.D. (Electrical Engineering); Neno Medvidovic, Ph.D.; Aiichiro Nakano, Ph.D. (Biomedical Engineering, Materials Science, Physics); Ulrich Neumann, Ph.D. (Electrical Engineering); Ramakant Nevatia, Ph.D. (Electrical Engineering); Aristides Requicha, Ph.D. (Electrical Engineering); Paul Rosenbloom, Ph.D.; Stefan Schaal, Ph.D. (Neuroscience Center); Cyrus Shahabi, Ph.D.; Gaurav Sukhatme, Ph.D. (Electrical Engineering); Milind Tambe, Ph.D. (Industrial and Systems Engineering); Shanghua Teng, Ph.D.

Associate Professors: Shahram Ghandeharizadeh, Ph.D.; David Kempe, Ph.D.; Fei Sha, Ph.D.

Assistant Professors: Nora Ayanian, Ph.D.; Jernej Barbic, Ph.D.; Shaddin Dughmi, Ph.D.; William GJ Halfond, Ph.D.; Aleksandra Korolova, Ph.D.; Hao Li, Ph.D.; Wyatt Lloyd, Ph.D.; Ethan Katz-Bassett, Ph.D.; Yan Liu, Ph.D.; Minlan Yu, Ph.D.

Joint Professors: Murali Annavaram, Ph.D. (Electrical Engineering); Melvin Breuer, Ph.D. (Electrical

Engineering); Todd Brun, Ph.D.; Tim Ting Chen, Ph.D. (*Biological Sciences*); Michael Crowley, Ph.D. (*Information Technology Program*); Kai Hwang, Ph.D. (*Electrical Engineering*); Rajiv Kalia, Ph.D. (*Physics*); Carl Kesselman, Ph.D. (*Industrial and Systems Engineering*); Bhaskar Krishnamachari, Ph.D. (*Electrical Engineering*); C-C Jay Kuo, Ph.D. (*Signal and Image Processing*); Stephen Lu, Ph.D. (*Industrial and Systems Engineering*); Urbashi Mitra, Ph.D. (*Electrical Engineering*); Shrikanth (Shri) Narayanan, Ph.D. (*Electrical Engineering*); Hamid Nazerzadeh, Ph.D. (*Data Sciences and Operations*); Viktor Prasanna, Ph.D. (*Electrical Engineering*); Konstantinos Psounis, Ph.D.; C.S. Raghavendra, Ph.D. (*Electrical Engineering*); Benjamin Reichardt, Ph.D. (*Electrical Engineering*); Remo Rohs, Ph.D. (*Computational Biology*); Nicolas Schweighofer, Ph.D. (*Biokinesiology and Physical Therapy*); Francisco Valero-Cuevas (*Biomedical Engineering*); Priya Vashishta, Ph.D. (*Chemical Engineering and Materials Science, Physics*); Michael Waterman, Ph.D. (*Mathematics, Biological Sciences*); Richard Weinberg, Ph.D. (*Cinematic Arts*); John Wilson, Ph.D. (*Geography*); Xianghong Zhou, Ph.D. (*Biological Sciences*)

Adjunct Professors: Danny Cohen, Ph.D.; Rick Selby, Ph.D.

Adjunct Associate Professors: David Chiang, Ph.D.; Mary Hall, Ph.D.; Eduard Hovy, Ph.D.; Stacy Marsella, Ph.D.; Larry Matthies, Ph.D.; Chris Mattmann, Ph.D.; Zhengyou Zhang, Ph.D.

Adjunct Assistant Professors: Aude Billard, Ph.D.; Auke Ijspeert, Ph.D.; Louis-Phillippe Morency, Ph.D.; Marco Papa, Ph.D.; Sethu Vijayakumar, Ph.D.; Roger Zimmermann, Ph.D.

Research Professors: Paul Debevec, Ph.D.; Yolanda Gil, Ph.D.; Jonathan Gratch, Ph.D.; John Heidemann, Ph.D.; Randall Hill, Ph.D.; Jerry Hobbs, Ph.D.; Craig Knoblock, Ph.D.; Premkumar Natarajan, Ph.D.; Herbert Schorr, Ph.D.; William Swartout, Ph.D.

Research Associate Professors: Ann L. Chervenak, Ph.D.; Ewa Deelman, Ph.D.; Andrew Gordon, Ph.D.; Eduard Hovy, Ph.D.; Kristina Lerman, Ph.D.; Robert Lucas, Ph.D.; Daniel Marcu, Ph.D.; Stacey Marsella, Ph.D.; Robert Neches, Ph.D.; Clifford Neuman, Ph.D.; Wei-Min Shen, Ph.D.; Pedro Szekely, Ph.D.; Joseph Touch, Ph.D.

Research Assistant Professors: Jose Luis Ambite, Ph.D.; Ron Artstein Ph.D.; Yu-Han Chang, Ph.D.; Young Cho, Ph.D.; Morteza Dehghani, Ph.D.; David DeVault, Ph.D.; Pedro Diniz, Ph.D.; Aram Galstyan, Ph.D.; Kallirroi Georgila, Ph.D.; Jihie Kim, Ph.D.; Anton Leuski, Ph.D.; Rajiv Maheswaran, Ph.D.; Jelena Mirkovic, Ph.D.; Kenji Sagae, Ph.D.; Stefan Scherer, Ph.D.; Evan Suma, Ph.D.; David Traum, Ph.D.; Greg Ver Steeg, Ph.D.

Professor of Engineering Practice: Michael Zyda, Ph.D.

Associate Professor of Engineering Practice: Jeffrey Miller, Ph.D.

Lecturers: Claire Bono; William Cheng, Ph.D.; Aaron Cote, Ph.D.; Scott Easley, B.A.; Massoud Ghyám-Khah, Ed.D.; Saty Raghavachary, Ph.D.; Shawn Shamsian, Ph.D.; Michael Shindler, Ph.D.; Sheila Tejada, Ph.D. (*Senior Lecturer*)

Emeritus Professor: George Bekey, Ph.D. (*Electrical Engineering, Biomedical Engineering*)

Viterbi School of Engineering

Computer Science

Bachelor of Science

Undergraduate Program Educational Objectives

Graduates of the undergraduate program in Computer Science are expected to attain the following objectives within a few years of graduation:

(1) Graduates apply the computational and analytical approaches of computer science to their chosen professions.

(2) Graduates successfully engage in life-long learning to continue to be contributing members of their communities in fields within and outside the traditional scope of computer science.

(3) Graduates exhibit high professional and ethical standards to become productive leaders in society.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Computer Science includes at least one and one-third years of computer science that covers the fundamentals of algorithms, data structures, software design, concepts of programming languages and computer organization and software; provides an exposure to a variety of programming languages and systems, including at least one higher-level language; and includes advanced course work that builds on the fundamental course work to provide depth.

The program includes at least one year of science and mathematics, including at least one-half year of mathematics, including discrete mathematics. Additional mathematics might consist of calculus, linear algebra, numerical methods, probability, statistics, number theory, geometry, or symbolic logic. The science component develops an understanding of the scientific method and provides an opportunity to experience this mode of inquiry in courses for science or engineering majors that provide some exposure to laboratory work.

Bachelor of Science in Computer Science

The undergraduate program in computer science is an interdisciplinary program leading to the Bachelor of Science in Computer Science. The program is designed to provide both an academic and professional orientation.

General admission requirements for the undergraduate program are the same as those of the university and the USC Viterbi School of Engineering and include 3 to 5 units of mathematics and one unit of science (biology, chemistry or physics) together with satisfactory scores on the Scholastic Aptitude Test and Achievement Tests. The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied towards the major, regardless of the department in which the courses are taken. Candidates must complete general education requirements; see The USC Core and the General Education Program.

COMPOSITION/WRITING REQUIREMENT (7 UNITS)		UNITS
WRIT 150	Writing and Critical Reasoning — Thematic Approaches	4

EE 352 Computer Organization and Architecture 3

Technical electives++ (at least four courses for a minimum of 14 units) 14

Free electives 10

Total units 128

**WRIT 340 Advanced Writing (Communication for Engineers)* is strongly recommended for CSCI majors

**Satisfies general education requirement.

***Any course in physics, biology or chemistry beyond the basic science requirement or in another scientific discipline. See adviser for a list of approved electives.

+The university allows engineering students to replace GE Category IV with a second course in Categories I, II or VI.

++Applicable courses include: CSCI 300, CSCI 351, CSCI 352, CSCI 353, CSCI 420, CSCI 445L, CSCI 459, CSCI 464, CSCI 485, CSCI 490x, CSCI 499; EE 450, EE 454L, EE 459L, EE 465, EE 477L, EE 490x, EE 499; MATH 458. Students may also choose one adviser-approved course from the 300- and 400-level ITP offerings. Other courses may be applicable; please see an adviser for approval.

Bachelor of Science in Computer Science (Games)

The goal of the B.S. in Computer Science (Games) program is to graduate students with a solid grounding in computer science and a cross-disciplinary background in game development. Topics covered in the cross-disciplinary game development portion of the degree program include game production, visual design for games and interactives, computer animation, video game programming, game hardware architectures, game engine programming, serious game development, introductory and intermediate game design, and two semester-long final game projects. Students graduating from this program will be capable of engineering next-generation games and simulations and their technologies in the entertainment and serious game fields. Additionally, graduates

from this program will be able to further their education in graduate programs in game development and computer science.

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper-division courses applied toward the major, regardless of the department in which the courses are taken.

*Satisfies GE requirement.

Bachelor of Science in Computer Science/Business Administration

The combined Bachelor of Science degree program in computer science/business administration offers qualified students the opportunity to gain an educational foundation in both areas. The degree cannot also be combined as an additional major in either computer science or business administration. The degree is administered by the Computer Science Department.

The minimum requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied toward the major, regardless of the department in which the courses are taken.

COMPOSITION/WRITING REQUIREMENT (7 UNITS) UNITS

CSCI 270	Introduction to Algorithms and Theory of Computing	4
CSCI 310	Introduction to Software Engineering	4
CSCI 477ab	Design and Construction of Large Software Systems (2-2)	4

Computer Science Electives (8 units minimum)

Take one of the following courses:

CSCI 351	Programming and Multimedia on the World Wide Web	3
CSCI 360L	Introduction to Artificial Intelligence	4
CSCI 430	Security Systems	4
CSCI 485	File and Database Management	3

And take one approved Computer Science elective (see adviser) 4

Business Requirements (36 units)

ACCT 410x	Accounting for Non-Business Majors	4
BUAD 302	Communication Strategy in Business	4
BUAD 304	Organizational Behavior and Leadership	4
BUAD 306	Business Finance	4
BUAD 307	Marketing Fundamentals	4
BUAD 311	Operations Management	4
BUAD 497	Strategic Management	4
ECON 351x	Microeconomics for Business	4
ECON 352x	Macroeconomics for Business	4

Business Electives (8 units)

Take two of the following courses:

BAEP 452	Feasibility Analysis	4
BAEP 453	Venture Management	4
BUAD 301	Technology Entrepreneurship	3
DSO 431	Managing the Digital Revolution for Your Business	4
DSO 433	Business Information Systems Analysis and Design	4
DSO 443	The Business of Interactive Digital Media	4
DSO 462	Managing a Small Business on the Internet	4
MKT 425	Marketing on the Internet	4

Total units **129-**
131

*Satisfies GE requirement.

Physics/Computer Science Major Requirements for the Bachelor of Science

This program is intended for students with dual interests in physics and computer science who wish to complete

the essential courses for both majors within their normal four year career. See the Physics and Astronomy Department section for course requirements.

Bachelor of Science in Computer Engineering and Computer Science

See the listing under Computer Engineering.

Minor in Computer Science

The computer science minor introduces the concepts, tools and techniques that are involved in the programming of computers. The minor prepares students to achieve mastery in several current programming languages. In addition, the student will learn about creating effective user interfaces and how to build applications that are available on the Internet.

REQUIRED COURSES		UNITS
<i>Lower division</i> (18 units)		
CSCI 103L	Introduction to Programming	3
CSCI 104L	Data Structures and Object-Oriented Design	4
CSCI 109	Introduction to Computing	3
CSCI 170	Discrete Methods in Computer Science	4
CSCI 201L	Principles of Software Development (3), or	
CSCI 270	Introduction to Algorithms and Theory of Computing (4)	3-4
ELECTIVES		UNITS
12 units selected from the following courses:		
CSCI 351	Programming and Multimedia on the World Wide Web	3
CSCI 445L	Introduction to Robotics	4
CSCI 360L	Introduction to Artificial Intelligence	3
CSCI 477ab	Design and Construction of Large Software Systems	2-2
CSCI 485	File and Database Management	3
CSCI 499	Special Topics	2-4
Total units		30

Minor in 2-D Art for Games

This interdisciplinary minor integrates three major disciplines (fine arts, computer science and interactive media) to develop the 2-D visual skills necessary to conceptualize and illustrate images for games. For more information, see USC Roski School of Art and Design.

Minor in 3-D Art for Games

The focus of the 3-D Art for Games minor is a trans-disciplinary approach that incorporates the creative, technological and team-based communication skills necessary to develop 3-D art skills for video games. For more information, see USC Roski School of Art and Design.

Viterbi School of Engineering

Computer Science

Graduate Degrees

The requirements listed below are special to this department and must be read in conjunction with the general

requirements of the USC Viterbi School of Engineering for master's degrees and the general requirements of the USC Graduate School for Ph.D. degrees. The graduate program in computer science provides intensive preparation in the basic concepts and techniques related to the design, programming and application of digital computers. Both the Master of Science and Doctor of Philosophy degrees are offered.

A Master of Science degree with specialization in software engineering is also offered. The program seeks to prepare students for an industrial leadership career in software engineering. It also serves as an introduction to this area for students who wish to pursue advanced studies and research leading to a Ph.D.

A Master of Science degree with specialization in intelligent robotics is also offered. This program seeks to prepare students for an industrial career in the development of computer systems for CAD/CAM (Computer-Aided Design and Manufacturing) and robotics. It also serves as an introduction to this area for students who wish to pursue advanced studies and research leading to a Ph.D. The emphasis is on the domain of mechanical, electromechanical and mechatronic products. (CAD for digital systems is covered by a separate program offered by the Electrical Engineering-Systems department.)

A Master of Science degree with a specialization in computer networks is offered. This specialization prepares students in the areas of computer communications, networks and distributed processing.

A Master of Science in Computer Science (Multimedia and Creative Technologies) is also offered.

A Master of Science in Computer Science (High Performance Computing and Simulations) is also offered.

A Master of Science in Computer Science (Data Science) is also offered.

A Master of Science in Computer Science (Game Development) is also offered.

A Master of Science in Computer Science (Computer Security) is also offered.

A Master of Science in Computer Science (Technical Professionals) is also offered for students with three to five years of work experience.

A Master of Science in Computer Science Dual Degree with Tsinghua University School of Information Science and Technology – China is also offered.

A Master of Science in Computer Science (Scientists and Engineers) is also offered for students with limited background in computer science.

Admission and Prerequisites

Admission is determined by the Office of Admission and the Viterbi School of Engineering, in consultation with the Computer Science Department. The applicant is required to have a bachelor's degree or its equivalent from an accredited college or university; satisfactory scores on the verbal and quantitative portions of the aptitude test of the Graduate Record Examinations (one advanced test from computer science, mathematics or engineering is recommended); and a substantial background in computing constitutes a minimum requirement. Foreign students must earn a satisfactory score on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS).

Master of Science in Computer Science

Requirements for Graduation without a Thesis

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in computer science. This average must also be earned on all graduate courses completed at USC (400-level and above). Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average. The required courses are as follows: CSCI 570 and one course from each of the following two categories: *I.* CSCI 551, CSCI 555, CSCI 571, CSCI 577a, CSCI 585, EE 557; *II.* CSCI 545, CSCI 561, CSCI 564, CSCI 574, CSCI 580, CSCI 582. A maximum of 4 units may be taken at the 400 level from approved courses in either electrical engineering or computer science; the remaining units must be approved courses at the 500 or 600 level. CSCI 590 and ENGR 596 may be counted for a maximum of 6 units. Total units required for the degree is 27. No

examination is required for the degree. Other requirements for the Master of Science in computer science are the same as set forth in the general requirements for Viterbi School of Engineering master's degrees.

A maximum of 4 units may be taken at the 400 level from approved courses in either electrical engineering or computer science; the specialization "Game Development" allows for up to 7 units at the 400 level. The remaining units must be approved courses at the 500 or 600 level.

Thesis Option

With the approval of a supervising professor, qualified students may be allowed to pursue a thesis option. Students pursuing the thesis option must satisfy all of the policies and course requirements for the master's degree with the following exceptions: A maximum of 4 units from approved courses may be taken at the 400 level in either electrical engineering or computer science; and CSCI 590 and ENGR 596 may be counted for a maximum of 2 units. In addition, these students must enroll in a minimum of two semesters of CSCI 594*abz* for a maximum of 4 units. Total units required for the degree is 27. The thesis must comply with all requirements set by the Graduate School. The thesis option is available to students pursuing degrees in the following programs: M.S. in computer science and M.S. in computer science with specializations in computer networks, software engineering, intelligent robotics, multimedia and creative technologies, computer security and high performance computing simulations.

Master of Science in Computer Science (Data Science)

The Master of Science in Computer Science (Data Science) provides students with a core background in computer science and specialized algorithmic, statistical and systems expertise in acquiring, storing, accessing, analyzing and visualizing large, heterogeneous and real-time data associated with diverse real-world domains including energy, the environment, health, media, medicine and transportation. Students must satisfy all the requirements for the Master of Science degree in Computer Science. The following additional requirements must be met to obtain an M.S. in Computer Science with a specialization in Data Science.

REQUIRED COURSES (3 COURSES)		UNITS
CSCI 561	Artificial Intelligence	3
CSCI 570	Analysis of Algorithms	3
CSCI 585	Database Systems	3

GROUP ELECTIVES (MUST TAKE 3 COURSES WITH A MINIMUM OF 1 COURSE FROM EACH GROUP):		UNITS
Group 1 (Data Systems):		
CSCI 548	Information Integration on the Web	3
CSCI 572	Information Retrieval and Web Search Engines	3
CSCI 586	Database Systems Interoperability	3
CSCI 587	Geospatial Information Management	3
CSCI 653	High Performance Computing and Simulations	3
CSCI 685	Advanced Topics in Database Systems	3

Group 2 (Data Analysis):		
CSCI 567	Machine Learning	3
CSCI 573	Probabilistic Reasoning	3
CSCI 686	Advanced Big Data Analytics	3
ISE 520	Optimization: Theory and Algorithms	3
MATH 467	Theory and Computational Methods for Optimization	4
MATH 574	Applied Matrix Analysis	3

ELECTIVES (A MINIMUM OF 3 COURSES)		UNITS
Any 500- or 600-level course in CSCI (including additional group electives)		

MATH 458	Numerical Methods	4
MATH 501	Numerical Analysis and Computation	3
MATH 502ab	Numerical Analysis	3-3
MATH 505a	Applied Probability	3
MATH 601	Optimization Theory and Techniques	3
MATH 650	Seminar in Statistical Consulting	3

Total units required for the degree is 27. No more than 4 units may be taken at the 400-level.

Master of Science in Computer Science (Game Development)

The goal of the M.S. in Computer Science (Game Development) program is to graduate students with a core in computer science, an engineering-oriented game development core and a concentration in one of the key research directions in game development infrastructure, cognition and games, immersion and serious games. Infrastructure is researching and developing the software and hardware infrastructure necessary for the development of the future of interactive games and large-scale simulations; massively multiplayer online games (MMOGs) and simulation networks; game engines and tools; instant games; wireless and mobile games and infrastructures; and next generation consoles. Cognition and games is developing theories for modeling and simulating computer characters and story; developing methods for modeling, simulating and displaying human emotion; analyzing large-scale game play; and developing theories for infusing pedagogy with game play. Immersion is researching and developing the technologies to engage the mind of the game player via sensory stimulation; reading the human emotional state and providing that as an input to the game; and emotionally adaptive game software architectures. Serious games and simulations is developing a theory for the deployment of games and simulations for purposes of education and training, health, public policy and strategic communication; game evaluation; serious game development; and human performance engineering. Students graduating from this program will be capable of engineering next generation games and simulations and their required technologies immediately upon graduation in the entertainment and serious game fields. Additionally, graduates from this program will be able to further their education in graduate programs in game development and computer science. The long-term goal with this M.S. degree is to establish research and development directions that create a science of games and an accompanying archival literature that improves game development for both serious and entertainment purposes.

CSCI (9 UNITS) UNITS

CSCI 570	Analysis of Algorithms	3
CSCI 580	3-D Computer Graphics and Rendering	3

One of the following:

CSCI 555	Advanced Operating Systems	3
CSCI 561	Foundations of Artificial Intelligence, or	
CSCI 573	Probabilistic Reasoning	3
CSCI 571	Web Technologies	3
CSCI 577a	Software Engineering	4
CSCI 585	Database Systems	3
EE 557	Computer Systems Architecture	3

GAME DEVELOPMENT CORE (11 UNITS) UNITS

CSCI 522	Game Engine Development	4
CTIN 488	Game Design Workshop	4
EE 452	Game Hardware Architectures	3

PROJECT CLASSES (7 UNITS) UNITS

CSCI 529ab	Advanced Game Projects	4-3
------------	------------------------	-----

Complete two courses from one of the following areas of concentration: Infrastructure; Cognition and Games; Immersion; Serious Games.

Infrastructure

CSCI 503	Parallel Programming	3
CSCI 520	Computer Animation and Simulation	3
CSCI 522	Game Engine Development	4
CSCI 523	Networked Games	3
CSCI 524	Networked Artificial Intelligence	3
CSCI 526	Advanced Mobile Devices and Game Consoles	3

Cognition and Games

CSCI 524	Networked Artificial Intelligence	3
CSCI 534	Affective Computing	3
CSCI 541	Artificial Intelligence Planning	3
CSCI 543	Software Multiagent Systems	3
CSCI 573	Probabilistic Reasoning	3

Immersion

CSCI 520	Computer Animation and Simulation	3
CSCI 523	Networked Games	3
CSCI 574	Computer Vision	3
CSCI 588	Specification and Design of User Interface Software	3
CTAN 502a	Experiments in Stereoscopic Imaging	2
CTIN 488	Intermediate Game Design Workshop	4
EE 619	Advanced Topics in Automatic Speech Recognition	3

Serious Games

CSCI 520	Computer Animation and Simulation	3
CSCI 537	Immersive Environments	3
CSCI 538	Human Performance Engineering	3

Other courses may be eligible subject to adviser approval.

Total units: 33

Master of Science in Computer Science (Computer Networks)

Under the networks option students must satisfy the requirements for the Master of Science in Computer Science and the following courses must be included in the program: EE 450, CSCI 551, CSCI 555 and three of the following: CSCI 558; CSCI 599 or CSCI 694a or CSCI 694b; EE 549, EE 550 and EE 555. Total units required for the degree is 27. Students who can demonstrate that they have already taken these courses (or equivalent) may be waived out of the requirement by a memo from their faculty adviser. All courses must be approved by a faculty adviser. A list of suggested electives is available from the department office.

Master of Science in Computer Science (Computer Security)

Completion of this program satisfies all the requirements for the Master of Science in computer science.

CSCI 530	Security Systems	4
CSCI 531	Applied Cryptography	3
CSCI 551	Computer Communications	3
CSCI 555	Advanced Operating Systems	3
CSCI 570	Analysis of Algorithms	3
CSCI 577a	Software Engineering, or	4
CSCI 578	Software Architectures	3

At least one of the following courses:

CSCI 545	Robotics	3
CSCI 561*	Foundations of Artificial Intelligence	3
CSCI 564	Brain Theory and Artificial Intelligence	3
CSCI 573*	Probabilistic Reasoning	3
CSCI 574	Computer Vision	3
CSCI 580	3-D Graphics and Rendering	3
CSCI 582	Geometric Modeling	3

At least two of the following courses:

CSCI 556	Introduction to Cryptography	3
CSCI 558L	Internetworking and Distributed Systems Laboratory	3
CSCI 571	Web Technologies	3
CSCI 585	Database Systems	3
CSCI 599**	Special Topics	2-4, max 9
CSCI 694a	Topics in Computer Networks and Distributed Systems	3
Total units:		28

*CSCI 561 or CSCI 573 is recommended for this specialization. CSCI 573 may be used in place of CSCI 561 to satisfy the requirements for the general M.S. degree.

**Topics must be pre-approved by an adviser. Course must be a minimum of 3 units.

Master of Science in Computer Science (High Performance Computing and Simulations)

Students in the MSCS-HPCS program must satisfy the current core requirements for the Master of Science in computer science and the following elective courses must be included in the program:

REQUIRED CORE COURSE	UNITS	
CSCI 596*	Scientific Computing and Visualization	3

TECHNICAL ELECTIVE COURSES	UNITS
Three of the following courses — students must take courses from both the computer science track and the computational science/engineering application track.	

Computer Science Track

CSCI 503	Parallel Programming	3
CSCI 520	Computer Animation and Simulation	3
CSCI 551*	Computer Communications	3
CSCI 558L	Internetworking and Distributed Systems Laboratory	3
CSCI 580	3-D Graphics and Rendering	3
CSCI 583*	Computational Geometry	3

CSCI 595	Advanced Compiler Design	4
CSCI 653*	High Performance Computing and Simulations	3
EE 653	Advanced Topics in Microarchitecture	3
EE 657*	Parallel and Distributed Computing	3
EE 659*	Interconnection Networks	3
MATH 501	Numerical Analysis and Computing	3

Computational Science/Engineering Application Track

AME 535a*	Introduction to Computational Fluid Dynamics, or	
AME 535b*	Introduction to Computational Fluid Dynamics	3
CE 529a*	Finite Element Analysis	3
CHE 502	Numerical Methods for Diffusive and Convective Transport	3
EE 553*	Computational Solution of Optimization Problems	3
MASC 575*	Basics of Atomistic Simulations of Materials	3
MATH 578a	Computational Molecular Biology	3
PHYS 516	Methods of Computational Physics	3
PTE 582*	Fluid Flow and Transport Processes in Porous Media	3
Adviser approved remainder of elective units		6

*Courses offered through the Distance Education Network (DEN).

Master of Science in Computer Science (Multimedia and Creative Technologies)

Students may earn a specialization in multimedia and creative technologies by completing the general requirements for the Master of Science in computer science and the following additional courses:

Every student must complete CSCI 576 Multimedia Systems Design (3). Students must also complete at least two courses selected from one of the two specialization tracks: Graphics and Vision or Networks and Databases.

GRAPHICS AND VISION TRACK		UNITS
CSCI 520	Computer Animation and Simulation	3
CSCI 574	Computer Vision	3
CSCI 580	3-D Graphics and Rendering	3
CSCI 582	Geometric Modeling	3
CSCI 674	Advanced Topics in Computer Vision	3
EE 569	Introduction to Digital Image Processing	3

NETWORKS AND DATABASES TRACK		UNITS
CSCI 551	Computer Communications	3
CSCI 558L	Internetworking and Distributed Systems Laboratory	3
CSCI 585*	Database Systems	3
CSCI 586	Database Systems Interoperability	3
CSCI 694ab	Topics in Computer Networks and Distributed Systems	3-3
EE 450	Introduction to Computer Networks	3

Suggested Core and Elective Courses

Since this specialization is systems oriented, it is recommended (but not required) that students select CSCI 555 Advanced Operating Systems and EE 557 Computer Systems Architecture as two of their three core courses. Additional electives may be taken from the two tracks or from the partial list of suggestions below.

CSCI 561*	Foundations of Artificial Intelligence	3
CSCI 573	Probabilistic Reasoning	3
CSCI 577ab*	Software Engineering	4-4
CSCI 583	Computational Geometry	3
CSCI 588	Specification and Design of User Interface Software	3
CSCI 590	Directed Research	1-12
EE 554	Real Time Computer Systems	3

*Also satisfies a core course requirement in the general requirements for the M.S. degree in Computer Science.

Master of Science in Computer Science (Software Engineering)

Students must satisfy all requirements for the Master of Science degree in Computer Science. In addition, they must take the following courses, CSCI 510, CSCI 577ab and CSCI 578, plus three of the following six courses: CSCI 503, CSCI 511, CSCI 555, CSCI 585, CSCI 588 and EE 557 (EE 557, CSCI 555, CSCI 577a, and CSCI 585 may be used to satisfy both the general master's degree requirements and the specialization requirements.) Students may also include research for an optional master's thesis in their programs.

Master of Science in Computer Science (Intelligent Robotics)

Students must take CSCI 545 and three of the following courses: CSCI 445L, CSCI 547 and CSCI 584. Other requirements are the same as for the Master of Science degree in computer science, described above. (CSCI 561 and CSCI 545 may be used to help satisfy both the general master's requirements and the specialization requirements.) Students may include in their programs research for an optional master's thesis conducted in collaboration with industry.

Master of Science in Computer Science (Scientists and Engineers)

Designed for students with engineering or science bachelor's degree but limited background in computer science, this comprehensive, two-year, 37-unit program combines an introductory sequence of undergraduate preparatory and foundational course work with all the graduate breadth requirements necessary to satisfy the traditional master's degree. Applicants to this program must meet the admissions standards of the Viterbi School of Engineering.

PREPARATORY PROGRAMMING REQUIREMENT		UNITS
CSCI 455x*	Introduction to Programming Systems Design	4
FOUNDATIONAL REQUIREMENTS		UNITS
CSCI 402	Operating Systems	4
EE 457	Computer Systems Organization, or	
EE 450	Introduction to Computer Networks	3
BREADTH REQUIREMENTS		UNITS
CSCI 561	Foundations of Artificial Intelligence	3
CSCI 570	Analysis of Algorithms	3
CSCI 577ab	Software Engineering	4-4
CSCI 585	Database Systems	3
ELECTIVES		UNITS
Select three courses, 9 units, from approved 500-level course work from Computer Science or Electrical Engineering**		9
Total Program units:		37
Total Degree units:		33

**Note: CSCI 455 is a preparatory requirement for this program, but the units for this course do not count toward the 33 units required for the degree.*

***See departmental adviser for a list of approved electives.*

Master of Science in Computer Science (Technical Professionals)

The M.S. program offers a cohort-based degree designed for computer science technical professionals with three to five years of work experience. Students may begin the program at any point in the year — fall, spring, or summer. It is possible to complete the degree in one calendar year. The GRE general exam is recommended but not required. An interview is required of all finalists.

REQUIRED COURSES*		UNITS
CSCI 402**	Introduction to Operating Systems	4
CSCI 561	Foundations of Artificial Intelligence, or	
CSCI 580***	3-D Graphics and Rendering	3
CSCI 570	Analysis of Algorithms	3
CSCI 571	Web Technologies	3
CSCI 576	Multimedia Systems Design	3
CSCI 577ab	Software Engineering	4-4
CSCI 585	Database Systems	3
Total units:		27

**Students enrolled in the program are not limited to the courses listed here. These are simply the courses that we routinely offer in evening sessions. Schedule permitting, students are free to take advantage of our full array of courses, including those offered during the day. However, any course selection beyond this list should be done in consultation with an academic adviser.*

***Students who can demonstrate programming proficiency may replace CSCI 402 with another 500-level elective.*

****If a student wishes to take both CSCI 561 and CSCI 580, the second course may be taken in place of CSCI 571, CSCI 576 or CSCI 585.*

Master of Science in Computer Science Dual Degree with Tsinghua University School of Information Science and Technology – China

The Master of Science in Computer Science Dual Degree with Tsinghua University School of Information Science and Technology – China (THU) leads to two Master of Science degrees in Computer Science, one from each institution. The dual degrees are subject to the following stipulations:

1. All required courses for each degree are required for the dual degree.
2. The program description for the Tsinghua University Master of Science in Computer Science and Technology is online at <http://www.tsinghua.edu.cn/publish/csen/4906/index.html>.
3. The general requirements for the M.S. in Computer Science at USC in this dual degree program are the same as those for the USC general M.S. in Computer Science without a thesis, except that at least 18 units (of the minimum total of 27) must be completed at USC, and 9 units of pre-approved course work transferred from THU may be counted toward the degree requirements at USC. This is due to:
 - a special partnership in this area established by a Memorandum of Understanding at the University level to amplify cooperation between USC and THU and between the United States and China in an intellectual and economic arena of great importance to both, where many shared interests exist;
 - the similarity of the USC and THU curricula, which allows expanded course substitution due to interchangeable content;
 - the desirability of providing students with a wider array of relevant courses than they can get at either institution;
 - the opportunity to provide students a unique transcultural experience that will position them to be global leaders in their field.
4. The two M.S. degrees must be earned at the same time, generally at the end of two and one-half to three

years of study. The THU degree requirements must be completed for students to receive the USC M.S. in Computer Science as part of the dual degree program.

5. Students who elect to receive only the USC degree must change their degree objective from the USC-Tsinghua University dual degree to a different M.S. degree objective in Computer Science. In this case they will be allowed to transfer only the standard 4 adviser-approved units from Tsinghua University toward the USC degree.
6. The following required courses must generally be taken at USC: CSCI 570 and one course from each of the following two categories: *I.* CSCI 551, CSCI 555, CSCI 571, CSCI 577a, CSCI 585, EE 557; *II.* CSCI 545, CSCI 561, CSCI 564, CSCI 574, CSCI 580, CSCI 582. There must be justification for the omission of a required course in either degree, for example a certain course in one degree may provide comparable content to the omitted course in the other degree.
7. The USC Computer Science Department has identified a list of transferrable THU courses that can be considered USC equivalents but is also willing to entertain transfer, on a case by case basis, of unique THU CSCI courses for which no obvious mapping to a USC CSCI course exists.
8. Courses taken at Tsinghua University by students sent from USC will be taught in English.
9. Other requirements for the Master of Science in Computer Science are the same as set forth in the general requirements for Viterbi School of Engineering Master of Science degrees.

Graduate Certificate in Software Architecture

This certificate program will provide engineers with the skills required to face the increasingly complex future in architecting systems, systems of systems and software-intensive systems. Students will be exposed to the concepts, principles and state-of-the-art methods in software architectures. This program introduces principles and approaches for modeling systems using SysML; applies software engineering process models and management approaches to the design and architecture of large software systems; and guides the architect through every phase of the conception, implementation, deployment and finally retirement of software systems. It is expected that participants in the certificate program will have completed an undergraduate degree in computer science or a related field and will have several years of practical experience in software engineering and/or systems engineering. If students are later admitted to the Master of Science in Computer Science, the courses taken for the certificate may be applied to that program.

REQUIRED COURSES		UNITS
CSCI 568	Requirements Engineering	3
CSCI 578	Software Architectures	3
SAE 547	Model-Based Systems Architecting and Engineering	3
SAE 549	Systems Architecting	3
ELECTIVES (CHOOSE ONE)		UNITS
CSCI 510	Software Management and Economics	3
CSCI 530*	Security Systems	4
CSCI 555*	Advanced Operating Systems	3
CSCI 577a	Software Engineering	4
CSCI 577b	Software Engineering	4
CSCI 589**	Software Engineering for Embedded Systems	3
EE 557***	Computer Systems Architecture	3
SAE 541	Systems Engineering Theory and Practice	3
Total units:		15

*Prerequisite: CSCI 402

**Prerequisite: CSCI 577a

***Prerequisite: EE 457

Doctor of Philosophy in Computer Science

The Doctor of Philosophy degree in computer science is awarded in strict conformity with the general requirements of the USC Graduate School. Admission to the Ph.D. program in computer science is highly selective, based upon a superior academic record, prior training in computer science, letters of recommendation, a statement of purpose and Graduate Record Examinations scores. Applicants are expected to have completed the equivalent course work necessary to satisfy the general breadth requirements outlined in the Master's Admissions and Prerequisites section. Particular attention is given to the applicant's potential to perform original research in an area of computer science. Since research potential is a key factor in the evaluation, new students are strongly urged to begin research with a computer science faculty member as soon as possible. See general requirements for graduate degrees.

Screening Procedure

When a student has completed 21 units or more of graduate level studies or no later than his or her fourth semester in computer science at USC, he or she must apply for screening. The screening evaluation takes place during the regular review of Ph.D. students; based upon the student's performance in course work, overall record, and research potential, the screening evaluation determines whether or not the student will be allowed to continue toward the Ph.D. A screening determination of "pass," "no pass" or "postpone" is made; in the latter case, the student must reapply for screening the subsequent semester(s) until a "pass" or "no pass" determination is made.

Qualifying Exam Committee

After passing the screening procedure, the student must select a dissertation adviser and form a qualifying exam committee consisting of the dissertation adviser and at least four other faculty members. The committee must include a faculty member from another department who does not hold a joint appointment in computer science. All qualifying exam committees must be approved by the department chair and the Graduate School.

Course Requirements

Each Ph.D. student is expected to demonstrate breadth of knowledge as well as depth in a chosen area of concentration. Hence, the required courses fall into two groups: (1) a common core, required of all doctoral students, and (2) additional required courses which depend on the student's area of concentration. The common core consists of five courses selected from the following five groups. Students must complete one class from each group: *Group 1:* EE 557 Computer Systems Architecture, CSCI 551 Computer Communications, CSCI 555 Advanced Operating Systems; *Group 2:* CSCI 577a Software Engineering, CSCI 571 Web Technologies, CSCI 585 Database Systems; *Group 3:* CSCI 545 Robotics, CSCI 561 Foundation of Artificial Intelligence, CSCI 564 Brain Theory and Artificial Intelligence; *Group 4:* CSCI 574 Computer Vision, CSCI 580 Graphics and Rendering, CSCI 582 Geometric Modeling; *Group 5:* CSCI 670 Advanced Analysis of Algorithms, CSCI 581 Logic and its Applications, MATH 501 Numerical Analysis and Computation. A minimum GPA of 3.5 must be obtained in these five core courses.

In addition, all Ph.D. students must register for two semesters of CSCI 597 Seminar in Computer Science Research for a maximum of 2 units during their first year. Ph.D. programs in computer science are grouped into the following specializations: Network and Systems (Interaction); Databases (Interaction); Software Engineering (Interaction); Robotics (Autonomy); Intelligent Agents and Organizations (Autonomy); Natural Language Processing (Autonomy); Graphics and Multimedia (Immersion); Vision (Immersion); Theory of Computation: Genomic, Molecular and Quantum Computation (Computation); Brain Theory and Neural Networks (Computation); High Performance Computing and Parallel Computation (Computation).

Each student must select a specialization as his or her area of concentration. Each specialization requires a minimum of three additional courses. Specific specialization requirements (which may change as the fields change) will be provided to the students by the department.

Required courses may be taken in any chronological order, with due attention to prerequisites, and may precede or follow the Screening Evaluation.

A total of 60 units, at least 40 at the 500 level or above, beyond the bachelor's degree is required (including the above required courses). A minimum grade point average of 3.5 must be maintained. Students with a Master of Science degree may transfer up to 27 units.

Qualifying Examination

All doctoral students must pass a qualifying examination in computer science within four years before being admitted to candidacy. The qualifying examination tests the student's broad knowledge of computer science and deep insight into a chosen area of research.

Permission to take the qualifying examination must be obtained from the dean of graduate studies at least 60 days prior to its occurrence, and must be taken in the semester for which permission is granted. The qualifying exam committee administers the qualifying examination and evaluates the student's performance. If the examination is failed, the qualifying exam committee may recommend that the student repeat the examination 6–12 months later. The examination cannot be taken more than twice.

Dissertation

An acceptable dissertation based upon original research is required. The dissertation must show mastery of some special field, must be an original contribution to that field and must be presented in scholarly form.

Defense of the Dissertation

When all other requirements are satisfied, the candidate must pass a public final oral examination in defense of the dissertation.

Viterbi School of Engineering

Computer Science

Courses of Instruction

COMPUTER SCIENCE (CSCI)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

CSCI 101L Fundamentals of Computer Programming (3, FaSp) Introduction to the design of solutions to computer solvable problems. Algorithm design, solution implementation using a high-level programming language, program correctness and verification.

CSCI 103L Introduction to Programming (3, FaSp) Basic datatypes, assignments, control statements (if, switch, for, while), input/output (printf, scanf, cin, cout), functions, arrays, structures, recursion, dynamic memory, file handling. Programming in C/C++. *Corequisite*: CSCI 109 or EE 109.

CSCI 104L Data Structures and Object Oriented Design (4, FaSp) Introduces the student to standard data structures (linear structures such as linked lists, (balanced) trees, priority queues, and hashtables), using the C++ programming language. *Prerequisite*: CSCI 103L; *corequisite*: CSCI 170.

CSCI 109 Introduction to Computing (3, FaSp) Computing as a discipline, a body of knowledge, and a domain of science/engineering concerned with information and its transformation.

CSCI 110 Introduction to Digital Logic (3) (Enroll in EE 101)

CSCI 170 Discrete Methods in Computer Science (4, FaSp) Sets, functions, series. Big-O notation and algorithm analysis. Propositional and first-order logic. Counting and discrete probability. Graphs and basic graph algorithms. Basic number theory. (Duplicates credit in CSCI 271.) *Prerequisite*: CSCI 103L and CSCI 109.

CSCI 180 Survey of Digital Games and Their Technologies (3, Fa) Historical, technical, and critical approach to the evolution of computer and video game architectures and game design, from its beginnings to the present day.

CSCI 201L Principles of Software Development (4, FaSp) Object-oriented paradigm for programming-in-the-large in Java; writing sophisticated concurrent applications with animation and graphic user interfaces; using professional tools on team project. *Prerequisite:* CSCI 104L.

CSCI 270 Introduction to Algorithms and Theory of Computing (4, FaSp) Algorithm analysis. Greedy algorithms, divide and conquer, dynamic programming, graph algorithms. NP-completeness and basic recursion theory and undecidability. Sorting lower bounds. Number-theory based cryptography. (Duplicates credit in CSCI 303.) *Prerequisite:* CSCI 104L and CSCI 170.

CSCI 280 Video Game Production (4, FaSpSm) (Enroll in ITP 280)

CSCI 281 Pipelines for Games and Interactives (3, FaSp) Explores the aesthetic development/technical implementation necessary to achieve unique, compelling, intuitive visual design in games. Students will develop group visual game design portfolios.

CSCI 300 Introduction to Intelligent Agents Using Science Fiction (3, Fa) Fundamental concepts of intelligent agents and multiagent interactions using science fiction short stories and movie clips; topics include decision theory, game theory, auctions, swarms, teamwork, emotions. *Prerequisite:* CSCI 101L or CSCI 103.

CSCI 310 Software Engineering (4, Sp) Introduction to the software engineering process and software lifecycle. Covers project management, requirements, architecture, design, implementation, testing, and maintenance phase activities in team based projects. *Prerequisite:* CSCI 201L. (Duplicates credit in CSCI 377.)

CSCI 350 Introduction to Operating Systems (4) Basic issues in concurrency, deadlock control, synchronization scheduling, memory management, protection and access control, inter-process communication, and structured design. Laboratory experiences with Unix-like operating system. *Prerequisite:* CSCI 201L and EE 109 or EE 352. (Duplicates credit in CSCI 402.)

CSCI 351 Programming and Multimedia on the World Wide Web (3, FaSpSm) HTML programming for creating home pages, installation and modification of Web server, writing programs that offer enhanced services, manipulation of graphics, video and sound. *Prerequisite:* CSCI 104.

CSCI 352L Computer Organization and Architecture (3, Sp) (Enroll in EE 352L)

CSCI 353 Introduction to Internetworking (4) Global Internet: design principles, layering, protocol design/analysis. Networked applications, Internet structure/architecture, Protocols for transport/congestion control, network layer/routing, link layer/MAC. Network security. *Prerequisite:* CSCI 201; *recommended preparation:* Familiarity with C and C++. (Duplicates credit in EE 450.)

CSCI 357 Basic Organization of Computer Systems (3) (Enroll in EE 357)

CSCI 360L Introduction to Artificial Intelligence (4) Concepts and algorithms underlying the understanding and construction of intelligent systems. Agents, problem solving, search, representation, reasoning, planning, machine learning. *Prerequisite:* CSCI 104L and CSCI 170. (Duplicates credit in CSCI 460.)

CSCI 377 Introduction to Software Engineering (3) Introduction of principles, methods, techniques, and tools for multi-person construction of multi-version software systems. *Prerequisite:* CSCI 104.

CSCI 380 Video Game Programming (4, FaSpSm) (Enroll in ITP 380)

CSCI 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

CSCI 402 Operating Systems (4, FaSpSm) Concurrency, deadlock control, synchronization, process and thread scheduling, memory management, file systems, security and access control, communication and networking, distributed file systems, data management. *Prerequisite:* CSCI 201L or CSCI 455x; EE 352L or EE 357.

CSCI 410x Translation of Programming Languages (3) Concepts of assemblers, compilers, interpreters

and their design; macro assemblers, Polish notation and translation techniques; operator precedence parsing, push down automata, code generation. Not available for graduate credit to computer science majors.

Prerequisite: CSCI 201; *corequisite:* EE 357.

CSCI 420 Computer Graphics (4, FaSp) Computer graphics, OpenGL, 2D and 3D transformations, Bézier splines, computer animation, rendering including ray tracing, shading and lighting, artistic rendering, virtual reality, visualization. *Prerequisite:* CSCI 104L and MATH 225.

CSCI 423 Native Console Multiplayer Game Development (4) Implementation of AAA style multiplayer game running on consoles and DX11. Console development in native C++, console SDKs, engine components, gameplay, networking, data prediction/replication. *Prerequisite:* CSCI 522 or ITP 380; *recommended preparation:* ITP 485.

CSCI 424 Game Engine Tool Development (4) Tool development for a C++ console game. Animation export, compression. FBX parsing. Level editing, object live update tools. Debugging tools. Texture compression. Data Pipeline. *Prerequisite:* ITP 380; *recommended preparation:* ITP 485.

CSCI 425 Immersive Game Development (4) Implementation of a console multiplayer game leveraging input devices such as Kinect, PSMove, Console + Ipad/PSVita, Cloud Computing, to achieve creative design. *Prerequisite:* CSCI 423.

CSCI 430 Introduction to Computer and Network Security (4, Sp) A broad overview of security threats and defenses, security systems and functionalities, as well as current security practices. Includes homeworks and in-class exercises to provide practical experience working with such systems. *Prerequisite:* CSCI 201.

CSCI 445L Introduction to Robotics (4, FaSpSm) Designing, building and programming mobile robots; sensors, effectors, basic control theory, control architectures, some advanced topics, illustrations of state-of-the-art. Teamwork; final project tested in a robot contest. Junior standing or higher. *Prerequisite:* CSCI 103.

CSCI 450 Introduction to Computer Networks (3) (Enroll in EE 450)

CSCI 452 Parallel and Distributed Computation (3) (Enroll in EE 451)

CSCI 454L Introduction to System-on-Chip (4, Fa) (Enroll in EE 454L)

CSCI 455x Introduction to Programming Systems Design (4, FaSp) Intensive introduction to programming principles, discrete mathematics for computing, software design and software engineering concepts. Not available for credit to computer science majors, graduate or undergraduate. *Prerequisite:* departmental approval.

CSCI 457 Computer Systems Organization (3) (Enroll in EE 457)

CSCI 458 Numerical Methods (4) (Enroll in MATH 458)

CSCI 459 Computer Systems and Applications Modeling Fundamentals (3, Sp) Techniques and tools needed to construct/evaluate models of computer systems and applications. Analytical and simulation methods, capacity planning, performance/reliability evaluation, and decision-making. *Prerequisite:* MATH 225, CSCI 201.

CSCI 460 Introduction to Artificial Intelligence (3, FaSp) Concepts and algorithms underlying the understanding and construction of intelligent systems. Agents, problem solving, search, representation, reasoning, planning, communication, perception, robotics, neural networks. *Prerequisite:* CSCI 104.

CSCI 464 Foundations of Exotic Computation (3, Sp) Introduction to new approaches to computation: quantum — inspired by quantum mechanics; neural — inspired by the study of the brain; and molecular — inspired by the genome. *Prerequisite:* MATH 225 or MATH 245 or EE 241.

CSCI 465 Probabilistic Methods in Computer Systems Modeling (3) (Enroll in EE 465)

CSCI 476 Cryptography: Secure Communication and Computation (4) Introduction to modern

Cryptography; mathematical/algorithmic studies of methods for protecting information in computer and communication systems: Public-Key Cryptosystems, zero-knowledge proofs, data privacy. *Prerequisite:* CSCI 270.

CSCI 477ab Design and Construction of Large Software Systems (2-2, FaSpSm) Programming methodologies; intra-group and inter-group communication; software life-cycle; software economics. A large software project is a central aspect of the course. *Prerequisite:* CSCI 201. Open only to seniors.

CSCI 485 File and Database Management (3, FaSp) File input/output techniques, basic methods for file organization, file managers, principles of databases, conceptual data models, and query languages. *Prerequisite:* CSCI 201.

CSCI 487 Programming Game Engines (4, FaSp) (Enroll in ITP 485)

CSCI 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

CSCI 491abL Final Game Project (4-2, FaSpSm) *a:* Design, iterative prototyping, and development of a 1st playable level. Open only to seniors. *b:* Design, iterative stage 2 prototyping and development of a refined game.

CSCI 495 Senior Project (3) (Enroll in PHYS 495)

CSCI 499 Special Topics (2-4, max 8) Selected topics in computer science.

CSCI 501 Numerical Analysis and Computation (3) (Enroll in MATH 501)

CSCI 502ab Numerical Analysis (3-3) (Enroll in MATH 502ab)

CSCI 503 Parallel Programming (3) Exploration of parallel programming paradigms, parallel computing architectures, hands-on parallel programming assignments, contemporary and historical examples and their impact, context with parallel algorithms. *Recommended preparation:* CSCI 104 or CSCI 455; EE 452 or EE 457.

CSCI 504ab Numerical Solutions of Ordinary and Partial Differential Equations (3) (Enroll in MATH 504ab)

CSCI 505ab Applied Probability (3-3) (Enroll in MATH 505ab)

CSCI 510 Software Management and Economics (3, Fa) Theories of management and their application to software projects. Economic analysis of software products and processes. Software cost and schedule estimation, planning and control. *Prerequisite:* graduate standing.

CSCI 511 Personal Software Process (PSP) and Project (3, Sp) Individual analysis, planning, development and maintenance of a software product or development artifact, using the principles and practices of PSP. Analysis of project's lessons learned.

CSCI 512 Testing and Analysis of Software Systems (4) Introduces students to the topic of automated testing and analysis of large-scale modern software systems. *Recommended preparation:* CSCI 571; Java programming skills; Linux system administration.

CSCI 520 Computer Animation and Simulation (3) Fundamental techniques of computer animation and simulation, knowledge and/or experience in the design, scripting, production and post-production stages of computer animation. *Recommended preparation:* CSCI 420 or equivalent.

CSCI 521 Optimization: Theory and Algorithms (3, Fa) (Enroll in ISE 520)

CSCI 522 Game Engine Development (4, Fa) The principles of developing game engines targeted at modern PC and game console hardware.

CSCI 523 Networked Games (3, FaSpSm) Design and implementation of networked games, from the

origins of the supporting technologies in distributed systems, visual simulations, networked virtual environments, and shipped games. *Recommended preparation:* CSCI 420 or CSCI 580 or an equivalent course in graphics.

CSCI 524 Networked Artificial Intelligence (3, FaSpSm) Networked game communication architectures, protocol development, architecting networked game AI clients/services. Character following, knowledge representation and reasoning, dynamic play strategies, search, learning, and planning. *Recommended preparation:* CSCI 420 or CSCI 580 or an equivalent course in graphics.

CSCI 525 Advanced Game System Development (2, Sp) Topics include: game engine/tool development, AI/autonomous character integration, game networking, performance measurement/enhancement, character animation systems, mobile devices, game consoles, next generation gameplay. *Prerequisite:* CSCI 522 or CSCI 523 or CSCI 524 or CSCI 526 or CSCI 529b; *recommended preparation:* significant participation in a prior game development effort.

CSCI 526 Advanced Mobile Devices and Game Consoles (3, FaSpSm) Explore the complex engineering process required to design and build a real-time graphics engine to support physical realism on mobile devices. *Recommended preparation:* CSCI 420 or CSCI 580 or an equivalent course in graphics.

CSCI 529ab Advanced Game Projects (4-3, FaSp) *a:* Team projects intended to address the multifaceted technical and creative challenges that are inherent to comprehensive game development. *Recommended preparation:* CSCI 522 or CTIN 488. *b:* This course provides students in various areas of game specialization the practice of design, iterative stage 2 prototyping and development of a refined game.

CSCI 530 Security Systems (4, FaSp) Protecting computer networks and systems using cryptography, authentication, authorization, intrusion detection and response. Includes lab to provide practical experience working with such systems. *Prerequisite:* CSCI 402.

CSCI 531 Applied Cryptography (3, Fa) Intensive overview of cryptography for practitioners, historical perspective on early systems, number theoretic foundations of modern day cryptosystems and basic cryptanalysis.

CSCI 533 Combinatorial Analysis and Algebra (3) (Enroll in MATH 533)

CSCI 534 Affective Computing (3, Sp) Overview of the theory of human emotion, techniques for recognizing and synthesizing emotional behavior, and design application. *Recommended preparation:* CSCI 561.

CSCI 536 Linear Programming and Extensions (3, Fa) (Enroll in ISE 536)

CSCI 540 Self-Organization (3) Massively distributed systems whose global behavior emerges from local interactions of components. Global to local compilation; robot swarms; formation of shapes/spatial patterns; self-assembly; programmable matter. *Recommended preparation:* Graduate standing in science or engineering.

CSCI 542 Neural Computation with Artificial Neural Networks (3, Sp) Computation and adaptation in networks of interconnected distributed processing units; classical and statistical approaches to neural nets; state-of-the-art neural network research. *Recommended preparation:* basic statistics, linear algebra.

CSCI 543 Software Multiagent Systems (3, Sp) Investigate computational systems in which several software agents or software agents and humans interact.

CSCI 544 Applied Natural Language Processing (3, Sp) Introduction to key components of human language technologies, including: information extraction, sentiment analysis, question answering, machine translation. *Recommended preparation:* proficiency in programming, algorithms and data structures, basic knowledge of linear algebra.

CSCI 545 Robotics (3, Sp) Fundamental skills for modeling and controlling of dynamic systems for robotic applications and graphics animations; control theory; kinematics; dynamics; sensor processing; real-time operating systems; robot labs. *Prerequisite:* C-programming, basic linear algebra, calculus.

CSCI 546 Intelligent Embedded Systems (3, Sp) Survey of techniques for the design of large-scale, distributed, networked, embedded systems. Examples include sensor/actuator networks, wearable computing, distributed robotics and smart spaces.

CSCI 547 Sensing and Planning in Robotics (3, Fa) Introduction to software methods in robotics including sensing, sensor fusion, estimation, fault tolerance, sensor planning, robot control architectures, planning and learning.

CSCI 548 Information Integration on the Web (3, Sp) Foundations and techniques in information integration as it applies to the Web, including view integration, wrapper learning, record linkage, and streaming dataflow execution. *Prerequisite:* CSCI 561, CSCI 585; *recommended preparation:* CSCI 571, CSCI 573.

CSCI 549 Nanorobotics (3, Sp) Introduction to nanotechnology. Nanorobotic systems: sensing; actuation and propulsion; control; communication; power; programming and coordination of robot swarms. Nanomanipulation and nanoassembly with atomic force microscopes. Graduate standing in science or engineering.

CSCI 550 Advanced Data Stores (3) Selected topics on highly available, elastic data stores. Topics include non-relational data models, simple interfaces and query languages, weak consistency and benchmarking techniques. *Prerequisite:* CSCI 485 or CSCI 585.

CSCI 551 Computer Communications (3, FaSp) Protocol design for computer communication networks, network routing, transport protocols, internetworking. *Prerequisite:* CSCI 402, EE 450 and C-language programming.

CSCI 552 Asynchronous VLSI Design (3) (Enroll in EE 552)

CSCI 553 Computational Solution of Optimization Problems (3) (Enroll in EE 553)

CSCI 554 Real Time Computer Systems (3) (Enroll in EE 554)

CSCI 555 Advanced Operating Systems (3, FaSp) Advanced issues in computer organization, naming, kernel design, protection mechanisms and security policies, reliable computing, data base OS, secure networks, systems specification, decentralized systems, real time systems. *Prerequisite:* CSCI 402.

CSCI 556 Introduction to Cryptography (3, Sp) Modern secret codes. Public key cryptosystems of Rivest-Shamir-Adelman, Diffie-Hellman and others. The underlying number theory and computational complexity theory. *Prerequisite:* CSCI 570 or CSCI 581.

CSCI 557 Computer Systems Architecture (3) (Enroll in EE 557)

CSCI 558L Internetworking and Distributed Systems Laboratory (3, FaSp) Students complete laboratory exercises in operating system and network management, distributed systems, TCP/IP, SNMP, NFS, DNS, etc. Term project required. *Prerequisite:* CSCI 402 and EE/CSCI 450; *recommended preparation:* CSCI 551 and CSCI 555.

CSCI 559 Mathematical Pattern Recognition (3) (Enroll in EE 559)

CSCI 560L Advanced Microcomputer-Based Design (3) (Enroll in EE 560L)

CSCI 561 Foundations of Artificial Intelligence (3, FaSp) Foundations of symbolic intelligent systems, search, logic, knowledge representation, planning, learning. *Recommended preparation:* good programming and algorithm analysis skills.

CSCI 564 Brain Theory and Artificial Intelligence (3, Fa) Introduces neural modeling, distributed artificial intelligence and robotics approaches to vision, motor control and memory. *Prerequisite:* graduate standing.

CSCI 565 Compiler Design (4, Sp) Formal grammar; parsing methods and lexical analysis; code generation;

local and global code optimization; and dynamic allocation. *Prerequisite:* CSCI 455x.

CSCI 567 Machine Learning (3, Fa) Statistical methods for building intelligent and adaptive systems that improve performance from experiences; focus on theoretical understanding of these methods and their computational implications. *Recommended preparation:* Undergraduate level training or course work in linear algebra, multivariate calculus, basic probability and statistics; an undergraduate level course in Artificial Intelligence may be helpful but is not required.

CSCI 568 Requirements Engineering (3, Fa) Techniques for successful requirements analysis and requirements engineering (RE) of software-intensive systems. Systematic process of developing requirements through cooperative problem analysis, representation, and validation.

CSCI 570 Analysis of Algorithms (3, FaSpSm) Explores fundamental techniques such as recursion, Fourier transform ordering, dynamic programming for efficient algorithm construction. Examples include arithmetic, algebraic, graph, pattern matching, sorting, searching algorithms.

CSCI 571 Web Technologies (3, FaSpSm) Advanced study of programming languages with application to the Web. Languages for client-side and server-side processing. Examples taken from: HTML, Java, JavaScript, Perl, XML and others. *Recommended preparation:* knowledge of at least two programming languages.

CSCI 572 Information Retrieval and Web Search Engines (3, Sp) Examines key aspects of information retrieval as they apply to search engines; web crawling, indexing, querying and quality of results are studied. *Prerequisite:* CSCI 351, CSCI 485.

CSCI 573 Probabilistic Reasoning (3, Fa) Reasoning under uncertainty, statistical directed and undirected graphical models, temporal modeling, inference in graphical models, parameter learning, decisions under uncertainty. *Recommended preparation:* An undergraduate level course in probability theory.

CSCI 574 Computer Vision (3, Fa) Description and recognition of objects, shape analysis, edge and region segmentation, texture, knowledge based systems, image understanding. *Prerequisite:* CSCI 455x.

CSCI 575 Wireless and Mobile Networks Design and Library (3) (Enroll in EE 579)

CSCI 576 Multimedia Systems Design (3, FaSp) State-of-the-art technology for networked multimedia systems such as: system design, I/O technologies, data management, data compression, networking and telecommunications. Design of real-world multimedia solution. *Recommended preparation:* familiarity with C or C++.

CSCI 577ab Software Engineering (4-4, FaSp) *a:* Software life cycle processes; planning considerations for product definition, development, test, implementation, maintenance. Software requirements elicitation and architecture synthesis. Team project. *b:* Software development, test, implementation, and maintenance methods. CASE tools and software environments. Software product engineering, configuration management, quality engineering, documentation. Application via projects. *Prerequisite:* *a:* graduate standing; *b:* CSCI 577a.

CSCI 578 Software Architectures (3, Sp) Study of concepts, principles and scope of software system architectures, including architectural styles, languages, connectors, middleware, dynamism, analysis, testing and domain-specific approaches.

CSCI 579ab Computational Molecular Biology (3-3, FaSp) (Enroll in MATH 578ab)

CSCI 580 3-D Graphics and Rendering (3, Fa) The process of creating images from 3-D models. Includes transformations, shading, lighting, rasterization, texturing, and other topics.

CSCI 581 Logic and its Applications (3) Formal systems, first order logic, truth, completeness, compactness, Godel incompleteness, recursive functions, undecidability. Selected applications, e.g., theorem proving, artificial intelligence, program verification, databases, computational complexity. *Prerequisite:* CSCI 430 and MATH 470.

CSCI 582 Geometric Modeling (3, Sp) Mathematical models and computer representations for three-

dimensional solids; underlying topics from set theory, geometry, and topology. Fundamental algorithms; applications to CAD/CAM and robotics. *Recommended preparation:* Linear algebra and data structures.

CSCI 584 Control and Learning in Mobile Robots and Multi-Robot Systems (3, Fa) Survey of robot control and learning methods from technical papers. Control architectures, adaptation, learning, cooperation, distributed vs. centralized approaches, cooperative and competitive systems. *Prerequisite:* CSCI 445L or CSCI 460 or CSCI 547 or CSCI 561.

CSCI 585 Database Systems (3, FaSpSm) Database system architecture; conceptual database models; semantic, object-oriented, logic-based, and relational databases; user and program interfaces; database system implementation; integrity, security, concurrency and recovery.

CSCI 586 Database Systems Interoperability (3, Sp) Federated and multi-database systems, database networking, conceptual and schematic diversity, information sharing and exchange, knowledge discovery, performance issues. *Prerequisite:* CSCI 585.

CSCI 587 Geospatial Information Management (3, Fa) Techniques to efficiently store, manipulate, index and query geospatial information in support of real-world geographical and decision-making applications. *Prerequisite:* CSCI 485 or CSCI 585.

CSCI 588 Specification and Design of User Interface Software (3, Fa) The design and implementation of user interface software. Study of issues relating to human/computer interaction. Visual design and real-time interfaces.

CSCI 589 Software Engineering for Embedded Systems (3) Software engineering methods and techniques for embedded, resource constrained, and mobile environments. Applications to real-time operating systems and wireless networking systems. Class project. *Prerequisite:* CSCI 577a.

CSCI 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

CSCI 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

CSCI 595 Advanced Compiler Design (4) Code generation, data-flow analysis, global optimization, register allocation, data dependency analysis, unimodular transformations, vectorization, parallelization, data and computation decomposition. *Prerequisite:* CSCI 565.

CSCI 596 Scientific Computing and Visualization (3) Hands-on training on the basics of parallel computing and scientific visualization in the context of computer simulations in science and engineering. *Recommended preparation:* CSCI 455x and MATH 458.

CSCI 598 Mathematical Foundations for Computer-Aided Design of VLSI Circuits (3, Sp) (Enroll in EE 581)

CSCI 599 Special Topics (2-4, max 9) Course content to be selected each semester from recent developments in computer science.

CSCI 621 Digital Geometry Processing (4) Digital geometry processing (subfield of computer graphics), that covers the full pipeline from 3D scanning, processing, to 3D printing. *Recommended preparation:* Solid background in linear algebra, numerical optimization, and C/C++ programming. CSCI 420 Computer Graphics is recommended. Open only to Computer Science doctoral students.

CSCI 646 Coordinated Mobile Robotics (4) State-of-the-art techniques for coordinating robot teams. Distributed approaches; task allocation; control and stability; network topology; coverage and monitoring; caging; bio-inspired approaches; persistence; probabilistic methods. *Recommended preparation:* Solid background in linear algebra, programming and algorithm analysis skills. Open only to Computer Science doctoral students.

CSCI 648 Advanced Information Integration (4) Focus on foundations and techniques for information

integration. Topics include Semantic Web, linked data, data integration, entity linkage, source modeling, and information extraction. *Prerequisite*: CSCI 561; *recommended preparation*: CSCI 585 and programming experience. Open only to Computer Science doctoral students.

CSCI 652 Low-Power Wireless Networks (3, Fa) (Enroll in EE 652)

CSCI 653 High Performance Computing and Simulations (3, Sp) Advanced high-performance computer simulation techniques; multiscale deterministic and stochastic simulation algorithms on parallel and distributed computing platforms; immersive and interactive visualization of simulation data. *Prerequisite*: CSCI 596 or CSCI 580.

CSCI 657 Advanced Distributed Systems (4) The foundations and modern applications of distributed systems. Topics include: logical time, fault tolerance, group communication, consensus, consistency, transactions, and peer-to-peer. *Recommended preparation*: Proficiency in a high-level language, ideally C++, and familiarity with Git. Open only to Computer Science doctoral students.

CSCI 658 Diagnosis and Design of Reliable Digital Systems (3) (Enroll in EE 658)

CSCI 662 Advanced Natural Language Processing (3, Fa) Computational models of natural language. Formalisms for describing structures of human language, and algorithms for learning language structures from data. (Duplicates credit in former CSCI 562.) *Recommended preparation*: proficiency in programming, algorithms and data structures, discrete math, probability theory, and calculus.

CSCI 664 From Action to Language (3, Sp) Analysis of neurocomputational processes linking action, perception, emotion and language within an evolutionary framework integrating data from neuroscience, primatology, human psychology and linguistics. *Recommended preparation*: graduate standing with background or strong interest in one of linguistics, computational neuroscience (e.g., CSCI 564), robotics, or emotion.

CSCI 670x Advanced Analysis of Algorithms (4, FaSpSm) Fundamental techniques for design and analysis of algorithms. Dynamic programming; network flows; theory of NP-completeness; linear programming; approximation, randomized, and online algorithms; basic cryptography. *Prerequisite*: CSCI 570; *recommended preparation*: familiarity with algorithms and discrete mathematics. Open only to computer science and industrial and systems engineering doctoral students.

CSCI 671 Randomized Algorithms (3, Sp) Standard techniques in the design and analysis of randomized algorithms and random structures. Topics include tail bounds, Markov Chains, VC-dimension, probabilistic method. *Prerequisite*: CSCI 570 or CSCI 670; *recommended preparation*: basic background in probability.

CSCI 672 Approximation Algorithms (3, Sp) Algorithmic techniques include combinatorial algorithms and rounding of linear and semi-definite programs. Applications include network design, graph cuts, covering problems, and approximation hardness. *Prerequisite*: CSCI 570 or CSCI 670; *recommended preparation*: basic background in probability and linear algebra.

CSCI 673 Structure and Dynamics of Networked Information (3, Sp) Algorithms for analyzing network data and spreading information over networks. Focuses on broadly applicable mathematical tools and techniques, including spectral techniques, approximation algorithms and randomization. *Prerequisite*: CSCI 570 or CSCI 670; *recommended preparation*: basic background in probabilities, linear algebra.

CSCI 674ab Advanced Topics in Computer Vision (3-3) Selected topics from current active research areas including image segmentation, shape analysis and object recognition, inference of 3-D shape, motion analysis, knowledge-based system, neural nets. *Prerequisite*: CSCI 574.

CSCI 675 Convex and Combinatorial Optimization (3) Topics include: Convex sets and functions; convex optimization problems; geometric and Lagrangian duality; simplex algorithm; ellipsoid algorithm and its implications; matroid theory; submodular optimization. *Prerequisite*: CSCI 570 or CSCI 670; *recommended preparation*: Mathematical maturity and a solid grounding in linear algebra.

CSCI 676 Multimodal Probabilistic Learning of Human Communication (3, Fa) Computational

models of human communicative behaviors. Linguistic, acoustic and visual modalities during social interaction. Multimodal machine learning and pattern recognition, including generative and discriminative models. *Recommended preparation:* CSCI 542 or CSCI 567 or CSCI 573 or equivalent; proper academic background in probability, statistics and linear algebra; previous experience in machine learning is suggested but not obligatory. This course is not a replacement for CSCI 567.

CSCI 685 Advanced Topics in Database Systems (3, Sp) Advanced techniques in database management. Topics include optimization, cache management, data mining and knowledge discovery, decision support, spatial indexes, parallel and distributed systems, extendible storage. *Prerequisite:* CSCI 485 or CSCI 585.

CSCI 686 Advanced Big Data Analytics (3) Advanced statistical inference and data mining techniques for data analytics, including: topic modeling, structure learning, time-series analysis, learning with less supervision, and massive-scale data analytics. *Recommended preparation:* CSCI 567, CSCI 573 or EE 559.

CSCI 698 Practicum in Teaching Computer Science (1, max 2, FaSp) Practical principles for the long-term development of effective teaching in Computer Science. Intended for teaching assistants for classes offered by the Computer Science department. Graded CR/NC. Open only to computer science doctoral students.

CSCI 694ab Topics in Computer Networks and Distributed Systems (3-3) Current topics in network and distributed systems; verbal and written presentation skills, effective critiquing, and evaluation. *Prerequisite:* CSCI 551 or CSCI 555.

CSCI 697 Seminar in Computer Science Research (1, max 2, FaSp) Introduction of Ph.D. students to the broad range of computer science research. Two semesters registration required. Open to computer science doctoral students only. Graded CR/NC. (Duplicates credit in former CSCI 597.)

CSCI 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

CSCI 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Associate Chair (Systems): Bhaskar Krishnamachari, Ph.D.

Associate Chair (Curriculum and Student Services): Edward W. Maby, Ph.D.

Faculty

Presidential Chair: Andrew J. Viterbi, Ph.D.

Presidential Chair: Simon Ramo, Ph.D.

Kenneth C. Dahlberg Early Career Chair: Rahul Jain, Ph.D.

Lloyd F. Hunt Chair in Electrical Power Engineering: Martin Gundersen, Ph.D.

William M. Keck Chair in Engineering: P. Daniel Dapkus, Ph.D.

Robert G. and Mary G. Lane Early Career Chair: Murali Annavaram, Ph.D.

Fred W. O'Green Chair in Engineering: Leonard M. Silverman, Ph.D.

Robert C. Packard President's Chair and Malcolm R. Currie Chair in Technology and the Humanities: C. L. Max Nikias, Ph.D.

Colleen and Roberto Padovani Early Career Chair in Electrical Engineering: Mike Chen, Ph.D.

George T. Pflieger Chair in Electrical Engineering: Robert W. Hellwarth, Ph.D.

Charles Lee Powell Chair in Electrical Engineering and Computer Science: Melvin Breuer, Ph.D.

Charles Lee Powell Chair in Engineering: Viktor Prasanna, Ph.D.

Steven and Kathryn Sample Chair in Engineering: Alan E. Willner, Ph.D.

Leonard Silverman Chair: Alexander A. Sawchuk, Ph.D.

Andrew and Erna Viterbi Chair in Communications: Solomon W. Golomb, Ph.D.

WISE Junior Gabilan Chair: Michelle Povinelli, Ph.D.

Fred H. Cole Professor of Electrical Engineering: Robert A. Scholtz, Ph.D.

Dean's Professor in Electrical Engineering: Chung-Chieh Kuo, Ph.D.

Stephen and Etta Varra Professor: Massoud Pedram, Ph.D.

Viterbi Professor in Engineering: Shrikanth (Shri) Narayanan, Ph.D.

Ming Hsieh Faculty Fellow in Electrical Engineering: Hossein Hashemi, Ph.D.

Ming Hsieh Faculty Fellow in Electrical Engineering: Bhaskar Krishnamachari, Ph.D.

Professors: Melvin Breuer, Ph.D. (Computer Science); Todd Brun, Ph.D. (Computer Science, Physics); Giuseppe Caire, Ph.D.; Keith M. Chugg, Ph.D.; P. Daniel Dapkus, Ph.D. (Materials Science); Michel Dubois, Ph.D.; Solomon W. Golomb, Ph.D. (Mathematics); Martin Gundersen, Ph.D. (Materials Science, Physics); Sandeep Gupta, Ph.D.; Robert W. Hellwarth, Ph.D. (Physics); Hossein Hashemi, Ph.D.; Kai Hwang, Ph.D. (Computer Science); Petros Ioannou, Ph.D.; B. Keith Jenkins, Ph.D.; Edmond Jonckheere, Ph.D. (Mathematics); Eun Sok Kim, Ph.D.; Bart Kosko, Ph.D. (Law); Bhaskar Krishnamachari, Ph.D. (Computer Science); Chung-Chieh Kuo, Ph.D. (Computer Science); Richard Leahy, Ph.D.* (Biomedical Engineering, Radiology); Anthony F. J. Levi, Ph.D. (Physics); Daniel Lidar, Ph.D. (Chemistry); William C. Lindsey, Ph.D.; Jerry M. Mendel, Ph.D.; Urbashi Mitra, Ph.D. (Computer Science); Mahta Moghaddam, Ph.D.; Andreas Molisch, Ph.D.; Shrikanth (Shri) Narayanan, Ph.D. (Computer Science, Linguistics, Psychology); Krishna Nayak, Ph.D. (Biomedical Engineering, Medicine); C. L. Max Nikias, Ph.D.; John O'Brien, Ph.D.; Antonio Ortega, Ph.D.; Alice C. Parker, Ph.D.*; Massoud Pedram, Ph.D.; Timothy Pinkston, Ph.D.; Viktor Prasanna, Ph.D. (Computer Science); C. Raghavendra, Ph.D. (Computer Science); Simon Ramo, Ph.D.; Steven B. Sample, Ph.D.; Alexander A. Sawchuk, Ph.D.*; Robert A. Scholtz, Ph.D.; Leonard Silverman, Ph.D.; John Silvester, Ph.D.; John B. Slaughter, Ph.D. (Education); Armand R. Tanguay Jr., Ph.D. (Biomedical Engineering, Materials Science); Andrew J. Viterbi, Ph.D.; Alan E. Willner, Ph.D.*; Zhen Zhang, Ph.D.; Chongwu Zhou, Ph.D.*

Associate Professors: Murali Annavaram, Ph.D. (*Computer Science*); Salman Avestimehr, Ph.D.; Peter Beerel, Ph.D.; Stephen B. Cronin, Ph.D.; Rahul Jain, Ph.D. (*Industrial and Systems Engineering*); Christos Kyriakakis, Ph.D.; Michael Neely, Ph.D.; Michelle Povinelli, Ph.D.; Aluizio Prata Jr., Ph.D.*; Konstantinos Psounis, Ph.D. (*Computer Science*); Wei Wu, Ph.D.

Assistant Professors: Paul Bogdan, Ph.D.; Michael Shuo-Wei Chen, Ph.D.; Panayiotis Georgiou, Ph.D.; Justin Haldar, Ph.D.; Rehan Kapadia, Ph.D.; Ashutosh Nayyar, Ph.D.; Benjamin W. Reichardt, Ph.D. (*Computer Science*); Maryam M. Shanechi, Ph.D.; Mahdi Soltanolkotabi, Ph.D.; Han Wang, Ph.D.

Adjunct Professors: Dan Goebel, Ph.D.; P. Vijay Kumar, Ph.D.; Patric Muggli, Ph.D.

Adjunct Associate Professors: Serge Dubovitsky, Ph.D.; Edgar Satorius, Ph.D.; P. Thomas Vernier, Ph.D.

Adjunct Assistant Professor: Bindu Madhavan, Ph.D.

Research Professor: Michael Fritze, Ph.D.

Research Associate Professors: Stephen Crago, Ph.D.; Jeffrey Draper, Ph.D.; John Granacki, Ph.D. (*Biomedical Engineering*); Joseph Touch, Ph.D. (*Computer Science*);

Research Assistant Professors: Anand Joshi, Ph.D.; Sungbok Lee, Ph.D.; Federico Spedalieri, Ph.D.; John Stang, Ph.D.; Alireza Tabatabaenejad, Ph.D.

Professors of Engineering Practice: Mary Eshaghian-Wilner, Ph.D.; Edward W. Maby, Ph.D.; Gandhi Puvvada, M.S.

Associate Professors of Engineering Practice: Mohammed Beshir, Ph.D.; Shahin Nazarian, Ph.D.; Mark Redekopp, M.S.

Senior Lecturer: Douglas Burke, Ph.D.

Emeritus Professors: Alvin Despain, Ph.D.; Hans H. Kuehl, Ph.D.*; Michael J. Safonov, Ph.D.; William H. Steier, Ph.D.; Lloyd Welch, Ph.D. (*Mathematics*)

Emeritus Instructor: Sidney A. Wielin, B.S.

Research Professor Emeritus of Electrical Engineering: Sanjit Mitra, Ph.D.

Joint Faculty

Joint Professors: Michael Arbib, Ph.D. (*Computer Science, Neurobiology, Biomedical Engineering*); Stanley P. Azen, Ph.D. (*Preventive Medicine and Biomedical Engineering*); Jack Feinberg, Ph.D. (*Physics*); Leana Golubchik, Ph.D. (*Computer Science*); Ramesh Govindan, Ph.D. (*Computer Science*); Norberto Grzywacz, Ph.D. (*Biomedical Engineering*); Ellis Horowitz, Ph.D. (*Computer Science*); Gerard Medioni, Ph.D. (*Computer Science*); Ellis Meng, Ph.D. (*Biomedical Engineering*); Ulrich Neumann, Ph.D. (*Computer Science*); Ramakant Nevatia, Ph.D. (*Computer Science*); Si-Zhao Qin, Ph.D. (*Chemical Engineering*); Aristides Requicha, Ph.D. (*Computer Science*);); Suvrajeet Sen, Ph.D. (*Industrial and Systems Engineering*); Cyrus Shahabi, Ph.D. (*Computer Science*); Gaurav Sukhatme, Ph.D. (*Computer Science*); Paul Thompson, Ph.D. (*Ophthalmology*); Arthur Toga, Ph.D. (*Ophthalmology*); William G. Wagner, Ph.D. (*Physics*); Curt F. Wittig, Ph.D. (*Chemistry, Physics*); Stanley M. Yamashiro, Ph.D. (*Biomedical Engineering*)

Joint Associate Professors: Andrea M. Armani, Ph.D. (*Chemical Engineering and Materials Science*); Behnam Jafarpour, Ph.D. (*Chemical Engineering, Materials Science*); Jia Grace Lu, Ph.D., (*Physics*); Elahe Nezami, Ph.D. (*Preventative Medicine*); John Van Horn, Ph.D. (*Neurology*)

Joint Assistant Professors: Yan Liu, Ph.D. (*Computer Science*); Ketan Savla, Ph.D. (*Civil, Environmental Engineering*); Yonggang Shi, Ph.D. (*Neurology*); Jongseung Yoon, Ph.D. (*Chemical Engineering, Materials Science*)

Joint Research Professor: Fred Aminzadeh, Ph.D. (Chemical Engineering, Materials Science)

Joint Research Associate Professor: Joseph Touch, Ph.D. (Computer Science)

Joint Research Assistant Professor: Young Cho, Ph.D. (Computer Science)

Joint Emeritus Professors: George A. Bekey, Ph.D. (Computer Science, Biomedical Engineering); Murray Gershenson, Ph.D. (Materials Science)*

**Recipient of university-wide or school teaching award.*

Electrical Engineering Honor Society: Eta Kappa Nu

Viterbi School of Engineering

Ming Hsieh Department of Electrical Engineering

Degree Requirements

Undergraduate Program Educational Objectives

The electrical engineering program objectives are designed to promote technical competence, professional development and citizenship in the global community. Graduates of the undergraduate program in electrical engineering are expected to attain the following objectives within a few years of graduation:

Technical Competence

Graduates will apply their technical skills in mathematics, science and engineering to the solution of complex problems encountered in modern electrical engineering practice.

Graduates will model, analyze, design and experimentally evaluate components or systems that achieve desired technical specifications subject to the reality of economic constraints.

Professional Development

Graduates will compete effectively in a world of rapid technological change and assume leadership roles within industrial, entrepreneurial, academic or governmental environments in the broad context of electrical engineering.

Some graduates who choose to redirect their careers will be employed in diverse fields such as healthcare, business, law, computer science, multimedia and music through graduate-level studies and the process of lifelong learning.

Citizenship in the Global Community

Graduates will have established the foundations for critical thinking that are needed to broaden or redirect their careers in diverse disciplines such as business, health care and the arts through graduate-level studies and/or the process of life-long learning.

Graduates will adhere to highly ethical practices, and they will make exemplary engineering decisions that balance economic, environmental and societal factors for the betterment of the global community.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Electrical Engineering provides both breadth and depth across the range of engineering topics implied by the title. The curriculum includes probability and statistics, including appropriate applications; mathematics through differential and integral calculus, and advanced mathematics, such as differential equations, linear algebra, complex variables and discrete mathematics; sciences (defined as

biological, chemical or physical science); and engineering topics (including computing science) necessary to analyze and design complex electrical and electronic devices, software and systems containing hardware and software components.

Bachelor of Science in Electrical Engineering

The requirement for the degree is 131 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied towards the major, regardless of the department in which the courses are taken. See also the common requirements for undergraduate degrees section.

COMPOSITION/WRITING REQUIREMENTS		UNITS
WRIT 150*	Writing and Critical Reasoning — Thematic Approaches	4
WRIT 340	Advanced Writing	43

GENERAL EDUCATION		UNITS
General education* +		20

PRE-MAJOR REQUIREMENTS		UNITS
<i>Math Requirement</i>		
MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 226	Calculus III	4
MATH 245	Mathematics of Physics and Engineering I	4
MATH 445	Mathematics of Physics and Engineering II	4

<i>Physics Requirement</i>		
PHYS 151L**	Fundamentals of Physics I: Mechanics and Thermodynamics	4
PHYS 152L	Fundamentals of Physics II: Electricity and Magnetism	4
PHYS 153L	Fundamentals of Physics III: Optics and Modern Physics	4

MAJOR ELECTIVES		UNITS
Electives	See requirements for graduation	<u>37</u>
Total units:		131

*GE Category VI is taken concurrently with WRIT 150.

**Satisfies GE Category III requirement.

***Students enrolled in the progressive degree program may take EE 503 (4) to satisfy this requirement

+The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

*Requirements for Graduation: Engineering Electives**Entry-Level Electives*

Students are required to take four entry-level electives from the following list: EE 241 (3), EE 322 (3), EE 337L (3), EE 338 (3), EE 348L (4), EE 357 (3).

Advanced Electives

Students must fulfill a minimum requirement of three 400-level elective courses in electrical engineering. Of these, one must be a capstone design course from the following list: EE 422x (3), EE 423Lx (3), EE 434Lx (4), EE 447Lx (4), EE 459Lx (3), EE 484x (3).

Free Electives

Free elective courses that complete the 37-unit elective requirement are to be chosen in consultation with the student's academic adviser. Students are encouraged to pursue minor options when satisfying this requirement.

Bachelor of Science in Computer Engineering and Computer Science

See the listing under Computer Engineering.

Minor in Music Recording

A minor in music recording is offered through the USC Thornton School of Music to provide undergraduate students with the background necessary to enter the field of recording engineering and to familiarize them with the design needs of modern recording equipment. The minor is recommended to electrical engineering majors with extensive musical training who would like to combine their technical and musical abilities while learning the engineering applications of physical and mathematical principles to the art of music recording. See the listing under the Thornton School of Music.

Master of Science in Electrical Engineering

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in electrical engineering. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree and through an accumulation of no more than 12 units beyond the minimum needed for the specific degree program. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average.

In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in electrical engineering is also subject to the following requirements: (1) a total of at least 27 units is required; (2) every non-EE course for graduate credit requires prior written adviser approval recorded each semester on a special request form in the student's department file; (3) no more than three courses (maximum 12 units) may be counted at the 400 level – at least 18 adviser-approved units must be taken at the 500 or 600 level; (4) at least 18 units must be

taken in electrical engineering, those not in EE require written adviser approval and must be technical in nature; (5) to achieve a degree of breadth in their program, students are encouraged to take two technical courses outside their area of specialization but within EE; (6) at least 21 of the 27 units must be taken in the Viterbi School of Engineering; (7) units to be transferred (maximum four with adviser approval) must have been taken prior to taking classes at USC — interruption of residency is not allowed.

The aerospace controls option is available as an area of emphasis for MSEE students interested in learning to apply innovative control techniques to aerospace control problems. In addition to 18 approved units of electrical engineering courses, students in this option will take at least three of the following aerospace and mechanical engineering courses: AME 453 Engineering Dynamics (3); AME 531 Aerodynamics of Wings and Bodies (3); AME 532ab Flight Vehicle Stability and Control (3-3); AME 525 Engineering Analysis (3); AME 526 Engineering Analytical Methods (3); ASTE 580 Orbital Mechanics I (3).

Master of Science in Electrical Engineering (Computer Networks)

Under the computer networks option students must satisfy the M.S., Electrical Engineering requirements with the exception that only 15 units of EE are required. It is expected that each student in this program will take or have taken the equivalent of three of the four following fundamental courses: CSCI 402x, EE 450, EE 457Lx, and EE 465 or EE 503. With the exception of EE 503, the fundamental courses may also be satisfied by having passed EE placement exams. Three of the following courses are required: CSCI 551, EE 550, EE 555 and EE 597. If a fourth required course is taken it can be counted toward elective credit. Suggested elective courses include: CSCI 530, CSCI 555, CSCI 558L, CSCI 570, CSCI 694a, CSCI 694b, EE 512, EE 532, EE 535, EEE 549, E 554, EE 557, EE 558, EE 579, EE 590, EE 649, EE 650, EE 652, EE 659. Any other course must be approved by a faculty adviser. Total units required for the degree is 27.

Master of Science in Electrical Engineering (Electric Power)

See listing in the Sustainable Infrastructures Systems section.

Master of Science in Electrical Engineering (Multimedia and Creative Technologies)

Students may earn a specialization in multimedia and creative technologies by completing the general requirements for the Master of Science in Electrical Engineering and the following additional requirements:

- At most four units of electives can be taken outside of the Viterbi School of Engineering *with adviser approval*. Some examples are CTAN 452 Introduction to 3-D Computer Animation (2 units) and CTIN 483 Introduction to Game Development (4 units).
- Computer science courses that are cross-listed with EE can (but do not have to) count toward the 18 EE units. Up to nine units of other CSCI courses that either are or are not cross-listed can also be used. Multimedia and creative technologies draws heavily on concepts and techniques from computer science.
- Students must include the following three courses in their program

EE 483	Introduction to Digital Signal Processing	3
EE 519	Speech Recognition and Processing for Multimedia	3
EE 569	Introduction to Digital Image Processing	3

- A course can be waived if a student can demonstrate equivalent knowledge of the material and if the course instructor will certify it.
- Students must include six courses from the following list of courses in their programs for a total of 18 units.

Approved Courses for the Multimedia Specialization

COURSES IN ELECTRICAL ENGINEERING		UNITS
EE 450	Introduction to Computer Networks	3
EE 522	Immersive Audio Signal Processing	3
EE 555	Broadband Network Architectures	3

EE 577a	VLSI System Design	3
EE 586L	Advanced DSP Design Laboratory	4
EE 596	Wavelets	3
EE 619	Advanced Topics in Automatic Speech Recognition	3
EE 669	Multimedia Data Compression	3

COURSES IN COMPUTER SCIENCE		UNITS
CSCI 455x	Introduction to Programming Systems Design	4
CSCI 485	File and Database Management	3
CSCI 551	Computer Communications	3
CSCI 571	Web Technologies	3
CSCI 574	Computer Vision	3
CSCI 576	Multimedia Systems Design	3
CSCI 580	3-D Graphics and Rendering	3
CSCI 582	Geometric Modeling	3
CSCI 585	Database Systems	3

COURSES FROM THE SCHOOL OF CINEMATIC ARTS		UNITS
CTAN 452	Introduction to 3-D Computer Animation	2, max 4
CTIN 483	Introduction to Game Development	4

COURSE IN INFORMATION TECHNOLOGY		UNITS
ITP 411x	Multimedia and Video Production	3

- Students may replace courses in the above list with a combined maximum of multimedia-related EE 599 or CSCI 599 Special Topics courses in their programs. Every course requires prior approval from the faculty adviser, recorded each semester on the plan of study form.
- Students may include a maximum of 6 units of EE 590 Directed Research in their programs. Before registering for these units, the faculty adviser must approve a written description of the intended multimedia research project signed by the faculty member who will supervise the student.
- Students entering this program are expected to have already completed, either at USC or at another institution, formal course work equivalent to USC course EE 364 Introduction to Probability and Statistics for Electrical Engineering. If an approved course has either EE 441 or EE 464 as a prerequisite, then the student must first take and pass the placement examination that is given each semester for either EE 441 or EE 464 before taking the approved course. Information about placement exams can be found at *ee.usc.edu*.
- Although not required, students should be proficient in C or C++ programming, at the level taught in CSCI 455x.
- Although not required, ITP 411x Multimedia and Video Production (3 units) will provide the student with hands-on experience in using multimedia application tools. This will help the student prepare a portfolio, which is expected by the industry from students who major in a multimedia program.

Master of Science in Systems Architecting and Engineering

See the listing under Systems Architecting and Engineering.

Master of Science in Electrical Engineering (VLSI Design)

The Master of Science in Electrical Engineering (VLSI design) is earned by successfully completing the normal requirements for the Master of Science in electrical engineering, with the following additional required courses: EE 536a; EE 577a; EE 577b or EE 536b; and EE 552. If a student chooses to take EE 536b *as well* as EE 577b, the student may *either* count EE 536b as one of the courses for Area 2 or EE 577b as one of the courses for Area 1 or Area 3. No more than three courses (maximum 12 units) may be counted at the 400 level — at least 18 adviser-

approved units must be taken at the 500 or 600 level.

The students must also take two courses from one of the following areas and one course from a second area:

- Area 1: CSCI 455x, EE 560, EE 577b (see above), EE 658, EE 680 and EE 681.
- Area 2: EE 448L, EE 504L, EE 536b (see above), EE 537 and EE 630.
- Area 3: CSCI 455x, CSCI 570, EE 557, EE 560, EE 577b (see above), EE 659 and EE 677.

With explicit approval of a faculty adviser, EE 599 Special Topics and/or 3 units of EE 590 Directed Research may be used to meet requirements for any of the approved areas.

The remaining courses must be technical electives approved by the adviser, and can including the following: EE 501, EE 502, EE 504L, EE 506, EE 540, EE 554, EE 560, EE 590, EE 601 and EE 677.

Master of Science in Electrical Engineering (Wireless Health Technology)

The Master of Science in Electrical Engineering (Wireless Health Technology) reflects a partnership between the Viterbi School of Engineering, the Keck School of Medicine, and other institutions engaged in health care research. The program of study features targeted engineering courses, a rigorous exposure to general medicine, and relevant internship practice (a total of 29-32 units).

REQUIRED COURSES (20 UNITS)		UNITS
EE 450	Introduction to Computer Networks	3
EE 579	Wireless and Mobile Networks Design and Laboratory	3
MEDS 530abc	Foundations of Medicine, Anatomy, Physiology, and Pathology	12
MEDS 597ab	Health Technology Internship	1-1

Take three electives from the following list (9-12 units)

CSCI 545	Robotics	3
CSCI 561	Foundations of Artificial Intelligence	3
EE 503	Probability for Electrical and Computer Engineers	4
EE 519	Speech Recognition and Processing for Multimedia	3
EE 535	Mobile Communications	3
EE 550	Design and Analysis of Computer Communication Networks	3
EE 559	Mathematical Pattern Recognition	3
EE 564	Digital Communication and Coding Systems	3
EE 565a	Information Theory	3
EE 567	Communication Systems	3
MEDS 500	Basic Concepts in Global Health	4
MEDS 501	Critical Issues in Global Health	4
MEDS 502	Global Epidemiology of Diseases and Risk Factors	4
Total:		29-32 units

Students are expected to have a background in linear algebra equivalent to EE 441 and experience with a programming language such as C or C++. Admitted students who do not meet prerequisites by placement examination will be assigned courses to complete the deficiencies.

Master of Science in Electrical Engineering (Wireless Networks)

The Master of Science in Electrical Engineering (Wireless Networks) is a unique interdisciplinary degree program that prepares graduates for the design and improvement of future wireless networks such as the “Internet of Things.” The program combines courses related to radio hardware, transmission techniques, the medium-access control layer, networking, applications and standards.

No more than three courses (maximum 12 units) may be counted at the 400 level — at least 18 adviser-approved units must be taken at the 500 or 600 level.

REQUIRED COURSES (15 UNITS)		UNITS
CSCI 402	Operating Systems	4
EE 503	Probability for Electrical and Computer Engineers	4
EE 511	Simulation Methods for Stochastic Systems	1
EE 535	Mobile Communications	3
EE 597	Wireless Networks	3

ELECTIVE COURSES (12-14 UNITS, AT LEAST ONE COURSE FROM TWO AREAS)		UNITS
<i>Transmission Techniques and Signal Processing</i>		
EE 483	Introduction to Digital Signal Processing	3
EE 558	Optical Fiber Communication Systems	3
EE 564	Digital Communication and Coding Systems	3
EE 583	Statistical Signal Processing	3
EE 586L	Advanced DSP Design Laboratory	4

Architectures, Protocols, and Applications

EE 519	Speech Recognition and Processing for Multimedia	3
EE 532	Wireless Internet and Pervasive Computing	3
EE 550	Design and Analysis of Computer Communication Networks	3
EE 555	Broadband Network Architectures	3
EE 579	Wireless and Mobile Networks Design and Laboratory	3
EE 652	Low-Power Wireless Networks	3

Communication Hardware and Design

EE 448L	Communication Electronics	4
EE 541	Radio Frequency Filter Design	3
EE 544	Radio Frequency Systems and Hardware	3

Note: This program assumes prerequisite preparation in the area of computer networks. Students who do not meet this requirement or who do not pass a related placement exam will be required to take EE 450 Introduction to Computer Networks.

Financial Engineering

Electrical Engineering Building 100

Faculty Contact: Professor Petros Ioannou,  ioannou@usc.edu

Master of Science in Financial Engineering

The objective of this program is the training of graduate students with engineering, applied mathematics or physics backgrounds in the application of mathematical and engineering tools to finance. Financial engineering is a multidisciplinary education program that involves the Viterbi School of Engineering, the USC Marshall School of Business and the USC Dornsife College of Letters, Arts and Sciences (Department of Economics). Financial engineering uses tools from finance and economics, engineering, applied mathematics and statistics to address problems such as derivative securities valuation, strategic planning and dynamic investment strategies,

and risk management, which are of interest to investment and commercial banks, trading companies, hedge funds, insurance companies, corporate risk managers and regulatory agencies.

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in financial engineering. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average. In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in Financial Engineering is also subject to the following requirements: (1) a total of at least 30 units is required; (2) every plan of study requires prior written approval by the contact faculty of the program; (3) units to be transferred (maximum of four with adviser approval) must have been taken prior to taking classes at USC; interruption of residency is not allowed.

Curriculum

The degree requirements include six required courses and two courses from each of two lists of electives for a minimum total of 30 units.

REQUIRED		UNITS
GSBA 548	Corporate Finance	3
FBE 559	Management of Financial Risk, or	3
ISE 563	Financial Engineering	3
EE 503	Probability for Electrical and Computer Engineers	4
EE 512	Stochastic Processes	3
EE 518	Mathematics and Tools for Financial Engineers	4
EE 590	Directed Research, or	
ENGR 596	Internship in Engineering	1

ELECTIVES (ADVISER APPROVED)		UNITS
------------------------------	--	-------

Finance, Business, Economics Area:

Two courses (6-7 units) from the following:

ECON 500	Microeconomic Analysis and Policy	4
ECON 501	Macroeconomic Analysis and Policy	4
ECON 613	Econometric and Financial Time Series I	4
FBE 529	Financial Analysis and Valuation	3
FBE 535	Applied Finance in Fixed Income Securities	3
FBE 540	Hedge Funds	3
FBE 543	Forecasting and Risk Analysis	3
FBE 554	Trading and Exchanges	3
FBE 555	Investment Analysis and Portfolio Management	3
FBE 589	Mortgages and Mortgage-Backed Securities and Markets	3
ISE 566	Financial Accounting Analysis for Engineering	3

Optimization, Simulations, Stochastic Systems:

Two courses (6-7 units) from the following:

CE 645	Uncertainty Modeling and Stochastic Optimization	3
CSCI 455x	Introduction to Programming Systems Design	4
CSCI 570	Analysis of Algorithms	3
EE 500	Neural and Fuzzy Systems	3
EE 517	Statistics for Engineers	3
EE 553*	Computational Solution of Optimization Problems	3
EE 556	Stochastic Systems	3

EE 562a	Random Processes in Engineering	3
ISE 520*	Optimization: Theory and Algorithms	3
ISE 536	Linear Programming and Extensions	3
ISE 539	Stochastic Elements of Simulation	3

*Students cannot receive credit for both ISE 520 and EE 553

Dual Degree Program (M.S., Electrical Engineering / M.S., Engineering Management)

The Ming Hsieh Department of Electrical Engineering in conjunction with the Daniel J. Epstein Department of Industrial and Systems Engineering offers a program leading to the degree of Master of Science in Electrical Engineering/Master of Science in Engineering Management. This program is designed for graduate electrical engineers whose career objectives lead to increasing technical management responsibilities.

In addition to the general requirements of the USC Viterbi School of Engineering, the dual degree of Master of Science in Electrical Engineering and Master of Science in Engineering Management is also subject to the following requirements:

(1) All applicants must meet the admissions requirements of both the Department of Electrical Engineering and the Department of Industrial and Systems Engineering; (2) a total of at least 48 units is required; (3) 24 of these must satisfy the requirements of the master's degree in electrical engineering; (4) 21 units must satisfy the required courses towards the master's degree in engineering management; (5) 3 units of electives approved by the program director or adviser; (6) all courses counted towards the dual degree must be at the 500 level, except those 400-level courses required by the master's degree in electrical engineering.

Second Master's Degree

A graduate student who already holds a master's degree from USC may apply up to 4 units toward a second master's degree with the permission of the chair of the major department. All credit, including the transferred units, must be earned within seven calendar years.

For students who earned their first master's degree at another institution, no course work may be repeated from the first program of study and no unit credit from the first program of study may be counted toward the second master's degree.

Engineer in Electrical Engineering

Requirements for the Engineer in Electrical Engineering are the same as those listed under Engineer degree, except that both areas of concentration must be in electrical engineering.

Doctor of Philosophy in Electrical Engineering

The Doctor of Philosophy with a major in electrical engineering is awarded in strict conformity with the general requirements of the USC Graduate School. See general requirements for graduate degrees. Departmental requirements for this degree consist of a concentrated program of study and research and a dissertation. Each student wishing to undertake a doctoral program must first be admitted to the program and then take the screening examination. This examination will emphasize comprehension of fundamental material in one of the 13 specialized areas of electrical engineering listed below. Listed under each area are courses offered by the Department of Electrical Engineering, which will provide basic background for the examination and partial preparation for the dissertation. Not all courses listed are required for preparation for the screening examination in any specific area. Consult a separately published guide, available from the department office, for more information concerning examination content and scheduling. Further guidance concerning the full completion of courses, including those given outside the department, which are recommended for preparation for the dissertation, can be obtained from the faculty in each technical area.

Courses of Instruction

ELECTRICAL ENGINEERING (EE)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

EE 101 Introduction to Digital Logic (3, FaSp) Boolean algebra; number systems; Boolean function synthesis; binary arithmetic; codes; combinational logic devices; sequential circuits; state machine design and implementation. (Duplicates credit in former EE 154.)

EE 105 Introduction to Electrical Engineering (3, Fa) Gateway to the majors in Electrical Engineering. An overview of modern electrical engineering: communications, computers, circuits, components, controls, electromagnetics, microelectronics; principles of commercial products such as FAX, modem, copier, CD-ROM, ATM networks.

EE 109L Introduction to Embedded Systems (3, Fa) Information representations, embedded C language constructs, assembly programming, state machines, and fundamental circuit analysis. Embedded topics will include digital I/O, serial I/O protocols, analog-to-digital conversion and interrupt mechanisms. *Recommended preparation:* Knowledge of C or C++.

EE 150L Engineering Computational Methods (3, Fa) Algorithms and computational methods for efficient solution of engineering problems. Introduction to engineering software tools.

EE 202L Linear Circuits (4, FaSpSm) Lumped circuit elements; network equations; zero-input and zero-state responses; sinusoidal steady-state analysis; impedance; resonance; network functions; power concepts; transformers; Laplace transforms. *Prerequisite:* PHYS 152L; *corequisite:* MATH 245.

EE 222 Fundamentals of Audio Engineering (3, Fa) Introduction to basic audio engineering principles and techniques, with emphasis on practical sound-system analysis and design. Sound measurements, microphones, amplifiers, loudspeakers, and system integration.

EE 241 Applied Linear Algebra for Engineering (3, FaSp) Introduction to the theory of matrices, vector spaces, least-squares approximation and MATLAB. Applications to communications, control and signal processing. *Prerequisite:* MATH 126.

EE 254L Introduction to Digital Circuits (4, FaSpSm) Digital system design and implementation; synchronous design of datapath and control; schematic/Verilog-based design, simulation, and implementation in Field Programmable Gate Arrays; timing analysis; simple CPU design; semester-end project. *Prerequisite:* EE 101 or EE 154. (Duplicates credit in former EE 201.)

EE 277L Introduction to Digital Integrated Circuits (2) Physical principles and circuit theory used to analyze and design digital integrated circuits. Introduction to digital abstractions that bridge the gap between basic circuit theory and VLSI. *Prerequisite:* EE 109.

EE 301L Linear Systems (4, FaSp) Representation and analysis of linear time-invariant systems primarily for the continuous time case. Convolution, Fourier series and transform, Laplace transform, controls and communications applications. *Prerequisite:* EE 202L.

EE 322 Introduction to Digital Audio (3, Fa) Fundamentals of sound, acoustics and digital audio signal processing.

EE 326Lx Essentials of Electrical Engineering (4) Network analysis and theorems; transient analysis; transformers; semiconductor physics and circuits; power amplifiers, modulation and demodulation, and pulse,

digital, and switching circuits. Introduction to instrumentation. Not available for credit to electrical engineering majors. *Prerequisite:* PHYS 152L, MATH 126.

EE 330 Electromagnetics I (3, FaSp) Basic static and dynamic electromagnetic field theory and applications; electrostatics, magnetostatics, Maxwell's equations, energy flow, plane waves incident on planar boundaries, transmission lines. *Prerequisite:* EE 202L, MATH 445, PHYS 152L.

EE 337L Engineering Nano-Systems (3, Sp) Methods to control and exploit the phenomena of nano-science, and the integration of nano-technology into systems. Development of fundamental concepts through a series of experimental modules. (Duplicates credit in former EE 238L.) *Prerequisite:* PHYS 152L.

EE 338 Physical Electronics (3) Semiconductor device characteristics and applications. Physical models of electronic conduction in solids, p-n junctions, bipolar and field effect transistors and other solid-state devices. *Prerequisite:* EE 202L, PHYS 152L.

EE 348L Electronic Circuits (4, FaSp) Basic analog and digital circuit design using Bipolar Junction Transistors, Field Effect Transistors and integrated circuits. *Corequisite:* EE 338.

EE 351 Programming and Multimedia on the World Wide Web (3, FaSpSm) (Enroll in CSCI 351)

EE 352L Computer Organization and Architecture (3) Computer organization and architecture. Concepts include: computer evolution and performance, system busses, cache memory, internal and external memory, input/output, operating system support, computer arithmetic. *Prerequisite:* CSCI 104.

EE 355x Software Design for Electrical Engineers (3) Object-oriented programming techniques, basic data structures, and elementary complexity analysis for the modeling, simulation, and solution of engineering problems. Not available for credit for CSCI, CSGM, CSBA, or CECS majors. (Duplicates credit in former CSCI 355x). *Prerequisite:* EE 150.

EE 357 Basic Organization of Computer Systems (3, FaSp) Organization and operation of the processor, memory and I/O of a minicomputer at the machine language level; assembly language programming; data representation and computer arithmetic. *Prerequisite:* EE 254; *recommended preparation:* a high level programming language.

EE 364 Introduction to Probability and Statistics for Electrical Engineering and Computer Science (3, FaSp) Introduction to concepts of randomness and uncertainty: probability, random variables, statistics. Applications to digital communications, signal processing, automatic control, computer engineering and computer science. *Prerequisite:* MATH 225 or MATH 245.

EE 370 Electromechanics (3) Ferromagnetism and transformers. Energy conversion in singly and multiply excited systems. Concepts in rotating machinery analysis. Direct energy conversion. *Prerequisite:* EE 330.

EE 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

EE 415 Introduction to MEMS (3) (Enroll in AME 455)

EE 422x Electromagnetic Systems Design (3, FaSp) Applied electromagnetics for large- and small-scale electromechanical systems. Comprehensive design project. Capstone design experience. Open only to seniors. Not available for graduate credit. *Prerequisite:* EE 330.

EE 423Lx Loudspeaker and Sound-System Design (3, Sp) Project-based design of loudspeaker transducers, filters, and enclosures. Measurement of transfer functions, acoustical performance, distortion, Thiele-Small parameters, and power handling. Listening evaluations. Capstone design experience. Open only to seniors. Not available for graduate credit. *Prerequisite:* EE 301L or AME 302; PHYS 152L; *recommended preparation:* EE 330.

EE 434Lx Digital Signal Processing Design Laboratory (4) Experiments and design project in digital signal processing (e.g., real-time DSP, acoustics, video) including: systems specification, preliminary analysis,

trade-off studies, implementation, presentation. Capstone design experience. Open only to seniors. Not available for graduate credit. *Prerequisite:* EE 483.

EE 436 Introduction to Condensed Matter Physics (4, Irregular, Sp) (Enroll in PHYS 440)

EE 438L Processing for Microelectronics (3) Applications and electrical evaluation of selected processes used in electronic microfabrication. (Duplicates credit in former MASC 438L.) *Prerequisite:* EE 338.

EE 439 Principles of Semiconductor Processing (3) (Enroll in MASC 439)

EE 441 Applied Linear Algebra for Engineering (3, FaSpSm) Introduction to linear algebra and matrix theory and their underlying concepts. Applications to engineering problems. *Prerequisite:* MATH 445 or graduate standing.

EE 443 Introduction to Power Systems (3) Components of power systems. Analysis techniques in electrical power generation transmission and utilization. Environmental and economic considerations in system operations and planning.

EE 444 Power Systems Technology (3, Fa) Comprehensive assessment of the technical, environmental, and regulatory challenges that affect the future delivery and utilization of electric power. Case-study analysis. *Prerequisite:* EE 202L.

EE 445 Introduction to Robotics (4) (Enroll in CSCI 445L)

EE 447Lx Mixed Signal Electronic Circuits (4) Application of solid-state electronic devices to the design of linear and mixed-signal systems. Laboratory experiments and projects involving the design of electronic hardware. Capstone design experience. Open only to seniors. Not available for graduate credit. *Prerequisite:* EE 348L.

EE 448L Communication Electronics (4, FaSp) Analysis, design, and experimental evaluation of transistor-level communication circuits and micro-systems. Transmission lines, impedance matching, noise, distortion, tuned amplifiers, mixers, oscillators, phase-locked loops. *Prerequisite:* EE 348L.

EE 450 Introduction to Computer Networks (3, FaSpSm) Network architectures; layered protocols, network service interface; local networks; long-haul networks; internal protocols; link protocols; addressing; routing; flow control; higher level protocols. (Duplicates credit in CSCI 353.) *Prerequisite:* junior standing.

EE 451 Parallel and Distributed Computation (3) Architectural principles underlying modern processors; introduction to parallel programming techniques, software performance optimization strategies, and application mapping to multi-core, accelerator and cloud platforms. *Prerequisite:* EE 355 or CSCI 201; *recommended preparation:* EE 109 or EE 352.

EE 452L Game Hardware Architectures (3, Fa) Architectural principles underlying modern game console hardware design; introduction to the programming techniques, optimization strategies, and hardware insights to create powerful games. *Prerequisite:* EE 352L.

EE 454L Introduction to System-on-Chip (4, Fa) Design flow, tools, and issues related to System/Network-on-Chip (S/Noc) design for real-time embedded systems with applications in mobile, cloud, aerospace, and medical electronics. *Prerequisite:* EE 354.

EE 455x Introduction to Programming Systems Design (4) (Enroll in CSCI 455x)

EE 457 Computer Systems Organization (3, FaSpSm) Register Transfer level machine organization; performance; arithmetic; pipelined processors; exceptions, out-of-order and speculative execution, cache, virtual memory, multi-core multi-threaded processors, cache coherence. *Prerequisite:* EE 354L or graduate standing.

EE 459Lx Embedded Systems Design Laboratory (3, FaSpSm) Specification, design, implementation, testing and documentation of a digital system project using embedded processors, programmable logic, analog I/O interfaces and application specific hardware. Capstone design experience. *Prerequisite:* EE 357;

recommended preparation: Knowledge of C programming. Open only to seniors.

EE 460 Introduction to Artificial Intelligence (3) (Enroll in CSCI 460)

EE 464 Probability Theory for Engineers (3, FaSpSm) Axiomatic foundations of probability, random variables, functions of several random variables, introduction to statistics, sequences of random variables. *Prerequisite:* EE 301L and MATH 445.

EE 465 Probabilistic Methods in Computer Systems Modeling (3, FaSp) Review of probability; random variables; stochastic processes; Markov chains; and simple queueing theory. Applications to program and algorithm analysis; computer systems performance and reliability modeling. *Prerequisite:* MATH 407 or EE 364.

EE 467 Introduction to Communication Systems (3) Analog and digital communication systems. (De)modulation and (de)multiplexing of AM/FM/PM, noise, digital data formats, error rates, and spectral analysis. Review of wireless, networking, and optical systems. *Prerequisite:* EE 301L.

EE 470 Electromagnetics II (3) Dynamic field theory and elementary solutions to Maxwell's equations. Introduction to propagation and radiation of electromagnetic fields. *Prerequisite:* EE 330.

EE 471 Applied Quantum Mechanics for Engineers (3) Introductory quantum mechanics and applications. Schrodinger equation, atomic and molecular processes, time-dependent perturbation theory. Applications to lasers, solid-state devices and gaseous devices. *Prerequisite:* EE 330 or graduate standing.

EE 472 Introduction to Lasers and Laser Systems (3, Fa) Electric dipole transitions; traveling wave and resonant amplifiers; laser pumping and rate equations; threshold, frequency, and power output of lasers; holography; laser communication systems. *Corequisite:* EE 470.

EE 473L Lasers and Optics Laboratory (3, Sp) Introductory design/research laboratory in lasers and optics, which typically includes fiber optics, photonics, electro-optics, optical sensors, optical communication, optical signal processing and computing. *Corequisite:* EE 470.

EE 474 Introduction to Photonics (3, Sp) Photonic system requirements; waveguide modes and dispersion; optical fiber modes, loss and dispersion; principles of operation of lasers, optical amplifiers, detectors and modulators; noise. *Prerequisite:* EE 330, EE 338.

EE 475 Wireless Communication Technology (3, Fa) Fundamentals of wireless communication from a device point of view. Lab experiments and design project. *Recommended preparation:* EE 241, EE 483.

EE 476 Chemical Engineering Materials (3, Sp) (Enroll in CHE 476)

EE 477L MOS VLSI Circuit Design (4, FaSpSm) Analysis and design of digital MOS VLSI circuits including area, delay and power minimization. Laboratory assignments including design, layout, extraction, simulation and automatic synthesis. *Prerequisite:* EE 277L or EE 338 or graduate standing.

EE 479 Analog Integrated Circuit Design (4, Sp) MOSFET and BJT operation and models; elementary amplifier configurations; biasing and references; frequency response; feedback; operational amplifiers. *Prerequisite:* EE 348.

EE 480 Introduction to Nanoscience and Nanotechnology (3, Fa) Next-generation nanoscale materials and electronic devices: nanoscale fabrication and characterization, nanomaterials, nanoelectronics, and nanobiotechnology. *Prerequisite:* EE 338.

EE 481L Control Systems Laboratory (3, Sp) (Enroll in AME 443L)

EE 482 Linear Control Systems (3, FaSpSm) Analysis of linear control systems; continuous and sampled-data systems, various stability criteria; frequency response and root locus compensation techniques. *Prerequisite:* EE 301L or graduate standing. (Duplicates credit in AME 451.)

EE 483 Introduction to Digital Signal Processing (3, FaSp) Fundamentals of digital signal processing covering: discrete time linear systems, quantization, sampling, Z-transforms, Fourier transforms, FFTs and filter design. *Prerequisite:* EE 301L.

EE 484x Communication System Design (3, Sp) Design and analysis of analog and digital communication systems. System models, requirements, development, performance analysis and component selection techniques. Comprehensive system design project. Capstone design experience. Open only to seniors. Not available for graduate credit. *Prerequisite:* EE 364, EE 475; *recommended preparation:* EE 467.

EE 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

EE 499 Special Topics (2-4, max 8) Course content will be selected each semester from current developments in the field of electrical engineering.

EE 500 Neural and Fuzzy Systems (3, FaSpSm) Neural networks and fuzzy systems, including: neuron structure and dynamics, unsupervised and supervised learning, network models and architectures, network stability and learning convergence. *Recommended preparation:* EE 503.

EE 501 Solid State (3) (Enroll in MASC 501)

EE 502 Advanced Solid State (3) (Enroll in MASC 502)

EE 503 Probability for Electrical and Computer Engineers (4, FaSp) Rigorous coverage of probability, discrete and continuous random variables, functions of multiple random variables, covariance, correlation, random sequences, Markov chains, estimation, and introduction to statistics. (Duplicates credit in EE 464 and EE 465.)

EE 504L Solid-State Processing and Integrated Circuits Laboratory (3) Laboratory oriented with lectures keyed to practical procedures and processes. Solid-state fabrication and analysis fundamentals; basic device construction techniques.

EE 506 Semiconductor Physics (3) Semiconductor bonds, crystallography, band structure assumptions, group theory, band structure results, k.p. method, quantum wells, wires and dots, superlattices, amorphous, organic semiconductors, defects, statistics, surfaces.

EE 507 Micro- and Nano-Fabrication Technology (3) Physical basis of technologies for the fabrication of micro- and nano-scale devices. Thin-film deposition, etching, and material modification processes; pattern-transfer methods. *Recommended preparation:* graduate standing in engineering, physics, or chemistry.

EE 508 Nano-Fabrication Lithography (3) Physical basis of lithography methods for nano-scale devices. Photon-, electron-, and ion-based systems, advanced processes; resolution enhancement techniques; directed self assembly.

EE 509 Electromagnetics for Semiconductor Photonics (3) Overview of electromagnetics needed to understand and design photonic devices. Includes discussion of waveguides and resonant cavities and an introduction to photonic crystals.

EE 511 Simulation Methods for Stochastic Systems (1) Project-oriented investigation of simulation methods used for the analysis and design of complex stochastic systems whose operation and performance are affected by random events. *Corequisite:* EE 503; *recommended preparation:* MatLab programming experience.

EE 512 Stochastic Processes (3) Probability theory and stochastic processes, including renewal theory, Markov chains, Brownian motion, martingales, and stochastic calculus. Applications in communication networks, queuing theory, and financial systems. *Prerequisite:* EE 441 and EE 503.

EE 513 Solid State Energy Devices (3) Design and operation of solar photovoltaic energy converters, thermovoltic energy converters, thermoelectric energy converters, and solid state light emitters; their roles in renewal and conservation of energy. *Recommended preparation:* EE 338.

EE 514 Quantum Error Correction (3) A comprehensive introduction to quantum error correction and decoherence control, from the basics to the cutting edge, enabling students to delve into current research topics. *Recommended preparation:* EE 520.

EE 515 High-Voltage Technology (3) High voltage engineering basic concepts; theoretical, design, and practical aspects of overvoltages, travelling-waves, insulation, and aging; breakdown mechanisms; insulation coordination.

EE 516 High-Voltage DC Transmission Systems (3) AC/DC conversion processes, converter technologies, and design; harmonics, controls, and protection; AC/DC interactions and system performance; modeling, application, and installation; current-source versus voltage-source converters. *Prerequisite:* EE 443.

EE 517 Statistics for Engineers (3, FaSpSm) Presents statistics with engineering emphasis. Topics include confidence intervals, hypothesis testing, estimation, regression, nonparametric tests, analysis of variance, quality control, and experimental design. *Recommended preparation:* EE 503.

EE 518 Mathematics and Tools for Financial Engineering (4) Students will build a mathematical background for studying financial engineering. Emphasis is on analysis, proofs and examples. Mathwork's financial toolbox will be introduced.

EE 519 Speech Recognition and Processing for Multimedia (3, Fa) Speech production, acoustics, perception, synthesis, compression, recognition, transmission. Coding for speech, music, and CD-quality. Feature extraction. Echo cancellation. Audio, visual synchronization. Multimedia, internet use. *Prerequisite:* EE 483.

EE 520 Introduction to Quantum Information Processing (3, FaSpSm) Introduces the basics of quantum computation and quantum information theory: quantum bits and registers, unitary gates, algorithms, error correction, and quantum cryptography. *Recommended preparation:* EE 441 and EE 503.

EE 521 Power Systems Analysis and Design (3) Power system planning, studies, and design; time-domain modeling and analysis of power-system networks; power flow, stability, fault, and economic dispatch analysis; symmetrical components. *Prerequisite:* EE 443.

EE 522 Immersive Audio Signal Processing (3, Sp) Fundamentals of digital audio signal processing, room acoustics, and psychoacoustics. Algorithms for real-time implementation of immersive audio systems for integrated media applications. *Prerequisite:* EE 301L; *recommended preparation:* EE 483.

EE 523 Advanced Biomedical Imaging (3) (Enroll in BME 525)

EE 524 Transients in Power Systems (3) Overvoltages during faults, voltage recovery, arcing faults, restrikes, theory of switching surges. Systems grounding, traveling waves, lightning and surge protection, insulation coordination. *Prerequisite:* EE 443.

EE 525 Power System Protection (3) Theory of system and equipment protection, characteristics of relays, relay coordination, and system considerations. *Prerequisite:* EE 443.

EE 526 Renewable Energy in Power Systems (3) Renewable energy sources and their integration in electrical networks. Power-flow control from highly variable resources. Cost analysis and planning.

EE 527 Net-Centric Power-System Control (3, FaSpSm) Control and stability of large-scale systems such as the electric power grid. Integration with information networks. *Corequisite:* EE 521; *recommended preparation:* EE 482.

EE 528 Power Electronics (3) Fundamentals of switched-mode power converters operating under steady-state and transient conditions. Feedback control systems. Magnetic circuit design.

EE 529 Optics (3) Basic graduate level optics including wave optics, foundations of geometric optics, optical elements, aberration theory, Hermite-Gaussian beams, multilayer structures, and matrix techniques. *Recommended preparation:* EE 470 or graduate standing.

EE 530 Optical Materials, Instruments and Devices (3) Anisotropic materials and devices; properties of metals; design and theory of selected optical instruments; properties of electrooptic, acoustooptic, and spatial light modulators; optical detectors. *Prerequisite:* EE 529.

EE 531 Nonlinear Optics (3) Theory of nonlinear optical susceptibility and application to self-focusing, harmonic generation, and parametric interactions. Raman and Brillouin scattering. Coherent spectroscopy. *Prerequisite:* EE 470.

EE 532 Wireless Internet and Pervasive Computing (3, Fa) Wireless Internet access technologies, 3G cellular systems, WAP and PKI protocols, mobile computing devices, network security for mobile E-commerce, software and middleware for pervasive, cluster, grid, and Internet computing. *Prerequisite:* EE 450; *recommended preparation:* EE 457.

EE 533 Network Processor Design and Programming (3, Sp) Understanding of network processor architecture, applications, and other relevant issues. Program network processor and test under realistic network environment. Design and deploy custom network processor. *Prerequisite:* EE 457; *recommended preparation:* EE 450.

EE 534 Materials Characterization (3) (Enroll in MASC 534)

EE 535 Mobile Communications (3, FaSpSm) The mobile communication channel; techniques used to combat the channel; cellular communications; multiple-access techniques; example mobile communication systems. *Prerequisite:* EE 503.

EE 536ab Mixed-Signal Integrated Circuit Design (4, Fa) *a:* MOSFET operation and models; elementary amplifier configurations; biasing and references; frequency response; noise; feedback; operational amplifiers; frequency compensation; non-linearity and mismatch; passive and active filters. *Prerequisite:* EE 448L or EE 479. *b:* Non-linear integrated circuits, data-converter architectures and implementations, comprehensive design project.

EE 537 Modern Solid-State Devices (3, Fa) Integrated-circuit technologies for mixed-signal communication and data systems. Constituent device models and their limitations. Contemporary research topics. *Prerequisite:* EE 338.

EE 539 Engineering Quantum Mechanics (3, Fa) Quantum mechanics for engineering majors who work with solid-state devices, quantum electronics, and photonics. Schroedinger equation, perturbation theory, electronic and optical processes.

EE 540 Introduction to Quantum Electronics (3) Fundamentals of light amplification; laser amplifiers and oscillators; atomic pumping; maser and laser systems; definitions of coherence; measurements in quantum electronics. *Prerequisite:* EE 470.

EE 541 Radio Frequency Filter Design (3, Fa) Theory and realization of passive and transconductance-based active filters for radio frequency communications. Distributed and quasi-distributed passive filters. Circuit testing via scattering parameters. *Prerequisite:* EE 348.

EE 542 Internet and Cloud Computing (3, Fa) Principles and technologies of server clusters, virtualized datacenters, Grids/P2P, Internet clouds, social networks, Internet of Things (IoT), and their innovative applications. *Recommended preparation:* EE 450 or EE 457.

EE 543abL Digital Control Systems (a: 3, Fa; b: 1) *a:* Design, analysis, and implementation of digital control systems using microcomputers; Z-transform methods; frequency domain and state space approach; computational aspects; sampling and quantization. *Prerequisite:* EE 482. *b:* Modeling of real processes; design and implementation of digital control systems in the controls laboratory. (Lab is required for the *b* section only.) (Duplicates credit in former EE 485abL.) *Prerequisite:* EE 543a.

EE 544 Radio Frequency Systems and Hardware (3, Sp) Elements of radio frequency communication systems: modulation/demodulation strategies, transmission-channel impairments, performance criteria,

hardware (low-noise amplifiers, mixers, oscillators), digital back-end, contemporary case studies. *Prerequisite:* EE 301L, EE 348L, EE 364.

EE 545 Robotics (3, FaSp) (Enroll in CSCI 545)

EE 546 Intelligent Embedded Systems (3, Sp) (Enroll in CSCI 546)

EE 547 Sensing and Planning in Robotics (3, Fa) (Enroll in CSCI 547)

EE 548 Analytical Methods in Robotics (3) (Enroll in AME 548)

EE 549 Queueing Theory for Performance Modeling (3, Sp) Review of Poisson and Markov processes; Markovian and non-Markovian queueing systems; networks of queues; priority queueing; applications of the theory to computer systems and communication networks. *Prerequisite:* EE 464 or EE 465 or EE 503.

EE 550 Design and Analysis of Computer Communication Networks (3) Applications of stochastic modeling and optimization techniques to communication network design and analysis. Data link control; performance models; multi-access channels; routing and flow control. *Prerequisite:* EE 450 and EE 503; *recommended preparation:* EE 549.

EE 551 Principles of Radar (3, Irregular) Signal propagation, reflections from targets; radar equation; detection of scintillating targets; resolution; ambiguity functions; clutter rejection; tracking radars. *Prerequisite:* EE 364 and EE 470.

EE 552 Asynchronous VLSI Design (3, FaSp) Asynchronous channels and architectures; implementation design styles; controller synthesis; hazards, and races; Petri-nets; performance analysis, and optimization; globally asynchronous locally synchronous design. Open only to graduate students. *Prerequisite:* EE 477.

EE 553 Computational Solution of Optimization Problems (3, Sp) Computer algorithms for system optimization. Search techniques, gradient methods, parameter optimization in control systems. Optimization with constraints; linear and nonlinear programming. Random search techniques. *Prerequisite:* EE 441.

EE 554 Real Time Computer Systems (3, Sp) Structure of real-time computer systems; analog signals and devices; scheduling, synchronization of multiprocessors; reliability, availability; serial/parallel computations; real-time operating systems and languages; design examples. *Prerequisite:* EE 457.

EE 555 Broadband Network Architectures (3, FaSpSm) Broadband network architectures and services, technologies for high-speed access and core networks, optical infrastructure for layered network architectures, high performance switch and router architectures. *Prerequisite:* EE 450 and EE 503.

EE 556 Stochastic Systems (3, FaSpSm) Stochastic system models, Dynamic programming, Linear quadratic control, Kalman filtering and estimation, System identification, approximate dynamic programming methods, adaptive control and online learning. *Prerequisite:* EE 464 or EE 465 or EE 503. *Recommended preparation:* EE 512 or EE 562 or ISE 538.

EE 557 Computer Systems Architecture (3, FaSp) Computer architecture from a design perspective: Pipelined processors, speculative execution, VLIW, vector processors, memory systems, interconnection networks, shared-memory and message-passing multiprocessors, chip multiprocessors. *Prerequisite:* EE 457.

EE 558 Optical Fiber Communication Systems (3, FaSp) State-of-the-art optical fiber communication systems. Emphasis on optoelectronic-device and communication-systems issues necessary to provide high-speed and/or networked optical communications. *Recommended preparation:* EE 338; basic knowledge of optics, semiconductor, and communications concepts.

EE 559 Mathematical Pattern Recognition (3, Sp) Distribution free classification, discriminant functions, training algorithms; statistical classification, parametric and nonparametric techniques; artificial neural networks. *Corequisite:* EE 441, EE 503.

EE 560 Digital System Design-Tools and Techniques (3, Sm) ASIC design, FPGAs, VHDL, verilog, test

benches, simulation, synthesis, timing analysis, post-synthesis simulation, FIFOs, handshaking, memory interface, PCI bus protocol, CAD tools, design lab exercises. *Prerequisite:* EE 457, EE 454L; *recommended preparation:* familiarity with CAD tools.

EE 561 Foundations of Artificial Intelligence (3-3, FaSp) (Enroll in CSCI 561)

EE 562ab Random Processes in Engineering (a: 3, FaSpSm; b: 3, Irregular) *a:* Random vectors, sequences, and functions. Linear transformations, second moment theory, spectral densities, narrowband processes, Gaussian processes, correlation detection, linear minimum mean square error estimation. *Prerequisite:* EE 441, EE 464 or EE 503. *b:* Orthogonal or independent increment processes. Poisson processes. Nonlinear operations on random processes; power-law detectors. Markov chains and processes; the Fokker-Planck equation; level crossing problems. *Prerequisite:* EE 562a.

EE 563 Estimation Theory (3, Fa) Parameter estimation and state estimation technique including: least squares, BLUE, maximum-likelihood, maximum a posteriori, Kalman-prediction, Kalman-filtering and Kalman smoothing and extended Kalman filtering. *Prerequisite:* EE 562.

EE 564 Digital Communication and Coding Systems (3) Digital modulations. Optimal reception. Performance analysis. Classical and modern codes. Viterbi, forward-backward, and iterative decoding. Practical designs for channels with memory or nonlinearities. Example systems. *Prerequisite:* EE 441 and EE-503. *Recommended preparation:* EE 511.

EE 565ab Information Theory (a: 3, Fa; b: 3, Irregular) Information measures; asymptotic equipartition property; source coding theorem; noiseless coding; cryptography, channel coding theorem; rate distortion theory; Gaussian channels; multiple user source and channel theory. *Prerequisite:* EE 464 or EE 465 or EE 503.

EE 566 Optical Information Processing (3, Fa) Coherent and incoherent optical transforming, imaging and two-dimensional information processing systems; optical image processing, spatial frequency response and filtering; optical and digital holography. *Recommended preparation:* EE 401.

EE 567 Communication Systems (3, Fa) Analysis of communication systems operating from very low to optical frequencies. Comparison of modulation and detection methods. System components description. Optimum design of communication systems. *Corequisite:* EE 464 or EE 465 or EE 503; *recommended preparation:* EE 441.

EE 569 Introduction to Digital Image Processing (3, FaSpSm) Image sampling, 2-D image transform, image enhancement, geometric image modification, morphologic processing, edge detection, texture analysis, image filtering and restoration. Graduate standing. *Recommended preparation:* EE 401 and EE 503.

EE 570ab Advanced Electromagnetic Theory (3-3) Static and dynamic electromagnetic field theory; solution of scalar and vector boundary value problems; Kirchhoff radiation theory; geometrical optics and geometrical diffraction theory. *Prerequisite:* EE 470.

EE 571ab Microwave Networks (3-3) *a:* Microwave network theory for transmission lines and waveguides, discontinuities, impedance transformers, resonators, multi-junction networks, periodic structures, non-reciprocal and active devices. *Prerequisite:* EE 470. *b:* Parameter matrices, approximate design procedures for distributed networks from lumped networks, coupled lines, equivalent coupled-line circuits, Kuroda's identities, and capacitance matrix transformations. *Prerequisite:* EE 571a.

EE 572ab Plasma Dynamics (3-3) Particle drifts, collision phenomena, Boltzmann and Vlasov equations, hydrodynamic equations, Coulomb interactions; waves in a cold and hot plasma, plasma oscillations, Landau damping, hydromagnetic waves.

EE 573ab Antenna Analysis (3-3) Analysis of idealized antenna models, including the dyadic Green's function, reciprocity, aperture radiation, methods of moments, geometrical and physical optics, reflectors, arrays. *Prerequisite:* EE 470.

EE 574 Computer Vision (3, Fa) (Enroll in CSCI 574)

EE 577ab VLSI System Design (a: 3, FaSp; b: 3, FaSp) *a*: Integrated circuit fabrication; circuit simulation; basic device physics; simple device layout; structured chip design; timing; project chip; MOS logic; system design silicon compilers. *Prerequisite*: EE 477; *b*: VLSI design project; chip level design issues: power and clock distribution, packaging, I/O; design techniques; testability; chip fabrication and test.

EE 578 Reflector Antennas (3) Introduction to the analytical and numerical techniques used in the analysis and design of modern reflector antenna systems, including physical optics, asymptotic techniques, shaping and feeds. *Prerequisite*: EE 470.

EE 579 Wireless and Mobile Networks Design and Laboratory (3, Sp) Mobile ad hoc networks: ad hoc and geographic routing, resource discovery, medium access control, IP-mobility, mobility modeling, wired-wireless networks. Lab: wireless LAN measurement, mobile-IP, ad hoc routing. *Prerequisite*: CSCI 551 or EE 550 or EE 555; *recommended preparation*: programming, network simulation.

EE 581 Mathematical Foundations for Computer-Aided Design of VLSI Circuits (3, Sp) Mathematical techniques employed in computer-aided-design systems, including: graph theory, algorithmic and heuristic techniques for combinatorial problems, data structures and modeling. *Corequisites*: EE 457, EE 477.

EE 583 Statistical Signal Processing (3) Characterization of discrete-time random processes. Parametric and non-parametric spectral estimation, adaptive filtering, signal subspace methods, independent components analysis, non-Gaussian signal processing. *Prerequisite*: EE 503.

EE 584 Chaotic Systems (3, Fa) Logistic map, chaotic bifurcation, strange attractors, and fractals. Conservative dynamical systems and measure preserving transformations. Ergodicity. Kolmogorov-Sinai entropy. Chaotic/stochastic realization. Chaos in feedback. *Prerequisite*: EE 562.

EE 585 Linear System Theory (3, FaSpSm) Analysis of linear dynamical systems by state-space techniques; controllability, observability, stability, passivity. Application of feedback control and network synthesis. *Prerequisite*: EE 441. (Duplicates credit in AME 541.)

EE 586L Advanced DSP Design Laboratory (4) Real-time adaptive signal processing design projects using special purpose DSP processors. Suitable project areas include acoustics, speech, arrays, image compression and biomedical signal processing. *Prerequisite*: EE 583 or EE 569.

EE 587 Nonlinear and Adaptive Control (3, Fa) Nonlinear systems, Lyapunov Stability, Parameter Identification, direct and indirect adaptive control for linear and nonlinear systems. Design analysis, stability, robustness and applications. Backstepping, feedback linearization. *Prerequisite*: EE 482, EE 585.

EE 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

EE 591 Magnetic Resonance Imaging and Reconstruction (3, FaSp) Principles of magnetic resonance imaging. Spin physics, Fourier-based acquisition and reconstruction, generation of tissue contrast, fast imaging, artifact correction, advanced image reconstruction. *Prerequisite*: EE 483; *recommended preparation*: EE 441 and EE 503. Familiarity with MATLAB is required.

EE 592 Computational Methods for Inverse Problems (3, FaSpSm) Vector-space methods for solving inverse problems. Existence and uniqueness of solutions; conditioning and regularization; iterative algorithms; constrained optimization; applications in signal and image processing. *Prerequisite*: EE 483 and EE 441. *Recommended preparation*: EE 503.

EE 593 Multivariable Control (3, Fa) Feedback performance analysis; robustness and stability margins; sensitivity; disturbance attenuation; design tradeoffs; singular value, characteristic locus, and inverse Nyquist array design methods. *Prerequisite*: EE 482 and EE 585.

EE 594abz Master's Thesis (2-2-0, FaSpSm) For the master's degree. Credit on acceptance of thesis. Graded IP/CR/NC.

EE 596 Wavelets (3, Fa) The theory and application of wavelet decomposition of signals. Includes subband

coding, image compression, multiresolution signal processing, filter banks, and time-frequency tilings. *Prerequisite:* EE 441, EE 483; *recommended preparation:* EE 569, MATH 570a.

EE 597 Wireless Networks (3, Fa) Introduction to wireless networking technologies; fundamental architectural and design principles used at all protocol layers; optimization and performance evaluation using mathematical analysis and simulations. *Prerequisite:* EE 450 and EE 503; *recommended preparation:* EE 467, familiarity with Matlab and C programming.

EE 598 Electrical Engineering Research Seminar (1, max 2) Introduction to research in electrical engineering. Topics vary by semester. May be repeated for up to one unit of credit for M.S. students, two units of credit for Ph.D. students. Open only to master's and doctoral students. Graded CR/NC.

EE 599 Special Topics (2-4, max 9) The course content will be selected each semester to reflect current trends and developments in the field of electrical engineering.

EE 601 Advanced Semiconductor Device Physics (3) Fundamentals and limitations of nanoscale electronic and photonic semiconductor components. Engineering classical, mesoscale, and quantum electron and photon dynamics in advanced devices. *Recommended preparation:* EE 471 or EE 539.

EE 606 Nonequilibrium Processes in Semiconductors (3) Non-equilibrium processes in modern semiconductor devices. Carriers lifetime and trapping; luminescence; hot carrier and high field effects.

EE 607 Microelectromechanical Systems (3, FaSp) Exploration of the technology methods and physical principles of MEMS, and survey various MEMS of current interest. *Prerequisite:* EE 504.

EE 608L Microelectromechanical Systems Laboratory (3, Fa) Lab fabrication and analysis of several MEMS applications, including diaphragm-based sensors and actuators, microfluidic components, and deformable mirror array.

EE 612 Science and Practice of Nanotechnology (3, Fa) In-depth discussions of important topics in nanotechnology, including both the implementation and the underlying theory. *Prerequisite:* EE 330 or EE 470.

EE 619 Advanced Topics in Automatic Speech Recognition (3, FaSpSm) Advanced topics in automatic speech recognition, speaker recognition, spoken dialogue, conversational multimedia interfaces. *Recommended preparation:* EE 519 and CSCI 544 and EE 503.

EE 620 Advanced Topics in Applied Stochastic Models (3, FaSp) (Enroll in ISE 620)

EE 632 Integrated Communication Systems (3) Analysis and design of high-speed integrated communication systems at circuit and system levels. Emphasis on broadband wireless applications. Transceiver architectures, amplifiers, oscillators, frequency synthesizers. *Prerequisite:* EE 536a.

EE 635 Advanced Wireless Communications (3) Fundamentals of advanced wireless systems, including multi-antenna, cognitive, and cooperative systems as well as exploration of current standards in wireless networks in use today. *Prerequisite:* EE 535; *recommended preparation:* basic programming course.

EE 642 Advanced Geometrical Optics (3) First order design of optical systems; origin of aberrations and their effects on wave propagation and imaging based on geometrical and physical optics. *Prerequisite:* EE 529.

EE 645 Uncertainty Modeling and Stochastic Optimization (3) (Enroll in CE 645)

EE 648 Network Economics and Games (3) Economics of networks; game theory, mechanism design and auctions in networks; spectrum sharing mechanisms in communications; pricing of differentiated services; network security. *Prerequisite:* EE 450 and EE 503.

EE 649 Stochastic Network Optimization (3, FaSpSm) Optimization of wireless and ad-hoc mobile networks; opportunistic scheduling, flow control; back-pressure routing; queue stability; energy-delay and utility-delay trade-offs. *Prerequisite:* EE 503.

EE 650 Advanced Topics in Computer Networks (3, Irregular) Protocol modeling: flow and congestion control, dynamic routing, distributed implementation; broadcast communication media and multiple access protocols; local networks, satellite networks, terrestrial radio networks. *Prerequisite:* EE 450 and EE 503; *recommended preparation:* EE 550 or CSCI 551.

EE 652 Low-Power Wireless Networks (3, Fa) Implementation of low-power wireless protocols for medium access, scheduling, multi-hop routing, congestion control, localization, synchronization. IP stack for the Internet of Things. Wireless sensor network applications. *Prerequisite:* EE 450; *recommended preparation:* CSCI 402, strong programming skills, and experience with Linux.

EE 653 Advanced Topics in Microarchitecture (3) Current research topics related to microprocessor architecture. Dynamically/statically scheduled processors, multithreading, chip multiprocessors, systems on a chip. Power, performance, complexity, dependability issues. Impact of technology. *Prerequisite:* EE 557.

EE 657 Parallel and Distributed Computing (3, FaSpSm) Scalable multiprocessor systems and clusters, virtual machine, service oriented architecture, network-based computing, peer-to-peer, grid and cloud based storage and computing, case studies. *Prerequisite:* EE 557; *recommended preparation:* EE 450.

EE 658 Diagnosis and Design of Reliable Digital Systems (3, Fa) Fault models; test generation; fault simulation; self-checking and self-testing circuits; design for testability; fault tolerant design techniques; case studies. *Prerequisite:* graduate standing.

EE 659 Interconnection Networks (3, Sp) Theory, design and analysis of interconnection networks for multiprocessor systems. Study of direct and indirect topologies, deadlock-free routing, flow control, network interfaces, optical interconnects. *Prerequisite:* EE 557.

EE 660 Machine Learning from Signals: Foundations and Methods (3, Fa) Supervised, semi-supervised, and unsupervised machine learning; classification and regression. Model complexity, assessment, and selection; performance (error) on unseen data. *Prerequisite:* EE 441 and EE 503. *Recommended preparation:* EE 559 or CSCI 567.

EE 664 Advanced Topics in Communication Theory (3) Modern communication theory for heterogeneous networks. Novel methods for communication network analysis and design. New theoretical tools: e.g. interference alignment, polar codes, and sparse approximation. *Prerequisite:* EE 564; *recommended preparation:* EE 535 and EE 565.

EE 667 Array Signal Processing (3, Sp) Beamforming principles, monopulse and conical-scan concepts, phased arrays, synthetic multiple beam arrays; signal processing techniques for synthetic aperture formation, adaptivity, and retro-directing. *Prerequisite:* EE 562.

EE 669 Multimedia Data Compression (3, FaSpSm) Lossless compression, audio/speech coding, vector quantization, fractal compression, JPEG and JPEG-2000, video compression techniques and MPEG standards, video transmission over wired and wireless networks. *Recommended preparation:* EE 503.

EE 674ab Advanced Topics in Computer Vision (3-3, Irregular) (Enroll in CSCI 674ab)

EE 677 VLSI Architectures and Algorithms (3) VLSI models; measures of area, volume and time; mapping algorithms; systolic arrays; area time tradeoffs; applications to signal and image processing problems. *Prerequisite:* EE 557.

EE 680 Computer-Aided Design of Digital Systems I (3, Sp) Synthesis; partitioning; placement; routing of digital circuits; integrated circuit design methods; simulation at the switch, gate, register transfer and system levels. *Prerequisite:* EE 581; *recommended preparation:* EE 577a.

EE 681 Computer-Aided Design of Digital Systems II (3) Theory and techniques for design and analysis of digital logic; specification, formal models; hardware-descriptive languages; formal verification, high level synthesis; logic synthesis. *Prerequisite:* EE 557, EE 680.

EE 682 Law and Intellectual Property for Engineers (3, Sp) Detailed introduction to the modern

American legal system with a special focus on intellectual-property doctrines. *Recommended preparation:* EE 503.

EE 690 Directed Research (1-4, maximum number to be determined by the department, FaSpSm)
Laboratory study of specific problems by candidates for the degree Engineer in Electrical Engineering. Graded CR/NC.

EE 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

EE 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC

Master of Science in Green Technologies

Green Technologies is a highly interdisciplinary degree program that emphasizes green systems and the environment, energy technology and efficiency, and sustainability and society. The discipline seeks opportunities for alternative sourcing, conservation, efficiency and repurposing through an understanding of product life cycles from origins to recycling or inevitable disposal. Green technologists will design products, processes and complex infrastructure systems to promote sustainable attributes of importance to the environment and the global community.

The Green Technologies program requires a minimum of 27 units (typically nine courses). At least 18 units must be at the 500-level or above, and at least 18 units must be completed in the Viterbi School of Engineering. These 18 units may reflect courses offered by other schools if cross-listed in a department in the Viterbi School. Students with B.S. degrees in engineering and science disciplines can be accepted into the program.

REQUIRED COURSES		UNITS
------------------	--	-------

Students are required to take two courses in each of three topical areas:

Green Systems and the Environment (two courses)

CE 515	Sustainable Infrastructure Systems	3
ISE 576	Industrial Ecology: Technology-Environment Interaction	3

Energy Technology and Efficiency (two courses)

CHE 510	Energy and Process Efficiency, or	
AME 577	Survey of Energy and Power for a Sustainable Future	3

Also take only one of the following:

EE 513	Solid State Energy Devices	3
EE 526	Renewable Energy in Power Systems	3
ENE 505	Energy and the Environment	3

Sustainability and Society (two courses)

CE 469	Sustainable Design and Construction	3
--------	-------------------------------------	---

*Also take one of the following:**

ARCH 519	Sustainability in the Environment: Infrastructures, Urban Landscapes, and Buildings	3
CE 567	Smart Infrastructures	3
ENE 502	Environmental and Regulatory Compliance	3
GEOG 581	Concepts for Spatial Thinking	4
MOR 566	Environmental Sustainability and Competitive Advantage	1.5 or 3
POSC 546	Seminar in Environmental Policy	4
PPD 692	Transportation and the Environment	4
PPDE 632	Sustainable Cities	4

Electives (three courses)	9
---------------------------	---

Electives shall be chosen in consultation with an adviser to develop technical specialization in an area of interest to the student. This may include up to 3 units of directed research.

**Additional courses from this list may be used to fulfill the elective requirement.*

Adjunct Research Professors: Wanda M. Austin, Ph.D.; Mohamed I. Dessouky, Ph.D.

Associate Professors of the Practice of Industrial and Systems Engineering: Geza Bottlik, Engineer, P.E.; Nitin Kale, M.S. (*Information Technology Program*); Kurt Palmer, Ph.D.*

Senior Lecturers: Cesar Acosta-Mejia, Ph.D.; Dana Sherman, Esq. (*Civil and Environmental Engineering*); Richard Vawter, M.S. (*Information Technology Program*)

Emeritus Professors: Gerald A. Fleischer, Ph.D., P.E.; Homer H. Grant, M.S.; Ralph Keeney, Ph.D. (*Data Sciences and Operations*); Peter Will, Ph.D. (*Aeronautical Engineering, Chemical Engineering*)

*Recipient of university-wide or school teaching award.

Honor Societies

Alpha Pi Mu

Alpha Pi Mu is the industrial engineering honor society. Qualifications for election are: juniors in the upper one-fifth of their class; seniors in the upper one-third of their class; master's degree students who have completed at least one-third of the courses required for their degree and rank among the top 10 students in all ISE master's degree programs; and doctoral students recommended by the department chair. The adviser is Kurt Palmer, associate professor of the practice of industrial and systems engineering, (213) 740-5960.

Omega Rho

Omega Rho is the operations research honor society to recognize academic excellence in operations research and encourage study of operations research, management science and closely associated disciplines. Election is by nomination only during the spring semester.

Viterbi School of Engineering

Daniel J. Epstein Department of Industrial and Systems Engineering

Undergraduate Degree Requirements

Undergraduate Education Program Mission

The mission of the Daniel J. Epstein Department of Industrial and Systems Engineering undergraduate program is to:

- Provide students: the skills and knowledge to obtain employment and achieve leadership with the industrial and systems engineering profession or to proceed with graduate education; the intellectual resources to continue life-long learning; and the knowledge of professional ethics and critical reasoning skills necessary for contributing to society.
- Provide employers of industrial and systems engineering professionals with candidates who are technically competent, business aware, collaborative, able to communicate effectively, and ethically grounded.
- Maintain and enhance the reputation of the Epstein department within the engineering, business and academic communities.

Undergraduate Program Educational Objectives

Graduates of the Bachelor of Science in Industrial and Systems Engineering program are prepared to achieve any of the following accomplishments:

- Obtain employment in an organization that values people who demonstrate both technical competence and business awareness.
- Pursue graduate or professional education.
- Assume a leadership role in their employment organization or community.
- Utilize critical reasoning, collaboration and creativity to contribute to society.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Industrial and Systems Engineering prepares graduates to design, develop, implement, and improve integrated systems that include people, materials, information, equipment and energy. The curriculum includes in-depth instruction to accomplish the integration of systems using appropriate analytical, computational, and experimental practices.

For additional information, visit usc.edu/dept/ise.

Bachelor of Science in Industrial and Systems Engineering

The Epstein Department of Industrial and Systems Engineering offers a Bachelor of Science degree in Industrial and Systems Engineering. Additionally, information systems engineering exists as an emphasis within this industrial and systems engineering program major. An area of emphasis appears in parentheses after the primary major name on the transcript.

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied towards the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees.

COMPOSITION/WRITING REQUIREMENT UNITS

WRIT 150*	Writing and Critical Reasoning — Thematic Approaches	4
WRIT 340	Advanced Writing	3

GENERAL EDUCATION UNITS

General education* +	20
----------------------	----

PRE-MAJOR REQUIREMENTS UNITS

Math Requirement

MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 225	Linear Algebra and Linear Differential Equations	4
MATH 226	Calculus III	4

Physics Requirement

PHYS 151L**	Fundamentals of Physics I: Mechanics and Thermodynamics	4
PHYS 152L	Fundamentals of Physics II: Electricity and Magnetism	4

Chemistry Elective

CHEM 105aL	General Chemistry, or	
CHEM 115aL	Advanced General Chemistry, or	
MASC 110L	Materials Science	4

Economics Requirement

ECON 203	Principles of Microeconomics	4

MAJOR ELECTIVES		UNITS
Approved engineering electives***		3
Free electives		7
Total units:		128

*GE Category VI is taken concurrently with WRIT 150.

**GE Category III is fulfilled by PHYS/CHEM requirement.

***Students selecting EE 326 are only required to complete 2 units of approved engineering elective.

+The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

Minor in Engineering Management

This minor is designed to provide students who have a sound foundation in mathematics and the sciences with tools and skills for managerial analysis and problem solving.

Science and technology are driving significant portions of American and global economies. Individuals, companies and governments are demanding products, services and systems, which grow more complicated every day. Suppliers are forced by competition to provide goods and services efficiently and economically.

Scientists and engineers are trained in scientific and technical subjects which form an excellent base for building complex, technical products, services and systems. But more and more, scientists and engineers are managing the financial, material and human resources required to turn abstract ideas into physical and virtual reality, often without any formal management training. This minor provides that training, a complement to any science or technology degree.

Application Procedures

Applicants must be upper division students in good standing and complete the Change/Addition of Major, Minor or Degree Objective form. The minor is not open to industrial and systems engineering majors.

PREREQUISITES		UNITS
ISE 220	Probability Concepts in Engineering (or equivalent)	3
ISE 225	Engineering Statistics I (or equivalent)	3
MATH 125	Calculus I	4
MATH 126	Calculus II	4

MATH 225	Linear Algebra and Linear Differential Equations (or equivalent)	4
MATH 226	Calculus III	4

REQUIRED COURSES		UNITS
BUAD 301	Technology Entrepreneurship	3
ISE 330	Introduction to Operations Research: Deterministic Models	3
ISE 370L	Human Factors in Work Design	4
ISE 440	Work, Technology, and Organization	3
ISE 460	Engineering Economy	3

Viterbi School of Engineering

Graduate Degree Requirements

Analytics Program
Ethel Percy Andrus
Gerontology Center 240
(213) 740-4893

The Master of Science in Analytics is designed to satisfy the growing demand for professionals equipped with significant technical and quantitative training in the fundamentals of analytics for solving engineering and management problems in today's data-extensive digital world.

Analytics is a multidisciplinary field that relates the application of engineering approaches and methods to the analysis and management of engineering and enterprise processes based on data. Learning objectives of this program involve data collection, cleansing, fusing and curating, for the purpose of analyzing trends, discovering patterns and building decision models for well-reasoned decision support. Rigorous mathematical modeling and computational methods tools are at the heart of the program.

Graduates of this program will be prepared to convert data into meaningful information, embedded in decision support systems that can help organizations make important operational decisions and help set strategic direction and policy.

Master of Science in Analytics

The core of the M.S. in Analytics program consists of six foundational courses, and four elective courses, totaling 30 units. The foundational courses cover the basic topics of data science and management, statistical methods, optimization, simulation and other operations research tools. The elective courses allow students to deepen their technical skills and expose them to the applied domains where analytics is much needed; some of these domains include electricity markets, supply chains and logistics, health care systems, and transportation.

REQUIRED COURSES		UNITS
DSO 529	Advanced Regression Analysis	3
INF 551	Foundations of Data Management	3
ISE 515	Engineering Project Management	3
ISE 529	Engineering Data Analytics	3
ISE 530	Optimization Methods for Analytics	3
ISE 580	Performance Modeling and Simulation	3

ELECTIVES		UNITS
-----------	--	-------

ISE Elective	3
INF or CSCI Elective	3
Electives subject to adviser approval	6

Total units for the degree: 30

Engineering Management Program

Ethel Percy Andrus

Gerontology Center 240

(213) 740-4893

Program Director: Geza Bottlik, Engineer, P.E.

This program is designed primarily, but not exclusively, for graduate engineers whose career objectives lead to increasing technical management responsibilities. Students interested in the engineering management objectives may also want to consider the M.S., Industrial and Systems Engineering/MBA dual degree program.

Master of Science in Engineering Management

A total of 30 units is required for the degree. A minimum of 18 units must be taken in the Epstein Department of Industrial and Systems Engineering. A total of 21 units must be at the 500 level or above. The program is available via distance education.

Applicants to the program are expected to have a degree in engineering or the equivalent.

REQUIRED COURSES (6 UNITS) UNITS

ISE 500	Engineering Management Decisions and Statistics	3
ISE 561	Economic Analysis of Engineering Projects	3

AT LEAST ONE COURSE FROM THE ACCOUNTING AREA IS REQUIRED (3 UNITS) UNITS

CE 502	Construction Accounting and Finance	3
ISE 566	Financial Accounting Analysis for Engineering	3

AT LEAST TWO COURSES FROM THE ENGINEERING MANAGEMENT AREA ARE REQUIRED (6 UNITS) UNITS

ISE 515	Engineering Project Management	3
ISE 544	Management of Engineering Teams	3
ISE 564	Performance Analysis	3
ISE 565	Law and Finance for Engineering Innovation	3

AT LEAST ONE COURSE FROM THE QUANTITATIVE METHODS AREA IS REQUIRED (3 UNITS) UNITS

ISE 513	Inventory Systems	3
ISE 514	Advanced Production Planning and Scheduling	3
ISE 525	Design of Experiments	3
ISE 527	Quality Management for Engineers	3
ISE 530	Optimization Methods for Analytics	3

Electives (12 units):

Four courses for at least 12 units chosen to form a coherent program with the consent of the adviser.

Health Systems Management Engineering Program

This degree is in revision, and applications are not currently being accepted. Interested students should consider the Master of Health Administration program in the USC Price School of Public Policy.

Master of Science in Industrial and Systems Engineering

The Master of Science in Industrial and Systems Engineering is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. This program enhances the technical capabilities of the industrial engineer. The program is available via distance education.

The M.S. program is for students who want to become technical leaders in the field of industrial and systems engineering. Applicants to the program are expected to have a bachelor's degree in an engineering discipline with undergraduate course work in computing, probability and statistics, and engineering economy. Admitted students who do not meet prerequisites will be assigned courses to complete the deficiencies.

A total of 30 units is required for the degree, of which at least 18 units must be completed in the Epstein Department of Industrial and Systems Engineering. Of the 30 units, 20 must be at the 500 level or above.

Operations Research Engineering Program

Ethel Percy Andrus
Gerontology Center 240
(213) 740-4891

Program Director: Maged Dessouky, Ph.D.

Master of Science in Operations Research Engineering

The Master of Science in Operations Research Engineering is conferred upon candidates who hold bachelor's degrees in engineering, mathematics, science or related fields who successfully complete an integrated program (with departmental approval in advance) of not less than 30 units. The program must include not less than 21 units of industrial and systems engineering courses related to operations research and 9 units of approved electives. Students will be required to make up deficiencies in mathematics and statistics. Additional courses or examinations may be required at the discretion of the department before full admission to the program. The General Test of the Graduate Record Examinations (GRE) is required. Additional information is available from the department. This program is available via distance education.

REQUIRED COURSES

		UNITS
ISE 532	Network Flows	3
ISE 536	Linear Programming and Extensions	3
ISE 538	Elements of Stochastic Processes	3
ISE 580	Performance Modeling and Simulation	3
ISE 582	Web Technology for Industrial Engineering, or	
ISE 583	Enterprise Wide Information Systems	3

400- or 500-level computer science course, approved by faculty adviser		3
Two electives, approved by faculty adviser		6
		30

Master of Science in Product Development Engineering

This interdisciplinary program is offered jointly with the Department of Aerospace and Mechanical Engineering. The program is available via distance education. See the listing under Product Development Engineering.

Master of Science in Systems Architecting and Engineering

See the listing under Systems Architecting and Engineering. The program is available via distance education.

Dual Degree Program (M.S., Electrical Engineering / M.S., Engineering Management)

See listing in the Electrical Engineering section.

Dual Degree Program (M.S., Industrial and Systems Engineering / MBA)

The USC Marshall School of Business in conjunction with the Epstein Department of Industrial and Systems Engineering offers a program leading to the degree of Master of Business Administration/Master of Science in Industrial and Systems Engineering.

This alternative requires 66 units for graduates of industrial and systems engineering undergraduate curricula and leads to both a Master of Science in Industrial and Systems Engineering and the Master of Business Administration. The dual degree provides an education of great depth.

The total number of units required for the MBA program is 48 including all required courses in an MBA program and graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students may not count courses taken outside the Marshall School of Business toward the 48 units.

REQUIRED COURSES (MINIMUM 18 UNITS)

	UNITS	
ISE 514	Advanced Production Planning and Scheduling	3

Engineer in Industrial and Systems Engineering

Requirements for the Engineer in Industrial and Systems Engineering are the same as set forth in the general requirements.

Doctor of Philosophy in Industrial and Systems Engineering

The degree Doctor of Philosophy in Industrial and Systems Engineering is also offered. See general requirements for graduate degrees.

Graduate Certificates

Graduate Certificate in Health Systems Operations

This 17-unit graduate certificate is jointly sponsored by the Epstein Industrial and Systems Engineering Department and the USC Price School of Public Policy (Master of Health Administration program), and

administered by the Epstein ISE Department. This certificate is designed for students with bachelor's degrees in applied social science, engineering or the sciences, who are interested in operations management and health care applications. The courses taken for the certificate may be applied later to the Epstein ISE Department's Master of Science in Engineering Management degree, the USC Price School of Public Policy's Master of Health Administration degree or the jointly sponsored M.S. in Health Systems Management Engineering degree subject to approval of the appropriate academic unit. This program is available via distance education.

REQUIRED COURSES		UNITS
ISE 507	Six-Sigma Methods and Applications	3
ISE 508	Health Care Operations Improvement	3
PPD 509	Problems and Issues in the Health Field	4
PPD 513	Legal Issues in Health Care Delivery, and	2
PPD 517	Concepts and Practices in Managing Health Care Organizations, or	2
PPD 514	Economic Concepts Applied to Health	4
PPD 557	Modeling and Operations Research (4), or	
ISE 530	Optimization Methods for Analytics (3), or	
ISE 562	Value and Decision Theory (3)	3-4
		17-18

Graduate Certificate in Network Centric Systems

See listing under Systems Architecting and Engineering. The program is available via distance education.

Graduate Certificate in Optimization and Supply Chain Management

This abbreviated interdisciplinary program is offered jointly with the Department of Data Sciences and Operations in the USC Marshall School of Business. See here for program requirements.

Graduate Certificate in Systems Architecting and Engineering

See listing under Systems Architecting and Engineering. The program is available via distance education.

Graduate Certificate in Transportation Systems

This abbreviated interdisciplinary program is offered jointly with the Astani Department of Civil and Environmental Engineering and the USC Price School of Public Policy. See listing under Civil Engineering.

Graduate Certificate in System Safety and Security

Applications for this program are not currently being accepted.

Viterbi School of Engineering

Daniel J. Epstein Department of Industrial and Systems Engineering

Courses of Instruction

INDUSTRIAL AND SYSTEMS ENGINEERING (ISE)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ISE 105 Introduction to Industrial and Systems Engineering (2, FaSp) A combination of plant tours, laboratory experiences, and lecture are used to introduce the philosophy, subject matter, aims, goals, and techniques of industrial and systems engineering.

ISE 220 Probability Concepts in Engineering (3, FaSp) Techniques for handling uncertainties in engineering design: discrete and continuous random variables; expectations, probability distributions and transformations of random variables; limit theorems; approximations and applications. *Prerequisite:* MATH 126.

ISE 225 Engineering Statistics I (3, Sp) Sampling distributions; parameter estimation, hypothesis testing; analysis of variance; regression; nonparametric statistics. *Prerequisite:* ISE 220.

ISE 232L Manufacturing Processes (3, Fa) Basic manufacturing processes including casting, machining, forming and welding; current trends in manufacturing processes including polymer, ceramic and composite material processing, and electronic device fabrication; introduction to numerical control and computer integrated manufacturing. *Recommended preparation:* MASC 110L or CHEM 105aL or CHEM 115aL.

ISE 310L Facilities and Logistics (4, FaSp) Facilities layout and design: material handling and transportation; site selection and sourcing; supply chain management. *Prerequisite:* ISE 330 and ISE 460.

ISE 330 Introduction to Operations Research: Deterministic Models (3, Fa) Introduction to linear programming; transportation and assignment problems; dynamic programming; integer programming; nonlinear programming. *Prerequisite:* MATH 225.

ISE 331 Introduction to Operations Research: Stochastic Models (3, Sp) Stochastic processes; Markov chains; queueing theory and queueing decision models; probabilistic inventory models. *Prerequisite:* ISE 220; *recommended preparation:* ISE 330.

ISE 344 Engineering Team Management (3) Examine team formation and team dynamics including organizational behavior, group dynamics, psychology, and business management, all in the context of engineering development; decision-making and negotiation. Open only to juniors and seniors.

ISE 370L Human Factors in Work Design (4, Fa) Physiological systems and psychological characteristics; ergonomics; anthropometry; effects of the physical environment on humans; occupational safety and health; work methods.

ISE 382 Database Systems: Concepts, Design and Implementation (3, Sp) Concepts in modeling data for industry applications. Designing and implementing robust databases. Querying databases to extract business intelligence; Global Enterprise Resource Planning with databases.

ISE 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

ISE 404 Business and Intellectual Property Law for Engineers (3) (Enroll in CE 404)

ISE 410 Production II: Planning and Scheduling (3, FaSp) Production planning, forecasting, scheduling, and inventory; computer integrated decision systems in analysis and control of production systems. *Prerequisite:* ISE 330.

ISE 422L Configuring Enterprise Resource Planning Systems (3, FaSp) (Enroll in ITP 422L)

ISE 426 Statistical Quality Control (3, Fa) Quantitative aspects of statistical quality control (process control, acceptance sampling by attribute and by variable, rectifying inspection), quality assurance and the management of QC/QA functions. *Prerequisite:* ISE 225.

ISE 435 Discrete Systems Simulation (3, FaSp) Model design to simulate discrete event systems with basic input and output analysis using high order languages, applied to industrial systems analysis and design problems. *Prerequisite:* CSCI 101L and ISE 225.

ISE 440 Work, Technology, and Organization (3, Sp) Impact of technology on work and organizational design; effects of automation; design of improvement programs; information infrastructures; teams; individual behavioral outcomes. Upper division standing.

ISE 455Lx Enterprise Information Portals (3, Sp) (Enroll in ITP 455Lx)

ISE 460 Engineering Economy (3, FaSpSm) Utilizing principles of economic analysis for choice of engineering alternatives and engineering systems. Pre-tax and after-tax economy studies. Upper division standing.

ISE 470 Human/Computer Interface Design (3, Sp) Essentials of human factors and computer interface for the design, development, implementation, and evaluation of integrated media systems.

ISE 482 Engineering Database Applications (3) (Enroll in ITP 482)

ISE 487Lx Data Warehouses and Business Intelligence (3) (Enroll in ITP 487)

ISE 488x Managing Supply Chains with Advanced Planning and Optimization (3) (Enroll in ITP 488x)

ISE 490x Directed Research (1-8, max 12, FaSp) Individual research and readings. Not available for graduate credit.

ISE 495abx Senior Design Project (2-2, FaSp) *a*: Preparation and development of the senior project proposal. Not available for graduate credit. Senior standing in industrial and systems engineering. *Prerequisite*: ISE 225 and ISE 460 and DSO 435 or ISE 382. *b*: Group work on an industrial engineering design problem in an organization. Not available for graduate credit. Senior standing in industrial and systems engineering. Open only to industrial and systems engineering majors. *Prerequisite*: ISE 315 and ISE 435 and ISE 370 or ISE 470.

ISE 499 Special Topics (2-4, max 8) Course content to be selected each semester from recent developments in industrial and systems engineering and related fields.

ISE 500 Engineering Management Decisions and Statistics (3, FaSpSm) Case-based decision and statistical analysis. Framing engineering management situations with statistical methods. Experiments, regression, ANOVA, hypothesis, factor analysis. Open only to fifth-year seniors and master's students.

ISE 502 Construction Accounting and Finance (3) (Enroll in CE 502)

ISE 507 Six-Sigma Methods and Applications (3, FaSpSm) Comprehensive study of Six Sigma and Lean metrics, methods, and systems with their applications to manufacturing, services, quality improvement and management.

ISE 508 Health Care Operations Improvement (3, Sp) Improving operations, patient flow, quality and processes. Students will become familiar with methods for implementing change in health care settings such as hospitals or clinics.

ISE 510 Advanced Computational Design and Manufacturing (3) Study advanced concepts behind computational representations, algorithms, and mathematical foundations, and their applications in computer-aided design and manufacturing. Develop hands-on computational skills in team projects. *Recommended preparation*: bachelor's degree in industrial engineering; programming experience, C++ preferred.

ISE 511L Mechatronic Systems Engineering (3, Sp) Use of mechanical, electrical, and computer engineering, math, and computer science to design of high performance and sophisticated products and processes and systems involving mechatronic. *Recommended preparation*: bachelor's degree in engineering or physical sciences, and preliminary knowledge of programming in C.

ISE 512 Software Management and Economics (3, Fa) (Enroll in CSCI 510)

ISE 513 Inventory Systems (3, Sp) Deterministic and stochastic demand systems with static/dynamic models. Practice in inventory management, computerized procedures, materials requirements planning, just-in-time production, Kanban systems.

ISE 514 Advanced Production Planning and Scheduling (3, FaSm) Advanced concepts in production planning and scheduling including resource allocation, lot sizing, flow shop and job shop scheduling, workforce scheduling and assembly line balancing. *Recommended preparation*: prior knowledge of operations research

and probability theory.

ISE 515 Engineering Project Management (3, FaSpSm) Applying industrial and systems engineering skills to problems drawn from industry, while working in teams of 3–4 students. Teach project management skills and provide direct experience in managing and executing a group project.

ISE 517 Modern Enterprise Systems (3, FaSp) Managing the process design, interfaces and resources of service and manufacturing systems, based on the state of their processes.

ISE 520 Optimization: Theory and Algorithms (3, Fa) Conditions for optimality. Nonlinear programming algorithms for constrained and unconstrained problems. Special problems such as quadratic, separable, fractional, geometric programming. *Prerequisite:* MATH 225 or EE 441.

ISE 525 Design of Experiments (3, FaSp) Planning data collection to investigate relationships between product/process design choices (materials, temperatures, etc.) and performance, empirical modeling to predict performance, identification of the best design choices. *Recommended preparation:* ISE 225.

ISE 527 Quality Management for Engineers (3, FaSp) Principles of quality management, quality philosophies and frameworks, quality leadership and strategic planning, process management, and performance measurements.

ISE 528 Advanced Statistical Aspects of Engineering Reliability (3) Advanced statistical methods applied to reliability engineering. Experimental design analysis and interpretation of multifactor reliability problems.

ISE 529 Engineering Data Analytics (3, FaSp) Theory and methods of data analytics emphasizing engineering applications: multivariate statistics, supervised learning, classification, smoothing and kernel methods, support vector machines, discrimination analysis, unsupervised learning. *Prerequisite:* DSO 529.

ISE 530 Optimization Methods for Analytics (3, FaSp) Linear Programming, Integer Programming, Meta-heuristics and Multi-objective optimization. *Recommended preparation:* Calculus III, Linear Algebra and Computer Programming.

ISE 532 Network Flows (3, Sp) Tree, path, flow problems, formulation and solution techniques. Methods for minimal cost flows. Applications. *Prerequisite:* ISE 330 or ISE 536.

ISE 536 Linear Programming and Extensions (3, Fa) Linear programming models for resource allocation; simplex and revised simplex methods; duality; sensitivity; transportation problems; selected extensions to large scale, multiobjective, and special structured models. *Prerequisite:* MATH 225 or EE 441.

ISE 538 Elements of Stochastic Processes (3, Sp) Random variables, stochastic processes, birth-and-death processes, continuous and discrete time Markov chains with finite and infinite number of states, renewal phenomena, queueing systems.

ISE 539 Stochastic Elements of Simulation (3, Sp) Simulation techniques combined with probabilistic analysis for solving problems in inventory theory, queueing theory, financial engineering, decision analysis, and other fields having a stochastic element. *Corequisite:* ISE 538.

ISE 543 Case Studies in Systems Engineering (3, FaSp) (Enroll in SAE 543)

ISE 544 Management of Engineering Teams (3, FaSp) Design and management of engineering teams. Group decision-making, motivation, leadership, infrastructural requirements, performance measurement, team diversity, conflict, and integration.

ISE 545 Technology Development and Implementation (3, Fa) Principles and practices of technology development and implementation, with application to products and systems in manufacturing and services.

ISE 549 Systems Architecting (3, FaSp) (Enroll in SAE 549)

ISE 551 Foundations of Data Management (3, FaSp) (Enroll in INF 551)

ISE 554 Innovation and the Engineering Enterprise (3) Examination of innovation in engineering enterprises including human behavior and human resources, organizational development, engineering management, business structures, financing the enterprise and intellectual property.

ISE 555 Invention and Technology Development (3) This project-oriented course elaborates on the process of engaging creative thought, tools and techniques for invention, and issues involved in bringing inventions to the production phase. Graded CR/NC.

ISE 556 Stochastic Systems (3, Sp) (Enroll in EE 556)

ISE 560 Analysis of Algorithms (3, FaSp) (Enroll in CSCI 570)

ISE 561 Economic Analysis of Engineering Projects (3, FaSpSm) Economic evaluations of engineering systems for both government and private industry; quantitative techniques for evaluating non-monetary consequences; formal treatment of risk and uncertainty. *Prerequisite:* ISE 500; *recommended preparation:* an undergraduate course in engineering economy.

ISE 562 Value and Decision Theory (3, Fa) Decision making under risk conditions; utility theory; sufficient statistics; conjugate prior distributions; terminal and pre-posterior analysis; Bayesian statistics versus classical statistics.

ISE 563 Financial Engineering (3, Sp) Concepts underlying the economic analysis of engineering projects; applications to call and put options; utility theory and mathematical optimizations models; and simulation. *Recommended preparation:* ISE 220 or an equivalent course in probability.

ISE 564 Performance Analysis (3) Measurement systems for performance analysis. Determination of performance metrics, analytical models, case studies. Cross-industry comparisons, measures for manufacturing and service systems, information and knowledge workers.

ISE 565 Law and Finance for Engineering Innovation (3) Students will identify, formulate and resolve legal, financial and ethical issues affecting innovation in engineering organizations including legal structures, financing and intellectual property rights. Open only to graduate students.

ISE 566 Financial Accounting Analysis for Engineering (3, Sp) Identification, formulation, and solution of financial accounting problems in engineering enterprises. Legal context of financial decisions, process cost determination and allocation, financial reports, and reporting systems. Open only to graduate students.

ISE 567 Collaborative Engineering Principles and Practice (3, Sp) Scientific principles and industrial practices defining how a team of stakeholders should collaboratively work together to reach agreement on complex engineering tasks. Open only to graduate students in engineering.

ISE 568 Machine Learning (3, Fa) (Enroll in CSCI 567)

ISE 570 Human Factors in Engineering (3, Fa) Psychological and physiological characteristics of humans; how they limit engineering design of machines and human-machine systems.

ISE 573 Work Physiology (3) Survey of metabolic processes in the performance of physical work, study of individual and environmental factors affecting these processes.

ISE 574 Probabilistic Reasoning (3, Fa) (Enroll in CSCI 573)

ISE 576 Industrial Ecology: Technology-Environment Interaction (3) Concepts and methods to analyze the environmental impacts of industrial systems, including lifecycle assessment, material flow analysis, design for environment and sustainable consumption.

ISE 580 Performance Modeling and Simulation (3, FaSp) Introduction to modeling and analysis of stochastic systems, with an emphasis on analytic methods for Markovian systems and discrete-event simulation

of non-Markovian systems. *Recommended preparation:* probability and statistics, including hypothesis testing and introductory computer programming.

ISE 581 Negotiation For Engineering Management (3, Sp) Decision making techniques for the engineering manager including negotiation principles, contract negotiation, dispute resolution, auctions, bidding, voting and coalition formation.

ISE 582 Web Technology for Industrial Engineering (3, Fa) A fast-paced, project-based introduction to designing and implementing interactive Web applications. Emphasizes skills for building engineering and market research applications requiring information gathering, analysis, representation. *Prerequisite:* ISE 382.

ISE 583 Enterprise Wide Information Systems (3, FaSp) The role of enterprise resource planning systems (ERPs) in an organization and the task of implementing and managing the IS function.

ISE 585 Strategic Management of Technology (3, FaSp) Management skills and tools for technology intensive enterprises. Life cycle analysis of technology from planning through exploitation, obsolescence and renewal.

ISE 587 Risk Analysis (4) (Enroll in PPD 587)

ISE 589 Port Engineering: Planning and Operations (3, Fa) (Enroll in CE 589)

ISE 590 Directed Research (1-12) Research leading to the master's degree; maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

ISE 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

ISE 599 Special Topics (2-4, max 9, Fa) Course content will be selected each semester to reflect current trends and developments in the field of industrial and systems engineering.

ISE 620 Advanced Topics in Applied Stochastic Models (3, FaSp) Applications of continuous time Markov chains, semi-Markov processes, martingales, random walks, and coupling techniques to models of industrial systems. Queueing, reliability, and optimization models. *Prerequisite:* ISE 538.

ISE 630 Foundations of Optimization (3, Sp) Convex sets, convex functions, structures of optimization problems, Lagrangian and conjugate duality. First and second order optimality conditions; applications in engineering and management. *Recommended preparation:* Calculus III and Linear Algebra.

ISE 632 Network Flows and Combinatorial Optimization (3, Sp) Combinatorial optimization, particularly graph problems. Shortest paths, max flow, minimum cost flows, spanning trees, matroids, submodular functions. Bipartite and general matchings, polyhedral combinatorics, total unimodularity. (Duplicates credit in ISE 532.) *Prerequisite:* ISE 536; *recommended preparation:* familiarity with the theory of linear programming and with mathematical proofs; knowledge of linear algebra.

ISE 637 Equilibrium Programming (3, FaSp) Built on the methodology of constrained optimization, a graduate level course on equilibrium programming cast in the framework of finite-dimensional variational inequality and complementarity problems. *Prerequisite:* ISE 520 and ISE 536.

ISE 638 Stochastic Optimization (3, FaSp) Stochastic linear and integer programming, multi-stage stochastic programming, application, models and algorithms. *Recommended preparation:* A first graduate course in optimization and the ability to program in a high level language are essential.

ISE 645 Uncertainty Modeling and Stochastic Optimization (3, Sp) (Enroll in CE 645)

ISE 651 Seminar in Industrial and Systems Engineering (1, max 4, FaSp) Current research, guest speakers in the field; review papers; guidance in preparing research proposals and special projects. (Duplicates credit in the former ISE 650abc.) Open only to fifth-year seniors and master's students. Graded CR/NC.

ISE 670 Advanced Analysis of Algorithms (3, Fa) (Enroll in CSCI 670)

ISE 671 Randomized Algorithms (3, Sp) (Enroll in CSCI 671)

ISE 690 Directed Research (1-4, max 8, FaSpSm) Laboratory study of specific problems by candidates for the degree Engineer in Industrial and Systems Engineering. Graded CR/NC.

ISE 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

ISE 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Informatics Program

Henry Salvatori Computer Science Center 104

(213) 740-4494

Fax: (213) 740-7285

Email: informatics@usc.edu

Director: Cyrus Shahabi, Ph.D.

Faculty

Professors: Barry Boehm, Ph.D. (Computer Science, Industrial and Systems Engineering); Ramesh Govindan, Ph.D. (Computer Science, Electrical Engineering); Julia Higle, Ph.D. (Industrial and Systems Engineering); Carl Kesselman, Ph.D. (Industrial and Systems Engineering, Computer Science); Neno Medvidovic, Ph.D. (Computer Science); Shri Narayanan, Ph.D. (Electrical Engineering, Computer Science, Linguistics, Psychology); Viktor Prasanna, Ph.D. (Electrical Engineering); Suvrajeet Sen, Ph.D. (Industrial and Systems Engineering, Electrical Engineering, Computer Science); Cyrus Shahabi, Ph.D. (Computer Science); Gaurav Sukhatme, Ph.D. (Computer Science, Electrical Engineering); Milind Tambe, Ph.D. (Computer Science, Industrial and Systems Engineering); Priya Vashishta, Ph.D. (Physics, Computer Science, Biomedical Engineering)

Assistant Professor: Yan Liu, Ph.D. (Computer Science)

Research Professors: Herbert Schorr, Ph.D. (Computer Science); Craig Knoblock, Ph.D. (Computer Science); Yolanda Gil, Ph.D. (Computer Science); William Swartout, Ph.D. (Computer Science)

Research Associate Professor: Clifford Neuman, Ph.D. (Computer Science)

Research Assistant Professor: Stefan Scherer, Ph.D. (Computer Science)

Professor of the Practice: Roger Schell, Ph.D.

Senior Lecturers: Blaine Burnham, Ph.D.; Mark Heckman, Ph.D.

Master of Communication Informatics

Program Director: Cyrus Shahabi, Ph.D.

Program Co-Director: Michael Cody, Ph.D.

The Master of Communication Informatics is a cross-disciplinary joint degree program offered by the Viterbi School of Engineering and the Annenberg School for Communication and Journalism. Students must be admitted by both schools.

Students explore several of the most interesting technological phenomena impacting communication today, including online communities, social media and user-generated content, Crowdsourcing, Big Data and data

analytics, virtual and augmented reality, data mining and others. The goal is to educate students who are proficient users of these technologies, and who also possess the analytical and problem-solving skills to expand and improve on existing technologies, and to help define a roadmap for the communication technologies of the future. Students work on projects where the fields of communication and engineering naturally converge, namely in the engineering of communication (e.g. the design and construction of mobile apps, online networks, social media tools, the use of technology in journalism, etc.) and the communication of engineering (e.g. public relations, public awareness, and public engagement of topics relating to science and technology).

There are many career opportunities for students completing the Master of Communication Informatics degree. Traditional media outlets ranging from newspapers to network/cable news are hungry for individuals who understand the new technology-enabled social communication paradigms and can help translate this knowledge into new products. An example is the coverage of natural disasters, where it is difficult for media to get on the ground, but where social media allows victims to relay experiences and provide accounts of these situations. How to collect, manage, distribute and capitalize from this news source is a major challenge in current media.

There are also careers within these emerging communication platforms. Many technology companies realize the value in employing experts who understand the human factors aspects of their products. Communication is now so vital to the function of many products that success and failure are often determined by how well communication is performed, and how seamlessly it integrates into existing platforms. In the corporate world, the need to understand and capitalize on social media is pervasive, and the unique expertise this degree provides leaves graduates well positioned to become leaders in the space. Finally, as technology becomes ubiquitous in society, the role of the informed commentator has become very important in formal and informal formats. There is need for individuals who understand the basics of communication and have enough technology knowledge to provide analysis at a meaningful level to the public.

Requirements for completion (33 units minimum)

FOUNDATIONS (9-10 UNITS, 3 COURSES)		UNITS
COMM 502	Theoretical Approaches to Multidisciplinary Design Projects (4) or	
INF 510	Principles of Programming for Informatics (3)	3-4
INF 529	Security and Privacy in Informatics	3
INF 570	Foundations of Communication Informatics	3
INFORMATICS CORE (12 UNITS, 4 COURSES)		UNITS
INF 550	Overview of Data Informatics in Large Data Environments	3
INF 551	Foundations of Data Management	3
INF 553	Foundations and Applications of Data Mining	3
INF 554	Information Visualization	3
COMMUNICATION CORE (12 UNITS, 3 COURSES)		UNITS
CMGT 530	Social Dynamics of Communication Technologies	4
CMGT 555	Online Marketing Communication Development and Analysis	4
COMM 648	Online Communities and Networks	4

Master of Science in Cyber Security Engineering

Associate Director of Informatics: Clifford Neumann, Ph.D.

The Master of Science in Cyber Security Engineering is intended for graduate students who desire to: a) obtain jobs in which computer security knowledge and skills are required; b) continue an education path toward a doctorate degree with focus on information security; or, for individuals who are in degree programs or job fields that have some responsibility for information security, to c) enhance knowledge and skills. The typical admitted student will have the following qualifications:

- an undergraduate degree in computer science, electrical engineering or information security;

- programming capability;
- understanding of the Theory of Computation and operating systems;
- desire to learn information security techniques and tools that are directly applicable to current information security challenges; and
- above average mathematical foundation.

Upon completion of this program, students will have learned the fundamentals of developing, engineering and operating secure information systems. They will be well-versed in the challenges and problems of secure operating systems, secure applications, secure networking, database security and privacy, use of cryptography and key management. They will understand how to develop a security policy, and how policy drives technology decisions. Students will gain the knowledge and skills necessary to administer environments that require high levels of information security, both from the standpoint of the principles of information protection and the role and application technology has in meeting the goal of information protection. Students will understand the value of assets, the business model of threat, the threat matrix, mitigation strategy, and how all of this integrates with the core organizational mission. They will understand why some information security plans succeed and why others fail. Students will have hands-on experience in situations that simulate real-world scenarios with all technical and theoretical situations through extensive laboratory work, which will be designed by current and former information security practitioners.

Requirements for completion (27 units minimum)

REQUIRED COURSES (21 UNITS)		UNITS
INF 520	Foundations of Information Security	3
INF 521	Applications of Cryptography to Information Security Problems	3
INF 522	Policy: The Foundation for Successful Information Assurance	3
INF 523	Assurance in Cyberspace Applied to Information Security	3
INF 524	Distributed Systems and Network Security	3
INF 525	Trusted System Design, Analysis and Development	3
INF 527	Secure Systems Engineering	3

ELECTIVE COURSES (CHOOSE TWO, 6-7 UNITS)		UNITS
CSCI 530	Security Systems	4
CSCI 531	Applied Cryptography	3
INF 526	Secure Systems Administration	3
INF 528	Computer and Network Forensics	3

Master of Science in Data Informatics

Associate Director of Informatics: Craig Knoblock, Ph.D.

The social emergence of large data environments and infrastructures (Big Data) in diverse domains and uses has spawned a requirement for analysis of the information contained. Past experience has shown that extracting value from large information stores can often be difficult due to the intrinsic nature of data, and the limits on ability to intelligently mine the information to add value to the organization.

The USC Viterbi Master of Science in Data Informatics provides students with the knowledge and skill to: a) understand and contribute toward the significant technical challenges created by large data environments, including architecture, security, integrity, management, scalability, artificial intelligence topics, and distribution; b) understand the principles and application of informatics, and the goals of enterprise intelligence; and c) utilize technical/engineering skills coupled with informatics capabilities to provide enterprise-centric solutions to stakeholders. The degree features application of knowledge and skill in hands-on type experiences, with the goal of having students leave the program having “lived in the data.”

Students will understand the overall field of data analytics, the role of the analyst and/or data scientist, and the domains where informatics skills can be applied to critical organization missions. They will understand how data management, data visualization, data mining, and artificial intelligence techniques (specifically machine

learning) are critical to the analysis process, and how these can be applied to real world challenges. Through an extensive elective track, they can find the specializations that will help them better prepare themselves for the area(s) of analytics in which they hope to contribute.

Requirements for completion (27 units minimum)

REQUIRED COURSES (15 UNITS)		UNITS
INF 550	Overview of Data Informatics in Large Data Environments	3
INF 551	Foundations of Data Management	3
INF 552	Machine Learning for Data Informatics	3
INF 553	Foundations and Applications of Data Mining	3
INF 554	Information Visualization, or	
INF 555*	User Interface Design, Implementation, and Testing	3
ELECTIVE COURSES (CHOOSE FOUR, 12-13 UNITS)		UNITS
CSCI 402	Operating Systems	4
CSCI 530	Security Systems	4
CSCI 544	Applied Natural Language Processing	3
CSCI 548	Information Integration on the Web	3
CSCI 561	Foundations of Artificial Intelligence	3
CSCI 570	Analysis of Algorithms	3
CSCI 572	Information Retrieval and Web Search Engines	3
CSCI 585	Database Systems	3
CSCI 587	Geospatial Information Management	3
INF 510	Principles of Programming for Informatics	3
INF 520	Foundations of Information Security	3
INF 528	Computer and Network Forensics	3
INF 529	Security and Privacy in Informatics	3
INF 556	User Experience Design and Strategy	3
INF 557	Foresight for Engineers	3
INF 560	Data Informatics Professional Practicum	3
INF 570	Foundations of Communication Informatics	3

**Whichever course (INF 554 or INF 555) is not taken as a required course may be taken as an elective.*

Courses of Instruction

INFORMATICS PROGRAM (INF)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

INF 510 Principles of Programming for Informatics (3) Programming in Python for retrieving, searching, and analyzing data from the Web. Programming in Java. Learning to manipulate large data sets.

INF 520 Foundations of Information Security (3) Threats to information systems; technical and procedural approaches to threat mitigation; secure system design and development; mechanisms for building secure security services; risk management. *Recommended preparation:* Background in computer security preferred. Recommended previous courses of study include computer science, electrical engineering, computer engineering, management information systems, and/or mathematics.

INF 521 Application of Cryptography to Information Security Problems (3) Application of cryptography and cryptanalysis for information assurance in secure information systems. Classical and modern cryptography. Developing management solutions. *Recommended preparation:* Previous degree in computer science, mathematics, computer engineering, or informatics; understanding of number theory and programming background are helpful.

INF 522 Policy: The Foundation for Successful Information Assurance (3) Policy as the basis for all successful information system protection measures. Historical foundations of policy and transition to the digital age. Detecting policy errors, omissions and flaws. *Recommended preparation:* Background in computer security, or a strong willingness to learn. Recommended previous courses of study include degrees in computer science, electrical engineering, computer engineering, management information systems, and/or mathematics.

INF 523 Assurance in Cyberspace Applied to Information Security (3) Assurance as the basis for believing an information system will behave as expected. Approaches to assurance for fielding secure information systems that are fit for purpose. *Recommended preparation:* Prior degree in computer science, electrical engineering, computer engineering, management information systems, and/or mathematics. Some background in computer security preferred.

INF 524 Distributed Systems and Network Security (3) Fundamentals of information security in the context of distributed systems and networks. Threat examination and application of security measures, including firewalls and intrusion detection systems. *Prerequisite:* INF 521; *recommended preparation:* Prior degree in computer science, mathematics, computer engineering, or informatics. It is recommended that students have a working understanding of communication networks and computer architecture, and some programming facility.

INF 525 Trusted System Design, Analysis and Development (3) Analysis of computer security and why systems are not secure. Concepts and techniques applicable to the design of hardware and software for Trusted Systems. *Prerequisite:* INF 522; *recommended preparation:* Prior degree in computer science, mathematics, computer engineering, or informatics; advanced knowledge of computer architecture, operating systems, and communications networks will be valuable.

INF 526 Secure Systems Administration (3) The administrator's role in information system testing, certification, accreditation, operation and defense from cyber attacks. Security assessment. Examination of system vulnerabilities. Policy development. *Recommended preparation:* Previous degree in computer science, mathematics, computer engineering, informatics, and/or information security undergraduate program. Also, it is highly recommended that students have successfully completed course work involving policy and network security.

INF 527 Secure Systems Engineering (3) The process of designing, developing and fielding secure information systems. Developing assurance evidence. Completion of a penetration analysis. Detecting architectural weaknesses. Case studies. *Prerequisite:* INF 525; *recommended preparation:* Previous degree in computer science, mathematics, computer engineering, or informatics; moderate to intermediate understanding of the fundamentals of information assurance, and distributed systems and network security. Knowledge and skill in programming.

INF 528 Computer and Network Forensics (3) Preservation, identification, extraction and documentation of computer evidence stored on a computer. Data recovery; cryptography; types of attacks; steganography; network forensics and surveillance. *Recommended preparation:* Previous degree in computer science, mathematics, computer engineering, or informatics; a working understanding of number theory and some programming knowledge will be helpful.

INF 529 Security and Privacy in Informatics (3, FaSp) Fundamental concepts in information security and privacy; security and privacy policies, threats, and protection mechanisms; security and privacy laws, regulations, and ethics.

INF 550 Overview of Data Informatics in Large Data Environments (3, FaSp) Fundamentals of big data informatics techniques. Data lifecycle; the data scientist; machine learning; data mining; NoSQL databases; tools for storage/processing/analytics of large data set on clusters; in-data techniques. *Recommended preparation:* Basic understanding of engineering and/or technology principles; basic programming skills;

background in probability, statistics, linear algebra and machine learning.

INF 551 Foundations of Data Management (3, FaSp) Function and design of modern storage systems, including cloud; data management techniques; data modeling; network attached storage, clusters and data centers; relational databases; the map-reduce paradigm. *Recommended preparation:* INF 550 taken previously or concurrently; understanding of operating systems, networks, and databases; experience with probability, statistics, and programming.

INF 552 Machine Learning for Data Informatics (3, FaSp) Practical applications of machine learning techniques to real-world problems. Uses in data mining and recommendation systems and for building adaptive user interfaces. *Recommended preparation:* INF 550 and INF 551 taken previously or concurrently; knowledge of statistics and linear algebra; programming experience.

INF 553 Foundations and Applications of Data Mining (3, FaSp) Data mining and machine learning algorithms for analyzing very large data sets. Emphasis on Map Reduce. Case studies. *Recommended preparation:* INF 550, INF 551 and INF 552. Knowledge of probability, linear algebra, basic programming, and machine learning.

INF 554 Information Visualization (3, FaSp) Graphical depictions of data for communication, analysis, and decision support. Cognitive processing and perception of visual data and visualizations. Designing effective visualizations. Implementing interactive visualizations.

INF 555 User Interface Design, Implementation, and Testing (3, FaSp) Understand and apply user interface theory and techniques to design, build and test responsive applications that run on mobile devices and/or desktops. *Recommended preparation:* Knowledge of data management, machine learning, data mining, and data visualization.

INF 556 User Experience Design and Strategy (3, FaSp) The practice of User Experience Design and Strategy principles for the creation of unique and compelling digital products and services. Open only to Data Informatics majors. *Recommended preparation:* Basic familiarity with web development and/or graphic design using a digital layout tool.

INF 557 Foresight for Engineers (3, FaSp) Applying specialized engineering skillsets to exploring/conceiving of solutions to future challenges; use of techniques for systematically imagining/analyzing diverse possible future paths for engineering products. *Recommended preparation:* Interest in technology innovation, technology policy/strategy and management, or entrepreneurship.

INF 560 Data Informatics Professional Practicum (3, FaSp) Student teams working on external customer data analytic challenges; project/presentation based; real client data, and implementable solutions for delivery to actual stakeholders; capstone to degree. *Recommended preparation:* Knowledge of data management, machine learning, data mining, and data visualization.

INF 570 Foundations of Communication Informatics (3) Modeling behavior and understanding network structures using graph theory and game theory. Using massive data to analyze group behavior. *Recommended preparation:* Minimum one year of calculus and background in matrix operations.

INF 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree; maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Information Technology Program

Olin Hall 412
(213) 740-4542
Email: [✉ itp@usc.edu](mailto:itp@usc.edu)

itp.usc.edu

Director: Michael Crowley, Ph.D.

Associate Professor of Engineering Practice: Nitin Kale, M.S.

Senior Lecturers: Joseph Greenfield, M.S.; Tom Sloper, B.A.

Instructors: Patrick Dent, M.S.; Jennifer Kassir, B.A.; Nathan Greenfield, M.S.; Trina Gregory, B.A.; Sanjay Madhav, B.S.; Rob Parke, M.S.; Chi So, M.S.; Ashish Soni, M.S.; David Tang, M.S.; Richard Vawter, M.S.; Lance Winkel, MFA

Adviser: Lisa Mataczynski, Ed.D.

ITP courses are open to all USC students.

Minors

ITP minors are open to undergraduate students in all majors.

To apply for a minor, students should meet the regular admissions standards and have a declared USC major. Students will complete an application for the minor with the Viterbi School of Engineering. For specific information on admission and application procedures, contact the Information Technology Program at (213) 740-4542.

ITP Minors:

3-D Animation

Applied Computer Security

Computer and Digital Forensics

Computer Programming

Enterprise Information Systems

Innovation: The Digital Entrepreneur

Mobile App Development

Video Game Design and Management

Video Game Programming

Web Technologies and Applications

Viterbi School of Engineering Students

The “x” designation indicates that engineering students require prior departmental approval to count 100-level and above ITP courses for major credit.

Minor in 3-D Animation

The 3D animation minor is a cross-disciplinary program merging theoretical concepts and state of the art techniques to prepare students to apply 3D animation across a wide range of industry applications. The courses integrate three major disciplines — cinematic arts, fine arts and information technology.

Requirements for completion (five core courses plus minimum 9 units of electives)

Minimum units: 22

CTAN 330	Animation Fundamentals	2
CTAN 451	History of Animation	2
FADW 101	Introduction to Drawing	4
ITP 215Lx	3D Modeling, Animation, and Special Effects	2
ITP 414x	Seminar and 3D Portfolio Development	3

ELECTIVE COURSES (9 UNITS) UNITS

ITP 305x	Advanced 3D Modeling, Animation, and Special Effects	3
ITP 315x	3D Character Animation	3
ITP 360x	3D Compositing and Visual Effects	3
ITP 470x	Information Technology Practicum	3-4
CTAN 452	Introduction to 3-D Computer Animation	2

Minor in Applied Computer Security

The minor in applied computer security combines both theoretical concepts and technical skills to prepare students for a career in information security while incorporating their major field of work. Students will study various areas of computer security, including hacking, ethics, forensics, networking and security management. Electives are available depending on the students' academic and professional goals.

Requirements for completion (five core courses plus one elective)

Minimum units: 18

REQUIRED COURSES (14 UNITS) UNITS

ITP 125Lx	From Hackers to CEOs: Introduction to Information Security	2
ITP 325x	Ethical Hacking and Systems Defense	3
ITP 357x	Enterprise Network Design	3
ITP 370x	Information Security Management	3
ITP 375x	Digital Forensics	3

ELECTIVE (4 UNITS) UNITS

ITP 425x	Web Application Security	4
ITP 457	Network Security	4
ITP 475x	Advanced Digital Forensics	4

Minor in Computer and Digital Forensics

The computer and digital forensics minor combines both theoretical concepts and practical skills to prepare students for a career as a digital forensics investigator. Students will study various areas of cyber-forensics, including forensic methodologies and processes, digital evidence-gathering and preservation, investigations and examinations, and court presentation. Electives are available depending on the students' academic and professional goals.

Requirements for completion (core courses plus electives)

Minimum units: 18

REQUIRED COURSES (4 COURSES, 12 UNITS) UNITS

ITP 125Lx	From Hackers to CEOs: Introduction to Information Security	2
ITP 375x*	Digital Forensics	3
ITP 475x*	Advanced Digital Forensics	4
ITP 479	Cyber Law and Privacy	3

FORENSIC ELECTIVES (CHOOSE TWO, 6 UNITS)		UNITS
ITP 325x*	Ethical Hacking and Systems Defense	3
ITP 445*	Macintosh, OSX and iOS Forensics	3
ITP 446*	Cyber Breach Investigations	3
ITP 447*	Mobile Device Security and Forensics	3
ITP 448*	Cyber Litigation Support	3

*Prerequisite required

Minor in Computer Programming

The minor in computer programming focuses on the practical programming skills necessary to solve problems in a variety of domains including on desktops, laptops, mobile devices, the Web, the cloud and for video games. Upon completion of the minor, students will have strong experience with the application of programming languages in several different contexts.

Students with a declared major in computer science, computer science and computer engineering, computer science (games), or computer science and business administration are not eligible for this minor. Students with a declared minor in computer science are likewise not eligible.

Requirements for completion (two core courses plus 12 units of electives)

Minimum units: 17

CORE COURSES (5 UNITS)

CORE COURSES (5 UNITS)		UNITS
ITP 165x*	Introduction to C++ Programming	2
ITP 365x	Managing Data in C++	3

ELECTIVE COURSES (12 UNITS)

ELECTIVE COURSES (12 UNITS)		UNITS
ITP 341x	App Development for Phones and Tablets	3
ITP 342L	Mobile Application Development	3
ITP 368x	Programming Graphical User Interfaces	3
ITP 380	Video Game Programming	4
ITP 404x**	Modern Technologies of Web Development	3
ITP 435x	Professional C++	3
ITP 437x	Secure Programming	3
ITP 439x	Compiler Development	3

*ITP 109x or ITP 115 can be substituted for ITP 165x, though ITP 165x is recommended.

**ITP 404x has additional prerequisites outside the minor, though these prerequisites can be waived for students in the minor (subject to faculty approval).

Minor in Enterprise Information Systems

The 21st century has seen tremendous growth in global enterprises, which has required robust and integrated information systems to support streamlined business processes. These Enterprise Information Systems, also known as Enterprise Resource Planning (ERP) systems, have continued to mature and dominate the information systems of corporations. Most Fortune 500 companies have adopted ERP systems. This minor combines business process management and information technology to prepare students for technical careers as well as business consulting in the ERP domain. Students will study various areas of ERP implementation, configuration, business intelligence, security and supply chain management. Electives are available depending on the students' academic and professional goals.

Requirements for completion (three core courses plus minimum 7 units of electives)

Minimum units: 16

REQUIRED COURSES (10 UNITS)		UNITS
ITP 320x	Enterprise Wide Information Systems	4
ITP 422	Configuring Enterprise Resource Planning Systems	3
ITP 454x	Enterprise Resource Planning, Design, and Implementation	3
ELECTIVES (CHOOSE MINIMUM 6 UNITS OF WHICH MINIMUM 3 UNITS SHOULD HAVE ITP PREFIX)		UNITS
ACCT 371a	Introduction to Accounting Systems	2
ACCT 371b	Introduction to Accounting Systems	2
ACCT 410x	Foundations of Accounting	4
ACCT 478	Accounting Systems Design	4
ACCT 479	Accounting Systems Development	4
BUAD 311	Operations Management	4
DSO 431	Foundations of Digital Business Innovation	4
DSO 433	Business Process Design	4
DSO 435	Enterprise Data Architecture	4
ISE 382	Database Systems: Concepts, Design and Implementation	3
ITP 421x	Advanced Programming for Enterprise Information Systems	3
ITP 455Lx	Enterprise Information Portals	3
ITP 470x	Information Technology Practicum	1-4, max 8
ITP 486	Securing and Auditing Enterprise Resource Planning Systems	3
ITP 487	Data Warehouses and Business Intelligence	3
ITP 488x	Managing Supply Chains with Advanced Planning and Optimization	3
PPD 318	Financial Accounting in Public and Nonprofit Organizations	4

Minor in Innovation: The Digital Entrepreneur

The Minor in Innovation: The Digital Entrepreneur is jointly sponsored by the Information Technology Program in the Viterbi School of Engineering and the Lloyd Greif Center for Entrepreneurial Studies in the USC Marshall School of Business. The minor is designed for students from a range of backgrounds who are interested in starting their own digital ventures, working for start-up companies, or pursuing traditional jobs with large corporations and consulting firms that may involve launching new digital business units. Students will learn all major elements of launching a digital venture including ideation, feasibility analysis, high-tech product management, online customer acquisition, technology implementation, online business models and monetization. Students will work on launching a digital venture in a team-based environment in the capstone class.

The Information Technology Program in the Viterbi School of Engineering handles advising and admissions relating to the minor, consulting as needed with the Grief Center for Entrepreneurial Studies in the Marshall School of Business.

Requirements for completion (six core courses plus minimum 6 units of electives)

Minimum units: 26

REQUIRED COURSES (20 UNITS)		UNITS
BAEP 451	The Management of New Enterprises	4
BAEP 452*	Feasibility Analysis	4
ITP 466x	Building the High-Tech Startup	4
ITP 476x	Technologies for Interactive Marketing	4
ITP 496x*+	The Digital Startup Launchpad Lab	2
(capstone course; <i>Corequisite</i> : BAEP 496)		

BAEP 496*+	The Digital Startup Launchpad	2
------------	-------------------------------	---

ELECTIVE COURSES (6 UNITS)		UNITS
BAEP 423	Management of Small Businesses	4
BAEP 460	Seminar in Entrepreneurship	2
BUAD 304	Organizational Behavior and Leadership	4
BUAD 307	Marketing Fundamentals	4
IOM 462	Managing a Small Business on the Internet	2
ITP 310Lx	Design for User Experience	3
MKT 425*	Marketing on the Internet	4

**Prerequisite required*

+ITP 496 and BAEP 496 must be taken in the same semester.

Minor in Mobile App Development

Students will study and gain experience with the technologies, tools, frameworks and languages that are most commonly used in developing apps for mobile devices such as smartphones and tablets. They will learn the basics of the programming languages, how to design mobile interfaces, how to use the libraries to build apps that have the proper look and feel, how to design and handle user input, and other aspects. Students will go through the process of building a mobile app from idea to product. Students will learn the fundamental principles of mobile apps, so that they will be prepared for the new technologies and frameworks that are constantly being developed.

Students should meet the regular admissions standards and have a declared USC major. Students will complete an application for the minor with the Viterbi School of Engineering. For specific information on admission and application procedures, contact the Information Technology Program at (213) 740-4542.

Requirements for completion (five core courses plus two electives)

Minimum units: 20

REQUIRED COURSES (14 UNITS)		UNITS
Choose one from the following (2 units):		
ITP 109x	Introduction to Java Programming	2
ITP 115	Programming in Python	2
ITP 165x*	Introduction to C++ Programming	2
Choose one from the following (3 units):		
ITP 341x	App Development for Phones and Tablets	3
ITP 342L	Mobile Application Development	3
All of the following courses (9 units):		
ITP 140	Mobile Application Technologies	2
ITP 365x*	Managing Game Data	3
ITP 442	Mobile App Project	4

ELECTIVES (CHOOSE TWO COURSES FOR A MINIMUM OF 6 UNITS)		UNITS
ITP 310Lx	Design for User Experience	3
ITP 341x	App Development for Phones and Tablets	3
ITP 342L	Mobile App Development	3
ITP 344x	Advanced Topics in Mobile App Development	3

ITP 382x	Mobile Game Programming	3
ITP 435x	Professional C++	3

**ITP 165x and ITP 365x can be waived for students who have taken CSCI 103 and CSCI 104. However, these students must take an additional elective course in order to have the appropriate number of upper-division units.*

Minor in Video Game Design and Management

The video game design minor integrates theoretical concepts and practical skills to prepare students for a career in interactive entertainment, specifically the video game industry. Students will be exposed to a variety of design concepts related to creating video games including: level design, game-play control, user interface, multiplayer, game mechanics, and storytelling. As opposed to the video game programming minor where students will be writing code and programming game engines, students in the video game design and management minor will apply design concepts to different game genres and use game design software tools to create a working demo of a video game during the course of the minor program.

Requirements for completion

Minimum units: 22

REQUIRED COURSES (22 UNITS MINIMUM)		UNITS
CTIN 483*	Introduction to Game Development	4
CTIN 484L**	Intermediate Game Development	2
CTIN 488	Game Design Workshop	4
CTIN 489**	Intermediate Game Design Workshop	2
ITP 280	Video Game Production	4

And at least 6 elective units from the following:

ITP 391abx	Video Game Project Management	4, 2
ITP 393x	Video Game Design Documents	2
ITP 491x	Level Design and Development for Video Games	4

**It is recommended to take an introductory programming course before taking CTIN 483. Suggested courses: ITP 109, ITP 115, ITP 165.*

***CTIN 483 and CTIN 488 are prerequisites; enrollment in CTIN 484L and CTIN 489 is concurrent.*

Minor in Video Game Programming

The video game programming minor integrates the theoretical concepts and practical skills to prepare students for a career in interactive entertainment, specifically the video game industry. Through integration of two major disciplines (computer science and information technology), students will be exposed to a variety of programming concepts related to creating video games including: 3-D graphics, artificial intelligence, particle systems, rendering, collision detection, game algorithms, physics concepts, and math formulas. In contrast to the video game design minor where the focus is applying design concepts and using software design tools, students in the video game programming minor will evaluate, write and debug code, in addition to creating a game engine during the course of the minor.

This minor features an optional capstone that is a team-based, year-long game development project. Students are only eligible for the capstone after having completed all the required courses as well as the required three ITP elective units. The capstone must be taken in both the fall and spring semesters of a single academic year.

Requirements for completion (four core courses plus 6 units of electives)

Minimum units: 19

CORE COURSES (13 UNITS)		UNITS
ITP 165x*	Introduction to C++ Programming	

		2
ITP 365x*	Managing Data in C++	3
ITP 380	Video Game Programming	4
ITP 485	Programming Game Engines	4

ELECTIVE COURSES (6 UNITS — 3 UNITS MUST BE ITP)		UNITS
ITP 382x	Mobile Game Programming	3
ITP 435x	Professional C++	3
ITP 438x	Graphics Shader Programming	3
ITP 484x	Multiplayer Game Programming	3
CSCI 491abL**	Final Game Project	4-2

*ITP 165x and ITP 365x can be waived for students who have taken CSCI 103 and CSCI 104. However, these students must take an additional elective course in order to have the appropriate number of upper-division units.

**Optional capstone. See details above for requirements.

Minor in Web Technologies and Applications

The Web technologies and application minor is designed to introduce students to the Web publishing and development fields. Upon completion of the minor, students will be able to design and develop Websites using major Web technologies, standards and applications. Students can use the theoretical concepts and practical applications of Web technologies not only in the Web industry, but also within a different major field of study. The broad areas of study include Web publishing, Web programming, databases and multimedia. Electives will be chosen based on the students' academic and professional goals.

Students should meet the regular admissions standards and have a declared USC major.

Requirements for completion (four core courses plus two electives)

Minimum units: 18

CORE COURSES (13 UNITS)		UNITS
ITP 104x	Web Publishing	2
ITP 300x	Database Web Development	3
ITP 301Lx	Interactive Web Development	4
ITP 460x	Web Application Project	4

ELECTIVE (TWO COURSES)		UNITS
ITP 302x	Advanced Web Publishing	2
ITP 310x	Design for User Experience	3
ITP 404x	Modern Technologies of Web Development	3
ITP 411x	Multimedia and Video Production	3
ITP 425x	Web Application Security	4
ITP 470x	Information Technology Practicum	3

Courses of Instruction

INFORMATION TECHNOLOGY PROGRAM (ITP)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

All ITP courses are open to non-engineering majors. The “x” designation indicates that engineering students

require prior departmental approval to count 100-level and above ITP courses for major credit.

ITP 090x Introduction to Adobe Photoshop (2, FaSp) Basic concepts of colors; color calibration tools; scanning, importing and exporting images; painting, editing, fill, and type tools; using layers, masks, filters, and color correction. Not available for degree credit. Graded CR/NC.

ITP 101x Introduction to Business Information Technologies (2) Business technologies. Operating systems. Networks. Application software.

ITP 102x Introduction to Creative Information Technologies (2) Creative technologies. Computer Graphics. Internet and Web. Mobile Systems. Digital Audio and Video.

ITP 104Lx Web Publishing (2) Web publishing using HTML, CSS and other Web technologies. Concepts and theory of Web site creation, page layout and production. Introduction to advanced topics. Not available for major credit in electrical engineering or computer science.

ITP 105x Introduction to Computer Technologies and Applications (2) The course offers a primer in computer technologies and applications essential to academic and career success. Not available for major credit to engineering majors.

ITP 109x Introduction to Java Programming (2, FaSp) Introduction to object-oriented software design for business problems. Creation of console applications, windowed applications, and interactive Web applets. Not available for major credit in electrical engineering or computer science.

ITP 110x Introduction to C Programming (2) Fundamentals of C; a survey of C compilers; the role of C in developing Unix and other operating systems. *Prerequisite:* knowledge of a higher-level language.

ITP 111x Introduction to Cloud Technologies (2) Introduction to the fundamentals of cloud computing; cloud security, storage, services, and networking options.

ITP 115 Programming in Python (2, FaSp) Python's high level data structures and clear syntax make it an ideal first language with powerful applications to science, business, finance, math, and the web.

ITP 125Lx From Hackers to CEOs: Introduction to Information Security (2, FaSp) Introductory course in computer security. Fundamentals of information security management. Threats to information integrity. Ethical hacking concerns and practice. Policies and Procedures. Not available for major credit in Engineering.

ITP 140 Mobile Application Technologies (2, FaSp) Technologies, devices, operating systems, and tools of mobile applications, as well as the mobile industry. Students will use tools to create apps for different mobile devices.

ITP 165x Introduction to C++ Programming (2, FaSp) Fundamentals of C++ syntax and semantics, including function prototypes, overloading, memory management, abstract data types, object creation, pointers to class members, and I/O streams. *Prerequisite:* any high-level programming language.

ITP 168x Introduction to MATLAB (2) Fundamentals of MATLAB: a high-performance numeric computation and visualization environment. Overview of linear algebra and matrix manipulation; using 2-D and 3-D plotting routines; programming in MATLAB; basic numerical analysis. *Recommended preparation:* MATH 118x or MATH 125.

ITP 201x Information Systems Design and Development (4) Applied design and development of information systems. Information system design models. Information system lifecycles. Computing systems and infrastructure. *Prerequisite:* ITP 101x.

ITP 215Lx 3-D Modeling, Animation, and Special Effects (2, FaSp) Developing a 3-D animation from modeling to rendering: Basics of surfacing, lighting, animation and modeling techniques. Advanced topics: compositing, particle systems, and character animation. Not available for major credit in engineering. *Recommended preparation:* knowledge of any 2D paint, drawing or CAD program.

ITP 230x Video Game Quality Assurance (4, FaSp) Survey game software development through quality assurance and in-depth analysis of the development cycle with a focus on bug testing systems and methodologies. Not available for major credit in electrical engineering.

ITP 280 Video Game Production (4, FaSp) History of video games; overview of game genres; phases of video game development (concept, preproduction, production, post-production); roles of artists, programmers, designers, and producers.

ITP 300x Database Web Development (3, Fa) Fundamental theory and technologies for creating dynamic, database-driven Websites: Structured Query Language. *Prerequisite:* ITP 104x; *Recommended preparation:* ITP 204x.

ITP 301Lx Interactive Web Development (4, Sp) Design, programming techniques for creating interactive, dynamic Web pages. Web development technologies and techniques include scripting fundamentals, Javascript, dynamic HTML, Actionscript, and Flash. Not available for major credit in engineering. *Prerequisite:* ITP 104x.

ITP 302x Advanced Web Publishing (2) Advanced topics in Web Publishing including HTML5, CSS3, and jQuery. Concept and theory of responsive design. Miscellaneous Webmaster topics including analytics, podcasting and search engine optimization. *Prerequisite:* ITP 104x.

ITP 304L Technologies for Building Online Political Campaigns (4) Key technology components necessary in building a successful online political campaign. Fundamentals of implementing, marketing and managing an online political campaign.

ITP 305x Advanced 3D Modeling, Animation, and Special Effects (3, Sp) Advanced modeling, surfacing, and animation techniques as well as dynamics, scripting, and other advanced 3D automation procedures. Not available for major credit in engineering. *Prerequisite:* ARCH 207a or ITP 215Lx.

ITP 310x Design for User Experience (3) Fundamental concepts, techniques, practices, workflows, and tools associated with the practice of user experience and interaction design in web and mobile applications.

ITP 315x 3D Character Animation (3) Advanced exploration of the process of bringing 3D characters to life from concept to model, and through production to finished performance. Not available for major credit in electrical engineering. *Prerequisite:* ITP 215Lx.

ITP 320x Enterprise Wide Information Systems (4, FaSp) The role Information Systems play in an organization. Integration of Business Processes by using Enterprise Resource Planning Systems (ERP).

ITP 325x Ethical Hacking and Systems Defense (3, FaSp) Hacking from a defense perspective. Hacker ethics and laws. Penetration testing. Vulnerability assessment. Securing workstations, servers, and networks. Not available for major credit in engineering. *Prerequisite:* ITP 125Lx.

ITP 335x Computer Graphics and Animation Scripting (4) Applications of the Python programming language to create tools for computer graphics and animation. Topics include linear algebra for graphics, exporters, and procedural asset generation. *Prerequisite:* ITP 214.

ITP 340x Mobile App Design (3) Fundamental concepts, techniques, practices, workflows, and tools associated with the practice of user experience design for mobile apps. *Prerequisite:* ITP 140.

ITP 341x App Development for Phones and Tablets (3) Develop phone and tablet applications for open-source platforms such as Android that utilize the core functionality of mobile devices such as GPS, accelerometers, touch gestures. *Prerequisite:* CSCI 104L, ITP 365x or ITP 367x.

ITP 342 Mobile Application Development (3) Develop applications for mobile devices such as iPhones and iPads (iOS) and other smart phones (Android). Build a mobile application from start to finish. *Prerequisite:* CSCI 104 or ITP 365x or ITP 367x.

ITP 343 Mobile Development for Content and Media (1) Creating media-focused mobile applications. Topics include recording/playback, audio synthesis, stream mixing, and positional audio. *Corequisite:* ITP 342.

ITP 344x Advanced Topics in Mobile App Development (3) Advanced topics in mobile app development such as using REST services, security, cloud integration, NFC (near field communication), wireless networking for mobile apps, monetizing apps, and the latest frameworks to create advanced apps. *Prerequisite:* ITP 342L.

ITP 357x Enterprise Network Design (3) Network technologies. Strategies for managing thousands of systems. Routers and managed switches. Integrated operating systems (IOS). Windows and Linux networking. Subnets. Not available for major credit in engineering. *Prerequisite:* ITP 125Lx.

ITP 360x 3D Compositing and Visual Effects (3) Advanced techniques for 3D animation and visual effects development including 3D pre-visualization, match moving, dynamics, multi-pass rendering, and digital compositing. Not available for major credit in engineering. *Prerequisite:* ITP 215Lx.

ITP 365x Managing Data in C++ (3) Overview of basic data structures and algorithms including linked lists, stacks, queues, binary trees, and hash tables. *Prerequisite:* ITP 109x or ITP 115x or ITP 165x.

ITP 367x Advanced Coding (4) Accelerated introduction to the C++ programming language. Advanced programming concepts including memory allocation, data structures, and the Standard Template Library. *Prerequisite:* ITP 214.

ITP 368x Programming Graphical User Interfaces (3) Programming applications with dynamic graphical user interfaces. Topics include events, controls, resources, data bindings, styles, and user experience. *Prerequisite:* CSCI 104 or ITP 365.

ITP 370x Information Security Management (3, Sp) Management techniques for security projects. Security team management. Laws and regulations for information security. Disaster recovery. Security Audits. Not available for major credit in engineering. *Prerequisite:* ITP 125Lx.

ITP 375x Digital Forensics (3, Fa) Forensic science techniques. Digital evidence preservation and presentation. Processes and methodologies for digital analysis. Not available for major credit in engineering. *Prerequisite:* ITP 125Lx.

ITP 380 Video Game Programming (4, FaSp) Underlying concepts and principles required for programming video games (topics include vectors, transformations, 3-D math, geometric primitives, matrices). *Prerequisite:* CSCI 104L or ITP 365x.

ITP 382x Mobile Game Programming (3) Concepts and techniques required to develop games for smartphones and tablets. Topics include sprites, collision detection, mobile input, artificial intelligence, and augmented reality games. *Prerequisite:* CSCI 104L or ITP 365x.

ITP 383 Database Systems: Concepts, Design and Implementation (3, Sp) (Enroll in ISE 382)

ITP 387x Cloud Architecture and Applications (4) Survey of “Infrastructure as a Service” and online application development. Concepts include online storage, computation, virtualization, messaging, and monetization. *Prerequisite:* CSCI 104 or ITP 365x or ITP 367x.

ITP 391abx Video Game Project Management (4-2) a: Project management basics for the video game industry, focusing on external development. Examine the role of the producer, managing development and coordinating with various stakeholders. *Prerequisite:* ITP 280. **b:** Project management for the video game industry, focusing on internal development. Creating ROIs, P&Ls, managing internal creative personnel, and coordinating with internal and external stakeholders.

ITP 393x Video Game Design Documents (2) Creation of design documents, from treatment to Game Design Document (GDD). Structuring documents for ease of use by team members who will create the game. *Prerequisite:* ITP 280.

ITP 404x Modern Technologies of Web Development (3, Fa) Provide students with the necessary skills to build web applications using modern techniques, frameworks, libraries, and tools that are used among developers within the industry. *Prerequisite:* ITP 301Lx or CSCI 351.

ITP 405x Professional Applications and Frameworks in Web Development (3) Provide students with the necessary skills to build structured, maintainable, scalable, and testable web applications using frameworks, tools, and techniques common in the industry. *Prerequisite:* CSCI 351 or ITP 300.

ITP 411x Multimedia and Video Production (3, FaSp) Visual communication and storytelling are essential skills, especially in the digital age. Overview of techniques and software to create, edit, and deliver compelling images and video. Not available for major credit in Engineering.

ITP 414x Seminar and 3D Portfolio Development (3, Sp) Advanced processes for developing 3D animation, showcasing skill sets, and qualifications for positions within the 3D animation industries; including demo reel, media, and website creation. Not available for major credit in engineering. *Prerequisite:* ITP 215Lx and ITP 305x or ITP 315x or ITP 360x.

ITP 415x 3-D Design and Prototyping (2) Explore the range of 3-D printing and prototyping technologies, and their application in modern industrial, design, and creative fields.

ITP 421x Advanced Programming for Enterprise Information Systems (3) Object Oriented Programming for Enterprise information systems. Working with classes, objects, database tables, SQL. Designing reports and Graphical user interfaces. Leveraging service oriented architecture. Not available for credit for engineering majors. *Prerequisite:* ITP 320x; *recommended preparation:* object oriented programming.

ITP 422L Configuring Enterprise Resource Planning Systems (3) Business process integration is the core advantage of using ERP systems. Analyze, configure, and test business processes for a company from the ground up. (Duplicates credit in former ITP 322.) *Prerequisite:* ITP 320Lx or ISE 583.

ITP 425x Web Application Security (4) Web application security techniques. eCommerce vulnerabilities. Online fraud. Solutions to spam and identity theft. Not available for major credit in Engineering. *Prerequisite:* CSCI 351 or ITP 301Lx or ITP 325x.

ITP 435x Professional C++ (3, Sp) Applications of advanced concepts in C++ including lambda expressions, template metaprogramming, secure coding, parallel programming techniques, and the boost library. *Prerequisite:* CSCI 104L or ITP 365x.

ITP 437x Secure Programming (3) Practical techniques for prevention, assessment, and resolution of security vulnerabilities in software. *Prerequisite:* CSCI 104 or ITP 365x.

ITP 438x Graphics Shader Programming (3, Fa) Implementation of advanced graphical effects with shaders in a production environment. Topics include math for shaders, lighting, mapping techniques, procedural generation, and global illumination. *Prerequisite:* ITP 165x.

ITP 439x Compiler Development (3) Practical applications of techniques used to develop a programming language compiler. *Prerequisite:* ITP 435x.

ITP 440x Enterprise Database Management (3, FaSpSm) Advanced concepts in database management, design, customization, maintenance and management of a database in an enterprise environment.

ITP 442x Mobile App Project (4) Capstone course for Mobile App Development minor. Work in project teams to develop new mobile app from start to finish. Meet with client, create app design, develop, test, and demonstrate app to client. *Prerequisite:* ITP 140.

ITP 444 Social Game Development Workshop (2) Hands-on development of video games for social media; realities of the social games market; development tools and processes. *Prerequisite:* ITP 101.

ITP 445 Macintosh, OSX, and iOS Forensics (3) Digital forensics. Digital evidence. Apple. Mac. Macintosh. OSX. iOS. iPhone. iPad. *Prerequisite:* ITP 375x.

ITP 446 Cyber Breach Investigations (3, Fa) Cyber breaches. Data theft. Enterprise data analysis. Network forensic analysis. Server forensics. *Prerequisite:* ITP 375.

ITP 447 Mobile Device Security and Forensics (3, Sp) Mobile device security. Mobile device forensics. Android. Blackberry. Windows phone. Symbian. *Prerequisite:* ITP 375x.

ITP 448 Cyber Litigation Support (3, Sp) Civil Litigation. Digital and Electronic Evidence. Electronic Discovery. eDiscovery. Electronically Stored Information. *Prerequisite:* ITP 375x.

ITP 454x Enterprise Resource Planning, Design, and Implementation (3) Process and requirements to implement an Enterprise Resource Planning System (ERP). Set up server, implement ERP system, then transfer and configure database for case company. Not for major credit for Electrical Engineering students. *Prerequisite:* ITP 320x.

ITP 455Lx Enterprise Information Portals (3) Enterprise Information Portals for various case companies will be explored. Student will design, install, configure and administer core functionalities of a basic portal solution. *Prerequisite:* ITP 320Lx.

ITP 457 Network Security (4) Network policy and mechanism, firewalls, malicious code; intrusion detection, prevention, response; cryptographic protocols for privacy; risks of misuse, cost of prevention, and societal issues. *Prerequisite:* ITP 357x.

ITP 460x Web Application Project (4, Sp) Skills to plan, analyze, build, and launch professional Web sites with actual clients. Includes project management, documentation, technology assessment, security, UI, Q/A, and various methodologies. *Recommended preparation:* One 300-level Web minor course.

ITP 466 Building the High Tech Startup (4) Teach students the basic technologies and processes involved in building web and mobile startups. Students will be introduced to the different aspects of building a web startup including online business models, Product management, Agile development processes, technology platforms and operations, customer development and online marketing.

ITP 470x Information Technology Practicum (1-4, max 8, FaSpSm) Independent technology project related to specific topics under the direction of a faculty member. Not available for graduate credit in engineering. *Recommended preparation:* appropriate 300-level course work to topic of study.

ITP 475x Advanced Digital Forensics (4, Sp) Advanced forensic techniques. Live image analysis. Network level forensic investigation. Server forensic techniques. Deposition and trial. Not available for major credit in Engineering. *Prerequisite:* ITP 375x.

ITP 476 Technologies for Interactive Marketing (4) Designed to introduce students to technologies, concepts and strategies in the emerging online advertising ecosystem. Through lectures, discussions, and projects, students learn strategies and tactics to drive traffic to a website. They learn how to analyze and measure the efficacy of their plans. Lastly, they will work with a real client and with a real budget to craft and execute an online marketing plan.

ITP 479 Cyber Law and Privacy (3) Cyber legal issues, search and seizure, 4th amendment and digital evidence, private searches, case law relating to search and seizure.

ITP 480x Information Technology Internship (1-4, max 8) Practical experience in applying information technology skills in real-world settings. Supervised internship at companies and start-ups. Balancing academic rigor with corporate challenges and deadlines. Not available for graduate credit. Graded CR/NC. *Recommended preparation:* knowledge of chosen function area.

ITP 482 Engineering Database Applications (3) Planning and implementation of engineering information systems that interface with a large database. Emphasis is placed on web-based data entry and retrieval. *Prerequisite:* CSCI 101 and DSO 435 or ISE 382.

ITP 484x Multiplayer Game Programming (3) Techniques for developing networked multiplayer games. Topics include Internet protocols, network topology, data streams, object sharing, client prediction, latency, and back-end databases. *Prerequisite:* ITP 380.

ITP 485 Programming Game Engines (4, FaSp) Techniques for building the core components of a game

engine; 2-D/3-D graphics, collision detection, artificial intelligence algorithms, shading, programming input devices. *Prerequisite:* ITP 380.

ITP 486 Securing and Auditing Enterprise Resource Planning Systems (3) Management and technical issues related to the security of ERP systems. Students will audit ERP systems and apply appropriate security controls. *Prerequisite:* ITP 320x.

ITP 487 Data Warehouses and Business Intelligence (3) Rigorous modeling process leading from data to decisions. Explores theory and practice of Data Warehouses. Deriving Business Intelligence for strategic enterprise management. *Prerequisite:* ITP 320x.

ITP 488x Managing Supply Chains with Advanced Planning and Optimization (3) Drivers and obstacles to the process of coordinating the flow of material/information along the logistics chain. Optimize the supply network, from raw materials to sales. Not available for major credit in engineering except toward undergraduate and graduate programs offered by the Epstein Department of Industrial and Systems Engineering. *Prerequisite:* ITP 320x.

ITP 489 In-Memory Database Systems for Real Time Analytics (3) Examines the design, architecture, and capabilities of in-memory database and their application to real-time analytics. *Prerequisite:* ITP 320x or ITP 482.

ITP 491x Level Design and Development for Video Games (4) Theories and practices of defining, prototyping, testing, and refining a video game level, development of game level documents, and the tools for managing the development process. Not for major credit for computer science and electrical engineering students. *Prerequisite:* ITP 280.

ITP 496 The Startup Launchpad Lab (2) A real world, hands-on learning experience on what it's like to actually start a high-tech company. Students will work in teams to design, prototype and implement version 1.0 of a high tech web or mobile startup. *Prerequisite:* BAEP 451, BAEP 452, ITP 466 and ITP 476; *corequisite:* BAEP 496.

ITP 499x Special Topics (2-4, max 8) Recent developments in computers and data processing.

Master of Science in Manufacturing Engineering

Manufacturing engineering at USC is a multidisciplinary program that confers the degree of Master of Science and is designed to produce graduates capable of responding to the needs of modern, up-to-date manufacturing. These graduates should be able to design, install and operate complex manufacturing systems made up of people, materials, automated machines and information systems. The Departments of Computer Science, Electrical Engineering, Industrial and Systems Engineering, Materials Science, Mechanical Engineering, and Entrepreneurship participate in the Manufacturing Engineering Program.

Course work in the program will train students in traditional manufacturing engineering topics, such as materials selection and process design. Additional courses will include modern technologies such as 3D printing and system-level concepts of integrated product and process design, applications of modern information technology

to design and manufacturing, hands-on laboratories using advanced manufacturing equipment and commercial software, and innovation and entrepreneurship.

Curriculum

A total of 30 units is required beyond the B.S. degree. A minimum of 21 units must be at the 500 level or above. A maximum of 6 units of electives may be taken from non-engineering departments. At least three courses must be taken in the student's selected area of specialization.

REQUIRED COURSES		UNITS
CSCI 585	Database Systems, or	
ISE 510	Advanced Computational Design and Manufacturing	3
ISE 511L	Mechatronic Systems Engineering	3
ISE 517	Modern Enterprise Systems, or	
ISE 576	Industrial Ecology: Technology-Environment Interaction	3
ISE 525	Design of Experiments, or	
AME 525	Engineering Analysis	3
Approved electives*		18
		30

*A list of approved electives in specialization areas is available from the department. Departmental approval is required for courses not listed.

Program Director: Stephen C-Y Lu, Ph.D.

Interim Director: Ang Liu, Ph.D.

Master of Science in Product Development Engineering

The Master of Science in product development engineering (MS PDE) is an interdisciplinary graduate degree program at USC jointly offered by the Aerospace and Mechanical Engineering and the Daniel J. Epstein Industrial and Systems Engineering (ISE) departments. The Daniel J. Epstein Industrial and Systems department manages this joint degree program. Students can enter this program in either the fall or spring semesters, and it is available to full-time and part-time students.

Admission

The program has the following admission requirements:

- A bachelor's degree in an area of engineering or science;
- An undergraduate cumulative GPA of 3.0 or above; and
- Satisfactory general GRE scores of at least 146 verbal and 151 quantitative.

The MS PDE program requires a minimum of 27 units to complete. Although it is mainly a course work-based program, students can choose to complete the program with or without a thesis requirement. For the thesis option, 4 of the 27 units are to be thesis. At least 16 units, not including thesis, must be at the 500 level or higher,

and at least 18 units must be from the AME and ISE departments. For the non-thesis option, 18 of the 27 units must be at the 500 level or higher from the AME and ISE departments, and/or closely related departments. As well, students can choose to take up to 6 units of directed research (e.g., AME 590 or ISE 590). Students must maintain a minimal cumulative GPA of 3.0 in USC course work to graduate.

The program's prerequisite is a minimum of one 400 level course in either engineering design or engineering economy. Admitted students who do not meet this prerequisite will be assigned appropriate USC course(s) to complete the deficiencies. Deficiency courses, if taken at the 400 level, may be counted toward 27 units as general electives with adviser approval.

Depending on the academic background and career interests of students, the program offers two areas of specialization, product development technology and product development systems. The product development technology specialization will prepare students for a career as future product development engineers, while the product development systems specialization will prepare students as future product development managers. Students entering this program must declare their choice of an area of specialization and follow the requirements of each area of specialization to graduate.

Curriculum

The required 27 units are grouped into four categories of courses for each area of specialization as follows:

REQUIRED COURSES (6 UNITS)		UNITS
AME 503	Advanced Mechanical Design	3
ISE 545	Technology Development and Implementation	3
PRODUCT DEVELOPMENT SYSTEMS REQUIRED COURSES (6 UNITS)		UNITS
ISE 515	Engineering Project Management	3
ISE 544	Management of Engineering Teams	3
PRODUCT DEVELOPMENT SYSTEMS TECHNICAL ELECTIVES (6 UNITS)		UNITS
ISE 460	Engineering Economy	3
ISE 470	Human/Computer Interface Design	3
ISE 511L	Mechatronics Systems Engineering	3
ISE 517	Modern Enterprise Systems	3
ISE 525	Design of Experiments	3
ISE 527	Quality Management for Engineers	3
ISE 528	Advanced Statistical Aspects of Engineering Reliability	3
ISE 555	Invention and Technology Development	3
ISE 561	Economic Analysis of Engineering Projects	3
ISE 567	Collaborative Engineering Principles and Practice	3
ISE 576	Industrial Ecology: Technology-Environment Interaction	3
ISE 580	Performance Modeling and Simulation	3
ISE 585	Strategic Management of Technology	3
SAE 541	Systems Engineering Theory and Practice	3
PRODUCT DEVELOPMENT TECHNOLOGY REQUIRED COURSES (6 UNITS)		UNITS
AME 505	Engineering Information Modeling	3
AME 525	Engineering Analysis, or	
AME 526	Engineering Analytical Methods	3
PRODUCT DEVELOPMENT TECHNOLOGY TECHNICAL ELECTIVES (6 UNITS)		UNITS
AME 408	Computer-Aided Design of Mechanical Systems	3

AME 410	Engineering Design Theory and Methodology	3
AME 481	Aircraft Design	3
AME 501	Spacecraft System Design	3
AME 506	Design of Low Cost Space Missions	3
AME 527	Elements of Vehicle and Energy Systems Design	3
AME 544	Computer Control of Mechanical Systems	3
AME 588	Materials Selection	3
CE 550	Computer-Aided Engineering	3
CE 551	Computer-Aided Engineering Project	3
ISE 567	Collaborative Engineering Principles and Practice	3
ISE 576	Industrial Ecology: Technology-Environment Interaction	3
SAE 549	Systems Architecting	3

GENERAL ELECTIVES (9 UNITS)		UNITS
Adviser-approved electives		
(Must be upper-division 400- or 500-level courses; up to 4 units can be transferred from other institutions)		
Total units required for degree		27

Viterbi School of Engineering

Sustainable Infrastructure Systems

The Sustainable Infrastructure Systems program prepares students for immediate and effective participation in the modern infrastructure workforce through a common core that includes smart-system design for sustainable infrastructures, the societal and regulatory context of infrastructure engineering decisions, and construction management. Five plans of study for the Master of Science degree allow for specialization based on background and interest.

Master of Science in Civil Engineering (Transportation Systems)

REQUIRED COURSES		UNITS
CE 471	Principles of Transportation Engineering	3
CE 501	Functions of the Constructor	3
CE 515	Sustainable Infrastructure Systems	3
CE 579	Introduction to Transportation Planning Law	3
PPD 633	Urban Transportation Planning and Management	4

ELECTIVE COURSES (FOUR COURSES, OTHER ELECTIVES UPON APPROVAL*)		UNITS
CE 583	Design of Transportation Facilities	3
CE 585	Traffic Engineering and Control	3
CE 588	Railroad Engineering	3
CE 589	Port Engineering: Planning and Operations	3
PPD 634	Institutional and Policy Issues in Transportation	4
PPD 692	Transportation and the Environment	4

**Note: Students electing the Master of Science in Civil Engineering (Transportation Systems) degree option are expected to have a background in statistics and uncertainty equivalent to ISE 225 or CE 408, and engineering economy equivalent to ISE 460. Admitted students who do not meet these prerequisites can satisfy the requirements by taking appropriate, adviser-approved electives.*

Master of Science in Civil Engineering (Water and Waste Management)

REQUIRED COURSES		UNITS
CE 451	Water Resources Engineering	3
CE 453	Water Quality Control	3
CE 476	Design of Pressurized Hydraulic Systems	3
CE 501	Functions of the Constructor	3
CE 515	Sustainable Infrastructure Systems	3

ELECTIVE COURSES (FOUR COURSES, OTHER ELECTIVES WITH APPROVAL*)		UNITS
CE 504	Solid Waste Management	3
CE 510	Groundwater Management	3
CE 511	Flood Control Hydrology	3
CE 516	Geohydrology	3
CE 520a	Ocean and Coastal Engineering	3

**Note: Students electing the Master of Science in Civil Engineering (Water and Waste Management) degree option are expected to have a background in fluid mechanics equivalent to CE 309 or ENE 410. Admitted students who do not meet this prerequisite will be assigned a course to complete the deficiency.*

Master of Science in Electrical Engineering (Electric Power)

REQUIRED COURSES		UNITS
CE 515	Sustainable Infrastructure Systems	3
EE 443	Introduction to Power Systems	3
EE 444	Power Systems Technology	3
EE 521	Power Systems Analysis and Design	3

ELECTIVE COURSES (FIVE COURSES, TAKE AT LEAST ONE FROM EACH AREA)		UNITS
--	--	--------------

Transmission, Distribution and Planning

CE 501	Functions of the Constructor	3
EE 516	High-Voltage DC Transmission Systems	3
EE 524	Transients in Power Systems	3
EE 525	Power System Protection	3
EE 526	Renewable Energy in Power Systems	3

High-Voltage Equipment and Design

EE 515	High-Voltage Technology	3
EE 528	Power Electronics	3

Power-System Control and the Smart Grid

EE 482	Linear Control Systems	3
EE 527	Net-Centric Power-System Control	3

EE 543 a	Digital Control Systems	3
EE 585	Linear System Theory	3
EE 593	Multivariable Control	3

Master of Science in Mechanical Engineering (Energy Conversion)

REQUIRED COURSES (7 COURSES, 21 UNITS)		UNITS
AME 430	Thermal Systems Design	3
AME 525	Engineering Analysis	3
AME 526	Engineering Analytical Methods	3
AME 577	Survey of Energy and Power for a Sustainable Future	3
AME 578	Modern Alternative Energy Conversion Devices	3
CE 501	Functions of the Constructor	3
CE 515	Sustainable Infrastructure Systems	3

ELECTIVE COURSES (TWO COURSES, 6 UNITS*)		UNITS
AME 513	Principles of Combustion	3
AME 514	Applications of Combustion and Reacting Flows	3
AME 579	Combustion Chemistry and Physics	3
AME 581	Introduction to Nuclear Engineering	3
AME 582	Nuclear Reactor Physics	3
ENE 505	Energy and the Environment	3

**Students are encouraged to consider electives from other Sustainable Infrastructure Systems programs*

Students with M.S. degrees in engineering or science disciplines can be accepted in these programs. Students must satisfy all other departmental degree requirements.

Honor Societies

Omega Alpha Association

Omega Alpha Association is the systems engineering honor society. The adviser is Professor Elliot Axelband, [✉ axelband@rand.org](mailto:axelband@rand.org).

Degree Requirements

Master of Science in Systems Architecting and Engineering

This program is recommended to graduate engineers and engineering managers responsible for the conception and implementation of complex systems. Emphasis is on the creative processes and methods by which complex systems are conceived, planned, designed, built, tested and certified. The architecture experience can be applied to defense, space, aircraft, communications, navigation, sensors, computer software, computer hardware, and other aerospace and commercial systems and activities.

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in systems architecting and engineering. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average.

In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in Systems Architecting and Engineering is also subject to the following requirements:

- a total of at least 30 units is required, consisting of at least 3 units in the technical management area, 3 units in the general technical area, and 9 units in the technical specialization area;
- every plan of study requires prior written approval by the director of the systems architecting and engineering program recorded on the study plan in the student's file;

- no more than 9 units at the 400 level may be counted toward the degree — the remaining units must be taken at the 500 or 600 level;
- at least 24 of the 30 units must be taken in the Viterbi School of Engineering;
- units to be transferred (maximum of four with adviser approval) must have been taken prior to taking classes at USC; interruption of residency is not allowed;
- no more than 6 units of Special Topics courses (499 or 599) may be counted for this degree;
- thesis and directed research registrations may be allowed to individual students only by special permission of the supervising faculty member and the program director;
- a bachelor's degree in an engineering field and a minimum of three years systems experience are recommended prior to taking Systems Architecting and Design Experience courses. This program is not recommended for recent bachelor's degree graduates.

REQUIRED COURSES		UNITS
ISE 460	Engineering Economy, or	
SAE 560	Economic Considerations for Systems Engineering	3
SAE 541	Systems Engineering Theory and Practice	3
SAE 542	Advanced Topics in Systems Engineering	3
SAE 547	Model-Based Systems Architecting and Engineering, or	
SAE 548	Systems/System-of-Systems Integration and Communication	3
SAE 549	Systems Architecting	3

ELECTIVES		UNITS
Adviser-approved electives in technical management area		3
Adviser-approved electives in general technical area		3
Adviser-approved electives in technical specialization area		9

Technical Management Area: Take one course (3 units) from the following:

CE 556	Project Controls-Budgeting and Estimating	3
DSO 525*	Quality Improvement Methods	3
DSO 527*	Managerial Decision Analysis	3
DSO 537*	Global Businesses and Markets: Strategies Enabled by Technology	3
DSO 580*	Project Management	3
ISE 515	Engineering Project Management	3
ISE 517	Modern Enterprise Systems	3
ISE 544	Management of Engineering Teams	3
ISE 562	Value and Decision Theory	3
ISE 585	Strategic Management of Technology	3
MOR 561*	Strategies in High-Tech Businesses	3
SAE 550	Systems Architecting and the Political Process	3

*USC Marshall School of Business course. DSO 525 and DSO 527 are offered irregularly.

General Technical Area: Take one course (3 units) from the following:

CSCI 510	Software Management and Economics	3
CSCI 577ab	Software Engineering	4-4
ISE 580	Performance Modeling and Simulation	3
SAE 543	Case Studies in Systems Engineering and Management	3

SAE 550	Systems Architecting and the Political Process	3
SAE 551	Lean Operations	3

*USC Marshall School of Business course.

Technical Specialization Area: Nine units are required, usually in the student's present or intended technical specialty. Courses are intended to complement the student's prior education and experience toward becoming a well-rounded systems architect-engineer or architect-manager. With a few exceptions, the courses should come from the recommended list, and usually all from a single specialization.

The student may choose from a large variety of technical specializations spanning all departments in the Viterbi School of Engineering. Flexibility is emphasized in this choice; the program director is expected to work closely with the student in choosing the best set of courses to meet the student's need.

Several sample specializations are listed below but are not intended to be complete.

Recommended Courses

Aerospace and Mechanical Systems: AME 503, AME 521, AME 532a, AME 544, AME 548, AME 560, AME 588

Artificial Intelligence/Neural Networks: CSCI 460, CSCI 545, CSCI 561, CSCI 564, CSCI 567, CSCI 574; EE 547

Automation and Control Systems: EE 543a, EE 547, EE 585, EE 587, EE 593

Communication and Signal Processing Systems: EE 551, EE 562a, EE 563, EE 564, EE 567, EE 582, EE 583

Computer and Information Systems: CSCI 485, CSCI 551, CSCI 585, EE 552, EE 554, EE 561, EE 562a, EE 574, EE 658

Construction: CE 501, CE 519, CE 525ab, CE 533, CE 536, CE 556, CE 583

Engineering Management Systems: ISE 515, ISE 530, ISE 535, ISE 544, ISE 562, ISE 580, ISE 585, SAE 550

Integrated Media Systems: EE 450, EE 522, EE 555, EE 569, EE 596; CSCI 551, CSCI 574, CSCI 576, CSCI 585, CSCI 588

Manufacturing Systems: AME 588; EE 561ab; ISE 511, ISE 514, ISE 516, ISE 517, ISE 544, ISE 570

Network-centric: CSCI 402, CSCI 530, CSCI 551, CSCI 555, CSCI 558L, CSCI 577ab, EE 550

Software Process Architecture: CSCI 510, CSCI 577b, CSCI 665; EE 554, EE 557; ISE 544, ISE 562, ISE 564

Systems: EE 598; ISE 515, ISE 520, ISE 525, ISE 527, ISE 528, ISE 532, ISE 535, ISE 536, ISE 538, ISE 544, ISE 562, ISE 580, ISE 585; SAE 541, SAE 542

Graduate Certificate in Systems Architecting and Engineering

The graduate certificate in systems architecting and engineering is designed for practicing engineers engaged in the creation and design of complex innovative systems, in aerospace and commercial fields. Entering students are expected to have a bachelor's degree in engineering or a related field from an accredited institution. Three years of industry experience are recommended. Students are required to earn a cumulative B average or higher in courses taken for the certificate. The courses taken for the certificate may be applied later to the Master of Science in Systems Architecting and Engineering.

SAE 548	Systems/System-of-Systems Integration and Communication	3
SAE 549	Systems Architecting	3
SAE 574	Net-Centric Systems Architecting and Engineering	3

All programs of study will be approved by the director of the Systems Architecting and Engineering program.

Graduate Certificate in Network Centric Systems

This 15-unit graduate certificate is jointly sponsored by the Epstein Industrial and Systems Engineering, Hsieh Electrical Engineering and Computer Science departments, and administered by the Epstein ISE Department. This certificate is designed for practicing engineers engaged in the creation and design of complex innovative network centric systems in aerospace and commercial fields. Entering students are expected to have a bachelor's degree in engineering or a related field from an accredited institution. Three years of industry experience are recommended. Students are required to earn a cumulative B average or higher in courses taken for the certificate. The courses taken for the certificate may be applied later to the Master of Science in Computer Science, Electrical Engineering or Systems Architecting Engineering with departmental approval.

Courses of Instruction

SYSTEMS ARCHITECTING AND ENGINEERING (SAE)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

SAE 496 Systems Engineering Through Motorsports (3, FaSp) Applied systems architecting, engineering and management to motorsports from design to validation and verification; venues include drag racing, grand prix Formula SAE racing, DARPA Challenges.

SAE 499 Special Topics (2-4, max 8, FaSpSm) Course content to be selected each semester from recent developments in Systems Architecting and Engineering and related fields.

SAE 541 Systems Engineering Theory and Practice (3, FaSpSm) Integration of engineering problem solving methodologies based on systems concepts. Application to complex, large scale technical systems and problems faced by engineering managers. Case studies. (Duplicates credit in former ISE 541.)

SAE 542 Advanced Topics in Systems Engineering (3, FaSpSm) Advanced topics in integration software management and systems engineering, probabilistic foundations of decision-based theory, quantitative risk management, decision-based design, and safety aspects of systems engineering. (Duplicates credit in former ISE 542.)

SAE 543 Case Studies in Systems Engineering and Management (3, FaSp) Real-world case studies in DoD, NASA, and commercial arenas, employing new methodologies to cover the fundamental positive and negative development learning principles of systems engineering.

SAE 547 Model-Based Systems Architecting and Engineering (3) Approaches for modeling systems using software such as SySML; modeling system, requirements, structure, behavior, and parametrics; mapping to hardware description language and behavioral code generation. *Recommended preparation:* Modeling and simulation courses.

SAE 548 Systems/System-of-Systems Integration and Communication (3, FaSp) Essentials of systems and system-of-systems integration from the perspectives of business, programs, and technology. Process, legacy, and systems-of-systems integration. Verification and validation methods. Case studies. *Recommended preparation:* bachelor's degree in engineering or physical sciences.

SAE 549 Systems Architecting (3, FaSp) Introduction to systems architecture in aerospace, electrical, computer, and manufacturing systems emphasizing the conceptual and acceptance phases and using heuristics. *Prerequisite:* B.S. degree in a related field of engineering.

SAE 515 Sustainable Infrastructure Systems (3, Fa) Explores broad issues and mitigation measures involved in the analysis and design of complex, uncertain, interacting infrastructure systems needing to be resilient and sustainable.

SAE 550 Systems Architecting and the Political Process (3) Analysis of risks inherent in managing high-

tech/high-cost government-funded engineering programs; tools and techniques for coping with the impacts of politically-driven budgets on the engineering design process. (Duplicates credit in former ISE 550.)

Recommended preparation: two years of work experience.

SAE 551 Lean Operations (3, Sp) Study of lean principles and practices as applied to automotive, aerospace and other industries.

SAE 560 Economic Considerations for Systems Engineering (3, Sp) Impact of economic factors for systems architects and engineers, tools for understanding these factors, fundamental quantitative analysis of cash flow, life-cost estimating for systems and software engineering.

SAE 574 Net-Centric Systems Architecting and Engineering (3, FaSp) In-depth examination of the technical design approaches, tools, and processes to enable the benefits of net-centric operations in a networked systems-of-systems.

SAE 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SAE 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

SAE 599 Special Topics (2-4, max 9, FaSpSm) Course content will be selected each semester to reflect current trends and developments in the field of systems architecting and engineering.

USC Davis School of Gerontology

At the USC Leonard Davis School of Gerontology, students study the human lifespan by exploring all dimensions of adult life. They enhance their learning through volunteer work, research opportunities and internships with local organizations, national institutes and international partners.

The USC Leonard Davis School of Gerontology explores all aspects of human development and aging. Course work and research opportunities in biology, psychology, sociology, policy and aging services make up its multidisciplinary curriculum.

Founded in 1975, USC Davis is not only the nation's premier school of gerontology, it is also the first. Named in honor of Leonard Davis, a philanthropist and businessman who pioneered insurance plans for the elderly through his involvement in AARP and his own company Colonial Penn Life Insurance, the school provides ground-breaking solutions to issues facing an aging population.

USC Leonard Davis School is committed to providing students with a broad theoretical understanding of lifespan development as well as dynamic post-graduate career placement. Students on all levels often enroll in semester-long internship programs. Working with our internship director, students can apply their gerontological knowledge to an array of industries such as health, medicine, business, finance, policy, direct services, program development, counseling and many other fields.

USC Leonard Davis School's Bachelor of Science degrees can be pursued with a health science, a social science or a global emphasis. The school also offers five master's degrees, seven dual master's programs, a graduate certificate, and Ph.D. programs in gerontology as well as in the biology of aging.

The School is located in the Ethel Percy Andrus Gerontology Center and is home to the Center for Digital Aging, the Center for Global Aging, the Fall Prevention Center of Excellence, the Long Beach Longitudinal Study, the Longevity Institute, the USC/UCLA Center on Biodemography and Population Health and the Los Angeles Caregiver Resource Center.

Kelvin J.A. Davies, Ph.D., D.Sc., *Vice Dean and Director of the Ethel Percy Andrus Gerontology Center*

Maria Henke, M.A., *Associate Dean, USC Davis School of Gerontology*

Faculty

William and Sylvia Kugel Dean's Chair in Gerontology: Pinchas Cohen, M.D.

AARP University Chair in Gerontology: Eileen Crimmins, Ph.D.*

ARCO/William F. Kieschnick Chair in the Neurobiology of Aging: Caleb E. Finch, Ph.D.*

James E. Birren Chair in Gerontology: Kelvin J.A. Davies, Ph.D., D.Sc.*

The Golden Age Association/Frances Wu Chair in Chinese Elderly: Iris Chi, Ph.D. (Social Work)

Edna M. Jones Chair in Gerontology: Valter D. Longo, Ph.D.

Rita and Edward Polusky Chair in Education and Aging: Elizabeth M. Zelinski, Ph.D.*

*UPS Foundation Chair in Gerontology: Jon Pynoos, Ph.D.**

*Mary Pickford Foundation Professor of Gerontology: Kathleen H. Wilber, Ph.D.**

Professors: Margaret Gatz, Ph.D. (Psychology); Bob Knight, Ph.D.; Martin Levine, Ph.D. (Law, Psychiatry and the Behavioral Sciences); Mara Mather, Ph.D.; John J. McArdle, Ph.D. (Psychology); Michal Mor-Barak, DSW (Social Work); Roseann Mulligan, DDS (Dentistry); Mike Nichol, Ph.D. (Pharmacy and Public Policy); Christian Pike, Ph.D.; Victor Regnier, M.Arch. (Architecture); Edward L. Schneider, M.D.; Lon Schneider, M.D. (Psychiatry and Neurology); John Tower, Ph.D. (Biological Sciences); Bradley R. Williams, Pharm.D. (Clinical Pharmacy)

Associate Professors: Maria Aranda, Ph.D. (Social Work); Susan H. Enguidanos, Ph.D.; Jeffrey McCombs, Ph.D. (Pharmacy); John P. Walsh, Ph.D.**

Assistant Professors: Cleopatra Abdou, Ph.D.; Sean Curran, Ph.D.; Tara Lynn Gruenewald, Ph.D.; Natalie Leland, Ph.D. (Occupational Therapy); Ana Marie Yamada, Ph.D. (Social Work)*

Research Professors: Todd Morgan, Ph.D.; Albert Rizzo III, Ph.D.

Research Associate Professors: Roseann Giarrusso, Ph.D.; Jung Ki Kim, Ph.D.

Research Assistant Professors: Donna Benton, Ph.D.; Thomas Parsons, Ph.D.

*Adjunct Professors: Neal Cutler, Ph.D.; Fernando Torres-Gil, Ph.D.**

Adjunct Associate Professors: Joanna Davies, Ph.D.; Janet Frank, Ph.D.; Monika White, Ph.D.

Adjunct Research Professor: Larry Rubenstein, Ph.D.

Adjunct Research Assistant Professor: Tracy Armstrong, Ph.D.

Adjunct Clinical Professor: Robert M. Tager, M.D.

Clinical Associate Professor: Raquel D. Arias, M.D.

Instructional Assistant Professors: Aaron Hagedorn, Ph.D.; Carin B. Kreutzer, Ed.D.; Freddi Segal-Gidan, Ph.D.; George Shannon, Ph.D.

Emeritus Professors: Vern Bengtson, Ph.D.; James E. Birren, Ph.D.

Emeritus Associate Professor: Phoebe Liebig, Ph.D.

**Recipient of university-wide or college teaching award.*

Programs

The Davis School of Gerontology offers a Bachelor of Science in Human Development and Aging, a Bachelor of Science in Lifespan Health, undergraduate classes through the health and humanity major in the USC Dornsife College of Letters, Arts and Sciences, two minors in gerontology and a progressive Master of Science in Gerontology open to all undergraduate students.

The School of Gerontology offers several graduate degrees including a Master of Science in Gerontology; a Master of Aging Services Management; a Master of Arts in Gerontology; a Master of Long Term Care Administration (with the Marshall School of Business and the Price School of Public Policy) and a Master of Science in Nutrition, Healthspan and Longevity. All master's degrees are offered online and onsite. The School of Gerontology offers the premier Ph.D. in Gerontology program in the nation. The program is not offered online. The school also offers a Ph.D. in the Biology of Aging. Non-degree graduate students may complete 16 units of gerontology and be awarded a graduate level certificate in gerontology (also available online).

Master's degree students may pursue one of several dual degrees, which are jointly offered with other

professional schools. These are the Master of Science in Gerontology and the Master of Business Administration (M.S./MBA) with the Marshall School of Business; the Master of Science in Gerontology and the Juris Doctor (M.S./J.D.) with the Gould School of Law; the Master of Science in Gerontology and the Master of Public Administration (M.S./MPA), the Master of Science in Gerontology and the Master of Health Administration (M.S./MHA), and the Master of Science in Gerontology and the Master of Planning (M.S./MPI) with the Price School of Public Policy; the Master of Science in Gerontology and the Master of Social Work (M.S./MSW) with the School of Social Work; and the Master of Science in Gerontology and the Doctor of Pharmacy (M.S./Pharm.D.) with the School of Pharmacy.

In addition to the degree and minor programs, overview courses in aging are offered for undergraduates enrolled in other units of the university. Many gerontology courses can be credited as elective units.

Honor Society

The student honor society is Sigma Phi Omega, the national honor society formed in 1980 to recognize the excellence of those who study gerontology. The organization seeks to promote scholarship and professionalism, and to recognize exemplary attainment in the field of aging. Undergraduates must have a GPA of at least 3.3 and graduate students a GPA of at least 3.5. Sigma Phi Omega is administered by the Association for Gerontology in Higher Education, an educational unit of the Gerontological Society of America.

Davis School of Gerontology

Undergraduate Programs

Bachelor of Science in Human Development and Aging

The Bachelor of Science in Human Development and Aging is an undergraduate degree offered at the USC Davis School of Gerontology in the social sciences. Students in this program often pursue careers related to older adults in business, law, the nonprofit sector or government agencies.

Students may also specialize in a health science track. The health science track combines the core gerontology curriculum with the prerequisites for admission to medical school and other health-related fields including: dentistry, pharmacy, occupational/physical therapy, physician assistant programs and others. In addition, students will participate in a supervised practicum experience in which they will become directly involved with aging clients in a health care setting.

Students planning to pursue a B.S. are urged to notify the school of this intent as early as possible during their undergraduate study. This will help ensure that the student receives proper advisement and that the student is alerted to any special requirements or program modifications.

During the freshman and sophomore years, students enroll primarily in general education required courses as specified by the university and the Human Development and Aging course (GERO 200).

During their junior and senior years, students enroll in required and elective courses in the School of Gerontology as well as other courses throughout the university. These courses are selected in consultation with an adviser and reflect the personal and professional interests of the students.

The honors program is available to juniors who maintain a GPA of 3.5 in gerontology and a GPA of 3.3 in other USC course work. The honors program includes mentored training in research and course work relevant to research methodology and statistics.

A grade point average of at least C (2.0) on all units attempted at USC is required for undergraduate degrees. The School of Gerontology requires a minimum 2.0 grade point average in upper division courses applied toward the major.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies). See <http://dornsife.usc.edu/2015ge> for more information.

Foreign Language or Programming Skills (12 Units)

Students must satisfy the skill level requirement in one language or complete ITP 101x and additional ITP 100-level programming courses to total 12 units. Students in the health science track are required to complete only ITP 101x.

Degree Requirements

REQUIRED COURSES		UNITS
GERO 200	Gerontology: The Science of Adult Development	4
GERO 320	Psychology of Adult Development	4
GERO 330	Society and Adult Development	4
GERO 340	Policy, Values, and Power in an Aging Society	4
GERO 350	Administrative Problems in Aging	4

PSYC 437*	Adolescent Development	4
SOCI 305	Sociology of Childhood	4
SOCI 369	The Family in a Changing Society	4
SOCI 385	Population, Society, and Aging	4

*Prerequisite required.

Health Science Track in Human Development and Aging

Requirements for Admission

The listed requirements for admission to the health science track in human development and aging will not differ from existing requirements for admission to the Bachelor of Science in Human Development and Aging.

However, because health professional schools are very competitive, USC students interested in this program will be expected to have achieved at least a 3.0 grade point average (A = 4.0). Students entering the program from high schools or transferring from community colleges will also be expected to meet the minimum admission standards.

Degree Requirements

SCIENCE AND MATHEMATICS		UNITS
BISC 120Lx	General Biology: Organismal Biology and Evolution	4

*Prerequisite required.

Honors Program in Human Development and Aging

USC Davis offers an honors program to outstanding students already pursuing studies for the B.S. in Human Development and Aging degree. This program offers students an opportunity to participate in mentored undergraduate research, taking course work in research methods and statistics in aging, and experience in writing an honors thesis that summarizes the research project. Honors students are required to complete GERO 497abc for a total of 6–8 units, beginning in the fall or spring of the junior year. In the senior year, they must complete GERO 593 Research Methods with a minimum grade of B. GERO 593 is offered only in the fall semester. Completion of the program requires a minimum GPA of 3.5 in gerontology and 3.3 in other courses. The program leads to the designation on the transcript of Bachelor of Science in Human Development and Aging with Honors.

The student takes 2 units of GERO 497a in the fall or spring of the junior year as a mentored research course to begin the process of developing an honors thesis. This would be in lieu of elective units. In the fall of the junior or senior year the student would complete GERO 593 for 4 units and 2 units of GERO 497b, both in lieu of elective units. Also during the fall semester, the research design and methods for the honors thesis are finalized and the research project begun. In the spring, the student would register for 2–4 units of GERO 497c in lieu of elective units. The goal for that semester is to complete the research and write the honors thesis.

Bachelor of Science in Lifespan Health

The Bachelor of Science in Lifespan Health prepares students for admission to a graduate or professional school with an emphasis on the biomedical aspects of health including disease prevention, detection and treatment. This program is designed for students wishing to pursue graduate studies in a health field such as medicine, pharmacy, occupational/physical therapy, psychology and other related fields.

Admission to this program is granted through USC's admission process, described in the admission section of this catalogue. The same foreign language requirement for the B.S. in Human Development and Aging is required as well as the USC Core (see The USC Core and the General Education Program for more information). Students must enroll in the following courses:

GERONTOLOGY REQUIRED COURSES		UNITS
GERO 200	Gerontology: The Science of Adult Development	4
GERO 310*	Physiology of Aging	4
GERO 320	Psychology of Adult Development	4
GERO 416	Health Issues in Adulthood	4
GERO 483	Global Health and Aging	4
GERO 492	Senior Seminar	4

GERO 495	Practicum in Geriatric Care	4
----------	-----------------------------	---

Choose three from the following four courses:

GERO 414*	Neurobiology of Aging	4
GERO 437**	Social and Psychological Aspects of Death and Dying	4
GERO 475	Ethical Issues in Geriatric Care	4
GERO 481	Case Management for Older Adults	4
Electives		32
Gerontology electives		12

*Prerequisite required.

**GERO 437 must be taken for 4 units of credit

Bachelor of Arts in Health and Humanity

The USC Davis School of Gerontology offers undergraduate classes through the Health and Humanity major in the USC Dornsife College of Letters, Arts and Sciences (see the Health and Humanity page).

Progressive Degree in Gerontology/Master of Science in Gerontology

The progressive degree program allows high performing students to integrate their current undergraduate major with a Master of Science in Gerontology. Students with at least a 3.0 overall GPA may apply for admission to the degree program in their junior year.

Students will meet with the gerontology student adviser to develop a course plan that must be approved by the School of Gerontology and the student's home department. Students admitted into the progressive degree program begin taking master's level courses in their senior year and will complete the master's degree in year five. For more information on the admission process, see the gerontology student adviser. For further details on progressive degree programs, see the Requirements for Graduation page.

Minors in Gerontology

The undergraduate minor program gives students the option of combining their major with an emphasis in gerontology. The minors provide students with the opportunity to supplement their education with a life course perspective of aging processes.

The minor programs, which are multidisciplinary in nature, allow the student to survey the sociological, political, psychological and biological aspects of aging; to gain an understanding of the current services available to older persons; and to examine the contemporary policy issues facing the field.

Individuals, Societies and Aging

This minor is a fit for students in business, engineering, communication, cinematic arts, or arts and sciences interested in developing a broad knowledge of issues in aging. Based largely on disciplines in the behavioral and social sciences, students learn how aging will impact their lives, families and careers. Upon completion of 20 units and graduation, the minor is noted on the student's transcript.

REQUIRED COURSES		UNITS
GERO 320	Psychology of Adult Development	4
GERO 330	Society and Adult Development	4
GERO 340	Policy, Values, and Power in an Aging Society	4

Select two from the following:

GERO 380	Diversity in Aging	4
GERO 416	Health Issues in Adulthood	4
GERO 435	Women and Aging: Psychological, Social and Political Implications	4
GERO 437	Social and Psychological Aspects of Death and Dying	4
GERO 481	Case Management for Older Adults	4
GERO 491	Practicum	4
		20

Science, Health and Aging

The science, health and aging minor is appropriate for students working toward careers in medicine, dentistry, pharmacy, biological sciences, public health or other health related fields. Admission to the minor is only available to students who have completed 4 units of prerequisites (BISC 220L or BISC 221L) as part of their major requirements. Upon completion of 20 units and graduation, the minor is noted on the student's transcript.

REQUIRED COURSES		UNITS
GERO 310	Physiology of Aging	4
GERO 414	Neurobiology of Aging	4
GERO 416	Health Issues in Adulthood, or	
GERO 496	Introduction to Clinical Geriatrics	4
Select two from the following:		
GERO 415	Neuroaffective Disorders of Aging	4
GERO 421	Managed Care for an Aging Society	4
GERO 437	Social and Psychological Aspects of Death and Dying	4
GERO 475	Ethical Issues in Geriatric Health Care	4
GERO 495	Practicum in Geriatric Care	4
		20

Davis School of Gerontology

Graduate Degrees

Master's Degrees in Gerontology

Master of Science in Gerontology

The Master of Science in Gerontology prepares graduates to assume major leadership roles in the field of aging, primarily in the planning, administration and evaluation of programs in the private and public sectors, as well as executive positions in the delivery of direct services to older people and their families and in the instruction of older adults and service providers. The Master of Science in Gerontology requires 44 units of course work. This includes 32 units of required courses and 12 units of electives. As part of this curriculum, a field practicum assures that these skills can be applied in agencies and institutional settings.

All students take core courses in physiological, psychological, sociological, social policy and professional issues relating to aging, as well as research methods and the capstone course.

The course work includes instruction on the processes of aging and professional courses designed to develop the skills needed for practice. The field practicum includes one or two semesters of practical experience working in an organizational setting.

Continuous registration in the program is required. There is a five year completion time limit for the degree. Leaves of absence are available for limited times and are excluded from the total time limit. A maximum of two absences (one year each) is allowed. Most courses are offered on campus and online.

Prerequisites for Admission

Students applying for admission to the Master of Science in Gerontology program must have a bachelor's degree from an accredited college or university. In selecting applicants for admission, the School of Gerontology considers both academic potential (as reflected in undergraduate study or scores on the Graduate Record Examinations) and professional potential (as reflected in experience, references and career goals). The school requests information from applicants to supplement that supplied by the USC Application for Graduate Admission. Such supplemental information usually includes a resume, statement of interest in gerontology and letters of reference. Interviews may be required.

Probation and Disqualification

Probation and Warning: Any graduate student whose cumulative or semester grade point average in the university falls below B (3.0) will be placed on academic probation. A graduate student whose semester average falls below B (3.0) but whose cumulative grade point average in the university is 3.0 (A = 4.0) or higher will be placed on academic warning.

Disqualification: A graduate student on academic probation will be disqualified if his or her cumulative record accumulates more than 12 units of C work. A graduate student, whether on probation or not, will be subject to disqualification if the Student Affairs Committee of the USC Davis School at any time determines deficiency in academic achievement.

Common Requirements

All candidates for the Master of Science degree must complete the following common requirements:

REQUIRED COURSES		UNITS
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 589	Case Studies in Leadership and Change Management	4
GERO 591	Field Practicum	4
GERO 593	Research Methods	4
		28

Capstone Course

GERO 555	Integrating Gerontology: A Multidisciplinary Approach	4
----------	---	---

Suggested Electives (12 Units)

GERO 522	Counseling Older Adults and Their Families	4
GERO 543	Continuum of Care: A Systems Perspective	4
GERO 550	Administration and System Management in Programs for Older Adults	4
GERO 551	Applied Policy Skills in Aging	4
GERO 554	Evaluation: Incorporating Evidence-Based Practices	4
GERO 591	Field Practicum	4
		44

Common requirements for all programs include the 28 required units and GERO 555, totaling 32 units. In addition, each candidate must complete the 12 units of electives chosen from the complete list of electives approved by the student's adviser.

Field Practicum

The field practicum provides the opportunity for the student to gain valuable experience and develop needed skills by working in a community agency or institution. It involves a minimum of 240 hours of involvement. Students may elect to take an additional 4 units of GERO 591 Field Practicum as an elective.

Field placement assignments are made by the internship coordinator of the school in consultation with the student and in accordance with the resources available in the community. Every effort is made to secure placement which will reflect the student's capacity to assume the responsibilities of a professional in gerontology. Evaluations of the student's performance are sent to the school by the community agency; the student receives a grade of credit/no credit in GERO 591 Field Practicum.

Master of Science with Specialization in the Health Service Area and Ambulatory Care Certificate

In addition to the 32 units of common requirements for the M.S. in Gerontology, the following courses are required to earn the certificate.

CORE COURSES		UNITS
PPD 509	Problems and Issues in the Health Field	4
PPD 510a	Financial Management of Health Services, or	
PPD 516	Financial Accounting for Health Care Organizations	4
PPD 545	Human Behavior in Public Organizations, or	
PPD 557	Modeling and Operations Research	4
Elective		4
		16

ONE SPECIALIZED COURSE FROM THE FOLLOWING:

GERO 550	Administration and System Management in Programs for Older Adults	4
PPD 600	Management of Managed Care Organizations	4
PPD 601	Management of Long-Term Care Organizations	4

Advanced Placement Master of Science in Gerontology

The Advanced Placement M.S. program allows the outstanding student who has completed a Bachelor of Science in Gerontology to waive several courses in order to complete the master's degree in 36 units rather than the 44 units for the regular program.

REQUIRED COURSES		UNITS
GERO 510	Physiology of Development and Aging, or	
GERO 520	Life Span Developmental Psychology, or	
GERO 530	Life Span Developmental Sociology, or	
GERO 540	Social Policy and Aging	4
GERO 555	Integrating Gerontology: A Multidisciplinary Approach	4
GERO 591	Field Practicum	8
GERO 593	Research Methods	4
Gerontology skill requirements		12
Gerontology electives		4
		36

Program Adaptation

Three of the following courses, GERO 510, GERO 520, GERO 530 and GERO 540, will be waived for students in the advanced placement track. Advanced placement students admitted to dual degree programs must meet curriculum requirements for the respective programs.

Progressive Degree in Gerontology

A progressive degree program allows qualified undergraduate students the opportunity to complete an integrated program of study joining a bachelor's degree and a master's degree in the same or different departments.

The progressive degree program in gerontology allows students in their junior year to apply for the Master of Science in Gerontology program and complete both degrees in five years. Students must fulfill all the requirements for both the bachelor's degree and the master's degree. The total number of units for the master's degree, however, may be reduced by a maximum of one third. Students must obtain permission from both the bachelor's degree granting program and the USC Davis School of Gerontology. This program may be particularly attractive to students majoring in biology, psychology, policy and sociology. For more information on progressive degrees, see the entry under Undergraduate Programs or Graduate and Professional Education.

Master of Aging Services Management

The Master of Aging Services Management provides an opportunity for those seeking careers in the aging services industries to acquire skills and knowledge related to management of services, products and programs for older persons. The program requires a minimum of 12 units of core courses (three courses) and 20 units of electives (five courses). All graduate level courses are offered on campus and via the Internet. Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time.

In order to participate in online courses, students will be required to have access to a computer with multimedia capability including a modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. Specific details regarding the computer requirements will be provided by the department. This program is available as a progressive degree (see Progressive Degree in Gerontology).

Students applying to the Master of Aging Services Management must have a bachelor's degree from an accredited college or university with a GPA of 3.0. If the applicant's GPA falls below 3.0 the GRE will be required.

Students must choose a minimum of 12 units of core courses from the following:

CORE COURSES (MINIMUM OF 12 UNITS)		UNITS
GERO 500	Perspectives on a Changing Society: An Introduction to Aging	4
GERO 501	Applied Legal and Regulatory Issues in Aging	4
GERO 502	Marketing and Shifts in Consumer Decision Making	4
GERO 504	Current Issues in Aging Services Management	4
GERO 589	Case Studies in Leadership and Change Management	4
		12

Students must select up to five courses (for a total of 20 units) from the following courses or any other adviser-approved elective:

SUGGESTED ELECTIVE COURSES (20 UNITS)		UNITS
GERO 505	Behavioral and Social Consequences of Design and Environment	4
GERO 506	Technological Innovations in Aging (Gerontechnology)	4
GERO 507	End of Life Care	4
GERO 508	The Mind and Body Connection through the Lifespan	4
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology	4
GERO 522	Counseling Older Adults and Their Families	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 541	Health Care Delivery Models: Comparative Approaches	4

GERO 543	Continuum of Care: Systems Perspective	4
GERO 550	Administration and Systems Management in Programs for Older Adults	4
GERO 551	Applied Policy Skills in Aging	4
GERO 554	Evaluation: Incorporating Evidence-Based Practices	4
GERO 560	Micronutrients, Health, and Longevity	3
GERO 585	The Aging Family	4
GERO 593	Research Methods	4
Total:		32

Master of Arts in Gerontology

The M.A. in Gerontology provides an opportunity to acquire skills and formal training in gerontology. The online program requires 28 units of course work. Most courses are offered online and on campus.

Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time limit.

In order to participate in the online courses, students will be required to have access to a multimedia computer with modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. Specific details regarding the computer requirements will be provided by the department.

Admission standards and prerequisites are the same as listed for the Master of Science in Gerontology with the exception that students in the online M.A. program are expected to have a significant amount of experience working in human services, health care, business or similar settings. Students are not required to have taken an approved additional course.

REQUIRED COURSES (20 UNITS)		UNITS
GERO 500	Perspectives on a Changing Society: An Introduction to Aging	4
GERO 508	The Mind and Body Connection through the Lifespan	4
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
		20

Students must select two courses (for a total of 8 units) from the following courses:

ELECTIVE COURSES (8 UNITS)		UNITS
GERO 522	Counseling Older Adults and Their Families	4
GERO 550	Administration and System Management in Programs for Older Adults	4
GERO 560	Micronutrients, Health, and Longevity	3
GERO 585	The Aging Family	4
GERO 589	Case Studies in Leadership and Change Management	4
Total:		28

Graduate Level Certificate in Gerontology

The residential graduate certificate in gerontology program provides an opportunity for those who have completed a bachelor's degree in another profession or discipline and are employed in the field of aging to acquire a greater understanding of gerontology theory and research. The program consists of 16 units of gerontology content designed to familiarize the student with several areas of the field which relate to professional practice.

In addition to three of the four required core course areas for the certificate program (GERO 510, GERO 520 or

GERO 522, GERO 530 or GERO 585, GERO 540), each student will have the option to choose one elective course which meets his or her particular area of interest.

Certificate students do not take a field practicum. Students admitted to the non-degree certificate program are expected to enroll each semester until the program is completed.

Online Graduate Level Certificate in Gerontology

The online graduate certificate in gerontology program provides an opportunity for those with a bachelor's degree in another profession or discipline who are employed in the field of aging to acquire a greater understanding of gerontology theory and research. The program consists of 16 units of gerontology courses designed to familiarize the student with several areas of the field which relate to professional practice.

Students complete the introductory course, GERO 500, two of the four required core course areas (GERO 508 or GERO 510 or, GERO 520 or GERO 522, GERO 530 or GERO 585, and GERO 540), and one elective course in a particular area of interest.

The required courses are delivered via the Internet. The courses are offered in sequential order and are restricted by availability. Continuous registration in the non-degree program is required. Leaves of absence are available for limited times and are excluded from the total time limit. Entering students are encouraged to begin their course of study by taking GERO 500.

In order to participate in the online courses, students will be required to have access to a multimedia computer with modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. The department will provide specific details regarding the computer requirements.

Master of Long Term Care Administration

The Master of Long Term Care Administration provides an opportunity for professionals who are currently working in a long term care profession to acquire skills and formal training in long term care administration. The online program requires 28 units of course work.

The required courses are in sequential order and are restricted by availability. Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time limit.

In order to participate in the online courses, students will be required to have access to a multimedia computer with modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. Specific details regarding the computer requirements will be provided by the department.

Admission standards are the same as for the Master of Science in Gerontology.

Transfer Credits

An admission credit evaluation is prepared for graduate students with previous graduate level course work. This review indicates which courses the university will approve but it is the relevant school (Gerontology, Business, or Public Policy) that determines if any of these courses are appropriate for this degree. A maximum of 4 units may be used toward the master's degree.

Graduate transfer credit will not be granted for life experience, credit by examination, non-credit extension courses, correspondence courses or thesis supervision. Graduate transfer credit will not be granted for any course work taken elsewhere after the student has been admitted and enrolled at USC unless the student receives prior written approval from the department.

REQUIRED COURSES (24 UNITS)		UNITS
ACCT 509	Concepts of Financial and Management Accounting	4
FBE 587	Legal and Regulatory Environment of Long Term Care	4
GERO 500	Perspectives on a Changing Society: An Introduction to Aging	4
GERO 508	The Mind and Body Connection through the Lifespan, or	
GERO 522	Counseling Older Adults and Their Families	4

PPD 601	Management of Long-Term Care Organizations	4
PPD 649	Concepts and Practices in Public Personnel Administration	4

Students must select one course (for a total of 28 units) from the following courses.

ELECTIVE COURSE (4 UNITS)		UNITS
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 589	Case Studies in Leadership and Change Management	4

Pharm.D./Graduate Certificate in Gerontology

This integrated program in pharmacy and gerontology prepares students with an interest in geriatric pharmacy to assume leadership roles at academic, administrative or policy levels within the profession.

The program involves the completion of 16 units of core courses in physiology, psychology, sociology and social policy aspects of aging offered by the School of Gerontology. In addition, students are required to complete 8 units of approved elective courses in gerontology or geriatric pharmacy to be credited toward the requirements for the Pharm.D. and the Graduate Certificate in Gerontology.

REQUIRED COURSES IN GERONTOLOGY		UNITS
GERO 508	The Mind and Body Connection through the Lifespan, or	
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology, or	
GERO 522	Counseling Older Adults and Their Families	4
GERO 530	Life Span Developmental Sociology, or	
GERO 585	The Aging Family	4
GERO 540	Social Policy and Aging	4
		16

ELECTIVES IN GERONTOLOGY AND GERIATRIC PHARMACY (8 UNITS)		UNITS
GERO 554	Evaluation: Incorporating Evidence-Based Practices	4
GERO 555	Integrating Gerontology: A Multidisciplinary Approach	4
PHRD 655	Geriatric Pharmacy I	3
PHRD 656	Geriatric Pharmacy II	3
PHRD 703	Long Term Care Clerkship	6
PHRD 706	Geriatrics Clerkship	6
PHRD 730	Acute Care Geriatrics Clerkship	6
PHRD 731	Advanced Geriatrics APPE	6

It is expected that the program can be successfully completed by candidates taking electives in geriatric pharmacy or gerontology during the regular semester and completing one core course in gerontology during each summer in the four year Pharm.D. program.

Admission Requirements

Students who have a baccalaureate degree from an accredited college or university must submit separate applications to the USC School of Pharmacy and the USC Davis School of Gerontology. All requirements for admission to the regular Pharm.D. program must be fulfilled by the candidate. GRE scores are not required for admission to the certificate program.

Master of Science in Nutrition, Healthspan and Longevity

The Master of Science in Nutrition, Healthspan and Longevity, a Coordinated Program (CP) in Nutrition and Dietetics, prepares graduates for roles in the field of nutrition and dietetics promoting personalized nutrition through work in hospitals and health care facilities, long-term care or school food service programs, business, teaching, research or private practice. The program has been granted candidacy for accreditation by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) and integrates academic study with professional practice experience. Fifteen students are admitted each year in the fall. Students can complete the full-time degree program in two years, on-campus or online (for those living more than 100 miles from USC). Online students will be required to find and utilize facilities in their community to complete the required course laboratory activities and supervised practice (verification of facilities will be required after acceptance, and before enrollment, for first-year rotations). Successful completion of 46 units of course work is required for graduation and includes 28 units of required courses, 12 units of supervised practice and 6 units of research. The program summative experience will be an electronic portfolio, including research completed throughout the program. Students will be required to present their work at a local, state or national dietetics conference as a requirement of graduation.

Continuous registration in the program is required. Leaves of absence are available for limited times and may require the student to wait until the next year to re-enroll as some courses are offered annually, and must be taken sequentially. A maximum of two leaves of absence is allowed. Upon completion of the Master of Science degree, students are eligible to write for the Credentialing Examination for Registered Dietitian Nutritionists.

In order to participate online, students will be required to have access to a computer with multimedia capability including high-speed Internet access, audio and a digital video camera. Specific details regarding computer requirements will be provided by the program.

Field Practicum

The field practicum provides the opportunity for students to gain valuable experience and develop needed skills by working in an institutional or community environment where nutrition services are provided by registered dietitians or food services professionals. Field placement assignments begin in the second semester of the program and continue every semester until graduation. Students attending the program on campus are placed by the program coordinator in consultation with the student as resources are available in the community. Evaluations of students are sent to the school by the community agency; the student receives a grade of credit/no credit in GERO 591 Field Practicum.

Prerequisites for Admission

Students applying for admission to the Master of Science in Nutrition, Healthspan and Longevity program must have a bachelor's degree from an accredited college or university. In addition, the following prerequisites must be complete before starting the program: cellular biology with lab, microbiology with lab, general chemistry with lab, organic chemistry with lab, biochemistry with lab, human physiology with lab, general psychology or sociology, algebra or pre-calculus or calculus or statistics, speech or communications, introductory food science and human nutrition. All prerequisite courses cannot be more than 10 years old at the time of application. The exceptions are the general psychology course and the math course; there is no time limit on these two courses.

In selecting applicants for admission, the Davis School of Gerontology considers both academic potential (as reflected in undergraduate study with a GPA greater than 3.0) and professional potential (as reflected in experience, references and career goals). The school requests information from applicants to supplement that supplied by the USC Application for Graduate Admission. Supplemental information includes a résumé, statement of interest in nutrition and longevity and two letters of reference. Applicants are required to document at least 40 hours of paid or volunteer work experience with a registered dietitian. Interviews may be required for highest ranking applicants.

Probation and Disqualification

Probation and Warning: Any graduate student with a cumulative or semester grade point average in the university falling below B (3.0) will be placed on academic probation. A graduate student whose semester average falls below B (3.0) but whose cumulative grade point average in the university is 3.0 (A = 4.0) or higher will be placed on academic warning. Students will not be allowed to begin supervised field practice in the second semester if any first semester grades fall below a B (3.0).

Disqualification: A graduate student on academic probation will be disqualified if his or her cumulative record accumulates more than 12 units of C work. A graduate student, whether on probation or not, will be subject to disqualification if the Student Affairs Committee of the USC Davis School at any time determines deficiency in academic achievement.

Course Requirements

All candidates for the Master of Science in Nutrition, Healthspan and Longevity degree must complete the following required courses.

REQUIRED COURSES		UNITS
GERO 498	Nutrition, Genes, Longevity and Diseases	4
GERO 511	Fundamentals of Clinical Nutrition Screening and Assessment	4
GERO 512	Communicating Nutrition and Health	2
GERO 513	Fundamentals of Nutrition: Macronutrients	3
GERO 515L	Food Production and Food Service Management	4
GERO 517L	Advanced Therapeutic Nutrition	4
GERO 518	Current Topics in Clinical Nutrition	4
GERO 560	Micronutrients, Health and Longevity	3
GERO 590	Directed Research	2
GERO 591	Field Practicum	12
GERO 593	Research Methods	4

Davis School of Gerontology

Graduate Degrees

Dual Degree Programs

The USC Davis School of Gerontology cooperates with six other professional schools at USC in offering programs in which the student receives two master's degrees. These degrees provide the student with the knowledge and skills of gerontology as well as those of the other professional field. The dual degrees require more course work than the M.S. alone, but offer the graduate greater breadth of education and employment options.

Dual degrees currently available are the Master of Science in Gerontology and the Master of Business Administration (M.S./MBA) with the Marshall School of Business; the Master of Science in Gerontology and the Juris Doctor (M.S./J.D.) with the Gould School of Law; the Master of Science in Gerontology and the Master of Public Administration (M.S./MPA), the Master of Science in Gerontology and the Master of Health Administration (M.S./MHA), and the Master of Science in Gerontology and the Master of Planning (M.S./MPI) with the Price School of Public Policy; the Master of Science in Gerontology and the Master of Social Work (M.S./MSW) with the School of Social Work; and the Master of Science in Gerontology and the Doctor of Pharmacy (M.S./Pharm.D.) with the School of Pharmacy. Students must apply to both schools simultaneously and, if accepted to both, participate in specially designed programs combining the courses of each school.

Admission to Dual Degree Programs

Applicants to any of the dual degree programs must submit two application forms to the Office of Admissions; one indicating gerontology as the major and one indicating the other degree as the major. Each of the schools must accept the student for admission. Acceptance into one school's degree program does not imply acceptance into the dual degree program.

Gerontology and Business Administration

The M.S./MBA dual degree combines knowledge of the older population with the skills of business management. The program prepares graduates for a number of roles in both public and private sector organizations including the marketing of products or services to seniors, human resource development with older workers and retirement benefits.

Gerontology Requirements

The Master of Science in Gerontology requires 30 units of course and fieldwork which covers the core content of the M.S. program.

REQUIRED COURSES		UNITS
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 555	Integrating Gerontology: A Multidisciplinary Approach	4
GERO 591	Field Practicum	4
Gerontology electives		6
		30

Business Administration Requirements

The Master of Business Administration will require 48 units of credit. Required courses include: all required courses in an MBA program; MOR 548 Competitive Advantage Through People (3); one marketing elective chosen from among MKT 512 Marketing and Consumer Research, MKT 525 Consumer Behavior and MKT 560 Marketing Strategy and Policy (3); and additional graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students may not count courses taken outside the School of Business toward the 48 units.

Program Adaptation

The USC Davis School of Gerontology will waive 18 units of electives, plus GERO 593 Research Methods (4 units) and GERO 589 Case Studies in Leadership and Change Management (4 units), which are required in the regular M.S. program. Students will be exposed to research and professional issues in business administration course work.

Gerontology and Pharmacy

The emerging impact of the elderly on the health care system has created a need for health care providers who understand the unique needs of the elderly. As drug therapy remains the primary therapeutic option for chronic disease, the demand for prescription drugs will continue to rise. There is a demand for pharmacists who are equipped to meet the pharmaceutical care needs of this population. Geriatric pharmacy is recognized as a specialty, with board certification through the Commission for Certification in Geriatric Pharmacy. The Pharm.D./M.S., Gerontology program will provide extensive education and training in the unique health care needs of older adults. It will allow student pharmacists with a career interest in geriatrics or gerontology to work with health care planning or delivery organizations to develop and implement progressive pharmaceutical care programs for the elderly.

Application and Admissions Requirements

Students who intend to pursue the dual Pharm.D./MSG degree must be accepted by both programs. This includes having completed a baccalaureate degree from an accredited college or university with a minimum G.P.A. of 3.0 and a minimum equivalent GRE score of 1000. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual Pharm.D./M.S. degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both programs. Students, who elect this approach, must identify themselves on both applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the Pharm.D. and will be offered admission to the dual degree program. Second, students can apply to the dual degree by submitting an application to the M.S. in Gerontology program

during their first year of enrollment in the Pharm.D. prior to the M.S., Gerontology published application deadline. Students, who elect this approach, must apply through the School of Pharmacy. Students admitted to the M.S. program using this approach will be offered admission to the dual degree contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 G.P.A. Students accepted to the dual degree program must maintain a minimum 3.0 G.P.A. in their gerontology and Pharm.D. courses.

Graduation Requirements

Students must complete all requirements for the Pharm.D. and M.S. degrees as listed in the catalogue with a minimum cumulative 3.0 G.P.A. Students must complete 32 Gerontology units as indicated. The Pharm.D. degree course requirements are listed in the School of Pharmacy section.

GERONTOLOGY REQUIREMENTS		UNITS
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 555	Integrating Gerontology: A Multidisciplinary Approach	4
Gerontology electives*		16
		32

**Choose four of the following (16 units): GERO 475, GERO 496, GERO 508, GERO 519, GERO 522, GERO 543, GERO 550, GERO 554 or GERO 591.*

Gerontology and Public Administration

The M.S./MPA dual degree offers the student interested in management of agencies and institutions the opportunity to gain in-depth knowledge of the administrative and organizational processes and management skills necessary for the effective delivery of services to older persons. See the Price School of Public Policy, for course requirements.

Gerontology and Health Administration

Students can specialize in health care administration (profit and non-profit) through the dual degree with the Price School of Public Policy's Health Administration Program. See the Price School of Public Policy, for course requirements.

Gerontology and Planning

The M.S./MPI dual degree is one of few in the nation which combines the knowledge of the older population with the skills needed to plan services for older people. The MPI prepares the graduate for the responsibilities involved in development of public and private institutions and programs. The M.S. indicates a special focus on the older person and the skills to analyze and design programs for this growing population. See the Price School of Public Policy for course requirement.

Gerontology and Law

The M.S./J.D. dual degree combines the knowledge of the older population with understanding of the legal system. The program prepares graduates for a number of roles in both public and private sector organizations. Students are required to complete 110 units of course work, 74 from the Gould School of Law and 36 from the Davis School of Gerontology. The first year is devoted to required law courses, and the second, third and fourth years combine gerontology and law courses. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to the rule for students enrolled in the law school honors program. See the Gould School of Law for course requirements.

Gerontology and Social Work

The M.S./MSW dual degree offers the student interested in direct service or community organization the credentials most valued in clinical and therapeutic practice. Taken in connection with the social work degree, the

M.S. focuses course and fieldwork on the older person and prepares the student for social work with older persons and their families.

In the M.S./MSW dual degree program, the student enrolls primarily in the first year program of the USC School of Social Work. During the summer session, courses are taken in the USC Davis School of Gerontology. Second year courses are taken in both schools and fieldwork during the second year is taken in the School of Gerontology. The research course is taken through the School of Social Work in the student's concentration area. The School of Gerontology will waive GERO 589 Case Studies in Leadership and Change Management (4 units) and GERO 555 Integrating Gerontology: A Multidisciplinary Approach (4 units) because students enrolled in this program have a primary professional focus on social work.

GERONTOLOGY REQUIREMENTS		UNITS
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 591	Field Practicum	8
Gerontology electives		8
		32

SOCIAL WORK REQUIREMENTS		UNITS
SOWK 503	Human Behavior and the Social Environment I	3
SOWK 505	Human Behavior and the Social Environment II	3
SOWK 534	Policy and Practice in Social Service Organizations	3
SOWK 543	Social Work Practice with Individuals	4
SOWK 545	Social Work Practice with Families, Groups and Complex Cases	2
SOWK 562	Social Work Research	3
SOWK 586ab	Field Practicum	3-3
SOWK 587ab	Integrative Learning for Social Work Practice	2-2
SOWK 611	Leadership in the Social Work Profession and Organizations: Theory and Practice	3
		31

In the second half of the social work program, students may enroll in one of four concentrations: Health; World of Work; Mental Health; or Community Organization, Planning and Administration (COPA). All students are required to take SOWK 611 Leadership in the Social Work Profession and Organizations: Theory and Practice. Required courses are selected based on the chosen concentration as follows:

HEALTH		UNITS
SOWK 631	Advanced Theories and Clinical Interventions in Health Care	3
SOWK 632	Program Planning and Evaluation in Health Care	3
SOWK 636	Policy in the Health Care Sector	3

WORLD OF WORK		UNITS
SOWK 671	Micro Practice and Evaluation in Work-Related Environments	3
SOWK 672	Context and Policies of Social Work Practice in Work Environments	3
SOWK 673	Macro Practice and Evaluation in Work-Related Environments	3

MENTAL HEALTH		UNITS
----------------------	--	--------------

SOWK 605	Human Development and Mental Health	3
SOWK 625	Evaluation of Research: Mental Health	3
SOWK 645	Clinical Practice in Mental Health Settings	3

COMMUNITY ORGANIZATION, PLANNING, AND ADMINISTRATION (COPA)		UNITS
SOWK 629	Evaluation of Research: Community Organization, Planning and Administration	3
SOWK 639	Social Policy for Managers, Planners, and Community Organizers	3
SOWK 648	Management for Community and Social Services	3

Course selection is done only with an academic adviser's approval.

Program Adaptations

The School of Gerontology waives 12 units. The research course is taken through the School of Social Work in the student's concentration area, and GERO 593, the research course, and GERO 555 are waived as well as one elective. The School of Social Work waives 12 units.

Davis School of Gerontology

Graduate Degrees

Doctor of Philosophy in Gerontology

The purpose of the Ph.D. in Gerontology is to provide research training in the multidisciplinary field of aging. The program is designed to enhance the potential of able students to make scholarly and professional contributions to the field of gerontology through research and teaching. To obtain this goal, the Ph.D. in Gerontology provides (1) high level rigorous research training, (2) the acquisition and application of scientific knowledge in the field of aging and (3) the development of leadership skills.

Admission Requirements

Applicants for admission to the doctoral program must meet the following requirements:

- (1) Recipient of a bachelor's degree from an accredited college or university by anticipated enrollment date.
- (2) Academic promise, as evidenced by above average achievement in previous undergraduate and graduate education. A minimum GPA of 3.5 on all prior graduate work is required. In addition, a 3.25 GPA in an appropriate undergraduate major and a baccalaureate degree are required.
- (3) Personal qualities compatible with high level performance in gerontology and indicating a potential for leadership in the field. This includes a strong commitment to developing a scientific research program. Applicants to the Ph.D. program must submit a resume of professional and academic experience, three letters of reference (academic and professional), a statement of objectives and examples of written work.
- (4) Satisfactory performance on the Graduate Record Examinations — existing test scores may be submitted if the GRE has been completed no more than five years prior to the date of application. A satisfactory score on the Verbal and Quantitative GRE is required. Students should also provide scores from the Analytic exam.
- (5) Submission of application materials as required. Instructions for application to the Doctor of Philosophy in Gerontology may be obtained by contacting the Davis School of Gerontology.

Degree Requirements

Course Requirements

Students must complete a minimum of 60 units of course work (with at least 24 of these units being completed in

residency at USC), as well as additional dissertation units (at least 4 units) as required. All students will take courses in three areas: a set of required core courses, research courses and elective courses.

There are two tracks in the gerontology Ph.D. program: the social, behavioral, and policy track and the biology of aging track.

Students will be advised about course selection during the first year by the Ph.D. committee. As soon as a student has selected a specialization (e.g., biology, psychology, sociology/demography, policy), an advisory committee of appropriate faculty will be appointed. The purpose of the advisory committee is to help the student in the selection of courses and a research agenda; to monitor the student's progress; and to insure preparation for the qualifying examination.

Basic Scientific Core

Each track has a basic scientific core. The core for the social, behavioral and policy track stresses the physiological, psychological, sociological and policy dimensions of individual and population aging. The scientific core for the biology of aging track emphasizes the understanding in the molecular, cellular and physiological mechanisms of aging and age-related disease. Special emphases include mechanisms associated with chronic disease such as cancer, heart disease, Alzheimer's and Parkinson's disease, and the interplay between genetic and environmental influences.

SOCIAL, BEHAVIORAL AND POLICY TRACK REQUIRED CORE COURSES		UNITS
GERO 610	The Aging Society	4
GERO 613	Health and Aging	4
GERO 620	Psychology and Aging	4
GERO 645	Politics and Policy in an Aging Society	4

BIOLOGY OF AGING TRACK REQUIRED CORE COURSES		UNITS
BISC 502ab	Molecular Genetics and Biochemistry, or	8
BISC 502ab	Molecular Genetics and Biochemistry, and	8
BISC 505	Genomics and Molecular Genetics, or	4
NEUR 524	Advanced Overview of Neurosciences, and	4
NEUR 531	Molecular and Cellular Neurobiology, and	4
NEUR 532	Systems and Behavioral Neurobiology	3

Research Core

A second core area focuses on development of research skills. For social scientists this includes research design, methods and statistics. Biologists will learn methods appropriate to biological sciences as well as research design and statistics. Students in the social, behavioral and policy track are required to take GERO 593 and GERO 640 and at least one additional statistics course — generally from another department — on the student's research focus. Students in the biology of aging track are required to take GERO 593 and GERO 590 (2 semesters of 4 units).

Students in both tracks are also required to take two semesters of GERO 592, a research seminar in which participants will develop and carry out their own research. This course is generally taken after the first year.

Elective Core

A third core involves electives that allow students to create a concentration in a particular area of focus or analytic field of inquiry. Students should select courses in consultation with their adviser. Courses should be selected to provide in depth knowledge in the specialized area or general knowledge in the field of gerontology. A number of gerontology courses can be taken as electives.

Students should note that Gerontology courses at the 600 level are usually offered only every second year. Students are encouraged to review the course schedule to determine how to best complete these courses in a

timely manner. Successful completion of the required course work does not complete the educational experience of the student. Students are expected to enhance their exposure to research by attending the colloquium lecture series, working on research with a faculty member and presenting original research at the annual meeting of the Gerontological Society of America and other professional meetings.

Foreign Language Requirements

There are no foreign language requirements for the Ph.D. program.

Transfer Credits

Students with master's degrees or prior graduate course work in gerontology can petition to apply the credit toward required courses. Petition for credit will be based on the Graduate School's policies and requirements for "transfer of credit" and on approval by the doctoral advisory committee. Transfer credits toward the Ph.D. requirements will be limited to 20 units and must be credits taken within 10 years of entering the program.

Time Limit

The normal time for completing the Ph.D. is four to five years (without a prior master's degree). The first two years will consist of required and elective courses. The third year will consist of electives, the Ph.D. qualifying exams and completion of the dissertation proposal. The final year(s) will involve the completion of the dissertation. The maximum time to complete all requirements for the Ph.D. degree is eight years from the first course at USC applied toward the degree.

Students who have completed an applicable master's degree at USC or elsewhere within five years of the proposed enrollment in the Ph.D. program must complete the Ph.D. in six years.

Screening Procedures

When students have completed a minimum of 16 but not more than 24 units of doctoral course work, the doctoral advisory committee assesses their performance through a screening process and makes a decision regarding their ability to continue in the program. If the student is granted permission to continue, a guidance committee is established.

Qualifying Exam Committee

The qualifying exam committee is composed of five faculty members, at least three from the School of Gerontology. The function of the qualifying exam committee is to oversee the development of the student's academic progress through the qualifying examination, including the preliminary dissertation proposal.

Qualifying Examination

As a prerequisite for candidacy for the Ph.D., students must pass a qualifying examination, which is multidisciplinary and comprehensive in nature and that necessitates independent study beyond course requirements. Students must have completed at least 28 units of course work in the doctoral program with a GPA of at least 3.25 before attempting the qualifying exam. The exam is designed to test mastery of knowledge and scholarly skills and to test readiness to undertake independent research. If the student fails this exam, it may be repeated one time. When the exam is successfully completed, the student then must develop and have a dissertation proposal approved before the student is officially admitted to candidacy for the Ph.D. degree.

Doctoral Dissertation

Upon admission to candidacy, a dissertation committee is established which consists of three members of the faculty, some of whom may be from the qualifying committee.

The dissertation committee has responsibility for providing guidance and consultation during the research process, approving the dissertation, conducting the final oral examination, and recommending the candidate for the Ph.D. degree. The doctoral dissertation should make an original contribution to the development of knowledge and theory in gerontology.

Final Oral Examination

Upon approval of the final draft of the dissertation by all members of the dissertation committee, the candidate must pass a final oral examination. Upon successful completion of this final examination, the committee recommends the candidate to the Graduate School for award of the Ph.D. degree.

Doctor of Philosophy Biology of Aging

Application deadline: December 1

The purpose of the Ph.D. in the Biology of Aging is to provide interdisciplinary research training in an age-centric environment. Students will focus on basic mechanisms of aging as well as translational research related to medical applications. Students will approach aging as a major risk factor for disease.

Admissions Requirements

Applicants must have a bachelor's degree from an accredited four-year college or university preferably in one of the biological sciences. Applicants are evaluated by their transcripts and GPA; scores on the GRE General Test, three letters of recommendation and a statement of interest.

Degree Requirements

Course Requirements

The Ph.D. in the Biology of Aging will provide each student with detailed knowledge and expertise in the biology of aging. The Ph.D. in the Biology of Aging requires the following courses (GERO 600, GERO 601, GERO 602ab, GERO 603, plus 8-10 units from the list of suggested electives or other department approved courses). A minimum of 60 units is required, consisting of formal courses, seminars and research credit. At least 24 of the minimum 60 total units required are to be formal graduate course work (lecture or seminar courses).

Screening Examination

After completion of the core Biology of Aging course work (GERO 600, GERO 601, GERO 602ab and GERO 603) during the first year, the student's degree progress is discussed and evaluated by a screening committee composed of members of the gerontology faculty and the Buck Institute as well as the student's faculty adviser. The purpose of this written and oral evaluation is to determine competence to continue graduate study and identify areas to be strengthened prior to the qualifying examination.

Qualifying Examination

By the end of the third semester, students should choose a guidance committee consistent with the requirements of the graduate school composed of gerontology faculty, Buck Institute faculty and one outside member. This committee will conduct the qualifying exam and provide guidance during dissertation research. The chair of the committee will serve as the principal adviser. Students should consult extensively with each committee member regarding subjects to be covered in the exam.

The qualifying exam consists of written and oral parts. Both parts must be finished before the end of the fifth semester. For the written exam, the adviser will consult with each of the members of the qualifying exam committee. The written part will incorporate evaluation and synthesis of existing knowledge related to the topic areas, creation of a set of experiments to test a relevant hypothesis, and interpretation of anticipated results. The oral exam consists of an oral defense of the written part and will be conducted with a month of the written part of the qualifying exam.

Doctoral Dissertation

The dissertation is based on original, publishable and significant research conducted independently by the student under the guidance of the dissertation committee. Upon admission to candidacy, a dissertation committee is established which consists of three members of the faculty, some of whom may be from the guidance committee, one of whom must hold his or her primary appointment outside of the Davis School of Gerontology.

The dissertation committee is responsible for providing guidance and consultation during the research process, approving the dissertation, conducting the final oral examination, and recommending the candidate for the Ph.D.

degree.

Foreign Language Requirements

There are no foreign language requirements for the Ph.D. in the Biology of Aging program.

Transfer Credits

Students with a master's degree of prior graduate course work in biology can petition to apply the credit toward required courses. Petition for credit will be based on the Graduate School's policies and requirements for transfer of credit and on approval by the doctoral advisory committee. Transfer credits toward the Ph.D. requirements will be limited to 20 units and must be taken within 10 years of entering the program.

Davis School of Gerontology

Courses of Instruction

GERONTOLOGY (GERO)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

GERO 200 Gerontology: The Science of Adult Development (4, FaSp) Introduction to adult development through the lifespan; biological, psychological, and social processes; gerontology as a career for the future.

GERO 310 Physiology of Aging (4, Fa) Effects of normative aging processes on homeostatic mechanisms and how these changes relate to development of disorder and disease in later life. Lecture and discussion.
Prerequisite: BISC 220L or BISC 221L.

GERO 320g Psychology of Adult Development (4, FaSp) How psychologists study thinking, memory, emotions, personality, and behavior, and how people change in these throughout adulthood to old age.
Recommended preparation: PSYC 100.

GERO 330 Society and Adult Development (4, FaSp) How social relationships affect adults of different ages; the changing contract across generations; interaction of culture, race, family and social values with adult development.

GERO 340 Policy, Values, and Power in an Aging Society (4, FaSp) How Americans' political values affect public policy. Studies of landmark legislation to explore the social contract between generations and role of governments in social welfare.

GERO 350 Administrative Problems in Aging (2 or 4, Fa) Analysis of the skills, approaches and issues involved in the planning, development, and implementation of programs directed at meeting the needs of older persons.

GERO 380m Diversity in Aging (4) Exploring diversity in the older population and variability in the human aging process.

GERO 385 Transitions in Adulthood (2 or 4) An exploration of the critical issues and transitions in the adult years, including careers, relationships, parenthood, and major turning points for personal development.

GERO 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

GERO 402 Housing for the Elderly: Policy, Programs, and Design (2) An overview of housing policies, programs and design for the elderly, including analysis and evaluation of past, current and proposed government

programs.

GERO 411L Physiology, Nutrition, and Aging (2 or 4) Explores nutritional needs and the physiological, psychological, and sociological relationships to nutrition. Laboratory experiments in assessment and evaluation.

GERO 412L Exercise and Aging: Principles and Programs (2 or 4) Physiological, psychological, and sociological aspects of exercise. Laboratory involvement in assessment and evaluation of fitness.

GERO 414 Neurobiology of Aging (4, Fa) Age-related changes in nervous system structure and function; relationship of brain changes to changes in cognitive function and perception; Alzheimer's and Parkinson's diseases. Lecture and discussion. *Prerequisite:* BISC 220L or BISC 221L.

GERO 415 Neuroaffective Disorders of Aging (4, Sp) Methods of studying, evaluating, and treating cognitive, psychiatric, and behavioral problems associated with medical conditions of old age.

GERO 416 Health Issues in Adulthood (4, Sp) Physiological, psychological, and social health problems of adults as they are impacted by health choices throughout life.

GERO 421 Managed Care for an Aging Society (4, FaSp) Examines key legislation, policies, practice, and outcomes of managed care and how population aging affects health care delivery.

GERO 423 Psychological Development through Autobiography (4) Introduction to autobiography as a source of individual psychological development, with emphasis on integration of cognitive, emotional, and decision processes.

GERO 435m Women and Aging: Psychological, Social and Political Implications (4, FaSpSm) Problems and resources of the middle-aged and older woman in a changing society; including discrimination, stereotypes, employment, social interaction, etc.

GERO 437 Social and Psychological Aspects of Death and Dying (2 or 4, FaSp) Introduction and critical survey of the current issues, concepts, and research of the social and psychological aspects of death and dying.

GERO 440 Biodemography of Aging (4) Consideration of the biological and social-cultural factors that govern the evolution of life spans and the life of humans and selected animal models. *Prerequisite:* BISC 112 or BISC 113 or BISC 120 or BISC 121; *recommended preparation:* statistics.

GERO 451 Policy and Program Development in Aging (4) Policy trends and changing roles of local, state, and federal agencies in planning, managing, and evaluating programs in comprehensive, coordinated systems of service for older persons.

GERO 452 Economic Issues and the Aged (2 or 4) Analysis of economic factors associated with the aged; implications for individuals, society, and the economy; lifecycle economics, retirement, income maintenance, and social security.

GERO 461 Seminar in Molecular and Computational Biology (2, FaSpSm) (Enroll in BISC 461)

GERO 470 Aging and Business (4, Fa) An introduction to the dynamic roles of business in an aging society focusing on workplace issues, marketing to mature consumers, and careers for business gerontologists.

GERO 475 Ethical Issues in Geriatric Health Care (4) Biomedical ethical issues that are encountered in working with geriatric patients. Examination of ethical theory and the application of theory to clinical settings.

GERO 481 Case Management for Older Adults (4, Fa) Overview of the concepts, characteristics, skills, and clinical issues of case management in a variety of settings serving older persons.

GERO 483 Global Health and Aging (4, Fa) Overview of the impact aging populations will have on global institutions from a variety of perspectives. Examination of public health policy issues.

GERO 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

GERO 491 Practicum (2-8, max 8, FaSpSm) Supervised experience in one or more community agencies. Graded CR/NC.

GERO 492 Senior Seminar (4, Sp) An in-depth integration of major research and professional themes in the study of human development and aging.

GERO 493p Longevity and Death among Ancient and Modern European Populations (Italy) (2, SpSm) The discoveries of ancient humans and bodies that have been preserved illuminate the connection between diet, health, and disease.

GERO 495 Practicum in Geriatric Care (4, FaSpSm) Supervised experience in a geriatric health care setting which allows students to put theories and ideas into practice. Graded CR/NC. Lecture, discussion, and fieldwork.

GERO 496 Introduction to Clinical Geriatrics (4) Medical problems of older adults emphasizing common geriatric syndromes, chronic illness, and alternative approaches to primary health care of older persons and their families. Upper division standing. *Prerequisite:* BISC 220L or BISC 221L.

GERO 497abc Honors Seminar (2, 2, 2-4, FaSpSm) Advanced study of empirical approaches in gerontology. Preparation, progress, presentation, and evaluation of Senior Honors Thesis research. *Prerequisite:* standing in Gerontology Honors Program.

GERO 498 Nutrition, Genes, Longevity and Diseases (4, Sm) Examines the role of nutrition and genes and the impact each has on longevity and diseases, particularly diseases related to aging. Offered in Genoa, Italy.

GERO 499 Special Topics (2-4, max 8, FaSpSm) Examination of special topics in the area of gerontology.

GERO 500 Perspectives on a Changing Society: An Introduction to Aging (4, Fa) Analysis of physical, mental, and social age-related changes as well as implications of population aging trends for individuals and society.

GERO 501 Applied Legal and Regulatory Issues in Aging (4, Fa) Analysis of shifting legal and regulatory issues affecting the delivery of aging services.

GERO 502 Marketing and Shifts in Consumer Decision Making (4, Fa) Branding, marketing, and consumer behavior through examination of established, transitioning and emerging aging services and organizations.

GERO 504 Current Issues in Aging Services Management (4, Sp) Basic skills needed for an executive working in an aging services environment. Recommended for entry level administrators and managers.

GERO 505 Behavioral and Social Consequences of Design and Environment (4, Fa) Examination of the behavioral and social consequences of design and the environment to create a more satisfying physical environment for both frail and active older adults.

GERO 506 Technological Innovations in Aging (Gerontechnology) (4, Sp) Reflections on shifts in preferences for aging in place and the market ramifications of innovations in science and technology on older consumers and service providers.

GERO 507 End of Life Care (4, Sp) Examination of programs related to end of life care. Cultural competencies in working with a diverse population on end of life issues.

GERO 508 The Mind and Body Connection through the Lifespan (4, FaSpSm) An introduction to mind-body processes involved in healthy aging. Examines the interplay of emotions, beliefs, and behaviors in shaping health-relevant biological processes.

GERO 510 Physiology of Development and Aging (4, Sp) Examination of lifespan physiology of human development, growth, and aging; major emphasis in the physiology of the later years and implications for health maintenance.

GERO 511 Fundamentals of Clinical Nutrition Screening and Assessment (4, Sp) Examines tools and resources used to evaluate the nutrition status of individuals across the lifespan including biochemical, anthropometric and subjective global assessment. Open only to graduate students.

GERO 512 Communicating Nutrition and Health (2, Fa) Overview of current understanding of the dietary and nutritional needs of individuals across their lifespan. Open only to graduate students.

GERO 513 Fundamentals of Nutrition: Macronutrients (3, Fa) A study of the principles of human nutrition throughout the life cycle. Current topics and controversies in nutrition and health are discussed. Open only to graduate students.

GERO 515L Food Production and Food Service Management (4, FaSp) A study of principles and procedures for food systems including techniques of food preparation, development, modification and evaluation of recipes, menus and products. Open only to graduate students.

GERO 517L Advanced Therapeutic Nutrition (4, Fa) Application of nutrition science, physiology, biochemistry, and metabolism to evaluate critically ill patients and plan nutrition intervention and monitoring. Open only to graduate students.

GERO 518 Current Topics in Clinical Nutrition (4, Sp) Discuss various factors that affect nutrition and aging. Topics include allergies in nutrition, food toxins, weight factors, and prevention and treatment of multiple organ systems. Open only to graduate students.

GERO 519 Recent Advances in Neurobiology and Endocrinology of Aging (2 or 4) Theories of the biology of aging and the effects of age on functional integrity of the total organism.

GERO 520 Life Span Developmental Psychology (2 or 4, FaSm) Behavior from adulthood to old age; study of major components of behavior such as perception, cognitive processes, personality, intergenerational relationships, sexuality, and life styles.

GERO 522 Counseling Older Adults and Their Families (2 or 4, Sp) Theory and application of assessment and intervention techniques with older adults and their families. Topics include: treatment modalities, psychopathology, ethical and legal issues, brain disorders.

GERO 529 Seminar in Psychological Aspects of Aging (2 or 4) Psychological changes in the later years; perception; sensory factors; intelligence and memory; psychophysiological measures; personality; psychopathology.

GERO 530 Life Span Developmental Sociology (4, Sp) Life span perspective on the sociological theories of marriage and the family, inter-generational relationships, work and retirement, and other forms of social organization.

GERO 540 Social Policy and Aging (4, Fa) Major legislation and programs; examination and analysis of policy-making and political processes affecting development and implementation of programs for older persons.

GERO 541 Health Care Delivery Models: Comparative Approaches (4) Examination of current trends and future prospects of finance and reimbursement systems. Topics include major legislation and programs such as Medicare and Medicaid.

GERO 543 Continuum of Care: Systems Perspective (4) Structural and organizational aspects of institutional and community programs; public policies, fiscal management, regulation, administration; obstacles to interagency coordination; the continuum of care.

GERO 550 Administration and System Management in Programs for Older Adults (4, Sp) Application of theories of administration and system management to public and volunteer programs and services

for older adults including residential institutions and community programs.

GERO 551 Applied Policy Skills in Aging (4, Sp) An overview and application of techniques and approaches used in the definition and analysis of policy problems in aging. *Prerequisite:* GERO 540.

GERO 554 Evaluation: Incorporating Evidence-Based Practices (4, Sp) Examination of the evaluation of health and service delivery in aging services industries.

GERO 555 Integrating Gerontology: A Multidisciplinary Approach (4, Sp) Aging (commonalities and distinctions) as addressed by biologists, psychologists, and sociologists. Topics include research perspectives, normative aging, functional decline and disability, and aging and society.

GERO 556 Program Development (2 or 4) Principles and procedures of assessing needs, collecting resources, designing activities, and implementing programs for older people in a variety of community and institutional settings.

GERO 557 Geriatric Care Management (4, Sp) Overview of concepts, issues, and approaches to geriatric care management. Includes analysis and practice of a variety of care management clinical skills.

GERO 560 Micronutrients, Health, and Longevity (4, FaSpSm) Explores the basis of nutrition needs for vitamins, major minerals and trace minerals including nutrient interaction and their role in health and longevity. Open only to graduate students.

GERO 570 Corporate Policies and Aging (4) An introduction to the evolving roles of corporations in an aging society including such topics as retaining older workers, retiree benefits, and the mature consumer.

GERO 585 The Aging Family (2 or 4, Sm) Family processes and structure in families with aged persons will be reviewed, including marital and family therapy and intervention strategies.

GERO 589 Case Studies in Leadership and Change Management (4, Fa) Examination of case studies of issues affecting the aging services industries and the role industry leaders play in reacting to change.

GERO 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

GERO 591 Field Practicum (1-12, max 12, FaSpSm) Supervised experiential learning in one or more organizations that serve older adults; includes a regularly scheduled seminar. Graded CR/NC.

GERO 592 Multidisciplinary Research Seminar in Aging (2, max 8, FaSp) Multidisciplinary perspectives on current research in gerontology, including physiology, neurobiology, health and medicine, psychology, sociology, and public policy. Topics will change each semester.

GERO 593 Research Methods (4, Fa) An introduction to research methods and their application to gerontology including problem formation, research design, data collection, descriptive and analytic statistics, interpretation, and report preparation.

GERO 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

GERO 599 Special Topics (2-4, max 8, FaSpSm) Examination of special topics in the area of gerontological study.

GERO 600 Geroscience: Molecular and Cellular Biology (4, Fa) Emphasizes the molecular and cellular biology of aging and age-related pathology and other aspects of basic aging research, including evolutionary biology, demography, epidemiology and bioinformatics.

GERO 601 Molecular Genetics of Aging (4, Sp) Explores concepts of molecular and genetic regulation of healthy aging, lifespan, and age-related diseases.

GERO 602ab Seminar on Discoveries in Biogerontology (2-2, FaSp) Critical analyses of primary

scientific data and interpretations presented in the literature. (Duplicates credit in former GERO 602.)

GERO 603 Research Integrity (2, Fa) Explores scientific integrity, mentoring, scientific record keeping, authorship, peer review, animal and human experimentation, conflict of interest, data ownership and intellectual property, and genetic technology.

GERO 610 The Aging Society (4, Sp) The interaction of demographic and economic processes, with emphasis on how the contemporary nature of these interactions influence public policy response to an aging population.

GERO 613 Health and Aging (4, Sp) Examination of changes in health related to age, changes in health in populations over time, and the key health issues facing older persons.

GERO 614L Laboratory Rotations in the Biology of Aging (4,8, FaSp) Mandatory organized laboratory rotation. Allows students to participate in laboratory activities. Designed to help select dissertation advisor and research.

GERO 620 Psychology of Aging (4, Fa) Overview of topics in the psychology of aging. Includes research and theory bearing on cognitive, personality, adaptive, and social processes throughout the adult life span. Open only to doctoral students. *Recommended preparation:* undergraduate course work in psychology.

GERO 628 Theories of Aging (4) An examination of the nature and adequacy of existing explanations of aging. Focus will be on psychological, sociological, and biological paradigms, and on the epistemology of theory.

GERO 640 Data Analysis Strategies (4, FaSpSm) Hands-on experience in developing and testing hypotheses using various types of databases, data management and analysis strategies and written presentation of findings. *Recommended preparation:* GERO 593.

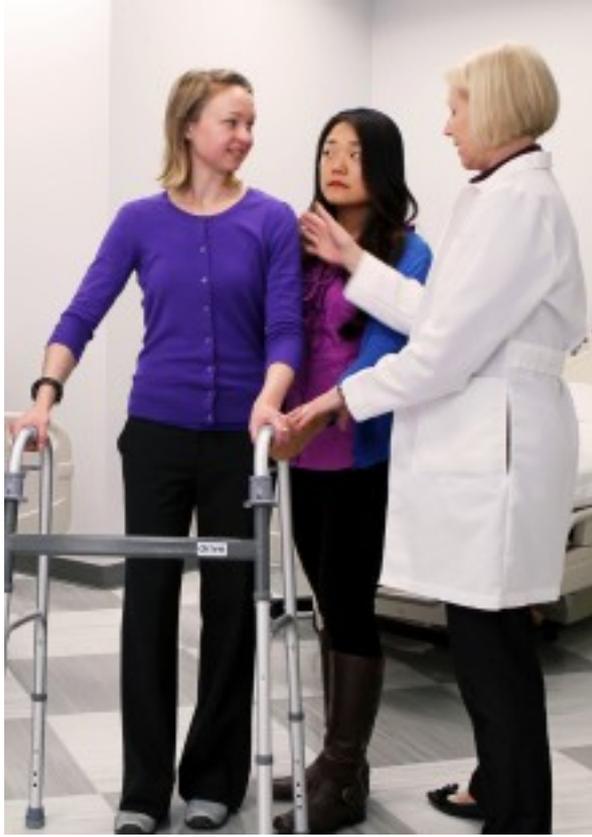

GERO 645 Politics and Policy Processes in an Aging Society (4, Fa) Dynamics of the policy-making process in the context of aging policy in the United States; focus on the political system and its social dynamics.

GERO 666 Free Radical Chemistry, Biology, and Medicine (4, Fa) Explores the chemical and physical-chemical nature of free radicals and related reactive species. Examines the roles of antioxidants and how they work. *Recommended preparation:* Course work in biology and chemistry.

GERO 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

GERO 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

USC Independent Health Professions at the Herman Ostrow
School of Dentistry

Ranked No. 1 by the U.S. News & World Report in its 2013 rankings, the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy integrates innovative research, education and clinical practice into its curriculum for all students. Here Associate Clinical Professor Julie McLaughlin Gray (right) demonstrates techniques for safe patient mobility to occupational therapy graduate students Amy Danielson OTD '14 (left) and Sharon Kim MA '14 (center).

The USC Division of Biokinesiology and Physical Therapy and the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy are administered by the Herman Ostrow School of Dentistry of USC. Both of these divisions offer outstanding education at either the graduate or undergraduate level.

The USC Division of Biokinesiology and Physical Therapy was established in 1944. For those entering the physical therapy profession, the division offers the Doctor of Physical Therapy. For practicing physical therapists, the division offers a Master of Science. In addition, the division offers the nation's longest-standing Ph.D. degree program in Physical Therapy, now a Ph.D. in Biokinesiology. Experienced clinicians with a master's degree in physical therapy may be eligible for the Doctor of Physical Therapy in an Advanced Standing program. Clinicians specializing in a specific area of practice may enter the Clinical Residency Program. The division is headquartered on the Health Sciences Campus.

The USC Chan Division of Occupational Science and Occupational Therapy opened in 1942 and is headquartered on the Health Sciences Campus. More than 50 percent of the recipients of the American Occupational Therapy Association's highest awards have been USC alumni. The division offers a professional degree program allowing students to earn a B.S. degree and, in one additional year, an M.A. in occupational therapy. These graduates are eligible to sit for the National Board for Certification in Occupational Therapy® examination. The division offers three graduate degrees: the Master of Arts, the world's first Ph.D. in Occupational Science and the professional Occupational Therapy Doctorate (OTD). The USC Chan Division of Occupational Science and Occupational Therapy master's-level professional degree program is fully accredited by the Accreditation Council for Occupational Therapy Education®, c/o Accreditation Department, American Occupational Therapy Association, Inc., 4720 Montgomery Lane, Suite 200, Bethesda, Maryland 20814-3449, (301) 652-6611 x2914, acoteonline.org.

Faculty

Associate Dean and Chair: James Gordon, Ed.D., P.T., FAPTA

Associate Chair: Cheryl Resnik, P.T., DPT, FNAP

Professors: James Gordon, Ed.D., P.T., FAPTA; Christopher Powers, Ph.D., P.T., FAPTA; Carolee J. Winstein, Ph.D., P.T., FAPTA; Francisco Valero-Cuevas, Ph.D.

Professors (Clinical Scholars): Linda Feters, Ph.D., P.T., FAPTA; Kornelia Kulig, Ph.D., P.T., FAPTA

Professors of Clinical Physical Therapy: Beth Fisher, P.T., Ph.D., FAPTA; Rob F. Landel, P.T., DPT, OCS, CSCS, FAPTA; Lori Michener, P.T., Ph.D., FAPTA

Associate Professors: Lucinda L. Baker, Ph.D., P.T.; Nina S. Bradley, Ph.D., P.T.; George J. Salem, Ph.D.; Nicolas Schweighofer, Ph.D.

Assistant Professors: Jason Kutch, Ph.D.; James Finley, Ph.D.; Sook-Lei Liew, Ph.D., OTR/L

Associate Professors of Clinical Physical Therapy: Beth Fisher, Ph.D., P.T.; Cheryl Resnik, P.T., DPT, FNAP; E. Todd Schroeder, Ph.D.; Julie Tilson, P.T., DPT, MS, NCS

Assistant Professors of Clinical Physical Therapy: Jesus Dominguez, Ph.D., P.T.; Jacquelyn Dylla, P.T., DPT, OCS; Rose Hamm, DPT, CWS; Robbin Howard, P.T., DPT, NCS; Yogi Matharu, P.T., DPT, OCS; Michael O'Donnell, P.T., DPT, OCS, FAAOMPT; Marisa Perdomo, P.T., DPT; Amy Pomrantz, P.T., DPT, OCS, ATC; Barbara Sargent, Ph.D., P.T., PCS; Susan Sigward, Ph.D., P.T., ATC; Michael S. Simpson, P.T., DPT, CCS; Jonathan Sum, P.T., DPT, OCS, SCS; Kimiko Yamada, P.T., DPT, OCS, ATC, CSCS

Assistant Professors of Research: Christina Dieli-Conwright, Ph.D., CSCS, CET; Beth Smith, P.T., DPT, Ph.D.

Instructors of Clinical Physical Therapy: Elizabeth Acreman, P.T., DPT; Geoffrey Cariker, P.T., DPT, GCS; Jessica Curran, P.T., DPT, OCS; Lauren Davis, P.T., DPT; Aimee M. Diaz, P.T., DPT, SCS, ATC; Ryan Frendewey, P.T., DPT; Lori Ginoza, P.T., DPT, NCS; Janelle Gilmer P.T., DPT, GCS; Erin Hayden, P.T., DPT, OCS; Lydia In, MPT; Nicole Irizarry, P.T., DPT, CCS; Eileen V. Johnson, P.T., DPT; Sean Johnson, DPT, OCS; Yasuyuki Kasayama, DPT, MHA, OCS; Kenneth Kim, P.T., DPT, OCS, CSCS; Daniel Kirages, P.T., DPT, OCS, FAAOMPT; Angela Kwan, MPT; Cherise Lathan, P.T., DPT, NCS; Valerie Matthews, P.T., DPT; Brian McNeill, P.T., DPT; Jennifer Okuno, MPT; Andrew Piraino, P.T., DPT, OCS, CSCS, PES; David Richards, P.T., DPT, NCS; Terry Richardson, P.T., DPT; Scott Russell, P.T., DPT; Don Shimabukuro, MPT; Jennifer Tanaka, P.T., DPT, NCS; Jeff Thompson, P.T., DPT; Erica Sigman, DPT, OCS; Stephanie Woelfel-Dyess, P.T., MPT, CWS, FACCWS; Noriko Yamaguchi, P.T., DPT, CSCS, GCS; Maria Zibell, P.T., DPT

Adjunct Professor: Robert Gregor, Ph.D., FEACSM, FEASB, FNAK, EISB

Adjunct Associate Professors: Joseph Godges, DPT; Larry Ho, P.T., DPT, OCS; Jing-Ching (Sally) Ho, P.T., DPT, OCS; Ning Lan, Ph.D.; Stephen Reischl, P.T., DPT, OCS; Rizkalla Zakhary, Ph.D.

Adjunct Assistant Professors of Clinical Physical Therapy: Michael Andersen, P.T., DPT, OCS; Kyle F. Baldwin, P.T., DPT; Julia Burlette Itamura, P.T., DPT, OCS; Jason Cozby, P.T., DPT, OCS; Sean Flanagan, Ph.D., ATC, CSCS; Kathryn L. Havens, Ph.D.; John Jankoski, MPT, NCS, OCS; Rebecca Lewthwaite, Ph.D.; Ndidiamaka Matthews, P.T., DPT, NCS; John Meyer, P.T., DPT, OCS, FAFS; Elizabeth Poppert, P.T., DPT, M.S., OCS; Gary Souza, P.T., DPT, OCS

Adjunct Instructors of Clinical Physical Therapy: Ginelle Amormino, P.T., DPT; Andrea Austin, P.T., DPT, OCS, ATC; Liz Bottrell, MPT, FAAOMPT; Melissa Brose, P.T., DPT; Erin Caudill, P.T., DPT, NCS; Manjiri Dahdaul, DPT; Oscar Gallardo, M.S., P.T.; Julie A. Programs

The Division of Biokinesiology and Physical Therapy offers multiple degrees, certificates and clinical residency programs allowing graduates the opportunity to choose educational programs that will expose them to cutting-edge research and scientific advancements, in turn creating innovators in the physical therapy profession. The largest degree program is the three-year Doctor of Physical Therapy (DPT), which is offered in addition to a post professional DPT, and a post-professional DPT and Master of Public Health dual degree. The division also offers a Ph.D. in Biokinesiology, one of the nation's first Ph.D. degrees in physical therapy education, as well as a Ph.D. in Biokinesiology and Physical Therapy. The graduate curricula for the Master of Science and Doctor of Philosophy degrees are open to all qualified students who are or are not physical therapists.

Independent Health Professions at the Herman Ostrow School of Dentistry

Biokinesiology and Physical Therapy

Master of Science

Graduate study for the Master of Science in Biokinesiology is open to individuals who have a bachelor's degree and who have a strong interest in movement science.

Admission Requirements

Admission requirements include a superior grade point average in cumulative undergraduate and graduate course work (if applicable). Applicants should score at least 600 in each area of the Graduate Record Examinations. Applicants are to provide the department with three letters of recommendation. The faculty may request a personal interview before making a decision on admission. Admission will be considered for the fall semester only. The application deadline is November 1. All applicants should contact the Division of Biokinesiology and Physical Therapy for advisement.

Prerequisites

The prerequisite for applicants to the Master of Science program in biokinesiology is either: (a) a bachelor's degree or higher with a science major or equivalent; or (b) a bachelor's or master's degree in physical therapy with appropriate basic science content. Courses completed at the time of application must include work (with appropriate laboratory study) in chemistry, physics, calculus and biology. Highly recommended is course work in anatomy, physiology, histology, kinesiology, trigonometry, neuroscience, analytical geometry, exercise physiology, biochemistry and computer programming. Applicants with no background in cellular or molecular biology may be required to take PT 509 in the entry-level DPT program. Candidates should have some degree of computer literacy. International applicants will be considered on a special evaluation of credentials.

Students deficient in certain prerequisites may be admitted subject to completion of requirements within two years after admission. An additional year may be granted upon review of the student's program by a faculty committee. Work in any prerequisite subjects will not be part of the required units for the Master of Science.

Degree Requirements

Completion of the degree requires satisfactory completion of a minimum of 32 credits of course work at the 500 level or above, a research project (BKN 559 and BKN 590), and a comprehensive examination administered with

the chair of the Biokinesiology Committee acting as the examination adviser.

REQUIRED COURSES		UNITS
BKN 550	Neurobehavioral Basis of Movement	4
BKN 551	Musculoskeletal and Biomechanical Basis of Movement	4
BKN 552	Physiological Basis of Voluntary Movement	4
BKN 559	Readings in Biokinesiology	1-4, max 8
BKN 590	Directed Research	1-12
PM 510L	Principles of Biostatistics	4

Students must complete the three biokinesiology core courses (BKN 550, BKN 551, BKN 552) before sitting for their comprehensive examination. Substituting a course for one of the core courses may be allowed after receiving approval from the Biokinesiology Program Committee prior to the beginning of the course.

In order to fulfill the research project requirement, the following plan is suggested; however, each plan can be individualized based on the needs of the student and/or adviser:

1. Select a research professor (from the department) whose work interests them. This should be done by the end of the first year of study.
2. After receiving the professor's approval, sign up for BKN 559 (4 units) and complete a semester reading the literature pertinent to the professor's work.
3. The following semester, sign up for BKN 590 (4 units) and participate in an ongoing research project that is being conducted by the professor. The research paper must be completed within the semester for which BKN 590 units are being given.

See the Doctor of Philosophy in Biokinesiology section for a list of courses available to M.S. students.

Independent Health Professions at the Herman Ostrow School of Dentistry

Biokinesiology and Physical Therapy

Doctor of Philosophy in Biokinesiology and Physical Therapy

The graduate program leading to the Doctor of Philosophy in Biokinesiology and Physical Therapy offers an opportunity for highly qualified students to prepare for careers in academic health care. The curriculum is designed for individuals who envision a career that combines training for physical therapy practice and scholarly research.

Admission Requirements

Applicants must have earned a bachelor's degree with a superior grade point average as well as Graduate Record Examinations scores. A personal interview with program faculty is required. Prerequisite course work must include: four courses in the biological sciences with labs (including human anatomy, human physiology and cell or molecular biology); one year of college physics with lab; one year of college chemistry with lab; one semester of college mathematics; two courses in psychology; one course in composition and writing; one course in literature or history. Courses that are highly recommended include: biochemistry, calculus, kinesiology, exercise physiology, neuroscience, genetics and a cross-cultural course in sociology.

Application for admission to the Division of Biokinesiology and Physical Therapy requires submission of two sets

of materials: special division application and university application forms. Students are admitted for study in the Ph.D. in Biokinesiology and Physical Therapy program beginning in the fall semester of each academic year. Both sets of applications must be submitted by December 1 of the previous year. At the time of admission to the program, the student must identify a faculty member who will serve as an adviser throughout every phase of study.

Degree Requirements

This degree is under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations.

YEARS 1, 2 – REQUIRED COURSES		UNITS
PM 510L	Principles of Biostatistics	4
PM 511aL	Data Analysis	4
PT 507	Professional Practice: Therapist Perspective	2
PT 509	Cellular and Systems Physiology	3
PT 514L	Musculoskeletal Anatomy	4
PT 516	Principles of Disease	2
PT 521L	Basics of Patient Management	4
PT 529	Life Span Motor Control	3
PT 534L	Neuroanatomy	3
PT 536	Pathology of Cardiopulmonary Disease and General Medical Conditions	3
PT 539	Clinical Pharmacology	1
PT 546	Neuropathology	3
PT 547	Professional Practice: System Perspective	2
PT 549L	Clinical Exercise Physiology	4
PT 551L	Therapeutic Applications of Physical Agents	2
PT 554L	Analytical Anatomy	3
PT 557	Professional Practice: Patient Perspective	2
PT 566	Disorders of the Musculoskeletal System	3
PT 569	Fundamentals of Neuroscience	4
PT 571L	Clinical Management of Cardiopulmonary Dysfunction	4
PT 574	Clinical Biomechanics	3
PT 581L	Clinical Management of the Patient with Neurological Dysfunction	5
PT 582	Mechanics of Human Gait	2
PT 583L	Clinical Electrophysiology	3
PT 600abcdez	Clinical Clerkship	1-3-1-1-3-0
PT 621L	Clinical Management of the Patient with Musculoskeletal Dysfunction	5
YEARS 3, 4, 5 — REQUIRED COURSES		UNITS
BKN 790	Research	1-12
BKN 794abcdz	Dissertation	2-2-2-2-0
YEAR 6 — REQUIRED COURSES		UNITS
PT 630	Integrated Management of the Upper and Lower Extremities	3
PT 631	Integrated Management of the Axial Skeletal System and Related Movement Disorders	3
PT 632	Integrated Patient Management Seminar	5
PT 660	Advanced Clerkship with Academic Integration	5

A minimum of 116 units is required for completion of this program.

Estimated Calendar of Study

Basic and Clinical Science Foundation Courses (Years 1, 2)

The student will enroll in all required course work and clinical experiences *excluding* BKN 790, BKN 794abcdz, PT 630, PT 631, PT 632, PT 660 and PT 665.

Qualifying Exam (Year 3)

The student will select a qualifying exam committee and begin preparing a research proposal (register for BKN 790). During this time, the student is encouraged to enroll in key elective courses, both inside and outside the division, which will enhance research proposal development. The expectation is that the student will sit for the qualifying exam and achieve doctoral candidacy at the end of year three.

Research and Dissertation Preparation (Years 4, 5)

The student will complete the research project and prepare a dissertation (register for BKN 790 and BKN 794). The expectation is that the student will successfully defend the dissertation by the end of year five.

Completion of Internship Requirement (Year 6)

The student will complete the required internships to achieve clinical competency (register for PT 630, PT 631, PT 632, PT 660 and PT 665).

Independent Health Professions at the Herman Ostrow School of Dentistry

Biokinesiology and Physical Therapy

Doctor of Philosophy in Biokinesiology

The graduate program leading to the Doctor of Philosophy in Biokinesiology is designed to prepare candidates for research and teaching at the university level. Actual programs of study will be designed with a degree of flexibility directed toward individual students who seek to become independent scholars.

Admission Requirements

Applicants must meet all general admission requirements of the university. Admission requirements include a superior grade point average in cumulative undergraduate and graduate course work (if applicable). In addition, applicants should score at least 600 in each area of the Graduate Record Examinations (GRE) and have some research experience. Students admitted for the Master of Science degree are not automatically admitted to the Doctor of Philosophy program. The Master of Science is not required as a prerequisite to the Ph.D. but may be advised.

Applicants must have a personal interview with the program faculty. A student can be considered for admission only when a member of the full-time Ph.D. faculty has agreed to serve as the student's Ph.D. adviser. Three letters of recommendation and duplicate transcripts must be sent to the division for preliminary evaluation, although final acceptance is based upon the official USC application procedure.

Prerequisites (Ph.D. Program)

The prerequisite for applicants to the Ph.D. program in biokinesiology is either: (a) a bachelor's degree or higher with a science major or equivalent; or (b) a bachelor's or master's degree in physical therapy with appropriate basic science content. Courses completed at the time of application must include work (with appropriate

laboratory study) in chemistry, calculus, physics and biology. Highly recommended is course work in anatomy, physiology, histology, cell biology, exercise physiology, kinesiology, biochemistry, neuroscience, trigonometry, analytical geometry and computer programming.

Candidates should be computer literate. International applicants will be considered upon evaluation of credentials by the USC Office of Admission.

Students deficient in certain prerequisites may be admitted subject to completion of requirements within two years after admission. An additional year may be granted upon review of the student's program by a faculty committee. Work in any prerequisite subject will not be part of the required 60 units for the Doctor of Philosophy.

Screening Procedure

A screening procedure will be offered twice each year for qualified students. It must be taken prior to the completion of 24 units at the 500-level or higher. The purpose of the screening procedure is to assess the progress of the Ph.D. student and to determine whether that progress is sufficient to continue in the Ph.D. program. Passing the procedure is a prerequisite for continuation in the Ph.D. program.

Course Requirements

A minimum of 60 units is required for the Doctor of Philosophy degree.

REQUIRED COURSE WORK		UNITS
BKN 550	Neurobehavioral Basis of Movement	4
BKN 551	Musculoskeletal and Biomechanical Basis of Movement	4
BKN 552	Physiological Basis of Voluntary Movement	4
BKN 790	Research	1-12
BKN 794abcdz	Doctoral Dissertation	2-2-2-2-0
INTD 500*	Ethics and Accountability in Biomedical Research	1
PM 510L**	Principles of Biostatistics	4
PM 511aL**	Data Analysis	4

*Or equivalent graduate ethics course.

**Or equivalent graduate level statistics.

Ph.D. students must complete three core courses (BKN 550, BKN 551, BKN 552) before participating in the screening procedure. Substituting a course for one of the core courses may be allowed after receiving approval from the Biokinesiology Program Committee prior to the beginning of the course.

Other course requirements (to complete 60 units) will vary according to the specific needs of each student. Course work other than departmental offerings is encouraged and may be required by the student's qualifying exam committee.

COURSES AVAILABLE FOR M.S./PH.D. STUDENTS		UNITS
BKN 559	Readings in Biokinesiology	1-4, max 8
BKN 563	Biomechanics	2
BKN 566	Neurobiology of Locomotion	2
BKN 567	Advanced Topics in Biomechanics	2
BKN 573ab	Advanced Dissection Anatomy	2-2
BKN 575	Principles of Musculoskeletal Imaging	2
BKN 585	Systematic Research Writing	3
BKN 587ab	Physiological Correlates of Therapeutic Exercise	4-4

BKN 588	Physiology and Biomechanics of Resistance Exercise	4
BKN 590	Directed Research	1-12
BKN 593	Behavioral Basis of Motor Control and Learning	3
BKN 594abz	Master's Thesis	2-2-0
BKN 599	Special Topics	2-4, max 8
BKN 615	Principles of Skeletal Adaptation	4
BKN 617	Modeling the Motor System: An Introduction	2
BKN 618L	Modeling the Motor System: Laboratory	1
BKN 621	Electromyography in Research and Practice	3
BKN 623	Neuroplasticity and Neural Repair	3
BKN 672	Advanced Independent Study in Biokinesiology	1-4, max 8
BKN 790	Research	1-12
BKN 794abcdz	Doctoral Dissertation	2-2-2-2-0

Foreign Language Requirement

There is no foreign language requirement.

Qualifying Exam Committee

Upon successful completion of the screening examination the student and the major adviser will select a qualifying exam committee for continuing course work and independent study. The qualifying exam committee comprises five members: three to four full-time faculty from the Division of Biokinesiology and Physical Therapy, one whom serves as committee chair, and one or two faculty members outside the division.

The qualifying exam committee will recommend course work, independent study and readings in the major and cognate areas.

Qualifying Examination

The Ph.D. qualifying examination is offered during the fall or spring semesters. The qualifying examination concentrates on the student's ability to demonstrate knowledge in the major academic area chosen and its relation to other areas of study offered in the department. The qualifying examination has both written and oral components. A student failing any part of the examination may be allowed one additional opportunity to pass that portion at the discretion of the qualifying exam committee, within the regulations of the Graduate School governing the repetition of qualifying examinations.

Dissertation Committee

After the qualifying examination has been passed and a dissertation topic approved, the qualifying exam committee shall be known as the dissertation committee and may be reduced to three members upon unanimous recommendation to the dean of graduate studies. One of the three members must be from outside the major division. The chair of the dissertation committee will be the principal research adviser.

Dissertation and Oral Defense

An acceptable dissertation based on original investigation is required. The dissertation must show technical mastery of a special field, capacity for independent research and scholarly ability.

The dissertation and the defense or final oral must have the unanimous approval of the dissertation committee. The dissertation should be complete within three years of the date the proposal is approved.

Independent Health Professions at the Herman Ostrow School of Dentistry

Biokinesiology and Physical Therapy

Doctor of Physical Therapy

Post-Professional Doctor of Physical Therapy Program

Applicants must be experienced physical therapy clinicians licensed to practice in the United States. Alternatively, foreign trained therapists must be graduates of institutions recognized by the American Physical Therapy Association. Applicants must also hold a master's degree in physical therapy or a field related to physical therapy practice. Generally, a minimum grade point average of 3.0 on a 4.0 scale as well as a minimum score of 500 on each of the three components of the Graduate Record Examinations are required. The degree requirement includes successful completion of 30–31 units as described in the following three sections:

REQUIRED COURSES		UNITS
PT 573	Physical Examination and Differential Diagnosis in Patients with Medical Disorders	2
PT 585	Physical Examination and Differential Diagnosis in Patients with Neurological Disorders, or	2
PT 624a	Neurological Differential Diagnosis and Therapeutic Interventions	3
PT 591	Physical Examination and Differential Diagnosis in Patients with Orthopedic Disorders	2
PT 605	Orthopedic Radiology	2
PT 607	Clinical Scanning	2
PT 608	Pharmacotherapeutics	2

ELECTIVES (A MINIMUM OF 9 UNITS IS REQUIRED, ONE FROM EACH CATEGORY IS RECOMMENDED)		UNITS
<i>Anatomy</i>		
BKN 551	Musculoskeletal and Biomechanical Basis of Movement	4
BKN 563	Biomechanics	2
BKN 573ab	Advanced Dissection Anatomy	2
PT 514L	Musculoskeletal Anatomy	4
PT 534	Neuroanatomy	3
PT 554L	Analytical Anatomy	3
<i>Neurobiology</i>		
BKN 550	Neurobehavioral Basis of Movement	4
BKN 566	Neurobiology of Locomotion	2

PT 549L	Clinical Exercise Physiology	4
PT 571L	Clinical Management of Cardiopulmonary Dysfunction	4
PT 624bL	Neurological Differential Diagnosis and Therapeutic Interventions	3

Capstone Project (PT 592)

This required project provides the student with the opportunity to synthesize the learning experiences of the DPT program. It can take the form of a case study, a learning module for students or patients, a business plan for a unique form of health care delivery, or some other innovative concept. Work toward the completion of the project is done under the guidance of a single faculty member or a committee, depending on the magnitude and scope of the project. The primary faculty adviser will determine the unit value of the project.

A clinical residency is also available as part of the post-professional DPT program.

Certificate in Neurologic Physical Therapy

Clinical Residency Program

This program is directed at practicing clinicians who seek post-professional clinical residency education in neurologic physical therapy and wish to obtain an academic credential for its completion.

Admission Requirements, Prerequisites and Degree Requirements

Admission requirements such as grade point average, GRE scores and P.T. licensure are the same as those for the post-professional DPT. In addition to the above listed requirements, experience as evidenced by the years in practice and post-graduate course work taken will be assessed in the applicant's portfolio. The faculty may request a personal interview. Admission will be considered for fall semester only. Deadline for application is four months prior to the proposed starting date. All applicants should contact the Division of Biokinesiology and Physical Therapy for advisement. Completion of the certificate requires satisfactory completion of a minimum of 15 units.

REQUIRED COURSES FOR CERTIFICATE IN NEUROLOGIC PHYSICAL THERAPY		UNITS
PT 595abcd	Residency in Advanced Clinical Physical Therapy	1-4 each
PT 624abL	Neurological Differential Diagnosis and Therapeutic Interventions	3-3

Doctor of Physical Therapy and Master of Public Health

The Post Professional Doctor of Physical Therapy (DPT) and the Master of Public (MPH) dual degree program offers the opportunity for physical therapy clinicians to pursue a doctoral-level education in combination with an integrated approach to health care. The program spans four years. Students begin the first one to two years completing MPH core and elective course work in the Department of Preventive Medicine. The remaining years are devoted to program requirements in physical therapy.

Professional Entry-Level Doctor of Physical Therapy Program

This program comprises six semesters and two summer courses for completion of the required 115 units. Clinical experience (clerkship) is part of the curriculum during all three years. The Division of Biokinesiology and Physical Therapy awards the DPT to enrolled students who have satisfactorily completed the three-year curriculum. For successful completion, students must complete all course work with a minimum cumulative GPA of 2.75, meet all professional standards and pass all clinical clerkships.

Admission Requirements (Entry-Level)

Applicants are required to complete the equivalent of a U.S. baccalaureate degree at an accredited college or university prior to matriculation. Prerequisite course work must include: four courses in the biological sciences (including human anatomy, human physiology and either cell or molecular biology); one year of college physics;

one year of college chemistry; one semester of college mathematics; two courses in psychology; one course in composition and writing; and one course in either literature or history. Human anatomy, human physiology, physics and chemistry must include laboratories. The following courses are highly recommended: biochemistry, calculus, kinesiology, exercise physiology, neuroscience, genetics and a cross-cultural course in sociology. Applicants should be computer literate.

Students from foreign countries must have completed one year of study in the United States prior to application. Credits from foreign institutions must be approved by the USC Office of Admission.

Graduate Record Examinations (GRE)

The GRE is required of all applicants. In general, minimum scores of 500 are required on each of the general test measures of verbal, quantitative and analytical ability.

Applications

Applications are available in September for the class entering in September of the following year. The deadline for receipt of applications is December 1 of each year. Only one class is admitted each year.

The Admissions Committee reviews all information submitted. Applicants may be requested to appear for a personal interview. It is highly recommended that all applicants make an appointment to visit the division's office located on the Health Sciences Campus and talk with students and members of the faculty.

Notice of Acceptance

Notice of acceptance will be sent to successful candidates no earlier than late January and continually thereafter until the class is filled. In no case will an acceptance be offered earlier than one year before anticipated enrollment.

Candidates should reply to an offer of acceptance within three weeks enclosing a \$1,000 deposit (nonrefundable) which is credited to tuition at the time of registration. A letter of withdrawal is required if applicants wish to relinquish their place in the class; release is granted automatically upon receipt of the letter.

Degree Requirements (Entry-Level)

The DPT is awarded to enrolled students who have completed satisfactorily the three-year curriculum of 115 credits (depending on electives chosen). The minimum number of credits required for graduation is 115. The minimum GPA required for graduation is 2.75. Clinical experience (clerkship) is part of the curriculum during all three years.

The Division of Biokinesiology and Physical Therapy uses a system of student evaluation and grading that is designed to encourage self-reliance, to stimulate the student's independent quest for knowledge and to promote excellence in clinical and academic achievement.

Faculty of the program are responsible for establishing evaluation criteria appropriate to the objectives of each course and for specifying the manner in which evaluative information is to be gathered. For clinical evaluation, descriptive comments based on the student's performance are submitted by faculty and clinical instructors to the student's permanent file.

Biokinesiology and Physical Therapy

Courses of Instruction

BIOKINESIOLOGY (BKN)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

BKN 504 Neuromuscular Systems (3, Fa) (Enroll in BME 504)

BKN 550 Neurobehavioral Basis of Movement (4, Sp) Introduction to the neurobehavioral and neurobiological basis of movement. Review of information processing, neural basis of perception/action, motor systems, and higher cognitive function and behavior. *Recommended preparation:* biology and physiology.

BKN 551 Musculoskeletal and Biomechanical Basis of Movement (4, Fa) Introduction to the mechanical properties of the musculoskeletal system. Review of connective tissue and muscle mechanics, arthrology, anatomical design and statics. Laboratory dissections illustrate biomechanical concepts.

BKN 552 Physiological Basis of Voluntary Movement (4, Sp) Consideration of the neuromuscular and musculoskeletal physiology of voluntary movement.

BKN 557L Functional Neuroanatomy with Lab Dissection (3, FaSpSm) Comprehensive survey of regional neuroanatomy covered in lecture and laboratory format with dissection. In-depth consideration is given to neuroanatomical basis of sensory and motor function. Topics include neuroanatomical basis of cellular function, somatosensation, special senses, movement and distributed motor control, and homeostasis regulation.

BKN 559 Readings in Biokinesiology (1-4, max 8, FaSpSm) Independent review and synthesis of papers appearing in the current literature.

BKN 563 Biomechanics (2, 2 years, Sp) Advanced study of the kinematics of human motion. Emphasis on the inverse dynamics solution to quantify forces and moments of force. Lecture and demonstration.

BKN 566 Neurobiology of Locomotion (2) Topics include developmental biology of embryonic motility, central pattern generators, descending neural regulation, sensory modulation, and perception/action influences on the motor control of locomotion. *Prerequisite:* BISC 524, BISC 525; *recommended preparation:* BKN 550.

BKN 567 Advanced Topics in Biomechanics (2, Sp) Advanced examination of motion-analysis techniques, applications and data interpretation. Magnetic tracking techniques, upper-extremity kinematics, energy/work/impulse concepts, intersegmental dynamics, and EMG muscle modeling are examined. *Prerequisite:* BKN 563.

BKN 573ab Advanced Dissection Anatomy (2-2, FaSpSm) Advanced analysis of systems or structures with dissection. Emphasis on correlations with function.

BKN 575 Principles of Musculoskeletal Imaging (2, Sm) Basic principles of musculoskeletal imaging as it relates to biomechanics research. Topics include MRI physics, variable imaging parameters and selection of pulse sequences.

BKN 578 Classic Readings in Biokinesiology (2) A seminar course in which students read and discuss classic scientific papers that have shaped the development of the movement sciences over the past 150 years.

BKN 585 Systematic Research Writing (3, Sm) Development of analytical journal reading skills and proficiency in scientific writing. Lecture and tutorial format.

BKN 587ab Physiological Correlates of Therapeutic Exercise (4-4, FaSp) *a:* Responses of the physically handicapped to exercise. Emphasis on muscle, energy metabolism, body temperature, environment, endocrine considerations. Strengthening, training, endurance, and evaluation of performance. *b:* Responses of the physically handicapped to exercise, with emphasis on cardiovascular and respiratory adaptations and pathology.

BKN 588 Physiology and Biomechanics of Resistance Exercise (2, Sp) Science of resistance-exercise prescription, adaptation, and outcome assessment. Topics include periodization, neuromuscular and connective-tissue adaptation, special populations, and biomechanical considerations.

BKN 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

BKN 593 Behavioral Basis of Motor Control and Learning (3, Fa) Seminar in movement science dealing with the behavioral basis of motor control and learning from an information processing perspective. *Recommended preparation:* statistics; psychology.

BKN 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

BKN 599 Special Topics (2-4, max 8, FaSpSm) Studies of scientific theory in physical therapy.

BKN 615 Principles of Skeletal Adaptation (4, 2 years, Sm) Introduction to the integrative physiology of skeletal adaptation to mechanical loading. Emphasis on mechanical and chemical regulation of bone mass.

BKN 617 Modeling the Motor System: An Introduction (2, 2 years, Sp) Introduction of basic principles and models of the primate motor system. Emphasis on arm control.

BKN 618L Modeling the Motor System: Laboratory (1, 2 years, Sp) Introduction of computer programming and implementation of computational models in a laboratory setting.

BKN 621 Electromyography in Research and Practice (3, 2 years, Fa) Physiology and electrophysiology of muscular contraction, how it is collected, quantified and processed. Uses of electromyographic information for research and clinical assessments. *Recommended preparation:* human anatomy, skeletal muscle physiology.

BKN 623 Neuroplasticity and Neural Repair (3, 2 years, Fa) Integration of basic research on neuroplasticity and clinical research on central nervous system reorganization after brain injury. Implication for neurorecovery and rehabilitation.

BKN 672 Advanced Independent Study in Biokinesiology (1-4, max 8, FaSpSm) Examination of selected mechanisms underlying normal movement and pathological movement. Ph.D. students only.

BKN 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

BKN 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

PHYSICAL THERAPY (PT)

PT 507 Professional Practice: Therapist Perspective (2, Fa) Identification of personal values, attitudes and beliefs and their relationship to personal development into a health care provider. Emphasis on communication skills, ethics, and professional guidelines, laws and regulations.

PT 509 Cellular and Systems Physiology (3, Fa) Selected subjects in cellular and systems physiology. Emphasis on molecular and cellular aspects of neuromuscular function; also renal and endocrine physiology.

PT 514L Musculoskeletal Anatomy (4, Fa) Musculoskeletal anatomy, innervation, blood supply, and function: intensive study of the head, neck, trunk, and limbs. Lecture, dissection laboratory.

PT 516 Principles of Disease (2, Sm) Principles and mechanisms of genetics, immunology, infection, wound healing, and oncology. Lecture.

PT 521L Basics of Patient Management (4, Fa) Development of basic decision-making skills, professional behaviors and impairment assessment in patients with musculoskeletal neurologic and/or cardiopulmonary dysfunction. Lecture, laboratory.

PT 529 Life Span Motor Control (3, Sm) Introduction to sensorimotor systems, overview of current perspectives in motor control from fetus through late adulthood, and clinical tests of motor proficiency. Lecture, limited laboratory.

PT 530ab Therapeutic Exercise (a: 2, Sp; b: 2, Sm) *a:* Theoretical and practical principles for evaluation of exercise need and prescription of exercise programs. Emphasis on approaches for patients with

musculoskeletal deficits. (Duplicates credit in former PT 530.) *b*: Examination of needs analysis and prescription of exercise programs for special patient populations and assessment of current community trends in exercise and wellness.

PT 534L Neuroanatomy (3, Fa) Organized approach to structures in the brain, spinal cord and peripheral nervous systems that subserve motor, sensory, and integrative functions, memory, cognitive and special senses. Lecture, laboratory.

PT 536 Pathology of Cardiopulmonary Disease and General Medical Conditions (3, Fa) Pathology and pathophysiological mechanisms in disease of the cardiac, pulmonary and circulatory systems; examination of diabetes, burns, and other disabling medical disorders. Lecture. *Prerequisite*: PT 509, PT 514L, PT 516, PT 521L, PT 529.

PT 539 Clinical Pharmacology (1, Fa) Effects of commonly used drugs in patients with physical disability; side effects that alter physical performance or responses to exercise.

PT 546 Neuropathology (3, Sp) Pathology in the central and peripheral nervous systems that alter motor and sensory performance. Emphasis on loss of motion, excessive and involuntary movement disorders. Lecture. *Prerequisite*: PT 516, PT 534L.

PT 547 Professional Practice: System Perspective (2, Sm) Analysis of the integration of physical therapy practice into the national health care system; administration, budgeting and reimbursement for physical therapy services.

PT 549L Clinical Exercise Physiology (4, Fa) Adaptation of the human body to exercise and the use of exercise to modify human function. Lecture and laboratory.

PT 551L Therapeutic Application of Physical Agents (2, Sm) Physiologic responses to the application of thermal, mechanical, electromagnetic and hydrodynamic therapeutic procedures. Evaluation procedures and intervention planning. Lecture, laboratory. *Prerequisite*: PT 521L.

PT 554L Analytical Anatomy (3, Sp) Detailed kinesiological analysis of axial, spine, head, neck, face and bulbar muscles. Lecture, laboratory and clinical demonstration. *Prerequisite*: PT 514L.

PT 557 Professional Practice: Patient Perspective (2, Sp) Examination of issues related to professional-patient relationships, culture, lifestyles, ethnicity, gender and age. Emphasis on communication within a patient care model.

PT 561abcde Evidence for Physical Therapist Practice (2-2-2-2-2) *a*: Introduction to a patient-centered Evidence Based Practice model with emphasis on professional communication skills, ethics, professional guidelines, laws and regulations; *b*: introduction to acquiring, appraising and integrating research evidence; *c*: advanced critical analysis and application of research of evidence; *d*: advanced integration of patient values as influenced by culture, ethnicity, lifestyles, gender, and age into patient-centered clinical decision making; *e*: analysis of the integration of physical therapist practice into the national health care system; administration, budgeting and reimbursement for physical therapist services.

PT 566 Disorders of the Musculoskeletal System (3, Sp) Regional description of pathology and pathophysiological mechanisms of disorders of bone, connective tissue, and joints. Lecture, demonstration.

PT 569 Fundamentals of Neuroscience (4, Sp) Detailed analysis of neurophysiologic mechanisms underlying normal and abnormal motor and sensory function. Lecture. *Prerequisite*: PT 509, PT 516, PT 529, PT 534L.

PT 571L Clinical Management of Cardiopulmonary Dysfunction (4, Fa) Physical therapy evaluation and intervention in the care of patients with circulatory, cardiac, or pulmonary dysfunction. Lecture, case presentations, laboratory. *Prerequisite*: PT 521L.

PT 573 Physical Examination and Differential Diagnosis in Patients with Medical Disorders (2, Fa) Physical assessment and differential diagnosis in common medical conditions. Emphasis on factors that

influence physical therapy or require referral back to the physician.

PT 574 Clinical Biomechanics (3, Sp) Introduction to the principles of biomechanics (statics, dynamics) as they apply to physical therapy practice. Emphasis on tissue mechanics, joint function and gait. Lecture.

Prerequisite: PT 554L.

PT 581L Clinical Management of the Patient with Neurological Dysfunction (5, Sp) Physical therapy theory and methods for intervention in neurological dysfunction. Lecture, laboratory. Neuroanatomy lab available. *Prerequisite:* PT 509, PT 516, PT 521L, PT 529, PT 534L.

PT 582 Mechanics of Human Gait (2, Fa) Introduction to both normal and pathological gait. Emphasis on the basic components of abnormal ambulation including temporal-spatial factors, joint motion, kinetics, kinematics, and muscle activity. Lecture.

PT 583L Clinical Electrophysiology (3, Sp) Use of electrical currents to evaluate and treat musculoskeletal, neurological and wound disorders. Theory and practice. Lecture, laboratory. *Prerequisite:* PT 514L, PT 554L.

PT 585 Physical Examination and Differential Diagnosis in Patients with Neurological Disorders (2, Fa) Physical examination and differential diagnosis in neurologic disorders. Emphasis on factors that influence physical therapy or require referral back to the physician.

PT 591 Physical Examination and Differential Diagnosis in Patients with Orthopedic Disorders (2, Sp) Physical examination and differential diagnosis in orthopedic disorders. Emphasis on factors that influence physical therapy or require referral back to the physician.

PT 592 Capstone Project (1-6, max 6, FaSpSm) Synthesis of knowledge gained in the pursuit of D.P.T. degree through a case study, a learning module for students or patients, a business plan for a unique form of health care delivery, or some other innovative concept. The primary faculty adviser will determine the unit value of the project.

PT 595abcd Residency in Advanced Clinical Physical Therapy (1-4 each, FaSpSm) Residency open to students pursuing a Graduate Certificate in Orthopedic Physical Therapy or Neurologic Physical Therapy or the post-professional D.P.T. program. Graded CR/NC. P.T. Licensure required.

PT 600abcdez Clinical Clerkship (1-3-1-1-3-0, FaSpSm) *a:* Practical experience in two- or six-week physical therapy manual skills, decision making and professional behaviors. *b:* Practical experience in six-week physical therapy manual skills, decision making, and professional behaviors. *c:* Practical experience in two-week physical therapy psychomotor skills, decision making and professional behaviors. *d:* Practical experience in two-week physical therapy psychomotor skills, decision making and professional behaviors. *e:* Practical experience in six-week physical therapy psychomotor skills, decision making and professional behaviors. Graded CR/NC.

PT 605 Orthopedic Radiology (2, Fa) Study of normal and pathologic skeletal radiographic examinations.

PT 606 Clinical Imaging (2, Sp) Elements of reading roentgenographs, CAT and MRI scans for the physical therapist. Lecture, demonstration, practical experience. Open only to Biokinesiology and Physical Therapy graduate students.

PT 607 Clinical Scanning (2, Sp) Survey of diagnostic imaging for orthopedic and neurologic disorders seen in physical therapy practice.

PT 608 Pharmacotherapeutics (2, Fa) Indications, contraindications, physiologic mechanisms, and side-effects of pharmacologic agents. Analysis of interactions between drugs and physical therapy interventions.

PT 612L Physical Therapy Management of Spinal Disorders (2, FaSpSm) Advanced evaluation and treatment skills for the management of individuals with spinal disorders. Lecture, laboratory. *Prerequisite:* PT 600d.

PT 613L Physical Therapy Management of the Foot and Lower Quarter (2, Fa) Advanced evaluation and treatment skills for management of individuals with lower extremity disorders. Lecture, laboratory.

Prerequisite: PT 600d.

PT 614L Evaluation and Management of Hand Dysfunction (2, Sp) Pathology, evaluation, differential diagnosis and treatment of hand and wrist dysfunction. Lecture, laboratory. *Prerequisite: PT 600d.*

PT 618L Seminar in Advanced Neurological Rehabilitation (2, Sp) Advanced evaluation treatment, and problem solving skills for the individual with neurological dysfunction. Lecture, laboratory. *Prerequisite: PT 600d.*

PT 619L Clinical Electrophysiology (2, Fa) Advanced evaluation and treatment of individuals with peripheral nerve disorders using electrotherapy. Lecture, laboratory. *Prerequisite: PT 600d.*

PT 621L Clinical Management of the Patient with Musculoskeletal Dysfunction (5, Sp) Physical therapy theory and methods of evaluation and treatment of orthopedic dysfunction. Lecture, demonstration, laboratory. Dissection lab available. *Prerequisite: PT 514L, PT 521L.*

PT 624abL Neurological Differential Diagnosis and Therapeutic Interventions (3-3, FaSp) Theoretical and practical foundations of clinical practice for specialization in neurologic physical therapy. *a:* Principles of neurologic differential diagnosis, mechanisms of neurorecovery and rehabilitation of focal neurologic disorders covered. *b:* Emphasis on advanced skills in neurologic differential diagnosis and rehabilitation for complex neurologic disorders.

PT 630 Integrated Management of the Upper and Lower Extremities (3, FaSp) Advanced evaluation and management of upper and lower extremity disorders and related movement dysfunction. *Prerequisite: PT 600e.*

PT 631 Integrated Patient Management of the Axial Skeletal System and Related Movement Disorders (3, FaSp) Advanced assessment and management of axial skeletal dysfunctions and related movement disorders. *Prerequisite: PT 600e.*

PT 632 Integrated Patient Management Seminar (5, FaSp) Integration of physical therapy management of complicated patients with concurrent musculoskeletal, cardiopulmonary and/or neurologic disorders. *Prerequisite: PT 571L, PT 581L, PT 621L.*

PT 642abc Evidence Based Practice (2-2-2, a: Sm, b: Fa, c: Sp) *a:* Practical considerations of evidence-based practice including patient interviews and search methods. *b:* Development of critical analysis skills of evidence to enhance critical thinking. *c:* Focus on evidence-based decision making using patient perspectives to effect optimal function outcomes.

PT 650 Differential Diagnosis in Physical Therapy (2, Sm) Consideration of principle of differential diagnosis with emphasis on mastering this skill. Open only to Biokinesiology and Physical Therapy graduate students. *Recommended preparation:* completion of years 1 and 2.

PT 654 Physical Therapy Intervention in Pediatrics (2, Sm) Physical therapy management of commonly encountered pediatric diagnoses. Seminar, clinical laboratory. Open to students enrolled in physical therapy degree programs only.

PT 660 Advanced Clerkship with Academic Integration (5, FaSp) A 16-week clerkship consisting of a minimum of 24 hours per week in a part-time setting. Emphasis on the care of orthopedic, neurologic, pediatric or complicated medical conditions. Graded CR/NC. *Prerequisite: PT 600e.*

PT 665 Advanced Clinical Clerkship (8, FaSp) A 16-week clerkship consisting of a minimum of 36 hours per week in a full-time setting. Emphasis on care of orthopedic, neurologic, pediatric or complicated medical conditions. Graded CR/NC. *Prerequisite: PT 600e.*

Faculty

Mrs. T.H. Chan Professorship in Occupational Science and Occupational Therapy, Associate Dean and Chair:
Florence A. Clark, Ph.D., OTR/L, FAOTA

Associate Chair: Julie McLaughlin Gray, Ph.D., OTR/L, FAOTA

Professors: Sharon Cermak, Ed.D.; OTR/L, FAOTA; Florence A. Clark, Ph.D., OTR/L, FAOTA; Gelya Frank, Ph.D.; Mary Lawlor, Sc.D., OTR/L, FAOTA; Cheryl Mattingly, Ph.D.; William Morgan, Ph.D.

Associate Professor: Lisa Aziz-Zadeh, Ph.D.

Assistant Professors: Natalie Leland, Ph.D., OTR/L, BCG (*Gerontology*), FAOTA; Elizabeth Pyatak, Ph.D., OTR/L; Shawn Roll, Ph.D., OTR/L, CWCE, RMSK; Olga Solomon, Ph.D.; Barbara Thompson, Ph.D.

Professor of Clinical Occupational Therapy: Linda Fazio, Ph.D., OTR/L, FAOTA

Associate Professors of Clinical Occupational Therapy: Erna Blanche, Ph.D., OTR/L; Katie Jordan, OTD, OTR/L; Linda Liang, MOT, OTR/L; Julie McLaughlin Gray, Ph.D., OTR/L, FAOTA

Assistant Professors of Clinical Occupational Therapy: Michael Ang, OTD, OTR/L; Sarah Bream, OTD, OTR/L; Elizabeth Carley, OTD, OTR/L; Adley Chan, OTD, OTR/L; Carlin Daley, OTD, OTR/L; Celso Delgado Jr., OTD, OTR/L; Camille Dieterle, OTD, OTR/L; Joan Forry, Ph.D.; Don Gordon, Ph.D., OTR/L; Ashley Halle, OTD, OTR/L; Kiley Hanish, OTD, OTR/L; Marisa Hernandez, OTD, OTR/L; Jess Holguin, OTD, OTR/L; Michelle Hsai, OTD, OTR/L; Karrie Kingsley, OTD, OTR/L; John Margetis, OTD, OTR/L; Jenny Martinez, OTD, OTR/L; Michael McNulty, OTD, OTR/L; Jaynee Meyer, OTD, OTR/L; Helen Mirsaeidi, OTD, OTR/L; Stacey Morikawa, OTD, OTR/L; Phuong Nguyen, OTD, OTR/L; Emily Ochi, OTD, OTR/L; Jazminne Orozco, OTD, OTR/L; Daniel Park, OTD, OTR/L; Joanne Park, OTD, OTR/L; Kimberly Perring, OTD, OTR/L; Tara Perry, OTD, OTR/L; Elyse Peterson, OTD, OTR/L; Deborah Pitts, Ph.D., MBA, OTR/L, BCMH (*Mental Health*); Samia Rafeedie, OTD, OTR/L; Chantelle Rice, OTD, OTR/L; Kimberly Rice, OTD, OTR/L; Clarissa Saunders-Newton, Ph.D., OTR/L; Shelby Surfas, OTD, OTR/L; Ashley Uyeshiro, OTD, OTR/L; Myka Winder, OTD, OTR/L

Instructors of Clinical Occupational Therapy: Mahjabeen Aftab, OTR/L; Aimee Aguilon, OTR/L; Catherine Crowley, OTD, OTR/L; Kim Eggleston, M.A., OTR/L; Heather Kitching, OTD, OTR/L; Stephanie Mielke, OTD, OTR/L; Tessa Milman, OTD, OTR/L; Scott Orr, M.A., OTR/L; Karen Park, OTD, OTR/L; Whitney Pike, B.S., OTR/L; Janice Rocker, M.S., OTD, OTR/L; Carey Sokol, M.A., OTR/L; Joan Vartanian, B.S., OTR/L

Research Professor: Michael Carlson, Ph.D.

Research Adjunct Professor: Barbara Gage, Ph.D.

Research Associate Professor: Sarah Jeanne Salvy, Ph.D.

Research Assistant Professors: Stefanie Bodison, OTD, OTR/L; Jesus Diaz, OTD, OTR/L; Stacey Schepens, Ph.D., OTR/L; Derek Snyder, Ph.D.; Cheryl Vigen, Ph.D.

Research Adjunct Assistant Professor: Nora Kashani, J.D.

Adjunct Assistant Professors of Clinical Occupational Therapy: Shawn Phipps, Ph.D., OTR/L; Susanne Roley, OTD, OTR/L

Adjunct Instructors of Clinical Occupational Therapy: Susan Bowles, OTD, OTR/L; Cynthia Burt, M.A., OTR/L; Remy Chu, B.S., OTR/L; Lisa Deshaies, M.A., OTR/L; Heidi Dombish, M.S., OTR/L; Janet Gunter, OTD, OTR/L; Dawn Hironaka, B.S., OTR/L; Pamela Roberts, M.A., OTR/L, FAOTA; Joan Surfus, M.A., OTR/L

Distinguished Emeritus Professor: Elizabeth J. Yerxa, Ed.D., LHD (Hon.), FAOTA

Emeritus Professor: Ruth Zemke, Ph.D., FAOTA

Degrees Offered

The USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy offers a Bachelor of Science in Occupational Therapy, a minor in Occupational Science, and a Master of Arts in Occupational Therapy. The Master of Arts in Occupational Therapy is offered for students continuing their education following their undergraduate degree in occupational therapy, for students whose first degree is in another field and also for certified occupational therapists seeking a post-professional degree. The division also offers the Doctor of Occupational Therapy (OTD) and the Ph.D. in Occupational Science. The USC Chan Division of Occupational Science and Occupational Therapy master's-level professional degree program is fully accredited by the Accreditation Council for Occupational Therapy Education®, c/o Accreditation Department, American Occupational Therapy Association, Inc., 4720 Montgomery Lane, Suite 200, Bethesda, Maryland 20814-3449, (301) 652-6611 x2914, acoteonline.org.

Entry into occupational therapy practice is at the graduate degree level only. In order to practice, students in the bachelor's program must earn an M.A. degree in Occupational Therapy, successfully complete a minimum of 24 full-time weeks of clinical fieldwork, sit for the National Board for Certification in Occupational Therapy® (NBCOT) exam and apply for a license (in most states including California).

Pi Theta Epsilon

Pi Theta Epsilon is the national honor society for occupational therapy students and alumni. This society recognizes and encourages superior scholarship among students enrolled in entry-level graduate programs of occupational therapy across the United States.

The Alpha Eta Chapter of Pi Theta Epsilon (PTE) at the University of Southern California selects candidates early in the spring semester of each year based on National PTE guidelines related to academic standing and students' potential for leadership in the profession.

Independent Health Professions at the Herman Ostrow School of Dentistry

USC Chan Division of Occupational Science and Occupational Therapy

Bachelor of Science

The undergraduate curriculum leads to the Bachelor of Science with a major in Occupational Therapy. Beginning fall 2015, students must apply to the major as incoming freshmen and will begin professional study during their junior year. Students enrolled at USC prior to fall 2015 may apply for junior entry to the program any time prior to May 15 of their sophomore year. Students majoring in occupational therapy can earn a USC master's degree in

occupational therapy with just one additional year instead of the traditional two years, substantially reducing their overall cost of education and preparing them sooner for the National Board Certification in Occupational Therapy® (NBCOT) examination. Successful completion of the Master of Arts degree and successful completion of a minimum of 24 full-time weeks of clinical fieldwork are required for eligibility to sit for the NBCOT examination. Certification from the board and licensure (most states) are required to practice as an occupational therapist. (See here for a description of the M.A. degree program.)

Admission Criteria and Application Procedures for Incoming Freshmen

See the Undergraduate Admission section of this catalogue for admission criteria and application procedures for the university.

Deadlines for Current USC Students

If enrolled at USC prior to fall 2015, sophomores may apply by May 15 for admission to begin the program in the fall of their junior year. The junior year entry option has very limited admissions availability each year and available spaces are not guaranteed.

Students admitted to USC after fall 2015 will not be eligible to apply for junior entry to the program.

Program Requirements

A total of 128 units is required for the Bachelor of Science degree. An occupational therapy major cannot count any 300-level OT course toward the B.S. degree.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge needed to become a well-educated person. This program requires six courses in different categories, plus writing, diversity and foreign language requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

Required Pre-Professional Courses

We recommend that you meet with an admissions counselor within the division in order to determine course work that can be taken at USC or could be transferred and substituted for required course work. Before taking the advanced professional courses you must have completed the pre-professional required courses:

- Within the last five years
- With a minimum GPA of 3.0 (pass/fail or grades below a C are not accepted)
- From an accredited junior college, four-year college or university
- Either in a classroom setting or online; however, anatomy must be completed in a classroom setting (refer to Course Work Taken Elsewhere)
- For a total of three or four semester units each (with the exception of medical terminology, which may be 1 or 2 units)

Required Pre-Professional Courses (USC course numbers are noted)

- Students who wish to transfer credit for courses taken at another institution must gain university approval:

PRE-PROFESSIONAL COURSES		UNITS
OT 200	Medical Terminology for Health Professions	1
SOCI 200	Introduction to Sociology, or	
ANTH 201	Principles of Human Organization	4
OT 251x	Across the Lifespan: Occupations, Health and Disability	4
OT 260	Human Functional Anatomy for the Occupational Therapist (with laboratory), or	
HBIO 301L	Human Anatomy (with laboratory)	3-4

OT 261	Human Physiology for Occupational Therapists, or	
BISC 307L	General Physiology	3-4
MATH 114	Foundations of Statistics, and	
PSYC 274L	Statistics, or	4
HP 340L	Health Behavior Statistical Methods, and	4
HP 350L	Health Behavior Research Methods, or	
BUAD 310	Applied Business Statistics	4
PSYC 360	Abnormal Psychology	4
A course in Gerontology or adult development (recommended but not required)		

Four-week intensive courses are offered by the division in human anatomy (OT 260) and human physiology (OT 261) from mid-May to mid-June (just prior to the start of summer professional courses) for students unable to complete those courses earlier. These courses are also offered fall and spring semesters.

Students may take OT 405L, OT 406L, OT 440L and OT 441L in the junior year, after having completed Human Anatomy and Lifespan Development. Human Physiology must be completed by fall of the junior year. The remaining pre-professional courses must be completed by the start of the senior year.

Required Professional Courses

Enrollment in professional occupational therapy courses is limited to junior and senior occupational therapy majors only.

REQUIRED PROFESSIONAL COURSES		UNITS
OT 405	Foundations: Occupation	2
OT 406L	Foundations: Creativity, Craft and Activity Analysis	2
OT 440L	Foundations: Kinesiology	2
OT 441L	Foundations: Neuroscience	2

Two of the following: OT 501L Practice Immersion: Adult Physical Rehabilitation (8), OT 502L Practice Immersion: Mental Health (8), or OT 503L Practice Immersion: Pediatrics (8) and

OT 511	Therapeutic Use of Self	2
OT 515	Neuroscience of Behavior	4
OT 518	Quantitative Research for Evidence-Based Practice	4
OT 521	Clinical Reasoning	3
OT 523	Communication Skills for Effective Practice	3
OT 525	Qualitative Research for Evidence-Based Practice	4

Scholastic Standards

Undergraduate occupational therapy students must maintain a GPA of at least 3.0 (A = 4.0) in all required OT courses and successfully complete the Graduate Record Examinations in order to continue into the master's (M.A.) program. If an undergraduate student's OT grade point average (GPA) falls below 3.0, or if the cumulative undergraduate GPA falls below 3.0 at the end of the fall semester of the senior year, continuance is not assured.

Advising

Advisement is available through the division.

Minor in Occupational Science

The division offers a minor in the discipline of occupational science. It is one of a select few programs in the world that offers undergraduates the opportunity to explore the fields of occupational science and occupational therapy.

Unlike other creatures, humans are innately driven to fill their time with interesting, meaningful activities, which scholars call “occupations.” That is, humans need to be occupied. These occupations have a profound impact on physical and mental health, one’s sense of well-being and the experience of quality of life. Occupational Science seeks to understand the precise nature and function of occupations and the critical effect of daily activity on human beings. Scientists working in the field examine questions such as: what is the relationship between childhood occupations and adult competency and achievement; what constitutes a healthy balance of work, rest and leisure; and what factors contribute to a good fit between a particular individual and his or her occupations.

The minor in occupational science requires a total of 20 units: a gateway course (OT 250) for 4 units plus 16 units selected from 11 upper division courses. It is open to all majors at USC. An occupational therapy major cannot count any 300-level OT course toward the B.S. degree.

REQUIRED GATEWAY COURSE		UNITS
OT 250	Introduction to Occupational Science and Occupational Therapy	4
16 ELECTIVE UNITS		UNITS
OT 251x	Across the Lifespan: Occupations, Health and Disability	4
OT 300	Occupational Expressions of Diverse Identities and Lifestyles	4
OT 310	Creativity Workshop	2
OT 312	Creating a Sustainable Lifestyle	2
OT 320	The Nature of Human Occupation: Form, Function, and Meaning	4
OT 325	The Brain: Mind, Body and Self	4
OT 330	Perspectives on the Daily Life of Families	4
OT 333	Sports Ethics	4
OT 350	Disability, Occupations, and the Health Care System	4
OT 355	Occupational Reconstructions and Social Transformations	2
OT 360	Creating the Self through Narrative: Acts of Life Story Production	4
OT 375	The Narrative Structure of Social Action: Narrative, Healing, and Occupation	4

Independent Health Professions at the Herman Ostrow School of Dentistry

The USC Chan Division of Occupational Science and Occupational Therapy

Master of Arts

The Master of Arts program is open to students with or without an undergraduate degree in occupational therapy. Students without a prior degree in occupational therapy take both the foundation courses and the advanced courses listed below. Students with a degree in occupational therapy may apply for Advanced Standing, reducing the units required for the degree from 80 units to 36 units (or 76 units to 32 units for the thesis option). All students must complete either the Thesis or Comprehensive Exam Option.

Admission Requirements

Applicants must have a bachelor’s degree from an accredited college or university; a minimum grade point average of 3.0 (A = 4.0); a minimum score of 153 on the verbal section, 144 on the quantitative section and a 3.5 on the analytical writing section of the Graduate Record Examinations taken within five years of application; three letters of recommendation and an autobiographical statement of purpose. A satisfactory score on the TOEFL or IELTS within two years of enrollment is a requirement for most international students.

Those with a baccalaureate degree who also have graduated from a World Federation of Occupational Therapy (WFOT) approved program in occupational therapy may apply for Advanced Standing.

Those with a baccalaureate degree in a field other than occupational therapy also must have completed all of the following prerequisites:

- Within five years of enrollment
- Prior to the start of the program with a minimum GPA of 3.0 (pass/fail or grades below a C are not accepted)
- From an accredited junior college, college or university
- Either in a classroom setting or online; however anatomy must be completed in a classroom setting
- With each course totaling three or four semester units (with exception of medical terminology which may be 1 or 2 units) as follows (course numbers refer to USC courses, but prerequisites can be taken at any accredited college or university):

PREREQUISITES		UNITS
OT 200	Medical Terminology for Health Professions	1
SOCI 200	Introduction to Sociology, or	
ANTH 201	Principles of Human Organization	4
HBIO 301L*	Human Anatomy (with laboratory)	4
OT 261*	Human Physiology for Occupational Therapists, or	
BISC 307L	General Physiology	3-4
OT 251	Across the Lifespan: Occupations, Health, and Disability	4
OT 260	Human Functional Anatomy for the Occupational Therapist (with laboratory)	3
MATH 114	Foundations of Statistics, and	4
PSYC 274L	Statistics, or	
HP 340L	Health Behavior Statistical Methods, and	4
HP 350L	Health Behavior Research Methods, or	
BUAD 310	Applied Business Statistics	4
PSYC 360	Abnormal Psychology	4
A course in Gerontology or adult development (recommended but not required)		

**If anatomy and physiology are combined, students must take two sequential semesters with a laboratory each semester (6–8 units).*

Four-week intensive courses are offered by the division in human anatomy (OT 260) and human physiology (OT 261) from mid-May to mid-June (just prior to the start of summer professional courses) for students unable to complete those courses earlier. These courses are also offered fall and spring semesters.

Application Procedures

For those with a baccalaureate degree in occupational therapy: applications are accepted at any time, preferably by February 15 for fall admission.

For those with a baccalaureate degree in a field other than occupational therapy: applications for early decision are due by November 30; all other applications are due February 15 for summer admission.

Applications received after the February 15 deadline are considered on a space-available basis.

Application materials include: 1) USC Online Graduate Application with Division Supplemental Application; 2) OTCAS online application; 3) three letters of recommendation; 4) transcripts from all colleges/universities attended; 5) results of the aptitude test of the Graduate Record Examinations; and 6) TOEFL or IELTS scores if required. A personal interview may be requested. Please see the division Website for the most up-to-date application procedures.

International Students

Students educated outside the United States must have their credentials evaluated by the Office of Admission before their application to the division can be reviewed. See the Admission section of this catalogue. International students must demonstrate competency in English, as measured by the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Degree Requirements

The M.A. degree is under the jurisdiction of the USC Graduate School. Students should also refer to the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School.

Requirements include: GPA of 3.0 in all course work attempted and all course work applied to the degree; at least two-thirds of units applied to the degree must be at the 500 level or higher.

Students without a prior degree in occupational therapy take both the foundation courses and the advanced courses listed below. OT 405, OT 406, OT 440 and OT 441 are foundational courses that students are required to pass before they may advance to the advanced courses in the professional program. Students must complete all subsequent courses in the professional program on a full-time basis and in sequence, except for students requiring disability accommodations.

Students with a degree in occupational therapy may apply for Advanced Standing, reducing the units required for the degree from 80 units to 36 units (or from 76 units to 32 units for the thesis option) and may choose between on campus or online format. Students who have completed a National Board of Certification of Occupational Therapists (NBCOT, www.nbcot.org) recognized fieldwork experience can waive OT 586 Clinical Internship with Seminar. All students must complete either the thesis or comprehensive exam option.

Thesis Option

In addition to the required courses, 4 units of electives at 500 level or above, and 4 units of OT 594ab Master's Thesis are required. Acceptance of the thesis by the master's committee and the university completes the degree.

Comprehensive Examination Option

In addition to the required courses, 4 units of electives and 8 units of occupational therapy electives are required. All electives must be 500 level or above. Successful performance on a written comprehensive examination administered on campus each fall and spring semester completes the degree.

REQUIRED COURSES

UNITS

Foundation Core Courses

OT 405	Foundations: Occupation	2
OT 406L	Foundations: Creativity, Craft and Activity Analysis	2
OT 440L	Foundations: Kinesiology	2
OT 441L	Foundations: Neuroscience	2
OT 501L	Practice Immersion: Adult Physical Rehabilitation	8
OT 502L	Practice Immersion: Mental Health	8
OT 503L	Practice Immersion: Pediatrics	8
OT 511	Therapeutic Use of Self	2
OT 521	Clinical Reasoning	3
OT 523	Communication Skills for Effective Practice	3
OT 537	Occupation-Centered Programs for the Community	4

Advanced Core Courses (Required for Advanced Standing Students)

OT 515	Neuroscience of Behavior	4
OT 518	Quantitative Research for Evidence-Based Practice, or	
OT 581	Quantitative Research for the Practicing Clinician	4

OT 525	Qualitative Research for Evidence-Based Practice	4
OT 534	Health Promotion and Wellness	2
OT 538	Current Issues in Practice: Adulthood and Aging	2
OT 540	Leadership Capstone	2
OT 545	Advanced Seminar in Occupational Science	2
OT 586*	Clinical Internship with Seminar	4

**May be waived for those who have completed fieldwork elsewhere*

Degree Requirements for Online MA

The degree requirements for the Online MA are the same as the resident program with the exception of the electives. For the Thesis Option, students must take one of the following electives: OT 500ab; OT 564; or OT 583 as well as 4 units of OT 594ab. For the Comprehensive Exam Option, students must take all three elective courses.

OT 500ab	Clinical Problems in Occupational Therapy	4
OT 515	Neuroscience of Behavior	4
OT 518	Quantitative Research for Evidence-Based Practice, or	
OT 581	Quantitative Research for the Practicing Clinician	4
OT 525	Qualitative Research for Evidence-Based Practice	4
OT 534	Health Promotion and Wellness	2
OT 538	Current Issues in Practice: Adulthood and Aging	2
OT 540	Leadership Capstone	2
OT 545	Advanced Seminar in Occupational Science	2
OT 564	Sensory Integration	4
OT 583	Lifestyle Redesign	4

Independent Health Professions at the Herman Ostrow School of Dentistry

USC Chan Division of Occupational Science and Occupational Therapy

Doctor of Occupational Therapy

The Doctor of Occupational Therapy (OTD) is a post-professional degree program that provides graduates with advanced knowledge and skills in one of four leadership concentrations: 1) advanced clinical practice; 2) policy and administrative leadership; 3) educational leadership; and (4) research expertise. OTD students graduate from the program with a strong foundation in occupational science as well as in-depth mentored residency experience. The OTD prepares graduates to secure positions as expert clinicians in specialty or emerging practice areas, as administrative leaders within health care organizations, as non-tenure track faculty in institutions of higher education, and as contributors to clinical research teams.

Admission Requirements

Applicants for admission to the OTD program are expected to have at least a baccalaureate degree from an accredited college or university and must be certified or licensed as an occupational therapist or be eligible to sit for the National Board for Certification in Occupational Therapy® (NBCOT) examination at time of matriculation. Domestic students not certified upon matriculation must pass the NBCOT examination by the end

of the first semester of the program to maintain enrollment. At the discretion of the OTD Program Director, some international students may not be required to obtain NBCOT certification. A minimum GPA of 3.0 (A = 4.0) and a minimum score of 153 on the Verbal section, a minimum score of 144 on the Quantitative section, and a minimum of 3.5 on the Analytical Writing section of the Graduate Record Examination (GRE) must be achieved within 5 years of application. Applicants must have earned a minimum cumulative 3.0 GPA in the 400- and 500-level required courses. At least three letters of reference, an autobiographical statement of purpose and a current resume are required. Applicants' leadership potential, previous academic record, clinical experiences and professional accomplishments will also be considered.

International Students

Students educated outside the United States must have graduated from a program approved by the World Federation of Occupational Therapists (WFOT). USC maintains additional admissions requirements for international students (see the Admission section of this catalogue), including English language competence as measured by the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination.

Application Procedures

Applications are accepted on a continuous basis. For consideration for fall semester admission, applications must be received by October 15 for maximum funding consideration. Applications received after October 15 will be considered on a space-available basis. Application requirements include: 1) USC Online Graduate Application; 2) USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy online supplemental application for graduate admission; 3) three letters of reference; 4) autobiographical statement of purpose; 5) transcripts from all colleges/universities attended; and 6) GRE General Test scores.

Degree Requirements

Satisfactory completion of 60 units beyond the baccalaureate degree is required. Students with a Master's degree in Occupational Therapy may apply for Advanced Standing, which requires 36 units beyond the first graduate degree. These students do not take the 24 units of foundation courses listed below. If not admitted with advanced standing, a student may receive partial credit for course work taken for a previous graduate degree.

The degree is awarded under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue, for general regulations. All courses applied toward the degree must be accepted by the USC Graduate School.

Course Requirements

REQUIRED OCCUPATIONAL THERAPY FOUNDATION COURSES (24 UNITS REQUIRED)		UNITS
OT 515	Neuroscience of Behavior	4
OT 518	Quantitative Research for Evidence-Based Practice, or	
OT 581	Quantitative Research for the Practicing Clinician	4
OT 525	Qualitative Research for Evidence-Based Practice	4
OT 534	Health Promotion and Wellness	2
OT 538	Current Issues in Practice: Adulthood and Aging	2
OT 540	Leadership Capstone	2
OT 545	Advanced Seminar in Occupational Science	2
OT 500 level Electives		4
REQUIRED OCCUPATIONAL SCIENCE ADVANCED COURSES (8 UNITS REQUIRED)		UNITS
OT 620	Current Issues in Occupational Science and Occupational Therapy	4
OT 621	Occupational Therapy Leadership: Contemporary Issues	4

Elective Courses (4 units required)

Students will complete a minimum of 4 course units at the 500-level or higher selected from courses within or outside the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy.

Residency Requirement (24 units required)

Students will complete 24 units of OT 686 residency. The residency ensures that graduates of the OTD program demonstrate competence in one of the following leadership concentrations: 1) advanced clinical practice; 2) clinical research; 3) policy and administration; and 4) pedagogy.

At least 20 units applied toward the OTD must be successfully completed before enrolling in OT 686 unless advanced standing has been granted. Students may complete their residency over three consecutive semesters (6 units, 6 units and 12 units) or over four consecutive semesters. It is highly recommended that one semester of OT 686 be enrolled full-time (12 units without any other simultaneous course enrollment). Full-time residency ensures the opportunity for full immersion in residency. Faculty must approve each student's residency plan prior to enrollment. OTD residency provides students the opportunity for mentorship by experts in their OTD leadership concentration (e.g., a master clinician, a world-class occupational science researcher, a leader in professional policy or administration, or a faculty member with at least three years of academic experience).

Portfolio Requirement

In the final semester of enrollment, each student will submit a portfolio demonstrating competence in his or her chosen leadership concentration. The final portfolio will include documentation of both written and oral presentation skills and expertise as designated in the residency plan.

Clinical Experience Criterion

If the student has less than three years of clinical experience as a registered and/or licensed occupational therapist at time of admission, he or she may be required to complete at least 8 units of clinical occupational therapy courses, which may include:

OT 500abc	Clinical Problems in Occupational Therapy	2-4 each
OT 560	Contemporary Issues in School-Based Practice	4
OT 564	Sensory Integration	4
OT 572	Ergonomics	4
OT 574	Enhancing Motor Control for Occupation	4
OT 583	Lifestyle Redesign	4
OT 590	Directed Research	1-12
OT 610	Sensory Integrative Dysfunction	4

Independent Health Professions at the Herman Ostrow School of Dentistry

USC Chan Division of Occupational Science and Occupational Therapy

Doctor of Philosophy

The Ph.D. in Occupational Science educates individuals to engage in the scientific study of human occupation, the purposeful activities that constitute our life experiences. This important new science is chiefly concerned with the unique capacity of humans to develop adaptive skills, such as tool use and related occupational behaviors, and to choose and orchestrate daily occupations. It also seeks to understand the function, structure and interrelationship of these occupations and their impact on individuals and institutions.

The focus on occupation distinguishes this program from closely-related disciplines such as psychology, sociology

and anthropology. The program emphasizes the development of research skills and encourages students to organize and synthesize knowledge to contribute to occupational science theory, as opposed to therapeutic application.

Admission Requirements

Applicants for admission to the Ph.D. program are expected to have a baccalaureate degree in an appropriate field, such as one of the biological or social sciences or occupational therapy, with a minimum GPA of 3.0 (A = 4.0) and a minimum score of 156 on the Verbal section, a minimum score of 146 on the Quantitative section and a minimum score of 3.5 on the Analytical Writing section of the Graduate Record Examination (GRE) within 5 years of application. At least three academic letters of reference must also be submitted. Other considerations include evidence of academic potential based on master's level study (if relevant), research skills and interest, and a statement of purpose. International students must demonstrate competency in English, as measured by the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination.

Degree Requirements

This degree is awarded under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the USC Graduate School.

Course Requirements

Satisfactory completion of 60 units beyond the baccalaureate degree is required, including the following courses:

REQUIRED CORE COURSES		UNITS
OT 640	Conceptual Foundations of Occupational Science	4
OT 641	The Nature of Occupation	4
OT 660	Research Practicum (2 units — six semesters)	12
REQUIRED CORE ELECTIVES (SELECT 5)		
OT 642	Therapeutic Uses of Self: Psychodynamic Perspectives	4
OT 643	Meaningful Engagement in Everyday Life	4
OT 644	Foundations of Research on Activity and Health	4
OT 645	Narrative, Healing and the Culture of Biomedicine	4
OT 646	Intersections of Occupational Science and Human Development	4
OT 653	Play and Occupation	4
OT 655	Work and Leisure	4

40 units of OT core courses must be completed. Twenty of those units include the required courses OT 640 (4 units), OT 641 (4 units) and OT 660 (12 units). The remaining 20 units are to be selected from the other OT 600-level classes.

Those students who also wish to participate in clinical practice in occupational therapy may opt to complete a master's degree in occupational therapy. Such students are required to complete the requirements for that degree, as well as the occupational therapy undergraduate major courses if they are not registered occupational therapists or eligible for registration prior to study.

Cognate Requirement

Completion of a minimum of 12 units in a topic area such as one of the following is required: quantitative research approaches, qualitative research approaches, neuroscience, social development, life span development or gerontology.

Research Practicum

Each student will enroll in 2 units of OT 660 Research Practicum in Occupation per semester for six consecutive

semesters, for a total of 12 units. Students are required to begin enrolling in OT 660 in their first semester of doctoral study. In this practicum the student will develop research skills by working as part of a research team under the direction of a faculty member.

Screening Procedures

Passing the screening is prerequisite to continuation in the doctoral program. Directions for obtaining and filing the Report on Ph.D. Screening Procedures are found in the Graduate School section of this catalogue.

Dissertation Enrollment

Doctoral students must submit a dissertation according to the policies and procedures described in the Graduate School section of this catalogue. Registration in OT 794 Doctoral Dissertation for a minimum of 4 units (2 units in each of two consecutive semesters) is required.

Summary of All Course Requirements

Required core courses are OT 640 (4), OT 641 (4), OT 660 (12) for a total of 20 units.

Required electives are five 600-level OT courses for a total of 20 units.

Cognate courses are a minimum total of 12 units.

Dissertation requires 2 units per semester for at least two semesters for a minimum total of 4 units.

Additional 4 units can include 4 further units of dissertation or cognate.

Total: 60 units

Foreign Language or Research Skills

The Ph.D. in Occupational Science does not require the demonstration of competence in a foreign language. However, each student is expected to achieve expertise, as defined by the student's qualifying exam committee, in either qualitative or quantitative research methods through participation in course work and the research practicum.

Qualifying Exam Committee

The qualifying exam committee is composed of five faculty members. Three members of the committee must be regular faculty from the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy. One member must be from outside the division. Complete regulations for establishing a qualifying exam committee are found in the Graduate School section of this catalogue.

Qualifying Examination

The qualifying examination is comprehensive in nature and requires the student to demonstrate a grasp of content from the core courses and the cognate area. The examination is both written and oral and is set and administered by the student's qualifying exam committee. Refer to the Graduate School section of the catalogue for additional information about the qualifying exam.

Dissertation Committee

The dissertation committee is composed of at least three faculty members. The chair of the committee and at least one additional member of the committee must be regular faculty from the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy. One member must be from outside the division. Complete regulations for establishing a dissertation committee are found in the Graduate School section of this catalogue.

Dissertation

Doctoral students must submit a dissertation based on students' original research according to the policies and procedures of the Graduate School section of this catalogue. Upon approval of the preliminary copy of the dissertation by all members of the dissertation committee, the candidate must pass an oral defense of the dissertation. Upon successful completion of the oral defense and revisions, the manuscript is approved and the

committee recommends the candidate to the Graduate School for the Ph.D.

Teaching

To prepare students for anticipated roles as faculty members, a teaching component is incorporated into the program. Students who receive teaching assistantships will be required to assist in relevant teaching assignments for a minimum of one academic year. Those who do not receive teaching assistantships are required to present a minimum of six lectures or laboratory sessions.

Additional Information

Further information about the baccalaureate, master's and doctoral programs can be obtained by writing or calling the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy, 1540 Alcazar Street (CHP 133), Los Angeles, CA 90089-9003; (323) 442-2850, toll free (866) 385-4250, or by sending email to [✉ info@chan.usc.edu](mailto:info@chan.usc.edu). Information regarding the USC Chan Division of Occupational Science and Occupational Therapy is available at chan.usc.edu.

Independent Health Professions at the Herman Ostrow School of Dentistry

USC Chan Division of Occupational Science and Occupational Therapy

Courses of Instruction

OCCUPATIONAL SCIENCE AND OCCUPATIONAL THERAPY (OT)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

OT 105g Culture, Medicine and Politics (4, Fa) (Enroll in ANTH 105g)

OT 200 Medical Terminology for Health Professions (1) Foundation of medical terminology and hospital abbreviations useful for practice in health care.

OT 220 Lifestyle Design: Introduction to Occupational Therapy (2, FaSp) Introduction to theoretical concepts concerning the relationship of engagement in activities (occupations) to health and well being. Application of these perspectives to students' own lives.

OT 250 Introduction to Occupational Science and Occupational Therapy (4) Introduction to concept of occupation and overview of human drive for meaningful activity; impact of occupations on health and well-being; analysis of personal occupational patterns; selected therapeutic applications.

OT 251x Across the Lifespan: Occupations, Health and Disability (4, FaSp) Exploration of the transformative power of occupation throughout the lifespan for all individuals.

OT 260 Human Functional Anatomy for the Occupational Therapist (3, Sm) An anatomical survey of the human musculoskeletal, nervous, cardiovascular, respiratory, digestive and urinary system. *Recommended preparation:* introductory undergraduate course in biology.

OT 261 Human Physiology for Occupational Therapists (3, FaSp) Provides a general overview of human physiology with special emphasis on physiologic systems supporting internal homeostatic mechanisms and human motion applicable for occupational therapists. Open only to OT majors. *Recommended preparation:* undergraduate biology course.

OT 300 Occupational Expressions of Diverse Identities and Lifestyles (4) Exploration of the diverse

ways occupational practices become central to identity, reify standard social ideologies, and are manipulated to redress conventional standards.

OT 310 Creativity Workshop (2, FaSpSm) Theories and practice of the creative process in varied media, genres and occupations. Explores creativity in the arts, sciences, professions, evolution, daily life, and culture.

OT 312 Creating a Sustainable Lifestyle (2) Scientists and policymakers advocate lifestyle changes as crucial to solving the environmental crisis. Investigation into the development of habits that promote environmental sustainability and personal wellbeing.

OT 320 The Nature of Human Occupation: Form, Function, and Meaning (4) The complex nature of human occupation is covered from an interdisciplinary perspective. Emphasis is on how occupation contributes to human experience in a lived world.

OT 325 The Brain: Mind, Body, and Self (4, FaSpSm) Exploration of neuroscience as it impacts everyday living, from the fundamentals of neurons and synapses, to the neural basis of language, empathy, and social interaction.

OT 330 Perspectives on the Daily Life of Families (4) Examines family structures and processes, the occupational dimensions of families, and the meanings embedded in the acts of daily life of contemporary families.

OT 333 Sports Ethics (4, FaSp) Critically examines ethical issues central to the world of sports that range from matters of fair play and cheating to performance-enhancing drugs and gene-doping.

OT 350 Disability, Occupations, and the Health Care System (4) Exploration of the ways in which able-bodyism, sexism, racism, classism and homophobia contribute to occupational opportunities or barriers and weave their way into health care.

OT 355x Occupational Reconstructions and Social Transformations (2, FaSp) The use of occupations – meaningful, purposeful activities – to restore identity, agency, health, well-being, skills, and political power to populations in problematic situations, such as wars and natural disasters.

OT 360 Creating the Self through Narrative: Acts of Life Story Production (4) Analysis of life stories, life histories, and testimonies in social interactions, texts, and films. Life stories are an occupation to re-create the “Self” in response to conflict and change.

OT 375 The Narrative Structure of Social Action: Narrative, Healing and Occupation (4) Narrative as guide and structure of practical action. Special emphasis on chronic illness and disability and narrative structure of clinical interactions.

OT 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

OT 405 Foundations: Occupation (2, FaSm) Introduction to basic tenets of occupational therapy history and practice, the profession’s language, and foundations of occupational science; incorporates experience and self-analysis of occupation. Open only to upper division and master’s level Occupational Therapy majors.

OT 406L Foundations: Creativity, Craft and Activity Analysis (2, FaSm) Exploration of craftsmanship in both historical and contemporary contexts; engagement in the craft experience to encourage creativity and to develop proficiency in analysis of performance. Open only to upper division, master’s and professional OT majors.

OT 440L Foundations: Kinesiology (2, FaSpSm) Review of joint and muscle structure and function; application of basic biomechanical, neuromuscular and musculoskeletal principles to the analysis of everyday activities and therapeutic interventions. Open only to upper division and master’s occupational therapy majors.

OT 441L Foundations: Neuroscience (2, FaSpSm) Application of basic neural function to the analysis of daily living tasks and activities; review of pathological conditions that interfere with performance in occupation.

Open only to upper division and master's occupational therapy majors.

OT 490x Directed Research (1-8, max 12, FaSp) Individual research and readings. Not available for graduate credit. Open only to OT majors.

OT 499 Special Topics (2-4, max 8, FaSpSm) Course content to be selected in occupational therapy and occupational science.

OT 500abc Clinical Problems in Occupational Therapy (2-4, 2-4, 2-4, FaSpSm) Specific applications of occupational therapy practice in varied clinical/health settings. Seminar to integrate theory with application of intervention principles for various populations. Graded CR/NC.

OT 501L Practice Immersion: Adult Physical Rehabilitation (8, FaSp) Scientific and theoretical underpinnings and knowledge and skills necessary for occupational therapy evaluation and intervention in adult rehabilitation and geriatrics; incorporates related Level I Fieldwork. (Duplicates credit in former OT 401.) Open only to Occupational Therapy majors.

OT 502L Practice Immersion: Mental Health (8, FaSp) Scientific and theoretical underpinnings and knowledge and skills necessary for occupational therapy evaluation and intervention in mental health practice; incorporates related Level I Fieldwork. (Duplicates credit in former OT 402.) Open only to Occupational Therapy majors.

OT 503L Practice Immersion: Pediatrics (8, FaSp) Scientific and theoretical underpinnings and knowledge and skills necessary for occupational therapy evaluation and intervention in pediatrics; incorporates related Level I Fieldwork. (Duplicates credit in former OT 403.) Open only to Occupational Therapy majors.

OT 511 Therapeutic Use of Self (2, Fa) Exploration of efficacy, therapeutic use of self, empathy and mindfulness; development of self-awareness to support the art, craft and skill of effective therapeutic relationships. (Duplicates credit in former OT 410.) Open only to Occupational Therapy majors.

OT 515 Neuroscience of Behavior (4, Fa) Foundation for understanding neural functions involved in typical/atypical behaviors; review of neural circuitry, experimental methods, basic behavioral systems, higher order cognitive functions and associated disorders. (Duplicates credit in former OT 451.) Open only to Occupational Therapy majors.

OT 518 Quantitative Research for Evidence-Based Practice (4, Fa) Traditions and methods of quantitative research; emphasis on formulation of clear clinical questions; finding, evaluating, and applying evidence to a clinical problem; includes journal club. (Duplicates credit in former OT 480.) Open only to Occupational Therapy majors.

OT 521 Clinical Reasoning (3, Sp) Dynamic look at creation and application of professional knowledge and expertise; examines interrelationship between theory and practice; incorporates narrative and illness experiences in clinical reasoning. (Duplicates credit in former OT 411.) Open only to Occupational Therapy majors.

OT 523 Communication Skills for Effective Practice (3, Fa) Principles of written, verbal and non-verbal communication with professionals, clients and families, from a personal and professional perspective; group interventions; interview skills; advocacy as communication. (Duplicates credit in former OT 430.) Open only to Occupational Therapy majors.

OT 525 Qualitative Research for Evidence-Based Practice (4, Sp) Traditions and methods of qualitative research; development of skills for research design, implementation and dissemination; critique of qualitative research for evidence-based practice and occupational science. (Duplicates credit in former OT 470.) Open only to Occupational Therapy majors.

OT 534 Health Promotion and Wellness (2, Fa) Examination of relationship of occupation to health, well-being, participation; critical thinking about lifestyle factors influencing occupational engagement; occupational science and wellness in occupational therapy practice. (Duplicates credit in former OT 504.) Open only to Occupational Therapy majors.

OT 537 Occupation-Centered Programs for the Community (4, Fa) Development of a proposal for new or extended services; includes trends analysis, needs assessment, literature review, marketing plan, mock funding request, program evaluation and presentation. (Duplicates credit in former OT 570.) Open only to Occupational Therapy majors.

OT 538 Current Issues in Practice: Adulthood and Aging (2, Fa) Exploration of adulthood, aging and occupation; current topics related to aging population and occupational therapy to promote health and participation throughout the lifespan. (Duplicates credit in former OT 508.) Open only to Occupational Therapy majors.

OT 540 Leadership Capstone (2, Sp) Professional capstone in leadership, advocacy, ethical reasoning, professional behavior, and public policy as it impacts the practice of occupational therapy; independent professional externship. (Duplicates credit in former OT 580.) Open only to Occupational Therapy majors.

OT 545 Advanced Seminar in Occupational Science (2, FaSp) Advanced analysis of occupational science concepts including dimensions of occupation and the impact of occupation on health and wellbeing; factors associated with participation in occupation at the individual, community and global levels. (Duplicates credit in former OT 585.) Open only to Occupational Therapy majors.

OT 560 Contemporary Issues in School-Based Practice (4, FaSp) Current issues in school-based occupational therapy evaluation, ongoing assessment and intervention. Topics include successful collaboration in inclusive classrooms and on IFSP and IEP teams. Open only to OT majors. Graded CR/NC.

OT 561 Occupational Therapy in Acute Care (4, Sp) Knowledge and skills for occupational therapy practice in acute care settings using a systems-based approach; includes an experiential learning component at Keck Hospital of USC. Open only to Occupational Science and Occupational Therapy students. Graded CR/NC.

OT 562 Advanced Hand Rehabilitation and Certification (PAMs) (4, Sp) Evidence-based and occupation-based practice for hand and upper extremity conditions; application of PAMs as preparatory for occupation. Applicable toward California educational requirements for advanced practice. *Corequisite:* OT 573. Open only to Occupational Science and Occupational Therapy students. Graded CR/NC.

OT 564 Sensory Integration (4, Sp) Comprehensive overview of sensory integration theory and basic intervention principles. A case-based approach will facilitate the integration of sensory integration, evidence-based practice and occupational science. Open only to OT majors. Graded CR/NC.

OT 571 Assistive Technology (4, Sp) Principles of assessment, selection, training, and follow-up with clients in the use of assistive technologies to enable and enhance participation in a meaningful occupation. Open only to OT majors. Graded CR/NC.

OT 572 Ergonomics (4, Sp) Focus on the effects of physical design in the workplace on users' injury rate, behavior, performance and stress levels. Intervention for repetitive motion included. Open only to OT majors. Graded CR/NC.

OT 573 Hand Rehabilitation (4, Fa) Occupation-based evaluation and intervention for individuals with acute and chronic hand disorders. Topics include scar management, splinting, peripheral nerve injury, wound healing and physical agent modalities. Open only to OT majors. Graded CR/NC.

OT 574 Enhancing Motor Control for Occupation (4, FaSp) Laboratory examining approaches to assessment and remediation of motor control following upper motor neuron lesions. An occupation-based approach to Neurodevelopmental Treatment (NDT) will be emphasized. Open only to OT majors. Graded CR/NC.

OT 575 Dysphagia Across the Lifespan: Pediatrics through Geriatrics (2, Sp) A comprehensive investigation of the anatomy and physiology of normal and abnormal swallowing. Didactic and hands-on study of assessment and treatment interventions will be addressed. Open only to OT majors. Graded CR/NC.

OT 576 Universal Design (4, Fa) Examination of the concepts and principles of universal design and the

benefits of the approach for people with disabilities and for all individuals. Open only to Occupational Therapy and Occupational Science majors. Graded CR/NC.

OT 577 Seminar in Occupational Therapy (2, Sp) Occupational therapy and the health care system. (Duplicates credit in former OT 505.) Open only to Occupational Therapy majors. Graded CR/NC.

OT 578 Therapeutic Communication for the Healthcare Practitioner (2) Explores the principles and practice of therapeutic communication including motivational interviewing, mindfulness, and cognitive behavioral therapy. Graded CR/NC. Not open to undergraduates.

OT 581 Quantitative Research for the Practicing Clinician (4, FaSp) Traditions and methods of quantitative research for practicing clinicians; emphasis on formulation of clear clinical questions; finding, evaluating, and applying evidence to a clinical problem. Open only to occupational therapy majors.

OT 583 Lifestyle Redesign (4, Sp) Seminar examining occupations and lifestyle redesign as a contribution to health and well-being. Topics include therapeutic process, needs assessment, design and marketing of lifestyle modules. Open only to OT majors. Graded CR/NC.

OT 584 Clinical Applications of Telehealth Technologies in OT (2, Sp) Interactive course exploring the history of telehealth technologies; includes definitions, care models, remote services, applications, activity monitoring devices, technology enabled therapy, legislation, reimbursement. Open only to Occupational Science and Occupational Therapy graduate students. Graded CR/NC.

OT 585 Advanced Seminar in Occupational Science (2, FaSp) Advanced analysis of occupational science concepts including dimensions of occupation and the impact of occupation on health and wellbeing; factors associated with participation in occupation at the individual, community and global levels. Open only to occupational therapy majors.

OT 586 Clinical Internship with Seminar (1-2, max 6, FaSpSm) Clinical internship to qualify for professional certification. Seminar to integrate theory with application of treatment principles for various populations. (Duplicates credit in former OT 486.) Open only to Occupational Therapy majors. Graded CR/NC.

OT 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. Open only to OT majors.

OT 594abz Master's Thesis (2-2-0, FaSp) Credit on acceptance of thesis. Graded IP/CR/NC. Open only to OT majors.

OT 599 Special Topics (2-4, max 8, FaSpSm) Recent developments in occupational therapy and occupational science.

OT 610 Sensory Integrative Dysfunction (4, FaSpSm) Differential evaluation of sensory integrative dysfunction; theory and procedure for enhancing the processing of sensory data by children with learning and behavior disorders. *Prerequisite:* admission by advance application and instructor's approval only; must be certified as an occupational or physical therapist.

OT 620 Current Issues in Occupational Science and Occupational Therapy (4) Review of current occupational science research as it is applied to practice; examination of leadership opportunities; development of proposal focusing on chosen area of study. Open only to occupational therapy doctoral students. *Prerequisite:* OT 585.

OT 621 Occupational Therapy Leadership: Contemporary Issues (4) Examination of themes in occupational therapy related to power, confidence, and identity; development of leadership skills; analysis of the impact of policy and advocacy on occupational therapy. Open only to occupational therapy doctoral students.

OT 640 Conceptual Foundations of Occupational Science (4, FaSp) Analysis of the conceptual foundations and methodological orientations for occupational science, understandings of disciplinary perspectives, formulation of theoretical arguments, and the interpretation of research data.

OT 641 The Nature of Occupation (4, FaSp) Theoretical and historical foundations for the study of occupation, engagement in living and learning in everyday life.

OT 642 Therapeutic Uses of Self: Psychodynamic Perspectives (4, FaSp) Survey of the diversity of analytic conceptions of subjectivity and intersubjectivity. Emphasis on the way these ideas influence the notion of therapeutic efficacy within Occupational Science.

OT 643 Meaningful Engagement in Everyday Life (4) Exploration of the subjective experience of meaningful engagement in work, play, and the occupational pursuits of everyday life, drawing on contributions from the social sciences.

OT 644 Foundations of Research on Activity and Health (4, FaSp) Examination of effectiveness and efficacy research, study design and methodology, dimensions of adaptation and research methods through the lens of two division-based research programs.

OT 645 Narrative, Healing and the Culture of Biomedicine (4, FaSp) Introduction to narrative as analytic framework for considering chronic illness, disability, occupation, and the moral and cultural influences on the clinical reasoning of health professionals.

OT 646 Intersections of Occupational Science and Human Development (4, FaSp) Analysis of occupational science perspectives related to human development and participation in sociocultural practices and examination of developmental theories and their relationship to occupational science.

OT 647 Producing New Knowledge in Occupational Science (4, Sp) Problems, theory, methods and contexts of research in occupational science, as a discipline that seeks to understand, explain, and promote human flourishing. *Prerequisite:* OT 640; *recommended preparation:* at least one advanced course in qualitative, quantitative, or mixed methods for research. Open only to doctoral students.

OT 650 Development of Adaptive Skills (4, Fa) Critical analysis of occupation as means and product of human adaptation. Adaptive skill development from traditional and occupational science approaches. Research methods and results.

OT 655 Work and Leisure (4, Sp) Ontogenesis and phylogenesis of work and leisure. Systems view of person/environmental interactions affecting competence and satisfaction with activity. Occupation and the need for mastery.

OT 660 Research Practicum (2, max 12) Experiential learning through immersion in one or more externally funded research groups in the Division, enabling intense participation in multi-skilled research groups. Graded CR/NC. Open only to Occupational Therapy and Occupational Science majors.

OT 686 Residency (6 or 12, max 24, FaSpSm) Residency involving development, administration, evaluation, or policy formulation for occupation-centered programs in clinical or community settings. Development of portfolio for professional doctorate. Open to OT majors only. Graded CR/NC.

OT 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. Open only to OT majors.

OT 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSp) Credit on acceptance of dissertation. Graded IP/CR/NC. Open only to OT majors.

USC Gould School of Law

Paige Smith '15 studies criminal law at the Asa V. Call Law Library. At the USC Gould School of Law, which has been in the practice of legal education for more than 100 years, students take law courses designed to challenge them to pursue transformative solutions.

USC Gould School of Law

The USC Gould School of Law provides a forward-looking, interdisciplinary and inter-professional legal education guided by nationally renowned professors and energized by an engaged and collegial student body. As one of the most diverse of the nation's top law schools, USC Gould is made up of students from throughout the country and around the world whose ideas and experiences enrich the learning process and provide new perspectives on the law. Through close collaboration, interdisciplinary academic training and hands-on application of skills, students acquire the experiences and knowledge necessary to succeed as leaders in a global environment.

USC Gould alumni are partners in the world's largest law firms, CEOs and presidents of multimillion-dollar companies, and leaders in government and public service organizations. Since its founding in 1900, the school has produced hundreds of judges on state and federal courts and elected officials ranging from mayor of cities large and small to a United States senator.

Associate Professors of Lawyering Skills: Elizabeth A. Carroll, J.D.; Catherine Coleman, J.D.; Rebecca S. Lonergan, J.D.; Julie A. Ryan, J.D.; Susan C. Wright, J.D.

Professor of the Practice of Law: Clare Pastore, J.D.

Emeritus Professors: Marshall Cohen, M.A., M.A. (Oxon.) (Philosophy); Edward J. Finegan, Ph.D. (Linguistics); Larry G. Simon, LL.B. (Herbert W. Armstrong Professor of Constitutional Law, Emeritus); W. David Slawson, M.A., LL.B. (Torrey H. Webb Professor of Law, Emeritus); Christopher D. Stone, J.D., LL.D. (Hon.)* (J. Thomas McCarthy Trustee Chair in Law, Emeritus)*

*Clinical Emeritus Professors: Lee W. Campbell, J.D.; Noel M. Ragsdale, J.D.**

**Recipient of university-wide or school teaching award.*

Degree Programs

Juris Doctor

The Juris Doctor (J.D.) is the basic law degree. To obtain the degree, full-time attendance for six semesters is

required. During the first year, the student takes a required curriculum of basic courses that examines fundamental legal institutions and addresses legal problems relevant to today's society and the modern practice of law. During the second and third years the student must complete a writing requirement and at least one course that provides substantial instruction in professional skills generally regarded as necessary in the practice of law. The remainder of the courses taken in the last two years are primarily elective.

Dual Degrees

USC Gould maintains dual degree programs with the graduate programs in accounting, business administration, economics, gerontology, pharmacy, philosophy, public administration, public policy, social work, politics and international relations, real estate development and communication. These programs enable qualified students to earn a law degree (J.D.) and the appropriate master's degree. If the master's degree normally requires one year of study, a student in a dual degree program earns both degrees in only three years. If the master's normally requires two years of post-baccalaureate courses, a total of four years is required. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC beyond the first year curriculum.

The goal of these programs is to encourage law students to gain a recognized competence in another discipline that has a direct relevance to the roles lawyers play in society. The dual degree programs are based on the premise that some topics covered in the law school are also covered in the programs of the cooperating departments, so that some credit toward the law degree may appropriately be given for specified graduate work taken in the cooperating department. Similarly, the cooperating departments have recognized that some credit toward the master's degree may appropriately be awarded for certain work completed in the law school.

LL.M. Degree

The residential LL.M. program is a master's degree program for foreign graduate students trained in law. This two-semester, full-time program introduces foreign lawyers to American law and the U.S. legal system and prepares them for leadership roles in the global market. After successfully completing the program, students will be awarded the Master of Laws degree.

The online LL.M. program is a master's degree program for foreign graduate students trained in law. This program is offered on a part-time or full-time basis in an online modality and introduces foreign lawyers to American law and the U.S. legal system and prepares them for leadership roles in the global market. After successfully completing the program, students will be awarded the Master of Laws degree.

MCL Degree

The MCL program is a master's degree program for foreign graduate students trained in law who have already earned their LL.M. degree. This two-semester, full-time program is focused on the study of comparative law. Students are provided with the opportunity to study the differences, similarities and interrelationships of different systems of law around the world. After successfully completing the program, students will be awarded the Master of Comparative Law degree.

Honor Society

Order of the Coif: Order of the Coif is a national honorary scholastic society that encourages excellence in legal education.

Qualifications: Membership will be extended to a graduating law student whose cumulative grade point average ranks in the top 10 percent of all graduating students, provided that he or she has completed at least 75 percent (66 units) of law studies in graded courses.

Adviser: Scott Altman, Vice Dean, Gould School of Law, (213) 740-2544, [✉ saltman@law.usc.edu](mailto:saltman@law.usc.edu)

Applications: Students are nominated by the law school.

Continuing Legal Education

USC Gould is a national leader in continuing education, presenting six annual programs designed for sophisticated attendees from the bar, judiciary, accounting, business, and law student communities and

supported by both law firm and corporate sponsors.

USC Gould has been approved as a provider of Minimum Continuing Legal Education (CLE) credit by the State Bar of California and offers general CLE and Legal Specialization Credit for lawyers, as well as continuing education credits for accountants, real estate professionals, and certified financial planners.

CLE programs in 2014–2015 include the Institute on Entertainment Law and Business, Trust and Estate Conference, Tax Institute, Institute for Corporate Counsel, Real Estate Law and Business Forum, and Intellectual Property Institute.

For detailed program and registration information, visit law.usc.edu/cle. For additional questions, call (213) 821-3580 or email [✉ cle@law.usc.edu](mailto:cle@law.usc.edu).

Tuition and Fees (Estimated)

Students in the law school's J.D. program pay tuition of \$55,084 per year (two semesters) (26–34 units). For less than 13 units the tuition is \$2,129 per unit, and tuition is an additional \$2,129 for each unit over 17.

Students in the law school's residential LL.M. and MCL programs pay tuition of \$55,084 per year (two semesters). Students in the law school's online LL.M. program pay tuition on a per unit basis.

The university reserves the right to assess new fees or charges as it may determine. The rates listed are subject to change without notice by action of the Board of Trustees.

These fees are based upon current information available at the time of publication and are subject to possible later change.

In addition to the mandatory fees charged to all USC students, law students must also join the Student Bar Association. In 2014–2015, this membership fee was \$25 per semester.

Admission Requirements — J.D. and Dual Degrees

First-year students must have earned a bachelor's degree from a regionally accredited college or university and be able to provide an official transcript denoting the degree conferred by the beginning of their law school classes. USC Gould does not require applicants to take any specific college courses, and discourages pre-law students from enrolling in college courses that duplicate the law school curriculum. The faculty recommends college courses that are intellectually challenging and require disciplined study. Training in careful reading and skilled writing is most valuable, as are courses involving seminar discussion and sustained research. The student will find that a broad exposure to such fields as economics, philosophy, history, political science, anthropology, mathematics and psychology is more useful than narrow exposure to vocationally oriented courses.

All applicants are required to take the Law School Admission Test (LSAT) administered by the Law School Admissions Council. Applicants must take the test no later than February if they seek to start law school the following August.

Like most law schools, the USC Gould School of Law requires students to apply online through the Law School Admission Council and register for the Credential Assembly Service (CAS). The CAS assembles an applicant's transcripts, LSAT scores and letters of recommendation and forwards copies of them to law schools of the applicant's choosing. Further information about the LSAT and the CAS may be obtained from the Law School Admission Council, 662 Penn St., Box 40, Newtown, PA 18940 and online at lsac.org.

Detailed information regarding admission application procedures is available from the Dean of Admissions, University of Southern California Gould School of Law, University Park, Los Angeles, CA 90089-0074 and on the school's Website (law.usc.edu).

Accelerated B.A./J.D. Program (3+3)

The program is open only to USC undergraduate students who can complete their required bachelor's major course work by the end of their junior year. Admitted students complete their undergraduate and law school studies in a total of six years. After year one of law school (at the latest), students must have all necessary course

work completed to earn their bachelor's degree and after year three, their law degree. However, the preference is that the bachelor's degree requirements be completed prior to beginning law school course work.

Students are not required to take the LSAT for admittance. Students are required to have taken either the SAT or ACT test and earned a score at or above the 85th percentile in the SAT Critical Reading or ACT Reading portion of the test. Students must have a minimum cumulative undergraduate GPA of 3.80. Additionally, strong faculty letters of recommendation, a personal statement, and an interview are required components of the application. The program is open to all participating majors.

Transfer Students and Visiting Students

A student in good standing at a law school that is approved by the American Bar Association may apply for admission with advanced standing either as a transfer student or as a visiting student. Transfer students enter USC Gould after one year at another law school; they then spend two years at the law school and earn the J.D. degree from USC. Visiting students spend one or two semesters at the law school during their third year of law school; they are not eligible for a USC degree. For further information, please request Transfer/Visitor Information from the Admissions Office at USC Gould.

Transfer LL.M. Students

Law students who are enrolled in USC Gould's residential and online LL.M. programs for foreign lawyers may apply to the J.D. program as transfer LL.M. students during the transfer application period. Only USC Gould LL.M. students may apply in this manner. Those who have already been awarded an LL.M. at another U.S. law school may apply as international J.D. applicants.

For further information, request LL.M. transfer information from the Graduate and International Programs Office at USC Gould.

Admission Requirements — LL.M. Degree

Students submitting an application must have earned a basic law degree, a Bachelor of Laws (LL.B.) degree or the foreign equivalent. Some experience following the completion of the first professional degree is preferred. For further information, contact the law school at (213) 821-5916 or visit the school's Website (law.usc.edu).

Admission Requirements — MCL Degree

Students submitting an application must have earned a basic law degree, a Bachelor of Laws (LL.B.) degree or the foreign equivalent and will have previously earned their LL.M. degree. Some experience following the completion of the first professional degree is preferred. For further information, contact the law school at (213) 821-5916 or visit the school's Website (law.usc.edu).

Registration

Registration is handled by the USC Gould School of Law Office of the Registrar. First-year students will automatically be registered in their fall semester courses approximately two to three weeks prior to the beginning of the school year and for their spring semester courses approximately two to three weeks prior to the dates listed in the law school calendar for upper-division student registration.

Grading and Attendance Policies

Grading

The grading system uses both numbers and letters in a range from 1.9 to 4.4 with letter-grade equivalents ranging from F to A+. The grade equivalents are: A+ (4.1–4.4); A (3.8–4.0); A- (3.5–3.7); B+ (3.3–3.4); B (3.0–3.2); B- (2.7–2.9); C+ (2.5–2.6); C (2.4); C- (2.1–2.3); D (2.0); and F (1.9). Students receiving a grade of 1.9 will not be given credit for the course toward graduation. A student who fails a first-year course must repeat the course, but both grades will be included in computing that student's general average. Other courses may not be repeated except on petition to the associate dean. A student with a weighted cumulative average of less than 3.0 at the end of the year will be placed on restricted enrollment. A student with a weighted cumulative average of less than 2.7 at the end of any year will not be permitted to continue.

Credit/D/F

After the first year, a student may take up to a total of 8 units on an elected CR/D/F basis, chosen from among courses otherwise graded in a normal manner. No more than 4 such units may be taken in a semester. The student must elect to take a course CR/D/F during the first two weeks of the semester. Courses or seminars may, at the instructor's option, be designated prior to registration as not available for CR/D/F grading. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC beyond the first year curriculum.

Students may also take such courses regularly offered only on a CR/D/F basis, in addition to courses taken under this rule.

Withdrawals from Courses

A student may not withdraw from a course later than two weeks after the first day of classes of any semester without permission of both the associate dean and the instructor.

Attendance

Class attendance is an important part of law school education. It assists both the individual and fellow students in making the most of the educational opportunity offered. Students should, therefore, attend class regularly and participate in the discussion. Professors may require attendance and may take attendance into account in evaluating student performance.

Gould School of Law

Degree Programs

Juris Doctor

The Juris Doctor is the basic law degree. To obtain the degree, a student must satisfactorily complete 88 units, be in full-time attendance for six semesters and complete all required courses. Several options are available through which students may, with appropriate permission, take courses outside the law school. Except with special permission, however, each student (including a dual degree student) must successfully complete at least 35 units beyond the first year curriculum, in law courses, taken at this law school, and graded in the normal manner. Each student must also complete a minimum of 65 of the required 88 units by attendance in regularly scheduled class sessions at the law school. A law student is expected to devote the major portion of his or her time to law studies; any outside employment must therefore be restricted. First-year students are not permitted to hold jobs, and second- and third-year students may not hold outside employment requiring more than 20 hours of work per week.

First-year students are required to carry the full load of courses prescribed for that year, and second- and third-year students are required to carry between 13 and 17 units each semester, unless special permission to carry a reduced or enlarged schedule is granted by the dean of students. All students must complete six full-time semesters.

Requirements for degrees, as well as the courses offered, may be changed by the faculty at any time. The dean of students may waive some requirements for individual students.

The First Year

During the first year, the student takes a required curriculum of basic courses that examines fundamental legal institutions and addresses legal problems relevant to today's society and the modern practice of law.

In the fall semester, Law, Language, and Values introduces students to foundational concepts in legal reasoning, including theories of interpretation, the rule of law and normative reasoning.

Torts I explores the individual's obligation to refrain from harming others and studies the bases for compensating persons who suffer injuries — either by holding responsible whomever is at fault for the harm, or by invoking other principles of liability including the efficiency of resource allocation and spreading of losses.

Procedure introduces students to the issues of what constitutes fair, adequate and efficient procedures in resolving legal disputes. Study focuses on the procedures outlined in Federal Rules of Civil Procedure.

Contracts studies the law regulating consensual arrangements entered into for commercial purposes. It concerns such questions as what promises do and should the state enforce and what remedies are available when enforceable promises are breached.

In the spring semester, students take Criminal Law, which studies issues relating to the decision, by legislature or court, to designate behavior as a “crime.” Significant attention is given to the moral, psychological and philosophical issues involved in ascribing criminal responsibility.

Constitutional Law focuses on fundamental structure provisions and relationships under the U.S. Constitution with an emphasis on separation of powers and federalism.

Property analyzes the development of rules dealing with land, water and other natural resources, frequently from historical and economic perspectives.

In addition to these required spring courses, first-year students will be able to choose an elective course. Elective topics may include (among other topics) a Business Basics course, a course on constitutional rights, and a course in Legal Profession with an orientation toward public interest.

All students take a year-long course, Legal Research, Writing and Advocacy. The course is coordinated with other first-year courses, and provides students an opportunity to draft pleadings and to prepare legal memoranda and briefs. Toward the end of the second semester, each student participates in a moot court argument based on work previously prepared for the course.

Students study basic sources of the law — case reports, constitutions, statutes and interdisciplinary materials. There is no uniform method of teaching, but Socratic dialogue and class discussion are primarily employed to help the students analyze issues, reasons and arguments. Moreover, law school faculty have traditionally employed interdisciplinary approaches in analyzing legal problems. First-year classes meet in sections of 60 to 100 students, about half the class size of many law schools.

The Second and Third Years

Requirements

The upper two years of law study are primarily elective, with only four requirements. First, students must satisfy the upper division writing requirement, either by completing a major faculty-supervised writing project or by taking a course with a substantial writing component.

Second, students must enroll in course work that offers substantial instruction in professional skills generally regarded as necessary for the effective and responsible participation in the legal profession. Such course work includes simulation courses (including Trial Advocacy and Pretrial Advocacy), live-client clinical offerings and courses involving the drafting of legal documents (including Contract Drafting and Negotiation).

Third, students who did not take the Constitutional Rights class as a first-year elective must take it during the second or third year of law school.

Finally, students who did not take the Legal Profession class as a first-year elective must take it during the second or third year of law school.

Course Offerings

The basic courses that most students elect to take — for example: Business Organizations, Evidence, Taxation, and Gifts, Wills and Trusts — are offered every year and usually twice a year. Other courses listed are offered once a year, or in some cases, once every several years. Each year the law school attempts to provide upper-division students with a wide variety of optional specialized courses. Often these reflect the research interests of the faculty. Some examples in recent years have been Biotechnology and the Law, Global Warming, Counterterrorism and Homeland Security, Wrongful Convictions, Reproductive Rights, Special Education and Disability Law, and a seminar on Corporate Fraud. Because there are specialty courses in nearly every major area

of the law, upper-division students are able to concentrate in a particular area, or, if they prefer, pursue a broad, basic legal education.

Clinical Offerings

The upper-division curriculum includes a variety of opportunities for clinical legal education. “Clinical” courses are of two kinds. First, clinical refers to courses in which the learning of legal principles occurs through actual work on cases in particular subject matter areas. For example, the law of prisoners’ rights and post-conviction remedies is taught in the Post-Conviction Justice Project, a course in which students represent inmates in the California Institution for Women. This representation is under the direct supervision of full-time law school faculty members. About 20 students participate each semester, traveling to the prison to meet with their clients on a regular basis, attending seminars at the law school, preparing briefs and papers, drafting habeas petitions, and negotiating and dealing with prosecutors and prison and court personnel. In addition, students make court appearances on behalf of clients in state and federal courts, as well as courts of appeals.

The second type of clinical course concentrates on specific lawyering skills taught in a classroom setting through the use of hypothetical case materials, with actors playing the roles of clients. The best illustration of this form of clinical teaching is the three-course sequence of Pretrial, Trial and Appellate Advocacy, which covers the stages in the litigation process suggested by the course titles. In these courses, students actually perform, in a simulated courtroom or law office environment, the multiple tasks required of lawyers. Most work is done in small groups; students are videotaped and intensively reviewed by the instructors. A student can take part or all of this sequence. The three courses together require the student to do at least the following: client interviewing and counseling, legal research, fact-finding, drafting of legal documents, negotiation with opposing counsel, arguing pretrial motions to a judge, preparing witnesses to testify, selecting a jury, conducting direct and cross-examination, proposing and opposing exhibits and testimonial evidence, arguing to a jury, and drafting and arguing an appellate brief.

The Post-Conviction Justice Project and the advocacy courses are not the only clinical courses in the curriculum, but they are useful examples of the variety of clinical teaching. A course in a specific area of law, like the Post-Conviction Justice Project, necessarily requires students to acquire basic courtroom, negotiation and client interviewing skills. The skills-oriented advocacy courses require students to be familiar with substantive areas like evidence, procedure and the law in the area of the hypothetical client’s problems. These two kinds of clinical courses supplement each other, just as substantive knowledge and expert skills do in the practice of law. Considered as a whole, USC’s clinical courses provide the foundation of knowledge and skill necessary to begin the practice of law.

Judicial Externships and Clinical Internships

The clinical opportunities listed previously are focused primarily within the law school. In addition, there are two categories of clinical options for students to pursue outside the law school in the actual environments of courts and law offices.

The first of these, the judicial externship program, enables students to receive credit for full- or part-time work as an extern to a judge of the state or federal court. Students are selected by the judges themselves. USC students have served as externs in the California Supreme Court, U.S. Court of Appeals, U.S. District Court, U.S. Bankruptcy Court, California Court of Appeal and Superior Court. During the externship, each student is supervised by the assistant dean and the placement supervisor.

The second program, the clinical internship option, allows USC Gould students to work part-time in government agencies, legal services programs or other nonprofit organizations under the supervision of practicing attorneys and faculty members. Students earn academic credit while providing representation to actual clients, learning important government processes or participating in large-scale impact litigation. Since the program includes more than 50 pre-approved agencies, students may choose from a wide range of clinical internships.

Neither program is considered a regularly scheduled class session for purposes of graduation requirements.

Individual Research Projects

A wide variety of courses and institutes offers opportunities for upper-division students to engage in individual research under faculty supervision and often in conjunction with course offerings, as well as to participate in

large research projects. Projects presently underway include the uses of ocean and sea resources, the development and regulation of geothermal energy, sentencing practices in felony cases, the effects of real estate taxation, the delivery of legal service to low- and middle-income persons, the civil commitment of elderly persons, the relationships between corporate law and actual corporate practices, and theoretical studies in law and economics. Such research projects are financed by grants from the Brookings Institution, the U.S. Commission on Civil Rights, the National Science Foundation, the Ford Foundation, the Lincoln Institute of Land Policy, the National Institute of Mental Health, and the Energy Research and Development Administration.

Independent research completed for academic credit is not considered a regularly scheduled class session for purposes of graduation requirements.

Courses Outside the Law School

With the concurrence of the dean of students, a student may receive up to 12 units of J.D. credit for courses taken outside the law school. These courses must be on the graduate level and may be taken only at USC. Taking graduate level courses outside the law school is an alternative to the dual degree program; a student may not pursue both approaches. With the approval of the dean of students, a student may receive a limited number of J.D. credits for undergraduate language courses taken at USC. For purposes of meeting the 35-graded-units rule, all non-law courses are counted as CR/D/F units.

A student may, with permission of the dean of students, enroll in and transfer the credit from a law course taken at another school that is a member of the Association of American Law Schools, if the course is equivalent to one included in the USC Gould curriculum that will not be offered here during the semester the student takes the course. Credit will be granted only for courses graded “C” or better. A maximum of 5 such units may be counted toward the J.D.

Courses taken outside of the law school are not considered regularly scheduled class sessions for purposes of graduation requirements.

Course Selection in the Upper Division

With such a variety of courses available, how do second- and third-year students go about selecting the program that will be best suited to their individual interests and ambitions?

There are no precise rules or proven methods for selecting second- and third-year courses. To a large extent, these choices reflect each student’s personal assessment at the end of the first year — strengths and weaknesses, developing intellectual interests and first tentative career plans. For this reason, the combination of courses most desirable for one person will not necessarily be best for anyone else. Students are urged to be wary of the notion that there is a specific, recommended curriculum to follow. But reluctance to impose a model course of study does not mean that no guidance is available, for there are at least four ways of thinking about these choices that, in combination, will help each student choose the best array of courses.

One recommended approach to course selection is to choose courses taught by professors the student admires, without regard to subject matter. For each student there are teachers who are particularly able to create intellectual excitement and whose approach to analysis and teaching strikes a responsive note. Students will benefit as much from exposure to a specific professor’s analytic skills and approach to legal issues as from specific course content.

A second approach is to choose courses that look exciting, without worrying about whether such courses are directly related to the student’s current career plans or to some idea of traditional curriculum. If it appears that a course will be intellectually interesting, will expose students to a new area of the law, or provide needed variety, there is already more than enough reason to enroll. Courses taken because of enthusiasm for either the instructor or the subject matter often lead to the richest academic experience of law school.

The third way to make decisions about taking courses is to classify them according to clusters that emphasize similar issues or themes and then select from each area. For example, a student interested in ideas about family relationships will find them discussed in different contexts in Gifts, Wills, and Trusts; Family Law; and the Children’s Legal Issues Practicum. Trial Advocacy and Pretrial Advocacy are courses that teach practical litigation skills, relating various performance tasks to the underlying skills of legal writing, advocacy, legal counseling, negotiation, and factual analysis. A further example includes courses involving close work with

statutes, such as Labor Law, Securities Regulation and Taxation, any of which will provide opportunities to develop important and transferable skills.

Finally, students might think about selection as a way of building a wide substantive expertise in an area of particular interest. For example, the following courses are crucial to one anticipating a substantial wills and estate planning practice: Family Law; Community Property; Taxation; Estate Planning; Real Estate Transactions; and Gifts, Wills and Trusts. This kind of course planning requires some thought and investigation, since a casual examination might omit such courses as Community Property (which may affect one's legal ability to transfer property by will), and Real Estate Transactions (since various forms of property ownership may dictate a specific will or create planning considerations).

These approaches to course selection describe only some of the ways in which students might make reasoned choices about their academic programs. Formal and informal academic counseling are available from the associate dean, the assistant deans and other faculty. In addition, students are encouraged to follow the written recommendations available in the online *Student Handbook* available via the Student Portal on the USC Gould School of Law Website.

Gould School of Law

Degree Programs

Dual Degrees

Admission

Students may be accepted for a dual degree program when they are accepted to the law school, although most students do not apply until near the end of the first year. All programs require that students successfully complete the required first year of law school before beginning work toward the master's degree. Credit toward the law degree may not be given for graduate work completed prior to the completion of the first year of law school, although some credit toward the master's degree may be allowed by the faculty of the cooperating department of approved work completed prior to the first year of law school. Students are not eligible for either of their dual degrees until they complete the requirements for both degrees. All students (including dual degree students) must complete at least 35 numerically graded USC Gould units beyond the first year curriculum.

Following are general descriptions of the dual degree programs. Students interested in further information should consult the USC Gould Admissions Office.

Juris Doctor/Master of Arts in Economics

Students are required to complete 92 units of law and economics course work, 4 units of which must constitute a thesis acceptable to the faculties of the law school and the Department of Economics. Before enrolling in economics courses, students must have completed an undergraduate course in probability and statistical inference (e.g., BUAD 310). Students with undergraduate degrees in such disciplines as business, economics, mathematics and psychology will usually have taken such a course as part of their undergraduate program.

First Year: Required law school courses.

SECOND AND THIRD YEARS:

		UNITS
ECON 500	Microeconomic Analysis and Policy	4
ECON 513	Practice of Econometrics, or	
ECON 602	Macroeconomic Theory I	4

Two Additional Graduate Level Courses in Economics (8 units): ECON 680 Industrial Organization and ECON 681 Economics of Regulated Industries are recommended, but the student is free to choose any graduate level courses other than ECON 590 or ECON 790 in consultation with the program adviser. ECON 401

Mathematical Methods in Economics may be substituted for one of these courses, and ECON 419 Introduction to Econometrics may be substituted for the other. (These three courses are applicable toward graduate credit.)

Four Units of Thesis: The thesis must be acceptable to both the faculty of the law school and the faculty of the Department of Economics.

Thirty-nine Units of Law Courses: including one course in a subject matter related to economics (including but not necessarily limited to Taxation, International Business Transactions, Antitrust Law I, Regulated Industries, Labor Law, Administrative Law and Regulatory Policy, Corporate Taxation or Land Use). In addition to the LSAT, students interested in this dual degree program are required to take the aptitude and advanced economic portions of the Graduate Record Examinations (GRE).

Juris Doctor/Master of Science in Gerontology

The J.D./M.S. dual degree combines the knowledge of the older population with understanding of the legal system. The program prepares graduates for a number of roles in both public and private sector organizations. Students are required to complete 110 units of course work, 74 from the law school and 36 from the Davis School of Gerontology. The first year is devoted to required law courses, and the second, third and fourth years combine gerontology and law courses.

Gerontology Requirements

The Master of Science in Gerontology will require 36 units of course and fieldwork that cover the core content of the M.S. program.

GERONTOLOGY REQUIREMENTS		UNITS
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 555	Integrating Gerontology: A Multidisciplinary Approach	4
GERO 591	Field Practicum	8
GERO 593	Research Methods	4
	Gerontology elective	4

The Davis School of Gerontology will waive 16 units of electives, which are required in the regular M.S. program, as well as GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program have a primary professional focus in law.

Law School Requirements

The law school requires 74 units of credit.

FIRST YEAR REQUIREMENTS		UNITS
LAW 502	Procedure I	4
LAW 503	Contracts	4
LAW 504	Criminal Law	3
LAW 505	Legal Profession	3
LAW 507	Property	4
LAW 508	Constitutional Law I	4
LAW 509	Torts I	4
LAW 512	Law, Language, and Values	2
LAW 515	Legal Research, Writing and Advocacy I	3
LAW 516	Legal Research, Writing and Advocacy II	2

Elective Course Work

The second and third year of law study are primarily elective with one requirement. Students must satisfy the upper division writing requirement, either by completing a major, faculty-supervised writing project such as a dissertation, or by taking a course with a substantial writing component.

The law school will waive 14 units of electives which are required in the regular J.D. program.

Juris Doctor/Master of Business Administration

In addition to the LSAT, applicants to this dual degree program are required to take the Graduate Management Aptitude Test. Requirements for the dual degree program are listed in the Marshall School of Business section of this catalogue.

Juris Doctor/Master of Business Taxation

The Leventhal School of Accounting offers a specialized program in taxation leading to the Master in Business Taxation (MBT). Requirements for this dual degree program are listed in the Leventhal School of Accounting section of this catalogue.

Juris Doctor/Pharm.D.

Admission Requirements

Admission to the dual Pharm.D./J.D. program is competitive, and involves meeting admission requirements and gaining acceptance to both the School of Pharmacy and the law school. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students that have a baccalaureate degree may apply to the dual Pharm.D./J.D. degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both schools. Students who elect this approach must identify themselves on their Pharm.D. applications as potential dual Pharm.D./J.D. degree students. Students who are admitted to both schools will be offered admission to the dual degree contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA.

Students pursuing the dual Pharm.D./J.D. degree must notify the law school in a timely fashion that they will be enrolling in the dual Pharm.D./J.D. degree program and will not matriculate at the law school until the following year. Students who are accepted only by one school may choose to attend that school but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the law school during their first year of enrollment in the Pharm.D. program prior to the law school's published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students admitted to the law school using this approach would be offered admission to the dual degree contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA. See the admissions section of the School of Pharmacy and the law school for specific requirements.

Degree Requirements

The professions of pharmacy and law are distinctly different, yet pharmacists are often involved in legal issues and lawyers frequently deal with pharmacy, drug, health care, product development and toxin-related matters. This dual degree program provides qualified students with an efficient mechanism for obtaining the expertise and professional credentials that will enable them to develop professional practices that bring together expertise in both areas.

Overall Requirements

A student is required to complete all work for both degrees within six years of the date of matriculation at the School of Pharmacy (Pharm.D.) and five years of matriculation at the law school (J.D.). The entire dual degree program will take six years to complete. Dual degree students will be allowed to use 12 units of approved J.D. course work (elective or required) to meet 12 units of Pharm.D. electives and 12 units of approved Pharm.D. course work (elective or required) to meet 12 units of J.D. electives. A faculty qualifying exam committee will determine the exact program for each student, including the appropriateness of courses in one program used to meet elective requirements for the other program. A total of 208 units is required for the dual degree.

Pharm.D. Requirements

Dual degree students must successfully complete 144 units of Pharm.D. and acceptable J.D. units to receive the Pharm.D. degree. The 144 units must include 132 units of required and elective pharmacy course work plus 12 units of J.D. course work deemed acceptable to meet Pharm.D. elective requirements. Dual degree students should graduate with their Pharm.D. degrees at the completion of the first semester of the sixth academic year of the dual degree program. Students will be eligible to sit for the Pharmacy Board Exams after completion of the Pharm.D. degree requirements. However, dual degree students will not actually be awarded their Pharm.D. degrees until they complete requirements for both degrees.

Juris Doctor Requirements

Dual degree students must successfully complete 88 units of J.D. and acceptable Pharm.D. course work during the second to sixth years of the dual degree program to receive the J.D. degree. The 88 units must be composed of 76 units of J.D. course work, including satisfaction of the upper-division writing requirement and any other substantive requirements, plus 12 units of Pharm.D. course work deemed acceptable to meet J.D. elective requirements. No J.D. credit will be awarded for Pharm.D. course work completed prior to matriculation in the law school. Students cannot receive the J.D. degree under requirements for the dual degree program without prior or simultaneous completion of the Pharm.D. degree.

Both professions require passing a state board or bar exam to practice the respective professions. Neither of these degrees requires a thesis or comprehensive final exam.

Recommended Program

Pharm.D./J.D. dual degree students will begin with the first year of the Pharm.D. curriculum (36 units). During the second year, students will take the first year law core (33 units), plus 3–5 Pharm.D. units. Due to the rigor of the law school core, pharmacy courses during the first year of law school are limited to non-science courses. The third through fifth years of the program focus on Pharm.D. courses with sufficient law courses to maintain students' educational momentum in law. Students should complete their Pharm.D. requirements during the fall of their sixth year of the program and their law course work also during the sixth year. Students must complete both degree requirements by the end of the sixth year of the program.

Juris Doctor/Master of Public Administration

Students are required to complete 97 units of course work. Candidates for the dual degree must fulfill the statistics requirement of the MPA degree. See the Master of Public Administration section. Requirements for this dual degree program are listed in the USC Price School of Public Policy section of this catalogue.

Juris Doctor/Master of Public Policy

The USC Price School of Public Policy and the law school offer a dual degree that enables qualified students to earn both a Juris Doctor and a Master of Public Policy in approximately four years of study.

The dual degree allows students to acquire a blend of the analytic skills of public policy and an understanding of legal institutions and processes. This combination of knowledge is well suited for law students who want to affect the policy-making process and craft legislation to aid in achievement of public policy goals. It is equally appropriate for prospective policy analysts who are interested in law and public policy.

Students must apply to, and be accepted by, both schools. They may be accepted to the dual degree at the time of their acceptance to the law school or at the beginning of their second year of law school. Dual degree students spend the first year of the program completing the required first year of law school. The remaining units of law school courses and the required 36 units of core MPP courses are taken by students in the second through fourth years.

Students are required to complete 114 units of course work, including 78 units in the Gould School of Law and 36 units in the USC Price School of Public Policy. The MPP program has a statistics prerequisite. See the Master of Public Policy section. Requirements for this dual degree are listed in the USC Price School of Public Policy section.

Juris Doctor/Master of Social Work

Students are required to complete 123 units of course work, including 76 units in the Gould School of Law and 47

units in the USC School of Social Work.

First and Second Years: Complete both the first year J.D. program of study and the first year MSW course of study.

Third Year: Complete the second year J.D. program.

Fourth Year: Complete the core concentration courses (included SOWK 686a Field Practicum II) of the concentration selected in the MSW program, with the fourth course to be determined as part of the student's individualized educational plan approved by that concentration. The final semester will be taken in the J.D. program in the spring. The law school gives credit for the third semester in the School of Social Work, while the latter recognizes law courses as substitutions for three social work courses and one semester of field instruction (for which a clinical law semester is substituted).

Juris Doctor/Master of Arts, International Relations

The USC Gould School of Law and the USC School of International Relations jointly offer a three-year program leading to the J.D. and M.A. degrees. (Students may extend the dual degree program to four years.) Applicants must apply to both the law school and the School of International Relations and meet requirements for admission to both. In addition to the LSAT, students interested in this program are required to take the Graduate Record Examinations (GRE). Law students may apply to the School of International Relations during their first year at the law school.

In the first year, students take their course work in the law school exclusively. The second and third years include 24 units of courses in international relations and 40 units in law. Students pursuing the dual degree must complete LAW 662 or LAW 764 and one additional international law course.

Students pursuing the dual degree must complete 24 units within the School of International Relations at the 500 level or above. These students are required to successfully complete IR 500 International Relations Theory, either IR 513 Social Science and Historical Research Methods: Introduction to Research Design or IR 517 International Policy Analysis, and two domain courses selected from among IR 502 Conflict and Cooperation, IR 509 Culture, Gender, and Global Society, IR 521 Introduction to Foreign Policy Analysis, and IR 541 Politics of the World Economy. Like all other master's students, students in the dual degree program must complete a substantive paper or alternative project. The requirements, standards and evaluation procedure for the substantive paper are identical to those listed for all M.A. students except that one member of the examining committee must come from the law school.

Juris Doctor/Master of Communication Management

Students must complete 20 units (five courses) of communication courses at the School of Communication: one core class from the student's preferred track; one method course; CMGT 597; and the remaining two courses may be from either core or elective offerings.

First Year: Required law school courses.

Second and Third Years: 20 units of communications courses and 38 units of law courses, of which 8 units must be approved as appropriate for acceptance by the Annenberg School for Communication and Journalism toward its degree. All students take CMGT 597 in the third year.

Application to pursue the dual degree should be made before completion of 15 units of work on law or 8 units toward the M.A. Admission by the law school to its J.D. degree will be evaluated as a substitute for GRE scores.

Juris Doctor/Master of Real Estate Development

The Juris Doctor/Master of Real Estate Development dual degree program provides the opportunity for in-depth study of legal issues and real estate development. The increasingly regulatory environment developers work within demands that professionals in the real estate industry have a strong understanding of the legal system. Lawyers who plan to specialize in real estate law will benefit from a thorough understanding of the development process, including financial, planning, marketing and design issues.

Application must be made to both the Gould School of Law and the USC Price School of Public Policy. This program normally requires three years (including one summer) of full-time study in residence to complete.

Students must have use of an approved laptop computer as required by instructors and must demonstrate calculator and spreadsheet skills; a calculator and/or spreadsheet class is offered online via the Internet.

Requirements for completion of the dual degree program are 112 units, including 78 units in law and 34 units in planning. For a complete listing, see Public Policy.

Juris Doctor/Master of Arts, Philosophy

Students must complete 24 units in the USC School of Philosophy and 69 units in the Gould School of Law.

First Year: Required law school curriculum.

Second and Third Years: The School of Philosophy prefers that students take at least one philosophy course each semester. During the four semesters, students must take at least 16 units at the 500 level, including PHIL 450 Intermediate Symbolic Logic and PHIL 500 Introduction to Contemporary Philosophical Literature; one 400- or 500-level course in ethics or social/political philosophy or aesthetics or philosophy of law; one 400- or 500-level course in metaphysics or epistemology or philosophy of language or philosophy of science or philosophy of mind; one 400- or 500-level course in the history of ancient or early modern philosophy; passage of the second year review, which shall include a research paper based on a completed seminar paper and completion of a publishable research paper. Students must also complete 36 additional law units.

Juris Doctor/Master of Arts, Political Science

The Department of Political Science and the Gould School of Law jointly offer a dual degree program leading to the J.D. and M.A. degrees. Applicants must apply to both the Department of Political Science and the law school and meet the requirements for admission to both. In addition to the LSAT, students interested in this program are required to take the Graduate Record Examinations (GRE).

In the first year, students take their course work in the law school exclusively. The second and third years include 24 units in political science and 40 units in law.

Like all other students in the political science M.A. program, students pursuing the dual degree must pass a master's screening examination in their field of choice. If they wish to write a master's thesis, they may do so in lieu of two courses.

Juris Doctor/Doctor of Philosophy in Political Science and International Relations

The Department of Political Science and the Gould School of Law offer a dual degree program leading to the J.D. and Ph.D. degrees. Applicants must apply to the Department of Political Science, the School of International Relations and the law school, and meet requirements for admission to all. In addition to the LSAT, students interested in this program are required to take the Graduate Record Examinations (GRE).

In the first year, students take their course work in the law school exclusively. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in the law school honors programs. The second and third years include 40 units of courses in political science and 40 units of law. Students must take two methodology courses, POSC 500 and POSC 600, and three core courses to be selected from POSC 510, POSC 512, POSC 520, POSC 530 and POSC 540.

To obtain a Ph.D. in Political Science and International Relations, students must pass the screening process. After the completion of additional course work, students must take a Ph.D. qualifying examination in three fields. Students will be examined in two of their three fields of concentration. The third ("write-off") field will be completed by taking at least three courses and passing them with a grade of B or better. The final requirement, following successful completion of the qualifying examination, is a doctoral dissertation.

Other Graduate Courses

Students interested in combining an expertise in another discipline with the law degree may arrange individually to take approved graduate courses for limited credit toward the law degree.

Students may receive up to 12 units for graduate work taken outside the law school with the prior permission of the administration. These units may be concentrated in a single appropriate discipline; they may not, however, be applied to another graduate degree in progress unless it is a certificate program offered by another department.

J.D. Study Abroad Programs

USC Gould offers five study abroad programs for J.D. students that provide opportunities to learn about foreign legal systems and to experience different cultures. Qualified second- and third-year J.D. candidates are exposed to international law as they take part in exchange programs with leading partner institutions worldwide.

University of Hong Kong: The semester exchange program at the University of Hong Kong (HKU) allows USC Gould J.D. students to experience Hong Kong and its legal culture and business in the Pacific Rim.

HKU was established in 1911 and is a leading university in Asia. It is linked with over 80 partner institutions in 15 countries and has exchange programs with prominent universities worldwide. The language of teaching at HKU for its law courses is English.

Bocconi University: USC Gould J.D. students have the opportunity to learn about law and business in Milan, Italy, in this semester exchange program with Bocconi University. An Italian course is available to interested exchange students who wish to study the language before the law program begins.

Bocconi University, a private institution in Milan, Italy, has a global reputation as a research university in business, economics and law. Bocconi offers its exchange students law courses in English. These include courses in international and European law, international trade law, and comparative business and corporate law.

University Jean Moulin Lyon 3: The semester abroad program at the University Jean Moulin Lyon 3 allows USC Gould J.D. students the chance to study in English at a leading law school in Lyon, France. After earning the J.D. degree, graduates may elect to return to Lyon for a semester to complete an LL.M. in international and European law.

The University Jean Moulin Lyon 3 is a public university ranked among the top in France. Lyon 3 is one of three universities in Lyon with a combined population of 100,000 students. Lyon is the second-largest city in France with a great selection of cultural and professional opportunities.

Bond University: USC Gould J.D. students have the opportunity to live in Queensland, on the Gold Coast of Australia, for a semester while studying at Bond University.

Bond University has a distinctly global perspective, aspiring to a 50:50 ratio of Australian to international students, who come from 80 countries worldwide. Under the guidance of Australia's most eminent legal professionals, internationally renowned criminologists and specialists, students benefit from the mentoring relationship fostered at Bond where professors take an active role in charting student success.

Fundação Getulio Vargas University: The semester exchange with Direito GV, the law school of FGV, allows J.D. students to study at their campus in São Paulo, Brazil. Direito GV has one of the top law faculties in Brazil. They offer law courses in English for their exchange students.

Fundação Getulio Vargas has developed a highly innovative curriculum. The Brazilian Ministry of Education and Culture and the Brazilian Bar Association have granted FGV their highest classification of academic rigor. This exchange introduces J.D. students to the Brazilian legal system and promotes a broad debate on the issues of global relevance within a South American perspective.

Degree Programs

Graduate Degree Programs

USC Gould's graduate degree programs include an LL.M. program and an MCL program for foreign law graduates. Through the graduate degree programs, students have opportunities to meet and interact with faculty and J.D. students and also with practicing lawyers from around the world.

Course Requirements

The LL.M. for foreign lawyers and MCL programs are intended for individuals who are trained in law abroad and wish to gain a basic knowledge of U.S. law and our legal system and/or who wish to engage in comparative legal study.

Gould School of Law

Certificate Programs

Certificate in Alternative Dispute Resolution

J.D. students must complete at least 14 units of arbitration and mediation-related classes to receive this certificate. Interested J.D. students must submit their applications for this certificate program after completing the first year of law school. J.D. students complete the certificate requirements during their second and third years of law school, and courses may count both toward the J.D. degree and the certificate.

LL.M. students must complete at least 14 units of arbitration and mediation-related classes to receive this certificate. LL.M. students complete the certificate requirements during the year they are taking their LL.M. course work, and courses may count both toward the LL.M. degree and the certificate.

All students are required to take both mandatory courses (Survey of ADR Law and Policy And Domestic Ethics in ADR) and a selection of elective courses (such as ADR Clause Drafting and Business Mediation).

Certificate in Business Law (Residential)

J.D. students must complete at least 27 units of business-related classes to receive this certificate. Interested J.D. students must submit their applications for this certificate program after completing the first year of law school. J.D. students complete the certificate requirements during their second and third years of law school, and courses may count both toward the J.D. degree and the certificate.

LL.M. students must complete at least 14 units of business-related classes to receive this certificate. LL.M. students complete the certificate requirements during the year they are taking their LL.M. course work, and courses may count both toward the LL.M. degree and the certificate.

All students are required to take both mandatory business law courses (such as business organizations) and a selection of elective business law courses (such as mergers and acquisitions, advanced contracts and bankruptcy).

Certificate in Entertainment Law (Residential)

J.D. students must complete at least 21 units of entertainment-related classes to receive this certificate. J.D. students must submit their applications for this certificate program after completing the first year of law school. J.D. students complete the certificate requirements during their second and third years of law school, and courses may count both toward the J.D. degree and the certificate.

LL.M. students must complete at least 14 units of entertainment-related classes to receive this certificate. LL.M. students complete the certificate requirements during the year they are taking their LL.M. course work, and courses may count both toward the LL.M. degree and the certificate.

All students are required to take both mandatory entertainment law courses (such as intellectual property) and a

selection of elective entertainment law courses (such as copyright, legal issues in music and sports law).

Certificate in Business Law (Online)

USC Gould School of Law Online LL.M. and Business Law Certificate students will enroll in the Online Business Law Certificate program and will take each of their courses in the online modality.

USC Gould School of Law J.D. and LL.M. residential students will enroll in the residential Business Law Certificate program and will take each of their courses in residence.

The Online Business Law Certificate program requires Business Organizations (4 units) as a core, mandatory course. Students are required to complete an additional 10 business law units online to earn the certificate. Electives include Securities Regulation (3 units), Business for Lawyers (2 units), Contract Drafting and Strategy (2 units) and Mergers and Acquisitions (3 units and for which Business Organizations is a prerequisite). Students must complete a minimum of 14 units to receive this online certificate.

The program is structured especially for working professionals who wish to take one or two courses per term in an online format. Students are expected to enroll each semester until the program is completed.

Gould School of Law

Degree Programs

Undergraduate Programs

B.A. Philosophy, Politics and Law

This interdisciplinary program consists of nine courses chosen from philosophy, political science, law and anthropology courses. See Philosophy for degree requirements.

Minor in Law and Public Policy

The minor in law and public policy draws upon four fields of study: public policy and management, law, economics and political science. It provides students with an understanding of the political and economic contexts in which laws are made, as well as how legal institutions shape policy formulation. Students learn to analyze the consequences of policy and alternatives; the roles played by government, business and nonprofit organizations in public decision-making; and the legal bases for various areas of public policy. See Public Policy for requirements.

Minor in Law and Society

This interdisciplinary program focuses on the effect of law on society and the way in which social forces influence the legal system. The idea is that students will understand the law if they look beyond “law in books” to “law in action.” See Political Science for requirements.

Minor in Psychology and Law

This interdisciplinary minor brings together courses in psychology that focus on the social, ethical, cognitive and societal aspects of psychology and how it relates to law. This knowledge is augmented with law courses that identify the relationship between mental health, social psychology and law. See Psychology for requirements.

Gould School of Law

Courses of Instruction

LAW (LAW)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

Courses numbered 500 and above are open only to law students except by special permission from the associate dean.

LAW 200x Law and Society (4) Sources and structure of law; history of Bill of Rights emphasizing effect on criminal justice system; limits of law in solving problems in American society. Not available for major credit to law students.

LAW 201x Law and Politics: Electing a President (4) Examination of the rules and realities of American politics, and the role politics plays in American life and culture. Not available for major credit to law students.

LAW 300 Concepts in American Law (4) The main concepts and topics in American law, in the historical, economic and cultural contexts in which they have developed. Open only to students enrolled in the Philosophy, Politics and Law (PPL) major.

LAW 301 The Constitution in Transnational Perspective (4) Examines the Constitution of the United States in transnational perspective, both historically and today. Focuses on democracy; slavery, emancipation, and freedom; empire; and governmental structures.

LAW 402 Psychology and Law (4, Sp) Explores issues of responsibility and credibility. Intentional and unintentional behavior. Clinical biases. Topics include witness credibility, confessions, cults, hostages, battered persons, and repressed memories.

LAW 403 Mental Health Law (4, Sp) Issues at the intersection of law and psychology, both civil — e.g., civil commitment — and criminal — e.g., the insanity defense. Emphasis on ethical issues.

LAW 404 Law and Psychology: Examining the Criminal Justice Process (4, FaSpSm) Examination of the capacity of the criminal justice process to produce accurate verdicts. Application of psychological research on witnesses, detectives, suspects, judges and jurors. *Recommended preparation:* PSYC 100.

LAW 444 Civil and Political Rights and Liberties (4) (Enroll in POSC 444)

LAW 502 Procedure I (4, Fa) Consideration of the participants in litigation — private and public plaintiffs, defendants, and courts. Information exchange, process, outcomes, and costs of lawsuits.

LAW 503 Contracts (2-4, Fa) The interpretation and enforcement of promises and agreements.

LAW 504 Criminal Law (3, Sp) The crime problem and the legislative response to it through substantive criminal law; administration of criminal justice through police, prosecutorial, sentencing, and penological discretion.

LAW 505 Legal Profession (2-4) Functions of the lawyer in modern society; history and organization of the legal profession; the adversary system; equal access to justice; other problems of ethics and professional responsibility.

LAW 507 Property (4, Sp) The idea of property as understood through economic and philosophical concepts. Rights in land, water and other natural resources. Forms of shared ownership (e.g., landlord and tenant), and a survey of mechanisms for controlling land use.

LAW 508 Constitutional Law I (2-5, FaSp) Considers the delineation of spheres of responsibility between the judiciary and legislature, the nation and the state, and the government and the individual.

LAW 509 Torts I (4, Fa) Individual's obligation not to harm others; bases for compensating persons who are harmed, either by holding responsible whoever is at fault or by invoking other principles of liability, including the efficiency of resource allocation and the spreading of losses.

LAW 510 Legal Research (0 or 1, FaSpSm) Examination of the basic sources of law for federal and California jurisdictions, utilizing a vast array of sources from books to computer-assisted research and analyzing research methodology and techniques. Graded CR/D/F.

LAW 511ab Legal Writing (a: 1-2, Fa; b: 1-2, Sp) Two-semester course focusing on developing analytic and communication skills. Lawyers will analyze legal principles and incisively apply them to facts. Graded CR/D/F.

LAW 512 Law, Language and Values (2-4) An introduction to legal interpretation and normative reasoning. Among the topics addressed are statutory and common law interpretation, the rule of law, externalities, and inequality.

LAW 515 Legal Research, Writing and Advocacy I (2-3) Development of legal research, writing and advocacy skills. Emphasis on objective legal writing, including memoranda, and researching case law through primary and secondary sources.

LAW 516 Legal Research, Writing and Advocacy II (2, Sp) Continuation of LAW 515. Development of legal research, writing, and advocacy skills. Emphasis on persuasive legal writing, including appellate briefs, and researching statutory and administrative law. Participation in a moot court program. *Prerequisite:* LAW 515.

LAW 520 Introduction to U.S. Legal System (2) The basic structure of government in the U.S., including the constitutionally mandated division of power in the federal government and the federal system of power sharing between state and federal systems. A comparative perspective on selected substantive and procedural matters, such as common law reasoning, jury trials, adversary process, and various aspects of civil procedure. Open to LL.M. students only.

LAW 521 Topics in American Law (1-4, FaSp) This course provides LL.M. and MCL students with a survey of various topics in American law, including criminal law, evidence, family law, constitutional law, torts, wills and trusts, administrative law and property law. Open to LL.M. and MCL students only.

LAW 599 Special Topics (2-4, max 8)

LAW 600 Taxation (3 or 4) Federal tax statutes, technical issues and social problems involved in tax planning, tax litigation, and reform of the tax laws.

LAW 601 Advanced Legal Writing Practicum (2-4) Requires students to draft legal documents they were not exposed to in the first-year writing course, such as client letters, demand letters, and contracts.

LAW 602 Criminal Procedure (2-4, FaSpSm) Criminal procedure in the courts, and the regulation of law enforcement by the courts through rules of evidence and interpretation of the Bill of Rights.

LAW 603 Business Organizations (3-5, FaSp) Organization of economic activity — especially the modern corporation — as institutions of social power. The roles of managers, owners, and public regulatory agencies in shaping processes of decision-making.

LAW 604 Real Estate Transactions Problems (1, Fa) Selected problems to supplement LAW 605. *Corequisite:* LAW 605.

LAW 605 Real Estate Law and Business I (Transactions) (3-5, Fa) The land transfer process: arrangements between buyers and sellers, brokers, escrows, recorders, title companies. Real estate financing through mortgages and other land security devices.

LAW 606 Sustainability, Global Warming, Land Use and Law (2-4) Concentrates on the major topics of Land Use and Environmental law in the 21st Century.

LAW 607 Gifts, Wills, and Trusts (3 or 4) Gratuitous transfer of wealth, especially the transmission of wealth from one generation to the next as a settlement of family affairs. Comparative analysis of the legal mechanisms of gifts, wills, and trusts. Introduction to problems of fiduciary administration.

LAW 608 Evidence (3 or 4) The purpose and character of trial. Problems of adversary presentation and the

nature of proof. The basis for admission and exclusion of evidence in judicial proceedings.

LAW 611 Advanced Topics in Constitutional Law (1-4, max 8) Seminar for students who aspire to write publishable research articles or notes on constitutional law topics.

LAW 612 California Civil Procedure (2-4) Examines the California rules of civil procedure. Emphasizes California law, with some discussion of the differences between state and federal procedure.

LAW 614 Accounting for Lawyers (2 or 3) The lawyer's skills needed to understand the financial affairs of a business client.

LAW 615 Election Law (1-4) Consideration of legal regulation of the right to vote and otherwise to participate in the electoral process.

LAW 616 Restitution (3) Comprehensive study of restitution, the common law action for unjust enrichment. Addresses unjust enrichment as a freestanding wrong, not just as a remedy.

LAW 617 History of American Law (2 or 3) Explores the interaction of law, culture, and politics in American society from the Revolution through the New Deal.

LAW 618 Advanced Contracts (2-4, FaSp) Students work in groups using principles of contract design analyzing concrete cases based on actual events in transactions handled by a large commercial law firm.

LAW 619 Employment Law (2-4) Examination of the evolving role of work in our society and the nature and scope of legal regulation of the employment relationship.

LAW 620 Mortgage Law (2-4, Sp) Deals with the rights and remedies of mortgage lenders and borrowers after the mortgage loan has gone into default. *Recommended preparation:* LAW 605.

LAW 621 Gender Discrimination (1-4) Analysis of the constitutional and statutory debates about the meaning of equality, and the recognition and accommodation of difference.

LAW 623 Family Law (3 or 4) Creating, regulating and dissolving family relationships. Explore moral and power relations among men, women, children and the state. Develop skills to help clients in families.

LAW 624 Water Law (2) Covers the regulation of groundwater and surface water by the courts and the State Water Resources Control Board.

LAW 625 Remedies (3 or 4) Comparison of the remedial goals of contracts, torts, and property and the impact of procedural devices in law and equity. Damages, injunctions, specific performance and restitution. Remedial theory and transactional application.

LAW 626 International Arbitration (2-4, Fa) Steps in the arbitration process, attorney's functions in the process, relation of arbitration to national courts, policy issues, issues involved when governments are parties to international commercial disputes.

LAW 627 Business Planning (3-4) Covers each phase of the structuring, formation, financing and operation of a new media enterprise.

LAW 628 Real Estate Finance Problems (1, Sp) Selected problems to supplement LAW 629. *Corequisite:* LAW 629.

LAW 629 Real Estate Law and Business II (Finance and Development) (2-4, FaSp) A survey of the major types of financing used for real estate and the basic techniques used to make real estate investment and financing decisions. *Recommended preparation:* LAW 605.

LAW 630 Mediation Clinic I (2-4, FaSpSm) Students receive the training required to become professional mediators for civil cases in the L.A. County Superior Court, and mediate these cases.

LAW 631 Mediation Clinic II (2-4) Continuation of LAW 630. *Prerequisite:* LAW 630.

LAW 632 Business for Lawyers (2-4) This course introduces law students to the tools, concept, and language of business. It is premised on the belief that to excel as a business lawyer, one must understand the business world from the perspective of the clients one counsels and assists. The course will cover, in compressed form, the basic subjects from the MBA program which are most useful to lawyers.

LAW 634 Legal Analysis of Evidence (2-4) Legal analysis of the rules of Evidence using problems designed to improve analytic skills and problem-solving. Taken in conjunction with Evidence. *Corequisite:* LAW 608.

LAW 635 Employment Discrimination Law (2-4) Examines the regulation of employment discrimination under federal law. Pays primary attention to issues of race, sex, age and disability discrimination.

LAW 636 Labor Law (3 or 4) The interrelation of labor, business, and government in collective bargaining, federal regulation of union and management practices and pressures, especially through the Taft-Hartley Act.

LAW 637 International Trade Policy (1-4) Examination of the institutions and laws that regulate international economic relations. Students will be introduced to the major international agreements and national laws that regulate international trade goods, services and capital.

LAW 638 Topics in Alternative Dispute Resolution (2-4, max 6, Sp) Examines selected topics in negotiation, mediation, or alternative dispute resolution. May be repeated with permission of the instructor as topics vary. Graded CR/D/F.

LAW 639 Law and Literature (1-4, max 8) Selected topics in law and literature.

LAW 641 Commercial Law (2 or 4) Commercial transactions involving secured financing (other than land). Government regulation of such sales and borrowing through Article 9 of the Uniform Consumer Credit Code and other recent legislation.

LAW 642 Secured Transactions (2-4) This is a course on Chattel paper and secured transactions involving personal property under Article 9 of the Uniform Commercial Code and some related bodies of law.

LAW 643 Securities Fraud Litigation (2-4, FaSpSm) Examination of the laws governing fraud in securities markets. Focus on several sections of the Securities Exchange Act of 1934, including fraudulent statements and insider trading, fraud in the takeover context, fraud in proxies, and controlling personal liability.

LAW 644 Corporate Taxation (2-4) Tax principles and practice applicable to business, especially problems of formation, liquidation, and reorganization. *Prerequisite:* LAW 600.

LAW 645 Transactional Practice — The Syndicated Loan Agreement (4) Involves issues including loan restructuring; what loan agreements cover; how representations, covenants, default and financial and repayment terms interrelate; and how security documents fit in. Graded CR/D/F.

LAW 646 Advanced Topics in Employment Discrimination (1-3) Reviews recent Supreme Court decisions and legal scholarship with attention to statutory interpretation, consistency with constitutional antidiscrimination standards, and consistency with current understandings about discrimination.

LAW 647 Bankruptcy: Debtors and Creditors I (2 or 3) Bankruptcy of the poor, imprudent or unlucky, and of unsuccessful businesses. The mechanisms of our law for distributing the debtor's property and discharging his obligations.

LAW 648 Topics in Entertainment Law (1-4, max 8) Contemporary topics in the field of entertainment law.

LAW 649 Insurance (2 or 3) The pooling of risks and distributing of losses. Actuarial foundation and contract problems of insurance.

LAW 650 Entertainment Law (2-4, FaSp) An examination of how the courts are handling selected, "cutting

edge” topics in entertainment law. The topics will include the scope of and limitations on the right of publicity; fair use and parody defenses to copyright infringement; future technology clauses in rights contracts; and copyright and defamation issues arising in the online world. Previous entertainment law courses recommended, but not required.

LAW 651 Entertainment Law Practicum (1-2, max 8, FaSpSm) Supervised internship for students enrolled in LAW 650. Graded CR/D/F. *Corequisite:* LAW 650.

LAW 653 Legal Issues in the Music Industry (1-4, FaSp) The course will focus on contract drafting and negotiation issues relevant to an artist’s pursuit of a career in the music business.

LAW 654 Legal Issues in the Television Industry (2-4) An in-depth study of television industry legal concepts, contracts, business structures and economic models.

LAW 655 Environmental Law (2-4) Focus on environmental law policy and practice. This course is a combination of regulatory and private law, with a special emphasis on disputes and regulations involving contamination in soil, water and air.

LAW 656 The Business of Entertainment, Media and Technology (1, 2) Introduces aspiring attorneys to important concepts in the entertainment business, and builds context for more advanced courses in entertainment, media, technology and intellectual property law. Graded CR/NC.

LAW 657 International Protection of Intellectual Property (1-4) The laws concerning how to enforce and exploit rights protecting media creations, marketing symbols, computer programs, new technologies, designs, know-how, and data across national borders.

LAW 658 Mergers and Acquisitions (1-4, Sp) Problems of integrating the corporate, securities, tax, business, antitrust, accounting and contractual aspects of corporate mergers and acquisitions. *Prerequisite:* LAW 603.

LAW 659 Legal Issues in the Motion Picture Industry (2-4) Involves the legal and business principles involved in structuring, negotiating and documenting agreements relating to the development, production and distribution of theatrical motion pictures. *Prerequisite:* LAW 772 or LAW 841; *corequisite:* LAW 650.

LAW 660 Advanced Trademark Law (1-4) A rigorous introduction to a law of trademarks. A trademark can be any word, symbol, design, sound, fragrance or product configuration that is used to distinguish the goods or services of one person from those of another, and to indicate the origin of the goods or services. *Prerequisite:* LAW 772 or LAW 841.

LAW 661 National Security Law (2-4) Examination of the nature of United States’ national security law, focusing on how it is created, violated and enforced.

LAW 662 Public International Law (3-4) Principles of international law involving relations among governments. The function of international tribunals and organizations.

LAW 665 Art Law (2 or 3) Provides an overview, often from a litigation perspective, of legal issues affecting artworks and cultural property.

LAW 667 Hale Moot Court Brief (2) Invitation-only course offered to second-year students as part of the Hale Moot Court Honors Program. Students write an appellate brief. Open only to students in J.D. program (including dual degrees).

LAW 668 Hale Moot Court Oral Advocacy (1, Sp) Invitation-only course for students in the Hale Moot Court Honors Program. Students present an oral argument and judge first-year student rounds. Graded CR/NC. *Prerequisite:* LAW 667.

LAW 669 Moot Court Supervision (1-3, max 6, FaSp) Evaluation and supervision of the preparation of briefs and oral arguments in the Hale Moot Court honors competition. Graded CR/D/F.

LAW 670 Advanced Moot Court Oral Arguments (1-3, max 3, Sp) Preparation of oral arguments in approved moot court competitions, such as national and state prize rounds (other than Hale Moot Court Program). Graded CR/D/F.

LAW 671 Advanced Moot Court Briefs (1-3, Sp) Preparation of briefs in approved moot court competitions, such as national and state prize rounds (other than Hale Moot Court Program).

LAW 672 Jessup Moot Court Briefs (1-3, Fa) Students prepare for competition by writing a brief on the issues in a problem that is the basis for the Jessup International Moot Court Competition. Participation is by faculty selection only.

LAW 673 Business Planning II (4) Examines the legal and business skills, concepts and practices, involved in structuring, drafting and negotiating financing, production and distribution deals in the entertainment industry.

LAW 674 Advanced Secured Transactions Workshop (1) Provides hands-on experience in the various tasks typically required in structuring, documenting and closing a personal property secured transaction. *Corequisite:* LAW 642. Graded CR/NC

LAW 675 Mental Health Law (2-4) Studies the important issues at the intersection of law and psychology/psychiatry, both civil and criminal.

LAW 678ab Review of Law and Social Justice Staff (1-4; 1-4) Writing, source-checking, and preliminary editing of articles and comments for publication in the *Review of Law and Social Justice*. For second-year students serving as staff members on the *Review*. Graded CR/D/F.

LAW 679 Review of Law and Social Justice Writing (1-4, max 4) Writing, source-checking, and preliminary editing of articles and comments for publication in the *Review of Law and Social Justice*.

LAW 680ab Review of Law and Social Justice Editing (1-3; 1-4) Supervision of research and writing, and final editing of articles and comments for publication in the *Review of Law and Social Justice*. For officers of the *Review*. Graded IP to CR/D/F.

LAW 681 Analytical Methods for Lawyers (2-4) Teaches important business and economic concepts that will assist with problems lawyers in every practice area routinely encounter.

LAW 682 Jessup Moot Court Oral Arguments (1, Sp) Students prepare oral arguments on the issues in a problem that is the basis for the Jessup International Moot Court competition. Participation is by faculty selection only. Graded CR/D/F. *Prerequisite:* LAW 672.

LAW 683 Client Interviewing and Counseling (2, 3, FaSp) Introduction to a practice-oriented approach to interviewing and counseling clients. Enables students to develop a useful framework for effectively interviewing and representing clients.

LAW 684 Suing the Government (2-4, FaSp) Deals with suits against federal and state governments. Intended for aspiring government workers or representatives of plaintiffs who sue a government official or entity.

LAW 685 Civil Discovery (2-4) Focuses on the discovery phase of pre-trial litigation and many of the skills new lawyers are called upon to use right out of law school.

LAW 686 Civil Rights: The Enforcement of the Constitution (3) Gives students operational significance to the abstractions presented in the Constitutional Law courses by investigating civil rights litigation.

LAW 697 Foreign Relations and National Security Law (2-4, FaSp) This course will examine the statutory, constitutional, and international legal structures that form the base of American diplomacy.

LAW 700 Health Care Regulations (1-4) Regulation of the medical profession; the physician-patient relationship; professional and institutional liability; health care institutions and delivery systems; quality control; access to health care services and problems of distribution and rationing; cost control, including government and

private health care programs; patient rights; antitrust.

LAW 701 Child Interviewing Seminar (1-4) Students learn how to effectively interview child witnesses. Students will practice mock interviews, and may be eligible to conduct actual interviews of child witnesses.

LAW 702 Children, Sexuality and the Law (2-4) Explores laws designed to protect children from sexual abuse and exploitation, with a limited emphasis on foreign and international law for comparative perspective.

LAW 703ab Children's Legal Issues (1-4; 1-4) Students will work on cases in the following areas: (1) Dependent and neglected children: All children who are wards of the court must have legal counsel. (2) Children with AIDS: Legal implications of such issues as health care and custody. (3) Guardianships or other temporary arrangements for children whose parents are terminally ill or are otherwise unable to care for them. Graded CR/D/F.

LAW 704 Poverty Law (2-4, FaSp) An introduction to the problem of poverty in the United States and to the response of government and the legal system to the problems of the poor.

LAW 705 Community Property (1-3) The law of community property, including disposition of property on dissolution of the marriage and questions of conflict of laws. May be offered as a reading course.

LAW 706 Public Health Law (2, 3, 4) Provides an introduction to the legal foundations of the public health system in the United States.

LAW 707 Global Health, Law and Human Rights (1-3) Highlights the complex interactions between health, law and human rights, emphasizing the use of human rights in public health thinking and practice. Duplicates credit in PM 577.

LAW 708 Reviewing and Negotiating Business Contracts (2-4, FaSp) Covers the fundamentals of reviewing and analyzing business contracts and strategies for negotiating business issues with an emphasis on developing practical skills.

LAW 709 Contract Drafting and Negotiation (2-4, FaSp) Contract Drafting and Negotiation will teach students the mechanics of drafting and negotiating sophisticated contracts from a variety of legal disciplines including entertainment law, real estate law and general corporate law.

LAW 710 Contract Drafting and Strategy (2, 3) Students examine contracts and present to the class their assessment of why the specific provisions were drafted and possible alternatives and challenges to those provisions.

LAW 711 Access to Justice Practicum (2-4) Real world advocacy projects involving issues such as civil rights, disability rights, foster care, welfare, and health care, among others.

LAW 712 Negotiation and Mediation Advocacy (2 or 3, FaSp) Develops enhanced negotiation skills and a working understanding of ADR processes and procedures in an interactive classroom experience. (Duplicates credit in LAW 638.) Graded CR/NC.

LAW 713 International Human Rights (2-4, FaSp) This course will address the international law and institutions which have developed since World War II for the protection of human rights.

LAW 714 U.S. Foreign Policy and International Law (1-4) Discusses current U.S. foreign policy challenges and the underlying international legal issues and principles which shape them.

LAW 715 Law and Policy of Alternative Dispute Resolution (2-4) Exploration of the origin, development, and practice of mediation, arbitration and other forms of ADR, emphasizing the policies underlying these increasingly significant and evolving areas.

LAW 716 Race and Gender in the Law (1-4) Investigates the experience of women and people of color as they have encountered legal institutions and processes.

LAW 717 Estate Planning (3, FaSp) Legal and tax considerations important to the lawyer advising his client on the transmission of wealth from one generation to the next.

LAW 718 Sports Law (1-4, Sp) Sports law is a blend of contract, labor, antitrust, agency, tax, intellectual property, tort, civil rights and constitutional law.

LAW 719 Corporate Finance (2-4) Legal and economic aspects of corporate finance including capital structure, policy, mergers, takeovers, and freeze-outs; analysis of policy relating to present law and possible reforms.

LAW 720 Topics in Corporate Law (1-4, max 8, FaSp) Executive malfeasance, shareholder rights, securities class actions, asset securitizations, hedge fund regulation and corporate social responsibility from a theoretical and corporate finance framework.

LAW 721 Class Actions (2) Studies the theory and practice of class action litigation in the United States.

LAW 722 Litigating Land Use Cases (2) Covers leading land use appellate cases, developing and implementing winning strategies with clients, formulating and articulating sensible arguments and rebuffing flawed arguments.

LAW 725 Bioethics and Law (3) Legal, ethical and economic problems of advanced biological technologies, for example, behavior, genetic, and reproductive control; control of the processes of dying; organ transplantation and the use of artificial organs; regulation of scientific research and human experimentation.

LAW 726 Stereotypes, Prejudice, and the Rule of Law (2-4, FaSp) An examination of the role of race (and other markers of social marginality) in the administration of justice in American courts.

LAW 727 Partnerships and Limited Liability Companies (2-4, FaSp) Deals with the formation, features and functions of general partnerships, limited partnerships and limited liability companies. Also focuses on business planning, recognizing business and legal objectives and selecting the appropriate entity to accomplish these objectives.

LAW 732 Bioethics and Law Seminar (1-4, max 8) Covers legal and law-related issues, including constitutional law perspectives, concerning biomedical technologies.

LAW 733 Corporate Reorganization (2 or 3) Reorganization of failing corporations under Chapter XI of the Bankruptcy Act. Claims, protective committees, plans, tax considerations.

LAW 734 Local Government Law (3 or 4) Study and evaluation of the municipal and regional legal institutions. Emphasis on the crises in financing and governing the urban society.

LAW 736 Small Business Clinic I (2-4, FaSpSm) Students provide legal assistance to small businesses, entrepreneurs and non-profit organizations that cannot pay market rates for legal services. Graded CR/NC.

LAW 737 Small Business Clinic II (2-4, Sp) Continuation of Small Business Clinic I. *Prerequisite:* LAW 736.

LAW 739 Reproductive Rights and Justice (4) Students will acquire a basic familiarity with the constitutional rules governing reproductive rights, and with legal and sociolegal theories that interpret and challenge those rules.

LAW 740 Law of the City (3) Reviews and discusses the laws and the lawsuits that shape daily life in the city.

LAW 743 Federal Criminal Law (2-4, max 8) Covered topics include offenses relating to fraud and political corruption, terrorism, narcotics, money laundering, organized crime, false statements and obstruction of justice.

LAW 746 Critical Race Theory (2-4) Intersectionality, destruction and critical historiography; specifically affirmative action in education, hate speech and immigration reform.

LAW 749 Securities Regulation (2-4, Sp) Regulation by state and federal agencies of issuance of, and trading in, stocks, bonds, and other securities. Particular reference to SEC regulations.

LAW 750 Choice of Law (2, 3) Introduces students to the doctrines of choice of law. This field determines which state's law applies when events causing disputes happen in several locations.

LAW 751 Sexual Orientation and the Law (2-4, FaSp) Explores the ways in which American law has responded to the diversity that exists within human sexual orientation.

LAW 752 Digital Media Transactions: Policy and Practice (2) Considers the policy and practice of digital media law in several disciplines including music, social media and other models for online content creation and distribution. Open only to Law School students.

LAW 753 Antitrust Law I (3 or 4) Laws designed to preserve and promote business competition, with heavy emphasis on the federal antitrust laws.

LAW 754 Antitrust and Intellectual Property Law (2-4) Covers the interface between antitrust law and intellectual property law.

LAW 757 Sex, Gender and the Law (1-4, FaSp) Explores law's response to questions of sex discrimination and gender identity and expression, with emphasis upon legal issues facing transgender and intersex persons.

LAW 758 Identity Categories (2-4, FaSp) Drawing on feminist legal theory, critical race theory, and lesbian/gay/bisexual and queer theory, this seminar will explore the treatment of identity categories in United States law.

LAW 760ab Interdisciplinary Law Journal Staff (1-1 or 2, FaSp) Source-checking and preliminary editing of articles and comments for publication in the *Interdisciplinary Law Journal*. For third-year students serving as staff members on the *Journal*. Graded *a*: IP to CR/D/F; *b*: CR/D/F.

LAW 761 Interdisciplinary Law Journal Writing (1-4, max 4, FaSp) Students will write journal notes as members of the *Interdisciplinary Law Journal*.

LAW 762ab Interdisciplinary Law Journal Editing (1-3, Fa; 1-3, Sp) Supervision and final editing of articles and comments for publication in the *Interdisciplinary Law Journal*. Graded IP to CR/D/F.

LAW 763 Federal Courts: The Federal System II (3-5, FaSpSm) Problems of adjudication in a federal system. Allocation of authority between federal and state courts and among Congress, the Executive and the Courts; choice of federal and state law; jurisdiction of federal courts and significant rules of practice.

LAW 764 International Business Transactions (3 or 4) Survey of legal aspects of international trade and investment transactions, including tax considerations.

LAW 765 Topics in Intellectual Property Law (1-4) Analyzes selected contributions to intellectual property scholarship and explores some challenging problems in contemporary intellectual property law.

LAW 766 Writing for Publication Seminar (1-4, max 8, FaSp) Special seminars to provide a forum for students who wish to produce a paper for academic publication to receive guidance and feedback.

LAW 767ab Law Review Staff I (1-1 or 2) Writing, source-checking, and preliminary editing of articles and comments for publication in the *Southern California Law Review*. For second-year students serving as staff members on the *Review*. Graded CR/D/F.

LAW 768 Law Review Writing (1-4, max 4) Writing, source-checking and preliminary editing of articles and comments for publication in the *Southern California Law Review*.

LAW 769ab Law Review Editing (1-3, FaSp) Supervision of research and writing, and final editing of articles and comments for publication in the *Southern California Law Review*. For officers of the *Review*. Graded IP to CR/D/F.

LAW 770 Technology Transactions (2) Provides students with the foundation for advising clients on transactions involving patents, trade secrets and other technology-related rights.

LAW 771 Intellectual Property and Technology Law Clinic I (2-5, Fa) Provides law students with the ability to represent clients (under the supervision of the professor) in cutting-edge issues of intellectual property and technology law. *Corequisite:* LAW 772 or LAW 841. Graded CR/NC.

LAW 772 Intellectual Property (2 or 3) The protection of intellectual property and encouragement of creativity. Explores copyright, trademarks, patents, and selected state law theories.

LAW 773 Internet Law (2-4, Fa) Integration of cyberspace and the Internet into existing legal structures. Topics include: First Amendment issues; intellectual property, privacy and child protection; criminal activity and governance and jurisdictional activities.

LAW 775 Immigration Law (2-5) The development of immigration law to its present state.

LAW 776 Immigration Clinic I (2-5, FaSpSm) Students represent clients before Immigration and Customs Enforcement, the Immigration Court, and certain law enforcement agencies in cases including applications for relief under the Violence Against Women Act, for asylum, and for relief against deportation.

LAW 777 Administrative Law and Regulatory Policy (1-4) Legal principles subject to judicial control and the alternative ways in which agencies can be organized to serve their purposes.

LAW 778 Sales (2-4, FaSp) Analysis of the buying and selling of goods both in domestic and international transactions with a heavy focus on Article 2 of the Uniform Commercial Code.

LAW 779 Regulated Industries (2-4) Provides students with an understanding and an appreciation of regulated industries.

LAW 780 Intellectual Property and Technology Law Clinic II (2-5, FaSpSm) Continuation of LAW 771.

LAW 781 Clinical Internship/Externship I (1-13, FaSpSm) A clinical internship or judicial externship allows a student to gain hands-on legal experience in legal settings. Students will be assigned to a legal services program, government agency, or state or federal judge under faculty supervision. Graded CR/D/F.

LAW 782 Clinical Internship/Externship II (1-13, FaSp) Advanced clinical training/externship. Graded CR/D/F.

LAW 783 General Counsel Practicum (1-2, max 8) Students will work under the direction of an experienced attorney in a general counsel's office. Graded CR/NC.

LAW 784 Theories of International Law (2-4) Explores theories of international law, examining classical and modern ideas of international legal obligations. Students develop their own intellectual structures for explaining international norms.

LAW 786 Core Competencies for Litigators (3) An introduction to the various approaches and techniques litigators use when interviewing, counseling, negotiating, and analyzing facts.

LAW 787 International Sales of Goods (2-4)

LAW 791 Law and Society (2-4) Examines where the law comes from, how it operates in society, and how it shapes and is shaped by competing social economic, and political institutions.

LAW 792 Law and Philosophy (2-4, max 8) Examination of the best scholarly work currently done by legal, moral and political philosophers. Open only to law students.

LAW 793 Law and Economics Seminar (1-4, max 8) Key concepts and cutting-edge research in law and economics. Workshops with leading scholars from around the country.

LAW 795 Law of the Political Process (2-4, max 8) Examines the state and federal laws regulating the political process and related Constitutional issues.

LAW 796 Immigration Clinic II (2-5, Sp) Continuation of LAW 776. Enrollment restricted to law students.
Prerequisite: LAW 776.

LAW 797 Public Policy in Law: Analysis and Advocacy (1-4) Focuses on contemporary policy problems, identifies relevant legal issues and utilizes multidisciplinary techniques found in law, political science, economics and history to formulate positions.

LAW 798 Law, Mental Health and Ethics (2-4, max 8, FaSp) Focuses on one or two topics per year at the intersection of law, mental health and ethics and explores them from an interdisciplinary perspective.

LAW 801 Venture Capital Law and Finance (2) Introduces students to the unique legal and financial aspects of the venture capital industry and the skills needed to represent entrepreneurs and venture capital investors. *Prerequisite:* LAW 603; *corequisite:* LAW 681 or LAW 719.

LAW 802 Psychology for Lawyers (2, 3) Exposes students to the psychological research on cognitive errors and biases that threaten to compromise a lawyer's performance. Also examines ethical issues and professional happiness.

LAW 808 Medical-Legal Community Partnership Seminar and Practicum (1-4)
Medical and law students, in conjunction with public policy advocates, work together to identify and improve health outcomes for vulnerable populations.

LAW 809 Deposition Strategies and Techniques (2, 3) Emphasizes strategies and tactics in asking and objecting to questions at a deposition in a civil case. Students will conduct mock depositions.

LAW 810 Patent Law (3-4, Sp) Patent laws, litigation, and the process of prosecuting the patent application. The concept of invention and ownership of rights under patents.

LAW 811 Health Law and Policy (2-4) Explores the statutes and regulations that govern the health care system and the policies that shape its development.

LAW 812 Patent Litigation (3, Fa) Provides students with a deep immersion into federal court litigation, with a focus on effective oral and written advocacy in the context of patent litigation.

LAW 813 Arbitration in the United States (3) Introduces students to the range of issues addressed by the Federal Arbitration Act and state arbitration laws.

LAW 814 Current Issues in Alternative Dispute Resolution (1) Examines the current issues and topics that practitioners face when seeking to resolve conflicts with the help of ADR.

LAW 815 Deals (3-4) Examines the collaboration between business people aiming to accomplish a goal and lawyers translating their business objectives into contract language to achieve the goal.

LAW 816 Dealmaking in the Entertainment Industry (1-2) Examines the major components of deals in the entertainment industry, and provides students the opportunity to learn real-world negotiating skills in the process.

LAW 817 International Laws and Institutions (1) Examines methods of dispute resolution used in other countries and compares them to those employed in the United States.

LAW 819 International and Domestic Ethics in ADR (2) Provides law students, lawyers and professional neutrals with an in-depth examination of the rules guiding our behavior in various dispute resolution processes. Open only to law students.

LAW 820 Pretrial Advocacy (3 or 4) Examines conceptual and practical aspects of interviewing, counseling, negotiation, settlement, drafting, and formal advocacy in the handling of legal cases.

LAW 821 Trial Advocacy (3 or 4, FaSp) Examines decision-making by counsel in the litigation of cases. Emphasis is given to decisions involving tactics and strategies and their implications for the functioning of legal institutions and substantive doctrine. Extensive use of simulated trial practice exercises.

LAW 822 Alternative Dispute Resolution Clause Drafting (1) Explores a variety of contract provisions, and teaches students the important drafting skills necessary to achieve a client's goal.

LAW 823 Statutory Interpretation (2 or 3) Examines the change and evolution of law to discover its political roots and the ways policy making branches work to make and implement law.

LAW 824 Arbitration Advocacy (1) Helps students understand the basic approaches to preparing and presenting cases in the arbitration context.

LAW 827 Counseling the Startup Company (2-4, Sp) Role of the attorney in startup firms: business plan, employment agreements, lease, stock option plan, financing documents and distribution and strategic partnership arrangements.

LAW 839 Advanced Copyright Law (2-4) Study of federal copyright law, analysis of property rights and interests created thereunder. Manner in which these rights can be exploited in the various entertainment media. *Prerequisite:* LAW 772 or LAW 841.

LAW 840 Copyright and Fictional Characters (2-4) Involves the treatment of fictional characters by the courts and in new media and the fundamental copyright concepts that have shaped that treatment.

LAW 841 Copyright, Trademark and Related Rights (3) An introductory survey of statutory and case law, and underlying policy issues, concerning copyright, trademark and certain related legal rights.

LAW 842 Partnership Taxation (2-4)

LAW 843 Tax Policy Seminar (2-4) Students will write and present papers discussing topics in tax policy.

LAW 846 Mathematical Modeling of Law and Society (2-4) Explores the use of mathematical modeling as a way of describing the dynamic relationships between legal regulation and the social behavior that law regulates.

LAW 847 Refugee and Forced Migration Law (2-4) Examines refugee law and forced migration, including the causes and consequences of forced migration and the responses to forced migration.

LAW 849 International Human Rights Clinic I (4-5) Students work under close faculty supervision on cases and projects that involve the application of international law to address human rights violations.

LAW 850 International Human Rights Clinic II (4 or 5) Continuation of the International Human Rights Clinic. *Prerequisite:* LAW 849.

LAW 851 Topics in Criminal Law and Criminology (1-4, max 8, FaSp) Selected topics in criminal law or criminology. May be repeated with permission of the instructor as topics vary.

LAW 854 Legal Design Lab (3) Students work in teams to develop innovative ways of addressing shortcomings in our legal systems to improve access, quality, efficiency and global integration and prosperity.

LAW 855 Topics in Maritime and Admiralty Law (2-4, max 6, FaSp) Taught in honor of James Ackerman, USC Law graduate of 1948, this class examines selected topics in maritime and admiralty law. May be repeated with permission of the instructor as topics vary.

LAW 856 Transnational Human Rights Litigation (1-4, Fa) Provides an introduction to the legal and political issues raised by cases involving international human right violations.

LAW 859 Regulation of Telecommunications (2-4, FaSp) Concentration on the regulation of broadcast television, cable television, telephone, and spectrum management.

LAW 860 International Criminal Law (4) Covers the prosecution, trial and punishment of individuals suspected of crimes considered among the most serious violations of international humanitarian and human rights law.

LAW 861 International Law Seminar (2-3, max 6, Sp) Investigation of selected problems of international law. May be repeated with permission of the instructor as topics vary.

LAW 862 Iraqi Refugee Assistance Project Seminar (1-4, max 8) Formally instructs students on U.S. and international refugee law and policy regarding the Iraqi refugee humanitarian crisis. Graded CR/D/F.

LAW 863 International Negotiations and Mediation (2-4) Introduction to negotiation and mediation from an international perspective. Development of essential skills for effective client representation in negotiation and mediation.

LAW 864 International Insolvency (1-4) Deals with multi-jurisdictional insolvency. Examines the insolvency laws of several different countries as well as Chapter 15 of the U.S. Bankruptcy Code and other issues.

LAW 865 Legislative Policy Practicum (3) Provides students with an opportunity to participate in real-world advocacy on juvenile justice issues.

LAW 866 Counterterrorism, Privacy and Civil Liberties (2-4, FaSpSm) Explores the spectrum of interrelated legal and policy issues known as “homeland security” since the events of September 11, 2001.

LAW 867 Corporate Fraud (2-4, FaSpSm) Introduces law students to the real world issues of major civil and criminal corporate fraud.

LAW 868 Business Enterprise Taxation (2-4, FaSp) Examination of the taxation of corporations, partnerships, and limited liability companies.

LAW 870 Legal Writing Fellows (1-4, max 7, FaSpSm) Assist in teaching writing and advocacy. Responsibilities include helping prepare lesson plans and drafting writing assignments and sample answers; leading class exercises; and judging first-year moot court practice rounds. Graded CR/D/F.

LAW 871 First Amendment (2-4, FaSp) Freedom of expression (political speech, symbolic expression, obscenity, commercial speech, defamation), rights of access to the media, religious protection and prohibition of establishment of religion.

LAW 872 Advanced Legal Writing and Advocacy: Appellate Advocacy (1-4, FaSp) Students will research, write, and rewrite an appellate brief and may work on motions and oral advocacy as well.

LAW 873 Judicial Opinion Writing (2-4) Students write a majority opinion and a dissenting opinion based on cases pending before the U.S. Supreme Court. This is a writing-intensive course.

LAW 874 Media Law in the Digital Age (2-4) Explores the interplay between the law, politics, and media, particularly mass media, in the digital age.

LAW 875 Constitutional Theory Seminar (1-4) Seminar course devoted to different methods of reading the Constitution.

LAW 877 Major Trends in American Legal Thought (1-3) Survey of major trends in American legal thought.

LAW 878 Evolutionary Game Theory and the Law (1-3) Uses the Evolutionary Game Theory methodology to explore the dynamics of cooperative interaction among people, and the role that legal punishment plays.

LAW 880 Treating Difference Equally (2-4) Comparative look at the legal treatment of religious, cultural, gender and sexual differences and differences in physical and mental ability.

LAW 881 Constitutional Innovation (2-4) Examines the U.S. Constitution in transnational perspective. The focus is democracy; slavery, emancipation, and freedom; empire; and governmental structures.

LAW 882 Advanced Legal Writing for Pretrial Practice (2) Hone written advocacy skills for pretrial litigation practice. Draft motions, letters, and other communications to court, opposing counsel, and client. Practice oral communication through exercises.

LAW 883 Advanced Legal Writing for International Business Lawyers (2) Develop communication skills for international transactional practice. Practice drafting memoranda, letters, and other communications to partners, clients, and other attorneys. Practice negotiation in intercultural setting.

LAW 884 Constitutional Law: Equality and Liberty (3-4) Focuses on individual rights and liberties, with special attention paid to equal protection and substantive due process.

LAW 886 Justice and the Foundations of Liberalism (1-4) Discusses John Rawls' *A Theory of Justice* (1971), critical reactions to it and some possible extensions of Rawls' theory of justice.

LAW 888 First Amendment: Law and Religion (1-3) Explores the laws that govern and affect religious groups and religious belief-systems and religious experience in the United States.

LAW 889 Law Informed by Faith (2-4) Considers the role of faith in a lawyer's life and work. Discusses issues in constitutional law, tort law, criminal law, professional responsibility and more. (Duplicates credit in LAW 748.)

LAW 890 Directed Research (1-4) Directed Research may be taken only with the approval of the Administrative Board. This course is intended for substantial independent research and study that does not result in a paper of publishable quality. It includes, but is not limited to, preparation of research memoranda for faculty research projects, empirical research for such projects, and supervised independent study. Directed research is to be supervised by a regular, full-time faculty member (including full-time visiting faculty). Students may take a maximum of 4 units of Directed Research during their educational experience at the law school.

LAW 891 Post-Conviction Justice Seminar I (1-5, max 5, Fa) Examines the substantive rights of federal prisoners with respect to parole, sentencing, validity of conviction and conditions of confinement and the procedural mechanisms by which to enforce those rights. Under faculty supervision, students provide legal assistance to federal inmates in administrative and judicial proceedings. Graded CR/D/F.

LAW 892 Post-Conviction Justice Seminar II (1-5, max 5, Sp) Continuation of LAW 891. *Prerequisite:* LAW 891.

LAW 893 Advanced Clinical Training (1-5, max 10, FaSp) For third-year students who wish to continue their clinical training.

Keck School of Medicine of USC

Students speak with a faculty member at the Keck School of Medicine of USC. The Keck School is adjacent to the Los Angeles County+USC Medical Center — one of the largest teaching hospitals in the United States. Keck’s faculty, students and residents serve more than one million patients each year through the Los Angeles County+USC Medical Center, the USC Norris Cancer Hospital, the Keck Hospital of USC, Children’s Hospital Los Angeles, and a network of USC-affiliated hospitals throughout Southern California.

Founded in 1885, the Keck School of Medicine of USC is part of Keck Medicine of USC, a major center of medical research, education and patient care with more than 1,500 full-time faculty members and a voluntary faculty of more than 4,000 physicians. Faculty includes national leaders in each of its 25 clinical and basic science departments. Located on the university’s 30.8-acre Health Sciences Campus three miles northeast of downtown Los Angeles, the Keck School is adjacent to the Los Angeles County+USC Medical Center, one of the largest teaching hospitals in the United States.

The Keck School’s faculty, students and residents serve more than one million patients each year through the Los Angeles County+USC Medical Center, the USC Norris Cancer Hospital, the Keck Hospital of USC, Children’s Hospital Los Angeles, USC Verdugo Hills and a network of USC-affiliated hospitals throughout Southern California. More than 500 faculty physicians care for patients with complex medical needs as well as provide primary care.

The new Eli and Edythe Broad CIRM Center for Regenerative Medicine and Stem Cell Research of USC, which opened in the fall of 2010, joins the Harlyne J. Norris Cancer Research Tower and USC Zilkha Neurogenetic Institute in providing state-of-the-art facilities for important scientific discovery. With more than \$248 million in total federal research support, the Keck School ranks among the top U.S. medical schools in federal funding.

The Keck School of Medicine of USC is at the forefront of medical education and was among the first medical schools to adopt Introduction to Clinical Medicine courses for first-year students, providing direct experience in patient care from the start.

Administration

Carmen A. Puliafito, M.D., MBA, Dean, May S. and John Hooval Dean’s Chair in Medicine

Ted J. Budge, M.S., Senior Associate Dean, Chief Operating Officer

Thomas A. Buchanan, M.D., Vice Dean, Research

Henri R. Ford, M.D., MHA, Vice Dean, Medical Education

Judy Garner, Ph.D., Vice Dean, Faculty Affairs

D. Brent Polk, M.D., Vice Dean, Clinical Affairs (CHLA)

Melany Duval, B.A., *Senior Associate Dean and Associate Vice President for Health Sciences Development*

Donna D. Elliott, M.D., Ed.D., *Senior Associate Dean, Student and Educational Affairs*

Deborah Fullerton, MBA, *Senior Associate Dean and Associate Vice President, Public Relations and Marketing*

Lili Delcampo, J.D., *Associate General Counsel for Health Sciences*

Raquel D. Arias, M.D., *Associate Dean, Admissions*

Glenn Ault, M.D., *Associate Dean for Clinical Administration (LAC+USC Medical Center)*

Ronald Ben-Ari, M.D., *Associate Dean, Continuing Medical Education, and Assistant Dean, Curriculum*

Peggy Farnham, Ph.D., *Associate Dean, Graduate Affairs (Ph.D. Programs)*

Inderbir Gill, M.D., *Associate Dean, Clinical Innovation*

Stephanie Hall, M.D., *Associate Dean, Clinical Affairs (Keck Medical Center)*

Laura Mosqueda, *Associate Dean, Primary Care*

Elahe Nezami, Ph.D., *Associate Dean, Graduate Affairs (Undergraduate, Master's and Professional Degree Programs)*

Lawrence M. Opas, M.D., *Associate Dean, Graduate Medical Education*

Michele T. Pato, M.D., *Associate Dean, Academic Scholarship*

Pamela Schaff, M.D., *Associate Dean, Curriculum*

Uttam Sinha, M.D., *Associate Dean, Surgical Simulation*

Maura Sullivan, Ed.D., *Associate Dean, Stimulation Education for Health Sciences*

Stuart P. Swadron, M.D., *Assistant Dean, Pre-health Undergraduate Studies*

Paul M. Thompson, Ph.D., *Associate Dean, Bioinformatics Research*

Rohit Varma, M.D., MPH, *Associate Dean, Strategic Planning and Community Network Development*

Althea M. Alexander, *Assistant Dean, Student Diversity*

David Baron, D.O., M.S.Ed., *Assistant Dean, Global Relations*

Gerhard Coetzee, Ph.D., *Assistant Dean, Research Integrity*

Cha-Chi Fung, Ph.D., *Assistant Dean of Educational Affairs*

Tatum Korin, Ed.D., *Assistant Dean of Graduate Medical Education*

Joyce Richey, Ph.D., *Assistant Dean, Educational Affairs*

Frank R. Sinatra, M.D., *Assistant Dean, Faculty Development*

Darcy Spicer, M.D., *Assistant Dean, Clinical Research Studies*

Sajjad Yacoob, M.D., *Assistant Dean, Student Affairs*

Keck School of Medicine

Admissions

Doctor of Medicine

Keith Administration Building 100B

1975 Zonal Avenue

Los Angeles, CA 90089-9021

(323) 442-2552

FAX: (323) 442-2433

Associate Dean, Admissions: Raquel D. Arias, M.D.

The Keck School of Medicine of USC Committee on Admissions is responsible for selecting members of the entering class. The committee comprises both faculty and students. The committee reviews candidates whose academic achievement, commitment to service and personal qualities distinguish them from the many thousands of applicants who apply.

The applicant's undergraduate major may be in any subject area from an accredited college or university. Although sound preparation in the basic sciences is essential, a background in the humanities, and depth and breadth of personal experience are also important.

General Admissions Information

The Keck School of Medicine of USC participates in the centralized American Medical College Application Service (AMCAS) and also requires the submission of the Keck School of Medicine supplemental application.

Approximately 7,500 applications are received per year and 750 applicants receive interview invitations.

Interviews begin in mid-September and end in early March. Students receive acceptance letters beginning in October.

Requirements

All applicants to the Keck School of Medicine of USC M.D. degree program must have completed a baccalaureate degree, or its equivalent, from an accredited college or university prior to matriculation. The school has no specific course requirements. Strong applicants will have distinguished themselves in their chosen field of study and have demonstrated competency in the sciences at the time of their application. The Medical School Admission Requirement (MSAR) guide may be referenced for recommended course work. The Medical College Admissions Test (MCAT) is required, and scores must be from within the previous three years of the date of matriculation.

International applicants must hold a degree considered equivalent to a U.S. bachelor's degree as evaluated by the USC Office of Graduate and International Admissions.

Individuals who have discontinued studies in medical school for academic reasons are not eligible to apply to the Keck School of Medicine of USC.

Medical College Admission Test (MCAT)

The MCAT is required of all applicants. Applicants to the entering class are required to take the MCAT within the previous three years of the date of matriculation and no later than August in the year that the application becomes available. Scores from administrations of the examination taken outside of this time period will not be accepted.

Applications

The Keck School of Medicine of USC participates in the American Medical College Application Service (AMCAS). AMCAS reproduces and distributes an application and standardized academic record to participating medical

schools designated by the student. Applications are submitted electronically at www.students/applying/amcas.

Applications are available after June 1 for the class entering in August of the following year. Applications to USC must be returned to AMCAS before November 2, but earlier application is encouraged.

The Committee on Admissions reviews all information submitted on the AMCAS application as well as the school's supplemental application. The nonrefundable supplemental application fee is \$100.

Personal Interviews

Personal interviews are a required aspect of the application process. Interviews are conducted at the Keck School of Medicine on the Health Sciences Campus of the University of Southern California.

Notice of Acceptance

Notices of acceptance will be sent to successful candidates beginning in October until the class is filled. Since Keck uses a rolling admissions process, it is highly recommended to submit a completed application early in the cycle. If not chosen for an interview, candidates are usually notified by March of the application year.

Candidates must reply to an offer of admission and agree to the Essential Characteristics and Abilities Required for the Completion of the MD Degree within 10 business days of receiving the offer of admission. A letter of withdrawal, via email or post mail, is required if students wish to relinquish their place in the class; release is granted automatically when the letter is received.

M.D./Ph.D. Program

The Keck School of Medicine has developed an M.D./Ph.D. program designed for individuals who aspire to a career in academic medicine or a leadership role within the biomedical industry. Students are expected to acquire the modern skills that are required for physician competence. Additionally, the M.D./Ph.D. program provides an opportunity for the development of research expertise and academic excellence while fulfilling the requirements for a Ph.D. degree.

A joint program between the Keck School of Medicine and the California Institute of Technology (Caltech) was established in fall 1997 for the granting of the M.D./Ph.D. degree. Ph.D. studies may be carried out at Caltech or through collaboration between two laboratories at both institutions. The M.D. will be awarded from the Keck School of Medicine and the Ph.D. will be awarded from Caltech.

The M.D./Ph.D. executive committee is responsible for selecting students for the M.D./Ph.D. program. Members of the committee review the qualifications of each applicant, including MCAT scores, academic performance, letters of recommendation and research experience. The committee interviews candidates and then selects students for admission to the program. All applicants to the joint program interview at Keck School of Medicine and the California Institute of Technology.

General Information

The M.D./Ph.D. program enrolls three to six students annually. Students have the option of doing the Ph.D. at USC or Caltech. Each student accepted to the program must also be accepted to the Keck School of Medicine. All positions are fully funded.

Requirements

Admission requirements for the M.D./Ph.D. program are those of one of the graduate programs at Caltech, the Keck School of Medicine and USC. Students select the program of their choice during the first two years of the medical curriculum; descriptions of these programs are available from each department or program and Caltech.

Graduate Record Examinations (GRE)

To assist the M.D./Ph.D. Committee in its evaluation of candidates, applicants to the M.D./Ph.D. program are encouraged to provide recent GRE scores. The committee does not, however, require GRE scores in order to consider an application.

Applications

Applicants to the Keck School of Medicine are advised to request information about the M.D./Ph.D. program at the time of application. In addition to completing the medical school application, applicants should indicate their interest in the M.D./Ph.D. program.

Students who are currently pursuing the medical curriculum at the Keck School of Medicine may apply to the M.D./Ph.D. program by contacting: M.D./Ph.D. Program, Keck School of Medicine, 1975 Zonal Avenue (KAM 200), Los Angeles, CA 90089-9023; (323) 442-2965, FAX: (323) 442-2318.

Personal Interviews

All applicants are screened by members of the M.D./Ph.D. Executive Committee; candidates who meet the basic criteria of the program are then invited to be interviewed by members of the committee and faculty at USC and Caltech.

Notice of Acceptance

Students selected for acceptance to the M.D./Ph.D. program are notified between November and May of each year. Students begin their program in the fall semester and register for courses in the medical curriculum at that time.

Further information about the M.D./Ph.D. program at the Keck School of Medicine may be obtained by contacting: M.D./Ph.D. Program, Keck School of Medicine, 1975 Zonal Avenue (KAM 200), Los Angeles, CA 90089-9023; (323) 442-2965, FAX: (323) 442-2318; email: [✉ med.mdphdpgm@med.usc.edu](mailto:med.mdphdpgm@med.usc.edu).

Graduate Degree Programs

Admission standards for these curricula are established jointly by the Keck School of Medicine, its participating programs and the Graduate School.

Applicants to graduate degree programs offered at the Keck School of Medicine must meet the general criteria for acceptance to the Graduate School. Each participating program may have additional requirements for application. The programmatic requirements for the Keck School of Medicine's graduate programs are detailed in the Graduate Degree Programs section.

Further information about graduate degree programs at the Keck School of Medicine may be obtained by contacting: Office of the Associate Dean for Graduate Studies, Keck School of Medicine, 1975 Zonal Avenue (KAM 409), Los Angeles, CA 90089-9023; (323) 442-1607, FAX: (323) 442-1199.

Keck School of Medicine

Tuition and Fees

The tuition and fees listed below are estimated for fall semester, 2013. All fees are subject to change without notice by action of the University of Southern California Board of Trustees. The university reserves the right to assess new fees or charges. Tuition is not refundable; late registration fees are mandatory and cannot be waived.

Tuition for each semester of the medical school curriculum is due and payable at the beginning of the semester. Registration is not permitted after the third week of instruction. Late payment of tuition is subject to a mandatory late fee. Average budgets for medical students will vary according to their year in the curriculum. Sample budgets for Year I, Year II, and the Junior/Senior Continuum may be requested from the Office of Financial Aid. Tuition, mandatory fees and parking are the same for all years.

Tuition for courses of the graduate curriculum is based upon the number of units assigned to each course. The Graduate Degree Programs section provides a department-by-department list of graduate course titles; the number following each title indicates the number of units for which tuition is charged. Late payment of tuition is

subject to a mandatory late fee.

Required Fees (Estimated)

Academic Year Tuition (two semesters)	\$54,662
Graduate Tuition (per unit)	1,602
Student Health Service Fee (annual)	545
Student Programming Fee (graduate)	80
Student Services Fee	20
Norman Topping Scholarship Fee	16
Health Insurance	1,712
Annual Dental Rate	136
Malpractice Insurance	25 (per academic year)
Disability Insurance	51 (per academic year)

Optional Fees

Parking fee, per semester (see Tuition and Fees).

Keck School of Medicine

Grading and Evaluation

The Keck School of Medicine employs a system of evaluation and grading designed to encourage student self-reliance, to stimulate the student's independent quest for knowledge and to promote excellence in academic achievement.

For courses of the medical curriculum, the Keck School of Medicine does not award numerical or letter grades. The evaluation process leading to a pass or fail grade is based on performance of the student in relation to announced course criteria. Throughout medical school, students will be evaluated on their fund of knowledge, problem-solving ability, professional behavior, relevant personality traits and clinical and interpersonal skills. Additional information on grading and evaluation is contained in the handbook provided to every enrolled medical student.

Faculty instructors are responsible for establishing evaluation criteria appropriate to the objectives of each course, discipline and clerkship, and for specifying the manner in which evaluative information is to be gathered. Instructor comments on student performance form an integral part of a student's total evaluation. For each evaluation, descriptive comments based on the student's overall performance in relation to course criteria are submitted for permanent file to the office of the senior associate dean for student affairs, and educational affairs, together with performance reports.

The student's permanent file is used to prepare a letter from the senior associate dean of Student Affairs and Educational Affairs of the Keck School of Medicine, which accompanies student applications for internships and residencies. These records are maintained by the Office of Student Affairs; students may review their records during regular office hours by scheduling an appointment. During the lifetime of the physician, the permanent student record may be consulted as evidence of completion of the required curriculum and as certification for licensure.

Grading and evaluation policies for graduate degree programs and for joint M.D./Ph.D. degrees are established in conjunction with the Graduate School. In general, courses taken in partial fulfillment of graduate degree

requirements receive letter grades that are recorded by the university.

Keck School of Medicine

Degrees and Requirements

The Keck School of Medicine and its departments offer types of curricula leading to award of: the Doctor of Medicine; joint M.D./Ph.D.; joint M.D./MBA; joint M.D./MPH; M.D./M.S., Global Medicine; a Master of Academic Medicine, MAM; Global Medicine, M.S.; Pharm.D./M.S., Global Medicine; Global Health, B.S.; Health Promotion and Disease Prevention Studies, B.S.; graduate degrees in conjunction with the Graduate School in Applied Biostatistics/Epidemiology, M.S.; Biochemistry and Molecular Biology, M.S.; Biostatistics, M.S., Ph.D.; Cancer Biology and Genomics, Ph.D.; Cell and Neurobiology, M.S.; Clinical, Biomedical and Translational Investigations, M.S.; Development, Stem Cells, and Regenerative Medicine, Ph.D.; Epidemiology, Ph.D.; Experimental and Molecular Pathology, M.S.; Medical Biology, Ph.D.; Molecular Epidemiology, M.S., Ph.D.; Molecular Microbiology and Immunology, M.S.; Molecular Structure and Signaling, Ph.D.; Nurse Anesthesia, M.S.; Physiology and Biophysics, M.S.; Psychology and Public Health, Ph.D./MPH; Stem Cell Biology and Regenerative Medicine, M.S.; Integrative Biology of Disease, Ph.D.

The Department of Family Medicine has one academic division: the Division of Physician Assistant Studies, which offers the Master of Physician Assistant Practice.

The Department of Preventive Medicine has two academic divisions: the Health Behavior Research Division, which offers a B.S., Global Health; B.S., Health Promotion and Disease Prevention Studies; B.S., Global Health/Master of Public Health; B.S., Health Promotion and Disease Prevention Studies/Master of Public Health; Master of Public Health; Pharm.D./Master of Public Health; Ph.D., Physical Therapy/Master of Public Health; Ph.D., Preventive Medicine (Health Behavior Research); and the Biostatistics Division, which offers M.S. programs in Biostatistics, Molecular Epidemiology, and Applied and Biostatistics/Epidemiology. The division also offers Ph.D. programs in Biostatistics, Epidemiology, and Molecular Epidemiology.

In addition, departments of the school have certificate programs in certain medical specialties.

The Medical Education Committee (MEC) is responsible for overall planning of the medical school curriculum. Separate curriculum committees plan and supervise the instructional programs for each year of medical school. Each of the committees includes student representatives and faculty members from the departments involved in each year's teaching program.

The curriculum of medical education at USC continues to emphasize preparation of the student to give optimal patient care. Students are progressively involved in patient care beginning with their first semester. The curriculum is patient-oriented, and students are expected to assume increasing responsibility for patient care as they acquire sufficient knowledge and skills. During the clinical experiences of the Junior/Senior Continuum students eventually attain a level equivalent to that of an intern.

At the same time, the school recognizes that the explosion of knowledge and techniques brought about by the current "biotechnology revolution" is rapidly altering the practice of medicine. During the four years of medical school, students cannot be taught all that will be needed for the practice of medicine — either now or in the years ahead. To a far greater degree than in the past, the present curriculum encourages students to acquire skills and habits of self-education and self-instruction that will prepare them for lifelong learning.

The faculty of the school recognize that while most students will eventually practice medicine, some will choose an academic research career. The plan of medical education fosters the development of individuals whose careers may be directed along this path. Faculty are available to counsel and encourage research participation by students during their medical school training.

The curricula of the Keck School of Medicine and its departments acknowledge the crucial place of basic medical science in the advance of modern clinical practice. Both basic and clinical science are taught throughout the four

years of the undergraduate medical curriculum. Basic science is taught both as pure basic science and in correlation with clinical science. In addition, a number of the school's departments cooperate with the USC Graduate School to offer degree courses leading to the award of the Master of Science and Doctor of Philosophy. Most of these graduate courses may also be taken as part of the school's joint M.D./Ph.D. program.

Keck School of Medicine

Degrees and Requirements

Doctor of Medicine

The Keck School of Medicine awards the Doctor of Medicine to enrolled students who have satisfactorily completed the four-year curriculum of the school. This curriculum integrates instruction in all departments of the school: Department of Anesthesiology, Department of Biochemistry and Molecular Biology, Department of Cell and Neurobiology, Department of Dermatology, Department of Emergency Medicine, Department of Family Medicine, Department of Medical Education, Department of Medicine, Department of Molecular Microbiology and Immunology, Department of Neurological Surgery, Department of Neurology, Department of Obstetrics and Gynecology, Department of Ophthalmology, Department of Orthopaedics, Department of Otolaryngology — Head and Neck Surgery, Department of Pathology, Department of Pediatrics, Department of Physiology and Biophysics, Department of Preventive Medicine, Department of Psychiatry and the Behavioral Sciences, Department of Radiation Oncology, Department of Radiology, Department of Stem Cell Biology and Regenerative Medicine, Department of Surgery and Department of Urology.

The sections that follow provide a synopsis of the emphases and organization of this four-year curriculum.

Years I–II (two academic years)

The curriculum is designed to enhance the students' understanding of the basic sciences and their relevance to clinical medicine. The methodology used will improve students' problem-solving and independent study skills. Curriculum themes are delivered in a case-centered format with the integration of small-group learning sessions, directed independent study and newer instructional technologies emphasized.

Year I–II begins in the first semester with Foundations of Medical Sciences followed by organ system review ending with Integrated Case Study section. There is an eight-week summer break between the first and second years. Students also take Clinical Translational Research (CTR), Evidence Based Medicine (EBM), Introduction to Clinical Medicine (ICM) and Professionalism and the Practice of Medicine (PPM).

Each week of the academic year is composed of approximately 20 hours of lecture and small group sessions with an additional 20 hours of independent directed study, CTR, EBM, ICM and PPM. Examinations in all systems throughout the first two years are graded Pass/Fail. Dean's recognition is awarded on the basis of year-end comprehensive examinations and special projects.

Foundations of Medical Sciences (FMS)

This 19-week introductory system provides the student with the fundamental knowledge necessary for the integrated study of the basic and clinical sciences in the human organ systems. Foundations of Medical Sciences is divided into three sections: FMS I, II and III. The overarching goal for these sections is the use of knowledge of medical science to describe basic concepts relating to the structure and function of the human body in normal and diseased states, and thus, provide a foundation for comprehending the disease-specific content required to achieve the case-based objectives in subsequent organ systems.

Gross Anatomy

Cadaver dissection remains a unique teaching tool by which the three dimensional organization of the human body is studied. Gross Anatomy will begin in the Core Principles of health and disease system with the dissection of the body wall and major body cavities followed by head and neck dissection in the neurosciences system,

limbs, dissection during the musculoskeletal system and pelvic cavity dissection in reproduction system. Continued study of gross anatomy by use of prosected anatomical specimens as well as computer programs, selected review lectures, and so on, continues throughout the integrated organ systems.

Introduction to Clinical Medicine (ICM)

ICM expresses the strongly patient-centered orientation of the medical school curriculum. The student is introduced to patients and is involved in patient care activities from day one. Students are introduced to the principles of patient care and management and examine what it means to be a physician and how one becomes a physician.

The major content areas of the course include communication in the setting of illness, the unified concept of health and disease (the biopsychosocial model), basic clinical skills and the correlation of basic science with clinical medicine.

ICM emphasizes the systematic acquisition of the clinical skills of interviewing, history taking, physical examination, elementary clinical problem solving and medical record keeping. Throughout the Year I–II continuum, the ICM clinical skills curriculum is integrated with basic science instruction. Students can therefore learn and apply basic science knowledge in the clinical setting. By encouraging a thorough understanding of the direct applications of basic science research to modern clinical medicine, instructors motivate the student to learn, use and retain more of the content and concepts presented in the basic science portions of the curriculum.

A group of five or six students spends from four to eight hours each week with an instructor from the clinical faculty who remains with the group for one to two years. As the group deals with basic medical themes (death, pain and helplessness) and issues (patient responsibility, learning to live with ambiguity and uncertainty), instructors help students to cope with their own feelings. This format opens the door for student-faculty interaction and improvement of student-faculty communication.

Instructors encourage students to take advantage of the learning experiences provided by their roles as helping and therapeutic persons. Students develop their ability to communicate with patients in the setting of illness and are guided by patient concerns to enhance their own growing knowledge, skills, abilities and responsibilities. Students are expected to acquire skills and habits of self-education and self-instruction that will prepare them for lifelong learning.

The unified concept of health and disease presented in this course enables students to comprehend the human organism in all its complexity. Using their clinical experiences as a teaching model, students are taught to consider the patient as an integrated whole and to view the patient's illness or disease as more than simply a disruption of physiologic processes or a collection of physical findings.

Additional learning experiences occur through workshops and focus experiences. ICM workshops provide standardized instruction in history taking and physical examination, as well as integrated instruction in areas that cross disciplines. These include physician well-being, substance abuse, domestic violence, and ethics. Through focus experiences, students are encouraged to explore a variety of practice environments as well as community-based health and social services. For example, students may visit outpatient clinical settings, a geriatrics long term care facility, a hospice care facility or homeless services organizations.

Professionalism and the Practice of Medicine (PPM)

The purpose of the PPM course is to create a community and social context to provide, identify and facilitate learning from professional role models for students throughout the first two years of the medical school curriculum, as well as to help students gain skills and competence in the areas of communication, the social and community context of health care, ethical judgment, self-awareness and reflection, self-care and personal growth, professionalism, cultural competence, and lifelong learning. The curriculum is dynamic and interactive, allowing for much small-group discussion and participation. Students are encouraged to work collaboratively and enhance small-group skills, in order to improve their participation in Introduction to Clinical Medicine (ICM), Gross Anatomy, MDL laboratories and large-group sessions, as well as to prepare them for the team work of their clinical years.

The PPM course sessions meet on Monday afternoons, typically for two hours per session. The students meet in groups with two faculty members, who serve as their mentors throughout the first year of their pre-clinical

education; at least one mentor is a clinician. The clinical faculty comes from multiple disciplines within Keck and the local community. While the course features large lectures, there is a great emphasis on small-group learning acquired from community leaders, faculty-mentored small-group discussions, student presentations and student-led sessions.

The students participate in a core curriculum in Year I, which includes general topics such as cultural competence, ethics, health care policy and finance, professionalism, and empathy. In Year II, the students are allowed to select from nine different areas of interest (selectives), and meet in groups with faculty having expertise in the given area. Examples of selectives presented include advanced ethics, medicine and the mind, spirituality and medicine, medical arts and humanities, global health, complementary and alternative medicine, medicine's intersection with technology, physicians operating outside their comfort zones, and the future of health care.

The PPM course provides students with an opportunity to build a professional identity, develop relationships with faculty mentors, and increase team-building and community-building skills. Students receive an introduction to the concepts of professionalism and ethics, with a better understanding of their real-world implications. The PPM course encourages leadership while engaging in the process of learning, characterized by presentations within both small and large groups, as well as professional development through exposure to multiple professional, ethical, and cross-cultural scenarios, cases, and providers. Evaluation is provided through student submission of portfolios containing written self-reflections, responses to faculty and peer feedback, and evaluations completed over the course of a two-year longitudinal curriculum. Finally, PPM hones sensitivity and skills relevant to medical professionalism to better prepare students for their transition into the clinical years of the medical school curriculum.

Clinical Translational Research

This course, a series of on-line lectures accompanied by small group discussion sessions, is intended to introduce students to the methods of clinical and translation research (CTR) and prepare them for carrying out research as medical students. Students are required to complete a Required Scholarly Project (RSP) and this course will provide students with the basic skills and competencies needed to plan, conduct, and complete their RSP.

Regardless of a student's future career path, the practice of medicine will be driven by the findings of CTR. Rapid advances in basic sciences, driven to new technologies such as genomics, have brought exciting new possibilities for identifying people at risk for disease, for identifying disease in its earliest stages, and in targeting therapies on an individual basis. On the verge of a new era of "personalized medicine", healthcare provision is driven by what is known about the characteristics of each individual and of the diseases that they may have.

CTR represents the research approach for moving from basic discovery in the laboratory to application in individual patients and in making populations healthier. Medical researchers have long carried out patient-oriented or clinical research. The term CTR is more recent, coming into use over the last decade in recognition of the research continuum from basic discovery in the laboratory to application in patients and on to populations. One problem in bringing discoveries into practice has been a gap between the work of laboratory researchers and clinical investigators; CTR bridges that gap.

Evidence Based Medicine (EBM)

Evidence-based medicine (EBM) is the clear, conscientious, and prudent use of current best evidence in making patient care decisions. Evidence-based guidelines are considered to be the basis for decision-making in clinical practice, guiding screening, diagnosis and treatment. In a new era of health care reform, EBM will likely be given even greater weight and outcomes are tracked carefully in order to evaluate the effectiveness of guideline-driven care.

Evidence-based practice is primarily based on five well defined steps: 1) Asking Focused Questions: translation of uncertainty to an answerable question; 2) Finding the Evidence: systematic retrieval of best evidence available; 3) Critical Appraisal: testing evidence for validity, clinical relevance, and applicability; 4) Making a Decision: application of results in practice; and, 5) Evaluating Performance: auditing evidence-based decisions.

EBM foundational material is taught during Foundations of Medical Sciences I as part of the biostatistics and epidemiology curriculum. Along with the clinical and translational research series during the first year of medical school, this information lays the foundation for the EBM curriculum during the remaining years of instruction.

Organ System Review

A sequence of study presenting integrated basic and clinical science instruction involving human organ systems — skin, hematology and clinical immunology, neurosciences, musculoskeletal, cardiovascular, renal, respiratory, endocrine/metabolism, reproduction, gastrointestinal/liver — follows Foundations of Medical Sciences.

Integrated Case Study

This section completes the second year of the Year I–II continuum and emphasizes patient-centered problems that integrate the basic and clinical science presented in the preceding organ systems. Students will explore the multi-organ effects of disease processes and reinforce diagnostic reasoning skills. In addition, concepts of pathophysiology, evaluation and management that can be applied to any organ system will be included. This section will also reinforce the appropriate use of medical information resources, effective self-directed learning skills, and interpersonal and group communication skills.

Separate review sessions of the important basic science and clinical concepts covered during the previous two years also occur during this seven-week section. These sessions will assist students in preparing to take Step I of the United States Medical Licensing Examination (USMLE).

By early spring of the second year of the Year I–II continuum, students are expected to select their academic clinical advisers and to begin arranging the schedule of clerkships to be taken during Year III–IV. By the end of the fall semester, Year II, each student receives information that describes the curriculum requirements of Year III–IV. Students choose the area of medical practice that they are most likely to pursue and an adviser is assigned from that discipline. The adviser counsels the student on clerkships and opportunities in graduate medical education.

Required Scholarly Project

The Required Scholarly Project (RSP) is designed to provide medical students with the opportunity to become engaged in hypothesis-driven research to promote analytical thinking skills and ultimately, physician leaders. The aim of the RSP is to expose students to the process of scientific inquiry, teaching them how to formulate an answerable question and the requisite methodology in seeking appropriate answers. Each student undertakes a faculty mentored research project in a discipline of his or her choice. Viable disciplines encompass a wide spectrum to include: biomedical research, from discovery to application, and health care, i.e., basic science, clinical, educational, behavioral science, health services, community and epidemiological activities. The RSP is interwoven with the curriculum, which includes didactic instruction on topics such as study design and biostatistics. The RSP is a longitudinal experience throughout all four years of medical school, with successful completion being required for graduation. Students with projects deemed meritorious by the RSP steering committee will receive “Distinction in Research” recognition at graduation.

Year III–IV (two academic years)

The final two years of medical school are designed as a continuum of two calendar years, beginning in July at the end of Year II. During the spring of their second year, students schedule clerkship rotations to be taken during the two years. Each student’s program is designed with the assistance of faculty advisers and includes 50 weeks of required clerkships, 16 weeks of selective clerkships and 16 weeks of elective clerkships.

All degree candidates are required to take Step I of the United States Medical Licensing Examination (USMLE) prior to entering Year III or within six months of completion of Year II (whichever comes first). Students must pass Step I, II CK and CS of the USMLE as a graduation requirement.

During Year III–IV, each student may schedule up to 16 weeks of discretionary time for personal convenience, remedial work, funded research work and other non-curricular activities, such as investigating postgraduate training programs. Although every effort is made to provide flexibility in the scheduling of each student’s program, some inherent limitations are imposed by the maximum enrollment permitted for each clerkship. Students are a vital part of the university’s medical team, which provides health care for patients throughout the year. Vacations are therefore subject to some scheduling adjustments.

Required Clerkships

Family Medicine

6 weeks

General Surgery	6 weeks
Surgical Subspecialty	4 weeks
Internal Medicine	6 weeks
Internal Medicine Sub-internship	4 weeks
Neurology	4 weeks
Obstetrics and Gynecology	6 weeks
Pediatrics	6 weeks
Psychiatry	6 weeks
Intersession	2 weeks (two, one-week sessions)

Intersession I and II

The Intersession curriculum is two, one-week sessions established for Year III students that will enable learners to pause, reflect and consolidate the many and varied clinical experiences that they encounter in their third year of medical school; to promote advanced clinical skills, professional development, health policy formulation and ethical decision-making, and patient safety; and to further prepare for the residency application process.

This individualized curriculum will allow students to revisit and focus basic-science topics through the prism of newly learned clinical material and to foster capacity for the analysis and formulation of health care policy in light of the political, economic, legal and social, and ethical dimensions of health care.

Students will be instructed in a systems-based approach to patient safety by stimulating the imagination, curiosity and skills of close observation and careful interpretation through engagement with the arts and humanities. Developing and building advanced clinical skills by acquiring, appraising and applying evidence in the context of individual patient decision-making, (i.e., Evidence Based Medicine) are two important goals of the Intersession curriculum.

Providing comprehensive, coordinated and consistent career advising along with fostering the continuing professional development of the learners in the frame of clinical practice are key components. Finally, the curriculum will provide ongoing instruction in the provision of culturally competent care and prepare learners for their required community project.

Selective Clerkships

Students are required to schedule 16 weeks of selective clerkships, chosen from a list of four-week clerkships approved by the Clinical Curriculum Committee. Selective clerkships are carried out at USC-affiliated hospitals and encompass virtually all specialty areas. Information is available at medweb.usc.edu.

Elective Clerkship

The elective period consists of 16 weeks, during which electives may be taken on campus, at USC-affiliated hospitals or at more distant medical schools or medical centers. Approved on-campus electives that are offered regularly are listed in the elective catalogue.

Proposals for other on-campus and off-campus electives are reviewed individually by a faculty adviser. All petitions must be submitted at least six weeks before the beginning of the rotation. Off-campus electives require documentation from the off-campus preceptor, endorsement of the student's medical school adviser, and prior approval and review by the Clinical Curriculum Committee. Credit is not given for electives until an evaluation has been received from the preceptor. Students with an academic deficiency may not schedule off-campus electives.

Business of Medicine (BOM)

This course, designed for Year III medical students, will introduce students to the fundamentals of the business of medicine, including the nuts and bolts of medical business, practice management and law, physician leadership, health care finance, and health care quality and costs. The BOM course will be case-based and interactive, and facilitated by leaders in the fields of health care business and management.

Program in Medical Humanities, Arts and Ethics

This four-year curriculum begins with collaborative discourse about ethical problems to help students learn to identify, analyze and resolve clinical ethical problems. This exercise is followed by interim skill building/maintenance and by instructor-facilitated discussion of videotaped ethics cases.

In Year II, the program focuses on ethical discernment and action in simulated settings and the study of the human dimensions of medicine. Standardized patients interact with students to help teach the telling of bad news, and students also learn from the humanities about patients as persons. The program concludes with a forum theatre in which students must decide what action to take based on their own convictions.

Year III is devoted to ethics education by clinical role models and encompasses instruction in the core clerkship by ethical standard-bearers. Students also participate in home hospice care and pain management cases.

During Intersession, the program includes a series of sessions that focus on contemporary health care and the physician-in-society. The goal of the sessions is to provide students with the experience of integrating the principles, methods and bedside issues included in Years I–III of the program. Students practice applying the micro-level (individual/clinical) decisions to the ethical dilemmas and policy issues that face physicians at the mezzo-level (health care organizations), and to the macro-level (profession as a whole, state and nation). Topics include issues of professionalism; allocation of resources; the economics, organization and societal oversight of health care; and the care of dying patients.

Fifth-year Research Option and Dean's Scholars

USC offers students the opportunity to take a full year of research experience with either a Keck School of Medicine faculty mentor or an approved faculty mentor at another institution. This program is open to any student in good academic standing who has completed his or her first year of medical school. Students interested in the option should identify a faculty preceptor and present a description of the proposed research program and funds available in support of the program to the director of the 5th year research option. Application for this program is made through the Office for Student Affairs (KAM 100B) and will be supervised through the Office of the Senior Associate Dean for Student Affairs and Educational Affairs (KAM 100D). A stipend, comparable to that received by a graduate student at the postgraduate level, is available for selected dean's research scholars pursuing this option.

Keck School of Medicine

Degrees and Requirements

M.D./Ph.D. Program

Departments and programs of the University of Southern California and the California Institute of Technology participate in the joint M.D./Ph.D. degree program administrated by the USC Graduate School, the Keck School of Medicine and the California Institute of Technology. This program integrates the medical school curriculum with graduate curricula in the basic sciences, to provide a unified course of study leading to both the M.D. and Ph.D. degrees.

This program is especially designed to prepare highly qualified students for careers in academic medicine and medical research. Formal course work and dissertation research provide the student with in-depth scientific preparation and research experience which enhances the application of basic science information to the diagnosis, treatment and prevention of disease. Conversely, the Ph.D. education becomes more meaningful because of its disease-oriented emphasis.

The curriculum for M.D./Ph.D. students differs from that of Ph.D. graduate students in the basic sciences in that the former take medical school courses as well as selected graduate level basic science courses and specific courses designed for M.D./Ph.D. students. The integrated training of the M.D./Ph.D. program enables students to compress their total academic effort by applying some course work toward the requirements of both degrees. On average, completion of the combined program requires a total of eight years.

The following graduate programs from the Keck School of Medicine participate in the M.D./Ph.D. program:

Cancer Biology and Genomics

Development, Stem Cells and Regenerative Medicine

Medical Biology

Molecular Structure and Signaling

Biological Sciences/Neurosciences, Molecular and Computational Biology

Engineering

Preventive Medicine (Biostatistics, Epidemiology, IPR/Health Behavior, Molecular Epidemiology)

Selected graduate programs from the USC Viterbi School of Engineering and the USC Dornsife College of Letters, Arts and Sciences also participate in the combined degree program.

Time limits for qualifying examinations and other procedures are determined by considering M.D./Ph.D. students as medical students for the periods when they are following the medical curriculum and as full-time graduate students during their years of graduate research prior to advancement to the Junior/Senior Continuum.

M.D./Ph.D. candidates have the option of pursuing a laboratory experience before beginning the Year I medical curriculum through a laboratory rotation at either USC or the California Institute of Technology. This laboratory experience is strongly encouraged although not required.

During the first two years of their program, M.D./Ph.D. students follow the medical school curriculum and gain added exposure to research faculty through a special survey course. Students are guided by the M.D./Ph.D. executive committee, which outlines the integration of the graduate program with the medical school curriculum and serves as the students' liaison until they have selected a graduate program and graduate research adviser. The graduate programs vary widely in the extent to which they allow credit toward the Ph.D. for courses taken during the first two years of medical school. M.D./Ph.D. students are encouraged to select a graduate program by early spring of the second year of medical school. Students are required to apply for admission to the Ph.D. program of their choice by the recommended deadline on the graduate application.

Prior to entering Ph.D. studies, the Keck School of Medicine allows M.D./Ph.D. candidates the option of beginning their clinical training by taking one six-week required clerkship in either Family Medicine or Pediatrics. This can provide an early introduction to clinical medicine and a context for integration with the basic sciences of the thesis years.

Beginning with the third year of the M.D./Ph.D. program, students enter their selected program as full-time graduate students. Although the content of graduate courses required of M.D./Ph.D. students is generally identical to that required of Ph.D. students in the same graduate program, M.D./Ph.D. students are permitted greater latitude in the scheduling of their graduate courses. Four years are commonly necessary to fulfill requirements for the Ph.D., including course work, qualifying examinations, independent dissertation research, and writing of the dissertation.

After completion of the graduate program, the student is advanced to the Junior/Senior Continuum and completes the final two years of clinical training required by the medical school curriculum. No portion of clinical training is deleted from the joint program. Prior to entering the clinical component of the joint degree, students will be expected to participate in a clinical shadowing experience, which could be done throughout the Ph.D. studies or as part of an intensive program prior to entering the clinic. Students will also be required to participate in the Medical Scholars Program clinical tutoring skills program held in the spring of each year and re-take the Year II Objective Structured Clinical Examination at the end of May with the second year medical students.

Keck School of Medicine-Caltech M.D./Ph.D. Program

A joint program between the Keck School of Medicine and the California Institute of Technology (Caltech) was

established for the granting of the M.D./Ph.D. degree. Students do their preclinical and clinical work at the Keck School of Medicine and their Ph.D. work with any member of the Caltech faculty, including the biology, chemistry, engineering, applied sciences divisions and interdisciplinary programs divisions.

Admission to this joint program is made through the usual Keck/USC M.D./Ph.D. process. All applicants are interviewed at Keck School of Medicine and Caltech. Matriculated students in this program have the option of doing their Ph.D. at USC or Caltech. The M.D. degree will be awarded from the Keck School of Medicine and the Ph.D. from Caltech.

Further information about the M.D./Ph.D. program at the Keck School of Medicine may be obtained by contacting: M.D./Ph.D. Program, Keck School of Medicine, 1975 Zonal Avenue (KAM 200), Los Angeles, CA 90089-9023; (323) 442-2965, FAX: (323) 442-2318; email [✉ mdphdpgm@med.usc.edu](mailto:mdphdpgm@med.usc.edu).

Keck School of Medicine

Degrees and Requirements

M.D./MBA Dual Degree Program

In response to the ongoing reorganization of health care delivery systems, and the growing awareness of the impact of business decisions on health care, the Keck School of Medicine and the USC Marshall School of Business jointly offer an innovative program for individuals seeking knowledge in both medicine and business administration. The program is designed to prepare its graduates to assume leadership in the design and management of health care systems.

The M.D./MBA program spans five years. Interested students apply during their second or third year of medical school, and begin required MBA courses following successful completion of the first two or first three years of medical school. The remaining time is devoted to the clinical clerkships of the Keck School of Medicine and completion of graduate business elective courses. At the conclusion of the program, students will have completed 48 units in the Marshall School of Business, including required and elective courses, and four years of courses in the Keck School of Medicine. Dual degree students may not count courses taken outside the Marshall School of Business toward the 48 units.

First and Second Years: Required medicine courses.

Third or Fourth Year: Required MBA courses and graduate business electives.

Remaining Years: Keck School of Medicine core, selective, and elective clerkships and graduate business electives.

Admission Requirements

Students who have a baccalaureate degree from an accredited college or university and have successfully completed at least two years in the Keck School of Medicine will be considered for admission to the Marshall School of Business. Requirements for admission to the regular MBA Program (with the exception of the GMAT) must be fulfilled by the medical student for admission to the Marshall School.

The M.D. and the MBA degrees are awarded simultaneously upon completion of their requirements by the Keck School of Medicine and the Marshall School of Business.

Keck School of Medicine

Degrees and Requirements

M.D./Master of Public Health

The joint M.D./MPH program at the Keck School of Medicine is designed for individuals who envision a medical career that combines public health and medical disciplines. Many individuals entering careers as medical doctors or public health practitioners wish to acquire not only medical practice competencies, but also an understanding of the history, organization, goals and philosophy of public health. The joint M.D./MPH program offers a broad-based orientation to public health while the student completes medical school requirements. The Master of Public Health degree provides increased knowledge of and sensitivity to the political, historical, economic and social environments of health promotion and health services delivery.

The M.D./MPH program spans five years (four years of medical school and one year of public health courses). Students begin the core MPH courses following the successful completion of the first two years of medical school. The last two years of the program are devoted to clinical clerkships of the School of Medicine and to the completion of the elective courses and practicum (field experience) of the MPH program. At the conclusion of the joint degree program, students will have completed 42–46 units in the Master of Public Health program and four years of courses in the Keck School of Medicine.

Students who are enrolled in the Keck School of Medicine must apply to the Master of Public Health program no later than January of their second year. All requirements for admission to the regular MPH program must also be fulfilled by dual degree applicants.

All students in the M.D./MPH program must meet course requirements, grade point average requirements and program proficiency requirements of both programs. Students must have a grade point average of 3.0 in the MPH curriculum to meet graduation requirements.

The M.D. and the MPH degrees are awarded simultaneously upon completion of the Keck School of Medicine and the Master of Public Health program requirements. For more information, contact the MPH Program Office at (323) 442-7257.

Keck School of Medicine

Ph.D. Programs in Biomedical and Biological Sciences (PIBBS)

Keith Administration Building 409

1975 Zonal Avenue

Los Angeles, CA 90089-9031

(323) 442-1609

FAX: (323) 442-1199

Email:  pibbs@usc.edu

pibbs.usc.edu

Program Director: Ite A. Laird-Offringa, Ph.D.

The USC Ph.D. Programs in Biomedical and Biological Sciences (PIBBS) is a gateway program into graduate studies at the USC Health Sciences Campus, leading to a Ph.D. degree in a broad range of biological and biomedical disciplines.

PIBBS students experience a common first-year curriculum that will build a solid foundation in biomedical and biological sciences. Students are required to complete 25 units of core classes during the fall, spring and summer semesters of the PIBBS year, including courses in cell biology, molecular biology, human genetics and genomics, biostatistics, bioethics and scientific writing. Students will also complete three research rotations during the first year.

At the end of the spring semester of the first year, students will select a faculty adviser and a specific Ph.D. program from among the four participating programs listed. In the second year, students will take classes that will differ depending on the Ph.D. program they join; second year classes may include, but are not limited to, topics such as biochemistry, epidemiology, stem cell biology, molecular genetics, cancer, human genomics, immunology, and physiology. In addition, each student will complete qualifying examinations for the chosen Ph.D. program and will develop and complete an original research project that will serve as the basis for a doctoral dissertation.

Ph.D. Graduate Programs

Cancer Biology and Genomics
 Development, Stem Cells, and Regenerative Medicine
 Medical Biology
 Molecular Structure and Signaling

PIBBS Admission Requirements

Application Deadline (priority review): December 1

Applicants to PIBBS should have a baccalaureate degree in natural sciences, or sufficient courses in mathematics and the life sciences. This is required to provide a strong background for studies in biomedical and biological research. Appropriate undergraduate degrees include biology, physiology, engineering, chemistry or computer science.

Applicants should have a strong record of academic achievement and satisfactory performance on the general and advanced portions of the GRE. Other requirements for admission include: a detailed statement of purpose as well as three letters of recommendation, one of which should be from a wet laboratory or computational research mentor. Previous research experience is expected. Students are admitted for the academic year in the fall semester. Applicants who are accepted with minor deficiencies are expected to correct these during the first year following enrollment. Although there is no formal application deadline, complete applications received by December 1 will be given priority.

Financial Support

Admitted students are supported by research assistantships or fellowships during their graduate career. Tuition, health insurance and health fees are also covered.

Lab Rotations

During the first year, students register for INTD 790 Research (4 units in the fall semester and 3 units in the spring semester) and rotate through the labs of three faculty members of the program (potential research advisers). By the first summer of graduate study, but no later than after 12 months in the program, each student is expected to have selected a faculty mentor/research adviser.

PIBBS Required Core Curriculum and Research

FIRST SEMESTER		UNITS
INTD 531	Cell Biology	4
INTD 561	Molecular Biology	4
INTD 790	Research	4
SECOND SEMESTER		UNITS
BIOC 543	Human Molecular Genetics	4
INTD 577	Writing in the Biomedical and Biological Sciences	1
INTD 790	Research	3
PM 510L	Principles of Biostatistics	4
THIRD SEMESTER		UNITS

Admission Requirements for Ph.D. Programs

Admission to the Keck School of Medicine Ph.D. program is open to all incoming PIBBS students provided all PIBBS admission requirements are met and all first year course and lab rotation requirements have been satisfactorily completed. Students from other sources, such as M.D./Ph.D. students and clinician scientists, may also be eligible on a case-by-case basis.

In general, new graduate students apply for admission to USC through the Ph.D. programs in Biomedical and Biological Sciences (PIBBS), and become enrolled in one of four Ph.D. programs at the Keck School of Medicine after the successful completion of the PIBBS year. During the PIBBS year, students must complete the core curriculum of 25 units, maintain a 3.0 grade point average with no grade lower than a C on all courses and must complete three laboratory rotations in order to continue into a Ph.D. program.

Application information is available by contacting the PIBBS Program at [✉ pibbs@usc.edu](mailto:pibbs@usc.edu).

Doctor of Philosophy in Cancer Biology and Genomics

Program Director: Gerhard Coetzee, Ph.D.

The Ph.D. program in Cancer Biology and Genomics (CBG) focuses on training investigators in strategies to understand the mechanisms of cancer development and progression which includes cell biological and genomic approaches. The ultimate objective is to translate basic findings into diagnostics, treatments and ultimate cures. The program applies a multidisciplinary approach toward these goals, with the full realization that cancers in different organs represent different diseases. However all cancers relate to uncontrolled cell proliferation with many cancers having a strong genetic predisposition. Consequently, major features of this program include the breadth of medically related interests and training and faculty characterized by wide and varied skills in many cancer-related research areas. To facilitate the application of multidisciplinary approaches to make cancer a disease of the past, close and regular contact between participating faculty of different disciplines and students is a major theme of this Ph.D. program.

Cancer Biology and Genomics students are required to take CBG 580 and INTD 504 and must complete a total of 4 units from the following: INTD 549, INTD 685, PM 512, PM 517ab, PM 533*, PM 534*, PM 570*, PM 579, PM 599, MPTX 500 or other courses approved by the academic adviser. In the second year, students are required to register for INTD 575 in the fall and spring semesters. In the third and subsequent years, students should register for INTD 600 every fall and spring semester. In addition, students are required to complete at least 4 units of CBG 794ab Doctoral Dissertation.

Ph.D. students must supplement course work by registering for CBG 790 Research during the fall, spring, and summer semesters as needed to complete the minimum 60 units required for the Ph.D. program.

As part of the requirements for the Ph.D. degree in Cancer Biology and Genomic, students must adhere to the unit/course requirements, guidance committee and dissertation committee guidelines and must complete the qualifying examination, annual research appraisal, and dissertation and oral defense as outlined in the sections following the descriptions of the Ph.D. programs.

**Course requires prerequisite.*

Doctor of Philosophy in Development, Stem Cells, and Regenerative Medicine

Program Director: Gage Crump, Ph.D.

The goal of the Ph.D. program in Development, Stem Cells, and Regenerative Medicine is to train the next generation of investigators in the history and practice of developmental and stem cell biology. The ultimate aim is to understand how the genomes of animals are translated into complex morphological forms, and to apply this basic knowledge to the emerging field of regenerative medicine. Close and regular contact between participating faculty of different disciplines and students is expected to facilitate the application of multidisciplinary approaches toward regenerative medicine.

Development, Stem Cells, and Regenerative Medicine students are required to complete DSR 542 and at least 2

units from the following: DSR 610, DSR 620, INTD 504 or other courses approved by the faculty adviser. In the second and subsequent years, students are required to register in DSR 574 every fall and spring semester. In addition, students are required to complete at least 4 units of DSR 794ab Doctoral Dissertation.

Ph.D. students must supplement course work by registering for DSR 790 Research during the fall, spring and summer semesters as needed to complete the minimum 60 units required for the Ph.D. program.

As part of the requirements for the Ph.D. degree in Development, Stem Cells, and Regenerative Medicine, students must adhere to the unit/course requirements, guidance committee and dissertation committee guidelines and must complete the qualifying examination, annual research appraisal, and dissertation and oral defense as outlined in the sections following the descriptions of the Ph.D. programs.

Doctor of Philosophy in Medical Biology

Program Director: W. Martin Kast, Ph.D.

The objective of the Ph.D. program in Medical Biology (MEDB) is to educate investigators to develop strategies to translate and implement knowledge from cellular, molecular and genetic advances into studies of normal human organ system function as well as mechanisms of human organ system dysfunction in disease and how to reverse this dysfunction by medical treatment. Animal disease models as well as clinical trials in patients are frequently used to advance this field.

The program applies multidisciplinary approaches to understanding the human organism as a whole. Breadth of medically related interests and training are major features of this track and wide and varied skills in many research areas characterize the faculty. To facilitate application of multidisciplinary approaches, close and regular contact between participating faculty and students is a major theme of this Ph.D. program.

The MEDB program caters to M.D./Ph.D. students, clinician scientists and PIBBS students interested in but not limited to the following fields: immunology (including cancer immunology), virology (including cancer virology), microbiology, physiology and pathology (for example: diabetes, obesity, autoimmunity, infectious diseases, gastro-intestinal and liver diseases, heart and lung diseases, hypertension, central nervous system diseases, etc.)

Medical Biology students are required to complete 8 units from the following courses: INTD 504, INTD 522, INTD 549, INTD 550, INTD 551, INTD 572, INTD 573 or other courses approved by the faculty adviser. In the second and subsequent years, students are required to register in INTD 574 every fall and spring semester. In addition, students are required to complete at least 4 units of MEDB 794ab Doctoral Dissertation.

Ph.D. students must supplement course work by registering for MEDB 790 Research during the fall, spring and summer semesters as needed to complete the minimum 60 units required for the Ph.D. program.

As part of the requirements for the Ph.D. degree in Medical Biology, students must adhere to the unit/course requirements, guidance committee and dissertation committee guidelines and must complete the qualifying examination, annual research appraisal, and dissertation and oral defense as outlined in the sections following the descriptions of the Ph.D. programs.

Doctor of Philosophy in Molecular Structure and Signaling

Program Director: Wei Li, Ph.D.

The goal of the Ph.D. program in Molecular Structure and Signaling is to train students to become future leaders in biomedical and related fields. The Molecular Structure and Signaling program includes structural biology of proteins, lipids and nucleotides and signaling mechanisms by these molecules. The program encourages students to tackle important molecular problems with a high degree of difficulty and learn about creative thinking, experimental design and problem-solving skills. The Molecular Structure and Signaling program emphasizes elucidation of novel mechanisms and insights into important biomedical problems. In addition, the program promotes its students to become master communicators in science. Prior to graduation, Ph.D. students must demonstrate their understanding of the research, elucidation of a novel structure and/or signaling mechanism and a clear interpretation of its potential for developing novel diagnostics and therapeutics.

Molecular Structure and Signaling students are required to complete: INTD 549, INTD 571, INTD 575 and INTD 600. Other courses may be substituted with the approval of the Molecular Structure and Signaling executive

committee. In the second and subsequent years, students are required to register in INTD 575 every fall and spring semester. INTD 600 must be taken every fall and spring semester in years two through four. In addition, students are required to complete at least 4 units of MSS 794ab Doctoral Dissertation.

Ph.D. students must supplement course work by registering for MSS 790 Research during the fall, spring and summer semesters as needed to complete the minimum 60 units required for the Ph.D. program.

As part of the requirements for the Ph.D. degree in Molecular Structure and Signaling, students must adhere to the unit/course requirements, guidance committee and dissertation committee guidelines and must complete the qualifying examination, annual research appraisal, and dissertation and oral defense as outlined in the sections following the descriptions of the Ph.D. programs.

Unit/Course Requirements

A minimum of 60 units of graduate course credits is required for the Ph.D., including course work, seminars, research and dissertation units. No more than 8 units of 794 may be applied toward the Ph.D. degree. Students must complete the first year PIBBS core curriculum as well as course requirements for their specific Ph.D. program. Thirty units of course work, including the PIBBS core curriculum, must be completed before they are considered for the qualifying examination. Additional course work relevant to the research interests of the student may be required by the student's qualifying exam committee or by the student's faculty adviser.

Guidance Committee

After 30 units of course work, which includes the PIBBS core curriculum and course requirements for one of the four Ph.D. programs, the student, in consultation with his/her faculty adviser, will nominate five faculty members to serve on the guidance committee for the qualifying examination. A minimum of three of the faculty must be from the student's Ph.D. program, and one must be a faculty member from outside the Ph.D. program. The chair of the guidance committee must be a member of the student's Ph.D. program and the faculty adviser is not allowed to be on the committee (but may be a silent presence during the exam). These nominations are submitted to the chair of the program for formal appointment.

Qualifying Examination

Students in the Ph.D. program must pass both the written screening and the oral portions of the qualifying examination administered by their guidance committee during the second year of graduate study.

The written screening exam involves writing a research grant proposal. The deadline for completion of the written screening is January 5 of the second year. Students who receive a failing score will be allowed one resubmission, with a deadline of April 5 of the same year. The written portion must be passed before the oral portion can be taken.

The oral examination must be completed no later than September 1 of the beginning of the third year and only after successful completion of the written screening exam. The oral examination consists of two parts. The first part consists of a presentation of the proposed thesis research. The second part consists of an open forum in which the guidance committee asks general questions on any topic related to the student's research.

Final evaluation of the examination is determined by a consensus of the guidance committee. If a student fails, it is at the discretion of the committee to allow the student to repeat the oral examination within 60 days. A second failure will be grounds for dismissal from the program.

Advancement to Candidacy

Recommendation for advancement to candidacy for the Ph.D. degree is made on the basis of the successful completion of the qualifying examination, course requirements and the student's maintenance of at least a 3.0 GPA. A student who has not been recommended for advancement to candidacy at the end of the first semester of the third year will be dismissed from the program.

Annual Research Appraisal (ARA)

After advancing to candidacy, each graduate student presents a progress report to his or her dissertation research

committee. Prior to the meeting, the student prepares a short written document describing significant experiments, problems and projected studies. This document is distributed to the committee and is included in the student's file. The ARA meeting is intended to be a working session between the student and his or her committee; experimental results and problems are discussed with this context. In addition the student presents a research plan for the next year of work. A satisfactory ARA is required of every student for each year of residence after the completion of the qualifying exam. A final ARA is required the semester before the student is permitted to defend the dissertation.

Dissertation Committee

After advancement to candidacy, the student must form a dissertation committee, in consultation with their faculty adviser. A minimum of three committee members must be selected, one of which is the faculty adviser, and at least one of which must be a tenured or tenure-track faculty member of the student's Ph.D. program. One committee member may be non-tenure track. The chair of the dissertation committee must be a member of the student's Ph.D. program and may not be the faculty adviser. The dissertation committee is responsible for counseling the student during preparation of the dissertation and conducting the final oral examination during the dissertation defense. Students are expected to meet with the dissertation committee once per year to discuss progress.

Dissertation committee members are expected to read and comment on a dissertation within two weeks from its submission. The student and faculty will coordinate a timeline for the student to present the thesis to the dissertation committee. This timeline must allow all dissertation committee members enough time to fulfill their responsibilities within the four-week deadline.

Dissertation and Oral Defense

The student's research is reported in a dissertation written under the guidance of the dissertation committee. The dissertation must demonstrate the student's capacity for independent research, scholarly achievement and technical mastery of a special field. Students should have at least one first author publication accepted in a peer-reviewed journal before the defense.

When the final draft of the dissertation is ready, the student will take the final oral defense. Students must submit their dissertation to the dissertation committee at least one month before the student expects to make final revisions; committee members are expected to respond within two weeks.

The dissertation defense is a formal public presentation of the student's research before the program faculty and students. Dissertation defenses must be publicized at least two weeks prior to the oral defense.

All doctoral candidates must be registered in 794 Doctoral Dissertation each semester (excluding summer sessions) from the time of their advancement to candidacy until their dissertation is approved and submitted to the Graduate School.

Courses of Instruction

CANCER BIOLOGY AND GENOMICS (CBG)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

CBG 580 Topics in Cancer Biology and Genomics (1, max 12, Sp) Selected topics in Cancer Biology and Genomics including review of contemporary literature and research. *Prerequisite:* INTD 504. Open only to graduate students.

CBG 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Open only to doctoral students. Graded CR/NC.

CBG 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC. Open only to doctoral students.

DEVELOPMENT, STEM CELLS AND REGENERATIVE MEDICINE (DSR)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

DSR 542 Principles of Developmental and Stem Cell Biology (4, Sm) Introduction to developmental and stem cell biology. Lectures and lab component prepare students for a career in developmental and stem cell biology and regenerative medicine.

DSR 574 Stem Cell and Developmental Biology Seminar Series (1, max 10, FaSp) Selected topics in Development, Stem Cell, and Regeneration. Graded CR/NC.

DSR 580 Clinical Perspective of Regenerative Medicine (1, max 4, Sp) Offers interaction with clinicians in patient-care setting to understand the need and role of regenerative medicine in bedside management. Graded CR/NC.

DSR 610 Current Topics in Regenerative Medicine (1, max 12, Sp) Selected topics on sub-fields within developmental and stem cell biology including review of contemporary literature and research. Open only to master and doctoral students.

DSR 620 Current Topics in Stem Cell Biology and Organogenesis (1, max 12, Fa) Selected topics on sub-fields within stem cell biology and organogenesis. Includes review of contemporary literature and research. Open only to master and doctoral students.

DSR 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Open only to doctoral students. Graded CR/NC.

DSR 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC. Open only to doctoral students.

MEDICAL BIOLOGY (MEDB)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MEDB 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Open only to doctoral students. Graded CR/NC.

MEDB 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC. Open only to doctoral students.

MOLECULAR STRUCTURE AND SIGNALING (MSS)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MSS 574 Molecular Structure and Signaling Seminar Series (1, max 12, FaSp) Selected topics in Molecular Structure and Signaling. Open only to doctoral students.

MSS 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Open only to doctoral students. Graded CR/NC.

MSS 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC. Open only to doctoral students.

Courses of Instruction

INTERDEPARTMENTAL (INTD)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

INTD 500 Ethics and Accountability in Biomedical Research (1, Sm) The purpose of this course is to engage current (and potential) research trainees in discussions about the responsible conduct of science. The course is designed as an option for meeting current federal regulations which require that all predoctoral and postdoctoral fellows paid from federal contracts and grants have a component of ethical training. Graded CR/NC.

INTD 501 Recent Advances in Vision Science (1, max 4, FaSp) Recent advances in the understanding of the ocular surface are reported and discussed; students will learn how to read papers critically, develop speaking skills to explain a research paper and attend a three-day workshop on NIH proposal development and scientific manuscript preparation. Graded CR/NC.

INTD 504 Molecular Biology of Cancer (4, 2 years, Sp) Epidemiology, pathobiology, carcinogenesis, tumor biology and heterogeneity; retroviruses, oncogenes, cell cycle control, genetics of cancer, tumor immunology; treatment strategies.

INTD 522 Infection and Host Responses (4, Sp) Overview of microbes, their life cycles and the host response they elicit, evade or exploit, including the manipulation and the malfunction of the immune system.

INTD 531 Cell Biology (4, Fa) Current perspectives on major research areas in cell biology. Emphasis will be on in-depth examination of cellular structures, regulatory processes, intra-cellular routing and targeting, and cell/environmental interactions.

INTD 535 Continuing Introduction to Clinical Medicine for M.D./Ph.D. Students (1, FaSp) Course for M.D./Ph.D. students in Ph.D. years designed to allow maintenance and improvement of clinical skills prior to re-entry in clinical rotations in the Year III medical curriculum. Open only to medical students who have completed Years I and II. Graded CR/NC.

INTD 537 The Structure of Scientific Revolutions in Molecular Biology (1, Irregular) A course in how scientists make breakthrough discoveries and whether there are predictable ingredients for significant changes in perception of the living system. Open only to graduate-level students in any of the biological sciences. *Recommended preparation:* one year in cell and molecular biology.

INTD 549 Protein Chemistry — Structure and Function (4, Sp) Chemistry of peptides and proteins; protein structure and folding; molecular basis of protein action. *Recommended preparation:* general biochemistry.

INTD 550 Introduction to Pathology (4, Fa) Normal histology and introduction to basic pathological concepts. Provides a solid and basic understanding of normal structures and how they relate to function.

INTD 551 Pathobiology of Disease (4, Sp) Relationship between histopathological and clinical manifestations of disease and their underlying molecular mechanisms. Topics include inflammatory, developmental, environmental, degenerative, and neoplastic disease processes. *Prerequisite:* INTD 550.

INTD 555 Biochemical and Molecular Bases of Disease (4) Biochemical and molecular abnormalities in disease states. *Prerequisite:* general biochemistry.

INTD 561 Molecular Biology (4, Fa) Biochemistry and molecular biology of replication, transcription, RNA processing, translation, and regulation of gene expression with emphasis on multicellular eukaryotic organisms and comparisons to prokaryotes.

INTD 567 Molecular and Cellular Neurobiology (4) (Enroll in NSCI 531)

INTD 571 Biochemistry (4, Sp) Physical-chemical basis of life processes: protein structure and enzyme function; synthesis and metabolism of carbohydrates, lipids, amino acids, and nucleotides. (Duplicates credit in former BIOC 441.) *Prerequisite:* open to qualified students.

INTD 572 Systems Physiology and Disease I (4, Fa) Mammalian organ systems operation during health, and pathophysiologic analysis of related diseases with focus on muscle, respiratory, cardiovascular and renal systems. Faculty from basic and clinical sciences. Open to graduate students in biomedical science only.

INTD 573 Systems Physiology and Disease II (4, Sp) Mammalian organ systems operation during health, and pathophysiologic analysis of related diseases with focus on neuroscience, immunology, metabolism, endocrine, reproduction, GI and liver. Faculty from basic and clinical sciences. Open to graduate students in biomedical science only.

INTD 574 Systems Biology and Disease Seminar (1, max 16, FaSp) Selected topics in systems biology and disease. Graded CR/NC. Open only to integrative biology of disease Ph.D. students.

INTD 575 Interdisciplinary Research Presentations (1, max 12, FaSp) Broad Topics on Biomedical Research, Human Diseases and Career Development. Open only to doctoral students.

INTD 577 Writing in the Biomedical and Biological Sciences (1, Sp) Writing instruction for graduate students focusing on grant proposals and scientific papers. Includes both writing and providing critiques of classmates' work. Lectures and discussion. Open only to doctoral students in the school of Medicine.

INTD 600 Student Research Presentation (1, max 12, FaSp) Students prepare and present their own research to an audience of faculty and peers. Graded CR/NC. Open only to graduate students.

INTD 620 Medical Students Elective Program (0) Opportunities for medical students as preceptors in research laboratories or in field medical service under guidance of sponsors approved by faculty committees. Graded CR/NC.

INTD 621ab Introduction to Clinical Medicine (ICM) for HTE (a: 3, Fa; b: 3, Sp) A strongly patient-centered course in which both Ph.D. engineering and M.D. students experience how doctors handle communications, basic diagnostic thinking and engineering perspectives. Open only to Health, Technology and Engineering students. Graded CR/NC.

INTD 622L Pre-clinical System Block for Health, Technology and Engineering (3-9, FaSp) A three-to-nine week block of lectures and laboratories focused on particular body system (e.g., cardiovascular, renal, etc.). Open only to Health, Technology and Engineering students. Graded CR/NC.

INTD 630 Viral Oncology (2, Fa) Broad aspects of RNA and DNA viral oncology from epidemiology to molecular genetics. (Duplicates credit in former PATH 630.)

INTD 650 Stem Cell Biology and Medicine (4, FaSpSm) Basic principles, available embryonic and adult stem cells, principles of organogenesis and regeneration, animal models, delivery of engineered tissues to patients, promise and limitations of stem cells. Open to master's and Ph.D. students on the Health Sciences Campus and to medical and post-doctoral fellow trainees only.

INTD 685 Bioinformatics in Genome Analysis (4, Sm) Basic programming concepts for computational genomic analysis.

INTD 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Open only to doctoral students. Graded CR/NC.

Keck School of Medicine

Master of Academic Medicine

Keith Administration Building 211**1975 Zonal Avenue****Los Angeles, CA 90033****(323) 442-2372****FAX: (323) 442-2051****Email:  nyquist@usc.edu***Program Director: Julie G. Nyquist, Ph.D.***Faculty**

Professors: Donna Elliott, M.D., Ed.D. (Pediatrics); Jerry Gates, Ph.D. (Family Medicine); Win May, M.D., Ph.D. (Medical Education); Julie G. Nyquist, Ph.D. (Medical Education); Beverly Wood, M.D., Ph.D. (Medical Education)

Associate Professors: Kathleen Besinque, Pharm.D., M.S.Ed. (Pharmacy); Cha-Chi Fung, Ph.D. (Medical Education)

Assistant Professors: Dixie Fisher, Ph.D. (Medical Education); Lori Marshall, Ph.D., MSN (Pediatrics); Niurka Rivero, M.D. (Pediatrics); Samuel Yanofsky, M.D., M.S.Ed. (Anesthesiology)

The Master of Academic Medicine is offered by the Keck School of Medicine in collaboration with the Schools of Dentistry and Pharmacy. The goal is to develop leaders who will create and enhance academic and training programs for health care professions globally. Academic medicine is defined in broad terms as relating to those who lead training worldwide in medicine or in other health care related fields. Enacting this vision is possible due to the flexible delivery model selected. The program employs a hybrid model, combining on-campus face-to-face sessions, blended with online course work. During the 32-unit program, the majority of sessions will be delivered using interactive online delivery methods. All students will also be on campus for one-week intensive sessions in the spring of each year, which focus on community building and the development and evaluation of skills.

The program addresses the unique population of medical and health professions faculty who are focused on leading the academic enterprise for health professionals at the undergraduate, graduate and continuing education levels. Our graduates will be positioned to guide future generations of health professionals around the world toward better meeting the health needs of our global society. For those with a clear focus on the academic enterprise, a complementary degree in academic medicine offers the specialized skills needed to lead worldwide development of enhanced training for health professionals, increases professional capacity and provides new opportunity for promotion. The audiences for this degree will typically have primary professional degrees in health fields (e.g., M.D., DDS, DPT, R.N., MSN, P.A., DVM, D.O., Pharm.D., D.C., DOM). The Master of Academic Medicine will provide the needed complementary training for clinician educators.

Admission

Applicants for admission to the Master of Academic Medicine program are generally expected to have an advanced degree in a health profession. Proof of graduation is required. For applicants who do not have a degree in a health profession, a bachelor's degree or its equivalent from an accredited institution is required, a grade point average of 3.0 (A = 4.0) is usually expected as well as satisfactory scores on the Graduate Record Examinations (GRE) General Test and three letters of recommendation. For specific information on admission and application procedures, contact the Office of Medical Education, (323) 442-2372.

Students are admitted for the academic year beginning in the fall, although those admitted prior to March 15 may enroll in summer courses. Although there is no formal application deadline, complete applications received before March 1 will be given priority. Application inquiries should be made to: Master of Academic Medicine Program, University of Southern California, Office of Medical Education, 1975 Zonal Avenue, KAM 211, Los Angeles, CA 90033, telephone (323) 442-2372.

Satisfactory Academic Progress

A graduate GPA of at least 3.0 is required at all times. Any student whose graduate GPA falls below 3.0 will be placed on academic probation. Students on academic probation who do not raise their GPA to 3.0 after two semesters of written notification of academic probation will be academically disqualified.

A minimum of 32 units of graduate-level course work is required.

Degree Requirements

ACADEMIC COURSES (26 UNITS)		UNITS
ACMD 501	Introduction to Academic Medicine Worldwide	3
ACMD 502	Becoming a Leader in Academic Medicine Worldwide	3
ACMD 503	Leading Change in Academic Medical Centers	3
ACMD 511	Competencies in Academic Medicine and Health I	3
ACMD 512	Competencies in Academic Medicine and Health II	3
ACMD 513	Professionalism in Academic Medicine and Health	3
ACMD 514	Accreditation and Program Evaluation in Academic Medicine	3
ACMD 591	Designing Research on Innovations in Academic Medicine	2
ACMD 592	Implementing Research on Innovations in Academic Medicine	2
ACMD 621	Capstone Portfolio for the Master of Academic Medicine	1

Electives (6 units)

Six units of electives may be selected from the recommended courses below, or these may be replaced with approved courses at the 500 level or within USC that equal 6 units.

ACMD 593	Foundations of Scholarly Writing in Academic Medicine	1
ACMD 598	Fieldwork in Designing Innovations for the Health Professions	1-3
ACMD 604	Supporting the Educational Enterprise in Academic Medicine	3
ACMD 605	Faculty Development for Health Sciences Faculty Educators	2
ACMD 615	Maintenance of Competence in the Health Professions	2
INTB 603	Systematic Approach to Scientific Writing	2
MPTX 517	Structure and Management of Clinical Trials	4
PM 513	Experimental Designs	3

Courses of Instruction

ACADEMIC MEDICINE (ACMD)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ACMD 501 Introduction to Academic Medicine Worldwide (3) Introduces the master's program; includes historical development of training in the health professions; current issues, challenges and opportunities in academic medicine and health worldwide. Open only to Academic Medicine majors.

ACMD 502 Becoming a Leader in Academic Medicine Worldwide (3) Current approaches to leadership within the context of global academic medicine and health professions education; individual applications, group dynamics, teamwork, and interpersonal skill enhancement. Open only to Academic Medicine majors.

ACMD 503 Leading Change in Academic Medical Centers (3) Exploration and practice of skills for promoting programs within academic medicine and health professions' education; building trust, organizational change, conflict resolution, negotiation, and managing resources. Open only to Academic Medicine majors.

ACMD 511 Competencies in Academic Medicine and Health I (3) Acquisition of cognitive knowledge and problem-solving skills in health professions worldwide; instructional methods, assessment techniques, designing curricula for health professions education. Open only to Academic Medicine majors.

ACMD 512 Competencies in Academic Medicine and Health II (3) Learning theory, teaching methods, assessment techniques related to acquisition and reinforcement of competencies related to patient care, practice-based learning and improvement and systems-based practice. Open only to Academic Medicine majors.

ACMD 513 Professionalism in Academic Medicine and Health (3) Acquisition and evaluation of interpersonal and communication skills and professionalism including ethics and cultural competence; within the context of health care disparities and health initiatives. Open only to Academic Medicine majors.

ACMD 514 Accreditation and Program Evaluation in Academic Medicine (3) Evaluating health professions training programs within guidelines of relevant accreditation organizations; models of evaluation, designing plans and tools for evaluation of program elements. Open only to Academic Medicine majors.

ACMD 591 Designing Research on Innovations in Academic Medicine (2) Introduction to design and scholarly review of innovations in health professions education; needs assessment, problem selection, use of research methods to study an innovation. Open only to Academic Medicine majors.

ACMD 592 Implementing Research on Innovation in Academic Medicine (2) Mentored research on an innovation in academic medicine leading to the master's degree. The project will result in a formal written research report. Open only to Academic Medicine majors. *Prerequisite:* ACMD 591.

ACMD 593 Foundations of Academic Writing (1) Academic writing for conference papers, grant proposals and journal articles. Open only to Academic Medicine majors. *Recommended preparation:* A completed study of an innovation in academic medicine or other health-related field that is ready to move to publication.

ACMD 598 Fieldwork: Designing Innovations for the Health Professions (1-3, max 3) Individual projects designing curricular or other innovations for the home program as an application of Year 1 concepts and as part of the capstone experience. Open only to Academic Medicine majors.

ACMD 604 Supporting the Educational Enterprise in Academic Medicine (3) Explores support functions in academic medical centers and health professions schools; financial, scientific, educational, faculty and student affairs departments, and offices of medical education. Open only to Academic Medicine majors.

ACMD 605 Faculty Development for Health Sciences Faculty Educators (2) Role of faculty development programs in health professions schools; tools for delivering effective continuing education and faculty development; models for mentoring clinical faculty. Open only to Academic Medicine majors.

ACMD 615 Maintenance of Competence in the Health Professions (2) Maintenance of competence and continuing professional development (CPD) of physicians and other health care professionals; trends, needs, strategies, assessing outcomes, examining effectiveness of CPD programs. Open only to Academic Medicine majors.

ACMD 621 Capstone Portfolio for the Master of Academic Medicine (1) Role of portfolios for teachers and learners; develop a personal capstone portfolio that represents each learner's accomplishment of the core competencies of the MACM program. Open only to Academic Medicine majors. Graded CR/NC.

Keck School of Medicine

Master of Science in Clinical, Biomedical and Translational Investigations

Keith Administration Building 200

(323) 442-2965

Email: [✉ msclnbio@usc.edu](mailto:msclnbio@usc.edu)

Program Co-Directors:

Stanley P. Azen, Ph.D., *Professor, Co-Director of Biostatistics, Preventive Medicine, Co-Director CETCD*

The Master of Science in Clinical, Biomedical, and Translational Investigations (CBTI) is a joint effort to train medical students, fellows or other health professionals, including faculty and other scientists conducting clinical-related research, in clinical research methods to translate clinical, biomedical and technological discoveries into advances in population-based, clinical or basic science research. The M.S. Program of Clinical, Biomedical, and Translational Investigations (CBTI) is available to medical students who have completed their second year of medical school, and pre-doctoral students who are interested in expanding their pre-doctoral training to include methodology associated with conducting translational research. Pre-doctoral students will earn a joint degree (Ph.D. in their research area and an M.S. in CBTI). In addition, the M.S. CBTI Program is tailored to MDs doing fellowships at USC or Children's Hospital Los Angeles (CHLA), faculty interested in expanding their research careers, or are recipients of Young Investigator Awards, including Southern California Clinical Translational Science Institute's (SC CTSI) Center for Education, Training, and Career Development K and T Awardees. Tracks include: 1) Clinical Translational Research, 2) Community-based Intervention Trials, 3) Design, Conduct and Analysis of Clinical Studies, 4) Epidemiology and Disease Etiology, 5) Health Outcomes Research, 6) Environmental Epidemiology, 7) Molecular Biology, 8) Cell Biology, 9) Vision Science, and 10) Alternative Options Track.

The M.S. program in Clinical and Biomedical Investigations is designed to train students, fellows and faculty for future independent research careers in an academic, government or private sector setting. The objective of the M.S. program is to produce a clinical researcher with either an in-depth knowledge in laboratory methodologies or statistical and analytic skills in population-based, clinical studies or outcomes research. The program gives students a solid background in the methodological aspects of translational research, and in statistical thinking as applied to molecular epidemiology, as well as a solid grounding in biostatistical, epidemiological methods, and community based intervention strategies.

Admission Requirements

Applicants must apply to the Graduate School and meet the minimum requirements for admission to the Graduate School. The Departments of Preventive Medicine, Cell and Neurobiology, Family Medicine, and the Center for Education, Training and Career Development (CETCD) jointly administer the program through the MS Program Office.

The program will consider applicants who satisfy all requirements for admission to the Graduate School. For the M.S. program in Clinical and Biomedical Investigations, MCAT scores may be substituted for the GREs. Applicants not meeting Graduate School requirements for regular standing may, with approval of the Graduate School, be conditionally admitted. Regular standing is contingent upon maintaining a GPA of 3.0 in the first 12 units of graduate studies. All graduate students must maintain a GPA of 3.0 throughout their graduate studies.

General Requirements

Graduation requires the completion of a minimum of 29 units, of which a minimum of 15 units are didactic course credits taken in the first year (including summer sessions), with the remaining units being directed to: a) PM 590 (directed research, 1–12 units) and PM 594ab (thesis, 4 units) taken in the second year. The equivalent of one year of full-time effort must be devoted to research leading to a master's thesis. The thesis provides a structure for the development of a plan to address a research problem and a suitable approach to the analysis and presentation of the results.

Because the background and interests of applicants varies widely, one of the co-directors will consult with each student prior to the first year in order to design an individualized schedule of recommended courses, or this may be negotiated with a student's faculty sponsor. At the end of the first year, the trainee must submit a final program plan to the co-directors. This will summarize the courses taken, the proposed thesis title, and the names and credentials of the M.S. thesis committee. One of the members of the M.S. thesis committee will be the trainee's research adviser and will serve as the chair of the committee. At least one member of the thesis committee must be from outside the student's department. For faculty, at least two members of the thesis committee must be from outside the student's department.

For those trainees or SC CTSI's CETCD K and T awardees who do not wish to pursue an M.S. degree, the school offers a certificate in clinical, biomedical, and translational investigations (CBTI). The certificate program

requires completion of 12 credits, and a minimum of six months of practical research experience working on a research project (PM 590) approved by either an Oversight Committee or the CETCD's K and T Award Committee Review Process.

Students are expected to attend the three day workshop on NIH proposal development if offered by Thomas Ogden, M.D., Ph.D., and a workshop on the principles of scientific manuscript preparation.

Certificate in Clinical, Biomedical and Translational Investigations

Students who do not wish to pursue an M.S. degree may earn a university certificate in clinical, biomedical, and translational investigations. The certificate program requires 12 didactic credits and a minimum of six months (PM 590 Directed Research, 3 units) of practical experience working on a research project approved by the faculty mentor and co-directors.

Recommended Core Courses for Each Research Track

CLINICAL TRANSLATIONAL RESEARCH		(13-16 UNITS)
PM 510L	Principles of Biostatistics	4
PM 512	Principles of Epidemiology	4
PM 523	Design of Clinical Studies, or	3
PM 612abc	Clinical Translational Research	12
Electives (Pick one course)		
BIOC 543	Human Molecular Genetics	4
MPTX 511	Introduction to Medical Product Regulation	3
MPTX 602	Science, Research, and Ethics	2
PM 511b	Data Analysis	4
PM 512	Principles of Epidemiology	4
PM 518a	Statistical Methods for Epidemiological Studies I	3
PM 570	Statistical Methods in Human Genetics	4
RSCI 530	Translational Medicine: An Overview	2
COMMUNITY-BASED INTERVENTION TRIALS		(16 UNITS)
PM 512	Principles of Epidemiology	4
PM 528	Program Design and Evaluation	4
PM 563	Organizing and Mobilizing Communities for Public Health	4
Electives (Pick one course)		
PM 526	Communications in Public Health	4
PM 562	Intervention Approaches for Health Promotion and Disease Prevention	4
DESIGN, CONDUCT AND ANALYSIS OF CLINICAL STUDIES		(18 UNITS)
PM 510L	Principles of Biostatistics	4
PM 511a	Data Analysis	4
PM 523	Design of Clinical Studies	3
PM 538	Introduction to Biomedical Informatics	3
PM 570	Statistical Methods in Human Genetics	4
EPIDEMIOLOGY AND DISEASE ETIOLOGY		(14-15 UNITS)
PM 510L	Principles of Biostatistics	4

PM 512	Principles of Epidemiology	4
PM 517a	Research Methods in Epidemiology	3
Electives (Pick one course)		
PM 518a	Statistical Methods for Epidemiological Studies I	3
PM 527	Epidemiology of Infectious Disease	4
PM 529	Environmental and Occupational Health: An Epidemiological Approach, or	
PM 533	Genetic and Molecular Epidemiology	3
HEALTH OUTCOMES RESEARCH		(16 UNITS)
PM 511a	Data Analysis	4
PMEP 538	Pharmaceutical Economics	4
PMEP 539	Economic Assessment of Medical Care	4
PMEP 540ab	Seminar in Pharmaceutical Economics and Policy	2-2
ENVIRONMENTAL EPIDEMIOLOGY		(17-18 UNITS)
PM 510L	Principles of Biostatistics	4
PM 512	Principles of Epidemiology	4
PM 518a	Statistical Methods for Epidemiological Studies I	3
PM 529	Environmental Health: An Epidemiological Approach	3
Electives (Pick one course)		
PM 511a	Data Analysis	4
PM 533	Genetic and Molecular Epidemiology	3
PM 570	Statistical Methods in Human Genetics	4
PM 599	Special Topics	4
MOLECULAR BIOLOGY		(16 UNITS)
INTD 531	Cell Biology	4
INTD 561	Molecular Biology	4
INTD 571	Biochemistry	4
Electives (Pick one course)		
BIOC 543	Human Molecular Genetics	4
INTD 504	Molecular Biology of Cancer	4
INTD 555	Biochemical and Molecular Bases of Disease	4
MICB 551	Prokaryotic Molecular Genetics	4
CELL BIOLOGY		(15 UNITS)
INTD 531	Cell Biology	4
INTD 571	Biochemistry	4
PATH 553	Methods in Cellular and Clinical Pathology	3
Electives (Pick one course)		
INTD 504	Molecular Biology of Cancer	4
INTD 555	Biochemical and Molecular Bases of Disease	4

VISION SCIENCE**(19-26 UNITS)**

INTD 501	Recent Advances in Vision Science	1, max 4
INTD 531	Cell Biology	4
INTD 571	Biochemistry	4
INTD 573	Systems Physiology and Disease II	4
PHBI 608ab	Advanced Cellular, Molecular and Systemic Physiology	2 or 4 each
PSCI 667	Intracellular Drug Delivery and Targeting	2

ALTERNATIVE OPTIONS TRACK (MINIMUM 16 UNITS)

Courses are determined by mentor and student, based on research interests, with approval from the oversight committee.

Seminars/Workshops

Participation is required in a Recent Advances Journal Club to learn how to read papers critically and develop the speaking skills necessary to explain a research paper. Faculty members in the program rotate as course directors in order to emphasize new topics. Students are expected to attend the three-day workshop on NIH Proposal Development if offered by Thomas Ogden, Ph.D., and a workshop on the principles of scientific manuscript preparation.

Keck School of Medicine

Master of Science in Global Medicine**Keith Administration Building 317**

1975 Zonal Avenue

Los Angeles, CA 90089-9024

Tel: (323) 442-3141

FAX: (323) 442-1766

*keck.usc.edu/msgm**Program Director: Elahe Nezami, Ph.D.*

The Master of Science in Global Medicine (MSGM) is offered by the Department of Educational Affairs of the Keck School of Medicine. The program aims to train medical, dental and pharmacy students; current physicians and allied health professionals; and those planning to pursue degrees in the allied health professions to analyze and address critical issues in global medicine. The program provides a solid foundation in basic science while also exposing students to a broad scope of pertinent issues in global medicine. The program offers an advanced standing option for physicians, dentists, current medical/dental students and applicants with a Pharm.D. degree from accredited institutions. Students admitted to the advanced standing option may use previous equivalent course work for 8 units of credit toward MEDS 503L Core Principles System I and MEDS 504L Core Principles System II course requirements. The advanced standing option allows students to bypass the foundation course work and focus on globally oriented course work.

By providing the knowledge and training necessary to address current and future global medical challenges, the M.S. in Global Medicine program responds to the Institute of Medicine's recommendation that the education of health professionals include course work that promotes literacy in global medicine. In addition to gaining a strong medical science foundation, students are immersed in course work that examines methods used to create innovative programming, solutions and responses to global health challenges, thereby furnishing them with the problem-solving skills and analytical frameworks essential to their future career paths. Through partnerships

with the Marshall School of Business and the Viterbi School of Engineering, the M.S. in Global Medicine also includes a management track for students who intend to pursue international health management.

Upon completion of the M.S. in Global Medicine, students will be equipped to serve as leaders within the allied health field, including, but not limited to: medicine, pharmacy, dentistry and nursing. In addition, graduates will be prepared to collaborate with or seek employment from a variety of international aid, nonprofit, and global health organizations such as: the United Nations, the International Red Cross, United Nations Joint Programme on HIV/AIDS, United Nations Children's Fund, World Health Organization, World Bank and the Centers for Disease Control and Prevention.

Admission

Applicants for admission to the program must have a bachelor's degree or its equivalent from an accredited institution and have earned a GPA of 3.0 (A = 4.0) in undergraduate work. Prerequisite undergraduate course work for Clinical Track applicants must include one year of general biology, one year of general chemistry, one year of organic chemistry and one semester of calculus. Applicants to the Management Track should consult with advisers for prerequisite exceptions.

All applicants are required to have taken the Graduate Record Examinations (GRE) General Test, the Dental Admission Test (DAT) or the Medical College Admission Test (MCAT). A minimum score of 300 on the GRE, 18 on the DAT or 28 on the MCAT is required. Applicants beneath these standardized test score requirements are asked to consult with program staff for advisement. International Medical Graduates (IMGs) from accredited institutions can submit their USMLE results in lieu of GRE, DAT or MCAT scores. Applicants must also supply three letters of recommendation from evaluators qualified to assess their potential for graduate work. If applying for the advanced standing option, U.S. applicants must have successfully completed their first year of an M.D. (Doctor of Medicine) or DDS (Doctor of Dental Surgery) program or earned a Pharm.D. degree from a U.S.-accredited institute; international applicants must have earned a bachelor's degree in medicine and surgery or a degree equivalent of DDS (Doctor of Dental Surgery) or a Pharm.D. degree from an accredited institute.

Applicants must supply a completed application for graduate studies including: transcripts from all institutions previously attended, standardized test scores and three letters of recommendation. Applications are considered for enrollment in both fall and spring semesters. For further information contact: Master of Science in Global Medicine Program, 1333 San Pablo Street, MCA 144, Los Angeles, CA 90033, Tel: (323) 442-3141, email: [✉ msgm@med.usc.edu](mailto:msgm@med.usc.edu).

Advisement

The program recommends that students meet with an academic adviser of the program each semester prior to registration.

Satisfactory Academic Progress

A graduate GPA of at least 3.0 is required at all times. Any student whose graduate GPA falls below 3.0 will be placed on academic probation. Students on academic probation who do not raise their GPA to 3.0 after two semesters of written notification of academic probation will be academically disqualified. A minimum of 32 units of graduate level course work is required for graduation from the clinical or management track. A minimum of 24 units of graduate level course work is required for graduation with the advanced standing option.

Degree Requirements

CORE COURSES		UNITS
<i>GM Clinical Track Core</i>		
MEDS 500	Basic Concepts in Global Health	4
MEDS 503L	Core Principles System I	4
MEDS 504L	Core Principles System II	4
<i>GM Management Track Core</i>		
GSBA 520	Business Fundamentals for Non-Business Professionals	3

DSO 582	Service Management: Economics and Operations	3
MEDS 500	Basic Concepts in Global Health	4
MEDS 502	Global Epidemiology of Diseases and Risk Factors	4
<i>GM Advanced Standing Track Core</i>		
MEDS 500	Basic Concepts in Global Health	4
MEDS 502	Global Epidemiology of Diseases and Risk Factors	4

ELECTIVE COURSES		UNITS
-------------------------	--	--------------

(GM Clinical track students must complete at least 20 GM elective units; GM Management track students must complete at least 12 GM electives units; GM Advanced Standing track students must complete at least 16 GM elective units)*

GM Electives

MEDS 501	Critical Issues in Global Health	4
MEDS 502	Global Epidemiology of Diseases and Risk Factors	4
MEDS 510	Global Health Modules, Malaria	2
MEDS 511	Global Health Modules, Tuberculosis	2
MEDS 512	Global Health Modules, Maternal and Child Health I	2
MEDS 513	Global Health Modules, Maternal and Child Health II	2
MEDS 514	Global Health Modules, Tropical Diseases	2
MEDS 515	Global Health Modules, HIV/AIDS	2
MEDS 516	Cultural Competence in Health and Medicine	2
MEDS 517	Health and Human Rights	2
MEDS 518	Children in Emergency Situations: Global Policies & Programs	2
MEDS 520	Medical Spanish for the Health Professions	2
MEDS 521	Emerging and Re-emerging Infectious Diseases	2
MEDS 522	Human Hepatitis Viruses	2
MEDS 523	Global Toxicity and Carcinogenesis	2
MEDS 524	Grantwriting for Non-Government Organizations	2
MEDS 525	Global Mental Health	2
MEDS 526	Alternative and Eastern Medicine: A Biomedical Approach	2
MEDS 527	Zoonotic Infectious Diseases	2
MEDS 528	Global Health Modules, Sexually Transmitted Infections	2
MEDS 529	Refugee Healthcare	2
MEDS 530abc	Foundation of Medicine: Anatomy, Physiology, and Pathology	4-4-4
MEDS 535	Culture, Lifestyle, and Health	2
MEDS 550	Clinical Medicine and Healthcare Reform in Taiwan	2
MEDS 551	Clinical Medicine and Socioeconomic Factors in Uganda	2
MEDS 552	Clinical Medicine and Healthcare Reform in Jordan	2
MEDS 553	Clinical Medicine and Healthcare Challenges in India	2
MEDS 554	Clinical Medicine and Healthcare Delivery in Panama	2
MEDS 555	Clinical Medicine and Healthcare Access in Honduras	2
MEDS 556	Global Health Field Study, New York	2
MEDS 590	Directed Research	2-4
MEDS 599	Special Topics	2-4

GM Management Track Electives

ISE 507	Six-Sigma Methods and Applications	3
ISE 508	Health Care Operations Improvement	3
MKT 565	Global Marketing	3
MOR 470	Global Leadership	4
MOR 569	Negotiation and Deal-making	3

Note: On a case-by-case basis, GM students and GM Management students may take classes outside their particular group.

**Students will take 8 units of electives that have a global focus, chosen in consultation with their adviser from among MEDS courses.*

M.D./Master of Science, Global Medicine

The dual degree in Doctor of Medicine and Master of Science in Global Medicine will provide medical students with formal education in the field of global health. Students will benefit from a curriculum that supplements and strengthens their medical knowledge with additional expertise in cultural competence, the specific diseases that affect various populations worldwide, and the unique issues respective to practicing medicine in a developing country or in vulnerable, underserved populations domestically.

Requirements

Current enrollment in the Keck School of Medicine M.D. program and successful completion of at least the first two years of the M.D. curriculum are required prior to submitting an application to the M.S. in Global Medicine program for admission to the dual degree program. Students must gain admission to and fulfill the degree requirements for both programs, which include four years of course work for the Doctor of Medicine and 24 units of the M.S. in Global Medicine (Clinical track only).

For the dual degree with Global Medicine Clinical Track, 24 GM elective units should be successfully completed. The M.D. and the M.S. in Global Medicine degrees are awarded simultaneously upon successful completion of both degree requirements.

Program Adaptation

For the dual degree with Global Medicine Clinical Track, there are no Global Medicine core unit requirements. Students enrolled in M.D./M.S.G.M. dual degree will be eligible to apply 2 GM study-abroad elective units and 2 other GM elective units (except MEDS 503L, MEDS 504L, MEDS 520, MEDS 524 and MEDS 530abc) toward their MD program elective requirements. GM Management Track electives cannot be applied toward either degree requirements.

Pharm.D./Master of Science, Global Medicine

The dual degree in Pharmacy and Global Medicine is designed for students who are interested in providing pharmaceutical care to underserved populations around the world. Students enrolled in this dual degree program will benefit from an advanced understanding of the role of, and issues surrounding, modern medicine in developing countries.

Requirements

Students must gain admission to and fulfill the degree requirements for both programs, which include 138 units for the Doctor of Pharmacy and 24 units for the M.S. in Global Medicine. Six units of MEDS elective units can be used toward the Pharm.D. elective requirement, and PHRD 503 and PHRD 504 substitute for MEDS 503 and MEDS 504.

Program Adaptation

Because MEDS 503 and MEDS 504, core requirements for the M.S. in Global Medicine program, cover the same material as PHRD 503 and PHRD 504, the Pharm.D./Global Medicine dual degree program substitutes PHRD 503 and PHRD 504 for MEDS 503 and MEDS 504 as core requirements for the dual degree.

Graduate Certificate in Global Medicine

The certificate program in global medicine is for students who do not wish to pursue an M.S. degree in global medicine, but hope to pursue or expand careers in global health care. Students will study current topics in global health and health care, and will have a strong grounding in cultural competence, specific diseases, and creating and implementing health interventions in developing countries.

Students take 16 units of graduate course work that may not be used or have been used for any other degree or certificate program. These units include two core classes and eight units of electives, as follows:

CORE COURSES		UNITS
MEDS 500	Basic Concepts in Global Health	4
MEDS 502	Global Epidemiology of Diseases and Risk Factors	4

ELECTIVE COURSES:

Students will take 8 units of electives, chosen in consultation with their adviser, from among all MEDS courses numbered 510 or above. For example, there are groups of courses relevant to women's and family health; infectious diseases; health care in developing countries; working with diverse populations in the United States, etc.

Courses of Instruction

MEDICAL SCIENCES (MEDS)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MEDS 500 Basic Concepts in Global Health (4, FaSpSm) Exploration of global health issues facing resource-poor societies; emphasizes contributing factors including behavioral and physiological bases, economic, social, and political context.

MEDS 501 Critical Issues in Global Health (4, FaSpSm) Evaluation of government and non-government organizations' new global health responses, and critical issues affecting global health including: environment, workforce conditions, obesity, nutrition, drugs, poverty.

MEDS 502 Global Epidemiology of Diseases and Risk Factors (4, FaSpSm) Survey of major populations' crises and risk factors accounting for global health challenges. Evaluation of case studies of global health interventions and effective methodologies.

MEDS 503L Core Principles System I (4, FaSpSm) Introduction to basic medical concepts and biological system functions; examination of core principles of science and medical treatment.

MEDS 504L Core Principles System II (4, Fa) Continuation of concepts from MEDS 503L. Basic medical concepts and biological system functions; examination of core principles of science and medical treatment.
Prerequisite: MEDS 503L.

MEDS 510 Global Health Modules, Malaria (2, FaSpSm) Critical issues in international control and treatment of malaria. Exploration of biological and epidemiological fundamentals of human-parasite interaction, including dynamics of transmission among populations.

MEDS 511 Global Health Modules, Tuberculosis (2, FaSpSm) Exploration of biological and epidemiological fundamentals of tuberculosis including dynamics of transmission among populations. Overview of clinical manifestations, diagnosis, and treatment of infections.

MEDS 512 Global Health Modules, Maternal and Child Health I (2, FaSpSm) Biopsychosocial, cultural and economic aspects of women's health: pregnancy, childbirth, marriage. Examination of health

promotion and policy efforts to improve women's health globally.

MEDS 513 Global Health Modules, Maternal and Child Health II (2, FaSpSm) In-depth examination of women's health issues; health promotion and policy efforts to improve women's health globally.

MEDS 514 Global Health Modules, Tropical Disease (2, FaSpSm) Examination of prevalent tropical diseases: epidemiology, clinical manifestations, treatment, impact on economies of tropical countries. Key issues related to these diseases; World Health Organization responses.

MEDS 515 Global Health Modules, HIV/AIDS (2, FaSpSm) HIV epidemiology, basic biology of transmission and pathophysiology, associated opportunistic infections, and challenges to providing care in the developing world, including government responses.

MEDS 516 Cultural Competence in Health and Medicine (2, FaSpSm) Practical approach to the development of professional skills for providing culturally sensitive clinical health services to ethnically and linguistically diverse patients.

MEDS 517 Health and Human Rights (2, FaSpSm) The relationship between health and human rights, and the study of human rights issues relevant to health care professionals.

MEDS 518 Children in Emergency Situations: Global Policies and Programs (2, Sp) Focuses on children in emergency situations, including natural and man-made disasters, such as floods, earthquakes, conflicts, or war, with an emphasis on the poorest and most vulnerable children. Open only to Global Medicine majors.

MEDS 519 Global Oral Health (2, FaSpSm) Better understand the key issues impacting global oral health, how better care can help reduce the disease prevalence, and ways to prepare the next generation of global health leaders to address the key issues. Open only to Global Medicine majors.

MEDS 520 Medical Spanish for the Health Professions (2, FaSpSm) Spanish language course for students planning to enter the health professions.

MEDS 521 Emerging and Re-emerging Infectious Diseases (2, FaSpSm) Exploration of the threat of major worldwide epidemics and diseases with a focus on the recent emergence of new plagues.

MEDS 522 Human Hepatitis Viruses (2, FaSpSm) Human hepatitis and the viruses that cause them, how they are spread, symptoms, treatment, and prevention.

MEDS 523 Global Toxicity and Carcinogenesis (2, FaSpSm) Covers the occurrences of toxic substances and the toxicity/diseases they cause, and chemical carcinogens and the types of cancer they cause worldwide.

MEDS 524 Grantwriting for Non-Government Organizations (2, FaSpSm) Instruction on the process and methods of writing effective grants from identifying appropriate funders to implementing project upon receipt of funding award.

MEDS 525 Global Mental Health (2, FaSpSm) Examines the major mental health diagnoses from clinically relevant perspectives and their prevalence in specific geographical regions around the world.

MEDS 526 Alternative and Eastern Medicine: A Biomedical Approach (2, FaSpSm) Exploration of issues of complementary and alternative medicine (CAM) and traditional Eastern medical views of health and illness from a Western biomedical perspective.

MEDS 527 Zoonotic Infectious Diseases (2, SpSm) Background information on a group of infections that are transmitted via animal contact. Understanding of the epidemiology, clinical manifestations, treatment, and impact of the diseases on the economies of the countries in which they are found. Open only to graduate students. *Recommended preparation:* MEDS 500.

MEDS 528 Global Health Modules, Sexually Transmitted Infections (2, SpSm) Examines clinically relevant perspectives from distinguished international authors on STI issues and the devastating effect on

particular geographical regions around the world.

MEDS 529 Refugee Health Care (2) Introduction to refugee health care and life events which impact health. Discuss medical needs of long-term displaced populations with specific case studies. Open only to graduate students.

MEDS 530abc Foundation of Medicine: Anatomy, Physiology, and Pathology (4-4-4, FaSpSm) a: Fundamentals of physiology, chemistry, anatomy, biochemistry and microbiology, as well as pharmacological issues, mathematical basis of lab instruments or techniques, and computational modeling. *b:* The basics of human anatomy (gross anatomy, histology, radiographic anatomy), physiology (cellular physiology, organ system areas) and pathology (general, systemic, cellular pathology). *c:* Continues material from MEDS 530a and MEDS 530b, covering human anatomy (gross anatomy, histology, radiographic anatomy), physiology (cellular physiology, organ systems) and pathology (general, systemic, cellular pathology).

MEDS 531 The Politics of Global Health (2, FaSpSm) Examines the impact of politics on global health progress and declines. Open only to Global Medicine majors.

MEDS 532 Non-communicable Diseases (2, FaSpSm) A conceptual framework for understanding global challenges faced in the management of non-communicable diseases, including heart disease, diabetes, chronic lung disease, and cancer.

MEDS 553 Emerging Cell-based Therapeutics (2) Examination of microbial and human cells as versatile therapeutic engines, including their novel applications: autologous and allogenic immunotherapies, stem cell technologies, and human microbiome transplantations. *Recommended preparation:* two semesters of Introductory Biology; two semesters of Cell Biology and Genetics.

MEDS 535 Culture, Lifestyle, and Health (2, FaSpSm) Overview of national and international variations in health status indicators in regard to cultural and lifestyle differences.

MEDS 550 Clinical Medicine and Health Care Reform in Taiwan (2, Sm) Two-week in-depth study abroad in Taipei, Taiwan, focused on understanding Taiwan's health care system, health priorities, and needs.

MEDS 551 Clinical Medicine and Socioeconomic Factors in Uganda (2, Sm) Two-week course that provides students with hands-on experience in clinical medicine/public health and exposure to the various socioeconomic factors impacting health in the developing world.

MEDS 552 Clinical Medicine and Health Care Reform in Jordan (2, Sm) A two-week, in-depth study abroad course that explores the economic, social, political, and health issues in the Middle East region and specifically Jordan.

MEDS 553 Clinical Medicine and Health Care Challenges in India (2, Sm) Two-week study abroad course that explores the health dynamics and health care settings of India.

MEDS 554 Clinical Medicine and Healthcare Delivery in Panama (2, SpSm) A two-week course providing students with hands-on experience in the practice of rural medicine as they gain exposure to the various socio-economic factors present in Bocas del Toro, Panama. *Recommended preparation:* MEDS 500, MEDS 501, MEDS 510, MEDS 511, MEDS 514, MEDS 515. Open only to Global Medicine majors.

MEDS 555 Clinical Medicine and Healthcare Access in Honduras (2, Sm) A three-week hybrid course providing students with hands-on experience in clinical medicine/public health and exposure to the various socio-economic factors impacting healthcare delivery in the developing world, specifically in Honduras. *Recommended preparation:* MEDS 500, MEDS 501, MEDS 513, MEDS 514, MEDS 515. Open only to Global Medicine majors.

MEDS 556 Global Health Field Study, New York (2, Sp) Two-week course providing students with a solid understanding of the United Nations' major agencies influential in global health, their mandate, their strengths and challenges. Includes field visit to selected UN organizations all located in NYC. Open only to Global Medicine majors.

MEDS 557 Clinical Medicine and Healthcare Dynamics in Denmark (2, SpSm) Two-week course that provides a venue for careful examination and assessment of the economic, social, political, and specific health issues currently faced by countries in the European Region. Open only to Global Medicine majors.

MEDS 558 Clinical Medicine and Translational Research in Argentina (2, SpSm) Two week in-depth course examining and assessing the economic, social, political and unique health issues faced by the Latin-American Region especially Argentina. Open only to Global Medicine majors.

MEDS 559 Clinical Medicine and Healthcare Determinants in China (2, SpSm) A two-week intensive course abroad in Shanghai, China, focused on understanding clinical realities of Chinese medicine, health determinants and healthcare delivery. *Recommended preparation:* MEDS 500, MEDS 501, MEDS 515, MEDS 535. Open only to Global Medicine majors.

MEDS 560 Innovating in Healthcare in Malaysia (2, Sm) Two-week study abroad course in Malaysia that examines the capacity of local communities to address health needs and to address health priorities with innovation.

MEDS 561 Global Healthcare Development and Practices in Nepal (2, Sm) Two-week course providing a multi-faceted understanding of the delivery of essential services to underserved populations, particularly women and children, in the challenging Nepalese healthcare landscape. *Recommended preparation:* MEDS 500, MEDS 501, MEDS 513, MEDS 518. Open only to global medicine majors.

MEDS 562 Healthcare in Thailand (2, Sm) Two-week course that provides students opportunities to analyze and gain exposure to public health and health systems infrastructure in Thailand. *Recommended preparation:* MEDS 500, MEDS 501, MEDS 515, MEDS 535.

MEDS 563 Global Healthcare Development and Social Justice in Italy (2, Sm) A two-week course analyzing global healthcare access and delivery through the lens of development economics, social justice, health advocacy, and Italian medical history and research.

MEDS 564 Health Behavior and Healthcare in Germany (2, Sm) Two-week course that exposes students to public health and health systems infrastructure in Germany and Switzerland, including analysis of health behaviors. *Recommended preparation:* MEDS 500, MEDS 501, MEDS 515, MEDS 535.

MEDS 590 Directed Research (1-12, max 12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MEDS 597ab Health Technology Internship (1-1, FaSpSm) *a:* Internship course on the use of new technology based on sensors and wireless communications to the healthcare industry. *b:* Internship course on the use of new technology based on sensors and wireless communications to the healthcare industry. Continues material from GM 597a. Open only to M.S., Electrical Engineering (Wireless Health Technology) students. Graded CR/NC.

MEDS 599 Special Topics (2-4, FaSpSm) Lecture and discussion focused on specific topics within global medicine. Course topic will vary from semester to semester.

Keck School of Medicine

Graduate Certificate in Health, Technology and Engineering (HTE@USC)

Academic Director: Terry Sanger, M.D., Ph.D., *Provost Associate Professor of Biomedical Engineering, Neurology, Biokinesiology, and Physical Therapy*

Administrative Director: George Tolomiczenko, Ph.D., *Assistant Professor, Neurology*

This program offers current second-year USC Ph.D. engineering students and first-year M.D. students an

opportunity to learn about and gain experience in medical device and process innovation. Through project-based and interdisciplinary collaboration, students will augment their current programs with a set of courses and lab experiences linking medical and engineering research groups. By applying design-informed approaches toward problem identification and solution prototyping, students will be involved in all the steps of medical device innovation from conception to commercialization. The program aims to create interdisciplinary, boundary-spanning, inventive entrepreneurs seeking early practical experience with device and method innovation in health care. Program participants will form bonds with a group of like-minded medical students and engineers who will be their mentors, colleagues and contacts as they advance in their careers.

The courses unique to the program include a seminar sequence (Topics in Health, Technology and Engineering), which must be taken during the first two years of involvement with the HTE@USC program, a case studies sequence taken during the second year and a research course to earn project-related credits:

COURSES		UNITS
BME 566abcd	Topics in Health, Technology and Engineering	2-2-2-2
BME 567ab	Case Studies in Health, Technology and Engineering	1-1
790	Research (in the student's major department)	2-8

Other required courses that are part of the M.D. curriculum (Ph.D. students enroll in INTD course versions of the same courses open only to HTE students on CR/NC basis):

INTD 621ab	Introduction to Clinical Medicine (ICM) for HTE	3-3
INTD 622L	Pre-clinical System Block for Health, Technology and Engineering	3-5

Candidates interested in applying should contact [✉ HTE@usc.edu](mailto:HTE@usc.edu) via email.

Keck School of Medicine

Undergraduate Minor Program

Minor in Health Care Studies

The USC Dornsife College of Letters, Arts and Sciences and the Keck School of Medicine offer an interdisciplinary minor in health care studies. This minor is targeted to those undergraduates who wish to pursue a postgraduate career in health care or health care related fields. The minor brings together a background in fundamental science necessary to understand the biological basis of medicine with course work that explores health care both in classroom and clinical settings. The minor requires a minimum of 28 units, at least 16 of which must be at the upper-division level. If the core required courses listed below are already included in a student's major, then other lower division courses may be selected from the electives list.

Students should consult their advisers in selecting courses. Depending on the major, prerequisites may increase total units required to complete this minor.

REQUIRED COURSES (12 UNITS)		UNITS
BISC 220L	General Biology: Cell Biology and Physiology, or	
BISC 221L	Advanced General Biology: Cell Biology and Physiology	4
CHEM 103Lx	General Chemistry for the Environment and Life, or	
CHEM 105aL	General Chemistry	4
MDA 110	Contemporary Issues and Cases in Health Care	2
MEDS 220	Preparation for the Clinical Experience	2

Electives: Students must choose a minimum of 16 upper division units from the following lists.

Introduction to Human Health I

ANTH 101	Illness and Healing: The Cross-Cultural Perspective	4
BISC 150Lx	The Nature of Human Health and Disease	4
PSYC 100	Introduction to Psychology	4
PSYC 360*	Abnormal Psychology	4

Introduction to Human Health II

BISC 320L*	Molecular Biology	4
BISC 421*	Neurobiology	4
BISC 450L*	Principles of Immunology	4

**Prerequisite required*

Courses of Instruction

MEDICAL SCIENCES (MEDS)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MEDS 220 Preparation for the Clinical Experience (2, FaSpSm) Discussion and exercises in clinically

relevant topics (professional behavior, patient privacy, medical ethics, cultural competency, teamwork, etc.) in preparation for experience in the clinical setting.

MEDS 260 Challenges in the Forefront of Biomedical Ethics (2, Sp) Examination of fundamental ethical concepts and principles in clinical health care and biomedical research. Use of film, case studies and discussion. *Recommended preparation:* MDA 110 or MEDS 220.

MEDS 280 The History of Medicine: a Doctor's Perspective (2, Fa) Explores the role of medicine/surgery in society, whose ideas about health and disease have undergone enormous changes from antiquity to the present day.

MEDS 300 Statistical Methods for Biomedical Research (4, Fa) Fundamental basis for various statistical tests, underlying assumptions, and statistical analyses used in biomedical and clinical research.

MEDS 320 Human Cadaveric Anatomy (4, FaSp) Anatomical structure and function of the major regions of the human body as related to health and disease, using clinical cases, lectures and cadaveric demonstrations. *Prerequisite:* BISC 220L or BISC 221L.

MEDS 335 Human Development: From Stem to Sternum (2, Fa) An introduction to transformation of a single cell into a mature organism. *Prerequisite:* BISC 220L or BISC 221L. *Recommended preparation:* BISC 320L.

MEDS 340 The Brain in Health and Disease (4, Fa) Study of the human brain with emphasis on structure-functional relationships, illustrative case studies, current imaging techniques, with illustrative laboratory exercises using specimens and slides. *Prerequisite:* BISC 220L or BISC 221L; CHEM 103Lx or CHEM 105a or CHEM 115a; *recommended preparation:* MEDS 310.

MEDS 350 Drugs and the Brain (2, Sp) Effects of legal and illegal drugs on human brain function. Introduction to common prescribed drugs, pharmacokinetics, pharmacodynamics, and brain pathways utilized by common drug classes. *Prerequisite:* BISC 220L or BISC 221L; and CHEM 103Lx or CHEM 105aL or CHEM 115aL; *recommended preparation:* BISC 320L or BISC 330L.

MEDS 360 From Bench to Bedside: New Frontiers in Biomedical Research (2, Fa) A theoretical basis of laboratory approaches that help the biomedical or physician scientist in understanding the etiology of disease and targeting disease processes. *Prerequisite:* BISC 220L or BISC 221L; and CHEM 103Lx or CHEM 105aL or CHEM 115aL; *recommended preparation:* BISC 320L or BISC 330L.

MEDS 370 Organ Failure: Non-Communicable Chronic Disease (2, Sp) An examination of frequently treated diseases with the greatest impact on society. Involvement of medical specialists and actual patients as guests. *Prerequisite:* MEDS 220 and BISC 220L or BISC 221L; and CHEM 103Lx or CHEM 105aL or CHEM 115aL; *recommended preparation:* MEDS 320 or EXSC 301L.

MEDS 380 Stem Cells: Fact and Fiction (2, Sp) Exploring how stem cells and regenerative medicine are portrayed in culture, the scientific underpinnings of what is currently possible, and visions into the future. *Prerequisite:* BISC 220L or BISC 221L.

MEDS 425 Medical Examiner-Coroner: Investigating Death (2, Fa) Emphasizes the team-based approach used by forensic scientists, medical examiners and coroners to investigate the circumstances and determine the cause/manner of death. *Prerequisite:* BISC 220 or BISC 221 and MEDS 220. Open only to juniors and seniors.

MEDS 440 Introduction to Surgical Principles (2, Sp) Introduction to the spectrum of surgical care, taught by surgeons, with the goal of developing an appreciation of the role that surgery plays in society. *Prerequisite:* BISC 220 or BISC 221; and CHEM 103Lx or CHEM 105a or CHEM 115a; and MEDS 220. Open only to juniors and seniors.

MEDS 445 Cancer: Introduction to Oncology in the Modern Era (2, Fa) Introduction to the spectrum of clinical and scientific issues surrounding contemporary cancer care – molecular diagnostics, genomic

medicine, modern therapeutics, and community/patient engagement. *Prerequisite:* BISC 220 or BISC 221 and MEDS 220. Open only to juniors and seniors.

MEDS 450 OB/GYN: The Medicine and Surgery of Reproduction (2, Fa) An introduction to the practical realities of modern obstetric and gynecology practice from the point of view of practicing surgeon scientists at USC. *Prerequisite:* BISC 220 or BISC 221 and MEDS 220.

MEDS 460 Emergency Health Care (2, FaSp) Principles of emergency medical services, ranging from pre-hospital care and advanced life-saving, to minor injuries and illnesses. Interactive experience with ER physicians/emergency health care providers. *Prerequisite:* BISC 220 or BISC 221; and MEDS 220. *Recommended preparation:* MEDS 260.

MEDS 465 Wilderness and Survival Medicine (4, Sp) Medical physiology principles of people under “extreme” wilderness conditions, factors affecting remote medical care, and basic survival strategies, led by Emergency Medicine physicians. *Prerequisite:* BISC 220 or BISC 221; and MEDS 220.

MEDS 490x Directed Research in Biomedical Science (2-8, max 8, FaSpSm) Individual research and readings. Not available for graduate credit. *Prerequisite:* BISC 220L or BISC 221L and CHEM 103Lx or CHEM 105aL or CHEM 115aL; *recommended preparation:* MEDS 300, MEDS 360.

Program Director: Michele E. Gold, Ph.D.

Associate Program Director: Teresa Norris, Ed.D.

Assistant Program Director of Clinical Services: Kären Embrey, Ed.D.

Faculty

Chair and Professor: Philip Lumb

Professor of Pediatrics and Anesthesiology: Randall Wetzel

Professors of Clinical Anesthesiology: Jack Berger; Mary Joseph; Ronald Katz; Duraiyah Thangathurai; Vladmir Zelman

Associate Professors of Clinical Anesthesiology: Steven Haddy, Jeffrey Lee; Michele Gold; Rajesh Patel; Steven Richeimer; Earl Strum

Assistant Professors of Clinical Anesthesiology: Rudolfo Amaya; Dimiter Arnaudov; Tawfik Ayoub; Armin Azad; Jason Bang; Maxim Benbassat; Martin Bohorquez; Kari Cole; Ahmed Darwish; James Daniel; Kären Embrey; Maria Espi; Gligor Gucev; Wayne Kaufman; Mona Kulkarni; Rodney McKeever; Mariana Mogos; Rana

Movahedi; Ali Nemat; Teresa Norris; Shatel Patel; Catherine Rodziewicz; Ashraf Sedra; Fayez Takla; Candace Tay; Chelsea Varner; Samuel Yanofsky

Instructors of Clinical Anesthesiology: Roberta Ashley; Deborah Avnet; Gina Basehore; Brindusa Bauer; Paula Belson; Eric Bowles; Douglas Brannan; Ryan Brown; James Carey; Jennilyn Casalme; Johnny Cheng; Kim Coscina; Rebecca Darnell; Judith Franco; Jessica Frazier; Charlotte Garcia; Katharine Getz; Dolores Gibbs; Amy Gilb; Sarah Giron; Elizabeth Glazer; David Godden; Jennifer Hogan; Dina Hunt; Monique Jabbour; Kim Jones-Tang; Rory Keenan; Vadim Kuraev; Benjamin Lindsey; Victoria McKinzie; Cameron Meyer; Cathy Ngo; Aileen Nguyen; Arthur Norcliffe; Michelle Olivares; Margaret Oliveto; Robert Olsen; Patricia Omoto; Joseph Ortega; Nilu Patel; Nancy Perez; Erin Peters; Gabriel Punsalan; Christina Quinn; Ellie Rawson, Dhanya Renjith; Ryan Reynolds; Ilene Richards; Sara Rondinone; Joseph Sammut; Susan Shenkosky; Michelle Smith; Tahira Smith; Helen Stepan; Crystal Trinooson; Regalado Valerio; Rhona Wang; Annie Wiley; Kelly Zhou

The nurse anesthesia program prepares qualified nurses in the specialty of nurse anesthesia and qualifies the graduate to sit for the certification examination given by the Council on Certification of Nurse Anesthetists. The graduate attains a high level of clinical competence with an extensive body of didactic knowledge relevant to the specialty and advanced practice nursing. The mission of the USC Program of Nurse Anesthesia is scholarly education and professional development of future nurse anesthetists with the academic strength and leadership skills to advance our profession.

Students enrolling in the M.S., Nurse Anesthesia course of study must complete the nurse anesthesia core curriculum and specialty practicum. The program consists of 47 units and is completed in 27 months of continuous enrollment (seven semesters; the first semester 2-unit course is provided in a hybrid online platform). There is an optional one-semester clinical fellowship offered in the eighth semester of enrollment to provide specialty training in a clinical area of choice: critical care, cardiovascular, neurosurgical, ambulatory anesthesia or pain management. Students may sit for the certification examination during this semester.

The program is based in the Department of Anesthesiology, and classroom instruction is provided by nurse anesthesia program faculty and faculty from the Department of Anesthesiology, the Department of Physiology and Biophysics, and the Department of Cell and Neurobiology within the Keck School of Medicine, as well as clinical faculty from the program clinical sites. Clinical training occurs at Los Angeles County + USC Medical Center, Keck Hospital of USC, Harbor-UCLA Medical Center, Long Beach Veterans' Administration Medical Center and West Los Angeles Veterans' Administration Medical Center for the primary rotations. Advanced rotations occur at those sites, as well as Cedars-Sinai Medical Center, Children's Hospital of Los Angeles, Northridge/Hallmark Pain Management and Surgery Center, Arrowhead Regional Medical Center and UCLA Medical Center.

Master of Science (in Nurse Anesthesia)

General requirements for admission include a minimum 3.0 undergraduate grade point average, a minimum score on the verbal and quantitative sections of the Graduate Record Examination of 300 (or a score of 1000 on the GRE prior to September 2011), completion of the university *and* Program supplemental application, current licensure as a Registered Nurse, a bachelor's degree in nursing or a related field from an accredited university or college, submission of an essay describing the applicant's career goals, professional resume and three letters of reference.

Competitive applicants will be interviewed and must demonstrate an acceptable understanding of the role and responsibilities of certified registered nurse anesthetists. Shadowing experience of CRNAs must be demonstrated. Selections are made on the basis of the formal interview and consideration of a variety of factors that include academic record, type and amount of clinical experience and professionalism.

Academic and Scientific Prerequisites

The admission requirements also include appropriate undergraduate course work in biology, anatomy, physiology, chemistry, biochemistry, physics and statistics (or nursing research). A minimum of one year of experience in critical care nursing as a registered nurse is required. Licensure as an RN in California and current BCLS, ACLS and PALS certifications are required prior to enrollment. Conversational Spanish is strongly recommended.

Computer Skill Requirements

During the program, students must have a personal computer or notebook with Internet. The primary mode of program communication is email. Computer accounts are provided by the university to all students and can be activated online.

Advisement

Prospective students should contact the program's admission office, (323) 442-2037 or [✉ uscnap@usc.edu](mailto:uscnap@usc.edu) for evaluation of previous course work and clinical background.

Admission

Admission procedures follow the information in the USC Graduate School section of this catalogue. Admission standards for the USC nurse anesthesia program are established jointly by the Keck School of Medicine, the USC Graduate School and the Department of Anesthesiology. Interested students should apply online at usc.edu/admission/graduate/apply. Additional admissions requirements and the supplemental application must be obtained from the nurse anesthesia program and can be requested through email at [✉ uscnap@usc.edu](mailto:uscnap@usc.edu) or accessed at keck.usc.edu/nurse-anesthesia.

DEGREE REQUIREMENTS

UNITS

DEGREE REQUIREMENTS		UNITS
<i>Academic Courses</i>		
ANST 500	Human Anatomy	3
ANST 501	Advanced Pharmacology of Anesthesia Practice I	4
ANST 502	Principles of Nurse Anesthesia Practice	4
ANST 503	Advanced Pharmacology of Anesthesia Practice II	4
ANST 504	Advanced Pathophysiology Related to Anesthesia Practice	4
ANST 506	Advanced Principles of Nurse Anesthesia Practice	4
ANST 508	Research: Investigative Inquiry	3
ANST 510	Leadership and Professional Aspects of Nurse Anesthesia	3
ANST 512	Research Integration: Capstone Experience	1
ANST 607	Advanced Health Assessment	2

Department-Specific Programs

Department of Anesthesiology

Courses of Instruction

ANESTHESIOLOGY (ANST)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ANST 500 Human Anatomy (3, Fa) Lectures and laboratory simulation in anatomy emphasizing structure and function of major organs to include brain, cardiovascular, lungs, liver, kidneys and musculoskeletal system. Open to nurse anesthesia students only.

ANST 501 Advanced Pharmacology of Anesthesia Practice I (4, Fa) Pharmacokinetic and pharmacodynamic principles, uptake and distribution of inhalational anesthetics, and pharmacology of respiratory and cardiovascular drugs. Application of pharmacologic principles to anesthetic management.

ANST 502 Principles of Nurse Anesthesia Practice (4, Fa) Basic theory of anesthesia administration, preanesthetic assessment, physical examination, monitoring. Case management including airway and blood/fluid management, anesthesia machine, and postoperative pain. Lecture/case study format. Open to nurse anesthesia students only.

ANST 503 Advanced Pharmacology of Anesthesia Practice II (4, Sp) Pharmacokinetic/pharmacodynamic principles of drugs covering different organs systems (cardiovascular, CNS, hematology, endocrine), herbal therapies, chemotherapeutics, antimicrobials. Application of pharmacology to anesthetic management using problem-based learning. *Prerequisite:* ANST 501 and ANST 502.

ANST 504 Advanced Pathophysiology Related to Anesthesia Practice (4, Sp) In-depth study of cardiovascular, respiratory, renal, liver, endocrine and neurophysiology and pathophysiology with application of these principles to anesthetic case management using problem-based learning. *Prerequisite:* ANST 501, ANST 502.

ANST 505 Clinical Residency in Nurse Anesthesia I (2, FaSpSm) Correlation of techniques of anesthesia administration with application of scientific and pharmacologic theory in the clinical setting with observation and supervised clinical residency.

ANST 506 Advanced Principles of Nurse Anesthesia Practice (4, Sm) Advanced theory of anesthesia management for general and specialized procedures, diagnostic procedures, pediatrics and obstetrics. *Prerequisite:* ANST 503, ANST 504, ANST 505.

ANST 507 Clinical Residency in Nurse Anesthesia II (2, FaSpSm) Correlation of techniques of anesthesia administration with application of scientific and pharmacologic theory in the clinical setting with observation and supervised clinical residency. Open only to nurse anesthesia majors. *Prerequisite:* ANST 503, ANST 504, ANST 505.

ANST 508 Research: Investigative Inquiry (3, Fa) Utilization of research, which includes the evaluation of research, problem identification within the practice setting, awareness of practice outcomes and the clinical application of research. Recommended preparation: research course; basic statistics.

ANST 509 Advanced Clinical Residency in Nurse Anesthesia I (2, FaSpSm) Correlation of techniques of anesthesia administration with application of scientific and pharmacologic theory expanded to geriatric, obstetrical, and pediatric anesthesia; anesthetic management to include medically compromised patients. Open only to nurse anesthesia majors. *Prerequisite:* ANST 505, ANST 506, ANST 507.

ANST 510 Leadership and Professional Aspects of Nurse Anesthesia (3, Fa) Emphasis on the professional components of nurse anesthesia practice, including socialization, regulation, culture, ethics, law, employment, advocacy, and contemporary practice issues.

ANST 511 Advanced Clinical Residency in Nurse Anesthesia II (2, FaSpSm) Correlation of techniques of anesthesia administration with application of scientific and pharmacologic theory expanded to neuroanesthesia, cardiac anesthesia, trauma anesthesia, critical care and pain management. Open only to nurse anesthesia majors.

ANST 512 Research Integration: Capstone Experience (2, FaSpSm) A capstone course that requires students to demonstrate ability to integrate theory, research, and practice through a mentored research experience with direct relevance to graduate specialization. Open only to nurse anesthesia majors.

ANST 513 Advanced Clinical Residency in Nurse Anesthesia III (2, FaSpSm) Correlation of advanced techniques of anesthesia administration with application of scientific and pharmacologic theory in diverse specialty anesthesia rotations. *Prerequisite:* ANST 511.

ANST 514 Specialty Fellowship (2, Fa) Optional internship to develop advanced skills and critical assessment of anesthesia specialty or clinical research. Graded CR/NC. *Prerequisite:* ANST 513; graduate of an accredited nurse anesthesia program.

ANST 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree in nurse anesthesia. Maximum units which may be applied to the degree to be determined by the department. Open to nurse anesthesia majors only. Graded CR/NC. *Prerequisite:* ANST 508.

ANST 591 Special Projects (1-4, max 4, FaSpSm) Supervised learning in functional and/or clinical area of focus reflecting current trends and development in the field of nurse anesthesia. Open to nurse anesthesia majors only. Graded CR/NC.

ANST 607 Advanced Health Assessment (2, Sm) Advanced health assessment of all human systems utilizing advanced assessment techniques, concepts and approaches. Graded CR/NC. Open to nurse anesthesia majors only.

Assistant Professors of Research: T. Miki; S. Swenson; D. Weisenberger; S. Zhong

The USC Department of Biochemistry and Molecular Biology prides itself on maintaining a broad-based approach to various aspects of biochemical and molecular biological research. In 2010, the department received more than \$10 million in research funding for its primary faculty members.

Altogether, the department numbers 49 primary and joint-appointment faculty members, who conduct research in a variety of areas including: molecular biology and genetics of development and cell differentiation; mammalian and human genetics; DNA methylation, replication, recombination and repair; membrane transport; kinetics and mechanism of enzyme action; protein structure-function interrelationships; carcinogenesis and cancer chemotherapy; and stem-cell biology.

The department also has major research programs in the molecular basis of control and regulation of gene expression, epigenetics, molecular mechanisms of signal processing and transduction, developmental and stem cell biology, detailed analysis of macromolecular structure and function, the biochemistry and molecular biology of the brain, and genetic medicine including gene therapy.

The department's exceptionally strong research into various aspects of the biochemistry and cell biology of cancer is internationally recognized. Ongoing research programs in this area include mechanism of action of cancer chemotherapeutic agents, tumor cell invasion and metastasis, and cancer cell epigenetics and gene regulation.

Many members of the department are members of the USC Norris Comprehensive Cancer Center, USC Institute for Genetic Medicine (IGM), USC Zilkha Neurogenetic Institute (ZNI), Eli and Edythe Broad CIRM Center for Regenerative Medicine and Stem Cell Research at USC, and Children's Hospital Los Angeles (CHLA).

The USC Norris Comprehensive Cancer Center maintains a microchemical core facility that includes capabilities for gas phase protein sequencing, amino acid analysis, peptide synthesis, DNA synthesis and sequencing. The Institute for Genetic Medicine maintains a customized microarray core facility. Other facilities available to support the research of members of the department include mass spectroscopy, transgenic mice, flow-cytometry, biostatistics, microchemical resource for DNA, and protein sequencing and synthesis core facilities.

The primary offices and laboratories of the department are located on the Health Sciences Campus.

Graduate Programs

Admissions

The prerequisite for applicants to the graduate program in biochemistry and molecular biology is a bachelor's degree with an undergraduate major in one of the natural sciences. Undergraduate course work should have included organic chemistry, the physics and mathematics required of a chemistry major and some courses in the biological sciences. A course in general biochemistry is also required, but may be taken during the period of graduate study. Previous course work in physical chemistry is strongly recommended. A minimum GPA of 3.0 in the natural sciences (including mathematics) is normally required.

Applicants must pass satisfactorily the general portions of the Graduate Record Examinations. In addition, the department requires at least three letters of recommendation from faculty members who can evaluate the applicant's potential for graduate work and independent research.

Faculty members of the Department of Biochemistry and Molecular Biology participate in a variety of interdisciplinary Ph.D. programs. Students interested in pursuing a Ph.D. degree in the fields related to biochemistry, molecular and cellular biology, and genetics should apply to USC's Programs in Biomedical and Biological Sciences (PIBBS). Applications for the Ph.D. Programs in Biomedical and Biological Sciences should be submitted online through the PIBBS Website (usc.edu/pibbs).

Applications should be submitted before the application due date specified on the PIBBS Website. Applications for the M.S. program in biochemistry and molecular biology can be obtained from the department at the address listed below. In addition to the university application, a supplemental departmental application must be completed and returned with transcripts, GRE scores and letters of recommendation to: Graduate Admissions Committee, Department of Biochemistry and Molecular Biology, 1333 San Pablo Street, Los Angeles, CA 90089-9151.

Fellowships

Students admitted to PIBBS are awarded fellowships which pay for tuition and provide a stipend. No fellowships are available for master's degree students.

Master of Science

The Department of Biochemistry and Molecular Biology offers a program for the Master of Science degree. The primary objectives of this program are to provide the necessary theoretical preparation for biochemical careers and to expose students to biochemistry and molecular biology related research activities culminating with the Master of Science degree. Goals of the program are to train students in preparation for (1) further doctoral study, (2) advanced biochemical research positions in industry and academia and (3) teaching positions at the community college level.

In general, admission requirements are the same as for the Doctor of Philosophy degree. The prerequisite for applicants to the graduate program in biochemistry is a bachelor's degree with an undergraduate major in one of the natural sciences. A minimum GPA of 3.0 in the natural sciences (including mathematics) is normally required. Applicants must satisfactorily pass the general and advanced (chemistry, or biology or molecular biology) portions of the Graduate Record Examinations. In addition, the department requires at least three letters of recommendation from faculty members who can evaluate the applicant's potential for graduate work and independent research. Demonstrated proficiency in the English language is required. Special circumstances may provide consideration for conditional admission.

The master's degree in biochemistry and molecular biology requires 34 units of elective graduate study to be determined by the student's advisory committee. Fourteen or more course units must be taken in biochemistry and molecular biology; eight units may be pursued outside the department. Students interested in the commercial aspects of biotechnology may take courses focusing on business entrepreneurship, finance, management and marketing in the USC Marshall School of Business. Master's students have the option of completing a research thesis allowing state-of-the-art laboratory-based investigation or a non-research-based theoretical thesis. Upon approval, a maximum of 10 units of directed research in biochemistry will be applied to the degree. Up to six units of graduate course work taken outside of USC may be applied toward the M.S. degree. Flexibility exists to plan each student's program to suit individual needs, ambitions and background.

Keck School of Medicine

Department-Specific Programs

Department of Biochemistry and Molecular Biology

Courses of Instruction

BIOCHEMISTRY (BIOC)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

BIOC 501 Recent Advances in Biochemistry (2-4, max 16, Fa) Lectures on areas of intermediary metabolism and the chemistry of natural products. *Prerequisite:* BISC 435, CHEM 430ab.

BIOC 502 Biochemistry Seminar (1, max 12, FaSp) Formal presentations and discussion by students of material from research literature.

BIOC 504 Molecular Biology of Cancer (4, Sp) (Enroll in INTD 504)

BIOC 510 Introductory Molecular Biology (2, Sp) Principles of molecular biology with applications to the medical sciences. Nucleic acid structure, function, and analysis. *Recommended preparation:* a course in biochemistry.

BIOC 512 Molecular Basis of Cell Proliferation and Differentiation (2, Irregular) An advanced seminar course in molecular cell biology, discussing current literature with significant impact on the understanding of the cell cycle and differentiation of various cell types. *Recommended preparation:* basic cell biology and molecular biology. (Frenkel)

BIOC 522 Applications of Physical Methods in Biochemistry (2, FaSp) Applications of physical analytical methods commonly utilized in research in biochemistry and molecular biology. *Concurrent enrollment:* CHEM 521. (Langen)

BIOC 531 Cell Biology (4) (Enroll in INTD 531)

BIOC 536 Molecular Biology of Cellular Communication in the Nervous System (2, Sp) Discussion of cellular communications in the nervous system through neurotransmitters and their receptors, neuromodulators; biochemical changes during development and the impact of human genomic research. *Recommended preparation:* one year of general biochemistry or molecular biology. (Tokes)

BIOC 542 Cellular and Molecular Basis of Animal Development (4, Fa) Processes of cell type specification, determination, and morphogenesis in metazoans from vertebrates to insects. Genetic, paragenetic and molecular biological approaches to developmental processes. *Prerequisite:* INTD 571. (Maxson)

BIOC 543 Human Molecular Genetics (4, Fa) Comprehensive course covering basic principles of human genetics, genetic disease, the Human Genome Project, and gene therapy. *Recommended preparation:* undergraduate genetics. (Allayee)

BIOC 549 Protein Chemistry – Structure and Function (4, FaSpSm) (Enroll in INTD 549)

BIOC 551 Prokaryotic Molecular Genetics (4, Fa) (Enroll in MICB 551)

BIOC 555 Biochemical and Molecular Bases of Disease (4) (Enroll in INTD 555)

BIOC 561 Molecular Biology (4, Fa) (Enroll in INTD 561)

BIOC 571 Biochemistry (4, Fa) (Enroll in INTD 571)

BIOC 573 Optimal Research Presentations by Ph.D. Students (1, max 12, FaSp) Students will attend lectures by peers, and after their first year in the Ph.D. program, prepare and present their own research to an audience of faculty and peers. Open to Ph.D. students in Genetic, Molecular and Cellular Biology Program (GMCB), Biochemistry and Molecular Biology and Molecular Epidemiology only. Graded CR/NC. (Hong)

BIOC 574 Systems Physiology and Disease II (4, Sp) (Enroll in INTD 573)

BIOC 575 Predictive and Prognostic Biomarkers in Cancer Treatment (2) Exploration of how appropriate biomarkers can predict response to cancer therapy, tumor recurrence after surgery, rapid detection of tumor response and overall prognosis. *Recommended preparation:* INTD 571 and a basic understanding of molecular biology.

BIOC 590 Directed Research (1-10, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

BIOC 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

BIOC 599 Special Topics (2-4, max 8)

BIOC 601 Molecular Biology of Gene Regulation (2, max 8, FaSp) Current techniques and systems in molecular biology from an interdisciplinary perspective: microbiological, biochemical, and pharmaceutical.

BIOC 604 Current Topics in Animal Development (2, Sp) (Enroll in CNB 604)

BIOC 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

BIOC 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Emeritus Professor: Dwight Warren III

**Recipient of university-wide or school teaching award.*

The Department of Cell and Neurobiology provides interdisciplinary training in molecular, cellular and systems biology. Ongoing programs explore basic mechanisms in molecular and cellular neurobiology, neurogenetics, endocrinology, pharmacology, stem cell biology and vertebrate evolution. Disease-oriented research, bridging basic and clinical disciplines, investigates inherited or acquired disorders in vision, stroke, Parkinson's disease, Alzheimer's disease, epilepsy and steroid abuse. The challenge is to weld interdisciplinary activities into a conduit for transferring basic science discoveries into more effective and innovative clinical interventions in the treatment of disease-related disabilities.

The Department of Cell and Neurobiology has 24 primary faculty members.

The Department of Cell and Neurobiology is dedicated to excellence and state-of-the-art training and education in molecular and cellular aspects of normal function and in acquired or genetic disorders that cause human disease. Professional and intellectual development is fostered through a broadly based curriculum from which students can tailor a menu of specialization and by a supportive environment of faculty interactions. Graduate education is designed to prepare the student for a lifetime of learning, exploring the limits of research, teaching and creative activities.

Cell and Neurobiology Graduate Program

The graduate program offered in cell and neurobiology provides a flexible, individualized course of study directed toward developing independent, resourceful scholars. The major thrust of this program is devoted to students training for the Ph.D. degree but study toward the M.S. degree is also possible.

Admissions

Master of Science

(No longer accepting applications)

The prerequisite for applicants to the M.S. graduate program in cell and neurobiology is a bachelor's degree with a science major or equivalent. Applicants should have a superior undergraduate record at an accredited college or university. Additional requirements include three letters of recommendation and satisfactory performance on the general and advanced (biology or chemistry) portions of the Graduate Record Examinations. Students are normally admitted for the academic year beginning in the fall; however admission to the master's program can begin in the spring semester with approval from the Graduate Admission Committee. Application deadline for the following academic year is January 1.

Doctor of Philosophy

(No longer accepting applications)

Doctoral candidates interested in working with CNB faculty in the areas of neural, computational, cognitive and behavioral science should apply through either of the two university wide interdisciplinary graduate programs at USC: the Neuroscience Graduate Program or the Program in Biomedical and Biological Science (PIBBS). Applicants interested in working with CNB faculty as part of the M.D./Ph.D. program should apply directly to the Keck School of Medicine.

Application deadlines:

- M.D./Ph.D. program — American Medical College Application Service (AMCAS) — November 1;
Supplemental — December 1

- Neuroscience Graduate Program — January 15 (see the Graduate School section for Ph.D. student funding deadline information)
- PIBBS — December 1

Master of Science

The Master of Science degree is awarded for demonstrated competence in the cell biological sciences, broadly defined. Two options are available: (1) a non-thesis M.S. program based entirely on course work followed by a comprehensive examination; and (2) a thesis M.S. program that includes fewer courses but requires a written thesis based on original laboratory research. Students take courses both from the Department of Cell and Neurobiology and other departments to obtain a broad appreciation of structure and function. Students must maintain a minimum GPA of 3.0. The Master of Science candidate may engage in teaching if this is beneficial to the individual program.

Students in the non-thesis program must complete a minimum of 34 units of graduate level courses (500 or higher) beyond the baccalaureate degree.

Non-thesis students must take 16 units from the following list of courses: BISC 421, BME 552, BME 575L, BME 670, BME 671, CNB 501ab, CNB 511abL, CNB 512L, CNB 513, CNB 521, CNB 525, CNB 534, CNB 631, INTD 504, INTD 531, INTD 555, INTD 561, INTD 571, INTD 572, INTD 573, MICB 551, NSCI 524. All students must pass additional courses totaling 18 units. All course work must be approved by the student's graduate adviser and the chair of the graduate program.

Students in the thesis program must complete a minimum of 38 units of graduate level courses (500 or higher) beyond the baccalaureate degree.

The regulations for thesis students are the same as specified above, except the student is required to take only 12 units from the course list and an additional 16 units from other departmental or non-departmental courses. Students will also take 6 units of CNB 590. The thesis M.S. student is required to take at least 4 units of Master's Thesis (CNB 594). All course work must be approved by the student's graduate adviser and the chair of the graduate program.

Doctor of Philosophy

The Ph.D. student develops background knowledge in cellular, molecular and structural biological sciences. The objective of the Ph.D. program is rigorous, original research experience obtained by design and execution of a dissertation project. Active research areas for which guidance is available include cell and molecular biology, neurobiology of circadian rhythms, visual neuroscience, neuropharmacology, neurodegenerative and neurogenetic diseases, developmental and cellular neuroscience, neuroendocrinology, reproductive endocrinology and evolutionary biology.

Research Tool-Statistics

Each student must demonstrate competence in statistics. The student must demonstrate competence in the theory and use of statistics including knowledge of regression, correlation and analysis of variance. A student who has prior experience in statistics should consult the faculty adviser and petition the Graduate Advisory Committee to waive the research tool requirement. This requirement may be fulfilled by obtaining a grade of B (3.0) or higher in specified courses. This requirement must be fulfilled before the qualifying examination.

Course Requirements

A minimum of 60 units of course credit is required for the Ph.D. Course requirements vary according to the specific needs of the student. Graduate students must take at least 16 units from the following list of courses: BISC 421, BME 552, BME 575L, BME 670, BME 671, CNB 501ab, CNB 511abL, CNB 512L, CNB 521, CNB 525, CNB 534, CNB 631, INTD 504, INTD 531, INTD 555, INTD 561, INTD 571, INTD 572, INTD 573, MICB 551, NSCI 524. Ph.D. students must take additional classes or research units totaling 44 units from other departmental or non-departmental courses. All course work must be approved by the student's graduate adviser and the chair of the graduate program.

Prior to the qualifying examination, each student must complete at least three, eight-week periods of introductory research in the laboratories of departmental faculty. The purpose of the laboratory rotations is to

encourage one-on-one interactions between new students and departmental faculty while at the same time providing an introduction to research in a sampling of departmental laboratories.

Course work outside of the departmental offerings is often encouraged and may be required by the student's qualifying exam committee. In most instances, a program will include extra departmental courses such as physiology, biochemistry and molecular biology. A grade point average of a least 3.0 (A = 4.0) must be maintained in both departmental and overall course work.

Communication Skills Requirement

The department considers teaching experience to be an important part of graduate education. Students in the Ph.D. program are required to serve a teaching practicum during at least one semester of their graduate training.

Screening Procedure

The graduate affairs committee conducts a screening for each student at the end of one full year in the program. The committee reviews thoroughly all facets of the student's performance in the graduate program. The student's progress must be judged satisfactory before a qualifying exam committee can be nominated.

Qualifying Exam Committee

Students are expected to select a general area of research interest and a dissertation adviser as soon as possible but no later than 18 months after entering the graduate program in this department. The dissertation adviser and the graduate affairs committee consult with the student to select a qualifying exam committee. After the student has successfully completed the first-year screening, the qualifying exam committee's nomination is forwarded to the Graduate School.

Qualifying Examination

Before the end of their fifth semester of graduate standing, students in the Ph.D. program must pass both the written and oral portions of a qualifying examination. The examination is intended to reveal the student's insight and understanding of general concepts and the ability to design and defend a dissertation research project. The examination is designed and administered by the student's qualifying exam committee.

Dissertation and Oral Defense

After the student has passed the qualifying examination, a dissertation committee (commonly comprising the former qualifying exam committee) is appointed to advise the student regarding the research project and to supervise writing of the dissertation. The dissertation must be an original contribution giving evidence of the student's ability to perform independent and innovative research. The final oral defense shall be open to the public and the dissertation adviser will entertain questions from the dissertation committee and assembled audience.

Keck School of Medicine

Department-Specific Programs

Department of Cell and Neurobiology

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

CELL AND NEUROBIOLOGY (CNB)

CNB 501ab Gross Human Anatomy (3-4, FaSp) A complete dissection of the adult human body. Supplementary lectures and demonstrations. Emphasis on correlating development, structure and function.

CNB 511abL Microscopic Anatomy (3-3, FaSp) Lectures and laboratory in microscopic anatomy emphasizing embryonic origin of the basic body plan, cells, tissues, and organs; ultrastructural and functional correlations.

CNB 512L Pharmacology I (5, Fa) Actions, chemical properties, bodily distribution, and toxicology of drugs. Laboratory. (Duplicates credit in former PHNU 510L.)

CNB 513 Pharmacology II (3, Sp) Continuation of 512L. (Duplicates credit in former PHNU 511.)
Prerequisite: CNB 512L.

CNB 521 Neuroanatomy (3, Sp) Structure and function of the human nervous system with emphasis on central conduction pathways, especially those of clinical significance.

CNB 525 Neural Development (3, Fa) Cellular, molecular, and physiological features of development and plasticity in the nervous system. Lecture and student presentations and discussion of classic and current research literature. *Prerequisite:* BISC 524; *recommended preparation:* background in neurosciences.

CNB 530 Anatomy for the Artist (1-2, Irregular) This course includes lectures and demonstrations of human anatomy specifically for the artist, and art instruction on drawing the human figure.

CNB 531 Cell Biology (4, Fa) (Enroll in INTD 531)

CNB 534 Molecular Aspects of Neuropharmacology (2, FaSp) Current advances in selected areas of molecular neuropharmacology, e.g., mechanisms by which drugs affect neurotransmitter systems, neural plasticity, treatment of neurological and psychiatric diseases.

CNB 550 Cell and Neurobiology Seminar (1, max 6, FaSp) Reports and discussion on recent advances in anatomy. Graded CR/NC. (Duplicates credit in former ANCB 550.)

CNB 561 Molecular Biology (4, Fa) (Enroll in INTD 561)

CNB 571 Biochemistry (4, Fa) (Enroll in INTD 571)

CNB 572 Systems Physiology and Disease I (4, Fa) (Enroll in INTD 572)

CNB 573 Systems Physiology and Disease II (4, Sp) (Enroll in INTD 573)

CNB 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

CNB 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

CNB 598 Introductory Laboratory Rotations (1-3, FaSp) Introductory laboratory rotations wherein students are directed in individualized research, reading and discussion to provide perspective and supplemental background in areas of faculty research interests.

CNB 599 Special Topics (2-4, max 8, FaSp) Special topics provides background for instruction and research in the Department of Cell and Neurobiology through lectures, discussions, assigned readings, and student presentations. (Duplicates credit in former ANCB 599 and PHNU 599.)

CNB 600 Literature Tutorial (1, max 3, FaSp) Individualized readings and discussions culminating in a literature-review paper; to promote the acquisition of critical thinking skills in the evaluation of scientific problems. *Recommended preparation:* background in biological sciences.

CNB 603 Current Topics in Vision Research (2, Sp) Basic science (e.g., anatomy, cell biology, electrophysiology) and clinical aspects of the eye: cornea, lens, retina, and optic nerve. USC faculty and authorities from other institutions will lecture.

CNB 604 Current Topics in Animal Development (2, 2 years, Sp) Current research in selected aspects

of mammalian and nonmammalian developmental biology, including the molecular genetics and molecular biology of organogenesis, morphogenesis, lineage specification, and differentiation. *Prerequisite:* INTD 561 and CNB 542.

CNB 631 Morphogenesis and Regeneration (2, 2 years, Sp) Analysis of developing and regenerating systems: historical and recent interpretations of morphogenetic movements, tissue interactions, fields, gradients, differentiation, and determination.

CNB 641 Brain-Endocrine Interactions in Reproduction (2, 2 years, Fa) Past and current experimental approaches to morphology and endocrinology at hypothalamic, pituitary, and gonadal levels in both males and females. *Prerequisite:* CNB 511abL or a general endocrinology course.

CNB 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

CNB 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Program Director: Kevin Loheny, Ph.D., PA-C

Medical Directors: Ignacio DeArtola, M.D.; Raymond Waliany, M.D.

Faculty

Professor of Clinical Family Medicine: D. Lie, M.Ed., M.D.

Associate Professor of Clinical Family Medicine: : C. Feifer, Ph.D., M.D.

Assistant Professors of Clinical Family Medicine: I. DeArtola, M.D.; C. Forest, MSHS, PA-C; L. Landry-Taylor, M.A., P.A.; K. Loheny, Ph.D., PA-C; J. Mabee, Ph.D., PA-C; A. Vallejo, Ph.D.; R. Waliany, M.D.; Emily WhiteHorse, MA Ed., PA-C

Instructors of Clinical Family Medicine: M. D'Aquila, MACM, PA-C; M. Maldonado, MPH, PA-C; D. Mayo, MPAS, P.A.; J. Tramel, MS-HPE, PA-C; A. Walsh, MMSc, PA-C; J. Wegler, MMS, PA-C

The faculty listed above are faculty with the Primary Care Physician Assistant Program at USC.

The Primary Care Physician Assistant Program at USC prepares students to practice medicine under the supervision of a physician. Students earn a Master of Physician Assistant Practice (MPAP) degree upon completion of the program.

The MPAP degree program offered by the Division of Physician Assistant Studies is part of the Department of Family Medicine. Preclinical instruction is provided by physician assistant program faculty and faculty from other departments within the Keck School of Medicine, the USC School of Pharmacy, other divisions within the Health Sciences Campus, as well as clinicians from the surrounding communities. Emphasis is placed on primary care medicine and caring for medically underserved populations. Clinical training occurs at various clinical sites throughout the greater Los Angeles region, including the Los Angeles County+USC Medical Center, Arrowhead Regional Medical Center, Long Beach Memorial Family Practice Residency, private offices and managed-care settings, community-based clinics, VA facilities and specialty settings.

Students complete eight, six-week clinical clerkships in emergency medicine, family medicine, internal medicine, orthopedics, pediatrics, general surgery, women's health, and a one-week mental health/behavioral medicine clerkship. These clerkships emphasize the development of necessary clinical skills as well as learning how to work as part of a health care team. The Primary Care Physician Assistant Program at USC is committed to recruiting diverse applicants and preparing graduates to practice in medically underserved communities.

The Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) has granted Accreditation-Continued status to the Primary Care Physician Assistant Program at USC sponsored by the University of Southern California. Accreditation-Continued is an accreditation status granted when a currently accredited program is in compliance with the ARC-PA Standards.

Accreditation remains in effect until the program closes or withdraws from the accreditation process or until accreditation is withdrawn for failure to comply with the Standards. The approximate date for the next validation review of the program by the ARC-PA will be September 2018. The review date is contingent upon continued compliance with the Accreditation Standards and ARC-PA policy.

The program is approved by the Physician Assistant Committee (PAC) of the Medical Board of California. Graduates must pass the National Commission on Certification of Physician Assistants (NCCPA) Physician Assistant National Certifying Exam to qualify for licensure throughout the United States.

Pi Alpha Honor Society

The program participates in the Pi Alpha Honor Society, which is the national Physician Assistant honor society organized for the promotion and recognition of both PA students and graduates. Membership signifies the inductees' significant academic achievement and honors them for their leadership, research, community/professional service and other related activities. The society also encourages a high standard of character and conduct among students and graduates. Students are encouraged to apply for this honor during their final semester in the program, but selection is done via an application process and review by current members of the society.

Master of Physician Assistant Practice

Admission Requirements and Procedures

Application to the Physician Assistant Program requires completion of a bachelor's degree (in any discipline) from a regionally accredited four-year institution and completion of academic prerequisite requirements.

Admission to the program is for the fall semester only. Admission is granted by the physician assistant admissions committee after careful review of all applications. Selections are made on the basis of a formal interview (for competitive applicants) and consideration of a variety of factors which include: academic record, type and amount of clinical experience, multicultural sensitivity, community service experience and professional experience.

Applicants are required to submit an application through the Central Application Service for Physician Assistants (CASPA) as well as a USC Supplemental Application by November 1 of each year. Further details regarding admission procedures including those for international student applicants are provided online at usc.edu/pa.

Transfer Students or Advanced Placement

The Physician Assistant Program does not accept transfer students, nor do we allow advanced placement based on prior education or clinical experience. Each applicant who is admitted is required to complete the full Master of Physician Assistant Practice curriculum in residence at USC. No waivers or substitutions are permitted.

Registration

Students receive information regarding registration procedures during an orientation program held the week before classes begin.

Advisement

Information sessions are available for prospective students who would like to receive more information regarding the program. Applicants are encouraged to attend one of the program's information sessions where PA faculty and staff describe the program, the application process and answer general questions. Information sessions are held on the Alhambra Campus, Building A11. Contact the PA Program for further details and RSVP at [✉ uscpa@usc.edu](mailto:uscpa@usc.edu) or call (626) 457-4240. The information session schedule may be viewed at usc.edu/pa.

Degree Prerequisites

A bachelor's degree from a regionally accredited institution and completion of all prerequisite course work are required for admission to the Physician Assistant Program.

Science Prerequisites

A one-year general biology sequence with lab and a one-year general chemistry sequence with lab, each course designed for science majors. All science prerequisites must be completed within 10 years of application to the program.

Three semester units or 4 quarter units of each of the following: human anatomy with lab; human physiology with lab; and microbiology with lab.

Distance learning courses are acceptable provided they are equivalent in all dimensions (including laboratory requirements) to courses taught in "traditional" educational settings (e.g., hybrid courses). All distance learning course credit must be provided by regionally accredited institutions of higher education.

Students are expected to have a strong competency in medical terminology.

All science prerequisites should be completed within 10 years of application to the program. Exceptions to the 10-year science prerequisite time frame may be granted on an individual basis to those individuals who have completed one of the following: 1) at least 8 semester units of graduate credit in a medically related natural science discipline with an overall grade point average of 3.0 or better, completed within seven years of the application deadline, or 2) received an advanced degree in the natural or clinical sciences (e.g., M.S., DVM, Pharm.D., Ph.D., M.D.) within 10 years of the application deadline. In either case, all course work completed and degrees conferred must be from institutions of higher education accredited by an accrediting agency recognized by the Secretary of the U.S. Department of Education. Requests for this 10-year exemption should be directed to the chair of Admissions.

Non-science Prerequisites

Three semester units or 4 quarter units of each of the following: general psychology and statistics.

Two semesters of beginning college level Spanish language earned through course work or by placement examination. There are no language substitutions or waivers.

Two semester units or three quarter units of English composition are required for international applicants only. AP course work is acceptable.

Students who intend to apply to the Physician Assistant Program should contact the admission office for evaluation of previous baccalaureate and/or post-baccalaureate course work.

Standardized Tests

Applicants are required to take either the GRE or MCAT examination. The examination must be taken within five years of the application deadline of November 1. Official scores of the general and analytical sections of the GRE must be submitted to USC by using the Institutional Code 4852 (departmental code is not necessary). Applicants with MCAT scores must provide their AAMC verification code to the USC PA Program. GRE or MCAT scores must be submitted by November 1. The PA Program expects that all applicants earn a combined quantitative and

verbal GRE score of no less than 1,000 (on the older version of the exam) and 295 (on the newer version of the exam).

Clinical Experience Prerequisite

“Hands-on” patient care experience is preferred. Most successful applicants typically have 2,000 hours or more of paid clinical hours and have worked as one of the following: emergency medical technician, licensed vocational nurse, medical assistant, medical scribe, medical technologist, military medical corpsman, paramedic, psychiatric technician, physical therapy aide, radiological technician, respiratory therapist or registered nurse. Other health care experience is equally acceptable as long as the experience is “hands-on” in nature.

Physician Assistant Shadowing Experience

Shadowing a physician assistant in a clinical setting is expected. This activity provides the applicant with the up-close experience needed to understand the role and responsibilities of the PA and may help the applicant make a better informed decision in choosing a career as a physician assistant.

Community Service Prerequisite

Community service activities/projects are expected of all applicants. Service which benefits medically underserved or disadvantaged populations is preferred.

Curriculum Requirements

The completion of the 33-month professional curriculum is required to earn the Master of Physician Assistant Practice degree. Students do not have choices of courses to take nor are they permitted to drop any course or courses during the semester. Progress is permitted only when the prior semester is successfully completed. Students should view the curriculum outlined here as advisory only and subject to modification.

Summative Evaluation

A summative evaluation is conducted on each student during the sixth and final semester of the program to verify that each student is prepared to enter clinical practice.

Health Requirements and Technical Standards

All accepted candidates are required to meet the PA program’s technical standards (physical and psychological competencies of performance) prior to entering the program and throughout training. Upon acceptance, students will be required to submit and maintain evidence of current health status and immunizations. Specific details outlining these technical standards are located at usc.edu/pa.

Employment

The Primary Care Physician Assistant Program at USC is a full-time program. Students are strongly discouraged to accept or continue outside employment while enrolled in the program. Students are not permitted to work for the program.

Background Check

All USC Physician Assistant students are required to pass a background check prior to admission to the Master of Physician Assistant Practice (MPAP) Program.

Degree Requirements

All students in the Master of Physician Assistant Practice degree program must meet course and grade point average requirements. All course requirements must be completed with a grade of “B” or better. The degree will not be conferred until the student has successfully completed all degree requirements. Students are subject to the degree requirements in the catalogue current for the semester of their admission into the program.

Physician assistant students are enrolled in a standard curriculum during their 33 months in the program. The following courses must be successfully completed in order to earn the Master of Physician Assistant Practice degree. Only physician assistant students may enroll in these courses. Departmental clearance is required to enroll.

Courses of Instruction

PRIMARY CARE PHYSICIAN ASSISTANT (PCPA)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PCPA 503 Behavioral Sciences I (4, Fa) First of three-semester sequence in current topics in behavioral medicine, psychological and cultural factors in health and illness, interpersonal and sociological aspects of patient care, and competencies for PA practice. Open to physician assistant practice majors only.

PCPA 506 Behavioral Sciences II (4, Sp) Second of three-semester sequence in current topics in behavioral medicine, psychological and cultural factors in health and illness, interpersonal and sociological aspects of patient care, and competencies for PA practice. Open to physician assistant practice majors only. *Prerequisite:* PCPA 503.

PCPA 509 Behavioral Sciences III (4, Fa) Last of three-semester sequence in current topics in behavioral medicine, psychological and cultural factors in health and illness, interpersonal and sociological aspects of patient care, and competencies for PA practice. Open to physician assistant practice majors only. *Prerequisite:* PCPA 506.

PCPA 523 Clinical Skills I (4, Fa) Laboratory experiences with basic clinical skills essential to medical practice. First of four courses. Open to physician assistant practice majors only.

PCPA 526 Clinical Skills II (6, Sp) Laboratory experiences with basic clinical skills essential to medical practice. Second of four courses. Open to physician assistant practice majors only. *Prerequisite:* PCPA 523.

PCPA 529 Clinical Skills III (6, Fa) Laboratory experiences with basic clinical skills essential to medical practice. Third of four courses. Open to physician assistant practice majors only. *Prerequisite:* PCPA 526.

PCPA 530 Basic Medical Sciences (6, Fa) A one-semester overview of clinical anatomy, physiology, pathophysiology, and pathology essential to understanding disease mechanisms commonly encountered in primary care and specialty practices of medicine. Open to physician assistant practice majors only.

PCPA 532 Clinical Skills IV (3, SpSm) Laboratory experiences with basic clinical skills essential to medical practice. Last of four courses. Open to physician assistant practice majors only. *Prerequisite:* PCPA 529.

PCPA 543 Topics in Medicine I (4, Fa) Basic instruction in normal/abnormal states of organ systems in the study of human disease. The first of three courses that includes instruction in pathophysiology, pharmacology, diagnostic studies, and medicine. Open to physician assistant practice majors only.

PCPA 546 Topics in Medicine II (6, Sp) Basic instruction in normal/abnormal states of organ systems in the study of human disease. The second of three courses that includes instruction in pathophysiology, pharmacology, diagnostic studies, and medicine. Open to physician assistant practice majors only. *Prerequisite:* PCPA 543.

PCPA 549 Topics in Medicine III (6, Fa) Basic instruction in normal/abnormal states of organ systems in the study of human disease. The third of three courses that includes instruction in pathophysiology,

pharmacology, diagnostic studies, and medicine. Open to physician assistant practice majors only. *Prerequisite:* PCPA 546.

PCPA 561 Clinical Assignment I (3.5, FaSpSm) One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

PCPA 562 Clinical Assignment II (3.5, FaSpSm) One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

PCPA 563 Clinical Assignment III (3.5, FaSpSm) One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

PCPA 564ab Clinical Assignment IV (a: 3.5; b: 0, FaSpSm) One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

PCPA 565ab Clinical Assignment V (a: 3.5; b: 0, FaSpSm) One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

PCPA 566 Clinical Assignment VI (3.5, FaSpSm) One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

PCPA 567 Clinical Assignment VII (3.5, FaSpSm) One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

PCPA 568 Clinical Assignment VIII (3.5, FaSpSm) One discrete consecutive five-day-a-week intensive field placement under a program-approved supervising preceptor in a program-approved clinical setting. Graded CR/NC.

PCPA 583 Advanced Topics in PA Studies: Education (4, Sp) Seminar format: students explore educational theories and methods used by PAs in a variety of settings, including clinical practice, classroom and community. Open to physician assistant practice majors only.

PCPA 586 Advanced Topics in PA Studies: Research (4, Sp) Seminar format: students receive an integrated experience in research methods including methodology, data collection, analysis and evaluation. Open to physician assistant practice majors only.

PCPA 589 Advanced Topics in PA Studies: Medical Care Organization (4, Sp) Seminar format: students will explore current topics in medical care organization and physician assistant practice including administration, financing, changing organizational settings, and workforce issues. Open to physician assistant practice majors only.

Fletcher Jones Foundation Chair of Molecular Biology and Immunology and Hastings Foundation Professor of Molecular Microbiology and Immunology: Jae Jung, Ph.D.

Rita and Edward Polusky Chair in Basic Cancer Research: Michael Lieber, Ph.D., M.D.

Walter A. Richter Chair in Cancer Research: W. Martin Kast, Ph.D.

Leslie P. Weiner Professor of Neurology and Richard Angus Grant, Sr., Chair in Neurology: Leslie P. Weiner, M.D.

Chair, Graduate Advisory Committee: Stanley M. Tahara, Associate Professor

Professors: S. Chen; G. Coetzee (Urology); L. Comai; S.J. Gao; D.A. Horwitz (Medicine); M. Lieber (Pathology, Biochemistry and Molecular Biology); W.M. Kast; M. McMillan; J.-H. Ou; P. K. Pattengale (Pathology); L.P. Weiner (Neurology)

Associate Professors: Omid Akbari; E. Bogenmann (Pediatrics); P. Cannon; R. Duncan (Pharmacy); P. Feng; H.K.W. Fong (Ophthalmology); C. Hill (Radiation Oncology); A. Jong (Pediatrics); J.R. Landolph; H. Lee; A. Schönthal; S. Tahara; E. Zandi

Assistant Professors: R.W. DePaolo; X.F. Huang; C. Liang; K. Machida; T. Saito (GI Liver-Medicine); W. Yuan

Associate Professor of Research: S.Y. Park

Assistant Professors of Research: H. Lee; Z. Toth

Emeritus Professors: F. Aladjem; M. Lieb; G. Dennert

Clinical Assistant Professor: Jie Li

Distinguished Professor, Emeritus: Michael M.C. Lai

The Department of Molecular Microbiology and Immunology is located on the Health Sciences Campus in the Elaine Stevely Hoffman Medical Research Center, in the USC Norris Comprehensive Cancer Center and at the USC Institute for Genetic Medicine. Faculty guidance and specialized facilities are available for advanced research in animal virology, eucaryotic cell biology and cellular differentiation, molecular and cellular immunology, genetic diseases, microbial and molecular genetics, regulation of gene expression, and chemical and viral carcinogenesis.

Graduate Programs

Admissions

An applicant to the graduate programs in molecular microbiology and immunology must have a bachelor's degree from an accredited college or university with a major in science — usually biology, chemistry or physics. The applicant must have demonstrated strength in science or mathematics. Undergraduate course work should have included at least one year of biology, chemistry through organic chemistry, mathematics through calculus, physics and physical chemistry. Deficiencies may be made up early in the predoctoral program.

The department encourages applicants to contact its office prior to making formal application. Each applicant must pass satisfactorily the general and advanced (biochemistry, cell and molecular biology or biology, chemistry or physics) portions of the Graduate Record Examinations, and must also arrange for three letters of recommendation to be written. In addition, the applicant must provide a one-page statement of career objectives, including the general area of research interest. This statement is intended to facilitate selection of those students who will most benefit from the department's graduate program. A personal interview is strongly recommended but not required.

Applicants who have attended graduate school at another university may be admitted to advanced standing upon recommendation of the department.

Training Grants and Fellowships

Incoming domestic students may be supported by a departmental training grant or by a research grant to a specific faculty mentor during their first year; subsequently, students are supported by research grants awarded to individual faculty members. International students are supported by research assistantships.

Master of Science

The primary objective of the Master of Science program is to prepare students for a career in the broad field of biomedical sciences with focus on, but not limited to, microbiology, virology, immunology and cancer research. This program provides extensive theoretical preparation in combination with hands-on research, where students are trained in research laboratories located on the Health Sciences Campus (HSC), comprising the Keck Medical School, the School of Pharmacy and the USC Norris Comprehensive Cancer Center, or located at Children's Hospital Los Angeles (CHLA).

Goals of the program are to prepare students for employment opportunities in: academic research or teaching at universities, institutes or not-for-profit research centers; research and development in industry (biotech, pharma, petrol, dairies, breweries); health care (hospitals and health care providers, medical technology, diagnostic laboratories); law firms (patents, intellectual property rights, technology transfer, toxic torts); environmental organizations (advisory, management, planning); government (public health, waste management, EPA, FDA, NIH, etc.); publishing (journalism, journal editor).

Admission Requirements Applicants are expected to have a bachelor's degree in science (usually biology, chemistry or physics) from an accredited college or university. Generally required courses include: at least one year of college-level biology, chemistry through organic chemistry, mathematics through calculus, and one year of college-level physics. Students who do not meet all requirements may still apply, and admission will be decided on a case-by-case basis. In general, a minimum undergraduate GPA of 3.0 is expected. Additionally, a student must take the Graduate Record Examinations (GRE), and a minimum score of 1000 is expected. International applicants are expected to provide results from the International English Language Testing System (IELTS) or the Test of English as a Foreign Language (TOEFL; results from Internet-based, computer-based or paper-based tests are acceptable).

Course Requirements A total of 34 units is required. Students may pursue a thesis option, which requires completion of MICB 594abz (2-2-0) plus 30 units of approved course work, no more than 8 of which can be MICB 590 Directed Research. Students pursuing a non-thesis option must complete 34 units of approved course work. Students must choose one of these options by the end of the first year of study.

Fourteen or more course units must be taken in the Department of Molecular Microbiology and Immunology; 8 units may be pursued outside the department and, upon approval, a maximum of 8 units of directed research in molecular microbiology and immunology may be applied to the degree. No more than 4 units of course work taken outside of USC can be applied toward the M.S. degree requirements. Students considering such an action should submit a petition to the department and document a rigorous academic standard for the course (reading materials, tests and other performance criteria, lecture content, etc.). The graduate advisory committee will review the petition and inform the student of its decision.

Department-Specific Programs

Department of Molecular Microbiology and Immunology

Courses of Instruction

MOLECULAR MICROBIOLOGY AND IMMUNOLOGY (MICB)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MICB 500L Introductory Medical Microbiology (4, Irregular) A survey of microorganisms which cause human infectious diseases including mechanisms of pathogenesis, principles of antibiotic usage, pertinent microbial genetics; lectures, laboratories and demonstrations. *Prerequisite:* one year general biology, one semester biochemistry.

MICB 501 Introduction to Immunology (1, Irregular) Basic introduction into molecular, cellular, and clinical immunology for second year medical students and graduate students in Microbiology. (Duplicates credit in BISC 450L.)

MICB 502 Molecular and Cellular Immunology (2, max 8, Fa) Specific topics to be scheduled on a yearly and rotating basis. *Prerequisite:* MICB 501.

MICB 503 Current Topics in Immunology (1, max 8, Irregular) Discussion forum on the diverse areas of research which constitute modern immunology. *Prerequisite:* MICB 501.

MICB 504 Molecular Biology of Cancer (4, Sp) (Enroll in INTD 504)

MICB 522 Infection and Host Responses (4, Sp) (Enroll in INTD 522)

MICB 531 Cell Biology (4) (Enroll in INTD 531)

MICB 542 Animal Virology (2, max 6, Irregular) Virus structure and chemistry; virus-cell interactions; aspects of virus genetics; molecular biology; pathogenesis, immunology, and evolution of viral infections.

MICB 549 Student Seminar Series (1, max 8, FaSp) Microbiology students will present research seminars describing their thesis progress.

MICB 550 Microbial Pathogenesis (2, Irregular) Critical discussion of recent developments in pathogenesis of select microbial, viral and parasitic agents with particular emphasis on molecular factors and their synergistic (antagonistic) actions.

MICB 551 Prokaryotic Molecular Genetics (4, Sp) Macromolecular processes and their regulation in prokaryotes; DNA replication, transcription, and post-transcriptional events in general and as related to operons, phage biology, and eucaryotic organelles.

MICB 560 Recent Advances in Microbiology (1, max 6, Irregular) Intensive examination of selected topics in microbiology. Student presentations and critiques. Required for all graduate students.

MICB 561 Molecular Biology (4, Fa) (Enroll in INTD 561)

MICB 570 Microbiology Research Seminar (1, max 10, FaSpSm) Critical discussion of current research topics. Students present published and unpublished research results for discussion and critique. *Prerequisite:* current enrollment in Microbiology Ph.D. program.

MICB 571 Biochemistry (4, Fa) (Enroll in INTD 571)

MICB 572 Systems Physiology and Disease I (4, Fa) (Enroll in INTD 572)

MICB 573 Systems Physiology and Disease II (4, Sp) (Enroll in INTD 573)

MICB 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MICB 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

MICB 601 Molecular Biology of Gene Regulation (2, max 8, FaSp) (Enroll in BIOG 601)

MICB 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MICB 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Email:  NIIN@ini.usc.edu
nii.usc.edu**

NIIN Core Faculty

Associate Professors of Neurology: Hongwei Dong, Ph.D.; John Darrell Van Horn, Ph.D. (NIIN Program Director)

Assistant Professors of Neurology: Kristi Clark, Ph.D.; Neda Jahanshad, Ph.D.; Judy Pa, Ph.D.; Yonggang Shi, Ph.D.

Assistant Professors of Research: Meredith Braskie, Ph.D.; Derrek Hibar, Ph.D.; Hourii Hintiryan, Ph.D.; Xue Hua, Ph.D.; Andrei Irimia, Ph.D.; Junning Li, Ph.D.

Introduction

The Master of Science (M.S.) in Neuroimaging and Informatics (NIIN) program provides students with an understanding of the scientific and clinical underpinnings of neuroimaging science and how to leverage that knowledge to make new and important discoveries in biomedicine. Students who successfully complete the program will be ideally positioned to apply to formalized medical training programs, join Ph.D. research training programs, obtain laboratory or administrative employment in the growing field of brain imaging neuroscience, or engage in public policy or regulatory administration of academic, clinical or business efforts in this expanding discipline.

The program comprises 10 courses (eight 3-unit and two 1-unit) to be taken in one academic year. Didactic lecture courses address the technology of neuroimaging, a detailed examination of brain anatomy and function, and the variety of data-type dependent as well as integrative computational processing approaches. Laboratory modules (1) provide guided, hands-on experience with neuroimaging data collection approaches for examining anatomy, connectivity, and functional activity; and (2) examine and develop optimized data processing

strategies. Finally, scholarship is enriched by several distinct faculty-guided, discussion-based courses that allow detailed examination of specific aspects of neuroimaging of elemental neurological processes and carefully selected applications in neurological and psychiatric medicine. Graduation requires completion of 26 course units.

Admissions Requirements

Applicants must supply a completed application for graduate studies including: transcripts from all institutions previously attended, standardized test scores, a personal statement describing scientific and career interests, and two letters of recommendation. Applications are generally anticipated for fall enrollment. Applicants to the program must apply to the USC Graduate School and must meet the minimum requirements for admission to the Graduate School. Students are required to have an overall undergraduate GPA of 3.0 or better (or equivalent) and have achieved graduation with a B.S. or B.A. degree (or equivalent) prior to matriculation. Students are expected to have taken the general portion of the GRE exam before application and to have met or exceeded university score requirements. Applicants not meeting Graduate School requirements for regular standing may, with the approval of the Graduate School, be conditionally admitted. International students from non-English speaking home countries are expected to demonstrate English language proficiency or take remedial English language courses, according to Graduate School policy. Specific prerequisites for this program include completed course work with a B or better grade (or equivalent) in neuroscience, computer science, mathematics, biology or a related field.

Advisement

The program recommends that students meet with the program director each semester prior to registration for courses.

Satisfactory Academic Progress

A graduate GPA of at least 3.0 in the program is required at all times. Any student whose graduate GPA falls below 3.0 will be given written notification that they have been placed on academic probation. Students who do not raise their GPA to 3.0 in the second semester are academically disqualified.

Degree Requirements

Graduation requires completion of 26 units, according to the required course schedule outlined below. None of the NIIN courses may be waived or substituted for other courses in the USC Catalogue. This program is intended to be completed within one academic year, and, while optional, does not include a requirement for independent laboratory research or a thesis. Students may request approval to undertake laboratory research and continuing course work during a second year research option; students must already be matriculated into the program before making this request, and not all students will be granted this opportunity (selection will be based on academic performance and student research interests, and on availability of laboratory space).

REQUIRED COURSES OF INSTRUCTION

UNITS

		UNITS
<i>Fall</i>		
NIIN 500	Neuroimaging and Systems Neuroscience	3
NIIN 510	Fundamentals of Human Neuroimaging	3
NIIN 520	Experimental Design for Neuroimaging	3
NIIN 530	Neuroimaging Data Acquisition	3
<i>Spring</i>		
NIIN 540	Neuroimaging Data Processing Methods	3

Institute for Neuroimaging and Informatics

Courses of Instruction

NEUROIMAGING AND INFORMATICS (NIIN)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

NIIN 500 Neuroimaging and Systems Neuroscience (3, Fa) Overview of elemental neuroanatomy and brain systems with an emphasis on a neuroimaging perspective in the human and mouse. Open only to Neuroimaging and Informatics majors.

NIIN 510 Fundamentals of Human Neuroimaging (3, Fa) Survey of anatomical and functional neuroimaging approaches and their use to explore the healthy as well as diseased human brain. Open only to Neuroimaging and Informatics majors.

NIIN 520 Experimental Design for Neuroimaging (3, Fa) Examine experimental design approaches for experimental and clinical neuroimaging investigation. Topics on how to develop rigorous experiments to test theories of cognitive and clinical neuroscience. Open only to Neuroscience and Informatics majors.

NIIN 530 Neuroimaging Data Acquisition w/ Magnetic Resonance Imaging (3, Fa) Introduces the various approaches used to image the living brain using MR-based techniques. Covers neuroimaging scanning technologies, pulse sequence design, and sources of image artifact. *Recommended preparation:* familiarity with Matlab. Open only to Neuroscience and Informatics majors.

NIIN 540 Neuroimaging Data Processing Methods (3, Sp) Comprehensive investigation of data processing methods, software strategies, and workflow design and execution methodologies. Open only to Neuroimaging and Informatics majors.

NIIN 550 Computational Modeling in Neuroimaging (3, Sp) Addresses the current neuroinformatics approaches to large-scale data representations, mining, and visualization in brain imaging. Open only to Neuroimaging and Informatics majors.

NIIN 560 Microscopy Techniques and Neuroinformatics in Animal Models (3, Sp) Introduction to methodological approaches to neuroscience: identification of neurochemicals and genetic content in discrete anatomical locations using immunohistochemistry, in situ hybridization, and polymerase chain reaction. Open only to Neuroscience and Informatics majors.

NIIN 570 Neuroimaging Genetics and Phenomics (3, Sp) Lectures on the linkage of genomic methods for identifying genes and their allelic variants in the context of demographic, neuropsychological, and clinical variables. Open only to Neuroimaging and Informatics majors.

NIIN 597 Current Topics in Neuroinformatics (1, FaSp) Student-led presentations with faculty-guided discussion of recent literature in the subject of neuroimaging and neuroinformatics. Open only to Neuroscience and Informatics majors.

Emeritus Assistant Professor of Clinical: R.B. Hopper

Emeritus Professor of Research: T.L. Lincoln

**Recipient of university-wide or school teaching award.*

The Department of Pathology provides training for both medical and graduate students. Medical students are trained in general, systemic and cellular pathology, providing them with an understanding and visualization of the basic processes underlying symptoms and clinical courses, as well as the ability to evaluate laboratory findings. This department also contributes to the training of residents and fellows at the LAC+USC Healthcare Network, Keck Hospital of USC and the USC Norris Cancer Hospital, Childrens Hospital Los Angeles and Los Angeles County Coroner/Medical Examiner's Office, providing these residents and fellows with an intensive residency program in anatomic and clinical pathology and offering subspecialty fellowship training in surgical pathology, cytopathology, hematopathology and neuropathology.

The Department of Pathology has a Master of Science program. The two-year M.S. program provides training in the latest technologies and concepts of biomedical research and provides the graduate with enhanced opportunities for positions in biotechnology companies, teaching colleges and various health department/governmental positions.

With more than 87 full-time faculty and 37 residents and fellows in training, the USC Department of Pathology is one of the largest pathology departments in the United States. The department is particularly strong in areas of surgical pathology, cytopathology, hematopathology, immunocytochemistry, immunopathology, neuropathology, and AIDS-related research. The department maintains active research programs in hematopathology, neuropathology and translational cancer research and has begun to expand its base in radioimmunoimaging and immunotherapy. It also has ongoing research projects in the new areas of molecular and genetic pathology. Residency training has added months in dermatopathology and molecular pathology at Keck Hospital of USC and in cytogenetics at CHLA. The hematopathology fellowship has increased fellowship items from two to three fellows and added Norris Cancer Hospital and CHLA as affiliated institutions, making this one of the leading hematopathology fellowships in the nation.

The department provides diagnostic laboratory services for the LAC+USC Medical Center, the USC Norris Cancer Hospital, the Doheny Eye Institute, Keck Hospital of USC and the USC Clinical Laboratories Group. Approximately 40 of the department's full-time faculty members work in service laboratories throughout the LAC+USC Medical Center, where they are supported by 37 residents and fellows and a technical and clerical staff numbering in excess of 500. The USC Norris Cancer Hospital and Research Institute and Keck Hospital of USC houses 18 full-time pathologists, two fellows, three residents and approximately 25 clerical and support staff.

Graduate Programs

General Admissions

Applicants to the graduate program in pathology must have a bachelor's degree from an accredited college or university with an undergraduate major in one of the natural sciences; a minimum cumulative GPA of 3.0 for undergraduate work is required. Applicants must submit undergraduate transcripts and letters of recommendation from two undergraduate teachers with their application. All applicants must take the general portion of the Graduate Record Examinations (GRE). A combined score of at least 1100 for the verbal and quantitative scores is required. International students whose native language is not English must submit scores from the IELTS (International English Language Testing System) or the TOEFL (Test of English as a Foreign Language) examination. Personal interviews by members of the department's graduate committee may be requested.

Original application materials, except letters of recommendation, should be sent to the Office of Admission, University of Southern California. To expedite consideration of the application, applicants should also send

photocopies of the application, transcripts and GRE scores to the Pathology Department's graduate committee secretary, Lisa Doumak. Letters of recommendation should be addressed directly to the secretary, graduate committee. Applications are considered for admission to both the fall and spring semesters.

Residency and Fellowship Programs

The Department of Pathology offers six first-year residency positions and 24 residency positions in its fully ACGME-accredited four-year training program in anatomic and clinical pathology at the LAC+USC Medical Center. Training is offered in autopsy and surgical pathology, neuropathology, cytology, microbiology, hematopathology, immunohematology, clinical chemistry, toxicology, immunopathology, cytogenetics, instrumentation, laboratory management, clinical informatics, electron microscopy, molecular pathology and other specialty areas. The Department of Pathology also offers the Accreditation Council on Graduate Medical Education (ACGME) fully accredited fellowship training in cytopathology (four positions), hematopathology (three positions), neuropathology (one position), and surgical pathology (seven positions).

Master of Science in Experimental and Molecular Pathology

The Department of Pathology offers a program for the master of science degree with a major in experimental and molecular pathology. The primary objectives of this program are to provide the necessary theoretical and practical training in experimental pathology that culminates with the master of science degree. Goals of the program are to train students in preparation for senior research staff or senior technician positions in academic or industrial institutes, further M.D. or Ph.D. study, consultancies requiring multidisciplinary backgrounds or advanced teaching positions in community colleges.

Admissions The prerequisite for applicants to this program in pathology is a bachelor's degree with an undergraduate major in one of the natural sciences. A minimum GPA of 3.0 in the natural sciences (including mathematics) is usually required. Applicants must achieve a competitive score on the general portions of the Graduate Record Examinations (GRE). In addition, the department requires at least three letters of recommendation from faculty members who can evaluate the applicant's potential for graduate work. Demonstrated proficiency in the English language is required. International students whose native language is not English must submit scores from the IELTS (International English Language Testing System) or the TOEFL (Test of English as a Foreign Language) examination. Special circumstances may provide consideration for conditional admission.

Course Requirements At least 34 units of graduate study are required. The required courses include INTD 522 Infection and Host Responses (4), INTD 531 Cell Biology (4), INTD 550 Introduction to Pathology (4), INTD 551 Pathobiology of Disease (4), INTD 571 Biochemistry (4), PATH 553 Methods in Cellular and Clinical Pathology (3), PATH 554 Methods in Molecular Pathology (2) and PATH 570ab Seminar in Pathology (2). Fourteen or more course units must be taken in the Department of Pathology, 8 units may be pursued outside the department, and a maximum of 8 units of directed research in pathology may be applied to the degree. No more than 4 units of course work taken outside of USC should be applied toward the M.S. degree requirements. Students considering such an action should submit a petition to the pathology graduate committee and document a rigorous academic standard for the course (reading materials, texts and other performance criteria, lecture content, etc.). The pathology graduate committee reviews the petition and informs the student of its decision.

Master's Examinations/Master's Thesis

The Master of Science has the option of either an experiment-based thesis or theory-based thesis course of study. Each student's program will be tailored to suit individual needs and background. Students who require training mainly in the knowledge of pathology may opt for the theory-based thesis course of study. Students also have an opportunity to register for directed research (PATH 590). For the experiment-based thesis option, the student must take PATH 594ab Master's Thesis. For the theory-based thesis option, the student must take GRSC 810 Studies for Master's Examination during the semester they plan to graduate if not otherwise enrolled.

Department-Specific Programs

Department of Pathology

Courses of Instruction

PATHOLOGY (PATH)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PATH 500ab Basic and Applied Systemic Pathology (3-2, Irregular) Clinical, gross, and microscopic study of basic disease processes. Pathophysiology of major organ systems; etiology, pathogenesis and histopathology of important diseases; oral manifestations, clinical recognition.

PATH 531 Cell Biology (4) (Enroll in INTD 531)

PATH 550 Introduction to Pathology (4, Fa) (Enroll in INTD 550)

PATH 551 Pathobiology of Disease (4) (Enroll in INTD 551)

PATH 553 Methods in Cellular and Clinical Pathology (3, Fa) Includes advanced techniques in cell biology, protein and immunochemistry. A practical approach to acquaint new graduate students with current methodologies and applications used in biomedical research. (Duplicates credit in former PATH 552a.)

PATH 554 Methods in Molecular Pathology (2, Sp) Theory and practice methods useful in experimental pathology; experimental design; statistical analysis; literature analysis; laboratory and radiation safety. (Duplicates credit in former PATH 552b.)

PATH 555 Biochemical and Molecular Bases of Disease (4, Sp) (Enroll in INTD 555)

PATH 561 Molecular Biology (4, Fa) (Enroll in INTD 561)

PATH 570abcd Seminar in Pathology (1-1-1-1, FaSp) Recent advances in the understanding of diseased cells and tissues are reported and discussed using standard seminars, as well as autopsy organ reviews.

PATH 571 Biochemistry (4, Fa) (Enroll in INTD 571)

PATH 572 Systems Physiology and Disease I (4, Fa) (Enroll in INTD 572)

PATH 573 Systems Physiology and Disease II (4, Sp) (Enroll in INTD 573)

PATH 575 Frontiers of Pathology (2, max 8, Sp) Weekly research lectures by leading investigators in the field of homeostatic response to injury such as cell death, inflammation, fibrosis and regeneration.

PATH 581 Essentials of Animal Experimentation (1, Fa) A course providing basic information on the issues and responsibilities of investigators using animals in biomedical research. *Recommended preparation:* graduate standing.

PATH 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PATH 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

PATH 599 Special Topics (2-4, max 8, FaSp)

PATH 631 Viral Oncology (2, Fa) (Enroll in INTD 630)

PATH 650 Stem Cell Biology and Medicine (4, Sp) (Enroll in INTD 650)

PATH 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PATH 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Faculty

Division Head: C.C. Fung

Professors: J.G. Nyquist; B.P. Wood

Associate Professors: C.C. Fung; J. Gates (*Family Medicine*); R.A. Girard; W. May

Assistant Professors: T. Kovin, D. Souder

Instructor: D. Poole

Clinical Faculty: A.M. Alexander; J. Davis; D.L. Fisher; A. Richards

Emeritus Professors: S. Abrahamson; M.A. Hitchcock; K. Hoffman

Established in 1963 as one of the first medical education units in the United States, the division conducts educational programs for four different types of students: medical students; graduate students in education; those teaching in medical and other health professional education settings; and physicians in the postgraduate study of medical education.

The division's primary mission is to enhance the quality of medical education by serving as a resource of educational expertise for planning, developing, and evaluating medical education programs and conducting educational research. Similar activities and programs are conducted with various government and private organizations outside the university.

Major research and training interests of the faculty include the instruction of lay persons to be used as standardized patients for teaching and evaluation, case-based learning, pre-med programs for minority students and interactive video systems.

Administratively, the division is an independent unit in Educational Affairs in the Keck School of Medicine. The faculty hold appointments in the Department of Pediatrics. The division also employs 10 staff and research assistants. All activities of the division are conducted at the USC Health Sciences Campus.

Fellowship Programs

Teaching and Learning

A Teaching and Learning Fellowship program is offered to health care professionals who are engaged in teaching.

The primary goals of this fellowship are to provide participants with multiple ways to teach and evaluate effectively. Through seminars, fellows will gain increased understanding of basic principles of teaching and learning and achieve the skills necessary to apply principles effectively.

Educational Leadership

An Educational Leadership Fellowship program is available for health care professionals with two primary goals: to prepare participants for understanding and serving in positions of leadership and enhance fellows' personal and professional effectiveness. Seminars will explore transformational change, team and community formation, group dynamics, organizational culture and resources.

Health Professions Teachers

From time to time, the division offers special workshops or seminars in various subject areas related to the improvement of instruction. Division staff members are available to plan these special programs on request.

Master of Academic Medicine

The program addresses the unique population of medical and health professions faculty who are focused on leading the academic enterprise for health professionals at the undergraduate, graduate and continuing education levels. The six-semester program consists of 32 graduate units and employs a hybrid model, combining on-campus face-to-face sessions, blended with online course work. For more information, see the Master of Academic Medicine page.

Postgraduate Program

Individually tailored programs of study in medical education are available to visiting postdoctoral fellows who wish to gain an understanding of principles, problems and practices in medical education. These visiting fellows may spend from a few weeks to a year in residence, participating in ongoing projects, seminars, readings and independent study.

**Recipient of university-wide or school teaching award.*

The administrative offices of the Department of Physiology and Biophysics are located on the Health Sciences Campus. Faculty of the department are predominantly located at the Health Science Campus and also at the LAC+USC Medical Center and the University Park Campus.

The graduate program in physiology and biophysics is designed to prepare students for a career in research and teaching in physiology, biophysics and related fields. Faculty of the department guide students toward becoming effective members of today's scientific community by providing an integrated knowledge of physiological systems at several levels of organization. The course of study required of each candidate is planned to meet his or her individual interests and needs.

Faculty guidance and specialized facilities are available for advanced research in the four broad areas of research represented in the department: endocrinology, reproduction and metabolism; neurophysiology; fluid and electrolyte physiology; and cellular and molecular physiology.

Graduate Programs

Admissions

Applicants should have a bachelor's degree in one of the natural sciences. Undergraduate course work in mathematics (including one and a half years of calculus), physics (one year), organic chemistry (aliphatic and aromatic), and biological sciences (one year) is required. Prospective students should also have completed at least two courses from among the following areas: physical chemistry, advanced physics, electronics, histology, physiology, cell biology, computer science, or biochemistry. Equivalent work will be considered on an individual basis.

Students interested in applying must complete an application for graduate studies and submit official transcripts from all academic institutions previously attended, a personal statement of career objectives, financial statement of support, standardized test scores and three letters of recommendation.

Master of Science, Medical Physiology

Keith Administration Building 409

1975 Zonal Avenue

Los Angeles, CA 90089-9031

(323) 442-0230

FAX: (323) 442-9031

Program Director: H. Kaslow, Ph.D., [✉ hrkaslow@usc.edu](mailto:hrkaslow@usc.edu)

Physiology is the study of the functions and activities of life and living matter at all levels of organization within an organism. While physiology research is frequently at the molecular level, the tradition of the discipline challenges the researcher to consider all homeostatic and developmental functions of an organism. This tradition can guide research efforts seeking to identify causes of disease and critical physiological functions possessing therapeutic and health-promoting opportunities. The Medical Physiology program focuses on the research experience of the thesis track but in special circumstances will consider applications to the non-thesis track.

Admission Applicants to the Master of Science in Medical Physiology (MPHY) program will have earned a bachelor's degree and completed course work in mathematics (including calculus), physics, chemistry and biological sciences. To be considered, applicants must complete a USC Graduate Admissions application and

submit either GRE or MCAT test scores, a brief personal statement explaining the reasons for applying to the program, official transcripts from all academic institutions previously attended and three letters of recommendation. Foreign applicants are required to submit results from a TOEFL or IELTS examination. Potential applicants are encouraged to submit questions regarding the program and application process to the Medical Physiology Graduate Program Office prior to submitting the formal application ([✉ physiology@usc.edu](mailto:physiology@usc.edu)). In the personal statement, applicants must specify whether they are applying to the thesis- or non-thesis track and the rationale for that decision. Normally, admission will be in the thesis track and a recommendation to admit an applicant will require MPHYS graduate committee approval of an agreement between an applicant and a faculty member who will serve as mentor of the thesis project. The agreement shall specify the general research area of the thesis.

The Medical Physiology graduate program participates in the USC Progressive Master's Degree Program and seeks applications from qualified students (usc.edu/programs/ugprograms/progressive).

Course Requirements The master's degree in Medical Physiology requires the completion of at least 32 graduate-level units with a grade point average of 3.0. All students are required to take the following: INTD 531, INTD 561, INTD 574, MPHYS 572, MPYH 573, MPHYS 590, PM 510. Elective courses must be approved by the director of the MPHYS Graduate Program. Students may pursue a thesis option, which requires completion of MPHYS 594abz (2-2-0). The thesis track is required when students take less than 26 units of non-research units (i.e., more than 6 research units out of the 32 units required for graduation). Students pursuing a non-thesis option must complete 32 units of approved course work.

Continued enrollment: Continued enrollment in the program requires an average GPA of at least 3.0, a grade of at least B in MPHYS 572 and MPHYS 573, a grade of at least B, "Pass" or "Credit" in INTD 574 or equivalent, and a "Pass" or "Credit" in all non-graded courses. At any time, after evaluating a student's progress, the MPHYS Graduate Committee, at its discretion, may require a student pass a screening examination to be eligible to progress to the third or later semester of graduate study. If a student fails to achieve these metrics or pass a screening examination, the MPHYS Graduate Committee will make a recommendation as to whether or not to place the student on probationary enrollment with a defined remediation sufficient to remedy the deficiency or to recommend the student withdraw or be dismissed from the program.

Thesis track:

The thesis work of a student in the thesis track will be conducted under the guidance of a Master's Student Thesis Committee, which shall consist of at least:

1. The student's adviser who shall chair the committee and be a tenure-track member of the MPHYS Graduate Committee.
2. The student's thesis mentor if not the same faculty member as the adviser.
3. One additional tenure-track faculty member of the Department of Physiology and Biophysics.
4. One additional tenure-track faculty member.

Final Examination: Passing the examination requires: 1) submission of a thesis document describing the work of the thesis, and 2) an oral defense of the thesis both to the satisfaction of the Thesis Committee. The thesis document shall be distributed to the student's Master's Thesis Committee and a copy provided to the Medical Physiology Graduate Program Office at least two weeks prior to the oral examination. If the document is not provided by that date, then the oral examination shall be rescheduled to accommodate this requirement. Final acceptance of the document and passage of the oral examination requires the unanimous recommendation of all members of the thesis committee. If the student does not pass the examination on the first attempt, at its discretion the MPHYS Graduate Committee may grant a second opportunity to pass the examination according to policies in the *USC Catalogue*.

Non-thesis track:

Final Examination. A comprehensive examination replaces the thesis defense. The MPHYS Graduate Committee shall appoint a member of the MPHYS Graduate Committee to supervise the final examination process (the "Examination Supervisor"). The examination shall be on a topic approved by the Examination Supervisor and consist of: 1) a document sufficiently discussing the topic, and 2) passing an oral examination on the substance of the topic. The document shall be submitted to the Examination Supervisor at least two weeks prior to the oral examination. If the document is not provided by that date, then the oral examination shall be

rescheduled to accommodate this requirement. To qualify as the final examination, all the faculty of the MPHYS Graduate Committee shall be invited to attend the presentation with notice given at least two weeks in advance and at least three members of the MPHYS Graduate Committee or alternates selected by the program director shall attend.

During and following the presentation, faculty members may pose questions relevant to the presentation to determine if the student has mastered an appropriate breadth and depth of knowledge of physiology. The Examination Supervisor shall then receive reports from faculty attending the presentation, usually within a week, and make a recommendation to the MPHYS Graduate Committee as to whether or not the student passed the examination. Unless a member of the Graduate Committee objects, the recommendation shall be considered accepted. If an objection is received a decision shall be made by a secret ballot vote with two thirds of those voting in favor of passage required for passage of the examination. If the student does not pass the examination on the first attempt, at its discretion the MPHYS Graduate Committee may grant a second opportunity to pass the examination according to policies in the *USC Catalogue*.

Courses of Instruction

MEDICAL PHYSIOLOGY (MPHY)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MPHY 572 Systems Physiology and Disease I (4, Fa) (Enroll in INTD 572)

MPHY 573 Systems Physiology and Disease II (4, Sp) (Enroll in INTD 573)

MPHY 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Open only to master's students. Graded CR/NC. (Duplicates credit in former PHBI 590.)

MPHY 594abz Master's Thesis (2, FaSpSm) Credit upon acceptance of thesis. Graded IP/CR/NC. (Duplicates credit in former PHBI 594a.)

PHYSIOLOGY AND BIOPHYSICS (PHBI)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PHBI 524 Advanced Overview of Neurosciences (4, Fa) (Enroll in NSCI 524)

PHBI 531 Cell Biology (4) (Enroll in INTD 531)

PHBI 550 Seminar in Advanced Cellular, Molecular and Systemic Physiology (1, max 12, FaSp) Lectures and student presentations on advanced topics in molecular, cellular and systemic physiology. Open to integrative biology of disease program, physiology and biophysics, and pathobiology students only. Graded CR/NC.

PHBI 561 Molecular Biology (4, Fa) (Enroll in INTD 561)

PHBI 571 Biochemistry (4, Fa) (Enroll in INTD 571)

PHBI 572 Systems Physiology and Disease I (4) (Enroll in INTD 572)

PHBI 573 Systems Physiology and Disease II (4) (Enroll in INTD 573)

PHBI 594abz Master's Thesis (2-2-0, FaSpSm) Credit upon acceptance of thesis. Graded IP/CR/NC.

PHBI 608ab Advanced Cellular, Molecular and Systemic Physiology (a: 2 or 4, Fa; b: 2 or 4, Sp)
Lectures and student presentations on advanced topics in molecular, cellular and systemic physiology.

PHBI 650 Mechanisms of Ion and Solute Transport Across Cell Membranes (2, Fa) Biophysical examination of the mechanisms of ion and solute transport across cell membranes; emphasis on the structures of transport proteins and kinetic models of transport. *Recommended preparation:* graduate level course in biochemistry, physical biochemistry, or cell biology.

PHBI 651 Molecular Modeling and Kinetic Simulations in Membrane Transport (2, Fa)
Introduction to the principles of mathematical modeling of biological systems and molecular dynamics simulations, with emphasis on membrane transport. *Recommended preparation:* graduate level courses in biochemistry or physical biochemistry, and cell biology.

PHBI 660 Understanding Diseases of Ion Transport (2, Sp) Examination of the genetics, biochemical mechanisms, and physiological characteristics of diseases caused by inherited mutations in ion channels and ion transport proteins.

The Department of Preventive Medicine is responsible for training medical, graduate and undergraduate students in the areas of biostatistics, epidemiology, health behavior research, public health, and preventive medicine. Faculty from the statistical genetics and molecular epidemiology department also perform research in the areas of biostatistics, epidemiology of acute and chronic diseases, and environmental health.

The undergraduate and graduate programs offered by the department are noteworthy for the extensive opportunities offered to the students for involvement in faculty research. It is not uncommon for students to begin working closely with faculty members on research projects as early as their first or second year of study.

Degree Programs

The Department of Preventive Medicine offers the following degree programs:

B.S. in Global Health

B.S. in Health Promotion and Disease Prevention Studies

B.S. in Health Promotion and Disease Prevention/Master of Public Health

B.S. in Health Promotion and Disease Prevention/M.S. in Biostatistics

B.S. in Health Promotion and Disease Prevention/M.S. in Molecular Epidemiology

B.S. in Dental Hygiene/Master of Public Health

M.S. in Applied Biostatistics/Epidemiology

M.S. in Clinical and Biomedical Investigations

M.S. in Molecular Epidemiology

M.S. in Biostatistics

Master of Public Health

Master of Public Health (online)

Master of Public Health/Doctor of Medicine

Master of Public Health (Health Promotion)/Ph.D. in Psychology (Clinical)

Master of Public Health/Pharm.D.

Master of Public Health/ Master of Planning

Master of Public Health/Master of Social Work

Ph.D. in Biostatistics

Ph.D. in Epidemiology

Ph.D. in Molecular Epidemiology

Ph.D. in Preventive Medicine (Health Behavior Research)

The Department of Preventive Medicine also offers the following undergraduate minor programs:

Minor in Cinema-Television for the Health Professions

Minor in Cultural Competence in Medicine

Minor in Environmental Health

Minor in Global Health

Minor in Health Communication

Minor in Public Health

Minor in Nutrition and Health Promotion

Minor in Substance Abuse Prevention

The undergraduate program in Health Promotion and Disease Prevention Studies (HP) provides a well-rounded, professionally focused education leading to the Bachelor of Science degree. The program is concerned with the sociocultural, behavioral, psychological, and biological factors contributing to wellness and disease. It is an ideal major for students interested in medicine, pharmacy, dentistry, public health, epidemiology, health psychology and health behavior research. Areas of study include: global health; cultural diversity in medicine; substance abuse prevention and program planning; nutrition and fitness; health promotion of minority and underserved populations; and general public health issues (e.g., HIV/AIDS, violence, health promotion in the workplace and behavioral medicine).

Program Requirements

The Bachelor of Science degree is awarded after students successfully complete 128 units, consisting of 66 units for the major and fulfillment of USC general education requirements including third semester equivalency in a foreign language.

General Education Requirements

The university's general education program requires six courses plus writing and diversity requirements, which provide a coherent, integrated introduction to the liberal arts and sciences. See The USC Core and the General Education Program for more information.

Requirements for the Major (66 units)

The program is divided into core and elective components.

The following core component (42 units) is required of all students.

NON-HP COURSES (20 UNITS)		UNITS
BISC 120L	General Biology: Organismal Biology and Evolution, or	
BISC 121L	Advanced General Biology: Organismal Biology and Evolution	4
BISC 220L	General Biology: Cell Biology and Physiology, or	
BISC 221L	Advanced General Biology: Cell Biology and Physiology	4
CHEM 105aL	General Chemistry, or	
CHEM 115aL	Advanced General Chemistry	4
MATH 116	Mathematics for the Social Sciences, or	
MATH 125*	Calculus I	4
PSYC 100	Introduction to Psychology	4

**MATH 125 allows students who have placed out of MATH 116 to take a higher-level math class; it also satisfies the math requirement for premedical students.*

HP COURSES (22 UNITS)		UNITS
HP 200	Introduction to Health Promotion and Disease Prevention	4
HP 300	Theoretical Principles of Health Behavior	4
HP 320	Biological and Behavioral Basis of Disease	4
HP 340L	Health Behavior Statistical Methods	4
HP 350L	Health Behavior Research Methods	4
HP 480	Internship in Health Promotion and Disease Prevention, or	2-4
HP 490x	Directed Research	1-8, max 12

Advanced HP and Health Profession Preparatory Courses

A total of 24 units of electives are required of all students (at least 12 of the 24 must be HP courses).

ELECTIVES (24 UNITS)		UNITS
BISC 320L	Molecular Biology	4
BISC 330L	Biochemistry	4
CHEM 105bL	General Chemistry, or	
CHEM 115bL	Advanced General Chemistry	4
CHEM 322abL	Organic Chemistry	4-4

The Bachelor of Science in Global Health is a multidisciplinary degree of the Keck School of Medicine's Department of Preventive Medicine. This undergraduate program offers an examination of public health and policy issues in the context of global affairs. Students complete course work from Health Promotion and Disease Prevention Studies and International Relations in addition to requirements from other schools of the university. The program provides students with a strong background in understanding and evaluating global health issues and prepares students to become health professionals with international competencies. This program is an ideal major for students interested in medicine, pharmacy, dentistry, international relations, public health, epidemiology, health psychology and health behavior research.

Program Requirements

The Bachelor of Science degree is awarded after students successfully complete 128 units, consisting of 66 units for the major and fulfillment of USC general education requirements including third semester equivalency in a foreign language.

General Education Requirements

The university's general education program requires six courses plus writing and diversity requirements, which provide a coherent, integrated introduction to the liberal arts and sciences. See The USC Core and the General Education Program for more information.

Requirements for the Major (66 units)

The program is divided into core and elective components. As part of the core research requirements, students must complete a directed research requirement, HP 490x, with a specific international research focus.

The core component (42–46 units) is required for all students.

CORE COURSES (32 UNITS)		UNITS
BISC 220L	General Biology: Cell Biology and Physiology, or	
BISC 221L	Advanced General Biology: Cell Biology and Physiology	4
CHEM 105aL	General Chemistry, or	
CHEM 115aL	Advanced General Chemistry	4
ECON 203	Principles of Microeconomics	4
HP 270	Introduction to Global Health	4
HP 320	Biological and Behavioral Basis of Disease	4
HP 470	Case Studies in Global Health	4
IR 308	Economic Globalization	4
MATH 125	Calculus I	4
CORE RESEARCH COURSES (10–16 UNITS)		UNITS
HP 340L	Health Behavior Statistical Methods	4
HP 350L	Health Behavior Research Methods	4
HP 490x	Directed Research	1-8, max 12

Students must choose 24 units of elective course work from the following lists. At least 8 units must be from HP and at least 8 units must be from IR.

HP ELECTIVES (MINIMUM 8 UNITS)		UNITS
HP 300	Theoretical Principles of Health Behavior	4
HP 400	Culture, Lifestyle, and Health	4
HP 401	Cultural Competence in Medicine: Promoting Health in Diverse Communities	4
HP 402	Maternal and Child Health	4
HP 403	Behavioral Medicine	4
HP 404	Religion and Health	4
HP 405	Sexually Transmitted Diseases: A Global Public Health Priority	4
HP 420	Gender and Minority Health Issues	4
HP 422	AIDS in Society	4
HP 450	Traditional Eastern Medicine and Modern Health	4
IR ELECTIVES (MINIMUM 8 UNITS)		UNITS
IR 305	Managing New Global Problems	4
IR 306	International Organizations	4
IR 307	Contemporary International Politics	4
IR 308	Economic Globalization	4
IR 315	Ethnicity and Nationalism in World Politics	4
IR 323	Politics of Global Environment	4
IR 325	North-South Relations in the Global Economy	4
IR 371	Global Civil Society: Non-State Actors in World Politics	4
IR 424	Citizenship and Migration in International Politics	4
IR 444	Theories of Global Society	4
OTHER ELECTIVES (MAXIMUM 8 UNITS)		UNITS
BISC 120Lx	General Biology: Organismal Biology and Evolution, or	
BISC 121L	Advanced General Biology: Organismal Biology and Evolution	4
BISC 320L	Molecular Biology	4
BISC 330L	Biochemistry	4
CHEM 105bL	General Chemistry, or	
CHEM 115bL	Advanced General Chemistry	4
CHEM 322aL	Organic Chemistry	4
CHEM 322bL	Organic Chemistry	4
GERO 483	Global Health and Aging	4
PHYS 135aL	Physics for the Life Sciences, or	
PHYS 151L	Fundamentals of Physics I: Mechanics and Thermodynamics	4
PHYS 135bL	Physics for the Life Sciences, or	
PHYS 152L	Fundamentals of Physics II: Electricity and Magnetism	4
POSC 442	The Politics of Human Differences: Diversity and Discrimination	4
POSC 451	Politics of Resources and Development	4
POSC 456	Women in International Development	4
PPD 250	Third World Cities	4
PPD 382	International Development	4
SOCI 432	Racial and Ethnic Relations in a Global Society	4
SOCI 460	Key Issues in Contemporary International Migration	4

Progressive Degree Programs in Preventive Medicine

The Master of Public Health, the Master of Science in Biostatistics and the Master of Science in Molecular Epidemiology programs admit a limited number of undergraduate students to a progressive degree program, which allows them to pursue a master's level degree while completing the bachelor's degree. Applicants to the program must have completed 64 units of course work and must submit their applications prior to the completion of 96 units of course work. Applicants need not submit GRE scores, but are expected to have a minimum GPA of 3.0 at the time of application. The application for admission to a progressive degree program must be accompanied by an approved course plan proposal and two letters of recommendation. The requirements for both the B.S. and the master's degrees must be satisfied, including a minimum of 128 undergraduate units. For further details on progressive degree programs, see the Requirements for Graduation page.

Keck School of Medicine

Department-Specific Programs

Department of Preventive Medicine

Minor in Cinema-Television for the Health Professions

This minor introduces pre-health students to the theory and techniques of the cinematic arts and to a set of media practices useful for the implementation of health promotion strategies. This minor is designed for students who plan to enter careers or professional programs in medicine after graduation and are interested in working with film and television producers to disseminate accurate health information to the public. It complements major programs such as biological sciences, chemistry, kinesiology, health promotion and disease prevention studies, and environmental studies.

REQUIRED COURSES (24 UNITS)		UNITS
CTCS 190	Introduction to Cinema	4
HP 345	Health Issues in Entertainment Media	4
Two of the following:		
HP 370	Introduction to Epidemiology: Methods and Applications	4
HP 401	Cultural Competence in Medicine	4
HP 408	Environmental Health in the Community	4
HP 410	Issues in Prevention and Cessation of Drug Abuse	4
HP 420	Gender and Minority Health Issues	4
HP 421	Violence as a Public Health Issue	4
HP 422	AIDS in Society	4
Eight additional units from the following:		
CTAN 451	History of Animation	2
CTCS 400	Non-Fiction Film and Television	4
CTPR 301	Creating the Non-Fiction Film	4
CTPR 375	Functions of a Director	4
CTPR 385	Colloquium: Motion Picture Production Techniques	4

CTPR 474	Television Documentary Production	4
CTWR 315x	Filmwriting	3
CTWR 412	Introduction to Screenwriting	2
CTWR 416	Motion Picture Script Analysis	2-4

Minor in Cultural Competence in Medicine

This minor is designed for students who plan to enter careers or professional programs in medicine after graduation and are interested in using cultural knowledge to provide more effective health care. The minor focuses on cultural differences in the understanding of health, disease, health care and risk factors unique to specific populations. The minor provides a foundation for students who want to become effective health care providers in an increasingly diverse society. It complements major programs such as biological sciences, chemistry, kinesiology and environmental studies.

REQUIRED COURSES (20 UNITS)		UNITS
HP 200	Introduction to Health Promotion and Disease Prevention	4
HP 400	Culture, Lifestyle and Health	4
HP 401	Cultural Competence in Medicine	4
HP 420	Gender and Minority Health Issues	4

One of the following:

HP 370	Introduction to Epidemiology: Methods and Applications	4
HP 402	Maternal and Child Health	4
HP 408	Environmental Health in the Community	4
HP 410	Issues in Prevention and Cessation of Drug Abuse	4
HP 421	Violence as a Public Health Issue	4
HP 422	AIDS in Society	4
HP 442	Chronic Disease Epidemiology	4
HP 450	Traditional Eastern Medicine and Modern Health	4
HP 460	Adolescent Health	4
PSYC 462	Minority Mental Health	4

Minor in Environmental Health

This minor provides students with a basic understanding of environmental health and its challenges. Curriculum will focus on global health, epidemiology (as it relates to environmental exposures), toxicology and exposure science. Students will be prepared to address and prevent environmental health hazards, promote public health and contribute to the resolution of various environmental health challenges. This minor is ideal for pre-health majors across the university.

REQUIRED COURSES (20 UNITS)		UNITS
HP 200	Introduction to Health Promotion and Disease Prevention	4
HP 320*	Biological and Behavioral Basis of Disease	4
HP 408	Environmental Health in the Community	4
HP 446	Poison, People, and Politics	4
HP 448	Global Environmental Changes and Health	4

*Prerequisite required

Minor in Global Health

This minor provides students with a basic understanding of the factors that determine the health of populations around the globe. Curriculum focuses on the cultural, environmental and clinical aspects of various health topics

such as maternal and child health, aging, obesity, infectious disease and others. By studying these issues, students from majors across the university will be prepared to assess and contribute to the resolution of emerging global health challenges. This minor will appeal to a wide variety of majors, particularly majors centered on international affairs, business and health care.

REQUIRED COURSES (20 UNITS)		UNITS
HP 270	Introduction to Global Health	4
HP 470	Case Studies in Global Health	4
Three of the following:		
GERO 483	Global Health and Aging	4
HP 400	Culture, Lifestyle, and Health	4
HP 401	Cultural Competence in Medicine	4
HP 402	Maternal and Child Health	4
HP 422	AIDS in Society	4

Minor in Health Communication

This minor is designed to appeal to students with a wide range of interests, including those with a general interest in promoting healthy lifestyle practices through effective communication. These students will be prepared to seek jobs in areas such as the managed care industry, hospitals, wellness programs, broadcast and cable companies, and private and governmental agencies, as well as other organizations looking for experts with demonstrated knowledge in health-related fields.

REQUIRED COURSES (20 UNITS)		UNITS
COMM 302	Persuasion	4
COMM 385	Survey of Organizational Communication	4
COMM 443	Health Communication Strategies and Evaluation	4
HP 200	Introduction to Health Promotion and Disease Prevention	4
One of the following:		
COMM 304	Interpersonal Communication	4
COMM 308	Communication and Conflict	4
COMM 315	Health Communication	4
COMM 324	Intercultural Communication	4
COMM 375	Business and Professional Communication	4
COMM 402	Public Communication Campaigns	4
COMM 480	Nonverbal Communication	4
COMM 486	Human and Technological Systems in Organizations	4
HP 370	Introduction to Epidemiology: Methods and Applications	4
HP 400	Culture, Lifestyle, and Health	4
HP 401	Cultural Competence in Medicine	4
HP 402	Maternal and Child Health	4
HP 403	Behavioral Medicine	4
HP 408	Environmental Health in the Community	4
HP 412	Health Promotion and Prevention Policy	4
HP 420	Gender and Minority Health Issues	4
HP 421	Violence as a Public Health Issue	4
HP 422	AIDS in Society	4

HP 430	Obesity and Health	4
HP 442	Chronic Disease Epidemiology	4

Minor in Public Health

This minor is designed for students interested in a broad array of health issues. The focus of the minor is on reducing disability and mortality from avoidable injuries and chronic disease, educating the community about healthy lifestyles, assuring access to health care, and measuring changes using various indicators over time. This minor teaches students to meet the challenges of the changing environment of the health care system.

It complements a number of majors including psychology, sociology, American studies and ethnicity, biological sciences, economics, environmental studies, kinesiology, gender studies, international relations, philosophy, religion, gerontology and political science.

REQUIRED COURSES (20–24 UNITS) UNITS

HP 200	Introduction to Health Promotion and Disease Prevention	4
PPD 330	Introduction to Health Care Systems	4

Three of the following:

HP 370	Introduction to Epidemiology: Methods and Applications	4
HP 400	Culture, Lifestyle, and Health	4
HP 401	Cultural Competence in Medicine	4
HP 402	Maternal and Child Health	4
HP 403	Behavioral Medicine	4
HP 408	Environmental Health in the Community	4
HP 410	Issues in Prevention and Cessation of Drug Abuse	4
HP 412	Health Promotion and Prevention Policy	4
HP 420	Gender and Minority Health Issues	4
HP 421	Violence as a Public Health Issue	4
HP 422	AIDS in Society	4
HP 430	Obesity and Health	4
HP 441	Health Promotion in the Workplace	4
HP 442	Chronic Disease Epidemiology	4
HP 460	Adolescent Health	4

Minor in Nutrition and Health Promotion

This minor is designed to appeal to students interested in nutrition, especially in preparation for graduate study in health-related fields (e.g., medicine, public health) or to enter health-related fields of employment. The focus of the minor is on assessing, planning and evaluating dietary intake of individuals or groups under various conditions of health and disease based upon principles of nutrition and behavioral science. Students in this minor will study factors associated with dietary habits and the development of effective individual and group interventions. It complements majors including psychology, gerontology, biological sciences, chemistry, kinesiology and environmental studies.

REQUIRED COURSES (20 UNITS) UNITS

HP 230	Nutrition and Health	4
HP 430	Obesity and Health	4
HP 431	Behavior and Education Strategies for Nutrition and Fitness	4

Two of the following:

HP 370	Introduction to Epidemiology: Methods and Applications	4
--------	--	---

HP 400	Culture, Lifestyle, and Health	4
HP 401	Cultural Competence in Medicine	4
HP 402	Maternal and Child Health	4
HP 403	Behavioral Medicine	4
HP 412	Health Promotion and Prevention Policy	4
HP 420	Gender and Minority Health Issues	4
HP 432	Clinical Nutrition	4
HP 433	Advanced Topics in Nutrition	4
HP 460	Adolescent Health	4
HP 480	Internship in Health Promotion and Disease Prevention	2-4, max 4
HP 490x	Directed Research	1-8, max 12

Minor in Substance Abuse Prevention

This minor offers students an opportunity to gain an overall understanding of substance abuse as a major modifiable risk factor for illness. It allows students to learn theories of behavior change, to understand the issues in prevention and cessation of drug abuse, and to develop, implement, and evaluate intervention strategies. It complements a number of majors including psychology, sociology, American studies and ethnicity, biological science and gerontology.

REQUIRED COURSES (24 UNITS*)		UNITS
HP 200	Introduction to Health Promotion and Disease Prevention	4
HP 300*	Theoretical Principles of Health Behavior	4
HP 410	Issues in Prevention and Cessation of Drug Abuse	4
HP 411	Drug Intervention Program Design and Evaluation	4

One of the following:

HP 370	Introduction to Epidemiology: Methods and Applications	4
HP 400	Culture, Lifestyle, and Health	4
HP 401	Cultural Competence in Medicine	4
HP 402	Maternal and Child Health	4
HP 403	Behavioral Medicine	4
HP 412	Health Promotion and Prevention Policy	4
HP 421	Violence as a Public Health Issue	4

*Including prerequisite

Keck School of Medicine

Department-Specific Programs

Department of Preventive Medicine

Graduate Programs — Admissions

Master of Science in Applied Biostatistics/Epidemiology

The department encourages applicants with undergraduate degrees in allied health, pharmacology, public health, medicine, biological and clinical sciences or other related fields. Undergraduate preparation should have

included applied statistics, college algebra, an introductory course in calculus and basic computer programming. Applicants should also meet the minimum requirements for admission to the Graduate School. Demonstrated proficiency in the English language is essential. With approval of the Graduate School, applicants not meeting these requirements may be conditionally admitted contingent upon maintaining a GPA of 3.0 for the first 12 units of graduate study.

Master of Science in Biostatistics

The department encourages applicants with undergraduate degrees in mathematics, statistics or biostatistics, computer science or other related fields. Undergraduate preparation should have included differential and integral calculus, introduction to mathematical statistics, and basic computer programming. Applicants should also meet the minimum requirements for admission to the Graduate School. Demonstrated proficiency in the English language is essential. With approval of the Graduate School, applicants not meeting these requirements may be conditionally admitted contingent upon maintaining a GPA of 3.0 for the first 12 units of graduate study.

Master of Science, Molecular Epidemiology

Students with a bachelor's degree in quantitative biological sciences will be eligible for admission. In addition, the B.A. students must have completed at least one year of general biology, one semester of biochemistry and one semester of statistics to be admitted into the Graduate School. Under unusual circumstances, conditional acceptance will be offered to students who do not meet these requirements — allowing them to complete the missing undergraduate courses prior to their full admission into the Graduate School. An introductory biochemistry class is also available in the School of Pharmacy, which may satisfy the biochemistry prerequisite.

Master of Public Health

The MPH program is offered in two formats: the traditional format (on-campus) and via distance learning (online). The traditional MPH program allows students to choose from seven tracks: Health Education and Health Promotion, Biostatistics/Epidemiology, Health Communication, Child and Family Health, Global Health Leadership, Public Health Policy and Environmental Health. The distance-learning program allows students to choose from four tracks: Health Education and Promotion, Biostatistics/Epidemiology, Global Health Leadership, and GeoHealth. The curriculum includes a set of core courses for each track and electives. The program also includes a capstone course and an internship placement that integrates academic and practical experiences and prepares individuals to work in governmental and non-governmental organizations in health-related fields.

The department encourages applicants from the USC undergraduate program in health promotion and disease prevention and throughout the campus, as well as health professionals seeking advanced degrees, medical students who are interested in pursuing an MPH along with their medical degree, nurses who desire a more public health focus, pharmacists and dentists. Applicants should meet the minimum requirements for admission to the Graduate School. Demonstrated proficiency in the English language is essential. With approval of the Graduate School, applicants not meeting these requirements may be conditionally admitted contingent upon maintaining a grade point average of 3.0 (A = 4.0) in PM 501, PM 510L and PM 512 (12 units).

Doctor of Philosophy in Biostatistics

The department encourages applicants with undergraduate degrees in mathematics, statistics or biostatistics, or other related fields. Undergraduate preparation should have included differential and integral calculus, introduction to mathematical statistics and basic computer programming. Applicants should also meet the minimum requirements for admission to the Graduate School. Demonstrated proficiency in the English language is essential. With approval of the Graduate School, applicants not meeting these requirements may be conditionally admitted contingent upon maintaining a GPA of 3.5 for the first 12 units of graduate study.

Doctor of Philosophy in Epidemiology

The department encourages applicants who have undergraduate degrees in allied health, public health, biological sciences or other related fields. Applicants not meeting these requirements may, with approval of the Graduate School, be conditionally admitted contingent upon maintaining a GPA of 3.5 in the first 12 units of graduate studies. Applicants should also meet the minimum requirements for admission to the Graduate School.

Doctor of Philosophy in Preventive Medicine (Health Behavior Research)

Applicants must have a bachelor's degree from an accredited institution; students entering with an advanced

degree may be eligible to transfer course credit. Applicants should also meet the minimum requirements for admission to the Graduate School.

Applicants must supply a completed application for graduate studies, including transcripts from all institutions previously attended, a curriculum vitae (if available), a statement of interest, and three letters of recommendation. For further information contact: Director for Graduate Studies, USC Institute for Health Promotion and Disease Prevention Research, 2001 N. Soto Street, Suite 201B, Los Angeles, CA 90032-3628, (323) 442-8299, FAX: (323) 442-8297.

Doctor of Philosophy in Statistical Genetics and Genetic Epidemiology

The Ph.D. program in Statistical Genetics and Genetic Epidemiology is no longer accepting applicants. It now forms a track within the Doctor of Philosophy in Biostatistics degree program (see above).

Keck School of Medicine

Department-Specific Programs

Department of Preventive Medicine

Master of Science in Applied Biostatistics/Epidemiology

Course Requirements

General requirements include at least 38 units of required courses as follows: 25 units of core courses and at least 9 units of elective courses. In addition, each student must register for four units of 594ab Thesis and write a master's thesis.

CORE COURSES (25 UNITS)		UNITS
PM 510L	Principles of Biostatistics	4
PM 511aL	Data Analysis	4
PM 512	Principles of Epidemiology	4
PM 517a	Research Methods in Epidemiology	3
PM 518a	Statistical Methods for Epidemiological Studies	3
PM 523	Design of Clinical Studies	3
PM 527	Epidemiology of Infectious Disease	4
ELECTIVES (AT LEAST 9 UNITS)		UNITS
PM 511bL	Data Analysis	4
PM 515	Behavioral Epidemiology	3
PM 516ab	Statistical Problem Solving	1-1
PM 517b	Research Methods in Epidemiology	3
PM 529	Environmental Health	3
PM 530	Biological Basis of Disease	4
PM 533	Genetic and Molecular Epidemiology	3
PM 590	Directed Research	1-12
PM 611	Advanced Topics in Epidemiology	3
THESIS (4 UNITS)		UNITS
PM 594ab	Thesis	2-2

Electives will be determined by the student's needs and interests and will be approved by the student's adviser. When appropriate, courses not listed above may be chosen with approval of the student's adviser. Sufficient familiarity in computer languages to operate major software packages for data management and analysis is required.

Thesis Requirement

A master's thesis is required of all students. This thesis consists of a research project approved by the faculty and chosen from problems encountered within the department, in other departments of the Keck School of Medicine or university or elsewhere in the community.

Master of Science in Biostatistics

Course Requirements

General requirements include at least 36 units of required courses as follows: 25 units of core courses and at least 7 units of elective courses. Each student must also register for four units of 594ab Thesis and write a master's thesis.

CORE COURSES (25 UNITS)		UNITS
PM 510L	Principles of Biostatistics	4
PM 511abL	Data Analysis	4-4
PM 512	Principles of Epidemiology	4
PM 513	Experimental Designs	3
PM 518a	Statistical Methods for Epidemiological Studies	3
PM 522a	Introduction to the Theory of Statistics	3
ELECTIVES (AT LEAST 7 UNITS)		UNITS
PM 516ab	Statistical Problem Solving	1-1
PM 518b	Statistical Methods for Epidemiological Studies	3
PM 520	Advanced Statistical Computing	3
PM 522b	Introduction to the Theory of Statistics	3
PM 523	Design of Clinical Studies	3
PM 534	Statistical Genetics	3
PM 544L	Multivariate Analysis	3
PM 552	Survival Methods in Clinical Trials	3
PM 590	Directed Research	1-12
PM 603	Structural Equation Modeling	4
PM 604	Health Behavior Research Methods	4
	(or MATH 506, MATH 542, MATH 543, MATH 545L, MATH 547, MATH 548, MATH 549, MATH 550)	
THESIS (4 UNITS)		UNITS
PM 594ab	Thesis	2-2

The student's choice of elective courses will be directed by needs and interests and must be approved by the student's graduate adviser. When appropriate, elective courses not listed above may be substituted with approval of the adviser. Sufficient familiarity in computer languages to operate major software packages for data management and analysis is required.

Thesis Requirement

A master's thesis is required of all students. This thesis consists of a research project approved by the faculty and chosen from problems encountered within the department, in other departments of the Keck School of Medicine or university or elsewhere in the community.

Master of Science in Molecular Epidemiology

Course Requirements

The M.S. program requires 37 graduate-level units with a minimum grade point average of 3.0 including epidemiology core courses, 14 units; molecular biology core courses, 12 units; at least 3 elective units; laboratory research plus thesis, 8 units. Students must also complete a master's thesis.

Prerequisite: PM 510 Principles of Biostatistics

EPIDEMIOLOGY CORE COURSES (14 UNITS)		UNITS
PM 511aL	Data Analysis	4
PM 512	Principles of Epidemiology	4
PM 518a	Statistical Methods for Epidemiological Studies	3
PM 533	Genetic and Molecular Epidemiology	3
MOLECULAR BIOLOGY CORE COURSES (12 UNITS)		UNITS
BIOC 543	Human Molecular Genetics	4
INTD 504	Molecular Biology of Cancer, or	
INTD 555	Biochemical and Molecular Basis of Disease	4
INTD 571	Biochemistry	4
ELECTIVES (AT LEAST 3 UNITS)		UNITS
INTD 561	Molecular Biology	4
PM 517a	Research Methods in Epidemiology	3
PM 523	Design of Clinical Studies	3
LABORATORY RESEARCH + THESIS (8 UNITS)		UNITS
DPT 590abcd	Directed Research	1-1-1-1
DPT 594ab	Thesis	2-2

(1) DPT refers to the department offering the laboratory/directed research experience and thesis supervision. DPT is one of the following departments (but not restricted to): PM, BIOC, PATH.

(2) Laboratories should expose students to: statistical and epidemiological methods, molecular techniques, human genetics, population-based studies.

Master of Public Health

Course Requirements

The master's degree program in public health (MPH) requires a minimum of 47 semester units of required and elective graduate study. The MPH is also available online.

CORE REQUIREMENTS		UNITS
PM 501	Foundations in Health Education and Promotion	4
PM 508	Health Service Delivery in the U.S., or	
PM 509	Comparative Health Care Systems	4
PM 510L	Principles of Biostatistics	4
PM 512	Principles of Epidemiology	4
PM 529	Environmental Health: An Epidemiological Approach	4
PM 564	Public Health Leadership and Management	3

In addition, at least another 20 to 24 units including the practicum and capstone, must be completed in their selected track of study.

Track 1: Health Education and Health Promotion

REQUIRED COURSES (12 UNITS)		UNITS
PM 526*	Communications in Public Health, or	
PM 562*	Intervention Approaches for Health Promotion and Disease Prevention	4
PM 528	Program Design and Evaluation	4
PM 563	Organizing and Mobilizing Communities for Public Health	4

At least 4 units from the following**: PM 505, PM 514, PM 525, PM 526*, PM 530, PM 536, PM 542, PM 562*, PM 564, PM 587 (4 unit courses)

At least 4 units from any 500- or 600-level course**

2 units of a practicum (PM 596) and 2 units of the capstone (PM 597), ending in a final report.

**May not receive credit for both track core and track elective category.*

***Distance learning track elective and elective options are limited. Students should consult their adviser for guidance about available options.*

Track 2: Biostatistics/Epidemiology

REQUIRED COURSES (AT LEAST 12 UNITS)		UNITS
PM 511aL	Data Analysis (SAS)	4
PM 511bL	Data Analysis (STATA)	4

Select one course from the following:

PM 527*	Epidemiology of Infectious Disease	4
PM 536*	Program Evaluation and Research	4
PM 537*	Chronic Disease Epidemiology	4

At least 4 units from the following**: PM 514, PM 517ab, PM 518ab, PM 527*, PM 530, PM 532, PM 536*, PM 537*, PM 542, PM 546, PM 558, PM 587 (4 unit courses); PM 515, PM 523, PM 538, PM 586 (3 unit courses)

At least 4 units from any 500- or 600-level course**

2 units of a practicum (PM 596) and 2 units of the capstone (PM 597), ending in a final report.

**May not receive credit for both track core and track elective category.*

***Distance learning track elective and elective options are limited. Students should consult their adviser for guidance about available options.*

The elective courses will be directed by the student's needs and interests and must be approved by the student's graduate adviser. Sufficient familiarity in computer languages to operate major software packages for data management and analysis is required.

Track 3: Health Communication

REQUIRED COURSES (8 UNITS)		UNITS
PM 526	Communications in Public Health	4
PM 536	Program Evaluation and Research	4

At least 8 units from: CMGT 510, CMGT 511, CMGT 528, CMGT 583, CMGT 587 (4 unit courses); PM 530, PM 542, PM 562, PM 587 (4 unit courses); JOUR 508, JOUR 536 (3 unit courses)

At least 4 units from any 500- or 600-level course

2 units of a practicum (PM 596) and 2 units of the capstone (PM 597), ending in a final report.

Track 4: Child and Family Health

REQUIRED COURSES (12 UNITS)		UNITS
PM 528	Program Design and Evaluation	4
PM 580	Foundations of Child Health	4
PM 585	Child Health Policy	4

At least 4 units from: PM 530, PM 540, PM 581, PM 582, PM 583, PM 584, PM 585, PM 587 (4 unit courses)

At least 4 units from any 500- or 600-level course

2 units of a practicum (PM 596) and 2 units of the capstone (PM 597), ending in a final report.

Track 5: Global Health Leadership

REQUIRED COURSES (12 UNITS)		UNITS
PM 525	Culture and Health: Global Perspectives	4
PM 565	Introduction to Global Health	4
PM 576	Global Health Research and Programs	4

At least 4 units from the following^{**}: PM 530, PM 557, PM 563, PM 567, PM 568, PM 577, PM 578, PM 587 (4 unit courses)

At least 4 units from any 500- or 600-level course^{**}

2 units of a practicum (PM 596) and 2 units of the capstone (PM 597), ending in a final report.

***Distance learning track elective and elective options are limited. Students should consult their adviser for guidance about available options.*

Track 6: Public Health Policy

REQUIRED COURSES (12 UNITS)		UNITS
PM 547	Public Health Policy and Politics	4
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 560	Methods for Policy Analysis	4

At least 4 units from: PM 514, PM 528, PM 530, PM 536, PM 542, PM 548, PM 555, PM 577, PM 578, PM 585, PPD 513, PPD 514, PPD 542, or PPD 560

At least 4 units from any 500- or 600-level course

2 units of a practicum (PM 596) and 2 units of the capstone (PM 597), ending in a final report

Track 7: Environmental Health

REQUIRED COURSES (12 UNITS)		UNITS
PM 553	Human Exposure Assessment for Public Health	4
PM 554	Biological Effects of Environmental Toxins	4
PM 555	Environmental Health, Policy and Practice	4

At least 4 units from: PM 530, PM 556, PM 557, PM 558

At least 4 units from any 500- or 600-level course

2 units of a practicum (PM 596) and 2 units of the capstone (PM 597), ending in a final report.

Track 8: GeoHealth (Online Option Only)

REQUIRED COURSES (8 UNITS)

		UNITS
SSCI 581	Concepts for Spatial Thinking	4
SSCI 583	Spatial Analysis	4

At least 8 units from: SSCI 584, SSCI 588, SSCI 589

At least 4 units from any 500- or 600- level course

And, 2 units of a practicum (PM 596) and 2 units of Capstone (PM 597), ending in a final report

The elective courses will be directed by the student's needs and interests and must be approved by the student's graduate adviser.

Practicum Requirement

A practicum (PM 596) is required of all students. The practicum is provided by an internship rotation through an area of public health practice in a county, state, federal or community-based agency. The practicum offers students the opportunity to observe as well as participate in applying their newly acquired skills and tools. All students are expected to participate in at least one internship and attend a corresponding seminar. An electronic portfolio describing the project and evaluating the outcomes completes the course requirement.

Capstone Requirement

Completion of the capstone course (PM 597) is required of all MPH students during their last semester prior to graduation and is the culminating experience for the master's program. The course draws on students' prior training in the five core areas of public health; their additional required course work in their selected track of study; and their "real world" experience gained in the field prior to their graduation. The capstone class is closely linked to the MPH practicum and is designed to challenge students to reflect and integrate their training and experience with the goal of developing their own individual point of view regarding the role of public health in contributing to the improvement of the health and well-being of populations in the United States, as well as abroad.

Criteria

Students enrolled in one of the MPH professional dual degree programs (e.g., M.D./MPH, Pharm.D./MPH, DPT/MPH, and Ph.D. (Clinical Psychology)/MPH, MPI/MPH) may waive 4 units of the elective requirement and thus are required a minimum of 43 units to graduate. All other students must complete a minimum of 47 units to graduate.

Keck School of Medicine

Department-Specific Programs

Department of Preventive Medicine

Doctor of Philosophy in Psychology (Clinical)/Master of Public Health (Health Promotion)

The Ph.D./MPH dual degree combines knowledge of clinical psychology research and practice with an

understanding of health from a population perspective. The student enrolls primarily in the clinical psychology doctoral program and may apply to the MPH program during the first year. During the second and subsequent years, course work is taken in both programs. The dissertation is undertaken through the Department of Psychology.

Pharm.D./Master of Public Health

The School of Pharmacy and the Master of Public Health program, in recognition of the rapidly changing health care environment and in response to the growing demand for pharmacists who are knowledgeable in both pharmacy and population-based health care issues, have developed a dual degree program. The joint Pharm.D./MPH degree will enable graduates to be more responsive to today's health care needs and will provide training for pharmacists who seek to be agents of change within the profession and to assume leadership roles in the pharmacy field and in public health at the local, state and national levels.

The Pharm.D./MPH program spans five years (four years of pharmacy school courses and one year of public health courses). Students begin the core MPH courses following the successful completion of the first year of pharmacy school. The last three years of the program are devoted to the clinical rotations of the School of Pharmacy and to the completion of the elective courses and practicum (field experience) of the MPH program.

All students in the Pharm.D./MPH program must meet course requirements, grade point average requirements and program residency requirements of both programs. Students must have a cumulative GPA of 3.0 in the Pharm.D. curriculum and a 3.0 in the MPH curriculum to meet graduation requirements.

The Pharm.D. and the MPH degrees are awarded simultaneously upon completion of the School of Pharmacy and the Master of Public Health requirements.

Application and Admissions Requirements

Students may apply to the dual Pharm.D./MPH degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both programs. Students who elect this approach must identify themselves on both applications as potential dual degree students. Students admitted to both programs will be offered admission to the Pharm.D. and will be offered admission to the dual degree program contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 G.P.A. Students who are accepted only by one program may choose to attend that program but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the MPH program during their first year of enrollment in the Pharm.D. prior to the MPH published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students admitted to the MPH program using this approach will be offered admission to the dual degree contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 G.P.A. Students accepted to the dual degree program must maintain a minimum 3.0 G.P.A. in Public Health and Pharm.D. courses.

Master of Planning/Master of Public Health

The Master of Planning/Master of Public Health (MPI/MPH) dual degree is designed for individuals who envision a career that combines urban planning and public health disciplines. This dual degree combines the knowledge of urban planning with an understanding of health from a population perspective. It will provide training for planning, evaluating and guiding healthy community and urban development, and will enable graduates who seek to be agents of change within the profession to assume leadership roles in planning and in public health at the local, state and national levels. A total of 79 units are required for the dual degree. For further information about dual degree requirements, see the USC Price School of Public Policy.

Master of Social Work/Master of Public Health

The Master of Social Work/Master of Public Health (MSW/MPH) dual degree offers the student interdisciplinary preparation in the fields of public health and social work leading to the Master of Social Work (MSW) and Master of Public Health (MPH) degrees.

The dual degree program is a collaborative effort between the USC School of Social Work and the Department of Preventive Medicine in the Keck School of Medicine. The objectives of the program are to provide students with the knowledge and skills necessary to promote health, prevent disease, and enhance the delivery of health and

social services in the community. Students will build interdisciplinary skills and an interdisciplinary professional identity by developing an understanding of the breadth of each field and their interface, while permitting concentration in particular specialization areas. The program prepares graduates for work in a variety of interdisciplinary settings; and for some, it will provide the basis for doctoral study.

Students must complete a minimum of 81 units: 45 units in social work and 36 units in preventive medicine; 16 of these units fulfill requirements for both degrees. Depending on specific social work concentration and public health track requirements, there may be additional courses and an increase in the total number of units. Most students complete both program requirements over three years for full-time students; however, the program can be completed in two years if the student takes a full course load during the two summer sessions. Dual degree students in this program complete the standard foundation year courses during the first year in the School of Social Work with the exception of SOWK 562 Social Work Research. Students may select only the health concentration in social work and either of two public health tracks: health education and promotion; or child and family health.

M.D./Master of Public Health

The joint M.D./MPH program at the Keck School of Medicine is designed for individuals who envision a medical career that combines public health and medical disciplines. For further information about the joint program, refer to the program page.

Keck School of Medicine

Department-Specific Programs

Department of Preventive Medicine

Doctor of Philosophy in Biostatistics

The department offers a degree program leading to the Ph.D. in biostatistics. The program is designed to produce biostatisticians who will have in-depth knowledge of statistical theory and methodology and the ability to apply this knowledge creatively to statistical problems in the biological and health sciences. All students will enroll in a set of core courses that cover both biostatistical theory and applications. Students will then choose from one of four tracks that will allow them to develop expertise in a specific area. The available tracks are: (1) biostatistics theory; (2) statistical genetics; (3) environmental statistics; (4) clinical trials.

Course Requirements

A minimum of 60 units of graduate study is required for the Ph.D. degree; a maximum of 19 of these units may be from research and dissertation. In preparation for the qualifying examination, students are required to take all remaining core and track-specific courses.

Screening Procedure

In preparation for the screening examination, all students must take four core courses: PM 511ab and PM 522ab. A student failing the screening examination will either terminate or will terminate with the M.S. degree upon completion of an acceptable thesis.

Qualifying Exam Committee

A formal qualifying exam committee will consist of at least five faculty members. The committee chair and at least two additional members must be affiliated with the student's program. At least three members of the committee must be tenured or tenure track.

Qualifying Examination

The written portion of the qualifying examination will comprise testing on track-specific course content and focus on the student's dissertation topic. An oral examination will ascertain the student's competence in orally

communicating this knowledge. Students must pass the written portions and the oral portions in order to pass the qualifying examination.

Annual Research Appraisal (ARA)

Beginning in the second year, each student must register for PM 610 (1 unit) and present an annual progress report to the program oversight committee. Once a dissertation topic has been selected, the annual progress report is presented to the student's qualifying exam committee. Once the student has passed the qualifying examination and is appointed to candidacy, the annual progress report is presented to the student's dissertation committee. The student will meet annually with the dissertation committee, until he or she graduates from the program. The oral portion of the screening examination as well as the qualifying examination and the defense examination will count as ARAs.

Dissertation and Oral Defense

Upon passing the qualifying examination the Ph.D. candidate and his or her chair will recommend a three-member dissertation committee. The dissertation should be completed within two years and should be oriented toward a theoretical-methodological application to a problem area in the biological or health sciences. The oral defense is based on a rough draft or final version of the dissertation. The defense is administered by the dissertation committee, with other faculty invited to attend.

PREREQUISITE		UNITS
PM 510L	Principles of Biostatistics	4

REQUIRED COURSES FOR ALL TRACKS (SCREENING EXAM COURSES)		UNITS
PM 511ab	Data Analysis	4-4
PM 522ab	Introduction to the Theory of Statistics	3-3

RECOMMENDED COURSES: ALL TRACKS		UNITS
PM 511c	Data Analysis	4
PM 520	Advanced Statistical Computing	3
PM 610	Seminar in Biostatistics and Epidemiology	1

RECOMMENDED COURSES: BIOSTATISTICS THEORY TRACK		UNITS
PM 513	Experimental Designs	3
PM 518ab	Statistical Methods for Epidemiological Studies I, II	3-3

RECOMMENDED COURSES: STATISTICAL GENETICS TRACK		UNITS
PM 534	Statistical Genetics	4
PM 570	Introduction to Statistical Genetics	4

RECOMMENDED COURSES: ENVIRONMENTAL STATISTICS TRACK		UNITS
PM 518ab	Statistical Methods for Epidemiological Studies I, II	3-3
PM 558	Environmental Epidemiology: Concepts, Methods and Practice	4
PM 575	Statistical Methods in Environmental Epidemiology	3

RECOMMENDED COURSES: CLINICAL TRIALS TRACK		UNITS
PM 513	Experimental Designs	3
PM 518a	Statistical Methods for Epidemiological Studies I	3
PM 523	Design of Clinical Studies	3
PM 552	Statistical Methods in Clinical Trials	3

Elective Courses

BIOC 543, BISC 478, BISC 502ab, BISC 505, BISC 577ab, CSCI 570, CSCI 653, INTD 561, INTD 572, INTD 573, MATH 505ab, MATH 507ab, MATH 509, MATH 520, MATH 541ab, MATH 542L, MATH 543L, MATH 545L, MATH 547, MATH 548, MATH 550, MATH 578ab, PM 511c, PM 513, PM 516ab, PM 517ab, PM 518ab, PM 520L, PM 523, PM 533, PM 538, PM 544L, PM 552, PM 558, PM 565, PM 575, PM 579, PM 599, PM 603, SSCI 581, SSCI 582, SSCI 583, SSCI 585, SSCI 586, SSCI 587, SSCI 589

Doctor of Philosophy in Epidemiology

The department offers a degree leading to the Ph.D. in epidemiology. This program may be an extension of the applied biostatistics and epidemiology M.S. program and is especially aimed at persons with a strong background in medicine: in particular, students enrolled in the M.D. program of the Keck School of Medicine who wish to interrupt their M.D. studies after two years to complete a Ph.D. degree. This program is designed to produce an epidemiologist with in-depth statistical skills. The program requires a solid core of courses in methodological aspects of statistics and in statistical thinking as applied to medicine, as well as a solid grounding in epidemiological methods and in certain medical disciplines.

Course Requirements

A minimum of 60 course units with a maximum of 20 units of research and dissertation; passing of screening and qualifying examinations; and completion of dissertation and final oral are required. In preparation for the screening examination the student must take the required core course and elective 33 units of master's level applied biostatistics and epidemiology courses. A student failing the screening examination will either terminate or terminate with the M.S. degree upon satisfactory completion of a master's thesis. In preparation for the qualifying examination, the student is required to join an on-going research project under the direction of the chair of the qualifying exam committee and directly participate in the conduct of that project. Credit will be given as PM 790 (4 units, two semesters). In addition, it is recommended that the student take PM 610 (at least two semesters). Electives may be selected with the approval of the chair of the qualifying exam committee from courses in the biological sciences or from the medical school. For students in the M.D./Ph.D. program in epidemiology, satisfactory completion of the first two years of the M.D. program will be considered to provide 20 units toward the Ph.D. degree.

Qualifying Exam Committee

A formal qualifying exam committee will consist of at least five faculty members. The committee chair and at least two additional members must be affiliated with student's program. At least three members of the committee must be tenured or tenure track.

Qualifying Examination

The written portion of the qualifying examination will test the student's integration of knowledge in biostatistics and medicine. In general, the qualifying examination will present plans for implementation and completion of three components: an independent and complete data analysis arising from ongoing epidemiological study, a "review" paper on an area of epidemiological research, and a grant application for a new epidemiological study.

Dissertation

Upon passing the qualifying examination, the Ph.D. candidate and his or her chair will recommend a three-member dissertation committee. The dissertation should be completed within two years and should be oriented toward a methodological application to a problem area in the biological or health sciences.

The Oral Defense

This examination is based on a draft or final version of the dissertation and will be administered by the dissertation committee with other faculty invited to attend.

Language and Other Requirements

Proficiency in the English language is essential.

Course Requirements

Students must complete a minimum of 60 units, with a maximum of 20 units of research and dissertation; pass screening and qualifying examinations; complete the dissertation and the dissertation defense examination. In addition the student is required to join a research project under the direction of one or both of the chairs of the

qualifying exam committee and directly participate in the conduct of that project. Credit will be given by the department (DPT) conducting the research project DPT 790 Research (4 units, 2 semesters). In addition, at least two semesters of PM 610 is recommended.

Prerequisites: PM 510 Principles of Biostatistics or the equivalent. INTD 571 Biochemistry or the equivalent.

Biochemistry and Molecular Biology Core Courses (16 units): BIOC 543, INTD 531, INTD 561, INTD 504 or INTD 555.

Preventive Medicine Core Courses (17 units): PM 522aL, PM 512, PM 517a, PM 518a, PM 533.

Suggested Electives (at least 7 units) from: MICB 551, PM 511bL, PM 517b, PM 523, PM 527, PM 529 and PM 534.

Preparation for Screening Examination

The screening examination will be taken after two years in the program. Prior to the screening examination a mentor who will serve on the qualifying exam committee must be identified. The screening examination will consist of a written component and an oral component. The written component will be drawn from the core courses. A student failing the screening examination may be given a second opportunity to retake either one or both portions. Students failing the examination for the second time will terminate with the M.S. degree upon satisfactory completion of 37 units and an acceptable master's thesis.

Annual Research Appraisal (ARA)

Beginning in the second year, each student must register for PM 610 (1 unit) and present an annual progress report to the program oversight committee. Once a dissertation topic has been selected, the annual progress report is presented to the student's qualifying exam committee. Once the student has passed the qualifying examination and is appointed to candidacy, the annual progress report is presented to the student's dissertation committee. The student will meet annually with the dissertation committee, until he or she graduates from the program. The oral portion of the screening examination as well as the qualifying examination and the defense examination will count as ARAs.

Doctor of Philosophy in Preventive Medicine (Health Behavior Research)

The Department of Preventive Medicine, Division of Health Behavior Research, offers a degree program in preventive medicine (health behavior), leading to attainment of the Ph.D. The program is designed to train exceptional researchers and scholars in the multidisciplinary field of health behavior research. Students receive a thorough grounding in academic and research experience, encompassing theoretical and methodological training in such allied fields as communication, psychology, preventive medicine, biostatistics, public health and epidemiology. Students receive research experience by participating in projects conducted through the USC Institute for Health Promotion and Disease Prevention Research (IPR). The doctoral program is full-time: students are expected to enroll for fall, spring and summer semesters.

Assistantships

Financial and educational support is provided to qualified doctoral students in health behavior research. Graduate (research and/or teaching) assistantships are half-time (20 hours per week) and provide tuition remission as well as a monthly stipend.

Computer Language Requirement

Sufficient familiarity in computer languages to operate major software packages for data management and analysis is required.

Course Requirements

The doctoral program in health behavior research is structured as a four to five year course of study for students entering with a bachelor's degree. Time requirements are subject to review and approval by the division's Graduate Program Committee and the Graduate School.

A total of 60 units of graduate study is required for the Ph.D. in health behavior research. Students are required to complete nine core courses: PM 500, PM 511abL, PM 515, PM 530, PM 601, PM 602, PM 604 and PM 756

(total of 37 units). Other requirements include: two elective PM courses, one not offered by health behavior faculty (minimum of 7 units); and a minimum of 4 units each in PM 590, PM 690abcdz, PM 790 and PM 794abcdz.

For students entering with a bachelor's degree, one of the directed research projects will be equivalent in scope to a master's thesis. All research experiences/projects must be completed before registering for 794abcdz Doctoral Dissertation.

Screening Procedure

The progress of each student is reviewed at the end of every academic year. At the end of the second year of study, students who have not made satisfactory progress are advised that they will be dropped from the program unless their progress improves during their second year.

Qualifying Exam Committee

Each student's qualifying exam committee consists of five members, including: no more than three health behavior faculty members; one other member from the Department of Preventive Medicine; and one member from a doctorate-granting program outside the Department of Preventive Medicine, representing the student's minor field.

Qualifying Examination

Following course work and prior to beginning the dissertation, students must demonstrate written and oral mastery of the general field of health behavior research as well as of their chosen area of specialization. The qualifying process includes a written examination on theory and literature relevant to a selected content area. The examination is administered by the student's qualifying exam committee.

In addition to the qualifying examination, each student is expected to produce the following as evidence of qualification to conduct dissertation research: an academic dossier consisting of a summary of the student's academic record, teaching and research experience, and professional presentations and publications; at least one original empirical research paper of publishable quality, produced in connection with one of the student's courses or research experiences or developed independently; a dissertation proposal; and an oral defense of all the preceding materials.

Keck School of Medicine

Department-Specific Programs

Department of Preventive Medicine

Courses of Instruction

HEALTH PROMOTION AND DISEASE PREVENTION STUDIES (HP)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

HP 101 Current Issues in Medical Education and Healthcare (2, Sp) Current critical issues in healthcare delivery; strategies to succeed in medical school and as physicians.

HP 200 Introduction to Health Promotion and Disease Prevention (4, Fa) Introduction to strategies for promoting health and wellness. Includes self monitoring of health risk behavior, goal setting, and behavior changes.

HP 230 Nutrition and Health (4, FaSp) Nutrition as it relates to health promotion across the lifespan and

disease prevention. Discussion of nutrients, factors affecting food choices, food safety and global nutrition issues.

HP 270 Introduction to Global Health (4, Fa) Introduction to concepts of global health and disease control. Issues of globalization, global governance, emerging diseases, infectious disease treatment, and outbreak challenges.

HP 290 Introduction to Research Apprenticeship (2, max 8, FaSp) Individual research apprenticeship in health related fields under supervision of a departmental faculty member. Graded CR/NC.

HP 300 Theoretical Principles of Health Behavior (4, FaSp) Overview and analysis of predictors and consequences of health-related behaviors; theoretical viewpoints and strategies for behavior change.
Recommended preparation: HP 200; *prerequisite:* PSYC 100.

HP 320 Biological and Behavioral Basis of Disease (4, FaSp) Examination of the major systems of the human body; disease processes and behavioral risk factors. *Prerequisite:* BISC 220L or BISC 221L.

HP 340L Health Behavior Statistical Methods (4, FaSp) Intermediate statistics for health behavior studies; topics include descriptive statistics, hypothesis testing, correlation and regression, and use of computer software in data analysis.

HP 345 Health Issues in Entertainment Media (4, FaSpSm) Study of major chronic illnesses and their risk factors as a foundation for discussions about the portrayal of health and illness in entertainment media. (Duplicates credit in the former CNTV 345.)

HP 350L Health Behavior Research Methods (4, FaSp) Introduction to the design, conduct and evaluation of health behavior research studies; quantitative and qualitative approaches to research and analysis.
Recommended preparation: HP 340L.

HP 370 Introduction to Epidemiology: Methods and Applications (4) Examines the primary goals and methods of epidemiology, the study of factors that influence health and disease in individuals and populations.

HP 400m Culture, Lifestyle, and Health (4, Sp) Comparison of national and international differences in health status as influenced by cultural practices and lifestyles within geographic, economic and political environments.

HP 401 Cultural Competence in Medicine (4, Fa) Systematic development of specific professional skills for providing effective, culturally sensitive health services to diverse populations. *Recommended preparation:* ANTH 101.

HP 402 Maternal and Child Health (4, Sp) Health issues of women of childbearing age from pre-pregnancy through the postpartum period, and of children from their development in utero through early adolescence.
Recommended preparation: PSYC 100.

HP 403 Behavioral Medicine (4, Sp) Examines behavioral risk factors for illness, health-enhancing and health-compromising behaviors, stress/coping in promoting health and preventing illness, and behavioral management of chronic illness. *Prerequisite:* PSYC 100.

HP 404 Religion and Health (4, Fa) Differential relationships of religiosity and spirituality with health and risk behaviors, physical and mental health outcomes, coping skills and well-being across cultures and religions.

HP 405 Sexually Transmitted Diseases: A Global Public Health Priority (4) An overview of the magnitude and impact of STDs including prevention, diagnosis, and treatment of common STDs, STD/HIV inter-relationship, global burden, trends, public health challenges, and STD/HIV prevention and control strategies and programs worldwide.

HP 408 Environmental Health in the Community (4) Survey of occupational and environmental health. Introduction to epidemiology, exposure assessment, toxicology, policy development, risk assessment, and effects of urban development on health.

HP 410 Issues in Prevention and Cessation of Drug Abuse (4, Sp) Examination of factors related to drug abuse behaviors; overview and assessment of drug abuse prevention and cessation programs; relapse prevention programs. *Recommended preparation:* HP 300.

HP 411 Drug Intervention Program Design and Evaluation (4, Sp) Strategies for drug abuse prevention and intervention; introduction to techniques and research methods used in designing, conducting, and evaluating drug abuse prevention programs. *Recommended preparation:* HP 410.

HP 412 Health Promotion and Prevention Policy (4, Sp) Overview of health promotion and drug prevention policy at local, state, and federal levels; methods for evaluating policy effectiveness and cost effectiveness.

HP 420m Gender and Minority Health Issues (4, Fa) Examines the nature and roots of health disparities among women, men, and different ethnic and age groups; methods for reducing such disparities; strategies for prevention services.

HP 421 Violence as a Public Health Issue (4, Fa) Patterns and prevalence of violence; psychosocial, environmental, and biological influences on violent behavior; youth gangs; drugs and violence; family violence; and prevention and intervention strategies.

HP 422 AIDS in Society (4, Sp) Provides a broad examination of issues in HIV/AIDS, including behavioral, social, biological, clinical and ethical dimensions of the pandemic in the U.S. and elsewhere.

HP 430 Obesity and Health (4, Fa) Examination of causes and consequences of obesity, with emphasis on health risks of type II diabetes and cardiovascular disease. *Recommended preparation:* HP 230.

HP 431 Behavior and Education Strategies for Nutrition and Fitness (4, Sp) Examination of dietary intake and exercise behaviors as they relate to health and illness; methods for measuring diet and exercise. *Recommended preparation:* HP 430.

HP 432 Clinical Nutrition (4, Irregular) Metabolism of carbohydrates, fats and protein; introduction to vitamins, minerals and dietary modifications in various pathological conditions. *Prerequisite:* CHEM 105a; *recommended preparation:* HP 230.

HP 433 Advanced Topics in Nutrition (4, Sp) In-depth discussion of vitamins and minerals and their role in human nutrition; introduction to the role of vitamins and minerals in selected pathological conditions. *Prerequisite:* HP 432.

HP 434 Physical Activity and Health (4, FaSpSm) Examination of the health impacts of physical inactivity; participation rates across subgroups; physical activity determinants; and interventions, programs, and policies to promote physical activity. *Recommended preparation:* HP 200.

HP 440 Happiness, Well-Being, and Health (4, Sp) Explores human strengths that promote happiness/well-being and whether they influence physical health; mind-body relationships; and strategies for promoting hope, resilience, and quality of life. *Recommended preparation:* HP 200, PSYC 100.

HP 441 Health Promotion in the Workplace (4, Fa) Covers phases of worksite health promotion; research, design, implementation and evaluation; concerns regarding escalating medical costs and the role of health promotion in offering solutions.

HP 442 Chronic Disease Epidemiology (4, Sp) Overview of causative factors and demographic distributions of the major chronic diseases in the western world; epidemiologic concepts and research designs. *Recommended preparation:* HP 320.

HP 443 Communicating Health Messages and Medical Issues (4) (Enroll in COMM 443)

HP 446 Poisons, People, and Politics (4, Fa) Case studies of toxic exposures and investigation of the role of government, scientists, labor and industry in protecting against health threats caused by toxic exposures.

HP 448 Global Environmental Changes and Health (4, FaSpSm) Discussion of global environmental changes, including climate change, air pollution, water pollution, radiation, and their impacts on human health.

HP 450 Traditional Eastern Medicine and Modern Health (4, Fa) Overview of traditional Eastern approaches toward health and disease; relevance to modern health issues, emphasizing a comparison between traditional Chinese and modern Western medicine. *Recommended preparation:* fundamentals of medicine.

HP 460 Adolescent Health (4, Fa) Survey of the development of healthy and the prevention of health-risk behaviors during adolescence. Prevention and promotion techniques will be explored emphasizing cultural differences.

HP 465 Health Status of Indigenous Peoples of America (4, FaSpSm) Survey of indigenous people's health, including health conditions, special cultural and ethical considerations, the Indian health system, and the politics of indigenous health.

HP 470 Case Studies in Global Health (4, Sp) Case study examination of programs and organizational structure underlying current international efforts addressing problems related to infection disease, chronic disease, global environmental change, emergencies and emerging disease epidemics. *Prerequisite:* HP 270.

HP 480 Internship in Health Promotion and Disease Prevention (2-4, max 4, FaSpSm) Field placement in a community agency such as a county health services agency, a not for profit voluntary agency or a health care setting. Open to majors only. Graded CR/NC. *Prerequisite:* completion or concurrent registration in required core courses.

HP 483 Global Health and Aging (4, Fa) (Enroll in GERO 483)

HP 485 Global Health: Obesity and Nutrition (4, FaSpSm) Overview of the epidemiology of obesity and related diseases and the etiology of obesity, including genetic, biological, behavioral, environmental and socio-cultural correlations.

HP 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit. Open to HP majors only. *Corequisite:* HP 340L; *recommended preparation:* HP 350L.

HP 499 Special Topics (2-4, max 8) Lecture and discussion focused on specific topics within health promotion and disease prevention. Course topic will vary from semester to semester.

PREVENTIVE MEDICINE (PM)

PM 500 Foundations of Health Behavior (4, Fa) Overview of behavioral theory and research in disease prevention and health promotion and in adaptation of chronic disease, including an introduction to measures of outcomes. *Prerequisite:* admission to Ph.D. in Preventive Medicine.

PM 501 Foundations in Health Education and Promotion (4, FaSpSm) Overview and application of behavioral theories to the field of health education and promotion. Examines the determinants of health behavior and strategies for change at the individual, group and community level.

PM 505 Training and Curriculum Design in Public Health (4, Sm) Curriculum writing and training skills applied to public health needs and settings. Covers adult learning theories, assessment of learning needs, curriculum design, training design, conduct and evaluation. *Recommended preparation:* PM 500.

PM 508 Health Service Delivery in the U.S. (4, FaSpSm) Historical development of the American health care system; determinants of health care utilization; role of health care providers; health policy; public health services; and health care finance.

PM 509 Comparative Health Care Systems (4, Sp) Macro-level analysis of the structure and delivery of health care services around the world, including an examination and comparison of health system performance.

PM 510L Principles of Biostatistics (4, FaSp) Concepts of biostatistics; appropriate uses and common misuses of health statistics; practice in the application of statistical procedures; introduction to statistical

software including EXCEL, SPSS, nQuery. Laboratory.

PM 511abcL Data Analysis (4-4-4, a: FaSp, b: Sp, c: FaSpSm) *a*: Major parametric and nonparametric statistical tools used in biomedical research, computer packages including SAS. Includes laboratory. Lecture, 3 hours; laboratory, 1 hour. *Prerequisite*: PM 510L. *b*: Exploratory data analysis, detection of outliers, robust methods, fitting data with linear and nonlinear regression models, computer packages including BMDP. Includes laboratory. Lecture, 3 hours; laboratory, 1 hour. *c*: Methods and applications for modeling longitudinal, time-to-event and multi-level data. Includes laboratory using R package. Lecture, 2 hours; laboratory, 2 hours.

PM 512 Principles of Epidemiology (4, FaSp) Terminology/uses of epidemiology and demography; sources/uses of population data; types of epidemiologic studies; risk assessment; common sources of bias in population studies; principles of screening. *Recommended preparation*: algebra.

PM 513 Experimental Designs (3, Sp) Statistical methods for analysis of various experimental designs. Parametric analysis of variance (ANOVA), repeated measures methods, crossover designs, non-parametric ANOVA. *Prerequisite*: PM 510L.

PM 514 Detection and Control of Sexually Transmitted Infections (4, Sm) Overview of issues concerning the design and implementation of STI prevention and control programs. Epidemiology, diagnosis, treatment and partner management strategies for common STIs in the U.S. *Recommended preparation*: PM 501, PM 512.

PM 515 Behavioral Epidemiology (3, 2 years, Sp) Basic understanding of behavioral risk factors in chronic disease and premature mortality; epidemiological methods for studying behavioral risk factors. *Recommended preparation*: PM 511ab, PM 512.

PM 516ab Statistical Problem Solving (1-1, FaSpSm) An overview of the tools used by statisticians for solving statistical problems. *Prerequisite*: PM 510L.

PM 517ab Research Methods in Epidemiology (a: 3, Fa, b: 3, Sp) *a*: Study design, ascertainment of study objects, questionnaire development, various methodological issues in data analysis and interpretation including bias, measurement error, confounding and effect modification. *Prerequisite*: PM 511aL, PM 518a. *b*: Overview of epidemiologic research in cancer. Selected cancer sites will be covered to highlight study design and conduct, exposure assessment, data analysis and interpretation. *Prerequisite*: PM 517a.

PM 518ab Statistical Methods for Epidemiological Studies I, II (3-3, Sp) *a*: Principles and methods used in epidemiology for comparing disease frequencies between groups. Restricted to the analysis of binary outcome variables. *Prerequisite*: PM 512. *b*: Statistical methods for binary outcomes by introducing techniques for cross classified risks and rates and regression models for individual data. *Prerequisite*: PM 518a.

PM 519 Introduction to Human Nutrition (4, Sp) Dietary role of carbohydrates, proteins, lipids, vitamins, and minerals in metabolism; nutritional assessment; nutritional deficiencies. Focus on the role of nutrition in the prevention and treatment of chronic disease. (Duplicates credit in former PHNU 527.) *Recommended preparation*: PM 530.

PM 520L Advanced Statistical Computing (3, SpSm) Techniques for the solution of statistical problems through intensive computing; iterative techniques, randomization tests, the bootstrap, Monte Carlo methods.

PM 521ab Seminar in Nutrition (2-2, FaSp) (Duplicates credit in former PHNU 520ab.)

PM 522ab Introduction to the Theory of Statistics (3-3, FaSp) *a*: Density distribution and hazard functions; normal, chi-square, student's t and F distributions; and sampling procedures for single factor and multiple factor designs, distributions. *Recommended preparation*: working knowledge of multivariable calculus and familiarity with linear algebra. *b*: Theory of estimation and testing, inference, analysis of variance, theory of regression. *Recommended preparation*: college-level calculus and linear algebra.

PM 523 Design of Clinical Studies (3, Sp) Design, conduct, and interpretation of results of clinical trials; emphasis on principles affecting structure, size, duration of a trial, and the impact of ethical and practical

considerations. *Prerequisite:* PM 511abL, PM 513.

PM 524abc Practicum in Health Behavior (2-2-2, FaSpSm) Practical experience in a variety of field settings to gain a certain type of skill such as curriculum development, media production, and patient education. *a:* Practicum in prevention; *b:* practicum in compliance; *c:* practicum in health behavior topics. *Recommended preparation:* PM 500.

PM 525 Culture and Health: Global Perspectives (4, FaSpSm) International variations in health status with a focus on the impact of socioeconomic status, politics, environment, education and gender in etiology of illness, access to health care, progression of disease, and recovery.

PM 526 Communications in Public Health (4, Sp) Application of communication theories and methods to community health problems. Includes background assessment, program design, evaluation, social marketing, media advocacy, review of major health campaigns. *Recommended preparation:* PM 500.

PM 527 Epidemiology of Infectious Disease (4, FaSpSm) Survey of natural history of infectious disease, methods of disease control and outbreak investigation, and an overview of the epidemiology of injury. *Prerequisite:* PM 512.

PM 528 Program Design and Evaluation (4, Sp) Core concepts, methods and values of public health program planning and evaluation, including community needs assessment, writing objectives, designing health promotion programs, process and outcome evaluation. *Recommended preparation:* PM 500.

PM 529 Environmental Health: An Epidemiological Approach (4, FaSpSm) An overview of environmental health, identifying issues in assessing effects of exposure on health and potential interventions for reducing adverse health risks. *Prerequisite:* PM 512.

PM 530 Biological Basis of Disease (4, 2 years, Sp) With a physiological overview, differentiates genetic and environmental disease; emphasis on the relationships between lifestyle, behavior, and health. *Prerequisite:* admission to Ph.D. in Preventive Medicine, Health Behavior Research or basic biology.

PM 531 Research Methods in Nutrition (4, Fa) In-depth discussion of nutrition research including nutrition assessment, measurement of dietary intake, study design, statistical issues, critical appraisal, and translation into practice. Open to M.P.H. nutrition track students only. *Prerequisite:* PM 510, PM 512.

PM 532 Genetics in Public Health and Preventive Medicine (4, Sm) History and philosophy of public health genetics and mechanisms of genetic diseases. Epidemiologic methods used to identify genetic diseases in individuals, families, and populations. Emphasis on prevention and relevant ethical issues. *Recommended preparation:* PM 512.

PM 533 Genetic and Molecular Epidemiology (3, 2 year, Fa) Genetic principles; design and analysis of family studies; introduction to likelihood estimation; segregation and linkage analysis; biomarkers of exposure, susceptibility, and disease; laboratory methods; susceptibility genes; association and linkage disequilibrium. *Prerequisite:* PM 510L, PM 511a, PM 512, PM 518a.

PM 534 Statistical Genetics (4, Sp) Familial aggregation, segregation analysis, linkage analysis, association, regressive models, gene-environment interactions, genetic heterogeneity and linkage disequilibrium. *Prerequisite:* PM 518a, PM 522a.

PM 535 Nutrition in Public Health (4, Fa) Principles related to developing effective programs and services to improve the health and nutrition within a community. Attaining and maintaining nutritional health related to biology, lifestyle choices, environments, and health care delivery systems. (Duplicates credit in former PHNU 523.) *Recommended preparation:* PM 530.

PM 536 Program Evaluation and Research (4, Fa) Overview of concepts, tools, data collection, analysis methods and designs used to evaluate health promotion programs. Examples from substance abuse prevention, family planning and reproductive health programs.

PM 537 Chronic Disease Epidemiology (4, FaSpSm) Overview of causative factors and demographic

distribution of major chronic diseases in the western world. Epidemiologic concepts, methods and research design as applied to chronic disease prevention will be emphasized. *Prerequisite:* PM 512.

PM 538 Introduction to Biomedical Informatics (3, Sm) Overview of current topics, enabling technologies, research initiatives, and practical considerations in biomedical informatics.

PM 539 Nutrient-Drug Interactions (2, Sm) Examines the various ways foods, and the nutrients contained in them, interact with medications used to treat chronic health conditions.

PM 540 Maternal and Child Nutrition: Practice and Policy (4) Physiological basis for good nutrition during pregnancy and childhood through adolescence. Design, implementation and evaluation of public health nutrition programs and policies serving women and children. *Recommended preparation:* PM 530.

PM 541 Obesity, Metabolism and Health (4, Fa) Overview of the epidemiology of obesity, related health conditions and mechanisms related to energy balance, food intake and genetics. Discussion of prevention and treatment strategies. *Recommended preparation:* PM 530.

PM 542 Social Network Analysis (4, Sp) Theory, methods and procedures of network analysis with emphasis on applications to public health programs.

PM 543L Nonparametric Statistics (3) (Enroll in MATH 543L)

PM 544L Multivariate Analysis (3, 2 years, SpSm) Exploratory and inferential techniques for multivariate data, Hotelling's T², multivariate analysis of variance, classification analysis, principle components, cluster analysis, factor analysis. Involves computer use. *Prerequisite:* PM 510L, PM 522a.

PM 545L Introduction to Time Series (3) (Enroll in MATH 545L)

PM 546 Biological Threats and Terrorism (4, Fa) History of biowarfare and bioterrorism; proper surveillance techniques, capacity building for public health and medical communities, and the importance of effective communications. Methods of preparedness, prevention and response are examined. *Recommended preparation:* PM 512.

PM 547 Public Health Policy and Politics (4, FaSp) Examination of major policy issues in the U.S. health care delivery system to understand policy options in reforming health care and reducing health care disparities. *Prerequisite:* PM 508.

PM 548 Prevention and Public Policy (2, FaSp) Introduction to prevention policy framework; examination of how the application of epidemiology and behavioral aspects of diseases shapes the development of public health policy. *Prerequisite:* PM 508, PM 512.

PM 549 Human Molecular Genetics (4, FaSpSm) (Enroll in BIOC 543)

PM 550 Sample Surveys (3) (Enroll in MATH 550)

PM 551 Statistical Methods in Genome-Wide Association Studies (3, FaSpSm) Provides epidemiologists with an overview of current statistical problems and approaches in the design and analysis of genome-wide association studies. *Prerequisite:* PM 511a, PM 512; *corequisite:* PM 522a.

PM 552 Statistical Methods in Clinical Trials (3, 2 years, Sp) Stochastic failure process; parametric models for survival data; sample size estimation procedures for clinical trials; multivariate regression models for binary outcome and censored survival data; computer programs; multiple failure modes and competing risks. *Prerequisite:* PM 518a, MATH 408.

PM 553 Human Exposure Assessment for Public Health (4, FaSpSm) Examination of important routes of exposure to toxic materials; how to measure exposure; strengths and weaknesses of different measurement techniques; design of exposure assessment studies. *Recommended preparation:* PM 510 or one semester of statistics and background in science or engineering for graduate students not in MPH.

PM 554 Biological Effects of Environmental Toxins (4, FaSp) Overview of how environmental exposures affect various biological systems and lead to observed health outcomes in populations. *Recommended preparation:* PM 529.

PM 555 Environmental Health, Policy and Practice (4, FaSp) Examination of environmental public health policies/regulations, the role of science in assessment and policy initiatives, barriers to change, and competing interests that influence policy adoption. *Recommended preparation:* PM 529.

PM 556 Environment and the Brain (4, FaSpSm) An examination of the effects of environmental exposures on the brain, addressing both human health and neurobiologic correlates throughout the lifespan.

PM 557 Global Environmental Health (4, Sp) Examination of the health effects of global environmental changes, including climate change, globalization, food safety, air pollution, water pollution, and radiation.

PM 558 Environmental Epidemiology: Concepts, Methods, and Practice (4, FaSp) Examine epidemiologic methods, concepts, and statistical approaches; case-study seminars with structured critiques of current literature on human-environment interactions affecting public health. *Recommended preparation:* PM 510 and PM 512.

PM 560 Statistical Programming With R (2, Sm) The contents include: R objects, control structure, data input and output, subsetting objects, data manipulation and aggregations, character manipulation, graphics, and writing user-defined functions. *Recommended preparation:* Knowledge of one programming language other than R or a half-year experience programming in R.

PM 561 Promoting Dietary Change (3, Sp) Development, implementation, and evaluation of dietary interventions at community and individual levels. Discussion of lifespan, culture, socioeconomic, and environmental factors. Open to M.P.H. nutrition track students only. *Prerequisite:* PM 501.

PM 562 Intervention Approaches for Health Promotion and Disease Prevention (4, Sp) Approaches for modifying health behavior in various settings and within diverse populations. Emphasis on practical considerations necessary to design and implement interventions with demonstrated effectiveness.

PM 563 Organizing and Mobilizing Communities for Public Health (4, Fa) Survey of effective community organizing and mobilization efforts in the U.S. and abroad, using participatory, organizational, community empowerment and public-private partnership models.

PM 564 Public Health Leadership and Management (3, FaSpSm) Introduction to business and management concepts, tools, and practices in the context of domestic and global healthcare delivery, public health, and allied health industries.

PM 565 Introduction to Global Health (4, Sp) Current public health issues and research topics relating to 21st century challenges and threats. Lessons learned and best practices to strengthen public health systems and enhance public health readiness and preparedness.

PM 566 Public Health in China: A System and Country in Transition (4, Fa) Scientific, political, economic, social, and historical influences affecting Chinese public health policy and practice. *Prerequisite:* PM 501, PM 510L; *recommended preparation:* PM 512.

PM 567 Disasters, Conflict and Global Health (4, FaSpSm) Definition and chronology of natural and man-made disasters and their effects on the global community. Structure and organization of disaster management systems and the role of humanitarian organizations. *Recommended preparation:* PM 501, PM 512.

PM 568 Ethical Issues in Global Health (4, Fa) Ethical principles in the distribution of health resources, conduct of global public health research, and implementation of public health initiatives across different nations, cultures, religions. *Recommended preparation:* PM 501.

PM 569 Spatial Statistics (3, FaSpSm) An introduction to statistical methods for analyzing and interpreting spatially referenced data topics include: geostatistics, areal data, point pattern data and visualization. *Prerequisite:* PM 511a; *recommended preparation:* familiarity with R.

PM 570 Statistical Methods in Human Genetics (4, Sp) An introductory course in the statistical methods used in the analysis of human genetic data. *Prerequisite:* PM 533.

PM 571 Applied Logistic Regression (3, Sm) An introduction to the logistic regression model, emphasizing practical data analysis techniques. *Prerequisite:* PM 510L; PM 512; and PM 511aL or PM 518a.

PM 572 Systems Physiology and Disease I (4, Fa) (Enroll in INTD 572)

PM 573 Systems Physiology and Disease II (4, Sp) (Enroll in INTD 573)

PM 574 Programming In Modern Statistical Software (2, FaSpSm) Programming using SAS Software, including branching, sub-setting, PDV, looping, by-group processing, array, combining data functions, ODS, and macros.

PM 575 Statistical Methods in Environmental Epidemiology (3, FaSpSm) Study designs, exposure-time response, longitudinal, spatial, ecologic correlation and mechanistic models, measurement error interactions, measurement error, public policy implications. *Prerequisite:* PM 511b and PM 518a.

PM 576 Global Health Research and Programs (4, FaSpSm) Introduction to the core concepts and methods of planning and implementing health-related programs and research in resource-constrained settings.

PM 577 Global Health, Law and Human Rights (1-4, FaSp) Highlights the complex interactions between global health, law and human rights, emphasizing the use of human rights in public health thinking and practice. Duplicates credit in LAW 707. *Recommended preparation:* MPH core course work.

PM 578 Global Health Governance and Diplomacy (4, FaSp) Investigates the way health is organized and administered at the global level, emphasizing the role of international diplomacy and law in governing health.

PM 579 Statistical Analysis of High-Dimensional Data (4, FaSpSm) Overview of statistical issues and solutions to high dimensional data analysis. Use of Bioconductor and R, with applications in molecular biology. *Recommended preparation:* PM 511a.

PM 580 Foundations of Child Health (4, Sp) Overview of issues related to infant, child and adolescent health, including special health considerations at different points in the developmental cycle, health care systems and policies and health disparities.

PM 581 Quality and Inequality in Health Care: Examination of Health Services (4, Fa) Social inequalities, including racial/ethnic disparities and income related inequalities are examined in the context of access and delivery of health care in the U.S.

PM 582 Epidemiology and Prevention of Pediatric Injuries (4, Fa) Examines the incidence and causes of injuries to children from birth to adolescence, risk factor distributions and approaches to prevention.

PM 583 Foundations of Early Childhood Mental Health (4, Fa) Overview of major infant and early childhood mental health issues, relating to the status of child mental health and the importance of comprehensive systems of care for children that support resilience and respond to biological and psychosocial mental health risks.

PM 584 Systems of Care for Children with Special Needs (4, Sm) Examines and evaluates principles, policies, programs and practices (systems) that have evolved to identify, assess and meet the special needs of children and families. Includes both historical and current perspectives.

PM 585 Child Health Policy (4, Sp) History of child health and social welfare programs during the past century. Issues examining health status and health service delivery, the role of health care financing and health policy.

PM 586 Reproductive and Perinatal Epidemiology (3, FaSpSm) Introduction to reproductive health, from preconception to the neonatal and early period of human development. Heavy emphasis on the methods

and public health implications. *Prerequisite:* PM 510L and PM 512.

PM 587 Qualitative Research Methods in Public Health (4) Introduction to common uses of qualitative research methods in public health research and application. Methods include ethnography, participant observation, open-ended interviewing, and focus groups.

PM 588 The Practice of Epidemiology (4, FaSpSm) Provides students with hands on experience of the common methods used in conducting epidemiological studies, and designing and obtaining funding for research projects. *Prerequisite:* PM 512; *recommended preparation:* PM 527.

PM 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PM 593 Public Health Practicum (4 or 8, FaSpSm) Field placement in a community agency, such as a county health department or community-based organization. Open to MPH candidates only. Graded CR/NC. *Recommended preparation:* completion of all course work.

PM 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

PM 596 Practicum in Public Health (2, FaSpSm) Field placement in a public health agency, such as a county hospital department or community-based organization. Graded CR/NC. *Recommended preparation:* completion of all MPH course work.

PM 597 Capstone in Public Health (2, FaSpSm) Provides the culminating, integrative curricular experience for students enrolled in the Master of Public Health program. *Recommended preparation:* completion of all MPH course work.

PM 599 Special Topics (2-4, max 8, Irregular) Special topics relevant to the study of selected issues and areas of health behavior research or other aspects of preventive medicine.

PM 601 Basic Theory and Strategies in Prevention (4, 2 years, Fa) Psychosocial basis of health-hazardous lifestyle behaviors and preventive strategies. *Recommended preparation:* PM 500, PM 515.

PM 602 Basic Theory and Strategies for Compliance/Adaptation (4, 2 years, Fa) Behavioral and psychosocial demands of acute and chronic diseases. Comparison of theoretical models of compliance and adaptation with intervention methods to improve compliance and adaptation. *Recommended preparation:* PM 500, PM 515.

PM 603 Structural Equation Modeling (4, 2 years, Fa) Factor analytic and structural equation modeling approaches to health behavior research — conceptual, practical and mathematical. *Prerequisite:* PM 511b.

PM 604 Health Behavior Research Methods (4, Sp) Health research/evaluation philosophies, approaches, and development of skills for development and critique of health behavior research projects/studies. *Recommended preparation:* PM 511.

PM 610 Seminar in Biostatistics and Epidemiology (1, max 4, FaSpSm) Special topics of current interest to provide background for research in biostatistics and epidemiology. Based largely on student dissertation research. Graded CR/NC. *Prerequisite:* Ph.D. level.

PM 611 Advanced Topics in Epidemiology (3, Irregular) Review of current epidemiologic research contained in recent medical literature; emphasis on critique of studies and interpretation of findings.

PM 612abc Clinical Translational Research (CTR) (4-4-4, FaSpSm) *a:* First of three courses in CTR, a discipline that fosters multidirectional integration of basic, patient-oriented and population-based research with the long-term goal of improving public health. *Recommended preparation:* PM 510. *b:* Analysis and interpretation of data to test clinical translational hypotheses. *c:* Multidisciplinary approach to clinical and translational research.

PM 690abcdz Directed Research in Health Behavior (2-2-2-2-0, FaSpSm) Independent research at an

advanced level on a problem in the field of Health Behavior. Graded CR/NC. *Recommended preparation:* PM 604.

PM 756 Research Seminar in Health Behavior (1, max 6, FaSp) Short seminar presentations and discussions on issues accompanying the development of the field of health behavior and implementation of research in this field. Graded CR/NC.

PM 790 Research (1-12, FaSpSm) Research applicable to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PM 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Master of Science in Stem Cell Biology and Regenerative Medicine

Eli and Edythe Broad CIRM Center for Regenerative Medicine and Stem Cell Research at USC

Program Director: Henry Sucov, PhD

Stem cell biology is one of the newest and most powerful approaches in biomedical science; it offers the opportunity to experimentally approach previously intractable biological questions, create models of human disease and develop cell-based therapeutics.

This intensive one-year program (with an optional second year) will give students a deep understanding of the scientific and clinical underpinnings of stem cell biology and regenerative medicine. The program includes three didactic lecture courses that address developmental cell biology and human embryology, stem cell biology and regenerative medicine, and translational and therapeutic aspects of stem cell technology; the program also includes two laboratory modules that provide guided hands-on experience with stem cells and stem cell laboratory approaches, and several different faculty-led discussion-based courses that allow detailed investigation of specific aspects of stem cell biology and regenerative medicine.

Students completing this program will be well-positioned to proceed to medical or Ph.D. programs, find laboratory or administrative employment in the growing stem cell pharmaceutical domain, or engage in public policy or regulatory administration of academic, clinical or business efforts in this expanding discipline.

California is globally recognized as the worldwide center of stem cell science, and USC has invested significantly in building the new Department of Stem Cell Biology and Regenerative Medicine at the Keck School of Medicine of USC, within which this M.S. program is based and administered.

Admissions Requirements

Applicants must supply a completed application for graduate studies including: transcripts from all institutions previously attended, standardized test scores, a personal statement describing scientific and career interests, and two letters of recommendation. Applications are generally anticipated for fall enrollment, but applications for spring enrollment may also be considered. Applicants to the program must apply to the USC Graduate School and must meet the minimum requirements for admission to the Graduate School. Students are required to have a 3.0 or better overall GPA (or equivalent) and have achieved graduation with a B.S. or B.A. degree (or equivalent) before matriculation. Students are expected to have taken the general portion of the GRE exam before application and to have met or exceeded university score requirements. (MCAT scores that are less than five years old may be submitted in lieu of GRE scores by physicians and MD students with a 3.0 LCME-accredited

medical school GPA or higher, or by medical school-bound students with a 3.0 undergraduate GPA or higher. DAT scores that are no more than three years old and that reflect a minimum score of 15 in each area may also be submitted in lieu of GRE scores.) Applicants not meeting Graduate School requirements for regular standing may, with the approval of the Graduate School, be conditionally admitted. International students from non-English speaking home countries are expected to demonstrate English language proficiency or take remedial English language courses, according to Graduate School policy. Specific prerequisites for this program include completed course work with a B or better grade (or equivalent) in Cell Biology and in Molecular Biology.

Advisement

The program recommends that students meet with the program director each semester prior to registration.

Satisfactory Academic Progress

A graduate GPA of at least 3.0 is required at all times. Any student whose graduate GPA falls below 3.0 will be given written notification that they have been placed on academic probation. Students who do not raise their GPA to 3.0 after two semesters on academic probation will be academically disqualified.

Degree Requirements

Graduation requires completion of 25 units, according to the required Year 1 course schedule outlined below. None of these courses may be substituted or waived.

This program is intended to be completed within one academic year, and does not include a requirement for independent laboratory research or a thesis. Students may request approval to undertake laboratory research and continuing course work during a second year research option; students must already be matriculated into the program before making this request, and not all students will be granted this opportunity (selection will be based on academic performance and student research interests, and on availability of laboratory space). During this optional second year, students must enroll in the required Year 2 courses listed below; none of these courses may be substituted or waived.

REQUIRED COURSES – YEAR 1, FALL SEMESTER		UNITS
DSR 574	Stem Cell and Developmental Biology Seminar Series	1
DSR 620	Current Topics in Stem Cell Biology and Organogenesis	1
SCRM 511	Developmental Biology and Human Embryology	4
SCRM 513	Stem Cells and Regenerative Medicine	4
SCRM 580	SCRM External Speaker Seminar Series	2

REQUIRED COURSES – YEAR 1, SPRING SEMESTER		UNITS
DSR 574	Stem Cell and Developmental Biology Seminar Series	1
DSR 610	Current Topics in Regenerative Medicine	1
SCRM 515	Bringing Stem Cells to the Clinic	4
SCRM 522L	Biological Imaging in Stem Cell Research	2
SCRM 524L	Culture and Differentiation of Human Pluripotent Stem Cells	2
SCRM 555	Writing About Stem Cell Biology and Regenerative Medicine	1
SCRM 580	SCRM External Speaker Seminar Series	2

REQUIRED COURSES – OPTIONAL RESEARCH YEAR 2, FALL SEMESTER		UNITS
DSR 574	Stem Cell and Developmental Biology Seminar Series	1
DSR 620	Current Topics in Stem Cell Biology and Organogenesis	1
SCRM 580	SCRM External Speaker Seminar Series	2
SCRM 590	Independent Research	1-4

REQUIRED COURSES – OPTIONAL RESEARCH YEAR 2, SPRING SEMESTER		UNITS
--	--	-------

DSR 574	Stem Cell and Developmental Biology Seminar Series	1
DSR 610	Current Topics in Regenerative Medicine	1
SCRM 580	SCRM External Speaker Seminar Series	2
SCRM 590	Independent Research	1-4

Department of Stem Cell Biology and Regenerative Medicine

Courses of Instruction

STEM CELL BIOLOGY AND REGENERATIVE MEDICINE (SCRM)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

SCRM 511 Developmental Biology and Human Embryology (4, Fa) Survey of anatomical, cellular and molecular processes that underlie human development and congenital malformations, with discussion of other species for comparison. Open only to Stem Cell Biology and Regenerative Medicine majors.

SCRM 513 Stem Cells and Regenerative Medicine (4, Fa) A comprehensive investigation of embryonic, fetal and adult stem cells and the application of stem cell biology to treat disease. Open only to Stem Cell Biology and Regenerative Medicine majors.

SCRM 515 Bringing Stem Cells to the Clinic (4, Sp) Lectures addressing the business, legal, ethical, manufacturing and regulatory aspects involved in moving stem cells or related product into clinical practice. *Prerequisite:* SCRM 513. Open only to Stem Cell Biology and Regenerative Medicine.

SCRM 522L Biological Imaging in Stem Cell Research (2, Sp) Theory and practice of using microscopy and flow cytometry in stem cell biology, including sample preparation, digital processing and data analysis. *Concurrent enrollment:* SCRM 524L. Open only to Stem Cell Biology and Regenerative Medicine.

SCRM 524L Culture and Differentiation of Human Pluripotent Stem Cells (2, Sp) Classroom and laboratory experience in the techniques for deriving, culturing and differentiating human pluripotent stem cells (hPSCs) and related cell types. *Concurrent enrollment:* SCRM 522L. Open only to Stem Cell Biology and Regenerative Medicine majors.

SCRM 555 Writing About Stem Cell Biology and Regenerative Medicine (1, Sp) Instruction in writing for various audiences on topics related to stem cell biology and regenerative medicine. Open only to Stem Cell Biology and Regenerative Medicine majors.

SCRM 580 SCRM External Speaker Seminar Series (2, max 8, FaSp) Reading and discussion of recent papers by the SCRM speaker of the week, and attendance at the speaker's seminar. Open only to Stem Cell Biology and Regenerative Medicine majors.

SCRM 590 Independent Research (1-4, max 16) Independent research conducted under the guidance of faculty in the Department of Stem Cell Biology and Regenerative Medicine. *Prerequisite:* SCRM 511, SCRM 513, SCRM 515, SCRM 522L, SCRM 524L, SCRM 555, SCRM 580. Open only to Stem Cell Biology and Regenerative Medicine majors. Graded CR/NC.

USC Thornton School of Music

As the longest-standing cultural institution in Los Angeles, the USC Thornton School of Music educates students in a real-world context through collaborations with the Los Angeles Philharmonic, Los Angeles Opera, Grammy Foundation and others. Here Doctor of Musical Arts student Sarah Gibson and Professor Kevin Fitz-Gerald practice in the Chamber Music Interpretation Masterclass.

Since its founding in 1884, the USC Thornton School of Music has become the center of higher education in music in the western United States and ranks among the top schools of music in the nation. Situated in the heart of the vital musical life of Los Angeles, USC Thornton brings together a distinguished faculty and gifted students from around the world. It is in this wonderfully diverse cultural milieu that students are offered instruction in virtually all professional and scholarly branches of music, including instrumental and vocal performance, jazz, popular music performance, music production, early music, conducting, composition, film scoring, music industry, musicology, music education, arts leadership, pedagogy, choral and sacred music, conducting and opera. In addition to its major programs, USC Thornton also offers a wide array of music minors and general interest courses for students majoring in other disciplines.

The USC Thornton Symphony, Chamber Choir, Concert Choir, Opera, Wind Ensemble, Popular Music Ensembles, Songwriter Showcases, Jazz Orchestra, Contemporary Music Ensemble, Early Music Ensemble and a wide variety of large and small choral and instrumental ensembles assure students the broadest performing experience. More than 500 formal and informal concerts and recitals are presented on campus each year and the school regularly presents eminent visiting artists and scholars in master classes, workshops, lectures, seminars and in performance.

Los Angeles is the home of numerous musical organizations whose performances contribute immeasurably to the cultural life of the region, and also the home of the nation's major recording, radio, film and television industries. All offer abundant opportunities to the serious young musician.

Thornton School of Music

Degree Programs

The Thornton School of Music offers professional and academic degrees at the bachelor's, master's and doctoral levels. These degrees are summarized below.

Bachelor of Music: Students working toward this professional degree have a wide choice of specializations: composition, music industry, instrumental performance, jazz studies, popular music performance, music production and vocal arts. Students can take either a single major program or double majors in several combinations such as piano and composition, string, or percussion instrument. The two majors must be offered

by different departments but lead to the same degree (for example, Bachelor of Music). Double majors consisting of two majors in the same department are not permitted. The degree is granted by the Thornton School of Music.

Bachelor of Arts: These degrees are for students with a strong music background who wish to combine professional music training with substantial study in other disciplines.

Bachelor of Science: Offered by the Thornton School of Music in the specialized area of music industry.

Minors in Music: Seven different minors in music are offered, each approaching the discipline from a unique perspective and with a distinct curriculum: Jazz Studies, Musical Studies (Performance), Musical Theatre, Music Industry, Music Recording, Popular Music Studies and Songwriting.

Master of Music: This is a professional degree that represents proficiency in one area of musical practice and relevant knowledge in musical literature, performance and technique. It requires a minimum of 30 graduate units, of which 15 must be at the 500 level or higher. Students complete either a thesis or recital(s) as part of the degree requirements. The degree can be earned in choral music, composition, conducting, jazz studies, music education, keyboard collaborative arts, guitar, organ, piano, voice or instrumental performance, or sacred music. The degree is granted by the Thornton School of Music.

Master of Arts: This degree, offered through the Graduate School in conjunction with the Thornton School of Music, stresses music history or early music performance, with emphasis on scholarly research.

Doctor of Musical Arts: This is a professional degree that represents the highest level of expertise in a major field of musical practice and competence in several additional areas. Students may specialize in choral music, composition, jazz studies, music education, vocal or instrumental performance, or sacred music.

Doctor of Philosophy: Offered through the Graduate School, this is an academic degree in the field of historical musicology. A substantial background in music, research and languages is required.

Entrance to the Degree Programs

Admission to a degree program is granted through USC's admission process, described in the Admission section of this catalogue. A supplementary application form is also required for students seeking admission to the Thornton School of Music, which can be obtained from the School of Music Office of Admission.

Applicants to a program within the school are screened by appropriate faculty selection committees that hold auditions, interviews and examine supportive materials. Letters of acceptance are issued by the USC Office of Admission.

Audition

A performance audition is required of applicants to most degree and certificate programs in the Thornton School of Music. Refer to individual curriculum listings for details.

Graduate Record Examinations

Scores from the General Test of the Graduate Record Examinations (GRE) are required for application and admission to the Master of Arts, certain Doctor of Musical Arts and Doctor of Philosophy degrees. (The Music Subject Test is not required.) Test scores on the GRE that are more than five years old at the time of application are not accepted.

Placement Tests

Undergraduate transfer students who have had formal study in any of the following areas must take the appropriate placement examination prior to their first registration: aural skills, theory, music history, conducting, analysis, orchestration and performance. The results of these examinations determine placement in appropriate sequential courses.

Admission to Graduate Standing

Achievement tests in basic musical skills and areas of study (Music Graduate Entrance Examinations) are required of all entering graduate students during the first semester or summer session in residence. If all

examinations are not passed by the end of two semesters of course work, then further registration must include remedial courses in all areas where deficiencies exist. In degree programs in which one recital is required, all entrance examinations must be passed or corresponding remedial course work completed with a minimum grade of B- before permission to present a graduate recital is given. In programs with two or more recitals, only the first may be given prior to passing all entrance examinations or completing corresponding remedial courses.

Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS)

All applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). Test scores that are more than two years old at the time of application are not accepted.

Advanced Standing Credit for Music Taken in Accredited Schools of Music

Music courses completed with satisfactory grades in a member institution of the National Association of Schools of Music are acceptable for transfer. The university reserves the right, however, to require a student to take a placement test (at no cost) to determine the level of achievement in any given aspect of music, and to review the student's credentials at the end of one semester at USC to determine what credit will in fact be transferred.

Advanced Standing Credit for Music Not Taken in Accredited Schools of Music

Students who wish credit for music taken in institutions not accredited by the National Association of Schools of Music must provide the Office of Admission with information on their prior work, showing the subjects studied, the number of lessons in each subject, the length of each lesson, number of years of study and the names of instructors. Such special requests are dealt with on an individual basis. Examinations or continuation work or both may be required before credit allowance is considered.

General Requirements

All curricula leading to the Bachelor of Music, Master of Music and Doctor of Musical Arts degrees require proficiency in performance. This is accomplished by individual instruction in the areas best suited to the student's ability and interests.

All curricula require competency in either piano or another performance medium.

Attendance at recitals in the field of the student's major is a regular part of the work in applied music for all music majors. Attendance at recitals is recommended for non-music majors who take individual instruction as an elective.

Curriculum Requirements

The curriculum requirements for each major are listed under each degree. The USC course classification and numbering system is explained on the Registration page. In addition, music courses sometimes carry the following abbreviations: CD = Conducting; CG = Classical Guitar; HC = Harpsichord; OR = Organ; P = Piano; SG = Studio Guitar; VA = Viola; VC = Voice Coaching; VO = Voice.

Change of Curriculum

To change from one curriculum to another, a student must obtain written approval of all of the following: the department chair in the curriculum which the student is leaving, the department chair for the new curriculum and the dean of the Thornton School of Music.

Non-Degree Programs

Students who have highly specialized interests which may not be met through degree programs may apply for admission to one of the following non-degree programs.

Artist Diploma Program

This program is designed for young artists of exceptional ability and musical sensitivity who plan careers as solo performers. The Artist Diploma Program provides young artists the opportunity to devote their full time to concentrated study and practice for the duration of their assigned programs. This program typically requires two to three consecutive years of study for completion.

Graduate Certificate in Arts Leadership

The graduate program in arts leadership is a two-semester certificate program for artists, arts administrators and cultural workers of all types to develop the skills necessary to become successful leaders in the arts and arts organizations in a rapidly changing and radically altered contemporary world.

Graduate Certificate Program in Performance

This two-year graduate-level program is designed for students who have completed their undergraduate education in music, or its equivalent, and intend to concentrate their energies on the full-time development of their discipline.

Graduate Certificate Program in Scoring for Motion Pictures and Television

This one-year program is designed for students who hold the Bachelor of Music in Composition or its equivalent. Students in this program must maintain a 3.0 grade point average, with no course grade lower than a C (2.0). Work graded C- or below is not acceptable for credit toward the certificate.

Honor Society

Pi Kappa Lambda

Pi Kappa Lambda is a national honor society established in 1918 for the promotion and recognition of scholarship and performance in music. Students of the School of Music are eligible for election to Eta chapter at the University of Southern California, established in 1923.

Thornton School of Music

Undergraduate Degrees

Bachelor of Music

The Bachelor of Music (B.M.) is a professional degree granted by the Thornton School of Music. The various majors for the degree are listed subsequently along with special requirements for each.

Individual Instruction in Residence

Candidates for the B.M. degree in performance must complete a minimum of three semesters of individual instruction in their major field while in residence.

Senior Recital

All performance majors must present a senior recital consisting of a memorized program one hour long (except in the case of certain wind instruments) in partial fulfillment of the degree requirements. Composition majors present a full-length recital of their original compositions. A candidate's program must be ready for presentation before a faculty committee at least one month before the required public recital. Complete details are available from the Music Operations Office, Thornton School of Music.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements.

The provost has allowed an exception to the rules governing the new general education requirements for certain groups of students pursuing performance degrees in music. Students pursuing the Bachelor of Music in Jazz Studies or the Bachelor of Music in Performance (in all tracks except organ) may satisfy their social issues and first writing requirement separately by taking WRIT 130 (instead of WRIT 150) in the spring of their freshman year. In addition those pursuing the Bachelor of Music in Performance (vocal arts) may satisfy Category I of the

new program with MUHL 331 and MUHL 332.

In all other respects, students in the Thornton School of Music must satisfy the general education requirements as described on The USC Core page and the General Education Program page.

Individual Instruction Limitations

Music majors may accumulate a maximum of 16 units of individual instruction at the 300 level toward an undergraduate degree program.

Bachelor of Music in Composition

Entrance Requirements

Applicants must submit the Thornton School of Music Supplementary Application, a statement of objectives, resume, complete academic transcripts, three original compositions, and a complete list of all original compositions including dates and media. If available, audio recordings of the submitted scores should also be included. An on-campus interview with the composition faculty is encouraged but not required. Admission to the B.M. in Composition is highly competitive. The program is a four-year program, to which transfer students are rarely admitted. Admission to programs in composition is limited to fall semester only.

CURRICULUM REQUIREMENTS

	UNITS
General education	6 courses
Writing	2 courses
Large ensemble*	4
Ensemble electives	2
MPKS 250ab (4), MPKS 350ab (4), MPKS 301P (4)**	12
MTEC 474a or MTEC 474b or MTEC 490	2
MUCO 132ab (4), MUCO 133ab (6), MUCO 135 (2), MUCO 137ab (4), MUCO 232ab (4), MUCO 233ab (6), MUCO 235 (2), MUCO 236 (2), MUCO 237ab (8), MUCO 336ab (4), MUCO 337ab (8), MUCO 434 (2), MUCO 435 (2), MUCO 437ab (4)	58

MUHL 231 (3), MUHL 232 (3), MUHL 331 (3), MUHL 332 (3)	12
General electives	6
Senior recital	0
Total required for degree	132

*Transfer credit may not fulfill the large ensemble requirement.

**Requirement may be fulfilled with MPKS 301P if proficiency level equivalent to MPKS 350b is demonstrated by examination.

Bachelor of Music in Jazz Studies

Entrance Requirements

Applicants must submit the Thornton School of Music Supplementary Application, a statement of objectives, resume and repertoire list. A performance audition is required for admission to this program. Specific audition requirements, along with other entrance requirements, are reviewed on an annual basis and published in the Application Requirements section online at usc.edu/music. Most applicants will also be asked to sit for a written examination consisting of listening to excerpts, basic jazz theory and jazz history. Though applicants are strongly encouraged to perform a live audition, a recent video recording may be submitted in lieu of a live audition if necessary.

Bachelor of Music in Performance (Piano)

Entrance Requirements for Piano Major

Applicants in piano must submit the Thornton School of Music Supplementary Application, a statement of objectives, resume and repertoire list. A performance audition is also required. Current requirements for the audition may be found at usc.edu/music. Follow the links to the Keyboard Studies Department and choose "Application Requirements." Although live auditions are strongly encouraged, a recent, high-fidelity audio or CD recording may be submitted in lieu of a live audition if necessary by applicants living a distance greater than 200 miles from the USC campus.

*All individual instruction units must be taken in the same area in which the students auditioned.

Bachelor of Science in the Music Industry

The Bachelor of Science in the Music Industry is a professional degree that prepares students to enter a variety of careers in the music industry of today. Students must fulfill a series of core requirements for the degree.

Entrance Requirements

Applicants must submit the Thornton School of Music Supplementary Application, a statement of objectives, resume and full academic transcripts. A full academic review will be the primary consideration for admission to this program. In some cases, a phone or in-person interview will be requested by the Thornton admission office.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated

person. This program requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies). See <http://dornsife.usc.edu/2015ge> for more information.

Business-related Requirements

In addition to the above general education requirements, the following courses offered through the USC Marshall School of Business, the USC Leventhal School of Accounting and the USC Dornsife College of Letters, Arts and Sciences are required.

Any 4 unit ECON course	1 course
BAEP 450x or 451	1 course
ACCT 410x	1 course
	3 courses

Curriculum Areas of Study

Within the curriculum for the B.A., students may wish to focus in a particular area of music that suits their interest and the faculty’s expertise. Students may specialize in one area or may design individual programs of study by choosing various combinations of electives that best meet their needs and career objectives. Relevant courses for each area are posted at usc.edu/music. One such option is listed below.

Vocal Jazz Option: This option is designed for students with a strong interest in the performance of solo and ensemble vocal jazz music. Students should take two semesters of Vocal Jazz Techniques, as well as individual instruction in jazz voice. Students may also perform in vocal ensembles and with instrumental combos.

Bachelor of Arts in Choral Music

Applicants must submit the Thornton School of Music Supplementary Application, a statement of objectives, resume and repertoire list. A performance audition according to the requirements of the Choral Music department is also required.

General Education Requirements

The university’s general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies). Thornton School of Music

Minors in Music

Minor in Music Recording

A minor in music recording is offered for undergraduate students to provide them with the background necessary to enter the field of recording engineering and to familiarize them with the design needs of recording equipment.

Prerequisite

Acceptance into the program might require a personal interview by the Thornton School of Music to assure that the student has sufficient musical background and skill.

Students admitted to this minor will be expected to have a minimum GPA of 2.0 and to maintain that average with no grade lower than a “C” for all courses taken in the minor.

REQUIRED COURSES

		UNITS
MTEC 175	Fundamentals of Audio Recording	2
MTEC 176	Critical Listening	2
MTEC 275	Fundamentals of Audio Engineering	4
MUIN 286	Record Production Management	2
MUIN 287	The Business and Economics of the Recording Industry	2
MTEC 446a	Computer Assisted Recording and Editing	2

10 units from the following:

MTEC 389	Digital Equipment and Recording	2
MTEC 392a	Acoustics and Speaker Design	2
MTEC 446b	Computer Assisted Recording and Editing	2
MTEC 477	Remote Recording Techniques	2
MTEC 478	Advanced Multichannel Remix	2
MTEC 479	Audio Mastering	2
MTEC 493	Audio Signal Processing Equipment	2

24

Minor in Music Industry

A minor in the music industry is offered for undergraduate students to provide them with the background necessary to enter varied fields in the music business and to familiarize them with standard practices and procedures. A minimum of 20 units is required for completion of this minor. The minor is not available to music industry majors.

Prerequisite

Acceptance into the program might require a personal interview by the Thornton School of Music.

Students admitted to this minor will be expected to have a minimum GPA of 2.0 and to maintain that average with no grade lower than a “C” for all courses taken in the minor.

REQUIRED COURSES

		UNITS
MUIN 272x	Basics of the Music Industry	4
MUIN 372x	Business and Legal Aspects of the Music Industry	4

Select 4 units from the following:

MUHL 315x	Music and Culture	4
MUSC 410	Electronic Dance Music	4
MUSC 420	Hip-Hop Music and Culture	4
MUSC 422	The Beatles: Their Music and Their Times	4

MUIN 497	Current Topics, Case Studies and Analysis	2
		20

Minor in Jazz Studies

This 21-unit minor program in jazz studies incorporates course work in individual instruction, the history of jazz masters, techniques of jazz improvisation and jazz theory for improvisers. The minor is not available to B.M. jazz studies majors.

Requirements for admission are: GPA per university regulations and an audition.

REQUIRED COURSES		UNITS
MUCO 130a	Basics of Music Theory	3
MUEN 329	Jazz Ensemble (1, max 8), or	
MUEN 332	Jazz Chamber (1, max 8)	4
MUJZ 150x	Beginning Jazz Improvisation	2
MUJZ 301	Individual Instruction	4
MUJZ 419	The Jazz Experience: Myths and Culture, or	
MUSC 450	The Music of Black Americans	4
MUJZ 450	Intermediate Jazz Improvisation	2
Music courses numbered 300–499		2
Total units:		21

Minor in Musical Theatre

The minor in musical theatre, interdisciplinary in nature, is a 27-unit program incorporating the study of acting, dance or movement, vocal arts and related musical subjects. Admission to the minor requires an audition for music but not for theatre.

For students majoring in theatre or another non-music discipline:

REQUIRED COURSES		UNITS
MUSC 400	The Broadway Musical: Reflection of American Diversity, Issues, and Experiences	4
MPGU 125	Beginning Fingerstyle/Chord Guitar, and	
MPGU 126	Easy Fingerstyle Beatles, or	
MPKS 150ab	Beginning Piano, or	
MUED 330x	Fundamentals of Music	4
MPVA 301	Individual Instruction (6), or	
MPVA 141	Class Voice (2), or	
MPVA 241	Intermediate Class Voice (2), and	
MPVA 301	Individual Instruction (4)	6
MPVA 402*	Musical Theatre Workshop	8

2 units to be selected from:

DANC 181–189, or		
THTR 216	Movement for Actors, or	
THTR 316	Advanced Movement for Actors	2
THTR 343	Musical Theatre Audition	3
Total units:		27

**2 units of MPVA 402 may be satisfied by taking THTR 397 Theatre Practicum I.*

For students majoring in music performance (vocal arts):

REQUIRED COURSES		UNITS
MPVA 402*	Musical Theatre Workshop	8
MUSC 400	The Broadway Musical: Reflection of American Diversity, Issues, and Experiences	4
THTR 101	Introduction to Acting	4
THTR 343	Musical Theatre Audition	3

2 units to be selected from:

DANC 181–189, or		
THTR 216	Movement for Actors, or	
THTR 316	Advanced Movement for Actors	2

6 units to be selected from:

THTR 252ab	Intermediate Acting I, or	
THTR 352ab	Intermediate Acting II	6
Total units:		27

**2 units of MPVA 402 may be satisfied by taking THTR 397 Theatre Practicum*

For students majoring in music (non-vocal arts performance):

REQUIRED COURSES		UNITS
------------------	--	-------

MPVA 301	Individual Instruction	4
MPVA 402*	Musical Theatre Workshop	8
MUSC 400	The Broadway Musical: Reflection of American Diversity, Issues, and Experiences	4
THTR 101	Introduction to Acting	4
THTR 343	Musical Theatre Audition	3

2 units to be selected from:

DANC 181–189, or		
THTR 216	Movement for Actors, or	
THTR 316	Advanced Movement for Actors	2

2 units to be selected from:

THTR 252ab	Intermediate Acting I, or	
THTR 352ab	Intermediate Acting II	2
Total units:		27

*2 units of MPVA 402 may be satisfied by taking THTR 397 Theatre Practicum I

Minor in Musical Studies

This 26-unit program in musical studies, with an emphasis in performance, incorporates the study of music theory, music history, performance, ensembles and electives. Students may enter the program in their freshman year. An audition is required for this minor, which is not available to music majors.

REQUIRED COURSES	UNITS	
MUEN 300–499	2	
MUHL 315x	Music and Culture	4
MPKS 250a	Keyboard Instruction I	2
Individual Instruction at the 301 level		6
MUCO 130abx	Basics of Music Theory	6
Music electives*		6
Total:		26

*Must include 4 upper division units.

Minor in Popular Music Studies

This minor consists of four upper division courses, to be chosen from courses that examine different aspects of popular music. The minor focuses on the study of the repertoires and their cultural and social context. Students must be in good academic standing to be admitted. No previous musical experience is required.

COURSE REQUIREMENTS	UNITS	
Choose four courses (16 units) from the following:		
MUSC 400	The Broadway Musical: Reflection of American Diversity, Issues, and Experiences	4
MUSC 420	Hip-Hop Music and Culture	4
MUSC 422	The Beatles: Their Music and Their Times	4
MUSC 444	American Roots Music: History and Culture	4
MUSC 450	The Music of Black Americans	4
MUSC 460	Film Music: History and Function from 1930 to the Present	4
MUSC 465	Music, Television and American Culture	4
MUJZ 419	The Jazz Experience: Myths and Culture	4

Minor in Songwriting

The minor in songwriting incorporates practical instruction in the craft of songwriting and in performance skills, instruction in the technology relevant to songwriting, and critical studies in the relevant repertoires.

Requirements for admission: Successful completion of MUSC 255 Songwriting I and an interview with the admission coordinator.

REQUIRED COURSES		UNITS
MTEC 310	Computer Recording for the Performing Musician	2
MTEC 311	MIDI Music Production for the Performing Musician	2
MUCO 130abx	Basics of Music Theory	3-3
MUSC 255	Songwriting I	2
MUSC 355	Songwriting II	2
MUSC 455	Songwriting III: The Performing Songwriter	2

Choose one of the following courses:

COMM 306	Innovation, Entertainment, and the Arts	4
COMM 307	Sound Clash: Popular Music and American Culture	4
COMM 384	Interpreting Popular Culture	4
COMM 440	Music as Communication	4

Choose one of the following courses:

MUSC 400	The Broadway Musical: Reflection of American Diversity, Issues, and Experiences	4
MUSC 420	Hip-Hop Music and Culture	4
MUSC 422	The Beatles: Their Music and Their Times	4
MUSC 444	American Roots Music: History and Culture	4
MUSC 450	The Music of Black Americans	4
MUSC 460	Film Music: History and Function from 1930 to Present	4
		<hr/> 24

Minor in Performing Arts Studies

The minor in performing arts provides an interdisciplinary inquiry into the nature and aesthetics of the performing arts. It combines the disciplines of cinematic arts, dance, music and theatre. The minor is a unique course of study that looks at how the performing arts contribute to a culturally literate society. See the USC School of Dramatic Arts section of this catalogue.

Thornton School of Music

Graduate Degrees

Admission-Audition Requirements

Applicants to graduate programs in the Thornton School of Music must submit the music supplementary application in addition to fulfilling all USC graduate admission requirements. More information can be obtained from the School of Music Office of Admissions. Applicants to specified doctoral programs, the M.A. in Music History and Literature and the M.A. in Early Music must also submit scores from the general test of the Graduate Record Examinations (GRE). Any applicant whose native language is not English must also submit scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System

(IELTS). GRE test scores that are more than five years old, and TOEFL or IELTS scores that are more than two years old, at the time of application, will not be accepted.

Additional requirements for specific graduate programs are detailed below.

Choral Music

Applicants must submit the following: a brief resume detailing conducting experience; a statement of objectives; a repertoire list divided into categories of works sung, works studied and works conducted; three letters of recommendation; a videotape of both a choral ensemble performance and rehearsal conducted by the applicant, including choral works from several periods and styles, with at least one being a 20th century work. Master of Music applicants should have a minimum of two years' experience as the regular conductor of a choral ensemble. Doctor of Musical Arts applicants should have a minimum of four years' experience.

Composition

Applicants must submit the following: three carefully prepared scores and audio recordings of recent works; a complete list of all compositions, including dates and media; a statement of objectives; resume; transcripts from all universities attended. An on-campus interview with the composition faculty is encouraged but not required. Admission to graduate programs in composition is highly competitive and is limited to approximately six new students per year.

Conducting

Applicants must submit the following: a repertoire list, clearly indicating both works conducted in rehearsal and those conducted in performance; an unedited videotape from the orchestra's side of the podium, no less than 30 minutes in length, of which half should be of the applicant in rehearsal; a statement of objectives; three letters of recommendation; resume. Selected applicants will be invited to present a live audition with the university. Such applicants will be contacted to determine repertoire.

Jazz Studies

Applicants must submit a statement of objectives, resume and repertoire list. A performance audition is required for admission to this program. Specific audition requirements, along with other entrance requirements, are reviewed on an annual basis and published in the Application Requirements section online at usc.edu/music. Most applicants will also be asked to sit for a written examination consisting of listening to excerpts, basic jazz theory and jazz history.

Music Education

Applicants must submit the following: a resume listing group teaching experience (one year experience or more for M.M. applicants, three years' experience or more for DMA applicants); brief statement of objectives and professional goals; academic transcripts from all universities attended; writing sample (essay or research abstract on a music education topic for M.M. applicants, a copy of the master's thesis or written project on a music education topic for DMA applicants); an audition tape, approximately 15 minutes in length, of the applicant's solo performance field; three letters of recommendation.

Music History and Literature

Applicants must submit the following: a statement of objectives and professional goals; academic transcripts from all universities attended; three letters of recommendation; writing sample (one or two historical or analytical term papers or a copy of the master's thesis).

Performance

A performance audition is required for all applicants for admission to a *performance major*. In the case of some programs, additional materials are also required. Specific audition requirements, along with other entrance requirements, are reviewed on an annual basis and published in the Application Requirements section online at usc.edu/music.

Sacred Music

Applicants must submit the following: a brief resume detailing conducting and/or sacred music experience; a statement of objectives; a repertoire list divided into categories of works sung or performed, works studied and works conducted; three letters of recommendation; a videotape of both a choral ensemble performance and rehearsal conducted by the applicant, including choral works from several periods and styles, with at least one being a 20–21st century work. Master of Music applicants are preferred to have had a minimum of two years' experience as the regular conductor of a choral ensemble or worship leader. Doctor of Musical Arts applicants should have a minimum of four years' experience.

Thornton School of Music

Graduate Degrees

Master of Music

Unit and Grade Requirements

Thirty units of graduate work are required; a minimum of 15 units (excluding thesis) must be at the 500 level or higher. All students must satisfy the special requirements of their major department (see departmental adviser). Students must complete at least 26 semester units at USC, including the thesis or recital. A grade point average of not less than 3.0 (A = 4.0) is required for all graduate courses in music, and a grade of B or higher is required for all courses in the major department. Students who transfer credits must achieve this average on all combined transferred and residence units.

Transferred Credits

All credits transferred must be the equivalent of corresponding *current work* at USC. Transfer work must have been completed within seven years from the date of admission to a master's degree program to be applied toward that degree. Transfer credit petitions must be filed with the appropriate faculty chair and the chair's decision made no later than the end of the first year in either the master's or doctoral program.

Time Limit

The time limit for completing the Master of Music degree is five years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

Thesis Requirements and Qualifying Exam Committees

A composition portfolio is required of candidates for the Master of Music degree in composition; a thesis or final project is required of candidates for the Master of Music degree in music education. For music education majors, the thesis will consist of a research document written on a topic approved by the music education department, the final project will consist of a creative project that will present the arrangement, production or design of innovative ideas, materials or curricula for specific applications in teaching music. Before registering for 594a Thesis, a student must choose a qualifying exam committee composed of three regular faculty, approved by the department chair, of which at least two come from the home department. The chair of the qualifying exam committee directly supervises the preparation of the thesis, the final acceptance of which is based upon the unanimous recommendation of all three members of the committee.

Master's Recital

At least one public recital is required of all candidates for the Master of Music degree with a major in choral music, composition, organ, strings, vocal arts or wind and percussion instruments. Two public recitals are required for majors in conducting, guitar, jazz studies, keyboard collaborative arts and piano. Candidates should apply at the Music Operations Office for recital dates. Some departments require that a candidate be prepared to play or conduct the program for the approval of a faculty committee in advance of the recital.

Students majoring in conducting may complete the recital requirements with a formal public recital or with special projects assigned, approved and attended by faculty from the conducting department, who also judge the acceptability of all such performances.

Students majoring in sacred music must complete a recital or project, as approved by the department.

Comprehensive Review

Candidates for the Master of Music must pass a comprehensive review toward the end of their course of study. This review, which is administered by the faculty of the major department, consists of an oral or written examination or a specially designated course; it will cover relevant aspects of musical performance, literature and technique.

Master of Music in Choral Music

Prerequisite

Applicants must hold a Bachelor of Music degree or its equivalent. Completed course work must include at least the following: Conducting MUCD 340, MUCD 343 and MUCD 441; Music History and Literature MUHL 331 and MUHL 332; Theory and Composition MUCO 232b, MUCO 233b and MUCO 338x. One year of German or French is strongly recommended. Applicants must have attained senior standing in a principal performance medium.

Keyboard Proficiency

A keyboard proficiency test will be given by the choral faculty during the student's first semester in residence to determine if additional study in keyboard is required.

Comprehensive Review

A final oral examination in choral literature, conducting and rehearsal techniques will be administered by the choral music faculty.

CURRICULUM REQUIREMENTS	UNITS
MUCM 440 (2), MUCM 541 (2), MUCM 542 (2), MUCM 543 (2), MUCM 590 (2)	10
MUCD 443 (2), MUCD 541 (6)	8
Ensemble	2
MUHL 570 (2), electives at 500 level (4)	6
MPVA 439 (2), MPVA 501VO (2)	4
Graduate recital	0
Comprehensive review	0
	30

Master of Music in Composition

Prerequisite

The applicant must hold a Bachelor of Music degree with a major in composition or theory.

CURRICULUM REQUIREMENTS	UNITS
Ensemble	2
MUHL 570 (2), electives at the 500 level in MUHL or MUCO (6)	8
Individual instruction 501 in any performance medium (MPxx 501) or applicable MTEC or MUCD instruction	4
MUCO 537 (8), MUCO 592 (2), MUCO 536 (2)	12
Electives	4
Graduate recital	0
Comprehensive review	0

M.M. composition portfolio	0
	30

Master of Music in Conducting

Prerequisite

The applicant must hold a bachelor's degree with a music major and have at least one year of experience conducting an orchestra.

CURRICULUM REQUIREMENTS	UNITS
MUCD 550 (8)	8
Ensemble (preferably chamber music)	4
MUHL 570 (2), MUHL 575 (2), MUHL 591 (2)	6
One course from MUHL 573 (2), MUHL 574 (2), MUHL 576 (2), MUHL 577 (2) or MUHL 578 (2)	2
MUCO 501 (2), MUCO 502 (2)	4
Electives	6
Two graduate recitals	0
Comprehensive review	0
	30

Master of Music in Jazz Studies

Prerequisite

The applicant must hold a Bachelor of Music degree with a major in jazz studies or its equivalent.

CURRICULUM REQUIREMENTS	UNITS
MUEN 505 or MUEN 529 (4), MUEN 532 (4)	8
MUHL 570 (2), MUHL 578 (2), MUHL electives at the 500 level (2)	6
MUJZ 443 (2) or MUJZ 545 (2)	2
MUJZ 547 (2), MUJZ 553 (8)	10
Electives	4
Two graduate recitals	0
Comprehensive review	0
	30

Master of Music in Music Education

Prerequisite

The applicant must hold a Bachelor of Music degree with a major in music education and have one year of teaching experience beyond supervised student teaching.

CURRICULUM REQUIREMENTS	UNITS
MUED 500 (3), MUED 505 (2), MUHL electives at the 500 level (4)	9
MUCD 441 (2) or MUCD 443 (2)	2
MUCO 501 (2) or MUCO 502 (2)	2
MUED 594ab (4), or MUED 590 (2) and MUED 592 (2)	4
Two courses from: MUED 501 (3), MUED 502 (3), MUED 503 (3) or MUED 504 (3)	6
Individual instruction (organ, piano, string instrument, vocal arts, or wind or percussion instrument), courses in conducting, composition or arranging, or ensemble	4
Electives in music	3

Comprehensive review	0
	30

Master of Music in Performance (Keyboard Collaborative Arts)

Prerequisite

Applicants must hold the Bachelor of Music degree with a major in piano or keyboard collaborative arts or equivalent background as determined by the collaborative arts faculty. It is strongly suggested that students who have not previously taken courses in Italian, French, English and German diction, or in song literature, enroll in the appropriate course(s) (MPVA 440, MPVA 441, MPVA 479) as part of their electives.

CURRICULUM REQUIREMENTS	UNITS
MUHL 570 (2), MUHL 578 (2), MUHL electives at the 500 level (4)	8
MPKS 481 (2), 553CP (8), 560 (2), 561 (2)	14
Electives in music	8
Two graduate recitals, one with voice(s), the other with instrument(s)	0
Comprehensive review	0
	30

Master of Music in Performance (Classical Guitar)

Prerequisite

The applicant must hold a bachelor's degree with a major in music with guitar as the principal instrument.

CURRICULUM REQUIREMENTS	UNITS
MUEN 526 (2), electives (2)	4
MUHL 570 (2), MUHL 578 (2), MUHL electives at the 500 level (2)	6
MPGU 427 (3), MPGU 553CG (8), MPGU 557 (4)	15
MPKS 481 (2)	2
Electives	3
Two graduate recitals	0
Comprehensive review	0
	30

Master of Music in Performance (Studio Guitar)

Prerequisite

The applicant must hold a bachelor's degree with a major in music with guitar as the principal instrument.

CURRICULUM REQUIREMENTS	UNITS
MUEN 526 (2), electives (2)	4
MUHL 570 (2), MUHL 578 (2), MUHL electives at the 500 level (2)	6
MPGU 553SG (8), MPGU 558 (4)	12
Music electives	4
Electives	4
Two graduate recitals	0
Comprehensive review	0
	30

Master of Music in Performance (Organ)

Prerequisite

The applicant must hold a Bachelor of Music degree with a major in organ or equivalent.

CURRICULUM REQUIREMENTS	UNITS
Ensemble	2
MUHL 570 (2), MUHL 578 (2), MUHL electives at the 500 level (4)	8
MPKS 481 (2), MPKS 553OR (8)	10
Music electives (at least two from the 500 level)	6
Electives	4
Graduate recital	0
Comprehensive review	0
	30

Master of Music in Performance (Piano)**Prerequisite**

The applicant must hold a Bachelor of Music degree in piano or equivalent.

CURRICULUM REQUIREMENTS	UNITS
Ensemble	2
MUHL 570 (2), MUHL electives at 500 level (6)	8
MPKS 553P (8), MPKS 450a (2), MPKS 520 (6)	16
Electives	4
Two graduate recitals	0
Comprehensive review	0
	30

Master of Music in Performance (Violin), (Viola), (Violoncello), (Double Bass) or (Harp)**Prerequisite**

The applicant must hold a Bachelor of Music degree with a major in a string instrument or equivalent.

CURRICULUM REQUIREMENTS	UNITS
MUCD 443	2
MUEN 527 (2) and MUEN 520, MUEN 530 or MUEN 550 (4)	6
MUHL 570 (2), MUHL 578 (2), MUHL electives at the 500 level (4)	8
MPKS 481	2
MPST 553 (8)	8
Music electives	4
Graduate recital	0
Comprehensive review	0
	30

Master of Music in Performance (Vocal Arts)**Prerequisite**

The applicant must hold a Bachelor of Music degree with a major in vocal arts. Students who have not had formal training in foreign language, diction, vocal pedagogy, acting for singers, song literature and in Italian, French or German languages must show competency in these areas through examination or complete appropriate course work with a grade of B or higher.

CURRICULUM REQUIREMENTS	UNITS
Ensemble	2
MUHL 570 (2), electives at 500 level (2)	4
MPVA 443 (2), MPVA 540 (2), MPVA 541 (2), MPVA 553VO (8)	14
Electives in music (400 or 500 level)	5
Electives	5
Graduate recital	0
Comprehensive review	0
	30

Comprehensive Review

A final examination in vocal pedagogy, art song and oratorio literature and diction will be administered by the vocal arts faculty. Students are required to write extensive program notes for the degree recital.

USC Opera

USC Opera is an integral part of the Vocal Arts Department, providing career development opportunities for singers, coach/pianists, conductors and directors. The program includes instruction in opera history and literature, coaching techniques, stage direction, body movement for singers, stage training, role study and analysis.

The opera workshop is a repertory experience involving preparation and performance of operatic works and excerpts for performance both on and off the USC campus.

Master of Music in Performance (Flute), (Oboe), (Clarinet), (Bassoon), (Saxophone), (French Horn), (Trumpet), (Trombone), (Tuba) or (Percussion)

Prerequisite

The applicant must hold a Bachelor of Music degree with a major in a wind instrument or percussion or equivalent.

CURRICULUM REQUIREMENTS	UNITS
MUCD 443	2
MUEN 523 (4), MUEN 525 (4)	8
MUHL 570 (2), MUHL 578 (2), MUHL electives at the 500 level (4)	8
MPWP 481 or MPWP 482 (2), MPWP 551 (2), MPWP 553 (8)	12
Graduate recital	0
Comprehensive review	0
	30

Master of Music in Sacred Music

Prerequisite

Applicants must hold a Bachelor of Music degree or its equivalent. Completed course work must include at least the following or their equivalent: Conducting MUCD 340, MUCD 343 and MUCD 441; Music History and Literature MUHL 331 and MUHL 332; Theory and Composition MUCO 232b, MUCO 233b and MUCO 338x. One year of German or French is strongly recommended. Applicants must have attained senior standing in a principal performance medium.

Keyboard and Voice Proficiency

Proficiency tests in keyboard and voice will be given by the choral and sacred music faculty during the student's first semester in residence to determine if additional study in either medium is required.

Comprehensive Review

A final oral examination in sacred music and related areas will be administered by the sacred and choral music faculty.

CURRICULUM REQUIREMENTS	UNITS
MUCM 440** (2), MUCM 541** (2), MUCM 542** (2)	6
MSCR 473 or MSCR 475	2
MSCR 571 (2), MSCR 572 (2), MSCR 590 (2)	6
MSCR 474 or MPVA 439	2
MUCD 541**	4
Ensemble*	2
MUHL 570 (2), MUHL electives at the 500 level (2)	4
MPKS 501** (PI or OR) or MPVA 501**	2
Electives	2
Graduate recital or project	0
Comprehensive review	0
Total:	30

*Sacred music majors must participate in a choral ensemble chosen from MUEN 508, MUEN 510, MUEN 511 or MUEN 512 each semester if enrolled for 4 or more units. In some cases, large instrumental ensemble courses may be substituted.

**In some cases, MUHL 500-level courses and/or private instruction in organ, piano, voice or guitar may be substituted for MUCM 440, MUCM 541, MUCM 542 and MUCD 541. In some cases, instruction in guitar or another instrument may be substituted for MPKS 501 or MPVA 501.

Thornton School of Music

Graduate Degrees

Master of Arts

This degree is under the jurisdiction of the Graduate School. Students should also refer to the Graduate School section of this catalogue for general regulations.

Departmental Requirements

Applicants will be evaluated on the basis of scores on the Graduate Record Examinations, transcripts of previous college courses, a research paper and letters of reference.

Regular (classified) standing is achieved when the general test of the Graduate Record Examinations has been taken, and when the Music Graduate Entrance Examinations have been completed satisfactorily. Remedial course work, if recommended, may be substituted for repetition of examinations.

Language Requirement

Students are required to demonstrate a reading knowledge by passing an examination in one foreign language chosen by the student from among French, German, Italian or Latin. This requirement must be passed prior to the comprehensive examination.

Prerequisites

Applicants should have an undergraduate degree with a major in music or the equivalent, and a substantial background in languages, arts and letters.

Degree Requirements for the Music History and Literature Emphasis

REQUIREMENTS	UNITS
MUHL 570	2
MUHL courses numbered 579, 600–699	6
Courses in history, language, literature or the arts other than music	8

Degree Requirements for the Early Music Performance Emphasis

REQUIREMENTS	UNITS
MUEN 550	3
MUHL 570 (2), MUHL 572 (2), MUHL 574 (2), MUHL 575 (2), MUHL 589 (2), MUHL 591 (2), MUHL 594ab (2-2),	16
MPEM 450 (2), MPEM 553 (5)	7
Elective in music	2
Electives in letters, arts and sciences	4
	32

The thesis will include the planning, research, preparation and leadership of a full-length program in early music. This practical work will be supported by a written essay that deals, as appropriate, with historical data sources, authentic performance practices and a stylistic assessment of the repertoire that is performed. In lieu of a comprehensive examination, candidates for the Early Music Performance Emphasis will be required to pass periodic reviews to demonstrate progress.

Thornton School of Music

Graduate Degrees

Non-Degree Programs

Artist Diploma Program

This program is designed for young artists of exceptional ability and musical sensitivity who plan careers as solo performers. The Artist Diploma Program provides young artists with the opportunity to devote their full time to concentrated study and practice for the duration of their assigned programs.

Entrance Requirements

Following the recommendation of the student's major department, a performance audition, consisting of a full-length recital before the Artist Diploma Committee, is required.

Curriculum Requirements

A minimum of 16 units at the 754 level (from MPEM, MPGU, MPKS, MPST, MPVA or MPWP) and four full-length recitals are required. This program typically requires two to three consecutive years of study for completion.

Graduate Certificate in Arts Leadership

Certificate in Arts Leadership (ARTL)

The graduate program in arts leadership is a two-semester certificate program for artists, arts administrators and cultural workers of all types to develop the skills necessary to become successful leaders in the arts and arts organizations in a rapidly changing and radically altered contemporary world. The program is based in the Thornton School of Music, but it is designed to be applicable for artists/students engaged in any of the arts disciplines who want to develop their leadership skills in the hybrid and holistic environment of the contemporary arts. The program is highly individualized and deeply student centered in its approach, with simultaneous emphases on research, discovery, theory and current practice. With strong faculty mentorship and guidance from the director of the program and other working professionals in the field, students explore the dimensions of the most current issues and ideas while developing specific real-world applications of these ideas to their own practice as artists and leaders.

The program consists of a minimum of 18 units which can be completed in two semesters. The program begins with a 2-unit gateway course (ARTL 500) which introduces the students to the varied, complex and contentious issues in the arts and arts leadership that currently exist in the contemporary arts world. From this experience, students will develop a life plan that examines their own career and life trajectory for the next several years, providing a guidepost for their own personal development in arts leadership. Students will take four core courses including ARTL 501, which focuses on a deep understanding and application of the challenges of executive leadership in the arts and ARTL 502, which looks at major environmental trends affecting the arts and how that impacts the student's leadership role in the arts. Essential to all of these courses is developing the ability to think, speak and write critically about the arts in the contemporary world, key components of strong arts leadership. There is also a two semester practicum, ARTL 510, in which the student creates, develops and completes an actual arts leadership project of his or her own choosing, supported by faculty mentorship and the cohort of other practicum students.

Admission to the program is by application, reviewed and approved by the director of the program. Admission to the practicum requires a project proposal to be created by the student and approved by the director of the program.

CORE COURSES		UNITS
ARTL 500	Arts Leadership and Arts Entrepreneurship	2
ARTL 501	Executive Leadership in the Arts	2
ARTL 502	Issues in the Arts and the Contemporary World	2
ARTL 503	Arts Organizations: Innovation and New Models	2
ARTL 504	Arts and Community: Current Practice and New Visions	2
ARTL 510	Arts Leadership Practicum (2 semesters)	2-2
		14

SELECT A MINIMUM OF 4 UNITS FROM THE FOLLOWING COURSES*		UNITS
MUIN 570	The Music Industry	4
PAS 561	Curatorial/Organizational Models	2
PAS 571	Histories of Art in the Public Sphere	3
PAS 572	Contemporary Art in the Public Sphere	3
PAS 585	Theorizing the Public Realm	3

**Prerequisite: PPD 675 and PPD 689

Minimum total units: 18

Graduate Certificate Program in Performance

This two-year graduate-level program is designed for students who have completed their undergraduate education in music, or its equivalent, and intend to concentrate their energies on the full-time development of their discipline.

Entrance Requirements

A performance audition is required with repertory to be determined by the student's primary department.

Curriculum Requirements

The requirements for this program consist of 16 units of Graduate Certificate Performance (4 units per semester of MPEM 554, MPGU 554, MPKS 554, MPST 554, MPVA 554, MPWP 554 or MUJZ 554). Graduate Certificate Performance encompasses individual instruction, studio class and two ensembles or the equivalent as appropriate to the discipline.

Graduate Certificate Program in Scoring for Motion Pictures and Television

This one-year program is designed for students who hold the Bachelor of Music in Composition or its equivalent. Students in the SMPTV program must maintain a 3.0 GPA (A = 4.0), with no course grade lower than a C (2.0). Work graded C- or below is not acceptable for credit toward the certificate.

Entrance Requirements

Specific entrance requirements are reviewed on an annual basis and published in the Application Requirements section online at usc.edu/music.

--	----

Thornton School of Music

Graduate Degrees

Doctor of Musical Arts

Degree Prerequisites

DMA applicants must complete the appropriate master of music degree program or its equivalent.

Admission

Refer to School of Music Graduate Degrees, Admission Requirements.

Graduate Record Examinations

Scores from the General Test of the Graduate Record Examinations (GRE) are required for application and admission to certain Doctor of Musical Arts degree programs. Consult the School of Music Office of Admissions for more information. Test scores on the GRE that are more than five years old at the time of application are not accepted.

Graduate Committee Interview

Before the completion of 16 units beyond the master's degree and before permission to present the second doctoral recital is requested, doctoral students must submit a detailed curriculum vitae to the Graduate

Committee of the School of Music summarizing their background and objectives. The student will be evaluated on musicianship and general academic qualifications, teaching experience and the validity and quality of creative, literary or performance projects submitted. The committee determines the student's continuation in the program, proposed areas of concentration and the qualifying exam committee members.

Course Requirements

Each student is required to prepare four areas of concentration: the major field, an academic field (chosen from among musicology, theory and analysis, music education, choral music or sacred music), and elective areas selected in consultation with an adviser from two of the following: theory or compositional skills (composition, counterpoint, orchestration, band arranging or choral arranging); performance, early music or jazz studies; music education; sacred or choral music; conducting; performance pedagogy; electroacoustic media; a field outside of music. The academic field may not duplicate a major or an elective field. Admission to elective and academic fields must be approved by the department concerned, prior to the Graduate Committee interview.

The elective and academic fields are supported by courses that are determined by the department in which these fields are administered. Six to 8 units are taken in elective fields; 8 to 10 units in the academic field. No more than two of the four fields may be under the guidance of the same department within the School of Music, and at least one of the elective fields must result in a written examination as part of the qualifying examinations.

Required courses for each major curriculum are listed subsequently in this catalogue. Special requirements in any of the four areas of concentration (if any) are determined by the qualifying exam committee member responsible for that area.

A minimum of 65 graduate units beyond the bachelor's degree are required to complete the degree. Fifty-five or more units must be in music, 12 of these beyond the master's level must be in the major. At least 40 of these must be at the 500 level or higher. All course work earned under these requirements for a doctoral degree is considered to be obsolete after 10 years from the date of completion of such work and may not be used to fulfill degree requirements.

Residence Requirement

A minimum of two years of full-time study beyond the Master of Music degree is required for the Doctor of Musical Arts. At least one year of full-time study beyond the master's degree (8 units or more per semester) must be in residence at USC.

Grade Point Average Requirements

A minimum grade point average of 3.0 (A = 4.0) is required for all graduate course units in music. A grade of B or higher is required for all courses in the major.

Transfer Credit

The Degree Progress Department in the Office of Academic Records and Registrar determines whether course work taken elsewhere is available for transfer credit. A maximum of 30 units of transfer credit may be applied toward a doctoral degree in music. Whether such credit is applicable toward a specific requirement in a major or minor field is determined by the chair of the department in the School of Music in which the subject is taught, pending approval by the dean of the Thornton School of Music. Transfer credit petitions must be filed with the appropriate faculty chair and the chair's decision made no later than the end of the first year in either the master's or doctoral program. Transfer work must have been completed within 10 years of admission to the DMA program to be applied toward that degree.

Foreign Language

A reading knowledge of French, German, Italian or Spanish is required of all students. Departments within the Thornton School may require additional language skills. All language requirements must be fulfilled one semester before the qualifying examination at the latest.

Qualifying Exam Committee

The qualifying exam committee is composed of at least five members: two faculty from the major department,

one of whom will serve as chair, and a faculty member from each of the three other areas of concentration. At least three members of a committee must be drawn from tenured and tenure-track faculty.

The committee administers the written and oral parts of the qualifying examination. The committee continues to serve until the qualifying examination has been passed, the dissertation topic approved (if applicable) and the student is admitted to candidacy. For students in curricula which require recitals, the qualifying exam committee serves as the recital committee and is responsible for the format, content, scheduling, and approval of the required performances.

Qualifying Examination

The qualifying examination for the DMA is administered by the student's qualifying exam committee. It is comprehensive, partly written and partly oral, and designed in part to test the student's fitness for independence as a performer, composer, teacher, researcher and/or scholar. The student must obtain permission from the qualifying exam committee to take the qualifying examination and schedule it at least two months in advance to ensure the committee's availability. The examination may be taken either during the final semester of course work (except dissertation or individual instruction) or within two semesters immediately after, provided that all members of the qualifying exam committee are available to administer it. In degree programs that require the presentation of four major recitals, at least two major recitals must be presented prior to the administration of the qualifying examination. Qualifying examinations will not be scheduled during summer sessions except under extraordinary circumstances and only with the written approval of all qualifying exam committee members. All portions of the examination must be completed within one month.

Written examinations are prepared and read by the qualifying exam committee. All of the student's areas of concentration, except performance, conducting and composition, will be covered in a written examination or comparable project. The examination in performance, conducting or composition normally is a public recital, evaluated by appropriate members of the qualifying exam committee. If the written examinations, comparable project(s), or recital(s) are judged to be satisfactory, an oral examination is then given. This examination covers in depth topics discussed in the written examinations and/or new material.

The two representatives of the department and the academic minor representative must be present at the oral examination and render a judgment on the acceptability of the qualifying examinations as a whole. The representatives of the two elective fields, at their discretion, may take part in the oral examination, especially if they feel that the project, recital or written examination passed by the candidate for their field should be explored further. Their presence is not required if they feel that the candidate has demonstrated knowledge and accomplishments appropriate for an elective field in their disciplines. The examinations will be reported as passing if there is no more than one dissenting vote on the qualifying exam committee. A student must pass both the written and oral examinations to pass the qualifying examination. A pass on the examination cannot be made contingent upon any form of additional work.

If a student fails the qualifying examination, the qualifying exam committee may permit the student to repeat it once at a mutually satisfactory time within a period of not less than six months nor more than one year from the date of the first examination. A student may not take the qualifying examination more than twice.

Admission to Candidacy

Admission to candidacy occurs after the student has passed the qualifying examination, upon formal action of the dean of the Thornton School. The dissertation or one final recital must be completed *after* admission to candidacy.

Doctoral Dissertation

A dissertation based on original investigation is required of candidates in composition, music education and choral music. The dissertation must reveal scholarly ability, technical mastery, capacity for independent research and originality in creative thought.

Dissertation Committee

After the qualifying exam committee recommends admission to candidacy and approves the dissertation, it is reduced to three members. This smaller committee guides the student through the completion of the final

project. Additional members may be added at the discretion of the chair of the committee if the topic requires special expertise.

Registration

The student must register in 794 Dissertation each semester after admission to candidacy until degree requirements are completed. Registration for the dissertation in no less than two regular term semesters following admission to candidacy entitles the candidate to supervision by the dissertation committee. If the dissertation is not completed and accepted within two semesters, the candidate must register for 794 each semester thereafter until the document has been accepted. No more than 8 units of credit in 794 may be accumulated regardless of the number of semesters the candidate may be required to register.

A candidate who must withdraw temporarily from registration in 794 for a semester must formally report this before the beginning of that semester to the Office of Doctoral Programs, Thornton School of Music, requesting by petition a leave of absence. During a leave of absence the candidate will not be entitled to assistance from the qualifying exam committee or to the use of university facilities. Leave will be granted only under exceptional circumstances.

Format for Theses and Dissertations

All theses and dissertations submitted for requirements for graduate degrees must conform to university regulations in format and method of preparation. See Theses and Dissertations.

Defense of the Dissertation

After meeting all requirements including the qualifying examination, the candidate must defend the dissertation. This defense occurs to determine for the committee that the candidate has attained the stage of scholarly advancement and power of investigation demanded for recommendation to the doctorate. While this oral defense is open to the general university community, only the members of the dissertation committee have the authority to recommend its acceptance or denial. The recommendation must be unanimous.

At least seven weeks before the scheduled date of the defense of the dissertation, written approval by all members of the candidate's dissertation committee must be filed with the dean of the Thornton School of Music. The typed copy for the abstract of the dissertation is due at this time.

A candidate may defend the dissertation on the basis of an approved preliminary copy. If the defense is satisfactory and the committee is satisfied with the manuscript as presented, the committee then signs the Approval to Submit Defended and Final Copy of the Doctoral Work form. If additional work is required, the form is left unsigned until the work has been approved.

The final electronic PDF copy of the dissertation, together with signed signature sheet and approval forms, must be presented to the Thesis Editor, the Graduate School, GFS 315, by the Graduate School's submission date and times. Approval of format and acceptance by the Graduate School must be presented to the dean of the Thornton School of Music at least one week before the end of the semester.

Abstract of Dissertation

Since the abstract of the dissertation is published in Dissertation Abstracts International, it should be written with care and be representative of the final draft of the dissertation.

Time Schedule

The DMA is established on the assumption that a well-qualified student can complete it in three years of full-time work. If the student pursues part-time graduate study, or if the field of graduate work is not that of undergraduate study, more time may be required.

The time limit for completing the Doctor of Musical Arts degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the doctoral program, the time limit for completing the Doctor of Musical Arts degree is six years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

Basic DMA Curriculum

REQUIRED FOR ALL DMA CANDIDATES	UNITS
MUCD 441* (2), MUCD 443 (2)	4
MUCO 501 (2), MUCO 502 (2)	4
MUED 505	2
MUHL 570	2
MUHL electives numbered 500 through 695	6
Ensemble	2
	20

**Choral music majors are exempt from taking MUCD 441.*

Courses with similar content taken for graduate credit in another accredited institution may be substituted, subject to departmental approval. Master's degree credit for ensemble taken at USC may fulfill this requirement, subject to departmental approval.

Choral Music Major

A keyboard proficiency test will be given by the choral faculty during the student's first semester in residence to determine if additional study in keyboard is required.

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum**	20
MUCM 440* (2), MUCM 541* (2), MUCM 542* (2), MUCM 641 (2), MUCM 794ab (2-2)	12
MSCR 571	2
MUCO 441 (2)	2
MUCD 541 (4), MUCD 641 (2), MUCD 653 (2)	8
Ensemble (500 level; choral music majors must participate in a choral ensemble each semester if enrolled for 4 or more units)	2
Electives	19
Conduct two principal choral concerts (at least one of which will include instrumental ensemble)	0
	65

**May be taken as part of the master's degree.*

***Choral music majors are not required to take MUCD 441.*

Composition Major

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum	20
MUCO 536 (2), MUCO 592 (4), MUCO 636 (2), MUCO 637 (4), MUCO 737 (4), MUCO 794ab (4)	20
Electives	25
Graduate recital	0
	65

Jazz Studies Major

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum	20
MUEN 532	4
MUJZ 443 (2), MUJZ 545 (2), MUJZ 547 (4), MUJZ 653 (8), MUJZ 688 (4)	20

Electives	21
Two recitals of original compositions and arrangements written while in the DMA program	0
Lecture-recital in conjunction with an appropriate research project	0
	65

Music Education Major

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum*	20
MUED 500 (3), MUED 605 (3), MUED 606 (3), MUED 607 (3), MUED 790 (1), MUED 791 (3), MUED 794ab (4)	20
Two courses from: MUED 501 (3), MUED 502 (3), MUED 503 (3), MUED 504 (3)	6
One course from: MUED 792 (3), MUED 793 (3)	3
Electives	16
	65

*MUED 500 may be taken as a substitute for MUHL 570 in the basic DMA curriculum.

Performance Major

It is the objective of the performance curriculum to combine high standards of performance with intellectual accomplishments appropriate to a university degree. Candidates electing this major must present at least four major public appearances: two solo recitals and two other appropriate appearances. The exact format, content and scheduling of the four appearances are the responsibility of the candidate's qualifying exam committee.

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum	20
Individual instruction 653 (take organ, string instrument, vocal arts, wind instrument or percussion for a maximum of 12 units)	12
Electives	33
Two solo recitals and two other appropriate performances	0
	65

String and wind instrument and percussion majors must participate in a large ensemble each semester if enrolled in four or more units.

Performance Major — Piano

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum	20
MPKS 653 (12), MPKS 520 (6)	18
Electives	27
Four graduate recitals: two solo recitals, one chamber recital, and one lecture-recital	0
	65

Performance Major — Keyboard Collaborative Arts

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum	20
MPKS 481 (2), MPKS 560 (2), MPKS 561 (2), MPKS 653 (12)	18
Electives	27
Four doctoral level recitals; one with voice(s), one with instrument(s), one lecture recital, and other	

recital as approved	0
	65

The exact format, content and scheduling of the four graduate recitals are the responsibility of the candidate's major professor.

Performance Major — Early Music

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum*	20
MPEM 653 (8); MPEM 650 (4)	12
MUHL 572 (2), MUHL 589 (2), MUHL 591 (2)	6
MUEN 650	4
Electives	23
Four graduate recitals: two as soloist and ensemble director, one lecture-recital, and one recital of the student's choice	0
	65

*Must include MUHL 574 and MUHL 575.

Performance Major — Classical Guitar

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum	20
MPGU 653 (12), MPGU 427 (3)	15
MPKS 481	2
Electives	28
Two solo recitals and two other appropriate performances	0
	65

Performance Major — Studio Guitar

CURRICULUM REQUIREMENTS	UNITS
Basic DMA curriculum	20
MPGU 558 (4), MPGU 653 (12)	16
MUEN 526 (4)	4
Electives	25
Four doctoral recitals, one of which must be a lecture recital in conjunction with an appropriate research project	0
	65

Sacred Music Major

Proficiency tests in both keyboard and voice will be given by the choral and sacred music faculty during the student's first semester in residence to determine if additional study in either area is required.

CURRICULUM REQUIREMENTS	UNITS
Basic D.M.A. Curriculum	20
MSCR 474 or MPVA 439****	2
MSCR 571*** (2), MSCR 572*** (2)	4
MSCR 790 or Mxxx-501	4
MSCR 794ab Dissertation/Final Project	4

MUEN xxx Ensemble*	2
Choose 4 units from the following:	
MSCR 473, MSCR 475 or MUHL 588	4
Electives to fulfill the academic field and two elective fields**	25
Lecture/Recital	0
Total required for degree:	65

*Sacred music majors must participate in a choral ensemble chosen from MUEN 508, MUEN 510, MUEN 511, or MUEN 512 each semester if enrolled for 4 or more units.

**Requires one elective field in a performance area.

***If these courses have already been taken toward a Master of Music degree at USC, then 500-level MUHL courses or 500-level MUCO analysis courses should be substituted, on consultation with the Sacred Music faculty.

****MPVA 439 has a prerequisite of MPVA 438. Waiver of MPVA 438 will be determined by the department, pending students' knowledge and background in vocal pedagogy.

Thornton School of Music

Graduate Degrees

Doctor of Philosophy

The Doctor of Philosophy degree with a major in music is granted by the Graduate School. Candidates for the Ph.D. in music should also refer to the Graduate School section of this catalogue for general regulations.

A substantial background in music and liberal arts is required. Graduate course requirements for the Ph.D. are adapted to the needs and research interests of the individual student. A minimum of 60 post-baccalaureate units is required.

Foreign Language Requirements

Students are required to demonstrate a reading knowledge by passing an examination in German and one other foreign language chosen by the student from among French, Italian or Latin. With the permission of the chair of the qualifying exam committee, a foreign language relevant to the dissertation may be chosen in place of French, Italian or Latin. The language requirement for the M.A. degree may be applied toward the Ph.D. Doctoral language requirements should be passed as early as possible, but, at latest, during the fourth semester of course work.

Screening Procedure

Before the completion of 24 units of graduate work at USC and with the approval of the department chair, students must be interviewed by the curriculum committee of the School of Music. Continuance in course work will be contingent upon approval of the committee. Ph.D. candidates in musicology who did not receive an M.A. degree from USC must take the M.A. comprehensive examination in historical musicology prior to the interview. Continuance in course work will be contingent upon passing these examinations.

Historical Musicology Emphasis

REQUIREMENTS	UNITS
MUHL 570	2
Courses selected from: MUHL 579, MUHL 600–699	12
Electives in history, language, literature or arts other than music	8

Courses drawn from: MUHL 500–699, MUCO 501, MUCO 502	10
Electives in music, letters, arts and sciences	24
Dissertation (MUHL 794ab)	4
	60

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ARTS LEADERSHIP (ARTL)

ARTL 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit. Open only to juniors and seniors.

ARTL 499 Special Topics (2-4, max 8) Selected topics of current interest.

ARTL 500 Arts Leadership and Arts Entrepreneurship (2, FaSp) Introduction to key issues involved in both managing an arts organization and creating sustainable enterprise. For students in music, arts, public policy, and related fields.

ARTL 501 Executive Leadership in the Arts (2, FaSp) Investigation into a variety of leadership approaches within an arts organization, with a focus on the development of the student's own leadership capacity.

ARTL 502 Issues in the Arts and the Contemporary World (2, FaSp) Examination of major environmental trends including changing demographics, new business models, rapidly developing technology and globalization, and understanding their implications for the arts.

ARTL 503 Arts Organizations: Innovation and New Models (2, FaSp) Designed for current and future arts leaders interested in looking critically at organizational practice and bringing innovative solutions to old problems in a contemporary context.

ARTL 504 Arts and the Community: Current Practice and New Visions (2, FaSp) Exploration of a range of ideas, ideologies and strategies that have historically been used to connect arts organizations to their communities.

ARTL 510 Arts Leadership Practicum (2, max 4, FaSp) Year-long practicum which puts ideas and concepts into practice. Each student will conceptualize, develop, and complete an arts project of his/her own choosing.

ARTL 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

ARTL 599 Special Topics (2-4, max 8) Selected topics of current interest.

ARTL 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Thornton School of Music

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

CHORAL MUSIC (MUCM)

MUCM 320 Introduction to Choral Music (2) An introduction to the many facets of choral music. Grounding in the intellectual and practical issues of choirs, singing, and choral literature. *Recommended preparation:* ability to read music.

MUCM 390 Special Problems (1-4) Supervised, individual studies. No more than one registration is permitted. Enrollment by petition only.

MUCM 440 Choral Development (2) Problems of achieving proper balance, blend, intonation, diction, precision, etc., in choral groups; criteria for selection of repertoire for particular groups. Junior standing in

music.

MUCM 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

MUCM 499 Special Topics (2-4, max 8) Selected topics of current interest.

MUCM 541 Choral Literature I (2) Choral composition from c. 1500 to 1800. Performance and analysis of representative works.

MUCM 542 Choral Literature II (2) 19th and 20th century choral works; criteria for program building.

MUCM 543 Seminar in Choral Music (2, max 4) Advanced choral techniques; historical, analytical and performance problems. *Prerequisite:* MUCM 641.

MUCM 590 Directed Research (1-12) Supervised research in preparation for the Master's recital. Graded CR/NC.

MUCM 599 Special Topics (2-4, max 8) Selected topics of current interest.

MUCM 641 Choral Literature III (2) Detailed study of selected major choral works; historical context, score analysis, performance practices. *Prerequisite:* MUCM 541, MUCM 542.

MUCM 643 Seminar in Choral Music II (2, max 4, Sp) Continuation of MUCM 543, with concentration on the conducting problems in major choral-orchestral works.

MUCM 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MUCM 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Thornton School of Music

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

COMPOSITION (MUCO)

MUCO 101x Fundamentals of Music Theory (2, FaSp) An introductory course in music theory required for those majors in need of remedial training, and available to the general student who wishes to develop music writing skills. Not available for credit to B.M. and B.A. music majors. *Recommended preparation:* ability to read music.

MUCO 130abx Basics of Music Theory (a: 3, Fa; b: 3, Sp) Introduction to music theory; scales, intervals, principles of common practice and popular music harmony; melodic, harmonic, and structural analysis; 20th century developments. Not available for credit to B.M. majors.

MUCO 131ab Harmony in Popular Music (2-2, FaSpSm) Study of harmony used in the popular music idiom, as well as diminished chord patterns, modulation techniques, basic modal theory, and principles of melodic construction. *Prerequisite:* a: MUCO 133b; b: MUCO 131a.

MUCO 132ab Aural Skills I (a: 2, Fa; b: 2, Sp) Sight-singing, dictation, related keyboard application.

MUCO 133ab Theory I (a: 3, Fa; b: 3, Sp) a: Notation, scales, intervals; introduction to counterpoint;

harmonic principles of the common practice period; analysis, written work. *b*: Continuation of MUCO 133a; elements of form; application of analysis to performance. Concurrent registration in Aural Skills required.

MUCO 135 Counterpoint I (2, FaSpSm) The study of the techniques of modal counterpoint; exercises in two-, three- and four-part writing in 16th century style. *Corequisite*: MUCO 137a.

MUCO 137ab Introduction to Composition (2-2, FaSp) Beginning exercises in composition, study and class discussion of assigned scores and recordings.

MUCO 140 Music for Dancers (2) Practical understanding and perception of music coupled with the ability to follow a score and understand the work in relation to dance.

MUCO 221abx Composition for Non-Majors (2-2, FaSp) Introduction to the composition of concert music. Includes set exercises, free composition, study of selected compositions. Intended for interested, qualified students not majoring in composition. Not available for degree credit to composition majors. *Prerequisite*: MUCO 221a; *recommended preparation*: MUCO 130bx, MUCO 133b.

MUCO 232ab Aural Skills II (a: 2, Fa; b: 2, Sp) Continuation of MUCO 132ab.

MUCO 233ab Theory II (a: 3, Fa; b: 3, Sp) *a*: Analysis of representative pieces from the classic and romantic periods; exercises in composition. *b*: Survey of 20th century developments; composition utilizing 20th century techniques. *Prerequisite*: MUCO 133b.

MUCO 235 Counterpoint II (2, Sp) Studies in tonal counterpoint; two-, three- and four-part counterpoint in 18th century style; polyphonic variations; inventions. *Prerequisite*: MUCO 137b.

MUCO 236 Orchestration I (2, Fa) Introduction to the principles of instrumentation; ranges techniques, timbres; transpositions of orchestral instruments; beginning exercises in orchestration. *Prerequisite*: MUCO 137b.

MUCO 237ab Composition I (4-4, FaSp) Composition in shorter forms, continuation of score analysis and listening assignments. *Prerequisite*: MUCO 137b.

MUCO 300 Theory Review (1, FaSpSm) Review of materials covered in Theory I and II. For students whose entrance examination in music theory indicates the need for further study.

MUCO 321x Composition for Non-Majors II (1-2, max 8, FaSpSm) Individual instruction in composition for non-composition majors. Continuation of MUCO 221abx. Not open to B.M. in composition majors. *Prerequisite*: MUCO 221bx.

MUCO 333 Aural Skills Review (1, FaSp) Review of the materials covered in Aural Skills I, II, and III. For students whose entrance examination in aural skills indicates the need for further study.

MUCO 336ab Orchestration II (a: 2, Fa; b: 2, Sp) Intermediate exercises in orchestration, including scoring for chamber ensembles and orchestra; study of the history of orchestration. *Prerequisite*: MUCO 236.

MUCO 337ab Composition II (4, Fa; 4, Sp) Continuation of MUCO 237; composition in larger forms. *Prerequisite*: MUCO 237b.

MUCO 338x Elementary Orchestration (2, Fa) Range, techniques, timbre, transposition of orchestral instruments; exercises in orchestration. Not available for credit to Composition majors. *Recommended preparation*: MUCO 233b.

MUCO 339 Orchestration Review (1, FaSm) Review of materials covered in elementary orchestration; for students whose entrance examination in orchestration indicates a need for further study.

MUCO 341 Counterpoint Review (1, SpSm) Review of materials covered in tonal counterpoint. For students whose entrance examination in counterpoint indicates the need for further study. For graduate students only.

MUCO 360 Music Notation and Copying (1) Development of skills in music calligraphy.

MUCO 370ab Arranging for the Recording Media (2-2) Arranging and composing for studio recording ensembles.

MUCO 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

MUCO 406ab Contemporary Notation (2-2) Notating new music; study and comparison of representative scores.

MUCO 422 Composers and Interdisciplinary Art Studies (2, max 6) A structured collaboration between composers and artists outside of music to explore an interdisciplinary area in an environment of practical collaborative creation. *Prerequisite:* MUCO 133b.

MUCO 425 Instrumental Music of Debussy and Ravel (2) Critical examination of the piano, chamber, and orchestral scores; comparison of styles, techniques and aesthetics of these "Impressionist" composers. *Prerequisite:* MUCO 336a or MUCO 338x; MUHL 331; MUHL 332.

MUCO 432ab Advanced Theory (1 or 2; 1 or 2) Special problems in music theory.

MUCO 434 Analytical Techniques (2) Selected analytical topics. *Prerequisite:* MUCO 232b, MUCO 233b.

MUCO 435 Counterpoint III (2, Fa) Canon and fugue; 19th and 20th century developments. *Prerequisite:* MUCO 235.

MUCO 436 Orchestration III (2, Sp) Continuation of Orchestration II. *Prerequisite:* MUCO 336ab.

MUCO 437ab Composition III (2-2, FaSp) Individual instruction in composition; preparation for senior recital. Not intended for SMPTV students. *Prerequisite:* MUCO 337b.

MUCO 438 Arranging for Marching Band (2) Fundamental concepts; instrumental capabilities; notation; color and scoring; modulation; percussion writing. *Prerequisite:* MUCO 336b or MUCO 338x.

MUCO 439 Band Arranging (2, max 4) Characteristics and use of individual instruments; writing for separate choirs; chamber and solo writing; scoring piano, organ, and orchestral music for band. *Prerequisite:* MUCO 237b, MUCO 336b or MUCO 338x.

MUCO 440ab Composition for Films and Television (2-2) Planning, timing, composing, and orchestrating music for dramatic and documentary films and television programs. *Prerequisite:* MUCO 336b or MUCO 338x, MUCO 337b.

MUCO 441 Choral Arranging (1-2, max 4, FaSpSm) Arranging and composing for chorus. *Prerequisite:* MUCO 233b.

MUCO 442ab History of Film Music Scoring (a: 2, Fa; b: 2, Sp) A comprehensive survey of the craft of composing music for motion pictures and television, combining film music history and score analysis, geared specifically to composers. Open only to students in the Advanced Studies Certificate Program in Scoring for Motion Pictures and Television and the B.M. in Composition (Film Scoring).

MUCO 443ab Film Score Analysis and Preparation (2-2, FaSp) Applied techniques in film music analysis and preparation for scoring.

MUCO 470 Electroacoustic Composition (2) Electronic music for the composer: history of means and styles, aesthetic issues and practical problems, computer usages, bibliography and repertoire. *Recommended preparation:* MTEC 474a.

MUCO 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

MUCO 499 Special Topics (2-4, max 8) Selected topics of current interest.

MUCO 501 Introduction to the Analysis of Tonal Music (2, FaSp) Survey of common practice period (1650–1900) approaches to phrase design, tonal organization and type-forms (binary, ternary, rondo, sonata).

MUCO 502 Introduction to the Analysis of Post-Tonal Music (2, FaSp) Introductory survey of 20th/21st century approaches to the organization of pitch (serial, modal, extended tonal, etc.), rhythm, texture and form.

MUCO 520 Composition Forum (1, max 2, FaSp) Graded CR/NC.

MUCO 521x Composition for Non-Majors III (1-2, max 8, FaSpSm) Individual instruction in composition. Not open to graduate students in composition. *Prerequisite:* submission of portfolio of musical compositions.

MUCO 522ab Sketching and Scoring for Film and TV (2-2, FaSp) Applying techniques of music composition, orchestration and conducting towards creating original dramatic scores for film and TV.

MUCO 523ab Advanced Application of Film Music Technology (2-2, FaSp) Applying advanced state of the art technologies to the art of film music, including synthesizers, samplers, digital audio workstations and hard disk recording.

MUCO 533ab Analytical Approaches to Tonal Music (2-2, FaSp) *a:* Introducing to essential structural and prolongational aspects of Schenkerian theory. *b:* Application of the Schenkerian methods to individual movements and short pieces. *Prerequisite:* MUCO 501.

MUCO 536 Advanced Orchestration I (1-4, max 4, FaSp) Continuation of Orchestration III with emphasis on contemporary techniques.

MUCO 537 Advanced Composition I (1 or 2, max 8) For graduates with evidence of preparation for advanced work.

MUCO 538ab Analytical Approaches to Post-Tonal Music from 1908–1950 (2-2, FaSp) *a:* The breakdown of tonality, rise of atonal/pantonal pitch organization, new and extended approaches to tonality, modality. *b:* Continuation of 538*a*; twelve-tone methods, just tuning systems, new approaches to rhythm, texture, timbre. *Prerequisite:* MUCO 502.

MUCO 539ab Theoretical and Aesthetic Issues in Music from 1950 to the Present (2-2, FaSp) *a:* Anti-rationality and indeterminacy, ultra-rationality and integral serialism, new performance procedures, electronic music and new technologies, minimalism. *b:* Post-modernism of reaction, post-modernism of resistance, mannerist minimalism, anti-modernism. *Prerequisite:* MUCO 502.

MUCO 540ab Composing Music for Games (a: 2, Fa; b: 2, Sp) Applied techniques of music composition to video games. Includes conceptual and technical details which differentiate scoring for games.

MUCO 545 Individual Instruction in Advanced Film Music Composition (2, max 4, FaSp) Private instruction in composition and conducting for film and television.

MUCO 548 Writer and Composer (3, Sp) Structured collaboration among composers and poets. Activities include fundamentals of poetry, comparative analysis, creative projects. Open to Literature and Creative Writing and Composition majors only; students with other majors require departmental approval.

MUCO 550 Teaching Music Theory (2) Comparative study of curricula, text materials, and teaching strategies in music theory.

MUCO 560ab Music Editing for Film (2-2, FaSp) Develop and implement state of the art techniques in joining music and film.

MUCO 571 Comparative Analytical Studies: Traditional Forms (2, max 6, FaSpSm) Analytical survey

of the development of a specific form or genre. Specific emphasis to be determined by the department.
Recommended preparation: MUCO 501.

MUCO 572 Comparative Analytical Studies: 20th/21st Century and Non-Traditional Forms (2, max 6, FaSpSm) In-depth analysis of characteristic forms and genres of 20th century music or of other forms and genres that do not figure largely in the “common practice” tradition. Specific emphasis to be determined by the department. *Recommended preparation:* MUCO 501.

MUCO 573 Special Studies in Contrapuntal Music (2, max 6, FaSpSm) In-depth analytical and historical study of contrapuntal techniques and styles. Emphasis to be determined by the department.
Recommended preparation: MUCO 501.

MUCO 574 Special Studies in Tonal Analysis (2, max 6, FaSpSm) Analytical study of major composers and/or problems in tonal music. Emphasis to be determined by the department. *Recommended preparation:* MUCO 501.

MUCO 575 Special Studies in Post-Tonal Analysis (2, max 6, FaSpSm) Analytical study of major composers and/or problems in post-tonal music. Emphasis to be determined by the department. *Recommended preparation:* MUCO 502.

MUCO 576 Special Studies in Musical Aesthetics (2, max 6, FaSpSm) An investigation of aesthetics in general and the application of aesthetic theories to music; readings will be selected from pre-modern, modern, and post-modern texts. *Recommended preparation:* MUCO 501 and MUCO 502.

MUCO 590 Directed Research (1-12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MUCO 592 Selected Topics in Graduate Composition (2, max 8, Irregular) Seminar for graduate students in composition that addresses aesthetic, technical and analytical issues from a composer’s perspective. Open only to Composition majors.

MUCO 594abz Master’s Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

MUCO 599 Special Topics (2-4, max 8) Seminars in selected areas of study.

MUCO 633ab Advanced Analysis of Tonal Music (2-2) *a:* Application of Schenkerian techniques to large works. *b:* Criticisms and extensions of Schenker, semiotic approaches, theories of rhythmic structure.
Prerequisite: MUCO 533b.

MUCO 636 Advanced Orchestration II (1 or 2, max 4, FaSp) Continuation of Advanced Orchestration I with emphasis on historical survey of orchestral compositions and advanced orchestration projects. *Prerequisite:* MUCO 536.

MUCO 637 Advanced Composition II (1-2, max 4) Continuation of MUCO 537. For students holding the M.M. degree in composition.

MUCO 737 Advanced Composition III (1 or 2, max 8) Continuation of MUCO 637. *Prerequisite:* MUCO 536, MUCO 637.

MUCO 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MUCO 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

CONDUCTING (MUCD)

MUCD 301 Individual Instruction (1-2, max 16, FaSpSm) Intermediate and advanced instruction secondary emphasis for music majors and minors. (Duplicates credit in former MUCD 401.)

MUCD 340 Choral Conducting I (2, FaSpSm) Basic conducting techniques; score analysis; conducting patterns; problems of tempo, dynamics, articulation and text.

MUCD 343 Instrumental Conducting I (2, FaSp) Communicating musical ideas to instrumental ensembles; reading and conducting from full score of orchestral compositions. Laboratory, 3 hours. *Prerequisite:* ability to read a music score.

MUCD 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

MUCD 441 Choral Conducting II (2) Refinement of techniques developed in MUCD 340; study of styles and interpretations of choral music from the Renaissance to the present. Laboratory, 3 hours. *Prerequisite:* MUCD 340, MUCD 343.

MUCD 443 Instrumental Conducting II (2, FaSpSm) Principal composers and representative instrumental works since the 18th century; studies of styles and interpretations based on scores and the performance of works in class.

MUCD 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

MUCD 499 Special Topics (2-4, max 8) Selected topics of current interest.

MUCD 501 Individual Instruction (1 or 2, max 8, FaSpSm) Secondary instruction for graduate music majors or instruction for graduate non-music majors.

MUCD 541 Choral Conducting III (2, max 6) Problems of preparing and conducting contemporary choral music and major choral-orchestral works from full score; special projects according to student's development and interests. Laboratory, 3 hours. *Prerequisite:* MUCD 441.

MUCD 543 Instrumental Conducting III (2, max 4, FaSp) Problems in advanced conducting. *Prerequisite:* MUCD 443.

MUCD 550 Orchestral Conducting Seminar (2, max 8, FaSp) Advanced instrumental conducting techniques. Literature drawn from music of all periods. *Prerequisite:* MUCD 441, MUCD 443, and admission as candidate for M.M. degree in conducting.

MUCD 553 Individual Instruction (1 or 2, max 8, FaSpSm)

MUCD 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MUCD 599 Special Topics (2-4, max 8) Selected topics of current interest.

MUCD 641 Choral Conducting IV (2, max 8) Continuation of MUCD 541, including choral conducting pedagogy. *Prerequisite:* MUCD 541.

MUCD 653 Performance (1 or 2, max 12, FaSpSm) Individual or master class instruction for DMA Performance majors. (Duplicates credit in former MUPF 653.)

MUCD 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Thornton School of Music

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

JAZZ STUDIES (MUJZ)

MUJZ 100mx Jazz: America's Music (4) Music of the jazz greats. Experience through live performances, field trips, readings, recordings, videos and guest lectures. Not available for credit to jazz studies majors.

MUJZ 101x Non-Major Beginning Individual Instruction (1-2, max 2, FaSpSm) Individual instruction at the beginning level designed for non-music majors with no previous experience. Not available for credit to music majors.

MUJZ 105ab Jazz Theory (2-2, FaSp) Study of basic and advanced concepts of jazz melody, harmony and form. Includes functional chord idioms and relationships, compositional and improvisational devices, and song forms.

MUJZ 141ab Basic Keyboard Skills for the Improviser (2-2, FaSp) Reading skills related to jazz accompanying, including the ability to identify and play chords on the piano utilizing different voicings.

MUJZ 142ab Jazz Ear Training (2-2, FaSp) Sight-singing and melodic/rhythmic reading and dictation applied to jazz repertoire. Includes vocalization of scales and chord patterns and study of rhythmic reading and jazz articulation.

MUJZ 150 Beginning Jazz Improvisation (2, max 4, FaSp) Development of beginning improvisational skills including underlying principles of theory, harmony, jazz ear training, and jazz style.

MUJZ 153 Individual Instruction (1-2, max 8, FaSpSm) Weekly individual instruction and performance forum. Open only to jazz studies majors.

MUJZ 180 Techniques of Jazz Improvisation (2, max 4) Development of improvisational skills through instrumental performance.

MUJZ 195L Jazz Elements I (2, max 8, FaSp) Study of compositional, improvisational, performance, and arranging elements found in jazz. Students will model influential groups and jazz artists.

MUJZ 196 Jazz Combo I (2, max 8, FaSp) Rehearsal and performance of literature for jazz chamber groups. Graded CR/NC. (Duplicates credit in MUEN 332.)

MUJZ 200ab Jazz Styles Analysis (2-2) Theoretical skills and analytical techniques related to jazz styles from Dixieland to the present. *a*: Styles through Progressive Swing; *b*: Bebop to the present. (Duplicates credit in former MUCO 200ab.)

MUJZ 218ab Afro-Latin Percussion Instruments (2-2) Instruction in the performance of percussion instruments associated with African, South American, and Caribbean music traditions, with special emphasis on adaptation to jazz music.

MUJZ 252 Individual Instrument Performance Class I (1, max 4, FaSp) Solo and orchestra repertoire, professional preparation, reed making, and other matters appropriate to group study. Required of all first and second year wind and percussion majors each semester in residence.

MUJZ 253 Individual Instruction (1-2, max 8, FaSpSm) Weekly individual instruction and performance forum. Open only to jazz studies majors.

MUJZ 286ab The History of Jazz (3-3, FaSpSm) A study of the evolution of American jazz music from its roots in Africa to the present day. Includes an introduction to world music elements. *Prerequisite:* MUCO 132b and MUCO 133b.

MUJZ 300x Non-Major Individual Instruction (1-2, max 16, FaSpSm) Intermediate and advanced instruction designed for non-music majors. Not available for credit to music majors. (Duplicates credit in former MUJZ 201 and MUJZ 401.)

MUJZ 301 Individual Instruction (1-2, max 16, FaSpSm) Intermediate and advanced instruction: secondary emphasis for music majors, principal emphasis for music minors and B.A. music majors. Open only to music majors and minors. (Duplicates credit in former MUJZ 201 and MUJZ 401.)

MUJZ 305ab Advanced Jazz Theory (2-2, FaSpSm) Analysis and transcription of jazz performances and scores, encompassing questions of style, form, harmonic and melodic language, and considerations of rhythm. *Prerequisite:* MUCO 133b.

MUJZ 311 Vocal Jazz Techniques (2, max 4) Development of skills needed for the professional vocal jazz musician. Study of the standard jazz repertoire, vocal improvisation, lead sheet writing, and working with rhythm sections. *Prerequisite:* MUJZ 180.

MUJZ 341 Keyboard Skills for Improvisers (2) Reading skills related to jazz accompanying; “fake” books, chord progressions commonly used in jazz. *Prerequisite:* MPKS 250ab.

MUJZ 342ab Aural Skills for Improvisers (1-1, FaSp) Sight-singing and dictation applied to jazz repertoire. Vocalization of modal and synthetic jazz scales and chordal qualities. (Duplicates credit in former MUCO 342ab.) *Prerequisite:* MUCO 132b.

MUJZ 347 Jazz Composition (2, max 4) Composing in the jazz medium. (Duplicates credit in former MUCO 347.)

MUJZ 353 Individual Instruction (1-2, max 8, FaSpSm) Weekly individual instruction and performance forum. Open only to jazz studies majors.

MUJZ 390 Special Problems (1-4, Irregular) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

MUJZ 395 Jazz Elements II (2, max 8, FaSp) Advanced study of compositional, improvisational, performance, conducting, and arranging elements found in the jazz repertory. Students will be encouraged to forge individual musical expressions. Open to juniors and seniors only. *Prerequisite:* MUJZ 195.

MUJZ 396 Jazz Combo II (2, max 8, FaSp) Preparation and performance of literature for jazz combos. Open to juniors and seniors only. Graded CR/NC. *Prerequisite:* MUJZ 195.

MUJZ 400 Arranging for Jazz Ensemble (2) Scoring for jazz ensemble with emphasis on writing for sections of like and mixed instruments as well as full ensemble. (Duplicates credit in former MUCO 400.)

MUJZ 403 Studio Singing Techniques (2, FaSp) Study of technique, theory and aural skills as applied to studio singing; critical listening; study of various styles; ear training and sight singing as these apply to working in a studio. *Recommended preparation:* jazz background; can read music and sing well.

MUJZ 419m The Jazz Experience: Myths and Culture (4, FaSp) An examination of the music, culture, and mythology of jazz revealed through the study of jazz fiction, film, poetry, and recorded examples.

MUJZ 443 Jazz Pedagogy (2, 2 years, Sp) Concepts, methods, and resources; examination and comparison of textbooks, recordings, tapes, and materials related to the study and teaching of jazz. (Duplicates credit in former MUED 443.)

MUJZ 450 Intermediate Jazz Improvisation (2, max 4, FaSp) Development of intermediate improvisational skills including underlying principles of theory, harmony, jazz ear training, and jazz style. *Recommended preparation:* MUJZ 150.

MUJZ 451 Advanced Jazz Improvisation (2, max 4, Sp) Development of advanced improvisational skills, including Lydian-chromatic and bi-modal techniques, through instrumental performance. Junior standing.

MUJZ 452 Individual Instrument Performance Class II (1, max 4, FaSp) Solo and orchestra repertoire, professional preparation, reed making, and other matters appropriate to group study. Required of all third and fourth year wind and percussion majors each semester in residence.

MUJZ 453 Individual Instruction (1-2, max 8, FaSpSm) Weekly individual instruction and performance forum. Open only to jazz studies majors.

MUJZ 486 Jazz Masters from World War II to the Present (2) Examination of major jazz artists from World War II to the present with emphasis on the innovators of each period. Detailed analysis of selected repertoire. (Duplicates credit in former MUHL 486.) *Recommended preparation:* MUJZ 419.

MUJZ 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

MUJZ 499 Special Topics (2-4, max 8) Selected topics of current interest.

MUJZ 501 Individual Instruction (1 or 2, max 8, FaSpSm) Secondary instruction for graduate music majors or instruction for graduate non-music majors.

MUJZ 545 Jazz Ensemble Development (2, 2 years, Sp) Techniques, approaches, teaching materials, and music useful in developing jazz ensembles in educational settings, from junior high school through college. (Duplicates credit in former MUED 547.)

MUJZ 547 Jazz Composition (2, max 4, Fa) Application of theoretical and compositional techniques used in jazz to written music. Analysis and performance of historical and contemporary examples will be included. (Duplicates credit in former MUCO 547.)

MUJZ 551 Graduate Jazz Improvisation (2, Sp) Development of proficiency in improvising to advanced jazz concepts, including transposition, substitute harmony, superimposed harmony, atypical harmonic schemes and contemporary chord and scale types. Open to jazz studies and studio guitar majors only. *Prerequisite:* MUJZ 451.

MUJZ 553 Individual Instruction (1 or 2, max 8, FaSpSm)

MUJZ 554 Graduate Certificate Performance (4, max 16, FaSpSm) Individual instruction and related lab participation for Graduate Certificate students.

MUJZ 588 Special Studies in Jazz Performance (2, max 6) Performance problems, composers and/or stylistic analysis of music from the jazz idiom. Specific emphasis to be determined by the Jazz Studies department.

MUJZ 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MUJZ 599 Special Topics (2-4, max 8) Selected topics of current interest.

MUJZ 653 Performance (1 or 2, max 12, FaSpSm) Individual or master class instruction for DMA Performance majors.

MUJZ 688 Special Topics in Jazz Performance (2, max 4, Fa) Examination and analysis of solo and compositional repertory of the jazz idiom through transcription and comparative research. Specific emphasis to be determined by the Jazz Studies department.

MUJZ 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Thornton School of Music

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MUSIC EDUCATION (MUED)

MUED 330x Fundamentals of Music (4, FaSp) Introduction to the content of music through an investigation of its melodic, rhythmic, and harmonic structure. Not available for credit to music majors.

MUED 390 Special Problems (1-4, FaSp) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

MUED 402 Teaching Choral Music (2, Sp) Problems of school choral organizations; the changing and adolescent voice; appropriate repertoire and materials. *Corequisite*: MUCD 340 or MUCD 343.

MUED 403 Teaching Instrumental Music (2, Sp) Problems of school instrumental organizations; teaching wind, string, and percussion instruments; appropriate repertoire and materials.

MUED 420 Teaching Beginning Improvisation (2, Irregular) Strategies for teaching beginning improvisation in K–12 music classes; includes playing/singing and teaching in many styles. No improvisation experience necessary.

MUED 440ab Music and Movement: The Orff Approach (2-2) Orff Schulwerk techniques in rhythmic and melodic training through speech, singing, body percussion, playing Orff instruments, improvisation, and elemental movement. Certification available.

MUED 443 Teaching Vocal Jazz (2) Strategies for teaching the principles of vocal jazz; historical perspective, repertoire, recordings, improvisation, scat, accompaniment, amplification, rehearsing, teaching sequences. No prior jazz experience necessary. (Duplicates credit in former MUED 530.)

MUED 449 Teaching Marching Band (2, Fa) Modern school marching band techniques; precision drill; administration; rehearsal techniques.

MUED 452 Introduction to Technology in Music Education (2, Fa) Applications of computers and electronic music to music education; survey of current approaches and materials.

MUED 479x Music for the Elementary Classroom Teacher (2, FaSp) The nature and structure of music, its processes, and its notational symbols. Not available for credit to music majors. *Recommended preparation*: MUED 330.

MUED 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

MUED 499 Special Topics (2-4, max 8, Irregular) Selected topics of current interest reflective of changing trends in music education.

MUED 500 Research Foundations in Music Education (3, Fa) Introductory exploration of types of research linked to research literature in music education; interpreting and organizing research proposals and reports.

MUED 501 Historical Foundations of Music Education (3) A contextual exploration of the historical

development of American music education.

MUED 502 Sociological Foundations of Music (3) Study of interdependent relationship between society, music and music education.

MUED 503 Philosophical Foundations of Music Education (3) Exploration of philosophical thinking in the field of music with emphasis on philosophical foundations for teaching and learning.

MUED 504 Psychological Foundations of Music (3) Exploration of theories, research and practice in psychological foundations of music teaching and learning.

MUED 505 Teaching and Learning Music (2, Irregular) Studies of the latest resources concerning the teaching and learning of music so that musicians can function more effectively as both teachers and performers.

MUED 510 Leading a Music Program in a Public School Setting (2, Sm) The philosophy and purposes of music programs combined with early field experiences, varied teaching strategies, and music learning assessment.

MUED 515 Using Technology in the Classroom (2, Sm) Study of the tools and knowledge necessary to the music educator to facilitate the application of computers and electronic music in music education.

MUED 520 Early Childhood Music (2, Irregular) An overview of significant developmental issues, current research, and appropriate practices for children from birth to age eight. Professor-guided practicum teaching.

MUED 522ab Teaching Public School Instrumental Music (a: 3, Fa; b: 2, Sp) Methods and materials appropriate for teaching and modeling instrumental lessons and instruction in the public and private schools.

MUED 524 Teaching and Conducting Public School Instrumental Ensembles (4, Sp) Study of the methods and materials needed to rehearse an instrumental ensemble in K–12 settings. Includes conducting and rehearsal techniques, literature selection, score analysis.

MUED 526 Teaching General/Choral Music for Instrumentalists (2, Sp) Study of psychomotor and cognitive learning in K–12 classes. Vocal/choral music in classroom settings; techniques and repertoire for use in K–12 choirs.

MUED 532 Teaching General Music K–8 (4, Fa) Methods and materials for cognitive learning and development of music skills in K–8 music classes, featuring Orff, Kodaly, and Dalcroze approaches.

MUED 534 Teaching and Conducting Public School Choral Ensembles (4, Sp) Comprehensive consideration of the choral music program in grades K–12. Topics include: development and care of the voice, audition and rehearsal techniques, conducting, lesson planning.

MUED 536 Teaching Instrumental Music for Vocalists (2, Sp) An introduction to the pedagogical and acoustic aspects for woodwind, brass, string and percussion instruments. Includes hands-on performance, class discussion and practical application.

MUED 540 Motivation and Discipline in the Music Classroom (2, Sp) An examination of the current research into learning theories and motivation with emphasis on the application of these theories to the music classroom.

MUED 542 Orchestra Development (2, Irregular) Repertoire and rehearsal techniques appropriate for school and community orchestras useful in solving specific problems of technical and tonal growth. *Prerequisite:* MUCD 343.

MUED 545 String Class Pedagogy (2, Irregular) Approaches to beginning through intermediate string class instruction in school and other group setting derived from principles of Suzuki, Bornoff, Rolland, and other leading teachers. *Prerequisite:* MUED 345abL.

MUED 546 Wind Band Pedagogy (2, 2 years, Fa) Methods and materials relevant to current trends in

wind band pedagogy; development of comprehensive pedagogical and performance practices; appropriate wind band music survey. *Prerequisite:* MUCD 343.

MUED 547 Vocal Pedagogy in the Public School Classroom (2, Sp) Development of technical knowledge, tone production, and performance skills for voice appropriate for public school music teaching.

MUED 548 Orchestral Bowing (2, Irregular) Introduction to bowing function and style with application to typical repertoire; practical experience for teachers and conductors in educational and community settings.

MUED 549ab Directed Teaching: Public School Music (2-2) Observation and teaching under the guidance of a university supervisor and a directing teacher. Open only to MAT, Single Subject (Music Education) majors.

MUED 550 Teaching Music Fundamentals and Appreciation Courses (2, 2 years, Fa or Sp) Purpose and objectives of music in general education. Survey of current approaches and materials.

MUED 552 Music Education Courseware Development (2, Sp) Development of music education courseware using current technology. Two lecture hours per week. *Prerequisite:* MUED 452.

MUED 555 Entering the Music Professoriate (3, Fa) Preparation for academic careers in music. Methodologies and approaches to teaching, learning, and assessment; statements of teaching philosophies; creation of academic portfolio. Open only to doctoral students (DMA and Ph.D.) in the Thornton School of Music.

MUED 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MUED 592 Final Project (2, max 2) Required for the Master of Music Education degree. Credit upon acceptance. Graded CR/NC. *Prerequisite:* MUED 500.

MUED 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

MUED 599 Special Topics (2-4, max 8, Irregular) Selected topics of current interest reflective of changing trends in music education.

MUED 601 Field Seminar in Elementary School Music Education (2, 2 years, Fa or Sp) Observation in schools. Identification and analysis of problems; strategies for improvement; alternative approaches including those of Orff and Kodaly. Readings, examination of teaching materials.

MUED 602 Field Seminar in Choral Music Education (2, 2 years, Fa or Sp) Observation in schools. Current practice; identification and analysis of problems; strategies for improvement; readings, examination of music and teaching materials.

MUED 603 Field Seminar in Instrumental Music Education (2, 2 years, Fa or Sp) Observation in schools. Identification and analysis of problems; strategies for improvement. Readings, examination of music and teaching materials.

MUED 604 Preparing School Music Teachers (2, 2 years, Fa or Sp) Analysis of best practices in teacher training; faculty, curriculum, schedule, materials, methods, and supervision of directed teaching. *Prerequisite:* three years of teaching music in public schools or two years of college teaching.

MUED 605 College Teaching in Music Education (3) Exploration of music education faculty duties at the collegiate level, including teacher training, working with local school systems, leading professional organizations, and conducting research.

MUED 606 Internship in Collegiate Music Education (3) Students intern with USC professors in training music teachers in traditional and alternative music education practices.

MUED 607 Alternative Models in Music Education (3) Examination of diverse, evolving settings for music teaching and learning in contemporary society. Emphasis on programming and administrative structures

of community-based music providers.

MUED 610 Pedagogy for Collegiate Teaching (2, FaSpSm) A preparation for teaching in the modern university environment, examining the role of the professor, and focusing on the development of innovative collegiate teaching skills.

MUED 640 Research and Practice in Orff Schulwerk (2, Sp) Exploring research on the philosophical and historical bases of the Orff Schulwerk approach and acquiring skills in pedagogical applications in early childhood through collegiate settings.

MUED 650 Pedagogy for Collegiate Music Appreciation and Fundamentals (2, Sp) Design and teaching strategies for collegiate music appreciation and fundamentals classes developed for the adult, non-music major student.

MUED 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MUED 791 Pedagogical Writing and Media in Music Education (3) Development of skills in pedagogical writing for professional journals, text books, and multimedia publications, and knowledge of publishing procedures for compositions and arrangements.

MUED 792 Quantitative Research in Music Education (3) Survey of theories, concepts and procedures for designing and evaluating quantitative research studies. *Prerequisite:* MUED 500.

MUED 793 Qualitative Research in Music Education (3) Survey of theories, concepts and procedures for designing and evaluating qualitative research studies. *Prerequisite:* MUED 500.

MUED 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Thornton School of Music

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MUSIC ENSEMBLE (MUEN)

Large ensemble requirements in undergraduate curricula must be fulfilled by the following ensembles: University Chorus (MUEN 307); Men's Chorus (MUEN 308); Oriana Choir (MUEN 311); University Concert Choir (MUEN 310); Chamber Choir (MUEN 312); USC Symphony (MUEN 320); USC Concert Orchestra (MUEN 321); University Wind Ensemble (MUEN 323); or University Band (MUEN 324).

Exceptions to the above policies include: Contemporary Music Ensemble and Early Music Ensemble may fulfill the large ensemble requirement for instrumental majors, with the approval of the conductor of University Symphony or Wind Ensemble and the chair of the student's major department.

Music Education majors with an instrumental emphasis must take one semester of a choral ensemble.

Composition majors must register for at least 2 units in a choral ensemble.

Students majoring in Strings, Vocal Arts, or Wind and Percussion may not count USC Concert Orchestra toward their large ensemble requirement.

Vocal Arts majors must register for University Concert Choir, USC Chamber Choir, or USC Oriana Choir to fulfill their large ensemble requirement.

Further exceptions may be made subject to departmental approval and approval of the conductor of the appropriate large ensemble.

MUEN 222 Trojan Marching Band (1, max 4) Rehearsal and participation in performances for athletic and other university functions. Graded CR/NC. Open to all students by audition.

MUEN 305 Vocal Jazz Ensemble (1, max 8, FaSp) Study and performance of vocal ensemble literature from the Jazz idiom, with emphasis on improvisational techniques. Open to all students by audition. Graded CR/NC.

MUEN 307 University Chorus (1, max 8, FaSp) Rehearsal and performance of choral literature from all periods of music history. Open to all students. Graded CR/NC.

MUEN 308 USC Men's Chorus (1, max 8, FaSp) Rehearsal and performance of choral repertoire from all periods written for male voices. Open to all students. Graded CR/NC.

MUEN 310 University Concert Choir (1, max 8, FaSp) Performance of choral works of all styles and periods. Open to all students by audition. Graded CR/NC.

MUEN 311 USC Oriana Choir (1, max 8, FaSp) Rehearsal and performance of advanced chamber music written for women's voices. Open to all students by audition. Graded CR/NC.

MUEN 312 USC Chamber Choir (1, max 8, FaSp) Performance of vocal chamber music and choral masterworks from the 16th century to the present. Open to all students by audition. (Duplicates credit in former MUEN 212 and MUEN 412.) Graded CR/NC.

MUEN 314 Opera Chorus (1, max 8, FaSp) Study and performance of operatic choruses and extended ensembles of all styles and periods. Open to all students by audition. (Duplicates credit in former MUEN 214 and MUEN 414.) Graded CR/NC.

MUEN 320 USC Symphony (1, max 8, FaSp) Rehearsal and performance of orchestra repertoire. Open to all students by audition. (Duplicates credit in former MUEN 220 and MUEN 420.) Graded CR/NC.

MUEN 321 USC Concert Orchestra (1, max 8, FaSp) Rehearsal and performance of orchestra repertoire. Open to all students, faculty, staff, and members of the community. Audition not required. Graded CR/NC.

MUEN 322 Trojan Marching Band (1, max 4) Continuation of MUEN 222. Graded CR/NC.

MUEN 323 University Wind Ensemble (1, max 8, FaSp) Rehearsal and participation in concert programs. Open to all students by audition. (Duplicates credit in former MUEN 223 and MUEN 423). Graded CR/NC.

MUEN 324 University Band (1, max 8, FaSp) Rehearsal and performance of standard repertoire. Open to all students by audition. Graded CR/NC.

MUEN 325 Wind and Percussion Chamber Music (1, max 8, FaSp) Performance of chamber music for wind and percussion instruments. Open to all students by audition. (Duplicates credit in former MUEN 225 and MUEN 425.) Graded CR/NC.

MUEN 326 Guitar Ensemble (1, max 8, FaSp) Rehearsal and performance of literature composed, transcribed and arranged for small ensembles, including literature for small ensembles of guitar and other instruments, as well as voice. (Duplicates credit in former MUEN 226 and MUEN 426.) Graded CR/NC.

MUEN 327 String Chamber Music (1, max 8, FaSp) Preparation and performance of small ensemble literature for strings. (Duplicates credit in former MUEN 227 and MUEN 427.) Graded CR/NC.

MUEN 328 Keyboard Collaboration (1, max 4, FaSp) Preparation and performance of literature for piano with voice and string, woodwind, brass and percussion instruments. (Duplicates credit in former MUEN 428.) Graded CR/NC.

MUEN 329 Jazz Ensemble (1, max 8, FaSp) Rehearsal and performance of literature written for large jazz ensemble. Open to all students by audition. (Duplicates credit in former MUEN 229 and MUEN 429.) Graded CR/NC.

MUEN 330 Contemporary Music Ensemble (1, max 8, FaSp) Performance of 20th-century music; readings of student and faculty compositions; experimental music; guest conductors, composers, performers; annual concert series. (Duplicates credit in former MUEN 230 and MUEN 430.) Graded CR/NC.

MUEN 331 Guitar Big Band (1, max 8, FaSp) Rehearsal and preparation of big band literature adapted for large guitar ensemble. Guitarists perform in place of the traditional trumpet, trombone and sax sections. Graded CR/NC.

MUEN 332 Jazz Chamber Music (1, max 8, FaSp) Preparation and performance of literature for jazz chamber groups. Open to all students by audition. (Duplicates credit in former MUEN 232 and MUEN 432.) Graded CR/NC.

MUEN 335 University Brass Band (1, max 8, FaSp) The study, rehearsal and performance of standard brass choir and brass band literature. (Duplicates credit in former MUEN 235 and MUEN 435.) Graded CR/NC.

MUEN 344 Vocal Chamber Music (1, max 8, Fa) Study of solo ensemble vocal literature such as duets, trios, quartets, madrigals, etc. Open to all students by audition. (Duplicates credit in former MUEN 244 and MUEN 444.) Graded CR/NC.

MUEN 350 Early Music Ensemble (1, max 8, FaSp) Rehearsal and performance of vocal and instrumental ensemble music of the Renaissance and Baroque, with emphasis on chamber music for solo voices and bowed and plucked strings. Instrumentalists are required to perform on either their own or the school's historical instruments. Open to all students by audition. (Duplicates credit in former MUEN 250 and MUEN 450.) Graded CR/NC.

MUEN 505 Vocal Jazz Ensemble (1, max 4, FaSp) Study and performance of vocal ensemble literature from the Jazz idiom, with emphasis on improvisational techniques. Open to graduate students by audition.

MUEN 507 University Chorus (1, max 8, FaSp) Rehearsal and performance of choral literature from all periods of music history. Open to all graduate students.

MUEN 508 USC Men's Chorus (1, max 4, FaSp) Rehearsal and performance of choral repertoire from all periods written for male voices.

MUEN 510 University Concert Choir (1, max 4, FaSp) Performance of choral works of all styles and periods. Open to all graduate students by audition.

MUEN 511 USC Oriana Choir (1, max 4, FaSp) Rehearsal and performance of advanced chamber music written for women's voices. Open to all graduate students by audition.

MUEN 512 USC Chamber Choir (1, max 4, FaSp) Performance of vocal chamber music and choral masterworks from the 16th century to the present. Open to all graduate students by audition. (Duplicates credit in former MUEN 412.)

MUEN 514 Opera Chorus (1, max 4, FaSp) Study and performance of operatic choruses and extended ensembles of all styles and periods. Open to all graduate students by audition. (Duplicates credit in former MUEN 414.)

MUEN 520 USC Symphony (1, max 4, FaSp) Rehearsal and performance of orchestra repertoire Open to all graduate students by audition. (Duplicates credit in former MUEN 420.)

MUEN 521 USC Concert Orchestra (1, max 4, FaSp) Rehearsal and performance of orchestra repertoire. Open to all graduate students. Audition not required.

MUEN 523 University Wind Ensemble (1, max 4, FaSp) Rehearsal and participation in concert programs.

Open to all graduate students by audition. (Duplicates credit in former MUEN 423.)

MUEN 525 Wind and Percussion Chamber Music (1, max 4, FaSp) Performance of chamber music for wind and percussion instruments. Open to all students by audition. (Duplicates credit in former MUEN 425.)

MUEN 526 Guitar Ensemble (1, max 4, FaSp) Rehearsal and performance of literature composed, transcribed and arranged for small ensembles, including literature for small ensembles of guitar and other instruments, as well as voice. (Duplicates credit in former MUEN 426.)

MUEN 527 String Chamber Music (1, max 4, FaSp) Preparation and performance of small ensemble literature for strings. (Duplicates credit in former MUEN 427.)

MUEN 528 Keyboard Collaboration (1, max 4, FaSp) Continuation of MUEN 328.

MUEN 529 Jazz Ensemble (1, max 4, FaSp) Rehearsal and performance of literature written for large jazz ensemble. Open to all graduate students by audition. (Duplicates credit in former MUEN 429.)

MUEN 530 Contemporary Music Ensemble (1, max 4, FaSp) Performance of 20th-century music; readings of student and faculty compositions; experimental music; guest conductors, composers, performers; annual concert series. (Duplicates credit in former MUEN 430.)

MUEN 531 Guitar Big Band (1, max 4, FaSp) Rehearsal and preparation of big band literature adapted for large guitar ensemble. Guitarists perform in place of the traditional trumpet, trombone and sax sections.

MUEN 532 Jazz Chamber Music (1, max 4, FaSp) Preparation and performance of advanced literature for jazz chamber groups. Open to graduate students, by audition.

MUEN 535 University Brass Band (1, max 4) The study, rehearsal and performance of standard brass choir and brass band literature. (Duplicates credit in former MUEN 435).

MUEN 544 Vocal Chamber Music (1, max 4, Fa) Study of solo ensemble vocal literature such as duets, trios, quartets, madrigals, etc. Open to all graduate students by audition. (Duplicates credit in former MUEN 444.)

MUEN 550 Early Music Ensemble (1, max 4, FaSp) Rehearsal and performance of vocal and instrumental ensemble music of the Renaissance and Baroque, with emphasis on chamber music for solo voices and bowed or plucked strings. Instrumentalists are required to perform on either their own or the school's historical instruments. Open to all graduate students by audition. (Duplicates credit in former MUEN 450.) Graded CR/NC.

MUEN 628 Keyboard Collaboration (1, max 4, FaSp) Continuation of MUEN 328.

MUEN 650 Early Music Ensemble (1, max 8, FaSp) Rehearsal and public performance of vocal and instrumental music of the Renaissance and Baroque era; emphasis is on large- and small-scale chamber works. Instrumentalists are required to perform on historical instruments.

Thornton School of Music

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MUSIC HISTORY AND LITERATURE (MUHL)

MUHL 231 Music History (3, Fa) A study of the musical styles and genres from antiquity to c. 1680 within their historical context. Detailed analysis of selected works. (Duplicates credit in MUHL 385a.) *Prerequisite:*

MUCO 132b, MUCO 133b.

MUHL 232 Music History II (3, Sp) A study of the musical styles and genres from c. 1680 to c. 1850 within their historical context. Detailed analysis of selected works. (Duplicates credit in MUHL 385b.) *Prerequisite:* MUCO 132b, MUCO 133b.

MUHL 302 Musical Cultures of the World (4, FaSp) Survey of the world's major musical cultures; aesthetic and social values, theoretical systems, musical style and structure, instruments, and performance traditions.

MUHL 315x Music and Culture (4, FaSpSm) Gateway to the B.A. degree in music. Western and non-Western music in its sociocultural context. Not available for credit to B.M. majors. Ability to read music highly recommended.

MUHL 331 Music History III (3) A study of the musical styles and genres from c. 1850 to the present within their historical context. Detailed analysis of selected works. (Duplicates credit in former MUHL 280a.) *Prerequisite:* MUCO 132b, MUCO 133b; *recommended preparation:* MUCO 232b, MUCO 233b.

MUHL 332 Studies in Musical Culture (3) Special musical repertoires, issues, and critical problems; emphasis determined by the department. (Duplicates credit in former MUHL 280b.) *Recommended preparation:* MUHL 231, MUHL 232, MUHL 331, MUCO 232b, MUCO 233b.

MUHL 333 Music History Review (1-2, FaSpSm) Supervised review of the materials covered in undergraduate music history courses for students whose music history examinations indicate the need for further study.

MUHL 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

MUHL 403 Armenian Musical Culture (2) Study of the four branches of Armenian music within the context of past and present Armenian culture.

MUHL 476 Music Criticism (2) Procedure and practice in forming critical judgments of music and in writing music criticism; practical journalism; professional and community ethics. *Prerequisite:* for music majors, MUHL 331, MUHL 332; for nonmusic majors, MUHL 315x.

MUHL 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

MUHL 499 Special Topics (2-4, max 8, FaSpSm) Selected topics of current interest.

MUHL 560 Studies in World Music I (2, Fa) The indigenous and syncretic musics of Africa, India, Indonesia, and the Balkan countries. *Prerequisite:* MUHL 570.

MUHL 561 Studies in World Music II (2, Sp) The indigenous and syncretic musics of the post-Soviet political landscape, the Far East, the Middle East, and Latin America. *Prerequisite:* MUHL 570.

MUHL 570 Research Materials and Techniques (2, FaSpSm) Introduction to music research, information science and technical writing. Required of all graduate students majoring in music.

MUHL 572 Seminar in Historical Musical Notation (2, Fa) Performing, reading, and editing historical notation from original sources. *Prerequisite:* MUHL 570.

MUHL 573 Music of the Middle Ages (2, Sp; 2 years, Sm) Chief musical developments in Western Europe from the beginning of the Christian era to the middle of the 14th century. *Prerequisite:* MUHL 570.

MUHL 574 Music of the Renaissance (2, Sp; 2 years, Sm) Chief musical developments in Western Europe from the middle of the 14th century to the end of the 16th. *Prerequisite:* MUHL 570.

MUHL 575 Music of the Baroque Era (2, Fa; 2 years, Sm) Styles, forms, composers, and compositions of the Baroque era. *Prerequisite:* MUHL 570.

MUHL 576 Music of the Classical Period (2, Sp; 2 years, Sm) Development of classical style in symphonic music, opera, and chamber music. *Prerequisite:* MUHL 570.

MUHL 577 Music of the 19th Century (2, Fa; 2 years, Sm) Vocal and instrumental music of the Romantic era from late Beethoven through Brahms. *Prerequisite:* MUHL 570.

MUHL 578 Music since 1900 (2, FaSpSm) Musical developments in Europe and the Americas from 1900 to the present. *Prerequisite:* MUHL 570.

MUHL 579 Studies in Music History (4, max 16, FaSp) Intensive study of major problems, issues, and interpretations in the history of music. *Prerequisite:* MUHL 570.

MUHL 580 Historical Perspectives in Jazz (2) Chief musical developments in the principal styles of Jazz from their inception to the present. *Prerequisite:* graduate standing or departmental approval.

MUHL 583 Special Studies in Medieval Music (2, max 4, Irregular) Music problems and composers of the period. Specific emphasis to be determined by the department. *Prerequisite:* MUHL 570.

MUHL 584 Special Studies in Renaissance Music (2, max 4, Irregular) Music problems and composers of the period. Specific emphasis to be determined by the department. *Prerequisite:* MUHL 570.

MUHL 585 Special Studies in Baroque Music (2, max 6, Irregular) Music problems and composers of the period. Specific emphasis to be determined by the department. *Prerequisite:* MUHL 570.

MUHL 586 Special Studies in the Music of the Classical Period, 1730–1800 (2, max 6, Irregular) Music problems and composers of the period. Specific emphasis to be determined by the department. *Prerequisite:* MUHL 570.

MUHL 587 Special Studies in the Music of the 19th Century (2, max 6, Irregular) Music problems and composers of the period. Specific emphasis to be determined by the department. *Prerequisite:* MUHL 570.

MUHL 588 Special Studies in Music since 1900 (2, max 6) Music problems and composers of the period. Specific emphasis to be determined by the department. *Prerequisite:* MUHL 570.

MUHL 589 Seminar in Renaissance Repertories and Performance Practice (2, Sp) Study and discussion of Renaissance music sources and performance practice treatises. *Corequisite:* MUHL 570.

MUHL 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. *Prerequisite:* MUHL 570.

MUHL 591 Seminar in Baroque Repertories and Performance Practice (2) Study and discussion of Baroque music sources and performance practice treatises. *Corequisite:* MUHL 570.

MUHL 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

MUHL 595 Seminar in Performance Practices (2, max 4) Scholarly preparation and authentic performance of music written before c. 1770. Ornamentation and improvisation, tunings and temperaments, early language pronunciation, historical instruments, etc. *Prerequisite:* MUHL 570.

MUHL 599 Special Topics (2-4, max 8, Irregular) Selected topics of current interest.

MUHL 681 Studies in Musicology (4, max 16, FaSp) Close study of musical repertories and issues (particularly ones transcending period divisions), with emphasis on recent scholarship and methodologies. *Prerequisite:* MUHL 570.

MUHL 683 Seminar in Medieval Music (2-3, max 6, Irregular) Problems and composers of the period; specific emphasis determined by the department. *Prerequisite:* MUHL 570.

MUHL 684 Seminar in Renaissance Music (2-3, max 6, Irregular) Problems and composers of the period; specific emphasis determined by the department. *Prerequisite:* MUHL 570.

MUHL 685 Seminar in Baroque Music (2-3, max 6, Irregular) Problems and composers of the period; specific emphasis determined by the department. *Prerequisite:* MUHL 570.

MUHL 686 Seminar in Classical Music (2-3, max 6, Irregular) Problems and composers of the period; specific emphasis determined by the department. *Prerequisite:* MUHL 570.

MUHL 687 Seminar in Romantic Music (2-3, max 6, Irregular) Problems and composers of the period; specific emphasis determined by the department. *Prerequisite:* MUHL 570.

MUHL 688 Seminar in Music since 1900 (2-3, max 6, Irregular) Problems and composers of the period; specific emphasis determined by the department. *Prerequisite:* MUHL 570.

MUHL 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. *Prerequisite:* MUHL 570.

MUHL 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Thornton School of Music

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MUSIC INDUSTRY (MUIN)

MUIN 270 Introduction to the Music Industry (4, FaSp) A survey of the music business with emphasis on distribution of recorded music, music publishing, performance rights societies, record companies, agents, personal managers and contracts. Open to music majors (B.M. and B.S. degrees) only.

MUIN 272x Basics of the Music Industry (4, FaSp) Introductory survey of the music business. Topics include: copyright, record companies, contracts, music publishing, performance rights societies, managers, agents, and other artist team/income considerations. Not available for major credit for music industry majors. (Duplicates credit in former MUIN 372ax.)

MUIN 280 Communications in the Music Industry (4) A survey of the music industry communications including radio, television, film, satellite communications, records, compact disc, cassette, cable and any future forms of transmission and delivery systems.

MUIN 286 Record Production Management (2, FaSp) Function of the record producer, studio procedures, music business law, union relations, artist management, copyright and publishing agreements, record company structure.

MUIN 287 The Business and Economics of the Recording Industry (2, Fa) Economic considerations of home, studio and location recording. Equipment, labor, facilities, media, legal and tax considerations will be explored.

MUIN 320 Critical Listening, Acoustics and Audio Perception (4) Development of perceptual skills for detailed analysis and awareness of the timbral, dynamic, temporal and spatial attributes of sound as they relate to audio production.

MUIN 340 Introduction to Sound Reinforcement (4, FaSpSm) An introduction to the practical application of large scale sound reinforcement for concerts, sporting events, church services and convention situations.

MUIN 360 Introduction to Music Law (4, FaSp) A study of entertainment law with a focus on the music industry. Areas of study include contracts, domestic practices, international practices, copyright protection, trademarks. *Prerequisite:* MUIN 270.

MUIN 370 Music Publishing and Licensing (2, Sp) A contemporary survey of the methods used to monetize music through licensing/media placement, covering music publishing, songwriter agreements, performance rights and licenses for traditional/new media. *Prerequisite:* MUIN 270 or MUIN 272x.

MUIN 372x Business and Legal Aspects of the Music Industry (4, FaSp) An intermediate-level survey of music law, artist contract analysis, case studies, modern/emerging business models and the business of music licensing. *Prerequisite:* MUIN 272x. Not available for major credit for music industry majors. (Duplicates credit in former MUIN 372bx.)

MUIN 385 Radio in the Music Industry (4, Fa) A survey of radio; its operation and effect on the music industry. Topics include advertising, playlists, program direction, FCC, networks, news, promotion, payola and format development.

MUIN 410 Marketing, Branding and Strategic Alliances in Music (2, FaSp) An in-depth study of music marketing, non-traditional revenue streams for artists, musicians, and labels including artist endorsements, artist tour sponsorships, digital music programs, music licensing, merchandise, and a primary focus on brand partnership deals in the music space. *Prerequisite:* MUIN 270 or MUIN 272x.

MUIN 420 DIY Music Marketing (2, FaSp) An exploration of the most current and effective marketing strategies and online branding tools for promoting, monetizing, and sustaining the career of the independent creative artist. *Prerequisite:* MUIN 270 or MUIN 272x.

MUIN 425 Live Music Production and Promotion (4) A survey of the presentation of the live musical experience. Both classical and popular concert presentation will be examined including venue selection, promotion and security.

MUIN 430 Artist Management and Development (4) A study of issues relating to the personal management of music artists including negotiating contracts, image, career development, agents, touring, merchandising, fees and duties.

MUIN 435 Manufacture and Distribution of Musical Products (4, Sp) An in-depth study of musical instrument manufacture and distribution in the United States. Topics covered include sheet music, instrument rentals, lessons and band operations.

MUIN 440 Arts Management (4, Fa) A survey of the management of non-profit and for-profit arts organizations with emphasis on funding, donor development tax status and promotion.

MUIN 443 The Business of Music for Visual Media (4, FaSpSm) Introduction to music designed for synchronization to picture including history of music in cinema, music editing, supervision, performance rights licensing, production, and music scoring procedures. *Prerequisite:* MUIN 360 or MUIN 372x.

MUIN 445 International Music Industry (4, Sp) A survey of international operations of music distribution, publishing, touring, law, promotion, customs and practices. *Prerequisite:* MUIN 360.

MUIN 450 Practicum in Music Industry Issues (Internship) (2-4, max 8, FaSpSm) Field application of music industry theories and practices; part-time employment. Project jointly defined by student, employer and professor. *Prerequisite:* MUIN 360 or MUIN 372x. Junior or senior standing. Graded CR/NC.

MUIN 475 Advanced Concert Management (4, Sp) Application of theories, technologies, and practices of the live music industry. Focus on the business, management, marketing, promotion, and production of

professional concert events. *Prerequisite:* MUIN 425.

MUIN 476ab Advanced Sound Reinforcement (2-2, FaSp) Special problems of multimedia mixing with simultaneous audio re-processing for live performance situations including rigging, house mix, monitor mix, venues and power distribution.

MUIN 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

MUIN 495 Web Design for the Music Industry (4, FaSp) A hands-on experience in which students work in teams to create web sites specifically designed to promote, market, and sell musical artists' products online.

MUIN 496 Music Media Solutions (4, FaSp) Group study of one current music media issue, focusing on possible solutions with practical applications. Stress on leadership, critical thinking, and professional practices. By application only. Open only to junior level and above.

MUIN 497 Current Topics, Case Studies, and Analysis (2, max 6, FaSp) Exploration of emerging topics and trends in business and technology in the music and entertainment industries. *Prerequisite:* MUIN 270 or MUIN 272x.

MUIN 498ab Final Capstone Project (1-1, FaSp) Culmination of the four-year course of study. Affords students the opportunity to experience guided work to meet the professional demands of the industry. *Prerequisite:* MUIN 270 or MUIN 272x. Graded IP/CR/NC.

MUIN 499 Special Topics (2-4, max 8) Selected topics of current interest.

MUIN 570 The Music Industry (4, FaSpSm) A graduate level survey of the music business with emphasis on distribution of recorded music, music publishing, performance rights societies, musical products and live music.

MUIN 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MUIN 599 Special Topics (2-4, max 8) Selected topics of current interest.

MUIN 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Thornton School of Music

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MUSIC TECHNOLOGY (MTEC)

MTEC 105 Electronic Studio Techniques (2) Electronic Music procedures in a multi-track studio. Computer applications. (Duplicates credit in former MUEA 105.)

MTEC 174 Fundamentals of Music Technology (2) Introductory microphone technique, signal processing, and computer literacy for musical performers. (Duplicates credit in former MUEA 174.)

MTEC 175 Fundamentals of Audio Recording (2) Introduction to the principles and techniques of audio recording. Students will gain a basic understanding of signal flow, gain structure, microphones, monitoring systems, signal processing, mixing. (Duplicates credit in former MTEC 275a.)

MTEC 176 Critical Listening (2) Introductory course where students will develop an understanding of audio quality, the musical aspects of audio production and the vocabulary necessary to offer audio critique. *Recommended preparation:* MTEC 175. (Duplicates credit in former MTEC 275a.)

MTEC 205ab Music with Computers (4-4) Computers in music composition, realization and performance. Representative hardware, software and languages. (Duplicates credit in former MUEA 205ab.) *Recommended preparation:* MTEC 105.

MTEC 237ab Music Production I (2-2) *a:* Study of small ensemble (rhythm section, vocal, background vocals) music production in a variety of popular music styles; *b:* Study of large ensemble (rhythm section, vocal, background vocal with horn section and or strings) music production in a variety of popular music styles.

MTEC 245 Introduction to MIDI Sequencing (1, FaSp) Introductory course where students will learn to use professional MIDI sequencing software to sequence, edit, and realize music compositions.

MTEC 246 Introduction to Audio Recording and Editing (1, FaSp) Introduction to the techniques and applications of recording, editing and mixing sound on personal computers.

MTEC 248 Introduction to Music Notation (1, FaSp) Introduction to the skills and techniques required to prepare musical scores and parts using industry standard music notation software.

MTEC 249 Introduction to Web Design for Musicians (1, FaSp) Introductory course where students will learn to use professional web languages, tools, and techniques to create musical artist and band websites.

MTEC 275 Fundamentals of Audio Engineering (4) Fundamentals of Audio Engineering is an intermediate course in the principles and techniques of professional audio production as related to music. *Recommended preparation:* MTEC 175 and MTEC 176. (Duplicates credit in former MTEC 275b.)

MTEC 277x Introduction to Music Technology (4, FaSpSm) A survey of the technology used to create, prepare, perform, and distribute music, with an emphasis on recording, MIDI, music production, mastering and Internet technologies. Not available for major credit to B.M. and B.S., Music Industry majors. (Duplicates credit in former MUIN 277.)

MTEC 301 Individual Instruction (2-3, max 8, FaSp) Intermediate and advanced instruction in the applications of technology to the creation and performance of music. *Recommended preparation:* experience with audio recording and synthesizers.

MTEC 305ab Electroacoustic Media I (4-4) Composition, arranging, performance and/or fixed medium realization of electroacoustic music. Critical/analytic listening. History of the medium. (Duplicates credit in former MUEA 305ab.) *Prerequisite:* MTEC 205b.

MTEC 310 Computer Recording for the Performing Musician (2, FaSpSm) Fundamentals of computer music production for music students. Recording and editing multitrack digital audio using computer software. Open to music majors only, with the exception of majors in music industry. (Duplicates credit in former MUSC 310.)

MTEC 311 MIDI Music Production for the Performing Musician (2, FaSpSm) Techniques of sequencing and recording musical compositions via MIDI on personal computers. Includes study of hardware, software, processes, functions, editing and orchestration techniques. Not open to music industry majors. (Duplicates credit in former MUSC 311.)

MTEC 337ab Music Production II (2-2) *a:* Small group instruction to develop the student's arranging, production and project management skills as related to small budget music and multimedia projects. *Prerequisite:* MTEC 237b. *b:* Small group instruction to develop the student's arranging, production and project management skills as related to medium budget music and multimedia projects.

MTEC 379ab Recording Studio Theory (2-2) Basic electronic concepts needed to understand operational parameters of a state-of-the-art recording studio; schematics, interface, capacitance, resistance and problem solving. *Prerequisite:* MTEC 275. (Duplicates credit in former MUIN 379ab.)

MTEC 389 Digital Equipment and Recording (2) Digital equipment including computers, sequencers, digital signal synthesis, MIDI, and rotary and stationary digital recording. *Prerequisite:* MTEC 275. (Duplicates credit in former MUIN 389.)

MTEC 390 Special Problems (1-4, FaSpSm) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only. (Duplicates credit in former MUEA 390.)

MTEC 392ab Acoustics and Speaker Design (2-2) Principles of acoustics relating to studio construction, wall treatment, and furnishings; natural reverberation, speaker materials, passive and active crossovers and time alignment. *Prerequisite:* MTEC 275. (Duplicates credit in former MUIN 392ab.)

MTEC 405ab Electroacoustic Media II (4-4) Continuation of MTEC 305ab. (Duplicates credit in former MUEA 405ab.) *Prerequisite:* MTEC 305b.

MTEC 442 Operation of the Radio Studio (2, FaSpSm) An in-depth study of radio studio technical operations. Topics include consoles, microphones, transmission considerations, networks, satellites, and digital and analog production situations. *Prerequisite:* MTEC 275. (Duplicates credit in former MUIN 442.)

MTEC 443 Desktop Music Production (2) Intermediate course where students will learn to use professional MIDI sequencing and digital audio software to compose, edit, and mix songs and other music compositions. *Recommended preparation:* MTEC 245. (Duplicates credit in former MTEC 305.)

MTEC 444 Non-Linear MIDI Sequencing (2, FaSp) An in-depth course focusing on the principles and techniques of sequencing and performing musical compositions using a non-linear sequencer. *Recommended preparation:* MTEC 245.

MTEC 445 Advanced Desktop Music Production (2) Students will learn to apply their musical and technical skills to create professional quality computer-based arrangements in a variety of musical styles. *Recommended preparation:* MTEC 443 or MTEC 444 and MTEC 474a.

MTEC 446ab Computer Assisted Recording and Editing (2-2, FaSpSm) Techniques and applications of recording and editing sound on personal computers. Hardware, software, editing for song, sound effects and dialog for film. (Duplicates credit in former MUIN 446ab.)

MTEC 448 Computer Music Notation and Preparation (2) Techniques and principles of computer music notation including conventions of music notation, idiomatic practices, preparation of significant score types, and MIDI basics. (Duplicates credit in former MUIN 448.)

MTEC 474ab Electronic Synthesizer Techniques (2-4; 2-4, FaSpSm) *a* and *b*: Electronic music procedures in a multi-track studio. *b*: Computer applications. (Duplicates credit in former MUEA 474abx.)

MTEC 476ab Advanced Electronic Studio Techniques (2-4; 2-4) *a*: Digital devices and specialized audio processing modules applied to electronic music. (Duplicates credit in former MUEA 476a.) *Prerequisite:* MTEC 474b. *b*: Continuation of MTEC 476a. Emphasis on individual projects. (Duplicates credit in former MUEA 476b.)

MTEC 477 Remote Recording Techniques (2) Special problems of location recording; specialized equipment; microphone design and operation. *Prerequisite:* MTEC 275. (Duplicates credit in former MUIN 477.)

MTEC 478 Advanced Multichannel Remix (2) Special problems of multi-channel re-mixing with simultaneous audio re-processing. Album, film, television and multimedia formats will be covered. *Prerequisite:* MTEC 446a. (Duplicates credit in former MUIN 478.)

MTEC 479 Audio Mastering (2) A survey of the final creative steps of an audio CD. Concepts of acoustics, mastering suite design, critical listening, frequency, dynamics and sequencing. *Prerequisite:* MTEC 275; *recommended preparation:* MTEC 446a. (Duplicates credit in former MUIN 479.)

MTEC 481 Programming the MIDI Interface (2, FaSpSm) Programming MIDI Interface Software using the C Programming Language. Developing original applications software for sequencing and real-time event

processing. (Duplicates credit in former MUEA 481.) *Recommended preparation:* prior experience in electronic music or computers.

MTEC 486 Computer-Assisted Music Editing for Picture (2, FaSpSm) Techniques and applications of recording, editing and synchronizing music and sounds to film, video or games, using time code and personal computers. *Prerequisite:* MTEC 446b. (Duplicates credit in former MUIN 486.)

MTEC 488ab Recording Studio Maintenance (2-2) Fundamentals needed to perform maintenance on professional audio equipment including trouble-shooting, interface, and alignment procedures. *Prerequisite:* MTEC 275. (Duplicates credit in former MUIN 488ab.)

MTEC 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit. (Duplicates credit in former MUEA 490x.)

MTEC 491 The Recording Console (4) Introduction to professional analog audio consoles and their use in recording and mixing music for records, video and film. *Prerequisite:* MTEC 275 and MTEC 446a. (Duplicates credit in former MTEC 291.)

MTEC 493 Audio Signal Processing Equipment (2) Principles and design characteristics of digital and analog signal processing equipment including plate reverb, digital reverbs, synchronizers, digital editing systems and mastering systems. *Prerequisite:* MTEC 275. (Duplicates credit in former MUIN 493.)

MTEC 494 Classical Music Recording (4) Principles of classical music recording with emphasis on history, equipment, techniques, and locations. Differences in orchestral, choral, opera, and small ensemble recording. (Duplicates credit in former MUIN 494.)

MTEC 498ab Senior Project (1-1) Culmination of the four-year course of study intended to afford students the opportunity to pursue a mentored project to advance their future careers. Graded IP/CR/NC.

MTEC 499 Special Topics (2-4, max 8, FaSpSm) Selected topics of current interest. (Duplicates credit in former MUEA 499.)

MTEC 501 Individual Instruction (1-2, max 8, FaSp) Intermediate and advanced instruction in the applications of technology to the creation and performance of music. *Recommended preparation:* experience with audio recording and synthesizers.

MTEC 550 Technology and the Collegiate Music Curriculum (2) Prepares the college-level music instructor for assuming a technological leadership role within a music department. Examines traditional, experimental, and pedagogical aspects of technology. *Recommended preparation:* computer, Internet, and basic music software literacy.

MTEC 575 Music Technology and Production (4, FaSpSm) Fundamentals of audio recording. Focuses on the principles and applications of sound and hearing, recording systems and their components, and production techniques. (Duplicates credit in former MUIN 575.)

MTEC 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. (Duplicates credit in former MUEA 590.)

MTEC 599 Special Topics (2-4, max 8) Selected topics of current interest.

MTEC 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. (Duplicates credit in former MUEA 790.)

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PERFORMANCE (EARLY MUSIC) (MPEM)

MPEM 201 Individual Instruction (1 or 2, max 8, FaSpSm) Secondary instrument for lower division students.

MPEM 390 Special Problems (1-4, Irregular) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

MPEM 450 Collegium Workshop (1, max 8, FaSp) Study and rehearsal of music of the Middle Ages, Renaissance, and Baroque; technique, interpretation, improvisation, and ornamentation. Open to all students.

MPEM 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

MPEM 499 Special Topics (2-4, max 8) Selected topics of current interest.

MPEM 501 Individual Instruction (1 or 2, max 8, FaSpSm) Secondary instruction for graduate music majors or instruction for graduate non-music majors.

MPEM 553 Individual Instruction (1 or 2, max 8, FaSpSm)

MPEM 554 Graduate Certificate Performance (4, max 16, FaSpSm) Individual instruction and related lab participation for Graduate Certificate students.

MPEM 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MPEM 599 Special Topics (2-4, max 8) Selected topics of current interest.

MPEM 650 Collegium Directing (2, max 4) Practical training in the direction of a Collegium Musicum or other early music ensemble; program planning, repertory search and preparation, historical instrumentation and arranging, rehearsal procedure, improvisational techniques, and maintenance of instruments.

MPEM 653 Performance (1 or 2, max 12, FaSpSm) Individual or master class instruction for DMA Performance majors.

MPEM 754 Artist Diploma Performance (4, max 16, FaSpSm) Individual instruction and related lab participation for Artist Diploma students.

MPEM 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Thornton School of Music

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PERFORMANCE (GUITAR) (MPGU)

MPGU 101x Non-Major Beginning Individual Instruction (1-2, max 2, FaSpSm) Individual

instruction at the beginning level designed for non-music majors with no previous experience. Not available for credit to music majors.

MPGU 120abcd Beginning Pop/Rock Guitar (2-2-2-2, FaSpSm) Introduction to the performance technique of pop/rock guitar as well as music theory fundamentals, exploring repertoire by artists such as The Beatles and Dave Matthews.

MPGU 121 Intensive Beginning Pop/Rock Guitar (4, FaSp) Introduction to the performance technique of pop/rock guitar as well as music theory fundamentals, exploring repertoire by artists such as The Beatles and Dave Matthews.

MPGU 125 Beginning Fingerstyle/Chord Guitar (2, FaSp) Basic fingerstyle guitar, learned through the study of such pieces as “Greensleeves,” “Malaguena,” and “Minuet” (Bach); song accompaniment patterns and music notation for the beginner.

MPGU 126 Easy Fingerstyle Beatles (2, FaSp) Techniques of classical guitar applied to the study of five to eight Beatles songs, from “Hey Jude” to “Blackbird.” No guitar or music background required.

MPGU 153 Individual Instruction (1 or 2, max 8, FaSpSm)

MPGU 158 Guitarists in the U.S. (2) Study of the lives and music of influential guitarists; analysis of musical and technical details. Open to all university students.

MPGU 159 Functional Skills for Studio Guitarists I (2) Study of technique, theory and aural skills as applied to guitar; fingerboard organization of melodic and chordal topics; sight reading.

MPGU 253 Individual Instruction (1 or 2, max 8, FaSpSm)

MPGU 257 Classical Guitar Performance Class (2, max 8, FaSp) Technical problems; solo and ensemble literature; interpretation; professional preparation. Required of first and second year Classical Guitar majors each semester in residence.

MPGU 258 Functional Skills for Studio Guitarists I (2, max 4, FaSp) Melodic and chordal topics applied to the total fingerboard; successful completion required for junior standing. *Prerequisite:* MPGU 159.

MPGU 259 Functional Skills for Classical Guitarists I (2, Fa) Fundamentals of music theory experienced through the medium of the classical guitar. Topics include analysis of important guitar works, basso continuo realization, arranging, and improvisation. *Recommended preparation:* MUCO 232a.

MPGU 300x Non-Major Individual Instruction (1-2, max 16, FaSpSm) Intermediate and advanced instruction designed for non-music majors. Not available for credit to music majors. (Duplicates credit in former MPGU 201 and MPGU 401.) *Recommended preparation:* MPGU 101x.

MPGU 301 Individual Instruction (1-2, max 16, FaSpSm) Intermediate and advanced instruction on secondary instrument for music majors, on principal instrument for music minors and B.A. music majors. Open only to music majors and minors. (Duplicates credit in former MPGU 201 and MPGU 401.)

MPGU 335 Jazz Guitar Master Class (1, FaSp) Explore the music of Joe Diorio, Wes Montgomery and John Coltrane in a master class setting.

MPGU 353 Individual Instruction (1 or 2, max 8, FaSpSm)

MPGU 357 Advanced Classical Guitar Techniques (2, Sp) An in-depth exploration of the most advanced facets of classical guitar technique. *Recommended preparation:* MPGU 257.

MPGU 358 Performance Practices for Studio Guitarists (2, max 4) Rehearsal procedures; stage deportment; interpretation of solo and ensemble literature; preparation for recitals and professional performance. *Prerequisite:* MPGU 258.

MPGU 390 Special Problems (1-4, Irregular) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

MPGU 415 Studio Guitar Pedagogy (2) Teaching techniques and literature; function of the hands; acoustical properties of instruments.

MPGU 416 Evolution of the Guitar in the United States (3) Historical survey of styles, literature and performance practice; emphasis on playing technique and interpretation. A time-line study relating guitar to popular music and historical events. (Duplicates credit in former MUHL 416.)

MPGU 417 Classical Guitar Pedagogy (2) Teaching techniques and literature; function of the hands; acoustical properties of instruments.

MPGU 426 Classical Guitar History and Literature (3, Fa) A survey of music for the guitar, lute and vihuela from 1500 to the present. (Duplicates credit in former MPGU 426a and former MUHL 426a.)

Recommended preparation: MUHL 332.

MPGU 427 Advanced Topics in Classical Guitar History and Literature (3, Sp) An in-depth study of major works for lute, vihuela and classical guitar, with emphasis on early music and the music of the 20th century. (Duplicates credit in former MPGU 426b and former MUHL 426b.) *Recommended preparation:* MPGU 426.

MPGU 428ab Improvisation and Arranging for Guitarists (3-3) Principles of improvisation and impromptu arranging; comparison and application of techniques and musical styles of the various kinds of guitars and related fretted instruments.

MPGU 453 Individual Instruction (1 or 2, max 8, FaSpSm)

MPGU 457 Classical Guitar Performance Class (2, max 8, FaSp) Technical problems; solo and ensemble literature. Required of all third and fourth year classical guitar majors each semester in residence.

MPGU 458 Current Electric Guitar Styles (2) Analysis and performance of music and techniques currently in use in the recording, TV and motion picture studios; includes study of recordings, videos and guitar equipment.

MPGU 459 Functional Skills for Classical Guitarists II (2, Sp) Advanced theory and composition on the guitar. Weekly analysis exercises, arranging projects and studies in improvisation and ornamentation are directed toward creating an original solo or chamber work for guitar. *Recommended preparation:* MUCO 232b, MUCO 233b.

MPGU 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

MPGU 499 Special Topics (2-4, max 8) Selected topics of current interest.

MPGU 501 Individual Instruction (1 or 2, max 8, FaSpSm) Secondary instruction for graduate music majors or instruction for graduate non-music majors.

MPGU 553 Individual Instruction (1 or 2, max 8, FaSpSm)

MPGU 554 Graduate Certificate Performance (4, max 16, FaSpSm) Individual instruction and related lab participation for Graduate Certificate students.

MPGU 557 Advanced Classical Guitar Performance Class (1, max 4) Study of advanced classical guitar solo and ensemble literature; interpretation; professional preparation and other topics appropriate for group study. *Prerequisite:* bachelor's degree with music major; principal instrument, classical guitar.

MPGU 558 Advanced Studio Guitar Performance Class (1, max 4) Study of advanced studio guitar and ensemble literature; interpretation; professional preparation and other topics appropriate for group study.

Prerequisite: bachelor's degree with music major; principal instrument, studio guitar.

MPGU 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MPGU 599 Special Topics (2-4, max 8) Selected topics of current interest.

MPGU 653 Performance (1 or 2, max 12, FaSpSm) Individual or master class instruction for DMA Performance majors.

MPGU 754 Artist Diploma Performance (4, max 16, FaSpSm) Individual instruction and related lab participation for Artist Diploma students.

MPGU 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Thornton School of Music

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PERFORMANCE (KEYBOARD STUDIES) (MPKS)

MPKS 150abcd Beginning Piano (2-2-2-2, FaSp) Techniques of performance, note reading, and basic musicianship. Not open to music majors.

MPKS 153 Individual Instruction (1 or 2, max 8, FaSpSm)

MPKS 160ab Functional Skills for Keyboard Majors I (a: 2, Fa; b: 2, Sp) Sight-reading and principles of style as related to intermediate literature; c-clef and open score reading; improvisation and functional harmony. Introduction to standard reference works, periodicals. Required of all keyboard majors.

MPKS 170ab Introduction to Piano Repertoire and Performance (a: 1, Fa; b: 1, Sp) Survey of basic piano repertoire and styles through lecture, discussion, and performance. *a:* Late Baroque through Beethoven; *b:* Schubert to the present. *Prerequisite:* piano performance major status.

MPKS 228 Four-Hand Keyboard Repertoire (1, max 4, FaSp) Preparation and performance of literature for piano duets and duo-piano. (Duplicates credit in former MUEN 228.)

MPKS 250ab Keyboard Instruction I (2-2, FaSp) Beginning and elementary instruction; emphasis on reading skills, harmonization, transposition, score reading, improvisation; group instruction in a keyboard laboratory facility.

MPKS 253 Individual Instruction (1 or 2, max 8, FaSpSm)

MPKS 260ab Functional Skills for Keyboard Majors II (2-2, FaSp) Sight-reading and principles of style as related to lower advanced literature; extended score reading; improvisation and functional harmony. Mini-survey; basic keyboard literature. *Prerequisite:* MPKS 160b.

MPKS 300x Non-Major Individual Instruction (1-2, max 16, FaSpSm) Intermediate and advanced instruction designed for non-music majors. Not available for credit to music majors. (Duplicates credit in former MPKS 201 and MPKS 401.)

MPKS 301 Individual Instruction (1-2, max 16, FaSpSm) Intermediate and advanced instruction on secondary instrument for music majors, on principal instrument for music minors and B.A. music majors. Open

only to music majors and minors. (Duplicates credit in former MPKS 201 and MPKS 401.)

MPKS 350ab Keyboard Instruction II (2-2, FaSp) Intermediate and advanced instruction; development of reading, performance and improvisation skills necessary for proficiency examinations. Group and individualized instruction in a keyboard laboratory facility. *Prerequisite:* MPKS 250b.

MPKS 353 Individual Instruction (1 or 2, max 8, FaSpSm)

MPKS 360ab Accompanying (a: 2, Fa; b: 2, Sp) Techniques of vocal and instrumental accompanying.

MPKS 390 Special Problems (1-4, Irregular) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

MPKS 431ab Piano Pedagogy: Introduction and Practicum (2-2, FaSp) The learning process at the keyboard; pedagogy and methodology of beginning methods. Studio/group instruction: children/adults. MPKS 431a: survey and observation. MPKS 431b: practice teaching: beginners. *Prerequisite:* MPKS 253, MPKS 260b.

MPKS 435 Technology of the Pianoforte and Harpsichord (2, Irregular) Analysis of technical innovations and maintenance of the pianoforte and harpsichord as related to musical performance.

MPKS 450ab Piano Pedagogy: Intermediate Literature and Functional Skills (a: 2, Fa; b: 2, Sp) Methods, study of college curriculum keyboard classes. Studio/group instruction. Business practices; audition, interview techniques. 450a: Survey and observation. 450b: practice teaching; secondary piano classes.

MPKS 453 Individual Instruction (1 or 2, max 8, FaSpSm)

MPKS 472ab Piano History and Literature (a: 2, Fa; b: 2, Sp) Solo piano literature; emphasis on composers' influences, performance practices and the development of the pianoforte. *a:* Late Baroque through Beethoven. *b:* Schubert to the present. *Prerequisite:* *a:* MUHL 331 and MUHL 332; *b:* MPKS 472a.

MPKS 481 Interpretation of Baroque Music (2, max 6, FaSp) Repertoire and performance practice in music of the period: style, phrasing, embellishments, dynamics, improvisation, tempi. Performance in class of solo and ensemble works, instrumental and vocal.

MPKS 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

MPKS 499 Special Topics (2-4, max 8) Selected topics of current interest.

MPKS 501 Individual Instruction (1 or 2, max 8, FaSpSm) Secondary instruction for graduate music majors or instruction for graduate non-music majors.

MPKS 520 Special Studies in Solo Repertoire for Piano (2, max 12, FaSp) Historical, stylistic and pedagogical aspects of solo repertoire. Special emphasis to be determined by the department.

MPKS 553 Individual Instruction (1 or 2, max 8, FaSpSm)

MPKS 554 Graduate Certificate Performance (4, max 16, FaSpSm) Individual instruction and related lab participation for Graduate Certificate students.

MPKS 560 Song Interpretation Master Class (2, max 12, FaSp) For advanced singers and pianists.

MPKS 561 Chamber Music Interpretation Master Class (2, max 12, FaSp) For advanced pianists and instrumentalists.

MPKS 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MPKS 599 Special Topics (2-4, max 8) Selected topics of current interest.

MPKS 653 Performance (1 or 2, max 12, FaSpSm) Individual or master class instruction for DMA Performance majors.

MPKS 754 Artist Diploma Performance (4, max 16, FaSpSm) Individual instruction and related lab participation for Artist Diploma students.

MPKS 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Thornton School of Music

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PERFORMANCE (POPULAR MUSIC) (MPPM)

MPPM 100 Popular Music Forum (1, max 4, FaSp) A weekly lecture series addressing a wide range of special topics and issues confronting the popular musician. Graded CR/NC.

MPPM 120 Popular Music Performance I (2, max 8, FaSp) Study of musical elements appropriate to the performance of popular music in a collaborative, interactive environment.

MPPM 153 Individual Instruction (1, 2, max 8, FaSp) Weekly individual instruction.

MPPM 240 Drumming Proficiency for the Popular Musician (2, FaSp) Beginning and elementary instruction in drum set techniques.

MPPM 250 Keyboard Proficiency for the Popular Musician (2, FaSp) Development of practical keyboard skills, including reading and realizing chord symbols, basics of voice leading, study of various harmonic and rhythmic styles.

MPPM 253 Individual Instruction (1, 2, max 8, FaSp) Weekly individual instruction.

MPPM 301 Individual Instruction (1-2, max 16, FaSpSm) Intermediate and advanced instruction on secondary instrument for all majors and minors except MPPM. Not open to B.M. in Popular Music Performance students.

MPPM 320 Popular Music Performance II (2, max 8, FaSp) Development of ensemble and communication skills through the performance and interpretation of American popular music in concert and studio settings. Development of original compositions. Open only to juniors and seniors. *Prerequisite:* MPPM 120.

MPPM 325ab Arranging in Popular Music (2, Fa; 2, Sp) *a:* Principles and techniques of arranging for voice and rhythm section in the popular music idiom. *Prerequisite:* MTEC 310, MTEC 311 and MTEC 446*b;* *b:* writing and arranging for small groups of brass, wind, and/or string instruments with rhythm section in the popular music idiom.

MPPM 340 Intermediate Drum Set Proficiency (2, FaSp) Intermediate level instruction in drum set performance including accompaniment techniques, fills, beat and brush patterns in jazz, Afro-Caribbean and Brazilian styles, interpreting drum charts. *Recommended preparation:* MPPM 240.

MPPM 420 Popular Music Performance Styles and Genres (2, max 8, FaSp) The detailed exploration of a specific style or genre in Popular Music through study of repertoire, history and practice with particular emphasis on performance. *Recommended preparation:* MPPM 120 and MPPM 320.

MPPM 450ab Final Project (1, Fa; 1, Sp) Major collaborative performance project in popular music. Graded CR/NC.

MPPM 490x Directed Research (1-8, max 12) Individual research and readings. Open only to juniors and seniors. Not available for graduate credit.

MPPM 499 Special Topics (2-4, max 8) Selected topics of current interest.

MPPM 590 Directed Research (1-12, max 12) Research leading to the Master's Degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MPPM 599 Special Topics (2-4, max 8) Selected topics of current interest

MPPM 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Thornton School of Music

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PERFORMANCE (STRINGS) (MPST)

MPST 101x Non-Major Beginning Individual Instruction (1-2, max 2, FaSpSm) Individual instruction at the beginning level designed for non-music majors with no previous experience. Not available for credit to music majors.

MPST 153 Individual Instruction (1 or 2, max 8, FaSpSm)

MPST 163 Beginning Harp (2, max 8, FaSp) Basic instruction in the fundamentals of solo harp playing, note reading, and basic musicianship. Open to music and non-music majors.

MPST 253 Individual Instruction (1 or 2, max 8, FaSpSm)

MPST 262 Double Bass Performance Class (1, max 4, FaSp) Study of solo and orchestra repertoire, professional preparation, and teaching techniques. Required of all first and second year double bass majors each semester in residence. *Prerequisite:* music major.

MPST 263 Harp Performance Class (1, max 4, FaSp) Study of solo and orchestra repertoire, professional preparation, and teaching technique. Required of all first and second year harp majors each semester in residence. *Prerequisite:* music major.

MPST 300x Non-Major Individual Instruction (1-2, max 16, FaSpSm) Intermediate and advanced instruction designed for non-music majors. Not available for credit to music majors. (Duplicates credit in former MPST 201 and MPST 401.) *Recommended preparation:* MPST 101x.

MPST 301 Individual Instruction (1-2, max 16, FaSpSm) Intermediate and advanced instruction on secondary instrument for music majors, on principal instrument for music minors and B.A. music majors. Open only to music majors and minors. (Duplicates credit in former MPST 201 and MPST 401.)

MPST 353 Individual Instruction (1 or 2, max 8, FaSpSm)

MPST 390 Special Problems (1-4, Irregular) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

MPST 453 Individual Instruction (1 or 2, max 8, FaSpSm)

MPST 462 Double Bass Performance Class (1, max 8, FaSp) Continuation of MPST 262. Required of all third and fourth year double bass majors each semester in residence. *Prerequisite:* music major.

MPST 463 Harp Performance Class (1, max 8, FaSp) Continuation of MPST 263. Required of all third and fourth year harp majors each semester in residence. *Prerequisite:* music major.

MPST 471ab String Pedagogy (a: 2, Fa; b: 2, Sp) Survey of teaching literature; techniques of teaching beginning, intermediate, and advanced students.

MPST 472 Orchestra Repertoire – Strings (2, max 8, FaSp) Orchestral literature for string players, covering a broad spectrum of the repertoire; emphasis on preparation for auditions.

MPST 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

MPST 499 Special Topics (2-4, max 8) Selected topics of current interest.

MPST 501 Individual Instruction (1 or 2, max 8, FaSpSm) Secondary instruction for graduate music majors or instruction for graduate non-music majors.

MPST 553 Individual Instruction (1 or 2, max 8, FaSpSm)

MPST 554 Graduate Certificate Performance (4, max 16, FaSpSm) Individual instruction and related lab participation for Graduate Certificate students.

MPST 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MPST 599 Special Topics (2-4, max 8) Selected topics of current interest.

MPST 653 Performance (1 or 2, max 12, FaSpSm) Individual or master class instruction for DMA Performance majors.

MPST 754 Artist Diploma Performance (4, max 16, FaSpSm) Individual instruction and related lab participation for Artist Diploma students.

MPST 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Thornton School of Music

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PERFORMANCE (VOCAL ARTS) (MPVA)

MPVA 101x Non-Major Beginning Individual Instruction (1-2, max 2, FaSpSm) Individual instruction at the beginning level designed for non-music majors with no previous experience. Not available for credit to music majors.

MPVA 141 Class Voice (2, max 4, FaSp) Introduction to the fundamental principles of singing: breath control, tone production, diction, and the use of appropriate song material.

MPVA 153 Individual Instruction (1 or 2, max 8, FaSpSm) Weekly individual instruction and vocal performance forum.

MPVA 203ab Acting for Singers I (2-2, FaSp) Use of dramatic techniques in the interpretation and performance of music; basic acting techniques for the operatic and recital stages; sensory exercises, movement, improvisation, relaxation and make-up. (Duplicates credit in former MPVA 303.) *Recommended preparation:* MPVA 153.

MPVA 241 Intermediate Class Voice (2, max 4, FaSp) Continued development of the fundamentals of singing, diction, and repertoire building. *Prerequisite:* MPVA 141.

MPVA 253 Individual Instruction (1 or 2, max 8, FaSpSm) Weekly individual instruction and vocal performance forum.

MPVA 300x Non-Major Individual Instruction (1-2, max 16, FaSpSm) Intermediate and advanced instruction designed for non-music majors. Not available for credit to music majors. (Duplicates credit in former MPVA 201 and MPVA 401.) *Recommended preparation:* MPVA 101x.

MPVA 301 Individual Instruction (1-2, max 16, FaSpSm) Intermediate and advanced instruction: secondary emphasis for music majors, principal emphasis for music minors and all B.A. music majors. Open only to music majors and minors. (Duplicates credit in former MPVA 201 and MPVA 401.)

MPVA 353 Individual Instruction (1 or 2, max 8, FaSpSm) Weekly individual instruction and vocal performance forum.

MPVA 390 Special Problems (1-4, Irregular) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

MPVA 402 Musical Theatre Workshop (2, max 8, Irregular) Stylistic and technical features of dramatic and musical elements involved in performance of American musical and standard operetta repertory; staging of scenes.

MPVA 403 Acting for Singers II (2, max 8, FaSp) Continuation of MPVA 203ab. Acting of operatic roles in different periods and styles; specific recital and audition techniques. *Recommended preparation:* MPVA 203ab.

MPVA 404 Word and Music in Opera (2, max 8, Irregular) Performance class for singers and pianists; analysis of recitatives, arias, and ensembles of various operatic styles; study of the technique of effective musical delivery. By audition only. *Recommended preparation:* MPVA 203ab.

MPVA 405 USC Opera (2, max 12, FaSp) Preparation, rehearsal, and performance of operatic works and excerpts; study of different operatic styles; public appearances. By audition only.

MPVA 406 Opera Coaching Techniques (2, max 8, Irregular) Score study for pianists, coaches, and conductors; role analysis; transcription techniques for one or two pianos of an orchestral score.

MPVA 407 Directing for the Operatic Stage (2, max 8, FaSp) Various approaches to operatic style; basic blocking; stage management. Student direction of scenes produced in USC Opera.

MPVA 438 Vocal Pedagogy (2, Fa) Voice physiology and function.

MPVA 439 Vocal Pedagogy Practicum (2, Sp) Pedagogical approaches and methodology; practice teaching. *Prerequisite:* MPVA 438.

MPVA 440 Italian and French Diction (2) Principles of pronunciation and enunciation; use of international phonetic alphabet. (Duplicates credit in former MPVA 442a.)

MPVA 441 English and German Diction (2) Principles of pronunciation and enunciation; use of international phonetic alphabet.

MPVA 442 Introduction to the International Phonetic Alphabet (2, Fa) Principles of pronunciation and enunciation; basic application of the International Phonetic Alphabet symbols and sounds to English, German, Italian, French and Latin.

MPVA 443 Cantata and Oratorio (2, 2 years, Fa) Historical survey of literature, style and performance practice; emphasis on performing solo and small ensemble sections of larger works.

MPVA 453 Individual Instruction (1 or 2, max 8, FaSpSm) Weekly individual instruction and vocal performance forum.

MPVA 479 Song Literature (2, max 4, FaSp) Song literature of Italy, France, Germany, Russia, Norway, Sweden, England, America; comparative analysis of various composers and their influence on song literature. (Duplicates credit in former MUHL 479.) *Recommended preparation:* for music majors, MUHL 331; for non-music majors, MUHL 315x.

MPVA 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

MPVA 499 Special Topics (2-4, max 8) Selected topics of current interest.

MPVA 501 Individual Instruction (1 or 2, max 8, FaSpSm) Secondary instruction for graduate music majors or instruction for graduate non-music majors.

MPVA 540 Special Studies in Vocal Literature (2, max 6, Sp) Art song, concert and operatic repertoire. Emphasis to be determined by the department.

MPVA 541 Comparative Vocal Pedagogy (2, 2 years, Sp) Survey of pedagogical sources from early 17th century to present; major historic figures, terminologies and methods; relevance to modern-day singing and teaching practice.

MPVA 553 Individual Instruction (1 or 2, max 8, FaSpSm) Weekly individual instruction and vocal performance forum.

MPVA 554 Graduate Certificate Performance (4, max 16, FaSpSm) Individual instruction and related lab participation for Graduate Certificate students.

MPVA 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MPVA 599 Special Topics (2-4, max 8) Selected topics of current interest.

MPVA 653 Individual Instruction (1 or 2, max 12, FaSpSm) Weekly individual instruction and vocal performance forum.

MPVA 754 Artist Diploma Performance (4, max 16, FaSpSm) Individual instruction and related lab participation for Artist Diploma students.

MPVA 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Thornton School of Music

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PERFORMANCE (WIND AND PERCUSSION) (MPWP)

MPWP 101x Non-Major Beginning Individual Instruction (1-2, max 2, FaSpSm) Individual instruction at the beginning level designed for non-music majors with no previous experience. Not available for credit to music majors.

MPWP 153 Individual Instruction (1 or 2, max 8, FaSpSm)

MPWP 252 Individual Instrument Performance Class I (1, max 4, FaSp) Solo and orchestra repertoire, professional preparation, reed making, and other matters appropriate to group study. Required of all first and second year wind and percussion majors each semester in residence.

MPWP 253 Individual Instruction (1 or 2, max 8, FaSpSm)

MPWP 300x Non-Major Individual Instruction (1-2, max 16, FaSpSm) Intermediate and advanced instruction designed for non-music majors. Not available for credit to music majors. (Duplicates credit in former MPWP 201 and MPWP 401.) *Recommended preparation:* MPWP 101x.

MPWP 301 Individual Instruction (1-2, max 16, FaSpSm) Intermediate and advanced instruction on secondary instrument for music majors, on principal instrument for music minors and B.A. music majors. Open only to music majors and minors. (Duplicates credit in former MPWP 201 and MPWP 401.)

MPWP 353 Individual Instruction (1 or 2, max 8, FaSpSm)

MPWP 390 Special Problems (1-4, Irregular) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

MPWP 440 Drum Set for Classical Percussionists (1, max 2, Fa) A progressive course for Classical Percussion majors as it pertains to drum set in the symphony orchestra and other classical settings. Open only to percussion, and performance (wind instrument or percussion).

MPWP 452 Individual Instrument Performance Class II (1, max 4, FaSp) Solo and orchestra repertoire, professional preparation, reed making, and other matters appropriate to group study. Required of all third and fourth year wind and percussion majors each semester in residence.

MPWP 453 Individual Instruction (1 or 2, max 8, FaSpSm)

MPWP 481 Interpretation of Baroque Music (2, max 6, FaSp) Repertoire and performance practice in music of the period: style, phrasing, embellishments, dynamics, tempi. Performance in class of solo and ensemble works, instrumental and vocal.

MPWP 482 Interpretation of Classic, Romantic, and 20th Century Wind and Percussion Music (2) Analysis and performance of 18th, 19th, and 20th century ensemble music, octet through symphonic band; historical perspectives of instruments including technical developments.

MPWP 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

MPWP 499 Special Topics (2-4, max 8) Selected topics of current interest.

MPWP 501 Individual Instruction (1 or 2, max 8, FaSpSm) Secondary instruction for graduate music majors or instruction for graduate non-music majors.

MPWP 551 Individual Instrument Performance Class III (1, max 2, FaSp) Solo and orchestra repertoire, professional preparation, reed making, and other matters appropriate to group study. Intended for M.M. wind and percussion majors.

MPWP 553 Individual Instruction (1 or 2, max 8, FaSpSm)

MPWP 554 Graduate Certificate Performance (4, max 16, FaSpSm) Individual instruction and related lab participation for Graduate Certificate students.

MPWP 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MPWP 599 Special Topics (2-4, max 8) Selected topics of current interest.

MPWP 653 Performance (1 or 2, max 12, FaSpSm) Individual or master class instruction for DMA Performance majors.

MPWP 754 Artist Diploma Performance (4, max 16, FaSpSm) Individual instruction and related lab participation for Artist Diploma students.

MPWP 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

SACRED MUSIC (MSCR)

MSCR 390 Special Problems (4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only. (Duplicates credit in former MUCH 390.)

MSCR 473 Hymnology (2) Study of hymns and hymn tunes, and their functions, from the formation of the Christian Church to the present; historical survey of the literature. (Duplicates credit in former MUCH 473.)

MSCR 474 The Organ in Worship and Congregational Life (2) Accompanying; hymn playing, transposition, improvisation, vocal score reading; conducting from the console; service repertoire. Basic knowledge of the organ as an instrument and planning for and purchase of an organ. (Duplicates credit in former MUCH 474.)

MSCR 475 Introduction to Jewish Music (2) Development of Jewish music from biblical times to the present, with emphasis on liturgical practices, traditions of itinerant musicians and the adaptability of community song.

MSCR 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit. Open only to juniors and seniors. (Duplicates credit in former MUCH 490.)

MSCR 499 Special Topics (2-4, max 8) Selected topics of current interest.

MSCR 570 Foundations of Sacred Music (2) An introduction to the history of sacred music, liturgical practices and worship traditions from antiquity to present day. (Duplicates credit in former MUCH 570.)

MSCR 571 Music of the Great Liturgies (2) Comparison of the Jewish, Eastern Orthodox, Roman Catholic, Lutheran, and Anglican liturgies and their music; relation to music in the nonliturgical service; the church year. (Duplicates credit in former MUCH 571.)

MSCR 572 Sacred Music Administration (2, FsSpSm) Developing, maintaining and administering the music program of the church or other religious institutions. Programming, staffing, developing budgets, techniques and repertoire for the graded choir program, handbell choir and other ensembles. (Duplicates credit in former MUCH 572.)

MSCR 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. (Duplicates credit in former MUCH 590.)

MSCR 599 Special Topics (2-4, max 8) Selected topics of current interest.

MSCR 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. (Duplicates credit in former MUCH 790.)

MSCR 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC. (Duplicates credit in former MUCH 794abcdz.)

Thornton School of Music

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

SCHOOL OF MUSIC (MUSC)

MUSC 110 Freshman Forum (1, FaSp) Introduction to issues and skills relevant to the professional musical world of today. Open only to music majors. Graded CR/NC.

MUSC 255 Songwriting I (2, FaSp) Development of musical and lyrical skills, composing, listening, analysis, and critiques of popular original music.

MUSC 355 Songwriting II (2, FaSp) Continuation of Songwriting I; particular emphasis on the analysis of the techniques of important popular songwriters and the application of these techniques to original songs. (Duplicates credit in former MUCO 252.) *Prerequisite:* MUSC 255.

MUSC 400m The Broadway Musical: Reflection of American Diversity, Issues, and Experiences (4, FaSpSm) Selected Broadway musicals serve as a catalyst for inquiry into human diversity, cross-culturalism, and significant social and political issues.

MUSC 410 Electronic Dance Music (4, FaSp) The study of EDM's origins and development, focusing on the cultural and technological contexts that have influenced the genre.

MUSC 420m Hip-Hop Music and Culture (4) A history of hip-hop music from its inception to the present: its musical processes and styles, as well as attendant social, political, and cultural issues.

MUSC 422 The Beatles: Their Music and Their Times (4) Music, lyrics, recordings, production techniques, career strategy, social ramifications, and especially the technological impact of the musical group known as The Beatles.

MUSC 423 Classic Rock: Popular Music of the Sixties and Seventies (2) Critical examination of the lyrics, structure, associated mythology, technology, and evolving styles of popular music reflecting the turbulent societal changes during the Sixties and Seventies.

MUSC 424 Iconic Figures of Popular Music (2, max 8, FaSp) Music, life, recordings, and attendant musical, cultural and political influences of a seminal musician or group in 20th or 21st century popular music.

MUSC 430m Music and the Holocaust (4, FaSp) Study of the creation and performance of Holocaust-related music from 1933 to the present, including interaction with other arts.

MUSC 444 American Roots Music: History and Culture (4, Irregular) The history, genre, styles, songs, lyrics, and influences of American vernacular music in the 20th century, including the background that spawned

these musical genres.

MUSC 450m The Music of Black Americans (4, FaSp) The musical contribution of Africans and African Americans to American society. Musical genres and the relationship between music and society will be topics for examination.

MUSC 455 Songwriting III: The Performing Songwriter (2) Continuation of Songwriting I and II with emphasis on the development of performance skills of original popular music in preparation for songwriting showcases. (Duplicates credit in former MUCO 254.) *Prerequisite:* MUSC 355.

MUSC 460 Film Music: History and Function from 1930 to the Present (4, Fa) A survey of the art and craft of film music as practiced by outstanding composers in motion pictures.

MUSC 465 Music, Television and American Culture (4, Sp) An exploration of the social and cultural impact of music written for, popularized by, or exploited by American television from the 1950s through today.

MUSC 470 Contemporary Popular Music: A Global Perspective (2, Sm) Contemporary popular music in global culture; includes performance and collaboration opportunities with local musicians.

MUSC 496 Careers in Music (2, Sp) A study of the practical aspects of the music business, including the history, procedures, standard practices, economics and technologies employed by the music industry. Open to juniors and seniors only.

MUSC 498x Internship in Music (1-4, max 8, FaSpSm) Practical work experience in the student's field of study, at an off-campus location. Students are individually supervised by faculty. Open only to Bachelor of Music and Bachelor of Arts, Music majors only. Not available for graduate credit. Graded CR/NC.

MUSC 499 Special Topics (2-4, max 8, FaSpSm) Selected topics of current interest.

MUSC 598 Internship in Music (1-4, max 4, FaSpSm) Practical work experience in the student's field of study, at an off-campus location. Students are individually supervised by faculty. Open only to music majors. Graded CR/NC.

MUSC 599 Special Topics (2-4, max 8) Selected topics of current interest.

MUSC 798 Internship in Music (1-4, max 4, FaSpSm) Practical work experience in the student's field of study, at an off-campus location. Students are individually supervised by faculty. Open only to doctoral students in music. Graded CR/NC.

MUSC 800 Studies for the Qualifying Examination in Music (0, FaSpSm) Studies for the qualifying examination. Duplicates credit in GRSC 800. Graded Credit/No Credit. Open only to Doctor of Musical Arts students.

USC School of Pharmacy

Ranked in the top 10 by U.S. News & World Report for its Pharm.D. program, the USC School of Pharmacy uniquely covers the full spectrum of pharmaceutical care – from drug discovery and development to translation and regulation to patient care and outcomes – giving students the opportunity to learn and experience in a multidisciplinary, “bench-to-bedside” environment.

Founded in 1905, the USC School of Pharmacy is the oldest and foremost pharmacy school in Southern California. The school is a national leader known for its progressive curriculum and research excellence. Approximately 50 percent of the practicing pharmacists in Southern California are graduates of USC. The school has an average student body of 735 full-time students in the Pharm.D. program and 250 students pursuing M.S., Ph.D., and DRSc degrees in pharmacology and toxicology, pharmaceutical sciences, health economics, regulatory science and healthcare decision analysis. There are 73 full-time faculty and more than 400 part-time and volunteer faculty at the school.

The school occupies state-of-the-art facilities on the USC Health Sciences Campus in metropolitan Los Angeles, adjacent to the Los Angeles County+USC Medical Center (one of the largest teaching hospitals in the country), the USC Norris Cancer Hospital and the Keck Hospital of USC. USC pharmacy students receive clinical training at these facilities and many other affiliated hospitals, health care clinics, skilled nursing facilities, home health care agencies and pharmacies in the Southern California region.

Recognized as one of the most innovative schools of pharmacy, the USC School of Pharmacy serves as a model for other progressive schools. In 1950, USC was the first to establish a Doctor of Pharmacy program. Additional national “firsts” that distinguish the school include: first clinical pharmacy program and first M.S. in radiopharmacy (both in 1968); first Pharm.D./MBA dual degree program (1988); first M.S. and Ph.D. programs in pharmaceutical economics and policy (1994) and first professional doctorate in regulatory science (2008).

Consistently the top private pharmacy school nationwide, the school is a member of the American Association of Colleges of Pharmacy, and the Pharm.D. program is accredited by the Accreditation Council for Pharmacy Education.

Administration

R. Pete Vanderveen, Ph.D., R.Ph., *Dean*

Sarah F. Hamm-Alvarez, Ph.D., *Executive Vice Dean and Vice Dean for Research and Graduate Affairs*

Scott Evans, Pharm.D., *Associate Dean, Academic Health Center Programs*

Fred G. Weissman, Pharm.D., J.D., *Associate Dean, Student/Faculty Affairs and Admission*

Michael Z. Wincor, Pharm.D., *Associate Dean, Global Initiatives and Technology*

Kathleen H. Besinque, Pharm.D., M.S.Ed., *Assistant Dean, Curriculum and Assessment*

Steven Chen, Pharm.D., *Chair, Titus Family Department of Clinical Pharmacy and Pharmaceutical Economics & Policy*

Curtis Okamoto, Ph.D., *Interim Chair, Department of Pharmacology and Pharmaceutical Sciences*

Faculty

John Stauffer Dean's Chair in Pharmaceutical Sciences: R. Pete Vanderveen, Ph.D., R.Ph.

University Professor and Boyd P. and Elsie D. Welin Professor in Pharmaceutical Sciences: Jean Chen Shih, Ph.D.

Hygeia Centennial Chair in Clinical Pharmacy: Steven Chen, Pharm.D.

Quintiles Chair in Pharmaceutical Development and Regulatory Innovation: Darius Lakdawalla, Ph.D.

R. Pete Vanderveen Endowed Chair in Therapeutic Discovery and Development: Roberta Diaz Brinton, Ph.D.

John A. Biles Professor in Pharmaceutical Sciences: Wei-Chiang Shen, Ph.D.

Gavin S. Herbert Professor in Pharmaceutical Sciences: Sarah F. Hamm-Alvarez, Ph.D.

Charles Krown/Pharmacy Alumni Professor in Pharmaceutical Sciences: Enrique Cadenas, M.D., Ph.D.

Provost Professor of Cell and Neurobiology, Pharmacology and Pharmaceutical Sciences, and Psychology: Pat Levitt, Ph.D.

Provost Professor of Medicine and Pharmacy: Michael Kahn, Ph.D.

Professors: Enrique Cadenas, M.D., Ph.D.; Roberta Diaz Brinton, Ph.D.; Dana Goldman, Ph.D.; Sarah F. Hamm-Alvarez, Ph.D.; Joel W. Hay, Ph.D.; Darius N. Lakdawalla, Ph.D.; Michael B. Nichol, Ph.D.; Wei-Chiang Shen, Ph.D.; Jean C. Shih, Ph.D.; Rajindar Sohal, Ph.D.; R. Pete Vanderveen, Ph.D.; Clay C.C. Wang, Ph.D.

Associate Professors: James D. Adams, Jr., Ph.D.; Julio A. Camarero, Ph.D.; Jason N. Doctor, Ph.D.; Roger F. Duncan, Ph.D.; Ian S. Haworth, Ph.D.; Geoffrey Joyce, Ph.D.; Jeffrey S. McCombs, Ph.D.; Curtis T. Okamoto, Ph.D.; Kathleen Rodgers, Ph.D.; Neeraj Sood, Ph.D.; Bangyan Stiles, Ph.D.

Assistant Professors: J. Andrew MacKay, Ph.D.; Bogdan Z. Olenyuk, Ph.D.; Jianming Xie, Ph.D.; Yong (Tiger) Zhang

Lecturer: Rebecca Romero, Ph.D.

Research Associate Professor: Chuanqing Ding, M.D., Ph.D.

Research Assistant Professors: Liana Asatryan, Ph.D.; Julianna Hwang, Pharm.D., Ph.D.; Jennica Zaro, Ph.D.

Professors of Pharmacy: Julie A. Dopheide, Pharm.D.; Frances Richmond, Ph.D.; Glen L. Stimmel, Pharm.D.; Bradley R. Williams, Pharm.D.; Annie Wong-Beringer, Pharm.D.

Associate Professors of Pharmacy: Melvin F. Baron, Pharm.D., MPA; Paul M. Beringer, Pharm.D.; Kathleen H.

Besinque, Pharm.D., M.S.Ed.; Steven Chen, Pharm.D.; Daryl L. Davies, Ph.D.; Kevin L. Forrester, Pharm.D.; William C. Gong, Pharm.D.; Grant D. Lawless, M.D., R.Ph.; Cynthia L.L. Lieu, Pharm.D.; Stanley G. Louie, Pharm.D.; Gladys H. Mitani, Pharm.D.; Tien Ng, Pharm.D.; Susie H. Park, Pharm.D.; Irving Steinberg, Pharm.D.; Fred G. Weissman, Pharm.D., J.D.; Michael Z. Wincor, Pharm.D.; Frances S. Wong, Pharm.D.

Assistant Professors of Pharmacy: Betty Chan, Pharm.D.; Vivian Chow, Pharm.D.; Marc Cosep, Pharm.D.; Jennifer H. Cupo-Abbott, Pharm.D.; Melissa Durham, Pharm.D.; Emily Han, Pharm.D.; Michael Jamieson, DRSc; Jiwon Kim, Pharm.D.; C. Benson Kuo, Ph.D.; Kum Ja K. Lee, Pharm.D.; May C. Mak, Pharm.D.; Emi Minejima, Pharm.D.; Edith Mirzaian, Pharm.D.; Rory O'Callaghan, Pharm.D.; Eunjoo Pacifici, Pharm.D., Ph.D.; Paula Phongsamron, Pharm.D.; Candace Tan, Pharm.D.; Florence H. Wong-Yu, Pharm.D.

Lecturers: Leah Amirian, Pharm.D.; Sarah Sae Byul Ma, Pharm.D.

Emeritus Professor and Dean: Timothy M. Chan, Ph.D.

Emeritus Professor: Eric J. Lien, Ph.D.

Programs

The School of Pharmacy offers curricula leading to the Doctor of Pharmacy (Pharm.D.) and Doctor of Regulatory Science (D.R.Sc.) degrees and graduate degrees through the Graduate School including: Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in pharmaceutical sciences, Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in molecular pharmacology and toxicology, Master of Science (M.S.) in pharmaceutical economics and policy, Doctor of Philosophy (Ph.D.) in health economics, Master of Science (M.S.) in Health Care Decision Analysis, Doctor of Philosophy (Ph.D.) in clinical and experimental therapeutics, Master of Science (M.S.) in regulatory science, and Master of Science (M.S.) in management of drug development. Seven dual degree programs, one joint program and numerous certificate programs are also offered, including: Pharm.D./J.D., Pharm.D./MBA, Pharm.D./MPH, Pharm.D./M.S. in regulatory science, Pharm.D./M.S. in gerontology, Pharm.D./M.S. in global medicine, Pharm.D./Ph.D., Pharm.D./graduate certificate in gerontology, Pharm.D./M.S. in health care decision analysis, and graduate certificates in clinical research design and management, food safety, preclinical drug development, and patient and product safety.

The USC School of Pharmacy Doctor of Pharmacy program is accredited by Accreditation Council for Pharmacy Education, 135 S. LaSalle Street, Suite 4100, Chicago, IL 60603-4810, phone: (312) 664-3575, Fax (312) 664-4652 or (312) 664-7008.

Tuition and Fees (Estimated)

Tuition for School of Pharmacy degree programs (Pharm.D.; M.S. and Ph.D. in pharmaceutical sciences; M.S. and Ph.D. in molecular pharmacology and toxicology; M.S. and Ph.D. in health economics) is charged at a flat rate (which differs from standard USC tuition). See the Tuition and Fees section for fee information. These fees are subject to change.

Doctor of Pharmacy students must pay a \$500 non-refundable acceptance deposit that is applicable toward tuition. For deposit information in other degree programs in the School of Pharmacy, please consult appropriate offices.

Honor Societies

Rho Chi

Theta chapter of Rho Chi, the academic honor society in pharmacy, was established at USC in 1925. Charters for chapters of this organization are granted only to student groups in those colleges that are members in good standing of the American Association of Colleges of Pharmacy. Eligibility for membership is based on high attainment in scholarship, character, personality and leadership. All candidates selected for membership must have completed three semesters of the pharmacy program, and they must be approved by the Dean of the School of Pharmacy.

Phi Lambda Sigma

The Phi Lambda Sigma chapter was established at USC in 1988. This national pharmacy leadership society is

devoted to identifying, supporting and recognizing the contribution of pharmacy students to their colleges, their classmates, their campuses, their communities and to their chosen profession.

Student Housing and Service Facility, Health Sciences Campus

There are limited university-managed accommodations on the Health Sciences Campus. The Blanche and Frank R. Seaver Student Residence, adjacent to the John Stauffer Pharmaceutical Sciences Center, provides dining facilities and a bookstore. For residence information, call (323) 442-1576; for bookstore information, call (323) 442-2674. Students may also live in student housing on the University Park Campus, located about eight miles from the Health Sciences Campus.

Student Health Services, Health Sciences Campus

Services of the Student Health Center, covered by the mandatory student health fee, include the ambulatory care health services provided by the Student Health Center nursing staff. The Student Health Center is located in the USC Health Care Consultation Center, 1500 San Pablo Street, Suite 104, adjacent to the USC University Hospital, one block northeast of the School of Pharmacy. The telephone number is (323) 442-5980. In addition to the student health fee, all Pharm.D. students must have major medical insurance coverage from the USC Student Health Plan. A student may request a waiver of the USC Student Health Plan if covered by a personal medical plan that meets criteria established by the Health Insurance Office.

School of Pharmacy

Professional Degrees

Doctor of Pharmacy

The USC School of Pharmacy offers a full-time, four-year course of study leading to the Doctor of Pharmacy (Pharm.D.). An undergraduate B.A. or B.S. degree is required for admission to the program. A description of the curriculum is listed in the following pages. The degree will be conferred upon successful completion of all Doctor of Pharmacy degree requirements. The USC School of Pharmacy Doctor of Pharmacy program is accredited by the Accreditation Council for Pharmacy Education, which is the national agency that accredits professional degree programs in pharmacy and providers of continuing pharmacy education.

Application Procedure

The School of Pharmacy requires applicants to complete both the Pharmacy College Application Service (PharmCAS) and a supplemental application for admission. The supplemental application is available at pharmacyschool.usc.edu.

Both the PharmCAS and the supplemental applications deadlines are November 1. Follow the instructions carefully for both the PharmCAS and supplemental applications. Applications will not be reviewed until both applications have been received by the Office of Admission and Student Affairs. An on-campus interview is required for admission. Only applicants with complete application files and are evaluated for an on-site interview and only highly qualified applicants will be granted interviews. Not all applicants will be invited for an interview. Applicants are encouraged to apply well before the November 1 deadline to allow time for file review.

All documents mailed directly to the School of Pharmacy and received from PharmCAS by the Office of Admission become the property of the university and cannot be returned or duplicated for other than USC's purposes.

Admission Guidelines

The Admission Committee considers several factors in making admissions decisions: strong academic performance; the on-site interview including the writing component; letters of recommendation; and other components of the completed application. The committee also considers a candidate's motivation to pursue

pharmacy, interpersonal skills, oral and written communication skills, and leadership abilities. While the School of Pharmacy gives equal consideration to every qualified applicant, the school cannot accommodate all qualified candidates who apply for admission.

International Students

Because the Doctor of Pharmacy is consistently oversubscribed, the University of Southern California, School of Pharmacy does not admit holders of international visas to the program.

Entrance Requirements

Admission to the School of Pharmacy requires completion of a baccalaureate degree, completion of the specified prerequisite college courses, with a grade of C or better and a minimum 3.0 (A = 4.0) grade point average and a minimum cumulative 3.0 grade point average.

Pre-pharmacy Requirements*

**Courses for science majors are required to meet the Pre-Pharmacy Requirements*

To be eligible for admission to the School of Pharmacy, applicants must take required prerequisite college courses, including general biology (one-year course with laboratory, excluding human anatomy and physiology), general chemistry (one-year course with laboratory, including inorganic and qualitative analysis), organ chemistry (one-year course with laboratory), biochemistry (upper division), microbiology (one course), calculus (one semester or two quarters), and human physiology (one course for science majors). The science requirements should be completed at an accredited four-year university.

Recommended Courses:

Upper-division molecular biology, physics (thermodynamics and electromagnetism), microeconomics, statistics (non-business), human behavior in either general psychology, introductory sociology, or cultural anthropology

Grades of pass/no pass or credit/no credit will not be accepted (unless a course is only offered on a pass/no pass basis). Online courses are not accepted for science courses with a laboratory requirement. Prerequisite courses are subject to change, and applicants are encouraged to check with the school prior to submitting an application.

Mathematics and Sciences

Courses must include calculus, general biology, microbiology, human physiology, general chemistry, biochemistry, and organic chemistry. Only courses for science majors are acceptable. It is highly recommended that math and science courses be completed during the regular academic year and not during a summer term.

Advanced Placement and International Baccalaureate Examinations

Applicants may use AP and IB courses to meet certain USC School of Pharmacy prerequisites with the following provisos. AP results are acceptable only with scores of 4 or 5. IB results are acceptable with a score of 5. AP or IB may be applied to a maximum of one semester/one quarter of general chemistry or general biology; they may not be used to satisfy the laboratory requirement. Note: AP/IB courses used to meet prerequisites will be for course credit only (i.e., they will not count toward the GPA). The Admission Committee recommends that applicants enroll in all of the required pre-pharmacy courses. Please contact the School of Pharmacy Office of Admission for specific information.

Entrance Examination

An in-person interview is required for admission. The PCAT is not required at this time.

Special Admission Program for Entering Freshmen

The Trojan Admission Prepharmacy (TAP) program provides priority consideration for admission to the USC School of Pharmacy's four-year Doctor of Pharmacy (Pharm.D.) program for USC undergraduates who are accepted to the program. Students accepted into the TAP program apply to the Doctor of Pharmacy program during their senior year and must meet all regular admission criteria including a B.A./B.S. degree at USC, specific academic performance standards and an on-site interview. Students in the TAP program are required to complete all prerequisite courses at USC and meet regularly with a TAP program adviser. The TAP program is

designed to attract highly qualified, mature high school seniors applying to USC. A specific listing of USC courses and a recommended program for TAP participants may be obtained from the School of Pharmacy Office of Admission or online at pharmacyschool.usc.edu/programs/pre/tap.

General Education Requirements (TAP Students Only)

TAP students must meet the university's general education requirements; see The USC Core and the General Education Program for details.

Pharm.D. Curriculum Requirements

The completion of a four-year professional curriculum is required for the Doctor of Pharmacy (Pharm.D.) degree. The Pharm.D. curriculum is a "block" program. All students must enroll in the specified block of courses each semester. Students do not have a choice in the course sequence. Year III and IV students have a limited number of elective course choices. Student progress is permitted only when the prior semester has been successfully completed. Students should view the curriculum outlined here as advisory only and subject to modification. A minimum of 144 units is required for graduation.

Students enrolled in the Doctor of Pharmacy program are required to be licensed by the California Board of Pharmacy as an intern pharmacist for the entire length of the program. Completion of the program requires placement in health care settings for experiential learning. The School of Pharmacy has developed technical standards to inform students of the non-academic requirements of the program. Placement in health care settings may require the applicants pass criminal background screening and/or drug screening tests.

The pharmacist of tomorrow will provide preventive and therapeutic pharmaceutical care, provide drugs to patients, communicate in health care matters, meet the ethical and legal requirements of the practice of pharmacy and maintain professional expertise.

The curriculum committee of the School of Pharmacy has developed guidelines and patient care competencies consistent with interpretations of this new role. An appropriate and dynamic educational program is needed to develop these competencies. Therefore curriculum changes may be necessary in order to meet scientific advances, population profile changes, increasing health expectations, technological advances, or changes in health services.

Core Curriculum

Foundation courses in the biomedical, pharmaceutical, social-administrative and clinical sciences comprise the first three years of the program. Students complete Introductory Pharmacy Practice Experiences (IPPE) along with classroom-based courses. The final (fourth) year of the program includes the Advanced Pharmacy Practice Experiences (APPE), which are set in health care setting throughout the greater Los Angeles area, and a capstone course leading to a final paper/project.

YEAR I CURRICULUM		UNITS
PHRD 501	Pharmaceutics I	4
PHRD 502	Pharmaceutics II	3
PHRD 503	Biological Systems I	4
PHRD 504	Biological Systems II	6
PHRD 505	Molecular Genetics and Therapy	3
PHRD 507	Health Care Delivery Systems	2
PHRD 509	Pharmacy Practice and Experience I	4
PHRD 510	Pharmacy Practice and Experience II	4
PHRD 554	Public Health and Epidemiology	2
PHRD 555	Biochemical and Molecular Sites of Drug Action	4
YEAR II CURRICULUM		UNITS
PHRD 506	Self Care and Non-Prescription Therapies	5

PHRD 508	Pharmacy Literature Analysis and Drug Information	3
PHRD 551	Immunology	3
PHRD 552	Pharmaceutics III	3
PHRD 553	Management Within Health Care Organizations	2
PHRD 557	Therapeutics I	4
PHRD 559	Therapeutics II	3
PHRD 560	Therapeutics III	6
PHRD 561	Pharmacy Practice and Experience III	3
PHRD 562	Therapeutics IV	4

YEAR III CURRICULUM

UNITS

PHRD 601	Therapeutics V	6
PHRD 603	Therapeutics VI	3
PHRD 605	Therapeutics VII	4
PHRD 606	Therapeutics VIII	2
PHRD 607	Nutrition	2
PHRD 608	Therapeutics IX	2
PHRD 610	Therapeutics X	3
PHRD 612	Therapeutics XI	2
PHRD 614	Pharmaceutical Economics and Outcome Studies	3
PHRD 616	Pharmacy Law and Ethics	3

Electives (two, one course per semester)*

*Students choose elective courses from courses approved by the School of Pharmacy Curriculum Committee and available during that semester. Students will be provided a list of courses approved each year.

Required APPE Courses (all five courses)

YEAR IV CURRICULUM

PHRD 701	Acute Care Clinical APPE
PHRD 704	Primary Care APPE
PHRD 705	Community Pharmacy APPE
PHRD 718	Hospital Pharmacy Practice APPE
PHRD 750	Advanced Pharmacy Practice Elective APPE

Elective APPE Course (choose one course from list):

PHRD 714	Nuclear Pharmacy APPE
PHRD 725	International Pharmacy Practice Experience
PHRD 726	Directed Clinical Project I APPE
PHRD 727	Directed Clinical Project II APPE
PHRD 731	Advanced Geriatrics APPE
PHRD 735	Clinical Pharmacy Research APPE
PHRD 738	Pharmaceutical Industry APPE
PHRD 750	Advanced Pharmacy Practice Elective (APPE) (second time)
PHRD 751	Non-traditional Advanced Pharmacy Practice Elective (APPE)

CAPSTONE

PHRD 796ab	Doctor of Pharmacy Capstone (a in the fall, and b in the spring)
------------	--

Degree Requirements

All students in the Doctor of Pharmacy degree program must meet course requirements, grade point average requirements and program residency requirements. All course requirements must be completed with a grade of “C” or better for letter graded courses and a grade of A or B quality in non-letter graded courses. The degree will not be conferred until the student has successfully completed all Doctor of Pharmacy degree requirements. Students are subject to the degree requirements in the *USC Catalogue* current for the semester of their admission into the Doctor of Pharmacy program. Students must have a cumulative grade point average of 3.0 in the Pharm.D. curriculum to meet graduation requirements.

Registration

Details of the School of Pharmacy registration procedure will be included in the orientation program prior to the first week of classes.

Cancellation of Registration

During the first three years of the Doctor of Pharmacy program (PI, II and III), a student will only be permitted to withdraw from the entire block of courses enrolled in a semester and may not selectively withdraw from a single course or group of courses. During the fourth year, students must contact the School of Pharmacy Office of Admission and Student Affairs for withdrawal guidelines. Procedures for readmission into the program or make-up of incomplete courses are included in the school’s brochure on academic policies and procedures.

School of Pharmacy

Graduate Degrees

The School of Pharmacy, through the Graduate School, offers curricula leading to the M.S. and Ph.D. degrees in pharmaceutical sciences, in molecular pharmacology and toxicology, and in health economics, as well as a Ph.D. in clinical and experimental therapeutics. The school also offers interdisciplinary M.S. degrees in regulatory science and in the management of drug development. The M.S. degree in pharmaceutical economics and policy is offered jointly with the USC Price School of Public Policy and the Department of Economics. In addition, the school offers dual degrees with the schools of law, business, gerontology and medicine as well as other programs. Instructions given in the Admission section of this catalogue are to be followed, but the application and the supplemental information requested should first be submitted to: Graduate Programs Office, USC School of Pharmacy, 1985 Zonal Avenue, Los Angeles, CA 90033. Additional information may be obtained by calling (323) 442-1474 or sending email to [✉ pharmgrd@usc.edu](mailto:pharmgrd@usc.edu).

Admission Requirements for the Master of Science and Doctor of Philosophy in Pharmaceutical Sciences

Applicants should possess a bachelor’s degree or equivalent from an accredited college or university. A minimum grade point average of 3.0 and qualifying scores on the GRE in the verbal and quantitative tests are required. In addition to excellent communication skills, applicants should possess knowledge and competence equivalent to one year of acceptable course work in at least three of the following disciplines: mathematics, organic chemistry, physical chemistry, biochemistry, physiology and pharmacology. In addition to the application for admission, three letters of recommendation from faculty members who can evaluate the promise of the applicant for graduate study and a personal statement summarizing career objectives and research interests must be submitted.

Applicants who do not meet all the specific requirements indicated above, but who show unique potential, may be considered for admission with conditions which may be fulfilled during the first semester of enrollment. See the Graduate School section of this catalogue.

Admission Requirements for the Master of Science and Doctor of Philosophy in Molecular Pharmacology and Toxicology

Applicants should possess a bachelor's degree or equivalent from an accredited college or university. A minimum grade point average of 3.0 and qualifying scores on the GRE in verbal and quantitative tests are required. In addition to excellent communication skills, applicants should possess knowledge and competence equivalent to one year of work in at least three of the following disciplines: mathematics, organic chemistry, physical chemistry, biochemistry, molecular biology, cell biology, physiology, pharmacology, economics, statistics and computer sciences. In addition to the application for admission, the candidate must submit three letters of recommendation from faculty members who can evaluate the promise of the applicant for graduate study and a personal statement summarizing the candidate's career objectives and research interests. Students will be selected for admission on the basis of their academic and scientific record, and, whenever possible, interviews (in person or by phone) with one or more members of the faculty.

Admission Requirements for the Master of Science in Pharmaceutical Economics and Policy

Applicants for admission must have achieved a minimum 3.0 GPA in undergraduate or professional school and adequate scores on the GRE. In addition, applicants will be required to have completed upper division courses in statistical methods, calculus and microeconomics.

Admission Requirements for the Doctor of Philosophy in Clinical and Experimental Therapeutics

Applicants should possess a bachelor's degree in quantitative/biological sciences (or health profession) or an advanced health professional degree (i.e., Pharm.D., M.D., DDS) from an accredited college or university. A minimum grade point average of 3.0 and qualifying scores on the GRE in the verbal and quantitative tests are required. A student currently enrolled in the Pharm.D. program may pursue a Pharm.D./Ph.D. dual degree following the admission procedure in the Catalogue.

In addition to the application for admission, three letters of recommendation from faculty members who can evaluate the promise of the applicant for graduate study and a personal statement summarizing career objectives and research interests must be submitted.

Applicants who do not meet all the specific requirements indicated above, but who show unique potential, may be considered for admission with conditions, which may be fulfilled during the first semester of enrollment. See the Graduate School section of this catalogue for further information.

Admission Requirements for the Doctor of Philosophy in Health Economics

Candidates with a bachelor's, master's or Pharm.D. degree are invited to apply. Applicants must have demonstrated proficiency in verbal and written English and aptitude in economics, mathematics, statistics and computer science. Deficiencies in economics and statistical background can be addressed through preliminary course work after admission to the program.

A minimum grade point average of at least 3.0 (A = 4.0) is required. Special attention is given to the grades achieved in economics, statistics and mathematics courses relevant to the program. A qualifying score on the GRE in verbal and quantitative areas is required. Students with GRE scores of 1200 or better will be given priority for financial aid support.

Admission Requirements for the Master of Science in Health Care Decision Analysis

Applicants should possess a bachelor's degree or equivalent from an accredited college or university. Applicants with graduate or professional degrees are encouraged to apply. A minimum grade point average of 3.0 and qualifying scores on the GRE examination are required. The program encourages the participation of part-time students with work experience. Acceptance criteria for those individuals will be assessed on a case-by-case basis. English proficiency is essential. Additional requirements for international students are outlined by university regulations under Admission of International Students.

Admission Requirements for the Master of Science in Regulatory Science

Applicants should possess a bachelor's degree or equivalent from an accredited college or university. Applicants with graduate or professional degrees are encouraged to apply. A minimum grade point average of 3.0 or

qualifying scores on the GRE or equivalent examination are required. The program encourages the participation of part-time students with work experience.

Acceptance criteria for those individuals will be assessed on a case-by-case basis. English proficiency is essential. Students will be selected for admission, whenever possible, after interviews with one or more members of faculty.

Admission Requirements for the Master of Science in Management of Drug Development

Applicants should possess a bachelor's degree or equivalent from an accredited college or university. Applicants with graduate or professional degrees are encouraged to apply. A minimum grade point average of 3.0 or equivalent and qualifying scores on the GRE or equivalent examination are required. The program encourages the participation of part-time students with work experience. Acceptance criteria for those individuals will be assessed on a case-by-case basis. English proficiency is essential.

Admission Requirements for the Master of Science in Medical Product Quality

Applicants should possess a bachelor's degree or equivalent from an accredited college or university. Applicants with graduate or professional degrees are encouraged to apply. A minimum grade point average of 3.0 and qualifying scores on the GRE or equivalent examination are normally required. The program encourages the participation of part-time students who are already working in the industry as well as students who have recently completed or are about to complete an undergraduate program.

Acceptance criteria will be assessed on a case-by-case basis. English proficiency is essential. Applicants who do not meet all the specific requirements indicated above, but who show unique potential, may be considered for admission with conditions, which may be fulfilled during the first semester of enrollment.

Admission of International Students to Graduate Degree Programs

All requirements described in this section are also applicable to the admission of international students. In addition, special application and admission procedures are required of international students. Refer to the section on Admission of International Students in this catalogue.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Students should also refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Science in Pharmaceutical Sciences

A Master of Science in the pharmaceutical sciences will be granted on the basis of completion of at least 24 units of formal course work and presentation of an acceptable thesis (PSCI 594ab, 4 units) based on the results of an original investigation.

The 24 units of course work must be at the 500-level or above, exclusive of directed research. At least 16 of the 24 required units must be taken from courses offered within the Department of Pharmacology and Pharmaceutical Sciences (courses within the department have designations of either PSCI or MPTX). The remaining units can be taken from courses offered within the Department of Pharmacology and Pharmaceutical Sciences or in various related disciplines outside the department if approved by the Department of Pharmacology and Pharmaceutical Sciences Graduate Affairs Committee.

Master of Science in Molecular Pharmacology and Toxicology

A Master of Science in molecular pharmacology and toxicology will be granted on the basis of completion of at least 24 units of formal course work and presentation of an acceptable thesis (MPTX 594ab, 4 units) based on the results of an original investigation.

The 24 units of course work must be at the 500-level or above, exclusive of directed research. At least 16 of the 24 required units must be taken from courses offered within the Department of Pharmacology and Pharmaceutical Sciences (courses within the department have designations of either PSCI or MPTX). The remaining units can be

taken from courses offered within the Department of Pharmacology and Pharmaceutical Sciences or in various related disciplines outside the department if approved by the Department of Pharmacology and Pharmaceutical Sciences Graduate Affairs Committee.

Master of Science in Pharmaceutical Economics and Policy

The Department of Pharmaceutical Economics and Policy (School of Pharmacy) offers a program of study leading to the M.S. degree. Applicants must apply to the Graduate School and meet the admissions requirements of the program. This program requires students to demonstrate skills in the analysis of pharmaceutical and health technology innovations, as well as an understanding of contemporary health policy issues.

A minimum of 36 units of graduate level courses is required.

Grade Point Average

A grade point average of at least 3.0 (A = 4.0) must be achieved on graduate course work at USC.

Recommended Courses

It is recommended that the student complete the following 36 units of graduate level course work: ECON 611 (4 units), ECON 500 (4 units) or PPD 501*ab* (4 units), PM 511*aL* (4 units), PM 512 (4 units) or approved elective, PMP 509 (4 units), PMP 519 (4 units), PMP 529 (4 units), PMP 538 (4 units) and PMP 539 (4 units).

Students must complete all recommended courses for the degree within five years of entry into the program.

Additional Degree Requirements

The student must satisfactorily complete the recommended courses in economics, preventive medicine and public administration prior to enrolling in PMP 538. The student is also required to complete an empirical research project on a topic relevant to pharmaceutical economics and policy.

Degree Requirements

These degrees are under the jurisdiction of the School of Pharmacy and/or jointly with the Graduate School.

Master of Science in Health Care Decision Analysis

Curriculum Requirements

A Master of Science degree in health care decision analysis will be granted upon completion of at least 33 units of formal course work. Students with experience in industry or government can substitute an equivalent amount of formal course work with a research project, subject to the approval from program administrators.

Course requirements normally include a minimum of eight courses (24 units) with emphasis on applied health care policy, business intelligence and technical analysis. Recommended course work and electives include some courses available in other departments of the university and will be selected in consultation with the program advisers according to the areas of intended specialization of the participant in order to meet the credit requirements of the program. Students should develop a specific plan of study in consultation with the graduate advisers before beginning the program.

Grade Point Average

A grade point average of at least 3.0 (A = 4.0) must be achieved on graduate course work at USC.

Master of Science in Regulatory Science

Regulatory science relates the regulatory and legal requirements of biomedical product development to the scientific study needed to establish product safety and efficacy. A Master of Science degree in regulatory science will be granted upon completion of at least 36 units of formal course work, which can include an optional research project in an internship setting. Students with experience in industry or government can substitute an equivalent amount of formal course work for the research project with the permission of the program director. Course requirements normally include a minimum of three courses concerned with regulatory aspects of medical product development and a minimum of one course each in quality assurance, clinical research, business,

statistics and law. Recommended course work includes some courses available in other departments of the university. Students should develop a specific plan of study in consultation with the graduate advisers before beginning the program.

Master of Science in Management of Drug Development

A Master of Science degree in the management of drug development will be granted upon completion of at least 32 units of course and research project work. The program is offered on both a full-time and part-time basis, and courses are also available in distance formats. Most students will take six units of directed research as part of this program. Students with appropriate industry or laboratory experience can substitute an equivalent amount of formal course work for the research project with the permission of the program director. Course requirements normally include a minimum of three courses concerned with translational aspects of medical product development. Recommended courses to satisfy this core requirement include RSCI 530, RSCI 531, RSCI 532, PSCI 664 or CXPT 609. The program must also include a minimum of one course in each of: regulatory science, quality assurance, clinical research, business and statistics. Students should develop a specific plan of study in consultation with graduate advisers before beginning the program.

Master of Science in Medical Product Quality

To keep medical products safe and effective, a strong system of quality management is required. Quality is assured through compliance with strict regulations and is assessed by regulatory agencies through audits and inspections. A Master of Science degree in Medical Product Quality is a specialized program designed to prepare individuals to function effectively as quality specialists in pharmaceutical and medical device sectors. The degree will be granted upon completion of at least 32 units of course work, which can include an optional research project in an internship setting. Students with experience in industry or government can substitute an equivalent amount of formal course work for the research project with the permission of the program director. Course requirements normally include a minimum of four courses concerned with the quality aspects of medical product development and manufacturing and a minimum of one course each in regulatory science, risk management, statistics and project management. The program is offered on both a full-time and part-time basis, and courses are also available in distance formats. Students should develop a specific plan of study in consultation with their graduate adviser before beginning the program.

Doctor of Regulatory Science

The Doctor of Regulatory Science program cultivates research, leadership and inquiry skills for advanced students in the emerging profession of global regulatory science. It is designed to produce graduates with expertise in strategic management, policy development and research assessment who can play leadership roles in the public sector, academia and the medical products industry. Participants in this program will take a set of interdependent courses that extend from a strong core of basic regulatory science course work and additionally focus on three main areas — global product strategy, product lifecycle strategy, and project and personnel management. After students have completed foundational course work, they will participate as a cohort that typically has a two-year cycle of classes and an additional year of dissertation research. The program has been designed to meet the needs of individuals who are already working full-time outside of the university. The doctoral degree will be administered by the School of Pharmacy.

Admission

The program is designed for individuals with strong professional experience and demonstrated intellectual and leadership capabilities. Applicants are expected to have a GPA of 3.0 on university-level course work and five or more years of professional experience. Admission requirements include university transcripts, a resume, at least three letters of reference, and a one-page personal statement that outlines the background and goals of the applicant. Students are encouraged even at this early stage to identify areas in which they are interested in conducting research. Additional requirements for international students are outlined by university regulations under Admission of International Students. Students are not required to provide GRE scores unless indicated by the program director.

Students with an appropriate graduate or professional degree may use some previous graduate courses as transfer units toward the overall credit requirements of the Doctor of Regulatory Science program with the approval of the program director and under the normal rules of the university. Students who have graduated from the M.S. program in Regulatory Science can apply all of the previously taken course work toward the

doctoral degree. Students with graduate degrees from outside of the regulatory science program are required to take a minimum of 32 units of course work and 4 units of dissertation research to complete the requirements for graduation. The course work requirements will be determined on an individual basis in consultation with the program director and participant's advisers.

Curriculum Requirements

The Doctor of Regulatory Science is administered by the School of Pharmacy. It requires participants to complete 64 units that include the following elements:

REQUIREMENTS	UNITS
Foundation courses	15
Product lifecycle strategy	8
Global strategy	8
Project/personnel management	8
Research methods	4
Dissertation	4

Additional elective course work will be selected in consultation with the program advisers according to the areas of intended specialization of the participant in order to meet the credit requirements of the program. Typically foundational courses and some electives will be taken in the first two years of the program. Advanced courses in product lifecycle strategy, global strategy and project/personnel management will normally be taken by the doctoral cohort of students during the third and fourth years of the program. Dissertation planning and research will typically commence in the third year of the program, and extend until the successful completion of the dissertation.

Foundation Courses

Fifteen or more units of foundation courses may be taken as part of the master's program in regulatory science, or with prior approval, from another graduate program with similar objectives. Required foundational courses normally include: MPTX 511 Introduction to Medical Product Regulation; two from MPTX 512 Regulation of Pharmaceutical and Biological Products, MPTX 513 Regulation of Medical Devices and Diagnostics, MPTX 514 Regulation of Food and Dietary Supplements; MPTX 515 Quality Systems and Standards; MPTX 516 Medical Products and the Law; MPTX 517 Structure and Management of Clinical Trials. Other courses may be substituted after the participant's background preparation has been considered.

Product Lifecycle Strategy

Eight or more units of course work related to product lifecycle management, from discovery to commercialization, will be drawn from a broad list of courses offered in regulatory science or through the Titus Family Department of Clinical Pharmacy and Pharmaceutical Economics and Policy. Included in this list are: PME 538 Pharmaceutical Economics; PME 539 Economic Assessment of Medical Care; RSCI 601 Biomedical Commerce. Other courses may also be considered in consultation with the supervisors and program director. Students are also encouraged to take courses outside the School of Pharmacy when more specialized courses fit their professional research or development plans.

Global Regulatory Strategy and Policy

Eight or more units of course work related to global regulatory strategy could include some of the following courses: MPTX 519 Global Regulation of Medical Products; PPD 571 International Public Policy and Management Seminar; RSCI 604 Regulatory Strategy in Asia; RSCI 608 Regulatory Strategy in Europe and the Americas.

Project and Personnel Management

Eight or more units of relevant course work should typically include: MPTX 602 Science, Research and Ethics; RSCI 603 Managing Complex Projects; RSCI 605 Managing Organizations and Human Resources. Graduate courses in other university departments or schools can be substituted with the approval of the program director.

Research Methods

Participants will typically take PMEP 509 Research Design or MPTX 522 Introduction to Clinical Design and Statistics.

Student Progress and Assessments

In the third year, students are expected to identify a pair of advisers including one USC faculty member and one adviser from industry or the private sector. Students are typically placed in study groups of three or four whose dissertation interests are most similar and whose collective supervisors will oversee their academic and research progress. This committee will form the dissertation committee.

At the completion of the foundational course work, students will undergo a competency review that will include considerations of academic progress. Students are expected to maintain a GPA of 3.0 and will be required to pass a written examination designed to assure the professional competence of the student prior to advancing further in the program. Students who do not pass this preliminary review, administered prior to entering the dissertation and advanced course work phase of the program, will be notified of dismissal from the program in writing by the associate dean for graduate studies in the School of Pharmacy.

Doctoral Dissertation

Students must enroll in RSCI 794 Doctoral Dissertation for at least two terms, during which time they will develop a dissertation proposal and conduct the necessary research and analysis in collaboration with the supervisory team. The dissertation committee will approve the thesis plan and monitor its progress. Each student will be required to produce and defend an independent dissertation as a requirement for graduation. A maximum of 6 dissertation units can be applied to satisfy the degree requirement, but students should register for the dissertation units in each term subsequent to the completion of their course work requirements. Institutional Review Board approval is required for all human studies.

Doctor of Philosophy in Clinical and Experimental Therapeutics

The goal of the Ph.D. program in Clinical and Experimental Therapeutics is to develop a scientist who is engaged in team science through interdisciplinary education; competent in conducting research across clinical and basic science disciplines; and integrates basic investigations and clinical observations in applied research to better understand disease process, advance drug development and evaluate efficacy and toxicity of therapeutic regimens with the goal of improving the safe, effective and economical use of therapeutic modalities by patients.

The program applies an interdisciplinary approach that focuses the graduate studies directly toward translational, rather than basic science, aiming to educate students with the perspective and skill set to identify important connections between fundamental biomedical research and human disease. This program emphasizes cross-training between clinical and basic sciences focusing on the investigation of disease processes, drug development and the efficacy and toxicity of therapeutic regimens. Course requirements and research opportunities for graduate students enrolled in the program provide both experimental (basic) and disease-focused experiences that complement the graduate's research focus.

Course Requirements

A minimum of 60 units is required. At least 26 of the 60 units are to be formal graduate course work at the 500-level or above, exclusive of seminars and directed research. Students must complete 14 units of course work before they are eligible for the screening procedure. Additional course work relevant to the research interests of the student may be required by the student's advisers or the student's qualifying exam committee, with an emphasis on cross-training and taking into account the amount and level of previous scientific preparation and the nature of the research dissertation that will be the major endpoint of the program. Specifically, recommended course work differs between students who have an advanced professional degree (Track I) and those who do not (Track II). A maximum of 12 units may be transferred from graduate studies elsewhere.

In the first year, all students (Tracks I and II) are recommended to take 14 units of course work in translational medicine (RSCI 530, 2 units), research design (CXPT 609, 4 units), biostatistics (PM 510L, 4 units), and clinical trial design (MPTX 517, 4 units). In the second year, Track I students will take the remaining 12 units of course work as electives based on the background of the student and the proposed research focus of the student. Track II students who do not have an advanced professional degree are recommended to select from the following courses as part of their electives: systems physiology and disease (INTD 572 and INTD 573, 4 units each) or pathology (INTD 550 and INTD 551, 4 units each). Other electives that can be chosen are INTD 531, INTD 561, PM 533, PM

The remaining 34 of the 60 units required for the Ph.D. degree may be fulfilled with other courses including ethics, interdisciplinary seminar, directed research and dissertation. Note that to become eligible to take the qualifying exam, Track II students must fulfill the prescribed clinical experiences that match the disease-related topic of the student's thesis work as approved by the student's advisers and advisory committee. Students with a bachelor's degree in a health care subject area (e.g., nursing, pharmacy, medicine) will be evaluated on a case basis and may be required to meet the therapeutic course work or clinical experience component described above, as determined by their background and previous experiences.

Foreign Language Requirement

There is no formal language requirement. However, an individual qualifying exam committee can require competency in a foreign language or a computer language if it is relevant for the student's area of research.

Qualifying Exam Committee

Upon admission, the student will be assigned to a member of the graduate faculty who will serve as his or her temporary adviser until a permanent adviser has been identified. The student's program of study will be under the direction of the qualifying exam committee composed of at least five members, one of whom must be from outside the department. Because of the centrality of research in the Ph.D. program, the student is encouraged to get acquainted with the participating faculty mentors from the day they enter the program, and have selected a research direction, paired graduate advisers (clinical and basic scientists), and qualifying exam committee no later than the third semester of study. The graduate affairs committee will serve as the qualifying exam committee until one is selected.

Screening Procedure

The performance of each student will be evaluated no later than the end of the second semester of enrollment in the graduate program. This screening procedure is conducted by the student's qualifying exam committee or, if a student has not yet selected a qualifying exam committee, by the graduate affairs committee. The committee reviews the student's progress to date in various areas including course work, research interests, and laboratory performance on his or her research project or laboratory rotations. If a performance deficiency is determined, specific goals will be established that the student must fulfill to continue in the program. Passing this screening procedure is prerequisite to continuation in the Ph.D. program.

Qualifying Examination

Students will be required to pass a comprehensive written and oral examination on the chosen disease-focused area of research emphasis. The examination will encompass basic scientific concepts relevant to the disease under study and the laboratory techniques in that discipline, fundamental principles of clinical research and design, biostatistics, and therapeutics in the chosen disease-focused area of research. The examination is administered by the qualifying exam committee and consists of two parts: a written examination administered to all students at the end of their second year of study and a detailed written proposal and its oral presentation and defense by the student to the qualifying exam committee. The examination process is conducted by the student's advisory committee with oversight by the graduate affairs committee. All course and qualifying examination requirements for the Doctor of Philosophy must be completed within two-and-a-half years after admission. After passing these examinations, the student is admitted to candidacy for the Ph.D. degree.

Dissertation

A dissertation based on original investigation in a relevant scientific area is required for the Ph.D. The dissertation research must represent a significant contribution to science and should demonstrate the candidate's scholarly advancement and competence to undertake independent research. An oral defense of the dissertation will be held after the candidate submits the final draft of the dissertation to the dissertation committee. (See Theses and Dissertations in the Graduate School section.)

Student Teaching

Teaching experience is considered an integral part of the training of graduate students. As part of the general requirements for the Ph.D. degree, each student is required to participate in the teaching program of the School of Pharmacy.

Doctor of Philosophy in Health Economics

The Titus Family Department of Clinical Pharmacy and Pharmaceutical Economics and Policy (School of Pharmacy) offers a program of study leading to the Ph.D. degree in Health Economics. The program focuses on microeconomics; econometrics; health economics and policy; public finance; pharmaceutical economics and policy. The program offers one track in microeconomics and a second track in pharmaceutical economics and policy.

Microeconomics Track

Students in the microeconomics track will complete the microeconomic theory and econometric sequence and course work in health economics. They will receive focused training and mentoring in health economics through collaboration on research projects.

Foreign Language Requirement

There is no formal foreign language requirement. However, competence in the use of one computer programming language is required for the graduate degrees. Such competence can be demonstrated either by course work or examination.

Grade Point Average

A grade point average (GPA) of at least 3.0 and typically considerably higher (on a scale of 4.0) must have been achieved on all graduate work at USC for the passing of the screening procedure. The Graduate School requires a minimum GPA of 3.0 on all course work taken as a graduate student at USC.

Unit Requirements and Recommended Courses

The Ph.D. in Health Economics requires a minimum of 64 units of graduate-level courses numbered 500 or higher (excluding 794) and a minimum of 4 units of 794. A maximum of two full courses (eight units) or their equivalent may be PMEP 790 (research) since directed research will generally be incorporated into most 500- and 600- level courses. Exceptions will be considered on an individual basis. Normally, a full-time graduate student course load is three full courses or their equivalent per semester, with a four-course maximum.

MICROECONOMICS TRACK

UNITS

Satisfactory completion of the economic theory sequence with a grade point average of B or higher. At least one of the econometrics courses must be completed with a grade of B or higher:

ECON 601	Microeconomic Theory I (4), or	
GSBA 602	Selected Issues in Economic Theory (3)	3-4
ECON 603	Microeconomic Theory II (4)	4
ECON 609	Econometric Methods	4
ECON 611	Probability and Statistics for Economists	4
ECON 615	Applied Econometrics	4

Satisfactory completion of the health economics sequence with a grade point average of B or higher:

ECON 636	Health Economics I	4
PM 511abL	Data Analysis	4
PMEP 509	Research Design	4
PMEP 519	Survey Research and Quality of Life Assessment	4
PMEP 529	Risk, Probabilities and Preferences	4
PMEP 544	Health Economics II	4
ECON 693	Seminar in Applied Economics and Public Policy, or	2, max 4
PMEP 698	Seminar in Pharmaceutical Economics and Policy	1, max 4

Three electives at the 500 level or higher from the School of Pharmacy's Health Economics Program and from the departments of economics, mathematical statistics, biometry, epidemiology, public administration, computer science or other relevant fields are required.

Qualifying Exam

The student will be assigned to a member of the graduate faculty who will serve as his or her temporary adviser until the formation of a qualifying exam committee. The student should consult the health economics director of graduate studies on the appointment of a Ph.D. qualifying exam committee after taking the written screening examinations. The chairman of the student's Ph.D. qualifying exam committee advises the student on matters of curriculum and graduate opportunities. The qualifying exam committee comprises three to five members, at least one of whom can be from outside the department; at least two members must specialize in the student's area of emphasis; and at least three of the members must be suitable for service on the student's dissertation committee. The composition of all Ph.D. qualifying exam committees must be approved by the health economics director of graduate studies. The student must form his or her qualifying exam committee soon after passing the departmental screening procedure.

Screening Procedure

The student's progress will be reviewed after each semester and before registration for any additional course work to determine if progress has been satisfactory. The screening procedure will include satisfactory performance on written screening exams covering the major topics covered in the recommended course work for each track.

Seminar Requirements

Every student is recommended to take and satisfactorily complete 4 units of research seminars chosen from ECON 693, PMP 698 or the equivalent. At least one of these seminars must be related to the student's major field, and the same seminar may be taken more than once. Before completing the dissertation, it is recommended that the student present at least one original research paper in a seminar of his or her choice. This paper should typically consist of original results contained in the student's dissertation.

Dissertation Proposal Preparation

The student is required to register for two units of PMP 790 and write a research paper on a topic suitable for a dissertation. Typically, the chair of the student's guidance committee directs this work. The resulting essay becomes part of the student's written dissertation proposal which is presented and critiqued during the oral portion of the qualifying examination.

Qualifying Examination

Upon successful completion of the first two years of course and grade requirements, and following passing of required screening procedures, the student takes a general written and oral examination on the chosen area of research emphasis after presenting a detailed written dissertation proposal. After passing these examinations, the student is admitted to candidacy for the Ph.D. degree.

Dissertation

After admission to candidacy, the student forms a dissertation committee comprising three faculty members, one of whom can be from an outside department. The chair of this committee is the dissertation supervisor. The student must register for PMP 794 each semester, excluding summer sessions, until the dissertation and all other degree requirements are completed.

The student is expected to complete a dissertation based on an original investigation. The dissertation must represent a significant contribution to knowledge and must be defended in an oral examination administered by the dissertation committee (see the section on Theses and Dissertations).

Student Teaching

Teaching experience is considered an integral part of the training of graduate students. As part of the general requirements for the Ph.D., all students are required to undergo training as an educator. This will include participating in seminars on educational techniques and hands-on teaching experiences through participation in didactic and small group teaching in the School of Pharmacy or the USC Price School of Public Policy.

Pharmaceutical Economics and Policy Track

Students in the pharmaceutical economics and policy track will specialize in areas such as cost-effectiveness, comparative effectiveness, drug therapy outcomes and organization of pharmaceutical markets. They will receive

focused training and mentoring in pharmaceutical economics and policy through collaboration on research projects.

Foreign Language Requirement

There is no formal foreign language requirement. However, competence in the use of one computer programming language is required for the graduate degrees. Such competence can be demonstrated either by course work or examination.

Grade Point Average

A grade point average of at least 3.0 (A = 4.0) must have been achieved on graduate course work at USC. ECON 615 or a higher level course in econometrics must be completed with a grade of B or higher.

Unit Requirements and Recommended Courses

Students are required to complete a minimum of 64 units of graduate level course work. The following courses are recommended towards fulfilling the 64-unit requirement: ECON 401, ECON 500, ECON 513, ECON 514, ECON 609, ECON 615, PM 511a, PMEP 509, PMEP 519, PMEP 529, PMEP 538, PMEP 539, PMEP 549 and PMEP 698. Students may transfer and substitute up to 24 units of graduate course work from other universities to fulfill the required 64 units of graduate credit subject to the approval of the department.

PHARMACEUTICAL ECONOMICS AND POLICY TRACK		UNITS
Satisfactory completion of the economic theory sequence with a grade point average of B or higher. At least one of the econometrics courses must be completed with a grade of B or higher:		
ECON 401	Mathematical Methods in Economics	4
ECON 500	Microeconomic Analysis and Policy	4
ECON 609	Econometric Methods	4
ECON 611	Probability and Statistics for Economists	4
ECON 615	Applied Econometrics	4
Satisfactory completion of the pharmaceutical economics and policy sequence with an average grade of B or higher:		
PMEP 509	Research Design	4
PMEP 519	Survey Research and Quality of Life Assessment	4
PMEP 529	Risk, Probabilities and Preferences	4
PMEP 538	Pharmaceutical Economics	4
PMEP 539	Economic Assessment of Medical Care	4
PMEP 549	Applied Pharmacoeconometrics	4
PMEP 698	Seminar in Pharmaceutical Economics and Policy	1, max 4

A minimum of three electives at the 500 level or higher from the School of Pharmacy's Pharmaceutical Economics and Policy Program and from the departments of economics, mathematical statistics, biometry, epidemiology, public administration, computer science or other relevant fields are required.

Qualifying Exam Committee

The student will be assigned to a member of the graduate faculty who will serve as his or her temporary adviser until the formation of a qualifying exam committee. The student should consult the pharmaceutical economics and policy director of graduate studies on the appointment of a Ph.D. qualifying exam committee after taking the written qualifying examination. The chairman of the student's Ph.D. qualifying exam committee advises the student on matters of curriculum and graduate opportunities. The qualifying exam committee comprises three to five members, at least one of whom can be from outside the department; at least two members must specialize in the student's area of emphasis; and at least three of the members must be suitable for service on the student's dissertation committee. The composition of all Ph.D. qualifying exam committees must be approved by the pharmaceutical economics and policy director of graduate studies. The student must form his or her qualifying exam committee soon after passing the departmental screening procedure.

Screening Procedure

The student's progress will be reviewed after each semester and before registration for any additional course work to determine if progress has been satisfactory. The screening procedure may include satisfactory performance on written screening exams covering the major topics covered in the recommended course work for each track.

Seminar Requirements

Every student is recommended to take and satisfactorily complete 4 units of research seminars chosen from PMEP 698 or the equivalent. At least one of these seminars must be related to the student's major field and the same seminar may be taken more than once. Before completing the dissertation, it is recommended that the student present at least one original research paper in a seminar of his or her choice. This paper should typically consist of original results contained in the student's dissertation.

Dissertation Proposal Preparation

The student is required to register for two units of PMEP 790 and write a research paper on a topic suitable for a dissertation. Typically, the chair of the student's guidance committee directs this work. The resulting essay becomes part of the student's written dissertation proposal which is presented and critiqued during the oral portion of the qualifying examination.

Qualifying Examination

Upon successful completion of the first two years of course work and grade requirements, including the passing of required screening procedures, the student takes a general written and oral examination on the chosen area of research emphasis after presenting a detailed written dissertation proposal. After passing these examinations, the student is admitted to candidacy for the Ph.D. degree.

Dissertation

After admission to candidacy, the student forms a dissertation committee comprising three faculty members, one of whom can be from an outside department. The chair of this committee is the dissertation supervisor. The student must register for PMEP 794 each semester, excluding summer sessions, until the dissertation and all other degree requirements are completed.

The student is expected to complete a dissertation based on original investigation. The dissertation must represent a significant contribution to knowledge and must be defended in an oral examination administered by the dissertation committee (see the section on Theses and Dissertations).

Student Teaching

Teaching experience is considered an integral part of the training of graduate students. As part of the general requirements for the Ph.D., all students are required to undergo training as an educator. This will include participating in seminars on educational techniques and hands-on teaching experiences through participation in didactic and small group teaching in the School of Pharmacy.

Doctor of Philosophy in Pharmaceutical Sciences

This program emphasizes basic as well as applied research in drug delivery and targeting, utilizing medicinal chemistry, computational chemistry, pharmaceuticals, pharmacodynamics, molecular pharmacology, immunology and cell biology.

A minimum of 60 units is required for the Doctor of Philosophy degree. At least 24 units of course work are required at the 500-level or above, exclusive of seminar and directed research. The Doctor of Philosophy candidate must select a minimum of 12 units from courses offered in the Department of Pharmacology and Pharmaceutical Sciences (PPSI), eight of which must be selected from the core 4-unit courses. The remainder of the 24 units may be taken from PPSI courses or from courses offered in other departments that are approved by the PPSI graduate affairs committee. The qualifying exam committee may require more than 24 units of course work. A maximum of 12 units can be transferred from graduate studies elsewhere.

Foreign Language Requirement

There is no formal foreign language requirement. However, an individual qualifying exam committee can require

competency in a foreign language or some other research tool such as computer language, if this is relevant for the student's area of research.

Qualifying Exam Committee

Upon admission, the student will be assigned to a member of the graduate faculty who will serve as his or her temporary adviser until a permanent adviser has been identified. The student's program of study will be under the direction of a qualifying exam committee composed of at least five members, one of whom must be from outside the department granting the degree. The student should select a graduate adviser and qualifying exam committee no later than the third semester in residence.

Screening Procedure

The performance of each student will be evaluated no later than the end of the second semester of enrollment in the graduate program. This screening procedure is conducted by the student's qualifying exam committee or, if a student has not selected his or her research adviser at that time, by the Graduate Review Committee of the department. The committee reviews thoroughly the student's progress up to that point in various areas including course work, research interests and laboratory performance on his or her research project or laboratory rotations. If a performance deficiency is detected at that point by the committee, the student will be recommended to either take additional course work or transfer to the Master of Science program. Passing this screening procedure is prerequisite to continuation in the Ph.D. program.

Qualifying Examination

Students will be required to pass a comprehensive qualifying examination in major areas of the pharmaceutical sciences. The examination is administered by the qualifying exam committee and consists of two parts: a written examination and a written proposition outlining a research project, followed by an oral examination based on the proposition and questions dealing with the written examination.

All course and qualifying examination requirements for the Doctor of Philosophy must be completed within two and one half years after admission.

Dissertation

A dissertation based on original investigation is required. The research should make a contribution to science and should demonstrate the candidate's scholarly advancement and competence to undertake independent research. An oral defense of the dissertation will be held after the candidate submits the final draft of the dissertation to the dissertation committee (see Theses and Dissertations).

Student Teaching

Teaching experience is considered an integral part of the training of graduate students. Thus, as part of the general requirements for the Ph.D., each student is required to participate in the teaching program of the School of Pharmacy.

Doctor of Philosophy in Molecular Pharmacology and Toxicology

This program emphasizes basic as well as applied research in various aspects of drug discovery and molecular and behavioral mechanisms of action. Research opportunities span investigations of fundamental molecular and cellular physiological mechanisms, including receptor activity, intracellular signaling and the regulation of gene expression, to the molecular bases of disease and aging, including avenues of pharmacological intervention.

A minimum of 60 units is required for the Doctor of Philosophy degree. At least 24 units of course work are required at the 500-level or above, exclusive of seminar and directed research. The Doctor of Philosophy candidate must select a minimum of 12 units from courses offered in the Department of Pharmacology and Pharmaceutical Sciences (PPSI), eight of which must be selected from the core 4-unit courses. The remainder of the 24 units may be taken from PPSI courses or from courses offered in other departments that are approved by the PPSI graduate affairs committee. The qualifying exam committee may require more than 24 units of course work. A maximum of 12 units can be transferred from graduate studies elsewhere.

Foreign Language Requirement

There is no formal language requirement. However, an individual qualifying exam committee can require

competency in a foreign language or a computer language if it is relevant for the student's area of research.

Qualifying Exam Committee

Upon admission, the student will be assigned to a member of the graduate faculty who will serve as his or her temporary adviser until a permanent adviser has been identified. The student's program of study will be under the direction of a qualifying exam committee composed of at least five members, one of whom must be from outside the department. The student should select a graduate adviser and qualifying exam committee no later than the third semester in residence. The graduate affairs committee will serve as the qualifying exam committee until one is selected.

Screening Procedure

The performance of each student will be evaluated no later than the end of the second semester of enrollment in the graduate program. This screening procedure is conducted by the student's qualifying exam committee or, if a student has not yet selected a qualifying exam committee, by the graduate affairs committee. The committee reviews the student's progress to date in various areas including course work, research interests and laboratory performance on his or her research project or laboratory rotations. If a performance deficiency is determined, specific goals will be established that the student must fulfill to continue in the program. Passing this screening procedure is prerequisite to continuation in the Ph.D. program.

Qualifying Examination

Students will be required to pass a comprehensive qualifying examination in major areas of molecular pharmacology, including fundamental principals of molecular and cellular biology. The examination is administered by the qualifying exam committee and consists of two parts: a written examination administered to all students at the end of their second year of study and a written proposal outlining the dissertation goals, and its oral presentation and defense by the student to the qualifying exam committee. The examination process is conducted by the student's advisory committee with oversight by the graduate affairs committee. The qualifying examination must be completed within three years after admission, unless an extension is obtained from the qualifying exam committee.

Annual Research Appraisal (ARA)

Beginning in the third year, each graduate student will meet with the qualifying exam committee and present a progress report on his or her research. Prior to the meeting the student will present a short written document describing significant experiments during the past year, problems and projected studies. This document is distributed to the committee members and is included in the student's file. The oral ARA meeting is intended to be a working session between the student and the qualifying exam committee. Experimental results and problems are discussed in this context, as well as a research plan for the next year of work. A satisfactory ARA is required for each year in the graduate program.

Dissertation

A dissertation based on original investigation in a relevant scientific area is required for the Ph.D. The dissertation research should demonstrate the student's ability to undertake independent research through planning, conducting and evaluating experiments. The dissertation research must represent a significant contribution to knowledge. A public oral defense of the dissertation will be held after the candidate submits the final draft of the dissertation to the dissertation committee, and it is approved by the graduate adviser and dissertation committee. For additional details, see Theses and Dissertations.

Student Teaching

Teaching experience is considered an integral part of the training of graduate students. As part of the general requirements for the Ph.D. degree, each student is required to participate in the teaching program of the School of Pharmacy.

Pharm.D./Juris Doctor

Admission Requirements

Admission to the dual Pharm.D./J.D. program is competitive, and involves meeting admission requirements and gaining acceptance to both the School of Pharmacy and the USC Gould School of Law. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students

who have a baccalaureate degree may apply to the dual Pharm.D./J.D. degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both schools. Students who elect this approach must identify themselves on their Pharm.D. applications as potential dual Pharm.D./J.D. degree students. Students who are admitted to both schools will be offered admission to the dual degree contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA. Students pursuing the dual Pharm.D./J.D. degree must notify the law school in a timely fashion that they will be enrolling in the dual Pharm.D./J.D. degree program and will not matriculate at the law school until the following year. Students who are accepted by only one school may choose to attend that school but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the Gould School of Law during their first year of enrollment in the Pharm.D. program prior to the law school's published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students who are admitted to the law school using this approach would be offered admission to the dual degree contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA. See the admissions section of the School of Pharmacy and the Gould School of Law for specific requirements.

Pharm.D. Requirements

Dual degree students must successfully complete 144 units of Pharm.D. and acceptable J.D. units to receive the Pharm.D. degree. The 144 units must include 132 units of required and elective pharmacy course work plus 12 units of J.D. course work deemed acceptable to meet Pharm.D. elective requirements. Dual degree students should graduate with their Pharm.D. degrees at the completion of the first semester of the sixth academic year of the dual degree program. Students will be eligible to sit for the Pharmacy Board Exams after completion of the Pharm.D. degree requirements. However, dual degree students will not actually be awarded their Pharm.D. degrees until they complete requirements for both degrees.

Juris Doctor Requirements

Dual degree students must successfully complete 88 units of J.D. and acceptable Pharm.D. course work during the second to sixth years of the dual degree program to receive the J.D. degree. The 88 units must be composed of 76 units of J.D. course work, including satisfaction of the upper-division writing requirement and any other substantive requirements, plus 12 units of Pharm.D. course work deemed acceptable to meet J.D. elective requirements. No J.D. credit will be awarded for Pharm.D. course work completed prior to matriculation in the law school. Students cannot receive the J.D. degree under requirements for the dual degree program without prior or simultaneous completion of the Pharm.D. degree.

Both professions require passing a state board or bar exam to practice the respective professions. Neither of these professional doctoral degrees requires a thesis or comprehensive final exam.

Pharm.D./MBA Dual Degree Program

Responding to the growing demand on pharmacists to be knowledgeable in both science and business administration, the USC School of Pharmacy in 1988 helped pioneer an innovation in pharmaceutical education by offering this unique five-year dual degree program.

The Pharm.D./MBA dual degree program is offered cooperatively by the School of Pharmacy and the USC Marshall School of Business. Students must complete concurrently all requirements established by both schools for their respective degrees.

The program involves completion of the first year in the School of Pharmacy, the second in the Marshall School of Business, and then completion of the balance of both degrees during the third through fifth years. A total of 48 units must be completed in the Marshall School of Business.

First Year: Required Pharmacy School courses.

Second Year: Required MBA courses and graduate business electives.

Third to Fifth Years: 108 units of Pharmacy courses and graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students may not count courses taken outside the Marshall School of Business toward the 48 units.

The Pharm.D. and the MBA are awarded simultaneously upon completion of the School of Pharmacy and the Marshall School of Business requirements.

Admission Requirements

Applicants to this program must have a baccalaureate degree from an accredited college or university and should apply during their first year of pharmacy studies. Only students who have successfully completed one year in the School of Pharmacy will be considered for admission to the Marshall School of Business. See the Marshall School of Business for admission requirements.

Pharm.D./M.S., Gerontology

The emerging impact of the elderly on the health care system has created a need for health care providers who understand the unique needs of the elderly. As drug therapy remains the primary therapeutic option for chronic disease, the demand for prescription drugs will continue to rise. There is a demand for pharmacists who are equipped to meet the pharmaceutical care needs of this population. Geriatric pharmacy is recognized as a specialty, with board certification through the Commission for Certification in Geriatric Pharmacy. The Pharm.D./M.S., Gerontology program will provide extensive education and training in the unique health care needs of older adults. It will allow student pharmacists with a career interest in geriatrics or gerontology to work with health care planning or delivery organizations to develop and implement progressive pharmaceutical care programs for the elderly.

Application and Admission Requirements

Students who intend to pursue the dual Pharm.D./MSG degree must be accepted by both programs. This includes having completed a baccalaureate degree from an accredited college or university with a minimum GPA of 3.0 and a minimum equivalent GRE score of 1000. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual Pharm.D./M.S. degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both programs. Students who elect this approach must identify themselves on both applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the Pharm.D. and will be offered admission to the dual degree program. Second, students can apply to the dual degree by submitting an application to the M.S. program during their first year of enrollment in the Pharm.D. prior to the M.S. published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students admitted to the M.S. program using this approach will be offered admission to the dual degree contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA. Students accepted to the dual degree program must maintain a minimum 3.0 GPA in their Gerontology and Pharm.D. courses.

Recommended Program

First year: Required Year I Pharm.D. course work

Second year: Required Gerontology course work

Third year: Required Year II Pharm.D. course work

Fourth year: Required Year III Pharm.D. course work

Fifth year: Required Year IV Pharm.D. course work

Graduation Requirements

Students must complete all requirements for the Pharm.D. (see the Professional Degrees page) and M.S., Gerontology degrees as listed in the current catalogue with a minimum cumulative 3.0 GPA. The specific M.S. course requirements for the dual Pharm.D./M.S. degree are listed on the School of Gerontology Dual Degree Programs page.

Pharm.D./Master of Science, Global Medicine

The dual degree in Pharmacy and Global Medicine is designed for students who are interested in providing pharmaceutical care to underserved populations around the world. Students enrolled in this dual degree program

will benefit from an advanced understanding of the role of, and issues surrounding, modern medicine in developing countries.

Requirements

Students must gain admission to and fulfill the degree requirements for both programs, which include 138 units for the Doctor of Pharmacy and 24 units for the M.S. in Global Medicine. Six units of GM elective units can be used towards the Pharm.D. elective requirement, and PHRD 503 and PHRD 504 substitute for MEDS 503 and MEDS 504.

Program Adaptation

Because MEDS 503 and MEDS 504, core requirements for the M.S. in Global Medicine program, cover the same material as PHRD 503 and PHRD 504, the Pharm.D./Global Medicine dual degree program substitutes PHRD 503 and PHRD 504 for MEDS 503 and MEDS 504 as core requirements for the dual degree.

Pharm.D./Master of Science, Health Care Decision Analysis

The Health Care Decision Analysis (HCDA) program gives students the tools and knowledge to succeed in the complex world of health care data analytics, international access and reimbursement, product pricing and value assessment, insurance operations and design, along with competitive business intelligence. A dual degree of Doctor of Pharmacy and Master of Science in Health Care Decision Analysis will be granted upon the completion of the course work required for the Pharm.D. degree, and the HCDA core and elective units. Dual degree students will be credited up to 9 units of appropriate Pharm.D. course work toward the M.S., HCDA. Dual degree students will select from a series of HCDA core courses and required electives to meet the M.S., HCDA degree requirements. Electives will be considered from the disciplines: applied health care policy, business intelligence, regulatory science, and health care economics, along with all required clerkships and rotations offered through the USC School of Pharmacy. Students should develop a specific plan of study in consultation with program administrators before beginning the program.

Pharm.D./Master of Public Health

The School of Pharmacy and the Master of Public Health program, in recognition of the rapidly changing health care environment, and in response to the growing demand for pharmacists who are knowledgeable in both pharmacy and population-based health care issues, have developed a dual degree program. The joint Pharm.D./MPH degree will enable graduates to be more responsive to today's health care needs and will provide training for pharmacists who seek to be agents of change within the profession and to assume leadership roles in the pharmacy field and in public health at the local, state and national levels.

Students who are enrolled in the School of Pharmacy must apply to the Master of Public Health program no later than January of their first year. All requirements for admission to the regular MPH program must also be fulfilled by dual degree applicants.

The Pharm.D./MPH program spans five years (four years of pharmacy school courses and one year of public health courses). Students begin the core MPH courses following the successful completion of the first year of pharmacy school. The last three years of the program are devoted to course work and the clinical rotations of the School of Pharmacy and to the completion of the elective courses and practicum (field experience) of the MPH program.

All students in the Pharm.D./MPH program must meet course requirements, grade point average requirements and program residency requirements of both programs. Students must have a cumulative GPA of 3.0 in the Pharm.D. curriculum and a 3.0 in the MPH curriculum to meet graduation requirements.

The Pharm.D. and the MPH degrees are awarded simultaneously upon completion of the School of Pharmacy and the Master of Public Health requirements.

Admission Requirements and Procedures

Students applying for the dual degree program must meet the respective admission requirements for each program. This includes having completed a baccalaureate degree from an accredited college or university with a minimum GPA of 3.0 and having acceptable GRE and TOEFL or IELTS scores as applicable. Students will not be

given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual Pharm.D./MPH degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both programs. Students who elect this approach must identify themselves on both applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the Pharm.D. and will be offered admission to the dual degree program contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA. Students who are accepted by only one program may choose to attend that program, but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the MPH program during their first year of enrollment in the Pharm.D. prior to the MPH published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students admitted to the MPH program using this approach will be offered admission to the dual degree contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA.

Pharm.D./M.S., Regulatory Science

Regulatory science is that branch of knowledge which relates the regulatory and legal requirements of biomedical product development to the scientific testing and oversight needed to ensure product safety and efficacy. The program provides an opportunity for advanced preparation in the fields of regulatory affairs, quality assurance and clinical research. Students must complete concurrently all of the requirements established for the respective degrees. The program alternates the courses required for the Pharm.D. program during the fall and spring terms with courses required in summer terms for the M.S. program. Students will typically take courses in the summers of years two-four. Up to 12 appropriate units of course work from the Pharm.D. program can be applied toward the M.S. degree. The Pharm.D. and the M.S., Regulatory Science degrees will be awarded simultaneously upon completion of requirements for the two programs.

Admission Requirements and Procedures

Students applying for the dual degree program must meet the respective admission requirements for each program and must have a baccalaureate degree. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual Pharm.D./M.S., Regulatory Science degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both programs. Students who elect this approach must identify themselves on both applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the Pharm.D. and will be offered admission to the dual degree program contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA. Students who are accepted by only one program may choose to attend that program but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the M.S. in Regulatory Science program during their first or second year of enrollment in the Pharm.D. prior to the M.S. in Regulatory Science published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students admitted to the M.S. in Regulatory Science using this approach will be offered admission to the dual degree contingent on passing all courses in their Pharm.D. studies with a minimum 3.0 GPA.

Pharm.D./Doctor of Philosophy

The Doctor of Pharmacy/Doctor of Philosophy (Pharm.D./Ph.D.) program is designed to permit qualified Pharm.D. students with a bachelor of science or equivalent degree to pursue research training in the pharmaceutical sciences and toxicology. A student accepted into the joint program must meet all requirements for the Pharm.D., as well as the requirements for the Ph.D. in the pharmaceutical sciences or toxicology sections listed in this catalogue. A maximum of 20 units from the Pharm.D. program may be credited toward the Ph.D. Up to 12 units of these Pharm.D. courses may, at the discretion of the student's Ph.D. adviser, be counted toward the required 24 units of core course work.

Admission Procedure

Students applying for the dual degree program must meet the respective admission requirements for each program. This includes having completed a baccalaureate degree from an accredited college or university with a minimum GPA of 3.0 and a minimum GRE score of 1000. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual Pharm.D./Ph.D. degree program in two ways. First, they may apply at the time they submit their Pharm.D. application by concurrently submitting applications to both programs. Students who elect this approach must

identify themselves on both applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the Pharm.D. and will be offered admission to the dual degree program contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 GPA. Students who are accepted by only one program may choose to attend that program but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to one of the Ph.D. programs in the School of Pharmacy during their first two years of enrollment in the Pharm.D. prior to the respective published application deadlines for the Ph.D. programs. Students who elect this approach must apply through the Pharm.D. program. Students admitted to the Ph.D. program using this approach will be offered admission to the dual degree contingent on their having maintained a minimum 3.0 GPA in the Pharm.D. program.

Pharm.D./Graduate Certificate in Gerontology

This integrated program in pharmacy and gerontology prepares students with an interest in geriatric pharmacy to assume leadership roles at academic, administrative or policy levels within the profession. The program involves the completion of 16 units of core area courses in physiology, psychology, sociology and social policy aspects of aging offered by the USC Davis School of Gerontology. In addition, students are required to complete 8 units of approved elective courses in gerontology or geriatric pharmacy to be credited toward the requirements for the Pharm.D. and the Graduate Certificate in Gerontology. It is expected that the program can be successfully completed by candidates taking electives in geriatric pharmacy or gerontology during the regular semester and completing one core course in gerontology during each summer in the four year Pharm.D. program.

See the Davis School of Gerontology for complete requirements.

Admission Requirements

Students who have a baccalaureate degree from an accredited college or university must submit separate applications to the School of Pharmacy and the Davis School of Gerontology. All requirements for admission to the regular Pharm.D. program must be fulfilled by the candidate. GRE scores are not required for admission to the certificate program.

Certificate in Clinical Research Design and Management

The graduate certificate in clinical research design and management is designed to strengthen the statistical, research and project management skills of clinical researchers and their associated clinical team members. Students must complete at least 12 units of course work including at least two courses in clinical design and trial management, one course in ethics and one course in a specialized aspect of design, management or statistics, subject to the approval of the program director. The program will include course work delivered in nontraditional formats such as intensive weekend sessions and will use distance learning tools, Webcast lectures and study materials. Courses can be taken on site, by distance or as a blended combination. Students should confirm their specific course work plan in consultation with the graduate advisers before beginning the program. Students who have bachelor's degrees from accredited colleges or universities must submit an application for graduate study through the regulatory science program of the School of Pharmacy. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed.

Introduction to Clinical Trials

MPTX 517	Structure and Management of Clinical Trials	4
----------	---	---

Clinical Design/Statistics (choose one)

PM 510L	Principles of Biostatistics	4
---------	-----------------------------	---

MPTX 522	Introduction to Clinical Trial Design and Statistics	3
----------	--	---

Biomedical Ethics

MPTX 602	Science, Research and Ethics	2
----------	------------------------------	---

Additional options in specialized aspect of design or management (choose one):

MPTX 511	Introduction to Medical Product Regulation	3
----------	--	---

RSCI 520	Introduction to Risk Management for Health Care Providers	2
----------	---	---

PM 510L	Principles of Biostatistics	4

Certificate in Food Safety

The graduate certificate in food safety is a 12-unit program of course work designed to strengthen the knowledge base and functional “toolkit” of individuals who deal with the production and management of food in industry and government. Students are required to take an entry level course that focuses on regulatory requirements for foods and dietary supplements and two additional courses that focus on food science and food/drug toxicology respectively. Final course work will be selected from a small grouping of electives that deal with quality systems or risk management. The program will include course work delivered in nontraditional formats, such as intensive weekend sessions, and will use distance learning tools, Webcast lectures and study materials. Courses can be taken on site, by distance or as a blended combination. Students should confirm their specific course work plan in consultation with the graduate advisers before beginning the program. Students who have bachelor’s degrees from accredited colleges or universities must submit an application for graduate study through the regulatory science program of the School of Pharmacy. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed.

REQUIREMENTS

UNITS

MPTX 514	Regulation of Food and Dietary Supplements	3
----------	--	---

MPTX 524	Introduction to Food Science and Technology	3
----------	---	---

RSCI 525	Introduction to Drug and Food Toxicology	3
----------	--	---

Quality/Risk Management Option:

MPTX 515	Quality Systems and Standards	3
----------	-------------------------------	---

MPTX 526	Chemistry Manufacturing and Controls	3
----------	--------------------------------------	---

RSCI 520	Introduction to Risk Management for Health Care Products	2
----------	--	---

RSCI 529	Application of Risk Management Tools and Techniques	2
----------	---	---

Certificate in Patient and Product Safety

The graduate certificate in patient and product safety is a 12-unit program that educates students in the emerging field of safety and risk management in the health care environment. It is designed to produce graduates who have a particular expertise in the evaluation and mitigation of medical errors and health-care product problems. Course work is typically delivered in nontraditional formats such as intensive weekend sessions and will use distance learning tools, Webcast lectures and study materials. Courses can be taken on site, by distance or as a

blended combination. Students should confirm their specific course work plan in consultation with the graduate advisers before beginning the program. Students who have bachelor's degrees from accredited colleges or universities must submit an application for graduate study through the regulatory science program of the School of Pharmacy. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed.

Students must complete 12 units of specified course work, that normally will include an introductory course in the basic principles of risk management, a second course in the use of risk management tools, and two additional courses in patient and product safety respectively as listed below. In addition, a course in medical ethics is recommended. Most students will take the courses that are listed in the sample student program below, but if students have already strong previous experience in risk management or safety, other statistical or quality courses taught in graduate programs at USC may be substituted with the permission of the program director. The certificate can be completed on a part-time basis but must be finished within five years.

Courses may be selected from the following recommended course list.

		UNITS
MPTX 515	Quality Systems and Standards	3
MPTX 517	Structure and Management of Clinical Trials	4
MPTX 602	Science, Research and Ethics	2
RSCI 520	Introduction to Risk Management for Health Care Products	2
RSCI 527	Medical Product Safety	3
RSCI 529	Application of Risk Management Tools and Techniques	3
RSCI 603	Managing Complex Projects	3

Certificate in Preclinical Drug Development

The graduate certificate in preclinical drug development provides advanced foundational training in preclinical aspects of drug development, translational research and regulatory control. Students must complete at least 12 units of course work including at least three courses in preclinical design and development (typically, RSCI 530 Translational Medicine: An Overview; RSCI 531 Drug Discovery; RSCI 532 Early Stage Drug Development) and one course in a related aspect of research design, regulation or ethics, subject to the approval of the program director. The program will include course work delivered in nontraditional formats such as intensive weekend sessions and will use distance capabilities, Webcast lectures and study materials. Courses can be taken on site, by distance or as a blended combination. Students should confirm their specific course work plan in consultation with graduate advisers before beginning the program. Students who have baccalaureate degrees from accredited colleges or universities must submit an application for graduate study through the regulatory science program of the School of Pharmacy. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed.

Certificate in Regulatory and Clinical Affairs

The graduate certificate in regulatory and clinical affairs is designed to provide specialized education for individuals interested in developing a systematic understanding of the U.S. regulatory system for medical products. Students must complete at least 12 units of course work including an introductory course in regulatory affairs:

REQUIREMENTS		UNITS
<i>One introductory course in regulatory affairs</i>		
MPTX 511	Introduction to Medical Product Regulation	3
RSCI 530	Translational Medicine: An Overview	2
RSCI 532	Early Stage Drug Development	3
<i>At least one specialized course in regulatory management of a particular product type</i>		
MPTX 512	Regulation of Pharmaceutical and Biological Products	3

MPTX 513	Regulation of Medical Devices and Diagnostics	3
MPTX 514	Regulation of Food and Dietary Supplements	3

At least one course in clinical design

MPTX 517	Structure and Management of Clinical Trials, or	
MPTX 522	Introduction to Clinical Trial Design and Statistics	4

One course in quality systems or risk management

MPTX 515	Quality Systems and Standards	3
MPTX 526	Chemistry Manufacturing and Controls	3
RSCI 520	Introduction to Risk Management for Health Care Providers	2
RSCI 525	Introduction to Drug and Food Toxicology	3

Other courses may be substituted with the approval of the program director. The program will include course work delivered in nontraditional formats such as intensive weekend sessions and will use distance capabilities to capture and Webcast lectures and study materials. Courses can be taken on site, by distance or as a blended combination. Students should confirm their specific course work plan in consultation with the graduate advisers before beginning the program. Students who have a baccalaureate degree from an accredited college or university must submit an application for graduate study through the regulatory science program of the School of Pharmacy. This program is particularly directed at Ph.D. students who wish to take the certificate during their USC studies. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed.

Continuing Education

The School of Pharmacy, Office of Continuing Professional Development, is a recognized provider of continuing pharmacy education accredited by the Accreditation Council for Pharmacy Education (ACPE) and recognized by the California State Board of Pharmacy and throughout the United States.

The school serves as a primary educational resource for pharmacists in California and as a supplementary resource for other health professionals and pharmacists, nationally and internationally.

Programs are designed to educate pharmacists about current issues in pharmaceutical care, practice management, therapeutics and other topics of professional interest. Continuing education programs are held at the School of Pharmacy and other locations.

For information concerning continuing education programs contact: Office of Continuing Professional Development.

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

- Clinical And Experimental Therapeutics (CXPT)
 - Health Care Decision Analysis (HCDA)
 - Molecular Pharmacology and Toxicology (MPTX)
 - Pharmacy (PHRD)
 - Pharmaceutical Economics and Policy (PMEP)
 - Pharmaceutical Sciences (PSCI)
 - Regulatory Science (RSCI)
-

School of Pharmacy

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

CLINICAL AND EXPERIMENTAL THERAPEUTICS (CXPT)

CXPT 609 Preclinical Experimental Drug Therapeutic Development (4, Sp) Evolution of a chemical entity as it is transformed into a drug candidate. Open only to students in clinical and experimental therapeutics and management of drug development.

CXPT 664 Clinical Problem Solving (3, Sp) (Enroll in PHRD 664)

School of Pharmacy

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

HEALTH CARE DECISION ANALYSIS (HCDA)

HCDA 501 Fundamentals of Health Care Insurance Design (3, Fa) Introduction to insurance payer types, functions, actuarial pricing methods, network design and business operations impacting the provision of health benefits and reimbursement for medical products and services. *Recommended preparation:* undergraduate degree in pharmacy, medicine, other health care, economics and administrative sciences or related disciplines; enrollment in a related M.S. or Ph.D. program.

HCDA 502 Comparative International Health Care Systems (3) Health coverage and funding across seven industrial countries, with examination of variances and similarities in stated policy and outcomes by region and population mix. *Recommended preparation:* HCDA 501 and undergraduate degree in pharmacy, medicine, other health care, economics and administrative sciences or related disciplines; enrollment in a related M.S. or Ph.D. program.

HCDA 503 Competitive Health Care Intelligence and Pricing (3) Analysis and techniques to evaluate marketplace opportunities and value and pricing determinations for medical products; considers product launch

and positioning strategies, intelligence gathering, and decision-making. *Recommended preparation:* HCDA 501 and undergraduate degree in pharmacy, medicine, other health care, economics and administrative sciences or related disciplines; enrollment in a related M.S. or Ph.D. program.

HCDA 510 Business Implications of Health Care Reform (3) Coverage, access and reimbursement changes from health care reform; individual and mandated benefits, medical loss ratio, health care exchanges and impact of comparative effectiveness review.

HCDA 515 Medical Decision Analysis and Modeling (3) Quantitative methods of evaluating business, policy, pharmaceuticals, medical care resource allocations. Budget Impact Models, Decision Trees, Sensitivity Analysis tradeoffs between treatment strategies, interventions, risks, outcomes.

HCDA 520 Health Economic and Outcomes Methodology (3) Comprehensive review of core biostatistics principles and applications through practical problem solving approach and case studies. Statistical methods, data validation and outcomes research, clinical trials.

HCDA 525 Healthcare Literature Analysis and Applications (3) Review and critique of health economics, P&T and outcomes literature. Core biostatistical measures used to deconstruct and evaluate published research through case studies. *Recommended preparation:* HCDA 520.

HCDA 530 Total Product Development: Benchtop to Launch (3) Systematic review from discovery to market assessment, bio-targeting through clinical trial design. Profile past and current launch strategies, pharmacovigilance, regulatory and filing requirements.

HCDA 550 Healthcare Innovation: Creativity to Value (3) Systematically review creativity and innovation techniques across healthcare industry, examine breakthrough genomic and biopharmaceutical processes and thinking, evaluate novel therapeutic and economic measures transforming outcomes.

HCDA 553 Advanced Pricing Strategies (3) Positioning products in global markets; market share targets, payer value, life cycle and launch techniques, tools for formulary positioning and reimbursement.

HCDA 560 Managing Effective Partnerships and Mergers (3) M&A and partnering in the health care industry; law, due diligence, contracts, research alliances, structured agreements, global partners, and tactical business strategies.

HCDA 570 Asia Pacific: Access, Delivery and Reimbursement (3) In-depth review China, India, Japan, Korea, Taiwan. Analyzing regional pharmaceutical industry, research, manufacturing, partnerships, licensing, trials. Compare insurance, pricing, access, reimbursement for drugs, healthcare services.

HCDA 580 Seminars in Healthcare Decision Analysis (3) Weekly seminar and literature series, review and discuss policy, biopharmaceuticals, insurance, global healthcare access issues. Student lead discussions, expert guest speakers, group projects, critical thinking.

HCDA 590 Directed Research (1-12, max 12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

HCDA 599 Special Topics (2-4, max 8, FaSpSm) Special topics in Healthcare Decision Analysis.

School of Pharmacy

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MOLECULAR PHARMACOLOGY AND TOXICOLOGY (MPTX)

MPTX 500 Molecular Pharmacology and Toxicology I (4, Fa) This is the first part of a two-semester introductory and survey course for the molecular pharmacology and toxicology degree program. *Prerequisite:* knowledge of biochemistry.

MPTX 501 Molecular Pharmacology and Toxicology II (4, Sp) The second part of the two-semester course covers the general aspects of molecular pharmacology and toxicology on the basis of biochemical, molecular, biological and environmental approaches. *Prerequisite:* MPTX 500.

MPTX 502 Pharmacology (4, Fa) Fundamentals of pharmacology in the context of the rapidly developing knowledge of related disciplines.

MPTX 511 Introduction to Medical Product Regulation (3, Sm) Introduction to regulatory environments surrounding medical product development, manufacturing and marketing; operation of federal, state and international regulatory bodies. *Recommended preparation:* undergraduate degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

MPTX 512 Regulation of Pharmaceutical and Biological Products (3, Sm) Ensuring safety and effectiveness of new drugs and biologics; marketing and monitoring approved pharmaceutical/biological products; management of genetically engineered products. *Recommended preparation:* undergraduate degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

MPTX 513 Regulation of Medical Devices and Diagnostics (3, Sm) Development and testing of new medical products according to U.S. and international regulatory requirements. *Recommended preparation:* undergraduate degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

MPTX 514 Regulation of Food and Dietary Supplements (3, Sm) Regulation and testing of foods, food additives and dietary supplements in the U.S. and abroad. *Recommended preparation:* undergraduate degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

MPTX 515 Quality Systems and Standards (3, Sm) Principles of quality assurance and quality control for medical-product development and manufacture. *Recommended preparation:* undergraduate degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

MPTX 516 Medical Products and the Law (3, Fa) Legal issues affecting intellectual property, medical product development, marketing and safety, taught through case studies and lectures. *Recommended preparation:* undergraduate degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

MPTX 517 Structure and Management of Clinical Trials (4, FaSpSm) Development and execution of clinical trials: bioethical principles, good clinical practices, project management and documentation.

MPTX 518 Writing Regulatory Drug Submissions (3, Sp) Developing form and content for investigational drug applications, new drug applications, biologic licensing applications to FDA; common technical documents; considerations of writing style.

MPTX 519 Global Regulation of Medical Products (3, Fa) Regulatory requirements governing medical products in European Union, Asia and other global markets.

MPTX 522 Introduction to Clinical Trial Design and Statistics (3) Clinical designs and statistics commonly used to test medical products in general populations and special patient groups.

MPTX 524 Introduction to Food Science and Technology (3, Sm) Discusses the basic and applied concepts of food science and food safety, and demonstrates the principles of food chemistry, sensory evaluation,

and product development. *Recommended preparation:* undergraduate degree in biological sciences or related disciplines.

MPTX 526 Chemistry Manufacturing and Controls (3, Fa) Provides a firm foundation in the domestic and international CMC process, from concept to commercialization of new active pharmaceutical ingredients and products. *Recommended preparation:* undergraduate degree in pharmacy, medicine or independent health science, engineering or equivalent.

MPTX 531 Cell Biology (4) (Enroll in INTD 531)

MPTX 561 Molecular Biology (4, Fa) (Enroll in INTD 561)

MPTX 571 Biochemistry (4, Sp) (Enroll in INTD 571)

MPTX 572 Systems Physiology and Disease I (4, Fa) (Enroll in INTD 572)

MPTX 573 Systems Physiology and Disease II (4, Sp) (Enroll in INTD 573)

MPTX 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MPTX 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

MPTX 599 Special Topics (2-4, max 8) Special topics in Molecular Pharmacology and Toxicology.

MPTX 602 Science, Research and Ethics (2, Fa) A discussion of the unique technological and philosophical issues that challenge modern scientists and a discernment of ethical responses to those challenges.

MPTX 603 Molecular Mechanisms for Biological Signals (4, Fa) Biological mechanisms of hormone, neuro-transmitter, growth factor and xenobiotic actions from ligand-receptor interactions, signal transductions, modification processes to regulation of gene expression and cellular growth. *Prerequisite:* knowledge of physiology and biochemistry.

MPTX 630 Directed Field-Research Project (6, FaSpSm) Research/policy analysis conducted under preceptor supervision in an industrial or governmental setting. Open to students who have completed the majority of course credits in the Regulatory Science program. Graded CR/NC.

MPTX 700 Seminar in Molecular Pharmacology and Toxicology (1, max 8, FaSp) Contemporary advances in molecular pharmacology and toxicology research. Registration required during each year of residency.

MPTX 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MPTX 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

School of Pharmacy

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PHARMACY (PHRD)

PHRD 501 Pharmaceutics I (4, Fa) Introduction to physiochemical principles of dosage forms; properties of

molecules in dosage forms, stability of pharmaceuticals and their interactions in body tissue, including computational approaches. Open to Doctor of Pharmacy students only.

PHRD 502 Pharmaceutics II (3, Sp) Principles involved in molecules movement across biological barriers. Properties, characteristics, application of homogeneous and heterogeneous dosage forms, liquid, semi-solid and solid. Open to Doctor of Pharmacy students only.

PHRD 503 Biological Systems I (4, Fa) Integrated teaching of anatomy, histology, physiology and pathophysiology using an organ-based approach. Open to Doctor of Pharmacy students only.

PHRD 504 Biological Systems II (6, Sp) Continued integrated teaching of anatomy, histology, physiology and pathophysiology, using an organ-based approach. Open to Doctor of Pharmacy students only.

PHRD 505 Molecular Genetics and Therapy (3, Fa) Principles of gene expression, and recombinant DNA methods and applications. Focus on human genetics and influence of genetic background on the utilization and effectiveness of drugs. Open to Doctor of Pharmacy students only.

PHRD 506 Self Care and Non-Prescription Therapies (5, Fa) Facilitate patient selection of self-care health care products: OTC drugs, dosages, pharmacology, efficacy, cost, side effects, adverse reactions, contraindications, and interactions with other medications. Open to Doctor of Pharmacy students only.

PHRD 507 Health Care Delivery Systems (2, Fa) Introduction to understanding the structure of the health care system. Includes health care financing and the role of pharmacy and the pharmacist in health systems.

PHRD 508 Pharmacy Literature Analysis and Drug Information (3, FaSp) Literature evaluation and biostatistics of clinical and health services research, and drug information services. Emphasis on drug therapy, patient outcomes, and formulary development. Open to Doctor of Pharmacy students only.

PHRD 509 Pharmacy Practice and Experience I (4, Fa) Introduction of principles and the application of pharmaceutical care in community or hospital pharmacy setting. Includes communications, basic practice skills, career pathways and leadership. Open to Doctor of Pharmacy students only.

PHRD 510 Pharmacy Practice and Experience II (4, Sp) Introduction of principles and the application of pharmaceutical care in community or hospital pharmacy setting. Includes calculations, drug information, and basic practice skills. Open to Doctor of Pharmacy students only.

PHRD 551 Immunology (3, Fa) Basic principles of immunology and their application to the understanding and treatment of immunologically-mediated diseases. Provides the scientific basis of immunotherapy and immunodiagnosis. Open to Doctor of Pharmacy students only.

PHRD 552 Pharmaceutics III (3, Sp) Principles and applications of controlled, targeted, and self-regulating drug delivery. Methods to deliver therapeutic peptides, proteins and genetic materials. Open to Doctor of Pharmacy students only.

PHRD 553 Management within Health Care Organizations (2, Fa) Management of the professional practice of pharmacy in organized health care systems. Introduction to formulary development and outcome analysis. Open to Doctor of Pharmacy students only.

PHRD 554 Public Health and Epidemiology (2, Sp) Introduction to epidemiology, environmental health, health education, health care organizations and financing. Orientation to social and governmental controls on the health care system. Open to Doctor of Pharmacy students only.

PHRD 555 Biochemical and Molecular Sites of Drug Action (4, Fa) Basic principles of drug action and receptor actions. Includes their application to the understanding and treatment of disease. Provides the scientific basis of pharmaceutical action.

PHRD 557 Therapeutics I (4, Fa) Integrated teaching of the principles of pharmacology, biomedical chemistry, pharmacogenomics and clinical therapeutics. Open to Doctor of Pharmacy students only.

PHRD 559 Therapeutics II (3, Fa) Integrated teaching of basic and clinical pharmacokinetic/pharmacodynamic concepts. Open to Doctor of Pharmacy students only.

PHRD 560 Therapeutics III (6, Sp) Integrated teaching of biomedical chemistry, pharmacology, clinical pharmacokinetics, and therapeutics of drugs, with emphasis on pharmaceuticals treating diseases associated with the central nervous system. Open to Doctor of Pharmacy students only.

PHRD 561 Pharmacy Practice and Experience III (3, FaSp) Introductory Pharmacy Practice Experiences (IPPEs) in hospital and community settings. Includes; didactic instruction, laboratory practicums, IV training and practical experience hours. Open only to Doctor of Pharmacy students.

PHRD 562 Therapeutics IV (4, Sp) Integrated teaching of biomedical chemistry, pharmacology, clinical pharmacokinetics, and therapeutics of drugs with an emphasis on treating diseases of the renal, GI and pulmonary systems. Open to Doctor of Pharmacy students only.

PHRD 601 Therapeutics V (6, Fa) Integrated teaching of biomedical chemistry, pharmacology, clinical pharmacokinetics, and therapeutics of drugs, with emphasis on pharmaceuticals affecting cardiovascular and circulatory diseases. CPR certification. Open to Doctor of Pharmacy students only.

PHRD 603 Therapeutics VI (3, Fa) Integrated teaching of biomedical chemistry, pharmacology, clinical pharmacokinetics and therapeutics of drugs with an emphasis on pharmaceuticals affecting the endocrine diseases, systems and women's health. Open to Doctor of Pharmacy students only.

PHRD 605 Therapeutics VII (4, Fa) Integrated teaching of the biomedical chemistry, pharmacology, clinical pharmacokinetics, and therapeutics of drugs; with emphasis on chemotherapy of infectious disease: bacterial, microbial, viral, parasitic, and fungal.

PHRD 606 Therapeutics VIII (2, Sp) Advanced topics and clinical therapeutics of drugs, with emphasis on the treatment of infectious disease: bacterial, microbial, viral, parasitic and fungal.

PHRD 607 Nutrition (2, Fa) Biomedical knowledge is correlated with assessments of clinical case-management problems to understand the interrelationship between nutrition and health in both hospitalized and healthy patients. Open to Doctor of Pharmacy students only.

PHRD 608 Therapeutics IX (2, Sp) Integrated teaching of biomedical chemistry, pharmacology, clinical pharmacokinetics and therapeutics of drugs, with emphasis on pharmaceuticals for managing oncological diseases. Open to Doctor of Pharmacy students only.

PHRD 610 Therapeutics X (3, Sp) Focuses on the pharmacology, pharmacokinetics, medicinal chemistry and clinical therapeutics that apply to pharmaceutical care of pediatric, geriatric and chronic pain patients.

PHRD 612 Therapeutics XI (2, Sp) Updates students on recent advances in clinical areas, prepares students for advanced practice experiences and assessment of clinical readiness via a final examination. Graded CR/NC.

PHRD 614 Pharmaceutical Economics and Outcome Studies (3, Sp) Economic analysis of the U.S. health care system, the pharmaceutical industry, and the profession; economic assessment of drug therapy costs and health care outcomes applying pharmacoeconomic research methodologies. Open to Doctor of Pharmacy students only.

PHRD 616 Pharmacy, Law and Ethics (3, Sp) To provide students with an understanding of ethical issues that arise in pharmacy practice along with state and federal statutes, regulations, and pharmacy-related cases. Open to Doctor of Pharmacy students only.

PHRD 651 Community Pharmacy I (3, Fa) Development of specialized knowledge and skills in community pharmacy practice involving location analysis, pharmacy management principles, and introduction to business law concepts. Open to Doctor of Pharmacy students only.

PHRD 652 Community Pharmacy II (3, Sp) A continuation of pharmacy business law concepts encompassing contract principles and forms of ownership, including a review of pharmacy laws, compounding

principles, and OTC agents. Open to Doctor of Pharmacy students only. *Prerequisite:* PHRD 651.

PHRD 653 Health Systems Pharmacy I (3, Fa) Understanding formal and informal organizations in institutions, managed care, disease management, health care policy and financing, patients' chart organization, and clinical monitoring parameters. Open to Doctor of Pharmacy students only.

PHRD 654 Health Systems Pharmacy II (3, Sp) Recognizing resources available for drug information, familiarity with institutional formularies, medication counseling, writing chart notes, and clinical activities at an off-campus health care institution. Open to Doctor of Pharmacy students only. *Prerequisite:* PHRD 557.

PHRD 655 Geriatric Pharmacy I (3, Fa) Specialized knowledge and skills in geriatric pharmacy, pharmacology of aging, and unique functions of health care team providing care to the elderly patient. Open to Doctor of Pharmacy students only.

PHRD 656 Geriatric Pharmacy II (3, Sp) Specialized knowledge and skills in gerontology and geriatric pharmacy including the pathophysiology of selected cardiovascular, endocrine, genitourinary gastrointestinal disorders, osteoarthritis, and osteoporosis. Open to Doctor of Pharmacy students only. *Prerequisite:* PHRD 559.

PHRD 657L Basic Research Design (3, max 6, FaSp) Research experience to integrate research into Doctor of Pharmacy program. Research focuses on industrial, academic, or governmental issues. Open to Doctor of Pharmacy students only.

PHRD 658 Sleep and the Pharmacologic Management of Its Disorders (3, FaSp) Overview of normal sleep manifestations, and treatment of common sleep disorders, and the pharmacist's role in assessment, treatment, and referral. Open to Level III Doctor of Pharmacy students only.

PHRD 659 Molecular Therapeutics: Signal Transduction (3, FaSp) Principles of molecular therapeutics against signaling pathways; emphasis on biological mechanisms underlying hormone, growth factor, and neurotransmitter-mediated gene regulation, proliferation, and cell death. Open to Level III Pharm.D. students only.

PHRD 660 Disease State Management I (3, FaSp) The processes required to develop disease state management protocols based on data drawn from the medical research literature. Open to Level III Doctor of Pharmacy students only.

PHRD 661 Pharmacy Practice in Women's Health (3, FaSp) The pharmaceutical care of women patients is emphasized. Therapeutic, psychosocial factors and current research in women's health. Open to Level III Pharm.D. students only.

PHRD 662 Psychiatric Pharmacy Practice (3, Sp) Specialized knowledge and skills in psychiatric pharmacy practice including child, adult, and geriatric psychopharmacology applied to inpatient and outpatient treatment. Open to Level III Pharm.D. students only.

PHRD 663 Pharmaceutical Development (3, FaSp) Examination of pharmaceutical product development process including discovery, preclinical/clinical studies, regulatory-legal issues, and marketing. Open to Doctor of Pharmacy students only.

PHRD 664 Clinical Problem Solving (3, Sp) Integration of physical assessment, laboratory tests, history-taking, and diagnosis to formulate decisions for optimal treatment plans in specific disease states. Open to graduate pharmacy students only.

PHRD 665 Complementary/Alternative Therapeutics (3, FaSp) Examines the therapeutic use of complementary/alternative medicines, such as herbal medicines, homeopathic drugs, vitamins and other nutritional supplements. Open to Level III Pharm.D. students only.

PHRD 666 Therapeutic Drug Monitoring (3, FaSp) Application of pharmacokinetic and pharmacodynamic principles to individualize patient drug regimens. Open to Level III Pharm.D. students only.

PHRD 667 Drugs of Abuse (3, FaSp) Specialized knowledge and skills in specific substance abuse-related

areas. Each area will include addiction, wellness, and prevention components. Open to Doctor of Pharmacy students only.

PHRD 668 Computing Application (3, FaSp) Specialized knowledge and skills using computers in professional practice: telecommunication protocols, typical patient databases in hospital and community pharmacies, drug interactions, insurance billing, inventory control. Open to Doctor of Pharmacy students only.

PHRD 669 Health Care Needs of Special Populations (3, FaSp) Health care needs of the poor will be examined through participation in a multidisciplinary community clinic setting focusing on medication counseling and compliance. Open to Level III Pharm.D. students only.

PHRD 670 Marketing and Development in the Pharmaceutical Industry (3, FaSp) Basic and advanced strategies for marketing and development of new compounds or indication in the pharmaceutical industry. *Recommended preparation:* PHRD 663.

PHRD 671 Pharmacy Education Seminar (3, FaSp) A seminar course with a focus on educational methods and teaching skills providing career development for students interested in academia. Open to Doctor of Pharmacy students only.

PHRD 675 Travel Medicine (3, FaSp) An elective course for emphasizing the role of the pharmacist in preventing and treating travel related medical conditions. Open only to pharmacy majors.

PHRD 677 Risk Assessment and Management in Pharmacy Practice (3, FaSp) Specific risk management issues, legal and professional expectations of pharmacists, and assessing and avoiding risk. Open only to Doctor of Pharmacy students.

PHRD 701 Acute Care Clinical APPE (6, FaSpSm) Application of pharmaceutical care principles to the adult patient population in an acute care environment. Pharmacology, pharmacokinetics, and disease state management will be emphasized. Open to Doctor of Pharmacy students only. Graded CR/NC.

PHRD 703 Long Term Care Clerkship (6, FaSpSm) Application of pharmaceutical care to patients in long term care environments. Understanding of the therapeutic, legal and special needs of this patient population. Open to Level IV Doctor of Pharmacy students only.

PHRD 704 Primary Care APPE (6) Disease state management and a primary care setting. Modification and design of drug therapy regimens and primary patient care using a team based approach. Open to Doctor of Pharmacy students only. Graded CR/NC.

PHRD 705 Community Pharmacy APPE (6, FaSpSm) Pharmaceutical care principles applied to the community pharmacy environment. Participating in the development, implementation and outcome evaluation of patient care services in the community. Open to Doctor of Pharmacy students only. Graded CR/NC.

PHRD 706 Geriatrics Clerkship (6, FaSpSm) Drug therapy and management of geriatric patients with a focus on unique medical, economic, and psycho-social problems of this population. Open to Level IV Doctor of Pharmacy students only.

PHRD 714 Nuclear Pharmacy APPE (6, FaSpSm) Provides practical and theoretical aspects of radiopharmacy services delivery. Open only to Pharm.D. students.

PHRD 718 Hospital Pharmacy Practice APPE (6, FaSpSm) Practical experience in the practice of hospital pharmacy. Administrative, practice-based and therapeutic competencies emphasized. Open to Doctor of Pharmacy students only.

PHRD 725 International Pharmacy Practice Experience (3, 6, FaSpSm) Practical experience in the practice of pharmacy in the international setting. Students will visit an international pharmacy practice setting and complete a project. Open to Doctor of Pharmacy students only.

PHRD 726 Directed Clinical Project I APPE (6, max 12, FaSpSm) Directed educational opportunities not presently offered as electives, e.g., research project or new and evolving practice models.

PHRD 727 Directed Clinical Clerkship Project II (6, FaSpSm) Directed educational opportunities not presently offered as electives, e.g., research projects or new and evolving clerkships. Open to Doctor of Pharmacy students only.

PHRD 730 Acute Care Geriatrics Clerkship (6, FaSpSm) Pharmaceutical care principles applied to the acutely ill geriatric patient population. Emphasis on drug therapy problem solving, physiology, pharmacokinetics and compliance problems. Open to Doctor of Pharmacy students only.

PHRD 731 Advanced Geriatrics APPE (6, FaSpSm) Directed projects/practical experience in geriatric drug therapy. Open to Doctor of Pharmacy students only.

PHRD 735 Clinical Pharmacy Research APPE (6, FaSpSm) Drug research administration: research design; ethics; record-keeping; and institutional review. Practical experience emphasized. Open to Doctor of Pharmacy students only.

PHRD 738 Pharmaceutical Industry APPE (6, FaSpSm) Practical experience within a pharmaceutical company may include: clinical affairs, drug development, research, and/or marketing process. Open to Doctor of Pharmacy students only.

PHRD 750 Advanced Pharmacy Practice Elective (APPE) (6, max 18, FaSpSm) Pharmacy practice experience (internship) course in a health care setting. Open only to pharmacy students.

PHRD 751 Non-traditional Advanced Pharmacy Elective (APPE) (6, FaSpSm) Pharmacy practice experience (internship) course in a non-traditional or emerging setting. Open only to pharmacy students.

PHRD 790 Directed Research (1–12, max 12) Research leading to doctorate in Clinical and Experimental Therapeutics. Graded CR/NC.

PHRD 794abcdz Doctoral Dissertation (2-2-2-2-0) Dissertation research required for completion of Doctor of Philosophy in Clinical and Experimental Therapeutics.

PHRD 796ab Doctor of Pharmacy Capstone (0-0, FaSpSm) Capstone course required for completion of Doctor of Pharmacy degree. Graded CR/NC. Open only to pharmacy students.

PHRD 796b Doctor of Pharmacy Capstone (0, SpSm) Capstone course required for completion of Doctor of Pharmacy degree. Graded CR/NC. Open only to pharmacy students.

School of Pharmacy

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PHARMACEUTICAL ECONOMICS AND POLICY (PMEP)

PMEP 509 Research Design (4, Fa) Introduction to the concept of research design and examples of the variant research methods utilized in the field. Both the conceptual and practical issues of research including development of the research question, selection of appropriate methods, data sources and analytic approaches to address the research question will be addressed.

PMEP 519 Survey Research and Quality of Life Assessment (4, Sp) Skills to develop and assess surveys which are integral in Pharmaceutical Economics and Policy research. *Prerequisite*: PMEP 509; *recommended preparation*: biostatistics, econometrics.

PMEP 529 Risk, Probabilities and Preferences (4, Sp) Analysis of economic and psychological constructs of risks, probabilities, and health related preferences and utilities.

PMEP 538 Pharmaceutical Economics (4, Sm) Introduction to pharmacoeconomics with special emphasis on the role of pharmaceuticals and the pharmaceutical industry, insurance, managed care, regulation and pricing. *Prerequisite:* ECON 500.

PMEP 539 Economic Assessment of Medical Care (4, Fa) Principles of cost-benefit analysis and medical cost-effectiveness analysis with applications in medical care and the pharmaceutical field. *Prerequisite:* ECON 500 and ECON 581.

PMEP 544 Health Economics II (4, Sp) Second of part series in techniques of microeconomic analysis to inform health policy. Topics include: patents and innovation, pharmaceutical regulation, hospital competition, physician practice. *Recommended preparation:* ECON 601, ECON 611 and ECON 636.

PMEP 547 Programming Methods for Empirical Analysis of Health Data (4, Fa) Introduction to methods for analysis of large health data sets, including data selection, SAS/Stata programming under Linux, and review of claims and survey data.

PMEP 549 Applied Pharmacoeconometrics (4, Sp) Use of quantitative models to describe and analyze pharmaceutical and health care markets; experimental design/power calculations; survival models; multiple indicator models; qualitative and limited dependent variables models; estimation and application of such models to selected problems. *Prerequisite:* ECON 615.

PMEP 590 Directed Research (1–12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PMEP 698 Seminar in Pharmaceutical Economics and Policy (1, max 4, FaSp) Current research in pharmaceutical economics and policy presented by outside scholars, faculty and students. Graded CR/NC.

PMEP 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PMEP 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

School of Pharmacy

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PHARMACEUTICAL SCIENCES (PSCI)

PSCI 531 Cell Biology (4) (Enroll in INTD 531)

PSCI 556 Principal Research Approaches in PPSI (2, Fa) Familiarize new graduate students with basic approaches used in biomedical research with focus on data interpretation and experimental approaches. Graded CR/NC.

PSCI 557 Introduction to Tools and Techniques for Chemical Biology (2, Sp) Multidisciplinary science where the knowledge of chemistry is utilized to solve problems in biology, and biological systems are evolved to gain new functions. This course aims to establish a great opportunity for graduate students at the interface of biology and chemistry. *Recommended preparation:* formal course work in chemistry and biochemistry.

PSCI 561 Molecular Biology (4, Fa) (Enroll in INTD 561)

PSCI 571 Biochemistry (4, Fa) (Enroll in INTD 571)

PSCI 590 Directed Research (1–12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PSCI 594abz Master's Thesis (2-2-0, FaSp) Credit on acceptance of thesis. Graded IP/CR/NC.
Prerequisite: completion of all required course work for the M.S. degree.

PSCI 599 Special Topics (2-4, max 8, FaSp) Topics in advanced pharmaceutical sciences.

PSCI 601 Molecular Biology of Gene Regulation (2, max 8) (Enroll in BIOC 601)

PSCI 633 Free Radical Chemistry, Biology, and Medicine (4, Fa) (Enroll in GERO 666)

PSCI 655 Immunopharmaceutics (2, 2 years, Fa) Lectures and discussion sessions on pharmaceuticals-related immunology, including drugs affecting the immune system, antibodies and cytokines as drugs, and new developments in immunobiotechnology.

PSCI 661L Advanced Pharmaceutical Analysis (4, 2 years, Fa) Theory and application of quantitative instrumental techniques to the pharmaceutical sciences. Includes principles of chromatography, spectrophotometry, fluorescence, mass spectrometry and immunologic assays. Lecture and laboratory.

PSCI 662 Advanced Pharmacokinetics/Pharmacodynamics (2, max 4, FaSp) Principles of advanced pharmacokinetics/pharmacodynamics. Mathematical description of drug disposition processes. Design and evaluation of pharmacokinetic/pharmacodynamic studies. Advanced approaches to parameter estimates.

PSCI 663 Advanced Drug Delivery Systems (2, Fa) Design and applications of polymers, liposomes, micro/nanoparticles, prodrugs, and macromolecules for parenteral, oral, transdermal, respiratory and CNS drug delivery. *Prerequisite:* PSCI 665; *recommended preparation:* college level chemistry and biology.

PSCI 664 Drug Discovery and Design (4, FaSpSm) Principles of drug discovery, design and characterization. Mechanisms of action of major classes of drugs. Open only to students in management of drug development. *Recommended preparation:* college level chemistry and biology.

PSCI 665 Drug Transport and Delivery (4, Fa) Principles of cellular drug transport, in vivo drug transport, and modern drug delivery, including drug targeting. *Recommended preparation:* college level chemistry and biology.

PSCI 667 Intracellular Drug Delivery and Targeting (2, 2 years, Sp) Mechanisms of membrane trafficking and intracellular transport and the utilization of these mechanisms in drug delivery and targeting. *Recommended preparation:* college level chemistry and biology, INTD 531.

PSCI 756ab Seminar in Pharmaceutical Sciences (1-1, FaSpSm) Review of current pharmaceutical and related research topics.

PSCI 790 Research (1–12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PSCI 791L Research (2-12, no max) Directed research for the M.S. thesis or Ph.D. dissertation.

PSCI 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

School of Pharmacy

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

REGULATORY SCIENCE (RSCI)

RSCI 504 Good Laboratory Practices (GLP) (2) Introduction to Good Laboratory Practices (GLP), including the design, implementation and monitoring of non-clinical GLP studies, and GLP studies in an academic environment.

RSCI 506 Auditing Principles (3) Audit requirements mandated by the FDA and other international regulatory agencies including internal, external, regulatory agency, third party, GMP, GLP, ISO 13485/QSR and supplier audits.

RSCI 507 Quality Systems and Statistical Process Control (2) Fundamentals and applications of Statistical Process Control (SPC) in development and monitoring of manufacturing processes; includes SPC in root cause analysis and CAPA.

RSCI 508 Quality Assurance for Drugs and Biologics (3) Design and implementation of a quality system to assure quality and safety of pharmaceuticals and biologics, according to relevant FDA and international regulations and guidance's

RSCI 509 Quality Assurance, Medical Devices and Combination Products (3) Design of systems according to FDA and international regulations and guidelines to ensure the quality and safety of medical devices and combination products.

RSCI 520 Introduction to Risk Management for Health Care Products (2) Historical development, formal language and theoretical approaches to risk management in health care and medical product environment; policies, regulations, standards; liability prevention and loss control. (Duplicates credit in former MPTX 520.) *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

RSCI 521 Seminars in Regulatory Science (1, max 6, FaSpSm) Current problems in regulatory affairs, legal management, preclinical and clinical testing, scientific evaluation and quality assurance. (Duplicates credit in former MPTX 521.) Graded CR/NC. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post secondary training and industry experience; enrollment in M.S., Regulatory Science program.

RSCI 523 Advanced Concepts in Risk Management for Medical Products (3) Managing risk in demanding health-care and medical-product situations: clinical trials, emerging technologies, counterfeit prevention, hard-to-reach populations. *Recommended preparation:* undergraduate or professional degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience; enrollment in M.S. (Regulatory Science), Certificate in Patient and Product Safety, or permission of instructor.

RSCI 525 Introduction to Drug and Food Toxicology (3) Factors affecting toxic responses to foods and drugs: dose-response relationships, absorption, distribution, biotransformation, elimination of toxicants; target organ toxicity, teratogenesis, mutagenesis, carcinogenesis, food allergies, risk assessment. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

RSCI 527 Medical Product Safety (3) Management of medical product safety by manufacturers/suppliers including: safe manufacturing, labeling, packaging; pharmacovigilance, field observations, complaint handling; record-keeping, safety issues documentation; crisis management/recalls. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

RSCI 529 Application of Risk Management Tools and Techniques (2) Use of risk management tools in the medical products arena: functional analysis, fault-tree analysis, failure modes and effects analysis, HACCP

and six sigma methods. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

RSCI 530 Translational Medicine: An Overview (2, FaSpSm) An overview of principles and concepts underlying drug discovery and development, including terminology of translational science. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience; enrollment in M.S., Regulatory Science, Certificate in Preclinical Drug Development and M.S., Management of Drug Development.

RSCI 531 Industrial Approaches to Drug Discovery (4, FaSpSm) Examines the process of drug discovery from selection of disease and therapeutic target to characterization and validation of lead drug candidates. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience; enrollment in M.S., Regulatory Science, Certificate in Preclinical Drug Development and M.S., Management of Drug Development.

RSCI 532 Early Stage Drug Development (3, FaSpSm) Explores the activities involved in transforming an early drug or biological candidate to a drug approved for marketing by regulatory authorities. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience; enrollment in M.S., Regulatory Science, Certificate in Preclinical Drug Development and M.S., Management of Drug Development.

RSCI 533 Safety Evaluation during Drug Development (3) Safety pharmacology/toxicology requirements mandated by FDA and other regulatory agencies to move a new chemical entity from discovery stage to market approval.

RSCI 534 Drug Development in CNS Disorders (4) Successes and challenges related to central nervous system therapeutics. Major brain disorders, current and future therapeutic targets and clinical trial designs.

RSCI 535 Methods Development and Validation (3) Foundation in the process of developing and validating analytical methodology for purposes of pharmaceutical, biological and medical device development.

RSCI 540 Analysis of Food and Dietary Supplement Regulations (3) Changes and interpretation of regulations affecting food supply and dietary supplements impacting global markets. Product development, health-claim positioning, advertising, media messaging, consumer choices, personal health outcomes.

RSCI 590 Directed Research (1-12, max 12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

RSCI 596 Internship for Curricular Practical Training in Regulatory Science (1, max 4, FaSpSm) Part-time or full-time practical work experience in Regulatory Science. The internship must be located at an off-campus facility. Students are individually supervised by faculty. Graded CR/NC. *Recommended preparation:* undergraduate or professional degree in pharmacy, medicine or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience; enrollment in M.S. (Regulatory Science).

RSCI 601 Biomedical Commerce (4) Introduction to business principles appropriate to medical products, including: supply and demand, product entry-exit strategies, financing, reimbursement, marketing and pricing in global marketplace. *Recommended preparation:* undergraduate degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience; enrollment in M.S., Regulatory Science.

RSCI 603 Managing Complex Projects (3) Theory and methods to manage complex projects in medical products sectors; timelines, intellectual property, security, contracts, budgets, review activities, reports, electronic tools, cross-cultural communication. *Recommended preparation:* undergraduate or professional degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

RSCI 604 Regulatory Strategy in Asia (4, FaSpSm) Regulatory policy, standards and practices in different Asian markets: product licensing, import/export management, materials sourcing, quality systems compliance,

reimbursement, prescribing practices. Travel may be required. *Recommended preparation:* undergraduate or professional degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

RSCI 605 Managing Organizations and Human Resources (3) Theory and practice of personnel management, organizational structure and industrial relations in small, growing enterprises and large global companies typical of pharmaceutical and medical device sectors. *Recommended preparation:* undergraduate or professional degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

RSCI 606 Regulation of Emerging Technologies and Biological Products (3) Policies, testing and regulatory requirements affecting commercialization of biologics and novel medical technologies. Focus on biologics, blood and tissue products, radiopharmaceuticals and nanotechnology.

RSCI 607 Theory, Methods and Practice of Medical Products Research (4, FaSpSm) Statistical and research design methods, data analysis, survey and interview techniques laying the foundation for the dissertation.

RSCI 608 Regulatory Strategy in Europe and the Americas (4) Regulatory strategy in EU, Canada, Mexico and South America; culture, health-care practices, reimbursement, product registration, quality systems, trade restrictions, import/export requirements. Travel may be required. *Recommended preparation:* undergraduate or professional degree in pharmacy, medical or independent health sciences, engineering or equivalent mix of post-secondary training and industry experience.

RSCI 790 Directed Research (1-12, max 12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied towards the degree to be determined by the department. Graded CR/NC.

RSCI 794abcdz Doctoral Dissertation (2-2-2-2-0) Dissertation research required for completion of doctoral degree in regulatory science. Graded IP/CR/NC.

RSCI 800 Studies for the Qualifying Exam (0, FaSpSm) Preparation for the qualifying exam. Graded CR/NC.

USC Price School of Public Policy

Professor LaVonna Lewis, director of undergraduate programs at the USC Sol Price School of Public Policy, speaks with students from her Public Policy and Management course (PPD 225). The Price School is home to more than 200 faculty members from diverse disciplines and backgrounds who contribute to an environment that fosters innovation, entrepreneurship, experimentation and collaboration.

The USC Price School of Public Policy provides a dynamic learning environment where interdisciplinary education abounds. At USC Price, students choose a program of study from the independent yet related fields of public administration and leadership, public policy, nonprofits and philanthropy, health management and policy, urban planning, real estate development and executive leadership. Students are supported by a committed faculty who contribute to the strong sense of community present in the school.

The school's mission is to improve the quality of life for people and their communities. Faculty engage in solving some of society's most pressing issues — and challenge students to do the same. USC Price is renowned for its expertise in areas such as: sustainability and the environment, health care policy, nonprofit management, housing and real estate, transportation, infrastructure, urban development and land use, social policy, governance, civic engagement, community development, immigration and risk analysis, among others.

Defining characteristics of USC Price are the depth of its academic classroom experience and connecting classroom theory to professional practice through practicums, internships and laboratory work locally, nationally and around the globe. Students graduate with the knowledge, skills and experiences to lead in their chosen field of practice.

Today's complex challenges call for leaders who are able to work across disciplines and across the public, private and nonprofit sectors to find solutions. It is for this multidisciplinary reality that USC Price prepares its students.

USC Price students go on to hold high-ranking appointments in our nation's capital, analyze and determine public policy, design new transportation systems, and redesign city, county, state and federal governance structures — in the United States and abroad.

Administration

Jack H. Knott, Ph.D., *Dean*

Elizabeth Graddy, Ph.D.*, *Vice Dean*

Marlon Boarnet, Ph.D., *Senior Associate Dean, Academic Affairs*

Genevieve Giuliano, Ph.D.*, *Senior Associate Dean, Research and Technology*

Regina T. Nordahl, J.D., MBA, SPHR, *Associate Dean, Administration*

Carol A. Rush, MPA, *Associate Dean, Student Affairs and Enrollment Management*

John Sonogo, M.A., *Associate Dean for Development and External Relations*

Faculty

C. Erwin and Ione L. Piper Dean's Chair: Jack H. Knott, Ph.D.

University Professor: Kevin Starr, Ph.D. (*History*)

Wallis Annenberg Chair in Communication and Journalism: Manuel Castells, Ph.D. (*Communication*)

Judith & John Bedrosian Chair in Governance & Public Enterprise: Raphael Bostic, Ph.D.

Blue Cross of California Chair in Health Care Finance: Glenn A. Melnick, Ph.D.

Borstein Family Endowed Professor of Real Estate: Christian L. Redfearn, Ph.D.

Margaret and John Ferraro Chair in Effective Local Government: Genevieve Giuliano, Ph.D.*

James Irvine Chair in Urban and Regional Planning: Tridib Banerjee, Ph.D., FAICP*

Lusk Chair in Real Estate: Richard K. Green, Ph.D. (Business)

Jeffrey J. Miller Chair in Government, Business and the Economy: Elizabeth Graddy, Ph.D.*

Emery Evans Olson Chair in Nonprofit Entrepreneurship & Public Policy: James M. Ferris, Ph.D

Quintiles Chair in Pharmaceutical and Regulatory Innovation: Darius Lakdawalla, Ph.D. (Pharmacy)

Leonard D. Schaeffer Director's Chair of the USC Leonard D. Schaeffer Center for Health Policy and Economics: Dana Goldman, Ph.D.*

Norman Topping Chair in Medicine and Public Policy: Paul B. Ginsburg, Ph.D.

Maria B. Crutcher Professor of Citizenship and Democratic Values: Terry L. Cooper, Ph.D.

Governor Downey Professor of State and Global Policy: Arnold Schwarzenegger

Frances R. and John J. Duggan Distinguished Professor of Public Administration: Shui Yan Tang, Ph.D.*

Houston Flournoy Professor of State Government: Juliet Musso, Ph.D.*

William M. Keck Professor of Energy Resources: Donald Paul, Ph.D. (Engineering and Earth Sciences)

Dr. Chester A. Newland Professor of Public Administration: Janet Vinzant Denhardt, DPA

Presidential Professor of Health Economics: Daniel McFadden, Ph.D.

Judge Widney Professor: Leonard D. Schaeffer

Judge Widney Professor of Poetry and Public Culture: Dana Gioia, M.A., MBA

Professors: Ali E. Abbas, Ph.D. (Engineering); Marlon Boarnet, Ph.D.; Ann Crigler, Ph.D. (Political Science); Howard Greenwald, Ph.D.; Eric Heikkila, Ph.D.; Alan Kreditor, MCP, AICP; Dan Mazmanian, Ph.D.; Martin Krieger, Ph.D.; Jacquelyn McCroskey, Ph.D. (Social Work); James Moore II, Ph.D. (Engineering); Dowell Myers, Ph.D.; Michael Nichol, Ph.D.; Gary Painter, Ph.D.; Manuel Pastor, Ph.D. (Geography and American Studies and Ethnicity); Jane Pisano, Ph.D.; Jon Pynoos, Ph.D. (Gerontology); Alison D. Renteln, Ph.D.* (Political Science); David Sloane, Ph.D.; Robert Suro (Journalism); Detlof von Winterfeldt, Ph.D. (Engineering)

Associate Professors: Elizabeth Currid-Halkett, Ph.D.; Christian Grose, Ph.D. (Political Science); Geoffrey Joyce, Ph.D. (Pharmacy); Annette Kim, Ph.D.; Christian Redfearn, Ph.D.; Peter Robertson, Ph.D.*; Lisa Schweitzer, Ph.D.; Jeffrey Sellers, Ph.D. (Political Science); Neeraj Sood, Ph.D. (Pharmacy); Katharine Strunk, Ph.D. (Education); Kathleen Wilber, Ph.D. (Gerontology)

Assistant Professors: Emma Aguila, Ph.D.; Alice Chen, Ph.D.; Jorge De la Roca, Ph.D.; Kathleen Doherty, Ph.D.; Nicolas Duquette, Ph.D.; Nicole Esparza, Ph.D.; Alexandra Graddy-Reed, Ph.D.; Marco Huesch, Ph.D.; Pamela McCann, Ph.D.; Mark D. Phillips, Ph.D.; William Resh, Ph.D.; Abby Wood, Ph.D.; Julie M. Zissimopolous, Ph.D.

Professors (Teaching): Robert Denhardt, Ph.D.; LaVonna B. Lewis, Ph.D.; Dora Vertenten, DPA

Associate Professors (Teaching): Elizabeth Falletta, MRED; Deborah J. Natoli, Ph.D.

Assistant Professors (Teaching): Tara Blanc, Ph.D. (*nonresident*); William Leach, Ph.D. (*nonresident*); T.J. McCarthy, Ph.D.; Jennifer Miller, Ph.D.; Kelly Rawlings, Ph.D. (*nonresident*); Minzi Su, Ph.D. (*nonresident*); Michael Thom, Ph.D.

Research Professors: Hilda Blanco, Ph.D.; Stephen Hora, D.B.A.; Adam Rose, Ph.D.

Research Associate Professors: Michael Cousineau, Ph.D. (*Medicine*); Christopher Weare, Ph.D.

Research Assistant Professors: John Romley, Ph.D.; Heather Rosoff, Ph.D.; Dan Wei, Ph.D.

Distinguished Fellow: Stan Ross, Honorary J.D.

Professors of Practice: Michael E. Harris (*Health Services Administration and Policy*); Sherry Bebitch Jeffe (*Public Policy Communication*); Geraldine Knatz, Ph.D. (*Public Policy & Engineering*); Leonard Mitchell (*Economic Development*); Mark Pisano (*Public Administration*); Dan Schnur (*Political Science*); Antonio R. Villaraigosa (*Policy*); Frank Zerunyan (*Governance*)

Adjunct Professors: Janis Breidenbach, M.A.; Jonathan Brown, DPA; Robert Champion, MRED; Thomas Collins, Ed.D.; Rick Culley, Ph.D.; Tim Gage, MPP; Patrick G. Hays, MHA; Lori Howard, Ph.D.; Stanley Iezman, J.D.; Robert Ingenito, M.A.; Jong S. Jun, Ph.D.; Patrick Kapsner, MPA, FACMPE; Michael Keston, MBA; Allan Kotin, M.A.; Ehud Mouchly, M.A.; Tomson Ong, J.D., Ph.D., LL.M.; James Osterling, MBA; Robert Smythe, B.S.; Erroll Southers, MPA; Donna Staal, DPA; Deborah Torres, M.Arch.; Henry Zaretsky, Ph.D.

Adjunct Associate Professors: Aggie Afarinesh, MPA; P.K. Agarwal, M.S.; Austin Anderson, MBA; Deepak Bahl, MBA, MPI; William Barcellona, MHA, J.D.; Bruce Baltin; Vinayak Bharne, M.Arch.; Sandipan Bhattacharjee, MPI; David Brown, J.D.; Grace Cheng, MSPH; Glenn Daley, M.Phil., MBA; Terri Dickerhoff, MRED; Grace Dyrness, DPDS; Ali Farahani, Ph.D.; James Fawcett, Ph.D.; Veronica Flores, M.A.; Matt Gainer, MFA; Richard Garcia, DPA; Guillermo Gil, MBA; Todd Gish, Ph.D.; Shawn Godkin, M.Arch; Ray Gonzales, Ph.D.; David Grunwald, J.D., MPP; Richard A. Hagy, Ph.D.; Mark Hanson, Ph.D.; Daniel Haverty, DPA; Con Howe, MCP; Donald Hufford, M.D.; Bryan Jackson, J.D.; Dion Jackson, MBA, MPI, MRED; Daniel Jordan, Ph.D.; Rym Kaki, Ph.D.; Steven Kellenberg, M.A.U.D.; William R. Kelly, MPA, MBA, M.A.; Michael Kodama, M.A.; Kathy Kolnick, Ph.D.; Alon Kraft, MPI; Jeffrey Kreshek, MBA, MRED; Vi-Nhuan Le, Ph.D.; Richard Little, M.S.; Kenneth Long; John Loper, MRED; Melissa Lopez, Ph.D.; Robert Manford, DPPD; Marcella Marlowe, Ph.D.; Carl Meyer, M.Arch.; Ryan Millsap, Ph.D.; Donald Morgan, Ph.D.; Bret Nielsen, MRED; Mark E. Oliver, MRED; P. Michael Paules, MPA; Katherine Perez, MURP; John Perfitt, MBA; John Raffoul, DPA; Maurice Rahimi, Ph.D.; Ann Reyes Robbins, Ph.D., J.D.; Ellen Riley, MBA; Jeanne Ringel, Ph.D.; Shlomi Ronen, MBA; Robert A. Saunders, MRED; Jeffrey Schaffer, MPA; Bonnie Shrewsbury, M.A.; Susan Sinclair, MBA; Krista Sloniowski, MPI; Jeffrey Smith, Ph.D.; Matthew Smith, MRED; Helene Smookler, Ph.D.; Donald Spivack, MCP; Elwood Tescher, M.Arch.; Halil Toros, Ph.D.; Mark Velez, J.D., Ph.D.; Barry Waite, MPA; Jeffrey Wasserman, Ph.D.; Dennis A. Watsabaugh; Clyde Wesp, M.D.; Chris Wilson, MBA; Jack Wong, M.A.; Ke Ye, Ph.D.; Diane Yoder, Ph.D.

Frances R. and John J. Duggan Professor Emeritus in Public Administration: Chester A. Newland, Ph.D.

Emeritus Professors: William C. Baer, Ph.D., AICP; Gerald Caiden, Ph.D.; Robert M. Carter, D.Crim.; T. Ross Clayton, Ph.D.; Lois Friss, Dr.P.H.; David Lopez-Lee, Ph.D.; Peter Gordon, Ph.D.; David Mars, Ph.D.; Robert C. Myrtle, DPA; E.K. Nelson, DPA; William Petak, DPA; Francine Rabvinovtitz, Ph.D., AICP; Warren Schmidt, Ph.D.; Gilbert Siegel, Ph.D.; Robert Stallings, Ph.D.; Richard A. Sundeen, Ph.D.*; Robert E. Tranquada, M.D.; Joseph S. Wholey, Ph.D.; William J. Williams, DPA

Emeritus Associate Professors: Wesley E. Bjur, Ph.D.; Catherine Burke, Ph.D.

**Recipient of university-wide or school teaching award.*

Degrees Offered

The Price School of Public Policy offers the following degrees:

- Bachelor of Science in Policy, Planning and Development
- Master of Health Administration

- Executive Master of Health Administration
- Master of Science in Health Systems Management Engineering (with Industrial and Systems Engineering)
- Executive Master of Leadership
- Master of Public Policy and Management
- Master of Planning
- Master of Planning and Development Studies
- Master of Public Administration
- Master of Public Policy
- Master of Nonprofit Leadership and Management
- Master of Real Estate Development
- Doctor of Philosophy in Public Policy and Management
- Doctor of Philosophy in Urban Planning and Development
- Doctor of Policy, Planning, and Development

The Bachelor of Science and the school's master's degrees are also offered jointly as a progressive five-year program and the school participates in the following interdisciplinary minors:

- Construction Planning and Management
- Health Policy and Management
- International Policy and Management
- Law and Public Policy
- Nonprofits, Philanthropy and Volunteerism
- Real Estate Development
- Urban Policy and Planning

The Master of Planning is offered as a dual master's degree with programs in architecture, landscape architecture, art and curatorial practices in the public sphere, business administration, economics, gerontology, public administration, public health, public policy, real estate development and social work.

The Master of Public Administration is offered as a dual master's degree with programs in planning, gerontology, Jewish nonprofit management, law and social work.

The Master of Real Estate Development is offered as a dual degree with the Master of Business Administration, Juris Doctor and Master of Planning.

The Master of Health Administration is offered as a dual degree with the Master of Science in Gerontology.

The Master of Public Policy is offered as a dual degree with programs in law and planning.

National Honor Societies

Pi Alpha Alpha

Pi Alpha Alpha is the national honor society for public affairs and administration. Graduate students in the Price School of Public Policy who have completed at least 18 semester units and have earned a 3.7 grade point average are eligible for membership.

Pi Sigma Alpha

Pi Sigma Alpha is the national honor society for students in public administration, political science, and international relations. Students who have completed at least three courses from among these fields and have earned at least a 3.5 grade point average are eligible to apply.

Price School of Public Policy

Undergraduate Degrees

The Price School of Public Policy offers a suite of degrees that allow undergraduate students to gain the skills and knowledge necessary to understand complex health, environmental and urban issues, as well as to potentially enter the professional fields of health and nonprofit management, public policy, real estate development, and urban planning. Students may enroll in the Bachelor of Science in Policy, Planning, and Development or the Bachelor of Science in Real Estate Development. In addition, students can select from a challenging set of minors or possibly the very competitive progressive degrees associated with the Master of Health Administration, Master of Planning and Master of Public Administration.

Admission

Freshman and transfer students may indicate their desire to declare a Price School major on their university application. Students enrolled at USC wishing to declare either Price major or to be admitted into the minors must be in good academic standing. Interested current USC students should contact the Admissions and Recruitment Office in RGL 111 for more information.

Advisement

Students must discuss courses of study with the appropriate undergraduate advisers throughout their college enrollment and need to develop their own individual programs with faculty and staff advisers at the time of first enrollment and throughout their college careers.

Price School of Public Policy

Undergraduate Degrees

Bachelor of Science in Policy, Planning, and Development

The Bachelor of Science in Policy, Planning, and Development is an interdisciplinary major that prepares students for graduate study and/or professional careers by engaging them in the analysis of society's political, social and economic issues in such areas as environment, health care and urban life. The major introduces students to theoretical foundations and practical applications through a set of cross-cutting introductory courses and specialized courses in one of five tracks: health policy and management, public policy and law, nonprofits and social innovation, real estate development, or sustainable planning. Students will be introduced to analytical and research tools, including economics, Geographic Information Systems, statistics, urban design, and applied field research. Throughout, the students' education will be connected to professional practice, as exemplified by the mandatory internship. Finally, the major is structured to provide students with sufficient elective credits to explore minors or other programs at USC so they can broaden their education to better prepare themselves for the next stage of their lives.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See The USC Core and the Requirements for Graduation page for more information.

Major Requirements

A minimum grade of C-, 1.7 (A = 4.0) must be earned in each PPD course specifically listed as a degree requirement. In addition, a minimum grade point average of C (2.0) or higher must be achieved to earn all Price degrees. The GPA for all upper division PPD courses applied toward the major must also be a C (2.0) or higher. No more than 16 units of PPD course work may be taken prior to the successful completion of pre-major requirements.

Pre-major Requirements

A minimum grade of C, 2.0 (A = 4.0), must be earned in each of the pre-major courses.

All pre-major requirements must be taken for a letter grade.

Math

MATH 117 (4)

Economics

ECON 203 Microeconomics (4)

General Electives (26 units)

PPD CORE COURSES (30 UNITS)

PPD CORE COURSES (30 UNITS)		UNITS
PPD 225	Public Policy and Management (gateway course)	4
PPD 227	Urban Planning and Development (gateway course)	4
PPD 240	Citizenship and Public Ethics	4
PPD 245	The Urban Context for Policy and Planning	4
PPD 357	Government and Business	4
PPD 301	PPD Practices: Internship Seminar	2
PPD 303	Statistics for Policy, Planning and Development	4
PPD 373	Public Policy and Planning Analysis	4

Tracks

Students select one track for degree emphasis; they take 28 units (seven courses) from the track selected. Each track includes four required courses and three elective courses. During advisement, students will be given a list of recommended elective courses particularly appropriate for the chosen track, but students have the flexibility to craft the electives out of Price School courses to meet their academic needs. The four requirement courses for each track are listed below.

HEALTH POLICY AND MANAGEMENT

HEALTH POLICY AND MANAGEMENT		UNITS
Required courses:		
PPD 325	Fundamentals of Health Policy and Management	4
<i>Health Policy Focus:</i>		
PPD 314	Public Policy and Law	4
PPD 315	Analytical Foundations for Public Policy	4
PPD 415	Health Policy	4
<i>Health Management Focus:</i>		
PPD 320	Organizational Behavior in Public Administration	4
PPD 407	Financial Management of Public and Nonprofit Organizations	4
PPD 413	Administration of Health Care Organizations	4

Electives (select 3):

Health Policy Focus:

GERO 416	Health Issues in Adulthood	4
HP 408	Environmental Health in the Community	4
HP 412	Health Promotion and Prevention Policy	4
PPD 330	Introduction to Health Care Systems	4
PPD 413	Administration of Health Care Organizations	4
PPD 414	Community Health Policy and Planning	4

(Study abroad if applicable to track)

Health Management Focus:

PPD 318	Financial Accounting in Public and Nonprofit Organizations	4
PPD 330	Introduction to Health Care Systems	4
PPD 403	Management Analysis I	4
PPD 414	Community Health Policy and Planning	4
PPD 478	Social Innovations	4

(Study abroad if applicable to track)

PUBLIC POLICY AND LAW

UNITS

Required courses:

PPD 313	Finance of the Public Sector	4
PPD 314	Public Policy and Law	4
PPD 315	Analytical Foundations for Public Policy	4
POSC 340	Constitutional Law	4

Electives (select 3):

ECON 434	Economic Analysis of Law	4
LAW 200x	Law and Society	4
POSC 444	Civil and Political Rights and Liberties	4
PPD 342	Crime and Public Policy	4
PPD 410	Comparative Urban Development	4
PPD 415	Health Policy	4
PPD 439	Housing and Community Development	4
PPD 461	Sustainable Communities, Policy and Planning	4
PPD 478	Social Innovations	4
PPD 485	U.S. Immigration Policy	4

Washington, D.C. Semester

(Study abroad if applicable to track)

NONPROFITS AND SOCIAL INNOVATION

UNITS

Required courses:

PPD 371	The Nonprofit Sector and the Public Interest	4
PPD 402	Management of Public and Nonprofit Organizations	4
PPD 407	Financial Management of Public and Nonprofit Organizations	4
PPD 478	Social Innovations	4

Electives (select 3):		
BUCO 485	Business Communication Management for Nonprofits	4
IR 371	Global Civil Society: Non-State Actors in World Politics	4
PPD 318	Financial Accounting in Public and Nonprofit Organizations	4
PPD 320	Organizational Behavior in Public Administration	4
PPD 353	Introduction to Philanthropy and Grant-Writing	4
PPD 372	Public Service in an Urban Setting	4
PPD 382	International Development	4
PPD 403	Management Analysis I	4
(Study abroad if applicable to track)		

REAL ESTATE DEVELOPMENT UNITS

Required courses:		
FBE 400x	Introduction to Real Estate Finance and Development	4
PPD 362	Real Estate Fundamentals for Planning and Development	4
PPD 417	History of Planning and Development	4
PPD 437	Advanced Finance and Investment for Planning and Development	4

Electives (select 3):		
CE 460*	Construction Engineering	3
FBE 427	Real Estate Law	4
PPD 410	Comparative Urban Development	4
PPD 420	Environmental Impact Assessment	4
PPD 425	Designing Livable Communities	4
PPD 435	Analyzing Real Estate Markets	4
PPD 438	Local Economic Development	4
PPD 439	Housing and Community Development	4
(Study abroad if applicable to track)		

**Students in the real estate track who select CE 460 as an elective will earn 27 units rather than 28 in the track and will require 27 units of general electives rather than 26 to reach 128 units total.*

SUSTAINABLE PLANNING UNITS

Required courses:		
PPD 358	Urban and Regional Economics	4
PPD 417	History of Planning and Development	4
PPD 427L	Geographic Information Systems and Planning Applications	4
PPD 461	Sustainable Communities, Policy and Planning	4

Electives (select 3):		
PPD 306	Visual Methods in Policy, Management, Planning and Development	4
PPD 358	Urban and Regional Economics	4
PPD 360	Urban Transportation Planning and Policy	4
PPD 362	Real Estate Fundamentals for Planning and Development	4
PPD 410	Comparative Urban Development	4
PPD 414	Community Health Policy and Planning	4

PPD 420	Environmental Impact Assessment	4
PPD 425	Designing Livable Communities	4
PPD 438	Local Economic Development	4
PPD 439	Housing and Community Development	4
(Study abroad if applicable to track)		

The faculty director of the undergraduate program may approve students' petitions to substitute or mix track classes if based on an appropriate academic/career rationale.

Capstone

All students will take four units of a capstone experience during their senior year. This may be fulfilled by taking PPD 431L Undergraduate Policy, Planning, and Development Studies (4) or PPD 497ab Senior Thesis (2-2). Students wishing to enroll in PPD 497ab must have a 3.7 GPA in PPD courses and an overall 3.5 GPA.

Internships

Policy, Planning and Development majors are required to complete 140 hours of internship by enrolling in PPD 301 PPD Practices: Internship Seminar or the Washington, D.C., Semester internship. Internships are matched as closely as possible to the student's interests and skills.

PPD 301 and the internship in a position provide numerous opportunities to develop and formulate future career goals, as well as to gain personal and professional experience while completing the undergraduate degree.

Honors

Price School honors are available at graduation to qualified PPD majors and result in a special designation of departmental honors on a student's transcript. Achievement of PPD honors requires a 3.7 GPA in PPD major courses and a 3.5 overall GPA as well as nomination by the professor in the capstone experience. In addition, students must earn an A in their capstone course (PPD 497ab or PPD 431).

Washington, D.C., Semester

The Washington, D.C., Semester program provides an intensive semester of confrontation with the political center of the nation and its complex components. The program offers opportunities for behind-the-scenes work in national government agencies and related organizations, combined with an academic environment and the chance to explore, share and learn with a group of fellow students.

Price School of Public Policy

Undergraduate Degrees

Bachelor of Science in Real Estate Development

Price School students are trained to look at the interaction between people and place and the consequences for our communities. The Bachelor of Science in Real Estate Development explores the broader context of real estate allowing students to launch their careers by grasping the full structure of the industry and its role in society. The pre-major courses integrate the many disciplines which are the foundation for real estate education, including accounting, economics, and business finance. The real estate core classes taken through the Price School focus on real estate principles, financial analysis, market analysis, land use policy, urban design, and the history of cities. Students also select electives to complement their interests from either the Price School or closely related disciplines. Throughout, the students' education will be connected to professional practice, as exemplified by the mandatory internship. Finally, the major is structured to provide students with sufficient elective credits to explore minors or other programs at USC so they can broaden their education to better prepare themselves for the next stage of their lives.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. See The USC Core and the Requirements for Graduation page for more information.

Pre-major Requirements

A minimum grade of C, 2.0 (A = 4.0), must be earned in each of the pre-major courses. All pre-major requirements must be taken for a letter grade.

Major Requirements

A minimum grade of C-, 1.7 (A = 4.0) must be earned in each Price School course specifically listed as a degree requirement. In addition, a minimum grade point average of C (2.0) or higher must be achieved to earn all Price degrees. The GPA for all upper-division Price courses applied toward the major must also be a C (2.0) or higher. No more than 16 units of Price School course work may be taken prior to the successful completion of pre-major requirements.

PRE-MAJOR CORE (28 UNITS)

		UNITS
BUAD 215x	Foundations of Business Finance	4
BUAD 285a	Accounting Fundamentals, Financial and Managerial Accounting	4
ECON 203	Principles of Microeconomics	4
MATH 117	Introduction to Mathematics for Business and Economics	4
PPD 225	Public Policy and Management	4
PPD 245*	The Urban Context for Policy and Planning	4
PPD 303	Statistics for Policy, Planning, and Development	4

**May double count as general education.*

REAL ESTATE CORE (24 UNITS)

		UNITS
PPD 362	Real Estate Fundamentals for Planning and Development	4
PPD 375	Real Estate Development Analysis	4
PPD 417	History of Planning and Development	4
PPD 425	Designing Livable Communities	4
PPD 435	Analyzing Real Estate Markets	4
PPD 437	Advanced Finance and Investment for Planning and Development	4

Real Estate Electives (12 units)

Students select up to 12 units of course work from the Price School or in related fields. Elective classes must be approved by the Price School academic adviser.

Capstone (4 units)

Students will complete four units of a capstone experience during their senior year. This may be fulfilled by taking PPD 431L Undergraduate Policy, Planning, and Development Studies (4) or PPD 497ab Senior Thesis (2-2). Students wishing to enroll in PPD 497ab must have a 3.7 GPA in Price School courses and an overall 3.5 GPA.

Internships

Students are required to complete 140 hours of internship by enrolling in PPD 301 PPD Practices: Internship Seminar. Internships are matched as closely as possible to the student's interests and skills. PPD 301 and the internship provide opportunities to develop and formulate future career goals, as well as to gain personal and professional experience while completing the undergraduate degree.

Honors

Price School honors are available at graduation to qualified students and result in a special designation of departmental honors on a student's transcript. Achievement of Price School honors requires a 3.7 GPA in Price School major courses, a 3.5 overall GPA, as well as nomination by the professor of the capstone experience. In addition, students must earn an A in their capstone course (PPD 431 or PPD 497ab).

Price School of Public Policy

Undergraduate Degrees

Progressive Degrees in the Price School of Public Policy

The Price School of Public Policy offers students who have demonstrated exceptional academic success the opportunity to earn both bachelor's and master's degrees in a progressive degree program. This program allows students to earn both the Bachelor of Science and a master's degree in five years. Further details about progressive degrees can be found on the Requirements for Graduation page.

Admission

Admission is available after the completion of 64 units of course work toward the undergraduate degree. Students must apply for admission to the progressive degree program after completing 64 units of applicable course work to their undergraduate programs, but prior to the completion of 96 units of course work (not including AP, IB or courses taken prior to high school graduation). The application for admission to the progressive degree plan must be accompanied by a course proposal plan and two letters of recommendation with one at least from a Price School faculty member.

Awarding of Degrees

The Bachelor of Science and master's degree may be awarded separately upon completion of all degree requirements, but the master's degree will not be awarded before the bachelor's degree. Students who elect not to complete the master's, must complete 128 units to earn the bachelor's degree, including 32 units of upper division Price course work (including any graduate Price classes).

Time Limits

All requirements for the progressive degree must be completed within 12 semesters. If not completed within that time, students will no longer be eligible for the master's degree but may still earn the bachelor's.

Transfer of Credits

Graduate courses will not be accepted for transfer credit. Undergraduate classes may be transferred in accordance with university guidelines.

Price School of Public Policy

Undergraduate Degrees

Minor Programs

Minor in Construction Planning and Management

This program covers the most current theories and practice of construction planning and management. The program provides a valuable adjunct credential to professional school students pursuing careers in business administration, public administration, environmental studies, and other areas; and a unique opportunity for

professional focus to students in the USC Dornsife College of Letters, Arts and Sciences.

Construction activities are complex. In contemporary society, effective planning and management of these activities requires specialized knowledge of the technical, economic and political environment. This program couples the knowledge of how construction activities are organized with a broader understanding of the urban system in which construction projects are embedded. With the exception of statistics, all of the required courses are within the Department of Civil Engineering and the Price School of Public Policy.

Any USC undergraduate who has completed the equivalent of two full-time semesters in good standing is eligible to pursue the minor program. This minor program is rigorous enough to serve as an introductory credential for students subsequently electing to pursue advanced studies in development, urban planning, construction management or allied fields.

See the Department of Civil Engineering for course requirements.

Minor in Health Administration

This 20-unit minor in health administration provides students with a background in administration and management issues in the field of health care and the skills necessary to pursue health-related management opportunities in the for-profit, nonprofit and governmental sectors.

REQUIRED COURSES (12 UNITS)		UNITS
PPD 320	Organizational Behavior in Public Administration	4
PPD 325	Fundamentals of Health Policy and Management	4
PPD 330	Introduction to Health Care Systems	4

ELECTIVES (8 UNITS)		UNITS
PPD 316	Human Resources Management for Public Organizations	4
PPD 318	Financial Accounting in Public and Nonprofit Organizations	4
PPD 407	Financial Management of Public and Nonprofit Organizations	4
PPD 413	Administration of Health Care Organizations	4

Minor in Health Policy

This 16-unit minor in health policy provides students with a background in the policy issues and challenges globally, nationally and locally related to quality, cost and access to health care. Students in this minor will acquire an understanding of these issues and the skills required to influence health policy.

REQUIRED COURSES (12 UNITS)		UNITS
PPD 325	Fundamentals of Health Policy and Management	4
PPD 330	Introduction to Health Care Systems	4
PPD 415	Health Policy	4

ELECTIVES (4 UNITS)		UNITS
GERO 416	Health Issues in Adulthood	4
HP 422	AIDS in Society	4
PPD 414	Community Health Policy and Planning	4

Minor in International Policy and Management

The minor in international policy and management brings together courses from the School of International Relations, dealing with the new global challenges, specific regions of the world, and international organizations and policies, and the Price School of Public Policy, dealing with core management skills and public policy processes. Students will examine the changes and challenges which are transforming the world, and the policy

and management skills used to deal with them. To increase their understanding of the context and application of these concepts, students must complete a semester-long internship either in Washington, D.C. (through participation in the Washington, D.C. semester program) or in Los Angeles with an organization that has an international focus.

Students minoring in international policy and management take three courses in international relations, including the gateway course, IR 305 Managing New Global Problems; three courses in public policy and management; and an approved internship through the School of International Relations (IR 491 Field Study). For additional course information, see International Relations.

Minor in Law and Public Policy

The minor in law and public policy draws upon four fields of study: public policy and management, law, economics and political science. It provides students with an understanding of the political and economic contexts in which laws are made as well as how legal institutions shape policy formulation. Students learn to analyze the consequences of policy and alternatives; the roles played by government, business and nonprofit organizations in public decision making; and the legal bases for various areas of public policy.

Students minoring in law and public policy take six required courses, including the gateway class, PPD 225 Public Policy and Management, and one elective. The latter enables the student to focus on a specific area of law.

REQUIRED COURSES		UNITS
ECON 203	Principles of Microeconomics	4
LAW 200x	Law and Society	4
POSC 340	Constitutional Law	4
PPD 225	Public Policy and Management	4
PPD 303	Statistics for Policy, Planning, and Development	4
PPD 373*	Public Policy and Planning Analysis	4

And one of the following:

ECON 434	Economic Analysis of Law	4
FBE 403	Introduction to the Legal Environment of Business	4
POSC 345	International Law	4
POSC 347	Environmental Law	4
POSC 432	The Politics of Local Criminal Justice	4
POSC 440	Comparative Law and the Judicial Process	4
POSC 441	Cultural Diversity and the Law	4
POSC 444	Civil and Political Rights and Liberties	4
POSC 452	Critical Issues in Law and Public Policy	4
PPD 314*	Public Policy and Law	4
PPD 315*	Analytic Foundations for Public Policy	4

*Prerequisite required

Minor in Nonprofits, Philanthropy and Volunteerism

This four-course minor enables students to learn about the nonprofit sector — its organizations, philanthropy and voluntary action. The three course core provides: (1) an overview of the nonprofit sector and philanthropy and its role in the United States, including its historical and theoretical foundations, its various components and its relation to public policy; (2) a focus on voluntary action and service as one means for social change and problem-solving; and (3) insights into the management of nonprofit organizations. Students select an elective that extends their understanding to the role of nongovernmental organizations in international affairs or to the role of public relations for nonprofits.

This minor is intended for students who plan (1) to work in a nonprofit or charitable organization, whether it is a large organization such as United Way, a small social service agency, an environmental advocacy group, a museum or a religious organization, (2) to participate with nonprofits as a volunteer throughout their lives or (3) pursue further graduate work in a service-related profession.

REQUIRED COURSES		UNITS
PPD 371	The Nonprofit Sector and the Public Interest	4
PPD 402	Management of Public and Nonprofit Organizations	4
PPD 478	Social Innovations	4
Electives (select one)		
BUCO 485	Business Communication Management for Nonprofits	4
JOUR 455*	Public Relations for Non-Profit Organizations	4
IR 371	Global Civil Society: Non-State Actors in World Politics	4
PPD 318	Financial Accounting in Public and Nonprofit Organizations	4
PPD 353	Introduction to Philanthropy and Grant Writing	4
PPD 372	Public Service in an Urban Setting	4

*Prerequisite: JOUR 250

Minor in Real Estate Development

This minor provides students with an overview of the field of real estate development — its principles, market analysis, finance and history, as well as the opportunity to pursue more specialized interests and skills through a set of electives (including courses in architecture, civil engineering and business). It is a 23–24 unit minor, requiring four core courses and two electives. The minor is intended for any students with interests in careers in real estate development or other areas that might be related to real estate development, such as local government, non-profit housing and land use enterprises, urban economics, public-private partnerships or related entrepreneurial ventures.

REQUIRED COURSES		UNITS
FBE 400x	Introduction to Real Estate Finance and Development	4
PPD 362	Real Estate Fundamentals for Planning and Development	4
PPD 417	History of Planning and Development	4
PPD 437*	Advanced Finance and Investment for Planning and Development	4
Electives (select two):		
CE 460**	Construction Engineering	3
FBE 427	Real Estate Law	4
PPD 425	Designing Livable Communities	4
PPD 435	Analyzing Real Estate Markets	4
PPD 439	Housing and Community Development	4
PPD 461	Sustainable Communities, Policy and Planning	4
		23-24

*Prerequisite: MATH 117 and PPD 362

**7 units if CE 460 is selected

Minor in Urban and Sustainable Planning

The 24-unit minor in urban policy and planning focuses on the application of public policy, urban planning and public management to the analysis and solution of urban problems. It draws upon the interdisciplinary faculty

and programs of the Price School of Public Policy and includes foundational courses that introduce students to the nature of urban phenomena and the analysis and solution of urban problems. The minor also introduces students to the professional and academic fields of either urban planning and development or public policy and public management. In addition, based on their specific interests, students have the opportunity to explore in greater depth three areas and approaches of urban problem-solving. This minor is appropriate for students interested in expanding their understanding of the fields of urban planning and public policy and management as potential professional careers as well as increasing their comprehension of the analysis and solution of urban problems.

REQUIRED COURSES (16 UNITS)		UNITS
PPD 227	Urban Planning and Development	4
PPD 245	The Urban Context for Policy and Planning	4
PPD 427L	Geographic Information Systems and Planning Applications	4
PPD 461	Sustainable Communities, Policy and Planning	4

ELECTIVE COURSES (8 UNITS)		UNITS
Students select two courses from this list. They are encouraged through advisement to consider course clusters that reflect special interests.		
PPD 358	Urban and Regional Economics	4
PPD 360	Urban Transportation Planning and Policy	4
PPD 414	Community Health Policy and Planning	4
PPD 417	History of Planning and Development	4
PPD 425	Designing Livable Communities	4
PPD 438	Local Economic Development	4
PPD 439	Housing and Community Development	4

Price School of Public Policy

Aerospace Studies

Physical Education Building 112
(213) 740-2670

Administration

Sean C. Marler, M.Ed., *Lieutenant Colonel, USAF*

Faculty

Professor: Sean C. Marler, M.Ed., *(Lieutenant Colonel, USAF)*

Assistant Professors: Casey Whitson, B.S., *(Captain, USAF)*; Matthew Stewart, B.S., *(Captain, USAF)*

The Department of Aerospace Studies offers a three to four-year program of instruction leading directly to commissioning as an officer in the United States Air Force. To obtain a commission, qualified students must pass an aptitude test, physical fitness assessment and a medical examination; complete the aerospace studies program of instruction and concurrently receive an undergraduate or graduate degree. Credits earned in aerospace studies courses may be counted as electives in some degree programs. Those students who qualify for and are selected to enter Air Force pilot training will be given flight instruction upon graduation. Qualified applicants may compete for a variety of Air Force scholarships, some of which pay full tuition, books and associated fees. USC also offers a matching \$4,000 scholarship per year for all AFROTC scholarship recipients. See the Tuition and Fees page for additional scholarship information.

Program Requirements

Academic Year Program

This program consists of up to eight semesters of aerospace studies courses (AEST 100ab through AEST 400ab) plus a four-week summer field training course. Students enroll in the first four semesters of aerospace studies (AEST 100ab and AEST 200ab) in the same manner as in any other course of instruction at USC. Students will be considered on a competitive basis to attend the summer field training course and enroll in the final four semesters (AEST 300ab and AEST 400ab). The program can be tailored for students who join after the beginning of their freshman year.

Summer Training Courses

Field training is offered during the summer at Maxwell Air Force Base in Montgomery, Alabama. Students participate in four weeks of intensive training, normally between their sophomore and junior years.

The major areas of study in the field training course include junior officer leadership training, career orientation, survival training, weapons training, physical training, base functions and the Air Force environment.

Additional summer training courses at locations around the world are available to interested students to build leadership and human relations skills, develop cultural and language proficiency, provide a general orientation in Air Force specialties and motivate cadets toward an Air Force career. The training opportunities vary each year but may include cultural and language immersion programs, engineering research and apprenticeships, and orientation programs related to other air, space and cyberspace specialties.

Price School of Public Policy

Military Science

Physical Education Building 110
(213) 740-4026

Administration

Justin M. Chezem (*Lieutenant Colonel, U.S. Army*)

Faculty

Professor/Commander: Justin M. Chezem (Lieutenant Colonel, U.S. Army)

The Department of Military Science provides professional training for students leading to a commission, upon graduation, in the Active Army, Army Reserve or the Army National Guard. Through the Army Reserve Officers' Training Corps Program (AROTC), scholarship benefits include full tuition, fees and book stipends. Scholarships are also available for Guaranteed Reserve Forces Duty. Military science instruction is focused on hands-on leadership development and the practical application of military skills needed to produce America's future leaders. Additionally, military science courses count as electives in many degree programs. MS 101 and MS 102 are open to students who are not enrolled in the program, but have an interest in leadership, management, military history or military training. Enrollment in the Army ROTC program is open to qualified full-time students.

Scholarship Program

The majority of Army ROTC cadets attend USC on Army scholarships. All Army scholarships are merit-based and are not dependent on individual financial need.

Scholarships are available for both Active Duty and Guaranteed Reserve Forces Duty. Scholarships are awarded on a competitive basis to qualified applicants for two-, three- or four-year periods depending on the applicant's academic level and program of study. Scholarship cadets receive benefits that cover full tuition, fees and a book stipend, and are available to all majors. See the Tuition and Fees page for additional scholarship information.

Enrolled Cadets

Contracted scholarship and non-scholarship cadets can receive a monthly stipend subsistence allowance, based on academic class. Contracted scholarship cadets receive an annual book allowance. All enrolled scholarship and non-scholarship cadets receive uniforms and military science textbooks from the department.

Four-Year Program

The four-year military science curriculum is designed to be part of the student's undergraduate degree program. During the freshman and sophomore years, students receive introductory instruction in the theory of warfare, military history, military leadership and basic military skills. Cadets participate during their junior and senior years in a professional development program with instruction in leadership, management, military justice and advanced military skills.

Three-Year Program

The three-year program is available to qualified sophomore undergraduate students. Students may compress the first two years of the ROTC program by attending two ROTC classes per semester during their sophomore year. Scholarships are available, on a competitive basis, for students with three years remaining toward the completion of their undergraduate degree. Transfer students who meet the same criteria are also eligible for scholarships. Upon acceptance, students then follow the military science program described for the four-year program.

Two-Year Program

The two-year program is available to qualified junior and senior undergraduate students and graduate students who have two years of academic work remaining. Veterans who have achieved junior academic status and meet enrollment criteria are also eligible for this program. Students may receive credit for the first two years of the ROTC program by attending the ROTC Leaders Training Course or by previous junior ROTC participation. Transfer students who meet the same criteria are also eligible for scholarships. Upon acceptance, students then follow the military science program described for junior and senior cadets in the four-year program.

Field Training

Several military training programs are available to qualified cadets. A five-week paid Leaders Training Course at Fort Knox, Kentucky, qualifies students for the two-year program. All cadets attend a 32-day paid ROTC Leadership Development and Assessment Course at Fort Lewis, Washington, after their junior year. This course provides practical application of advanced military and leadership skills required for commissioning.

Adventure Training

Qualified candidates may also receive training in Airborne school, Air Assault school (rappelling from helicopters), Cadet Troop Leadership Training (training in Army units around the world), Northern Warfare school (Arctic survival) and Mountain Warfare school.

Price School of Public Policy

Naval Science

Physical Education Building (PED) 101
(213) 740-2663

Administration

Jonathan Hitesman, B.S., J.D., LLM (*Colonel, U.S. Marine Corps*), *Commanding Officer*

Faculty

Professor: Jonathan Hitesman, B.S., J.D., LLM (Colonel, U.S. Marine Corps)

Associate Professor: Julito Antolin, B.S., M.A. (Commander, U.S. Navy)

Assistant Professors: Mark E. Burrell, B.S. (Major, U.S. Marine Corps); Raymond A. Hill IV, M.S. (Lieutenant, U.S. Navy); Phillip Foster, B.S. (Lieutenant, U.S. Navy); Lou Alvarez, B.S. (Lieutenant, U.S. Navy)

The Department of Naval Science provides professional training for undergraduate students (midshipmen) leading to a commission, upon graduation, in the United States Navy or the United States Marine Corps. Through the Naval Reserve Officers Training Corps Program (NROTC), scholarship students receive full tuition, fees, book stipend and \$250–\$400 per month subsistence allowance. The university also provides an additional automatic scholarship of \$4,000 per year for each NROTC scholarship recipient. Non-scholarship students may apply to participate as members of the midshipman battalion with limited financial assistance, earning a commission upon completion of the baccalaureate degree. Because of the rapid development of highly technical ship systems, aviation and other military equipment, the majority of Navy scholarships are awarded to science and engineering majors; however, limited Navy scholarships and all Marine Corps scholarships are currently available to students pursuing any major offered by the university, as long as they complete basic technical requirements. In addition to university requirements, midshipmen must complete 15–22 units of naval science courses, a physical fitness test and three active duty summer training sessions, each about three to six weeks long.

All naval science courses are open to students who are not in the program but have an interest in the Navy and Marine Corps related fields, such as engineering, navigation, amphibious warfare, naval operations, history and leadership/management.

Program Requirements

Scholarship Program

The majority of naval science students attend the university on Navy or Marine Corps scholarships. Scholarships are awarded primarily on a four-year basis to high school seniors selected in nationwide competition. Two- and three-year scholarship programs are also available with a similar selection process. In addition to tuition and fees, books and uniforms, students receive subsistence allowance of \$250–\$400 per month. Navy Option midshipmen later will be required upon graduation to serve a minimum of five years of active military service. Additional requirements may be required for specific job assignments. The NROTC program only commissions Naval officers into the following communities: Aviation (pilot or naval flight officer), Submarine Warfare, Surface Warfare, Special Operations (Explosive Ordnance Disposal), Special Warfare (SEALs) or Medical/Dental Corps.

College Program

Students may join NROTC as non-scholarship “College Program” students. These students receive uniforms and participate as regular midshipmen in the program but do not receive scholarship or stipend funds or attend summer training. College Program students must complete and be selected for a two- or three-year scholarship or be placed in an “Advanced Standing” status in order to continue in the program and receive an active duty commission.

Marine Corps Option

The Marine Corps option prepares midshipmen for service as second lieutenants in the United States Marine Corps. Marine Option Midshipmen must successfully complete Officer Candidate School (OCS) in order to earn their commission. This intensive 6-week course is completed during their final summer training session. Marine Corps Option students also participate, on a limited basis, in local field training exercises during the academic year. Marine Corps Option midshipmen will be required upon graduation to serve at least four years on active duty.

Requirements for Commissioning

Students must meet USC degree requirements in their chosen fields and complete the prescribed naval science courses and Professional Laboratory (PROLAB). In addition, Navy scholarship students must include in their programs MATH 125 Calculus I and MATH 126 Calculus II and PHYS 151L Fundamentals of Physics I: Mechanics and Thermodynamics and PHYS 152L Fundamentals of Physics II: Electricity and Magnetism; two courses of English, one course in American history/national security policy and one course in language or culture.

More detailed program information and the online application process is available at:

Price School of Public Policy

Graduate Degrees

Admission

Applicants for admission to the Master of Health Administration; Executive Master of Health Administration; Executive Master of Leadership; Master of Nonprofit Management and Leadership; Master of Planning; Master of Planning and Development Studies; Master of Public Administration; Master of Public Policy; Master of Public Policy and Management; Master of Real Estate Development; Doctor of Policy, Planning, and Development; Doctor of Philosophy in Public Policy and Management; and Doctor of Philosophy in Urban Planning and Development must have a bachelor's degree or its equivalent from an accredited educational institution. In recognition of the increasing diversity of capabilities required as the theories and practices of policy, planning, and development evolve, students from a variety of undergraduate and graduate backgrounds are encouraged to apply.

Applicants for admission will be expected to have completed a broad range of undergraduate courses in addition to their academic major or professional concentration. Generally, this will be reflected in completion of courses from the following fields: English; economics (basic theory); political science, history or sociology; physical or natural science; art or philosophy. In addition, mathematics (algebra, calculus, probability theory) and a course in statistics are strongly recommended.

Application for Admission

Admission to graduate programs in the Price School of Public Policy is highly selective and competitive. Preference is given to those with a record of high educational achievement and personal qualities favoring success in the fields of planning or development. Applicants must have achieved superior grades during undergraduate and any graduate education. A grade point average of at least 3.0 (A = 4.0) is normally expected as well as satisfactory scores on the Graduate Record Examinations (GRE). The GRE and GMAT are neither accepted nor required for the DPPD or executive MHA programs. Students applying for admission to the Master of Nonprofit Management and Leadership, Master of Planning, Master of Planning and Development Studies or the Master of Real Estate Development program may submit results from the Graduate Management Administration Test (GMAT). MRED applicants may also submit results from the Law School Admission Test (LSAT). In exceptional cases, an applicant who has not met these scholarship requirements may be admitted with conditions of admission.

For specific information on admission requirements and application procedures, contact the Price School of Public Policy, Office of Recruitment and Admissions, at (213) 740-0550. Certificate in Transportation Systems applicants should apply to the USC Viterbi School of Engineering. For additional information, contact the school at (213) 740-0587.

Transfer Credit

The Degree Progress Department determines whether work done elsewhere is available for consideration for credit toward the USC degree. That office requires official transcripts of all course work done before entering USC. A Graduate Transfer Credit Statement of these official transcripts, done after a student has been admitted to regular status at USC, will indicate which units are available for transfer. These courses do not apply toward the degree unless, and until, the student's major department approves and submits transfer credit to the Degree Progress Department in the Office of Academic Records and Registrar.

Application of any available transfer credits toward a graduate degree will be determined by the director of the particular degree program, based on the semester units available for transfer as shown on the Transfer Credit Statement.

These general guidelines are followed by the admissions evaluator and by faculty members: (1) the work must be completed at an accredited graduate school; (2) the grade must be B or better; (3) the work must be a fair and reasonable equivalent to current USC course work at the graduate level which fits into the logical program for the degree; (4) the units are not more than seven years old at the time of admission to their master's program (or 10 years old for a doctoral program); (5) the units must reflect current knowledge in the field; and (6) the work must be completed prior to admission to the USC program.

USC does not give transfer credit for life experience, credit by examination, noncredit extension courses or thesis course supervision.

Please consult with your degree director before enrolling in courses outside of USC. In many of the Price School's master's degree programs, only courses taken outside of USC prior to admission may be applied to your degree.

Waiver of Course Content

The school recognizes that some applicants may have covered the material contained in core courses or courses required for a particular specialization. Under these circumstances, one particular course requirement may be waived, allowing the student to complete a more advanced course in the same area. Students who have a background in a particular area of study may be allowed to substitute other courses. In these situations students do not receive unit credit but are permitted to take course work, which does not repeat earlier academic experiences.

Waiver of content is usually given only in the case of previous academic study of the subject, not in the case of experiential background in the area.

Students who believe they are eligible for content waiver decisions must petition the faculty of the school, providing evidence of the previous work through transcripts, syllabi and other pertinent material. Contact the school's Student Affairs Office for information.

Price School of Public Policy

Graduate Degrees

Master of Health Administration

The issues surrounding the delivery and financing of health services have an enormous impact on individuals and the communities in which we live. The health care industry now accounts for more than 15 percent of the U.S. economy. Fast-moving developments in technology, economics, ethics, finance, policy, management and globalization are driving changes in the health sector. Effective health leadership requires an understanding of governance systems and the complex interplay between the public, private and nonprofit sectors as well as the dual imperatives of both the clinical and business facets of health care delivery. As the health care system changes, career opportunities abound. The field has a tremendous need for leaders, managers and analysts — in hospitals, health plans, physician practices, health-related enterprises, community health organizations, social advocacy groups, and regulatory and legislative agencies.

The Price School of Public Policy's multidisciplinary nature, with degree programs in public policy, public administration, urban planning, and international policy, adds breadth that distinguishes USC's MHA degree, providing students with an understanding of the larger social context in which the health sector is embedded and how it intersects and interacts with other social policy issues.

The Price School programs in health management and policy offer two degree options — the Master of Health Administration and the Executive Master of Health Administration. These degrees position the student to acquire the knowledge, skills and applied experience to shape health policy and lead health organizations. Requirements for the Executive MHA differ from those of the traditional MHA and are found on the program page.

The Master of Health Administration builds a solid foundation emphasizing managerial, analytical and public policy skills for those entering the health field, while the Executive Master of Health Administration deepens professional skills and permits those already working in the health field to advance to higher levels of leadership.

The MHA curriculum incorporates five major areas of competence: management/operations/leadership; health policy analysis; health finance; health information technology; and, health care quality. Each student will be exposed to these core areas and will specialize in two of them. The program prepares students for management positions in hospitals; managed care systems; physician groups; ambulatory care systems, government agencies concerned with health care policy, planning, quality assurance and regulation; and private firms involved in health care consulting, finance, performance assessment and evaluation.

Requirements for Admission

General

Applicants must have a bachelor's degree from an accredited college or university. Applicants may take courses on limited standing pending formal admission to the master's degree program.

Applicants with bachelor's degrees must have a minimum grade point average of 3.0 in their undergraduate course work and a score of at least 500 on the verbal and at least 500 on the quantitative sections of the GRE. Deviations from these minimums will be allowed when justified by exceptional work experience, letters of recommendation or improvement in academic performance during the third and fourth years of undergraduate study.

Prerequisites

Statistics

A basic competence in descriptive and inferential statistics is also required for the MHA program. The statistics prerequisite must be satisfied within the first 12 units or before enrolling in PPD 557 Modeling and Operations Research. This prerequisite may be met in one of two ways: (1) entering students must have passed an undergraduate inferential statistics class, with a grade of "B" or better, at an approved university within three years of matriculation, or (2) completing PPD 502x Statistical Foundations for Public Management and Policy with a grade of "B" or better (this course credit may not count toward the MHA degree).

Limited Status Students (Preadmission)

Students taking courses who have not been admitted to the school are designated limited status students. These students may be waiting for part of their application package materials to arrive; or they may be investigating whether an MHA may be right for them.

To be considered for limited status reenrollment, interested students need to complete the Price School of Public Policy Limited Student Application for Enrollment form and submit official or unofficial copies of their transcripts from their bachelor's degree granting institution. Students with a 3.0 grade point average (A = 4.0) may enroll in up to 8 units of graduate courses in the Price School of Public Policy.

Price School of Public Policy Limited Student Application for Enrollment forms may be obtained from the Admissions Office, USC Price School of Public Policy, University of Southern California, RGL 111, Los Angeles, CA 90089-0626, telephone (213) 740-6842. Limited students may only enroll during the in-person registration period (the week before classes begin).

Limited status students may apply only 8 units of appropriate graduate work toward the MHA after admission. Units beyond these first 8 must be petitioned for through the school. Students on limited status are encouraged to complete the application and admission process before completing those first 8 units.

Certificate Program

Information regarding the Certificate Program in Health Management and Policy Programs can be found on the Graduate Certificates page.

Curriculum

Curriculum for the MHA includes 48 units (40 required units and 8 elective units). In addition, a supervised field placement (residency) in a health service organization is required. The MHA degree is designed to be completed in two years of full-time study, but can be extended for those who work while going to school. Evening classes and classes that meet in an intensive, workshop format of two to four sequential days of training are designed to accommodate working professionals.

REQUIRED CORE (40 UNITS)		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 509	Problems and Issues in the Health Field	4
PPD 510a	Financial Management of Health Services	4
PPD 511	Health Information Systems	2
PPD 513	Legal Issues in Health Care Delivery	2
PPD 514	Economic Concepts Applied to Health	4
PPD 515	Strategic Management of Health Organizations	4
PPD 516	Financial Accounting for Health Care Organizations	4
PPD 517	Concepts and Practices in Managing Health Care Organizations	2
PPD 518	Quality of Care Concepts	2
PPD 545	Human Behavior in Public Organizations	4
PPD 558	Multivariate Statistical Analysis	4

Electives

In addition to the 40 required units, students are required to take 8 units of electives. Elective courses will be taken in two of the five specialization areas: management/operations/leadership; health policy analysis; health finance; health information technology; and health care quality. The two specializations will be selected by the student with the advice and written consent of the MHA program director and faculty adviser.

Residency

The MHA student is required to complete a 1,000 hour residency at a health care organization, generally during the second year of study. This residency may be reduced, but must include at least 500 hours, depending on the health care experience of the student. The residency is designed to provide the student with practical administrative experience that complements program course work.

Price School of Public Policy

Graduate Degrees

Executive Master of Health Administration

The Executive MHA Program offers clinical and management professionals an opportunity to advance their careers in health care and to more effectively improve health services within their communities. Mid- to senior-level professionals who have the ambition and potential to serve as industry leaders in the highly dynamic and competitive health care environment are encouraged to consider the Executive MHA degree. The Executive MHA is geared to those who have demonstrated capabilities, yet who will benefit from expanded skills and competencies that will enable them to lead.

Participants sharpen their business acumen by gaining exposure to and in-depth knowledge of the latest theories and the best in contemporary health management practice. A practical, problem-solving approach ensures that skills can immediately be applied on the job.

Requirements for Admission

Applicants for the Executive Master of Health Administration apply directly to the program. A minimum of five years of experience with progressively greater levels of responsibility in health care or a related field is required for entry into the Executive MHA program. Applicants must have earned a bachelor's degree from an accredited college or university. A minimum grade point average of 3.0 in undergraduate course work is required. Allowances may be made when justified by exceptional work experience and letters of recommendation.

Prerequisites

Accounting

A basic competence in accounting is required for the Executive MHA program. The accounting prerequisite must be satisfied before enrolling in HMGT 565 Managing the Organization's Financial Health. This prerequisite may be met in one of three ways: (1) completing the non-credit Executive MHA accounting workshop with a passing score; (2) demonstrating prior work experience or (3) completing prior course work at an accredited academic institution in accounting and finance.

Curriculum

The Executive MHA offers a hybrid online/in-residence executive education program that will prepare the graduate to meet career objectives. The program provides students with the flexibility to meet program requirements while maintaining full-time administrative positions, but also emphasizes the importance of an integrated approach to executive education. In addition to the synchronous and asynchronous learning modules included in each course, students will participate in five-day, in-residence sessions at the University Park Campus twice during the program. The first in-residence session will occur before the midpoint of the program, and the second session will be a capstone experience in the last semester of the program. The Executive MHA degree program does not require a supervised field placement (residency) in a health care organization.

The curriculum of the EMHA is organized around five themes: thriving in transformational times through innovative leadership; delivering cost-effective care in an era of value-based purchasing; providing efficient management and administration; developing and implementing strategies to enhance patient safety and quality of care; and demonstrating organizational and clinical effectiveness through health information technology. These integrated themes and the associated content provide graduates with a comprehensive approach that expands their understanding of the key principles and applications necessary to function in a senior administrative leadership role.

REQUIRED COURSES (36 UNITS)

		UNITS
HMGT 512	Information Technology and Patient Engagement	2
HMGT 520	Leading People and Health Care Organizations	4
HMGT 540	Health Economics, Financing and Reimbursement	2
HMGT 565	Managing the Organization's Financial Health	4
HMGT 570	Strategic Management	4
HMGT 575	Managing and Improving Health	4
HMGT 600	Managing Risk	2
HMGT 601	Operations Management for Accountability	4
HMGT 602	Operational Efficiency Processes in Health Care Organizations	2
HMGT 603	Developing and Monitoring of Quality and Patient Safety Outcomes	2
PPD 511	Health Information Systems	2
PPD 518	Quality of Care Concepts	2
PPD 605	Frontline Issues in Health Services Administration and Policy	2

Participants in the executive program gain practical skills. Emphasis is given to executive decision-making; development of sound planning, analytical and leadership capabilities; and strong interpersonal communication. More specifically, Executive MHA graduates will achieve advanced competency in disciplines which include economics and finance, health care regulation, business development, operations, strategic analysis and

management, organizational design, quality and outcomes assessment, and information management. Our graduates will model effective leadership and management in a rapidly evolving health care environment.

The core faculty is drawn from the USC Price School of Public Policy and includes senior, experienced faculty, along with nationally renowned academic specialists and health care experts. The opportunity to interact with health care's leading thinkers, policymakers and practitioners is an essential component of the Executive MHA program.

The Executive MHA office is located in Ralph and Goldy Lewis Hall, Room 307, Price School of Public Policy, (213) 740-2984, email [✉ emha@usc.edu](mailto:emha@usc.edu).

Price School of Public Policy

Graduate Degrees

Master of Science in Health Systems Management Engineering

This program is jointly sponsored by the Epstein Industrial and Systems Engineering Department and the Price School of Public Policy, and administered by the Epstein Industrial and Systems Engineering Department. This degree is designed for students with sufficiently quantitative bachelor's degrees in engineering, the sciences or applied social science who are interested in operations management and health care applications, and whose career objectives lead to increasing technical management responsibilities in large health care organizations, particularly hospitals. Students with less quantitative social science or other non-technical backgrounds interested in health administration objectives may also want to consider the Master of Health Administration program in the Price School of Public Policy. For information, see Industrial and Systems Engineering.

Price School of Public Policy

Graduate Degrees

Executive Master of Leadership

The Executive Master of Leadership Program offers professionals from a variety of fields including public administration, public policy, planning, law enforcement, transportation and other public, nonprofit and business organizations, with at least five years of professional experience, the opportunity to build leadership skills at five levels: individual, team, organizational, community and institutional. The program design offers participants insight into the mechanisms that facilitate effective personal and organizational networks, as well as collaborative problem-solving strategies and practices.

The program follows a cohort model for the four required core courses. The degree curriculum has three distinguishing features: a design to connect ethics with leading through core values; an interdisciplinary and multidisciplinary problem-solving approach; and transformational leadership that connects the public, private and nonprofit sectors.

Requirements for Admission

Applicants for the Executive Master of Leadership apply directly to the program. A minimum of five years of experience with progressively greater levels of responsibility is required for entry into the program.

Candidates for admission must have earned a bachelor's degree from an accredited college or university with a minimum 3.0 grade point average. Exceptions to the minimum GPA requirement may be made when justified by

exceptional work experience and letters of recommendation.

Applicants must submit a standard USC graduate application and fee along with official transcripts from all undergraduate and graduate institutions attended. Letters of recommendation, a current resume, an essay and an interview will also be required.

Degree Requirements

Students are required to complete 28 units of graduate work — 16 units of required core courses and 12 units of electives.

REQUIRED CORE COURSES (16 UNITS)		UNITS
PPD 640	Leadership Foundations: Competencies and Core Values	4
PPD 641	Leading Individuals, Groups and Teams	4
PPD 642	Strategic Leadership of Organizations	4
PPD 643	Leading Transformations Across Sectors: Integrative Seminar	4

Electives

In addition to these 16 required units, students are required to take 12 units of electives.

Elective courses will be selected in consultation with the faculty adviser based on the student's individual learning/development plan. Students will choose these electives in order to concentrate in a particular area of study. The following are examples of concentrations that are available: public management, nonprofit policy and management, urban planning, transportation, public policy and political management. The Price School of Public Policy offers a wide range of electives to students each semester.

Price School of Public Policy

Graduate Degrees

Master of Nonprofit Management and Leadership

The Master of Nonprofit Management and Leadership (MNL) program is designed to prepare students to distinguish themselves as leaders in the nonprofit sector whether managing nonprofits, advocating for social change or developing and implementing innovation solutions to social problems.

Degree Requirements

Students are required to complete 40 units of graduate work, with 32 units of core organized under three areas: theory and context, leadership and management, and analytical skills and 8 elective units based on their interests.

REQUIRED CORE COURSES		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 542	Policy and Program Evaluation	4
PPD 675	Nonprofit Management and Leadership	4
PPD 689	The Nonprofit Sector and Philanthropy	4
PPDE 645	Financial Management of Nonprofit Organizations	4
PPDE 680	Board Governance and Leadership	2
PPDE 681	Fund Development for Nonprofit Organizations	4

Electives

Students complete 8 units of electives based on their interest and in consultation with their adviser.

Price School of Public Policy

Graduate Degrees

Master of Planning

The planning of cities is as old as urban civilization. The contemporary planning profession has expanded to include a broad range of applications that draws upon emphases of foresight, common good and interconnections of elements in human settlements. Planners are engaged in evaluating and guiding community and urban development at geographic scales, ranging from the local American neighborhood to the global village utilizing the public, private and nonprofit sectors.

Planners play an increasingly important role in managing the pressing problems and competing demands of change and growth in shaping a better future. The Master of Planning (MPl) curriculum reflects this forward-looking and constantly evolving role.

The MPl curriculum provides a core of knowledge underlying the key forms and applications of planning. This core sets the foundation for a wide choice of specific careers in the field and extends the relevance and value of graduate education over an extended period of time. A goal of the MPl curriculum is to prepare planners to practice anywhere in the world.

The Planning Accreditation Board of the American Planning Association and the Association of Collegiate Schools of Planning accredit the MPl program.

All persons pursuing the MPl will complete core courses which present basic theories, techniques and methods.

Concentrations are available in five broad areas: economic development; preservation and design of the built environment; social and community planning; sustainable land use planning; and transportation and infrastructure planning. After students register, the faculty will suggest specializations that allow students to focus their concentrations even further or span planning more broadly.

A concentration in any of these areas qualifies graduates for a wide range of private, public and nonprofit sector careers with government agencies, consulting firms, corporations, utilities, international technical assistance programs, nonprofit and special interest organizations and joint public-private ventures.

Curriculum Requirements

The program of study for this professional graduate degree requires completion of 48 units, including 16 units of core curriculum, 8 units of planning studios, 4 units of methodology related to the student's concentration, a required concentration gateway course and 16 units of electives, including two additional courses related to a student's concentration. A comprehensive examination and an approved non-credit internship are also required. The degree may be pursued on either a full-time or part-time basis.

Statistics Prerequisite

A basic competence in descriptive and inferential statistics is required. This prerequisite may be fulfilled by successfully completing PPD 525 or by having completed a previous course (within five years) with a grade of B or higher (A = 4.0).

PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2
		16

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

Planning Studios

Planning studios are an integral part of the curriculum of the Price School of Public Policy, providing the essential educational link between academic education and preparation for professional practice. The planning studios require that students learn to work together as a team by applying their respective capabilities and knowledge to a real-world common problem and to produce a professional project. Students must complete 8 units of domestic or international planning studios under PPD 531L (4) to satisfy this requirement. A maximum of 12 units may be taken.

Local agencies, communities and firms often sponsor planning studios to obtain research and analysis. Community groups seek assistance as a means of informing themselves more thoroughly on community problems and issues or for obtaining planning analysis otherwise unavailable to them. The products of planning studios are usually in the form of policy recommendations, a suggested plan or alternative plans, databases, background information, base maps, or any one of many specific contributions.

MPI planning studios can either be situated in the United States or around the world. Past courses have examined the tragedy around Katrina in New Orleans, developed economic development plans for local Southern California cities, and studied changing public spaces in Germany.

Price International Laboratories (PPD 613ab) can be taken as an elective in the MPI program. The program strongly encourages students to enroll in one laboratory during their course of study. In recent years, Price lab courses have been offered in China, Brazil and England.

Concentrations (16 units)

Students must declare their concentration during the fall semester prior to taking the comprehensive examination in the spring semester. Students are required to complete the gateway course and methodology course related to their concentration as part of their preparation for their comprehensive examination. The student's concentration must contain a 4-unit methodology course, a 4-unit gateway course and 8 other units. At least 12 of these units must be selected from Price School curriculum. Courses outside the Price School should be selected by the student with the approval of an academic adviser and must be directly concerned with the subject matter of the concentration.

After students register, the faculty will provide them with a series of specializations they may take in association with the concentrations. These specializations are not required; they are provided as guidance for students interested in these subject areas. The specializations vary. Some suggest ways that students can more deeply study a single area within planning, while others provide a broad overview of planning and policy issues. The specializations draw upon courses within the MPI program, the Price School sister programs and courses from other USC units.

Economic Development is the basis for prosperous community development. Job creation and the development of service or employment sites are the core of economic development. At a higher geographical scale, development of regional economies provides a focus for planning in an international context. Suggested courses for students selecting this concentration include PPD 622, PPD 624, PPD 625, PPD 626, RED 509 and RED 542.

Preservation and Design of the Built Environment addresses the architecture of the city, viewed not as a series of individual buildings, but as a set of visual and functional connections between buildings on a street front or in a district. In contemporary settings, planning and construction do not begin with a blank slate. Rather, new structures are inserted into an existing built environment, which must be respected for its historical heritage and its contributions to the new. Students in this concentration are encouraged to draw from courses related to landscape architecture and historic preservation in the School of Architecture. Suggested courses for students selecting this concentration include PPD 530, PPD 615, PPD 618, PPD 619, PPD 623, PPD 631 and PPD 692.

Social and Community Planning gives specific attention to the changing needs of neighborhood residents and to the ways in which different planning policies, programs and activities contribute to resident well-being. Community planning is a process of organizational change that links residents and services to produce communities that are safe, healthy and socially connected. Achieving these goals demands that residents actively advocate for their communities. Suggested courses for students selecting this concentration include PPD 606, PPD 617, PPD 618, PPD 619, PPD 620, PPD 621, PPD 686 and PPD 690.

Sustainable Land Use Planning centers on community land use planning set in the context of regional growth or decline. The planning process involves forecasting transportation means, population growth and housing needs, together with providing comprehensive planning to accommodate that growth in a way that preserves and enhances local quality of life. Envisioning better futures, livability, environmental protection accessibility, mobility and affordable housing production are all part of smart growth strategies for sustainable regional growth. Suggested courses for students selecting this concentration include PLUS 611, PPD 615, PPD 618, PPD 620, PPD 621, PPD 627, PPD 631, PPD 692 and PPD 694.

Transportation and Infrastructure Planning is the combination of vital functions that determine the efficiency and productivity of a city. Issues of access and mobility of urban residents must be addressed. Circulation of workers from home to workplace, and of residents to shopping and services, are fundamental determinants of land use and urban form. Students in this concentration acquire mastery of the basics of transportation analysis, with emphasis on analysis of different policies that serve transportation and infrastructure needs within urban areas. Suggested courses for students selecting this concentration include PPD 557, PPD 588, PPD 589, PPD 621, PPD 630, PPD 631, PPD 635 and PPD 692.

Concentration Gateway Courses

Students are required to complete their gateway course prior to participating in the comprehensive examination. The following courses are required for their concentration:

Economic Development: PPD 639 Introduction to Community and Economic Development

Preservation and Design of the Built Environment: PPD 644 Shaping the Built Environment

Social and Community Planning: PPD 628 Urban Planning and Social Policy

Sustainable Land Use Planning: PPD 619 Smart Growth and Urban Sprawl: Policy Debates and Planning Solutions

Transportation and Infrastructure Planning: PPD 634 Institutional and Policy Issues in Transportation

Concentration Methodology Courses

Students are required to complete one methodology course related to their concentration. Students are encouraged to complete a second methodology course among their electives. The following courses are required for their concentration:

Economic Development: PPD 625 Planning and Economic Development Finance

Preservation and Design of the Built Environment: PPD 627 Design Skills for Urban Planners

Social and Community Planning: PPD 616 Participatory Methods in Planning and Policy

Sustainable Land Use Planning: PPDE 634 Methodology, Methods and Tools for Urban Sustainability

Comprehensive Examination

Successful completion of a comprehensive examination is required of each student seeking the Master of Planning degree (except for students pursuing the dual degree with either economics or gerontology). Students pursuing the dual degree with real estate development can choose the MPI or MRED examination. The comprehensive examination integrates accumulated lessons of the core courses and planning studios. Students are also expected to utilize material covered in their concentration and electives.

The comprehensive examination is given only in the spring semester of each year. Students usually take the examination in the last semester of their second year. Students must declare their concentration during the fall semester prior to completing the comprehensive examination in the spring semester. They must have completed the gateway and methodology courses in the declared concentration prior to taking the comprehensive examination.

The MPI Program degree committee administers the comprehensive examination. Examinations are graded on a pass/fail basis. Students who fail the examination may take it a second time the next year. The examination may only be repeated once.

Planning Electives

Students are encouraged to select electives related to their course of study. A Price international laboratory course is especially encouraged.

Internship

Students working toward the Master of Planning degree must complete an internship of at least 10 weeks duration and 400 hours in an organization engaged in planning or a closely related activity. Students must submit a report to the director of career services describing and evaluating the internship experience. Arrangements must also be made for an evaluative report of the internship by the student's supervisor submitted directly to the academic adviser. The internship is not for unit credit.

Students often fulfill their internship while working part-time in a planning-related job during their course of study in the program or in the summer between the two academic years. If a student has had equivalent career experience prior to admission to the program, the MPI director may waive the internship requirement on the recommendation of the student's academic adviser.

The Price Office of Career Services actively works with school alumni and area planning organizations to assist students in obtaining appropriate internships. Numerous internship opportunities are available in the greater Los Angeles area. The student is responsible for securing the internship and fulfilling the requirement.

Directed Research

With the advice of the faculty, a student may elect to enroll in directed research as an elective. Working directly with a faculty member, the student pursues an interest or problem appropriate to the student's program of study.

The faculty member supervising the student must approve the final product of directed research. The final product may be a written report, article, graphic formulation, physical model, mathematical-statistical analysis, computer output or film — depending on the most appropriate expression of the research undertaken.

General Requirements

Residence and Course Load

The Master of Planning normally requires two academic years of full-time study. Courses are also scheduled to allow completion on a part-time basis.

At least 36 units of graduate-level study must be done in residence at USC. The residency requirement may not be interrupted without prior permission from the Price School of Public Policy. Students accepted into the program with academic deficiencies will require a correspondingly longer time to complete their course work. Students seeking the degree on a part-time basis must take at least one course each semester.

Students must be enrolled at USC for the fall and spring semesters each year until all degree requirements have been met. Students who find it necessary to be excused from a semester of registration must request a leave of absence from the Academic Programs Office by the last day to drop/add courses of the semester in question; such leaves may be granted for up to one year. For additional information refer to USC policies governing continuous enrollment, readmission, and leaves of absence in the Academic Policies section of this catalogue.

Time Limits

All requirements for the Master of Planning must be completed within five calendar years from the beginning of the semester in which the student was admitted to the program. University regulations prohibit the acceptance of credits for courses taken toward the Master of Planning degree more than seven years after the date they were successfully completed.

Grade Point Average Requirement

While enrolled in the program a student must maintain a grade point average of at least a 3.0 for all courses taken toward the degree.

Probation and Disqualification

Any student with a cumulative grade point average below 3.0 for all courses taken in the program will be placed on academic probation. A student whose semester grade point average is below 3.0, but whose cumulative grade point average is 3.0 or higher, will be placed on academic warning.

A student may be disqualified to continue toward a graduate degree if the student has been on academic probation for two consecutive semesters. Whether or not on academic probation or warning, a student may be disqualified at any time from continuing in the program if the dean of the school, after consultation with the faculty, determines that the student is deficient in academic achievement or in another qualification required for the attainment of the Master of Planning degree.

Course Exemptions and Transfer of Credits

Graduate work by transfer may be accepted from approved graduate schools as determined by the USC Articulation Office upon recommendation of the dean of the school. Not more than 12 units of graduate work, with grades of B or better may be transferred for credit to the Master of Planning degree.

The following courses, or their equivalents, cannot normally be transferred for unit credit from other institutions: PPD 500, PPD 501a, PPD 524, PPD 525, PPD 526, PPD 527, PPD 529, PPD 531L, PPD 533, PPD 590, PPD 594ab. Undergraduate work will not be credited for advanced or graduate standing. Students may petition to receive subject credit for these courses; but unit requirements must be met through the completion of additional electives.

Some applicants for admission to the school have been engaged in work in planning, development or closely related activities. Although this experience may have been beneficial to the students involved and may satisfy the internship requirement, it may not be considered equivalent to academic education.

Price School of Public Policy

Graduate Degrees

Master of Planning and Development Studies

The Master of Planning and Development Studies degree is designed for mid-career professionals in planning, development or related disciplines who desire to update and/or redirect their professional skills and careers. The program is very flexible, allowing students to pursue areas of expertise that they find valuable in their present or future careers. Entering students must have a minimum of five years of planning, development or related professional work experience.

Curriculum Requirements

The Master of Planning and Development Studies program requires completion of 28 units. Basic degree requirements consist of two core courses; 16 units in a concentration area approved by an adviser; and an integrative seminar course during which the student completes a written and oral comprehensive examination.

REQUIRED COURSES		UNITS
PPD 611	Policy Issues in Planning and Development	4
PPD 612	Research and Analytical Techniques	4
PPD 638	Integrative Seminar (normally in the last semester in conjunction with the comprehensive examination)	4

Concentration Area(s)

Students elect a concentration area from one of three already defined or, with prior approval by an adviser, design a concentration from Price School of Public Policy courses and USC graduate courses. A minimum of eight units must be Price School of Public Policy courses. The three defined concentration areas are:

Community Economic Development Select 16 units from the following courses: PPD 618 (4), PPD 623 (4), PPD 624 (4), PPD 625 (4), PPD 626 (4), PPD 631 (2); RED 509 (4), RED 542 (3), RED 546 (3)

Environmental Policy and Planning Select 16 units from the following courses: PLUS 600 (4), PLUS 633 (4), PPD 531L (4), PPD 617 (4), PPD 619 (4), PPD 620 (4), PPD 621 (4), PPD 622 (4), PPD 631 (2), PPD 634 (4), PPD 712 (4)

International Planning and Development Select 16 units from the following courses: PLUS 631 (4), PLUS 632 (4), PLUS 633 (4), PLUS 635 (4), PLUS 640 (4); PPD 626 (4); RED 583 (2), RED 585 (4)

Integrative Seminar and Comprehensive Examination

Successful completion of a comprehensive examination is required of all students seeking the Master of Planning and Development Studies degree. The integrative seminar course (PPD 638) and comprehensive exam should be taken during the semester of intended graduation. During the seminar class, students identify a practice-oriented problem covering the core courses and concentration area, which ideally is sponsored by a planning and/or development office or firm. The student will: (1) prepare a professional-quality document; (2) present the solution to a faculty committee with invited sponsor guests; and (3) have an oral defense. Students who fail the examination may take it again within one year, but it may only be repeated once.

General Requirements

Residence and Course Load

The Master of Planning and Development Studies may be completed in one academic year of 12 units in the fall and spring semesters and the four-unit integrative seminar/comprehensive examination the following summer semester.

At least 18 units of graduate study must be done in residence at the University Park Campus, the USC State Capital Center or at an approved off-campus study center.

Time Limit

Students in the program must complete all requirements for the Master of Planning and Development Studies within five calendar years from the beginning of the semester in which the student was admitted to the program.

Grade Point Average Requirement

While enrolled in the program, a student must maintain a grade point average of at least 3.0 (A = 4.0) for all courses taken toward the degree.

Probation and Disqualification

Any student with a cumulative grade point average below 3.0 for all courses taken in the program will be placed on academic probation. A student whose semester grade point average is below 3.0, but whose cumulative grade

point average is 3.0 or higher, will be placed on warning.

A student may be disqualified to continue toward a graduate degree if the student has been on academic probation for two consecutive semesters. Whether or not on academic probation or warning, a student may be disqualified at any time from continuing in the program if the dean of the school, after consultation with the faculty, determines the student is deficient in any degree requirement.

Course Exemption and Transfer of Credits

Credit for graduate work may be transferred from approved graduate schools as determined by the USC Degree Progress Department in the Office of Academic Records and Register on recommendation of the dean of the school. Not more than four units of graduate work, with grades of B or better, can be transferred for credit toward the Master of Planning and Development Studies degree.

The following courses, or their equivalents, may not normally be transferred for unit credit from other institutions: PPD 611, PPD 612 and PPD 638. Undergraduate work may not be transferred into the degree program for unit credit.

Some applicants for admission to the school will have been engaged in work in planning, development or closely related activities. Although this experience should be beneficial to the students involved, it may not be considered equivalent to academic education.

Price School of Public Policy

Graduate Degrees

Master of Public Administration

Admission

The Master of Public Administration programs are under the jurisdiction of the Price School of Public Policy. All admissions decisions are made by the school, following guidelines set by the university. See the Admission section of this catalogue.

All questions about the programs and all materials required for admission should be submitted to: MPA Programs, Admissions Office, RGL 111, University Park, University of Southern California, Los Angeles, CA 90089-0626.

Admission to each of these programs is determined by the faculty and admissions committees connected with those areas. Application packages should be sent directly to the program office.

Applications

The admission decision is made using criteria which include verification that the applicant has completed a bachelor's degree from an accredited college, has maintained a B average in undergraduate course work and has earned an acceptable score on the verbal and quantitative portions of the Graduate Record Examinations (GRE) or the Graduate Management Admissions Test (GMAT). Other elements of the applicant's educational and experiential background are also evaluated. International students whose native language is not English must also submit a Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) score.

Each candidate should submit the following to the school: (1) official transcripts of all previous college and university work, showing an awarded degree where appropriate; (2) copies of GRE or GMAT scores; (3) an essay answering questions on the admission questionnaire provided by the school; (4) an up-to-date resume which includes academic and professional accomplishments; (5) three or more letters of evaluation from previous instructors and from professional associates who can attest to the applicant's potential; (6) completed USC

Graduate Admission Application, along with the nonrefundable processing fee; and (7) completed Price School of Public Policy Supplemental Graduate Application.

International applicants may be asked to supply additional information. See the Graduate Admission section of this catalogue.

Deadlines

Applications for admission are evaluated monthly. Those students who are also applying for financial aid, or who must meet other deadlines for admission, should submit application materials early enough to allow the admissions decision to be made in advance of those other deadlines.

The admissions process generally takes about four to six weeks after all necessary materials have been submitted.

Pre-Service/In-Service Designation

Most MPA students are classified as pre-service or in-service students at the time of admission. Pre-service students are those who enter the program with less than two years of professional work experience. In addition to course work, pre-service students complete an internship. Students pursuing the Intergovernmental Management specialization or one of the dual degree programs are not classified as pre-service or in-service. Appeals for reclassification of this designation must be submitted during the first semester of enrollment.

Prerequisites

Social Science

Any undergraduate major is acceptable as preprofessional background, provided the applicant has had at least 12 semester units (16 quarter units) of undergraduate course work in cultural anthropology, economics, ethnic studies, social and human geography, political science, sociology or related social science area courses; no more than two of these courses may be in the same field.

Deficiencies in the social science prerequisite may be met while in residence by taking appropriate courses in other departments, but such course work may not be counted toward the course requirements for the master's degree.

Statistics

A basic competence in descriptive and inferential statistics is also required for the MPA programs. This prerequisite may be met in one of two ways:

1. Entering students must have passed an undergraduate inferential statistics class, with a grade of "B" or better, at an approved university within three years of matriculation.
2. If students do not satisfy this prerequisite, they will be required to take PPD 502x Statistical Foundation for Public Management and Policy, a two-unit graduate level inferential statistics course. They must complete the course with a grade of "B" or better. The units associated with this class may not be used toward the MPA degree.

All prerequisites must be fulfilled within the first 12 units of graduate course work. The statistics prerequisite must also be met before enrolling in PPD 542, PPD 557, PPD 638 or PPD 666.

International Students

Students applying for graduate programs should send applications and appropriate documents to the MPA Programs Admissions Office, which processes all such applications.

Admission

A student is accepted for admission only for the semester indicated on the letter of admission. If the student desires to enter at another time, or if the student cannot arrive on campus in time for the semester in which he or she was admitted, the student must contact the MPA Programs Admissions Office in writing. That office will contact the Office of International Admissions.

Students who do not enroll for the semester indicated on the letter of admission cannot be guaranteed admission to a later session. They will need to work with the MPA Programs Admissions Office to determine procedures to follow.

Registration Requirements

International students on student visas must be registered as full-time students as arranged by the Office of International Services. Doctoral students must carry a load of at least 6 units to be considered full-time students. A full-time graduate load is eight units. Such students are not eligible to be considered students without formal registration and may be in violation of immigration laws when not properly registered.

International students who have questions about registration requirements should contact the Office of Recruitment and Student Affairs.

Admission Status

MPA applicants may be permitted to take courses before the admission process is completed or they may be admitted before certain conditions have been met; each student must, however, attain regular status (standing) admission to the school prior to or upon completion of 8 graduate units.

Limited Status Students (Preadmission)

Students taking courses who have not been admitted to the school are designated limited status students. These students may be taking courses to meet prerequisites; they may be waiting for part of their application package materials to arrive; or they may be investigating whether an MPA is the best choice for them.

To be considered for limited status enrollment, interested students need to complete the Price School of Public Policy Limited Student Application for Enrollment form and submit official or unofficial copies of their transcripts from their bachelor's degree granting institution. Students with a 3.0 grade point average (A = 4.0) may enroll in up to 8 units of graduate courses in the Price School of Public Policy.

Price School of Public Policy Limited Student Application for Enrollment forms may be obtained from the Admissions Office, Price School of Public Policy, University of Southern California, RGL 111, Los Angeles, CA 90089-0626; (213) 740-6842. Limited students may only enroll during the in-person registration period (the week before classes begin).

Limited status students may apply only 8 units of appropriate graduate work toward the MPA after admission. Units beyond these first 8 must be petitioned for through the school. Students on limited status are encouraged to complete the application and admission processes before completing those first 8 units.

Ph.D. Candidates

Ph.D. students who pass the qualifying examinations and complete the MPA course requirements or their equivalent during their course work at USC may, with the recommendation of the coordinator of the MPA program, apply for and receive the MPA degree.

MPA Curriculum

The MPA course requirements are designed to address current and future professional competencies for accomplishment; to establish a sequence of basic required courses; and to maximize student choice and depth in specialized studies. The curriculum requires 40 units for completion (41 for pre-service students). Pre-service students, that is, those who have less than 25 months' employment experience in a professional level position, are also required to take an internship that includes a one-unit seminar.

CORE COURSES

		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 540	Public Administration and Society	4
PPD 546	Capstone in Public Administration	4

Three of the required core courses (PPD 500, PPD 501ab and PPD 540) provide the foundation to the field and the fourth (PPD 546) serves as a capstone course. PPD 540 must be taken in the first semester or within the first 12 units and PPD 546 must be taken in the final semester or last 12 units of the student's program.

Management Competencies

MPA students are expected to develop managerial competencies in three areas by taking at least one course in each of the following areas:

MANAGEMENT COMPETENCIES		UNITS
<i>Analytic Methods</i>		
PPD 542*	Policy and Program Evaluation, or	
PPD 557*	Modeling and Operations Research	4
<i>Organizational Behavior</i>		
PPD 545	Human Behavior in Public Organizations	4

(With the approval of the MPA or center director, the student may choose a human resource management elective to fulfill this requirement.)

Finance

PPD 541	Public Financial Management and Budgeting, or	
PPDE 645	Financial Management of Nonprofit Organizations	4

(With the approval of the MPA or center director, the student may choose a financial management elective to fulfill this requirement.)

**The statistics requirement must be met before enrolling in PPD 542, PPD 557 or PPD 666.*

Area Cluster Electives

Students may elect to devote their elective courses (14 units) to gain depth in a designated area cluster. These areas include the following: community and economic development, environmental management and land-use policy, financial management, health administration, human resources management, information technology management, intergovernmental management, international policy and management, local government, nonprofit management, planning, public policy, real estate development, transportation, and urban form and design.

Students may elect to follow a more generalist perspective and take their elective courses from the array of elective offerings.

Thesis Option

Thesis option, PPD 594ab Master's Thesis (4 units), may be taken as part of the elective category. Information regarding the thesis contract is available from the MPA director. All theses and dissertations submitted in fulfillment of requirements for graduate degrees must conform to university regulations with regard to form and method of preparation.

Internships

Pre-service students — that is, those with fewer than 25 months' employment in a professional level position — are required to complete at least 300 hours of an internship and an internship seminar (PPD 543). MPA students may enroll in the internship seminar during their first semester. Students complete internships in conjunction with the internship seminar.

Specialization in Intergovernmental Management

In addition to the substantive area cluster, MPA students may choose the specialization in intergovernmental management.

Students enroll in courses and serve in internships in at least two levels of governance. A student may take courses toward this specialization at either the Los Angeles or USC State Capital Center. Internships may be taken through either of these centers. Students electing this specialization meet with the intergovernmental management coordinator at either the Los Angeles or the USC State Capital Center to design their program.

To complete this specialization, students complete three courses from the following lists (with at least two drawn from the first list): (1) PPD 661, PPD 662, PPD 663, PPD 669, PPD 670; (2) PPD 688, PPD 689, PPD 690.

Price School of Public Policy

Graduate Degrees

Master of Public Policy

The Master of Public Policy (MPP) program is designed to prepare students for careers as professional policy analysts. Through an interdisciplinary curriculum and real world experience, students gain an understanding of the policy process, and develop the capacity to formulate, analyze and implement public policy.

The MPP degree is offered at the University Park Campus only.

Requirements for Admission

Candidates for admission must have maintained a minimum B (3.0) average during their undergraduate degree work and attain a score of at least 500 on the verbal and at least 500 on the quantitative sections of the GRE. Exceptions to these requirements are allowed if justified by outstanding work experience, letters of recommendation, or demonstrated improvement in academic performance during undergraduate studies.

Applicants must have a bachelor's degree from an accredited institution and have a basic competence in descriptive and inferential statistics. This prerequisite may be met in one of two ways: (1) entering students must have passed an undergraduate inferential statistics class, with a grade of "B" or better, at an approved university within three years of matriculation, and must pass the MPP lab associated with PPD 554 Foundations of Policy Analysis, or (2) take PPD 502x Statistical Foundations for Public Management and Policy and complete with a grade of "B" or better. If students select to take PPD 502x, the units associated with this class may not be used toward the MPP degree.

Degree Requirements

Students are required to complete 48 units of graduate work, with 24 units of core and 24 elective units divided between management, analytic and specialization areas.

REQUIRED CORE COURSES		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 554	Foundations of Public Policy Analysis	2
PPD 555	Public Policy Formulation and Implementation	4
PPD 558	Multivariate Statistical Analysis	4
PPD 560	Methods for Policy Analysis	4
PPD 561ab*	Policy Analysis Practicum	1, 3

**During a student's final semester of the program, the Policy Analysis Practicum is required as a component of the program's 48 units of course work. The practicum is an opportunity for students to apply their analytic skills to a current problem for an actual client. Admission to the practicum is granted on the approval of the MPP director, and normally requires prior completion of most required courses.*

Electives

Students complete 4 units of management elective, 8 units of analytic elective and 12 units of specialization elective. These electives typically are selected to support specialization in a substantive policy area (e.g., environment or community economic development).

MANAGEMENT ELECTIVE (CHOOSE 4 UNITS)		UNITS
PPD 541	Public Financial Management and Budgeting	4
PPD 545	Human Behavior in Public Organizations	4
PPD 654	Information Technology Management in the Public Sector	4
PPD 656	Political Management: Theory and Applied Techniques	4
PPD 662	Intergovernmental Management: State Perspective	4
PPD 673	Strategic Planning in the Public Sector	4
PPD 675	Nonprofit Management and Leadership	4
PPD 690	Alternative Dispute Resolution	4
PPDE 645	Financial Management of Nonprofit Organizations	4

ANALYTIC ELECTIVE (CHOOSE 6-8* UNITS)		UNITS
COMM 650	Survey Construction and Validation	4
PM 542	Social Network Analysis	4
PPD 542	Policy and Program Evaluation	4
PPD 557	Modeling and Operations Research	4
PPD 587	Risk Analysis	4
PPD 617	Urban Demography and Growth	4
PPD 647	Finance of the Public Sector	4
PPDE 660	Environmental Policy Design and Analysis	2
PPDE 661	Methods for Equity Analysis	4
SOCI 621	Quantitative Methods and Statistics II	4
SSCI 581	Concepts for Spatial Thinking	4

**Students who select PPDE 660 to meet their analytic requirement will add the remaining 2 units to the 12 specialization units in consultation with their academic adviser.*

In addition, students take 12-14 units of additional electives selected by the students with the advice of the academic adviser or director of the MPP program. These electives typically are taken in an area of policy specialization, such as: community economic development, education policy, environmental policy, health, infrastructure, international policy and development, media and communications, philanthropy and nonprofit, and transportation.

Students may not take more than 12 units outside of the Price School of Public Policy without written consent of the director of the MPP program.

Price School of Public Policy

Graduate Degrees

Master of International Public Policy and Management

The International Public Policy and Management (IPPAM) Program offers a Master of International Public

Policy and Management (IPPM). The degree is designed for managers, planners and analysts involved in social sector programs who want to strengthen their management skills and further develop their policy analysis capabilities. For professionals working in the social sectors, IPPAM offers an opportunity to deepen their conceptual understanding of the forces driving change in their sectors and to develop an analytical approach for accessing and reshaping social policy. The program is well-suited for mid-career professionals working in the social sectors, such as physicians, nurses and pharmacists in the health professions; educators and administrators in the teaching professions; government regulators, managers and staff; community organizers, aid workers and others working in the NGO sector; and reporters and others in the news professions interested in covering social issues.

This program is specifically designed for international students and U.S. students who wish to work in international settings, including the Pacific Rim, Latin America and countries in other regions with evolving social systems.

Students are required to complete a minimum of 32 units. All students must fulfill core requirements (18 units) in fundamental policy analysis and management disciplines and an additional 14 units in an area of concentration chosen by the student. The core requirements include: PPD 501a Economics for Policy Planning and Development; PPD 542 Policy and Program Evaluation; PPD 569 Applied International Policy Analysis and Management Project; PPD 570 Applied Statistics for Planning, Policy and Management; and PPD 571 International Public Policy and Management Seminar.

Students select an area of concentration in which they complete a set of recommended elective courses. Each concentration allows students to pursue in depth one or more areas of particular relevance to their career goals. The concentration areas enable students in the interdisciplinary IPPAM program to establish a second “home” in one of the school’s programs, such as health administration or urban planning. Students are required to consult with IPPAM faculty advisers to choose elective courses from a recommended list of courses relevant to the IPPM degree.

Through the integrated curriculum, participants gain practical skills, which are developed within an appropriate conceptual context. Many of the courses and applied projects integrate examples and data from the student’s home countries. Program graduates will have achieved advanced competency in disciplines that include public sector economics, applied methods for public policy analysis, evaluation and management.

Core faculty are drawn from the Price School of Public Policy and include senior, experienced faculty along with leading practitioners and experts in applied fields such as community development, international trade policy, health care policy, and so forth. In addition to the participation of distinguished visiting scholars as guest lecturers in class sessions, the program features an international seminar on public policy and management with guest lectures by policy makers. The opportunity to interact with leading scholars, policy makers, and practitioners from the United States and abroad is an essential component of the program.

The program begins in mid-June with intensive English language workshops and the course in applied statistics. The language workshop can be waived for students with 250+ computer-based TOEFL scores or 600+ paper-based TOEFL scores, or a score of 6.5 on the IELTS exam with no less than a score of 6 on each band score. In the fall semester, international students transition into the regular program consisting of required courses and electives in their chosen concentration area. Some international students may be required to enroll in additional English language workshops depending on how they score on required English exams. Most students can expect to complete the program in 13 months. The intensive nature of the program is designed for full-time students who take a leave from work while enrolled in the program. This approach minimizes the amount of time that professionals must be away from their full-time careers to pursue an advanced degree.

Applicants should have at least a bachelor’s degree from an accredited university and three to seven years of significant professional experience. The IPPAM Program office is located in the Price School of Public Policy, Von KleinSmid Center, Room 253, phone (213) 740-0547, fax (213) 821-1331, email [✉ ippam@usc.edu](mailto:ippam@usc.edu).

USC Dollinger Master of Real Estate Development

The Master of Real Estate Development program is a carefully integrated program that brings together the three main elements of real estate development: design, finance and policy. It is a one-year full-time or two-year evening executive program of study designed to provide students with the knowledge and skills they require to compete successfully in the development industry. The curriculum encompasses eight areas of study with which developers must be conversant, including real estate law, economics, finance, market analysis, negotiation, planning, architecture and engineering. Courses are taught by full-time faculty members from the Price School of Public Policy. In addition, practicing developers, lawyers, planners and other professionals make regular contributions to the course of study, helping students link learning to practice.

Curriculum Requirements

The program of graduate study for the professional degree requires successful completion of the core curriculum (36 units), elective courses (8 units) and a comprehensive examination. Students must complete a total of 44 units.

Core Curriculum

The core comprises 13 lecture-seminar courses that combine lectures, projects, case analyses, and exercises which allow students to experience all facets of the developer's tasks and problems. The integrative project, RED 575L, provides problem solving exercises and the evaluation of actual development situations. Courses emphasize various design, regulatory and fiscal problems associated with urban development and the developer's role in improving development standards in the industry.

CORE COURSES		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
RED 509	Market Analysis for Real Estate	4
RED 542	Finance of Real Estate Development	3
RED 544	Real Estate Capital Markets	2
RED 546	Applications of Real Estate Finance to Problems of Development	3
RED 547	Project Management and Construction	2
RED 551	The Approval Process	4
RED 562	Legal Issues in Real Estate Development	4
RED 573	Design History and Criticism	2
RED 574	Building Typologies	2
RED 575L	Community Design and Site Planning	4
RED 598	Real Estate Product Development	2

Eight units of elective course work are required for the Master of Real Estate Development. These courses may be taken in the schools of Public Policy, Architecture, Business, Law and the Department of Civil Engineering. Admission to some classes requires advanced prerequisites and is subject to availability and approval of the instructor.

Comprehensive Examination

Successful completion of a comprehensive written and oral examination is required of all students seeking the Master of Real Estate Development degree. The examination explicitly covers the core courses. It is normally administered late in the spring semester by a faculty committee appointed by the dean. Students who fail the examination once may take it again within one year. The examination may not be repeated more than once.

General Requirements

Residence and Course Load

The Master of Real Estate Development may be completed on either a full-time or part-time basis. Both options begin in the summer session in June. The full-time program requires 11 months of study. The evening executive option is completed over a two-year period. Students are also expected to participate fully in all extracurricular activities associated with the Master of Real Estate Development program, including the weekly speaker series.

Students who wish to take a leave of absence for a semester or longer must request it from the dean in writing; such leaves may be granted for up to one year.

Students must have an approved laptop computer as required by instructors and must demonstrate calculator and spreadsheet skills.

Time Limit

The time limit within which students in the program must complete the requirements for the Master of Real Estate Development is governed by the following regulations:

All requirements for the Master of Real Estate Development must be completed within five calendar years from the first course at USC applied toward the degree.

University regulations prohibit the acceptance of credits for courses taken toward a Master of Real Estate Development degree more than seven years after the date they were successfully completed.

Grade Point Average Requirement

While enrolled in the program, a student must maintain a grade point average of at least 3.0 for all courses taken toward the degree.

Probation and Disqualification

Any student with a cumulative grade point average of below 3.0 for all courses taken in the program will be placed on academic probation. A student may be disqualified to continue toward a graduate degree if the student has been on academic probation for two consecutive semesters. Whether or not on academic probation or warning, a student may be disqualified at any time from continuing in the program if the dean of the school, after consultation with the faculty, determines that the student is deficient in academic achievement or in another qualification required for the attainment of the Master of Real Estate Development degree.

Course Exemptions and Transfer of Credits

Courses taken toward other degree programs, if determined by the dean to be equivalent to courses in the curriculum, may be accepted for subject credit only. All students are required to complete 44 units while enrolled in the Master of Real Estate Development program. The acceptance of previous course work for subject credit will enable the student to take additional elective courses.

Price School of Public Policy

Graduate Degrees

Graduate Professional Labs

USC's Price School of Public Policy offers professional consulting-like experience for graduate students in its core master's degree programs. Participants are presented with a challenging professional assignment and a well-defined client and terms of reference. Students typically work in teams to produce a professional report and related materials that are presented to the client at the close of the assignment. The terms of reference for the lab vary each year depending upon the client, the instructor and the setting, among other considerations.

In principle, these professional labs may be held anywhere, either in Los Angeles, elsewhere in the United States or abroad.

The Price School professional laboratory teaches students to integrate scholarly knowledge with professional practice. Likewise, it helps participants make the transition from the classroom back to a “real world” setting. In the case of international labs, participants also gain a deeper and more direct understanding of how the culture of professional practice can vary from one setting to the next. Through the Price School professional laboratory students build their credentials and experience while also extending their network of professional contacts.

These professional labs are intended primarily for graduate students in public administration, planning, real estate development, public policy and health administration. A distinctive feature of the professional laboratory is that it is intended as an integrative professional experience across the school, so that students from any of these programs may participate fully.

Each summer the Price School offers one or more international labs/workshops. Recent international labs have been held in China, Brazil, Germany, Morocco, Italy and Vietnam. All students are encouraged to take at least one international lab course.

Exchange Program

The Hertie School of Governance exchange program is a one-semester exchange program offered during the fall semester. The program will provide opportunities for students to acquire knowledge and skills necessary to become global leaders and succeed in a global market. All instruction is in English; proficiency in a foreign language is not required. Courses completed at the Hertie School of Governance are graded credit/no credit on the student’s USC transcript. The courses are selected from a list approved by the Price School of Public Policy. Students must work with their program administrator to understand how the courses will return to their degree.

Price School of Public Policy

Graduate Degrees

Graduate Certificate Programs

Certificate in City/County Management

The graduate Certificate in City/County Management is for students interested in acquiring the foundational training needed to pursue a career in public service leadership and provides students with the necessary knowledge, training and skills development that will ensure their professional success as a future city/county manager.

The Certificate in City/County Management consists of 16 units of graduate course work.

REQUIRED COURSES (16 UNITS)		UNITS
PPD 500	Intersectoral Leadership	2
PPD 541	Public Financial Management and Budgeting	4
PPD 542	Policy and Program Evaluation	4
PPD 651	Seminar in the Administration of Local Government	4
PPD 685	Human Resources Management in the Public and Non-Profit Sectors	2

Admission Requirements and Application Procedures

Applicants for the Certificate in City/County Management who are currently enrolled in a graduate program at USC and are in good standing with a 3.0 GPA only need to submit the appropriate paperwork for adding the certificate program, which may be obtained from the program administrator.

Applicants for the Certificate in City/County Management who have not matriculated at USC must make a formal application for admission to the certificate program; provide transcripts of all college work, a resume and one letter of recommendation.

Please contact the USC Price Office of Admissions at [✉ uscprice@usc.edu](mailto:uscprice@usc.edu) for more information.

Certificate in Transportation Systems

The graduate Certificate in Transportation Systems is an interdisciplinary program administered by the Department of Civil Engineering. The certificate program allows students to specialize in transportation applications, while simultaneously receiving a degree in their home department. The certificate in transportation systems combines elements of transportation engineering with transportation policy, planning and project management. The program is especially appropriate for students intending to pursue careers as developers of transportation technologies or as implementors of technologies within government agencies.

Students electing the certificate program apply to the Department of Civil Engineering.

Course prerequisites for the program are:

- 1) one course in statistics or uncertainty, equivalent to CE 408, ISE 225 or PPD 404x;
- 2) one course in engineering economy, equivalent to ISE 460;
- 3) one course in microeconomics, equivalent to ECON 203; and
- 4) one course in a high level programming language, such as C or Fortran.

These prerequisites may be satisfied after enrollment in the certificate program by taking the indicated courses or their equivalent. Graduate students cannot receive credit for courses numbered below 400. Detailed admissions requirements are published by the Department of Civil Engineering.

Requirements for Completion

The curriculum consists of five graduate courses for a total of 17 units.

REQUIRED COURSES		UNITS
CE 471	Principles of Transportation Engineering, or	
CE 519	Transportation Engineering	3
CE 583	Design of Transportation Facilities, or	
CE 585	Traffic Engineering and Control	3
ISE 515	Engineering Project Management	3
PPD 633	Urban Transportation Planning and Management	4
PPD 634	Institutional and Policy Issues in Transportation	4

Qualified students holding a bachelor's degree also have the option of enrolling in the certificate program without receiving a separate graduate degree.

Certificate in Nonprofit Management and Policy

This graduate certificate program provides students with a foundation in nonprofit management and policy. The certificate develops nonprofit management skills and provides students the knowledge needed to understand the increasing importance of nonprofits in society and their role in forming and influencing public policy.

Applicants for the Certificate in Nonprofit Management and Policy who are currently enrolled in a graduate program at USC and are in good standing with a 3.0 GPA only need to submit the appropriate paperwork for adding the certificate program, which may be obtained from the student services adviser.

Applicants for the Certificate in Nonprofit Management and Policy who have not matriculated at USC must make

a formal application for admission to the certificate program, provide transcripts of all college work, a resume and one letter of recommendation.

The certificate in nonprofit management and policy consists of 16 units of graduate course work.

CORE COURSES (12 UNITS)		UNITS
PPD 675	Nonprofit Management and Leadership	4
PPD 687	Strategic Management in the Nonprofit Sector	4
PPD 689	The Nonprofit Sector and Philanthropy	4

Elective Course

Students select 4 elective units. The elective course(s) may be taken from within the Price School of Public Policy course offerings or other USC units. The elective selection must be approved by the faculty adviser for the certificate program.

Up to 10 units of the certificate may be applied to both the certificate and the core requirements or electives in the Master of Public Administration program. Up to 12 units may be applied toward both the certificate and the core or electives in the Master of Public Policy program.

The Master of Public Administration director will provide advisement.

Certificate in Political Management

This graduate certificate program provides students with a foundation in political management. It is designed to provide expertise for students who wish to work in public policy advocacy, in political relations, with elected officials and with the public, nonprofit or private sectors.

Applicants who are currently enrolled in a graduate program at USC and are in good standing with a 3.0 GPA only need to submit the appropriate paperwork for adding the certificate program which may be obtained from the student services adviser.

Applicants who have not matriculated at USC must make a formal application for admission to the certificate program, as well as provide transcripts of all college work, a resume and one letter of recommendation.

The Certificate in Political Management consists of 14–16 units of graduate course work depending on the courses selected.

CORE COURSE (4 UNITS)		UNITS
PPD 658	Advocacy in Public Administration	4

FOUNDATION COURSE		UNITS
Select one: 2 or 4 units		
PPD 500	Intersectoral Leadership	2
PPD 540	Public Administration and Society	4
PPD 554	Foundations of Public Policy Analysis	2
PPD 684	Leadership Development in the Public and Nonprofit Sectors	2

CHOOSE TWO OF THE FOLLOWING (8 UNITS)		UNITS
PPD 616	Participatory Methods in Planning and Policy	4
PPD 656	Political Management: Theory and Applied Techniques	4
PPD 657	Political Leadership in Public Organizations	4
PPD 693	Communicating Public Policy	4

Up to 10 units of the certificate may be applied toward both the certificate and to the core requirements or

electives in the Master of Public Administration. Up to 12 units may be applied toward both the certificate and toward core or electives in the Master of Public Policy or Master of Planning.

The director of the graduate programs in public policy and management will provide advisement.

Certificate Programs in Public Financial Management

Students enrolled in the Public Financial Management certificate program are required to take 52 graduate units of course work (53 for pre-service students). Fourteen of these units are MPA core courses (PPD 500, PPD 501ab, PPD 540 and PPD 546); and 12 units of management competencies (PPD 541, PPD 542 or PPD 557, and PPD 545). In addition, students must take 16 units of course work in finance and related subjects (PPD 516, PPD 554* or PPD 555, PPD 647 and PPD 661 or PPD 662 or PPD 669). Ten units of approved electives will be selected from among: PPD 510b, PPD 542, PPD 652, PPD 660, PPD 661, PPD 662, PPD 669, PPD 679 and PPD 688. Pre-service students must also serve an internship and be enrolled in PPD 543.

Students may receive this certificate with a specialization in intergovernmental management provided they complete the three course sequence (PPD 661, PPD 662, PPD 669). Students may satisfy this requirement if they apply two of these courses toward the 10-unit elective requirement and apply the third course toward the 16-unit finance and related subjects requirement.

**Students who select PPD 554 (rather than PPD 555) must select an additional 2-unit elective.*

Certificate Programs in Health Management and Policy Programs

The Health Management and Policy Programs of the Price School of Public Policy offers certificate programs in specialized areas of health care administration. The certificates are designed to provide practitioners with means for improving or updating their knowledge and experience in a challenging and professionally relevant course of study. Certificates are offered in Administration of Long Term Care Programs and Management of Ambulatory Care Systems. Applicants for the certificate programs must make formal application for admission to the certificate program, provide transcripts of all college work, supplemented by three letters of recommendation, including one from a former instructor, a resume and a personal statement describing their career goals and the relationship of the certificate to those ends.

It is expected that applicants to the certificate programs should have graduated from a recognized college with an approximate grade point average of B in the last 60 units of college work. Non-graduates may be admitted if the director believes that there is evidence to suggest that the applicant is capable of graduate level work.

Successful completion of the certificate will not be a deciding factor in the admission decision for the degrees offered by the Health Management and Policy Programs or the Price School of Public Policy.

The Ambulatory Care program requires 20 units of graduate credit including a 16-unit core and a four-unit specialized seminar in the area of the certificate concentration. Core courses (16 units) are: PPD 509; PPD 510a or PPD 516; PPD 545 or PPD 557; one elective. One specialized seminar as follows (four units): PPD 600, PPD 601 or GERO 550.

The Certificate in Administration of Long Term Care Programs requires 16 units of course work. The required courses are GERO 500; PPD 513; PPD 518; PPD 601; PPD 510a or PPDE 645. The program can be completed via distance learning.

Completing a certificate program does not constitute completion of or admission to the Master of Health Administration (MHA) or Executive Master of Health Administration (EMHA) degree programs nor will it be a deciding factor in the admission decision to those programs. Students in the MHA program, however, may qualify for award of these certificates if they complete the applicable course requirements.

Certificate in Public Management

This program provides students with a solid foundation of training and skills in management. Individuals who need training in public administration but who are unable to enroll for the Master of Public Administration (MPA) degree may find this certificate program of particular interest. Key to the program's success is the close integration of the academic curriculum and the application of skills and theory to managerial work assignments.

Students may enroll at any time throughout the year.

The program consists of four courses: PPD 540, PPD 542, PPD 545, and one elective selected from any 500-level offering in the Price curriculum.

Certificate in Public Policy

This graduate certificate program provides students with a foundation in public policy analysis. It is designed to provide expertise in public policy to individuals who do not want to pursue the Master of Public Policy degree. Potential students include those who are pursuing another degree and want to complement that work with a specialization in public policy, as well as qualified students holding a bachelor's degree who have not matriculated at USC. The certificate develops policy analytic skills and their integration with a policy issue area of interest to the student.

Applicants for the Certificate in Public Policy who have not matriculated at USC must make a formal application for admission to the certificate program, provide transcripts of all college work, a resume and one letter of recommendation.

The program consists of 16 units of graduate course work.

CORE COURSES (8 UNITS)		UNITS
PPD 500	Intersectoral Leadership	2
PPD 554	Foundations of Public Policy Analysis	2
PPD 555	Public Policy Formulation and Implementation	4

Choose 4 units from:

PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 557	Modeling and Operations Research	4
PPD 558	Multivariate Statistical Analysis	4
PPD 560	Methods for Policy Analysis	4

Choose one course from a policy area. There are many policy issues courses from which to choose (e.g., health, nonprofit, transportation, environment, housing). 4

The Master of Public Policy director will provide advisement.

Certificate in Homeland Security and Public Policy

This graduate certificate program provides students with a foundation in homeland security and public policy. It is designed to provide expertise to individuals working in the field with an interest in refining their risk and security analysis skills as well as others with interest in the field. The certificate develops risk analysis skills and provides students with the knowledge needed to understand the issues surrounding the increasingly important issues of homeland security and public policy.

Applicants for the Certificate in Homeland Security and Public Policy who are currently enrolled in a graduate program at USC in good standing with a 3.0 GPA only need to submit the appropriate paperwork for adding the certificate program which may be obtained from the student services adviser.

Applicants for the Certificate in Homeland Security and Public Policy who have not matriculated at USC must make a formal application for admission to the certificate program, provide transcripts of all college work, a resume and one letter of recommendation.

The certificate in homeland security and public policy consists of 15–16 units of graduate course work depending on the course selected.

REQUIRED CORE COURSE	(4 UNITS)
-----------------------------	------------------

PPD 683	Homeland Security and Public Policy	4
Choose three of the following (11–12 units):		
PPD 501ab	Economics for Policy, Planning, and Development	4
PPD 557	Modeling and Operations Research	4, or
ISE 530	Optimization Methods for Analytics	3, or
ISE 562	Value and Decision Theory	3
PPD 587	Risk Analysis	4

Certificate in Sustainable Policy and Planning

This graduate certificate program provides students with a foundation in policy and planning issues in sustainability and the environment. The certificate develops analytic and methodological skills and provides students the knowledge to understand the increasing importance of issues surrounding the environment and sustainability in policy and planning.

For admissions information, please visit the Price Website. The Master of Planning director will provide advisement.

The Certificate in Sustainable Policy and Planning consists of 12-14* units of graduate course work:

REQUIRED COURSES (6 UNITS)		UNITS
PPD 568	Environmental Governance and Sustainability	2
PPDE 634*	Methodology, Methods and Tools for Urban Sustainability	2
PPDE 660	Environmental Policy Design and Analysis	2

*Students in the certificate program will take the 2-unit version of PPDE 634.

ELECTIVE COURSES (6-8 UNITS)		UNITS
Students select six to eight* units of electives.		
ARCH 519*	Sustainability in the Environment: Infrastructures, Urban Landscapes and Buildings	3
CE 515*	Sustainable Infrastructure Systems	3
ENE 502*	Environmental and Regulatory Compliance	3
ENE 505*	Energy and the Environment	3
GEOL 525	The Science of Climate Change	4
MOR 566*	Environmental Sustainability and Competitive Advantage	3
PPD 587	Risk Analysis	4
PPD 619	Smart Growth and Urban Sprawl: Policy Debates and Planning Solutions	4
PPD 621	Environmental Impacts	4
PPD 690	Alternative Dispute Resolution	4
PPD 692	Transportation and the Environment	4
PPD 694	Coastal Policy and Planning	4
PPDE 632	Sustainable Cities	4
PPDE 644	Land Use and Transportation Planning	4

*If students select 3-unit courses, they will take 6-7 units of electives. Others will take 8.

Certificate in Health Systems Operations

This 17-unit graduate certificate is jointly sponsored by the Epstein Industrial and Systems Engineering Department and the Price School of Public Policy (Master of Health Administration program), and administered by the Epstein Industrial and Systems Engineering Department. See the Industrial and Systems Engineering

Department for course requirements.

Certificate in Real Estate Development

This graduate certificate program provides students with a foundation of the key elements of real estate development. It is designed to provide these foundations for non-Master of Real Estate Development students who wish to obtain this knowledge to complement their graduate program of study as well as their careers. For admissions information, visit the Price School Website.

The certificate in real estate development consists of 12 units of graduate course work: RED 510, RED 511 and RED 512.

Certificate in International Policy and Planning

The Graduate Certificate in International Policy and Planning strengthens students' understanding of global policy, planning and public management issues underscoring comparative differences in policy approaches and governance institutions across countries, builds a core foundation of knowledge about the governing institutions and agreements that operate on a global level, and prepares students for working in international organizations. The professions of graduate students in the Price School (public administration, public policy, urban planning, health policy and management, and real estate development) are globalizing. To analyze and understand the impact of globalization on their chosen field and to be competitive in a global context, emerging leaders in these professions should be conversant in thinking and operating on a global scale. Earning this certificate better prepares students for the professional demands of the globalized era.

The Certificate in International Policy and Planning consists of 14 units of graduate course work.

Required Courses (8 units)

CORE COURSES (8)		UNITS
PPD 677	International Development Administration	4

Plus one of the following (4 units):

PPD 531L	Planning Studio	4
PPD 532L	International Planning and Development Laboratory Workshop	4
PPD 613a	Policy, Planning and Development International Laboratory	1
PPD 613b	Policy, Planning and Development International Laboratory	3

**If students select PPD 613ab, both must be completed.*

Elective Courses (6 units)

Students select at least 6 units of elective courses. The elective courses may be taken from within the Price School of Public Policy course offerings or other USC units. The electives will be selected from three topic areas: international development; urbanization, policy issues and sustainability; and global health. The electives will be selected in consultation with and approved by the faculty advisor for the certificate program. The electives should be chosen such that the combination of core classes and electives produces a well-rounded and rigorous preparation for professional practice in a globalized context.

Admission Requirements and Application Procedures

Applicants for the Certificate in International Policy and Planning who are currently enrolled in a graduate program at USC and are in good standing with a 3.0 GPA only need to submit the appropriate paperwork for adding the certificate program, which may be obtained from the program administrator.

Applicants for the Certificate in International Policy and Planning who have not matriculated at USC must make a formal application for admission to the certificate program; provide transcripts of all college work, a resume and one letter of recommendation.

Please contact the USC Price Office of Admissions at [✉ uscprice@usc.edu](mailto:uscprice@usc.edu) for more information.

Non-Credit Programs Offered by the Center for International Training and Development

Management Effectiveness Program

This is a four-week intensive training program in the art and science of management. The program is designed to enhance leadership effectiveness and the development of a management generalist perspective.

International Executive Development Laboratory

This five-week laboratory focuses on issues in executive leadership, strategic management, environmental analysis, international finance and economics, computer-based project planning, and implementation of planned change strategies.

Dual Degree Programs

A dual degree program is an academic option that allows a student to enroll in two graduate programs simultaneously. Application must be made to both schools, and if accepted to both, the student pursues a specially designed program which combines selected courses from the two academic units. Students are required to seek advisement from both schools. The student will have the opportunity to acquire the knowledge and skills from two fields of study.

The dual degree program enables the student to integrate a closely related field with planning or development. The purpose of the dual program is to provide an enriched educational experience; accordingly, concurrent course work in the two fields is required.

Since the unit requirements of dual degrees depend upon the mutual transfer of units between the two academic units, no other transfer of credits will be allowed.

Students who decide, at any point, to earn only one of the two degrees must meet all the regular requirements for earning that degree alone.

Students in Master of Planning dual degree programs must fulfill the comprehensive examination and appropriate internship requirements except where noted otherwise.

Master of Heritage Conservation/Master of Planning

The Master of Heritage Conservation/Master of Planning dual degree program facilitates highly related cross-disciplinary studies in heritage conservation and in urban planning at the master's level. The primary objective of the dual degree curriculum is to impart to students a basic familiarity with the origins and development of the philosophies, theories, and practices of planning and heritage conservation. This curriculum has been developed so that students will graduate from this program with a broad practical knowledge of the laws, regulations, and policies that apply to planning and conservation practice in the United States and internationally. This expertise will include knowledge of urban design, public policy, and architectural and planning history and theory. Students will be expected to understand the critical methodological tools necessary for a professional engaged in the investigation, interpretation, and evaluation of the urban built environment.

Qualified students who are admitted to the graduate programs in both the School of Architecture and the USC Price School of Public Policy may complete both degrees in a highly integrated five-semester program.

Requirements

Requirements for completion of the dual degree program are 60 units, including 30 units in heritage conservation and 30 units in planning, as follows:

ARCHITECTURE		UNITS
ARCH 549	Fundamentals of Heritage Conservation	3
ARCH 550	Heritage Conservation Policy and Planning	3
ARCH 551	Conservation Methods and Materials	3
ARCH 552	Introduction to Historic Site Documentation	2

ARCH 553	History of American Architecture and Urbanism	3
ARCH 555	Global Perspectives in Heritage Conservation	2
ARCH 691abz	Heritage Conservation Thesis Preparation and Thesis	2-6-0
ARCH	Electives	6
Total		30

PUBLIC POLICY		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning, and Development	2
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 527	The Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 531L	Planning Studio	4
PPD	Concentration – Gateway course	4
PPD	Concentration – Methodology course	4
PPD	Electives	6
Total		30

Concentration Methodology: Students in this program will be required to select a concentration for the Master of Planning program.

Electives: Electives must be taken within the USC School of Architecture or the Price School of Public Policy.

Degree Completion requirements: Dual degree students, like all other MPL students, must take a comprehensive examination and fulfill the internship requirement. In addition, like all other MHC students, dual degree students will be expected to complete a thesis.

Master of Planning/Master of Advanced Architectural Studies

The Master of Planning/Master of Advanced Architectural Studies dual degree program facilitates highly related cross-disciplinary studies in architecture and in planning at the master's level. This program offers students interested in developing a career in urban design an opportunity to make more substantial commitments in both disciplines and to achieve a more coherent and extensive knowledge in the design of built environments and public policy. This dual degree program normally requires five semesters in residence.

Qualified students who are admitted to the graduate programs in both the School of Architecture and the USC Price School of Public Policy may complete both degrees in a highly integrated five-semester program. Such students must already possess a five-year professional degree in architecture.

Requirements

Requirements for completion of the dual degree program are 72 units, including 36 units in architecture and 36 units in planning. See the School of Architecture for course requirements.

Master of Planning/Master of Business Administration

The Master of Planning/Master of Business Administration dual degree program enables the student to understand the conduct and requirements of business, accounting, corporate and strategic planning, real estate marketing, and finance. Further, students gain expertise in public policy, city planning and the interpretation of government regulations. Exposure to both fields becomes an educational as well as a professional asset for careers in either public service or private enterprise. This dual degree program normally requires five semesters in residence.

Requirements

A total of 84 units is required for the dual degree: 48 units of work in the USC Marshall School of Business and 36 units in the Price School of Public Policy. Required courses that must be taken in the Marshall School of Business include: all required courses in an MBA program and graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students must not count courses taken outside the Marshall School of Business toward the 48 units.

PLANNING		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

Concentration Methodology: A 4-unit course selected from the concentration list shown in the MPI program.

Planning Studios: PPD 531L (4, 4) to total 8 units.

Electives: 8 units of elective courses taken within the Price School of Public Policy.

Dual degree students, like all other MPI students, must take a comprehensive examination and fulfill the internship requirement.

Master of Planning/Master of Arts in Economics

The USC Price School of Public Policy and the Department of Economics jointly offer a two-year program leading to the MPI and M.A. degrees. Applicants must apply to the Price School of Public Policy and the USC Graduate School and meet the admission requirements of both.

Requirements

Requirements for completion of the dual degree program are 58 units, including 24 units in economics and 34 units in planning.

ECONOMICS		UNITS
ECON 500	Microeconomic Analysis and Policy	4
ECON 501	Macroeconomic Analysis and Policy	4
ECON 513	The Practice of Econometrics	4
ECON 594abz	Master's Thesis	4
Electives	Economics	8

PLANNING		UNITS
PPD 500	Intersectoral Leadership	2
PPD 524	Planning Theory	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

Planning Studios: PPD 531L (4, 4) to total 8 units.

Electives: 14 units of elective courses taken within the Price School of Public Policy.

Thesis: A thesis is required on a subject interrelating economics and urban planning and development. Students must register in a minimum of 4 units of ECON 594abz (2-2-0) and maintain continuous registration until completion of the thesis.

Internship: Dual degree students in this program must fulfill the internship requirement.

During the summer after the first year of graduate study, the student normally serves an internship in a planning organization. The student must complete a thesis acceptable to both faculties.

Master of Planning/Master of Real Estate Development

The Master of Planning/Master of Real Estate Development dual degree program enables students to expand their skills in planning, land development, market analysis, finance and economics. Exposure to both fields becomes an educational as well as a professional asset for careers in either real estate development or planning. This dual degree program normally requires five semesters, including one summer, in residence.

Requirements

A total of 74 units is required for the dual degree, all from within the Price School of Public Policy.

REQUIRED COURSES		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PLANNING CORE		UNITS
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 531L	Planning Studio	4
PPD 533	Planning History and Urban Form	2
REAL ESTATE CORE		UNITS
RED 509	Market Analysis for Real Estate	4
RED 542	Finance of Real Estate Development	3
RED 544	Real Estate Capital Markets	2
RED 546	Applications of Real Estate Finance to Problems of Development	3
RED 547	Project Management and Construction	2
RED 551	The Approval Process	4
RED 562	Legal Issues in Real Estate Development	4
RED 573	Design History and Criticism	2
RED 574	Building Typologies	2
RED 575L	Community Design and Site Planning	4
RED 598	Real Estate Product Development	2

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

Electives: 12 units of PPD courses and 12 additional units of elective courses taken within the Price School of

Public Policy.

Students are also required to complete a comprehensive examination. Students have the option of selecting either the existing MPI or existing MRED examination.

The internship requirement is waived for students who enter the program with professional experience in either planning, real estate or a related field.

Master of Planning/Master of Science in Gerontology

The M.S./MPI dual degree is one of a few in the nation which combines the knowledge of the older population with the skills needed to plan services for older people. The MPI prepares the graduate for the responsibilities involved in development of public and private institutions and programs. The M.S. indicates a special focus on the older person and the skills to analyze and design programs for this growing population. The M.S. is offered through the USC Davis School of Gerontology.

Requirements

Requirements for completion of the dual degree program are 66 units including 26 units in gerontology, 36 units in planning and a minimum of 4 units of thesis in either gerontology or planning, as follows:

GERONTOLOGY		UNITS
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 591	Field Practicum	6
Gerontology elective		4
PLANNING		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

Concentration Methodology: A 4-unit course selected from the concentration list shown in MPI program.

Planning Studios: PPD 531L (4, 4) to total 8 units.

Electives: 8 units of elective courses taken within the Price School of Public Policy.

Thesis: A thesis is required on a subject interrelating gerontology and planning. Students must register in a minimum of 4 units of PPD 594abz (2,2,0) or GERO 594abz (2,2,0). Students must maintain continuous registration until completion of the thesis.

Program Adaptation: The USC Davis School of Gerontology waives GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program will have a primary professional focus in planning.

Master of Planning/Master of Landscape Architecture

The dual degree option in planning and landscape architecture (in the USC School of Architecture) trains professionals in policy and design, and to be competent with design problems at different scales, but with a distinctly urban focus. Candidates must be independently admitted to the Master of Planning and Master of Landscape Architecture programs. The dual degree program normally requires between five and seven semesters in residence.

Requirements

Completion of the dual degree requires 24 units of courses in urban planning, 10 units of thesis option I or II and either 32 units of landscape architecture (for those students admitted with advanced standing); 48 units of landscape architecture (for those students admitted with advanced placement); or 74 units of landscape architecture (for those students admitted to the three-year curriculum). See School of Architecture for course requirements.

Master of Planning/Master of Public Administration

The Master of Planning/Master of Public Administration dual degree program is designed for the study of the relationships between planning and public administration. Administrative skills, budgeting and fiscal analysis, a knowledge of operations services of local governments, and formulation and conduct of planning operations within the context of municipal management are required. This dual degree program normally requires five semesters in residence.

Requirements

Requirements for completion of the dual degree program are 60 units, including 26 units in public administration, 20 units in planning and 14 units of electives (8 in planning), as follows:

Prerequisites: 12 undergraduate course credit units of social science, not more than 8 units in any one field, are required. Students must also satisfy the MPA statistics prerequisite and other prerequisites. PPD 525 satisfies the Price School of Public Policy prerequisite in descriptive and inferential statistics for students in the Master of Planning/Master of Public Administration dual degree program. Dual degree students completing PPD 525 with a grade of B or higher (A = 4.0) need not take PPD 502x Statistical Foundations for Public Management and Policy.

PUBLIC ADMINISTRATION		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 540	Public Administration and Society	4
PPD 541	Public Financial Management and Budgeting, or	
PPDE 645	Financial Management of Nonprofit Organizations	4
PPD 542	Policy and Program Evaluation, or	
PPD 557	Modeling and Operations Research	4
PPD 545	Human Behavior in Public Organizations	4
PPD 546	Capstone in Public Administration	4
PLANNING		UNITS
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

Planning Studios: PPD 531L (4, 4) to total 8 units.

Electives: 14 units of elective courses taken within the Price School of Public Policy. Eight of these elective units must be taken in the planning program. Dual degree students who complete PPD 502x with a grade of C or higher need not take PPD 525. Instead, they should take 2 additional elective units for a total of 16.

Dual degree students, like all other MPI students, must take a comprehensive examination and fulfill the internship requirement.

Master of Planning/Master of Public Health

The Master of Planning/Master of Public Health (MPI/MPH) dual degree is designed for individuals who envision a career that combines urban planning and public health disciplines. This dual degree combines the knowledge of urban planning with an understanding of health from a population perspective. It will provide training for planning, evaluating and guiding healthy community and urban development, and will enable graduates who seek to be agents of change within the profession to assume leadership roles in planning and in public health at the local, state and national levels. A total of 79 units are required for the dual degree.

PLANNING CORE REQUIREMENTS

PLANNING CORE REQUIREMENTS		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 524	Planning Theory	2
PPD 527	The Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2

Concentration

Students must select 16 units in a concentration from one of the five concentrations in the planning program. Students are required to complete the gateway course and methodology course related to their concentration as part of their preparation for their comprehensive examination. The student's concentration must contain a 4-unit methodology course, a 4-unit gateway course and 8 other units. See further details on the concentrations in the Master of Planning section of the catalogue.

Planning Studios

Students will complete a total of 8 units of domestic or international planning studios under PPD 531L (4) to satisfy this requirement.

Dual degree students, like all other MPI students, must take a comprehensive examination and fulfill an internship requirement. Students will take 200 hours of planning internship placement in addition to 2 units in PM 596 and 2 units in PM 597. See below for further internship details for this dual degree.

PREVENTIVE MEDICINE — PUBLIC HEALTH CORE REQUIREMENTS

PREVENTIVE MEDICINE — PUBLIC HEALTH CORE REQUIREMENTS		UNITS
PM 501	Foundations in Health Education and Promotion	4
PM 508	Health Service Delivery in the U.S.	4
PM 510L	Principles of Biostatistics	4
PM 512	Principles of Epidemiology	4
PM 529	Environmental Health: An Epidemiological Approach	4
PM 593*	Public Health Practicum	4 or 8

*PM 593 is a variable unit course, 4 or 8 units. Students are required to take 4 units for this dual degree.

HEALTH PROMOTION TRACK REQUIREMENTS

HEALTH PROMOTION TRACK REQUIREMENTS		19 UNITS
PM 528	Program Design and Evaluation	4
PM 562	Intervention Approaches for Health Promotion and Disease Prevention	4

PM 563	Organizing and Mobilizing Communities for Public Health	4
Health promotion track electives		4
Other electives		3

All students admitted into the dual degree program must complete all requirements for each program.

Students in the dual degree may substitute two MPL core courses with PM courses. PPD 525 may be substituted with PM 510 and PPD 526 may be substituted with PM 563. Students enrolled in the dual degree are not required to take PPD 525 (as opposed to the stand alone MPL degree students) because they develop the necessary proficiencies in statistics in PM 510L, which provides them the opportunity to learn biostatistics, health statistics and the application of statistics necessary for success in this dual degree and for their future career. Dual degree students are not required to take PPD 526 and may take PM 563 as this course covers global health and international issues and will provide students with the information needed for success in their career.

Students may substitute 4 units of the health promotion track electives with relevant courses from the Price School of Public Policy. Relevant courses would include PPDE 630 Community Health Planning, PPD 511, PPD 513, and PPD 514.

In addition, for PM 596, students complete an internship specific to meet the competencies of the health promotion track. Dual degree students would enroll in this 2-unit course and complete a 150-hour placement. The other 150 hours would be waived because students will spend 200 hours during their planning internship, acquiring additional relevant practical experience. (Note: This is consistent with the established dual degree programs with medicine, pharmacy, social work and clinical psychology).

The skeleton curriculum is described by these requirements. In fact, students will tend to take additional courses specific to their planning concentration and will enroll in additional units.

Units required to complete program: 79

Master of Planning/Master of Arts, Art and Curatorial Practices in the Public Sphere

The Master of Planning/Master of Arts, Art and Curatorial Practices in the Public Sphere dual degree program offers an unusually rich opportunity for students interested in developing a new knowledge base to become successful professionals working in the arena of organizing art projects in urban public space, planning and community development. Los Angeles and the facilities at USC provide a unique learning laboratory to educate a more competitive professional with a better understanding of both the administration of public art and issues of urban planning.

Students must complete the following requirements in this program: 70 units, including 28 units in the Master of Arts, Art and Curatorial Practices in the Public Sphere program, 22 in policy, planning, and development, and 20 in a field of study with no more than 8 units taken from other USC programs.

MASTER OF ARTS, ART AND CURATORIAL PRACTICES IN THE PUBLIC SPHERE (28 UNITS)		UNITS
PAS 549	Methodologies of Art Writing	3
PAS 555abc	Curatorial Practicum	2-2-2
PAS 561	Curatorial/Organizational Models	2
PAS 571	Histories of Art in the Public Sphere	3
PAS 572	Contemporary Art in the Public Sphere	3
PAS 581	Critical Conversations	3
PAS 585	Theorizing the Public Realm	3
PAS 591	Field Internship Experience	1
PAS 594ab	Master's Thesis	2, 2

MASTER OF PLANNING (22 UNITS)		UNITS
--------------------------------------	--	--------------

PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 529	Legal Environment of Planning	2
PPD 531L	Core Laboratory Workshop	4
PPD 533	Planning History and Urban Form	2
PPD 627*	Design Skills for Urban Planners	4

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

**PPD 627 is the methodology course for the Preservation and Design of the Built Environment concentration. Students who choose to do a concentration other than Preservation and Design of the Built Environment need to take the respective methodology course.*

Dual degree students, like all other MPI students, must take a comprehensive examination and fulfill the internship requirement.

Field of Study (20 units)

Students may include no more than 8 units from outside the Roski School of Art and Design and the Price School of Public Policy. The MPI program requires students to declare their concentration during the fall semester prior to taking the comprehensive examination in the spring semester. Students are required to complete the gateway course and methodology course related to their concentration as part of their preparation for their comprehensive examination. The student's concentration must contain a 4-unit methodology course, a 4-unit gateway course and 8 other units directly concerned with the subject matter of the concentration.

Capstone Projects

Students must complete a master's thesis or final thesis project through the Roski School of Art and Design and the MPI comprehensive examination through the Price School of Public Policy.

Internship

All students must complete 400 hours of internship through the Price School of Public Policy. This internship may be partially or completely fulfilled through prior professional experience.

Master of Public Policy/Master of Planning

The Master of Public Policy/Master of Planning dual degree program gives students the opportunity to develop a depth of analytic and design skills with which to effectively address the problems of urban communities. The dual degree program normally requires six semesters in residence.

Requirements

Completion of the dual degree requires 72 units, including: PPD 500 and PPD 501a, 32 units in public policy, 22 units in planning, 6-8* units in electives and 8 units in planning studios/practicum.

Prerequisites

Applicants must have a basic competence in descriptive and inferential statistics. This prerequisite may be met in one of two ways: (1) entering students must have passed an undergraduate inferential statistics class, with a grade of "B" or better, at an approved university within three years of matriculation, and must pass the MPP lab associated with PPD 554 Foundations of Policy Analysis, or (2) take PPD 502x Statistical Foundations for Public Management and Policy and complete with a grade of "B" or better. If students select to take PPD 502x, the units associated with this class may not be used for graduate credit.

REQUIRED COURSES

		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2

PUBLIC POLICY COURSES		UNITS
PPD 501b	Economics for Policy, Planning and Development	2
PPD 554	Foundations of Public Policy Analysis	2
PPD 555	Public Policy Formulation and Implementation	4
PPD 558	Multivariate Statistical Analysis	4
PPD 560	Methods for Policy Analysis	4
Public policy elective		4
Analytic electives (PPD 542, PPD 557, PPD 587, PPD 617 or PPD 647, PPDE 660*, PPDE 661, PM 542, SOCI 621, COMM 650, SSCI 581)		6-8*
Students who select PPDE 660 will take an additional 2 units of electives in consultation with the adviser.		
One management elective from the following list:		4
PPD 541	Public Financial Management and Budgeting	
PPD 545	Human Behavior in Public Organizations	
PPD 654	Information Technology Management in the Public Sector	
PPD 656	Political Management: Theory and Applied Techniques	
PPD 662	Intergovernmental Management: State Perspective	
PPD 673	Strategic Planning the Public Sector	
PPD 675	Nonprofit Management and Leadership	
PPD 690	Alternative Dispute Resolution	
PPDE 645	Financial Management of Nonprofit Organizations	
PLANNING		UNITS
PPD 524	Planning Theory	2
PPD 526	Comparative International Development	2
PPD 527	Social Context of Planning	2
PPD 529	Legal Environment of Planning	2
PPD 533	Planning History and Urban Form	2
Concentration electives in planning from the Price School (includes 4 units of methodology to be selected with adviser from the following list)		12
PPD 612	Research and Analytical Techniques	
PPD 616	Participatory Methods in Planning and Policy	
PPD 617	Urban Demography and Growth	
PPD 627	Design Skills for Urban Planners	
PPD 634	Institutional and Policy Issues in Transportation	
		22

Electives

Students are required to take 6-8* units of electives from the curriculum offered by the university. Non-Price School courses may be selected by the students with the approval of an academic adviser.

Practicum/Planning Studios

After finishing the core courses of both programs, students are required to take 8 units in practicum/planning studios: 4 units from the public policy program (PPD 561ab) and 4 units from the planning program (PPD 531L).

Comprehensive Exam and Internship

Dual degree students, like all other MPI students, must take a comprehensive examination and fulfill the

internship requirement.

Master of Planning/Master of Social Work

The dual degree program between the USC School of Social Work and the USC Price School of Public Policy offers unique opportunities for students who want to devote their professional careers to social policy, social planning or social services delivery. Students with a dual degree will have broader employment options beyond those in traditional planning or social work.

The schedule of courses allows students to experience direct service in the first year so that course work planning is supplemented by a knowledge of consumers, service delivery, etc. Courses for both schools are taken simultaneously, intermingling social work and planning content. Two years of field practicums in social work provide in-depth exposure to social service issues from both planning and direct service perspectives, thus satisfying some of the planning laboratory/workshop requirements and eliminating the need for a separate planning internship requirement.

Requirements

Requirements for completion of the MSW/MPI degree are 83 units including 51 units in social work and 32 units in planning. Students must select a community organization, planning and administration concentration in the second year of their social work program.

SOCIAL WORK		UNITS
SOWK 503	Human Behavior and the Social Environment I	3
SOWK 505	Human Behavior and the Social Environment II	3
SOWK 534	Policy and Practice in Social Service Organizations	3
SOWK 543	Social Work Practice with Individuals	4
SOWK 545	Social Work Practice with Families, Groups and Complex Cases	2
SOWK 562	Social Work Research	3
SOWK 586ab	Field Practicum	3-3
SOWK 587ab	Integrative Learning for Social Work Practice	2-2
SOWK 599	Special Topics (approved by concentration)	3
SOWK 611*	Leadership in the Social Work Profession and Organization: Theory and Practice	3
SOWK 629	Evaluation of Research: Community Organization, Planning and Administration	3
SOWK 648	Management for Community and Social Services	3
SOWK 686ab	Field Practicum II	4-4

and one of the following:

SOWK 603	Merging Policy, Planning, and Research for Change in Families and Children's Settings	3
SOWK 636	Social Policy: Health Care	3
SOWK 672	Context and Policies of Social Work Practice in Work Environments	3

**Students who have taken a leadership course in PPD are not required to take SOWK 611.*

PLANNING		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 529	Legal Environment of Planning	2

PPD 533	Planning History and Urban Form	2
PPD 628	Urban Planning and Social Policy	4

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

Planning Studios: PPD 531L (4) for 4 units.

Electives: 8 units of elective courses taken within the Price School of Public Policy.

Dual degree students, like all other MPI students, must take a comprehensive examination and fulfill the internship requirement.

Master of Public Policy/Juris Doctor

The Price School of Public Policy and the USC Gould School of Law offer a dual degree that enables qualified students to earn both a Juris Doctor and a Master of Public Policy in approximately four years of study.

The dual degree allows students to acquire a blend of the analytic skills of public policy and an understanding of legal institutions and processes. This combination of knowledge is well suited for law students who want to affect the policy-making process and craft legislation to aid in the achievement of public policy goals. It is equally appropriate for prospective policy analysts who are interested in law and public policy.

Students must apply to, and be accepted by, both schools. They may be accepted to the dual degree at the time of their acceptance to the law school or at the beginning of their second year of law school. Dual degree students spend the first year of the program completing the required first year of law school. The remaining units of law school courses and the required 36 units of core MPP courses are taken by students in the second through fourth years.

Students are required to complete 114 units of course work, 78 units in the law school and 36 units in the Price School of Public Policy. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honor programs. In addition, the MPP program has a statistics prerequisite. Please see the MPP degree in the Price School of Public Policy section of the catalogue for the requirements.

The required MPP courses are PPD 500, PPD 501ab, PPD 554, PPD 555, PPD 558, PPD 560, PPD 561ab; 4 units of a management elective (PPD 541, PPD 545, PPD 654, PPD 656, PPD 662, PPD 673, PPD 675, PPD 690 or PPDE 645); and 8 units of an analytic elective (COMM 650, PM 542, PPD 542, PPD 557, PPD 587, PPD 617, PPD 647, PPDE 661, SOCI 621 or SSCI 581).

Master of Real Estate Development/Juris Doctor

The Juris Doctor/Master of Real Estate Development dual degree program provides the opportunity for in-depth study of legal issues and real estate development. The increasingly regulatory environment developers work within demands that professionals in the real estate industry have a strong understanding of the legal system. Lawyers who plan to specialize in real estate law will benefit from a thorough understanding of the development process, including financial, planning, marketing and design issues. Application must be made to both the USC Gould School of Law and the USC Price School of Public Policy. This program normally requires three years (including one summer) of full-time study in residence to complete.

Requirements for completion of the dual degree program are 112 units, including 78 units in law and 34 units in planning and development. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honors programs.

LAW SCHOOL		UNITS
LAW 502	Procedure I	4
LAW 503	Contracts	4
LAW 504	Criminal Law	3

LAW 505	Legal Profession	3
LAW 507	Property	4
LAW 508	Constitutional Law I	4
LAW 509	Torts I	4
LAW 512	Law, Language, and Ethics	3
LAW 515	Legal Research, Writing, and Advocacy I	2
LAW 516	Legal Research, Writing and Advocacy II	2
LAW electives including fulfillment of the upper division writing requirement and skills course		45

REAL ESTATE DEVELOPMENT		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
RED 509	Market Analysis for Real Estate	4
RED 542	Finance of Real Estate Development	3
RED 544	Real Estate Capital Markets	2
RED 546	Applications of Real Estate Finance to Problems of Development	3
RED 547	Project Management and Construction	2
RED 551	The Approval Process	4
RED 573	Design History and Criticism	2
RED 574	Building Typologies	2
RED 575L	Community Design and Site Planning	4
RED 598	Real Estate Product Development	2
Elective from the Price School of Public Policy		2

Students are required to complete a comprehensive examination administered by faculty members from both the law school and the Price School of Public Policy.

Students are required to complete a comprehensive examination administered by faculty members from both the law school and the Price School of Public Policy.

Students must have an approved laptop computer as required by instructors and must demonstrate calculator and spreadsheet skills.

Master of Real Estate Development/Master of Business Administration

The Master of Real Estate Development/Master of Business Administration dual degree program enables students to expand their skills in planning, land development, marketing, decision sciences, accounting, management, finance and economics. The program is targeted for students who have a clear career goal of becoming real estate developers but who lack formal training in business. The program normally requires two years (including summers) of full-time study in residence to complete.

Requirements

A total of 82 units is required. Required courses include: all required courses in an MBA program; FBE 565 Economics of Urban Land Use — Feasibility Studies (3 units); FBE 588 Advanced Real Estate Law (3 units); graduate business electives sufficient to bring the total units completed in the USC Marshall School of Business to at least 48; and Policy, Planning, and Development courses (34 units). Dual degree students may not count courses taken outside the USC Marshall School of Business toward the 48 units.

Students must have an approved laptop computer as required by instructors and must demonstrate calculator and spreadsheet skills.

REAL ESTATE DEVELOPMENT	UNITS
--------------------------------	--------------

PPD 500	Intersectoral Leadership	2
RED 509	Market Analysis for Real Estate	4
RED 542	Finance of Real Estate Development	3
RED 544	Real Estate Capital Markets	2
RED 546	Applications of Real Estate Finance to Problems of Development	3
RED 547	Project Management and Construction	2
RED 551	The Approval Process	4
RED 573	Design History and Criticism	2
RED 574	Building Typologies	2
RED 575L	Community Design and Site Planning	4
RED 598	Real Estate Product Development	2
Elective from the Price School of Public Policy		4

Comprehensive Examination: Students are required to complete a comprehensive examination administered by faculty members from both the Marshall School of Business and the Price School of Public Policy.

Master of Public Administration/Master of Science in Gerontology

The Master of Public Administration/Master of Science in Gerontology (MPA/M.S.) dual degree offers students interested in management of agencies and institutions the opportunity to gain in-depth knowledge of the administrative and organizational processes and management skills necessary for the effective delivery of services to older persons.

In the MPA/M.S. dual degree, students spend their first year taking the required courses in the USC Davis School of Gerontology. The research course, GERO 593 Research Methods and the capstone course GERO 555 Integrating Gerontology: A Multidisciplinary Approach, are taken in the USC Davis School of Gerontology. The student begins courses in the Price School of Public Policy during the second semester of the first year.

Two versions of this dual degree are available, one with a general orientation and one with an emphasis on health services administration. Students must apply to both schools and, if accepted to both, participate in a specially designed program combining course work from both schools.

Curriculum requirements for the general focus dual degree are detailed in the USC Davis School of Gerontology section of this catalogue. Students are encouraged to seek advisement as they plan their actual programs, since curriculum changes may occur.

GERONTOLOGY REQUIREMENTS		UNITS
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Development Psychology	4
GERO 530	Life Span Development Sociology	4
GERO 540	Social Policy and Aging	4
GERO 550	Administration and System Management in Programs for Older Adults	4
GERO 555	Integrating Gerontology: A Multidisciplinary Approach	4
GERO 591	Field Practicum	8
GERO 593	Research Methods	4
Gerontology elective		4
		40

PUBLIC ADMINISTRATION REQUIREMENTS		UNITS
PPD 500	Intersectoral Leadership	2

PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 540	Public Administration and Society	4
PPD 541	Public Financial Management and Budgeting, or	
PPDE 645	Financial Management of Nonprofit Organizations	4
PPD 542	Policy and Program Evaluation, or	
PPD 557	Modeling and Operations Research	4
PPD 545	Human Behavior in Public Organizations	4
PPD 546	Capstone in Public Administration	4
Elective		2
		28

Program Adaptation

For the M.S. in Gerontology, 12 units of electives are waived as well as GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program have a primary professional focus in public administration. For the Master of Public Administration, 12 units of gerontology courses are used as the substantive specialization.

Master of Health Administration/Master of Science in Gerontology

Gerontology and health administration students can specialize in health care administration (profit and non-profit) through the dual degree with the USC Davis School of Gerontology and the USC Price School of Public Policy's Health Administration Program. Students in the dual degree program must be admitted by both academic units and complete 78 units of post-graduate academic work.

GERONTOLOGY REQUIREMENTS		UNITS
GERO 510	Physiology of Development and Aging	4
GERO 520	Life Span Developmental Psychology	4
GERO 530	Life Span Developmental Sociology	4
GERO 540	Social Policy and Aging	4
GERO 550	Administration and System Management in Programs for Older Adults	4
GERO 555	Integrating Gerontology: A Multidisciplinary Approach	4
GERO 591	Field Practicum	8
GERO 593	Research Methods	4
		36

HEALTH ADMINISTRATION REQUIREMENTS		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501a	Economics for Policy, Planning and Development	2
PPD 509	Problems and Issues in the Health Field	4
PPD 510a	Financial Management of Health Services	4
PPD 513	Legal Issues in Health Care Delivery	2
PPD 514	Economic Concepts Applied to Health	4
PPD 515	Strategic Management of Health Organizations	4
PPD 516	Financial Accounting for Health Care Organizations	4
PPD 517	Concepts and Practices in Managing Health Care Organizations	2
PPD 518	Quality of Care Concepts	2
PPD 545	Human Behavior in Public Organizations	4
PPD 558	Multivariate Statistical Analysis	4
PPD 601	Management of Long-Term Care Organizations	4

Statistics: The statistics requirement for dual degree students is the same as those that apply to the Master of Health Administration.

Program Adaptation: The USC Davis School of Gerontology will waive GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program will have a primary professional focus in health administration.

Students enrolled in the dual degree are not required to take PPD 511 (as opposed to the stand alone MHA degree students) because they develop the necessary proficiencies related to their career goals in long term care administration through other courses such as GERO 550, GERO 591 and GERO 593. In addition, PPD 601 is required for the dual degree (and not the stand alone MHA program) because most of these students will work in long-term care facilities and this course is critical for success in that market.

Any course substitutions are done by petition on an individual basis and should be part of a carefully developed course of study. The USC Price School of Public Policy should be consulted concerning this program of study.

Master of Public Administration/Juris Doctor

The dual degree program with the USC Gould School of Law and the USC Price School of Public Policy enables qualified students to earn a Juris Doctor/Master of Public Administration (J.D./MPA) in approximately four years of study.

Some of the topics covered in the law school are also covered in the program of the Price School of Public Policy, so some credit toward the law degree may appropriately be given for specified graduate work taken in the Price School of Public Policy. Similarly, some credit toward the master's degree may appropriately be awarded for certain work completed in the law school. The goal of the program is to encourage law students to gain a recognized competence in administration, which has a direct relevance for the roles lawyers are asked to play in society.

Students must apply to, and be accepted by, both schools. They may be accepted to a dual degree program at the time of their acceptance to the law school or at the beginning of their second year of law school. The program requires the completion of the required first year of law school and the fulfillment of a statistics prerequisite, which can be met by passing an undergraduate inferential statistics class with a grade of B or better at an approved university within three years of matriculation or taking PPD 502x Statistical Foundations for Public Management and Policy and completing with a grade of "B" or better. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honors programs.

Credit toward the law degree may not be given for graduate work completed prior to the completion of the first year of law school. The Price School of Public Policy, on the other hand, may allow some credit toward the MPA for approved work completed prior to the first year of law school.

Students are required to complete 97 units of course work.

Curriculum Requirements

First Year Required law school courses

Second and Third Year The remaining 39 units of law school courses, 32 additional units of public administration courses. These courses are from the MPA core (PPD 500, PPD 501ab, PPD 540 and PPD 546) and management competencies (PPD 542 or PPD 557, PPD 541 or PPDE 645, PPD 545) and 6 units of PPD electives.

Master of Public Administration/Master of Social Work

The Master of Public Administration/Master of Social Work (MPA/MSW) dual degree offers students interested in careers as administrators of social agencies the opportunity to prepare for social work while developing the administrative capabilities necessary in the public sector.

The MPA/MSW requires two calendar years of full-time study. The first academic year is devoted to the standard social work first year curriculum. During the second year, the curriculum combines social work and public administration course work. The curriculum for both summers will be in public administration.

Students can enter this program only with the written consent of both schools. Students who apply initially to the USC School of Social Work must declare their intention to pursue the MPA/MSW dual degree at the time of their application. If admission is approved, such students will be admitted to the dual degree program. Social work students selecting this program are required to select the Community Organization, Planning and Administration concentration in their second year program.

Students must complete 82 units (54 in social work and 28 in public administration).

SOCIAL WORK (54 UNITS)		UNITS
SOWK 503	Human Behavior and the Social Environment I	3
SOWK 505	Human Behavior and the Social Environment II	3
SOWK 534	Policy and Practice in Social Service Organizations	3
SOWK 535	Social Welfare	3
SOWK 543	Social Work Practice with Individuals	4
SOWK 545	Social Work Practice with Families, Groups and Complex Cases	2
SOWK 562	Social Work Research	3
SOWK 586ab	Field Practicum	3-3
SOWK 587ab	Integrative Learning for Social Work Practice	2-2
SOWK 599	Special Topics (approved by concentration)	3
SOWK 611*	Leadership in the Social Work Profession and Organizations: Theory and Practice	3
SOWK 629	Evaluation of Research: Community Organization, Planning and Administration	3
SOWK 639	Social Policy for Managers, Planners, and Community Organizers	3
SOWK 648	Management for Community and Social Services	3
SOWK 686ab	Field Practicum II	8

*Students who have taken a Price leadership course are not required to take SOWK 611.

PUBLIC ADMINISTRATION (28 UNITS)		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 540	Public Administration and Society	4
PPD 541	Public Financial Management and Budgeting, or	
PPDE 645	Financial Management of Nonprofit Organizations	4
PPD 546	Capstone in Public Administration	4
PPD electives**		10

**Electives in public administration need to be approved by the graduate adviser in the Price School of Public Policy.

Master of Public Administration/Master of Arts in Jewish Nonprofit Management

The Master of Public Administration/Master of Arts in Jewish Nonprofit Management (MPA/M.A.) has been developed, in cooperation between the USC Price School of Public Policy and the HUC-JIR School of Jewish Nonprofit Management, to prepare those students who want to make a career in Jewish nonprofit management. Students receive a solid academic and experiential foundation in the American Jewish experience — its history, culture and structure — combined with the theory and practice of community organization and administration.

Students must complete 88 units of course work, 36 in public administration, and must serve two academic years in supervised fieldwork. There is an opportunity to spend either 12 months in Sacramento, California, or Washington, D.C. At these sites, students attend classes while serving internships in the offices of politicians,

lobbyists or other advocates.

Students must meet admission requirements and be admitted by both the Price School of Public Policy and HUC-JIR's School of Jewish Nonprofit Management (formerly the HUC-JIR School of Jewish Communal Service).

Curriculum Requirements

The program begins in June of each year and continues for the next 24 months. Students are expected to work out individual course plans with advisers from each school.

In addition to applying to the Price School of Public Policy, those interested in the program should contact the Office of Admissions, Hebrew Union College — Jewish Institute of Religion, 3077 University Avenue, Los Angeles, CA 90007-3796, for comprehensive information about its requirements.

Public administration course work may be taken in Los Angeles or Sacramento. In Sacramento, a student will complete the Price core and elective courses, will take independent study with an HUC professor, and will serve in an internship while enrolled in HUC fieldwork classes.

PUBLIC ADMINISTRATION REQUIREMENTS		UNITS
PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 540	Public Administration and Society	4
PPD 541	Public Financial Management and Budgeting, or	
PPDE 645	Financial Management of Nonprofit Organizations	4
PPD 545	Human Behavior in Public Organizations	4
PPD 546	Capstone in Public Administration	4
PPD electives*		14

AN ELECTIVE IS DEFINED AS ONE OF THE FOLLOWING COURSES (SELECT 14 UNITS):

PPD 675	Nonprofit Management and Leadership	4
PPD 684	Leadership Development in the Public and Nonprofit Sectors	2
PPD 685	Human Resources Management in Public and Non-Profit Sectors	2
PPD 689	The Nonprofit Sector and Philanthropy	4
PPDE 646	Grant Writing Practicum	2
PPDE 649	International Development NGOS: Theory, Policy and Management Issues	4

Select 14 units from the list above. Substitutions may be requested by petition to the graduate adviser in the Price School of Public Policy.

Fieldwork Requirement

Throughout the program, students are expected to serve in supervised internships. Fieldwork is administered cooperatively by the faculties of HUC-JIR School of Jewish Nonprofit Management and the Price School of Public Policy.

Program Adaptation

Students enrolled in the dual degree are not required to take a research methods course (PPD 542, PPD 557 or PPD 666) in the MPA program (as opposed to the stand alone MPA degree students) because they develop the necessary proficiencies in research methods in the course offered in the HUC-JIR School of Jewish Nonprofit Management (CS 562 Jewish Social Research: Trends and Analysis). Students in the dual degree may elect an alternative four units within the Price School.

Regulations Concerning a Second Master's Degree

For rules governing a second master's degree, see the Requirements for Graduation page. In accordance with these policies, transfer credits will be granted only on the basis of a written petition to the MPA program

coordinator and on the basis of credits recognized by USC in a Transfer Credit Statement.

Teaching Opportunities

Students may want to prepare for teaching as well as for public service. By careful planning in the upper division of the undergraduate degree and during the graduate years, requirements for a bachelor's degree, a master's degree and the university recommendation for a community college instructorship may be met without unnecessary duplication of effort and waste of time. Those interested in teaching should consult advisers in both the USC Price School of Public Policy and the USC Rossier School of Education before beginning upper division and graduate work.

Public Administration Professional Sequence with the Viterbi School of Engineering

Regulations governing the Master of Science in Civil Engineering permit some candidates for this degree to take 12 units outside the School of Engineering. Those who wish to do so may take 12 units in public administration. Two courses in this sequence must be selected from among PPD 500, PPD 501ab, PPD 540, PPD 541, PPD 545, PPD 546. One course in this sequence must be selected from among PPD 542, PPD 557, PPD 666. PPD 541 requires PPD 502x and statistics as prerequisites. PPD 546 should be taken last if elected.

Price School of Public Policy

Dual Degree Programs

Joint Degree Programs

Master of Long Term Care Administration

This program is designed to prepare competent individuals to administer the long term care needs of America's elderly population. It is jointly offered by the Davis School of Gerontology, the Marshall School of Business, and the Price School of Public Policy. For information see the USC Davis School of Gerontology.

Master of Science in Health Systems Management Engineering

For information, see Industrial and Systems Engineering.

Price School of Public Policy

Doctoral Degrees

The USC Price School of Public Policy offers the Doctor of Philosophy in Public Policy and Management (Ph.D.), the Doctor of Philosophy in Urban Planning and Development (Ph.D.) and the Doctor of Policy, Planning, and Development (DPPD). The Ph.D. degrees are designed to prepare individuals for university level teaching and research. The DPPD degree is intended to develop a high level of conceptual and research competence for professional leadership in planning and development. The DPPD is administered by the Price School of Public Policy; the Ph.D. programs are administered by the Graduate School and the faculty of the Price School of Public Policy. Ph.D. students must consult the Graduate School section of this catalogue for regulations and requirements pertaining to its degrees. Students should also consult the Academic Policies section of this catalogue.

Completion of the requirements for all these degrees is assumed to take a minimum of three years of approved graduate study and research beyond the bachelor's degree. For the Ph.D. student, a minimum of 24 graduate units completed in residence on the University Park Campus in Los Angeles is required. DPPD students are required to complete a minimum of 24 units at the University Park Campus. Full-time study is represented by

enrollment in 6 units during the semester. Usually the school and the student's qualifying exam committee insist on a clear and mutually understood commitment of time and energy by the student to ensure significant involvement in the doctoral learning experience. For university policies regarding continuous enrollment, leave of absence and readmission, see the Requirements for Graduation page.

Application and Admission

Admission to graduate standing for the Ph.D. or DPPD is recommended by the school's admissions committee acting under guidelines established by the Graduate School as outlined in the Graduate School section and the Graduate Admission section. In addition to those guidelines, DPPD students are expected to have a minimum of five years of substantial relevant experience. Students intending to apply should direct questions about the program and all materials for the admission application to Doctoral Programs, Office of Student Affairs, RGL 111, Price School of Public Policy, University of Southern California, University Park, Los Angeles, CA 90089-0626.

The deadline for applications for admission to the Ph.D. and DPPD programs is December 1. Applications for admission are made once each year for fall semester admission.

The admission decision for Ph.D. students is made using criteria which include verification that the applicant has a bachelor's degree from an accredited college or university, has maintained a high grade point average in the last 60 units of undergraduate work, and has earned a competitive score on the verbal and quantitative portions of the Graduate Record Examinations (GRE). Other elements of the applicant's educational and experiential background are also evaluated, including performance in other advanced degrees. DPPD applicants must also provide evidence of at least five years of practical administrative or other relevant experience. The GRE and GMAT scores are neither accepted nor required for the DPPD program.

Each applicant should submit the following: (1) one copy of official transcripts of all previous college and university work (be sure that these official transcripts show an awarded degree where appropriate); (2) copies of GRE scores; (3) a 1,000-word essay discussing the applicant's background and reasons for wanting to pursue a Ph.D. degree and identifying his or her personal, educational and professional goals; (4) an up-to-date resume, including academic and professional accomplishments; (5) three letters of recommendation, two from previous instructors, the other from an instructor or from a professional supervisor or colleague. The letters should indicate the applicant's academic and professional accomplishments and potential; (6) a completed USC Graduate Admission Application, along with the nonrefundable application fee; (7) a writing sample of approximately 1,000 words (in addition to the applicant essay); and (8) a completed Price School of Public Policy Supplemental Graduate Application. International applicants are asked to submit additional information. Applicants should carefully choose, and clearly state, the degree objective (Ph.D. or DPPD) for which they are applying, since different sets of admissions criteria exist for each of them.

Transfer Credits

The application of any available transfer credits toward a graduate degree at USC will be determined by the faculty and the dean of the Price School of Public Policy, based on the semester units available for transfer as shown in the Transfer Credit Statement (determined by the USC Office of Academic Records and Registrar). Refer to Admission with Advanced Standing for more information.

Deferral of Enrollment

Admission to the university is granted for a specified semester, and it is expected that students will begin their programs during that semester. The school will normally allow students to defer their enrollment up to one year from the admission semester. Students who wish to defer enrollment should notify the school in writing no more than 30 days after the beginning of the semester of admission. Students who do not inform the school in a timely manner of their intent to defer enrollment may be required to reapply for admission.

Please note that more stringent regulations apply to international students. See the Admission section of this catalogue.

Admission to Candidacy

Acceptance to graduate standing does not in itself imply that the student is admitted or will be admitted to candidacy for an advanced degree. Application for admission as a candidate for an advanced degree is a separate

and subsequent step. See the Graduate School section of this catalogue.

Admission of International Students

All international applicants for admission to doctoral programs should submit materials to Doctoral Programs, Recruitment and Admissions Office, RGL 111, Price School of Public Policy, University of Southern California, University Park, Los Angeles, CA 90089-0626. See the Admission of International Students section of this catalogue.

Screening

Ph.D. students are required to have a 3.3 overall G.P.A. in first-year courses to continue in the program. DPPD students are required to pass a screening procedure after 16 units of course work. The procedure is designed to ensure that only those students who have demonstrated intellectual and scholarly potential continue in the program.

There are differences between the screening process for Ph.D. and DPPD students. Students should consult the relevant faculty director of the doctoral program in which they are enrolled.

Qualifying Exam Committee (for the Ph.D. programs)

A qualifying exam committee assists the student in outlining an academic program leading toward the degree. Students will form an initial qualifying exam committee by the end of the first fall semester. The committee might not yet include the Graduate School representative from outside the Price School, but must include at least three tenure track the Price School faculty members, one of whom is identified as the chair. This committee bears responsibility for counseling the doctoral student, for approving a course schedule and preliminary and qualifying examinations, and for recommending the student for admission to candidacy. After approval of the student's program and proposed time schedule, the program is submitted in writing to the relevant director. This should be accomplished by the beginning of the second year, following successful screening.

The complete qualifying exam committee must be in place no later than the third semester. The chair should have recognized expertise in the qualifying area and should be a regular participant in the qualifying examination committee for that area. The majority of the members of the qualifying exam committee (typically at least three out of five) should be experts in the area in which the student is qualifying and should be regular participants in the qualifying examination committee. The remaining members should have a clear interest in this area with the exception of the outside member whose primary responsibility is to serve as the representative of the Graduate School, ensuring the university's commitment to the equitable treatment of all students and that the highest quality education standards are upheld.

Students will formalize their relationship with their committees through the development of a work plan which specifies all courses, degree progress, seminar attendance and what was learned from these sessions as well as a research plan that articulates major research questions being explored. At the end of the first year of study, the qualifying exam committee chair reviews and approves the work plan. At the end of the second year, the full qualifying exam committee reviews the work plan and the second year paper.

Price School of Public Policy

Doctoral Degrees

Doctor of Philosophy in Public Policy and Management

Doctor of Philosophy in Urban Planning and Development

The Price School offers two Ph.D. programs. Both the Doctor of Philosophy (Ph.D.) in Public Policy and Management and the Doctor of Philosophy (Ph.D.) in Urban Planning and Development degree programs are

under the jurisdiction of the Graduate School. Students should also refer to the Graduate and Professional Education and Graduate School sections of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

The Ph.D. programs in the Price School both emphasize rigorous programs of advanced study and research, stressing qualitative or quantitative analysis and the theoretical foundations of their field of study. The programs are designed to provide students with the opportunity to develop their own specialization and expertise in either major field — public policy and management or urban planning and development — while also offering them a breadth of knowledge in an especially rich intellectual environment.

Curriculum Requirements

The Doctor of Philosophy in Public Policy and Management and the Doctor of Philosophy in Urban Planning and Development are administered by the doctoral committee of the school. The Ph.D. program in Public Policy and Management requires the completion of 60 units of course work, comprising the following elements: master's core in a substantive field (15–17 units), theoretical core (11–12 units), methodology (10–12 units), field/specialization courses (12 units), teaching seminar (2 units), research seminar (4 units) and dissertation (4 units minimum). The Ph.D. program in Urban Planning and Development requires the completion of 60 units of course work, comprising the following elements: master's core (14–16 units), doctoral core (8 units), methodology (10–12 units), field/specialization courses (16 units), teaching seminar (2 units), research seminar (4 units), and dissertation (4 units minimum).

Ph.D., Public Policy and Management

Core Curriculum

THEORETICAL CORE (11–12 UNITS)*		UNITS
PPD 711	Theoretical Foundation of Public Management	4
PPD 712	Seminar in Public Policy	4
PPD 715*	Political Economy and Institutional Analysis	4

*Students may petition to substitute PPD 715 with a different theory course derived from a discipline. Examples include MOR 602, ECON 500, etc.

METHODOLOGY (10–12 UNITS)		UNITS
PPD 706	Paradigms of Research and the Design of Inquiry	4
PPD 558	Multivariate Statistical Analysis, or	
ECON 513	Practice of Econometrics	4
One additional methods course selected with qualifying exam committee approval		2-4

Field Courses (12 units)

Students select 12 units of field courses which can be used to develop disciplinary expertise related to specialization interest or additional methodological expertise. Fields are developed with qualifying exam committee approval, can include any combination of the Price School and outside courses and are unique to each student.

Research Seminar (4 units)

Students will take PPD 710ab (2 units each, 4 total units), the Price School research seminar course.

Teaching Seminar (2 units)

Students will take two semesters of the teaching seminar, PPD 700ab (1 unit each, 2 total units).

Students entering the doctoral program without a relevant master's degree in public administration or public policy or a related field will be required to complete prerequisites (15–17 units) relevant to their program.

For the Ph.D. in Public Policy and Management, possible courses include:

PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 525	Statistics and Arguing from Data	2
PPD 540	Public Administration and Society	4
PPD 542	Policy and Program Evaluation	4
PPD 555	Public Policy Formulation and Implementation	4

Ph.D., Urban Planning and Development

Core Curriculum

THEORETICAL CORE (8 UNITS) UNITS

PPD 713	Advanced Planning Theory	4
PPD 714	Advanced Urban Development	4

METHODOLOGY (10–12 UNITS) UNITS

PPD 706	Paradigms of Research and the Design of Inquiry	4
Two additional methods courses selected with qualifying exam committee approval		6-8

Specialized Field Courses (16 units)

Students take a minimum of four courses to develop their specialized area of study. Courses may be taken in the Price School or other USC units. Students, working with their qualifying exam committees, have considerable flexibility in forming specializations.

Research Seminar (4 units)

Students will take PPD 710ab (2 units each, 4 total units), the Price School research seminar course.

Teaching Seminar (2 units)

Students will take two semesters of the teaching seminar, PPD 700ab (1 unit each, 2 total units).

Students entering the doctoral program without a relevant master's degree in urban planning or a related field will be required to complete prerequisites (16–18 units) relevant to their program.

For the Ph.D. in Urban Planning and Development, possible courses include:

PPD 500	Intersectoral Leadership	2
PPD 501ab	Economics for Policy, Planning and Development	2-2
PPD 524	Planning Theory	2
PPD 525	Statistics and Arguing from Data	2
PPD 526	Comparative International Development	2
PPD 527	The Social Context of Planning	2
PPD 533	Planning History and Urban Form	2
PPD 634	Institutional and Policy Issues in Transportation	4

Admission with Advanced Standing

Students entering the doctoral program with a master's degree from an accredited institution in public management/administration, public policy, planning, or urban development or related field may be admitted with advanced standing to either Ph.D. program. In the Public Policy and Management program, students must complete a minimum of 39–41 units of doctoral classes beyond that graduate degree, exclusive of 794ab doctoral dissertation units, for a minimum of 43–45 semester units. In the Urban Planning and Development program, students must complete a minimum of 40–42 units of doctoral classes beyond that graduate degree, exclusive of 794ab doctoral dissertation units, for a minimum of 44–46 semester units. Additional course work may be

required if deemed necessary by the student's faculty following the screening examination.

A maximum of 6 units of transfer credit may be applied toward a doctoral degree with advanced standing. Only course work not used to complete the master's degree described above is available for transfer credit. No exceptions are allowed.

Qualifying Exam Committee

Students will form an initial qualifying exam committee by the end of the first fall semester, which officially oversees the development of the student's academic program through the qualifying examination. Five tenure or tenure track committee members are designated to provide guidance in the field developed by the student. A minimum of three members, including at least one tenured member, must be from among the faculty participating in this Doctor of Philosophy program, and at least one member must be from outside the Price School of Public Policy. Students should refer to the Graduate School section regarding the qualifying exam committee and the outside member. The complete qualifying exam committee must be in place no later than the third semester.

Screening Procedures

Students must have a 3.3 overall GPA in first-year courses to continue in the program.

Work Plans

At the end of each spring semester, the student submits an academic work plan for the coming year to his or her qualifying exam committee chair. The plan should include courses, degree progress, seminar attendance and what was learned from those, and a research plan that articulates the major research questions being explored. At the conclusion of year one, the chair reviews and approves the work plan and at the end of year two, the chair reviews the work plan and the second year paper.

Qualifying Examination

The qualifying exam committee prepares a comprehensive written examination covering the fields of study. Following completion of the written portion, the entire committee conducts an oral examination of the student, focusing on material both complementary and supplementary to the written examination but relevant to the field and overall program selected by the student. Upon passing both portions of the qualifying examination, the student becomes a candidate for the Doctor of Philosophy degree. The qualifying exam will occur in the fall of year three.

Proposal Defense

Students are expected to have a proposal defense within one year of passing the qualifying exam.

Doctoral Dissertation

The dissertation is based on original research. The research is supervised by a dissertation committee of three or more regular USC faculty, at least one of whom must be from outside the Price School of Public Policy. A two-semester minimum registration in PPD 794 is required of all candidates. Students must maintain continuous registration until completion of the dissertation.

Defense of the Dissertation

Oral defense of the dissertation before the dissertation committee is usually made on a preliminary draft.

Format for Theses and Dissertations

All theses and dissertations submitted in fulfillment of requirements for graduate degrees must conform to university regulations with regard to format and method of preparation. Regulations for Format and Presentation of Theses and Dissertations is available from the Graduate School, Grace Ford Salvatori 315, or online at the Graduate School Website.

General Requirements

Price School of Public Policy

Doctoral Degrees

Doctor of Policy, Planning, and Development

Planning and development are critical concerns of the nation and the world today. Whether redesigning the health care system, reproducing economic innovation in our central cities, or facilitating economic and social relationships across the globe, planners and developers are on center stage.

Leading the way into the next century will be a group of experienced practitioners who have updated and expanded their professional achievements by developing additional conceptual and research competency through the Doctor of Policy, Planning, and Development (DPPD).

The goals of the program are: to create a unique educational environment that will forge these professionals into a cadre for urban change; to develop urban professionals who can merge development and planning tools to design new integrative policy planning and implementation systems; to establish a set of new problem solving paradigms for examining and altering planning and development decision-making and to equip professionals with sophisticated analytical tools and a sharper cultural awareness so they can practice planning and development anywhere in the world.

Admission

The program is intended for people with considerable professional experience and intellectual interests. Requirements for admission include: GPA of 3.0 (A = 4.0) for all post-high school academic work, and, for international students, submission of TOEFL or IELTS scores; five letters of recommendation, including at least one academic and one professional; five or more years of professional experience; a resume and, if appropriate, a portfolio; and a study prospectus detailing a proposed field of study. Guidelines for preparing the prospectus are included in the application package. Additional requirements for international students are listed under Admission of International Students. The GRE and GMAT are neither accepted nor required for the DPPD program. Each application will be examined with the aim of admitting an applicant whose study prospectus suggests the ability and focus to produce an innovative approach to professional practice.

Applicants are expected to hold a master's degree in architecture, landscape architecture, public administration, real estate development, urban/city/regional planning, urban design or a closely related field. Applicants with master's degrees in other fields will be expected to complete foundation courses prior to entering the degree's core classes.

Upon admission to the program, each student will be assigned a faculty adviser who will oversee his or her program.

Curriculum Requirements

The Doctor of Policy, Planning, and Development is administered by the Price School of Public Policy for full-time and part-time students. The DPPD requires completion of 60 units of course work comprising the following elements:

REQUIREMENTS	UNITS
Foundation courses	20
Core courses	8
Methods course	4

Field of study	20
Conspectus preparation	4
Planning, design and development project	(minimum) 4

Foundation Courses

Up to 20 units of foundation courses are required. These courses may be taken from the school's master's degree programs or, with prior approval, from other USC graduate degree programs. Students who hold a related master's degree may be admitted with advanced standing. Students are required to complete 36 units of course work and 4 units of PLUS 694 (project units).

REQUIRED COURSES UNITS

<i>Core Courses</i>		
PLUS 603	Planning and Development Paradigms	4
PLUS 623	Politics of Planning and the Urban Environment	4

Conspectus Preparation

PLUS 692	Conspectus Preparation	4
----------	------------------------	---

Methods

A student's methods course should be approved by the student's Professional Advisory Committee. Possible courses include:

PLUS 612	Analysis of Quantitative Data for Planning and Development	4
PPD 627	Design Skills for Urban Planners	4
PPD 632	Planning Analysis and Evaluation	4
PPD 707	Survey Research Methods	4
PPD 708	Qualitative Methods	4

Screening Process

As quickly as possible, the student will form a Professional Advisory Committee consisting of the student's adviser and two other school and/or USC faculty and up to five professionals whose activities are related to the student's. This committee shall oversee the student's program to its conclusion.

At the completion of no more than 16 units beyond the foundation courses and/or PLUS 603 and PLUS 623, students will complete a written examination which will consist of responding to a short list of specific planning and development problems using appropriate professional paradigms. The student will then meet with the Professional Advisory Committee to formally review the student's progress toward the degree.

Field of Study

In consultation with their faculty adviser and Professional Advisory Committee, students will craft a field of study related to the professional arena of practice. The field may or may not reflect standard academic boundaries, such as transportation and land use planning. Students should take advantage of USC's resources in developing the field, especially taking into consideration the relationship of practice to theory and context. Twenty units of course work are required for the field of study, 8 of which may be taken outside the Price School of Public Policy.

Conspectus Preparation

In PLUS 692 students complete a professional conspectus that defines their field of study, its structure and place within professional practice, and other related questions. The conspectus will be presented to the student's Professional Advisory Committee for acceptance. Only after it is accepted may the student proceed to the Planning, Design and Development Project.

Planning, Design and Development Project

The capstone project of the DPPD is the student's completion of the Planning, Design and Development Project (PDDP). The PDDP is a study of an aspect, site, issue or other such element of professional practice. Each PDDP

should be designed to present an innovative or original contribution to the practice of planning and development. The parameters of the PDDP are intentionally left wide, allowing the project to be produced as solely text, or text in conjunction with film, computer program, design or another multimedia format.

The PDDP is supervised by the student's Professional Advisory Committee. Students must maintain continuous registration in the PLUS 694 series until completion of the PDDP. Upon completion of an approved draft of the PDDP, students will present their findings in an open session, but the Professional Advisory Committee is the sole evaluator.

General Requirements

This degree is administered by the Price School of Public Policy. At least 24 units must be fulfilled in residence at USC. The total length of the study must not exceed six academic years. Students are encouraged to actively participate in a non-credit Price School of Public Policy doctoral workshop. Policies regarding time limits, leave of absence, scholarship standing, academic warning, and other issues not directly addressed are consistent with those of the Graduate School. Please consult the Academic Policies, Graduate and Professional Education and the Graduate School sections for additional information.

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

Policy, Planning and, Development Courses of Instruction

- Health Care Management (HMGT)
- Urban and Regional Planning (PLUS)
- Policy, Planning, and Development (PPD)
- Policy, Planning, and Development — Expanded (PPDE)
- Public Administration (PUAD)
- Real Estate Development (RED)

Military Courses of Instruction

- Aerospace Studies (AEST)
 - Military Science (MS)
 - Nautical Science (NAUT)
 - Naval Science (NSC)
-

Price School of Public Policy

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

HEALTH CARE MANAGEMENT (HMG)

HMG 510 The Dynamics of Health Care Leadership (4) A five-day residential provides an intensive, multi-faceted learning experience in leadership, communication, managed care, systems thinking, and the health care environment. Open to EMHA students only.

HMG 512 Information Technology and Patient Engagement (2, FaSpSm) Strategic management and utilization of healthcare information technology in the delivery of healthcare; patient engagement and the use of technology to facilitate participation in their own care. Open only to Executive Master of Health Administration students.

HMG 520 Leading People and Health Care Organizations (4, Fa) An exploration of contemporary work force issues and skills development in organizational design, performance measurement, teamwork, conflict resolution, leadership, and change management. Open to EMHA students only.

HMG 525 Managed Care Operations (4) Focuses on managerial, operational, and organizational aspects of managed care for integrated delivery systems, health plans, and medical groups. Open to EMHA students only.

HMG 540 Health Economics, Financing and Reimbursement (2, Fa) Provides a framework for the economic analysis of health care issues and provides students with an opportunity to apply economic methods to a number of actual health care problems. Open to EMHA students only.

HMG 545 Systems Thinking and the Analysis of Data (4) Quality improvement and statistical tools for health managers. Covers analyzing processes; collecting and analyzing operational data; drawing valid conclusions from data. Open to EMHA students only.

HMG 550 Law, Regulation, and Ethics (4) An intensive introduction to business and health care law, ethics and regulation; gives executives practical knowledge regarding legal consideration in business transactions. Open to EMHA students only.

HMG 560 Customer-Focused Health Care Organization (2) Strategies for gaining and using customer-derived data in planning, marketing and managing health care organizations. Open to EMHA students only.

HMG 565 Managing the Organization's Financial Health (4, Fa) Executives confront and solve problems requiring use of accounting, finance, and management control principles; provides core financial skills for non-finance professionals. Open to EMHA students only.

HMG 570 Strategic Management (4, Sm) Provides skill development and application in the integrative discipline of strategic management including assessment, strategy formulation, implementation and control. Open to EMHA students only.

HMG 575 Managing and Improving Health (4, Sp) Methods for monitoring and improving the health of populations. Topics include outcomes management, risk-adjustment, development and implementation of practice guidelines. Open to EMHA students only.

HMG 600 Managing Risk (2, FaSp) Overview of reimbursement models in clinical and institutional settings; legal, financial and clinical assumption of risk pursuant to new and evolving federal and state statutory and regulatory provisions. Open only to EMHA students.

HMG 601 Operations Management for Accountability (4, FaSp) Hospital operations in the inpatient/outpatient setting; special emphasis on the growing requirement to more effectively manage across the continuum of care while assuming greater accountability in the delivery of care. Open only to EMHA students.

HMG 602 Operational Efficiency Processes in Health Care Organizations (2, FaSp) Improving productivity and efficiency of health care organizations combining the application of key operational analysis principles to improve quality, speed and productivity in the delivery of health care. Open only to EMHA students.

HMG 603 Developing and Monitoring of Quality and Patient Safety Outcomes (2, Sm) Overview of contemporary methods used to develop and monitor patient quality and safety outcomes; develop skill in data collection and analysis of clinical care outcomes; focus on operationalizing outcomes that matter to payers, organizations, and clinicians. Open only to EMHA students.

Price School of Public Policy

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

URBAN AND REGIONAL PLANNING (PLUS)

PLUS 600 Environmental Goods in Planning and Development (4, Irregular) Production, distribution, and valuation of environmental goods with attention to amenity concepts, externalities, public goods, consumer behavior; as characterized in economics, political science, sociology, psychology.

PLUS 601 Advanced Planning Theory I (4, Fa) Value hierarchies, means-ends continuums, and the nature of social action; problems of prediction and choice under conditions of uncertainty; alternative planning strategies.

PLUS 603 Planning and Development Paradigms (4, Sp) Introduction to historic, prevalent, and alternative paradigms of professional planning and development practice; seminar format and case studies.

PLUS 612 Analysis of Quantitative Data for Planning and Development (4, Fa) Planning and development case study approach to identifying data needs, acquisition, evaluation, manipulation, analysis, and multimedia presentation. *Prerequisite:* PPD 525.

PLUS 615 Behavioral Issues in Environmental Design (4, Irregular) Planning and design of the physical environment for human activities, e.g., user preferences, privacy, territoriality, stress and adaptation, cognitive mapping, lifestyles.

PLUS 623 Politics of Planning and the Urban Environment (4, Sp) Historic roots of property rights and obligations related to public policy, focus on current issues and discourse.

PLUS 626 Information Systems for Planning and Development (4, 2 years, Sp) Structure, content, and applications of formal information systems in planning and policy making emphasizing social accounts and indicators, censuses, social reporting, and “futures” research.

PLUS 631 Seminar in Physical Planning and Design in Developing Countries (4, Irregular) Issues in comparative urbanism; planning and design in developing countries: slums and squatters, housing and infrastructure, new towns, land policy, conservation and redevelopment, city design.

PLUS 632 National Urban Policy in Developing Countries (4, Irregular) The problems of the primate city, the role of intermediate cities, and the implicit spatial impacts of macro and sectoral policies.

PLUS 633 Seminar in Comparative Housing Policy and Urban Planning Programs (4, Irregular) Comparative examination of urbanization experience in selected areas and cities throughout the world; housing policies, urban planning approaches, financial, administrative, legal, and other techniques.

PLUS 635 Urban Finance (4, Irregular) The theory of fiscal federalism and municipal finance, with examples from the USA and other countries, public/private partnerships in urban development, and government decentralization.

PLUS 640 International Urban Development (4, Irregular) Study of urbanization in developing

countries; special attention to urban growth, migration, city size, land use, and urban management. Comparative case studies.

PLUS 680 Advanced Urban and Regional Transportation Planning (4, 2 years, Fa) Social and environmental impacts; incentive structures; alternate travel; investment guidelines; technological change.

PLUS 692 Conspectus Preparation (4, FaSpSm) Preparation of a case study of a specific planning and/or development project that defines the student's field of study.

PLUS 694abcdz Planning, Design and Development Project (2-2-2-2-0, FaSp) Credit on acceptance of planning, design and development project. Graded IP/CR/NC.

Price School of Public Policy

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

POLICY, PLANNING, AND DEVELOPMENT (PPD)

PPD 100m Los Angeles, The Enduring Pueblo (4, FaSp) Gateway to the minor in Planning and Development. Ethnic history of Los Angeles, emphasis placed on architecture, planning, and development. Multiplicity of cross-connections shaped by race, ethnicity, religion, gender, and sexual orientation. (Duplicates credit in former PLDV 100.)

PPD 225 Public Policy and Management (4, FaSp) Institutions, legal context, and processes of public policy and management. Contemporary theories of public policy formulation, implementation, and evaluation. Public managerial challenges and reforms.

PPD 227 Urban Planning and Development (4, FaSp) Gateway to B.S., Public Policy, Management and Planning and minor in Planning and Development. City building and development process; who plans, politics of planning and development; major topics include land use, fiscal policy, transportation, sustainability, and economic development.

PPD 240g Citizenship and Public Ethics (4, Fa, Sp) Review of legal and ethical traditions of citizenship with emphasis on the latter; consideration of implications for current practice of public policy-making and management. (Duplicates credit in former PPMT 240.)

PPD 245g The Urban Context for Policy and Planning (4, Fa) The urban context for planning and policy decisions. Socioeconomic, physical, and spatial structure of cities; and the underlying demographic, economic, and social processes that drive their ongoing transformation.

PPD 250m Third World Cities (4, FaSp) Gateway to the B.S., Planning and Development. The transition from traditional to modern cities in the developing world. Primacy and dualism; comparative urbanism as an expression of cultural variation; contrast in Western cities. (Duplicates credit in former PLDV 250.)

PPD 301 PPD Practices: Internship Seminar (2, FaSpSm) Policy, planning, and development skills for practice; internship seminar; leadership, group dynamics and presentation skills; application of management; organizational diversity; reflection on experiences. (Duplicates credit in the former PPD 401.)

PPD 303 Statistics for Policy, Planning, and Development (4, FaSpSm) Statistical applications applied to the real world; techniques including probability, sampling; hypothesis formation and testing; correlation, and linear regression. (Duplicates credit in the former PPD 404.)

PPD 306 Visual Methods in Policy, Management, Planning and Development (4, FaSp)

Introduction to graphic design, photodocumentation, and geographic information systems as employed in planning, policy, and development. Visual explanations. Computer and by-hand applications. (Duplicates credit in former PLDV 410.)

PPD 313 Finance of the Public Sector (4, FaSp) Justifications for and effects of government policies; tax and spending sides of government budgets; public goods; externalities; social insurance; redistribution and welfare; tax policy. (Duplicates credit in former PPMT 313.) *Prerequisite:* ECON 203.

PPD 314 Public Policy and Law (4, Fa) Institutional foundations and analysis of public policy issues; policy formulation and implementation; application of theories; case analyses.

PPD 315 Analytic Foundations for Public Policy (4, Sp) Qualitative methods of analysis; ethical and political implications of policy choices; issue diagnosis and policy design skills; critical reasoning and ethics; policy leadership.

PPD 316 Human Resource Management for Public Organizations (4, FaSp) Human resource development and management; values and processes in civil service career systems; training practices; human relations in supervision; personnel theory. (Duplicates credit in former PPMT 316.)

PPD 318 Financial Accounting in Public and Nonprofit Organizations (4, FaSp) Basic accounting principles and concepts necessary for the preparation and understanding of financial statements; accounting for service organizations in the public/nonprofit sector; fund accounting. (Duplicates credit in former PPMT 351.)

PPD 320 Organizational Behavior in Public Administration (4, FaSp) Understanding human behavior in public organization: motivation, roles, communication; group behavior and decision-making in public context; managing conflict; leadership and change in public complex organizational systems. (Duplicates credit in former PPMT 485.)

PPD 325 Fundamentals of Health Policy and Management (4, FaSp) Institutions, policies, and processes affecting health care policy and management; historical and philosophical roots; management of health care delivery; access and quality issues; responsiveness to public needs. (Duplicates credit in the former PPD 230.)

PPD 330 Introduction to Health Care Systems (4, Sp) Concepts and determinants of health and illness; health care delivery organizations and programs; the role of the administrator; issues in health care financing and access; quality evaluation; future trends. (Duplicates credit in former PPMT 330.)

PPD 340 The American System of Justice (4, Irregular) Introduction to the system of justice administration: components — police services, judiciary, corrections; interrelationships and issues; management strategies for change. (Duplicates credit in former PPMT 340.)

PPD 342 Crime and Public Policy (4, Fa) Public policy agenda-setting, alternatives formulation, and implementation for crime and criminal justice; analysis of specific issues including crime control, death penalty and gun control. (Duplicates credit in former PPMT 342.)

PPD 343 Terrorism, Homeland Security, and Public Policy (4, Fa) Overview of terrorism, government policies and practices, issues of civil liberties, challenges to public sector management.

PPD 353 Introduction to Philanthropy and Grant-writing (4, Fa) History, theories, philosophies, and practices of philanthropy; relationship between philanthropy and nonprofit world; grant-making procedures and relation to social innovation.

PPD 357 Government and Business (4, FaSp) Interrelated roles of business and public institutions; effects of public policies and laws on business sector; incorporates public and business perspectives. (Duplicates credit in former PPMT 357.) *Prerequisite:* ECON 203.

PPD 358 Urban and Regional Economics (4, Fa) Basic concepts of urban and regional economies; how planners intervene in the urban market; housing, transportation, public goods; land use politics; fiscal issues; cost-benefit analysis. (Duplicates credit in former PLDV 402.)

PPD 360 Urban Transportation Planning and Policy (4, Sp) Current transportation planning and policy critiques. Transportation planning; the relationship to urban structure; conventional and para-transit modes; analysis of local plans. (Duplicates credit in former PLDV 480.)

PPD 362 Real Estate Fundamentals for Planning and Development (4, FaSpSm) Real estate overview; government and influences; evolution of cities residential and commercial mortgage instruments; and analytic tools for decision-making. *Prerequisite:* ECON 203.

PPD 371 The Nonprofit Sector and the Public Interest (4, Fa) Theories of the voluntary nonprofit sector in society and its relationship to government and business; public policies toward the sector. (Duplicates credit in former PPMT 371.)

PPD 372m Public Service in an Urban Setting (4, Sp) Voluntary service in an urban, multicultural context: diverse meanings and practices, history, motivations, relationship to charity and change, dilemmas, public policies; service learning project required. (Duplicates credit in former PPMT 372.)

PPD 373 Public Policy and Planning Analysis (4, FaSp) Applied analytic modeling and data manipulation; visual presentation; interpretation of data; needs assessment and market failure analysis; indexing; extrapolation and simple forecasting; simple risk analysis; benefit-cost analysis. (Duplicates credit in the former PPD 473.) *Prerequisite:* ECON 203, PPD 225, PPD 303.

PPD 375 Real Estate Development Analysis (4, FaSpSm) Real estate development feasibility and analysis; economic, physical, and public policy. *Prerequisite:* PPD 362.

PPD 380ab International Perspectives on Urban Problem Solving (4-4, Irregular) Research on comparative urban public policy and administration utilizing case study approach; field research includes study in various foreign cities. (Duplicates credit in former PPMT 412ab.)

PPD 382 International Development (4, FaSp) Definitions and measurements of development; impact of globalization; concept and practice of international and development administration and planning at local, national, and global governance levels. (Duplicates credit in former PLDV 405.)

PPD 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only. (Duplicates credit in former PLDV 390 and PPMT 390.)

PPD 402 Management of Public and Nonprofit Organizations (4, Fa) Contemporary management theory; the nature of complex organizations; organizational and intergovernmental arrangements; roles and responsibilities of managers; managerial and organizational effectiveness; organizational structure and dynamics.

PPD 403 Management Analysis I (4, Sp) Introduction to organizational and systems analysis; historical perspective; systems theory; information systems, procedure analysis; management planning; introduction to models. (Duplicates credit in former PPMT 403.)

PPD 405 Fundraising for Policy and Planning (2, Sp) Fundraising in the nonprofit sector; role and structure of philanthropy; strategic issues in the solicitation of private funds for the public good; effect of fundraising on behavior of institutions.

PPD 407 Financial Management of Public and Nonprofit Organizations (4, Sp) Time value of money, risk, government bonds and tax-exempt financing, cost of capital, budgeting, financial statement analysis, and working capital management.

PPD 410 Comparative Urban Development (4, Sp) Urbanization and urban development and growth through an international scope; globalizing cities.

PPD 411abcd Sacramento Semester (4-4-4-4, Irregular) Exploration of political, economic, and administrative climate of the state government; basic processes and functions considered through seminars, research projects, visitations, group discussions, and internships. (Duplicates credit in former PPMT 411abcd.)

PPD 412L GeoDesign Practicum (4, FaSp) (Enroll in SSCI 412L)

PPD 413 Administration of Health Care Organizations (4, Sp) Theory and practice; role of governing bodies, medical staffs and quality review committees; current trends; community responsibility; regulatory and oversight agencies. (Duplicates credit in former PPMT 439.)

PPD 414 Community Health Policy and Planning (4, Sp) Historical perspectives on and the contemporary practice of community health planning; impact of culture, socioeconomics, and environment; policy dimensions; urban planning's role in enhancing and sustaining health.

PPD 415 Health Policy (4, Sp) Health policy analysis and challenges; price of health; structure of major sectors in health care; role of insurance in policy debates; trade-offs with policy decisions. *Prerequisite:* PPD 325.

PPD 416 Food Policy and Planning (2, Sp) Key issues related to the practice of food system planning; practice of creating and implementing food policies; understanding of food systems; issues around community food governance.

PPD 417 History of Planning and Development (4, Sp) Historical evolution of planning and development. How changing modes of planning and development have shaped the built landscape throughout the century. (Duplicates credit in former PLDV 485.)

PPD 420 Environmental Impact Assessment (4, Sp) Exploration of the role of the National Environmental Policy Act and the California Environmental Policy Act; study of environmental impact assessments including the regulatory aspects, stakeholder and participatory processes, and legal framework.

PPD 424 Art and the City (4) Role of art in modern society with a particular emphasis on the urban context including public spaces, the process of gentrification, and redevelopment; theoretical and research approaches.

PPD 425 Designing Livable Communities (4, Fa) Theories and concepts of livable communities and good city form; case studies of historical and current best practices; field visits; collaborative design project. (Duplicates credit in former PLDV 407.)

PPD 427L Geographic Information Systems and Planning Applications (4, Fa) Basic GIS concepts, ArcView and other GIS software, planning applications and databases, basic cartography; students select, research and prepare a planning GIS analysis project.

PPD 429 Urban Design Practicum (4, Irregular) Application of design concepts and graphic skills to a local design problem sponsored by a local public or private client in a studio setting; site visits, community contact, presentations. (Duplicates credit in former PLDV 414.) *Prerequisite:* PPD 306, PPD 425.

PPD 431 Undergraduate Policy, Planning, and Development Studio (4, FaSp) Application of methods in the exploration of a specific project, policy, or organization from the multiple perspectives of the five tracks in the undergraduate program. Open only to seniors.

PPD 435 Analyzing Real Estate Markets (4, FaSpSm) Macro- and micro-analysis of urban property markets (residential, commercial, and industrial) with regard to their location and dynamics. *Prerequisite:* PPD 375.

PPD 437 Advanced Finance and Investment for Planning and Development (4, FaSpSm) Advanced real estate principles. The nature, operation, and role of US mortgage markets. Financing of residential and income-producing property types. *Prerequisite:* PPD 435.

PPD 438 Local Economic Development (4, Fa) Economic development in a capitalist system, historic review, sectoral review, funding, strategizing, partnerships, evaluation; class project. (Duplicates credit in former PLDV 447.)

PPD 439 Housing and Community Development (4, Fa) Evolution of government housing and community development programs; present practices, e.g., housing elements, economic development, neighborhood rehabilitation; housing needs and market analysis; housing and health. (Duplicates credit in

former PLDV 440.)

PPD 440 Management of Justice Systems (4, Irregular) Social controls and delivery of justice administration services; comparative systems; organization theory and justice administration; system adaptation and change; system performance measurement: economy, efficiency, effectiveness. (Duplicates credit in former PPMT 440.)

PPD 441 Judicial Administration (4, Irregular) Local, state, federal judicial systems; constitutional, legislative, judicial influences on administrative action. Administrative problems associated with judicial functions including district attorney, public defender, the courts. (Duplicates credit in former PPMT 441.)

PPD 442 Administration of Police Services (4, Irregular) Police and society; the structure and organization of American policing, current managerial problems; police research and development; future planning; administration of police juvenile programs. (Duplicates credit in former PPMT 442.)

PPD 452 Organization and Interface of Juvenile Justice Subsystems (2, FaSp) Effective interface among juvenile justice subsystems (police and social service agencies, schools, courts); legal/jurisdictional parameters, resource constraints; strategies for joint intervention and problem resolution. (Duplicates credit in former PPMT 452.)

PPD 453 Program, Policy, and Legislative Trends in Juvenile Justice (2, Irregular) Examination of current research findings and legislation in juvenile justice; relations of new information to operating assumptions of agencies; impacts, trends; implications for management practice. (Duplicates credit in former PPMT 453.)

PPD 454 Problems and Issues in the Delivery of Youth Services (2, Irregular) Strategies for coordinated mobilization of diverse juvenile justice agencies; resolution of conflicting agency objectives (e.g., enforcement vs. rehabilitation). Information and resource needs; organizational skills, techniques. (Duplicates credit in former PPMT 454.)

PPD 461 Sustainable Communities, Policy and Planning (4, FaSp) Policy and planning as shaped by sustainability theories; sustainability indicators; topics include water resources, air quality, land use regulations, environmental design, carrying capacity, ecological footprint analysis.

PPD 466 Urban Government and Management (4, Irregular) Preparation and discussion of cases dealing with selected policy areas including transportation, housing, poverty, and environmental quality. (Duplicates credit in former PPMT 427.)

PPD 468 Cross-Cultural Negotiations: Communication and Strategy (4) (Enroll in COMM 468)

PPD 475 The Future of California (4) (Enroll in MDA 475)

PPD 476 Politics and Administration (4, Sp) Administrative relationships to the policy processes; influence of political and economic pressures on administrative policy determination; political behavior by administrators; case analysis. (Duplicates credit in former PPMT 486.)

PPD 478 Social Innovations (4, Fa) Strategies and processes of social innovation and change; examination of social change in the market, government, and within the nonprofit sector; dynamics; civic action and activism.

PPD 482 Comparative Public Administration (4, Sp) Methodology, theories, and models of comparison; functional processes of administration in developing and developed nations compared; role of bureaucracy in development and nation-building; ecology of administration. (Duplicates credit in former PPMT 482.)

PPD 485m U.S. Immigration Policy (4, Fa) Examination of the historical and contemporary components of U.S. immigration policy with emphasis on policies addressing legal permanent immigrants, refugees, asylees, the undocumented.

PPD 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit. (Duplicates credit in former PLDV 490x and PPMT 490x.)

PPD 497ab Senior Thesis (a: 2, Fa; b: 2, Sp) Writing of the honors capstone project in an area of interest related to the track of study; research and writing skills. Open only to seniors.

PPD 498 Senior Honors Seminar (4, FaSpSm) Concepts, theories, and methods of analysis of a selected topic within the fields of public policy, management and planning. Students must have a 3.5 GPA in PPD courses; 3.0 GPA overall.

PPD 499 Special Topics (2-4, max 8, FaSpSm) Selected topics in Policy, Management and Planning. (Duplicates credit in former PLDV 499 and PPMT 499.)

PPD 500 Intersectoral Leadership (2) Roles of public, private, nonprofit, and civil society sectors in policy, planning, and development. Leadership skills in negotiation, conflict resolution, institutional design, problem solving.

PPD 501ab Economics for Policy, Planning and Development (2-2) *a:* Microeconomic theory as applied to policy, planning, and development; concepts of efficiency; macroeconomic issues. *b:* Microeconomic analysis and modeling to incorporate Market failure and issues of uncertainty and information failure; organization models; policy instruments; policy and planning applications.

PPD 502x Statistical Foundations for Public Management and Policy (2, FaSp) Statistical analysis concepts and reasoning; sampling and data sources; focus on basic statistical applications in public management and policy analysis. Not for graduate credit for MHA, MPA, MPP and affiliated degrees.

PPD 507 Six-Sigma Methods and Applications (3, FaSpSm) (Enroll in ISE 507)

PPD 508 Health Care Operations Improvement (3, Sp) (Enroll in ISE 508)

PPD 509 Problems and Issues in the Health Field (4, FaSp) Principles of epidemiology; disease trends, treatment efficacy, influences on utilization; health promotion, disease prevention and health protection; intergovernmental relationships; management of public health programs. (Duplicates credit in former PUAD 530.)

PPD 510ab Financial Management of Health Services (4-2, FaSp) *a:* Accounting principles, financial reports, managerial finance, financial planning, capital investments, working capital analysis; elements of budgeting and reimbursement; performance standards; reporting; developing a management system. Open only to graduate students. *Prerequisite:* PPD 516; *recommended preparation:* PPD 502x or competence in statistics. *b:* Changing practices, emerging issues, strategies and innovations in financial planning, management, and regulation; federal and state policies and requirements.

PPD 511 Health Information Systems (2, FaSm) Conceptual framework for data base development; relational data management; use of health statistics; health indicators; confidentiality, security, privacy. *Recommended preparation:* PPD 502x or competence in statistics and PPD 516 or competence in accounting.

PPD 512 Health Administration Residency Seminar (2, max 4, Sp) Supervised study of health care administration, governance, professional staff relations, internal operations and controls, legal and regulatory requirements, management policy and strategy. (Duplicates credit in former PUAD 533.) *Prerequisite:* PPD 509, PPD 510a, PPD 545; minimum of 20 graduate level units.

PPD 513 Legal Issues in Health Care Delivery (2, FaSp) Rights of consumers; health-related powers of governments; rights and responsibilities of health care providers; interrelationships of rights, powers, and responsibilities. Open only to graduate students. *Recommended preparation:* PPD 509 or substantial prior work experience in health care organizations.

PPD 514 Economic Concepts Applied to Health (4, FaSpSm) Relationships between economic characteristics and health status; impact of economy on health services industry; demand and resources for health services; utilization, prices, costs, health insurance. (Duplicates credit in former PUAD 537.) *Prerequisite:* PPD 501a.

PPD 515 Strategic Management of Health Organizations (4, FaSpSm) Application of principles of

health administration in several practice settings. Decision-making; strategic management; organizational performance; communication; provider comparisons. *Prerequisite:* PPD 510a or HMGT 565, PPD 545 or HMGT 520; *recommended preparation:* PPD 509, PPD 511, PPD 513, PPD 514, PPD 557.

PPD 516 Financial Accounting for Health Care Organizations (4) Accounting as a management tool; accounting systems; basic accounting concepts and procedures; budgets; financial statements. Open only to graduate students.

PPD 517 Concepts and Practices in Managing Health Care Organizations (2, FaSm) Application of principles of health administration. Role of managers; managing people and programs; human resource management concepts and applications; working with professionals; governance; public relations.

PPD 518 Quality of Care Concepts (2, Sp) Quality issues and complexities affecting health care; fundamentals of quality improvement programs; examination of quality issues and improvement programs in various health care venues; strategies.

PPD 519 Methods and Applications of Health Services Research (2, Fa) Examination of policy and management issues for empirical research; indicators and measurement of outcomes; impact on policy and management decisions; methodology; analysis of quantitative and qualitative data. *Prerequisite:* PPD 514.

PPD 520 Economic Approaches to Health Policy Analysis (2, Sp) Evaluation of current major health policy challenges and issues; economic analysis of behavioral responses to change in health care policy; new legislation; policy trade-offs. *Prerequisite:* PPD 514.

PPD 521ab Information Technology Management Systems in Health Care (2-2, Sm) Principles and methods of systems analysis; assessment; strategic planning, design consideration; e-health and e-commerce system trends; health care information systems application areas; regulatory requirements. *Prerequisite:* PPD 511. *b:* Analytic methods used to develop data-driven solutions; specific problems in health care organizations; integrating data; communicating data; interpretation; exploration of new approaches for improvement.

PPD 524 Planning Theory (2, Fa) Development of a critical perspective by becoming more aware of the intellectual roots of the planning profession, with a focus on practical outcomes of actions. (Duplicates credit in former PLUS 501.)

PPD 525 Statistics and Arguing from Data (2, FaSp) Fundamentals of probability and statistics, planning analysis techniques, computing standards, and understanding of the rhetoric related to statistical analysis. (Duplicates credit in former PLUS 502.)

PPD 526 Comparative International Development (2, Fa) Introduction to comparative international development with a focus on regional growth and urban development. (Duplicates credit in former PLUS 505.)

PPD 527 The Social Context of Planning (2, Sp) Examination of the formation of the modern urban environment with its consumer culture, social classes, and racial and ethnic diversity. (Duplicates credit in former PLUS 506.)

PPD 529 Legal Environment of Planning (2, Sp) Understanding of the legal system and its processes and laws applicable to land use and development and the legal nature of powers of public and private entities. (Duplicates credit in former PLUS 509.)

PPD 530 Historical Analysis of Urban Form and Planning Practice (2, Sp) Awareness, analysis, understanding, and influencing the city building process locally and regionally; isolate and exercise tools and methods of visual literacy. (Duplicates credit in former PLUS 510.)

PPD 531L Planning Studio (4, 8, 12, max 12, FaSp) Application of methods in planning, programming, research, and evaluation in a professional context; data collection and analysis; case studies; practical applications. (Duplicates credit in former PLUS 576L and PLUS 676L.)

PPD 532L International Planning and Development Laboratory Workshop (4-8, Sm) Application of planning principles and methods to specific urban planning problems abroad; involves preparation in the spring

semester and an overseas field visit and a collaborative practicum. (Duplicates credit in former PLUS 575L.)

PPD 533 Planning History and Urban Form (2) History of urban planning with an emphasis on the evolution of how planning shaped the physical environment in response to political, economic, and social issues.

PPD 540 Public Administration and Society (4, FaSpSm) Administrative concepts, institutions, legal systems, and practices; values; facilitation of responsibilities and rights; professional applications for personal, private sector, and public achievement. (Duplicates credit in former PUAD 500.)

PPD 541 Public Financial Management and Budgeting (4, Fa) Financial management applied to public and nonprofit organizations; financial valuation, financial markets, budgeting, tax administration, debt financing, cost-benefit analysis and financial analysis. (Duplicates credit in PPDE 645.)

PPD 542 Policy and Program Evaluation (4, Sp) Methods and models for policy and program evaluation; methods of collecting and analyzing evaluation data; processes for linking evaluation to policy formulation and program management. (Duplicates credit in former PUAD 525 and former PUAD 529.) *Prerequisite:* PPD 502x.

PPD 543 Internship Seminar (1, FaSp) Supervised study of management, analytical, or other professional activities in government; integration of theory, practice and relevant literature. (Duplicates credit in former PUAD 544.)

PPD 545 Human Behavior in Public Organizations (4, FaSpSm) Behavior in organizations; focus on personal, interpersonal, and group level factors that influence such behavior. (Duplicates credit in former PUAD 585.)

PPD 546 Capstone in Public Administration (4) Constitutionally accountable and ethical practice, individually and organizationally; applications of core competencies; practical inquiry, analysis, systems; comparative frameworks; citizenship and public service. *Prerequisite:* PPD 540 and PPD 545 and PPD 542 or PPD 557. Open only to master and doctoral students.

PPD 552 Managing and Financing Public Engineering Works (3, FaSpSm) (Enroll in CE 552)

PPD 554 Foundations of Public Policy Analysis (2, Fa) Introduction to public policy analysis; issue diagnosis and policy design; analytic reasoning and argumentation; the role of the public policy professional; ethical issues in policy analysis. Open only to MPP students and Certificate in Public Policy students.

PPD 555 Public Policy Formulation and Implementation (4, FaSpSm) Political and organizational perspectives on policy making process; agenda setting, policy design, adoption, implementation, evaluation, modification or termination. Policy leadership skills: negotiation and strategic mapping.

PPD 557 Modeling and Operations Research (4, FaSpSm) Management science methods that support decision making in policy, management, and planning settings. Includes linear programming, queuing theory, decision analysis, and forecasting. Open only to master's or doctoral students. *Prerequisite:* PPD 502x or PPD 525.

PPD 558 Multivariate Statistical Analysis (4, FaSp) Applied multivariate statistics in support of policy, management, and planning problem solving. Includes regression analysis, logit models, and an introduction to time-series models and multi-equation estimation. Open only to master's and doctoral students. *Prerequisite:* PPD 502x or PPD 525.

PPD 559 Policy Implementation and Evaluation (4, FaSp) Theoretical approaches, critical issues, and research methods in public policy implementation. Field-based research project. (Duplicates credit in former PUAD 570.)

PPD 560 Methods for Policy Analysis (4, Sp) Examination of methods used in the analysis of policy methods, including cost benefit analysis, decision and risk analysis, and applied social science methods. (Duplicates credit in former PUAD 572.) *Prerequisite:* PPD 502x and PPD 554 and PPD 501b.

PPD 561ab Policy Analysis Practicum (1, 3, FaSp) Application and integration of the knowledge and

techniques of analytic, quantitative, managerial, political and ethical analyses to specific public policy problems. (Duplicates credit in former PUAD 589.)

PPD 568 Environmental Governance and Sustainability (2, Fa) Introduction to leading issues of environmental governance and policy in looking toward a more sustainable future; normatively important concerns and the social, cultural, and political dimensions; thematic look from values to action.

PPD 569 Applied International Policy Analysis and Management Project (4, Sp) Enables students to integrate theory, research and practice into an applied project of their own choosing. The output of this course is a professional report in a selected public policy or management area. (Duplicates credit in former PUAD 507.)

PPD 570 Applied Statistics for Planning, Policy and Management (4, Sm) Use of statistical reasoning to answer questions related to public policy and management. Students will review and understand selected statistical techniques for analyzing data and for addressing public policy and management questions of interest using applied data analysis. (Duplicates credit in former PUAD 523.)

PPD 571 International Public Policy and Management Seminar (4, Fa) An introduction to the concepts and methods of public policy analysis and management. Highlights some of the constraints of the policy process. Includes examples from the United States but also presents comparative views of the contours of public policy in both developed and developing nations. The course applies public policy and management frameworks to selected areas of social policy. (Duplicates credit in former PUAD 524.)

PPD 572 Special Issues in International Public Policy (1-4, max 12, FaSpSm) Current international public policy on issues such as governmental reform, regulation, social welfare, poverty alleviation and international aid. Policy framework and in-depth analysis of specific topics of relevance to governmental agencies and international organizations.

PPD 587 Risk Analysis (4) Concepts of risk analysis, risk in engineered systems, environmental risk, security risks; fault trees, event trees, risk simulations; risks and decision-making. *Recommended preparation:* MATH 108g or MATH 116.

PPD 588 Introduction to Transportation Planning Law (3) (Enroll in CE 579)

PPD 589 Port Engineering: Planning and Operations (3) (Enroll in CE 589)

PPD 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PPD 594abz Master's Thesis (2-2-0, FaSp) Credit on acceptance of thesis. Graded IP/CR/NC.

PPD 599 Special Topics (2-4, max 8, FaSpSm) Selected topics in public policy, management and planning.

PPD 600 Management of Managed Care Organizations (2, FaSpSm) Managed care arrangements, interorganizational relations, management practices and controls, medical staff relations, strategic planning, marketing, utilization review, quality assurance, outcomes measures. *Prerequisite:* PPD 545 or HMGT 520; *recommended preparation:* PPD 516, PPD 510a or HMGT 565.

PPD 601 Management of Long-Term Care Organizations (4, Fa) History, development, trends; major policy issues; organization of systems; principles and techniques of administration; management of institutional and community based programs. Open only to graduate students.

PPD 602 Strategic and Operational Planning for Health Services (4, 2 years, Fa) Strategic, institutional, and program planning theory and methods; governmental and legal requirements, certificate of need processes, reimbursement controls; financing and marketing considerations, practices, and methods. (Duplicates credit in former PUAD 535.)

PPD 603 Marketing of Health Services (4, Sm) Assessing community needs and organizational service capabilities; evaluating competition; qualitative and quantitative market research methods; market communications and advertising; developing marketing plans. *Recommended preparation:* PPD 502x or

competence in statistics.

PPD 604 Seminar in Hospital Administration (4, Sm) Hospital systems and functions; managerial processes, theory, and practice; governance structures; legal, regulatory, administrative, and professional requirements; medical and professional staff; multi-institutional arrangements; controls. Open only to graduate students. *Prerequisite:* PPD 545 or HMGT 520; *recommended preparation:* PPD 516.

PPD 605 Frontline Issues in Health Services Administration and Policy (2, max 6, FaSpSm) Emphasis on current or emergent issues in the health care industry. Focus on impact of recent health legislation and/or health care system responsiveness.

PPD 606 Urban Health Policy (4, Fa) Addresses current U.S. health policy issues and the critical processes that shape them, with an emphasis on urban populations; institutional, economic, social, ethical, and political factors.

PPD 607 Introduction to Public Health Policy (4, Sp) Public health policy and analysis methods; evaluation of the public health system and safety net programs.

PPD 608 Leadership Symposium in Health Management and Policy (1, max 3, FaSpSm) A forum for leading executives and policymakers to address ways they or their organizations improve healthcare financing, delivery and management, in the U.S. and internationally.

PPD 609 Physician Practice Management (2, Sp) Overview of medical practice management issues, structures, systems and strategies for effective clinical and financial performance of physician organizations. *Recommended preparation:* PPD 509.

PPD 610 Managed Care Contracting (2, Fa) Provides practical and strategic decision-making skills in managed care contracting, including contract types, terms and conditions; financial assessment; proposal development and analysis; and negotiation. *Prerequisite:* PPD 600; *recommended preparation:* PPD 510a or HMGT 565, PPD 514.

PPD 611 Policy Issues in Planning and Development (4, Fa) Overview of policy issues in planning and development professions in the U.S. and abroad. Special attention to collective decision making, role of institutions, and ethics. (Duplicates credit in former PLUS 503.)

PPD 612 Research and Analytical Techniques (4, Sp) Professional practice-oriented analytic skill; fundamentals of data manipulation; spreadsheet applications and forecasting; and communication of results. (Duplicates credit in former PLUS 504.)

PPD 613ab Policy, Planning, and Development International Laboratory (a: 1, max 2, Sp; b: 3, max 6, Sm) Research methods for intensive practical field research and evaluation; policy, management and planning practice in intercultural contexts; preparation for professional-level consulting abroad.

PPD 614 Management in Planning Practice (2 or 4, 2 years, Sp) Administrative, management, political, and other problems faced by the practicing professional planner. (Duplicates credit in former PLUS 521.)

PPD 615 Comparative Urbanization, Development, and Inequality (4, Irregular) Theories of inequality, dependency and dualism in relation to urbanization, growth, and poverty in developing countries; development and underdevelopment; core-periphery linkages. (Duplicates credit in former PLUS 534.)

PPD 616 Participatory Methods in Planning and Policy (4) Approaches to community participation, introducing students to the theories behind participatory methods as well as to the skills to implement them.

PPD 617 Urban Demography and Growth (4, Fa) Theory and policy regarding population change in urban areas; housing; cohort analysis; immigration; ethnicity; employment; education. Methods of graphic representation; census data manipulation, interpretation, forecasting. (Duplicates credit in former PLUS 539.)

PPD 618 Housing Facilities and Community Development (4, Irregular) Structure of the building industry and technology. Housing markets and programs; environmental standards. Community development

and redevelopment. Planning, program development, finance, and coordination of public facilities and services. (Duplicates credit in former PLUS 540.)

PPD 619 Smart Growth and Urban Sprawl: Policy Debates and Planning Solutions (4, Irregular) Determinants and analytical models of land use; interaction of land uses with environmental quality and natural resources, land use policy instruments; regulation, taxation, public services. (Duplicates credit in former PLUS 562.)

PPD 620 General Plans (4, Fa) Assessment of a recently adopted general plan, analysis of the general plan process, and detailed review of each major element and issue. (Duplicates credit in former PLUS 563.)

PPD 621 Environmental Impacts (4, Sp) Legal, political/institutional, and technical aspects of environmental impact reports for urban planning. (Duplicates credit in former PLUS 561.)

PPD 622 Seminar in Urban Development (4, Irregular) Central city housing and renewal problems and policies. Site selection, organization; land valuation, acquisition, disposition; relocation and management; reuse; site planning and development; politics; financing. (Duplicates credit in former PLUS 541.)

PPD 623 Community Development and Site Planning (4, Sp) Urban form and emerging community design practices; design project development; evaluation and assessment of site planning in cities and local communities.

PPD 624 Local Economic Development: Theory and Finance (4, Sp) Socioeconomic change, economic development theory, assessment techniques, and economic indicators in the context of planning and development policies and programs. (Duplicates credit in former PLUS 547.)

PPD 625 Planning and Economic Development Finance (4, Fa) Fundamentals for economic development professionals and policy makers including feasibility analysis and the financing of facilities, social services, and community-based enterprises. (Duplicates credit in former PLUS 546.)

PPD 626 Public/Private and Mixed Enterprises Planning (2, Sp; 4, Fa) Case studies of planning and public/private and mixed enterprises; public production of private goods; privatization of public services; public/private partnerships; mixed enterprises.

PPD 627 Design Skills for Urban Planners (4, Fa) Develop observation, description, analysis, and conceptualization skills related to urban spatial conditions; advance professional communication proficiencies. (Duplicates credit in former PLUS 573.)

PPD 628 Urban Planning and Social Policy (4, Irregular) Urban planning and social work: theory, values, techniques of inquiry, and problem-solving methods appropriate to urban planning and social work. (Duplicates credit in former PLUS 552.)

PPD 630 Urban Economic Analysis (4, Sp) Economic models of cities and city development and structure; housing and land markets; transportation systems; problems of congestion and pollution; evaluation of urban policies. (Duplicates credit in former PLUS 566.)

PPD 631 Geographic Information Systems for Policy, Planning, and Development (2) Introduction to GIS systems and usage in the public sector; spatial data; understanding software and the application of technology; analysis of data using GIS.

PPD 632 Planning Analysis and Evaluation (4, Sp) Methods of policy, program, and plan evaluation: economic principles and theoretical concepts introduced, followed by case studies. (Duplicates credit in former PLUS 574.)

PPD 633 Urban Transportation Planning and Management (4, 2 years, Fa) Background applications of established urban travel forecasting procedures; land use; trip-generation, trip-distribution, modal-choice, trip-assignment; evaluation; criticisms. (Duplicates credit in former PLUS 580.)

PPD 634 Institutional and Policy Issues in Transportation (4, Sp) Analysis of policies relating to

transportation alternatives; institutional environment and background; federal, state, regional, and local agency responsibilities and interactions. (Duplicates credit in former PLUS 581.)

PPD 635 Principles of Transportation Systems Analysis (4, Fa) Planning, design, modeling, and operation of inter- and intra-urban transportation networks. Analysis of contemporary engineering-economic issues relevant to transport, especially questions pertaining to infrastructure. (Duplicates credit in former PLUS 582.)

PPD 636 Infrastructure and Modern Society (2, Sp) Survey of infrastructure issues that relates principles from multiple disciplines to the provision of vital services and encourages critical thinking within a systems context.

PPD 637 Forecasting and Urban Planning: A Survey of Theory and Methods (4, Sp) Overview of forecasting methods and applications in urban planning processes used to determine urban futures; includes theoretical and institutional factors as well as quantitative methods.

PPD 638 Integrative Seminar (4, FaSpSm) Individual research and preparation of an integrated comprehensive study coordinated with a sponsor such as a government agency or development firm. (Duplicates credit in former PLUS 591.) *Prerequisite:* PPD 611, PPD 612.

PPD 639 Introduction to Community and Economic Development (4, FaSp) Theories of community and economic development and a contextual understanding of the forces that change the development and community life of urban areas.

PPD 640 Leadership Foundations: Competencies and Core Values (4, Sm) An intensive introduction to leading through core values. Focuses on developing leadership skills at the personal level to build a foundation for leadership at all levels. Open only to Executive Master of Leadership students.

PPD 641 Leading Individuals, Groups and Teams (4, Fa) Leadership styles in various settings; team demographics, and dynamics; problem-solving; decision-making; diversity and critical thinking skills; effect of culture on small group communication; managing conflict. Open only to Executive Master of Leadership students. *Prerequisite:* PPD 640.

PPD 642 Strategic Leadership of Organizations (4, Sp) Strategic analysis; strategic planning; leadership; performance measurement and management; control systems; organizational structure and networks; organizational culture; organizational learning and change. Open only to Executive Master of Leadership students. *Prerequisite:* PPD 641.

PPD 643 Leading Transformations Across Sectors: Integrative Seminar (4, Sm) Application and practice of leadership skills working across the public, private and nonprofit sectors. Skills include negotiation, collaboration, communication, political management and ethical responsibilities. Open only to Executive Master of Leadership students. *Prerequisite:* PPD 642.

PPD 644 Shaping the Built Environment (4) Introduction to the theories and concepts and good city form. Explores the options for designing more livable and sustainable urban communities.

PPD 645 Professional Development (1-4, max 8, Irregular) Selected topics in the practical application of administrative concepts. Graded CR/NC. (Duplicates credit in former PUAD 502.)

PPD 646 Fieldwork (1-4, max 8, Sp) Supervised study of management activities in governmental agencies. Graded CR/NC. (Duplicates credit in former PUAD 503.)

PPD 647 Finance of the Public Sector (4, Sp) Sources of government revenue, intergovernmental financial relations, budgeting, public goods theory. Theoretical and applied skills in analysis of equity and efficiency issues. (Duplicates credit in former PUAD 513.) *Prerequisite:* PPD 501b.

PPD 648 Concepts and Practices of Public Budgeting (4, Irregular) Budget planning, budget formulation, tools for budget analysis and budget implementation. (Duplicates credit in former PUAD 515.)

PPD 649 Concepts and Practices in Public Personnel Administration (4, FaSm) Concepts of man and of work; workforce; government personnel systems, including merit concepts, classification, and compensation; collective bargaining; organizational justice; training and development. (Duplicates credit in former PUAD 516.)

PPD 650 Organization Development in Public Administration (4, FaSp) Overview of concepts and methodologies of organization development; diagnosing organizational needs; developing change strategies; selecting appropriate interventions. (Duplicates credit in former PUAD 517.)

PPD 651 Seminar in the Administration of Local Government (4, Irregular) Intensive consideration of the functions of the municipal executive and his environment. Research preparation and discussion of cases. (Duplicates credit in former PUAD 520.)

PPD 652 Financial Administration in Local Government (4, Irregular) Revenue sources, fees and charges, benefit assessments; financing economic development and redevelopment, issuing and managing debt, current asset management, and state-local relations. (Duplicates credit in former PUAD 521.)

PPD 653 Training in the Public Sector (4, Fa) Emergence of public service training; learning theories; program development process — assessing needs, design, delivery, and evaluation; role of media; individual, group, organization development; managing training. (Duplicates credit in former PUAD 522.)

PPD 654 Information Technology Management in the Public Sector (4, FaSpSm) Application of computer and information technology in government; e-government; information technology architecture; systems project management. (Duplicates credit in former PPD 518.)

PPD 655 Administrative Law and Public Management (4, FaSpSm) Administrative perspectives on legal principles of agency rule-making and adjudication; distinctions between the two; informal administrative actions; decision-making; judicial review; public control of administrative decisions.

PPD 656 Political Management: Theory and Applied Techniques (4, Sm) Political management theories; strategy formation; research and data collection approaches; computer applications; electronic databases; issue management; problem-solving techniques; ethical considerations. (Duplicates credit in former PUAD 545.)

PPD 657 Political Leadership in Public Organizations (4, Sp) Concepts and skills for public executives and senior managers; understanding the dynamics of governmental institutions and policy processes; organizational and personal assessment skills. (Duplicates credit in former PUAD 546.)

PPD 658 Advocacy in Public Administration (4, Fa) Perspectives on advocacy in the policy process; practice of advocacy; accessing the policy process; simulation of the advocacy process; ethical considerations. (Duplicates credit in former PUAD 547.)

PPD 659 National Security Administration and the Domestic and International Environment (4, Irregular) Interplay of domestic and international environments; resultant constraints upon national security program administration; administrative and organizational implications for future scenarios. (Duplicates credit in former PUAD 549.)

PPD 660 Local Agency Debt and Cash Administration (4, Irregular) Overview of methods of debt and cash administration including official statement analysis; mechanics of different types of issues; and cash management principles. (Duplicates credit in former PUAD 550.)

PPD 661 Intergovernmental Management: Local Perspective (4, Fa) Role of city, special district, and metropolitan governments in intergovernmental relations; intergovernmental impacts on local policy process and service delivery; management problems and alternatives. (Duplicates credit in former PUAD 552.)

PPD 662 Intergovernmental Management: State Perspective (4, FaSp) Role of state government in intergovernmental relations, emphasis on California experience; financial aspects of intergovernmental system. (Duplicates credit in former PUAD 553.)

PPD 663 Intergovernmental Management: Federal Perspective (4, Irregular) Role of national

government in intergovernmental process; impact of federal legislative, executive, and judicial actions on state and local government; intergovernmental policy-making process. (Duplicates credit in former PUAD 554.)

PPD 664 Contract Management (2, Sp) Contract management techniques in the public and private sectors; micro and macro management; compliance and negotiation; conflicts of interest and ethical issues.

PPD 665 Contemporary Issues in Philanthropy (4) Motivations and strategies of philanthropists; philanthropic foundations and emerging institutions for philanthropy; issues of philanthropic stewardship, public policy and public accountability.

PPD 666 Administrative Research and Analysis (4, Irregular) Theory and methods for study of administrative effectiveness: problem solving, performance measurement, administrative and organizational research, quality improvement, and change implementation. (Duplicates credit in former PUAD 506.)
Prerequisite: PPD 502x.

PPD 667 Public Ethics (4, Sp) Following an introduction to the study of ethics, relationships among administrative, political and policy ethics are examined, emphasizing the ethics of the administrative role. (Duplicates credit in former PUAD 560.)

PPD 668 Entrepreneurship in the Public Sector (4, Irregular) Providing public services through the private and nonprofit sectors; public-private partnerships; political and organizational skills required for public entrepreneurship. (Duplicates credit in former PUAD 561.)

PPD 669 Federal Management Systems (4, FaSp) Principal institutions and processes in federal government for overhead leadership and control; examines Office of Management and Budget, Office of Personnel Management, Merit Systems Protection Board, General Services Administration, and General Accounting Office. (Duplicates credit in former PUAD 564.)

PPD 670 Management of Intergovernmental Programs (4, Sp) Analysis of relationships among governmental units in delivery of governmental programs; historical development of intergovernmental relations; present status and future implications. (Duplicates credit in former PUAD 566.)

PPD 671 Decision-Making in Regulatory Agencies (4, Irregular) Risk assessment, management, and communication concepts and practices; comparisons of regulatory decision making in regulatory agencies; emerging benefit assessment, cost-effectiveness, and communication issues. (Duplicates credit in former PUAD 567.)

PPD 672 Presidency, Congress, and the Bureaucracy (4, SpSm) Relationships in national government among political executive, legislative, and administrative units; reviews institutions, formal processes, and political dynamics. (Duplicates credit in former PUAD 568.)

PPD 673 Strategic Planning in the Public Sector (4, Sp) Analysis/field application of action research models for strategic planning in public agencies; design of effective public systems; citizens/administrators' roles in strategic decision-making. (Duplicates credit in former PUAD 574.)

PPD 674 Science, Technology, and Government (4, Irregular) Impact of science/technology on governmental policy, processes, institutions; critical policy areas in science/technology; machinery for formulating science policy; governmental impact on science/technology. (Duplicates credit in former PUAD 575.)

PPD 675 Nonprofit Management and Leadership (4, FaSpSm) Issues in nonprofit management and leadership including: the role of boards; strategic planning; marketing and fund-raising; financial management; and volunteer and human resource management. *Recommended preparation:* PPD 689.

PPD 676 Comparative Public Administration (4, Irregular) Methodologies, theories and models of comparison; administrative systems; role and functions of the public sector; administrative cultures. (Duplicates credit in former PUAD 579.)

PPD 677 International Development Administration (4, Sp) Development of theories; role of international institutions in resource exchanges; foreign investment and trade policies; national planning and

allocation systems; development and modernization strategies and implementation. (Duplicates credit in former PUAD 581.)

PPD 678 Processes of Change in Developing Societies (4, Irregular) Nature of traditional and transitional societies; theories and practice of developmental change; role of bureaucracy in development; institution building; public enterprise; technology assessment and transfer. (Duplicates credit in former PUAD 582.)

PPD 679 Financial Administration in Developing Countries (4, Sm) Public sector finance; tax policy and administration; budgeting and auditing; debt management; public enterprise and development banks; planning; techniques; project assessment. (Duplicates credit in former PUAD 583.)

PPD 680 Development of Effective Groups and Organizations (4, Fa) Theories and techniques of assessing and improving interpersonal relationships and group dynamics in an organizational context; action research-based approaches to implementing organizational change. (Duplicates credit in former PUAD 586.)

PPD 681 Public Organization and Management Theory (4, FaSp) Nature and management of public organizations; examination of organizational characteristics, forms, and processes, including the relationship with the broader environment. (Duplicates credit in former PUAD 595.)

PPD 682 Justice Administration: A Management Perspective (4, 2 years, Fa) Justice administration as an interactive system: law, etiology of crime, police, the judiciary and corrections. Interface of offenders with community and political force fields. (Duplicates credit in former PUAD 540.)

PPD 683 Homeland Security and Public Policy (4, FaSp) Definition and history of terrorism, counterterrorism, domestic policy and public sector management; intelligence/information sharing and analysis; emergency preparedness planning, response and recovery.

PPD 684 Leadership Development in the Public and Nonprofit Sectors (2, Fa) An overview of leadership concepts, frameworks and skills; application of leadership in complex or inter-sectoral settings.

PPD 685 Human Resources Management in Public and Non-Profit Sectors (2, Fa) Merit principles, position classification, recruitment and selection, compensation, organizational development, labor relations; challenges and strategies for managing a diverse workforce.

PPD 686 U.S. Immigration Policy (4, Sp) Overall understanding of contemporary U.S. immigration policy.

PPD 687 Strategic Management in the Nonprofit Sector (4, Sp) Strategic management of nonprofit organizations, social entrepreneurship, and management practice. *Prerequisite:* PPD 675 and PPD 689.

PPD 688 Business and Public Policy (4, Irregular) The business-government relationship; effects of selected public policies (antitrust, economic, and social regulation, industrial policies, legal policy) on firm and industry behavior. (Duplicates credit in former PUAD 557.) *Prerequisite:* PPD 501b.

PPD 689 The Nonprofit Sector and Philanthropy (4, FaSp) Nonprofit organizations and their relation to government and business; the role of philanthropy, social enterprise and public support; and implications for policy, strategy and management.

PPD 690 Alternative Dispute Resolution (4, Fa) Theory and methods of conflict analysis, negotiation, facilitation and mediation in the public sector. (Duplicates credit in former PUAD 519.)

PPD 692 Transportation and the Environment (4, Sp) Analysis of the benefits and costs of urban transportation; concepts of social costs; benefits and externalities; environmental costs; social justice issues; policy and planning alternatives for sustainable transportation. (Duplicates credit in former PPD 584.)
Prerequisite: PPD 501a.

PPD 693 Communicating Public Policy (4) Exploring the complex relationships that exist among policies, policymakers, and the media; analyzing the role of journalists and policy analysts in the public policy process.

PPD 694 Coastal Policy and Planning (4, Sp) Coastal management issues in the context of public and private users competing for land resources, the costs and benefits of seaports, compare coastal development models.

PPD 695 Clinical Issues for Managers (1, Fa) Introduces key information and concepts for managers of clinical services. Examines problems and issues facing health care managers and clinician relations.

PPD 696 Health Care Venture Development (2, SpSm) Focuses on developing the resourcefulness, know-how and decision support skills needed to identify, assess and develop new health ventures. Includes business planning, financing, strategy, entrepreneurship. *Recommended preparation:* PPD 510a or HMGT 565.

PPD 697 Cultural Proficiency in Health Management and Policy (2, Sp) Provides an understanding of what social factors contribute to racial/ethnic, socioeconomic, and gender disparities in health and the culturally proficient provision of health care.

PPD 698 Strategic Management and Change (4) Theory and applied skills in management of social sector organizations with applications in international settings. Strategic management and planning; communication strategies, marketing and promotion; leadership skills; organizational development and change.

PPD 700 Teaching Seminar (2) Pedagogy: learning objectives, curriculum design, teaching methods, evaluation. Graded CR/NC. (Duplicates credit in former PPD 700ab.)

PPD 706 Paradigms of Research and the Design of Inquiry (4, FaSp) Philosophy of social science; applied social research; research design; sampling and validity; overview of qualitative and quantitative methods. Open only to doctoral students.

PPD 707 Survey Research Methods (4, Sp) Collection and use of survey data: basic orientation, mechanics of using SAS, and interpretation of survey tabulations. Graduate standing. (Duplicates credit in former PLUS 608.) *Prerequisite:* PPD 525.

PPD 708 Qualitative Methods (4, Sp) Reflective and critical approach that questions data collection techniques, positions relative to those being studied, and explanatory methods. (Duplicates credit in former PLUS 609.) *Recommended preparation:* PPD 525 or PPD 612.

PPD 709 Applications in the Advanced Quantitative Methods (4, Sp) Statistical and econometric modeling in real estate finance, urban economics, public policy, and planning research. Building, estimating and adjusting models for real-world. *Prerequisite:* PPD 525.

PPD 710ab Research Seminar (a: 2, Fa; b: 2, Sp) Research fields and design; literature reviews; critical reading and critiquing; project development. Open only to doctoral students. Graded CR/NC. *Prerequisite:* PPD 706.

PPD 711 Theoretical Foundation of Public Management (4, Fa) Theories of the role, structure, and growth of the public sector; political economy of public bureaucracies; the voluntary nonprofit sector. *Prerequisite:* PPD 501b.

PPD 712 Seminar in Public Policy (4, Fa) Critical analysis of the policy field; theoretical foundations; integration of quantitative, organizational, and political considerations; policy research. (Duplicates credit in former PUAD 626.) *Prerequisite:* PPD 501b, PPD 554.

PPD 713 Advanced Planning Theory (4, Fa) Positive and normative attitudes of public plans, policies, programs, organizational and institutional settings; policy analysis; modeling of social choices; evaluation; applied welfare analysis; performance assessment. (Duplicates credit in former PLUS 605.)

PPD 714 Advanced Urban Development (4, Fa) Urbanization, urban economics, land use, the politics of growth, governance, regulation, and the state, immigration, and place promotion.

PPD 715 Political Economy and Institutional Analysis (4) Institutional dimension of political economy; analytic approaches in institutional analysis and their relevance for understanding the interactions between

political and economic factors in public-sector issues. *Prerequisite:* PPD 501ab.

PPD 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC. (Duplicates credit in former PLUS 790 and PUAD 790.)

PPD 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC. (Duplicates credit in former PLUS 794abcdz and PUAD 794abcdz.)

PPD 795 Law of the Political Process (2-4, max 8) (Enroll in LAW 795)

PPD 797 Public Policy in Law: Analysis and Advocacy (1-4) (Enroll in LAW 797)

Price School of Public Policy

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

POLICY, PLANNING, AND DEVELOPMENT — EXPANDED (PPDE)

PPDE 630 Community Health Planning (4, Sp) The role of planning in sustaining community health; examines relationship between health and environment; historical development, conceptualization and practice of community health planning.

PPDE 631 Public Space: Theory, Policy, and Design (4) Examination of contemporary issues and practices in the design, production, and uses of public space in a comparative perspective; implications for future design and public policy.

PPDE 632 Sustainable Cities (4, FaSp) Exploration of environmental problems linked to urbanization, drawing on historical analysis, social theory, scientific research, and city planning/design practice. Alternative policy options for urban sustainability. (Duplicates credit in the former GEOG 601.)

PPDE 633 Communicating City Design: Positions and Representations (2) Communicating the processes, products, and concepts of city design; merging theoretical and skill-based exercises for effective communication; verbal and graphic communication; physical components of urban landscape and dimensional attributes.

PPDE 634 Methodology, Methods and Tools for Urban Sustainability (2-4, FaSp) Methodology, assessment and planning methods for urban sustainability and land use planning; how the choice and use of theory and methods impact the planning process; systems and spatial analysis.

PPDE 635 Housing and Land Use in Rapidly Urbanizing Regions (4, Fa) Interdisciplinary approach to conceptualize urban land and property rights; property rights strategies; design and policy interventions; the struggle for rights to space in the city.

PPDE 644 Land Use and Transportation Planning (4) Key theories of land use — transportation interactions; understanding of land markets and derived-demand approach; use of evidence for information; travel data collection methods; application of land use.

PPDE 645 Financial Management of Nonprofit Organizations (4) Accounting and financial management principles and practices in nonprofit organizations: budgeting financial analysis, internal controls, financial policies, grant making and financial reporting. (Duplicates credit in PPD 541.)

PPDE 646 Grant Writing Practicum (2) Grant making process and proposal development; philanthropic foundations; strategies for funding; budgeting, logic models, and evaluation; peer review.

PPDE 647 Civic Engagement in Governance (4, Sp) Roles of citizens, civic associations, nonprofit organizations, government and business in democratic governance; civil society as the interface among these entities; techniques, purposes and contexts of civic engagement.

PPDE 648 Performance Management (2) Concept and practice of performance management; examination of performance measurement; analysis and reporting practices for organizational accountability and improvements; performance design, indicators, utilization of information.

PPDE 649 International Development NGOs: Theory, Policy and Management Issues (4) Critical issues involved in International Development NGO management; theoretical work and analytical framework to understand organizational features; NGO management, issues and challenges.

PPDE 660 Environmental Policy Design and Analysis (2, Sp) Analytical foundation for design of institutions and policies; environmental policy; welfare economics and market failure; policy evaluation; economic policy instruments; climate change policy issues; other policy issues. *Prerequisite:* PPD 501a; *recommended preparation:* PPD 501b.

PPDE 661 Methods for Equity Analysis (4) Techniques to measure inequality and segregation. Policy evaluation using techniques for casual inference. *Prerequisite:* PPD 558.

PPDE 662 China from a US Policy Perspective (4) Examination of China through the lens of the US federal government; trade issues; economic coordination and stability; environment and sustainability; defense and security; human development.

PPDE 663 Media for Policy Change (4, Sp) The use of media as an implement of social policy and change at the state and federal level; analysis of social problems and the effect policy practitioners influence on change.

PPDE 664 Seminar in Social Justice and Public Policy (4) Major theories of social justice in the US and globally; how theories of social justice influence policy, urban planning, and public administration; how to bridge theories about justice for professional practice.

PPDE 680 Board Governance and Leadership (2) Governance of nonprofit organizations; responsibilities and expectations of boards; board effectiveness; and changes in governance as a result of recent federal and state legislation.

PPDE 681 Fund Development for Nonprofit Organizations (4) Key aspects of the fundraising process for nonprofit organizations; theoretical foundations and general fundraising principles; techniques sources of donations; key aspects of managing the process.

PPDE 682 Strategic Management and Leadership in Nonprofit Organizations (4) Mission-mandated accountable and ethical practice, individually and organizationally; applications of core competencies; practical inquiry, analysis, systems; comparative frameworks; strategic leadership and management of public value production. *Prerequisite:* PPD 500 and PPD 675 and PPD 689. Open only to Master of Nonprofit Leadership and Management students.

Price School of Public Policy

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PUBLIC ADMINISTRATION (PUAD)

Frequency of course offerings varies from campus to campus. Check with individual campuses regarding

availability.

PUAD 613 Seminar in Financial Policy (4, Irregular) Historical development and trends in public revenues and expenditures. Political, economic, and administrative significance of decisions in the field of financial management. *Prerequisite:* PPD 647.

PUAD 617 Seminar on Behavioral Aspects of Training and Development (4, Irregular) Theoretical concepts governing the administration of socio-technical systems, organization development, action training and research, and other development and change processes utilized in public service.

PUAD 675 Institutional Context of the Public Sector (4, Sp) Theories of the role, structure and growth of the public sector; public choice processes; political economy of public bureaucracies; the voluntary nonprofit sector. *Prerequisite:* PPD 501b.

PUAD 685 Seminar on Organizational Behavior in Public Systems (4, FaSp) Organizing processes; decision-making; communication; leadership; behavioral models; political and social behavior in organizations. *Prerequisite:* PPD 545.

PUAD 692 Multivariate Statistical Analysis (4, Fa) Multivariate analysis of qualitative and quantitative variables including multiple linear regression, multiple contingency table analysis, log-linear and logit models, and path analysis. *Prerequisite:* PPD 502x.

PUAD 695 Seminar in Administrative Theory (4, FaSp) Assessment of current normative and descriptive theories of public administration; variety of conceptual systems; operationalism; levels of organizational analysis. *Prerequisite:* PPD 540.

PUAD 697 Seminar in Public Management (4, Irregular) Public management research and theory; differences between private and public organizations; contextual influences on public management; contemporary empirical studies; bibliographic research. *Prerequisite:* admission to the DPA program.

PUAD 791ab Public Administration Research Seminar (1, 1, FaSp) Presentation and discussion of research histories and current research projects of members of the faculty and distinguished guest scholars. Open only to Ph.D. and DPA students. Graded CR/NC.

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

REAL ESTATE DEVELOPMENT (RED)

RED 500 Real Estate Development and the Economy (2, Sm) Linkages between national and regional economies and the performance of the real estate sector. Anticipating development trends. Public policy applications.

RED 509 Market Analysis for Real Estate (4, Fa) Explores macro and micro aspects of residential, retail, office, and industrial markets and examines methodologies for analyzing such markets for real estate development/investment purposes. *Prerequisite:* RED 542.

RED 510 Real Estate Practice and Principles (4, FaSp) Fundamental principles of real estate analysis; economics; capital markets; development decision-making; relationships between real estate markets and federal, state and local government policies; property value.

RED 511 Foundations of Real Estate Analysis (4, FaSp) Principles of real estate analysis; capital markets;

importance of uncertainty and metrics of risk; investments; valuation techniques; use of debt and equity, leases, taxes. *Prerequisite:* RED 510.

RED 512 Real Estate Project Analysis (4, FaSp) Fundamental economic theories; analytical techniques; practical applications for market analysis of various forms of real estate. *Prerequisite:* RED 511.

RED 541 Finance Fundamentals for Real Estate Development (2, Sm) Introduction to the general principles of finance with application to real estate development, including capital markets, financial institutions, valuation and risk management.

RED 542 Finance of Real Estate Development (3, FaSm) Theory and methods of real estate finance and investment. Real estate investment analysis, real estate entities, taxation; introduction to securitization of real estate equities, debt. *Prerequisite:* RED 541.

RED 544 Real Estate Capital Markets (2, Fa) Explore structure, instruments and institutions of real estate capital markets. Consider linkages between real estate and capital markets. Assess role of Real Estate Investment Trusts. *Prerequisite:* RED 542.

RED 545 Advanced Real Estate and Financial Modeling (2, Sp) Quantitative problem solving using computerized modeling. Complex debt financing, including lender participation, subordination, joint venture structuring, systematic treatment of real estate portfolios. *Prerequisite:* RED 542.

RED 546 Applications of Real Estate Finance to Problems of Development (3, Sp) Advanced topics in finance applied to cases and problems of real estate development; emphasis on structuring, finance and evaluation of various types of development projects. *Prerequisite:* RED 542.

RED 547 Project Management and Construction (2, Sm) Managing the building phase of development. Architectural and engineering aspects of construction management for the real estate developer.

RED 551 The Approval Process (4, FaSpSm) Approval process for real estate development including land use entitlement, site selection, zoning, environmental review, community and government relations, infrastructure financing, ethical issues, negotiation skills.

RED 562 Legal Issues in Real Estate Development (4, FaSp) Ownership and transfer of real estate; formation and enforcement of contracts; business associations; environmental regulation; taxation of property transfers; acquiring, financing, leasing of commercial property. (Duplicates credit in former RED 662.)

RED 563 Introduction to the Asset Management of Real Estate (2, Fa) Overview of institutional asset management: creating and implementing investment and portfolio strategies through the development, acquisition, underwriting, and operational stages of the investment, asset disposition.

RED 564 Issues in Asset Management of Real Estate (2, Sp) Advanced issues in institutional asset management. How value is created during investment process with focus on tactical, operational, and strategic goals of asset and owner. *Prerequisite:* RED 563.

RED 571 Introduction to Appraisal Principles, Procedures, and Standards (4, Fa) Valuation concepts. Theory and problem solving. Cost, sales comparison, and income approaches.

RED 572 Advanced Appraisal Approaches and Applications (2, Sp) Highest and best use. Advanced income capitalization. Advanced cost and sales comparison approaches. Advanced applications. *Recommended preparation:* RED 571.

RED 573 Design History and Criticism (2, Sm) The concepts, language and metaphors of design-related disciplines are examined in relation to design and construction values and choices in real estate development. (Duplicates credit in former RED 673.)

RED 574 Building Typologies (2, Fa) The exploration of categories of building types, including retail, industrial, residential, office and institutional, using key examples or case studies from each. (Duplicates credit in former RED 674.)

RED 575L Community Design and Site Planning (2-4, max 8, Sp) Physical implementation of development projects. Students will develop concept plan, preliminary design and marketing plan for selected domestic and/or international development sites. (Duplicates credit in former RED 675L.)

RED 583 International Development Opportunities (2, Sp) A survey of various markets prominent in the global real estate community. Protocols for analyzing international development opportunities and cultural, political, and socioeconomic considerations.

RED 585 Comparative International Development Workshop (2-4, Sm) Comparative study tour focused on understanding international real estate development practices and markets, site visits and meeting with principals.

RED 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department.

RED 598 Real Estate Product Development (2-4, max 12, FaSpSm) An evaluation of various real estate development types. Case studies and site visits.

RED 599 Special Topics (2-4, max 8) Current issues, trends, and developments in real estate development.

Military Courses of Instruction

AEROSPACE STUDIES (AEST)

AEST 100ab Aerospace Studies I: Air Force Mission and Organization (1-1, FaSp) *a*: Introduction to U.S. Air Force and the military profession; USAF organization and functions; Strategic Air Command organization, command, control, and weapons systems; communication skills. *b*: Organization and function of NORAD; tactical air, military airlift, systems, logistics, air training and communications commands; Army, Navy, Marines; reserves; separate operating agencies.

AEST 110ab Leadership Laboratory I (1-1, FaSp) Introduction to the military experience focusing on customs and courtesies, drill and ceremonies, and the environment of an Air Force officer. Graded CR/NC.

AEST 200ab Aerospace Studies II: Air Force History (1-1, FaSp) *a*: Development of aerospace power in the U.S. through World War II; emphasis on the Army Air Corps; communication skills. *b*: Development of aerospace power since World War II; emphasis on international confrontations involving the United States; communication skills.

AEST 210ab Leadership Laboratory II (1-1, FaSp) Introduction to the military experience focusing on

customs and courtesies, drill and ceremonies, and the environment of an Air Force officer. Graded CR/NC.

AEST 220ab Advanced Leadership Laboratory II (a: 1, Fa; b: 1, Sp) Additional exposure to the military experience for continuing AFROTC cadets, focusing on customs and courtesies, drill and ceremonies, and the environment of an Air Force officer. Graded CR/NC.

AEST 300ab Aerospace Studies III: Air Force Management and Leadership (3-3, FaSp) Air Force management focusing on the new manager in the Air Force milieu. Emphasis on communication skills peculiar to the Air Force.

AEST 310ab Leadership Laboratory III (1-1, FaSp) Practical introduction to Air Force leadership focusing on military communicative skills, group dynamics, and application of theories of leadership and management. Graded CR/NC.

AEST 400ab Aerospace Studies IV: National Security Forces in Contemporary American Society (3-3, FaSp) Military professionalism and the context in which defense policy is formulated and implemented; national security policy, political/social constraints, and military justice.

AEST 410ab Leadership Laboratory IV (1-1, FaSp) Advanced Air Force leadership experience focusing on the practical development of the Air Force officer through command and staff positions within the Cadet Corps. Graded CR/NC.

AEST 420ab Leadership Laboratory V (1-1, FaSp) Advanced leadership experiences for AFROTC continuing cadets. Graded CR/NC.

Military Courses of Instruction

MILITARY SCIENCE (MS)

MS 101 Foundations of Officership (1, Fa) Introduces students to issues and competencies that are central to a commissioned officer's responsibilities. Establish framework for understanding officership, leadership, and Army values followed and "life skills" such as physical fitness and time management. (Duplicates credit in former MS 100.)

MS 102 Basic Leadership (1, Sp) Establishes foundation of basic leadership fundamentals such as problem solving, communications, briefings and effective writing, goal setting, techniques for improving listening and speaking skills and an introduction to counseling. (Duplicates credit in former MS 110.)

MS 201 Individual Leadership Studies (2, Sp) Students identify successful leadership characteristics through observation of others and self through experimental learning exercises. Students record observed traits (good and bad) in a dimensional leadership journal and discuss observations in small group settings. (Duplicates credit in former MS 200.)

MS 202 Leadership and Teamwork (2, Sp) Study examines how to build successful teams, various methods for influencing action, effective communication in setting and achieving goals, the importance of timing the decision, creativity in the problem solving process, and obtaining team buy-in through immediate feedback. (Duplicates credit in former MS 210.)

MS 301 Leadership and Problem Solving (3, Fa) Students conduct self-assessment of leadership style, develop personal fitness regimen, and learn to plan and conduct individual/small unit tactical training while testing reasoning and problem-solving techniques. Students receive direct feedback on leadership abilities. (Duplicates credit in former MS 300.)

MS 302 Leadership and Ethics (3, Sp) Examines the role communications, values, and ethics play in effective leadership. Topics include ethical decision-making, consideration of others, spirituality in the military, and survey Army leadership doctrine. Emphasis on improving oral and written communication abilities. (Duplicates credit in former MS 310.)

MS 401 Leadership and Management I (3, Fa) Develops student proficiency in planning and executing complex operations, functioning as a member of a staff, and mentoring subordinates. Students explore training management, methods of effective staff collaboration, and developmental counseling techniques. (Duplicates credit in former MS 400.)

MS 402 Leadership and Management II (3, Sp) Study includes case study analysis of military law and practical exercises on establishing an ethical command climate. Students must complete a semester long Senior Leadership Project that requires them to plan, organize, collaborate, analyze, and demonstrate their leadership skills. (Duplicates credit in former MS 410.)

MS 499 Special Topics (2-4, max 8, FaSpSm) Selected topics in military science.

Military Courses of Instruction

NAVAL SCIENCE (NSC)

NSC 135 Introduction to Naval Science (2, Fa) Introduction to the structure, principles, and practices, lines of command and control, and functions of the various components of the naval service. Lecture, 2 hours; laboratory, 2 hours.

NSC 137 Seapower and Maritime Affairs (4, Sp) Analysis of U.S. Navy development and campaigns; evolution of strategic, tactical, and maritime doctrines; interaction of naval affairs with national security and domestic policies. Lecture, 3 hours; laboratory, 2 hours.

NSC 251 Seamanship and Ship Operations (3, Fa) Vector solutions of relative motion, tactical problems; tactical communications, instructions; fleet communications, organizations; rules of the Nautical Road; aviation and maritime meteorology; operation plans and orders. Lecture, 3 hours; laboratory, 1 hour.

NSC 283 Naval Ships Systems I (Engineering) (3, Sp) Types, structure, and purpose of Naval ships, compartmentation, propulsion systems, auxiliary power systems, interior communications, ship control; ship design and stability. Lecture, 3 hours; laboratory, 2 hours.

NSC 335 Navigation (3, Fa) Purposes, methods, and instruments of navigation; terrestrial and celestial navigation and nautical astronomy; time diagrams; lines of position by observation of celestial bodies. Lecture, 3 hours; laboratory, 2 hours.

NSC 337 Naval Ships Systems II (Weapons) (3, Sp) Systems approach to naval weapons; linear analysis of ballistics; weapons control systems configurations and dynamics. Field trips. Lecture, 3 hours; laboratory, 2 hours.

NSC 343 Evolution of Warfare (3, Fa) Causes and practice of warfare from ancient times; impact of changes in strategy, tactics, and technology; modern revolutionary warfare, global conflict, and politico-military relationships. Lecture, 3 hours; laboratory, 2 hours.

NSC 392 Amphibious Warfare (3, Fa) Concepts of seaborne military operations; relationship of factors involved; characteristic operations of World War II; amphibious operation planning. Lecture, 3 hours; laboratory, 2 hours.

NSC 453 Leadership and Management I (2, Fa) Principles of human relationships; principles of decision-making and management at the junior officer level; theory and techniques of leadership. Lecture, 2 hours; laboratory, 2 hours.

NSC 454 Leadership and Management II (2, Sp) Introduction to primary duties of junior naval officers; counseling and interviewing techniques; review of basic administrative responsibilities at the division officer level. Lecture, 2 hours; laboratory, 2 hours.

USC School of Social Work

Now the nation's largest and fastest growing school of social work, the USC School of Social Work is celebrated for its rigorous career preparation and scientific contributions. Led by Dean Marilyn L. Flynn, the school recently initiated the Grand Challenges effort among social work scholars to tackle the most serious societal issues. Here Diana Cruz speaks to a homeless woman in downtown Los Angeles.

USC School of Social Work

The USC School of Social Work offers programs of study leading to the Master of Social Work (MSW) and Doctor of Philosophy (Ph.D.) in social work. These programs provide the student a broad background of knowledge about health and welfare problems, the meaning of programs past and present that have been established to meet them, and current issues and policy trends in the field.

At the same time, the student is helped to become a professional person through development of a philosophy in harmony with that of the profession: to prevent and mitigate severe social problems that challenge the viability of culturally diverse and complex urban settings; to build on the strengths of individuals, families and communities; and to lead the scholarly search for innovative, efficacious and just solutions.

Degree Programs

The School of Social Work offers the Master of Social Work (MSW), the Doctor of Philosophy (Ph.D.) and the dual Master of Social Work/Doctor of Philosophy, Social Work (MSW/Ph.D.) degrees. In addition, the school offers dual degrees with the schools of business; gerontology; law; medicine; public policy; and Hebrew Union College.

School of Social Work

Master of Social Work

The program of study which leads to the Master of Social Work degree consists of 60 units (46 units of course work and 14 units of field practicum). The program is available at these locations: University Park, Orange County Academic Center in Irvine, Skirball Academic Center in West Los Angeles, San Diego Academic Center in Rancho Bernardo and Virtual Academic Center via the Internet and can be completed in a full-time (two-year) program or part-time (three- or four-year) program. In addition, some classes are offered at City Center in downtown Los Angeles.

The basic foundation curriculum introduces students to the range of social welfare problems and programs, and to the varieties of human behavior with which social work is concerned. At the same time, students learn the methods by which the social worker, the social agency and the organized community work with people and problems. Field instruction, under supervision in a social agency, is scheduled for two or three days a week, enabling students to apply theory to practice. All content areas include content on diversity, social work values and ethics, and economic justice and populations at risk. At the completion of foundation requirements, students are expected to have acquired a sense of professional responsibility and the ability to use knowledge on behalf of the individual, the group and the community.

The concentration curriculum builds on the generic social work knowledge obtained in the foundation study by offering a choice of five advanced practice concentrations: families and children; health; mental health; community organization, planning and administration (COPA); and social work and business in a global society. Students can complete all foundation courses in Orange County, as well as course work for the concentrations offered, which is determined by student interest but is typically families and children; health; and mental health concentrations. If a student's concentration is not offered, classes must be taken at the University Park Campus. The San Diego Academic Center offers all foundation courses, as well as all course work for the mental health and COPA concentrations. Students in the Virtual Academic Center may select the COPA; families and children; health; mental health; and social work and business in a global society concentrations. The Skirball Academic Center offers selected courses in the concentrations. Students who attend first-year courses at the Skirball Academic Center will take some or all concentration courses at University Park.

There are also five sub-concentrations at University Park: social work practice (1) with older adults; (2) for systems of mental illness recovery; (3) in school settings, which meets the academic requirements for the Pupil Personnel Services Credential necessary for social work practice in the public schools of California; (4) in public child welfare; and (5) in military social work and veteran services. The San Diego Academic Center offers the social work practice in school settings and the military social work and veteran services sub-concentrations. Students in the Virtual Academic Center may select the military social work and veteran services sub-

concentration. Students designate their choice of concentration in the final semester of the foundation year. The basic second-year curriculum (required courses and field instruction placement) will be determined by this choice of concentration; elective courses are available as part of the concentration-year curriculum. Students in all concentrations are required to enroll in SOWK 611 Leadership in the Social Work Profession and Organizations: Theory and Practice.

This system of curriculum offerings provides a strong educational program with a continuing commitment to a generalist base and a focused set of concentrations, in combination with a range of options to meet special interests. This program enables graduates to move into the social work community with a combination of knowledge and skills in a broad arena, as well as in-depth knowledge and skills in a particular method, population or area of service.

The curriculum builds on a liberal arts foundation which all entering students are required to have. The applicant should have a range of undergraduate courses in the humanities and the social and physical sciences.

General Requirements

The Master of Social Work degree requires a minimum of 60 semester units of courses, including field education (1000 clock hours).

The degree is not awarded solely on the basis of credits earned but also requires evidence of competence in both theory and practice. At their discretion, the faculty may require courses or fieldwork or both beyond the minimum requirements.

Time Limit

The master's degree program requires two academic years of full-time study or a structured part-time program which must be completed in a maximum of four years.

Grade Point Average Requirement

In accordance with the requirements of the Graduate School, a grade point average of 3.0 (A = 4.0) is required for admission to the School of Social Work. Likewise, the university requires an overall GPA of 3.0 for graduation from the master's degree program.

Course Requirements

Course requirements are organized in five interdependent content areas that continue throughout the two years: social work practice; social welfare, policy and services; human behavior and the social environment; research; and fieldwork.

A typical foundation program includes two courses in social work practice; two courses in social welfare, policy and organizations; two courses in human behavior; two semesters of fieldwork; two semesters of fieldwork seminars; and one course in research methods.

Students typically choose their concentration in the final semester of the foundation year and must enroll in three courses required by the concentration they select. Additionally, students in all concentrations must take two semesters of field instruction, three elective courses and SOWK 611 Leadership in the Social Work Profession and Organizations: Theory and Practice. Each student completes an individualized study plan, which is approved by the concentration faculty.

Academic credit is not granted for life experience or work experience in lieu of the field practicum or any other courses in the curriculum.

REQUIRED COURSES		UNITS
SOWK 503	Human Behavior and the Social Environment I	3
SOWK 505	Human Behavior and the Social Environment II	3
SOWK 534	Policy and Practice in Social Service Organizations	3
SOWK 535	Social Welfare	3

SOWK 543	Social Work Practice with Individuals	3
SOWK 545	Social Work Practice with Families, Groups and Complex Cases	3
SOWK 562	Social Work Research	3
SOWK 586ab	Field Practicum	3-3
SOWK 587ab	Integrative Learning for Social Work Practice	2-2
SOWK 611	Leadership in the Social Work Profession and Organizations: Theory and Practice	3
SOWK 686ab	Field Practicum II	4-4

Plus 9 additional units of concentration courses and 9 additional units of Social Work electives

Field Education

Field education is an integral part of the Master of Social Work curriculum. Two year-long field education courses are required. In the foundation year, the field courses include: 16 hours per week in field placement and participation in a field seminar on campus. In the concentration year, students are typically in placement 20 hours per week. Field education takes place in selected agencies and centers, which represent the complete range of social services. Field placements are approved on the basis of the quality of their professional practice, commitment to social justice and to addressing social work problems, interest in participating in professional education, and ability to make personnel and resources available. Field instructors, who are employed by either the agency or the school, are responsible for teaching students in their field placements. The associate dean for field education is administratively responsible for all field assignments.

Each placement in field education is made on an individual basis which takes into consideration the following: geographic location, previous experiences, future goals, professional interests, special needs and stipend requirements. In these placements, students engage in selected and organized social work activities that provide practical experience in applying skills learned in the classroom.

Foundation field placement is arranged by the school with the view of building a generalist foundation in direct services through providing practice experiences in a continuum of modalities including work with individuals, families, small groups and communities and with a diversity of client populations and treatment issues. All students are also required to complete an assignment related to the organization in which they are placed. The generalist experience also encompasses a range of theoretical concepts and models to develop breadth of learning and establish a broad base for practice. The foundation year field course is a prerequisite for entry into the concentration placement.

The school, the agency and the student collaboratively decide on the concentration field placement with the view of developing the special knowledge and depth of skill needed for professional practice in a designated area of concentration. This advanced experience is designed to build on the student's foundation year and to develop knowledge and skills within the concentration the student has selected.

Students must participate in an appropriate practice class concurrently with the field course and in a field seminar during the foundation field course. Satisfactory performance in both foundation and advanced field courses is required for all students earning the Master of Social Work degree, including those enrolled in dual degree programs.

The number of field placement options for non-driving students is limited. Students are encouraged to have access to an automobile for field placement.

A student must complete and receive credit for a minimum of 450 hours in the foundation year and 550 hours in the concentration year of field placement in order to be awarded the Master of Social Work degree.

Research Requirement

The research requirement consists of one foundation course. In the foundation year of study, SOWK 562 is designed to impart knowledge of research methodology and statistics. In the concentration year, students are required to enroll in core concentration courses that combine research skills acquired in the foundation year with evaluation and program development in their concentration field of study.

Transfer Students

Applicants who have recently completed part or all of the first half of graduate study at a Council on Social Work Education-accredited school of social work may apply as transfer students. In addition to materials described in the section on application procedures, transfer students should forward course syllabi and a bulletin of the school for the year in which the course or courses were taken.

Transfer credits may be applied for those courses determined to be equivalent to USC's first-year courses or to meet the expectation of the second-year electives. The grade point average for any course taken at another school of social work must be at least 3.0 on a 4.0 grading scale. Where foundation courses are similar, but not equivalent, transfer students may be permitted to take a waiver examination for possible exemption from those courses. Transferred credit for fieldwork will be computed on the basis of clock hours completed as well as on the breadth and depth of contents covered.

Military Social Work and Veteran Services

The School of Social Work offers a Military Social Work and Veteran Services sub-concentration in the MSW curriculum targeting military personnel, spouses and other military dependents and military retirees who wish to maintain a post-military career affiliation with the armed forces; military veterans who wish to provide professional services to their military comrades; and civilian personnel who are committed to assisting military personnel, their families and military veterans with adapting, coping and managing the stresses and strains of military life and post-military life.

Course Requirements

Beyond the basic professional social work foundation course requirement of the Master of Social Work degree, the sub-concentration in Military Social Work and Veteran Services will offer a series of highly specialized courses focusing on the needs of military personnel, veterans and their families. Students will take three courses in special topics that focus on this sub-concentration. Individuals pursuing the Military Social Work and Veteran Services sub-concentration will also be able to select from a variety of highly relevant elective courses that will serve to enhance their training and future service delivery capabilities.

Field Instruction

Students must complete a 600-clock hour internship in a military hospital, base/installation family services unit, Veterans Affairs, Vet Center, etc.

Advanced Standing Option

The School of Social Work offers an advanced standing option for students who have graduated with a Bachelor of Social Work (BSW) degree from a Council on Social Work Education (CWSE)-accredited BSW program within the past five years. To be eligible for the advanced standing option, students must have successfully completed their BSW with a minimum GPA of 3.25 for the last 60/90 units of undergraduate work. A cumulative 3.5 GPA for all social work courses with a grade of B or better is required for admission.

Students admitted to advanced standing must successfully complete three 2-unit intensive courses (SOWK 600 Assessment in Social Work Practice, SOWK 606 Neuropsychological Development and SOWK 604 The Role of Evidence-Based Practice in Social Work) in one six-week session prior to their first academic semester. Students who successfully complete these courses will be given credit for foundation year requirements (31 units) and advance into the concentration year or second year of study to complete the additional 29 units required for graduation. Students who do not pass the bridge courses will not be given the 31 units of credit, but may opt for the 60-unit MSW program and enter the foundation year or first year of the program.

Advanced standing allows students to bypass the foundation year and enter the concentration year of studies. The concentration curriculum builds on the generic social work knowledge, which they obtained through their BSW experience, by offering a choice of five advanced practice concentrations: (1) community organization, planning and administration (COPA); (2) families and children; (3) health; (4) mental health; and (5) social work and business in a global society. Students in all concentrations are required to enroll in SOWK 611 Leadership in the Social Work Profession and Organizations: Theory and Practice. Advanced standing students may also complete one of the following five sub-concentrations at the University Park Campus: (1) social work practice with older adults; (2) systems of mental illness recovery; (3) school social work, which meets the academic

requirements for the Pupil Personnel Services Credential necessary for social work practice in the public schools of California; (4) public child welfare; and (5) military social work and veteran services. Please note, some academic centers do not offer all concentration and/or sub-concentration areas of studies.

The advanced standing option consists of 35 units (27 units of course work and 8 units of field practicum). The option is available at these locations: University Park Campus, Orange County Academic Center in Irvine, San Diego Academic Center in Rancho Bernardo and Virtual Academic Center via the Internet and can be completed in three semesters. In addition, some classes are offered at City Center in downtown Los Angeles.

School of Social Work

Dual Degree Programs

The School of Social Work currently offers dual degree programs with a number of other USC professional schools. In addition, the school maintains a dual degree program at Hebrew Union College located adjacent to the USC campus.

The goal of these programs is to encourage graduate students to gain a recognized competence in another discipline which has direct relevance to the roles filled by social workers in society. Dual degree programs are based on the premise that some topics covered in the school are also addressed in the curricula of other departments, so that some credit toward an MSW degree may be given for specific courses in the cooperating department. Similarly, these departments have recognized that some credit toward their corresponding degree may be awarded for work completed in the School of Social Work. For this reason, students enrolled in dual degree programs can obtain both degrees with a reduced number of total units. Students wishing to enroll in dual degree programs must apply for and be admitted to both schools.

Master of Social Work/Doctor of Philosophy, Social Work (MSW/Ph.D.)

The MSW/Ph.D. dual degree program is a course of study leading to both a graduate degree (Master of Social Work) and doctor of philosophy (Ph.D.) in social work. This course of study is offered to exemplary students seeking advanced research based study in social work to become professional leaders who will make significant contributions to the knowledge base of the profession in the social work academic world.

Prospective students must meet both the MSW and Ph.D. standing admission requirements.

Requirements

A total of at least 90 units is required for the dual degree with at least 42 units in the MSW program and at least 48 units in the Ph.D. program (exclusive of SOWK 794 Doctoral Dissertation). Students who select the mental health concentration will be required to complete at least 93 units (at least 45 MSW units and at least 48 Ph.D. units). The program can be completed within four years.

REQUIRED MSW COURSES

		UNITS
SOWK 505	Human Behavior and the Social Environment II, or a graduate-level course in developmental psychology in Department of Psychology or another department	3
SOWK 543	Social Work Practice with Individuals	3
SOWK 545	Social Work Practice with Families, Groups and Complex Cases	3
SOWK 562	Social Work Research	3
SOWK 586ab	Field Practicum	3-3
SOWK 587ab	Integrative Learning for Social Work Practice	2-2
SOWK 611	Leadership in the Social Work Profession and Organizations	3
SOWK 686ab	Field Practicum II	4-4

Students in the COPA, Families and Children, Health, and Social Work and Business in a Global Society concentrations will be required to complete an additional 9 units of MSW core concentration specific courses,

while students in the Mental Health concentration will be required to complete an additional 12 units of MSW core concentration specific courses.

REQUIRED PH.D. COURSES		UNITS
SOWK 702	Theories of Human Behavior in the Contexts of Social Environments	3
SOWK 703	Explanatory Theories for Larger Social Systems, or	
SOWK 743	Theories for Practice with Small Systems	3
SOWK 733	Policy Analysis and Advocacy in a Comparative Social Policy Context	3
SOWK 744	Theories for Practice with Large Systems	3
SOWK 760L	Introduction to Social Work Statistics	3
SOWK 761L	Multiple Regression for Social Work Research	3
SOWK 762	Social Work Research Methods I	3
SOWK 763	Social Work Research Methods II: Issues in Research for Social Work Practice	3
SOWK 764	Advanced Multivariate Statistics	3

Dual degree students will develop an Individualized Study Plan (ISP) at two points in their educational process. They will develop a plan with their mentor before the fall semester begins in year 1 to identify courses they plan to take in years 1 and 2.

It will be approved by the doctoral committee. Students will develop a plan with their mentor in the spring semester of their second year to identify courses and tutorials they will take in their third and fourth years.

Program Adaptation

The USC School of Social Work waives the following 9 units of the MSW foundation curriculum for students in the MSW/Ph.D. Dual Degree Program: SOWK 503, SOWK 534 and SOWK 535. Content and theory from these courses will be more rigorously covered during the first year in the following Ph.D. courses: SOWK 702, SOWK 733 and SOWK 744.

The MSW and the Ph.D. degrees are awarded separately upon completion of all program requirements.

Master of Social Work/Master of Science, Gerontology

The M.S./MSW dual degree offers the student interested in direct service or community organization the credentials most valued in clinical and therapeutic practice. Students enrolled in this dual degree receive an MSW as well as an M.S. in Gerontology. This dual degree requires completion of 72 units: 32 units of work in the Davis School of Gerontology and 40 units in the School of Social Work. The course work is usually completed over a 24-month period for full-time students. Dual degree students in this program complete the standard foundation year courses in the School of Social Work, with the exception of SOWK 535 Social Welfare. Students may select any concentration, with the exception of Families and Children. In the concentration year, students must complete the three required core concentration courses as well as SOWK 611 Leadership in the Social Work Profession and Organizations: Theory and Practice. See the Davis School of Gerontology for course requirements.

Master of Social Work/Master of Planning, Public Policy

The dual degree program between social work and planning offers unique opportunities for students who want to devote their professional careers to social policy, social planning or social services delivery. Dual degree students in this program receive an MSW as well as a Master of Planning (MPL). The MPL/MSW degree requires completion of a total of 83 units: 51 units in social work and 32 units in planning. The course work is normally completed over a period of 28 months for full-time students.

Dual degree students in this program complete the standard foundation year courses in the School of Social Work, with the exception of SOWK 535 Social Welfare. Students must select the Community Organization, Planning and Administration (COPA) concentration. In the concentration year, students must complete the following SOWK courses: SOWK 599, SOWK 611, SOWK 629, SOWK 648, SOWK 686ab, as well as one of the following courses: SOWK 603, SOWK 636 or SOWK 672. Students must apply to both programs prior to matriculation. See the USC Price School of Public Policy for course requirements.

Master of Social Work/Master of Public Administration, Public Policy

The Master of Public Administration/Master of Social Work (MPA/MSW) dual degree program provides those students interested in careers as administrators of social service agencies the opportunity to combine preparation in the substantive field of social work with the acquisition of the administrative capabilities necessary in the public sector. Students must complete 82 units: 54 units in social work and 28 units in public administration. Dual degree students in this program complete the standard foundation year courses in the School of Social Work. Students must select the Community Organization, Planning and Administration (COPA) concentration. In the concentration year, students must complete the following SOWK courses: SOWK 599, SOWK 611, SOWK 629, SOWK 639, SOWK 648 and SOWK 686ab. Most students complete both program requirements over a 24-month period for full-time students. See the USC Price School of Public Policy for course requirements.

Master of Social Work/Master of Public Health, Medicine

The Master of Social Work/Master of Public Health (MSW/MPH) dual degree offers the student interdisciplinary preparation in the fields of public health and social work leading to the Master of Social Work (MSW) and Master of Public Health (MPH) degrees. The dual degree program is a collaborative effort between the School of Social Work and the Department of Preventive Medicine in the Keck School of Medicine. The objectives of the program are to provide students with the knowledge and skills necessary to promote health, prevent disease and enhance the delivery of health and social services in the community. Students will build interdisciplinary skills and an interdisciplinary professional identity by developing an understanding of the breadth of each field and their interface, while permitting concentration in particular specialization areas. The program prepares graduates for work in a variety of interdisciplinary settings; and for some, it will provide the basis for doctoral study.

Students must complete a minimum of 81 units: 45 units in social work and 36 units in preventive medicine; 16 of these units fulfill requirements for both degrees. Depending on specific social work concentration and public health track requirements, there may be additional courses and an increase in the total number of units. Most students complete both program requirements over three years for full-time students; however, the program can be completed in two years if the student takes a full course load during the two summer sessions.

Dual degree students in this program complete the standard foundation year courses during the first year in the School of Social Work with the exception of SOWK 562 Social Work Research. Students may select only the health concentration in social work and either of two public health tracks: health education and health promotion; or child and family health.

Master of Social Work/Juris Doctor, Law

The Juris Doctor and Master of Social Work (J.D./MSW) dual degree program with the USC Gould School of Law is a four-year program in which students complete a total of 123 units. This includes 47 units in social work and 76 units in law.

To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honors programs. Students must apply to both programs prior to matriculation. The program of study is as follows:

First and Second Years: Complete both the first year J.D. program of study and the first year MSW course of study.

Third Year: Complete the second year J.D. program.

Fourth Year: Complete the core required concentration courses and one semester of field instruction and the final semester of the J.D. program in the spring.

The law school gives credit for the third semester in the School of Social Work, while the latter recognizes law courses as substitutions for a one-semester practice course, special topics courses, a third semester of social policy and one semester of field instruction (for which a clinical law semester is substituted).

Master of Social Work/Master of Arts, Jewish Nonprofit Management

The dual degree program combines in-class learning and fieldwork under the auspices of the Hebrew Union College-Jewish Institute of Religion's School of Jewish Nonprofit Management (formerly the School of Jewish Communal Service) and the University of Southern California's School of Social Work. Students in this dual degree program simultaneously pursue graduate studies leading to the MSW and an M.A. in Jewish Nonprofit Management over a 24-month period for full-time students. A total of 90 units must be completed to meet the requirements of both degrees (44 units in social work and 46 units at the HUC-JIR School of Jewish Nonprofit Management). Dual degree students in this program complete the standard foundation year course in the School of Social Work, including the foundation field instruction. Students may select any concentration of interest. During their concentration year, students must enroll in the following: core required concentration courses: two SOWK 599 Special Topics courses (to be approved for the concentration). Students must apply to both programs prior to matriculation.

Master of Social Work/Master of Business Administration, Business

The MSW/MBA dual degree develops knowledge and skills in working with individuals, families and groups, as well as organizational dynamics, marketing, decision sciences, accounting and human relations. Students interested in working in the management of human services and not-for-profit organizations will develop knowledge of human resources, philanthropic and corporate social responsibility, organizational development and information management.

Prospective students must apply to both the School of Social Work and the Marshall School of Business.

The MSW/MBA requires completion of a total of 96 units: 48 in the Marshall School of Business and 48 in the School of Social Work. This dual degree program is typically completed in a three-year period, including summer, for full-time students.

Dual degree students in this program complete the standard foundation year courses in the School of Social Work. Students must select the social work and business in a global society concentration. During their concentration year, students must enroll in the following: three core required concentration courses and SOWK 686ab Field Practicum. Course requirements in the Marshall School of Business include all required courses in an MBA program and graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students may not count courses taken outside the Marshall School of Business toward the 48 units.

The MBA and the MSW degrees are awarded simultaneously upon completion of all program requirements.

School of Social Work

Doctor of Philosophy

With the enrollment of a small group of highly qualified experienced social workers, the School of Social Work established the first social work doctoral program in the Western United States in 1953. Over the years, the school has continued the tradition of providing opportunities for learning in small classes, seminars and tutorials.

The major goal of the doctoral program in social work is to produce social work scholars who will have the capacity to make valuable and significant contributions to the knowledge base of the profession. Students acquire the skills necessary to become professional scholars and develop a significant capacity for professional leadership. Toward this end, the school is committed to pursuing excellence in education with persons of definite promise and to seeking gifted students of varied social, ethnic and economic backgrounds.

Through training in specific areas, graduates of the program develop theoretical, conceptual, critical and analytic skills which can be applied to social, organizational, interpersonal and personal problems. They emerge from the program with substantive knowledge and analytic skills that enable them to contribute to understanding social problems and ways of solving them. With these skills, they are able to take a disciplined approach to the issues confronting the profession of social work and the field of social welfare and are prepared to make a significant

contribution to the research and scholarship that informs society's effort to improve the human condition.

The Ph.D. program in social work is administered by the Doctoral Committee of the School of Social Work in accordance with the policies set by the Graduate School. The requirements listed below are special to the School of Social Work and must be read in conjunction with the general requirements of the Graduate School.

Admission Requirements

Applicants for admission to the doctoral program must meet the following requirements:

- (1) A master's degree from a program accredited by the Council on Social Work Education or from another field related to social work.
- (2) Academic promise, as evidenced by above average achievement in undergraduate and professional education and a personal statement outlining the applicant's scholarly goals.
- (3) Professional competence as demonstrated through substantial experience in responsible social work, internships or other positions either during or subsequent to the master's program.
- (4) Personal qualities compatible with performance in social work and indicating a potential for leadership in the field: skill in relationships, flexibility and openness to new ideas, maturity, identification with the profession of social work, and commitment to furthering the development of the profession.
- (5) Satisfactory performance on the Graduate Record Examinations — existing test scores may be submitted if the GRE has been completed no more than five years prior to the date of application. Information may be obtained from the USC Center for Testing and Assessment, Student Union 301, Los Angeles, CA 90089-0896, (213) 740-7166, or from the Educational Testing Service at *ets.org*.
- (6) Satisfactory performance on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) for all international students prior to the date of application. Existing test scores may be submitted if the TOEFL or IELTS has been completed no more than two years prior to the date of application. Information may be obtained from the USC Center for Testing and Assessment, Student Union 301, Los Angeles, CA 90089-0896, (213) 740-7166, or from the Educational Testing Service at *ets.org*.
- (7) Submission of application materials as required. Instructions for application to the Doctor of Philosophy in Social Work program may be obtained by writing to the director of the program.

Under unusual circumstances, applications from persons who do not meet these requirements, including those who have just been awarded the MSW degree, will be considered. In cases where the MSW (or its equivalent) has recently been granted and the applicant does not have the prerequisite post-master's degree employment experience, it may be required that such experience be acquired concurrent with enrollment in the doctoral program.

Under very unusual circumstances, applications to the doctoral program in social work will be considered from those who do not hold the MSW or an equivalent degree. Such applicants, in order to be admitted to the program, must have a master's degree (or its equivalent) in a field related to social work and a demonstrated commitment to the field of social work as evidenced by substantial contribution to the knowledge base of the profession. Admission decisions on applicants who do not hold an MSW or equivalent degree will be made by the full Doctoral Program Committee of the School of Social Work rather than by a subcommittee of that body.

Priority will be given to applications that are completed by January 1.

Application Procedure

All applicants to the doctoral program must submit the following information: (1) graduate admission application using the university's online system; (2) statement of purpose which is submitted as part of the online application; (3) current resume which is uploaded as part of the online application; (4) all undergraduate and graduate transcripts; (5) four letters of reference, at least three of which are from persons who can assess the student's scholarly potential; (6) recent GRE scores; (7) recent TOEFL or IELTS scores; (8) documented evidence

of financial support is required of all international applicants; (9) Ph.D. Information Form for the School of Social Work; (10) career plans and goals; and (11) scholarly writing sample.

Foreign Language/Research/English Language Requirements

There is no foreign language requirement for the Ph.D. degree. Competence in advanced research methodology and statistics is required through satisfactory completion of required courses. All international students are required to submit their TOEFL or IELTS scores from a test date prior to application and to meet university requirements for teaching.

Course Requirements

Students must complete a minimum of 48 course units beyond the master's degree (exclusive of SOWK 794 Doctoral Dissertation). Students must complete at least 24 units within the School of Social Work and at least three courses in other departments or schools within the university. At least 8 of these 12 units must be in courses with a substantive rather than a research-methodology or statistic focus. Students must also take at least one 3-unit elective and one additional research or statistics course either in the School of Social Work or elsewhere in the university. Each student must develop a concentration either in another discipline outside the School of Social Work (such as gerontology; sociology; psychology; preventive medicine; business; policy, planning and development; or political science) or in a problem area where different external courses in different departments or schools bear on a specific social problem like homelessness. An overall grade point average of B (3.0) on all graduate work attempted in the doctoral program is required for graduation.

Core Content

All students are expected to master core content. They must also complete 12 units from the substantive five core courses.

REQUIRED COURSES

UNITS

24 units from the following:

SOWK 702	Theories of Human Behavior in the Contexts of Social Environments	3
SOWK 703	Explanatory Theories for Larger Social Systems	3
SOWK 733	Policy Analysis and Advocacy in a Comparative Social Policy Context	3
SOWK 743	Theories for Practice with Small Systems	3
SOWK 744	Theories for Practice with Large Systems	3

Core Courses:

SOWK 760L	Introduction to Social Work Statistics	3
SOWK 761L	Multiple Regression in Social Work Research	3
SOWK 762	Social Work Research Methods I	3
SOWK 763	Social Work Research Methods II: Issues in Research for Social Work Practice	3
SOWK 764	Advanced Multivariate Statistics	3

Macro focus: students with a macro focus in policy, community organization or administration must complete either SOWK 702 or SOWK 743 as part of their core curriculum.

Micro focus: students with a micro focus in direct practice must complete either SOWK 703, SOWK 733 or SOWK 744.

OTHER REQUIREMENTS

UNITS

Elective*		3
Research or statistics course*		3
SOWK 790	Research	6

Students must complete a minimum of 12 units per semester in their first semester and second semester of their first year in the program to maintain their status as full-time students and eligibility for financial support from the School of Social Work.

Individualized Course of Study

The second year of the curriculum is largely individualized to meet each student's educational goals. It is organized around a specific field of social work practice or a problem area. In the case of fields of practice or problem area, students gain knowledge of that field's development and policies; one level of comparative practice theory applicable to that field; comparative explanatory theory appropriate to the field and the chosen practice level; and advanced research methods which can be used to explore field-specific questions.

Field of Practice is defined as a field of activity in which there is an identifiable service delivery system, a continuum of care for clients, and a defined or established role for social workers.

Given the current expertise of the faculty and available faculty resources, students may choose from the following fields of practice specializations: (1) families and children, (2) mental health, (3) health, (4) occupational/industrial employment, (5) aging/gerontology, or (6) economic security/income maintenance.

Additional fields of practice can be added to the above choices depending on faculty interest, expertise and availability.

Problem Area is defined as a social or service delivery problem that is relevant to the field of social work such as homelessness or urban health systems.

Practice Theory is defined as advanced knowledge of comparative practice theories at one point on the intervention continuum as they relate to the field of practice chosen. The practice intervention continuum is defined to include practice with individuals, families and groups, as well as community practice, administration, planning, and policy practice.

Explanatory Theory is defined as advanced knowledge of comparative social science theories as they relate to the field of practice and level of intervention chosen.

Specialized Research Skills is defined as advanced skills in research methodology and statistics which support the student's dissertation within the field of practice.

Students fulfill the requirement for the mastery of the content of their individualized course of study through a combination of at least three (2-unit) directed tutorials (SOWK 790) with members of the social work faculty, at least three university courses in other departments of the university and an elective.

Students prepare an individualized course study plan with their faculty adviser in the spring of the first year that is approved by the doctoral committee. It details classes and tutorials that each student will take during the second year of the program.

Opportunities for Further Skill Development

The program offers students skills training in both teaching and research.

Teaching Skills

All doctoral students must teach for two semesters before they graduate. Requirements may be fulfilled by co-teaching, teaching as an assistant or solo teaching. Before beginning these teaching experiences, students must take a teaching course approved by the doctoral committee. International students must meet the English proficiency standards set forth by the American Language Institute and participate, if necessary, in specialized training offered by the Center for Excellence in Teaching.

Additional Research Skills

Students are also offered the opportunity for enhanced skills building in research through a research internship. The one- or two- semester internship (SOWK 785), starting typically in the spring of the second year, is designed

to provide students with hands-on, practical experience with an ongoing faculty research project prior to the start of their own dissertation research. Typically, activities include data collection and/or analysis. The practicum is expected to yield a paper of publishable quality co-authored by the student and the faculty member.

Students may enroll in SOWK 599 Special Topics by petitioning the doctoral committee in writing. The decision to grant or deny admission will be based on each applicant's learning and research interests and permission of the instructor.

The usual program includes two years of full-time course work, plus an additional period for completing the qualifying examinations and dissertation. In rare cases, students who are not able to take the full-time program because of employment may spread course work over three years. They must, however, have the equivalent of full-time study in residence for at least one year.

Students should specify whether they are applying for the full-time or part-time program at the time they apply to the program. Part-time students usually carry two courses per semester during the academic year. They may wish to accelerate their progress by enrolling in appropriate courses when available during the summer session.

The time limit for completing all requirements for the Ph.D. degree is eight years from the first course taken at USC to be applied toward the degree. Students who have completed an applicable master's degree at USC or elsewhere (almost all students in the social work doctoral program) must complete the Ph.D. in six years.

Transfer of Credit

The transfer of post-master's doctoral course work from another institution will only be considered if a grade of B or better (A = 4.0) has been obtained, and the course has been completed within the last five years. Transfer of credits must be petitioned and approved by both the School of Social Work and the Graduate School.

Screening Procedures

When students have completed a minimum of 16 units (but not more than 24 units) of doctoral course work, the doctoral committee assesses their performance and makes a decision about their readiness to continue in the program. If the decision is to deny permission to continue, the students are so notified. If permission is granted, a qualifying exam committee is established.

Qualifying Exam Committee

The qualifying exam committee is composed of five faculty members, four of whom, including the chair, are from the School of Social Work and one from an academic unit of the university other than the School of Social Work. The function of the qualifying exam committee is to oversee the development of the student's academic program through the qualifying examination.

Qualifying Examination

As a prerequisite to candidacy for the Ph.D. degree, students must pass written and oral qualifying examinations. In order to take the examinations, students must complete all core courses, at least 6 units of SOWK 790 tutorials and at least 32 units of course work in the doctoral program with a minimum grade point average of 3.0.

All students must pass a qualifying examination by completing a paper that the examination committee judges to be of publishable quality and passing an oral examination on subject matter related to the paper. The paper must deal with a substantive theoretical, model-building or methodological issue in the student's chosen area. Critical reviews of the literature or reports of empirical studies conducted by the student specifically for the qualifying examination are acceptable. The topic of the paper will be chosen in conjunction with the student's chair and must be defended before and agreed to by the entire examination committee. The content of the paper is to go beyond products developed for tutorials and must be an independent effort. Further details for completing the paper and oral examination are provided as needed. When students pass the written and oral portions of the qualifying examination, they advance to candidacy.

In accordance with university policy, since the two portions of the qualifying examination are considered part of a single examination, only one retake of either portion of the examination is permitted. When the oral examination has been passed, the student is formally admitted to candidacy.

Doctoral Dissertation

When the student is admitted to candidacy, a dissertation committee is established consisting of three members of the qualifying exam committee, one of whom must be from outside the School of Social Work. The dissertation committee has the responsibility of providing consultation in research, approving the dissertation, conducting the final oral examination and recommending the candidate for the Ph.D. degree. The doctoral dissertation should make a contribution to knowledge and theory related to the profession of social work. Dissertations must not only show technical mastery of the subject and research methodology but must also demonstrate the candidate's ability to work independently as a scholar.

The first step in the dissertation process is the development of a dissertation proposal. Normally about 25-30 pages, the proposal should contain a clear statement of purpose, a rationale for the research, research questions or hypotheses, a review of pertinent literature, and an explication of the research methods to be used including the design, instrumentation, sampling procedures and plan for analysis. The proposal must include human subject clearances for the anticipated research obtained from the appropriate school and university committees.

The dissertation proposal is submitted to the student's dissertation committee and defended. Upon approval of the proposal, a copy is filed with the director of the doctoral program.

It is expected that students will begin work on their dissertation prospectus as soon as possible after completion of the qualifying examinations, and that an acceptable proposal will be presented within three months of the completion of the examination.

Abstract of Dissertation

Since the abstract of the dissertation is also published in *Dissertation Abstracts International*, it should be written with care and must be representative of the final draft of the dissertation. A shorter abstract for publication in *Social Work Research and Abstracts* is also required.

Final Oral Examination

Upon approval of the final draft of the dissertation by all members of the dissertation committee, the candidate must pass a general final oral examination. After the candidate successfully completes the final oral examination, the committee recommends the candidate to the Graduate School for the Ph.D. degree.

Hamovitch Center for Science in the Human Services

The Hamovitch Center for Science in the Human Services, located in the School of Social Work, serves as the administrative umbrella for the school's centers of research excellence. These centers of interdisciplinary research include the areas of mental health, health, corporate and industrial social work, child abuse, interpersonal violence and other projects of interest to individual faculty. The center hosts seminars and colloquia which are open to the university and community.

Research projects are supported by federal, state, county and school resources. The center engages faculty in research, demonstration and application in building and testing theory, developing research instruments, testing models of service and treatment modalities, evaluating programs and service policy. The center also provides opportunities for doctoral students to acquire research training through ongoing and newly initiated faculty research projects. Doctoral students are encouraged to apply to participate in such projects which often lead to dissertation possibilities. Predoctoral fellowships and/or research assistantships for projects conducted at the center are sometimes available to incoming and ongoing doctoral students. The center also enables doctoral students to conduct their own research through the auspices of the center, including their dissertation research. All doctoral students are encouraged to attend and participate in the center's colloquia and programs to enhance their involvement with and skills in research and knowledge development.

School of Social Work

Courses of Instruction

SOCIAL WORK (SOWK)

The following courses may be offered during any given term; consult the *Schedule of Classes*.

SOWK 200xm Institutional Inequality in American Political and Social Policy (4) Historic and philosophical roots of inequality for minority groups in the United States and implications for public policy. Not available for major credit.

SOWK 304 Children and Families in Urban America (4) Gateway to the minor in Children and Families in Urban America. Provides foundation for principles on the conditions of children, families and communities, partnerships between families and human service professionals, and interprofessional practice in urban American communities.

SOWK 305L Children and Families in Urban America Integrative Seminar (2) Introduction to human service professionals, agencies and institutions in the greater Los Angeles area which serve children and families who reside there.

SOWK 350 Adolescent Gang Intervention (4) The incidence of gangs (particularly in the Los Angeles area), gang interventions, and policies developed to address the growing gang situation.

SOWK 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

SOWK 499 Special Topics (2-4, max 8) Selected topics in various specialty areas within social work.

SOWK 503 Human Behavior and the Social Environment I (3) The ecological systems paradigm is the lens through which theories of personality, family, group, organization, community and culture and the interaction among these systems are explored.

SOWK 505 Human Behavior and the Social Environment II (3) The course of human life, including the factors which impinge on the developmental continuum between normal and pathological conditions.
Prerequisite: SOWK 503.

SOWK 522 Global Violence Against Women (3) This course provides a broad understanding of violence against women within a global context.

SOWK 534 Policy and Practice in Social Service Organizations (3) Study of social work organizations with emphasis on their policy contexts, organizational theory, and the development of delivery systems.

SOWK 535 Social Welfare (3) Structure and operation of current American social welfare programs (social policy analysis). *Prerequisite:* SOWK 534.

SOWK 543 Social Work Practice with Individuals (3) Theory and principles underlying generic social work practice with primary emphasis on working with individuals.

SOWK 545 Social Work Practice with Families, Groups and Complex Cases (3) Theories and principles with primary emphasis on families and groups with application to problems requiring multi-level interventions. *Prerequisite:* SOWK 503, SOWK 534, SOWK 543.

SOWK 562 Social Work Research (3) Introduction to research methods, including conceptualization of research problems, literature review, research design, sampling, measurement, data collection and data analysis.

SOWK 586ab Field Practicum (3-3, FaSpSm) Supervised field placement to develop generalist practice skills in working with individuals, families, groups, communities and organizations. *Prerequisite:* SOWK 611. Graded IP/CR/NC.

SOWK 587ab Integrative Learning for Social Work Practice (2-2) Integrative content from Policy, Research, Human Behavior, Social Work Practice and Field Practicum. Graded CR/NC. *Concurrent enrollment:* a: SOWK 586a, SOWK 543; b: SOWK 586b, SOWK 545.

SOWK 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SOWK 599 Special Topics (1-4, max 13)

SOWK 600 Assessment in Social Work Practice (2, Sm) Theory and principles underlying generic social work practice with primary emphasis on psychosocial assessment. Open only to master's students in the School of Social Work.

SOWK 601 Advanced Theories and Interventions with Children and Adolescents (3) Advances students' knowledge and clinical skills working with children and adolescents. Emphasis on problems affecting children, including developmental derailments and disruptions. *Prerequisite:* SOWK 505, SOWK 545; or SOWK 600, SOWK 604, and SOWK 606.

SOWK 602 Advanced Theories and Clinical Interventions with Families (3) Advances students' knowledge and clinical skills working with diverse urban families experiencing various stressors. Exploration and application of a range of family therapy models. *Prerequisite:* SOWK 505, SOWK 545; or SOWK 600, SOWK 604, and SOWK 606.

SOWK 603 Merging Policy, Planning and Research for Change in Families and Children's Settings (3) Development and evaluation of service programs for children and families incorporating social welfare policy, macro practice and research skills. *Prerequisite:* SOWK 534, SOWK 535, SOWK 562; or SOWK 600, SOWK 604, and SOWK 606.

SOWK 604 The Role of Evidence-Based Practice in Social Work (2, Sm) Study of the important role research plays in the development of evidence-based practice methods. Open only to doctoral and master's students in the School of Social Work.

SOWK 605 Human Development and Mental Health (3) Understanding problem-producing behaviors and their ramifications on individuals, families, and groups that comprise the clientele in mental health settings. Required for students in Mental Health concentration. *Prerequisite:* SOWK 503, SOWK 505; or SOWK 600, SOWK 604, and SOWK 606.

SOWK 606 Neuropsychological Development (2, Sm) Study of human neuropsychological development within the context of social work. Open only to doctoral and master's students in the School of Social Work.

SOWK 607 Feminist Theory, Social Action, and Social Work: Philippines (4, Sm) Understanding and awareness of the political, economic, social, and cultural contexts through a feminist perspective, using the Philippines as a case study. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 611 Leadership in the Social Work Profession and Organizations: Theory and Practice (3) Through didactic and experiential methods, students learn to interpret and apply leadership theory and research. Covers skills of effective leadership at all organizational levels.

SOWK 612 Psychopathology and Diagnosis of Mental Disorder (3) Assessment of psychopathology, and the rationale and organization of the system for diagnosis of mental disorders. Emphasis is on developing differential diagnostic skills.

SOWK 614 Social Work Practice in School Settings (3) Based on ecosystems perspectives, this course examines policies, theories and principles of social work practice in school settings.

SOWK 615 Brief Therapy and Crisis Intervention (3) Theory and multimodal approaches for brief therapy and crisis intervention with diverse clientele in a range of mental health and health settings.

SOWK 616 Clinical Practice with Older Adults (3) Developmental tasks of adulthood and later life, as well as assessment and intervention for problems and disorders associated with aging.

SOWK 617 Substance Related and Behavioral Addictive Disorders and Rec (3) Causal exploration of substance related and behavioral addictive disorders. Evidence-based and practice informed treatment models

for vulnerable individuals, groups and families. *Prerequisite:* SOWK 503, SOWK 534, SOWK 543, and SOWK 562.

SOWK 618 Systems of Recovery from Mental Illness in Adults (3, FaSpSm) Focus on the multi-level impact of mental illness on adults and families. Evidence-based interventions promoting increased quality of life and stability are emphasized.

SOWK 619 Social Work in Public Child Welfare Settings (3) This advanced seminar will provide tools to enhance the practitioner's response to the special challenges (substance abuse, HIV/AIDS, domestic violence) in public child welfare.

SOWK 620 Social Work Practice With Transitional Youth (3, FaSpSm) Students will be introduced to policies affecting transitional youth and use a biopsychosocial perspective to work with them on macro, meso, and micro levels. (Duplicates credit in former SOWK 525.)

SOWK 622 Social Work Practice with African American Families (3, FaSpSm) Presents various theories for understanding African American families and addresses an Africentric framework for clinical practice and intervention with individuals and families. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

SOWK 625 Evaluation of Research: Mental Health (3) Range of research conducted in mental health; evaluation of selected research reports and their application to social work practice. Required for students in Mental Health concentration. *Prerequisite:* SOWK 562; or SOWK 600, SOWK 604, and SOWK 606.

SOWK 626 Social Conflict, Empowerment and Creative Practice in Israel (4, Sm) The summer global immersion program in Israel focuses on understanding social problems and alleviating them through empowerment approaches and the utilization of expressive practices. Open only to social work students.

SOWK 628 Social Work with Latino Populations (3, Fa) Current issues, trends and developments in social work practice with Latino populations.

SOWK 629 Evaluation of Research: Community Organization, Planning and Administration (3) Research for macro-practice, emphasizing qualitative methods, participatory action research, program evaluation, needs assessment; mapping and GIS to understand urban environments. *Prerequisite:* SOWK 562; or SOWK 600, SOWK 604, and SOWK 606.

SOWK 631 Advanced Theories and Clinical Interventions in Health Care (3) Evaluation of theory, best practices, emerging issues, and skill development in health settings; interaction among cultural, socioeconomic, and organizational factors. *Prerequisite:* SOWK 505, SOWK 545; or SOWK 600, SOWK 604, and SOWK 606.

SOWK 632 Program Planning and Evaluation in Health Care (3) Program and intervention development and evaluation research in health settings. Issues and skill development in program design and methods for evaluation. *Prerequisite:* SOWK 562; or SOWK 600, SOWK 604, and SOWK 606.

SOWK 636 Policy in the Health Care Sector (3) Analysis of behavioral, practice and research considerations in addressing a range of health problems and the policy-making process. Required for students in Mental Health in Health Settings concentration. *Prerequisite:* SOWK 535; or SOWK 600, SOWK 604, and SOWK 606.

SOWK 639 Social Policy for Managers, Planners and Community Organizers (3) Analysis of efforts to improve local human services organizations and agencies with consideration of political, social, demographic and organization contexts. *Prerequisite:* SOWK 535; or SOWK 600, SOWK 604, and SOWK 606.

SOWK 640 Clinical Practice with the Military Family (3) Theoretical and practical approaches to clinical practice with military families. Overview of common social issues in the military system and demands on the family dynamic. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 641 Clinical Practice with Service Members and Veterans (3) Theoretical and practical

approaches to trauma for use in treatment of PTSD. Advances students' knowledge of best practices and current evidence-based models on PTSD. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 645 Clinical Practice in Mental Health Settings (3) Social work processes from intake to termination; emphasis on clinical skills required for social work practice in a broad spectrum of mental health settings. Required for students in Mental Health concentration.

SOWK 648 Management for Community and Social Services (3) Methods and principles of management in urban settings with primary emphasis on strategic management, finance analysis, and innovative project development.

SOWK 653 Social Work with Older Adults (3, FaSpSm) Integrates foundation and advanced knowledge and skill for practice with and in behalf of older adults.

SOWK 655 Global Immersion in Military Culture: U.S. Forces Abroad (4, Sm) This course will enhance students' understanding of the delivery of human services on overseas military installations.

SOWK 660 Health Care Delivery Systems: Planning for Health and Social Services (3) Evaluating health care delivery systems in the U.S. and internationally including community social capital, health disparities, access to care, and policy implications for diverse populations.

SOWK 661 Case Management as a Service Model (3) Case management as a service model for increasing cost effectiveness and quality of care for diverse populations including transitional planning, utilization management and resource utilization.

SOWK 662 Information Technology for Human Services (3) Information technology as a resource for quality health and human services. Implications for interagency collaboration, empowerment of clients and professionals, evidence-based practice, education and ethics.

SOWK 663 Clinical Practice with Couples (3) Examination of major models and diverse intervention strategies to ameliorate common presenting problems of couples. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

SOWK 664 Consultation, Coaching and Social Entrepreneurship (3) Expanding roles that social workers play within both non-profit and for profit corporations. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

SOWK 665 Program Development and Grant Writing for Social Workers (3) Planning and program development that are generalized to any setting and relevant to direct and macro social work practice expertise. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

SOWK 666 Domestic Violence (3) Recognition of domestic violence and examination of effective intervention measures and preventive methods. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

SOWK 667 Information Systems for Program Development (3) Theoretical framework and practical skills in the use of some of the most common and up-to-date applications today of computers and electronic communication. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

SOWK 668 Social Work and Law (3) Examination of roles, opportunities, and concerns for the practice of social work in the structures and procedures of the law. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

SOWK 669 Managing Change and Organization Development (3) Conceptual framework and practical skills needed to design, implement and evaluate effective change and organization development programs. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

SOWK 670 Global Dimensions in Social Policy and Social Work Practice (3) Exploration and critique of how political, economic, cultural, religious and environmental factors impact social welfare policies, social work practice, and social development globally. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 671 Micro Practice and Evaluation in Work-Related Environments (3, FaSpSm) Drawing upon clinical evidence-based models, this course prepares students for micro level practice and evaluation to improve individual/family well-being within diverse work-related practice environments. *Prerequisite:* SOWK 505, SOWK 545; or SOWK 600, SOWK 604 and SOWK 606.

SOWK 672 Context and Policies of Social Work Practice in Work Environments (3, FaSpSm) Prepares students for practice in work-related environments through analysis of practice roles, settings, historical to current practice trends, business and economic contexts, and policy analysis. *Prerequisite:* SOWK 600 and SOWK 604 and SOWK 606 or SOWK 535.

SOWK 673 Macro Practice and Evaluation in Work-Related Environments (3, FaSpSm) Prepares students for macro level practice and evaluation in work-related environments to improve individual, family, organizational and community well-being. *Prerequisite:* SOWK 600 and SOWK 604 and SOWK 606 or SOWK 562.

SOWK 674 Human Sexuality in Clinical Social Work Practice (3) Explores physiological, psychological, and sociocultural variables associated with sexual identity, sexual orientation, and sexual behavior to increase student understanding and appreciation for human sexual behavior. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 675 Play Therapy in Social Work with Children and Adolescents (3) Advances student theoretical knowledge and clinical practice skills in working with children, adolescents, and their families and explores the process of child psychotherapy. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 676 Psychopharmacology for Therapists and Counselors (1, FaSpSm) Overview of various classes of basic psychotherapeutic medications. Useful to social workers, counselors, therapists, and other individuals who counsel and treat mentally ill patients.

SOWK 677 Mental Health Practice with Children and Adolescents (3) The assessment and treatment of children with serious emotional disturbance, including the service delivery models and policies that influence service delivery. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 678 Child Abuse and Neglect: Intervention and Treatment (3) Advanced practice course focusing on interventions with and treatment of complex family systems where the effects of child maltreatment are the presenting problems. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 679 Mezzo Theory and Practice in Work-Related Environments (3, FaSpSm) Emphasizing group and organizational dynamics, this course provides an understanding of human behavior in work-related environments, and prepares students for mezzo practice in these settings. Open only to master's students in the School of Social Work. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

SOWK 680 Social Work Spanish for Culturally Competent Services (3) Integration of cross-cultural practice skills with Spanish language development through the class instruction and practice development. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

SOWK 681 Managing Diversity in a Global Context (3) Interdisciplinary approach to innovative practices that make the workplace more inclusive and productive. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

SOWK 682 Spirituality, Religion, and Faith in Clinical Practice (3) Examination of diverse spiritual and religious traditions. Spiritually-sensitive treatment approaches applied to psychological and spiritual clinical problems of individuals, couples, and families. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 683 Hypnosis Social Work Practice (3) Examination of major theoretical and practice applications of hypnosis in social work practice and development of a beginning level of competency. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

SOWK 684 Community Practice for Social Change (3) Prepares students to work effectively within complex and diverse community settings. *Prerequisite:* SOWK 503, SOWK 505, SOWK 534, SOWK 535.

SOWK 685 Working with Adolescents: Practice, Systems and Advocacy (3) Enhance knowledge and skill in working with adolescents involved in the child welfare, juvenile justice and other systems. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 686abc Field Practicum II (4-4-4-0) Supervised field placement to develop depth of skill and practice in area of concentration. Graded CR/NC/IP. Open only to Social Work students. *Prerequisite:* SOWK 586ab.

SOWK 687 Media in Social Work (3) Creation of short documentaries for social change. Techniques in media production, strategies for media outreach, and development of media literacy skills to deconstruct media messages. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 688 School Violence (3) Examines theoretical, empirical and practice-based literature on school violence including how students' physical well-being, academic functioning, social relations, and emotional and cognitive development are affected. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 689 Models of Family Therapy: Theory and Practice (3) Expand students' theoretical and practical competence in systemic and narrative family therapy models for work with 21st century families. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 690ab Research (1-4; 1-4) Intensive individual study of specific problems. Graded CR/NC.

SOWK 692 Loss, Grief and Bereavement (3) Focus on the experiences of loss, death and bereavement as it is viewed by individuals, families and loved ones. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 693 Diagnosing Psychopathology: Introduction to DSM IV-TR (1) Advanced exposure to several issues in the area of adult psychopathology and diagnostics through didactic and experiential modalities. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 694 Group Psychotherapy in Mental Health Settings (3) Focus on group therapy for clinical social workers as practiced in various mental health settings. The entire process of group development is examined. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 695 Research Project I (2) Credit on acceptance of professional research project proposal. Graded CR/NC. *Prerequisite:* SOWK 562.

SOWK 696 LGBT Psycho/Social/Political Issues (3) Overview of clinical, social and political issues with which social workers should be familiar when working with lesbian, gay, bisexual and transgender clients. *Prerequisite:* SOWK 505, SOWK 535.

SOWK 697 Research Project II (1) Credit on acceptance of professional research project. Graded CR/NC. *Prerequisite:* SOWK 695.

SOWK 700 Innovations in Interactive Media and Informatics (3, SpSm) Theory, design, and analysis of interactive media research applications and informatics resources relevant to behavior and neurobiology within global interdisciplinary practice and policy settings. Open only to doctoral students. *Recommended preparation:* advanced research methods classes and grounding in discipline.

SOWK 702 Theories of Human Behavior in the Contexts of Social Environments (3) A focus on human behavior in interaction with the social environment; major paradigms including general systems theory, ego psychology, and role theories are examined.

SOWK 703 Explanatory Theories for Larger Social Systems (3) Theories of organizational and community behavior are examined in relation to their influence on the development of social services.

SOWK 733 Policy Analysis and Advocacy in a Comparative Social Policy Context (3) Examination of the evolution of American and other welfare states in selected nations. Analysis of global welfare institutions. Engaging in policy analysis in a comparative context.

SOWK 743 Theories for Practice with Small Systems (3) Early practice theories and their historical roots are examined. Implications for evolving current practice theories with individuals, families, and groups are discussed.

SOWK 744 Theories for Practice with Large Systems (3) Examination of the development and utility of theories, models and approaches to social work community and administrative practice.

SOWK 760L Introduction to Social Work Statistics (3) Foundation course covering univariate and bivariate descriptive and inferential statistics. Required lab covering basic computer skills and utilization of statistical software.

SOWK 761L Multiple Regression for Social Work Research (3) Multivariate statistical methods including descriptive and inferential statistics, parametric and non-parametric tests of hypotheses; correlation, analysis of variance, multiple regression, and factor analysis; utilization of computer programs for statistical analysis.

SOWK 762 Social Work Research Methods I (3) Models of research, the nature of inquiry, and the research process including problem formulation, measurement, designs, sampling and data sources.
Prerequisite: doctoral standing.

SOWK 763 Social Work Research Methods II: Issues in Research for Social Work Practice (3) Research methods to provide students with advanced methodological knowledge in two areas related to social work practice: psychotherapy outcome research and program research. *Prerequisite:* SOWK 762.

SOWK 764 Advanced Multivariate Statistics (3) Introduction to single equation statistical modeling using limited dependent variables (categorical and ordered categorical). Methods are drawn from statistics and econometrics.

SOWK 770 Introduction to Qualitative and Mixed Research Methods (3) Overview of the use of qualitative and mixed methods in social, clinical and health services research.

SOWK 781 Guided Teaching Experience (2) Mentorship with a member of the teaching faculty; discussions of curriculum design; observation; preparation and delivery of selected course sessions. Graded CR/NC.

SOWK 785 Guided Research Internship (2) Research practicum designed to provide students with hands-on practical experience with an ongoing faculty research project. Graded CR/NC. *Prerequisite:* SOWK 763.

SOWK 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SOWK 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Course Prefixes

ACAD	Academy
ACCT	Accounting
ACMD	Academic Medicine
ADNT	Advanced Dental Education Conjoint Program
AEST	Aerospace Studies
AHIS	Art History
