Earth Sciences

Undergraduate Degrees

Department Major Requirements for the Bachelor of Science in Geological Sciences

REQUIRED COURSES	UNITS
Introduction: Any one of (4 units):	
GEOL 105L Planet Earth	4
GEOL 107L Oceanography	4
GEOL 108L Crises of a Planet	4
GEOL 125L Earth History: A Planet and its Evolution	4
GEOL 130L The Nature of Scientific Inquiry	4
GEOL 150L Climate Change	4
GEOL 240L Earthquakes	4
Required (12 units):	
GEOL 315L Minerals and Earth Systems	4
GEOL 387a Undergraduate Team Research	2
GEOL 465 Field Geology, or	
GEOL 490x Directed Research	4
GEOL 494x Senior Thesis	2
Electives: choose at least seven of the following (28 units)*:	
BISC 427 The Global Environment	4
BISC 474 Ecosystem Function and Earth Systems	4
BISC 483 Geobiology and Astrobiology	4
GEOL 316L Petrologic Systems	4
GEOL 320L Surficial Processes and Stratigraphic Systems	4
GEOL 321L Structural Geology and Tectonics	4
GEOL 387bc Undergraduate Team Research	2-2
GEOL 412 Oceans, Climate, and the Environment	4
GEOL 425L Data Analysis in the Earth and Environmental Sciences	4
GEOL 433L Paleontology and Evolution in Deep Time	4
GEOL 440L Geophysics and Geoengineering	4
GEOL 450L Geosystems	4

GEOL 460L	Geochemistry	4
GEOL 470	Environmental Hydrogeology	4
MATH 225	Linear Algebra and Linear Differential Equations	4
MATH 226	Calculus III	4

**Up to two upper-division courses from other science departments may be substituted for any two in this group, on approval of the departmental undergraduate adviser.*

Required courses from other departments (24 units):

CHEM 105aLbL	General Chemistry, or	
CHEM 115aLbL	Advanced General Chemistry	4-4
MATH 125	Calculus I	4
MATH 126	Calculus II	4
PHYS 135abL	Physics for the Life Sciences, or	
PHYS 151L	Fundamentals of Physics I: Mechanics and Thermodynamics, and	4-4
PHYS 152L	Fundamentals of Physics II: Electricity and Magnetism, or	
BISC 120Lx	General Biology: Organismal Biology and Evolution, and	4-4
BISC 220L	General Biology: Cell Biology and Physiology, or	
BISC 121L	Advanced General Biology: Organismal Biology and Evolution, and	4-4
BISC 221L	Advanced General Biology: Cell Biology and Physiology	4-4
Total units		68

Department Major Requirements for the Bachelor of Arts in Earth Sciences

REQUIRED COURSES	UNITS
Introduction: Any GEOL 100- or 200-level course (4 units):	
Required:	
GEOL 315L Minerals and Earth Systems	4
Electives:	
28 additional units must be selected from MATH 225, MATH 226, or any upper-division course listed or cross-listed as GEOL (28 units):	
Required courses in other departments (8 units):	
CHEM 105aL General Chemistry	4
MATH 118x Fundamental Principles of Calculus, or	
MATH 125 Calculus I	4
Choose any one of the following (4 units):	
BISC 120L General Biology: Organismal Biology and Evolution	4
CHEM 105bL General Chemistry	4
PHYS 135aL Physics for the Life Sciences	4
Total units	48

Undergraduate Honors Program

The department offers an honors program for students pursuing either a B.S. or a B.A. in Earth Sciences. Students wishing to participate in this program must complete GEOL 494x Senior Thesis. Honors will be awarded upon successful completion of the thesis and attainment of an overall GPA of 3.0 and a GPA of 3.5 in

courses in the major.

Grade Point Average in Major Subject

A grade of C or higher is required in each course in the earth sciences courses used to complete the department or physical sciences major.

Requirements for the Bachelor of Science in Physical Sciences

REQUIRED COURSES	UNITS
Lower division:	
CHEM 105aLbL General Chemistry, or	
CHEM 115aLbL Advanced General Chemistry	4-4
GEOL 105L Planet Earth	4
PHYS 151L Fundamentals of Physics I: Mechanics and Thermodynamics	4
PHYS 152L Fundamentals of Physics II: Electricity and Magnetism	4
PHYS 153L Fundamentals of Physics III: Optics and Modern Physics	4
Upper division:	
Astronomy elective*	4
Chemistry elective*	4
Earth Sciences elective*	4
Physics elective*	4
Three additional electives from these fields*	12
Other courses:	
MATH 125 Calculus I	4
MATH 126 Calculus II	4
MATH 226 Calculus III	4
Total units:	64

**Upper-division courses must be applicable to majors in their respective departments.*

Minor in Geobiology

The minor in geobiology is designed to allow students majoring in biology to incorporate interdisciplinary courses in earth sciences into their program or to allow students majoring in geology to incorporate interdisciplinary courses in biology into their program. This field represents the intersection of what have been traditional disciplines and is valuable for understanding evolution, environmental contaminant behavior and ocean sciences. Students with majors offered by biological or earth or geological sciences will be able to complete this minor with 16 to 24 units of course work beyond their major requirements. Other students may need to complete up to 48 units of course work beyond their major requirements. For example, students majoring in biological sciences might take an introductory GEOL course; GEOL 315L; GEOL 433L or BISC 483; and two additional upper-division elective courses from the list below. Students majoring in earth or geological sciences must take BISC 120L and BISC 220L; GEOL 433L or BISC 483; and three additional elective courses. Courses selected must include at least 16 units unique to the minor and at least 16 units in a department outside the major.

REQUIRED COURSES	UNITS
BISC 120Lx General Biology: Organismal Biology and Evolution	4
BISC 220L General Biology: Cell Biology and Physiology	4
CHEM 105aLbL General Chemistry	4-4

ELECTIVE COURSES **UNITS**

One introductory GEOL course: GEOL 105L, GEOL 107L, GEOL 108L, GEOL 125L, GEOL 130L, GEOL 150L or GEOL 240L 4

BISC 483* Geobiology and Astrobiology, or
 GEOL 433L Paleontology and Evolution in Deep Time 4

Three upper-division BISC courses** 12

Two courses from the following (8 units):

BISC 474L* Ecosystem Function and Earth Systems 4

BISC 483* Geobiology and Astrobiology 4

GEOL 320L Surficial Processes and Stratigraphic Systems 4

GEOL 412 Oceans, Climate and the Environment 4

GEOL 433L Paleontology and Evolution in Deep Time 4

GEOL 450L Geosystems 4

GEOL 460L Geochemistry 4

GEOL 470 Environmental Hydrogeology 4

**Indicates BISC course that is also cross-listed under GEOL*

***Must carry credit for a biology major*

Minor in Geohazards

The geohazards minor allows students who are not geology majors to pursue a course of study that will lead to greater understanding of geohazards such as climate change, earthquakes, volcanic eruptions, floods, environmental contamination and availability of natural resources. These issues are examined in a number of upper-division geology courses, and each student can select from the list below depending on the particular area of interest and whether previous course work has been completed to meet prerequisites for some of the choices. The minor requires an introductory class, an upper-division course in either formation of minerals or geosystem behavior and three elective courses from the list below. The minimum number of units to complete the minor is 24, including the introductory course CHEM 105aL (a corequisite for GEOL 315L) or MATH 125 (prerequisite for GEOL 450L) and three of the group: BISC 427, GEOL 305L, GEOL 315L, GEOL 316L, GEOL 320L, GEOL 321L, GEOL 433L and GEOL 450L. The remaining courses listed have additional prerequisites.

REQUIRED COURSES (8 UNITS) **UNITS**

CHEM 105aL General Chemistry, and 4

GEOL 315L Minerals and Earth Systems, or 4

MATH 125 Calculus I, and 4

GEOL 450L Geosystems 4

ELECTIVE COURSES **UNITS**

One introductory GEOL course: GEOL 105L, GEOL 107L, GEOL 108L, GEOL 125L, GEOL 130L, GEOL 150L or GEOL 240L 4

Three of the following (12 units):

BISC 427 The Global Environment 4

GEOL 305L Introduction to Engineering Geology 4

GEOL 315L Minerals and Earth Systems 4

GEOL 316L Petrologic Systems 4

GEOL 320L	Surficial Processes and Stratigraphic Systems	4
GEOL 321L	Structural Geology and Tectonics	4
GEOL 412	Oceans, Climate, and the Environment	4
GEOL 433L	Paleontology and Evolution in Deep Time	4
GEOL 440L	Geophysics and Geoengineering	4
GEOL 450L	Geosystems	4
GEOL 460L	Geochemistry	4
GEOL 470	Environmental Hydrogeology	4

Progressive Degree Program in Geological Sciences

This program permits exceptional students to receive both a B.S. and M.S. in geological sciences in not more than 10 semesters. It is intended for students with extraordinary geological sciences preparation and performance who demonstrate a superior level of overall scholarship, including a GPA of 3.5 or better. Students may apply on completion of 64 units of course work but not later than the end of the junior year (or the completion of 96 units). The application for admission to a progressive degree program must be accompanied by an approved course plan proposal and letters of recommendation from two USC faculty members in the Department of Earth Sciences. The requirements for both the B.S. and M.S. degrees must be satisfied. Further details about progressive degree programs can be found [here](#).

Dornsife College of Letters, Arts and Sciences

Earth Sciences

Graduate Degrees

The department prepares professional earth scientists for careers in academia, government and industry. A wide range of specializations is offered in the department including sedimentary geology, paleobiology, paleoclimatology, paleoecology, micropaleontology, paleoceanography, geochemistry, geobiology, geophysics, geodesy, seismology, engineering geology and properties of earth materials, igneous and metamorphic petrology, structural geology and tectonics, and interdisciplinary options. Degrees in ocean sciences (through the Graduate Program in Ocean Sciences) are available.

Admission Requirements

Prerequisites

An applicant for admission should have the equivalent of the courses in earth sciences, chemistry, mathematics, and physics required for the B.S. degree in geological sciences. Applicants with an undergraduate degree in science or engineering who lack required earth sciences courses will also be given consideration.

Criteria

The Department of Earth Sciences requires the following evidence for admission to its doctoral program: strong undergraduate background and a superior academic record as documented by GPAs in undergraduate and any completed graduate work, Graduate Record Examinations scores no more than five years old in the verbal and quantitative General Test, and at least three letters of recommendation from undergraduate and, if applicable, graduate advisers and professors. The number of students accepted in any one year depends on available space in the department and acceptance for advisement by one or more professors.

Funding is offered for M.S. degrees only when completed en route to the pursuit of a Ph.D. degree.

Procedure

The online USC graduate admissions application will refer applicants to a required supplemental departmental application. The department admits students for both the fall and spring semesters; however, applicants for

assistantships and fellowships are encouraged to apply for the fall semester.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Science in Geological Sciences

Foreign Language/Research Tool Requirements

There is no language or research tool requirement for the master's degree.

Course Requirements

The M.S. degree in geological sciences requires 24 units of course work plus at least four thesis units. These restrictions apply: at least 16 units must be 500 level or higher; no more than eight units can be 590 Directed Research; and a maximum of four units, with superior grades, can be transferred from an accredited graduate school. Students are required to have an overall GPA of at least 3.0 (A = 4.0) in all graduate work. Students are also required to attend a series of departmental seminars.

Thesis

Students should arrange for the appointment of a thesis adviser and committee after the first semester, or, at the latest, after the first year of graduate work. The thesis committee should consist of the adviser plus two other faculty members, all of whom are generally selected from the department faculty. Once the committee is arranged, the student may make formal application to the Graduate School for the M.S. degree.

Doctor of Philosophy in Geological Sciences

Application deadline: January 1

Course Requirements

For students who have earned a master's degree, the minimum number of course credits required for the Ph.D. is 40 units. No more than four of these units may be earned in 794 Doctoral Dissertation. For students who have not earned a master's degree, the minimum number of course credits required is 60 units, including a maximum of eight units of 794 Doctoral Dissertation. The qualifying exam committee may require additional course work to insure a sufficient background in the student's area of specialization. At least two-thirds of the number of units presented for the degree must be 500 level or higher. Although the official minimum GPA for all graduate work attempted at USC is 3.0, the department does not consider a doctoral candidate in good standing unless the graduate GPA is considerably higher than the minimum (approximately 3.25 or above in graduate courses taken within the department).

Screening Procedure

Students in the Ph.D. program must pass the screening procedure before their 25th unit of graduate credit. Screening consists of a review of the student's progress and is usually done by the chair following a written recommendation by the student's adviser(s).

Qualifying Exam Committee

The doctoral qualifying exam committee is formed after the student has passed the screening procedure. The committee is appointed by the department with the advice of the student's research adviser. The five-member committee consists of the adviser, a minimum of three other members from the Department of Earth Sciences, and one from outside the department. The committee consults with the student, recommends an appropriate program of study and administers the written and oral qualifying examinations.

Qualifying Examination

This examination consists of two parts, one written and the other oral. The written exam, which precedes the oral, includes questions submitted by committee members on current geological problems and theory. The oral portion of the exam consists of the defense of two propositions written by the candidate prior to the oral exam. In addition, general questions are posed to test the student's breadth of scientific and earth science background.

The student's performance is evaluated by the qualifying exam committee, with a pass based on not more than one negative vote or abstention. Those who intend to take the exam must meet all the conditions specified in the section on general requirements for the Ph.D.

Defense of the Dissertation

When the candidate has passed the qualifying examination, a dissertation committee replaces the qualifying exam committee. The latter is appointed by the adviser and qualifying exam committee in conjunction with the student. The dissertation committee administers the final defense of the dissertation.

The defense takes place after the dissertation is substantially complete, and upon unanimous approval by the dissertation committee. It is conducted in the form of an open departmental seminar, but is evaluated by the dissertation committee alone.

Interdisciplinary Programs

Interdisciplinary programs can be arranged for students also interested in astronomy, bioscience, chemistry, engineering, oceanography and physics. The Department of Earth Sciences maintains laboratories for micro-paleontologic, paleobiologic, mineralogic, petrologic, geophysical, geochemical and oceanographic research, and collections are available for comparative work in invertebrate paleontology. Students interested in systematic studies will find a wealth of material, available for comparative purposes, in the adjacent Los Angeles County Museum. Facilities for research in sedimentation, oceanography, and marine geology are provided in the department and by the university's research fleet.

Dornsife College of Letters, Arts and Sciences

Earth Sciences

Courses of Instruction

EARTH SCIENCES (GEOL)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

GEOL 105Lg Planet Earth (4, FaSpSm) Geologic structure and evolution of planet earth. Principles of plate tectonics, rocks and minerals, processes of mountain building, continent and ocean formation, earthquakes, volcanism, development of landforms by running water and glaciers. Lecture, 3 hours; laboratory, 2 hours. One all-day or two-day field trip required.

GEOL 107Lg Oceanography (4, FaSp) Physical, chemical, and geological character of the oceans and ocean basins. Origin of the oceans. Ocean processes and agents. Economic value of the oceans. Lecture, 3 hours; laboratory, 2 hours. One all-day field trip required.

GEOL 108Lg Crises of a Planet (4, FaSpSm) Impact of civilization on planet earth, and impact of earth's natural evolution on society: earthquakes, volcanism, landslides, floods, global warming, acid rain, groundwater depletion and pollution; mineral and fossil fuel depletion, formation of the ozone hole. Lecture, 3 hours; laboratory, 2 hours. One all-day or overnight field trip.

GEOL 125Lg Earth History: A Planet and Its Evolution (4, FaSpSm) Basic principles of physics, chemistry, biology, and mathematics used in evaluating clues written in the rock record, and the processes that have shaped our planet. Lecture, 3 hours; laboratory, 2 hours. At least one field trip required.

GEOL 130Lg The Nature of Scientific Inquiry (4, FaSp) Examination of the scientific process: what constitutes science; evolution of ideas about the nature of space, time, matter, and complexity; paradigm shifts in the biological and earth sciences. Lecture, 3 hours; laboratory, 2 hours.

GEOL 150Lg Climate Change (4, FaSp) Climate systems from the beginning of earth history to the present; tools and techniques used to reconstruct prehistoric climate records; effects of climate variations on development of life forms on earth.

GEOL 160Lg Introduction to Geosystems (4, FaSpSm) Survey of natural geological/environmental processes (systems) and variability active near the earth's surface in the region that houses most life (the biosphere). Open only to environmental studies majors and minors. *Corequisite*: ENST 100.

GEOL 240Lg Earthquakes (4, FaSpSm) Causes of earthquakes and nature of large faults; earthquake hazard and risk; world's great earthquakes; understanding the Richter scale. Lecture, 3 hours; laboratory, 2 hours; one field trip required. *Concurrent enrollment*: MDA 140.

GEOL 241Lg Energy Systems (4, FaSpSm) Energy resources from a global perspective, including fossil fuels, nuclear, and renewable energy.

GEOL 290L Special Laboratory (1, FaSp) Laboratory component for GEOL 105L, GEOL 107L, GEOL 108L, GEOL 125L, GEOL 130L, GEOL 150L, or GEOL 240L for students with equivalent lecture credit from another institution.

GEOL 305L Introduction to Engineering Geology (4, Sp) Principles of geology with emphasis on structural geology, hydrogeology and geological hazards; basic geologic considerations in civil engineering practice; introduction to mineralogy and petrology. Field trip required. Lecture, 3 hours; laboratory, 2 hours. (Duplicates credit in GEOL 105L and GEOL 108L.)

GEOL 315L Minerals and Earth Systems (4, Fa) Minerals and their formation in Earth geosystems; includes discussions of mineral properties, crystal structures, uses and biogeochemical importance. Lecture, 3 hours; laboratory, 6 hours; required field trips. *Corequisite*: CHEM 105aL or CHEM 115aL; *recommended preparation*: any introductory GEOL course.

GEOL 316L Petrologic Systems (4, Sp) Formation and identification of igneous, metamorphic and sedimentary rocks; interpretation of tectonic and environmental settings based on rock type and chemistry. Lecture, 3 hours; laboratory, 6 hours; required field trips. *Prerequisite*: GEOL 315L.

GEOL 320L Surficial Processes and Stratigraphic Systems (4, Fa) Processes of erosion, sediment transport, and deposition that shape the land surface; landscape response to tectonism; recognition and interpretation of depositional environments in the stratigraphic record. (Duplicates credit in former GEOL 334L, GEOL 451L.) *Corequisite*: GEOL 315L.

GEOL 321L Structural Geology and Tectonics (4, Sp) Field and theoretical aspects of rock deformation, analysis of structural systems, and stress and strain; orogenic belts and plate tectonics; introduction to field techniques and construction of geologic maps. *Recommended preparation*: GEOL 320L.

GEOL 351L Climate Systems (4, FaSp) Introduces systems behavior in the context of climate dynamics. Modules of instruction geared to climate system application to real world problems. *Prerequisite*: MATH 125.

GEOL 387abcg Undergraduate Team Research (a: 2, Sp; b: 2, max. 4, Sm; c: 2, max 4, Fa) a. Introduction to scientific inquiry, field research opportunities, and history of physical sciences; strategies, research methodologies, and writing skills for proposals, abstracts, papers, and professional development. Duplicates credit in the former GEOL 385. *Recommended preparation*: A GE course in Earth Science. **b.** Multidisciplinary, learner-centered, individual and team-based student research, abroad and in the U.S.; field data collection and interpretation, mentored by domestic and international scientists.

GEOL 390 Special Problems (1–4) Supervised individual studies. No more than one registration permitted. Enrollment by petition only.

GEOL 412 Oceans, Climate, and the Environment (4, Sp) Survey of physical, chemical, and geological oceanography emphasizing the role of the oceans in modulation of climate, atmospheric composition and biogeochemical cycles; paleoceanography and paleoclimate. *Corequisite*: CHEM 105bL, MATH 126;

recommended preparation: PHYS 151L or PHYS 135abL.

GEOL 425L Data Analysis in the Earth and Environmental Sciences (4, Fa) Introduction to mathematical methods giving insight into earth and environmental data. Topics include probability and statistics, timeseries analysis, spectral analysis, inverse theory, interpolation. *Recommended preparation:* MATH 126, familiarity with matrix algebra.

GEOL 427 The Global Environment (4, Sp) (Enroll in BISC 427)

GEOL 433L Paleontology and Evolution in Deep Time (4, Fa) Origin and evolution of life; Precambrian life; evolutionary history of major groups during the Phanerozoic; mass extinctions; deep time and evolutionary processes. Lecture, 3 hours; laboratory, 3 hours; required field trips. *Recommended preparation:* any introductory GEOL course.

GEOL 440L Geophysics and Geoengineering (4, Sp) Plate tectonics, magnetic and gravity fields, earthquakes, seismic waves, reflection and refraction seismics, heat transport, mantle convection, deep Earth structure, data analysis. Includes field trip. *Prerequisite:* MATH 126; *corequisite:* PHYS 135bL or PHYS 152L.

GEOL 441 Seismic Exploration Geophysics (4, FaSp) Seismic wave theory, ray theory, reflection, refraction, data processing, signal enhancement, field instrumentation and techniques on land and at sea; geological interpretation of seismic data. One field trip.

GEOL 445 Earth Climate: Past, Present, and Future (4) (Enroll in ENST 445)

GEOL 450L Geosystems (4, Fa) Geosystems, such as mantle convection, active faults, climate, and the carbon cycle, will be studied using numerical models and concepts such as chaos, universality, emergence, and intermittency. Lecture, 3 hours; laboratory, 2 hours. *Prerequisite:* MATH 125; *recommended preparation:* MATH 126.

GEOL 460L Geochemistry (4, Fa) Composition, origin, and evolution of the earth; principles of physical chemistry applied to aqueous systems; reaction-diffusion modeling and problems in sedimentary geochemistry; global (bio)geochemical cycles and environmental problems. Lecture, 3 hours; laboratory/discussion, 2 hours. *Prerequisite:* CHEM 105bL or CHEM 115bL and MATH 126.

GEOL 465L Field Geology (4, max 8, SpSm) Ten days to four weeks of field study in an area of geological complexity, with preparatory instruction. *Recommended preparation:* introductory earth science course, e.g., GEOL 105L, GEOL 315L. One or more of GEOL 316L, GEOL 320L.

GEOL 470L Environmental Hydrogeology (4, FaSpSm) Concepts in hydrogeology and application to environmental problems. Topics include groundwater and surface water hydrology, chemistry, and contamination. Includes labs, guest lectures, and field trips. *Recommended preparation:* GEOL 105L, GEOL 160L.

GEOL 474 Ecosystem Function and Earth Systems (4) (Enroll in BISC 474L)

GEOL 483 Geobiology and Astrobiology (4) (Enroll in BISC 483)

GEOL 490x Directed Research (1–8, max 12) Individual research and readings. Not available for graduate credit.

GEOL 494x Senior Thesis (2, FaSp) Writing of a thesis under individual faculty supervision. Not available for graduate credit.

GEOL 499 Special Topics (2–4, max 8) Special topics in the earth sciences. Field trip required when appropriate to the topic.

GEOL 500 Marine Paleoecology (3, 2 years, Sp) Principles of marine paleoecology; interrelationships between marine organisms and their environment in geologic time. *Recommended preparation:* GEOL 577L.

GEOL 501 Paleobiology (3, Fa) Concepts and methods for functional morphologic analysis of fossil marine invertebrates. Systematics theory and methodology, macroevolution, and broad biotic trends in the Phanerozoic. *Recommended preparation:* GEOL 433L.

GEOL 505 Introductory Graduate Seminar in Earth Sciences (2, Fa) Lectures by Earth Sciences faculty about current research; introduction of new graduate students to the breadth of current research; applying for research funding; practicing effective research presentations. Graded CR/NC. Open only to geological sciences and ocean sciences master's and doctoral students.

GEOL 510L Advanced Stratigraphic Field Methods (3) Stratigraphic field methods and computer-assisted data analysis. Field trips incorporating vertical and lateral facies analysis; collection of paleocurrent, fabric, paleomagnetic, photogeologic and compaction data. Lecture, 2 hours; laboratory, 2 hours; field trips. *Prerequisite:* GEOL 320L.

GEOL 511L Depositional Systems (3) Analysis of depositional systems, including conceptual methods of lithostratigraphy, biostratigraphy, chronostratigraphy, and paleoecology; description of major depositional environments. Lecture, 2 hours; laboratory, 2 hours.

GEOL 512 Introduction to Chemical and Physical Oceanography (3, Fa) (Enroll in OS 512)

GEOL 514 Marine Geology (3, Fa) Origin and characteristics of ocean basins; marine sedimentary environments; shoreline classification and character; evolution of oceanic features. Lecture, 3 hours; research conference, 1 hour.

GEOL 515 Introduction to Atmospheric Science (3, Fa) Elementary physical principles underlying the behavior of Earth's atmosphere. Dry and moist thermodynamics, radiative transfer, conservation laws, fundamental dynamical balances, instability theory, cloud physics. *Recommended preparation:* PHYS 161L, PHYS 304.

GEOL 520 Ichnology (3, 2 years, Fa) Ancient and recent borings and bioturbation structures and their utilization in stratigraphic, paleoenvironmental, paleoecological, sedimentological, and geochemical studies. *Recommended preparation:* GEOL 320L and GEOL 433L.

GEOL 521L Advanced Structural Geology (3, FaSp) Advanced field and theoretical aspects of rock deformation, strain and stress analyses, and evolution of structural systems. Includes lab, field trip(s), and class project.

GEOL 525 The Science of Climate Change (4, Sp) Introduction to the fundamental aspects and the factors that influence ocean and atmospheric behavior, and how the earth's climate has varied in the past.

GEOL 530 Modern Perspectives on Crustal Dynamics (3, 2 years, Sp) Deformation mechanisms, strength and structure of the crust. Fractal scaling in structures and dynamic processes. Geodetic measurement of crustal deformation and spatio-temporal patterns of seismicity.

GEOL 531 Plate Interactions: Geological Aspects (3, 2 years, Sp) Principles and geometrics of plate tectonics; geologic characteristics of modern plate boundaries of divergent, convergent, transform type; ocean basin and orogen development from worldwide examples. Field trip.

GEOL 532 Advanced Geologic Mapping (3, Fa) Principles of mapping geologically complex terranes of different structural style. Fieldwork will be coordinated with seminar review of diverse structural phenomena. Field trips. *Recommended preparation:* GEOL 321L, GEOL 465L.

GEOL 533L Continental Margin Arcs (3) Evolution of continental margin arcs, magmatic systems within arcs. Arcs as tectonic elements and "differentiation factories" leading to formation and removal of continental material. *Recommended preparation:* GEOL 316L, GEOL 321L.

GEOL 534L Mechanics of Lithospheric Deformation (3, Fa) The mechanical description of deformational processes at both crustal and lithospheric scales, and the interpretation of geological and geophysical data in terms of these processes.

GEOL 535L Microstructures and Deformation Mechanisms (3, 3 years, Fa) Examination of deformation mechanisms and resulting microstructures in rocks; chemical and textural equilibrium; physical and chemical processes during fluid flow; prophyroblast-matrix relationships; interpretation of kinematic indicators. Laboratory. *Prerequisite:* GEOL 321L.

GEOL 536 Principles of Geomagnetism and Paleomagnetism (3, 2 years, Sp) Historic geomagnetic field behavior, secular variation, rock magnetism, paleomagnetic techniques, magnetic polarity time scale, apparent-polar-wander paths, and applications to stratigraphic and geotectonic studies. *Recommended preparation:* GEOL 440.

GEOL 537 Rock Mechanics (3, 2 years, Sp) Elasticity, fracture, and flow properties of rocks and minerals; effects of temperature, pressure, petrology, fractures, and interstitial fluids. Experimental techniques and geological applications.

GEOL 538 Tectonic Evolution of Western North America (3, 2 years, Sp) Geosynclinal and orogenic development of western North America from the Precambrian to present, in the light of plate tectonics concepts. Field trips. *Recommended preparation:* GEOL 321L.

GEOL 540 The Mantle System (3, Sp) Dynamics and structure of the deep earth and its relationship to earth evolution. *Recommended preparation:* GEOL 440L and GEOL 534L.

GEOL 550 Chemical Equilibrium and Disequilibrium in Geology (3, 2 years, Sp) Phase equilibria; phase diagrams; thermodynamics of aqueous and solid solutions; irreversible thermodynamics; kinetics, diffusion, and metasomatism, with applications to problems in petrology and geochemistry. *Prerequisite:* GEOL 460L.

GEOL 551 Introduction to Seismology (3, 2 years, Fa) Basic elements of seismology for the study of the earth's interior and the tectonic process, utilizing observations of seismic waves.

GEOL 552 Advanced Seismology (3) Advanced methods of theoretical seismology for studying the generation of seismic waves from natural and artificial sources and the propagation through realistic earth models.

GEOL 553 Physics of Earthquakes (3, 2 years, Fa) Basic physics of earthquakes and seismicity. Continuum elasticity; fracture mechanics; laboratory friction; damage rheology; physics of critical phenomena; spatio-temporal seismicity patterns; analysis of complex data sets. *Recommended preparation:* GEOL 537 and/or GEOL 551.

GEOL 555 Paleooceanography (3) Mesozoic and Cenozoic paleooceanography; analytical approaches applied to water mass history, paleocirculation, paleoproductivity, nutrient cycling, and paleotemperature reconstruction. Lecture, readings, and research project. *Recommended preparation:* GEOL 412 or GEOL 512 and GEOL 460L.

GEOL 556 Active Tectonics (3, Sp) Aspects of deformation and associated seismicity at active plate margins around the world. Includes review of plate tectonics, seismology, geodesy, paleomagnetism, geodynamics, - Quaternary dating techniques, tectonic geomorphology, paleoseismology, and seismic hazard assessment. Two weekend field trips required. *Recommended preparation:* GEOL 530, GEOL 531; *prerequisite:* GEOL 321L.

GEOL 557 Numerical Modeling of Earth Systems (3, Fa) The quantitative modeling of ordinary and partial differential equations as they arise in geology, geophysics, climate modeling and related fields with practical, numerical focus. *Recommended preparation:* GEOL 425, GEOL 534, and GEOL 540.

GEOL 558 Inverse Theory in the Earth Sciences (3, FaSp) Short review of probability theory, and extensive coverage of linear inverse theory, including seismic imaging. Non-linear inverse problems and factor analysis. *Recommended preparation:* GEOL 425L.

GEOL 560 Marine Geochemistry (3, 2 years, Sp) Principles of chemical sedimentology and aquatic chemistry; diagenesis, authigenesis, and the geochemical cycle. *Prerequisite:* GEOL 460L.

GEOL 564 Isotope Geochemistry (3, 2 years, Sp) Variations in the isotopic composition of elements in the earth's crust with applications to geological problems, including geochronology, geothermometry, ore genesis, and crustal evolution.

GEOL 566 Geochemistry Seminar (1–4) Current topics in geochemistry.

GEOL 567 Stable Isotope Geochemistry (3) Theoretical basis; nuclide nomenclature, partition function ratios, mechanisms and rates of isotope exchange; mass spectrometry and extraction techniques; application of stable isotopes to geologic problems.

GEOL 568L Metamorphic Petrology (3, 2 years, Fa) An introduction to advanced study of metamorphic mineral assemblages with use of experimental and field data. Lecture, 2–4 hours; laboratory to be arranged.

GEOL 569L Igneous Petrology (3, 2 years, Fa) Study of igneous and meta-igneous rocks from the basis of experimental and field data and theoretical considerations. Lecture, 2–4 hours, laboratory to be arranged.

GEOL 575 Organic Geochemistry (3, Sp) Advanced course on the fundamentals and frontiers of organic geochemistry. Topics include biomarker and isotope geochemical approaches to reconstructing past marine, terrestrial environmental change. *Recommended preparation:* CHEM 105abL, CHEM 322abL, GEOL 150L, GEOL 412, or equivalent background.

GEOL 577L Micropaleontology (3, 2 years, Fa) Microscopic fossils, especially foraminifera, their classification, the common genera, morphology, evolutionary trends; laboratory and field techniques. Lecture, 2 hours; laboratory and fieldwork, 6 hours. *Recommended preparation:* GEOL 433L.

GEOL 588L Quantitative Analysis for Biological and Earth Sciences (4, Sp) (Enroll in BISC 588L.)

GEOL 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

GEOL 593 Practicum in Teaching the Liberal Arts (2) Practical principles for the long-term development of effective teaching within college disciplines. Intended for teaching assistants in Dornsife College.

GEOL 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

GEOL 599 Special Topics (2–4, max 9, Irregular) Special topics in the earth sciences. Field trip required when appropriate to the topic. *Prerequisite:* second-year graduate standing normally required.

GEOL 601 Seminar in Sedimentary Geology (1–3, max 6, Sp) Analysis and discussion of current topics in sedimentary geology; topics will be chosen by students and faculty to focus on areas of recent advances.

GEOL 609 Seminar in Earthquake Physics (2, max 6, FaSp) Current research on the physics governing earthquakes and faults, including results from continuum and fracture mechanics, statistical physics, lab experiments, and seismological observations.

GEOL 650 Recent Advances in Paleontology (3) Selected review of recent ideas in paleobiology, evolution, and paleoecology related to examining the current frontiers in paleontology.

GEOL 790 Research (1–12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

GEOL 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation.

Associated Faculty

Professors: Jonathan Aronson (Communication and International Relations); Dominic Cheung (East Asian Languages and Cultures, Comparative Literature); Iris Chi (Social Work, Gerontology); Eugene Cooper (Anthropology); Robert Dekle (Economics); JoAnn Marie Farver (Psychology); Eric Heikkila (Public Policy); Velina Hasu Houston (Dramatic Arts); David James (Cinematic Arts); Douglas Joines (Finance and Business Economics); David Kang (International Relations, Business); Namkil Kim (East Asian Languages and Cultures); Dorinne Kondo (Anthropology, American Studies and Ethnicity); Audrey Li (East Asian Languages and Cultures, Linguistics); Thomas W. Lin (Accounting); Akira Mizuta Lippit (Cinematic Arts, East Asian Languages and Cultures, Comparative Literature); Roger Moon (Economics); Jeffrey B. Nugent (Economics, Business); C.W. Park (Business); Rhacel Parreñas (Sociology, Gender Studies); Joan Piggott (History); Nandini Rajagopalan (Management and Organization); Harry Richardson (Public Policy); Stanley Rosen (Political Science); Ellen Seiter (Cinematic Arts); Brett Sheehan (History); Jean Shih (Cell and Neurobiology, Molecular Pharmacology and Toxicology); Andrew Simpson (Linguistics, East Asian Languages and Cultures); James Steele (Architecture); John Strauss (Economics); Guofu Tan (Economics); Shui Yan Tang (Public Policy)

Associate Professors: David Bialock (East Asian Languages and Cultures); Bettine Birge (East Asian Languages and Cultures, History); Harrison Cheng (Economics); Meiling Cheng (Dramatic Arts, Critical Studies, English); Joshua Goldstein (History); Yasushi Hamao (Finance and Business Economics); George A. Hayden (East Asian Languages and Cultures); Hajime Hoji (Linguistics, East Asian Languages and Cultures); Mingyi Hung (Accounting); Kyung Moon Hwang (History); Jacques Hymans (International Relations); Saori Katada (International Relations); Annette Kim (Public Policy); Lon Kurashige (History, American Studies and Ethnicity); Kwanmin Lee (Communication); Sonya Lee (Art History, East Asian Languages and Cultures); Daniel Lynch (International Relations); Lori Meeks (East Asian Languages and Cultures, Religion); Sunyoung Park (East Asian Languages and Cultures); Lawrence Pryor (Public Relations); Gary Seaman (Anthropology); Jay Wang (Communication); Shiing-Wu Wang (Accounting); Duncan Williams (Religion); Carol Wise (International Relations)

Assistant Professors: Brian Bernards (East Asian Languages and Cultures); Youngmin Choe (East Asian Languages and Cultures); Robeson Taj Frazier (Communication); Clinton Godart (History, Religion, East Asian Languages and Cultures); Yu Hong (Communication); Lian Jian (Communication); Rongdao Lai (Religion); Satoko Shimazaki (East Asian Languages and Cultures); Yanhui Wu (Finance and Business Economics); Aimei Yang (Journalism)

Adjunct, Clinical, Research, Teaching and Visiting Faculty: John Chang (East Asian Languages and Cultures); Baizhu Chen (Finance and Business Economics); Helen Chung (East Asian Languages and Cultures); Ruth Gim Chung (Education); Xianxian Fang (East Asian Languages and Cultures); Nansong Huang (East Asian Languages and Cultures); Mayumi Ikeda (East Asian Languages and Cultures); Maki Irie (East Asian Languages and Cultures); Hee Ju (East Asian Languages and Cultures); Yuka Kumagai (East Asian Languages and Cultures); Jehoon Lee (Social Work); Seung-Ah Lee (East Asian Languages and Cultures); Steven Lee (East Asian Languages and Cultures); Hsiao-Yun Liao (East Asian Languages and Cultures); Yi-Hsien Liu (East Asian Languages and Culture); Christopher Magriny (East Asian Languages and Cultures); Yumi Matsumoto (East Asian Languages and Cultures); Miya Mizuta Lippit (East Asian Languages and Cultures); Takako Tajima (Architecture); Masako Tamanaha (East Asian Languages and Cultures); Tin-yu Tseng (East Asian Languages and Cultures); Juliana Wang (Environmental Studies); Jason Webb (Comparative Literature); Geoffrey Wiseman (International Relations and Public Diplomacy); Yan Xiao (Engineering); Ping Yang (East Asian Languages and Cultures)

Librarians: Joy Kim (Korean Heritage Library); Kenneth Klein (East Asian Library); Sun-Yoon Lee (Korean Studies); Lillian Yang (Chinese)

Emeritus Professors: Gordon Berger (History); Peter A. Berton (International Relations); Philip B.H. Birnbaum-More (Business Management and Organization); Roger Dingman (History); Murray Fromson (Journalism); Charlotte Furth (History); William Rideout (Education); Otto Schnepp (Chemistry); John E. Wills Jr. (History)

Programs

The East Asian Studies Center provides interdisciplinary studies of China, Japan and Korea. It offers an undergraduate major in East Asian Area Studies, minors in East Asian Area Studies and Korean Studies, the Master of Arts in East Asian Area Studies and the Master of Arts/Master of Business Administration. Its faculty are professors from departments throughout the college and several professional schools who teach and engage in research on East Asia. The center's interdisciplinary approach allows students to acquire broad exposure to many ways of learning about the region.

The East Asian Studies Center promotes and coordinates teaching, research and development of academic programs concerning East Asia, regardless of discipline or school, on a university-wide basis. Visiting scholars may also be named from among persons outside the university who wish to do research at USC and contribute to the goals of the center.

The center also promotes and coordinates academic exchange with other institutions with which USC maintains cooperative relations in the United States and abroad. The center serves, for example, as the consortium partner with UCLA's Asia Institute to form the UCLA-USC Joint East Asian Studies Center, a Title VI National Resource Center. Graduate students with special interests in East Asia may take courses at UCLA through USC and may also work, where appropriate, with certain UCLA faculty. UCLA graduate students may similarly take courses at USC and work with USC faculty, for credit at UCLA in East Asian studies. The center facilitates cooperation and provides graduate fellowships to students at both institutions.

Dornsife College of Letters, Arts and Sciences

East Asian Area Studies

Undergraduate Degrees

B.A. in East Asian Area Studies Requirements

Requirements for the lower division are: EALC 110 and EASC 150 or the equivalent; a minimum of four courses in one East Asian language (or the proficiency equivalent); and seven upper-division courses approved for the major in addition to the language courses used to meet the requirements. One lower-division course other than EALC 110 and EASC 150 may be substituted for one of the seven upper-division courses. Upper-division courses must include those from at least three departments, one of which must be History. At least one course must be taken on two of the following: China, Japan or Korea.

Requirements for the Minor in East Asian Area Studies

The minor in East Asian Area Studies gives students the opportunity to supplement more narrowly defined departmental majors with a multidisciplinary focus on an area of increasingly great importance to our nation in general and our region in particular. There is no language requirement.

Twenty-four units are required from among the more than 120 courses offered on East Asia at the university. Students are required to take EALC 110 and EASC 150; and at least four upper-division four-unit courses (16 units). At least one of these courses must be from the History Department and one from the humanities area. At least one course must be taken on two of the following: China, Japan or Korea.

Minor in Korean Studies

The minor in Korean studies offers an interdisciplinary approach to studying a dynamic and crucial region. Drawing on courses from departments across the social sciences, humanities and professional schools, the minor challenges and stimulates students who wish to learn about the political, economic, social and cultural changes of the area.

Twenty units (five courses) are required. All students must take EASC 150 East Asian Societies or HIST 105 The Korean Past as a gateway course, as well as four upper-division four-unit courses from the list below. There is no language requirement for the minor.

REQUIRED COURSES		UNITS
EASC 150	East Asian Societies, or	
HIST 105	The Korean Past	4
<i>Four 4-unit courses from the following:</i>		
CTCS 403**	Studies in National and Regional Media	4–8, max 8
CTCS 494**	Advanced Critical Studies Seminar	4–8, max 8
EALC 315*	Advanced Korean I	4
EALC 317	Advanced Korean II	4
EALC 332	Korean Literature in English Translation	4
EALC 344	Korean Culture from Ancient to Modern Times	4
EALC 415	Advanced Korean III	4
EALC 417	Advanced Korean IV	4
EALC 418*	Korean Writing in Mixed Script	4
EALC 419*	Newspaper and Documentary Korean	4
EALC 429	Gender in Korean Film and Literature	4
EALC 499**	Special Topics	2–4, max 8
HIST 333	Korea: The Modern Transformation	4
HIST 404	Seminar in Korean History	4
HIST 498**	Seminar on Selected Historical Topics	4, max 8
IR 499**	Special Topics	2–4, max 8

**Prerequisite: EALC 217*

***For these repeatable courses, only classes with Korean-based foci will count.*

Dornsife College of Letters, Arts and Sciences

East Asian Area Studies

Graduate Degrees

Master of Arts

The East Asian Studies Center offers an interdisciplinary master's degree in East Asian Area Studies. The program provides a wide range of language, cultural, social, historical, political and economic courses and faculty expertise; individual courses of study may be designed to meet both continuing academic and professional objectives. Students may concentrate primarily on one country (China, Japan, Korea) or develop region-wide expertise through a combination of course work and the thesis project.

Admission Requirements

Prerequisites

While an applicant for admission will normally have significant experience in East Asian language(s) and area studies as demonstrated through course work completed for the undergraduate degree, programs may be arranged for promising students without prior experience in East Asian studies. *There is no formal language requirement for admission.*

Criteria

Please refer to the EASC website for a detailed explanation of application requirements: dornsife.usc.edu/eascenter/masters.

Degree Requirements

This degree is under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses acceptable to the Graduate School.

Foreign Language Requirement

Students must be able to demonstrate oral and written proficiency in Chinese, Korean or Japanese through the third year level (equivalent to six semesters) before the M.A. program is completed.

Course and Thesis Requirements

Six courses (24 units), four of which must be at the 500 level or above, plus the thesis (4 units) are required. All students must complete: (1) EASC 592; (2) EALC 531, EALC 532 or EALC 533; and (3) one other course from a Dornsife College of Letters, Arts and Sciences department. The three additional courses (12 units) may be taken from college departments or professional schools. All courses must be approved by the center director or adviser. A maximum of two courses at the 400 level may be counted toward the degree. All students must register for EASC 594ab Master's Thesis for the thesis project.

Master of Arts/Master of Business Administration

The Marshall School of Business in conjunction with the East Asian Studies Center offers a joint M.A./MBA degree that combines graduate business education with training in the cultures and societies of East Asia. Students enrolled in the joint degree program are required to complete a minimum of 72 units. All students must complete 48 units in the Marshall School of Business. Dual degree students may not count courses taken outside the Marshall School of Business toward the 48 units. In East Asian Area Studies, students have the option of taking five courses and writing a thesis (for a total of 24 units) or taking six courses and passing a comprehensive examination (for a total of 24 units).

Applicants for the joint M.A./MBA are required to follow the admission procedures for the full-time MBA program. GRE scores are not required for admission into the joint program.

Required Courses

Required MBA courses: all required courses in an MBA program.

REQUIRED EASC COURSES

		UNITS
EASC 592	Proseminar on Issues and Trends in Contemporary East Asia	4

and *one* course from the following list:

<i>Cultural/Historical Foundations of East Asia</i>		
AHIS 518	Seminar in Chinese Art	4, max 16
AHIS 519	Seminar in Japanese Art	4, max 16
EALC 501	History of Chinese Literature	4
EALC 506	Selections from Classical Chinese Literature	4
EALC 515	Classical Japanese Poetics	4

EALC 531	Proseminar in Chinese Cultural History	4
EALC 532	Proseminar in Korean Cultural History	4
EALC 533	Proseminar in Japanese Cultural History	4
EALC 541	Seminar: Japan	4
EALC 543	Seminar: Japanese Literature	4
EALC 551	Seminar: China	4
EALC 553	Seminar: Chinese Literature	4
EALC 610	Seminar: Buddhism and the Literary Arts in Japan	4
HIST 535	Studies in Japanese History	4
HIST 536	Studies in Chinese History	2 or 4
HIST 540	Studies in Modern East Asian History	4, max 8
HIST 630	Seminar in Japanese History	2 or 4
HIST 635	Seminar in Chinese History	2 or 4

Elective Courses (Thesis Option)

During the second and third years of the program students must complete enough graduate units to bring the total number of units completed in the Marshall School of Business to 48, complete 12 units of East Asian Area Studies elective courses (three courses), and complete a four-unit thesis under the guidance of a faculty committee of three members. The subject will concern East Asia and may focus on business/finance.

Elective Courses (Comprehensive Examination Option)

During the second and third years of the program students must complete enough graduate units to bring the total number of units completed in the Marshall School of Business to 48, complete 16 units of East Asian Area Studies elective courses (four courses) and must pass a comprehensive examination in East Asian Area Studies.

Foreign Language Requirement

Students must be able to demonstrate oral and written proficiency in Chinese, Japanese or Korean language through the third year level (equivalent to six semesters) before the joint M.A./MBA program is completed. Language course work taken to meet this requirement will not count toward the minimum unit or course requirements for completion of the degree program. Therefore, students without sufficient undergraduate language course work, native speaker capability or other prior training, are advised that additional units and course work beyond the minimum 72 units may be required in order to satisfy the foreign language requirement. USC offers beginning, intermediate and advanced Chinese, Japanese and Korean language courses during the academic year (fall/spring).

Graduate Certificate

Requirements

Graduate students interested in East Asian Area Studies must be enrolled in an advanced degree program in the Graduate School or in a professional school at the university. While preparing for an M.A., Ph.D. or other graduate degree, they may earn a certificate in East Asian Studies, which certifies special area competence beyond discipline requirements. The certificate requirements provide the student with two options. The first requires that the student write a thesis and take four graduate-credit courses in East Asian studies in any department. An oral examination is given on the thesis. The second option does not require a thesis. The student instead takes six graduate-credit courses in the East Asian area and takes an oral examination on three research papers and on relevant graduate work. As a part of both options some basic East Asian history and at least two years of study or the equivalent of an East Asian language are required. The student makes the basic decisions on the program to be followed in consultation with a three-member interdisciplinary committee approved by the Director of the East Asian Studies Center.

For further information, interested students may write to: Director, East Asian Studies Center, College House 101, University of Southern California, Los Angeles, CA 90089-0127.

Dornsife College of Letters, Arts and Sciences

East Asian Area Studies

Courses of Instruction

EAST ASIAN STUDIES (EASC)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

EASC 150g East Asian Societies (4, FaSp) Main patterns of change in modern China, Japan, and Korea; historical framework and the insights of geography, economics, political science, and other disciplines.

EASC 160gmp China and the World (4, FaSp) Advanced-level introduction to China and its relations with the wider world in historic and contemporary perspective.

EASC 360 Global East Asia (4, max 12, Sm) Summer study abroad program to China, Japan or Korea with a focus on globalization. *Recommended preparation*: two language and/or area studies courses related to country of study; recommended course list provided by EASC.

EASC 490x Directed Research (1–8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

EASC 499 Special Topics (2–4, max 8, Irregular) Interdisciplinary examination of various areas of East Asian studies.

EASC 590 Directed Research (1–12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

EASC 591 Interdisciplinary Seminar (4, max 8, Irregular) An examination of a broad topic in the study of China, Korea, or Japan. Guest speakers, student reports, papers. Readings in English and the appropriate Asian language(s).

EASC 592 Proseminar on Issues and Trends in Contemporary East Asia (4, 2 years, Fa) Introduction to graduate level study of policy issues and major trends in contemporary China, Japan, and Korea; contributions of various academic disciplines.

EASC 593x Understanding East Asia: An Introduction for Professional School Students (3, Sp) Historical, social, political and cultural survey of China, Japan and Korea with focus on topics of particular relevance for business practitioners and other professionals. Not available for degree credit to East Asian Area Studies degree candidates.

EASC 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

EASC 599 Special Topics (2–4, max 8, FaSpSm) Special topics in East Asian Area Studies.

Lecturers: Helen Chung, Ed.D.; Xianxian Fang, M.A.; Mayumi Ikeda, M.A.; Xian Jian, M.A.; Hee Ju, Ph.D.; Seung-Ah Lee, Ph.D.; Christopher Magroney, M.A.; Yi Walker, Ph.D.

Adjunct Assistant Professor (Teaching): Miya Mizuta Lippit, Ph.D.

Emeritus Professor: Henry H.Y. Tsee, Ph.D.

East Asian Languages and Cultures offers undergraduate, master's and doctoral programs in Chinese, Japanese and Korean studies, and a progressive degree in East Asian Languages and Cultures. The department fosters original approaches in East Asian studies. With an emphasis on interdisciplinary and innovative research, the program provides students with systematic training in East Asian languages, literatures and cultures.

The faculty is committed to intra-regional and interdisciplinary studies of East Asia, which includes critical interaction among the cultures of China, Japan and Korea, as well as integration of modern and pre-modern studies. The department engages the arts, languages, linguistics, literatures, histories, media, religions, visual and material cultures of East Asia.

Dornsife College of Letters, Arts and Sciences

East Asian Languages and Cultures

Undergraduate Degree

Bachelor of Arts in East Asian Languages and Cultures Requirements

For the lower division, two years of Chinese, Japanese or Korean language are required. For the upper division, 32 units, including the third year of language, are required. The 32 units of upper-division courses must also

include one civilization course, one literature course and four upper-division elective courses (16 units) in Chinese, Japanese or Korean. One lower-division course may be counted toward the 16 units of upper-division electives. One East Asian course from another department may be included in the 32 unit requirement, if approved by an adviser.

Honors Program

Candidates for the B.A. in the Department of East Asian Languages and Cultures may receive a designation on their transcripts of departmental honors. Admission to the honors program is required.

Prerequisites: 3.33 overall GPA, 3.5 GPA or better in courses in the major, completion of at least one upper-level EALC course requiring a seminar paper at the time of admission, submission of an application form to the undergraduate faculty adviser.

Required for departmental honors: Maintain GPA requirements stated above and complete EALC 495ab Undergraduate Honors Thesis.

East Asian Languages and Cultures Minor Requirements

For the lower division, two years of language in one of three languages (Chinese, Japanese and Korean) are required. For the upper division, four 4-unit courses, including one civilization course, one literature course and two upper-division elective courses in Chinese, Japanese or Korean are required.

Cultures and Politics of the Pacific Rim Minor Requirements

This interdisciplinary minor introduces students to the cultural heritage and political contexts of the United States' most important trading partners on the Pacific Rim. Students study East Asia and Latin America, and the cultural, economic and political dimensions of international trade. It is intended for students who are interested in or considering diplomatic or commercial careers that require knowledge about the people and cultures of the Pacific Rim.

As with all minors, students must choose at least four classes dedicated to this minor and four classes outside their major department, which may be the same four courses.

REQUIREMENTS (FIVE COURSES, 20 UNITS)

UNITS

REQUIREMENTS (FIVE COURSES, 20 UNITS)		UNITS
<i>International Trade</i> (choose one course from the list below)		
ECON 450	International Trade (prerequisite: ECON 303 or BUAD 351)	4
IR 325	North-South Relations in the Global Economy	4
IR 330	Politics of the World Economy	4
IR 470	Comparative Regionalism (prerequisite: IR 210)	4
POSC 345	International Law	4
POSC 451	Politics of Resources and Development	4

Area Studies (choose two courses, each from a different list below)

<i>Latin America:</i>		
AHIS 319	Mesoamerican Art and Culture	4

EALC 332	Korean Literature in English Translation	4
EALC 335	Korean American Literature	4
EALC 345	Korean Civilization	4
HIST 333	Korea: The Modern Transformation	4

Study Abroad Programs

East Asian Languages and Cultures majors and minors are encouraged to take advantage of the numerous semester and year-long study abroad opportunities sponsored by the Office of Overseas Studies. Currently, the office offers programs in China (Beijing and Nanjing), Taiwan (Taipei), Korea (Seoul), and Japan (Tokyo, Nagoya). Each of the programs is affiliated with a world class institution, such as Waseda University in Tokyo, National Chengchi University in Taipei or Yonsei University in Seoul. Contact the Office of Overseas Studies at (213) 740-3636 for further details or visit them online at dornsife.usc.edu/overseas.

The majority of course work offered by these programs may be counted toward the EALC major or minor requirements. Students who receive major credit from any of these programs must still take at least eight units of non-language courses within EALC at the upper-division level while at USC (specifically an EALC civilization and an EALC literature course). Students interested in attending one of these programs must meet with an EALC academic adviser to ensure that the courses enrolled in overseas will meet EALC major or minor requirements.

Chinese Summer Program in Beijing

The Department of East Asian Languages and Cultures offers its Chinese language summer courses in Beijing. Participants will be able to transition seamlessly to the next level courses upon returning to campus. Cultural visits and excursions will be included in the tuition fee. All courses count toward a major and minor in East Asian Languages and Cultures.

Bachelor of Arts with a Combined Major in Linguistics/East Asian Languages and Cultures

See Department of Linguistics.

Progressive Degree Program in East Asian Languages and Cultures

The progressive degree program permits exceptional undergraduate students to receive both a Bachelor of Arts and a Master of Arts in East Asian Languages and Cultures within five years. It is intended for students with extraordinary EALC preparation and performance who demonstrate a superior level of overall scholarship.

Admission

Applicants may apply after the completion of 64 units of course work applicable to their undergraduate degree since graduating from high school. (AP units, IB units and course work taken prior to high school graduation are excluded). Applicants must submit their applications before completing 96 units of course work. Normally, the application is submitted in the fall semester of the third year of enrollment at USC. The application for admission to a progressive degree program must be accompanied by a departmentally approved course plan proposal and two letters of recommendation from USC faculty members in the Department of East Asian Languages and Cultures.

Awarding of Degrees

Progressive degree program students must fulfill all of the requirements for both the bachelor's degree and the master's degree, including a master's thesis. The unit requirement for the master's degree can be reduced by as

much as one-third. The degrees may be awarded separately, but the master's degree will not be awarded before the undergraduate degree.

Time Limits

The time limit for completing a progressive degree program is 12 semesters.

Further details about progressive degrees can be found [here](#).

Dornsife College of Letters, Arts and Sciences

East Asian Languages and Cultures

Graduate Degrees

Master of Arts in East Asian Languages and Cultures

The Department of East Asian Languages and Cultures offers instruction in the languages, literatures and cultures of East Asia. The graduate program offers the master's degree with specialties in Chinese, Japanese and Korean. Programs of study may emphasize foreign language teaching, applied linguistics, literature, thought, religions or area studies.

Admission Requirements — Prerequisites

An applicant for admission will normally have the equivalent of an undergraduate major in East Asian languages and cultures at USC, but programs may be arranged for promising students who do not have the prerequisites. Such students may be required to make up the deficiencies.

Criteria

All applicants are required to take the Graduate Record Examinations verbal and quantitative General Test and submit their complete undergraduate record: at least three letters of recommendation and a statement of purpose should be sent to the chair of the department. Applicants are urged to submit written materials as supporting evidence.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Foreign Language Requirement

Competence is required in Chinese, Japanese or Korean.

Course Requirements

Six courses, four of which must be at the 500-level or above, are required. Those students whose concentration is in language and literature should take a fourth year of language.

Final Research Paper

The research paper must demonstrate the student's ability to use source materials in the East Asian language of his or her area.

Doctor of Philosophy in East Asian Languages and Cultures

Course Requirements

A student's total graduate course work must be at least 60 units including 4 units of doctoral dissertation (794ab) and the following courses:

CORE COURSES		UNITS
COLT 601	Professional Development I: Applying for Positions	2
COLT 603	Professional Development II: Publication	2
EALC 505	Introduction to East Asian Languages and Cultures	4

A theory and methodology course in EALC or an equivalent course in a related program.

Four courses on East Asian languages and literatures.

Four courses on East Asian cultures and civilizations.

Three additional courses in a target discipline or field.

No more than four courses at the 400-level may be applied to the total requirement of 60 units. The fulfillment of the course requirements is determined by the Graduate Studies Committee in EALC.

Screening Procedure

A screening procedure will be conducted before the student completes 24 units of course work, which typically means by the end of the first year. The Graduate Studies Committee will review the student's performance comprehensively and meet the student after a statement describing his/her research ideas is submitted.

Qualifying Exam Committee

Upon successful completion of the screening procedure, the student is encouraged to begin forming a five-member qualifying exam committee, whose purpose is to help the student prepare for the qualifying examination. The committee must be approved by the Graduate School at the time the student applies to schedule a qualifying examination.

Qualifying Procedure

A student takes examinations in three different fields approved by the qualifying exam committee. An oral - examination based on the written exams will follow. After successful completion of the examinations, the student will submit a dissertation prospectus, which must be approved by the qualifying exam committee and the Graduate Studies Committee in EALC.

Foreign Language Requirement

A student must have at least four years of course work or its equivalent in the language of his/her specialization. In addition, the student should acquire or demonstrate competence in a second East Asian language. This requirement may be met by two years' worth of course work. Whether the second East Asian language should be classical or modern will be determined by the Graduate Studies Committee in consultation with a student's academic adviser.

Dissertation

Defense and presentation of the dissertation will follow regulations defined by the Graduate School.

Certificate in Foreign Language Teaching

The certificate in Foreign Language Teaching provides certification in the theory and practice of second or foreign language teaching for student language teachers concurrently enrolled in graduate degree programs in foreign languages or related graduate programs at USC; for graduates of such programs who are teaching languages; for external candidates concurrently enrolled in similar programs at accredited colleges or universities; or for graduates of such programs who are teaching languages. The certificate is meant to supplement graduate study in the literature or linguistics of foreign languages. It is also meant to supplement classroom teaching. Refer to the Department of Spanish and Portuguese for course work requirements.

Courses of Instruction

EAST ASIAN LANGUAGES AND CULTURES (EALC)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

EALC 101x Conversational Chinese and Intercultural Communication (2, FaSp) Basic Mandarin conversational skills for effective communication in familiar, everyday Chinese contexts and better understanding of intercultural communication through content-based language acquisition. Not available for credit to East Asian Area Studies and East Asian Languages and Cultures majors and minors. Graded CR/NC.

EALC 102 Language, Art and Culture: Calligraphy (2, FaSp) This course introduces students to the origin of the basic Chinese scripts and the basic principles and styles of calligraphy.

EALC 103ab Online Chinese I (2-2, FaSpSm) Basic listening, speaking, reading and writing abilities in Mandarin Chinese. Instruction includes individual meetings and online content. (Duplicates credit in EALC 104).

EALC 104 Chinese I (4, FaSpSm) The sound system of modern Chinese; aural comprehension, oral expression, basic patterns, and writing system.

EALC 106 Chinese II (4, FaSpSm) Dialogue practice and conversation; reading of simple stories and essays; comparison of Chinese and English grammar; writing of paragraphs. *Prerequisite:* EALC 104.

EALC 108 Reading and Writing Chinese (4, FaSp) The basics of reading and writing modern Chinese; intensive reading and writing of paragraphs, essays, and stories; extensive reading of beginner-level authentic materials.

EALC 110gp East Asian Humanities: The Great Tradition (4, FaSp) Introduction to the major humanities traditions of China, Japan, and Korea through an examination of representative works drawn from literature, aesthetics, philosophy, religion, and historical writing.

EALC 115 Korean I (4, FaSpSm) Aural comprehension and oral practice; the writing system; grammar drill, sentence patterns. Lecture, 5 hours; additional hours for drill and laboratory.

EALC 117 Korean II (4, FaSpSm) Continuation of EALC 115. Progressive drill in dialogue, reading, and writing. Lecture, 5 hours; additional hours for drill and laboratory. *Prerequisite:* EALC 115.

EALC 120 Japanese I (4, FaSpSm) Basic Japanese conversation practice, basic grammar and building proficiency of reading and writing Hiragana and Katakana (Japanese alphabetical systems).

EALC 121 Extensive Reading in Japanese I (2, max 4, FaSp) Development of reading skill in Japanese for elementary level students through short stories written for learners of Japanese and authentic materials written for native Japanese speakers. *Prerequisite:* EALC 120.

EALC 122 Japanese II (4, FaSpSm) Continuation of EALC 120. Basic Japanese conversation practice, basic grammar and building proficiency of reading and writing Hiragana and Katakana and basic kanji. *Prerequisite:* EALC 120.

EALC 125g Introduction to Contemporary East Asian Cinema and Culture (4) An introduction to and overview of the contemporary cinemas of East Asia: China (Hong Kong, the People's Republic, and Taiwan), Japan, and Korea.

EALC 130g Introduction to East Asian Ethical Thought (4, FaSp) Introduction to the history of

Chinese, Japanese, and Korean ethical thought; perspectives on human nature, historical writing, religious options, and aesthetic implications. Conducted in English.

EALC 145g Introduction to Chinese Culture, Art and Literature (4, FaSp) Introduction to the civilization, art and literature of pre-modern China through the lens of the cultural products of identity.

EALC 150g Global Chinese Cinema and Cultural Studies (4, FaSp) Examination of the transnational production and circulation of Chinese-language cinema. Analysis of the larger sociocultural significance of films by engaging their historical context.

EALC 204 Chinese III (4, Fa) Conversational practice: reading of stories and essays; writing of short essays. *Prerequisite:* EALC 106.

EALC 206 Chinese IV (4, Sp) Continuation of 204, with emphasis on reading and writing, frequent interaction with native speakers. *Prerequisite:* EALC 204.

EALC 207ab Intermediate Chinese: Reading and Oral Communication (4-4, Sm) Improving Chinese reading techniques and oral presentation skills in an immersive environment. Offered only in Taiwan. *Prerequisite:* a: EALC 106; b: EALC 204.

EALC 215 Korean III (4, Fa) Drill to increase proficiency in dialogue, reading, and writing; intermediate level readings. *Prerequisite:* EALC 117.

EALC 217 Korean IV (4, Sp) Advanced level reading of modern Korean and exercises in written composition. *Prerequisite:* EALC 215.

EALC 220 Japanese III (4, FaSpSm) Continuation of EALC 122. Conversation practice, basic to intermediate grammar, and building proficiency of reading and writing Hiragana and Katakana with additional kanji. *Prerequisite:* EALC 122.

EALC 221 Extensive Reading in Japanese II (2, max 4, FaSp) Development of reading skills in Japanese for intermediate level students through short stories written for learners of Japanese and authentic materials written for native Japanese speakers. *Prerequisite:* EALC 220.

EALC 222 Japanese IV (4, FaSpSm) Continuation of EALC 220. More sophisticated grammar and vocabulary for natural conversation. Enhancing fundamental reading and writing skills, expanding the knowledge of kanji. *Prerequisite:* EALC 220.

EALC 264g Asian Aesthetic and Literary Tradition (4) (Enroll in COLT 264g)

EALC 304 Advanced Modern Chinese I (4, Fa) Reading selections from different styles of modern Chinese writings, analysis of stylistic techniques and syntactic structure, composition, and translation. *Prerequisite:* EALC 206.

EALC 306 Advanced Modern Chinese II (4, Sp) Continuation of EALC 304; composition exercises in different styles of writing. *Prerequisite:* EALC 304.

EALC 315 Advanced Korean I (4, Fa) Advanced reading in modern Korean materials; improvement of skills in conversation, composition, and translation. *Prerequisite:* EALC 217.

EALC 317 Advanced Korean II (4, Sp) Continuation of EALC 315, with emphasis on the use of Chinese characters, translation, and composition exercises. *Prerequisite:* EALC 315.

EALC 318 Readings in Contemporary Korean (4, FaSpSm) Selected readings in a variety of Korean styles. Materials are from essays, short stories and newspapers. *Prerequisite:* EALC 217.

EALC 320 Advanced Japanese I (4) Strengthen intermediate Japanese language proficiency. Oral/aural communication skills as well as reading and writing skills. Promote an understanding of the present-day Japanese culture. *Prerequisite:* EALC 222.

EALC 322 Advanced Japanese II (4, FaSp) Continuation of EALC 320. Improve and strengthen abilities to speak, listen, read and write, coping with more involved materials and situation. *Prerequisite:* EALC 320.

EALC 332 Modern Korean Literature in Translation (4, Fa) Introduction to Korean literature, with discussion of critical approaches to literary discourse, historical contexts of literary production, and aspects of contemporary popular culture.

EALC 333g Introduction to Korean Film (4, Fa) Survey of Korean film, the film industry, and critical issues from the colonial period to the present.

EALC 334 Chinese Language Through Films and Television (4, FaSp) Enhancement of functional, advanced-level Mandarin proficiency for vocabulary, grammar, listening, speaking, reading, writing, and cultural awareness through selected Chinese-language films and television programs. *Prerequisite:* EALC 206.

EALC 335m Korean American Literature (4) Survey of Korean American literature from the mid-20th century until the most recent years. Focus on issues and topics central to Korean American experience.

EALC 336 Chinese Language through Films and Television II (4, FaSp) Further enhancement of functional, advanced-level Mandarin proficiency for vocabulary, grammar, listening, speaking, reading, writing, and cultural awareness through selected Chinese-language films and television programs. *Prerequisite:* EALC 304 and EALC 334.

EALC 340g Japanese Civilization (4, FaSp) Survey of the main characteristics and development of art, literature, philosophy, religion, political and social institutions through different periods. Conducted in English.

EALC 342g Japanese Literature and Culture (4, FaSp) Japanese literature from the earliest times to the present; development of prose, poetry and the novel; evolution of theatre; Japanese literature under Western influence. Conducted in English.

EALC 344g Korean Culture from Ancient to Modern Times (4, Sp) The history of Korean literature and culture from the ancient to the modern era. *Recommended preparation:* HIST 105.

EALC 345 Korean Civilization (4) Survey of the main characteristics and development of Korean art, literature, philosophy, religion, political and social institutions through different periods. Conducted in English.

EALC 350g Chinese Civilization (4, FaSp) Characteristics and aspects of Chinese civilization; interpretation of philosophy, literature, religion, art, music. Conducted in English.

EALC 352g Chinese Literature and Culture (4, FaSp) Readings of Chinese poetry, prose, novels and drama; influence of the West on Chinese literature and culture in modern times. Conducted in English.

EALC 354g Modern Chinese Literature in Translation (4) Readings in modern Chinese poetry, fiction, and drama since 1919.

EALC 355 Studies in Chinese Thought (4) Chinese thought, particularly as formulated in the three great traditions: Confucianism, Taoism, Buddhism.

EALC 358g Transnational Chinese Literature and Culture (4, Sp) An introduction to Sinophone literatures and cultures (in English translation) from the Asia-Pacific region, including Taiwan, Hong Kong, Tibet, Southeast Asia, and North America.

EALC 360g Performing Japan: Bodies, Media, and Textuality (4, FaSp) The classical foundations of Japanese performance, including noh, puppet theater, and kabuki; exploration of how these genres are implicated in modern and contemporary Japanese performance.

EALC 365 Studies in Japanese Thought (4) Influence of native traditions and imported Chinese traditions on Japanese civilization; religious, ethical, aesthetic, and political aspects.

EALC 374 Language and Society in East Asia (4) The interaction of language with society in countries of

East Asia: language and identity, the politicization of language, language change, language and gender.

EALC 375 Women and Gender in China: Past and Present (4) An examination of changes in sex roles and in constructs of the female as influenced by traditional Chinese thought and later social developments.

EALC 380 Cultural Topics in East Asian Literature (4) Selected themes, genres, and periods in East Asian literature, e.g., Taoism and Buddhism, women, folktales.

EALC 381 Visual Culture of Asia (4, max 8, FaSp) (Enroll in AHIS 381)

EALC 383 Later Chinese Art (4) (Enroll in AHIS 385)

EALC 384 Early Chinese Art (4) (Enroll in AHIS 384)

EALC 386 Readings in Modern Korean Literature (4) Selected readings from modern Korean short stories, novels, plays and essays. Readings will be in English and Korean. *Prerequisite:* EALC 217.

EALC 387 Early Japanese Art (4) (Enroll in AHIS 386)

EALC 388 Later Japanese Art (4) (Enroll in AHIS 387)

EALC 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

EALC 400 Classical Chinese I (4) Introduction to the classical styles, selections from classical style writings, contrastive analysis of modern and classical Chinese, translation and writing practice. *Prerequisite:* EALC 206.

EALC 402 Classical Chinese II (4) Continuation of EALC 400.

EALC 404 Advanced Modern Chinese III (4, Fa) Readings in modern Chinese literary, documentary, and epistolary styles; stylistic and syntactic analysis; composition; translation. *Prerequisite:* EALC 306.

EALC 406 Advanced Modern Chinese IV (4, Sp) Continuation of EALC 404.

EALC 407 News and Web Chinese (4) Reading selections from newspaper articles and online reports to further develop proficiency in advanced Chinese and understanding of the society and culture. *Prerequisite:* EALC 306.

EALC 410 Chinese-English Translation (4) Structure, vocabulary, and techniques of written translation and oral interpretation; classroom and laboratory practice; English-Chinese and Chinese-English.

EALC 412ab Business Chinese (4-4) a: Practice in the basic vocabulary and idioms of foreign trade and other commercial transactions in Mandarin. *Prerequisite:* EALC 306. *b:* Continuation of EALC 412a.

EALC 413 Business Japanese (4, FaSpSm) Practical advanced level Japanese business terms and their usage in a variety of business situations; cultural insights on Japanese customs that underline business transactions in Japan. *Prerequisite:* EALC 322.

EALC 415 Advanced Korean III (4, Fa) Selected readings in Korean texts, pre-modern and modern, in various literary and non-fiction genres; focus on developing reading and translation skills. *Prerequisite:* EALC 317.

EALC 416 Advanced Chinese Oral Communication (2, FaSp) Enhancement of advanced conversational skills through descriptions, summaries of texts, active participation in discussions, debates and oral presentations in class. *Prerequisite:* EALC 406.

EALC 417 Advanced Korean IV (4, Sp) Continuation of EALC 415.

EALC 418 Korean Writing in Mixed Script (4, FaSp) Selected readings in Korean texts written in mixed script; a systematic study of Chinese characters and translation of text. *Prerequisite:* EALC 217.

EALC 419 Newspaper and Documentary Korean (4, FaSp) Selected readings from newspapers, magazines, and other journalistic publications; analysis of styles and practice in writing articles. *Prerequisite:* EALC 217.

EALC 422 Advanced Japanese III (4, Fa) Students develop advanced levels of Japanese linguistic knowledge and communication skills through speaking, listening, reading and writing activities using authentic Japanese texts and discourse. *Prerequisite:* EALC 322.

EALC 424 Advanced Japanese IV (4, Sp) Continuation of EALC 422. Students continue to improve their Japanese language competence in the course of acquiring Japanese pragmatic skills and cultural knowledge. *Prerequisite:* EALC 422.

EALC 426 Classical Japanese (4) Introduction to the fundamentals of classical grammar; readings from various classical works, both poetry and prose; translation practice. *Prerequisite:* EALC 322.

EALC 427 Women's Lives in Premodern Japanese Literature (4, Fa) The social lives of women in ancient and medieval Japan as viewed through poetry, memoir, tale literature, legal documents, and personal correspondence. *Recommended preparation:* Any course in Japanese literature or civilization.

EALC 428 Nature and the Ecological Imagination in Japanese Literature (4, FaSpSm) Examination of cultural perceptions about nature and how they affect attitudes toward the environment: includes comparisons to Euro-American as well as other East Asian traditions.

EALC 429 Gender in Korean Film and Literature (4, Sp) Changing representations of gender in Korean films and literary works over the course of the 20th century. *Recommended preparation:* HIST 105 and EALC 332.

EALC 430 Gender and Sexuality in Korean Literature and Culture (4) Examination of the changing representations of gender and sexuality in Korean cultural texts over the course of the 20th century.

EALC 431 The Taoist Tradition (4) Close reading of primary text(s) of early Chinese Taoist thinkers (in translation), along with analysis of relevant secondary scholarship. *Recommended preparation:* EALC 355.

EALC 450 Contemporary Japanese Literature and Global Modernity (4, FaSp) Examination of historical currents in contemporary Japanese literature and popular culture and the role translation plays in their global circulation and redefinition.

EALC 452 Chinese Fiction (4) Development of Chinese fiction and readings from English translations of major Chinese novels such as the Dream of the Red Chamber, All Men are Brothers, and others. Conducted in English.

EALC 454 Bildungsroman in Modern East Asia (4, Sp) Comparative study of core narratives of youth and its destiny in modern literature from China, Japan, Korea, and Taiwan. Readings include scholarship on European literature.

EALC 455 Japanese Fiction (4) Japanese fiction from early to modern times; literary, philosophical, and social aspects of tales and novels. Conducted in English.

EALC 460 Love, Self and Gender in Japanese Literature (4, Sp) Examines conceptions of love, self, gender, and sexuality in Japanese literature and culture of the modern and pre-modern periods with comparisons to European and Chinese literature.

EALC 465 Topics in Korean Visual and Cultural Studies (4, FaSp) Examination of dominant and emergent critical issues in the study of modern and contemporary Korean visual culture.

EALC 470 Introduction to East Asian Linguistics (4) Survey of the sound systems, writing systems,

grammatical systems, historical development, and social environments of the Chinese, Japanese, and Korean languages. *Prerequisite:* EALC 406 or EALC 417 or EALC 424.

EALC 480 Marxism and Culture in East Asia (4, FaSp) Intensive reading on current transnational issues in the study of East Asian or Asian cultures.

EALC 481 Studies in Japanese Art (4, max 16) (Enroll in AHIS 481)

EALC 484 Studies in Chinese Art (4, max 16) (Enroll in AHIS 484)

EALC 490x Directed Research (1–8, max 12) Individual research and readings. Not available for graduate credit.

EALC 494ab Honors Thesis (4, Fa; 4, Sp) Research and writing of original thesis under guidance of faculty member. Open only to EALC majors.

EALC 499 Special Topics (2–4, max 8)

EALC 500 Advanced Classical Chinese I (4) Reading in classical Chinese and practice in classical vocabulary and syntax, with emphasis on translation into English and modern Chinese. *Prerequisite:* EALC 402.

EALC 501 History of Chinese Literature (4) An in-depth survey of literary development concerning periods, thought, genres, and socio-cultural backgrounds in China. In English.

EALC 502 Advanced Classical Chinese II (4) Continuation of EALC 500. *Prerequisite:* EALC 500.

EALC 503 Chinese Poetry (4) Literary studies of the theory and practice of Chinese poetry from major poets. *Prerequisite:* 4th year Chinese.

EALC 504 Selections from Modern Chinese Literature (4) Literary currents and representative writings of the 20th century. *Prerequisite:* EALC 306.

EALC 505 Introduction to East Asian Languages and Cultures (4, FaSp) An in-depth introduction to East Asian studies. Open to graduate students only.

EALC 506 Selections from Classical Chinese Literature (4) Writings of the important periods and genres of Chinese literary history. *Prerequisite:* EALC 406.

EALC 507 East Asia in Cross-Cultural Theories (4, FaSp) Introduction to major theoretical paradigms particularly relevant to the study of East Asian cultures. Seminal Western theoretical texts with studies on East Asia.

EALC 509 Transnational Korean Cinema (4, Fa) Korean cinema since the early 20th century, focusing on transnational production, circulation, and consumption. Open to graduate students only.

EALC 510 Contemporary Japanese Cinema (4, Fa) Japanese cinema since the 1980s focusing on the works by filmmakers.

EALC 512 Japanese Literature and Film (4, FaSp) Relationship between Japanese literature and film, focusing on the transition from literary text to film text. Open to graduate students only.

EALC 515 Classical Japanese Poetics (4) An analysis of major texts of the Japanese literary tradition from the 8th to the 16th century.

EALC 520 Modern Japanese Writers (4) Selections illustrative of major literary trends and literary works since the Meiji Restoration. *Prerequisite:* EALC 422.

EALC 522 Classical Japanese Writers (4) Writings representative of important periods and genres of Japanese literary history up to the Meiji Restoration. *Prerequisite:* EALC 426.

EALC 530 Race, Ethnicity, and Multiculturalism in East Asia (4, Sp) Examination of scholarship and cultural production on issues and theories of race, ethnicity, and multiculturalism in East Asia (China, Japan, Korea, and Southeast Asia).

EALC 531 Proseminar in Chinese Cultural History (4) Intensive readings in English concerning interpretive issues in the study of Chinese cultural history.

EALC 532 Proseminar in Korean Cultural History (4) Introduction to Korean cultural and social history through intensive reading of the English-language literature on Korean history and culture.

EALC 533 Proseminar in Japanese Cultural History (4) Intensive readings, chronologically arranged, in interpretive issues in the study of Japanese cultural history. Readings in English.

EALC 534 Modernity and Cultural Representation in Korea (4, FaSp) In-depth introduction to the cultural history, including emerging trends and new methodologies within modern Korean literary and cultural studies.

EALC 535 Proseminar in Chinese Visual Culture (4, FaSp) Chinese visual culture through the complex interface of art and thought. Examines architectural layout, pictorial representation, decorative motif as part of cultural production that intertwines with intellectual trends.

EALC 536 Studies in Modern Japanese History (4) (Enroll in HIST 534)

EALC 537 Structure of the Korean Language (4) Description and theoretical analysis of phonology, morphology and syntax of modern Korean; comprehensive view of the properties of the Korean structure. *Prerequisite:* EALC 470.

EALC 541 Seminar: Japan (4) Social, economic, political, and cultural problems in modern Japan. Bibliographic and reference materials. *Prerequisite:* HIST 436.

EALC 543 Seminar: Japanese Literature (4) Readings in original texts in the works of selected major writers; lectures dealing with intellectual and cultural backgrounds of the periods and the authors. *Prerequisite:* EALC 520, EALC 522.

EALC 545 Japanese Literary Criticism and Theory (4) Representative theories of literature; history of classical and modern literary criticism. *Prerequisite:* EALC 520, EALC 522.

EALC 547 Structure of the Japanese Language (4) Descriptive analysis of phonetic, phonological, and grammatical structure of Japanese. Conducted in English. *Prerequisite:* EALC 470.

EALC 551 Seminar: China (4) Individual research and seminar reports on selected phases of Chinese traditional civilization.

EALC 553 Seminar: Chinese Literature (4) Research in different genres of Chinese literature, traditional and modern.

EALC 555 Chinese Literary Criticism and Theory (4) Classical and modern literary theories and criticism; comparisons with literary theory and criticism in the West.

EALC 556 Seminar on Women and the Family in China (4) An introduction to the current state of research on women and the family in China, and training in feminist analytic approaches for further work in the China field of other areas.

EALC 557 Structure of the Chinese Language (4) Descriptive analysis of phonology, morphology, and syntax of modern Chinese. Conducted in English. *Prerequisite:* EALC 404.

EALC 558 History of the Chinese Language (4) Evolution of the Chinese language from the earliest time to the present: lectures and the reading of texts. Conducted in English. *Prerequisite:* EALC 557.

EALC 560 Comparative Syntax of East Asian Languages (4, max 12, FaSp) Descriptive-comparative study of the Chinese, Japanese and Korean languages with an emphasis on their structures, range of properties, similarities and dissimilarities. *Prerequisite:* EALC 537 or EALC 547 or EALC 557.

EALC 561 Topics and Issues in East Asian Linguistics (4, max 12) Descriptive and theoretical analysis of the grammars of Chinese, Japanese, and Korean; emphasis on comparative studies of these languages and English.

EALC 562 Teaching of the East Asian Languages (4) Materials and methods in teaching East Asian languages; application of methods and techniques of foreign/second language teaching to East Asian language teaching. *Prerequisite:* EALC 537 or EALC 547 or EALC 557.

EALC 565 Bibliography and Research Methods in Chinese Studies (4) An introduction to reference works and research methods in all fields on sinology; works in Chinese, Japanese and Western languages.

EALC 570 Narratives of Desire in Modern Chinese Literature (4, FaSp) The study of prominent fiction women writers from the first half of the 20th century in English and original translations. Open to graduate students only. *Prerequisite:* EALC 553.

EALC 575 Literary and Artistic Movements in Modern China (4, FaSp) Introduction to literary and artistic movements in 20th century China. Open to graduate students only.

EALC 580 Readings in East Asian Linguistics (4, max 12, FaSp) Survey of some representative works in generative grammar since the mid '60s, including those that deal with similar phenomena in the contexts of more recent theoretical frameworks as well as non-generative grammatical works on Chinese, Japanese, and Korean.

EALC 588ab Directed Readings (2-2) Assigned readings according to individual needs.

EALC 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

EALC 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

EALC 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

EALC 599 Special Topics (2-4, max 8, FaSpSm) Special topics in East Asian Languages and Cultures.

EALC 610 Seminar: Buddhism and the Literary Arts in Japan (4) Seminar on the impact of Buddhism on the literary tradition of medieval Japan. Selected topics.

EALC 620 Seminar in East Asian Linguistics (4, max 12, FaSp) Detailed theoretical discussions and empirical studies of the issues and development in East Asian linguistics.

EALC 650 Research Seminar in Chinese Documents (4) An introduction to the different genres of documents for the study of Chinese civilization, and training in their use.

EALC 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Professors: Dominic James Brewer, Ph.D. (*Education*); Juan Carrillo, Ph.D.; Robert Dekle, Ph.D.; Gillian Hadfield, Ph.D., J.D. (*Law*); Cheng Hsiao, Ph.D.; Ayse Imrohoroglu, Ph.D. (*Business*); Selahattin Imrohoroglu, Ph.D. (*Business*); Arie Kapteyn, Ph.D.; Michael J. P. Magill, Ph.D.; Edward J. McCaffery, J.D. (*Law*); Hyungsik Roger Moon, Ph.D.; Jeffrey B. Nugent, Ph.D.*; Vincenzo Quadrini, Ph.D. (*Business*); Geert Ridder, Ph.D.; John Strauss, Ph.D.; Guofu Tan, Ph.D.; Simon J. Wilkie, Ph.D.; Donald E. Yett, Ph.D.; Fernando Zapatero, Ph.D. (*Business*)

Associate Professors: Caroline Betts, Ph.D.; Isabelle Brocas, Ph.D.; Giorgio Corcicelli, Ph.D.; Harrison Hsueh-Cheng Cheng, Ph.D.; Michael E. DePrano, Ph.D.

Assistant Professors: Joel David, Ph.D.; Yu-Wei Hsieh, Ph.D.; Yilmaz Kocer, Ph.D.; Anant Nyshadham, Ph.D.

Professor of the Practice of International Relations and Economics: Lord John Eatwell, Ph.D.

Senior Lecturer: Nake Kamrany, Ph.D.*

Visiting Professor: Matthew Kahn, Ph.D.

Visiting Associate Professor (Research): Daniel Benjamin, Ph.D.

Associate Professor (Teaching): Mark Moore, Ph.D.

Emeritus Professors: Richard H. Day, Ph.D.; Peter Gordon, Ph.D. (*Public Policy*)

**Recipient of university-wide or college teaching award.*

Undergraduate Programs

The economics curriculum is oriented toward a general, liberal education. The study of economics requires adequate preparation in mathematics and statistics. The department offers a B.A. degree in economics, a B.A. degree in political economy, a B.A. degree in social sciences, a B.S. in economics/mathematics and a minor in economics. The B.A. degrees require a total of 32 upper-division units for the major.

Graduate Programs

The department offers a Master of Arts in Economics, a Master of Arts in Economic Developmental Programming, a Master of Science in Mathematical Finance, dual degrees with the USC Gould School of Law and the USC Price School of Public Policy, a Doctor of Philosophy in Economics, and a Doctor of Philosophy in Pharmaceutical Economics and Policy with the USC School of Pharmacy.

Undergraduate Degrees

Advisement

Upon declaring a major or minor in economics, students should consult with the department's undergraduate adviser. Students can check their academic progress on the USCweb under OASIS.

Major Requirements for the Bachelor of Arts in Economics

Students are required to take ECON 203, ECON 205, ECON 303, ECON 305, ECON 317, ECON 318 and four economics elective courses. Of the four elective courses (300 level or above) a minimum of two must be economics courses at the 400 level or higher. The remaining two economics courses must be approved by the department's director of undergraduate studies. A grade of C (2.0) or better is required for each of the core courses ECON 303, ECON 305, ECON 317 and ECON 318. MATH 118x or MATH 125 is required for the major; students are advised to meet the requirement by their sophomore year. Majors are also required to take at least one two-unit course on computing chosen from ITP 101x, ITP 110x or CSCI 101L.

Major Requirements for the Bachelor of Arts in Political Economy

The Bachelor of Arts in Political Economy explores the intersection of economics with politics in domestic and international contexts. It prepares students for engagement with global and regional questions that require analysis of economic and political causes and consequences and provides a useful background for a wide variety of entry positions in the public and private sectors.

LOWER-DIVISION COURSES (16 UNITS)

UNITS

Complete two ECON and one MATH course (12 units):

ECON 203	Principles of Microeconomics	4
ECON 205	Principles of Macroeconomics	4
MATH 118x	Fundamental Principles of Calculus, or	
MATH 125	Calculus I	4

Choose one (4 units):

IR 210	International Relations: Introductory Analysis	4
POSC 120	Comparative Politics	4
POSC 130	Law, Politics, and Public Policy	4

UPPER-DIVISION REQUIREMENTS (32 UNITS)

UNITS

ECON 303	Intermediate Microeconomic Theory	4
----------	-----------------------------------	---

Choose three, at least two from ECON (12 units):

BUAD 350	Macroeconomic Analysis for Business Decisions	4
ECON 305	Intermediate Macroeconomic Theory, or	
ECON 330	The Political Economy of Institutions	4
ECON 332	Contracts, Organizations, and Institutions	4
ECON 340	Economics of Less Developed Countries	4
ECON 360	Public Finance	4
ECON 366	Urban Economics	4
ECON 395	Economic Policy Issues	4
POSC 335	Political Parties, Campaigns, and Elections	4

Choose one (4 units):

FBE 402	Government and Business	4
IR 305	Managing New Global Problems	4
IR 308	Economic Globalization	4
IR 323	Politics of Global Environment	4
IR 324	Multinational Enterprises and World Politics	4
IR 325	North-South Relations in the Global Economy	4
IR 326	U.S. Foreign Economic Policy	4
IR 330	Politics of the World Economy	4
IR 333	China in International Affairs	4
IR 358	The Asia Pacific in World Affairs	4
IR 360	International Relations of the Pacific Rim	4
IR 362	The International Relations of the Contemporary Middle East	4
IR 364	The Political Economy of Latin American Development	4
IR 371	Global Civil Society: Non-State Actors in World Politics	4
POSC 320	Urban Politics	4
POSC 321	Urban Political Problems	4
POSC 325	State Politics	4
POSC 334	Interest Groups and Elite Behavior	4
POSC 347	Environmental Law	4
POSC 363	Cities and Regions in World Politics	4
POSC 380	Political Theories and Social Reform	4
PPD 357	Government and Business	4

Choose two, at least one from ECON (8 units):

ECON 450	International Trade	4
ECON 487	Resource and Environmental Economics	4
IR 430	The Politics of International Trade	4
POSC 425	Legislative Process	4
POSC 437	Mass Media and Politics	4

Choose one (4 units):

IR 430	The Politics of International Trade	4
IR 439	Political Economy of Russia and Eurasia	4
IR 454	The International Political Economy of Development	4
POSC 430	Political Economy of Mexico	4
POSC 451	Politics of Resources and Development	4
POSC 453	Political Change in Asia	4
POSC 456	Women in International Development	4
POSC 463	European Politics	4

Total: 48 units required for the major

Requirements for the Bachelor of Arts, Social Sciences, with an Emphasis in Economics

Students are required to take ECON 203, ECON 205, ECON 303, ECON 305 and three economics elective courses numbered 300 or 400. A grade of C (2.0) or better is required for each of the core courses ECON 303 and ECON 305. MATH 118x or MATH 125 is required and an additional 12 units of upper-division courses from

departments in the social sciences (anthropology, geography, international relations, history, political science, psychology, sociology).

Progressive Degree Program in Economics

The Economics department offers students who have demonstrated exceptional academic success the opportunity to earn both bachelor's and master's degrees in a progressive degree program. This program allows students to earn both the Bachelor of Arts and the Master of Arts degrees in five years. Students may also pursue the Bachelor of Science in Economics/Mathematics and the Master of Science in Mathematical Finance. Further details about progressive degree programs can be found [here](#).

Admission

Admission is available after the completion of 64 units of course work toward the undergraduate degree. Students must apply for admission to the progressive degree program after completing 64 units of applicable course work to their undergraduate program, but prior to the completion of 96 units of course work. The application for admission to the progressive degree program must be accompanied by a course proposal plan and two letters of recommendation from USC Economics faculty.

Awarding of Degrees

The bachelor's and master's degrees may be awarded separately upon completion of all degree requirements, but the master's degree will not be awarded before the bachelor's degree. Students who elect not to complete the master's must complete 128 units to earn the bachelor's degree.

Requirements for the Bachelor of Science in Economics/Mathematics

Students are required to take seven courses in economics, seven courses in mathematics and one course in computer programming languages. Pre-major requirement: MATH 125 or equivalent.

In Economics: ECON 203, ECON 205, ECON 303, ECON 305, ECON 318 and at least two other ECON courses at the 400 level or above

In Mathematics: MATH 126 or MATH 127; MATH 225 or MATH 245; MATH 226 or MATH 227; MATH 407, MATH 408 and at least two other MATH courses at the 400 level or above

In Computing: At least one course chosen from ITP 110x, ITP 150x, ITP 165x; CSCI 101L

Electives must be approved by the program advisers.

Minor in Economics

Students from all disciplines will benefit from an economics minor. The economics minor is offered in three tracks. Each track is designed to help the student explore a coherent area of economic thought and methodology. Students minoring in economics must maintain at least a 2.0 GPA (cumulative) in courses taken for the minor.

The minor includes the core courses ECON 203, ECON 205, ECON 303 or ECON 305, MATH 118x or MATH 125 plus three courses chosen from one of the following tracks:

Law and Political Economy

This track introduces students to the economic theory that underlies the economic choices made by individuals and the ways in which law and policy combine to regulate such behavior. Economic models of individual choice, contracts, and law are analyzed in courses in this track. Choose three courses from: ECON 317, ECON 330, ECON 332, ECON 434.

Finance and Money

This track guides students through the economic thought and theory that underlie the importance of money. Courses cover topics that shed light on the ways in which institutions, individual preferences and financial markets affect the allocation and investment of money. Choose three courses from: ECON 317, ECON 350, ECON 357, ECON 360, ECON 450, ECON 452, ECON 457.

International Economics

This track concentrates on the foundations, complexities and importance of the global economy as well as the role of economics and political economy in societies outside of the United States. Choose three courses from: ECON 317, ECON 330, ECON 340, ECON 342, ECON 343, ECON 346, ECON 450.

Undergraduate Honors Program

The department offers an honors program. First and second semester seniors can enroll in ECON 495 Honors Thesis. Honors will be awarded upon completion of the thesis, an overall GPA of 3.0 or higher and a major GPA of 3.5.

Department Policy Regarding Transfer Credits

Students who have taken courses equivalent to ECON 303, ECON 305, ECON 317 or ECON 414 from an economics department at another four-year college or from a program deemed comparable by the director of undergraduate studies, can earn transfer credits provided they received a B (3.0) or better in the courses.

Dornsife College of Letters, Arts and Sciences

Economics

Graduate Degrees

The graduate program in economics is designed to prepare students for careers in teaching, research, industry and government. The department emphasizes economic theory and econometrics; applied economic analysis, including microeconomics, macroeconomics, international and development economics, urban and regional economics; and political economy.

Admission Requirements

Prerequisites

The typical applicant for admission will normally have completed an undergraduate major in economics. Minimal prerequisites for admission to a master's degree program include courses in intermediate microeconomic and macroeconomic theory, a year of calculus, and a semester of statistics. Applicants for the Ph.D. program are normally expected to have completed more than the minimum, particularly in the areas of mathematics and statistics.

Criteria

The Graduate Record Examinations General Test, three letters of recommendation and the student's statement of purpose are required. The letters and statement should be sent directly to the Director of Graduate Admissions, Department of Economics, KAP 300, University of Southern California, Los Angeles, CA 90089-0253. International applicants are required to take the TOEFL or IELTS examination. In addition, applicants for financial aid are advised to take the GRE Economics Subject Test and international students must have a TSE score of 200. Admission is based on the appropriateness and quality of completed course work, GRE scores and the letters of recommendation.

Procedure

Application deadlines for master's degrees are normally April 15 for the fall semester and November 1 for the spring. Completed doctoral fellowship and assistantship applications are due by December 1. Except for unusual cases, students are permitted to begin Ph.D. programs only during the fall semester.

Placement Examinations

Prior to registration, all entering graduate students are required to take the Economics Department placement examinations in general economic theory and the basic principles of algebra, calculus and statistics. Depending on the outcome of these examinations, deficiency course work yielding no credit toward graduate degrees may

be required. Students whose native language is other than English will be required to take an English placement examination. Course work in English may be required.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Foreign Language/Research Tool Requirements

There is no foreign language requirement. However, competence in the use of one computer programming language is required for all graduate degrees offered through the Department of Economics, except the Ph.D. in Political Economy and Public Policy. Such competence can be demonstrated either by course work or examination. Students in master's programs must meet this requirement before starting the thesis or taking the comprehensive examination; students in the Ph.D. program must complete it before taking the qualifying examination.

Master of Arts in Economics

Thesis Option Requirements

At least 24 units (usually six courses; at least four must be in economics at the graduate level) and completion of an acceptable thesis accompanied by registration in ECON 594ab is required. Requirements include the following courses in economics:

REQUIRED COURSES		UNITS
ECON 500	Microeconomic Analysis and Policy	4
ECON 501	Macroeconomic Analysis and Policy	4
ECON 513	Practice of Econometrics	4
ECON 594ab	Master's Thesis	2-2

Comprehensive Examination Option Requirements

At least 32 units (usually eight courses; at least six must be in economics at the graduate level), and satisfactory performance on a comprehensive examination in economic theory is required.

REQUIRED COURSES		UNITS
ECON 500	Microeconomic Analysis and Policy	4
ECON 501	Macroeconomic Analysis and Policy	4
ECON 513	Practice of Econometrics	4

Not more than 4 units may be ECON 590; 590 units cannot be counted as part of the required minimum of graduate level courses specified above.

Master of Arts in Economic Developmental Programming

This degree program is designed to provide advanced training in the basic tools of development programming and their application to practical problems of developing countries. The program is structured to enable well-prepared students entering in May to finish the following summer. Requirements include the following courses in economics:

REQUIRED COURSES		UNITS
ECON 401	Mathematical Methods in Economics	4
ECON 500	Microeconomic Analysis and Policy, or	
ECON 601	Microeconomic Theory I	4
ECON 501	Macroeconomic Analysis and Policy, or	
ECON 602	Macroeconomic Theory I	4

ECON 502	Mathematical Methods in Dynamic Economics, or	
ECON 607	Topics in Dynamic Optimization, or	
ECON 615	Applied Econometrics	4
ECON 609	Econometric Methods	4
ECON 513	Practice of Econometrics	4
ECON 523	Economic History and Development, or	
ECON 537	Contracts, Organizations, and Institutions, or	
ECON 541	Economic Development, or	
ECON 634	Political Economy of Institutions, or	
ECON 644	Economic Development Programming and Policy Planning	4
ECON 590	Directed Research, or	
ECON 692	Seminar in Economic Development	2–8
ECON 650	International Trade Theory, or	
ECON 651	International Monetary Theory	4

In addition, a total of three courses in one of several designated options in economics, international relations, law, urban planning and development, demography, or business administration is required. In certain cases units can be granted for internship work. The total unit requirements are 32–48, including a comprehensive examination or a thesis.

For a detailed description of the program and its requirements see *Master of Arts in Economic Developmental Programming*, available from the Department of Economics faculty adviser.

Study Abroad Option

Students enrolled in the Master of Arts in Economics and the Master of Arts in Economics Development Programming have the opportunity to participate in an academic exchange program with the Paris School of Economics (PSE). This partnership will allow USC graduate students to engage economic issues on a global scale, providing both a dynamic and insightful experience. Students will take classes with European economists and students to broaden the understanding and depth of economics theory. PSE courses will not fulfill core requirements in the program, only elective units.

Students may participate after their first semester. All applicants must have a USC grade point average of at least 3.0 at the time of application. Students who wish to participate in their second semester must meet with the faculty director of graduate studies and be in academically good standing by the middle of their first semester.

Master of Science in Mathematical Finance

The objective of this master of science program is to produce graduates with a rigorous foundation in the economic theory and mathematical modeling of financial markets. The program creates an integrated curriculum spanning four disciplines: economics, mathematics, econometrics/statistics and computational/numerical analysis. The program is designed for recent graduates in the fields of applied mathematics, physics and engineering — or for graduates in economics, business and finance with strong mathematical backgrounds — who wish to pursue high-tech finance careers in financial institutions, industry or government.

Admission Requirements

Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All applicants must take the GRE General Test. Complete transcripts of undergraduate and any graduate level courses are required, as well as a statement of purpose and three recommendation letters. A substantial undergraduate background in mathematics is required, which should include one semester of real analysis or advanced calculus, one semester of linear algebra and one semester of advanced probability/statistics. Candidates with weaker backgrounds may be required to take mathematics classes prior to admission to the program. An undergraduate knowledge of microeconomics and of macroeconomics, and

partial differential equations is helpful, although it is not required for admission. Some experience in Matlab and C/C++ programming is also useful.

Foreign Language Requirement

There is no foreign language requirement.

Course Requirements

Thirty units of course work are required, six core courses and four to five elective courses. Students are required to satisfy a summative experience for degree completion. This will be in the form of registration in 1 unit of MATH 590 Directed Research with a summative report at the end of the term. Topics of research will be determined by the program director. The program consists of:

REQUIRED CORE COURSES (6 COURSES, 18 UNITS)		UNITS
Mathematics and Mathematical Finance:		
MATH 512	Financial Informatics and Simulation (Computer Labs and Practitioner Seminar)	3
MATH 530ab	Stochastic Calculus and Mathematical Finance	3-3
MATH 590	Directed Research	1
Financial Economics and Econometrics:		
ECON 613	Economic and Financial Time Series	4
ECON 659	Economics of Financial Markets I	4
ELECTIVE COURSES (4 COURSES, 12 UNITS)		UNITS
Computational and Empirical Finance (must take at least 2 courses)*:		
FBE 535	Applied Finance in Fixed Income Securities	3
FBE 554	Trading and Exchanges	3
FBE 555	Investment Analysis and Portfolio Management	3
FBE 559	Management of Financial Risk	3
FBE 589	Mortgages and Mortgage-Backed Securities and Markets	3
(FBE 555 highly recommended)		
Statistics*:		
MATH 541ab	Introduction to Mathematical Statistics	3-3
MATH 543L	Nonparametric Statistics	3
MATH 547	Methods of Statistical Inference	3
Numerical/Optimization/Other Methods*:		
MATH 501	Numerical Analysis and Computation	3
MATH 502ab	Numerical Analysis	3-3
MATH 504ab	Numerical Solution of Ordinary and Partial Differential Equations	3-3
MATH 505ab	Applied Probability	3-3
MATH 508	Filtering Theory	3
MATH 509	Stochastic Differential Equations	3
MATH 585	Mathematical Theory of Optimal Control	3
Computational and Financial Economics:		
ECON 614	Economic and Financial Time Series II	4
ECON 652	Economics of Financial Markets II	4
PM 511ab	Data Analysis	4-4

Prerequisites for any of the above courses can be waived based on students' knowledge of the subject area. Approval from the program director is required.

**The elective courses in statistics/numerical/optimization/other methods and computational and empirical finance have to be approved for each student by the program directors. Other electives, not on this list, may sometimes be approved after consultation with program directors.*

Juris Doctor/Master of Arts in Economics

Students are required to complete 92 units of law and economics course work, four units of which must constitute a thesis acceptable to the faculties of the USC Gould School of Law and the Department of Economics. Before enrolling in economics courses, students must have completed an undergraduate course in probability and statistical inference (e.g., BUAD 310). Students with undergraduate degrees in such disciplines as business, economics, mathematics and psychology will usually have taken such a course as part of their undergraduate program.

First Year: Required law school courses.

SECOND AND THIRD YEARS:		UNITS
ECON 500	Microeconomic Analysis and Policy	4
ECON 602	Econometric Methods, or	
ECON 513	Practice of Econometrics	4

Two Additional Graduate-level Courses in Economics (Eight Units): ECON 680 Industrial Organization and ECON 681 Economics of Regulated Industries are recommended, but the student is free to choose any graduate level courses other than ECON 590 or ECON 790 in consultation with the program adviser. ECON 401 Mathematical Models in Economics may be substituted for one of these courses, or ECON 419 Introduction to Econometrics may be substituted for the other. (These three courses are applicable toward graduate credit.)

Four Units of Thesis: The thesis must be acceptable to both the faculty of the law school and the faculty of the Department of Economics.

Thirty-nine Units of Law Courses: including one course in a subject matter related to economics (including but not necessarily limited to Taxation, International Business Transactions, Antitrust Law I, Regulated Industries, Labor Law, Administrative Law and Regulatory Policy, Corporate Taxation or Land Use. In addition to the LSAT, students interested in this dual degree program are required to take the aptitude and advanced economic portions of the Graduate Record Examinations (GRE).

Dual Master of Arts in Economics and Master of Planning

The USC Price School of Public Policy and the Department of Economics jointly offer a two-year program leading to the MPI and M.A. degrees. Applicants must apply to the Price School of Public Policy and the Graduate School and meet the admission requirements of both.

Requirements

Requirements for completion of the dual degree program are 58 units, including 24 units in economics and 34 units in planning. For a complete listing, see Public Policy.

Doctor of Philosophy in Economics

Application deadline: December 1

The Ph.D. in Economics requires 60 units of graduate level courses numbered 500 or higher (excluding ECON 500, ECON 501, ECON 590, ECON 690, ECON 691, ECON 692, ECON 693, ECON 694, ECON 790 and ECON 794).

REQUIRED COURSES	UNITS

The following courses must be taken within the first 36 units of graduate level courses:

ECON 601	Microeconomic Theory I	4
ECON 602	Macroeconomic Theory I	4
ECON 603	Microeconomic Theory II	4
ECON 605	Macroeconomic Theory II	4
ECON 609	Econometric Methods	4
ECON 611	Probability and Statistics for Economists	4

ADDITIONAL REQUIRED UNITS

UNITS

A minimum of 6 units selected from the following:

ECON 690	Seminar in Economic Theory	2–8
ECON 691	Seminar in Econometrics	2–8
ECON 692	Seminar in Economic Development	2–8
ECON 693	Seminar in Applied Economics and Public Policy	2–8
ECON 694	Seminar in Dynamic Economics	2–8

A minimum of 4 units of:

ECON 794abcdz	Doctoral Dissertation	2–12
---------------	-----------------------	------

Students must take a core theory examination immediately after the completion of ECON 601, ECON 602, ECON 603 and ECON 605 in order to continue in the Ph.D. program. There is also a breadth requirement, which may be satisfied by taking either ECON 523 Economic History and Development or ECON 527 Classical Economic Theory and Its Critics or ECON 538 Values and Social Analysis.

After passing the core theory examination, the student should consult the director of graduate studies on the appointment of a Ph.D. qualifying exam committee. The student should complete two advanced fields of study with the approval of the qualifying exam committee and the director of graduate studies. The requirements for completing each advanced field of study consist of (1) at least two courses numbered 600 or higher in that field with a minimum grade of A- in each, (2) satisfactory completion of one of the seminars related to the field and (3) presentation of a research paper in a class or seminar. In addition, the student should complete a minor field, which consists of a course numbered 600 or higher with a minimum grade of B. The signing of the student's Permission to Take the Qualifying Examination form will signify the satisfactory completion of the field requirements.

The remainder of the courses to total 60 units must be preapproved by the qualifying exam committee. However, not more than four units of ECON 590 and/or 790 can be taken in each semester. Courses taken outside the department or USC cannot count toward the completion of a field and are not allowed before at least one advanced field is completed. Waivers to the course requirements based on equivalent work at another university may be made upon petition to the director of graduate studies up to a maximum of 12 units. Waivers for any other reason require the approval of the department graduate committee.

Grade Point Average Requirements

In addition to the Graduate School requirements, a minimum GPA of 3.0 on all course work taken toward the 60 units requirement must be achieved. ECON 615 or a higher level course in econometrics must be completed with a grade of B or better.

Screening Procedure

Students desiring the Ph.D. must undergo a screening procedure before completing more than 24 units of graduate level courses. The process involves a review of the student's course grades, performance on the core theory examination, and demonstrated research ability. Students who pass the screening procedure are permitted to continue studies toward the Ph.D. degree.

Core Theory Examination

Before beginning the third semester of graduate study, the student must pass a written examination in general economic theory including applications. A maximum of two attempts is allowed. Not taking the examination at a given due time is considered as failing the examination once. The core theory examination is offered twice every year during the summer session. Any exceptions are subject to approval of the director of graduate studies.

Empirical Research Paper

During the summer after the fourth semester of study, the student must submit an empirical paper using quantitative methods to the examination committee. The paper may use field, experimental or simulated data. In this paper, the student should demonstrate competence in using a computer programming language and software.

Research Paper

During the summer after the sixth semester of study, the student must submit a research paper to a committee of faculty. The paper must be of publishable quality.

Seminar Requirements

Every student is required to take and satisfactorily complete three, two-unit research seminars chosen from ECON 690, ECON 691, ECON 692, ECON 693 and ECON 694. The same seminar may be taken more than once. Before completing the dissertation, the student must present at least one original research paper in a seminar of the student's choice.

Dissertation Proposal Preparation

The student is required to write a research proposal on a topic suitable for a dissertation. Normally, the chair of the student's qualifying exam committee directs this work. The written proposal is presented and critiqued during the qualifying examination.

Qualifying Examination

Upon successful completion of course and grade requirements, the paper requirement, and the core theory examination, the student takes an examination, which focuses on the presentation and defense of the written dissertation proposal. After passing this examination, the student is admitted to candidacy for the Ph.D. degree. This examination must be taken not later than the end of the seventh semester of study.

Doctoral Dissertation

After admission to candidacy, the student forms a dissertation committee composed of three faculty members, one of whom must be from an outside department. The chair of this committee is the dissertation supervisor. The student must register in sequence for ECON 794abcdz Doctoral Dissertation each semester, excluding summer sessions, until the dissertation and all other degree requirements are completed.

The dissertation is defended in an oral examination administered by the dissertation committee when the committee agrees that the student has completed the research and a satisfactory draft of the dissertation has been written. If the committee agrees to pass the student, all suggested extensions, modifications, and corrections are incorporated into a final draft, which must be approved by all members of the committee.

It is the student's responsibility to see that the proper paperwork is submitted to the Graduate School upon completion of each requirement for the Ph.D. degree.

Doctor of Philosophy in Pharmaceutical Economics and Policy

Application deadline: December 1

The Department of Economics and the Department of Pharmaceutical Economics and Policy (USC School of Pharmacy) jointly offer a program of study leading to the Ph.D. degree and to the M.A. degree in the process of work toward the Ph.D. degree.

Required courses include both core requirements and area requirements. Core requirements include courses in economic theory, econometrics, and research methods. Area requirements include courses in health economics,

pharmaceutical economics, welfare theory and applied econometrics.

For a detailed description of this program, see the School of Pharmacy section of this catalogue.

Dornsife College of Letters, Arts and Sciences

Economics

Courses of Instruction

ECONOMICS (ECON)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ECON 203g Principles of Microeconomics (4, FaSp) Behavior of firms and consumers, functions of the price system, competition and monopoly, labor markets, poverty, government regulation, international trade, and the environment.

ECON 205g Principles of Macroeconomics (4, FaSp) Unemployment, inflation and output determination and links. Effects of government taxation and spending on growth, investment, saving, consumption, and trade.

ECON 238xg Political Economy and Social Issues (4, Fa) Contending politico-economic perspectives in modern Western thought: conservatism, liberalism, radicalism, and their relevance for contemporary policy issues including government and markets, class, race, gender, poverty and inequality. Not available for major credit to economics majors.

ECON 303 Intermediate Microeconomic Theory (4, FaSp) Decision-making by business firms, consumer preferences and behavior, uncertainty, competition, monopoly, labor and resource markets, efficient resource allocation, externalities, and government policy. *Prerequisite:* ECON 203; MATH 118x or MATH 125; *corequisite:* ECON 205.

ECON 305 Intermediate Macroeconomic Theory (4, FaSp) The determinants of aggregate income, employment, and inflation; economic fluctuations; fiscal and monetary policy; financial markets; the national debt. *Prerequisite:* ECON 203 and ECON 205; MATH 118x or MATH 125.

ECON 317 Introduction to Statistics for Economists (4, FaSp) Introduction to statistical methods appropriate for analyzing economic data: probability theory, random variables and probability distributions, sampling, estimation, statistical inference. *Prerequisite:* MATH 118x or MATH 125.

ECON 318 Introduction to Econometrics (4, FaSp) Application of statistical methods to economic data: estimating economic relationships using regression analysis, testing hypotheses involving economic behavior, forecasting economic variables. *Prerequisite:* ECON 317. (Duplicates credit in former ECON 414.)

ECON 322 Economic History and Modernization of the Middle East (4, Irregular) Economic history of the Middle East from the rise of Islam to the modern era. Roles of law, religion. Processes of institutional transformation, stagnation, modernization. *Prerequisite:* ECON 203.

ECON 330 The Political Economy of Institutions (4) Social functions served by the rules, laws, regulations, and customs that constrain human activity. Processes whereby such institutions adapt, or fail to adapt, to changing circumstances. *Prerequisite:* ECON 203.

ECON 332 Contracts, Organizations and Institutions (4) Contract law and economic organization, determinants of firm boundaries, transaction cost economics, agency theory, incomplete contracting, business

strategy, bureaucracy, institutional environment, politics and property rights. *Prerequisite:* ECON 203.

ECON 338 Political Economy and Social Issues (4, Sp) Contending politico-economic perspectives in modern Western thought and culture; absolutist, liberal, democratic, Marxist, anarchist, and other traditions, topics and issues. (Duplicates credit in former ECON 121x.) *Prerequisite:* ECON 205.

ECON 340 Economics of Less Developed Countries (4) Causes of economic underdevelopment: historical, institutional, structural, ideological, technological, cultural. Patterns and theories of development. Role of government, international trade, and education in economic growth. *Prerequisite:* ECON 203 or ECON 205.

ECON 342 Economic Development of the Middle East (4, FaSp) Contemporary economic problems of the Middle East: comparative and historical perspectives on issues of institutions, investment, oil, trade, migration, finance, inequality, labor and capital markets. *Prerequisite:* ECON 203; *recommended preparation:* ECON 205 and ECON 303.

ECON 343 Economic Development of East Asia (4) Contemporary economic problems of East Asian countries: management, labor, technology, trade, investment. Determinants of their high growth rates in the late 20th century. *Prerequisite:* ECON 203 or ECON 205.

ECON 344 Economic Development of Sub-Saharan Africa (4, FaSpSm) Contemporary economic problems of sub-Saharan African economies: policies and endowments. Focus on issues of poverty, agriculture, health, macroeconomy and political economy. *Prerequisite:* ECON 203 or ECON 205.

ECON 346 Economics of Transition and Development: China (4, FaSpSm) A focus on the Chinese economy, its reform and transition to a market economy, its relation with East Asian countries and integration into the world economy. *Prerequisite:* ECON 203 or ECON 205.

ECON 348g Current Problems of the American Economy (4, Fa) A comprehensive investigation of problems stemming from changing composition of the work force, urban decline, new technologies, inequalities, ethnic relations, government deficits. Prospects for continued growth. *Prerequisite:* ECON 203 or ECON 205.

ECON 350 The World Economy (4, SpSm) International cooperation and conflict in the world economy. Global economic problems of growth and development, trade and finance, migration, economic stability, and the environment. *Prerequisite:* ECON 203 or ECON 205.

ECON 351x Microeconomics for Business (4, FaSpSm) Development and business applications of: theory of the firm; theory of the consumer; intertemporal decisions; decisions under risk; market failures; industrial and enterprise structure. Not for major credit for: economics, economics/mathematics, social sciences (economics) majors. (Duplicates credit in former ECON 251.) *Prerequisite:* MATH 118 or MATH 125 or MATH 126 or MATH 226; *Corequisite:* ECON 352x.

ECON 352gx Macroeconomics for Business (4, FaSpSm) Theoretical development and significance to business and markets of economic growth; inflation; unemployment; monetary and fiscal policy; business cycles; savings and investment; exchange rates. Not for major credit for: economics, economics/mathematics, social sciences (economics) majors. (Duplicates credit in former ECON 252x.) *Corequisite:* ECON 351x; *recommended preparation:* introductory economics course, high school math, and algebra.

ECON 357 Money, Credit, and Banking (4) The money, bond, stock, and other financial markets; portfolio choice; determinants of asset prices and interest rates; inflation; interactions between financial markets and government policies. *Prerequisite:* ECON 203 and ECON 205.

ECON 360 Public Finance (4) Role of the government; income and corporate taxation; direct versus indirect taxation; optimal tax structure; public goods; public sector pricing; public debt and macroeconomic stability. *Prerequisite:* ECON 203 and ECON 205.

ECON 366 Urban Economics (4) Urban trends and problems, including changing urban form and function, urban public finance, housing, renewal, poverty, race, transportation, and the environment. *Prerequisite:* ECON

203 and ECON 205.

ECON 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

ECON 395 Economic Policy Issues (4) Selected policy dilemmas, including welfare reform, urban renewal, government budget deficits, regulation and deregulation, environmental problems, immigration, and global development. Lectures by leading authorities and weekly discussion sessions. *Prerequisite:* ECON 203 and ECON 205.

ECON 401 Mathematical Methods in Economics (4, Fa) Introduction to quantitative methods for analyzing economic equilibria; comparative statics and dynamics. Utility theory, consumer behavior, and profit maximization. Model formulation in micro and macroeconomics. *Prerequisite:* ECON 303.

ECON 404 Games and Economics (4) Analysis of strategic economic interactions. Topics include bargaining, insurance, patents, voting, environmental depletion, strategic trade, learning, reputation, strikes, corporate takeovers, and the provision of public goods. *Prerequisite:* ECON 303.

ECON 405 Neuroeconomics (4) Introduction to the methodology used in experimental neuroeconomics and discussion of neural correlates of decision-making. *Prerequisite:* ECON 303.

ECON 415 Behavioral Economics (4) Examination of the traditional and behavioral theories of decision-making and the state of the art in the field. *Prerequisite:* ECON 303.

ECON 419 Advanced Econometrics (4, FaSpSm) Analysis of binary dependent variable models, panel data analysis, program evaluations, IV analysis, basics of time series and forecasting. *Prerequisite:* ECON 303, ECON 305, ECON 317, ECON 318; MATH 125 or MATH 126 or MATH 225 or MATH 226.

ECON 420 Experimental Economics (4) Examination of economic theories and patterns of behavior useful in building new theories. *Prerequisite:* ECON 303; *recommended preparation:* ECON 317.

ECON 432 Economics of Happiness (4) What is happiness? How does it vary by socio-economic status and over the life cycle? This course will develop insight into the nature and determinants of subjective well-being. *Prerequisite:* ECON 303; *recommended preparation:* ECON 305.

ECON 433 Empirical Economics Research (4, FaSp) Analysis of economic variables; investigation of empirical economics to estimate or test for relationships using various forms of data. *Prerequisite:* ECON 303, ECON 305, ECON 317 and ECON 318.

ECON 434 Economic Analysis of Law (4) Common law and property; rationing of justice, resource allocation between prevention and enforcement; division of decision making between public and private sectors. *Prerequisite:* ECON 303.

ECON 450 International Trade (4) Determinants and economic consequences of international trade patterns; effects of trade restrictions and trading blocs; trade negotiations and arrangements. *Prerequisite:* ECON 303.

ECON 451 The Politics of International Trade (4) (Enroll in IR 430)

ECON 452 International Finance (4) Consequences of trade deficits; theories of capital and currency markets, exchange rate regimes, and international monetary coordination. *Prerequisite:* ECON 305.

ECON 457 Financial Markets (4) General equilibrium analysis of economies with financial markets; decision making under uncertainty; methods of risk reduction; portfolio theory and valuation of securities; efficiency of security markets. *Prerequisite:* ECON 303.

ECON 471 Economics of Labor Markets and Human Capital (4) A human capital interpretation of labor demand and supply; wage determination, differentials, and discrimination; job turnover and occupational mobility; unions and collective bargaining. *Prerequisite:* ECON 303.

ECON 472 Economics of Medical Care (4) Health as an investment in human capital; analysis of the demand for and supply of health services and manpower; health insurance; cost-effectiveness analysis; market structures and the pricing of medical services. *Prerequisite:* ECON 303.

ECON 474 Economic Consulting and Applied Managerial Economics (4, FaSp) Economic consulting and managerial economic methods applied in real world problems. Economic methods to analyze issues of intellectual property, environmental damage, trademark infringement, brand value, and consumer demand. *Prerequisite:* ECON 303.

ECON 480 Economics of Industrial Organization (4) Pricing and resource allocation in imperfectly competitive markets; monopoly regulation, collusion, cartels, mergers and antitrust; patents and development incentives; industry case studies. *Prerequisite:* ECON 303.

ECON 487 Resource and Environmental Economics (4) Management and extraction of renewable and non-renewable natural resources; environmental externalities and regulation of air, water, and land pollution; market incentives versus direct regulation. *Prerequisite:* ECON 303.

ECON 490x Directed Research (1–8, max 12, FaSpSm) Supervised individual research. Not available for graduate credit.

ECON 495 Honors Thesis (4) Individual research supervised by a faculty adviser. Successful completion required for departmental honors degree.

ECON 499 Special Topics (2–4, max 8, FaSpSm) Selected topics in economic theory, history, or policy.

ECON 500 Microeconomic Analysis and Policy (4, Fa) Theories of the household and the firm; product and factor markets; perfect and imperfect competition; welfare criteria. *Prerequisite:* ECON 303 and ECON 305; *corequisite:* ECON 401.

ECON 501 Macroeconomic Analysis and Policy (4, Sp) Theories of aggregate economic activity; design and use of macroeconomic models; stabilization and control of inflation, unemployment, and growth. *Prerequisite:* ECON 303, ECON 305, and ECON 401.

ECON 502 Mathematical Methods in Dynamic Economics (4, SpSm) Movement of economic systems over time; differential and difference equations; introduction to the optimal control of economic processes; dynamic programming and optimal strategies; selected applications. *Prerequisite:* ECON 401.

ECON 513 Practice of Econometrics (4, FaSpSm) Application of econometric tools using standard econometric software packages for microcomputers; empirical applications to selected economic problems of estimation and inference. *Prerequisite:* ECON 318.

ECON 523 Economic History and Development (4) Historical trends in developed and developing societies in various aspects of modernization such as human resources, capital, technology, resource allocation, income distribution, international relations. *Prerequisite:* ECON 303.

ECON 527 Classical Economic Theory and Its Critics (4) Classical economic theory; its precursors, main contributors, extensions, and critics; focus upon the writings and ideas of Smith, Say, Malthus, Ricardo, Mill, and Marx. *Prerequisite:* ECON 303 and ECON 305.

ECON 537 Contracts, Organizations, and Institutions (4) Information, property rights, bargaining, transaction costs, incentives, free-riding and contracting in organizations; the nature of cooperation; bureaucracies. *Prerequisite:* ECON 303.

ECON 538 Values and Social Analysis (4) Factors that make values an essential feature of human society; how values develop, change, and are abandoned; role of values in economic development. *Prerequisite:* ECON 303.

ECON 541 Economic Development (4) Development, underdevelopment and the problems thereof; agriculture, industry, trade, population, human capital, capital formation; structural, technological,

environmental and institutional changes; political economy of the state. *Prerequisite:* ECON 303 and ECON 305.

ECON 580 Antitrust Economics and Competition Policy (4, FaSp) Efficiency, market failure, government regulation, some basics for antitrust economics, competition policy analysis and collusion and agreements among competitors. *Prerequisite:* ECON 500 or ECON 513.

ECON 590 Directed Research (1–12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

ECON 593x Practicum in Teaching the Liberal Arts (2, Fa) Practical principles for the long-term development of effective teaching within college disciplines. Intended for teaching assistants in Dornsife College. Open only to doctoral students in Economics. Graded CR/NC.

ECON 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

ECON 599 Special Topics (2–4, max 8, FaSpSm) Selected topics in economics as developed by the instructor.

ECON 600 Economics of Choice (4) Reviews the normative and positive theories of choice drawing upon recent theoretical and empirical work in cognitive and evolutionary psychology, artificial intelligence, linguistics and economics. *Prerequisite:* ECON 500.

ECON 601 Microeconomic Theory I (4) Optimization of the consumer and the firm; duality and imputed value; perfect and imperfect competition in product and factor markets. *Prerequisite:* ECON 401; *recommended preparation:* ECON 500. (Duplicates credit in former ECON 503.)

ECON 602 Macroeconomic Theory I (4) Aggregate demand, supply and government policy; theories of economic growth and business cycles; static and dynamic implications of government policies. *Prerequisite:* ECON 401. (Duplicates credit in former ECON 505.)

ECON 603 Microeconomic Theory II (4, Sp) General equilibrium theory; existence, uniqueness, and stability; welfare economics; social choice; dynamic models and uncertainty; special topics. *Prerequisite:* ECON 601.

ECON 604 Game Theory (4) Strategies and equilibrium concepts; dynamic and repeated games; incomplete information and learning in games. *Prerequisite:* ECON 601.

ECON 605 Macroeconomic Theory II (4, Sp) Macroeconomic theory based on the concepts of optimal growth and intertemporal equilibrium; overlapping generations models; recent developments in macroeconomic theory. *Prerequisite:* ECON 601 and ECON 602.

ECON 606 Behavioral Theories of Decision-Making (4) Examination of behavioral theories used to describe and predict choices made in both an individual decision-making setting and strategic environments. *Prerequisite:* ECON 601.

ECON 607 Topics in Dynamic Optimization (4) Theory and numerical methods for dynamic optimization and control; selected applications in economic analysis and econometrics. *Prerequisite:* ECON 502 and knowledge of FORTRAN.

ECON 608 Advanced Neuroeconomics (4) Advanced methodology of neuroeconomics including neural activity, memory, value and reward systems, emotions, and risk. *Prerequisite:* ECON 503.

ECON 609 Econometric Methods (4, FaSp) Review of statistical methods of estimation and inference, linear regression with multicollinearity and serial correlation; multivariate regression and simultaneous equations. *Prerequisite:* ECON 611. (Duplicates credit in former ECON 511.)

ECON 610 Quantitative Analysis in Macroeconomics (4, Sp) Dynamic economics, applied general equilibrium models, computational and calibration tools, discrete-state dynamic programming, log-linearization

of Euler equations. *Prerequisite:* ECON 602, ECON 605.

ECON 611 Probability and Statistics for Economists (4, FaSp) Introduction to probability theory and statistical inference to prepare students for graduate courses in econometrics and economic theory; probability, random variables, distributions, estimation, testing, asymptotics. *Prerequisite:* MATH 226. (Duplicates credit in former ECON 514.)

ECON 612 Econometric Theory (4) Inference and prediction, generalized and restricted least squares, specification analysis, multivariate and seemingly unrelated regressions, simultaneous equations techniques, dynamic models, instrumental variable estimation. *Prerequisite:* ECON 609.

ECON 613 Economic and Financial Time Series I (4, Fa) Simultaneous equation models, dynamic structural econometric models, vector autoregressions, causality, forecasting, univariate and multivariate nonstationary time series, tests for unit roots, cointegration, autoregressive conditional heteroscedasticity models, time series models with changes in regime. *Prerequisite:* ECON 609.

ECON 614 Economic and Financial Time Series II (4, Sp) Stock returns, predictability and volatility, random walk and variance-bounds tests, estimation of capital asset, multifactor, and derivative pricing models, term structure of interest rates. *Prerequisite:* ECON 604.

ECON 615 Applied Econometrics (4, Fa) Use of quantitative models to describe and forecast economic activity; estimation and application of such models to selected policy problems. *Prerequisite:* ECON 609.

ECON 616 Experimental Economics (4) Laboratory methods for testing economic theory; experimental comparison of alternative market and non-market institutions; identification of behavioral responses to alternative regulations. *Prerequisite:* ECON 500 or ECON 601.

ECON 620abL Experimental Methods (2-2) *a:* Experimental methods of and design of computer-based experiments. Use of standard software for data collection in individual decision-making experiments and games. *b:* Experimental methods relying on non-choice data. Design methods of experiments that record information in decision-making and physiological data of emotions. *Prerequisite:* ECON 601; *recommended preparation:* ECON 616. Graded CR/NC.

ECON 633 Law and Economics (4, Sp) (Enroll in LAW 633)

ECON 634 Political Economy of Institutions (4) The functions of laws, rules, customs, conventions, and other restrictions on economic and social activity. Theories of institutional evolution. (Duplicates credit in former ECON 534.) *Prerequisite:* ECON 500 or ECON 601.

ECON 636 Health Economics I (4, Fa) Techniques of microeconomic analysis to inform health policy. Topics include: demand for health, medical care, and insurance, risk selection, medical innovation. *Recommended preparation:* ECON 601, ECON 611. (Duplicates credit in former PMEP 534.)

ECON 639 Contemporary Economic Policy: Theory and Practice (4) History and analysis of the fundamental continuing policy issues: recession, inflation, public debt, regulation, international competition, energy resources and environmental issues, welfare and income distribution. *Prerequisite:* ECON 500 and ECON 501.

ECON 641 Empirical Analysis of Economic Development (4, FaSp) Theory and empirics of the sources of and barriers to economic development and the micro underpinnings of macroeconomic dynamics of growth, inequality, and productivity. *Prerequisite:* ECON 601, ECON 609.

ECON 642 Poverty, Human Resources and Economic Development (4, FaSpSm) Household production models and intra-household models of behavior and their empirical implementation, focus on poverty, human resource investments and their interaction with public policies. *Prerequisite:* ECON 501, ECON 609.

ECON 644 Economic Development Programming and Policy Planning (4) Model construction and application to policy and planning: open economy macroeconomics, trade and investment, institutions,

technology, income inequality, environment, policy reforms, political economy. *Prerequisite:* ECON 501 or ECON 602; ECON 500 or ECON 601.

ECON 645 Economic Growth (4, Fa) Surveys theoretical and empirical developments in growth macroeconomics. To equip students to undertake frontier research and policy work to reduce global income inequality. Open only to graduate students. *Prerequisite:* ECON 602.

ECON 650 International Trade Theory (4) General equilibrium theory applied to theory and practice of commercial policy, economic growth, and trade. *Prerequisite:* ECON 500 or ECON 601.

ECON 651 International Monetary Theory (4) Balance of payments concepts and measures; price theory and the foreign exchange market; international monetary systems; adjustment mechanisms; speculation and official intervention. *Prerequisite (choose two):* ECON 500 or ECON 501 or ECON 601.

ECON 652 Economics of Financial Markets II (4, Sp) Financial market equilibrium and partial equilibrium asset pricing in discrete and continuous time; properties of equilibria with and without complete markets; theory of option prices; Black-Scholes pricing formula; term structure of interest rates; hedging strategies and managing market risk using options, futures and swaps; hedging exchange-rates risks. *Prerequisite:* ECON 601.

ECON 653 Empirical International Economics (4) Empirical treatment of advanced topics in international finance including the determination of real and nominal exchange rates; stabilization policies in developing currencies and currency crisis models. Econometric methods in analyzing foreign exchange data and in forecasting. *Prerequisite:* ECON 501, ECON 513; *recommended preparation:* ECON 625, ECON 651.

ECON 659 Economics of Financial Markets I (4, Fa) Equilibrium model of finance economy; absence of arbitrage; complete and incomplete markets; asset pricing theory; representative agent pricing. Capital Asset Pricing Model, martingale property of security prices. *Prerequisite:* ECON 601.

ECON 671 Economics of Labor and Human Capital (4) A human capital interpretation of labor demand and supply; wage determination, differentials, and discrimination; job turnover and occupational mobility; unions and collective bargaining. *Prerequisite:* ECON 500 or ECON 601.

ECON 673 Program Evaluation (4) This course first proposes various means of evaluating an economic program. It then applies the tools to specific problems. *Prerequisite:* ECON 500 or ECON 601; ECON 609.

ECON 680 Industrial Organization (4) Decision making, economic behavior and organization in firms; types of competition and market structure; property rights, nonprofit decision making. *Prerequisite:* ECON 500 or ECON 601.

ECON 681 Economics of Regulated Industries (4) Theories and methods of government regulation; effects of regulation on various industries; behavior of regulatory agencies. *Prerequisite:* ECON 500 or ECON 601.

ECON 688 Empirical Industrial Organization (4) Econometric analysis of industrial organization issues including industry regulation and deregulation, collusions and pricing in differentiated oligopolistic markets, entry and exit, auction mechanisms, contractual relationships. *Prerequisite:* ECON 601, ECON 603; *recommended preparation:* ECON 600, ECON 603, ECON 612, ECON 615, ECON 680.

ECON 690 Seminar in Economic Theory (2, max 8, FaSp) Current research in economic theory presented by faculty, students and outside scholars. Graded CR/NC.

ECON 691 Seminar in Econometrics (2, max 8, FaSp) Current research in econometrics presented by faculty, students and outside scholars. Graded CR/NC.

ECON 692 Seminar in Economic Development (2, max 8, FaSp) Current research in international, regional, and urban development economics presented by faculty, students and outside scholars. Graded CR/NC.

ECON 693 Seminar in Applied Economics and Public Policy (2, max 8, FaSp) Current research in applied microeconomics, macroeconomics and public policy presented by faculty, students and outside scholars. Graded CR/NC.

ECON 694 Seminar in Dynamic Economics (2, max 8, FaSp) Topics in dynamic economics involving business fluctuations, economic growth and development, micro-economic adjustments and market mechanisms; related quantitative and qualitative methods; empirical research involving economic change. Graded CR/NC.

ECON 695 Internship in Mathematical Finance (4, Sm) Internship for students in the Mathematical Finance master's program. Practical training in real market environments. Real-world first-hand experience in implementing trading strategies. Application of mathematical finance to real financial markets.

ECON 696 Empirical Microeconomics Seminar (2, max 8, FaSp) Presentations on current research in empirical microeconomics by outstanding scholars from leading economics departments and faculty at USC. Open only to economics Ph.D. students.

ECON 715 Advanced Topics in Econometrics (4) Time-series methods; aggregation; structural models and methods such as factor analysis and multiple indicator models; various special topics. *Prerequisite:* ECON 612 and ECON 613.

ECON 790 Research (1–12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

ECON 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Dornsife College of Letters, Arts and Sciences

English

Undergraduate Degrees

Undergraduate Programs

The Department of English offers a broad range of courses in English, American and Anglophone literature of all periods and genres, and in related areas such as creative and expository writing, literature and visual arts, ethnic literature and cultural studies, history of the English language and of literary criticism, and literary and cultural theory. Instructors assign extensive reading and writing in order to help students become perceptive readers, critical thinkers and strong writers. Class sizes are kept at 19 to enable full discussion in literature classes and at 12 in creative writing workshops.

Advisement

All students meet with a faculty adviser before registering for courses each semester. Faculty advisers help students shape their majors according to their evolving interests and the requirements of the majors. Students should consult the director of undergraduate studies and the undergraduate staff adviser about departmental clearances and course substitutions.

Major Requirements for the Bachelor of Arts in English

Undergraduate majors in English are required to take 40 units (usually 10 courses) for a B.A. in English with an emphasis in either literature or creative writing. All majors must take three introductory courses:

ENGL 261	English Literature to 1800	4
ENGL 262	English Literature since 1800	4
ENGL 263	American Literature	4

Students should take at least two introductory courses before enrolling in upper-division literature courses or creative writing workshops.

Majors emphasizing English literature must take seven upper-division courses, including two courses in literature written before 1800, one course in 19th-century literature, one course in American literature, and two electives.

Majors emphasizing creative writing must take seven upper-division courses, including two introductory creative writing workshops in poetry and prose, and a third workshop at the 400-level. The remaining upper-division courses must include one course in literature written before 1900, one course in literature written after 1900 and one elective.

All major students must complete ENGL 491 Senior Seminar in Literary Studies.

Requirements for a Minor in English

The minor in English requires 20 units, or five courses, including at least two introductory courses (from among ENGL 261, ENGL 262 and ENGL 263) and at least three upper-division courses including one in literature written before 1800 and one in American literature. An English minor may enroll in no more than one creative writing workshop.

Bachelor of Arts in Narrative Studies

Narrative studies prepares students for the development and evaluation of original content for novels, films, theatre and other narrative platforms, but recognizes that the range of professional opportunities in literature and the performing arts is much wider than the roles of author, screenwriter or playwright. To recognize a good story, to critique, help shape, realize and transform it, requires a background in the history of narrative, cross-cultural and contemporary models, and an understanding of the broader context of popular culture.

Narrative Studies assumes that an effective narrative will be adapted from the medium in which it first appears as new media become available. To prepare students for a future in which the platform is likely to change, the Bachelor of Arts in Narrative Studies allows students to study across the current platforms while concentrating on the techniques of effective construction common to them all.

In so doing, it draws upon course work from several schools of art but finds its home in the humanities. To help develop the flexibility necessary to understand how stories change across platforms, students are expected to complete at least three courses in literary and three courses in performance-based media. The remaining three courses may be chosen to reflect the student's personal preference and initial career aspirations.

MDA 490 Directed Research or MDA 494 Directed Creative Projects are capstone experiences: Students work under the guidance of a faculty member in a relevant discipline or professional field, which may include full-time faculty from the college or the participating schools of the arts. Projects intended for the stage should be done under the direction of School of Dramatic Arts faculty.

REQUIREMENTS

UNITS

Nine or 10 courses totaling 36 units; no more than two at the 100- or 200-level, selected from the following lists.

Introduction to Narrative Media (choose one course):

COLT 101	Masterpieces and Masterminds: Literature and Thought	4
CTCS 190	Introduction to Cinema	4
CTCS 191	Introduction to Television and Video	4
CTIN 190	Introduction to Interactive Entertainment	4
ENGL 261	English Literature to 1800	4
ENGL 262	English Literature Since 1800	4
ENGL 263	American Literature	4
ENGL 471	Literary Genres and Film	4
ENGL 481	Narrative Forms in Literature and Film	4
FACS 150	Visual Culture and Literacy I	4
PHIL 446	Aesthetics and the Film	4
THTR 125	Text Studies for Production	4
THTR 403	The Performing Arts	4

Writing and Narrative Forms (choose one or two courses, totaling 4 units):

ENGL 105x	Creative Writing for Non-Majors	4
CTWR 412	Introduction to Screenwriting, and	2
CTWR 415a	Advanced Writing	2
ENGL 105x	Creative Writing for Non-Majors	4, max 8
ENGL 302	Writing Narrative	4
ENGL 405*	Fiction Writing	4, max 8
THTR 365	Playwriting I	4
THTR 366*	Playwriting II	4

Popular Culture and Ethnicity (choose one course):

AMST 200	Introduction to American Studies and Ethnicity	4
AMST 274	Exploring Ethnicity Through Film	4
AMST 285	African-American Popular Culture	4
ANTH 333	Forms of Folklore	4
COLT 365	Literature and Popular Culture	4
CTCS 192	Race, Class and Gender in American Film	4
CTCS 392	History of the American Film, 1925–1950	4
CTCS 393	History of the American Film, 1946–1975	4
CTCS 394	History of the American Film, 1977–Present	4
CTCS 407	African-American Cinema	4
CTCS 414	Latina/o Screen Cultures	4
ENGL 392	Visual and Popular Culture	4
HIST 380	American Popular Culture	4
MUSC 400	The Broadway Musical: Reflections of American Diversity, Issues and Experiences	4
MUSC 420	Hip-Hop Music and Culture	4
MUSC 460	Film Music: History and Function From 1930 to the Present	4
THTR 395	Drama as Human Relations	4
THTR 405	Performing Identities	4

Narrative in Cross-cultural Perspective (choose one course):

ANTH 372	Interpretation of Myth and Narrative	4

THTR 314***	Advanced Topics in Modern Drama	4

Two additional courses (three if CTWR 412/CTWR 414 are chosen) (8 units) at the upper-division 300 or 400 level, from different departments, chosen from the lists above.

Capstone Enrollment:

MDA 490x	Directed Research, or	
MDA 494	Directed Creative Project	4

**Prerequisite required*

***Corequisite required*

****Recommend preparation suggested*

Total: Nine or 10 courses, including at least seven at the upper-division level, for a total of 36 units.

Minor in Cultural Studies

Cultural studies is an interdisciplinary field of study that examines a broad array of issues of culture, including popular culture, identity, subcultures, nationalism, global culture and ethnography. This minor is designed for students majoring in the humanities or in the professional schools who wish to complement their majors with courses that investigate the politics of culture and cultural negotiation. Students are required to have a minimum 3.0 GPA and the completion of 32 units for admission to the minor.

REQUIRED COURSES		UNITS
COMM 384	Interpreting Popular Culture	4
CTCS 407	African American Cinema, or	
CTCS 411	Film, Television and Cultural Studies	4
ENGL 392	Visual and Popular Culture, or	
ENGL 472	Literature and Related Arts	4

ELECTIVE COURSES		UNITS
Choose three courses from the following. Students must take two electives outside the department of their major. Students may not take any more than two electives from any one department or school.		
AHIS 363	Race, Gender, and Sexuality in Contemporary Art	4
AHIS 469	Critical Approaches to Photography	4
ANTH 263	Exploring Culture Through Film	4
COLT 365	Literature and Popular Culture	4

COMM 339	Communication Technology and Culture	4
COMM 340	The Cultures of New Media	4
COMM 360	The Rhetoric of Los Angeles	4
COMM 370	The Rhetoric of Ideas: Ideology and Propaganda	4
COMM 395	Gender, Media and Communication	4
CTCS 406	History of American Television	4
CTCS 407	African American Cinema	4
CTCS 478	Culture, Technology and Communications	4
ENGL 473	Literature and Society	4
ENGL 478	Sexual/Textual Diversity	4
FACS 350	Art Theory and Criticism	4
FREN 320	French Cinema	4
HIST 225	Film, Power and American Society	4
HIST 255	American Popular Culture	4
PAS 400	New Models of Art in City-Space	4
SOCI 342	Race Relations	4

Total Units: 24

For more information or to apply to this minor, contact the Department of English, USC Dornsife College of Letters, Arts and Sciences.

Interdisciplinary Minor in Early Modern Studies

This minor brings together the resources of the departments of English, History and Art History to study the literatures and cultures of Europe and the Americas from the late medieval period to 1800. It draws upon courses from the departments of French and Italian, Spanish and Portuguese, Philosophy, American Studies and Ethnicity, the USC Thornton School of Music, and the USC School of Dramatic Arts.

The minor focuses on the interplay of literary and historical methodologies while promoting an area study in a wide context. Majors in any participating department can complement the strengths in their home department with courses in other participating departments; students with majors in most other areas should have room for the 20 units necessary to complete the minor.

The minor includes a capstone course, a senior seminar based on the resources of the Early Modern Studies Institute (a consortium between USC and the Huntington Library), which enables students to learn about current issues in this cross-disciplinary field and about research techniques employed to deal with those emergent issues.

Through its Early Modern Studies Institute, USC has recognized that the study of the literatures and cultures of Europe and the Americas prior to 1800 reaches beyond disciplinary boundaries. English studies are also historical, continental, multinational and multilingual. Historical studies are also literary and sociological. Both studies are enmeshed in art history and music. This cross-disciplinary understanding of early modern studies provides a model for research in many areas of the humanities and social sciences. Students who complete this minor will be able to use both literary and historical analyses to investigate other questions in which they are interested.

The minor requires 20 units. As with all minors, students must include at least four upper-division courses and four courses dedicated exclusively to this minor (not used for credit toward a major, another minor or general education requirements). Students must select four courses outside their major department.

REQUIREMENTS, LOWER-DIVISION

UNITS

Choose one, 4 units:

AHIS 230 Art and Culture in Early Modern Europe

ENGL 261	English Literature to 1800	4
HIST 103	The Emergence of Modern Europe	4

REQUIREMENTS, UPPER-DIVISION

Choose at least one course from each of the following four categories:

Literary Studies (4 units):

ENGL 420, ENGL 421, ENGL 422, ENGL 423, FREN 401, ITAL 350, ITAL 401, SPAN 350, SPAN 352

Historical Analysis (4 units):

AHIS 304, AHIS 343, AHIS 344, AMST 446, HIST 309, HIST 312, HIST 316, HIST 325, HIST 331, HIST 410, PHIL 320

Case Studies in Early Modern Discourse and History (4 units):

AHIS 430, AHIS 433, AHIS 453, AMST 373, DANC 380, ENGL 430, ENGL 444, ENGL 461, ENGL 465, ENGL 469, HIST 307, HIST 318, HIST 349, HIST 351, HIST 370, HIST 408, HIST 470, HIST 473, HIST 474, MPEM 450, PHIL 421, PHIL 422, PHIL 423, SPAN 455, SPAN 460, THTR 302, THTR 313, THTR 354

Senior Seminar in Early Modern Studies (capstone):

ENGL 497	Seminar in Early Modern Studies	4
----------	---------------------------------	---

Interdisciplinary Minor in Narrative Structure

This interdisciplinary minor is intended for students with an interest in story-telling who are majoring in programs and disciplines other than narrative studies. The minor, based in the humanities, provides opportunities for undergraduates to study story structure from the perspective of several disciplines. As with all minors, students must choose at least four courses (16 units) outside their major department and four courses (16 units) that are not being used to satisfy any other subject requirement.

Course Requirements: five courses (20 units)

LOWER-DIVISION REQUIREMENT

	UNITS	
Choose one course (4 units) from the following list.		
COLT 101	Masterpieces and Masterminds: Literature and Thought	4
COLT 264	Asian Aesthetic and Literary Traditions	4
CTCS 190	Introduction to Cinema	4
CTCS 200	History of the International Cinema I	4
CTCS 201	History of the International Cinema II	4
CTIN 190	Introduction to Interactive Entertainment	4
EALC 125	Introduction to Contemporary East Asian Cinema and Culture	4
ENGL 105x	Creative Writing for Non-Majors	4
ENGL 262	English Literature since 1800	4
ENGL 263	American Literature	4

UPPER-DIVISION REQUIREMENTS

Choose four courses (16 units) from the lists below, one from each list.

Core Course

ENGL 302	Writing Narrative	4
----------	-------------------	---

European and American Literary Narratives

CLAS 325	Ancient Epic	4
COLT 312	Heroes, Myths and Legends in Literature and the Arts	4
COLT 345	Realist Fiction	4
COLT 472	Los Angeles Crime Fiction	4
ENGL 375	Science Fiction	4
ENGL 425*	English Literature of the Victorian Age (1832-1890)	4
ENGL 426*	Modern English Literature (1890-1945)	4
ENGL 440**	American Literature to 1865	4
ENGL 441**	American Literature, 1865 to 1920	4
ENGL 442	American Literature, 1920 to the Present	4
ENGL 447	African-American Narrative	4
ENGL 455	Contemporary Prose	4
FREN 383**	French Women Writers (taught in French)	4
FREN 404	Studies in an Author (taught in French)	4
GERM 340	German Prose Fiction from Goethe to Thomas Mann	4
GERM 372	Literature and Culture in Berlin in the 1920s	4
SLL 302	Modern Russian Literature	4
SLL 303	Contemporary Russian Literature	4
SLL 344	Tolstoy: Writer and Moralist	4
SLL 345	Literature and Philosophy: Dostoevsky	4
SLL 348	The Novels of Vladimir Nabokov	4
SPAN 304	Survey of Fiction (taught in Spanish)	4

*Prerequisite required

**Corequisite required

Global Narrative Traditions

ANTH 372	Interpretation of Myth and Narrative	4
EALC 332	Korean Literature in Translation	4
EALC 342	Japanese Literature and Culture	4
EALC 354	Modern Chinese Literature in Translation	4
EALC 428	Nature and the Ecological Imagination in Japanese Literature	4
EALC 452	Chinese Fiction	4
EALC 455	Japanese Fiction	4
ENGL 444	Native American Literature	4
ENGL 445	The Literatures of America: Cross-Cultural Perspectives	4

Narratives in Visual Media

CLAS 337	Ancient Drama	4
CTCS 367	Global Television and Media	4
CTCS 392	History of the American Film, 1925-1950	4
CTCS 393	History of the American Film, 1946-1975	4
CTCS 394	History of the American Film, 1977-present	4
CTCS 407	African American Cinema	4
ENGL 430	Shakespeare	4
ENGL 463	Contemporary Drama	4

ENGL 471	Literary Genres and Film	4
ENGL 481	Narrative Forms in Literature and Film	4
FREN 320	French Cinema	4
GERM 360	20th Century German Prose: Texts and Films	4
ITAL 360	Italian Cinema	4
SLL 346	Russian Drama and the Western Tradition	4
SPAN 302	Survey of Film (taught in Spanish)	4
SPAN 306	Survey of Drama (taught in Spanish)	4

Double Majors

The department strongly encourages majoring in both English and in another department in the USC Dornsife College of Letters, Arts and Sciences or in another school of the university.

English Honors Program

Candidates for the B.A. in English can receive a designation on their transcripts of departmental honors by successfully completing a senior honors thesis while enrolled in ENGL 496, and having a 3.5 final GPA. ENGL 491 Senior Seminar in Literary Studies is a prerequisite for ENGL 496. Students with a minimum GPA of 3.0 overall and 3.5 in English courses can apply for ENGL 496; application is due at the start of fall semester of senior year. For additional information, contact a departmental adviser or the director of undergraduate studies.

Teaching Credential Requirements

Credential requirements in California and elsewhere are complex and changeable. Students interested in preparing for public school teaching should contact the Credentials Office, Rossier School of Education (or refer to this catalogue page), and the undergraduate adviser in the English department for up-to-date information. The English department usually offers courses that satisfy most, if not all, of these requirements.

Dornsife College of Letters, Arts and Sciences

English

Graduate Degrees

Admission Requirements

Requirements for admission to study in the department of English include: scores satisfactory to the department on both the verbal portion of the General Test and the literature Subject Test of the Graduate Record Examinations; evidence of competence in writing English and interpreting English literature, as demonstrated by two samples of written work by the applicant on literary subjects; a satisfactory written statement by the applicant of aims and interests in graduate work; letters of recommendation from at least three college instructors (English instructors preferred); and grades satisfactory to the department earned by the applicant at other institutions.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Arts in English

The department does not accept applicants for a Master of Arts degree. All graduate work in English at USC is taken as part of a Ph.D. program, and the M.A. in English is intended only as a transitional degree in the process

of completing requirements for the Ph.D.

A student admitted to the graduate program may choose later to earn a terminal M.A. degree, or may be invited by the department to attempt a terminal degree. The terminal M.A. in English may be earned by completing 30 units (normally eight courses) of graduate study in English or in other departments at USC (as approved by the graduate director) with an accumulated GPA of at least 3.0, and by passing the screening procedure. A maximum of four units of 590 Directed Research and four transfer units may count toward the 30 units minimum required for the M.A. degree.

Doctor of Philosophy in English

Students may earn the Ph.D. in English by successfully completing requirements in the English and American literature track.

English and American Literature

Application deadline: December 1

This program prepares students for research and teaching in all areas of English and American literary studies. The program offers the study of texts in their historical and cultural contexts as well as theoretical, interdisciplinary and cross-cultural approaches to literature.

Graduate Curriculum and Unit Requirements

The graduate curriculum is divided into 500-level foundation courses and 600-level advanced courses. The 500-level courses offer fundamental work in theory and in the history of British and American literatures and cultures. The 600-level courses feature advanced studies in theory, core requirements in film and literature, interdisciplinary studies, transhistorical studies in genres and sub-genres, individual writers, gender studies, multi-cultural literatures and societies, and special topics. Although students will normally take 500-level courses leading up to the screening procedure (see Screening Procedure) and 600-level courses thereafter, students, after consultation with their advisers, may be permitted to take 600-level courses in the first semesters of their graduate training.

Occasionally students who lack adequate undergraduate training in any given area may be required by the graduate director to enroll in appropriate 400-level courses.

The student's course work must total at least 64 units. No more than 8 units of 794 Doctoral Dissertation and no more than four units of 790 Research may count toward the 64 units. A maximum of 12 transfer units, approved by the graduate director, is allowed toward the 64 units minimum required by the Ph.D. (See Transfer of Credit.)

Advisement

The student will be assigned a faculty mentor in his or her first semester in the graduate program and will be encouraged in subsequent semesters to begin putting together an informal qualifying exam committee. The makeup of the qualifying exam committee may change as the interests of the student change. The faculty mentor and informal qualifying exam committee will assist the student in planning a program of study appropriate to the student's interests leading to the screening procedure.

Screening Procedure

In the semester immediately following the completion of 20 units of courses, the students will be screened. Passing this procedure is prerequisite to continuation in the doctoral program. The faculty mentor will write a report summarizing the student's course work, grades and instructor comments. The graduate studies committee will consider the student's record and determine if he or she is qualified to go on to the Ph.D. On successful completion of screening, the student may apply for the transfer of graduate credit from other institutions, up to a maximum of 12 units.

Qualifying Exam Committee

Immediately following successful completion of the screening procedure, the student will nominate formally a five-member qualifying exam committee, including a chair and three other members from the English Department who are in the student's areas of interest and an outside member from another Ph.D.-granting

department. The committee must be in place and approved by the Graduate School at the time the student chooses a dissertation topic, writes the dissertation prospectus and schedules a qualifying examination.

Field Examinations

In the semester following the completion of courses, and before submission of the dissertation prospectus, the student must take the field examinations. These are take-home essays in three broad fields preparatory to the dissertation. The fields are chosen and the questions developed by the student in consultation with a committee of three examiners chosen by the student. The field examinations may be repeated once in the semester immediately following an unsuccessful attempt. The committee may ask the student to retake one, two or all three fields.

Qualifying Examination

Following completion of course work and the field examinations, the student must sit for a qualifying examination, at a time mutually agreed upon by the student and the qualifying exam committee. This is an examination given in the subject of the student's proposed dissertation research. No less than one month before the qualifying examination, the student will submit to the qualifying exam committee a dissertation prospectus. The prospectus, it is understood, will not be a polished dissertation proposal, but at a minimum it should display a strong knowledge of the subject, much of the relevant secondary material and other contexts crucial to the writing of the dissertation, and should present a workable plan of attack as well as a reasonably sophisticated understanding of the theoretical assumptions involved in the subject.

The qualifying examination will consist of both written and oral portions. It will focus on the dissertation area and its contexts with the specific format and content of the examination being negotiated among the student and all members of the examination committee. Upon successful completion of the qualifying examination, the student proceeds to the writing of the doctoral dissertation.

Dissertation

The final stage of the program is the submission of a dissertation that makes an original and substantial contribution to its field of study. Dissertations being written in the department are now richly varied, and this diversity is encouraged.

Foreign Language

Ph.D. students are required to demonstrate proficiency in at least one foreign language. This may be demonstrated by completing a course in the literature of that language at the 400 or 500 level (with a grade of B [3.0] or better), or by passing a foreign language exam that tests proficiency in reading comprehension and translation. Ph.D. students may also be required to demonstrate proficiency in additional languages, as determined by the qualifying exam committee in view of the student's proposed field of research.

Doctor of Philosophy in Literature and Creative Writing

Application deadline: December 1

The program provides dual emphasis in literature and creative writing, culminating in the dissertation, which combines critical analysis with creative originality. Roughly half of the dissertation is based on original research, that is to say, research contributing to knowledge which enriches or changes the field. Doctoral candidates not only read and write texts as finished products of scholarship in researching their creative work's literary and historical milieu, but also consider the text as writers create it, then compose texts as writers, a process that goes to the source of the study of literature and of literature itself. This integration of literature and creative writing is reflected in the structure of the dissertation, which introduces the creative work within a context of critical inquiry, bringing together the examination and embodiment of the literary act, a new model of scholarship and creative innovation.

Ph.D. candidates in literature and creative writing must pass the same departmental screening examination taken by Ph.D. candidates in Literature who are not working in the area of creative writing. The exam tests students in various areas of emphasis (British literature, American literature, poetry, prose, etc.) and literature and historical periods as a measure of their preparedness to undertake independent research.

The literature and creative writing student takes 64 units in all, 32 in literature, 24 in creative writing workshops

and seminars and 8 units of dissertation studies credits.

Admission Requirements

Requirements for admission to study in the department of English include: scores satisfactory to the department in both the verbal and quantitative General Test and the literature Subject Test of the Graduate Record Examinations; evidence of experience and ability in creative writing, as demonstrated by a creative writing sample; evidence of competence in writing English and interpreting English literature, as demonstrated by a sample of written work by the applicant on literary subjects; a satisfactory written statement by the applicant of aims and interests in graduate work; letters of recommendation from at least three college instructors; and grades satisfactory to the department earned by the applicant at other institutions. This program will accept applicants with B.A. degrees or transfer students with an M.A. or MFA in creative writing.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Graduate Curriculum and Unit Requirements

The graduate curriculum is divided into 500-level foundation courses and 600-level advanced courses. The 500-level courses offer fundamental work in theory and in the history of British and American literatures and cultures. The 600-level courses feature advanced studies in theory, creative writing seminars and workshops and special topics. Although students will normally take 500-level courses leading up to the screening procedure (see Screening Procedure) and 600-level courses thereafter, students after consultation with their advisers may be permitted to take 600-level courses in the first semester of their graduate training.

The student's course work must total at least 64 units. No more than eight units of 794 Doctoral Dissertation and no more than four units of 790 Research may count toward the 64 units. A maximum of 12 transfer units, approved by the graduate director, is allowed toward the 64 units minimum required by the Ph.D. (See Transfer of Course Work.)

Advisement

The student will be assigned a faculty mentor in his or her first semester in the graduate program and will be encouraged in subsequent semesters to begin putting together an informal qualifying exam committee. The makeup of the qualifying exam committee may change as the interests of the student change. The faculty mentor and informal qualifying exam committee will assist the student in planning a program of study appropriate to the student's interests leading to the screening procedure.

Screening Procedure

At the end of the student's fourth semester (second semester for students who enter with an M.A. or MFA degree or near equivalent), the student will sit for a departmental examination, which is part of a comprehensive screening procedure. Rarely, and only with the approval of the graduate director and the graduate committee, will a student be allowed to postpone the departmental examination and the screening procedure, and then only for one year. Prior to the screening procedure, the student will be allowed to take a maximum of four units of independent study (ENGL 590), and that independent study will normally be used to prepare for the departmental examination; all other units must be in the 500- or 600-level seminar.

Qualifying Exam Committee

Immediately following successful completion of the screening procedure, the student will nominate formally a five-member qualifying exam committee, including a chair and three other members from the English Department who are in the student's areas of interest and an outside member from another Ph.D.-granting department. The committee must be in place and approved by the Graduate School at the time the student chooses a dissertation topic, writes the dissertation prospectus and schedules a qualifying examination.

Qualifying Examination

Following completion of course work, the student must sit for a qualifying examination, at a time mutually agreed upon by the student and the qualifying exam committee.

This is a field examination given in the subject of the student's proposed dissertation research. No less than one month before the qualifying examination, the student will submit to the qualifying exam committee a dissertation prospectus. The prospectus, it is understood, will not be a polished dissertation proposal, but at a minimum it should display a strong knowledge of the subject, much of the relevant secondary material and other contexts crucial to the writing of the dissertation, and should present a workable plan of attack as well as a reasonably sophisticated understanding of the theoretical assumptions involved in the subject.

The qualifying examination will consist of both written and oral portions with special emphasis areas in creative writing. It will focus on the dissertation area and its contexts with the specific format and content of the examination being negotiated among the student and all members of the examination committee. Upon successful completion of the qualifying examination the student proceeds to the writing of the doctoral dissertation.

Dissertation

The final stage of the program is the submission of a creative dissertation that makes an original, substantial and publishable contribution to creative literature: a book of poems, a novel, a collection of short stories.

Foreign Language

Ph.D. students are required to demonstrate proficiency in at least one foreign language. This may be demonstrated by completing a course in the literature of that language at the 400 or 500 level (with a grade of B [3.0] or better) or by passing a foreign language exam that tests proficiency in reading comprehension and translation. Ph.D. students may also be required to demonstrate proficiency in additional languages, as determined by the qualifying exam committee in view of the student's proposed field of research.

Common Requirements

Transfer of Credit

A Transfer Credit Statement is prepared by the Degree Progress Department for students admitted to full graduate standing. The application of any available transfer credit is contingent on successful completion of the screening exam and is determined by the director of graduate studies no later than the end of the second year according to the following guidelines: credit will only be allowed for courses (1) from accredited graduate schools; (2) of grade B (3.0 on a four-point scale) or better; (3) constituting a fair and reasonable equivalent to current USC course work at the graduate level and fitting into the program for the degree; and (4) approved by the Graduate School. Graduate transfer credit will not be granted for life experience, credit by examination, non-credit extension courses, correspondence courses or thesis course supervision.

The maximum number of transfer credits which may be applied toward the Master of Arts degree is four units. The maximum number of transfer credits which may be applied toward the Ph.D. degree is 12 units. The Graduate School stipulates that transfer units must have been completed within 10 years of admission for the doctoral program to be applied toward the degree.

Experience in Teaching

This requirement may be fulfilled by two to four years' service as a teaching assistant in the Writing Program or equivalent experience as determined by the director of the Graduate Studies Program.

Graduate Activity and Support

The English Department is committed to the development of its graduate students as professionals. To this end, the department provides a number of opportunities for professional activity. In addition, the Association of English Graduate Students (AEGS) hosts a variety of lectures, discussions and forums throughout the year. To support the student's professional activities outside of USC, the department also provides some funding for travel to conferences and professional meetings, along with a full range of placement, advising and support activities. Graduate creative writing students will host lectures, discussions and forums in poetry and fiction studies.

Courses of Instruction

ENGLISH (ENGL)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ENGL 105x Creative Writing for Non-Majors (4, max 8, FaSp) Introductory workshop in writing poetry, short fiction and nonfiction for love of the written and spoken word. Not for English major or English (Creative Writing) major credit.

ENGL 170g The Monster and the Detective (4, FaSp) Cultural images of disorder and chaos, and of the search for order and reason, from the eighteenth century to the present.

ENGL 172g The Art of Poetry (4) Introduction to the pleasures and power of poetry, exploring elements drawn from high-points of English poetry, and the lives and works of major poets.

ENGL 174g Reading the Heart: Emotional Intelligence and the Humanities (4) A study of emotional intelligence through literature, history and the arts with a focus on anger, happiness, love and empathy.

ENGL 176g Los Angeles: the City, the Novel, the Movie (4) An exploration of the culture, vibrance, heritage, mythology, variety, and pathology of a city that was born in hopes and captured the world's imagination.

ENGL 230g Shakespeare and His Times (4) Close study of Shakespeare's plays and poems to introduce his language, stagecraft, literary "genius," social and literary contexts, precursors and rivals, and legacy.

ENGL 250gm The African Diaspora (4, FaSp) (Enroll in AMST 250gm)

ENGL 261 English Literature to 1800 (4, FaSpSm) Intensive reading of major writers to 1800.

ENGL 262 English Literature since 1800 (4, FaSpSm) Intensive reading of major writers, 1800–1950.

ENGL 263 American Literature (4, FaSpSm) Intensive reading of representative writers.

ENGL 285m African American Popular Culture (4, Sp) (Enroll in AMST 285m)

ENGL 290 Cultural Studies: Theories and Methods (4, FaSpSm) Introduction to the theories, methods, and history of cultural studies, with coverage of contemporary debates over censorship and the politics of authorship, seriality and originality.

ENGL 298g Introduction to the Genre of Fiction (4, FaSpSm) An introduction to the close reading of fiction and the understanding of the genre as an aesthetic and historical phenomenon.

ENGL 299g Introduction to the Genre of Poetry (4, FaSp) Historical survey of the traditions of lyric poetry from Shakespeare to the contemporary, examining the genre's multiple forms of literary, visual, and aural expression.

ENGL 302 Writing Narrative (4, FaSpSm) Introduction to the techniques and practice of writing narrative in fiction and literary non-fiction.

ENGL 303 Introduction to Fiction Writing (4, FaSp) Introduction to the techniques and practice of writing prose fiction.

ENGL 304 Introduction to Poetry Writing (4, FaSp) Introduction to the techniques and practice of

writing poetry.

ENGL 305 Introduction to Nonfiction Writing (4, FaSp) Introduction to the techniques and practice of lyric essay, memoir, personal narrative, and scientific, medical, nature, culinary and travel writing.

ENGL 310 Editing for Writers (4) Practical course in relations between editing and the creative process in fiction, poetry, and exposition.

ENGL 350g Literature of California (4) Novels, stories, essays, poems, and plays written in and about California from the Gold Rush to the present.

ENGL 355g Anglo-American Law and Literature (4, max 8, FaSpSm) Examination of legal problems and concepts in English and American literature. *Recommended preparation:* CORE 102 or ARLT 100; WRIT 150.

ENGL 375 Science Fiction (4, FaSp) Investigation of the scope and possibilities of British and American science fiction as a genre, with some attention to its historical development.

ENGL 376g Comics and Graphic Novels (4, FaSpSm) Introduction to issues in visual and popular culture, focused on critical and historical interpretation of words and images in comic books and graphic novels.

ENGL 390 Special Problems (1–4, FaSp) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

ENGL 392 Visual and Popular Culture (4, FaSp) Course in the theory and practices of “popular culture,” highlighting modern and contemporary culture, film, video and popular music, as well as narrative forms.

ENGL 395 Junior Honors Seminar (4, Sp) Selected subjects; offered in spring only and restricted to honors students.

ENGL 400 Advanced Expository Writing (2–4, Fa) Intensive practice intended to develop a high level of competence in writing expository prose.

ENGL 401 The Rhetoric of Written Composition (4) Theories of rhetoric as they apply to written composition, with emphasis upon pedagogical applications. The course is designed for but not limited to prospective teachers of English.

ENGL 404 The Writer in the Community (2–4, max 8, FaSp) Apprenticeship with experienced writer-teachers, providing students with a pedagogical framework and practical experience for teaching creative writing in schools and community settings.

ENGL 405 Fiction Writing (4, max 8, FaSp) A practical course in composition of prose fiction.
Prerequisite: ENGL 303 or ENGL 305.

ENGL 406 Poetry Writing (4, max 8, FaSp) A practical course in poetry writing. *Prerequisite:* ENGL 304.

ENGL 407 Advanced Fiction Writing (4, max 8, FaSp) *Prerequisite:* ENGL 405.

ENGL 408 Advanced Poetry Writing (4, max 8, FaSp) *Prerequisite:* ENGL 406.

ENGL 409 The English Language (4) Instruction in the major grammatical systems of the English language, with particular emphasis on their relevance to language activities in the elementary classroom.

ENGL 410 History and Grammar of Modern English (4, FaSp) History and grammar of modern English as described by current linguistics; comparison with traditional grammar; application of grammar to stylistic analysis.

ENGL 412 Analysis of Written Persuasion (4, FaSp) Persuasive discourse, including structure, intention, and figurative language; analysis of texts in various humanistic, scientific, and socio-scientific disciplines.

ENGL 420 English Literature of the Middle Ages (1100–1500) (4, FaSp) Selected studies in major figures, genres, and themes of Middle English literature to Malory, with special emphasis on Chaucer. *Prerequisite:* ENGL 261.

ENGL 421 English Literature of the 16th Century (4) Selected studies in the non-dramatic literature of Renaissance England, with emphasis on Sidney, Spenser, and Shakespeare. *Prerequisite:* ENGL 261.

ENGL 422 English Literature of the 17th Century (4) Selected studies of prose and poetry in the age of Bacon, Donne, Jonson, Herbert, Browne, Marvell, and Milton. *Prerequisite:* ENGL 261.

ENGL 423 English Literature of the 18th Century (1660–1780) (4) Selected studies in poetry, prose, and fiction of such writers as Defoe, Dryden, Fielding, Richardson, Pope, Swift, and Johnson. *Prerequisite:* ENGL 261.

ENGL 424 English Literature of the Romantic Age (1780–1832) (4) Selected studies in major writers, including Blake, Austen, Wordsworth, Coleridge, Byron, Mary Shelley, P.B. Shelley, and Keats. *Prerequisite:* ENGL 262.

ENGL 425 English Literature of the Victorian Age (1832–1890) (4) Selected studies in the prose and poetry of such figures as Tennyson, Dickens, the Brontes, the Brownings, Hopkins, Arnold, Ruskin, and Newman. *Prerequisite:* ENGL 262.

ENGL 426 Modern English Literature (1890–1945) (4) Studies in English literary modernism, including the prose of Conrad, Joyce, and Woolf and the poetry of Pound, Eliot, Yeats, and Auden. *Prerequisite:* ENGL 262.

ENGL 430 Shakespeare (4, FaSp) Major history plays, comedies, and tragedies.

ENGL 440 American Literature to 1865 (4, FaSp) American poetry and prose to the Civil War with special attention to Irving, Cooper, Poe, Hawthorne, Emerson, Thoreau, Melville, and Whitman. *Corequisite:* ENGL 263.

ENGL 441 American Literature, 1865 to 1920 (4, FaSp) American poetry and prose with special attention to Twain, James, Dickinson, Henry Adams, Crane, and Dreiser. *Corequisite:* ENGL 263.

ENGL 442 American Literature, 1920 to the Present (4, FaSp) American poetry, fiction, and drama since World War I with special attention to Eliot, Frost, Hemingway, Fitzgerald, O'Neill, Stevens, Faulkner, and Nabokov. *Corequisite:* ENGL 263.

ENGL 444m Native American Literature (4, FaSp) Survey of Native American literature, including oral traditions and print genres, such as short story, poetry, novel, and autobiography, from 1700 to the present. *Recommended preparation:* ENGL 263.

ENGL 445m The Literatures of America: Cross-Cultural Perspectives (4) Introduction to African-American, Chicano, Asian American, and Native-American literatures — and to the literary diversity of American cultures.

ENGL 446 African-American Poetry and Drama (4) Survey of black poetry and plays in America from the Emancipation to the present, with special emphasis on the new poets and dramatists of the current “Black revolution.”

ENGL 447m African-American Narrative (4) Development of the novel in African-American literature beginning with the anti-slavery fiction of William W. Brown and his pre-Emancipation contemporaries and concluding with the emerging novelists of the late sixties.

ENGL 448m Chicano and Latino Literature (4, FaSp) (Enroll in AMST 448m)

ENGL 449m Asian American Literature (4, FaSp) (Enroll in AMST 449m)

ENGL 451 Periods and Genres in American Literature (4, max 8, FaSp) A concentrated reading and criticism of the works of one period or one genre of American literature; for example, colonial literature, the American Renaissance, American poetry, American drama.

ENGL 452 Modern Poetry (4) Study of poetry written in English from 1900 to 1945, with special emphasis on American modernists of the first two decades. *Recommended preparation:* ENGL 262, ENGL 263.

ENGL 454 Aesthetic Philosophy and Theory (4) (Enroll in COLT 454)

ENGL 455 Contemporary Prose (4) Study of prose written in English since 1945, principally fiction of the past two decades.

ENGL 456 Contemporary Poetry (4) Study of poetry written in English since 1945, with special emphasis on the last two decades.

ENGL 461 English Drama to 1800 (4, FaSp) Representative plays, especially those of the Elizabethan, Jacobean, and Restoration periods. *Corequisite:* ENGL 261.

ENGL 462 British and American Drama 1800–1950 (4, FaSp) Representative plays of England, Ireland, and the United States, especially those written after 1890. *Corequisite:* ENGL 262.

ENGL 463 Contemporary Drama (4) Selected British, Irish, and American drama from the post World War II period (1945 to the present).

ENGL 465 The English Novel to 1800 (4) Theory and practice of fiction in works of writers such as Defoe, Richardson, Fielding, Sterne, Burney, and Smollett. *Corequisite:* ENGL 261.

ENGL 466 The 19th Century English Novel (4) Theory and practice of fiction in works of major writers such as Austen, Dickens, Thackeray, George Eliot, Meredith, and Hardy. *Corequisite:* ENGL 262.

ENGL 467 The Modern Novel (4, FaSp) Studies of the narrative experiments and innovations in fiction following the realist novel; emphasis on gender, empire and class and the pluralities of “modernisms.”

ENGL 469 Women in English Literature before 1800 (4) English poetry, plays, novels, and discursive prose by and about women from 1375 to 1800.

ENGL 470 Women in English and American Literature after 1800 (4) Women as writers and as subjects, with special emphasis on feminist and liberationist traditions and on changing female images after 1800.

ENGL 471 Literary Genres and Film (4, FaSp) Literary studies in the relationship between fiction and drama and their adaptation as films.

ENGL 472 Literature and Related Arts (4, FaSp) An examination of how literature and related arts intersect in a particular cultural milieu. Selected topics.

ENGL 473 Literature and Society (4, FaSp) Theoretical and applied studies of literature in English as social activity and cultural production; its expression of, and influence upon, social values, concepts, and behavior.

ENGL 474m Literature, Nationality and Otherness (4, FaSp) English literature written about or in the British colonies and their post-colonial nations, including African, Asian, Pacific, and American countries. Emphasis on texts by other than British and United States authors. Completion of general education literature requirement highly recommended.

ENGL 475 Politics and the Novel (4) (Enroll in COLT 475)

ENGL 476m Images of Women in Contemporary Culture (4, FaSp) Representations of women and gender relations in contemporary literature and mass culture, using the tools of feminist, literary, and political

theory.

ENGL 478m Sexual/Textual Diversity (4, FaSp) Questions of gay and lesbian identity, expression and experience in a variety of literary and cultural forms; emphasis on sexual politics, equality and difference.

ENGL 479 History of Literary Criticism (4, FaSp) Philosophies of literary criticism from Plato to the end of the 19th century; the relationship between literary criticism and its contemporary literature.

ENGL 480 Modern Literary Criticism: Theory and Practice (4, FaSp) Analysis of philosophies and methods of modern schools of criticism; writing critical essays.

ENGL 481 Narrative Forms in Literature and Film (4, FaSp) Critical approaches to narrative form in literature and film; readings and films from several genres and periods, emphasis on gender, ethnic, and cultural studies.

ENGL 490x Directed Research (1–8, max 12, FaSp) Individual research and readings. Not available for graduate credit.

ENGL 491 Senior Seminar in Literary Studies (4, FaSpSm) Selected problems in literary history and criticism.

ENGL 495 Senior Honors Seminar (4, Fa) Advanced seminar involving extensive reading, research, and discussions. Selected subjects; offered in Fall only and restricted to Honors students.

ENGL 496 Senior Honors Thesis (4, Sp) Seminar in workshop form to accompany completion of Senior Honors Thesis. Bi-weekly meetings to complete thesis according to contract. *Prerequisite:* ENGL 491.

ENGL 497 Senior Seminar in Early Modern Studies (4, Sp) Intensive engagement with current research, problems, and methodologies in Early Modern discourses and cultures. Required capstone seminar for interdepartmental minor in early modern studies. Open only to seniors; open only to early modern studies minors.

ENGL 499 Special Topics (2–4, max 8, FaSp) Studies in the works of one or more authors, or in the development of a theme or genre.

ENGL 501 History of Literary and Cultural Theory (4) The assumptions and practices of major theorists and theoretical schools from Plato to literary modernism.

ENGL 502 Contemporary Literary and Cultural Theory (4) The assumptions and practices of major post-modern theorists and theoretical schools.

ENGL 503 Theories of History, Ideology and Politics (4) The principal ways in which history, ideology, and politics have informed the study of literary and cultural discourse.

ENGL 504 Theories of Race, Class, and Gender (4) The principal methods and assumptions by which race, class, and gender have been studied in reference to literary and cultural discourse.

ENGL 507 Rhetoric and Language (4) Examination of critical and linguistic theories; may include the changing structures of English discourse, cognitive poetics, and discourse analysis.

ENGL 508 History, Theories and Practice of Cultural Studies (4, max 12, FaSp) Looking at specific case histories, this course introduces students to the basic methods, theories and activities in cultural studies.

ENGL 510 Medieval English Literatures and Cultures (4, max 12) Investigations of chivalry and romance, allegory, drama, popular literature in the Middle Ages, the reception of medieval literature, and other topics.

ENGL 520 Renaissance English Literatures and Cultures (4, max 12) Studies in poetry and patronage, the popular tradition in literature and drama, the social and sexual dynamics of comedy, historical and cultural

uses of genres, among other topics.

ENGL 530 Restoration and 18th Century British Literatures and Cultures (4, max 12) Studies in prose, poetry, drama, and culture of the period 1660–1800.

ENGL 535 Literatures and Cultures of the Romantic Period (4, max 12) Studies in British literature and culture, from the 1790s to 1830s, including gender and genre, authorship and authenticity, “romance” and revolution, forms of belief and doubt, and other topics.

ENGL 536 Literatures and Cultures of the Victorian Period (4, max 12) Studies in British literature and society, 1837–1901, including gender and genre, industrialism, science and technology, empire and race, new forms of media and narrative, and other topics.

ENGL 540 19th Century British Literatures and Cultures (4, max 12) Studies in the Romantics and Victorians, gender and genre, the new woman and the novel, authorship and the marketplace, science, imperialism, the crisis of narrative, and other topics.

ENGL 550 20th Century British Literatures and Cultures (4, max 12) Studies in literary modernism, critical scrutiny and moral seriousness, poetry and politics, the Irish revival, and other topics.

ENGL 560 Early American Literatures and Cultures (4, max 12) Studies in the literature of discovery, exploration and conquest, the Puritan migration, literary genres in Colonial America, history and myth of American origins, and other topics.

ENGL 563 Poetry and Prose Into Drama (4, Fa) (Enroll in THTR 501)

ENGL 570 18th Century American Literatures and Cultures (4, max 12) Studies in the rhetoric, literature, and language of the pre-revolutionary and revolutionary periods, narrative and polemical writing, the American Enlightenment, and other topics.

ENGL 580 19th Century American Literatures and Cultures (4, max 12) Studies in canonic and non-canonic literature in the American Renaissance, cultural nationalism, the consequences of race, immigration, expansion, urbanization, science, and the marketplace, and other topics.

ENGL 590 Directed Research (1–12) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

ENGL 591 20th Century American Literatures and Cultures (4, max 12) Studies in rural and urban fictions, modernism, the shift from imagism and symbolism to confessional poetry, recovered writers, hemispheric traditions, literature and kindred arts, and other topics.

ENGL 592 Contemporary British and American Literatures and Cultures (4, max 12) Studies in contemporary women and ethnic writers, “extra-literary” forms (journalism, autobiography), the theatre of the absurd, post-modern fabulations, and other modes and issues since World War II.

ENGL 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

ENGL 595 Literary Studies Across Cultures (4, max 12) Studies in Empire and Commonwealth literatures, post-colonialism, American hemispheric connections, African-American literary discourse, Asian American writers, dialects and the folk, and other topics.

ENGL 599 Special Topics (2–4, max 8) Thematic, theoretical, or experimental studies in British and American literatures and cultures. (Duplicates credit in former ENGL 699.)

ENGL 600x Preparing Articles for Publication in Scholarly Journals (2, FaSp) Development of strategies for preparing articles for publication in scholarly journals. Aspects of publication will include abstracts, introductions, argumentation, style and footnotes. Open only to Ph.D. students in English and English (Creative Writing). Not for degree credit for English and English (Creative Writing) students. Graded CR/NC.

ENGL 605 The History of Rhetoric (4, max 12) Studies in European and American rhetoric and their contexts.

ENGL 606 Rhetoric and the Teaching of Writing (4, max 12) Studies in the rhetoric of written composition, critical theory and pedagogy, and other topics.

ENGL 610 Theory and Criticism (4, max 12) Studies in meaning and meaning-making, form, comparative theory, theories of history and culture, theory in the classroom, and other topics.

ENGL 620 Literature and Interdisciplinary Studies (4, max 12) Issues and theory of studying literature in relation to history, science, politics, psychology, religion, sociology, media, the visual arts, and other disciplines.

ENGL 630 Studies in Gender (4, max 12) History and ideology of gender studies, feminist theory, gay and lesbian discourse, and other studies in feminisms and masculinities in relation to literature.

ENGL 640 Individual Writers (4, max 12) Studies in major and minor, canonic and non-canonic writers.

ENGL 650 Multicultural Literary Studies (4, max 12) Theories of race and ethnicity, cultural imperialism, discourse of power and class, literatures of the Americas, and other topics.

ENGL 660 Studies in Genre (4, max 12) History, transformation, and theory of genre; studies in epic, lyric, drama, comedy, tragedy, the novel, biography, essay, and other forms.

ENGL 678 Seminar in Film Theory and Medium Specificity (4, max 8) (Enroll in CTCS 678)

ENGL 679 Seminar in Genre and/or Narrative Theory (4, max 8) (Enroll in CTCS 679)

ENGL 695 Graduate Fiction Form and Theory (4, max 12) Seminar. Studies in fiction form and function or critical theory.

ENGL 696 Graduate Poetry Writing Workshop (4, max 12) Intensive practicum in advanced level poetry writing, intended to develop high level creative compositional ability. Open only to Creative Writing Ph.D. degree candidates.

ENGL 697 Graduate Fiction Writing Workshop (4, max 12) Intensive practicum in advanced level fiction writing, intended to develop high level creative compositional ability. Open only to Creative Writing Ph.D. degree candidates.

ENGL 698 Graduate Poetry Form and Theory (4, max 12) Seminar. Studies in poetry form and function or critical theory.

ENGL 700x Theories and Practices of Professional Development I (2, FaSp) A structured environment in which to craft a research project, write a dissertation prospectus, and define areas of professional expertise. Graded CR/NC. Not available for degree credit. *Recommended preparation:* passage of screening exam.

ENGL 701x Theories and Practices of Professional Development II (2, Fa) This two-credit course helps ABD students craft their professional identities and placement materials as they make the transition from graduate school to their academic position. Not available for degree credit. Graded CR/NC.

ENGL 790 Research (1–12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

ENGL 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Director: Karla Heidelberg, Ph.D.

Faculty

Ray R. Irani Chairman of Occidental Petroleum Chair in Chemistry and Professor of Chemistry and Environmental Studies: James Haw, Ph.D. (Chemistry)

Professor: David Bottjer, Ph.D. (Earth Sciences)

Assistant Professor: Roderick McKenzie, Ph.D.

Associate Professor of the Practice: Yael Wolinsky-Nahmias, Ph.D.

Associate Professor (Teaching): Karla Heidelberg, Ph.D. (Biological Sciences)

*Assistant Professor (Teaching): Lisa Collins, Ph.D.; David Ginsburg, Ph.D.**

Lecturers: Jill Sohm, Ph.D.; Ekaterina Svyatets, Ph.D.

Emeritus Professor: Thomas Flood, Ph.D. (Chemistry)

Undergraduate Programs

The environmental studies program offers two undergraduate majors, environmental studies (ENVS) and environmental science and health (ENSH). Each of these majors lead to either a B.A. or B.S. degree.

The environmental studies degrees are built on specialized natural science and social science courses and a set of interdisciplinary courses focusing on sustainability. The social science core courses focus on environmental problems from political, legal, economic and international perspectives. Specially designed one-semester surveys of biology, earth science and chemistry provide the natural science competency for subsequent policy or science advanced course work in environmental studies. Four concentrations are available in the environmental studies degrees: sustainability, energy and society; oceans, life and people; climate, earth and environment; and environmental public policy. Each concentration culminates in the capstone experience of a senior seminar focusing on environmental problem-solving by interdisciplinary teams. A single 24-unit environmental studies minor is derived from the core major curriculum.

The environmental science and health degrees combine the interdisciplinary courses on sustainability described above and some of the environmental social science content with traditional biology and chemistry content to provide options for students preparing for one of the health professions with an undergraduate emphasis on environmental sustainability. The B.S. in environmental science and health incorporates recommended preparation for medical schools. The B.A. in environmental science and health may be appropriate for students preparing for other graduate or professional training as well as students pursuing double majors.

The environmental studies courses common to both majors emphasize the interdisciplinary nature of environmental problems. Some of the major courses are team-taught by faculty with complementary backgrounds in science and policy. A number of opportunities are provided for field studies from the urban Los Angeles environment to marine protected areas on the coasts of the California Channel Islands. More intensive field study opportunities include “Problems Without Passports” courses with international components. Note

that some of the field studies opportunities require travel to remote, rural locations and study under sometimes physically and mentally demanding conditions. These trips require a willingness to conform to the announced guidelines for conduct and safety.

Catalina Sustainability Semester

The environmental studies program in collaboration with the Department of Biological Sciences and the Wrigley Marine Science Center has created a Catalina sustainability semester focusing on California marine, coastal and island sustainability. This semester-long program is offered in spring 2016. The 16 units of course work in this program will be taught in a block format (sequential) and are designed to take advantage of the unique facilities and settings of Catalina Island. Enrolled students will be provided with food and lodging at the Wrigley Marine Science Center at rates roughly comparable to the services on the University Park Campus.

Suggested preparation for the Catalina sustainability semester includes completion of either ENST 100, BISC 120L or comparable experience. Prospective applicants are urged to contact the Environmental Studies Office in SOS B15 early in the fall semester prior to enrollment and no later than October 15 for consideration.

Graduate Programs

The Master of Arts degree program in environmental studies is also interdisciplinary and focuses on public policy and its related facets. Those who graduate with an M.A. in environmental studies are well prepared to pursue careers in policy, planning or management in the public, private or nonprofit sector in either this country or abroad. In addition, the curriculum provides students with a foundation for acquiring a Ph.D. in environmental studies or a related field, or a law degree. Individuals who are already employed in the pollution control and remediation field will find the M.A. degree attractive as well. Upon completion of the graduate program, students will possess extensive knowledge of environmental science, environmental statistics and economics, law and regulation, policy and planning, development and economic growth, and global issues and problems.

The Master of Science degree in environmental risk analysis focuses on providing advanced professional training for students with a B.S. degree in natural sciences or engineering. Students will pursue a core program encompassing science, engineering and finance supplemented with important skills courses in risk assessment, statistics and computer modeling and simulations. Those who graduate with the M.S. degree will be well prepared to pursue professional careers in business and industry, which build on their degrees in the natural sciences. This degree will produce individuals with the analytical and problem-solving skills of natural scientists combined with the necessary training in finance and management needed in the business world.

Dornsife College of Letters, Arts and Sciences

Environmental Studies

Undergraduate Degrees

Environmental Studies (ENVS)

REQUIRED CORE COURSES (48 UNITS)		UNITS
BISC 103Lx	General Biology for the Environment and Life	4
CHEM 103Lx	General Chemistry for the Environment and Life	4
ENST 100	Introduction to Environmental Studies	4
ENST 320ab	Water and Soil Sustainability; Energy and Air Sustainability	4-4
ENST 387	Economics for Natural Resources and the Environment	4
ENST 495	Senior Seminar in Environmental Studies	4

GEOL 160L	Introduction to Geosystems	4
IR 323	Politics of Global Environment	4
MATH 118x*	Fundamental Principles of Calculus, or	4
MATH 125*	Calculus I	4
POSC 270	Introduction to Environmental Law and Politics	4
PSYC 274L*	Statistics I	4

Bachelor of Arts in Environmental Studies

Concentration in Sustainability, Energy and Society (56 units)

In addition to the 48-unit core:

TWO OF THE FOLLOWING COURSES		UNITS
ENST 370	Marine and Coastal Environmental Policy	4
ENST 410	Water and Energy Management in the Asia-Pacific Region	4
ENST 442	Global Climate Change: Policy and Society	4
ENST 485	Role of the Environment in the Collapse of Human Societies	4
MOR 466	Business and Environmental Sustainability	4

Concentration in Oceans, Life and People (56 units)

In addition to the 48-unit core:

TWO OF THE FOLLOWING COURSES		UNITS
BISC 427	The Global Environment	4
ENST 310	Sustainable Fisheries Management	4
ENST 370	Marine and Coastal Environmental Policy	4
ENST 410	Water and Energy Management in the Asia-Pacific Region	4
ENST 480**	Integrated Ecosystem Management in Micronesia	4

Concentration in Climate, Earth and Environment (56 Units)

In addition to the 48-unit core:

TWO OF THE FOLLOWING COURSES		UNITS
ENST 442	Global Climate Change: Policy and Society	4
ENST 445	Earth Climate: Past, Present, and Future	4
ENST 480**	Integrated Ecosystem Management in Micronesia	4
GEOL 470L	Environmental Hydrogeology	4

Concentration in Environmental Public Policy (56 Units)

In addition to the 48-unit core:

REQUIRED COURSES		UNITS
PPD 420	Environmental Impact Assessment	4
PPD 461	Sustainable Communities, Policy and Planning	4

Bachelor of Science in Environmental Studies

Concentration in Sustainability, Energy and Society (72 units)

In addition to the 48-unit core:

TWO OF THE FOLLOWING COURSES		UNITS

ENST 370	Marine and Coastal Environmental Policy	4
ENST 410***	Water and Energy Management in the Asia-Pacific Region	4
ENST 442***	Global Climate Change: Policy and Society	4
ENST 485***	Role of the Environment in the Collapse of Human Societies	4
MOR 466	Business and Environmental Sustainability	4

FOUR OF THE FOLLOWING ELECTIVE COURSES **UNITS**

BISC 427	The Global Environment	4
ENST 410***	Water and Energy Management in the Asia-Pacific Region	4
ENST 442***	Global Climate Change: Policy and Society	4
ENST 445	Earth Climate: Past, Present, and Future	4
ENST 485***	Role of the Environment in the Collapse of Human Societies	4
GEOG 360	Environmental Disasters	4
GEOL 450L	Geosystems	4
GEOL 470L	Environmental Hydrogeology	4
IR 422	Ecological Security and Global Politics	4
POSC 436	Environmental Politics	4
PPD 461	Sustainable Communities, Policy and Planning	4

Concentration in Oceans, Life and People (72 units)

In addition to the 48-unit core:

TWO OF THE FOLLOWING COURSES **UNITS**

BISC 427	The Global Environment	4
ENST 310***	Sustainable Fisheries Management	4
ENST 370	Marine and Coastal Environmental Policy	4
ENST 410***	Water and Energy Management in the Asia-Pacific Region	4
ENST 480**	Integrated Ecosystem Management in Micronesia	4

FOUR OF THE FOLLOWING ELECTIVE COURSES **UNITS**

BISC 315L	Introduction to Ecology	4
BISC 320L	Molecular Biology	4
BISC 447L	Island Biogeography and Field Ecology	4
BISC 456L	Conservation Genetics	4
BISC 469L	Marine Biology	4
ENST 310***	Sustainable Fisheries Management	4
ENST 410***	Water and Energy Management in the Asia-Pacific Region	4
ENST 480**	Integrated Ecosystem Management in Micronesia	4
ENST 485	Role of the Environment in the Collapse of Human Societies	4
GEOL 320L	Surficial Processes and Stratigraphic Systems	4
GEOL 412	Oceans, Climate, and the Environment	4
GEOL 450L	Geosystems	4
GEOL 470L	Environmental Hydrogeology	4

Concentration in Climate, Earth and Environment (72 units)

In addition to the 48-unit core:

TWO OF THE FOLLOWING COURSES **UNITS**

ENST 442***	Global Climate Change: Policy and Society	4
ENST 445	Earth Climate: Past, Present, and Future	4
ENST 480**	Integrated Ecosystem Management in Micronesia	4
GEOL 470L	Environmental Hydrogeology	4

REQUIRED COURSES **UNITS**

MATH 126	Calculus II	4
PHYS 151L	Fundamentals of Physics I: Mechanics and Thermodynamics	4

TWO OF THE FOLLOWING ELECTIVE COURSES **UNITS**

BISC 427	The Global Environment	4
ENST 442***	Global Climate Change: Policy and Society	4
ENST 480**	Integrated Ecosystem Management in Micronesia	4
ENST 485	Role of the Environment in the Collapse of Human Societies	4
GEOL 315L	Minerals and Earth Systems	4
GEOL 412	Oceans, Climate and the Environment	4
GEOL 425L	Data Analysis in the Earth and Environmental Sciences	4
GEOL 450L	Geosystems	4

Concentration in Environmental Public Policy (72 Units)

In addition to the 48-unit core:

REQUIRED COURSES **UNITS**

PPD 420	Environmental Impact Assessment	4
PPD 461	Sustainable Communities, Policy and Planning	4

FOUR OF THE FOLLOWING ELECTIVE COURSES **UNITS**

PPD 314	Public Policy and Law	4
PPD 315	Analytic Foundations for Public Policy	4
PPD 353	Introduction to Philanthropy and Grant-writing	4
PPD 382	International Development	4
PPD 410	Comparative Urban Development	4
PPD 427L	Geographic Information Systems and Planning Applications	4
PPD 478	Social Innovations	4

*MATH 118x is not available as an alternative to MATH 125 for the concentration in Climate, Earth, and the Environment since this concentration requires MATH 125 and MATH 126. MATH 125 has a prerequisite of either the math placement exam or MATH 108. MATH 114 is a prerequisite for PSYC 274L.

**ENST 298abL is a corequisite for ENST 480. ENST 480 cannot be double-counted for B.S. ENVS degree credit.

***ENST 310, ENST 410, ENST 442, and ENST 485 cannot be double-counted for B.S. ENVS degree credit.

Progressive Degree Program in Environmental Studies

This progressive degree program allows superior USC undergraduates completing a bachelor's degree in a related natural science or environmental policy area to also complete a master's degree in environmental studies in as little as five years. An overall GPA of 3.2 or higher in all courses taken at USC is preferred. A 3.2 GPA does not guarantee acceptance. For more information about progressive degrees, see this page.

Requirements for the Minor in Environmental Studies

REQUIRED CORE COURSES		UNITS
ENST 100	Introduction to Environmental Studies	4
ENST 320ab	Water and Soil Sustainability; Energy and Air Sustainability	4-4

**ENST 100 is a corequisite for GEOL 160L.*

Dornsife College of Letters, Arts and Sciences

Environmental Studies

Graduate Degrees

Master of Arts in Environmental Studies

The master's degree program in environmental studies focuses on issues and problems concerning public policy. A main goal of the graduate program is to educate students who already have a good grounding in the natural sciences about central theories, concepts and principles in public policy. A minimum of 41 units is required to receive an M.A. in environmental studies.

All students have a common point of entry into the graduate program. ENST 500 Introduction to Environmental Studies is broad and interdisciplinary. It provides students with an introduction to the field and to the different concentrations in the program. POSC 546 Seminar in Environmental Policy represents the second required core course. It offers students an overview of environmental politics, policy and regulations. Environmental science courses — ENST 501, ENST 502, ENST 503 and ENST 504 — expose students to critical scientific principles, concepts and issues related to pollution control, remediation and ecology. Students must also obtain a background in statistics and economics by taking ENST 510 Statistics for Environmental Analysis (or an equivalent course in the social sciences) and ECON 487 Resource and Environmental Economics. Finally, all students must complete the capstone course, ENST 595 Graduate Seminar in Environmental Studies.

Students who enroll in the master's degree program must pursue one of three concentrations: global environmental issues and development; law, policy and management; and environmental planning and analysis. Each one differs in professional training and educational focus and, perhaps most importantly, exposes students to fields and areas of knowledge that are closely and critically connected to today's most vexing environmental policy problems.

The concentration in global environmental issues and development introduces students to the social, political and economic dynamics that underlie regional and global environmental problems and seeks to unravel the complex interrelationships between political economy, population growth and development in the Pacific Rim and elsewhere in the world.

The concentration in law, policy and management is intended for those who wish to work (or already work) in government agencies, private companies and non-profit organizations (e.g., environmental groups). Students learn about the interconnections that exist between law, public policymaking, management (i.e., the administration of human and financial resources) and environmental issues.

The third concentration, environmental planning and analysis, is for students who wish to study technical matters related to land use planning and analysis. This concentration seeks to train students who wish to work (or who are already working) for planning departments, planning commissions and consulting firms.

A master's thesis is not required for the M.A. degree.

Required Courses and Concentrations

A minimum of 41 units is required. All courses are four units unless otherwise noted.

CORE COURSES (14 UNITS):	UNITS
---------------------------------	--------------

Core introductory course:	
ENST 500 Introduction to Environmental Studies	4

ENVIRONMENTAL SCIENCE	UNITS
------------------------------	--------------

ENST 501* Environmental Science I	2
ENST 502 Environmental Science Seminar I	1
ENST 503 Environmental Science II	2
ENST 504 Environmental Science Seminar II	1
ENST 595 Graduate Seminar in Environmental Studies	4

Environmental regulation and policy course:

POSC 546 Seminar in Environmental Policy	4
---	---

**ENST 502 and 504 are corequisites for ENST 501 and 503, respectively, and ENST 501 is a prerequisite for ENST 503.*

SKILLS COURSES (8 UNITS):	UNITS
----------------------------------	--------------

Natural resource economics course:	
ECON 487 Resource and Environmental Economics	4

Statistics course: Students select one of the following:

ENST 510 Statistics for Environmental Analysis	4
GEOG 592 Quantitative Methods in Geography	4
IR 514 Multivariate Analysis	4
POSC 500 Methods of Political Science	4
POSC 600 Seminar in Advanced Research Methods	4
SOCI 521 Quantitative Methods and Statistics	4

Admission Requirements

Students who wish to enter the Master of Arts program in environmental studies are expected to have a GPA of at least 3.0 (A = 4.0). Students with a baccalaureate degree in any major will be admitted into the program as long as they have completed a year of biology, a year of chemistry, a course in earth sciences and a course in each of the following areas: a course in either earth, life, or physical sciences or engineering; a course in statistics (or calculus); and an introductory human environment, social ecology or environmental studies course in the social sciences. It is recommended that students take a science course in ecology and a course in economics at the undergraduate level prior to applying for admission. The director of the Environmental Studies Program will consider relevant course work and work experience as a possible substitute for the required and recommended course work.

Selection Criteria

Selection for graduate study is based on letters of reference, the student's previous academic record, the Graduate Record Examinations and a statement of purpose for graduate study.

Application Procedure

Applicants should contact the Environmental Studies Program office for an admission package. All applicants should return their applications by March 1 for full consideration. The following components of the application are required: (1) a completed USC Application for Admission to Graduate Studies, (2) official transcripts of all undergraduate and graduate course work taken to date, (3) the results of the General Test of the GRE or notification of when it will be taken and that a request has been made to send the results to USC and (4) at least three letters of recommendation from persons directly familiar with the student's academic work and potential for successful graduate study.

Advisement

Advisement for the graduate program in environmental studies is viewed as an ongoing process. Before entering graduate school and during the first months of graduate school, each student should work with the director of the Environmental Studies Program on devising a plan for completing his or her course work.

Degree Requirements

The master's degree in environmental studies is under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School.

Master of Science, Environmental Risk Analysis

The focus of the M.S., Environmental Risk Analysis degree is on advanced training for students with an existing science background. Students will enter the M.S. program with a B.S. degree in a core natural science field or in engineering, environmental science and certain fields of geography. Students take a core curriculum in science, engineering and finance, which is supplemented by important tools courses in risk assessment, statistics and computer modeling. Students learn about the basics of environmental science in a two-semester combination of courses and seminars (ENST 501, ENST 502, ENST 503, ENST 504). An advanced environmental science seminar (ENST 505ab) is offered in a two-semester sequence and ties together science, technology and finance with risk assessment and policy. The first semester of the course is devoted to analyzing case studies taken from business, industry and government. During the second semester students work on a project that employs the tools they have acquired in linking science, policy, technology and finance.

A master's thesis is not required for the M.S. degree. The M.S. degree in environmental risk analysis will give students the quantitative skills needed to understand and assess environmental risks and to use that information in business, industry, government and society.

Required Courses

A minimum of 48 units is required.

ENVIRONMENTAL RISK ANALYSIS		UNITS
ENST 530	Environmental Risk Analysis	4
ENVIRONMENTAL SCIENCE		UNITS
ENST 501*	Environmental Science I	2
ENST 502	Environmental Science Seminar I	1
ENST 503	Environmental Science II	2
ENST 504	Environmental Science Seminar II	1
ENST 505ab	Advanced Environmental Science Seminar	2-2

**ENST 502 and 504 are corequisites for ENST 501 and 503, respectively, and ENST 501 is a prerequisite for ENST 503.*

NATURAL SCIENCE

One graduate-level science course from outside undergraduate major and two graduate-level science courses

FINANCE		UNITS
GSBA 510	Accounting Concepts and Financing Reporting	3
GSBA 543	Managerial Perspectives, or	
MOR 569	Negotiation and Deal-Making	3
GSBA 548	Corporate Finance	3

TECHNICAL SKILLS		UNITS
ENST 510	Statistics for Environmental Analysis	4
One modeling course		
Two technology/engineering courses		

Admission Requirements

Students who wish to enter the Master of Science program in environmental risk analysis are expected to have a GPA of at least 3.0 (A = 4.0). Students with a baccalaureate degree in the natural sciences, mathematics, environmental science, geography and engineering will be admitted into the program. It is recommended that students have completed an introductory human environment, social ecology or environmental studies course in the social sciences as well as a course in economics and/or environmental policy. The director of the Environmental Studies Program will consider relevant course work and work experience as a possible substitute for the required and recommended course work.

Selection Criteria

Selection for graduate study is based on letters of reference, the student's previous academic record, the Graduate Record Examinations and a statement of purpose of graduate study.

Application Procedure

Applicants should contact the Environmental Studies Program office for an admission package. All applicants should return their applications by March 1 for full consideration. The following components of the application are required: (1) a completed USC Application for Admission to Graduate Studies; (2) official transcripts of all undergraduate and graduate course work taken to date; (3) the results of the General Test of the GRE or notification of when it will be taken and that a request has been made to send the results to USC; and (4) at least three letters of recommendation from persons directly familiar with the student's academic work and potential for successful graduate study.

Advisement

Advisement for the graduate program in environmental studies is viewed as an ongoing process. Before entering graduate school and during the first months of graduate school, each student should work with the director of the Environmental Studies Program on devising a plan for completing his or her course work.

Degree Requirements

The master's degree in environmental risk analysis is under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School.

Dornsife College of Letters, Arts and Sciences

Environmental Studies

Courses of Instruction

ENVIRONMENTAL STUDIES (ENST)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ENST 100g Introduction to Environmental Studies (4, FaSp) Gateway to the majors and minors in Environmental Studies. Provides students with an overview of how government agencies and societal institutions address (or fail to address) the interrelated social and scientific aspects of environmental problems and policies.

ENST 150gx Environmental Issues in Society (4, Fa) Exploration of the major social, political, economic, religious, and philosophical disagreements that exist between scholars, leaders, and citizens concerning today's most serious environmental issues and problems. Not available for major or minor credit to environmental studies majors and minors.

ENST 201 Introduction to Applied Environmental Science and Engineering (4) (Enroll in ENE 201)

ENST 255 American Environmentalism (4) (Enroll in GEOG 255)

ENST 270 Introduction to Environmental Law and Politics (4, Sp) (Enroll in POSC 270)

ENST 298abL Introduction to Scientific Diving (2-2, Sp) Extensive academic preparation in the physics, physiology, safety, and methodology for in-water scientific diving. Duplicates credit in former ENST 298L. *Recommended preparation:* background in natural science and/or environmental studies.

ENST 310 Sustainable Fisheries Management (4, Sp) Examination of scientific, social, political, and economic factors of fisheries management, engaging students in key issues of coastal and marine sustainability. Catalina Semester only. *Prerequisite:* ENST 100; *recommended preparation:* any introductory biology course.

ENST 320ab Water and Soil Sustainability; Energy and Air Sustainability (a: 4, Fa; b: 4, Sp) Overview of issues related to water and soil sustainability including science, policy and business aspects. (ENST 320a: Duplicates credit in former ENST 420.) *Recommended preparation:* ENST 100. (ENST 320b: Duplicates credit in former ENST 430.)

ENST 323 Politics of Global Environment (4) (Enroll in IR 323)

ENST 345 Conservation of Natural Resources (4) (Enroll in GEOG 345)

ENST 347 Environmental Law (4) (Enroll in POSC 347)

ENST 352 Conservation Biology (4, Sp) (Enroll in BISC 352)

ENST 360 Environmental Disasters (4) (Enroll in GEOG 360)

ENST 370 Marine and Coastal Environmental Policy (4, Sp) Survey of major environmental policies both international and domestic as they relate to fisheries, shipping, pollution, seaports and coastal management. *Recommended preparation:* ENST 100, ENST 387.

ENST 387 Economics for Natural Resources and the Environment (4, Fa) An introduction to the economic tools and issues that affect natural resource use and environmental management.

ENST 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

ENST 396 Directed Governmental and Political Leadership Internship (2-8, max 8) (Enroll in POSC 395)

ENST 400 Environmental Engineering Principles (3) (Enroll in ENE 400)

ENST 410 Water and Energy Management in the Asia-Pacific Region (4, Sp) An exploration of how the essential resources of water and energy are managed in the Asia-Pacific region and the implications of such management. *Prerequisite:* ENST 320ab.

ENST 422 Ecological Security and Global Politics (4) (Enroll in IR 422)

ENST 427 The Global Environment (4, Sp) (Enroll in BISC 427)

ENST 436 Environmental Politics (4) (Enroll in POSC 436)

ENST 440 Environmental Risk Assessment (4, Sp) Assesses various potential environmental risks and examines how science, government, business, and industry measure and prepare for environmental risks. *Recommended preparation:* ENST 100.

ENST 442 Global Climate Change: Policy and Society (4, Sp) Examines climate change policy at the international, national, state, and local levels, and explores the role civil society plays in climate change politics. *Prerequisite:* ENST 320b, POSC 270.

ENST 445 Earth Climate: Past, Present, and Future (4, Fa) Examination of the tools used to reconstruct past climate change and a thorough discussion of past climate changes on earth with an emphasis on the recent past. *Prerequisite:* MATH 118x or MATH 125 and ENST 320b; *recommended preparation:* any introductory GEOL course.

ENST 456L Conservation Genetics (4, Sp) (Enroll in BISC 456L)

ENST 466 Business and Environmental Sustainability (4) (Enroll in MOR 466)

ENST 470 Environmental Hydrogeology (4, FaSpSm) (Enroll in GEOL 470L)

ENST 480 Integrated Ecosystem Management in Micronesia (4, SpSm) Field studies in ecosystem management tools used to investigate complex environmental problems in Micronesia. Historical, cultural, and scientific topics, direct observations of biological, physical, and chemical conditions. *Corequisite:* ENST 298aL.

ENST 485 Role of the Environment in the Collapse of Human Societies (4, Sm) Field studies in the roles of environmental problems in the collapse of ancient civilizations and analogous problems facing contemporary populations in those same places. *Recommended preparation:* ENST 100.

ENST 487 Resource and Environmental Economics (4) (Enroll in ECON 487)

ENST 490x Directed Research (1–8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

ENST 495 Senior Seminar in Environmental Studies (4, Sp) Students form multidisciplinary teams and are asked to study and resolve a major environmental problem facing a particular region or target population.

ENST 499 Special Topics (2–4, max 8) Selected topics dealing with environmental issues and problems.

ENST 500 Introduction to Environmental Studies (4, Fa) This course introduces students to the major environmental issues and problems society faces today. Business, industry, and government actions concerning these issues and problems are examined.

ENST 501 Environmental Science I (2, Fa) Exposes students to critical scientific principles, concepts, and issues related to pollution control, remediation, and ecology. *Corequisite:* ENST 502.

ENST 502 Environmental Science Seminar I (1, Fa) A series of biweekly guest lectures on critical scientific principles, concepts, and issues related to pollution control, remediation, and ecology.

ENST 503 Environmental Science II (2, Sp) A continuation of ENST 501. Exposes students to critical

scientific principles, concepts, and issues related to pollution control, remediation, and ecology. *Prerequisite:* ENST 501; *corequisite:* ENST 504.

ENST 504 Environmental Science Seminar II (1, Sp) A continuation of ENST 502. A series of biweekly guest lectures on critical scientific principles, concepts, and issues related to pollution control, remediation, and ecology.

ENST 505ab Advanced Environmental Science Seminar (2-2, FaSp) Ties together science, technology, and finance with risk assessment and policy.

ENST 510 Statistics for Environmental Analysis (4) This course introduces graduate students to the various quantitative techniques and methodological approaches used in pollution control, natural resources management, and environmental protection.

ENST 520 Environmental Law and Policy (4, Sp) Introduces students to the central issues, concepts, and theories in environmental law and policy and analyzes present environmental laws and regulations.

ENST 530 Environmental Risk Analysis (4, Fa) Analyzes various potential environmental risks and examines how science, government, and business measure and prepare for environmental risks.

ENST 536 The Landscape Planning Process (3) (Enroll in ARCH 536)

ENST 540 California Coastal Zone Science and Policy (4, Sp) Science and policy issues used to characterize and manage California coastal resources. Key issues include: coastal pollution, public health, ecosystem management, and marine reserves. *Recommended preparation:* ENST 500.

ENST 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

ENST 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

ENST 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

ENST 595 Graduate Seminar in Environmental Studies (4, Sp) Addresses the obstacles to environmental policymaking and management by examining the interrelationships between science, technology, and social science. *Recommended preparation:* ENST 500, ENST 501, ENST 502, ENST 503, ENST 504.

ENST 599 Special Topics (2–4, max 8) Subjects specifically relevant to an environmental studies field, sometimes conducted as intensive short courses.

Professors: Elinor Accampo, Ph.D. (*History*); Joseph Dane, Ph.D. (*English*); Eunice Howe, Ph.D. (*Art History*)

Associate Professor: David Rollo, Ph.D. (*English*)

**Recipient of university-wide or school teaching award.*

Undergraduate Programs

The Department of French and Italian offers majors and minors in French and Francophone Studies and in Italian. The study of French or Italian involves the mastery of the languages and their literary and cultural expressions in fiction and non-fiction, dramatic, cinematic and poetic texts, as well as the study of social and political institutions in their relationship to cultural production.

The department offers a variety of classes in French and Italian, as well as some courses with readings and discussion in English to satisfy diverse needs. Topics range broadly from the study of a single author or literary genre to current events, cinema and new media, gender and postcolonial studies, and literary criticism.

Courses are kept small to allow for maximum interaction between students and professors. Students in both French and Italian work closely with their advisers to develop an appropriate course of study. This often involves study abroad. The department runs summer programs in Dijon, France and Rome, Italy; students also attend semester- or year-long programs in Paris and Florence or Rome.

Graduate Programs

The M.A. and Ph.D. degrees in Comparative Studies in Literature and Culture (French and Francophone Studies) are offered through the Comparative Studies in Literature and Culture program.

French and Italian

Undergraduate Degrees

Advisement

All French and Italian department majors should consult with the department student adviser and with our faculty adviser for French and Italian. Students should seek an appointment early in each semester so that an advisement file may be established for each student.

Requirements for the Bachelor of Arts in French

For the lower division, FREN 250 French IV is required. The upper-division requirements include three core courses plus an additional six courses to be selected in consultation with the department adviser (no more than two of which may be in English). Of the additional six courses, at least two must be at the 400 level.

LOWER DIVISION

	UNITS
FREN 250 French IV	4

UPPER DIVISION (9 COURSES)

	UNITS
Required core courses:	

FREN 300 French Grammar and Composition	4
---	---

FREN 330 Critical Writing in French	4
-------------------------------------	---

FREN 351 Introduction to Research in French and Francophone Cultures	4
--	---

Six upper-division French courses to be chosen from the following and to include at least two 400-level courses:

FREN 310 Media French	4
-----------------------	---

FREN 320 French Cinema	4
------------------------	---

FREN 347 Race, Gender and Power in Francophone Literature	4
---	---

FREN 360 Business and Technical French	4
--	---

FREN 370 Equality and Difference Around the Enlightenment	4
---	---

FREN 373 Remembering Loss, Writing Memory	4
---	---

FREN 375 Global Narratives of Illness and Disability	4
--	---

FREN 382 Paris Avant-Gardes (Paris semester only)	4
---	---

FREN 383 French Women Writers	4
-------------------------------	---

FREN 392 Seminar in Literary and Cultural Studies	4, max 8

FREN 490x	Directed Research	1–8, max 12
FREN 499	Special Topics	2–4, max 8

*FREN 310 and 360 cannot both be taken for credit toward the minor in French.

Honors Program

The B.A. in French with Honors is available to students who have an overall GPA of 3.0 and a GPA of at least 3.5

in courses counted for major credit. To complete the honors program the student must complete three 400-level courses and write an honors thesis of 25–30 pages in French in one of the 400-level courses. The topic of the thesis must be agreed upon with the instructor.

French Honors Society: Pi Delta Phi

Qualifications

Undergraduate students must have completed one semester of upper-division French with a minimum GPA of 3.0 in French and overall. Graduate students must be candidates for advanced degrees in French.

Sequence

A placement test is required of all students resuming French after high school courses in French.

Major Requirements for the Bachelor of Arts in Italian

REQUIRED COURSES — LOWER DIVISION

UNITS

Some or all of these courses may be waived by examination.

ITAL 120	Italian I	4
ITAL 150	Italian II	4
ITAL 220	Italian III	4
ITAL 224	Italian Composition and Conversation	4

REQUIRED COURSES — UPPER DIVISION (6 COURSES)

UNITS

No more than two courses conducted in English may be counted toward the major. A maximum of three courses may be completed outside the department.

Core course:

ITAL 320	Writing About Italian Literature	4
----------	----------------------------------	---

Remaining 5 upper-division Italian courses to be chosen from the following:

ITAL 330	Advanced Italian Composition and Style	4
ITAL 340	Italian Literature from Unification to Fascism (in English)	4
ITAL 345	Contemporary Italy (in English)	4
ITAL 350	Italian Renaissance Literature in Translation (in English)	4
ITAL 380	Italian Women Writers	4
ITAL 435	Ruins, Magic and Melancholy: Italian Literature 1600–1860	4
ITAL 440	Futurism and Fascism in Italy	4
ITAL 446	Italian Cinema and Society (in English)	4
ITAL 450	Dante	4
ITAL 461	Italian Theatre	4
ITAL 462	The Novella Tradition: Fables and Stories	4
ITAL 470	Modern and Postmodern Italian Literature	4
ITAL 480	Perceptions of the Exotic in Italian Culture	4
ITAL 490x	Directed Research	1–8
ITAL 499	Special Topics	2–4, max 8

Italian Minor Requirements

The department offers an Italian minor for students majoring in other disciplines. No more than one class conducted in English may be counted toward the major.

LOWER DIVISION**UNITS**

Some or all of these classes may be waived by examination.

ITAL 120	Italian I	4
ITAL 150	Italian II	4
ITAL 220	Italian III	4
ITAL 224	Italian Composition and Conversation	4

UPPER DIVISION (4 COURSES)**UNITS**

Required core course:

ITAL 320	Writing About Italian Literature (or equivalent)	4
----------	--	---

Plus 3 upper-division courses to be chosen from the following:

ITAL 330	Advanced Italian Composition and Style	4
ITAL 340	Italian Literature from Unification to Fascism (in English)	4
ITAL 345	Contemporary Italy (in English)	4
ITAL 350	Italian Renaissance Literature in Translation (in English)	4
ITAL 380	Italian Women Writers	4
ITAL 435	Ruins, Magic and Melancholy: Italian Literature 1600–1860	4
ITAL 440	Futurism and Fascism in Italy	4
ITAL 446	Italian Cinema and Society (in English)	4
ITAL 450	Dante	4
ITAL 461	Italian Theatre	4
ITAL 462	The Novella Tradition: Fables and Stories	4
ITAL 470	Modern and Postmodern Italian Literature	4
ITAL 480	Perceptions of the Exotic in Italian Culture	4
ITAL 490x	Directed Research	1–8
ITAL 499	Special Topics	2–4, max 8

FRENCH (FREN)

FREN 020x Course in Reading French (2, FaSpSm) For graduate students who wish help in meeting the French reading requirement for the Ph.D. degree. Synoptic presentation of French grammar. Emphasis on development of reading skills. Not available for degree credit. Graded CR/NC.

FREN 120 French I (4, FaSpSm) Introduction to current French. Oral practice, listening and reading comprehension; grammar necessary for simple spoken and written expression. *Prerequisite:* No previous experience or appropriate placement score.

FREN 150 French II (4, FaSpSm) Continuation of FREN 120. *Prerequisite:* FREN 120 or appropriate placement score.

FREN 220 French III (4, FaSpSm) Continuation of FREN 150. Review of structural patterns of French; selected cultural and literary readings; conversation and composition. *Prerequisite:* FREN 150 or appropriate placement score.

FREN 235x Intermediate Conversational French: Culture, Society, and Communication (2, FaSp) Designed for non-majors/minors interested in maintaining and developing French language competency. Builds vocabulary, ease of communication, and cultural knowledge through discussion of contemporary topics. Graded CR/NC. Not available for credit to French majors. Not open to French majors. *Prerequisite:* FREN 220.

FREN 236x Professional Communication in French (2, FaSp) Professional communication skills and cultural competency as preparation for working in an international environment. Not available for major credit to French majors or minors. *Prerequisite:* FREN 220.

FREN 250 French IV (4, FaSpSm) Introduction to French literature through the study of texts and audiovisuals organized around a central theme; develops close-reading techniques and discursive skills; reviews French grammar. *Prerequisite:* FREN 220 or French placement exam.

FREN 300 French Grammar and Composition (4, FaSpSm) Grammatical structure and vocabulary building with practical application to written composition. *Prerequisite:* FREN 250.

FREN 310 Media French (4, FaSpSm) Analysis of French media. Practice in sustained conversation. Emphasis on spoken sentence patterns. *Prerequisite:* FREN 250.

FREN 320 French Cinema (4, FaSp) Film-making in France from the earliest experiments to current trends. Emphasis on the political, social, historical context of French films. Taught in English. Reading knowledge of French recommended.

FREN 330 Critical Writing in French (4, FaSpSm) Advanced composition through critical reading of literary texts; comprehensive analysis of difficult grammatical structures and stylistics. *Prerequisite:* FREN 300.

FREN 347 Race, Gender and Power in Francophone Literature (4, FaSpSm) Study of post-colonialism as a ferment for literary creation in the literature of French expression from Africa, the Caribbean and Canada. Conducted in French. *Corequisite:* FREN 330.

FREN 351 Introduction to Research in French and Francophone Cultures (4, FaSp) Introduction to research methods through the study of a specific topic in French and/or Francophone literature and culture. *Corequisite:* FREN 330.

FREN 360 Business and Technical French (4) Specific vocabulary and formulae used in international commerce. Attention given to developing vocabulary and standard forms appropriate to individual career objectives. *Recommended preparation:* FREN 330.

FREN 370gm Equality and Difference around the Enlightenment (4, FaSpSm) 18th- and 20th-century debates around the idea of equality and the notion of difference. Relevance of the Enlightenment to contemporary discussions of identity, citizenship, and human rights. Conducted in English.

FREN 373 Remembering Loss, Writing Memory (4, FaSp) An exploration into how genocides and episodes of mass violence have been thought about, remembered and expressed in France and the Francophone world. Conducted in English.

FREN 375mw Global Narratives of Illness and Disability (4, Fa) Study of difference as represented through French, Francophone and related narratives of disability and illness, with attention to race and gender. Conducted in English.

FREN 382 Paris Avant-Gardes (4) Exploration of experimental artistic collaborations between poets, novelists, art critics and artists of the Paris Avant-gardes in 19th and 20th century. Taught in French. Paris Semester. *Prerequisite:* FREN 300; *corequisite:* FREN 330.

FREN 383 French Women Writers (4, FaSp) Major figures and their roles in French society and contributions to French literature. Conducted in French. *Corequisite:* FREN 330.

FREN 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

FREN 392 Seminar in Literary and Cultural Studies (4, max 8, FaSp) Selected topics in French and Francophone literature and culture. Conducted in French. *Corequisite:* FREN 330.

FREN 393 Seminar in French Thought and Theory (4, FaSp) Introduction to important trends in recent French philosophy, political and social theory, psychoanalysis, ethnology, semiotics, and media studies. Emphasis to be determined by department. Conducted in English.

FREN 401 Studies in Early Modernity (4, max 8, FaSp) Study and analysis of representative works and major intellectual, cultural, and artistic trends from the early modern period (pre-1789). *Prerequisite:* FREN 330.

FREN 402 Studies in Modernity (4, max 8, FaSp) Study and analysis of representative works and major intellectual, cultural, and artistic trends from the modern period (post-1789). *Prerequisite:* FREN 330.

FREN 403 Studies in Colonialism and Postcolonialism (4, max 8, FaSp) Study and analysis of colonialism and postcolonialism in French and Francophone contexts. *Prerequisite:* FREN 330.

FREN 404 Studies in an Author (4, FaSp) Close readings in works of a single influential French or Francophone author. Focused study of style, creative developments, historical context. Conducted in French. *Prerequisite:* FREN 330.

FREN 410 Actualités Françaises (4, Sp) Present day French life through readings in French periodicals and viewing of French films and art exhibits. Non-majors prepare assignments in English. Conducted in French. Spring semester in Paris only. *Recommended preparation:* FREN 330.

FREN 432 French Theatre (4, Sp) (Paris Semester only) A survey of French theatre from the 17th century to the present. Students read plays ranging from classical comedy and tragedy to modern movements. Live theatre performances will supplement class work. Taught in French. *Prerequisite:* FREN 330; *recommended preparation:* familiarity with French history since the Renaissance.

FREN 445 Studies in Gender, Feminism and Sexuality (4, FaSp) Major feminist thinkers and writers viewed from the perspective of the evolution of gender and sexuality in contemporary France. Conducted in French. *Prerequisite:* FREN 330.

FREN 446 Contemporary French Thought (4, FaSp) Readings in structuralism, post-structuralism, feminism, and deconstruction. Conducted in French. *Prerequisite:* FREN 330.

FREN 448m France and Islam (4, FaSp) Historical and theoretical analyses of the complex history of Western perceptions of Islam, focusing on France. Taught in French. *Prerequisite:* FREN 330; *recommended preparation:* REL 137g for Religion majors and minors.

FREN 449 Studies in French Civilization (4, Sp) (Paris Semester only) An analysis of the prestige of Paris, past and present, based upon close examination of literary texts and graphic materials, and visits to sites and monuments. *Recommended preparation:* FREN 300.

FREN 464 Colloquium: French Civilization (4, max 8, FaSpSm) Selected topics such as the press, educational institutions, French cinema today, and French colonial history. Conducted in French. *Prerequisite:* FREN 330.

FREN 490x Directed Research (1–8, max 12) Individual research and readings. Not available for graduate credit.

FREN 499 Special Topics (2–8, max 8) Selected topics in French. *Prerequisite:* FREN 330.

FREN 501 Early Modernities (4, FaSp) Broad introduction to French culture from the late Middle Ages through the 18th century; investigation of works of literature, philosophy, and visual culture.

FREN 503 Modernities (4) An intellectual genealogy of French modernity and modernism through the examination of canonical literary texts and theories.

FREN 504 Studies in Francophone Literature and Thought (4) Topics in Francophone literature and intellectual history of Africa, Asia and the Americas. Emphasis on colonial history and political and aesthetic concerns.

FREN 520 Studies in Diaspora and Transnationalism (4) Introduction to contemporary literature and thought on the dynamics of diaspora, transnationalism, and globalization.

FREN 530 Studies in a Genre (4) Studies one of the genres in French literature (including novel, poetry, drama, and essay) in any historical period or periods.

FREN 540 Studies in French Literature and Philosophy (4) Examines literary and philosophical works side by side in any historical period or periods in France.

FREN 550 Studies in Literature and Other Media (4) Survey-like review of the interaction between verbal and other artistic media such as print, music, dance, theater, and painting and the visual arts.

FREN 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

FREN 592 Practicum in Teaching French (2, Fa) Introduction to the approaches and techniques of teaching French as a second language. Open only to master's and Ph.D. students who will be assistant lecturers in French.

FREN 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

FREN 603 Seminar on an Author (4) Examines the work of a significant French author along with its critical and theoretical assessments.

FREN 604 Topics in Contemporary French Thought (4) Examines French thought from 1960 to the present day.

FREN 695 Topics and/or Themes in French Literature (4, max 12)

FREN 696 Topics and/or Themes in Francophone Literature (4, max 12) Advanced seminar with varying focus on the Francophone literature and culture of West Africa, North Africa, the Caribbean, Quebec and Southeast Asia.

FREN 790 Research (1–12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

FREN 794abcdz Doctoral Dissertation(2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

ITALIAN (ITAL)

ITAL 020x Course in Reading Italian (2) For graduate students who wish help in meeting the Italian reading requirement for the Ph.D. degree. Synoptic presentation of Italian grammar. Emphasis on development of reading skills. Not available for degree credit. Graded CR/NC.

ITAL 120 Italian I (4, FaSpSm) Introduction to current Italian. Oral practice, hearing and reading comprehension; grammar necessary for simple spoken and written expression. Lecture, classroom drill, laboratory drill. *Prerequisite:* Italian placement exam.

ITAL 150 Italian II (4, FaSpSm) Continuation of Italian I. *Prerequisite:* ITAL 120 or Italian placement exam.

ITAL 220 Italian III (4, FaSpSm) Continuation of Italian II. Review of structure of the language, drill in aural and reading comprehension, practice in oral expression. *Prerequisite:* ITAL 150 or Italian placement exam.

ITAL 224 Italian Composition and Conversation (4, FaSpSm) Practice in composition and conversation; organized around a set of themes; develops close-reading techniques and discursive skills; reviews Italian grammar. *Prerequisite:* ITAL 220 or Italian placement exam.

ITAL 235x Intermediate Conversational Italian (2, FaSp) Designed for students interested in maintaining and developing Italian language competency. Builds and reinforces vocabulary, idioms, communication skills and knowledge of Italian cultural aspects through discussion of contemporary topics. Graded CR/NC. *Prerequisite:* ITAL 220.

ITAL 320 Critical Writing in Italian (4, FaSpSm) Advanced composition through critical reading of literary texts; comprehensive analysis of difficult grammatical structures and stylistics. *Prerequisite:* ITAL 224.

ITAL 345 Contemporary Italy (4) Italian literature and arts in Italy following World War II. Conducted in English.

ITAL 350g Italian Renaissance Literature in Translation (4) Readings of major texts of Italian literature of the 15th and 16th centuries, including works by Petrarch, the Humanists, Lorenzo de Medici, Ariosto, Machiavelli, Castiglione, and Tasso.

ITAL 352 The Holocaust in Italian Fiction and Film (4, FaSp) The transformation of the Italian Jewish community before, during and after World War II, through an examination of modern novels, essays and films. Taught in English.

ITAL 380 Italian Women Writers (4) Selected poetry, prose, and drama by outstanding Italian women authors and their role in Italian society from the Middle Ages to 20th century. Taught in Italian. *Recommended preparation:* ITAL 320.

ITAL 381 Storytelling in the Italian Tradition (4, FaSp) Reading and close textual scrutiny of major short stories from Boccaccio's Decameron to the present. Conducted in English. (Duplicates credit in former ITAL 462.)

ITAL 382g Dante (4, FaSp) Analysis of the Divina Commedia and other works. Conducted in English. (Duplicates credit in former ITAL 450.)

ITAL 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted.

ITAL 392 Seminar in Literary and Cultural Studies (4, FaSp) Selected topics in Italian literature and culture. Conducted in English.

ITAL 393 Seminar in Italian Thought (4, FaSp) Introduction to important trends in recent Italian philosophy, political and social theory, and media studies. Emphasis to be determined by the department. Conducted in English.

ITAL 402 Studies in Modernity (4, max 8, FaSp) Study and analysis of representative works and major intellectual, cultural, and artistic trends from the modern period (post-1800). Taught in Italian. *Prerequisite:* ITAL 320.

ITAL 403 Studies in Colonialism and Postcolonialism (4, max 8, FaSp) Study and analysis of colonialism and postcolonialism in Italian contexts. *Prerequisite:* ITAL 320.

ITAL 440 Futurism and Fascism in Italy (4) Literature, theatre, visual arts, and politics, from the Futurist Avant-Garde through the reign of Mussolini. *Recommended preparation:* ITAL 320.

ITAL 461 Italian Theatre (4, FaSp) Italian dramatic literature from the earliest written documents to the present. Reading and close textual scrutiny of plays by major dramatists from the Renaissance to the present. Taught in Italian. *Prerequisite:* ITAL 320.

ITAL 490x Directed Research (1–8, max 12) Individual research and readings. Not available for graduate credit.

ITAL 499 Special Topics (2–4, max 8) Special topics in Italian literature, culture, and society. Conducted in Italian. *Prerequisite:* ITAL 224.

ITAL 590 Directed Research (1–12) Research leading to the master's degree in cognate fields. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

ITAL 592 Practicum in Teaching Italian (2, Fa)
Introduction to the approaches and methods of teaching Italian as a second language.

ITAL 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

Dornsife College of Letters, Arts and Sciences

Freshman Seminars

College Academic Services Building 200

(213) 740-2961

dornsife.usc.edu/fsem

Director: Richard Fliegel, Ph.D.

Freshman Seminars introduce freshmen to the larger academic world they are now entering. These small group seminars address topics of current interest in contemporary research and scholarship.

Freshmen earn two units of baccalaureate credit through participation in these weekly seminars. Active exploration of the life of the mind is emphasized through a variety of classroom activities and assignments.

To encourage the relaxed interchange of information and ideas, most seminars are graded credit/no credit. Each seminar is limited in enrollment to 18 freshmen.

Freshman Seminars encourage the natural development of the mentoring relationship between faculty and students. An early start on building these connections enhances the opportunities for intellectual growth throughout the student's years at USC.

Freshman Seminars are offered for the fall and spring semesters in a variety of subjects. Individual topics are indicated by parenthetical titles in the *Schedule of Classes* (usc.edu/soc) under the FSEM designation or on the

department's Website (usc.edu/fsem).

For further information, contact Richard Fliegel, Ph.D., (213) 740-2961, email: fliegel@usc.edu, or Marsha Chavarria-Winbush, (213) 740-2961, email: chavarri@usc.edu.

Courses of Instruction

FRESHMAN SEMINARS (FSEM)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

FSEM 100 Freshman Seminar (2, max 4, FaSp) A seven-to-eleven week course offered for incoming freshmen; limited to 18 students. Graded CR/NC. A combined maximum of 4 units of FSEM 100 and FSEM 101 may be applied to the degree.

FSEM 101 Freshman Seminar (2, max 4, FaSp) A seven-to-eleven week course offered for incoming freshmen; limited to 18 students. Letter graded. A combined maximum of 4 units of FSEM 100 and FSEM 101 may be applied to the degree.

FSEM 180 First Year College Seminar (2, max 4, FaSp) A thematic seminar for entering students in the USC Dornsife College of Letters, Arts and Sciences, exploring an area of academic study, research, or creative work. Graded CR/NC.

**Recipient of a university-wide or college teaching award.*

The Gender Studies Program explores, across disciplines and cultures, the changing roles, functions and images of women and men from feminist perspectives. The undergraduate major focuses on the evidence and argument about what the places of women and men are in culture and what they should be. Course offerings include interdisciplinary core courses, selected cross-listed classes in more than 20 departments and the upper-division community internship and senior seminar. Majors work with program faculty, in conjunction with USC Dornsife College Advising, to develop a four-year program designed to meet their individual needs. The program also offers a minor and a graduate certificate for students majoring in other disciplines.

Dornsife College of Letters, Arts and Sciences

Gender Studies

Requirements

Requirements for the Bachelor of Arts in Gender Studies

For the lower division, one of the following courses may be selected as the requirement: SWMS 210 Social Analysis of Gender or SWMS 215 Gender Conflict in Cultural Contexts. For the upper division, 32 units of SWMS courses, including SWMS 301, SWMS 311 and SWMS 410, are required.

Honors Program Requirements

The Gender Studies Program offers a two-semester honors program, in which qualified students spend their first semester in an honors track in an upper-division seminar, usually SWMS 410 Senior Seminar. During the second semester, all honors students are required to take SWMS 492 Honors Thesis, in which each completes a thesis project on a topic of his or her choosing under faculty direction. Contact the departmental honors director for further information. To graduate with honors, department majors must have a minimum GPA of 3.5 in their major course work.

Gender Studies Minor Requirements

The program offers a minor for students specializing in other disciplines. Twenty units of course work are required for completion of the minor in gender studies: SWMS 210 or SWMS 215; SWMS 301; SWMS 410; and two additional 4-unit upper-division SWMS courses. Since many SWMS courses are cross-listed, the two elective upper-division courses must be from two different departments.

Minor in LGBTQ Studies

The LGBTQ Studies minor focuses on how sexuality and sexual orientation shape gender identities, roles and status in societies past and present. Twenty units of course work are required for completion of the LGBTQ Studies minor: SWMS 210, SWMS 215 or SPAN 215; SWMS 306; and 12 units of upper-division electives.

REQUIRED COURSE – LOWER DIVISION (4 UNITS)		UNITS
SWMS 210	Social Analysis of Gender, or	
SWMS 212	Studies in Gender and Sexuality: An Introduction or	
SWMS 215	Gender Conflict across Cultural Contexts	4
REQUIRED COURSE – UPPER DIVISION (4 UNITS)		UNITS
SWMS 306	Introduction to LGBTQ Studies	4
UPPER-DIVISION ELECTIVES (12 UNITS)		UNITS
ENGL 478	Sexual/Textual Diversities	4
HIST 302	From Sappho to Stonewall: Lesbians in History	4
SOCI 437	Sexuality and Society	4
SWMS 311	Gender Studies and the Community: Internship	4
SWMS 355	Transgender Studies	4
SWMS 358	U.S. Gay and Lesbian History	4
SWMS 384	Gender, Social Inequality, and Social Justice	4
SWMS 385	Men and Masculinity	4
SWMS 425	Queer Los Angeles	4

Graduate Certificate Program

Graduate students intending to concentrate in gender studies must be admitted to a USC graduate or professional program. While meeting the requirements for a departmental graduate degree, they may earn a certificate of competency in gender studies. To earn a certificate, students must take SWMS 560 and other courses from the SWMS list of graduate level courses, 500 and above, to a total of at least 12 units. No more than four units of directed research may be taken and those units must be taken as SWMS 590. Each academic department will determine the number of units completed which may be applied to the student's graduate degree in that department.

In addition to the completion of course requirements, students must include a focus on gender as part of their major department master's thesis, doctoral dissertation or law review note. Or they may take an oral examination on three research papers they have written within the areas of gender studies and on relevant graduate work pertaining to the field of gender studies. The oral exam will be administered by members of the Gender Studies faculty. A Gender Studies faculty member will be assigned as an adviser for each student. Gender Studies faculty will be responsible for judging the adequacy of the gender studies analysis in the student's thesis, dissertation or oral examination.

Dornsife College of Letters, Arts and Sciences

Gender Studies

Courses of Instruction

GENDER STUDIES (SWMS)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult

the *Schedule of Classes*.

SWMS 140g Current Moral and Social Issues (4) (Enroll in PHIL 140g.)

SWMS 210gm Social Analysis of Gender (4, FaSp) Multidisciplinary survey of gender assumptions in relation to sexuality, mental health, social and political relations, and artistic expression.

SWMS 212g Studies in Gender and Sexuality: An Introduction (4, Sp) Examination of how gender and sexuality have been constructed, experienced, and legislated.

SWMS 215gp Gender Conflict across Cultural Contexts (4, Fa) Identification and examination of social and cultural conflicts through the lens of gender, and comparison of such conflicts across cultures, regions, and historical periods.

SWMS 225 Gender, Sex, and Science: A Gender Studies Approach (4, FaSp) Study of sex, gender in relation to science and social sciences; survey of scientific methods, approaches, current research; investigation of gender influences on scientific research.

SWMS 245gm Gender and Sexualities in American History (4) (Enroll in HIST 245gm)

SWMS 300 Women in Antiquity (4) (Enroll in CLAS 300)

SWMS 301gm Feminist Theory: An Introduction (4, FaSpSm) Theories of feminism; historical, social and cultural perspectives of the women's movement in America, Europe, and in developing countries; men's roles in the feminist movement.

SWMS 302 From Sappho to Stonewall: Lesbians in History (4, Sp) (Enroll in HIST 302)

SWMS 303 From Goddesses to Witches: Women in Premodern Europe (4) (Enroll in HIST 305)

SWMS 304xm Italian Renaissance Art: Old Masters and Old Mistresses (4) (Enroll in AHIS 304xm)

SWMS 305 Childhood, Birth and Reproduction (4) (Enroll in ANTH 305)

SWMS 306 Introduction to LGBTQ Studies (4, FaSp) Interdisciplinary analysis of LGBTQ issues; examination of the intersections of gender and sexuality with social class, race, religion, and nationality.

SWMS 307 Women in Medieval Europe, c. 1000–1500 (4, Fa) (Enroll in HIST 307)

SWMS 311 Gender Studies and the Community: Internship (4, FaSpSm) A combination of internships in the community and an intensive seminar on the relationship of the students in the academic community with the larger urban community of which it is a part.

SWMS 316 Gender and Global Issues (4) (Enroll in IR 316)

SWMS 320 Male and Female in Pacific Society (4) (Enroll in ANTH 320)

SWMS 321 Gender and Judaism (4) (Enroll in JS 321)

SWMS 324 Women in Medieval and Renaissance Europe (4) (Enroll in COLT 324)

SWMS 330m Culture, Gender and Politics in South Asia (4) (Enroll in ANTH 330)

SWMS 335 Gender, Religion, and Sexuality (4) (Enroll in REL 335)

SWMS 336 Health, Gender and Ethnicity (4, Sp) Cross-cultural notions of the body, health, and healing; historic and cultural variability of ideas of reproduction, birth, sexuality, mental illness, and disability.

SWMS 345 Men and Women in United States History from the 1920s to the Present (4) (Enroll in HIST 345)

SWMS 347 Race, Gender and Power in Francophone Literature (4) (Enroll in FREN 347)

SWMS 349 Women and the Law (4, Fa) Discussion of the relationship between women and the law in light of feminist jurisprudence, U.S. Supreme Court decisions, and cross-cultural perspectives.

SWMS 355 Transgender Studies (4, Sp) Analysis of transgender behaviors, from androgyny and transvestism to transexuality. Discussion of changing laws, representations, medical standards, and social attitudes towards transgender and intersex people.

SWMS 358 U.S. Gay and Lesbian History (4, Sp) Exploration of shifting social organization and cultural meanings of same-sex desire and cross-gender behaviors in the U.S., primarily during the 20th century.

SWMS 363m Race, Gender and Sexuality in Contemporary Art (4) (Enroll in AHIS 363m)

SWMS 366m Chicana and Latina Sociology (4) (Enroll in SOCI 366m)

SWMS 369 The Family in a Changing Society (4) (Enroll in SOCI 369)

SWMS 370 Family and Kinship in Cross-Cultural Perspective (4) (Enroll in ANTH 370)

SWMS 372 Human Sexuality (4) (Enroll in PSYC 372)

SWMS 374gm Women Writers in Europe and America (4) (Enroll in COLT 374gm)

SWMS 375 Women and Gender in China: Past and Present (4) (Enroll in EALC 375)

SWMS 377 The Image of the Journalist in Popular Culture (4) (Enroll in JOUR 375)

SWMS 378 Literature, Theory, Gender (4) (Enroll in COLT 377)

SWMS 380 Sex and Gender in Anthropological Perspective (4) (Enroll in ANTH 380)

SWMS 381 Sex, Power, and Politics (4) (Enroll in POSC 381)

SWMS 382 Political Theories and Social Reform (2 or 4) (Enroll in POSC 380)

SWMS 383 French Women Writers (4, FaSp) (Enroll in FREN 383)

SWMS 384m Gender, Social Inequality, and Social Justice (4, Fa) Analysis of the most effective strategies and techniques for reducing prejudice against racial/ethnic minorities, women, gays and lesbians, and others subjected to stigma.

SWMS 385m Men and Masculinity (4) Interdisciplinary examination of social, personal meanings of masculinity; variety of male experience by social class, race, sexuality, and age; emerging masculinities of the future.

SWMS 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

SWMS 395m Gender, Media and Communication (4) (Enroll in COMM 395m)

SWMS 402 Human Trafficking (4, FaSp) (Enroll in SOCI 402)

SWMS 410 Senior Seminar in Gender Studies (4, Fa) Study of a selected problem, period, or theme in the study of women and men in society by integrating perspectives from cross-cultural and interdisciplinary studies.

SWMS 412 Gender, Sexuality and Media (4, max 8) (Enroll in CTCS 412)

SWMS 415 Ecofeminism (4, Sp) Examination of the philosophy and politics of Ecofeminism. It will critique

the ideologies that link the oppression of women to the exploitation of nature. *Recommended preparation:* SWMS 210 or SWMS 301.

SWMS 420 Woman, Nature, Culture: The Behavioral Ecology of Women (4, FaSp) Analysis of theoretical perspectives and empirical data from biology, psychology and anthropology that relate to women's physiology and behavior.

SWMS 425 Queer Los Angeles (4, Sp) Interdisciplinary study of queer Los Angeles through examination of histories, memoirs, essays, fiction, poetry, documentaries, narrative films, and local archives.

SWMS 426 Gender, Family and Society in Europe and the United States, 1500–Present (4) (Enroll in HIST 426)

SWMS 430 Gender and Sexuality in Korean Literature and Culture (4) (Enroll in EALC 430)

SWMS 434m Women and Aging: Psychological, Social and Political Implications (4, FaSpSm) (Enroll in GERO 435m)

SWMS 435m Women in Society (4) (Enroll in SOCI 435m)

SWMS 437m Sexuality and Society (4) (Enroll in SOCI 437m)

SWMS 440 Women's Literature in Germany I (4) (Enroll in GERM 440)

SWMS 442m Women's Spaces in History: "Hussies," "Harems," and "Housewives" (4) (Enroll in ARCH 442m)

SWMS 445 Studies in Gender and Feminism (4) (Enroll in FREN 445)

SWMS 455m Gender and Sport (4) Sport as an institutional locus for construction of gender relations; lives of female and male athletes; issues of sexuality, violence, racism, spectatorship, and media.

SWMS 456 Women in International Development (4) (Enroll in POSC 456)

SWMS 465 Gender in Media Industries and Products (4) (Enroll in COMM 465)

SWMS 467 Gender and the News Media (4) (Enroll in JOUR 467)

SWMS 469 Women in English Literature before 1800 (4) (Enroll in ENGL 469)

SWMS 470 Women in English and American Literature after 1800 (4) (Enroll in ENGL 470)

SWMS 476m Images of Women in Contemporary Culture (4) (Enroll in ENGL 476m)

SWMS 478m Sexual/Textual Diversity (4) (Enroll in ENGL 478m)

SWMS 490x Directed Research (1–8, max 12, FaSpSm) Independent research and readings. Not available for graduate credit.

SWMS 492 Honors Thesis (4, Sp) Writing of the honors thesis; for students in the Gender Studies Honors Program. Open only to gender studies majors. *Recommended preparation:* SWMS 410.

SWMS 499 Special Topics (2–4, max 8) Study of a selected problem, period, or theme through interdisciplinary approaches.

SWMS 504 Theories of Race, Class, and Gender (4) (Enroll in ENGL 504)

SWMS 505 Seminar in Feminist Theory and Art History (4, max 8) (Enroll in AHIS 505)

SWMS 507 Gender and International Relations (4, Irregular) (Enroll in IR 507)

SWMS 508 Ethics of Liberation Theology (4) (Enroll in REL 508)

SWMS 509 Culture, Gender, and Global Society (4) (Enroll in IR 509)

SWMS 516 Seminar: Feminist Theory and Communication (4, 2 years, Sp) (Enroll in COMM 516)

SWMS 544 Feminist Theory for Historians (4, Fa) (Enroll in HIST 544)

SWMS 546 Comparative History of Women and Gender in the West to 1800 (4, Fa) (Enroll in HIST 546)

SWMS 550 Gender and Education in the Third World (3) (Enroll in EDPA 550)

SWMS 551 Studies in the History of Women, Gender and Sexuality (4, max 8) (Enroll in HIST 550)

SWMS 553 Race, Gender and Sexuality (4) (Enroll in AMST 553)

SWMS 554 Women in Global Perspective (4) Women and immigration, employment, and household and family relations in the context of the global economy; women's social and political movements in diverse cultural contexts.

SWMS 556 Seminar on Women and the Family in China (4) (Enroll in EALC 556)

SWMS 560 Feminist Theory (4, FaSpSm) History of feminist theory and major perspectives of current feminist theory: liberal feminism, socialist/Marxist feminism, radical feminism, psychological feminism, spiritual feminism, and ecological feminism.

SWMS 577 Therapy, Gender, and Ethnicity (3) (Enroll in SOCI 577)

SWMS 588 Seminar in Gay, Lesbian, Bisexual and Transgender Studies (4) Interdisciplinary cross-cultural, historical, psychological, sociological, and contemporary political perspectives on female and male homosexual eroticism, and the emergence of gay, lesbian, bisexual, and transgender identities.

SWMS 590 Directed Research (1–12, FaSpSm) Research leading to the master's degree in cognate fields. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SWMS 593 Practicum in Teaching Gender Studies (2, Fa) Basic principles of gender studies pedagogy, emphasizing practical applications and the importance of career-long skill development. Required for first-semester teaching assistants in gender studies. Open only to doctoral students. Graded CR/NC.

SWMS 599 Special Topics (2–4, max 8) Seminar in selected topics relating to gender and feminism.

SWMS 621 Gender Discrimination (1–4, FaSp) (Enroll in LAW 621)

SWMS 623 Family Law (3 or 4) (Enroll in LAW 623)

SWMS 630 Studies in Gender (4, max 12) (Enroll in ENGL 630)

SWMS 640 Sociology of Gender and Sexuality (4, FaSp) (Enroll in SOCI 640)

SWMS 642 Sex and Gender in Society (4) (Enroll in SOCI 642)

SWMS 648 Fertility Control Policies (4) (Enroll in SOCI 648)

SWMS 650 Seminar on Women's and Family History (4, max 8, Sp) (Enroll in HIST 650)

Courses of Instruction

GEOGRAPHY (GEOG)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

GEOG 255 American Environmentalism (4, FaSm) Geographic and historic approach to the growth of environmental awareness in the United States from Colonial times to the present. Extensive use of case materials.

GEOG 257g Environment and Ethics (4, SpSm) Examination of ethical issues in environmental context: systematic analysis of problems associated with protection and use of selected environments.

GEOG 345 Conservation of Natural Resources (4, Fa) Interaction between resource conservation and people based on recent advances, current developments, and future resource utilization. Special attention to the western United States. Field trips.

GEOG 360 Environmental Disasters (4, Sp) Evaluates the causes, effects, and responses to international environmental disasters. Emphasis is on contemporary case studies in a theoretical context.

GEOG 390 Special Problems (1–4, FaSp) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

GEOG 431 California's Changing Landscapes (4, Sp) Type study of a region; distribution of physical and cultural phenomena; delimitation into natural regions; analysis of human-environment interaction in regions of the state. Field trips.

GEOG 490x Directed Research (1–8, max 12, FaSp) Individual research and readings. Not available for graduate credit.

GEOG 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

GEOG 599 Special Topics (2–4, max 8, Irregular) Seminar in selected topics in geography.

GEOG 681 Environmental Modeling with GIS (4, 2 years, Sp) Advanced topics related to the collection, analysis, modeling, interpretation, and display of environmental information using GIS and related technologies. *Recommended preparation:* graduate standing and prior GIS experience equivalent to SSCI 382L or department approval.

GEOG 682 Health and Place (4, Sp) Examines the relationship between health and place and how geospatial approaches to analyzing and visualizing spatial data may advance our understanding of disease systems. Graduate standing.

GEOG 790 Research (1–12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

GEOG 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

German Minor Requirements

REQUIRED COURSES, LOWER-DIVISION

UNITS

GERM 101	German I	4
GERM 102	German II	4
GERM 201	German III, Conversation and Composition	4
GERM 221	Conversational German IV, or the equivalent by test	4

REQUIRED COURSES, UPPER-DIVISION

UNITS

Four courses — 16 units in the two areas of concentration.

One course from the following:

GERM 310*	Business German I	4
GERM 311*	Business German II	4
GERM 470	Advanced Composition and Stylistics	4

*Prerequisite: GERM 201 or the equivalent by test.

Three elective courses from the following (only one course each from HIST and IR may be counted toward the minor):

GERM 320	Composition and Conversation on Contemporary Affairs	4
GERM 325	Composition and Conversation in Cultural History	4
GERM 330	Introduction to Literary Studies	4
GERM 346	German Folklore and Popular Culture	4
GERM 352	Colloquium on Poetry	4
GERM 353	Colloquium on Prose	4

GERM 360	20th Century German Prose: Texts and Films	4
GERM 410	Profile of German Literature I	4
GERM 420	Profile of German Literature II	4
HIST 323	The Holocaust in 20th Century Europe	4
HIST 414	Contemporary Europe	4
HIST 427	The German Question: Nation and Identity in Modern Central Europe	4
HIST 428	Life and Death in Nazi Germany	4
HIST 445	Comparative History and Theory of Fascism and Nazism	4
IR 369	Post-War European Relations	4
IR 385	European Foreign Policy and Security Issues	4
IR 468	European Integration	4
POSC 463	European Politics	4

Courses of Instruction

GERMAN (GERM)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

GERM 020x Course in Reading German (2) For graduate students who wish help in meeting the German reading requirement for the Ph.D. degree. Emphasis on development of reading skills. Not available for degree credit. Graded CR/NC.

GERM 025x Course in Reading German (2) Continuation of 020x. Reading selections appropriate to candidate's major field. Not available for degree credit. Graded CR/NC.

GERM 101 German I (4) Introduction to modern German. Oral practice, listening and reading comprehension. Basic structures necessary for simple spoken and written expression.

GERM 102 German II (4) Continuation of German I. Introduction to German culture. *Prerequisite:* GERM 101.

GERM 201 German III, Conversation and Composition (4) Intermediate German. Increasing emphasis on listening and speaking skills and a review of basic structures of German. Discussion of cultural aspects. *Prerequisite:* GERM 102.

GERM 221 Conversational German IV (4) Conversational German in a variety of topical settings and vocabulary domains. *Prerequisite:* GERM 201.

GERM 310 Business German I (4, Sp) Introduction to German business language structure including correspondence and oral communication. In German. *Prerequisite:* GERM 201.

GERM 311 Business German II (4, Fa) Continuation of GERM 310. Terminology and style of commercial and legal texts, analyzed and applied in oral and written work. In German. *Prerequisite:* GERM 201.

GERM 320 Composition and Conversation on Contemporary Affairs (4) Practice in oral and written

German, emphasizing contemporary cultural and social developments in the German-speaking countries of Europe. In German. *Prerequisite:* GERM 221.

GERM 325 Composition and Conversation in Cultural History (4) Practice in oral and written German, emphasizing the cultural history of the German-speaking countries of Europe. In German. *Prerequisite:* GERM 221.

GERM 330 Introduction to Literary Studies (4) Review of essential literary terms, concepts, and critical methods through analysis and discussion of selected primary and secondary works. In German.

GERM 335 Applied German Drama (4, max 8) Works of a German playwright in their social and cultural context, leading to a dramatization of one of the works. In German.

GERM 340 German Prose Fiction from Goethe to Thomas Mann (4) Examines German prose fiction from the late 18th to the early 20th centuries, with particular emphasis on how narrative texts are constructed. In English.

GERM 346 German Folklore and Popular Culture (4) Survey and analysis of folklore and cultural phenomena, including tales, legends, and myths; folk and popular music; beliefs and customs. In English.

GERM 351 Colloquium on Drama (4) German drama from the 18th century, with emphasis on modernism (since Büchner) and the 20th century avant garde styles: Expressionist, Epic, Grotesque, Documentary, and Sprechtheater. In German.

GERM 352 Colloquium on Poetry (4) Definition and analysis of lyric genre through a study of major poets, such as Goethe, Schiller, Heine, Rilke, and Hofmannsthal; poetic traditions from the 17th century to the present. In German.

GERM 353 Colloquium on Prose (4) Study of German prose from the 18th century to the present; emphasis on narrative and thematic perspectives in relation to social change and on modernism since Kafka. In German.

GERM 360g 20th Century German Prose: Texts and Films (4) Aesthetic and historical analysis of major German 20th century novels, complemented by brief study of cinematic adaptation of each text. Texts in English; films with subtitles.

GERM 370 Literature and Culture in Vienna at the Turn of the Century (4) Literature, culture, and society in Vienna 1890–1925; works by figures such as Schnitzler, Hofmannsthal, Kafka, Musil, Kraus, Schönberg, Kokoschka, Freud, Wittgenstein, and others. In English.

GERM 372g Literature and Culture in Berlin in the 1920s (4) Literature, culture, and society through works by figures such as Kaiser, Toller, Brecht/Weill, Piscator, Th. Mann, Doebelin, Lukacs, Heidegger, etc. Films: *Caligari*, *Metropolis*, *Berlin, M*, *Blue Angel*. In English.

GERM 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

GERM 410 Profile of German Literature I (4) Survey of major trends in German literature within their historical and cultural contexts from the beginnings to the Baroque period. In German.

GERM 420 Profile of German Literature II (4) Survey of major trends, figures, and authors in German literature and culture of the 18th and 19th centuries within the European context. In German.

GERM 430 Age of Goethe (4) Background and significance of the period; lyrics, major dramatic and prose works from 1770–1832; Storm and Stress; Classicism; Goethe and Schiller. In German.

GERM 440 Women's Literature in Germany I (4) Reading and analysis of medieval texts from German-speaking countries, written by and about women: science, love, poetry, letters, drama, mysticism, romance. Conducted in German.

GERM 460 Expressionism to the Present (4) Representative authors and works since 1910; World War I, Expressionism, New Objectivity, World War II; literature after 1945: East and West, Swiss and Austrian.

GERM 465 Germany East and West (4) Study of the ideological, economic, social, and cultural differences between East and West Germany between 1945 and 1990 and their impact on today's unified Germany. In English.

GERM 466 The German Speaking Nations (4) Focus on the culture, history, and society of Austria, East and West Germany, and Switzerland. In German.

GERM 470 Advanced Composition and Stylistics (4) Development of competence in written expression; fundamentals of style in expository writing. In German.

GERM 490x Directed Research (1–8, max 12) Individual research and readings. Not available for graduate credit.

GERM 499 Special Topics (2–4, max 8) Intensive study of selected topics or regions.

GERM 508 Bibliography and Research Techniques (4) Bibliographic sources, reference works and periodicals, standard bibliographic formats; research methods and the writing of genres, stylistics, and textual interpretation.

GERM 510 Methods of Literary Criticism and Linguistic Analysis (4) Historical perspective on critical methods such as genre poetics, hermeneutics, Marxist and Freudian theories, structuralism, reception-aesthetics, literary semantics, pragmatics, and text linguistics.

GERM 581 Weimar Culture (4) A historical topic-oriented exploration of cultural activities in Weimar Germany. Examination of reflections of the social-political experience of the period in literary (essay, cultural critique, investigative reporting) and pictorial (painting, sculpture, photography, film) discourse.

GERM 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

GERM 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

GERM 595ab Directed Readings (2–4, 2–4)

GERM 599 Special Topics (2–4, max 8) Special topics such as concepts of government, roots of fascism, and ideologies of Hegel, Marx, Wagner, Nietzsche in German literature.

GERM 637 Seminar in Brecht (4)

GERM 790 Research (1–12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

GERM 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Bachelor of Arts in Health and Humanity

The Bachelor of Arts in Health and Humanity is a liberal arts degree. It is intended for students interested in fields that inform the health professions and in related questions about health and human experience. Courses in this interdisciplinary major meet many of the requirements for admission to the professional programs in medicine, nursing and other fields, but do not meet all of those entrance requirements. Some electives in this major have prerequisites in mathematics and physics that cannot be counted toward the 36-unit requirement in major electives. Students should consult their academic advisers for precise information on prerequisites and admission requirements for specific health fields.

Summary of Requirements

Core: 24 units; experiential learning: 1–4 units; major electives: one thematic module 16–20 units, other electives 16–20 units; total requirements: 61–64 units including at least 36 upper-division units plus prerequisites for certain electives.

CORE (16 LOWER-DIVISION, 8 UPPER-DIVISION) UNITS

BISC 120L	General Biology: Organismal Biology and Evolution, or	
BISC 121L	Advanced General Biology: Organismal Biology and Evolution	4
BISC 220L	General Biology: Cell Biology and Physiology, or	
BISC 221L	Advanced General Biology: Cell Biology and Physiology	4
BISC 320L	Molecular Biology	4
CHEM 105aLbL	General Chemistry, or	
CHEM 115aLbL	Advanced General Chemistry	4-4
HBIO 300	Evolution, Ecology, and Culture	4

EXPERIENTIAL LEARNING (1–4 UNITS) UNITS

Choose one course. A health-related internship is required:		
AMST 365	Leadership in the Community	4
GERO 495	Practicum in Geriatric Care	4
MDA 250	Internship for Liberal Arts: Work and Career — Theory and Practice	1–2, max 4
POSC 395	Directed Governmental and Political Leadership Internship	4
SWMS 311	Gender Studies and the Community: Internship	4

MAJOR ELECTIVES UNITS

Choose one complete thematic module from the list below (16–20 units). Then choose additional electives from the list of modules to equal nine courses (36 units) in all. No more than two courses may be lower-division (100- or 200-level). At least two courses must come from Group A and two courses from Group B.

Group A

Bioethics Module (16 units)

ANTH 305	Childhood, Birth and Reproduction, or	
POSC 333	Stigma and Society: Physical Disability in America, or	
SOCI 475	Medical Sociology, or	
GERO 475	Ethical Issues in Geriatric Health Care, or	
OT 375	The Narrative Structure of Social Action: Narrative, Healing and Occupation	4
REL 319	Religious and Ethical Issues in Death and Dying, or	
REL 341	Ethics in a Technological Society, or	
REL 360	Ethical Issues in the New Medical Revolution	4
REL 460	Senior Seminar: Medical Ethics	4

Health, Gender and Ethnicity Module (16 units)

ANTH 125	Social Issues in Human Sexuality and Reproduction, or	
SWMS 225	Gender, Sex, and Science: A Gender Studies Approach	4
ANTH 305	Childhood, Birth and Reproduction, or	
HBIO 405	Evolutionary Medicine	4
PSYC 462	Minority Mental Health	4
SWMS 336	Health, Gender, and Ethnicity, or	
SWMS 420	Woman, Nature, Culture: The Behavioral Ecology of Women	4

Health and Aging Module (16 units)

GERO 320	Psychology of Adult Development (Recommended preparation: PSYC 100), or	
GERO 330	Society and Adult Development	4
GERO 340	Policy, Values, and Power in an Aging Society, or	
GERO 437	Social and Psychological Aspects of Death and Dying	4
GERO 380	Diversity in Aging, or	
GERO 435	Women and Aging: Psychological, Social and Political Implications	4
GERO 416	Health Issues in Adulthood	4

Health and the Mind Module (20 units)

PSYC 100	Introduction to Psychology	4
PSYC 320	Principles of Psychobiology, or	
PSYC 326	Behavioral Neuroscience	4
PSYC 336L	Developmental Psychology	4
PSYC 360	Abnormal Psychology, or	
PSYC 404L	Psychophysiology of Emotion	4
PSYC 361	Introduction to Clinical Psychology, or	
PSYC 462	Minority Mental Health	4

Global Health Module (20 Units)

ANTH 101	Illness and Healing: The Cross-Cultural Perspective, or	
ANTH 105	Culture, Medicine, and Politics	4
ANTH 305	Childhood, Birth and Reproduction, or	
HBIO 405	Evolutionary Medicine	4
IR 305	Managing New Global Problems, or	
IR 382	Order and Disorder in Global Affairs	4
IR 306	International Organizations, or	
IR 371	Global Civil Society: Non-State Actors in World Politics	4
IR 344	Developing Countries in World Politics	4

Group B

Biological Sciences Module (20 units)

BISC 290L	Introduction to Biological Research (lab assignment required), or	
BISC 490x	Directed Research (lab assignment required)	4
BISC 325	Genetics, or	
BISC 330L	Biochemistry	4
CHEM 322abL	Organic Chemistry, or	
CHEM 325abL	Organic Chemistry	4-4

Biochemistry Module (20 units)

BISC 330L	Biochemistry	4
CHEM 300L	Analytical Chemistry	4
CHEM 322abL	Organic Chemistry, or	
CHEM 325abL	Organic Chemistry	4-4
CHEM 432	Physical Chemistry for the Life Sciences, or	
BISC 403	Advanced Molecular Biology, or	
BISC 435	Advanced Biochemistry	4

Biotechnology Module (20 units)

BISC 325	Genetics	4
BISC 330L	Biochemistry	4
BISC 406L	Biotechnology	4
CHEM 322abL	Organic Chemistry, or	
CHEM 325abL	Organic Chemistry	4-4

Professors: Elinor A. Accampo, Ph.D.; Lisa Bitel, Ph.D.; William Deverell, Ph.D.; Philip J. Ethington, Ph.D.; Richard W. Fox, Ph.D.; Ariela Gross, Ph.D. (Law); Karen Halttunen, Ph.D.; Deborah Harkness, Ph.D.*; Daniel*

Klerman, Ph.D. (*Law*); Carolyn Malone, Ph.D. (*Art History*); John Pollini, Ph.D. (*Art History*); Azade-Ayse Rorlich, Ph.D.*; Steven J. Ross, Ph.D.*; George J. Sanchez, Ph.D.* (*American Studies and Ethnicity*); Mary Sarotte, Ph.D. (*International Relations*); Vanessa Schwartz, Ph.D.; Nayan Shah (*American Studies and Ethnicity*); Brett Sheehan, Ph.D.*; David Sloane, Ph.D. (*Public Policy*); Jacob Soll, Ph.D.

Associate Professors: Marjorie R. Becker, Ph.D.; Bettine Birge, Ph.D. (*East Asian Languages and Cultures*); Daniela Bleichmar, Ph.D. (*Art History*); Jason Glenn, Ph.D.; Joshua Goldstein, Ph.D.; Sarah Gualtieri, Ph.D.*; Kyung Moon Hwang, Ph.D.; Lon Kurashige, Ph.D.; Paul Lerner, Ph.D.*; Ramzi Rouighi, Ph.D.; Francile Wilson, Ph.D. (*American Studies and Ethnicity*)

Assistant Professors: Gerard Clinton Rainier Godart, Ph.D.; Nathan Perl-Rosenthal, Ph.D.; Diana Williams, Ph.D.

Assistant Professor (Research): Peter Westwick, Ph.D.

Assistant Professor (Teaching): Lindsay O'Neill, Ph.D.

Adjunct Professor: Richard Hovannisian, Ph.D.

Professor Emerita of History and John R. Hubbard Chair in British History Emerita: Judith Bennett, Ph.D.*

Professor Emerita of History and John R. Hubbard Chair in British History Emerita: Cynthia Herrup, Ph.D.

Professor Emerita and John R. Hubbard Chair Emerita in History: Carole Shammas, Ph.D.

Emeritus Professors: Lois W. Banner, Ph.D.*; Gordon M. Berger, Ph.D.; Roger Dingman, Ph.D.; Charlotte Furth, Ph.D.; Paul W. Knoll, Ph.D.; Franklin D. Mitchell, Ph.D.; D. Brendan Nagle, Ph.D.; Edwin J. Perkins, Ph.D.; John E. Wills, Ph.D.

Associate Professor Emeritus: Terry L. Seip, Ph.D.*

**Recipient of university-wide or college teaching award.*

The Department of History offers courses in ancient, medieval and modern European history, including Russian history; in both North and Latin American history; in the history of East Asia; and in world history. Some of the department's courses are chronological, some national or regional and some are thematic, with special strengths in gender, race and ethnicity, popular culture, medicine and urban history. The faculty is committed to continuous review and revision of the department curriculum, as student needs and professional emphases shift. Many departmental courses meet general education requirements, and various programs for majors and non-majors are available.

The department offers an honors program for qualified seniors. Honors programs are individually arranged through consultation with the honors director, and completion of an honors thesis is required.

Degree Programs

The Department of History offers the B.A., a minor, the M.A. and Ph.D. in History; the B.A. in Law, History, and Culture; the B.A. in History and Social Science Education; and the minor in Resistance to Genocide.

Honor Society

The department sponsors its own local chapter of Phi Alpha Theta, the national history honor society. Phi Alpha Theta provides opportunities for students to take their interest in history beyond the classroom and to cultivate their intellectual pursuits in a community setting.

Membership is open to history majors and other interested students with a 3.33 GPA in history courses and a 3.0 overall GPA. For more information contact the honors director.

Dornsife College of Letters, Arts and Sciences

History

Undergraduate Degrees

Advisement

All history department majors should consult with the department student adviser and with one of our faculty advisers. Students should seek an appointment early in each semester so that an advisement file may be established for each student. The file will be kept current.

Bachelor of Arts in History

HIST 201 Approaches to History is required of all majors. In addition, ten courses in history are required, three at the lower-division level and six at the upper-division level. The three required lower-division courses must include one from the 100 level and one from the 200 level, and each of the three must be from a different geographic category. The department will accept scores of 4 or 5 on either Advanced Placement European History or Advanced Placement American History as a substitute for one requirement at the 100 level. At the upper division, majors are required to take a minimum of three courses in a thematic, temporal or geographic concentration they articulate under the guidance of faculty; they must also take at least two upper-division seminars, approved by the department, including one in their concentration. No more than 4 units of HIST 490x Directed Research may be counted as satisfying the upper-division seminar requirement.

For geographic breadth, at least one of the 10 courses must be taken from approved course work in each of the three following areas: Asia and Eurasia, Europe, and North and Latin America. For temporal breadth, at least one of the 10 courses must be taken from approved course work in each of the three following time periods: before 1300, 1300 to 1800, 1800 to the present. Students must consult with a department adviser in order to determine which courses meet these requirements.

Bachelor of Arts in History and Social Science Education

This degree is designed for students who are interested in a career in secondary school teaching. The courses chosen reflect the content of subjects taught in high schools and middle schools in California and therefore should be useful for those contemplating the profession of teaching history and social studies. It does not, however, provide a waiver of the CSET examination.

REQUIRED COURSES

		UNITS
ECON 203	Principles of Microeconomics	4
ECON 205	Principles of Macroeconomics	4
HIST 201	Approaches to History	4
HIST 488	Teaching History in the Secondary Schools	4

ADDITIONAL REQUIREMENTS

		UNITS
<i>Surveys of U.S. and World History</i>		
Choose three from the following:		
HIST 100	The American Experience	4
HIST 240	The History of California	4
HIST 349	Colonial North America 1600-1760	4
HIST 360	19th Century U.S. History	4
HIST 361	20th Century U.S. History	4
HIST 440	Early Modern World History	4

HIST 441 Modern World History 4

Pre-modern World History

Choose one of the following:

HIST 101	State and Society in the Ancient World	4
HIST 102	Medieval People: Early Europe and Its Neighbors, 400–1500	4
HIST 103	The Emergence of Modern Europe	4
HIST 180	The Middle East	4
HIST 275	The Worlds of the Silk Road	4
HIST 335	History of Japan to 1550	4
HIST 338	China to 960 A.D.	4
HIST 339	China, 960–1800 A.D.	4
HIST 369	Aztecs, Mayas and Other Indigenous Peoples of the Americas	4
HIST 382	The Middle East, 500-1500	4

Modern World History

Choose one of the following:

HIST 104	Modern Europe	4
HIST 333	Korea: The Modern Transformation	4
HIST 336	History of Japan, 1550–1945	4
HIST 340	History of China since 1800	4
HIST 383	The Modern Middle East	4
HIST 370	Spanish America, 1492–1821	4
HIST 372	Modern Latin America	4

Political Science

Choose one of the following:

POSC 100	Theory and Practice of American Democracy	4
POSC 300	Principles, Institutions, and Great Issues of American Democracy	4
POSC 340	Constitutional Law	4

Required Capstone Seminar (see under “required courses”)

A capstone seminar, HIST 488 Teaching History in the Secondary Schools, will be taught by a member of the history department and will focus on the ways in which historical research is brought into middle and high school curriculum. Seminar participants will examine textbooks and other materials designed for history instruction; engage in independent research; write curriculum and/or classroom units or lesson plans; and visit classrooms to assist with history instruction in the schools.

Bachelor of Arts in Law, History, and Culture

This major is designed for students drawn to interdisciplinary study of legal and cultural issues, as well as those who intend to pursue a law degree. It offers students an interdisciplinary education in legal institutions, languages and processes that are central to social, cultural and political developments in the past and present, and play a critical role in shaping our most basic concepts and categories of thought and identity. It combines approaches from history, literature, philosophy, political theory, religion and classical studies to explore the law’s position at the nexus of society. The major will help students develop the critical skills of reading, writing and analysis crucial to both a liberal education and the study of law. Students will gain theoretical and analytical perspectives on ethical, political and social issues relevant to law as they explore specific legal issues from a humanistic perspective.

This major requires 36 units from the following courses. Majors must complete all courses listed in Category 1 and seven courses from Categories 2 and 3. At least three out of the seven courses must come from Category 2.

Category 1 (All courses required.):

LAW 300	Concepts in American Law	4
LAW 301	The Constitution in Transnational Perspective	4

Category 2 (A minimum of three of the following courses is required.) :

AMST 342	Law and Identities	4
ANTH 345	Politics, Social Organization, and Law	4
CLAS 305	Roman Law	4
CLAS 307	Law and Society in Classical Greece	4
COLT 476	Narrative and the Law	4
ENGL 355	Anglo-American Law and Literature	4
HIST 385	Anglo-American Law before the 18th Century	4
HIST 386	American Legal History	4
HIST 463	The Constitutional History of the United States	4
POSC 130	Law, Politics, and Public Policy	4
SWMS 349	Women and the Law	4

Category 3:

AMST 101, AMST 320, AMST 353, AMST 357, AMST 389, CLAS 320, CLAS 333, CLAS 340, CLAS 348, CLAS 370, CLAS 470, COLT 385, COLT 472, COLT 475, ENGL 472, ENGL 474, ENGL 481, HIST 220, HIST 265, HIST 312, HIST 323, HIST 355, HIST 351, HIST 455, HIST 470, JS 342, PHIL 135, PHIL 140, PHIL 330, PHIL 430, PHIL 431, POSC 201x, POSC 340, POSC 345, POSC 370, POSC 371, POSC 374, POSC 375, POSC 377, POSC 380, POSC 426, POSC 441, POSC 443, POSC 444, REL 360, REL 414, SOCI 351, SOCI 353, SWMS 355

Bachelor of Arts in Middle East Studies

See the Department of Middle East Studies for a complete listing of requirements.

Interdisciplinary Minor in Resistance to Genocide

To resist genocide effectively, we need to understand its history — the factors that have brought it about and those that have enabled people to prevent, resist or recuperate from mass violence. This interdisciplinary minor draws upon USC faculty in 11 academic units researching the causes, results and representations of attempted genocide as well as resistance to genocidal mass violence. Courses include attention to different definitions of genocide, its occurrence around the world and its representation in literature and the arts.

Course Requirements

The minor requires five courses (20 units); at least four must be at the upper-division level. As with all minors, students must choose at least four courses (16 units) outside their major department and four courses (16 units) that are not being used to satisfy any other subject requirement.

LOWER-DIVISION REQUIREMENT

UNITS

Choose one course (four units) from the following list:

List A

JS 211	The Holocaust	4
POSC 248	Human Rights	4
POSC 260	Global Ethnic Politics	4

UPPER-DIVISION REQUIREMENTS

UNITS

Choose four courses (16 units) from the lists below, at least one from each list:

List B — Representations of Genocide

COLT 485	The Shoah (Holocaust) in Literature and the Arts	4
ENGL 444	Native American Literature	4
FREN 373	Remembering Loss, Writing a Memory	4
ITAL 352	The Holocaust in Italian Fiction and Film	4
MUSC 430m	Music and the Holocaust	4

List C — The Reality of Genocide

ANTH 357	Cultures of Genocide	4
HIST 323	The Holocaust in 20th Century Europe	4
HIST 428	Life and Death in Nazi Germany	4
IR 313	Religions and Political Violence	4
MDA 330	The Armenian Heritage: History, Arts, and Culture	4
POSC 366	Terrorism and Genocide	4
PSYC 453*	Intergroup Relations	4

List D — Capstone Courses: Resisting Genocide

HIST 444	Mass Violence and Comparative Genocide in Modern World History	4
HIST 446	Resistance to Genocide	4
IR 437	Comparative Genocide	4
JS 362	Terror and Resistance in Literature and the Media	4

*Prerequisite: PSYC 355

Minor in History

The minor in history is available to students in all schools and departments. The study of history deepens our understanding of peoples and societies and expands our knowledge of important issues operative in the world today. History minors will strengthen their skills in critical thinking, assessing evidence, and formulating clear and persuasive arguments both oral and written. History is essentially a laboratory of human experience, and students from a wide range of disciplines can discover new perspectives on their own intellectual interests through the study of the past.

Prerequisites: cumulative GPA of 2.0 or better and approval of a minor plan of study by the department's undergraduate adviser.

Requirements: 20 upper-division units, including a minimum of 16 upper-division units from Department of History offerings. The remaining 4 units may come from either (1) HIST 201 (preferable), or (2) upon the approval of a History Department adviser, 4 upper-division units from another department.

An appropriate capstone course chosen from 400-level seminar offerings must be included in the proposed program as part of the departmental work. The capstone course will normally be the last (or among the last) courses taken for the minor.

Minor in the History and Culture of Business

The minor in the history and culture of business is available to all students in all schools and departments. It is designed to cultivate an understanding of business as it is embedded in changing cultural, social and political environments in the United States and around the globe. Completion of the minor requires twenty units; four units at the lower division and sixteen units at the upper division. At least eight units must be from Department of History course offerings. Interested students should meet with the undergraduate adviser for the Department

of History.

LOWER-DIVISION REQUIREMENTS		UNITS
Choose one course (4 units)*		
ECON 203	Principles of Microeconomics	4
ECON 205	Principles of Macroeconomics	4
HIST 215	Business and Labor in America	4
HIST 266	Business and East Asian Culture	4

*ECON 351x or ECON 352x may be substituted for the lower-division requirement.

UPPER-DIVISION REQUIREMENTS		UNITS
Choose four courses (16 units), at least one from each of the groups below.		
<i>Corporate Culture</i>		
ECON 330	The Political Economy of Institutions	4
ECON 348	Current Problems of the American Economy	4
ENST 387	Economics for Natural Resources and the Environment	4
FBE 431	Financial Policies and Corporate Governance	4
HIST 343	Work, Leisure, and Violence in Industrializing America	4
HIST 348	Dynamics of American Capitalism	4
HIST 442	The Ethics of Financial and Political Accountability	4
IR 324	Multinational Enterprises and World Politics	4
IR 329	The Global Finance and Monetary Regime	4
IR 369	Post-War European Relations	4
MOR 385	Business, Government and Society	4
MOR 421	Social and Ethical Issues in Business	4
MOR 466	Business and Environmental Sustainability	4
<i>Consumer Culture</i>		
COMM 363	Media Consumption	4
COMM 433	Home Entertainment	4
HIST 380	American Popular Culture	4
MKT 450	Consumer Behavior and Marketing	4
MOR 472	Power, Politics and Influence	4
PSYC 456	Conservation Psychology	4
REL 375	Conflict and Change and the Ethics of Business	4
<i>Global and Regional Culture</i>		
BUCO 333	Communication in the Working World – Managing Diversity and Conflict	4
BUCO 460	International Business Communication	4
ECON 340	Economics of Less Developed Countries	4
ECON 342	Economic Development of the Middle East	4
ECON 343	Economic Development of East Asia	4
ECON 344	Economic Development of Sub-Saharan Africa	4
ECON 346	Economics of Transition and Development: China	4
ECON 350	The World Economy	4

HIST 424	Family, Work, and Leisure in Russian History	4
IR 325	North-South Relations in the Global Economy	4
IR 331	The Global Economy 2030	4
IR 333	China in International Affairs	4
IR 360	International Relations of the Pacific Rim	4
IR 363	Middle East Political Economy	4
IR 364	The Political Economy of Latin American Development	4
IR 367	Africa in International Affairs	4
IR 426	Trade Politics in the Western Hemisphere	4
IR 439	Political Economy of Russian and Eurasia	4
MOR 468	Cross Cultural Negotiations: Communication and Strategy	4

Honors Program

The department offers a two-semester honors program, in which qualified students spend their first semester in an honors track in an upper-division seminar or take HIST 490 Directed Research in their concentration. During the second semester, all honors students are required to take HIST 492 Honors Thesis in which each completes a thesis project on a topic of his or her choosing under faculty direction. Contact the department honors director for further information. To graduate with honors, department majors must have a minimum GPA of 3.5 in their major course work.

Teaching Credential Requirements

Credential requirements in California and elsewhere are complex and changeable. Students interested in preparing for public school teaching should contact the Credentials Office, Rossier School of Education, and the undergraduate adviser, Department of History, for up-to-date information.

Interdisciplinary Minor in Early Modern Studies

This minor brings together the resources of the departments of English, History and Art History to study the literatures and cultures of Europe and the Americas from the late medieval period to 1800. For a complete listing of requirements, see Department of English.

Interdisciplinary Middle East Studies Minor

See the Department of Middle East Studies.

Interdisciplinary Race, Ethnicity and Politics Minor

See Department of Political Science.

Interdisciplinary Russian Area Studies Minor

See Department of Slavic Languages and Literatures.

Interdisciplinary Law and Society Minor

See Department of Political Science.

Dornsife College of Letters, Arts and Sciences

History

Graduate Degrees

The graduate program in history provides advanced training in historical research and writing leading to the Doctor of Philosophy degree. Once admitted to the Ph.D. program, a student in exceptional cases may work for a Master of Arts degree, but the department does not accept applicants for an M.A. For further information, contact the director of the graduate program for the Department of History.

Admission Requirements

Prerequisites

An applicant should have an undergraduate degree or an M.A. degree in history or a related discipline. Promising students trained in other fields will also be considered.

Criteria

All applicants must take the general test of the Graduate Record Examinations. The subject test in history is not required. In addition, applicants must submit at least three letters of recommendation from college-level instructors and a sample of written work from a college-level history, social science or humanities course. This material should be submitted to the director of the graduate program for the Department of History.

Procedure

For complete information on the doctoral programs, prospective applicants should address inquiries to Graduate Admissions, Department of History, SOS 153, University of Southern California, Los Angeles, CA 90089-0034. Information on the programs is also available online at usc.edu/schools/college/history/programs/graduate.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Arts in History

The department does not accept applicants for a Master of Arts degree in history. The M.A. degree is intended only as a transitional degree in the process of completing requirements for the Ph.D. in history.

Foreign Language/Research Tool Requirement

Students are required to demonstrate competence in one foreign language, with the exception that none is required of majors in United States history.

Course Requirements

All students must enroll in HIST 500 Introduction to Graduate Historical Studies, and it is recommended that it be completed in the first year of residence.

Thesis Plan

Students must take a minimum of six graduate courses, including HIST 500 plus HIST 594ab Master's Thesis. No more than two 400-level courses may count toward this total. A thesis must be written and defended.

Comprehensive Examination Plan

This plan requires the approval of the student's master's committee chair to substitute a comprehensive examination for the thesis. If approved, the student completes eight graduate level courses, including 500, with no more than two 400-level courses counting toward this total, plus written exams in three fields, one of which may be in another department. Examinations are normally offered in October and April. An oral examination may be given at the discretion of the master's committee. Examinations are graded on an honors, pass or fail basis. Any student who receives a grade of fail in two examinations is considered as not having qualified for the degree. A student who receives one fail must retake an examination in that field at the next scheduled examination period. An examination cannot be retaken more than once.

Doctor of Philosophy in History

Application deadline: December 1

The history profession nationwide combines a traditional emphasis on geo-temporal fields (e.g., U.S. in the 19th century; medieval Europe) with a new emphasis on trans-nationalism, comparative history and interdisciplinary investigation. The USC program is at the forefront of these trends. Following the traditional emphasis, each graduate student must declare a major field in a geo-temporal area at the time of application to the program. Major fields of study include: China, Japan, Korea, Latin America, Middle East, American/United States, medieval Europe, early modern Europe and modern Europe. The purpose of the major field is to prepare students broadly for teaching and research.

By the beginning of his or her second year in the program, each graduate student must declare a minor field and an area of specialization. The minor field is intended to broaden skills beyond the geo-temporal boundaries of the major field; the area of specialization is intended to deepen the student's scholarly training in the chosen area of the dissertation. The minor field may be chosen from the list of major fields (i.e., a student entering the program with American/U.S. as a major field might select "modern Europe" as a minor field), or it may be conceived comparatively, thematically or cross-disciplinarily. Possible minor fields include: Latin America; pre-modern Japan; the colonial Americas; gender and sexuality; visual culture; and anthropology. Possible fields for the area of specialization include: 19th or 20th century U.S. intellectual history; visual culture of the 20th century; modern European cities; and the American West. These lists are not exhaustive and are meant to suggest only possible courses of study.

For the major field, each student must take a minimum of four courses; for the minor field two courses; for the area of specialization three courses. Either the minor field or the area of specialization must be outside the major field of study, transnational or outside the discipline of history. Each student must consult with his or her adviser in putting together these fields of study.

Foreign Language/Research Tool Requirements

Students are required to demonstrate competence in two foreign languages to be selected in consultation with the faculty adviser. Students in United States history may substitute competence in quantitative methods for one foreign language. The requirements in this category must be met before a student is eligible to take the qualifying examination.

Course Requirements

All entering students (including those with M.A. degrees) are required to take HIST 500 in their first semester of study. All students are required to take two 600-level research seminars in the History Department. At least one of these seminars must be in the major area of study. Students must complete a minimum of 60 units of course work. No more than 8 units of the 60 may be in HIST 794 (dissertation writing). Students must complete at least 30 units of graduate course work within the History Department.

Screening Procedures

The performance of every doctoral student is formally evaluated by the full faculty of the History Department, normally at the end of the spring semester and before a student has completed 24 units toward the degree. Unsatisfactory progress toward the degree requires either remedy of the deficiencies or termination of the student's graduate program. After successfully passing the screening procedures, each student establishes a qualifying exam committee which then supervises preparation for the qualifying examination.

Qualifying Exam Committee and Qualifying Examinations

Each student must set up a qualifying exam committee by the end of the third semester in residence. It includes at least five members, at least three of them from the History Department, and at least one of them from outside the History Department (this person must be a tenure-track faculty member from a Ph.D. granting program). The qualifying exam committee will oversee the student's written and oral qualifying examination, which should be taken by the end of his or her fifth semester in residence and no later than the end of the sixth semester. The examination covers the major field, minor field and area of specialization. Students prepare for these exams by developing, in collaboration with their qualifying exam committee, reading lists for study in their major field, minor field and area of specialization.

The qualifying examination consists of two parts: (1) Three four-hour written responses, based, respectively, on the major field, the minor field and the area of specialization; (2) a two-hour oral session, which may include

some discussion of the written exam. Students with one fail or more than two low-pass grades on the written responses will not be permitted to sit for the oral segment of the examination. The qualifying exam committee determines whether a student may retake any parts of the examination graded low-pass or fail.

A student must wait at least six, but not more than nine, months to retake any part, or all, of the qualifying examination. No part of the examination can be retaken more than once.

Dissertation

After students have successfully completed their qualifying examinations, they will select a dissertation committee consisting of at least three members, including at least two from the History Department. These individuals will be in charge of guiding the dissertation to completion. Within six months of passing the qualifying examination, students must submit a formal dissertation prospectus to all members of the dissertation committee and pass a one-hour prospectus defense convened by that committee. Some students (e.g., those whose major field is East Asia) can, with the approval of their dissertation committee, petition the Graduate Studies Committee for an extension of this six-month deadline. After passing the dissertation prospectus defense, a student is admitted to candidacy for the Ph.D. degree. The student will thereafter concentrate on the dissertation. After a student becomes a doctoral candidate, he or she must register for HIST 794 Doctoral Dissertation each semester thereafter until the dissertation is completed.

Advisement

Students should seek advice on their program of studies from the director of the graduate program, the professor in their major field of study and other members of their qualifying exam committee.

Dornsife College of Letters, Arts and Sciences

History

Courses of Instruction

HISTORY (HIST)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

HIST 100gm The American Experience (4, FaSpSm) Patterns of American development from Colonial times to the present. (Duplicates credit in former HIST 200gm.)

HIST 101g State and Society in the Ancient World (4, FaSpSm) Achievements of the near East, Greece, and Rome with emphasis on the development of ideas, arts, and institutions which have influenced modern man.

HIST 102gm Medieval People: Early Europe and Its Neighbors, 400–1500 (4) Early Europe, c. 400–1500, with a focus on Europe's diverse communities, cultural interactions among them, dealings between conquerors and conquered, and European contacts with non-Europeans.

HIST 103g The Emergence of Modern Europe (4, Fa) Political, intellectual, and cultural developments in Europe, 1300–1815. Renaissance and Reformation; absolute monarchy, scientific changes, and Enlightenment; French Revolution and Napoleon.

HIST 104g Modern Europe (4, Sp) The Enlightenment, French Revolution, industrialization, Darwinism, socialism, nationalism, technological revolutions, mass culture, imperialism, race, fascism, communism, world wars, genocide, migration, the Cold War, terrorism.

HIST 105g The Korean Past (4) A topical and chronological study of the major political, social, and

intellectual forces that have shaped the history of Korea.

HIST 106g Chinese Lives: An Introduction to Chinese History (4, FaSp) Study of the lives of selected individuals who have helped to shape Chinese politics and culture.

HIST 107g Introduction to the History of Japan (4, FaSp) Japan from the earliest times to the present; social, cultural, and political dimensions.

HIST 180g The Middle East (4, FaSpSm) Introduction to the history and the study of the Middle East from ancient to modern times.

HIST 195 Selected Themes and Topics in History (4, Irregular) Study of special historical themes and topics through readings, lectures, discussions, and supervised writings.

HIST 201 Approaches to History (4, FaSp) Methods and theories of historical interpretation of evidence; uses of archives; modes of presenting the past to the public. Required of all history majors. (Duplicates credit in former HIST 300.)

HIST 215g Business and Labor in America (4, Fa) Expansion of business enterprise from colonial merchants to modern corporations; evolution of the labor force from artisans to skilled and unskilled industrial workers.

HIST 220 Murder on Trial in America (4) Examination of high-profile murders and murder trials in order to explore major social, political, and cultural issues from the colonial period to the present.

HIST 225g Film, Power, and American History (4, Sp) U.S. motion pictures as both a response to and comment upon major events, problems, and themes in 20th century America.

HIST 235g War and the American Experience (4, Fa) Comparative historical analysis of the American experience of war: war decision-making processes; evolution of strategy and tactics; the political, economic, and social effects of war.

HIST 240g The History of California (4, Fa) A thematic approach to California history from precontact to present; focus on peoples, environment, economic, social, and cultural development, politics, and rise to global influence.

HIST 245gm Gender and Sexualities in American History (4) An investigation of the nature of femininities and masculinities over the course of U.S. history; including topics like women's rights, birth control, abortion, and gay/lesbian liberation.

HIST 255g The Evolution Debates (4, Fa) Historical perspective for current debates on evolution, investigating the contexts for the emergence and development of evolutionary theory and its subsequent impact on society.

HIST 260gp Dramatizations of Korean History (4, FaSp) Analysis and interpretation of popular depictions of Korean history.

HIST 265g Understanding Race and Sex Historically (4, Sp) To introduce students to historical consideration of the difficult contemporary topics of sexuality and race globally.

HIST 266g Business and East Asian Culture, 1800-Present (4, Sp) Business history of East Asia (China, Japan, Korea, Taiwan, and Hong Kong) as related to culture, politics, and society.

HIST 270 Queens, Witches, Courtesans: Women and Power in Renaissance Europe (4) Exploration of the lives of women who defied the ideals of "wife, mother, widow" and examination of how gender and power were negotiated.

HIST 271g Telling Native American Stories (4, Sp) An exploration of the history of Native America peoples and the ways they understood and explained the changes in their lives from 1492 to 1840.

HIST 273g Colonial Latin America (4, Sp) Introduction to Colonial Latin America; native American peoples, themes, issues, and evolution of Spanish and Portuguese colonial rule to ca. 1800.

HIST 275g The Worlds of the Silk Road (4, Sp) Exploration of the two millennia of economic exchanges and cross cultural interaction between Asia and Europe.

HIST 301 Religions of Ancient Egypt and the Near East (4) (Enroll in REL 302)

HIST 302 From Sappho to Stonewall: Lesbians in History (4, Sp) The cultural, social, and personal meanings of same-sex relations between women in Europe and the United States, from archaic Greece to the 1960s.

HIST 303 Barbarians, Romans, and Christians (4, Fa) Exploration of the dynamic transformation of the social, political, religious, and intellectual landscape of the Mediterranean during Late Antiquity, c. 200 – c. 700 AD.

HIST 304 Archaeology of Egypt and the Near East (4) (Enroll in REL 394)

HIST 305 From Goddesses to Witches: Women in Premodern Europe (4, Sp) Social, cultural and political contexts of women's spiritualities in Europe from the Paleolithic to the Reformation. Topics include: goddess-worship; Christian and Jewish contexts; male attitudes. (Duplicates credit in former HIST 270.)

HIST 306 The Early Middle Ages (4) Survey of European civilization in the Early Middle Ages.

HIST 307 Women in Medieval Europe, c. 1000–1500 (4, Fa) The influences of cultural, social, economic, familial, religious, and political factors on medieval women, as well as consideration of differences among them.

HIST 309 Britain and Ireland, 1100–1500 C.E. (4, Sp) English and Irish culture, economics, and politics during the expansion of the Norman-English kingdom, the colonization of Ireland, and subsequent development toward the English nation-state.

HIST 310 Shadow of God on Earth: Religion/Politics in Medieval Persia (4, FaSp) (Enroll in MDES 312)

HIST 312 The Age of the French Revolution and Napoleon (4, Fa) Europe in the Old Regime; causes and course of the French Revolution; rise of Napoleon; revolutionary impact on Europe, 1715–1815.

HIST 313 France and the French from Napoleon to Mitterand (4, Irregular) Social, cultural, and political history of France from 1789 to the present.

HIST 316 The Renaissance (4, Irregular) The flowering of arts, literature, and learning at the end of the Middle Ages.

HIST 317gm North American Indians in American Public Life (4, Irregular) (Enroll in ANTH 316gm)

HIST 318 Early American Indian History (4, Sp) Relations of European settlers with native Americans from the 16th into the early 19th centuries; cultural contacts, trade and eventual conflicts.

HIST 320 Russian and Soviet Rebels: The Moral Dilemma and the Continuity of Dissent (4, Irregular) The ethical foundations and the intellectual dimensions of philosophical, social, religious, artistic, and political dissent in Russia from the 14th century until the present.

HIST 323 The Holocaust in 20th Century Europe (4, Sp) The origins and development of anti-Jewish

persecution in Germany, resulting in the systematic mass murder of Europe's Jews during World War II.

HIST 324g Islam in Russia and the Soviet Union (4, Sp) Cultural cohesiveness and ethnic diversity of Islam in the USSR; nature and effect of government policies aimed at the integration of Islam into the state.

HIST 325 Early Modern Britain (4, Sp) A survey of one of the most pivotal eras in British history: reform, regicide, and revolutions; new ideas, new religions, and new worlds.

HIST 326 The Victorians (4) Britain in the 19th century, politics, industrialization, and imperialism, change and continuity in social and cultural aspects, especially class, gender, and race relations. (Duplicates credit in the former HIST 433.)

HIST 327 Twentieth Century Britain (4) The rise and decline of modern Britain as a global political and economic force, social and cultural change, emergence of a multiracial and multiethnic society. (Duplicates credit in the former HIST 434.)

HIST 328 Poland and the Western Tradition (4, 2 years, Irregular) Polish civilization from the 10th century to the present, with special emphasis upon the participation of Poland in the currents of the European tradition.

HIST 329 Madness and Society in the Modern Age (4) The shifting place of insanity and "the mad" in Europe and the United States from the French Revolution to the anti-psychiatry movement.

HIST 330 Drugs, Disease, and Medicine in History (4, Irregular) An overview of the role played by disease and the health sciences in history.

HIST 331 The British Empire: 1588–1834 (4, Sp) Emergence of the British Empire, emphasizing colonies in the Americas; the development of imperial economy, imperial wars, slavery and abolitionism.

HIST 332 British Empire from the Mid-19th Century (4, FaSp) Political and economic development of the British Empire since Victoria; rise of the British Commonwealth.

HIST 333 Korea: The Modern Transformation (4, Sp) Examination of selected topics on Korea's transition to the modern era; focus on the traditional roots of 20th century developments.

HIST 334 History of the Samurai (4) Development of the Samurai from a warrior elite to political hegemony between the 8th and 12th centuries; use of primary sources, introduction to divergent historiographies. *Recommended preparation:* a course in Japanese history.

HIST 335 History of Japan to 1550 (4, Irregular) Growth of Japanese civilization from the mythological "age of the gods" through the feudal "age of the samurai"; foundations of a great Asian power.

HIST 336 History of Japan, 1550–1945 (4, Irregular) Development of Japan as a modern world power; tradition and change in Japanese life; impact of Western culture, politics, and diplomacy from 1550 to 1945.

HIST 337 Japan since 1945 (4, Irregular) Survey of the impact of World War II, American occupation, and rapid economic growth on Japan's politics, society, economy, and culture; Japan as a post-modern nation.

HIST 338 China to 960 A.D. (4, Irregular) The origins of China's distinctive civilization; cultural and political ferment in the late Chou; the greatness of Han and T'ang.

HIST 339 China, 960–1800 A.D. (4, Irregular) Politics and culture under the Sung; Mongols, Manchus, and other invaders; the golden autumn of a great civilization.

HIST 340 History of China since 1800 (4, Sp) Western impact and dynastic decline; problems of the Chinese Republic; nationalism and communism.

HIST 341 American Social History (4, Irregular) The social history of the American peoples from Colonial times until the 20th century, to include industrialization, urbanization, women, families, workers,

immigration, ethnicity, racism, radicalism.

HIST 342 Love and Politics in America, 1750s to 2050s (4, Fa) An analysis of the intersections of love and politics, private and public, in fiction, non-fiction, and film in America from the Enlightenment into the future.

HIST 343 Work, Leisure, and Violence in Industrializing America (4, Irregular) Rise of industrial America from 18th to 20th centuries: changing work ethics, rise of factories, women workers, mass leisure, consumer culture, urban and industrial violence.

HIST 344 The Vietnam War, 1945–1975 (4, SpSm) Analysis of causes, conduct, and consequences of war in Southeast Asia; of participants' experiences; and of post-war debate.

HIST 345 Men and Women in United States History from the 1920s to the Present (4) Investigation of the roles and relationships of men and women in American society and culture from the era of the "flapper" to the era of the "yuppie."

HIST 346 American Intellectual History (4, Sp) Study of major American ideas and values as reflected in philosophy, political and economic thought, religion, and social movements.

HIST 347 Urbanization in the American Experience (4, Irregular) The American city in interdisciplinary perspective; emphasis on growth and change in relation to architecture, urban planning, demography, and ethnic politics.

HIST 348 The Dynamics of American Capitalism (4, Irregular) Economic growth and institutional change in American capitalism from the Colonial era to the present.

HIST 349 Colonial North America 1600–1760 (4, Fa) Colonial history of United States area, Canada, and Caribbean to 1760; Indians, European migration, plantation complexes, Puritan colonies, African slave migration, creole culture, borderlands, wars for empire.

HIST 350 American Standard of Living: 1600 to the Present (4, Fa) Socioeconomic history of material life: Indian experience, colonial diet, urbanization and slums, industrial households, 1920s durables revolution, installment credit, Depression, postwar boom, advertising, international comparisons.

HIST 351 The American Revolution (4, Fa) Origins, course and consequences of the American Revolution; the post-war establishment of the Constitution.

HIST 352 The American Civil War (4, Irregular) The causes, course, campaigns, and consequences of the American Civil War, 1861–1865.

HIST 353m Race and Racism in the Americas (4) (Enroll in AMST 353m)

HIST 354 Mexican Migration to the United States (4, 2 years, Fa) Mexican migration from the 1850s to the present, emphasizing labor migrants to the United States.

HIST 355 The African-American Experience (4, Fa) An historical and social analysis of the African-American experience from Colonial times to the present. (Duplicates credit in former HIST 250).

HIST 356 The Old South (4, Irregular) The South from Colonial days to 1860; slavery, the plantation system, politics; important social and economic problems.

HIST 357 The New South (4, Irregular) Economic and political change, racial problems, society, and culture in the American south from 1877 to the present.

HIST 358 U.S. Gay and Lesbian History (4, Sp) (Enroll in SWMS 358)

HIST 360 19th Century U.S. History (4, Sp) The social, political, and economic history of the United States from the formation of the Constitution to 1900.

HIST 361 20th Century U.S. History (4, Fa) Critical turning points in the 20th century; sources of major social and political change. Course materials include primary documents and historic radio/television recordings.

HIST 363 Foundations of American Foreign Policy, 1776 to the Present (4, Sp) Evolution of American principles, roles and policies in international relations from the founding of the republic to the present.

HIST 365 The Second World War (4, 2 years, Sp) Comparative analysis of the Second World War as a major transforming event of the 20th century. Its causes, conduct, and consequences for humanity.

HIST 366 The People's Republic of China (4) Politics, economy, society, and culture from 1949 to the present including the role of the communist party and the experiences of ordinary people.

HIST 369 Aztecs, Mayas, and other Indigenous Peoples of the Americas (4) Introduction to Pre-Columbian Mesoamerica and the Andes, the causes and consequences of the Spanish conquest, and the establishment of colonial societies and economies.

HIST 370 Spanish America, 1492–1821 (4, Sp) Topics in Spanish colonialism in Americas, with a focus on how religious, sexual, and racial differences shaped colonial policies and practices.

HIST 372 Modern Latin America (4, FaSpSm) Exploration of major themes and events in Latin American history from independence to the present.

HIST 373 History of the Mexican American (4, FaSp) (Enroll in AMST 373)

HIST 374 History of Mexico (4, Fa) The native cultures of Meso-America; colonial government, economy, and society; independence and 19th century liberalism; the Mexican revolution, 1910 to 1950. (Duplicates credit in former HIST 450.)

HIST 375 North Korean History (4, FaSp) History of North Korea from before statehood to the present. *Recommended preparation:* Introductory course of Korean history.

HIST 376 U.S.-Japan Encounters: War, Trade, and Culture (4, Fa) (Enroll in IR 376)

HIST 378m Introduction to Asian American History (4, FaSp) (Enroll in AMST 378m)

HIST 379 Arabs in America (4, FaSp) (Enroll in AMST 379)

HIST 380 American Popular Culture (4, Sp) Rise of popular culture (sports, amusement parks, movies, and television) and its significance in American society from mid 19th century to the present. (Duplicates credit in former HIST 255.)

HIST 381 Cinema and History (4, Irregular) Examines film as a means to narrate the past; treats the question of genre: epic, docudrama, the biopic, the music, adaptation, and such issues as authenticity and infotainment.

HIST 382 The Middle East, 500–1500 (4) Major topics, themes, and representative writings in the history and literature of the Arabic and Islamic World during the Medieval period.

HIST 383 The Modern Middle East (4, FaSp) Survey of major political, economic, and cultural developments in the Middle East on the basis of documents, literature, and film produced in the region. (Duplicates credit in former HIST 280.)

HIST 384 Popular Culture in the Middle East (4, FaSpSm) Examination of the Middle East through the prism of its popular cultures; emphasis on audio, visual, and literary representations in relation to colonialism, nation-building, and globalization.

HIST 385 Anglo-American Law before the 18th Century (4) The evolution of discourse, practices, and

institutions in Anglo-American legal history from the later Middle Ages to the 18th century.

HIST 386 American Legal History (4, Sp) An introduction to the study of law from a historical perspective; explores the interaction of law, culture, and politics from the Revolution through the New Deal.

HIST 388 Women and Gender in North American History through 1920 (4) Roles and relationships of women and men in North America from first contact to the 1920s, with special emphasis on race, marriage, and political culture.

HIST 389 Modern Iran (4, FaSpSm) (Enroll in MDES 313)

HIST 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

HIST 393g Quantitative Historical Analysis (4, FaSp) Reading and doing quantitative research with historical data. Covers research designs, appropriate statistical analysis, and software packages for the use of historians.

HIST 401 The Roman World (4, Fa) Rome at the crossroads of Europe and the Mediterranean; the rise of Rome to world power; social, cultural and political history of Republic and Empire.

HIST 402 Cultural Heritage, Religion, and Politics in the Middle East (4, Fa) (Enroll in REL 402)

HIST 403 Carolingian Europe (4) Political, religious, and intellectual culture of Europe in the 8th and 9th centuries.

HIST 404 Seminar in Korean History (4, Irregular) Exploration of issues and sources in Korean history; work on an individual research paper through an incremental process.

HIST 406 Special Periods in Medieval History (4, Irregular) Intensive study of selected periods.

HIST 407 Europe in the 10th Century (4) Political, religious, and intellectual culture of Europe in the 10th century and beyond.

HIST 408 Everyday Life in Chaucer's England (4, Sp) Readings and research on English social history between 1300 and 1550; emphasis on family structures, demography, gender relations, and class divisions.

HIST 409 The Norman Conquest of England, 1066 (4) Political, religious, and intellectual culture of England and the continent in the 11th and 12th centuries.

HIST 410 The Age of Humanism and Reformation (4, Irregular) The thought, art, politics, and religion of western Europe in the 16th and 17th centuries; emphasis on the contribution of Christian humanism.

HIST 413 The Age of Revolution (4, Irregular) The French and industrial revolutions and their interaction in 19th century Europe.

HIST 414 Contemporary Europe (4, Irregular) World War I and its aftermath; challenge of new culture values; World War II; problems of postwar adjustment.

HIST 415 Medieval and Early Modern Russia (4, 2 years, Fa) The politics, society, and culture of medieval and early modern Russia; the emergence of empire and the roots of its Eurasian identity.

HIST 416 History of Imperial Russia: 1689–1917 (4, Sp) The evolution of imperial society, politics and culture from Peter the Great to the Bolshevik Revolution. The dilemmas of identity in a multinational empire.

HIST 417 History of Soviet Russia: 1917–1991 (4, 2 years, Fa) The birth of the totalitarian regime, the emergence of the superpower and the socioeconomic, political and cultural developments that culminate in its demise.

HIST 419 Poland and Its Neighbors in the Middle Ages (4, 2 years, Sp) Polish politics, society, and culture in relation to its regional neighbors, especially Bohemia and Hungary, from the 10th to the end of the 15th century.

HIST 420 European Intellectual and Cultural History: The 19th Century, 1790–1870 (4) Intellectual and cultural trends of 19th century Europe, including Romanticism, Conservatism, Liberalism, Socialism and Evolutionary Theory.

HIST 421 European Intellectual and Cultural History: The Turn of the Century 1880–1920 (4) Intellectual and cultural trends of turn-of-the-century Europe, including the avant-garde, the crisis of positivism, psychoanalysis and gender theory.

HIST 422 European Intellectual and Cultural History: The 20th Century, 1920 to the Present (4, Irregular) Intellectual and cultural trends of contemporary Europe, including Dadaism, Surrealism, Western Marxism, Fascism, Existentialism and Structuralism.

HIST 424 Family, Work, and Leisure in Russian History (4, Irregular) Children and parents, love and marriage, work and leisure in the Russian village and city before and after the Revolution.

HIST 425 The Era of the First World War (4, FaSp) The background, causes, course, and aftermath of the First World War, with attention to the events in the United Kingdom and continental Europe.

HIST 426 Gender, Family, and Society in Europe and the United States, 1500–Present (4, 2 years, Sp) Changing social, economic, and cultural functions of the family and the roles of men, women, and children from pre-industrial times to the present in Europe and the United States.

HIST 427 The German Question: Nation and Identity in Modern Central Europe (4) A seminar on the making, unmaking and remaking of the German nation-state, with particular attention to issues of race, class and gender in German identity.

HIST 428 Life and Death in Nazi Germany (4) Social, cultural and medical history of Nazi Germany, emphasizing the Nazi vision of a racially pure national community. *Recommended preparation:* some European history.

HIST 429 Street Life: Urban Culture in Modern Europe (4, Sp) The 19th and 20th century European city as social artifact, cultural setting and object of fascination for its contemporary inhabitants.

HIST 432 Britain in the 18th Century (4) Political, social, and cultural aspects of British life from the accession of George I to about 1820.

HIST 437 Seminar in Modern Chinese History (4, max 8, FaSp) A readings and research seminar dealing with one topic in the history of China since 1600. Topics will change each time the course is offered. *Recommended preparation:* a class in Chinese history.

HIST 438 Seminar in Pre-Modern Japanese History (4, max 8, FaSp) A readings and research seminar dealing with one topic in the history of Japan before 1550. Topics will change each time the course is offered. *Recommended preparation:* a course in Japanese history.

HIST 440 Early Modern World History (4, Fa) Comparative patterns of historical change around the world, from ca. 1500 to ca. 1800.

HIST 441 Modern World History (4, Sp) Comparative patterns of historical change around the world, from ca. 1800 to the present.

HIST 442 The Ethics of Financial and Political Accountability (4) Examination of how kingdoms, empires and great companies have risen and fallen due to good or poor financial and political accountability.

HIST 443 Race and Religious Riots in Modern World History (4, FaSpSm) Origins of riots against Mexicans, Chinese, Jews and other minority groups in Asia, Europe, Australia and the Americas.

HIST 444 Mass Violence and Comparative Genocide in Modern World History (4) Systematic exploration of origins, developments, forms, and aftermath of mass murder of large population groups, one of the dark elements of modern world history.

HIST 445 Comparative History and Theory of Fascism and Nazism (4, Fa) Analysis and comparison of Italian Fascism and German Nazism in national and international contexts; recent historiographic debates.

HIST 446 Resistance to Genocide (4) Examination of theoretical approaches to and historical accounts of resistance to genocide. Students conduct original research on how people oppose or resist mass atrocities. *Recommended preparation:* course on the Holocaust or genocide.

HIST 451 The Mexican Revolution (4, 2 years, Sp) The roots, trajectory and outcome of the Mexican revolution of 1910.

HIST 452 Beauty and the Body in Historical Perspective (4, Sp) Cultural constructions of the body and beauty from gender, ethnicity, age, and disability perspectives in Europe and the United States from 1800 to the present.

HIST 453 The Age of Emancipation (4) Examines the evolution of racial status law in the long 19th century, with special emphasis on the relationship between slavery, segregation, and citizenship.

HIST 454 The World Pirates Made: Piracy and Privateering, 1500–1815 (4) Research seminar on history of piracy and its role in rise of modern state and nation. *Recommended preparation:* HIST 201.

HIST 455 Advanced Topics in African-American History (4, Sp) Exploration of African-American history through primary and secondary sources employing a colloquium format with an emphasis on shared responsibility for comprehensive discussion and analysis. Upper-division or graduate standing.

HIST 456 Race, Slavery, and the Making of the Atlantic World (4, FaSp) Introduction to the literature of the Atlantic World with a focus on slavery and its role in the emergence of the modern era. Seminar enrollment limited to 15 students.

HIST 457 The American West (4, Irregular) The nation's westward movement from Colonial times to the present, with emphasis on the frontier's effect on American life and institutions.

HIST 458 History of California (4, Fa) Exploration, colonization, and development of Hispanic California; coming of the Americans; political, economic, and cultural development of California since its acquisition by the United States.

HIST 461 19th Century American Thought (4, Fa) Major American thinkers from Emerson and Margaret Fuller to William James and W.E.B. DuBois, with emphasis on race, religion, politics, and gender.

HIST 462 20th Century American Thought (4, Fa) Major American thinkers from John Dewey and Jane Addams to Martin Luther King and Richard Rorty, with emphasis on race, religion, politics, and gender.

HIST 463 The Constitutional History of the United States (4) Historical influences on changes in the structure, practice, and interpretation of the American Constitution, including debates about institutional powers and civil/political rights and liberties. *Recommended preparation:* HIST 360 and HIST 361.

HIST 464 Culture, Money, and Power: Japanese-American Relations since 1853 (4, Sp) Examination of the role of cultural, economic, and military forces in shaping relations between two of the most important nations in the Asia/Pacific regions. *Recommended preparation:* HIST 363 or appropriate International Relations course.

HIST 465 America in the Cold War World, 1945–1991 (4, Fa) America's role in the Cold War and the impact of that conflict on its people, society and culture.

HIST 470 The Spanish Inquisition in the Early Modern Hispanic World (4, 2 years, Fa) The Spanish Inquisition in Spain and Colonial Latin America, major theories and interpretations. Junior or senior

standing recommended.

HIST 473 Colonial Latin America Seminar (4, Sp) The history of colonial Latin America, focusing on the transformation of native Americans and Europeans into participants in a new colonial tradition. Upper-division standing. (Duplicates credit in former HIST 371.)

HIST 474 Sex, Gender, and Colonialism in Latin America, 1492 to 1820 (4, 2 years, Sp) Seminar overview of the historical literature on women, gender, and sexuality in colonial Latin America.

HIST 478 The United States, 1789–1850 (4, Irregular) The nation during the first six decades; development of American institutions; constitutional growth, expansion, sectionalism, and the Mexican War; the Compromise of 1850.

HIST 480 Seminar in Middle East History (4, max 8) A readings and research seminar dealing with one topic in the history of the Middle East. Topics will change each time the course is offered.

HIST 481 Producing Film Histories (4, Sp) History of film form and its institutions. Students will produce an original written or multimedia research project.

HIST 482 Jesus in American History and Culture (4, Sp) The place of Jesus Christ in diverse American cultures from colonial times to the present: Jesus as cultural icon, secular inspiration, Christian Son of God.

HIST 484 The United States, 1919–1939 (4, Irregular) Postwar reaction and the Twenties; the Great Depression and the New Deal; diplomacy between the wars.

HIST 487 The United States since 1939 (4, Irregular) A survey of the accelerating changes that transformed the nation's domestic life and revolutionized America's role in world affairs.

HIST 488 Teaching History in the Secondary Schools (4, Fa) Seminar in research methods, textbook and online research and teaching materials, and instructional approaches for teaching history in secondary schools.

HIST 490x Directed Research (1–8, max 12, FaSp) Individual research and readings. Not available for graduate credit.

HIST 492 Honors Thesis (4, Sp) Writing of the honors thesis; for students in the History Honors Program.

HIST 494 Seminar in New Historical Writing (4, 2 years, Fa) Historical writing experiments combining historical specificity with more fluid approaches to time, characterization and objectivity associated with 20th century artists.

HIST 495 American Lives: Biography and Autobiography in the United States Past (4) The history of the United States seen through the lives of individuals, including Thomas Jefferson, Jane Addams, Malcolm X, and Marilyn Monroe.

HIST 497 Senior Seminar in Early Modern Studies (4, Sp) (Enroll in ENGL 497)

HIST 498 Seminar on Selected Historical Topics (4, max 8, FaSp) Advanced study in historical analysis and writing on selected topics and themes. Seminar enrollment limited to 15 students. *Recommended preparation:* HIST 201.

HIST 499 Special Topics (2–4, max 8, Irregular)

HIST 500 Introduction to Graduate Historical Studies (4, Fa) Techniques, theories, and sub-disciplines of history.

HIST 505 Studies in Early Medieval History (4, Irregular) Intensive study of subjects selected from the early Middle Ages, emphasizing source material, bibliography, and historiographic problems.

HIST 506 Studies in Later Medieval History (4, Irregular) Intensive study of subjects selected from the later Middle Ages, emphasizing source material, bibliography, and historiographic problems.

HIST 508 Studies in the Renaissance (4) Europe in the Renaissance: sources; secondary bibliography; and historiography.

HIST 509 Studies in the Reformation (4) Readings, reports, and discussions of major problems, issues, and interpretations of the Reformation.

HIST 510 Studies in Early Modern European History (4, Irregular) Readings of major interpretive studies on the 17th and 18th centuries.

HIST 511 Studies in Early Modern British History (4) Readings of major interpretive and historiographical studies on 16th and 17th century British history.

HIST 514 Studies in Modern European History, 1789–1914 (4, Fa) Readings and current bibliography in the history of Europe from the French Revolution to the outbreak of World War I; emphasis on cultural history approaches.

HIST 515 Studies in Modern European History: Europe's 20th Century (4, Fa) Readings in the history and historiography of Europe in the 20th century.

HIST 517 Studies in Russian History (4, Irregular) Readings, discussions, and student papers in modern Russian history.

HIST 520 Modernity and Its Visual Cultures (4, Sp) Western visual culture 1850–1930: historical background of changes in high and popular culture, technological reproducibility, display and spectacularization; recent literature and theoretical approaches.

HIST 525 Studies in British History (4, Irregular) Selected topics in English and British Empire history with emphasis on the 19th and 20th centuries.

HIST 534 Studies in Modern Japanese History (4) Selected topics and historiography of modern Japan. Open only to doctoral students.

HIST 535 Studies in Japanese History (4, max 8) Selected topics in historical problems dealing with Japan.

HIST 536 Studies in Chinese History (2 or 4, Irregular) Selected topics in historical problems dealing with China. *Prerequisite:* HIST 340.

HIST 540 Studies in Modern East Asian History (4, max 8, Irregular) Readings and analysis of a particular theme in modern Asian history, focusing on broad comparative issues like cultural identity, colonialism, nationalism, revolution, or interstate relations.

HIST 544 Feminist Theory for Historians (4, Fa) Readings in contemporary feminist theory, focused especially on theories that address the construction, writing, and general practice of history. Open only to graduate students.

HIST 546 Comparative History of Women and Gender in the West to 1800 (4, Fa) Topically-focused readings in the comparative history of women and gender in Europe and the Americas before 1800. Open only to graduate students.

HIST 550 Studies in the History of Women, Gender and Sexuality (4, max 8, Irregular) Readings and current bibliography in the history of women, gender and sexuality.

HIST 554 Readings in Chicano/Latino History (4, FaSp) (Enroll in AMST 554)

HIST 555 Studies in the American West (4) Zones of contact — physical, economic, political, ecological,

symbolic, cultural, metaphorical — between peoples “west” of the Eurasian land mass since the rise of capitalist global expansion.

HIST 560 Transpacific History (4) Exploration of the connections and divergences in the Pacific region, 19th century to present. Topics include transnationalism, war, political economy, international relations, immigration, environmentalism, and race.

HIST 561 Historiography of Colonial Mexico (4, Fa) Introduction to the historiography of Colonial Mexico from 1500 to 1821.

HIST 565 Studies in American International History (4, FaSm) Readings and analyses of American policies, roles and principles in their interaction with peoples and nations of the world.

HIST 566 Historical Scholarship on North America to 1800 (4, Fa) Introduction to research in the fields of American Indian, colonial America, Atlantic world, and the early United States. Open only to graduate students.

HIST 567 Historical Scholarship on 19th Century America (4, Sp) Introduction to historiography and research in the political, economic, social, cultural, and intellectual history of the 19th century United States.

HIST 568 Historical Scholarship on 20th and 21st Century America (4, Sp) Introduction to historiography and research in the political, economic, social, cultural, and intellectual history of the 20th and 21st century United States.

HIST 575 Studies in 19th Century United States History (4, max 8, 2 years, Fa) Intensive readings and bibliography in the Early National, Jacksonian, Civil War, and Post-Civil War periods.

HIST 583 Studies in Urban History (4) Readings and analyses in the rise of the city and the impact of urbanization from the colonial era to the present.

HIST 584 Seminar in American Social History (4, Irregular) Creation of communities and societies; industrialization, urbanization, working class life; families, women, ethnicity; immigration; racism; mobility; reform and radicalism, leisure.

HIST 585 Studies in 20th Century American History (4) Readings and analyses in social and political problems, movements, and issues.

HIST 587 Studies in the Politics of American Popular Culture (4) Selected themes, theories, and key works in the politics of American popular culture.

HIST 590 Directed Research (1–12, FaSpSm) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

HIST 592 Historiography (4, Sm) Historical criticism; form and mechanics of presenting research; writers of history, their works and philosophies; theories of historical development.

HIST 593 The Art of Historical Writing (4, Sp) An analysis of conventional forms of historical representation and the artistic and scientific challenges to them. Laboratory training in innovative forms of historical writing will be stressed.

HIST 594abz Master’s Thesis (2-2-0, FaSp) Credit on acceptance of thesis. Graded IP/CR/NC.

HIST 595x Practicum in Teaching the Liberal Arts (2, Fa) Basic principles of history pedagogy, with emphasis on practical applications and the importance of career-long skill development. Required for first semester teaching assistants in history. Graded CR/NC.

HIST 602 Seminar in Ancient History (2 or 4, max 8, Irregular) Directed research in historical problems.

HIST 605 Seminar in Medieval European History (2 or 4, max 8, Irregular) Directed research in historical problems.

HIST 608 Seminar on Premodern Europe (4, max 8) Directed research on topics from late antiquity to the 18th century. Students will work with both their faculty advisers and the course instructor.

HIST 610 Seminar in Early Modern European History (2 or 4, max 8, Irregular) Directed research in historical problems concerning the 17th and 18th centuries.

HIST 615 Seminar in Modern European History (2 or 4, max 8, Irregular) Directed research in historical problems dealing with Europe since 1789.

HIST 617 Seminar in Russian History (2 or 4, max 8, Irregular) Directed research in historical problems.

HIST 620 Research Seminar on Modern Visual Culture (4, Fa) A research seminar focusing on Western visual culture since the mid-18th century. *Recommended preparation:* HIST 520.

HIST 630 Seminar in Japanese History (2 or 4, max 8, Irregular) Directed research in historical problems.

HIST 635 Seminar in Chinese History (2 or 4, max 8, Irregular) Directed research in historical problems. *Prerequisite:* HIST 340.

HIST 650 Seminar on Women's and Family History (4, max 8, Sp) Readings, discussions, and directed research on women's and family histories.

HIST 655 Seminar in Western American History (2 or 4, max 8) Selected topics in the history of the American frontier and the West.

HIST 660 Research Seminar on Transpacific Studies (4, FaSp) (Enroll in AMST 622)

HIST 670 Illness and Healing in the Modern World (4, Sp) Illness and healing in Europe and the Americas since 1492, especially the changing clinical and cultural definitions and responses to disease and ailments.

HIST 673 Seminar in Early North American History (4, max 8) Primary research on issues related to the history of the colonial and early national periods with an emphasis on areas that became the United States.

HIST 675 Seminar in 19th Century United States History (4, max 8, 2 years, Sp) Research in historical problems of the Antebellum, Civil War, and Post-Civil War periods.

HIST 680 Seminar in 20th Century United States History (4, max 8, 2 years, Fa) Directed research in historical problems of the Reform, World War I, interwar, World War II, and Post-War periods.

HIST 700 Historical Explanation and Research Design (4) Designed for all doctoral candidates in their last year of course work, this practicum helps students define a dissertation topic and produce a prospectus. Graded CR/NC. Open only to graduate students.

HIST 790 Research (1–12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

HIST 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSp) Credit on acceptance of dissertation. Graded IP/CR/NC.

Interdisciplinary Major

The interdisciplinary major allows students to create an individual, original major. It is a flexible option available when a combination of existing majors and academic minors does not adequately fulfill a student's educational goals. With close advisement, students can build their own programs of study.

The interdisciplinary major is an intensive research program for students with a focused interest in a topic that requires study from more than one disciplinary perspective. Interdisciplinary majors are usually self-motivated students with good writing skills and an intellectual passion for a particular area of inquiry. Course work is selected to lead to a thesis project integrating the areas of research comprising the interdisciplinary major.

Admission

Admission to the interdisciplinary major is by application. Applications, which may be obtained from the program office, are considered by a special admissions committee. Interested students must have a GPA of 3.0 (A = 4.0) or above; those with less than a 3.3 are the exception. No one is usually admitted after the end of the first semester of the junior year.

Program Requirements

Students in the program must meet all graduation requirements of the college. When admitted, students establish an academic "contract," which outlines each semester's course of study through graduation. The contract includes a minimum of nine (four unit) upper-division courses, distributed in at least two fields. The primary focus of the major should be in the USC Dornsife College of Letters, Arts and Sciences. These areas of concentration must then be combined in a senior thesis or project, written under the guidance of a faculty committee.

Restrictions

Course prerequisites cannot be waived; admission to courses restricted to majors is subject to availability and direct negotiations; admission to departments and/or schools which have their own admission requirements must be processed separately.

The Bachelor of Arts in Health and the Human Sciences

LOWER-DIVISION CORE REQUIREMENTS (20 UNITS)

UNITS

Choose two:

BISC 150Lx	The Nature of Human Health and Disease, or	
BISC 220L	General Biology: Cell Biology and Physiology	4
CHEM 105aL	General Chemistry	4
MATH 114x	Foundations of Statistics, or	
MATH 125	Calculus I, or	
MATH 208x	Elementary Probability and Statistics	4
PSYC 240x	Scientific Inquiry and Reasoning	4
SOCI 242	Sociology, Human Behavior and Health	4

Choose one module among the six below:

1. Health, Gender and Ethnicity

ANTH 125	Social Issues in Sexuality and Reproduction, or	
SWMS 225	Gender, Sex, and Science: A Gender Studies Approach	4
ANTH 305	Childhood, Birth, and Reproduction	4
PSYC 462m	Culture and Mental Health	4
SWMS 336	Health, Gender, and Ethnicity, or	
SWMS 420	Women, Nature, Culture: The Behavioral Ecology of Women	4

2. Health and the Mind

PSYC 100	Introduction to Psychology	4
PSYC 336L	Developmental Psychology	4
PSYC 360	Abnormal Psychology	4
PSYC 361	Introduction to Clinical Psychology	4

3. International Health

ANTH 101	Illness and Healing: The Cross-Cultural Perspective, or	
ANTH 105	Culture, Medicine and Politics	4
IR 339	Public Health and International Relations	4
IR 306	International Organizations, or	
IR 371	Global Civil Society: Non-State Actors in World Politics	4
SOCI 362	Global and Transnational Sociology	4

4. Sociology of Health

SOCI 225	Sociology of Health and the Body	4
SOCI 314	Analyzing Social Statistics	4
SOCI 470	Development and Social Change in the Third World	4
SOCI 475	Medical Sociology	4

5. Health and Aging

GERO 320	Psychology of Adult Development, or	
GERO 330	Society and Adult Development	4
GERO 340	Policy, Values, and Power in an Aging Society, or	
GERO 437	Social and Psychological Aspects of Death and Dying	4
GERO 380	Diversity in Aging, or	
GERO 435	Women and Aging: Psychological, Social, and Political Implications	4
GERO 416	Health Issues in Adulthood	4

6. Human Biology

BISC 220L	General Biology: Cell Biology and Physiology	4
HBIO 300	Evolution, Ecology, and Culture	4
HBIO 301L	Human Anatomy	4
HBIO 302	Nutrition and Metabolism	4

Choose one course from the list below:

AMST 365	Leadership in the Community	4
GERO 495	Practicum in Geriatric Care	4
MDA 250	Internship for Liberal Arts: Work and Career — Theory and Practice	1-4
POSC 395	Directed Governmental and Political Leadership Internship	4
SOCI 450	Non-Governmental Organizations/Non-profits Field Practicum	4
SWMS 311	Gender Studies in the Community: Internship	4

UPPER-DIVISION ELECTIVES (8 UNITS)

UNITS

Choose two courses from the list below, or one from this list and one upper-division course from a module not yet chosen, above.

BISC 499	Molecular Principles of Biochemistry, or	
CHEM 499	Molecular Principles of Biochemistry	4
HIST 330	Drugs, Diseases and Medicine in History	4
HBIO 405	Evolutionary Medicine	4
MDA 320	Global Ethics: Poverty, Health, and the Human Condition	4
MDA 350	Community Health Scan	4
REL 460	Senior Seminar: Medical Ethics	4
SOCI 450	Non-Governmental Organizations/Non-profits Field Practicum	4

Total units required for the B.A. in Health and the Human Sciences
(at least 20 upper-division)

45-48

Bachelor of Arts in Narrative Studies

See English for a full description of the major.

Minor in Critical Approaches to Leadership

This minor is offered by faculty from several disciplines whose perspectives are brought to bear on issues and questions that should inform the judgements of capable, ethical leaders. Students are introduced to theoretical and historical models of leadership, engage in case studies of modern leaders, select critical electives that explore ethical and social considerations of leadership, examine professional applications of leadership principles, and integrate what they have learned in a capstone course. The emphasis of the minor is on leadership as expertise in community-building and takes advantage of USC's programs in community service, including the Joint Educational Project, the Jesse M. Unruh Institute of Politics and other internships available through the Division of Student Affairs.

Five upper-division courses, totaling 20 units, are required.

CORE COURSES

UNITS

Choose two:

CLAS 370	Leaders and Communities	4
CLAS 375	Alexander the Great: Leadership, Personality and World Conquest	4
PHIL 335	Theoretical Models of Leadership	4
MDA 325	Case Studies in Modern Leadership	4

CRITICAL ELECTIVES

UNITS

Group A — choose one

PHIL 337	History of Modern Political Philosophy	4
PHIL 437	Social and Political Philosophy	4
PSYC 355	Social Psychology	4
REL 341	Ethics in a Technological Society	4

REL 360	Ethical Issues in the New Medical Revolution	4
REL 375	Conflict and Change and the Ethics of Business	4
SOCI 320	Social Psychology	4

Group B – choose one

IR 303	Leadership and Diplomacy	4
MOR 470	Global Leadership	4
POSC 365	World Political Leadership	4
POSC 423	Presidents and the Presidency	4

CAPSTONE COURSE **UNITS**

AMST 365	Leadership in the Community, or	
MDA 365	The Art and Adventure of Leadership, or	
MDA 475	The Future of California	4

CORE COURSES **UNITS**

Choose two:		
CLAS 370	Leaders and Communities	4
CLAS 375	Alexander the Great: Leadership, Personality and World Conquest	4
PHIL 335	Theoretical Models of Leadership	4
MDA 325	Case Studies in Modern Leadership	4

Interdisciplinary Minor in International Health, Development, and Social Justice

This minor is intended for students who wish to understand the challenges associated with health care as an ethical issue in the international context. In doing so, it focuses on the convergence of three large fields of inquiry, raising questions about their intersection. Social justice is concerned with equity, with questions of fairness as they inform (or should inform) access to resources necessary for the survival and well-being of people around the globe.

To provide the necessary content, this minor presents an introduction to political economy, to cross-cultural approaches to health and wellness, and to theories of economic development as they relate to health care.

This minor is intended to prepare students for careers and leadership roles in the arenas of international health, medical ethics, overpopulation, economic development, human welfare and principles of social justice.

As with all minors, students should include four courses outside their major, four courses at the upper-division level, and four courses that are not being used to satisfy any other subject requirement. In addition, to satisfy this minor, students must choose courses from at least two different departments.

REQUIRED COURSE WORK: 24 units

LOWER DIVISION REQUIREMENT: CHOOSE ONE COURSE (4 UNITS) **UNITS**

<i>Students should have some experience with engaging ethical questions or considering the context in which these issues arise, which can be accomplished by completing one of the following:</i>		
ANTH 101	Illness and Healing: The Cross-Cultural Perspective	4
ANTH 105g	Culture, Medicine and Politics	4
ANTH 125g	Social Issues in Human Sexuality and Reproduction	4
ANTH 205	Introduction to Global Studies and Overseas Research	4
BISC 102Lxg	Humans and Their Environment	4
BISC 103Lx	General Biology for the Environment and Life	4

BISC 150Lxg	The Nature of Human Health and Disease	4
ECON 205	Principles of Macroeconomics	4
GEOL 108Lg	Crises of a Planet	4
IR 101xg	International Relations	4
IR 213*	The Global Economy	4
PHIL 137gm	Social Ethics for Earthlings and Others	4
PHIL 140g	Contemporary Moral and Social Issues	4
SOCI 225g	Sociology of Health and the Body	4
SOCI 242g	Sociology, Human Behavior, and Health	4
SWMS 225	Gender, Sex, and Science: A Gender Studies Approach	4

**Prerequisite: IR 210*

INTRODUCTION TO POLITICAL ECONOMY: CHOOSE ONE COURSE (4 UNITS) UNITS

The courses in this and the following categories provide an understanding of the forces that shape global development.

ECON 238xg	Political Economy and Social Issues	4
ECON 340*	Economics of Less Developed Countries	4
ECON 350*	The World Economy	4
POSC 435	Politics and the Economy	4

**Prerequisite: ECON 203 or 205*

THEORIES OF DEVELOPMENT: CHOOSE ONE COURSE (4 UNITS) UNITS

IR 325	North-South Relations in the Global Economy	4
IR 344	Developing Countries in World Politics	4
IR 454	The International Political Economy of Development	4
POSC 255g	Cultures, Civilizations and Ethnicities in World Politics	4
POSC 450	Political Development	4
POSC 456	Women in International Development	4
SOCI 314	Analyzing Social Statistics	4
SOCI 362	Global and Transnational Sociology	4
SOCI 470	Development and Social Change in the Third World	4

CROSS-CULTURAL PERSPECTIVES ON HEALTH AND WELLNESS: CHOOSE ONE COURSE (4 UNITS) UNITS

These courses explore cultural attitudes and differences about health and wellness that affect decisions about health care.

ANTH 301	The Performance of Healing	4
ANTH 305	Childhood, Birth and Reproduction	4
ANTH 405	Evolutionary Medicine	4
IR 339	Public Health and International Relations	4
PSYC 367*	Stress, Health, and the Mind-Body Connection	4
PSYC 462m**	Culture and Mental Health	4
REL 460	Senior Seminar: Medical Ethics	4
SOCI 385	Population, Society, and Aging	4
SOCI 475	Medical Sociology	4
SWMS 336	Health, Gender and Ethnicity	4

Prerequisite: PSYC 100

***Recommended preparation: PSYC 100*

PERSPECTIVES ON SOCIAL JUSTICE: CHOOSE ONE COURSE (4 UNITS)		UNITS
<i>These courses familiarize students with the application of legal and ethical questions to social phenomena and the allocation of resources.</i>		
ANTH 300	Evolution, Ecology, and Culture	4
IR 316	Gender and Global Issues	4
IR 401	The United Nations and World Order	4
PHIL 431	Law, Society, and Politics	4
PHIL 437	Social and Political Philosophy	4
REL 366	Religion and Social Change	4
SOCI 360m	Social Inequality: Class, Status, and Power	4
SWMS 384m	Gender, Social Inequality, and Social Justice	4

CAPSTONE REQUIREMENT: CHOOSE ONE COURSE (4 UNITS)		UNITS
<i>These three capstone courses examine efforts to introduce issues of social justice to the distribution of health care and other resources essential for human survival and well-being.</i>		
MDA 320	Global Ethics: Poverty, Health and the Human Condition	4
SOCI 408	Volunteers, Non-Governmental Organizations, and Everyday Politics	4
SOCI 450	Non-Governmental Organizations/Non-profits Field Practicum	4

Courses of Instruction

INTERDISCIPLINARY MAJOR PROGRAM (INDS)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

INDS 100 Topical and Multidisciplinary Seminars (1–4, max 12, FaSp) Small group investigation from an interdisciplinary perspective.

INDS 101 Directed Research and Tutorials (1–4, FaSp) Research and study with L.A.S. Faculty Associates and other faculty.

INDS 102 Field Study (1–4, FaSp) In-service experience in a variety of off-campus institutions under the supervision of an L.A.S. Faculty Associate.

INDS 300 Topical and Multidisciplinary Seminars (1–4, max 12, FaSp) See INDS 100 for description.

INDS 301 Directed Research and Tutorials (1–4, FaSp) See INDS 101 for description.

INDS 302 Field Study (1–4, FaSp) See INDS 102 for description.

INDS 400 Topical and Multidisciplinary Seminars (1–4, max 12, FaSp) See INDS 100 for description.

INDS 401 Directed Research and Tutorials (1–4, FaSp) See INDS 101 for description.

INDS 402 Field Study (1–4, FaSp) See INDS 102 for description.

INDS 494 Senior Thesis (1–8, FaSp) Writing the IDM senior thesis under the supervision of a faculty qualifying exam committee.

Degree Programs

The School of International Relations (SIR) offers a B.A. in international relations; a B.A. in international relations (global business); a B.A. in international relations and the global economy; a progressive degree in

international relations; a dual M.A. in international relations/Juris Doctor offered with the USC Gould School of Law; a Master of Public Diplomacy; and a Ph.D. in political science and international relations offered with the Political Science Department. The SIR also offers minors in global communication, international relations and international policy and management.

The SIR encourages undergraduate double majors, especially with economics, environmental studies, geography, history, journalism, foreign languages, political science and sociology. Programs are flexible, allowing students to gain a broad background in international studies and, at the same time, to specialize in a particular area. Minors in international relations; international policy and management; international urban development; and global communication, as well as interdisciplinary minors in nonprofits, philanthropy and volunteerism; and Russian area studies are also offered.

Dornsife College of Letters, Arts and Sciences

International Relations

Undergraduate Degrees

Major Requirements for the Bachelor of Arts in International Relations

The International Relations major requires a minimum of 48 units. All majors should complete IR 210 International Relations: Introductory Analysis, IR 211 International Relations: Approaches to Research, IR 212 Historical Approaches to International Relations and IR 213 The Global Economy in their first 32 total units. The 200-level courses must be completed by the time they have completed 48 total units. The 200-level courses must be completed before attempting 400-level courses.

Four semesters of a single foreign language are required. All majors are encouraged to obtain as much foreign language training as possible either through a major or a minor in a foreign language or through a study program abroad.

Beyond IR 210, IR 211, IR 212 and IR 213, international relations majors are required to take eight additional upper-division courses. Majors must choose one course from each of the four fields: Culture, Gender and a Global Society; Foreign Policy Analysis; International Political Economy; International Politics and Security Studies. In addition, students must complete one course from Regional Studies (Europe; Russia, Eastern Europe and Eurasia; Latin America; the Middle East and Africa; or Pacific Rim). Finally, students must complete one 400-level course of their choice. Students are encouraged to explore different professional career options within international relations by enrolling in IR 391 Directed International Relations Field Study, a 2-unit course that can be repeated for major credit. Students may receive both general education credit and major credit for the same course.

Culture, Gender and Global Society

This field explores identities and interests shaping the politics of intellectual global society. IR 303, IR 305, IR 306, IR 309, IR 310, IR 311, IR 315, IR 316, IR 339, IR 344, IR 371, IR 382, IR 403, IR 404, IR 406, IR 422, IR 424, IR 437, IR 438, IR 444, IR 449, IR 463, EALC 375, POSC 456, PPD 382, SOCI 335, SOCI 435, SOCI 445, SOCI 460 and SOCI 470.

Foreign Policy Analysis

This area examines the external relations of states, particularly the domestic and international factors that influence the formulation and implementation of national foreign policies. Factors within states (leadership, small group dynamics and domestic lobbying groups) and factors between states are stressed. IR 303, IR 311, IR 341, IR 342, IR 343, IR 345, IR 346, IR 362, IR 365, IR 368, IR 385, IR 403, IR 410, IR 440, IR 441, IR 442, IR 443, IR 445, IR 465 and IR 484.

International Political Economy

These courses focus on what used to be considered “low” politics, but which have become key issues. Money, trade, investment, development, the environment, law and foreign economic policy are examined. IR 308, IR 309, IR 311, IR 323, IR 324, IR 325, IR 326, IR 328, IR 329, IR 330, IR 331, IR 349, IR 363, IR 364, IR 425, IR 426, IR 427, IR 428, IR 430, IR 439, IR 449, IR 454, ECON 338, ECON 450, ECON 452, POSC 430 and POSC 431.

International Politics and Security Studies

War and peace are at the heart of relations among nations. These courses investigate defense analysis, arms control, peace-building and strategic studies. The domestic, technological and international factors influencing defense and arms control policies and negotiations are considered. The World Wars, Korea, Vietnam and the numerous crises of the Cold War are the backdrop in these courses. IR 302, IR 303, IR 304, IR 310, IR 311, IR 313, IR 318, IR 342, IR 381, IR 382, IR 383, IR 384, IR 385, IR 386, IR 387, IR 402, IR 403, IR 404, IR 410, IR 422, IR 427, IR 437, IR 445, IR 460, IR 453, IR 483, POSC 366 and POSC 448ab.

Regional Studies

The regional studies field focuses on geographic regions, such as the Pacific Rim, Latin America, Europe, the Middle East and Africa. These courses test general theories of international relations within the framework of a specific region. The economic, political, ethnic and social history of a region are examined to help explain current developments and interstate and domestic policies and issues within a region.

Europe: IR 368, IR 369, IR 385, IR 389, IR 468, FREN 410, GERM 465, HIST 312, HIST 313, HIST 332, HIST 414, HIST 422, HIST 425, HIST 427, POSC 370, POSC 371, POSC 463, SPAN 320 and SPAN 350.

Russia, Eastern Europe and Eurasia: IR 345, IR 346, IR 438, IR 439, HIST 320, HIST 328, HIST 416, POSC 464 and SLL 330.

Latin America: IR 364, IR 365, IR 366, IR 425, IR 426, IR 465, IR 466, ANTH 425, HIST 372, HIST 374, POSC 350, POSC 430, POSC 431 and SPAN 320.

The Middle East and Africa: IR 362, IR 363, IR 367, IR 463, ANTH 327, ECON 342, HIST 383, HIST 480, POSC 351, POSC 358 and REL 402.

Pacific Rim: IR 333, IR 360, IR 361, IR 376, IR 384, IR 440, IR 442, ANTH 323, ANTH 324, EALC 340, EALC 345, EALC 350, EALC 375, EASC 360, ECON 343, HIST 333, HIST 337, HIST 340, POSC 352, POSC 355, POSC 356, POSC 377 and POSC 453.

Honors Program

The honors program centers around the IR 494 Honors Thesis Seminar that culminates in a thesis based on original research. In the spring of the junior year, students who have earned a GPA of 3.5 in the major and an overall GPA of 3.3 submit an application, two letters of recommendation and a research proposal that identifies the thesis topic to the student affairs office. Upon admission to the program, the student identifies an appropriate faculty member to co-supervise the thesis and, in the fall of the senior year, enrolls in IR 311 to develop the formal research design and complete the literature review. Students may enroll in IR 311 in the fall of their junior year if their research interests are well specified. In the spring of the senior year, the student enrolls in IR 494. If the program is completed successfully (a B+ or better in IR 494, a major GPA of 3.5 and an overall GPA of 3.3 [A = 4.0]), the transcript will read “with Honors.”

Dornsife Washington, D.C. Program

The Washington, D.C. Semester program provides a unique, semester-long opportunity to study and work in the nation’s capital. The immersive program capitalizes on the D.C. experience. Courses are drawn from areas with direct policy relevance such as foreign policy, politics and the political process and economics. All students complete an internship with one of Washington’s many policy-focused organizations, including government agencies, non-governmental organizations, advocacy groups, think tanks, consulting firms and congressional offices. The Dornsife D.C. program is open to students from all majors while maintaining a focus on practical policy, both domestic and international.

Bachelor of Arts in International Relations (Global Business)

The B.A. in International Relations with an emphasis in Global Business will give students the opportunity to pursue a degree in international relations and acquire specific skills in one of four concentrations in international business: international finance, international financial management, global marketing or global management. Students who have earned a GPA of 3.0 or above and a “B” average in IR 210 International Relations: Introductory Analysis and a second 300-level or above IR course are eligible to apply during their sophomore year. In addition to the IR requirements, students need to complete the following prerequisite courses: ECON 203 Principles of Microeconomics or ECON 351x Microeconomics for Business, ECON 205 Principles of Macroeconomics or ECON 352x Macroeconomics for Business and MATH 118x Fundamental Principles of Calculus before they can begin this program. The international relations course work consists of 28 units: IR 210, a regional course, a 400-level course, an international political economy course (IR 324, IR 325, IR 326 or IR 330) and three upper-division electives.

Course work at the USC Marshall School of Business consists of ACCT 410x Accounting for Non-Business Majors or BUAD 285a Accounting Fundamentals, Financial and Managerial Accounting and 20 units in the respective areas of concentration. *International finance*: BUAD 215x Foundations of Business Finance or BUAD 306 Business Finance, BUAD 310 Applied Business Statistics, BUAD 350 Macroeconomic Analysis for Business Decisions or ECON 305 Intermediate Macroeconomic Theory, and FBE 462 International Trade, Finance and Commercial Policy; *international financial management*: BUAD 215x Foundations of Business Finance or BUAD 306 Business Finance, BUAD 310 Applied Business Statistics, FBE 432 Corporate Financial Strategy, FBE 436 Financial Management of Multinational Corporations, FBE 462 International Trade, Finance and Commercial Policy; *global marketing*: BUAD 307 Marketing Fundamentals, BUAD 310 Applied Business Statistics, MKT 450 Consumer Behavior and Marketing, and MKT 465 Global Marketing Management; *global management*: BUAD 304 Organizational Behavior and Leadership, MOR 431 Interpersonal Competence and Development, MOR 462 Management Consulting, MOR 402 Research Skills for Marketing Insights and MOR 492 Global Strategy.

Bachelor of Arts in International Relations and the Global Economy

The B.A. in International Relations and the Global Economy (IRGE) offers students rigorous interdisciplinary training at the intersection of international relations and economics. The major prepares students for careers ranging from foreign policy and international development to international finance and political risk analysis. It is also ideally suited for students who plan to seek advanced degrees in the social sciences.

LOWER DIVISION COURSES

		UNITS
ECON 203	Principles of Microeconomics	4
ECON 205	Principles of Macroeconomics	4
IR 210	International Relations: Introductory Analysis	4
IR 213	The Global Economy	4
MATH 118x*	Fundamental Principles of Calculus, or	4
MATH 125*	Calculus I	4

CORE SKILLS AND ISSUES

		UNITS
IR 330	Politics of the World Economy, or	4
ECON 350	The World Economy	4
ECON 305	Intermediate Macroeconomic Theory	4
ECON 317	Introduction to Statistics for Economists	4

Choose two courses (8 units):

IR 324	Multinational Enterprises and World Politics	4
IR 325	North-South Relations in the Global Economy	4
IR 326	U.S. Foreign Economic Policy	4
IR 327	International Negotiation	4

IR 329	The Global Finance and Monetary Regime	4
IR 331	The Global Economy 2030	4

REGIONAL STUDY		UNITS
Choose one course (4 units):		
ECON 340	Economics of Less Developed Countries	4
ECON 342	Economic Development of the Middle East	4
ECON 343	Economic Development of East Asia	4
ECON 344	Economic Development of Sub-Saharan Africa	4
ECON 346	Economics of Transition and Development: China	4
IR 363	Middle East Political Economy	4
IR 364	The Political Economy of Latin American Development	4
IR 425	The New Triangle: China, the U.S, and Latin America	4
IR 428	China's Political Economy	4
IR 439	Political Economy of Russia and Eurasia	4

SENIOR EMPHASIS		UNITS
Choose one course (4 units):		
ECON 450	International Trade (pre-req: ECON 303)	4
ECON 452	International Finance	4
IR 426	Trade Politics in the Western Hemisphere	4
IR 427	Seminar on Economics and Security	4
IR 430	The Politics of International Trade	4
IR 454	The International Political Economy of Development	4

Total: 12 courses, 48 units

**Prerequisite required*

Bachelor of Arts in Central European Studies

The major in Central European studies combines background in relevant languages (Russian plus either German or Polish, or more intensive study of Russian) with course work in international relations and the history, culture and politics of the region.

No longer an imperial backwater, Central Europe has risen from its Cold War stasis to become one of the world's most dynamic and important regions. Stretching from the Baltic Sea to the Balkan Peninsula, and from the Eastern lands of Germany to the Western regions of Russia, this onetime great-power battleground is now a vital trade and energy corridor, a mosaic of languages and cultures, a place of both successful state-building and persistent ethnic frictions, and a promising but still-precarious bridge between the former Soviet Union and the West. Central Europe rivals the Far East and Southwest Asia as one of the world's most strategically important regions — now, and over the coming decades. Those who master its history and politics, its economic, cultural and linguistic diversity, will be well positioned for fellowships, graduate work, business or analytical careers centered on this fascinating region.

The objectives of this interdisciplinary major are to provide students with: 1) the historical background and linguistic-cultural skills necessary for in-depth study of Central Europe; 2) knowledge of its main post-Cold War political, ethnic, and economic trends; and 3) understanding of current issues from nationalism and immigration to trade, military-diplomatic and alliance politics.

Requirements

The fundamental linguistic background of the major is Russian (12 units).

REQUIRED COURSES		UNITS
SLL 120	Beginning Russian I	4
SLL 150	Beginning Russian II	4
SLL 220	Intermediate Russian I	4

Beyond the second year of Russian, students may choose from among three options: further work on Russian; or a year of German; or a year of Polish (8 units).

COURSES		UNITS
<i>Russian</i>		
SLL 250	Intermediate Russian II	4
SLL 310	Advanced Russian in Popular Culture, or	
SLL 340	Intercultural Communication in Russian	4
<i>German</i>		
GERM 101	German I	4
GERM 102	German II	4
<i>Polish</i>		
SLL 122	Elementary Polish I	4
SLL 152	Elementary Polish II	4

Required upper-division courses in international relations: two courses must be chosen from among the following (8 units):

REQUIRED COURSES, UPPER-DIVISION		UNITS
IR 345	Russian and Post-Soviet Foreign Policy	4
IR 346	Communism and Post-Communism: Eastern Europe and the Balkans	4
IR 385	European Foreign Policy and Security Issues	4

In addition three electives are required from among the following. At least one course must be at the 400 level. With prior approval, IR 490x, Directed Research (4 units) or SLL 490x, Directed Research (4 units) may be substituted for one of these courses (12 units):

ELECTIVE COURSES		UNITS
HIST 320	Russian and Soviet Rebels: The Moral Dilemma and the Continuity of Dissent	4
HIST 323	The Holocaust in 20th Century Europe	4
HIST 324	Islam in Russia and the Soviet Union	4
HIST 328	Poland and the Western Tradition	4
HIST 365	The Second World War	4
HIST 414	Contemporary Europe	4
HIST 416	History of Imperial Russia: 1689–1917	4
HIST 417	History of Soviet Russia: 1917–1991	4
HIST 422	European Intellectual and Cultural History: the 20th Century, 1920 to the Present	4
HIST 427	The German Question: Nation and Identity in Modern Central Europe	4
IR 369	Post-War European Relations	4
IR 439	Political Economy of Russia and Eurasia	4
IR 468	European Integration	4
POSC 366	Terrorism and Genocide	4

POSC 371	European Political Thought II	4
POSC 463	European Politics	4
POSC 464	Politics of Russia and Eastern Europe	4
SLL 302	Modern Russian Literature	4
SLL 303	Contemporary Russian Literature	4
SLL 330	Russian Thought and Civilization	4
SLL 397	Literature and Film in Eastern European Historical Experience	4
SLL 465	Seminar in Russian Studies	4

Bachelor of Science in Global Health Studies

The Bachelor of Science in Global Health Studies is a multidisciplinary degree of the Keck School of Medicine's Department of Preventive Medicine. Students complete course work in Health Promotion and Disease Prevention Studies. For degree requirements, see Preventive Medicine.

Progressive Degree Program in International Relations

This progressive degree program permits superior students to complete all requirements for both the B.A. and the M.A. degrees in international relations in five years. Students may apply on completion of 64 units of course work, but not later than the end of their junior year (or the completion of 96 units). To be eligible for admission, students must have at least a 3.5 overall GPA and a 3.75 major GPA and must have completed IR 210 International Relations: Introductory Analysis and IR 211 International Relations: Approaches to Research, or equivalent courses, as well as at least two upper-division IR courses with at least one at the 400 level. The application for admission to a progressive degree program must be accompanied by an approved course plan proposal and letters of recommendation from two USC faculty members in the School of International Relations. The requirements for both the B.A. and M.A. degrees must be satisfied. Further details about progressive degrees can be found [here](#).

Students enrolled in a progressive degree program are encouraged to pursue minors in either foreign language, economics, public policy or regional studies to attain regional and functional expertise in addition to their training in international relations.

Minor in International Relations

The minor in international relations allows students to develop a specialty in the field without a full major. Requirements are: IR 210 International Relations: Introductory Analysis and four upper-division courses including at least one regional course and one 400-level course. Students planning to minor in international relations should see the School of International Relations advisers in Von KleinSmid Center 301.

Minor in Global Communication

The rise of global firms and international changes that followed the end of the cold war raise new opportunities and challenges. This minor provides students from fields such as business, journalism, engineering and political science an understanding of the dynamic nature of global relations, communications and technology. The global communication minor consists of six 4-unit courses, three from International Relations and three from Communication.

REQUIRED INTERNATIONAL RELATIONS COURSE		UNITS
IR 305	Managing New Global Challenges	4

INTERNATIONAL RELATIONS REGIONAL COURSES (SELECT ONE)		UNITS
IR 303	Leadership and Diplomacy	4
IR 325	North-South Relations in the Global Economy (departmental approval)	4
IR 326	U.S. Foreign Economic Policy	4
IR 327	International Negotiation	4
IR 330	Politics of the World Economy	4

IR 333	China in International Affairs	4
IR 345	Russian and Post-Soviet Foreign Policy	4
IR 360	International Relations of the Pacific Rim	4
IR 361	South and Southeast Asia in International Relations	4
IR 362	The International Relations of the Contemporary Middle East	4
IR 363	Middle East Political Economy	4
IR 365	Politics and Democracy in Latin America	4
IR 367	Africa in International Affairs	4
IR 368	French Foreign Policy: 1945 to the Present (offered in Paris only)	4
IR 369	Post-War European Relations	4
IR 383	Third World Negotiations	4
IR 384	Asian Security Issues	4
IR 385	European Foreign Policy and Security Issues	4
IR 403	Transnational Diplomacy and Global Security	4
IR 439	Political Economy of Russia and Eurasia	4
IR 442	Japanese Foreign Policy	4
IR 468	European Integration	4

IR ELECTIVE

Select one 300- or 400-level IR course

REQUIRED COMMUNICATION COURSE

UNITS

COMM 487	Communication and Global Organizations	4
----------	--	---

COMMUNICATION ELECTIVES (SELECT TWO)

UNITS

COMM 324	Intercultural Communication	4
COMM 339	Communication Technology and Culture	4
COMM 345	Social and Economic Implications of Communication Technologies	4
COMM 371	Censorship and the Law: From the Press to Cyberspace	4
COMM 385	Survey of Organizational Communication	4
COMM 414	Communication and Social Change in China	4
COMM 430	Global Entertainment (Prerequisite: COMM 300)	4
COMM 431	Global Strategy for the Communications Industry	4

Total units: 24

Minor in International Policy and Management

The minor in international policy and management brings together courses from the School of International Relations, dealing with the new global challenges, specific regions of the world and international organizations and policies, and the USC Price School of Public Policy dealing with core management skills and public policy processes. Students will gain an understanding of the changes and challenges transforming the world and a taste of the policy and management skills to deal with them. To increase their understanding of the context and application of these concepts, students must complete a semester-long internship either in Washington, D.C. or Los Angeles with an organization that has an international focus.

Students take three courses in international relations, including the gateway course, IR 305 Managing New Global Challenges, three courses in public policy and management, and an approved internship through the School of International Relations (IR 491x).

Required Courses from International Relations: IR 305; one regional course selected from: IR 333, IR 345, IR 358, IR 360, 361, IR 362, IR 363, IR 365, IR 367, IR 369, IR 383, IR 385, IR 439, IR 442, IR 468; one course from either the regional course list or the following: IR 306, IR 307, IR 310, IR 315, IR 316, IR 318, IR 323, IR 324, IR 325, IR 326, IR 327, IR 330, IR 341, IR 343, IR 344, IR 381, IR 382, IR 427, IR 441, IR 444.

The public policy component requires the completion of the following three options:

From Public Policy: PPD 225; two additional courses from the following: PPD 357, PPD 371, PPD 373, PPD 476 or PPD 482; or from *Public Management*: PPD 402; two additional courses from the following: PPD 313, PPD 407, PPD 411a, PPD 476.

Internship

Each student is required to complete an approved internship with an international focus. Students take a two-unit internship through the School of International Relations (IR 491).

Interdisciplinary Nonprofits, Philanthropy and Volunteerism Minor

See the USC Price School of Public Policy.

Interdisciplinary Russian Area Studies Minor

See Department of Slavic Languages and Literatures.

Advisement

Advisement is required for all majors and minors. Students are encouraged to meet with School of International Relations advisers at least once a semester to review the direction of their individual programs. Students are also encouraged to seek the advisement of faculty members whose specializations are appropriate to their programs of study.

Academic Specialization

Students majoring in international relations who wish to develop their own specialization or emphasize a particular regional area may establish with a faculty adviser, or with School of International Relations advisers, an academic program that will accomplish the students' objectives.

Dornsife College of Letters, Arts and Sciences

International Relations

Graduate Degrees

The School of International Relations offers graduate curricula leading to several different graduate degrees. With courses and faculty renowned for their strengths in a great variety of fields — culture, gender and globalization, political economy, foreign policy and security, regional studies — our graduate international programs generally emphasize training for careers in advanced research and teaching. The school also welcomes professionally oriented students with related interests in fields such as law, communication, economics and business and public policy.

The School of International Relations has programs leading to a progressive B.A./M.A. in international relations; a dual M.A. in international relations/Juris Doctor offered with the USC Gould School of Law; a dual M.A. in international relations/Master of Planning and M.A. in international relations/Master of Public Administration offered with the USC Price School of Public Policy; Master of Public Diplomacy; and a Ph.D. in political science and international relations offered with the Political Science Department.

Admission Requirements

The School of International Relations welcomes talented candidates from a variety of academic backgrounds. Admission decisions are based on consideration of applicants' prior academic performance, as reflected in course grades and letters of recommendation. Applicants also are strongly encouraged to submit a sample of their written work in English, preferably a research-oriented paper. The committee also considers the potential for success in a graduate program based on Graduate Record Examinations scores. Business, government and other practical experiences related to international relations also are taken into account.

It is strongly recommended that master's and doctoral degree candidates should have completed at least one undergraduate course in statistics or quantitative methods and at least one course in economics before enrolling for graduate study. A course in social or political theory or international history also is highly desirable. The faculty may admit promising students who lack one or more of these courses. Students with this preparation tend to be more successful in the program and more likely to prosper in an academic or research setting afterwards.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

All graduate students are required to maintain regular contact with the graduate coordinator to assure compliance with departmental regulations.

Foreign Language Requirement

Students in the progressive B.A./M.A. and joint M.A./J.D., M.A./MPl and M.A./MPA master's programs must show proficiency in at least one foreign language at the fourth semester level. In special instances a doctoral student's dissertation guidance committee may require a student to show research competence in one or two foreign languages. International students whose native language is not English may satisfy this requirement by submitting proof of their ability to read and understand social science materials in their native language where appropriate, or in another language in which significant social science material is available.

Substantive Paper Requirement

Students in the progressive B.A./M.A. and joint M.A./J.D., M.A./MPl and M.A./MPA master's programs must submit a substantive paper or alternative project. This requirement is meant to encourage students to polish articles that may ultimately prove suitable for publication, to develop materials that will display their talents for doctoral and graduate school admission committees or prospective employers, and to begin to develop dissertation proposals early in the graduate education process. A student may submit a revised version of a research paper or a detailed policy memorandum along with a copy of the original paper for which he or she received a grade of B+ or better in one international relations graduate class. Students may also submit a paper or project based on other original work. A two-person faculty examining committee, which must consist of School of International Relations faculty members, will evaluate the substantive paper or project and may, at their discretion, call the student for an oral examination on the project. The student may add a third outside member to the committee. They may also choose to examine the student on his or her course work in international relations.

Master of Arts, International Relations

Requirements

Students who have the degree objective of joint M.A. programs (Master of Arts, International Relations/Juris Doctor; Master of Arts, International Relations/Master of Planning; and Master of Arts, International Relations/Master of Public Administration) must apply for an M.A. in International Relations. Students pursuing these joint programs must refer to the specific course requirements outlined for each program.

Advisement

Students should consult with the school's faculty adviser each semester before registering for courses for the next semester. Students also are encouraged to seek advice from other faculty who work in areas related to their interests. Students may, if they wish and if a faculty member agrees, select a different faculty adviser from among the school's faculty. Consult with and inform the Office of Student Affairs regarding changes in faculty advisers.

Master of Arts, Political Science and International Relations

Only students who have a degree objective of obtaining the Ph.D. will be admitted into the Political Science and International Relations program. However, interested students can obtain an M.A. degree while pursuing the Ph.D. The degree is awarded upon successful completion of (a) 28 units, including three of the five courses in the program's theory and methodology sequence, a master's thesis and registration in POSC 594ab or IR 594ab; and (b) the approval of the master's thesis by the thesis committee.

Master of Arts, International Relations/Juris Doctor

The USC Gould School of Law and the School of International Relations jointly offer a three-year program leading to the J.D. and M.A. degrees. (Students may extend the dual degree program to four years.) Applicants must apply to both the law school and the School of International Relations and meet requirements for admission to both. In addition to the LSAT, students interested in this program are required to take the Graduate Record Examinations (GRE). Law students may apply to the School of International Relations during their first year at the law school.

In the first year, students take their course work in the law school exclusively. The second and third years include 24 units of courses in international relations and 40 units of law. Students pursuing the dual degree must complete LAW 662 or LAW 764 and one additional international law course. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honors programs.

Students pursuing the dual degree must complete 24 units within the School of International Relations at the 500 level or above. These students are required to successfully complete IR 500 International Relations Theory, either IR 513 Social Science and Historical Research Methods or IR 517 International Policy Analysis, and two domain courses selected from among IR 502 Conflict and Cooperation, IR 509 Culture, Gender, and Global Society, IR 521 Introduction to Foreign Policy Analysis and IR 541 Politics of the World Economy. Like all other international relations master's degree programs, students in the dual degree program must complete a substantive paper or alternative project. The requirements, standards and evaluation procedure for the substantive paper are identical to those listed above for all M.A. students except that one member of the examining committee must come from the law school.

Master of Public Diplomacy and Master of Public Diplomacy (Practitioner and Mid-Career Professional)

These degrees combine the resources of the USC Annenberg School for Communication and Journalism and USC Dornsife College of Letters, Arts and Sciences' School of International Relations. The Master of Public Diplomacy is designed for students who already have a substantial undergraduate background in social sciences or relevant professional experience in subjects such as communication, film and media studies, journalism, political science, public relations and international relations. The Master of Public Diplomacy (Practitioner and Mid-Career Professional) is designed for students who have at least five years experience working in public diplomacy. See Annenberg School for Communication and Journalism for degree requirements.

Doctor of Philosophy in Political Science and International Relations

See Political Science and International Relations for degree requirements.

International Relations

Courses of Instruction

INTERNATIONAL RELATIONS (IR)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

IR 100gx The United States and World Affairs (4) The changing character of contemporary international political issues from the Cold War to the future and U.S. foreign policy options for the future; exploration of competing perspectives. Not available for major credit.

IR 101gxw International Relations (4) Basic concepts of world affairs for non-majors. Development of competency to understand and critically evaluate global relations and international events, stressing empirical approaches. Not available for major credit.

IR 210gw International Relations: Introductory Analysis (4, Fa Sp) Comprehensive introduction to contending theoretical and analytical approaches; development of critical, evaluative, cognitive, and analytical competencies regarding historical and contemporary issues.

IR 211g International Relations: Approaches to Research (4, FaSp Sm) Introduction to theoretically oriented research approaches and designs; emphasis on the logic of argumentation.

IR 212 Historical Approaches to International Relations (4, FaSp) Introduction to historical research methods, with an emphasis on historical texts and modes of discourse.

IR 213 The Global Economy (4, FaSp) Economic and political concepts necessary to the understanding of the modern global economy. Topics include international trade, foreign investment and migration.

IR 302 International Relations of the Great Powers in the Late 19th and 20th Centuries (4) Introductory analysis of the interactions of the great powers during the period; initial focus on Europe, with expansion to include global relations.

IR 303 Leadership and Diplomacy (4) The role of leaders, diplomatic leadership and creativity in statecraft, providing a deep understanding of the theoretical and practical dimensions of diplomacy.

IR 304 Espionage and Intelligence (4) The role and evolution of espionage and intelligence as tools of statecraft are examined. Open, covert, clandestine, counterintelligence programs and oversight processes are considered.

IR 305gw Managing New Global Problems (4) Examines strategies for managing global issues in the post Cold War period. Explores ways that international institutions, national governments and non-state actors work separately and together to provide order and control over complex international issues areas. Issues that will receive attention could include financial and monetary relations, trade and foreign investment, preservation of the environment, the spread of weapons of mass destruction, population and migration, terrorism and ethnic strife.

IR 306 International Organizations (4) The emergence of international organizations as a permanent feature in world politics; role of the United Nations organization as well as regional international organizations.

IR 307 Contemporary International Politics (4, max 8) Analysis of recent events, forces, and conditions in the international political system.

IR 308w Economic Globalization (4) Globalization makes national borders and regulations increasingly obsolete. Analyzes the economic foundation of globalization, its consequences and efforts to manage it.

IR 309 Global Governance (4) Introduction to global governance structure and institutions. Exploration of the appropriate role for states, international organizations, civil society and individuals within the global governance structure.

IR 310 Peace and Conflict Studies (4) Interdisciplinary study of the pursuit of peace, including causes of wars, arms races, conflict resolution, peace movements, nonviolent resistance, and peace with justice.

IR 311 Research Design and Methods (4) Exploration of critical scholarship on research design, including

case selection, hypothesis testing, and field research techniques.

IR 313 Religions and Political Violence (4) An introduction to debates about the intersection of religion and conflict in politics and international affairs; theoretical, classical, and contemporary issues.

IR 315 Ethnicity and Nationalism in World Politics (4) Ethnic identity and nation formation in the global society of states; nation-states; conflict or political accommodation within multinational states; impact of dispersed nations on interstate relations.

IR 316 Gender and Global Issues (4) An examination of the role women have played in world politics focusing on issues of war and peace, the environment and the global economy.

IR 318 Violent Conflict (4) Origins and evolution of violent conflict among humans; modern efforts to end conflict; recent research in archaeology, anthropology, biology, economics, political science and psychology.

IR 323 Politics of Global Environment (4) Examines the politics of managing the global environment. The nature of ecosystems, common problems, population and resource utilization problems along with biodiversity and global governance are emphasized.

IR 324 Multinational Enterprises and World Politics (4) Political implications of interactions between different types of multinational enterprises and all levels of U.S. government, other industrial nations, and less-developed countries.

IR 325 North-South Relations in the Global Economy (4) Analysis of inequality in relations between developed and developing states; contending views on the causes and legacies of imperialism; development strategies and aid.

IR 326 U.S. Foreign Economic Policy (4) The U.S. economy and political-economic institutions in comparative perspective; economic diplomacy and policy; role of trade barriers, exchange rates, foreign aid, energy, foreign investment.

IR 327 International Negotiation (4) Practicum in negotiation skills. Diagnosis of situations and identification of strategies through case studies and personal exercises.

IR 328 The Evolving Global Economic Architecture-Capital Mobility (4) Exploration of the evolving global economic architecture of the past seventy years; overview of the possible future contours of economic and political globalization. *Recommended preparation:* Macro- and Micro-economics.

IR 329 The Global Finance and Monetary Regime (4) The international financial and monetary regime, its evolution and the problems facing it today.

IR 330 Politics of the World Economy (4) Exploration of questions and concepts in international economics and politics, especially as they relate to flows of trade, capital, people, and problems across borders.

IR 331 The Global Economy 2030 (4, Fa) Examination of key ideas from economics, demography and technology. Guest lecturers illuminate possible conditions of the global economy in 2030.

IR 333 China in International Affairs (4) Economic reform, the open door, and China's changing role in the international system. Relations with the United States, Japan, and other key powers in Asia. Tensions between the interests of American business and the human rights community over China policy.

IR 337 The Impact of Remittances on Development in Mexico (4) Examines the nature of remittances and their effects. Can remittances promote development? Explores policy making focused on improving the quality of remittance expenditures in Mexico. *Recommended preparation:* working ability with Spanish.

IR 339 Public Health and International Relations (4) Examination of threats to global security, state sovereignty and population health posed by infectious diseases, natural disasters, war and civil conflict.

IR 341 Foreign Policy Analysis (4) Basic concepts and analytical approaches in the study of decision-making

at the international level. This is a case-based class, requiring participation of students in interactive discussions of decision forcing and retrospective foreign policy cases.

IR 342 The Politics and Strategy of Weapons of Mass Destruction (4) Causes and effects of use and spread of nuclear, biological and chemical weapons; responses to WMD, including deterrence, preventive war, and non-proliferation policies and negotiations.

IR 343 U.S. Foreign Policy since World War II (4) Analysis of U.S. foreign policy since 1945 as a basis for understanding significant new trends. Explanation of contemporary issues in U.S. relations with other nations.

IR 344 Developing Countries in World Politics (4) Origin, concepts, realities, and ideals of the non-aligned movement, focusing on the United States' role in the developing world.

IR 345 Russian and Post-Soviet Foreign Policy (4) Overview of Tsarist and Soviet experience as background to detailed examination of the political, economic and ideological forces behind contemporary Russian foreign policy.

IR 346 Communism and Post-Communism: Eastern Europe and the Balkans (4) Analysis of of communism and post-communism in East-Central Europe, including economic transitions, nationalism, inter- and intra-state conflict, NATO and EU enlargement.

IR 349 International Law and Politics (4) Exploration of international law and international politics, including sovereignty, war, international tribunals, the environment, and human rights.

IR 358 The Asia Pacific in World Affairs (4) The cultural, political, economic, and social aspects of the Asia Pacific's rise to prominence in world affairs. Reasons for the "successes" of many Asian economies and the environmental and social problems accompanying their rapid transformation. The difficulties of interaction in complex cultural situations illustrated by participation in a computer-assisted simulation.

IR 360 International Relations of the Pacific Rim (4) Political, economic and security relations among the countries in East Asia and the Pacific with the emphasis on the role of the United States, China and Japan.

IR 361 South and Southeast Asia in International Affairs (4) The historical, cultural, and political reasons for Asia's dramatic transformation into a powerful engine of world economic growth. The secondary consequences of economic growth for environmental protection, gender relations, ethnicity, and military tension.

IR 362 The International Relations of the Contemporary Middle East (4) Introduction to problems and issues in the Middle East today: religio-ethnic rivalries, conflicting nationalisms and ideologies, the Arab-Israeli conflict, Middle East oil.

IR 363 Middle East Political Economy (4) Examination of general economic development issues: population, agriculture, industrialization, trade, oil, etc. Several Mideast case study countries are then explored in depth.

IR 364 The Political Economy of Latin American Development (4) The main economic development themes and strategies in Latin America over the past century. The interplay between domestic and international variables, and the resulting dynamic changes.

IR 365 Politics and Democracy in Latin America (4) Examines Latin America's experience with democracy emphasizing events since the 1980s. Analyzes the roles of interest groups, ideology, domestic politics, bureaucratic processes, perceptions and analogical reasoning.

IR 366 Mexico and its Relations with the United States (4) Analysis of Mexico and U.S.-Mexico relations, both historically and in the present day, to understand better the challenges in this key bilateral relationship.

IR 367 Africa in International Affairs (4) General overview of main historical, political, and economic issues as they affect Africa, focusing on nationalism, development, and superpower competition in Africa.

IR 368 French Foreign Policy: 1945 to the Present (4, FaSpSm) Introduction to historical, thematic perspectives of French foreign policy since 1945 including review of external and internal constraints influencing foreign policy. (Paris semester only).

IR 369 Post-War European Relations (4) European interstate conflict and cooperation since 1945; history of Western European integration during the Cold War; the European Union in post-Cold War Europe.

IR 371 Global Civil Society: Non-State Actors in World Politics (4) Examination of diplomatic and moral relationships between sovereign states and transnational non-state actors, both benevolent (humanitarian groups and philanthropies) and malevolent (mercenaries, pirates and terrorists).

IR 376 U.S.-Japan Encounters: War, Trade, and Culture (4) The significance of U.S.-Japan relations is addressed through historical and policy analysis of America, Japan, and the Asia-Pacific region.

IR 381 Introduction to International Security (4) Key concepts in international security studies; historical evolution of international warfare and diplomacy; contemporary international security issues.

IR 382w Order and Disorder in Global Affairs (4) Modern and post-modern perspectives on changes in the inter-state system, relations among cultures and civilizations, the conditions of ecologically sustainable human development.

IR 383 Third World Negotiations (4) Origins, intensity, management and/or resolution of regional conflicts in developing countries and the role and intervention of great powers.

IR 384 Asian Security Issues (4) Introduction to key security trends in the Asia-Pacific region, emphasizing strategic competition between U.S., Russia, and China; regional military capabilities; rise of neutrality politics.

IR 385 European Foreign Policy and Security Issues (4) In-depth analysis of foreign policy events and cases in Europe in the 20th century; focus on security issues.

IR 386 Terrorism and Counterterrorism (4) Examination of terrorism and responses to terrorism, including how societies understand and deal with terrorism; focus on ethical and normative issues.

IR 387 Strategic Studies (4) Strategic theory and its application to national security and warfare from Western and non-Western perspectives. Topics include strategic culture, political decision-making, cyber operations, and non-state challenges.

IR 389 Islam in France (4) (Paris Semester only) Historical overview of interactions between Muslims and Europeans. Islam: origins, history and circumstances that led to its revival. France's immigration policy.

IR 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

IR 391 Directed International Relations Field Study (2, 4, max 8) Intensive internship experience in international relations professional areas with academic research component (may be repeated for credit different semesters).

IR 401 The United Nations and World Order (4) The contribution of the United Nations to world order, focusing on its history, principal organs, relationships with global actors, and prospects for reform.

IR 402 Theories of War (4) Causes of war; means of prevention and consequences of war.

IR 403 Transnational Diplomacy and Global Security (4) Explores emerging “diplomatic” relations between nation-states and transnational (non-state) entities, such as non-governmental organizations (NGOs), in the development of global peace and security policies. *Recommended preparation:* IR 303.

IR 404 International Relations Policy Task Force (4) Addresses unfinished question of public policy. Provides experience in interviewing and field research, oral presentation and collective discussion and deliberation. Open to juniors and seniors only.

IR 405 Cultural Heritage, Religion, and Politics in the Middle East (4, Fa) (Enroll in REL 402)

IR 406 Ethics and World Politics (4) Exploration of the relationship between ethics and politics. Special focus on religion, violence and human rights in international relations

IR 408 Global Democratization (4) Exploration of the global experience with democracy. Meaning of the term “democracy,” explanations of the rise and fall of democracy, its current trends and future challenges.

IR 410 The History of Modern International Relations (4) Explores modern international relations history, focusing on the role of the U.S. in the global politics. Provides training in historical research methods.

IR 422 Ecological Security and Global Politics (4) Should environmental issues be treated as threats to security? Survey of recent literature explores global environmental politics using a security framework.
Recommended preparation: environmental studies course work.

IR 424w Citizenship and Migration in International Politics (4) Changing notions of citizenship in the context of history, and of economic, political and sociological theories of international migration; diaspora and migration case studies.

IR 425 The New Triangle: China, the U.S. and Latin America (4) China’s rise in the international political economy raises policy research questions, including an analysis of how this trend relates to U.S and Latin American relations. *Recommended preparation:* micro and macro economics.

IR 426 Trade Politics in the Western Hemisphere (4) Focus on the dynamic process of trade integration that has occurred since the mid-1980s in the Western Hemisphere.

IR 427 Seminar on Economics and Security (4) Introduction to important economic issue areas that are understood as security-related in the contemporary world: food, trade, debt, etc.

IR 428 China’s Political Economy (4) Critical issues surrounding China’s economic rise and the implications for international relations; the unique strengths and vulnerabilities of China’s political-economic model; prospects for change. *Recommended preparation:* IR 210 and a course from International Relations, Political Science, or History with a strong China component.

IR 430 The Politics of International Trade (4) Economic approaches and political processes are used to explain observed international trade policy choices. Topics covered include globalization, regionalism, labor standards, the environment and sanctions. *Recommended preparation:* micro and macro economics.

IR 437 Comparative Genocide (4) An interdisciplinary treatment of the tragic phenomenon of genocide. Subject matter includes historical cases and analysis of contemporary global efforts toward prevention.

IR 438 Nationalism and Ethnic Conflict after Communism (4) Explores origins and nature of ethnic strife among post-socialist states (ethnicity and national revival, modern histories of East-Central Europe and Russia, problems and conflict resolution).

IR 439 Political Economy of Russia and Eurasia (4) Interaction of politics and economics in the former Soviet Union and its component republics; the historical planned economy, the politics of reform and the political economy of former Soviet foreign relations.

IR 440 America’s Pacific Century: Dialogues between the U.S. and Asia (4, Sp) A hands-on analysis of the contemporary U.S. foreign policy towards East Asia through lectures, interviews, and policy paper writing, including an exchange visit to Singapore.

IR 441 Comparative Analysis of Foreign Policy (4) Comparative analysis of foreign policy determinants and decision-making; empirical emphasis.

IR 442 Japanese Foreign Policy (4) Economic, political, territorial, and security issues; foreign policy decision-making; relations with major powers and neighboring states.

IR 443 Formulation of U.S. Foreign Policy (4) Critical discussion of alternative approaches explaining the formulation and implementation of U.S. foreign policy: domestic politics, organizational processes, group dynamics, individual personality and perception.

IR 444w Theories of Global Society (4) Why the world is organized into sovereign nation-states. The challenges to nation-states in the 21st century from globalization, democratization, revolution, technology, and new forms of cultural identity.

IR 445 U.S. Defense and Foreign Policy: Nonproliferation and Weapons of Mass Destruction (4) Policies and programs aimed at stopping the spread of weapons of mass destruction. Presentations by executive/legislative officials involved in formulation and implementation of non-proliferation. Junior or senior standing required.

IR 449 International Courts and the Globalization of Law (4) Research-based analysis of dramatic development of international courts, exploring causes for their development, autonomy and political relations with states, compliance, effects on international relations.

IR 454 The International Political Economy of Development (4) Provides a critical introduction to scholarship on international political economy (IPE), the interaction of states and markets in a global context.

IR 463 Islam and Arab Nationalism (4) Historical, sociological and political processes that have shaped the emergence of and relationship between Arab nationalism and political Islam since the early 20th century.

IR 464 U.S. Policy Towards the Middle East: 1950 to the Present (4) The role of the United States in Middle Eastern affairs after the creation of the state of Israel.

IR 465 Contemporary Issues in United States-Latin America Relations (4) Examines major issues in the relationship between the United States and the countries of Latin America and the Caribbean, including trade and financial questions, security, immigration, the environment, narcotics, etc. Major bilateral relations (especially with Mexico, Brazil, and the Caribbean Basin countries) are emphasized, as are regional and multilateral relationships.

IR 466 Contemporary Issues in Latin American Politics (4) Focus on current politics in Latin America. Address a range of themes: electoral democracy, citizenship, political inclusion, human rights, corruption, economic inequality.

IR 468 European Integration (4) Research on the European Union's role in European international relations; internal EU developments since 1985 as an actor in the world economy. (Madrid Program only).

IR 470 Comparative Regionalism (4) Analysis of the factors that provide different forms of regional arrangements in different parts of the world (e.g. NAFTA, EU, ASEAN). *Prerequisite:* IR 210.

IR 483 War and Diplomacy: The U.S. in World Affairs (4) Perspective on recent American foreign policy; a case study of conflicting literature on the origins, development and legacy of the Cold War.

IR 484 American Religion, Foreign Policy and the News Media (4) (Enroll in JOUR 484)

IR 490x Directed Research (1–8, max 12) Individual research and readings. Not available for graduate credit.

IR 491x Field Study (1–8, max 8) Local, national, and international internships. Not available for graduate credit.

IR 494 Honors Thesis Seminar (4) Preparation and oral defense of senior honors thesis before supervising faculty and fellow honors students. Senior status and acceptance to program required. *Recommended preparation:* IR 311.

IR 499 Special Topics (2–4, max 8) Selected topics in various special areas within international relations, which may vary from semester to semester or within semesters.

IR 500 International Relations Theory (4) Development of organized knowledge of international relations. Main currents of thought and varieties of current literature.

IR 502 Conflict and Cooperation (4, Fa) Against the background of 20th century history this course introduces the major literatures on the causes, strategy, practice, and future possibilities of war and peace.

IR 503 Theories of Diplomacy (4) Investigation of international relations through the lens of diplomatic theories, considering the limits and potential of diplomacy and how thinking about diplomacy has evolved.

IR 507 Gender and International Relations (4) An examination of gender and culture in world society. Feminist perspectives on and critiques of various approaches to international relations theories.

IR 509 Culture, Gender, and Global Society (4) Cultural and gendered responses to economic globalization; topics include culture and security, identity politics, clashes of and accommodations among civilizations, modernity, post-modernity and world society.

IR 510 Gender, War and Peace (2, Sp) Examination of the extent to which conflict and its resolution have depended on stereotypically gendered associations of men with war and women with peace.

IR 512 Linkage Politics (4) (Enroll in POSC 512)

IR 513 Social Science and Historical Research Methods: Introduction to Research Design (2 or 4) Introduction to problems in philosophy of science, epistemology, historical and historiographical inquiry, leading to development of elementary research design capabilities.

IR 514 Multivariate Analysis (4) Causal inference and modeling in international relations and political science; assumptions and problems of multivariate regression analysis in both cross-sectional and time series cases.

IR 515 Qualitative Research Design (4) A practical seminar in which to develop a dissertation proposal. Covers casual inference and comparative case study designs; single-case designs; selecting cases; interviewing; combining quantitative and qualitative methods. *Recommended preparation:* IR 513, one course in statistics, and enough substantive study to identify a likely dissertation topic.

IR 516 Advanced Research Methods: Text, Talk and Context (4) Text and discourse analysis methods and strategies. Themes include the roles of ideas, identities, policies and interests in various institutional contexts. *Prerequisite:* COMM 550, IR 494, IR 513, POSC 500, PUBD 500 or PUBD 502.

IR 517 International Policy Analysis (4) Game theory and other methodologies applied to the study of international relations. Topics include global and regional public goods, collective action, externalities, treaty information, market failures.

IR 519 Field Research Methods in Comparative Politics and International Studies (4) Intended for graduate students planning social science research projects in a foreign country. Primary goal is to assist students to prepare the design for their dissertation research.

IR 520 Formulating US Foreign Policy: How Washington Works (4) Analyzes U.S. foreign policy, with emphasis on numerous inputs to the decision-making process — from media to conceptions of the national interest to organizational processes.

IR 521 Introduction to Foreign Policy Analysis (4) Survey of principal theoretical and empirical approaches to foreign policy analysis; bureaucratic politics, cybernetics, game theory and options analysis, comparison, design theory, simulation.

IR 522 United States Diplomacy since 1945: Issues and Decisions (4) An analysis of United States foreign policy with emphasis on the origins and structure of the cold war, decision-making, the role of ideology, containment and imperialism, and issues of the post-bipolar era.

IR 525 State and Society in International Relations (4) A readings seminar that assesses the challenges

to nation-states and world order presented by trans-border cultural flows, new technologies, and changing patterns of political participation.

IR 526 Migration and Diaspora in International Politics (4) Examines issues of migration, the relationship between citizen and state, economic factors triggering emigration/immigration, transnationalism, and explores the phenomenon of diasporas.

IR 531 Strategy and Arms Control (4) Impact of nuclear weapons on U.S. and U.S.S.R. postwar military policies and strategies; evolution of postwar deterrence postures; development of superpower arms control since 1945.

IR 534 East Asian Security Issues (4) Security politics of China, Japan, ASEAN states, and Southwest Pacific nations; their strategic relations with the superpowers; regional security initiatives: nuclear-free zone politics, ZOPFAN, and indigenous military capacities. *Prerequisite:* IR 531.

IR 539 Seminar in International Politics – Conflict Processes (4) Advanced seminar in international conflict, crisis and war. General perspectives on factors that bring about war and promote peace, with priority given to ethnopolitics. Open only to graduate students.

IR 540 Seminar in International Politics – Religion and Conflict (4) Advanced introduction to how religion has emerged as a powerful force in politics. Conflict resolution, fundamentalism, terrorism, war, American foreign policy and global civil society. Open only to graduate students.

IR 541 Politics of the World Economy (4) Survey of approaches to international political economy. Intellectual roots; the management of collective goods; North-South relations are examined.

IR 542 Foreign Economic Policies of Industrial Capitalist States (4) Seminar comparing policies of Britain, France, Germany, Japan, and the United States; evaluation of alternative research methods and theories; design and execution of an original project.

IR 543 Politics of International Monetary and Trade Relations (4) Political analysis of international monetary and trade relations; emphasis on interactions among industrialized nations.

IR 545 The International Political Economy of Development (4) The political aspects of economic growth, efficiency and distribution are explored for underdeveloped nations in an international relations context.

IR 547 Political Economy of Global Space and Environment (4) Regimes in an anarchic world will be examined to assess ways oceans, atmosphere, outerspace, and other unowned spaces or resources are and can be used.

IR 550 Economic Bargaining Theory and Practice (4) Development of analytical skills and strategies for negotiations over economic and political problems, through study of recent cases and participation in bilateral and multilateral exercises.

IR 551 International Political Economy of the Pacific Rim (4) Introduces issues related to political economy of the Pacific Rim; trade, investment and development strategies of these countries. The role of Japan's increasing economic power and that of the changing U.S.–Japan relations and their implications to the rest of the Pacific Rim region.

IR 553 Political Economy of Global Telecommunication and Information (4) (Enroll in COMM 553)

IR 555 Democracy and Democratization in Comparative Perspective (4) Seminar generates and tests theories of democratization. Readings will focus on Europe, Latin America, Soviet Eurasia emphasizing core theoretical and methodological aspects. Open only to master's and doctoral students.

IR 556 Latin America and U.S. Foreign Policy (4) Latin American challenges to U.S. policymakers; U.S. success in achieving its goals; alternative explanations of U.S. behavior.

IR 557 Africa and U.S. Foreign Policy (4) Research problems on international issues arising from the

emergence of Africa.

IR 561 Japanese Foreign Policy and International Relations of East and Southeast Asia (4)

Research problems in political, economic, and security issues in East and Southeast Asia, with special emphasis on the role of Japan.

IR 563 Chinese Foreign Policy (4) Research problems in political, economic, military, and ideological issues.

IR 581 International Relations of the Middle East (4) Salient issues in regional politics such as colonialism, nationalism, identity, religion, development, and war are examined.

IR 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

IR 591 Field Study (1–12) Study of contemporary institutions in selected regions of the world. Maximum units which may be applied to the degree to be determined by the department.

IR 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

IR 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

IR 599 Special Topics (2–4, max 8) Subjects specifically relevant to an international relations field, sometimes conducted as intensive short-courses.

IR 790 Research (1–12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

IR 791 Advanced Studies (2–4, max 12) Subjects specifically relevant to an international relations field; conducted for Ph.D. students, sometimes conducted as intensive short courses.

IR 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Executive Director: Tammara Anderson

The Joint Educational Project (JEP) is one of the oldest and largest service-learning programs in the United States. Established in 1972, JEP places university students in supervised community service assignments as a part of their academic course work. JEP partners with more than 50 local organizations — including neighborhood schools, non-profit organizations, hospitals and health clinics and government agencies — to design service-learning projects that complement students' course work and address a community-identified need. Students serve in many capacities through JEP, such as tutor, mentor, teaching assistant, translator, research assistant or guide. JEP also houses two volunteer programs for pre-law and pre-med students — the Pre-Law Project and Trojan Health Volunteers — that give USC students practical experience in a legal or medical context. In the process, JEP students learn how to develop and apply knowledge, work in diverse social settings, become engaged in civic affairs, explore possible career paths and make professional contacts. “JEP” following a section number indicates that the professor will offer JEP as a course option.

JEP also houses the USC Readers^{PLUS} work-study program. “Readers” assist K-9 children in USC’s “Family of Schools” in the areas of math and reading, allowing the USC students the opportunity to serve in the community while gaining work experience in an urban school environment.

Chair: Leah Hochman, Ph.D.

Liaison: Carol Sofer

Faculty

Professors: Reuven Firestone, Ph.D.; Bruce Phillips, Ph.D.

Associate Professors: Sarah Benor, Ph.D.; Joshua Garroway, Ph.D.; Sharon Gillerman, Ph.D.; Leah Hochman, Ph.D.; Joshua Holo, Ph.D.; Dvora Weisberg, Ph.D.

Assistant Professor: Lynn Kaye, Ph.D.

Adjunct Associate Professor: Yaffa Weisman, Ph.D.

Lecturer: Hagit Arieli-Chai, M.A.Ed.

Judaic Studies is offered by the Louchheim School for Judaic Studies, administrated by the Hebrew Union College-Jewish Institute of Religion, an independent college adjacent to the USC campus. Students registering for classes in the program do so through the regular USC registration process. They receive regular course credit and their degrees from USC. Hebrew courses may be used to fulfill graduation requirements in a foreign language; courses which meet humanities general education requirements may be used as electives or may be used for major or minor credit with the approval of an adviser.

Bachelor of Arts in Religion with Emphasis in Judaic Studies

A Bachelor of Arts in Religion with an area of emphasis in Judaic Studies is offered cooperatively by the School of Religion and Hebrew Union College-Jewish Institute of Religion. Program requirements are listed in this catalogue under Religion.

Bachelor of Arts in Middle East Studies

See the Department of Middle East Studies for a complete listing of requirements.

Minor in Judaic Studies

The minor in Judaic Studies provides the opportunity for in-depth study of Jewish history, literature, politics, culture, religion, sociology and gender studies using approaches developed through multidisciplinary approaches. Courses offered cover a broad time span — the ancient Near East to contemporary America — and they challenge and stimulate students to examine and learn about Jewish culture as a topic of scientific interest.

For the minor, 20 units in Judaic Studies and Religion are required. The following courses are required: REL 301

and JS 180. Three additional courses may be chosen from among JS 321, JS 340, JS 361, JS 375, JS 382, JS 383, JS 415 and REL 312. Successful completion of five 4-unit courses or the equivalent in Jewish American Studies is required to qualify for the minor.

Minor in Jewish American Studies

The minor in Jewish American Studies offers the opportunity to study the experiences and cultures of the American Jewish community in relation to those of other American peoples. For the minor, 20 units of American Studies and Judaic Studies are required.

CORE REQUIREMENTS

CORE REQUIREMENTS		UNITS
AMST 202	Interethnic Diversity in the West	4
JS 300	American Jewish History	4
Three courses from the following:		
AMST 301	America, the Frontier, and the New West	4
AMST 350	Junior Seminar in American Studies and Ethnicity: Theories and Methods	4
JS 330	Jewish Power, Powerlessness, and Politics in the Modern Era	4
JS 381	The Jew in American Society	4
JS 382	Judaism as an American Religion	4
JS 383	Jews in American Popular Culture	4
JS 415	The American Jewish Experience in Film	4
JS 428	Blacks and Jews: Conflicts and Alliances	4

Minor in Middle East Studies

See the Department of Middle East Studies.

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

HEBREW (HEBR)

HEBR 120 Hebrew I (4, Fa) Modern spoken and written Hebrew with emphasis on the principles of grammar.

HEBR 150 Hebrew II (4, FaSpSm) Continuation of modern Hebrew I. *Prerequisite:* HEBR 120.

HEBR 220 Hebrew III (4, Fa) Continuation of Hebrew II; stress on grammar, composition, and conversation. *Prerequisite:* HEBR 150.

HEBR 315 Modern Hebrew Language (Hebrew IV) (4, Sp) Fostering oral and written fluency in Hebrew language and literature through investigation of Hebrew poetry, short stories, novels and film. *Prerequisite:* HEBR 220.

JUDAIC STUDIES (JS)

JS 100gp Jewish History (4, Fa) Major ideas, personalities, and movements in Jewish history from antiquity to the present in light of the interaction of the Jews with the general culture.

JS 180p Introduction to Judaism (4, Sp) Jewish beliefs, practices, and history from the biblical period to the present; Judaic contributions to Western civilization.

JS 211gw The Holocaust (4, FaSp) Historical background and responses to the Holocaust, with special emphasis on ethical implications.

JS 214 Zionism, Israel, and the Modern World (4, Fa) Ideas about nationalism, Zionism, and society-building; emphasis on self-definition in the Jewish state.

JS 258gp Food, Faith and Conflict (4, Sp) Investigates how food and food traditions create and cross religious and social conflicts between Jews, Christians and Muslims by exploring faith, practice, thought and ethics.

JS 300 American Jewish History (4, Fa) Patterns of immigration, acculturation, religious forms, and ethnic expression in America from the colonial period to the present.

JS 314g Holy War And History: Jews, Christians, Muslims (4, Sp) Investigates the engagement in war by Judaism, Christianity and Islam by examining history and theology and looks at religious justifications and condemnations of war.

JS 321 Gender and Judaism (4, FaSp) An investigation into the ways in which gender has structured Jewish religious, social, political and intellectual life from the Biblical period through the present.

JS 330 Jewish Power, Powerlessness, and Politics in the Modern Era (4, FaSp) Explores the relationship between the Jewish people and political powers. Topics include politics in exile, changing relationships to power, and relations with the modern nation-state.

JS 340 Modern Jewish History (4, FaSp) A survey of the major trends and themes of modern Jewish history. Examination of Jewish culture, society and politics from the Spanish Expulsion to the Second World War. *Recommended preparation: JS 100.*

JS 342 Reading in Two Directions: Connecting Law and Literature in Jewish Tradition (4) Investigates understandings of law, legal interpretation and the integration of law and narrative in Jewish texts by exploring how to examine legal and literary texts.

JS 360m Identity, Community, and Service: Jews and Other Americans (4) Examination of relationships between identity, community and service by investigating ethno-religious organizations' attempts to serve members of their group and confront issues of injustice in society.

JS 361 Scripture and Polemic in Judaism, Christianity and Islam (4, FaSp) Origins of Scriptures and their polemical environments in earliest Judaism, Christianity, and Islam. Scripture as polemic and legitimation, and cross-religious/cross-cultural interpretation and argument based on scriptural themes.

JS 362 Terror and Resistance in Literature and the Media (4, Sp) Investigation of the multiple ways that people experience and represent incidents of terror in literature, film, music, and social media.

JS 374 Messiah: The History of an Idea (4, Sp) Exploration of the history of the idea of a messiah in Judaism from antiquity to today.

JS 375 Issues of American Jewish Literature (4) Issues-oriented study of the human experience in America as expressed in the fiction, poetry, drama, memoirs, and literary criticism of America's Jews, using a dual approach incorporating both literary history and specific issues.

JS 378 Jewish Magic in the Ancient World (4, Sp) A cross-cultural examination of different kinds of magical literature that describe miraculous practices in Jewish mainstream and marginal life in the ancient and classical periods.

JS 379gm Mixing and Matching: Intermarriage in the 21st Century (4, Sp) An investigation into inter-ethnic, interracial, and inter-religious marriage in the 21st century.

JS 381 The Jew in American Society (4, FaSp) The changing sociological profile of the American Jew and changing organization of the American Jewish community as they developed over the 19th and 20th centuries.

JS 382 Judaism as an American Religion (4) The development of American expressions of Judaism as part of the American religious context, from the perspective of the social scientific study of religion.

JS 383 Jews in American Popular Culture (4, FaSp) Social and cultural history of American Jewish contributions to the arts, science, literature, economics and politics.

JS 389 Culture and Society in Israel: Inventing the Dream (4, Sp) Examination of the social forces that shaped and continue to shape culture and society in contemporary Israel.

JS 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

JS 415 The American Jewish Experience in Film (4) A survey of American Jewish history through the medium of film, with particular emphasis on the experience of the post-war generation.

JS 428 Blacks and Jews: Conflicts and Alliances (4, Sp) Examination of the relationship between the American Jewish and African-American communities and what it teaches about race and coalition politics in American society.

JS 467 Modern Jewish Thought (4, Sp) Foundations of modern Jewish thought from the Western European Enlightenment to the present.

JS 490x Directed Research (1–8, max 12) Individual research and readings. Not available for graduate credit.

JS 499 Special Topics (4) Selected topics in Judaic Studies.

JS 501abc Bible Texts (4-4-4, FaSp) *a*: Advanced grammar and reading. An introduction to principles of form criticism as applied to selected narrative and legal portions of the Pentateuch. *b*: A critical evaluation of the biblical books of Amos and Hosea with a view to gaining an appreciation of the prophets' literary skill, their religious motivations, and the originality of their thought. *c*: Critical readings in each of the biblical books of Ruth, Lamentations, Ecclesiastes, Esther, and Song of Songs, with a view toward gaining an appreciation of their literary and religious values. Knowledge of Hebrew required.

JS 504 Modern Hebrew Literature (3, Fa) Reading of unvocalized texts primarily from modern Hebrew literature. A survey of the development of modern Hebrew literature, with an emphasis on short story and poetry. Knowledge of Hebrew required.

JS 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

JS 680 Boundaries of Jewish Normative Behavior (4, Sp) Institutions claiming Jewish authenticity and their treatment of Jews perceived to be deviant.

Faculty

See faculty listing for Biological Sciences (Human and Evolutionary Biology)

Academic Program Staff

Laboratory Manager: Emi Embler, Ph.D.

The Department of Kinesiology offers undergraduate and graduate degrees in the scientific study of human movement. The undergraduate curriculum is designed to provide a broad and comprehensive understanding of the human body at work. This includes studies of basic underlying parameters, as well as applications relevant to understanding human movement. The course work necessarily derives from a variety of disciplines, including physiology, anatomy, biochemistry, biomechanics, nutrition and psychology. As such, an undergraduate degree in human performance provides excellent training for students wishing to pursue further graduate or professional studies in health-related fields.

At the graduate level students are expected to specialize in one area, i.e., exercise physiology or biomechanics. These represent areas of active research by department faculty. The focus is on preparing individuals who will contribute to research and scholarship in their chosen discipline.

Dornsife College of Letters, Arts and Sciences

Kinesiology

Undergraduate Degrees

Bachelor of Arts in Human Performance

(No longer accepting new students into this program of study)

The specific degree requirements include 24 units of required core courses within human biology and 12 units of required collateral course work within the sciences. Students must also complete 8 units from a list of restricted electives.

See the Website for details or email Laura Ames at [✉ ames@usc.edu](mailto:ames@usc.edu).

REQUIRED CORE COURSES (24 UNITS)

	UNITS	
HBIO 202L*	Principles of Nutrition and Exercise	2
HBIO 203L*	Individualized Exercise Prescription	2
HBIO 250	The Pharmacology of Performance Enhancing Drugs	4
HBIO 301L*	Human Anatomy	4
HBIO 310*	Sociopsychological Aspects of Sport and Physical Activity	4
HBIO 400L*	Motor Control and Learning	4
HBIO 401L*	Physiology and Biomechanics of Movement	4

REQUIRED COLLATERAL COURSES (12 UNITS)

	UNITS	
BISC 220L	General Biology: Cell Biology and Physiology	4
MATH 108	Contemporary Precalculus	4
MATH 114x	Foundations of Statistics	4

REQUIRED ELECTIVES (8 UNITS)

	UNITS	
HBIO 302L*	Nutrition and Metabolism	4
HBIO 320L*	Muscle Physiology	4
HBIO 350*	Nutrition and Homeostasis	4

HBIO 420L*	Applied Human Physiology	4
HBIO 407L*	Endocrinology and Metabolism	4
HBIO 408L*	Biomechanics	4
HBIO 409*	Metabolic Diseases	4
HBIO 439L*	Human Performance and Bioenergetics	2 or 4
HBIO 441L*	Prevention of Athletic Injuries	4
HBIO 442L*	Evaluation and Rehabilitation of Athletic Injuries	4
HBIO 491L*	Laboratory Experience in Kinesiology	2 or 4
HBIO 499*	Special Topics	2-4

*Current syllabi for all human biology (HBIO) courses can be found in the USC Schedule of Classes.

Grade Point Average Requirements

Students must obtain a minimum GPA of 2.0 or better (cumulative) for the required core requirements, the required collateral courses, and the 16 units of required electives. In addition, a minimum grade of C- (1.7) will be allowed for each of the courses in the required core courses. This requirement will be effective for incoming students (freshmen or transfers) as well as for graduation from USC.

Minor in Kinesiology

For students who would like to obtain basic knowledge of kinesiology but are majoring in another area, a minor in this field is offered. The minor may be ideal for someone pursuing a career in the management area of health and corporate fitness.

A minor in a health-related science may also be desirable for those in engineering or the physical sciences. Students pursuing a teaching or coaching career at the secondary school level may also benefit from knowledge in this area.

REQUIRED COURSES, LOWER-DIVISION		UNITS
HBIO 202L	Principles of Nutrition and Exercise	2
HBIO 203L	Individualized Exercise Prescription	2
MATH 108*	Contemporary Precalculus (or equivalent)	4
PHYS 135aL	Physics for the Life Sciences	4

*MATH 117 Introduction to Mathematics for Business and Economics, MATH 118x Fundamental Principles of Calculus or MATH 125 Calculus I are acceptable equivalent courses for MATH 108 Contemporary Precalculus.

REQUIRED COURSES, UPPER-DIVISION		UNITS
HBIO 320L	Muscle Physiology	4
HBIO 301L	Human Anatomy	4
HBIO 408L	Biomechanics	4
HBIO 420L	Applied Human Physiology	4

A total of 28 units is required for the minor in kinesiology.

Dornsife College of Letters, Arts and Sciences

Kinesiology

Courses of Instruction

EXERCISE SCIENCE (EXSC)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

EXSC 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

EXSC 490x Directed Research (1–8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

EXSC 570 Scientific Integrity (2) Contemporary issues relating to ethics and responsible conduct of research including guidelines instituted by the Federal Government. Course fulfills requirements imposed by national funding agencies.

EXSC 580abcd Experimental Studies of Human Performance II (4-4-4-4, 2 years, FaSp) *a*: Force and kinematics; *b*: neuromuscular control of multijoint movements; *c*: kinetics; *d*: advanced kinetics.

EXSC 587L Seminar: Advanced Exercise Physiology (4) Body at work, energy liberation and transfer, muscular contraction, neuromuscular function, cardiovascular and pulmonary response, energy cost, nutrition and environmental adaptation. Primarily for master's students. Laboratory, 3 hours. *Prerequisite*: EXSC 300L.

EXSC 588L Seminar on Lipid Metabolism and Exercise (4) Metabolism and utilization of lipids and fatty acids in skeletal muscles with applications to exercise. *Prerequisite*: EXSC 405L; *recommended preparation*: EXSC 300L.

EXSC 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

EXSC 591 Research Seminar (4) Study of research design; critical analysis of specific techniques applied to student interests, including problem rationale, selection, development, organization, and data analysis.

EXSC 592ab Seminar in Exercise Science (a: 2, Fa; b: 2, Sp) Scientific presentations by graduate students and invited speakers on selected topics in the areas of biochemistry, biomechanics, physiology and psychology.

EXSC 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

EXSC 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

EXSC 595 Seminar: Analysis of Human Motor Performance (4) Application of mechanical principles of motion to the study of sport, exercise, and dance, utilizing cinematographic and related techniques.

EXSC 627 Quantitative Electromyography in Physiology of Exercise (4) Electromyographic techniques for measurement of relaxation and muscle spasm; estimation of strength, fatigue, and muscular endurance from submaximal efforts.

EXSC 640L Neuromuscular System in Physiology of Exercise (4) Gross structure and ultrastructure of muscle tissue, nervous system control of muscle function as related to exercise physiology. Laboratory, 3 hours. *Prerequisite*: EXSC 300L, EXSC 301L; BISC 306Lx and BISC 312Lx.

EXSC 690 Directed Readings (1–8, max 8) Graded CR/NC.

EXSC 790 Research (1–12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

EXSC 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

HUMAN BIOLOGY (HBIO)

HBIO 200Lg The Human Animal (4) Foundations of the human species. Examination of scientific evidence from Darwinian theory, primate behavior, fossils, and the behavior of modern people. Laboratory. (Duplicates credit in former ANTH 200.)

HBIO 202L Principles of Nutrition and Exercise (2, FaSpSm) Fundamental knowledge of proper nutrition for optimal health performance. Concepts of weight loss, gain; understanding of cardiorespiratory functioning. Laboratory experiments; body composition evaluation, energy metabolism. Lecture, 2 hours; laboratory, 2 hours. (Duplicates credit in former EXSC 202L.)

HBIO 203L Individualized Exercise Prescription (2, FaSp) Principles and theories related to exercise prescription; programs of weight-training, circuit-training, aerobics, flexibility, high and low-intensity training guidelines; safeguards and effectiveness. Lecture, 2 hours; laboratory, 2 hours. (Duplicates credit in former EXSC 203L.)

HBIO 205Lgx The Science of Sport (4, FaSpSm) The physiological and nutritional basis of human performance. Factors that facilitate and limit athletic achievement. Lecture, 3 hours; laboratory, 2 hours. Not available for major credit. (Duplicates credit in former EXSC 205Lxg.)

HBIO 250g The Pharmacology of Performance Enhancing Drugs (4, Sp) Evaluation of drugs, nutritional supplements, and ergogenic aids that are purported to enhance human athletic performance to promote weight and fat loss. Lecture, 3 hours; discussion, 1 hour. (Duplicates credit in former EXSC 250.)

HBIO 300 Evolution, Ecology, and Culture (4, FaSpSm) The roles of biology, culture, and the environment in shaping human society, integrating evolutionary biology and cultural theory. (Duplicates credit in former ANTH 300.)

HBIO 301L Human Anatomy (4, FaSp) Major organ systems; functional implications of their relationships; gross and microscopic examination with an emphasis on practical skills in recognizing, dissecting, and differentiating anatomical structures. (Duplicates credit in former EXSC 301L.)

HBIO 302 Nutrition and Metabolism (4, Fa) Gastrointestinal physiology and energy metabolism as it relates to macronutrient intake. Theories and principles of nutrition and their impact on metabolic regulation. *Prerequisite:* BISC 220L or BISC 221L. (Duplicates credit in former EXSC 200.)

HBIO 306 Primate Social Behavior and Ecology (4, FaSpSm) Behavior and ecology of living nonhuman primates, with an emphasis on field studies of apes and monkeys. Topics include aggression, communication, reproduction, and cognition. *Recommended preparation:* HBIO 200Lg. (Duplicates credit in former ANTH 306.)

HBIO 308 Origins and Evolution of Human Behavior (4) Examination of the evidence for and against evolutionary bases of a range of human behaviors. Topics include sex differences, human reproductive strategies, race, IQ, human ecology. (Duplicates credit in former ANTH 308.)

HBIO 310 Sociopsychological Aspects of Sport and Physical Activity (4, FaSp) Examination of the individual in a social environment related to sport and physical activity; personality, motivation, attitude, and group behavior viewed in physical activity contexts. (Duplicates credit in former EXSC 310.)

HBIO 320 Muscle Physiology (4) Analysis of the skeletal muscular system (anatomy, physiology, biochemistry, and development) and its functional properties under both normal and pathological conditions. Lecture, 3 hour; laboratory, 3 hours. *Prerequisite:* BISC 220L. (Duplicates credit in former EXSC 300.)

HBIO 350 Nutrition and Homeostasis (4, Fa) Theories and principles of regulation of vitamin/mineral metabolism as it relates to homeostasis of organ systems. Lecture, 3 hours; discussion, 1 hour. *Prerequisite:* HBIO 302L. (Duplicates credit in former EXSC 350.)

HBIO 400L Motor Control and Learning (4, Fa) Theories of control and learning applied to motor performance; variables affecting performance in exercise, games, sports, and dance. Lecture, 3 hours; laboratory,

3 hours. *Prerequisite:* HBIO 320L. (Duplicates credit in former EXSC 400L.)

HBIO 401 Physiology and Biomechanics of Movement (4, Sp) Terminology, structure and function of muscle, bone and endocrine systems; Effects of exercise and training on those systems. *Prerequisite:* BISC 220L. (Duplicates credit in former EXSC 401.)

HBIO 405 Evolutionary Medicine (4) Evolutionary, cultural, and environmental factors in the emergence and existence of diseases; a Darwinian examination of illness in the human species. *Recommended preparation:* HBIO 200Lg. (Duplicates credit in former ANTH 405.)

HBIO 406 Theory and Method in Human Evolutionary Biology (4, FaSpSm) Historical and theoretical approaches to major issues in the field of human evolutionary biology. Capstone course in which students will undertake an original independent research project. *Prerequisite:* HBIO 200Lg.

HBIO 407L Endocrinology and Metabolism (4, Sp) Regulation of metabolic pathways and endocrinology in health and metabolic diseases. Lecture, 3 hours; laboratory, 3 hours. *Prerequisite:* HBIO 302L. (Duplicates credit in former EXSC 406L.)

HBIO 408L Biomechanics (4, Fa) Kinematic and kinetic analysis of human motion. Emphasis on performance enhancement and injury prevention. Lecture, 3 hours; laboratory, 3 hours. *Prerequisite:* MATH 108g, PHYS 135aL, HBIO 301L. (Duplicates credit in former EXSC 408L.)

HBIO 409 Metabolic Diseases (4, FaSp) Examination of the etiology, prevention, and treatment of metabolic disorders such as diabetes mellitus and obesity that are major threats to public health. *Prerequisite:* BISC 220Lg. (Duplicates credit in former EXSC 409.)

HBIO 420L Applied Human Physiology (4, Sp) The physiology of the respiratory, cardiovascular, renal, musculoskeletal, digestive, endocrine, and nervous systems in humans, with application to human health and pathology. *Prerequisite:* BISC 220. (Duplicates credit in former EXSC 405.)

HBIO 435 Neurobiology of Feeding Behavior and Obesity (4, Fa) Neurobiological systems that control feeding behavior and energy balance with an emphasis on the determinants of obesity. *Prerequisite:* BISC 220 and HBIO 302L.

HBIO 439L Human Performance and Bioenergetics (2 or 4, FaSp) Application of physiology, biomechanics and perceptual-motor principles to the study of skill acquisition and human performance. Four units — Lecture, 3 hours; laboratory, 3 hours. Two units (kinematic analysis only) — Lecture, 1 hour; laboratory, 3 hours. *Prerequisite:* HBIO 408. (Duplicates credit in former EXSC 439L.)

HBIO 441L Prevention of Athletic Injuries (4, Fa) Application of scientific principles to conditioning, protecting, and rehabilitating the athlete. Laboratory, 2 hours. *Prerequisite:* HBIO 301L. (Duplicates credit in former EXSC 441L.)

HBIO 442L Evaluation and Rehabilitation of Athletic Injuries (4, Sp) Application of scientific principles to evaluating and rehabilitating athletic injuries. *Prerequisite:* HBIO 301L. (Duplicates credit in former EXSC 442L.)

HBIO 491L Laboratory Experience in Kinesiology (2,4, FaSpSm) Practical laboratory experience in basic and applied exercise physiology, biochemistry, and/or biomechanics. Emphasizing development of laboratory techniques. *Prerequisite:* HBIO 203, HBIO 301, HBIO 302, HBIO 320. (Duplicates credit in former EXSC 491.)

HBIO 499 Special Topics (2–4, max 8, FaSpSm) Selected topics in Human and Evolutionary Biology.

Collaborative Learning Projects (CLP) and Individual Programs of Study (IPOS)

A research university provides many opportunities for undergraduates to learn in settings that suit a wide variety of learning styles, talents and professional aspirations. Beyond the classroom lie opportunities for individual and collaborative research projects, creative literary work, the plastic and performing arts, service learning and internships, distance and distributive learning, overseas study and a range of other activities. To track an idea from its genesis in research to its application as the solution of a contemporary problem, students must be able to take advantage of all these learning modalities.

For that reason, the USC Dornsife College of Letters, Arts and Sciences offers two curricular structures that enable non-traditional learning experiences to be credited across institutions. In both of these options, students work with a faculty committee to create individual learning opportunities suited to their personal academic interests and professional aspirations. The first allows self-motivated, independent learners to combine resources in a particularly rich learning experience, while the second promotes collaborative learning across several aligned modalities.

Collaborative Learning Projects

The USC Dornsife College of Letters, Arts and Sciences offers a curricular construct (MDA 460) designed to promote collaborative learning. Two or more students may propose a research project or other collaborative program, with specified learning objectives; a faculty committee will review each proposal to decide if it comprises a well-conceived educational experience and determine the unit values to be awarded, either collectively or to each student who participates. Collaborative Learning Projects award only credit or no credit grades.

Individual Programs of Study

Individual Programs of Study (IPOS) allow individual students to design a “curriculum” of 2 to 18 units, including directed research, service learning and internships, creative artistic production and any other educational experiences that might be relevant to the proposed academic program.

An Individual Program of Study (MDA 450) might be created for an entire semester’s work, including directed research, an internship and a distance learning course. Or, a more modest proposal might include 4 units of original artwork plus service learning.

Individual Programs of Study encourage students to design educational experiences that inspire them, prompting a profound engagement with a learning environment ideally suited to their individual talents. Individual Programs of Study may include a wider array of educational contexts, experiences and opportunities for nontraditional learning than are generally available for credit at most institutions of higher education. Individual Programs of Study are letter graded.

Review Process

Students who are interested in proposing either an Individual Program of Study or a Collaborative Learning Project must complete an application that includes:

1. A full description of the project, including information about all courses, internships, and other academic activities that will be involved;
2. A statement explaining why these activities could not be accomplished within the context of existing course work and directed research;
3. A proposal for assessing the work that is to be completed for the project beyond that associated with graded courses;

4. The endorsement of a faculty member who will serve as sponsor for the project. This faculty member will typically lead directed research associated with the project and award the final grade for the entire project;
5. A sign-off from the student's major department is also required; and
6. The student's STARS report and transfer credit statement, if transfer courses are relevant.

These materials will be reviewed by three faculty members comprising an Independent Study Committee, which will consider the student's academic record and decide whether to allow the project, how many units to award and other relevant conditions.

Members of the Independent Study Committee are appointed by the vice dean of academic programs of the USC Dornsife College of Letters, Arts and Sciences for an academic year; they consult with a representative of the Registrar's Office on articulating credits. If a member of the committee wishes to serve as the sponsor for a project, the vice dean will appoint an alternate to serve on the committee and consider that student's proposal.

Credits count as elective units, unless individual departments choose to apply some or all of the units toward major or minor requirements. A student may count no more than 18 units toward the degree through a combination of Individual Programs of Study and Collaborative Learning Projects. Upon completion of the project, the student's transcript reads "Individual Program of Study" or "Collaborative Learning Project," with the units awarded and the titles of any courses included in the program. See Multidisciplinary Activities for MDA 450 and MDA 460 course descriptions.

Master of Liberal Studies

A multidisciplinary degree program, the Master of Liberal Studies (MLS) is designed for motivated, college-educated individuals who wish to further their intellectual growth and pursue graduate work part-time or full-time in the evenings.

The program centers on the major forces that are revolutionizing the way we conduct our professional lives, rather than on the individual liberal arts disciplines. In this way, subjects covered in the program's courses have immediate relevance to the problems and challenges of contemporary society. In particular, the program emphasizes some of the most fundamental dynamics shaping the contemporary world: urbanization and globalization, changing cultural landscape, and technological and environmental transformations.

The MLS is a year-round program consisting of nine 3-unit courses. The degree requires a core course and a summative project. Seven elective courses are chosen in consultation with the student's adviser and/or MLS program director.

Admission Requirements

Admission to the program is based upon possession of a baccalaureate degree from an accredited college or university, with a minimum 3.0 GPA. When possible, interviews will be conducted with applicants. Two letters of recommendation, a writing sample and a personal statement of purpose are required.

Degree Requirements

Course and Summative Project Requirements

Nine courses (27 units), including the core course, LBST 500 (3 units), and the summative project, LBST 585 (3 units), are required.

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

LIBERAL STUDIES (LBST)

LBST 500 Introduction to Liberal Studies: Methods of Knowing (3, Sp) Introduction to research methods in the social sciences, humanities, and natural sciences; then methods for applied interdisciplinary research.

LBST 502 The Anthropology of Popular Culture (4, FaSpSm) (Enroll in ANTH 602)

LBST 503 Self-Justifying Fictions (3) Theoretical approaches to the study of literature, including formal and cultural analysis and the ethics and social impact of the humanities.

LBST 505 East Asian Humanities: Classics of China, Korea, and Japan (3) Examination of major themes in East Asian culture through primary texts in translation.

LBST 507 Great Western Cities (3) Examination of Western civilization in the urban context, focusing on several great cities in their "golden age" of creativity, accomplishment, and influence.

LBST 510 Cities and Globalization (3) Contemporary urban theory and comparative urban analysis. Emphasis on the role of globalization in shaping urban form and problems.

LBST 512 Language in a Globalizing World (3) Examination of the relationship between language and geopolitical change, endangered and minority languages, and the public policy implications of multilingualism and multiculturalism.

LBST 514 Ideas of Nature in American Culture (3) Examination of how Americans have used nature to think about themselves, environmentalism, American identity, gender/class relations, the American West, and the mythology of Los Angeles.

LBST 516 Urban Conservation Biology (3) Analysis of plant and animal distribution in urban landscapes. Exploration of major threats to urban biodiversity and nature conservation controversies and successes.

LBST 520 Tradition and the Modern World (3) Studies the continuing interplays between tradition and

novelty; between locale and globalization; and between heritage and post-modernity with a focus on a specific locale.

LBST 525 The Revolution That Made America (3) Ideas and politics of the world's first modern revolution, which transformed 13 colonies into a nation.

LBST 527 Information Systems From Libraries to the Internet (3) History and sociology of information systems. Philosophical and literary implications of writing, archives, libraries, printing, and publishing from the ancient world to the Internet age.

LBST 530 Portraits of Leadership (3) Analysis of different forms of cultural leadership in their historical, literary, and philosophical context.

LBST 531 The Hero/Heroine in History (3) Analysis of human agency in history and whether individual men and women are capable of altering the course of history by their actions.

LBST 532 Ideas on Trial (3) Examination of great trials in history as indicators of changing social and cultural attitudes.

LBST 535 Great Works, Great Challenges (3) Analysis of works of literature, drama, and poetry and their relationship to their historical contexts.

LBST 537 Empire and Social Reform in America 1890–1917 (3) Analysis through literary and historical texts of American public life, culture, and social justice during the era of U.S. ascendancy as a world power.

LBST 540 Hell, Purgatory, and Paradise: Dante's Divine Comedy (3) In-depth reading and analysis of *Divine Comedy*, in order to develop appreciation for changing values from medieval, to Renaissance and contemporary culture.

LBST 541 Opera, Culture, History, and Thought (3) Analysis of cultural, historic, philosophical, political, and literary movements and themes through the medium of opera.

LBST 542 The Culture of Comedy (3) Historical and synchronic ideas of comedy. Ways in which philosophers, artists, and everyday individuals adapt in our ever-changing world.

LBST 544 Representations of Los Angeles (3) Study of literary, artistic and/or dramatic expressions of Los Angeles and its inhabitants in modern and historical literature, art, photography, film, television, and architecture.

LBST 545 Imagining the American West (3) Explores Western myths and realities through literature, history, film, and painting. Examines why American culture places questions about national pasts and futures in the West.

LBST 547 Acts of Interpretation: Literature, Film, and Methodology (3) Analysis of literature, film, and methodologies for approaching issues of interpretation, readership, and spectatorship. Examination of how interpretation varies across gender, race, class, and sexuality.

LBST 548 Contemporary Fiction in Social Context (3, FaSpSm) Study of novels and short stories to examine how societal pressures and cultural identity constrain individual actions, with attention to family, gender, class, ethnicity, others. Open only to graduate students.

LBST 550 Theories and Methods of Analysis in Cultural Studies (3) Development of cultural studies as a fast-growing area of intellectual inquiry. Case study analysis of race/ethnicity, history and memory, space, post-modernism, globalization, censorship, and originality.

LBST 551 Narrative Forms (3, max 6) Study of narrative in literature, film, sociology, psychology and history; how narrative conventions shape humans' experience and understanding of society, past and present.

LBST 554 Century City: 100 Years of LA Literature and Culture (3, Fa) The history of Los Angeles

since 1910, using literary, historical, autobiographical, and cinematic texts to consider issues of geography, economics, race, class, gender, and sexuality.

LBST 555 Constructions of Childhood (3) Analysis of the concept of childhood from its 18th-century origins. Applications of age studies, language, and cultural construction through fiction, history, film, and other media.

LBST 560 Effects of Traumatic Life Experiences (3) Examination of the psychological and emotional effects of extreme trauma and survivor consequences.

LBST 570 Ecology of Night (3) Explore the world of night. Human perception of the stars and the role of night in history. Impact of artificial lighting on non-human species and habitat.

LBST 571 Food, Fashion and Furniture: Commodities in the Global Economy (3) Analysis of commodities from origin to consumption illustrates the global impact of everyday choices.

LBST 572 Controversies in Science, Medicine and Ethics (3) Focus on how scientific developments drive ethical issues in medicine. Exploration of ethical dimensions of issues such as stem cells, genetic engineering and reproductive technology.

LBST 574 Advances in Genetics and Evolutionary Biology (3) How DNA directs an organism's development and how our DNA can be "read" to understand human diversity, diseases, defects, and evolution.

LBST 585abz Master's Project (3-3-0, FaSp) A summative research project completed in consultation with the student's committee. Departmental approval. Graded IP/CR/NC.

LBST 590 Directed Research (1-12, max 18) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department.

LBST 599 Special Topics (2-4, max 8) Current issues, trends, and developments in liberal studies.

Degree Programs

The Linguistics Department offers undergraduate (B.A.) and graduate (M.A. and Ph.D.) programs. A wide range of courses allows students to study formal grammar (syntax, morphology, phonology, semantics); phonetics; psycholinguistics (natural language processing, first and second language acquisition, language disorders); sociolinguistics (discourse, quantitative approaches to style, linguistics and law); universals and typology; historical linguistics and Indo-European; East Asian linguistics (Chinese, Japanese, Korean); Germanic linguistics; Hispanic linguistics; Romance linguistics; Semitic linguistics; and Slavic linguistics.

Dornsife College of Letters, Arts and Sciences

Linguistics

Undergraduate Degrees

The Linguistics Department emphasizes the study of language both as an abstract system and in its psychological and social contexts. In addition to introductory linguistics and courses in linguistic analysis, students take courses in psycholinguistics (language acquisition, processing, and language disorders) and/or sociolinguistics (language and society). The undergraduate major in linguistics focuses on how the human mind structures, processes and acquires language as well as how similar communication goals are met by diverse means in the languages of the world. Students are encouraged to pursue combined majors in Linguistics/Philosophy, Linguistics/Psychology and Linguistics/East Asian Languages and Cultures, as well as double majors with computer science or a language department. Please contact the department adviser for more information.

Major Requirements for the Bachelor of Arts in Linguistics

REQUIRED COURSES, LOWER DIVISION		UNITS
LING 210	Introduction to Linguistics	4
REQUIRED COURSES, UPPER DIVISION		UNITS
LING 301	Introduction to Phonetics and Phonology	4
LING 302	Introduction to Syntax and Semantics	4
ELECTIVE COURSES, UPPER DIVISION		UNITS
Select 16 units from the following		
LING 380	Languages of the World	4
LING 401	Advanced Phonology	4
LING 402	Advanced Syntax	4
LING 403	Advanced Semantics	4
LING 405	Child Language Acquisition	4
LING 406	Psycholinguistics	4
LING 407	Atypical Language	4
LING 410	Second Language Acquisition	4
LING 412	Language and Law	4

LING 415	Phonetics	4
LING 422	Language Contact and Language Acquisition	4
LING 450	New Horizons in Forensic Speaker Identification	4
LING 466	Word and Phrase Origins	4
LING 485	Field Methodology	4
LING 497	Honors Thesis	4
One additional upper-division course in linguistics or a related field		4

Linguistics Major with Honors

The linguistics major with honors requires the student to complete the requirements for the major with a GPA of 3.5 or above and to complete in addition LING 497 Honors Thesis with a grade of B or better. Intent to complete the linguistics major with honors should be registered with the undergraduate adviser no later than the second semester of the junior year.

Requirements for the Bachelor of Arts with a Combined Major in Linguistics and Philosophy

For the lower division, LING 210 is required. For the upper division the following courses are required: LING 301 and LING 302; PHIL 350 and PHIL 465; two courses selected from LING 380, LING 401, LING 402, LING 403, LING 405, LING 406, LING 407, LING 410, LING 415, LING 422, LING 466 and LING 485; and three courses selected from PHIL 450, PHIL 460, PHIL 462 and PHIL 470.

Combined Major in Linguistics and Philosophy with Honors

The combined major in linguistics and philosophy with honors requires the student to complete the requirements for the major with a GPA of 3.5 or above and to complete in addition LING 497 Honors Thesis or PHIL 494 Senior Thesis with a grade of B or better. Intent to complete the major with honors should be registered with the undergraduate adviser no later than the second semester of the junior year.

Requirements for the Bachelor of Arts with a Combined Major in Linguistics and Psychology

For the lower division: LING 210, PSYC 100 and PSYC 274L are required. For the upper division the following courses are required: LING 301 and LING 302; PSYC 314L; two courses selected from LING 380, LING 401, LING 402, LING 403, LING 405, LING 406, LING 407, LING 410, LING 415, LING 422, LING 466 and LING 485; three additional courses selected from LING 406, PSYC 301L, PSYC 326, PSYC 336L, PSYC 337L, PSYC 424 and PSYC 433.

Combined Major in Linguistics and Psychology with Honors

The combined major in linguistics and psychology with honors requires the student to complete the requirements for the major with a GPA of 3.5 or above and to complete in addition either LING 497 Honors Thesis or PSYC 380 Junior Honors Seminar and PSYC 480 Senior Honors Seminar, with a grade of B or better. Intent to complete the major with honors should be registered with the undergraduate adviser no later than the second semester of the junior year.

Requirements for the Bachelor of Arts with a Combined Major in Linguistics and East Asian Languages and Cultures

For the lower division, LING 210 is required. For the upper division, the following courses are required: LING 301 and LING 302; EALC 470; two courses from LING 380, LING 401, LING 402, LING 403, LING 405, LING 406, LING 407, LING 410, LING 415, LING 422, LING 466 and LING 485; two courses selected from EALC 304, EALC 306, EALC 315, EALC 317, EALC 320, EALC 322, EALC 400, EALC 402, EALC 406, EALC 407, EALC 412ab, EALC 413, EALC 415, EALC 417, EALC 422, EALC 424 and EALC 426; one EALC literature, civilization or thought course from EALC 332, EALC 335, EALC 340, EALC 342, EALC 345, EALC 350, EALC 352, EALC 354, EALC 355, EALC 365, EALC 380, EALC 386, EALC 452, EALC 455 and EALC 460; two additional EALC courses from category IV or V. (After consultation with a department adviser, students may petition to use EALC courses not listed toward this requirement.)

Bachelor of Arts in Interdisciplinary Archaeology

See Religion for a complete listing of requirements.

Bachelor of Arts in Middle East Studies

See the Department of Middle East Studies for a complete listing of requirements.

Linguistics Minor Requirements

Lower division: LING 210. Upper division: LING 301 and LING 302, one course in psycholinguistics (LING 405, LING 406 or LING 410) or in sociolinguistics (LING 375), and one additional upper-division course from LING 380, LING 401, LING 402, LING 403, LING 405, LING 406, LING 407, LING 410, LING 415, LING 422, LING 466 and LING 485.

Arabic and Middle East Studies Minor

The undergraduate minor program gives students the opportunity of supplementing their major with an emphasis in Arabic and Middle East Studies. The 20-unit interdisciplinary minor is designed for students who want to explore and develop a critical understanding of Middle East history, culture, religion and global issues as well as acquire excellent knowledge of the Arabic language.

REQUIRED COURSES, LOWER-DIVISION

UNITS

MDES 252	Arabic IV	4
----------	-----------	---

REQUIRED COURSES, UPPER-DIVISION

UNITS

ANTH 327	Anthropology of the Middle East and Islam	4
POSC 351	Middle East Politics, or	
IR 363	Middle East Political Economy	4
REL 315	Thought and Life of Islam	4

One course from the following:*

IR 362	The International Relations of the Contemporary Middle East	4
IR 363	Middle East Political Economy	4
POSC 351	Middle East Politics	4

*Cannot replicate IR 363 or POSC 351

Middle East Studies Minor

See the Department of Middle East Studies.

Dornsife College of Letters, Arts and Sciences

Linguistics

Graduate Degrees

The graduate program in linguistics trains individuals to engage in the scientific study of human language. Course work emphasizes the structural aspects of language and the mechanisms of language change. Students work closely with faculty members on problems in linguistic theory, the description of particular languages, and variation across different users and contexts, focusing on their implications for understanding social and cognitive structures.

Admission Requirements

Applicants for admission to the graduate program are expected to have a bachelor's degree in linguistics or other appropriate field and knowledge of at least one foreign language. At the least, applicants are expected to have completed an introductory course in general linguistics. Other requirements for admission include: a detailed statement of purpose with specific information about interests and goals, scores from the General Test of the Graduate Record Examinations (GRE), and at least three letters of recommendation from academic sources.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Arts in Linguistics (32 units)

The department does not accept applicants for a Master of Arts degree. All graduate work in Linguistics at USC is taken as part of the Ph.D. program, and the M.A. in Linguistics is intended only as a transitional degree in the process of completing requirements for the Ph.D.

A student admitted to the graduate program may choose later to earn a terminal M.A. degree, or may be invited by the department to attempt a terminal degree.

Students pursuing the Ph.D. program in linguistics are required to complete 32 units of course work toward the M.A. degree. The choice of courses is subject to approval by the Graduate Studies Committee. In addition, students must satisfy one foreign language or research tool requirement. (See Foreign Language/Research Tool Requirement.)

M.A. Research Paper

In addition to course work and the foreign language/research tool requirement, students are also required to write one research paper the contents of which represent a distinct area. The completed paper must be submitted to the Graduate Studies Committee no later than the student's fourth semester of graduate study by the deadline established for that academic year. Following submission of the research paper, each student will conduct an oral defense of his or her work.

Doctor of Philosophy in Linguistics

Application deadline: December 1

Students pursuing the Ph.D. in Linguistics are required to complete a minimum of 60 units of course work beyond the baccalaureate. In addition to the 32 units completed toward the M.A., students are required to take three 600-level seminars in linguistics and a minimum of four units of 794ab Doctoral Dissertation. No more than eight units of 794 may be applied toward the Ph.D. degree. A maximum of 30 transfer units, approved by the university and the department may be applied to the Ph.D. degree.

After successfully completing the screening procedure, students will establish a qualifying exam committee to determine a Ph.D. course program in preparation for the dissertation. This course program must be approved by the Graduate Studies Committee.

Students seeking the Ph.D. in linguistics must demonstrate knowledge of two foreign language/research tools with at least one of them falling under Option A. One of these two foreign language/research tools is satisfied as an M.A. requirement. See Foreign Language/Research Tool Requirement.

Advisement

The student in his or her first semester will have the option of either selecting a faculty adviser or postponing such a selection until, but no later than, the last day of classes of the first year in the program. The Graduate Studies Committee (GSC) will serve as a provisional adviser until the student makes a selection.

The student has the option of changing advisers at any time without the need to seek the original adviser's approval. The student should inform the GSC and the previous adviser of the change.

At the beginning of the second year of graduate study, the faculty adviser will assist the student in planning a program of study appropriate to the student's interests leading to the screening procedure.

Required Core Courses in Linguistics

Students pursuing the Ph.D. program in linguistics are required to complete 32 units of course work toward the M.A. degree. See Waiver and Substitution of Course Requirements for possible exceptions.

REQUIRED COURSES		UNITS
LING 530	Generative Syntax	3
LING 531a	Phonology	3
THREE COURSES FROM THE FOLLOWING (TO BE COMPLETED BY THE END OF THE THIRD YEAR)		UNITS
LING 512	Linguistics Variation and Language Changes	3
LING 534	Logic and the Theory of Meaning	3
LING 576	Psycholinguistics	3
LING 580	General Phonetics	3

Screening Procedure

Before a doctoral qualifying exam committee can be established for applicants to the Ph.D. program, a student must pass a screening procedure. This procedure consists of a review of the student's graduate work at USC by Linguistics Department faculty. The review will be based on the following criteria: course work completed, including grades and papers; faculty recommendations; and evaluation of both the student's M.A. research paper and a Ph.D. screening paper. The M.A. research and Ph.D. screening papers must be in two different sub areas of linguistics, for example: syntax and psycholinguistics, or phonology and semantics, or sociolinguistics and typology.

The M.A. research paper must be completed and defended prior to the end of the fourth semester of graduate study, and the Ph.D. screening paper must be completed and defended prior to the end of the fifth semester. The set of courses leading to the M.A. research paper and the Ph.D. screening paper are determined through recommendation of the screening committee and approval of the Graduate Studies Committee.

Qualifying Exam Committee

Following the successful completion of the screening procedure, the student will establish a five-member qualifying exam committee. The qualifying exam committee is composed of at least five members; a minimum of three, including at least one tenured member, must be from the Linguistics Department and one must be a faculty member from outside the Linguistics Department. The Associate Vice Provost for Graduate Programs is *ex officio* a member of all qualifying exam committees. (Refer to the Graduate School Policies and Requirements for instructions on forming a qualifying exam committee.)

The Request to Take the Qualifying Examination Form is the means by which the qualifying exam committee is formally established. This form should be filed with the qualifying exam committee and the Graduate School the semester prior to taking the qualifying examination but no later than 30 days before the date of the student's written examination. In order to take the written examination, the student must submit a dissertation prospectus and an original research paper to each member of the qualifying exam committee.

Qualifying Examination

The examination qualifying a student for candidacy for the Ph.D. degree is comprehensive in nature, partly written and partly oral. Prior to taking the qualifying examination, the student must have met all of the departmental requirements for doing so and have the recommendation of the qualifying exam committee. The committee will determine and administer the written examination.

The written examination consists of a limited number of questions in the fields related to the student's research. Students will receive the written examination two weeks after submitting the qualifying paper and will have 30 days to complete the questions. An oral examination will be scheduled by the qualifying exam committee two weeks after the written examination has been submitted.

The successful completion of the qualifying procedure is represented by the approval by the qualifying exam committee of (1) the prospectus, (2) the original research paper, (3) the written examination, and (4) oral defense.

Dissertation

The final stage of the program is the submission and defense of a dissertation that makes an original and substantial contribution to its field of study. Refer to the Graduate School section of the catalogue for the policies and procedures governing the submission of a dissertation.

Doctor of Philosophy in Linguistics (Specialization in East Asian Linguistics)

Application deadline: December 1

Students interested in East Asian linguistics take the Doctor of Philosophy in Linguistics with a specialization in East Asian linguistics. In addition to all requirements for the Ph.D. in linguistics, the following courses are required: four courses or 15 units related to East Asian linguistics that are approved by the Graduate Studies Committee (GSC), which may be chosen from the following list: EALC 537, EALC 547, EALC 557, EALC 558, EALC 560, EALC 561, EALC 580, EALC 620 and LING 539. Upon approval by the GSC, other courses may be substituted. In addition, one of the two screening papers, the research paper associated with the qualifying examination and the doctoral dissertation must deal with at least one East Asian language. Students must also take LING 794ab Doctoral Dissertation. Students must pass the reading examination in one East Asian language.

Doctor of Philosophy in Linguistics (Specialization in Slavic Linguistics)

Application deadline: January 1

Students interested in Slavic linguistics take the Doctor of Philosophy in Linguistics with a specialization in Slavic linguistics. In addition to all requirements for the M.A. in Linguistics, the following courses are required: LING 542; SLL 510, SLL 512, SLL 514 and SLL 516; three LING 600-level seminars; and 794ab Doctoral Dissertation. Students must pass reading examinations in one Slavic language and either French or German.

Foreign Language/Research Tool Requirement

The Foreign Language/Research Tool requirement may be satisfied by choosing from the following options:

(A) Demonstrate a working knowledge of a second language by:

1. Passing a department internal written translation examination administered by a qualified faculty member, or
2. Demonstrating native speaker competence in a language other than English.

(B) Demonstrate a working knowledge of statistics and experimental design by passing, with a grade of B or higher, LING 501a (or its equivalent) and a second course, such as LING 501b or its equivalent, where this knowledge is applied to a linguistic research problem.

The prior approval of the Graduate Studies Committee will be required to complete courses other than those listed above.

(C) Demonstrate the ability to use the computer as a research tool by passing, with a grade of B or higher, LING 585 (or its equivalent) or by completing a programming project related to linguistics; this should be equivalent in scope to a term project for a semester course.

The prior approval of the Graduate Studies Committee will be required to complete a course other than the one listed above.

Courses of Instruction

LINGUISTICS (LING)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

LING 110Lg In a Word (4, FaSp) Words as a gateway to the human mind. How words are stored, comprehended and retrieved. How words are constructed. Words and concepts. Words and social constructs. The processing and the acquisition of words in normal and atypical children and adults.

LING 115gw Language and Society (4, FaSp) Discourse patterns among diverse social groups in institutional and interpersonal settings; interrelationships among language practices and gender, socioeconomic status, ethnicity; social structures and cultural values as reflected in language policies and practices.

LING 125 Hindi I (4, Fa) Introduction to current Hindi. Oral practice, listening and reading comprehension; grammar necessary for simple spoken and written expression. Lecture, classroom drill, laboratory practice.

LING 155 Hindi II (4, Sp) Continuation of LING 125. Reading of simple Hindi prose, practice in pronunciation, the grammar essential for reading comprehension and writing. Lecture, classroom drill and laboratory practice. *Prerequisite:* LING 125.

LING 210g Introduction to Linguistics (4) Empirical study of the sounds and structures of human language; syntax and semantics; language change; linguistic universals.

LING 255 Hindi III (4, Fa) Continuation of LING 155; intensive work in listening comprehension, oral communication, reading and writing short essays; introduction of readings and periodicals related to Hindi culture and civilization. *Prerequisite:* LING 155.

LING 265x Hindi IV (4, Sp) Reading of modern Hindi authors, review of grammar, composition, oral conversation, and collateral reading. *Prerequisite:* LING 255.

LING 275Lg Language and Mind (4, FaSp) Language within cognitive science: speech physiology and acoustics, language acquisition, reading, language disorders, perception and mental representation of words, linguistic diversity and computer analysis of speech.

LING 285Lg Human Language and Technology (4) Study of human linguistic competence and technologies that simulate it. Grammar, parsing, text generation; semantics, pragmatics, sense disambiguation; phonetics, speech synthesis, speech recognition.

LING 295g The Ancient Near East: Culture, Archaeology, Texts (4) An investigation of the peoples of the ancient Near East, focusing upon the writings which they produced, their languages and scripts, and their archaeological remains. *Concurrent enrollment:* MDA 140.

LING 301 Introduction to Phonetics and Phonology (4, Fa) A survey of topics in phonetics and phonology. (Duplicates credit in former LING 401a.) *Prerequisite:* LING 210.

LING 302 Introduction to Syntax and Semantics (4, Fa) A survey of topics in syntax and semantics. (Duplicates credit in former LING 402a.) *Prerequisite:* LING 210.

LING 303 Logic and Meaning in Natural Language (4, FaSp) Introduction to meaning in natural language and the methods from logic applied to its study. *Prerequisite:* LING 210.

LING 322gx Language Contact and Language Acquisition (4, Sp) The emergence of new languages, spoken and signed, in socio-historical situations, where linguistic input is degraded and insufficient to support

the ordinary language acquisition process.

LING 325g Language and Number (4, FaSp) Analysis of the formal properties of linguistic expressions of number with the goal of understanding the structures that underlie language and numerical reasoning.

Recommended preparation: LING 210.

LING 374 Language and Society in East Asia (4) (Enroll in EALC 374)

LING 375 Sociolinguistics (4) Linguistic and cultural pluralism in the U.S.; distributional and structural characteristics of selected urban and minority dialects; the relationship between dialects and “media standard.”

Prerequisite: LING 210.

LING 380 Languages of the World (4) Introduction to the world’s linguistic diversity; number of languages spoken and where; grammatical structure and social function of selected languages.

LING 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

LING 401 Advanced Phonology (4) Advanced study of topics in phonology. (Duplicates credit in former LING 401b.) *Prerequisite:* LING 301.

LING 402 Advanced Syntax (4, Sp) Advanced study of topics in syntax. (Duplicates credit in former LING 402b.) *Prerequisite:* LING 210, LING 302.

LING 403 Advanced Semantics (4) Topics in the theory of meaning in natural language (Duplicates credit in former LING 201.) *Prerequisite:* LING 302.

LING 405 Child Language Acquisition (4) Universal characteristics of child language; stages of acquisition of phonology, syntax, semantics; processes and dimensions of development; psychological mechanisms; communicative styles. (Duplicates credit in former LING 395.)

LING 406 Psycholinguistics (4) Experimental and theoretical aspects of how spoken and written language is produced and understood, learned during childhood, and affected by brain damage. *Prerequisite:* LING 210 or PSYC 100.

LING 407 Atypical Language (4) Analysis of atypical language and language pathologies throughout the lifespan and their relevance to current linguistic and cognitive science theory. *Prerequisite:* LING 210 or PSYC 100.

LING 409 Linguistic Structure of English (3) An overview of the syntactic, semantic, pragmatic structures of English as they relate to the theoretical literature on language acquisition.

LING 410 Second Language Acquisition (4) Theories of second language acquisition in children and adults; comparison of first and second language acquisition including psychological, social, and individual factors. (Duplicates credit in former LING 396.) *Prerequisite:* LING 210.

LING 411x Linguistics and Education (4) Practical classroom approaches to children’s language; relationships between writing, reading, and speaking; social and regional dialects; traditional, structural, and generative-transformational grammars. Not available for major or minor credit.

LING 412 Language and Law (4) Principles of semantics; analysis of speech acts including informing, promising, threatening, warning; linguistic analysis of consumer contracts and advertisements; readability studies.

LING 415 Phonetics (4) Familiarization with the articulation and transcription of speech sounds. Also vocal tract anatomy, acoustics, speech technology, non-English sounds, perception. Includes laboratory exercises.

LING 422 Language Contact and Language Acquisition (4, Sp) The emergence of new languages, known as Creoles, in socio-historical situations where linguistic input is degraded and insufficient to support the

ordinary language acquisition process.

LING 433 Children's Learning and Cognitive Development (4) (Enroll in PSYC 433)

LING 450 New Horizons in Forensic Speaker Identification (4) Overview of methods used to identify voices on the basis of their characteristic speech patterns.

LING 465 Philosophy of Language (4) (Enroll in PHIL 465)

LING 466 Word and Phrase Origins (4) Introduction to historical-comparative word study; history of ideas concerning language relationships; types of semantic change; hidden metaphors in English word-stock.

LING 480 Linguistic Structures (4) Analysis of grammatical structures of an individual language.

LING 485 Field Methodology (4) Elicitation techniques and methodological principles; recording and analysis of phonological, syntactic, and semantic structures; practical approaches to procedures used in urban, rural, and "primitive" settings.

LING 490x Directed Research (1–8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

LING 497 Honors Thesis (4, FaSp) Writing of the honors thesis. Registration is restricted to honors students.

LING 499 Special Topics (2–4, max 8) Investigation of selected topics in linguistics.

LING 501ab Experimental Methods in Linguistics (3-3) *a*: Univariate and bivariate statistical methods with applications to linguistic research; introduction to statistical computer packages. *b*: The application of advanced multivariate statistical methods to linguistic research. (Duplicates credit in former LING 601.)
Prerequisite: LING 501a.

LING 505abc Seminar in Linguistics (1-1-1) *a*: Exploration of the professional world of linguistics for first semester graduate students. *b*: Preparation and presentation of M.A./Ph.D. screening papers; discussion of student research. *c*: Colloquium for presentation and discussion of student research paper. Graded CR/NC.

LING 512 Linguistic Variation and Language Changes (3, Fa) Linguistic relationships among various correlates of variation: social, psychological, and chronological. Focus on dialectical, registral, and historical variation; the constraints of production and perception in different modes and situations.

LING 513 Spanish Morphology and Phonology (3, FaSp) (Enroll in SPAN 513)

LING 514 Spanish Syntax (3, FaSp) (Enroll in SPAN 514)

LING 515 Spanish Grammar in Discourse (3, FaSp) (Enroll in SPAN 515)

LING 527 Second Language Acquisition (3, Sp) Concepts and issues in theoretical approaches to the study of non-primary language acquisition; e.g., linguistic and processing universals, language transfer, language learnability, fossilization.

LING 530 Generative Syntax (3) Introduction to syntax; transformational-generative syntax.

LING 531ab Phonology (a: 3, Fa; b: 3, Sp) Traditional views of phonology; generative phonology; current developments in phonological research and theory.

LING 532 Current Issues in Syntactic Theory (3) Original literature, focusing whenever possible on issues in comparative syntax and their implications for universal grammar. Course complements LING 530.

LING 533 Language Universals and Typology (3) Introduction to language universals and typology.

LING 534 Logic and the Theory of Meaning (3) An introduction to logic in preparation for advanced work in semantics and linguistic theory.

LING 535 Syntax and Grammatical Theory (3, Sp) Principles and comparison of modern theories of grammar with special reference to syntax.

LING 536 Semantics (3, Sp) Current linguistic approaches to the semantics of natural language; analysis of concepts of meaning and reference.

LING 537 Advanced Syntax (3, max 9) Topics in advanced formal syntax; current literature leading to open questions in research; survey of important and controversial issues of current theoretical relevance.

LING 538 Selected Topics in Romance Syntax (3, max 9, Sp) Overview of selected topics in Romance Syntax within a comparative perspective and their contribution towards the understanding of a general theory of grammar.

LING 539 Japanese/Korean Syntax and Theoretical Implications (3, max 9) Critical discussion of selected papers and dissertations on Japanese/Korean syntax and consideration of their theoretical implications.

LING 540 Field Methods in Linguistics (3, max 6, Sp) Recording and analysis of a living language as employed by a native speaker of that language.

LING 541 Field Methods in Second Language Acquisition (3) Research design and methodology; data collection, coding, and analysis; ethical considerations.

LING 542 Historical Linguistics (3, 2 years, Sp) Principles of language change; the comparative method; structural and social factors in language change.

LING 546 Comparative Indo-European Linguistics (3) Analysis of the phonological, morphological, and syntactic structures of Proto-Indo-European, and its development in the various branches of Indo-European.

LING 547 Morphology (3, max 12, FaSpSm) Introduction to morphology: words versus sentences, the grammar of words, the various notions of "lexicon," the architecture of the phonological component. This course is in preparation for advanced work in linguistic theory.

LING 548 Lexical Semantics (3, Sp) Languages group meaning elements together in different ways to form words. Consideration of how to identify these elements and how speakers map them into lexico-syntactic units.

LING 550 Advanced English Linguistics (3) The analysis of problems in the grammatical description and history of English.

LING 555 Comparative Germanic Linguistics (3) Nature and relationship of changes that led to the differentiation of the individual Germanic languages.

LING 557 Structure of the Chinese Language (4) (Enroll in EALC 557)

LING 561 Topics and Issues in East Asian Linguistics (4, max 12) (Enroll in EALC 561)

LING 573 Sociolinguistics (3) Theoretical approaches to language in social context; discourse analysis, ethnography of communication, variation theory.

LING 574 Advanced Sociolinguistics (3, max 9) Current issues in sociolinguistic theory.

LING 576 Psycholinguistics (3) Theories of acquisition; sentence and discourse processing; language and thought.

LING 579 Child Language Development (3, Sp) Acquisition of grammatical, discourse, and conversational competence; strategies and structures.

LING 580 General Phonetics (3, Sp) Familiarization with articulation, transcription, production, and acoustic analysis of the speech sounds found in the world's languages. Also speech technology, perception, and disorders. Includes laboratory exercises.

LING 581 Topics in Advanced Phonology (3, max 9) Topics in advanced formal phonology; theoretical issues in the interface of phonology with other areas of linguistics; literature study on themes of current theoretical relevance. *Recommended preparation:* LING 531ab.

LING 582 Experimental Phonetics (3, FaSp) Source-filter theory, acoustic correlates of speech sounds, vocal tract and auditory physiology, coarticulation and motor coordination, speech technology including synthesis and recognition, experimental design and statistics, and speech perception. *Prerequisite:* LING 580.

LING 585 Computational Linguistics (3) Using hands-on and research techniques, study of the role of linguistic knowledge and the procedures that implement it in computational systems that process natural language.

LING 586 Advanced Psycholinguistics (3, max 9) Current issues in psycholinguistic theory.

LING 590 Directed Research (1–12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

LING 593x Practicum in Teaching the Liberal Arts: Linguistics (2, FaSp) Practical principles for the long-term development of effective teaching within college disciplines. Graded CR/NC. Open only to doctoral students.

LING 595 Directed Readings (1–4, FaSpSm) Maximum units which may be applied to the degree to be determined by the department.

LING 599 Special Topics (2–4, max 8, FaSpSm) Research trends as reflected primarily in the current periodical literature.

LING 602 Seminar in Experimental Methods in Linguistics (3) Topics in quantitative methods in linguistics research, e.g., covariance structure analysis, multi-dimensional scaling, log linear model, meta-analysis.

LING 610 Seminar in Linguistic Theory (3, max 12, Sp)

LING 615 Seminar in Linguistics Structures (3, max 12, 2 years, Fa) Analysis of the synchronic or diachronic phonology, morphology, and syntax of individual languages.

LING 627 Seminar in Second Language Acquisition (3, max 12, FaSp) Readings in second language acquisition as the framework for a discussion and research-oriented seminar.

LING 631 Seminar in Phonological Theory (3, max 12, Fa)

LING 632 Seminar in Phonetics (3, max 12, FaSp) Readings in phonetic theory and current research as the framework for a discussion-oriented class. *Prerequisite:* LING 580.

LING 635 Seminar in Syntax (3, max 12, FaSp)

LING 636 Seminar in Semantics (3, max 12, Fa)

LING 645 Seminar in Language Change (3, max 12, Sp)

LING 675 Seminar in Sociolinguistics (3, max 12, Sp)

LING 676 Seminar in Psycholinguistics (3, max 12, Sp)

LING 790 Research (1–12, FaSpSm) Research leading to the doctorate. Maximum units which may be

applied to the degree to be determined by the department. Graded CR/NC.

LING 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Minor in Mathematical Finance

Kaprielian Hall 104

(213) 740-3800

Staff Contact: Cynthia Mata-Flores (Undergraduate)

This interdisciplinary minor was created for students in business, economics and mathematics, whose majors already require some of the introductory course work. Students in other programs are welcome but should expect the minor to require more units than it does for students in those programs.

As with all minors, students must include at least four upper-division courses and four courses dedicated exclusively to this minor (which may be the same four courses). Finally, students must select four courses outside their major department. Economics majors must choose four courses outside of economics; math majors must choose four courses outside of math; business majors must choose four courses outside of the Marshall School of Business. These may be the same courses used to meet the first two conditions.

REQUIREMENTS

UNITS

ECON 203	Principles of Microeconomics, and	4
ECON 205	Principles of Macroeconomics, or	4
ECON 351x*	Microeconomics for Business, and	4
ECON 352x*	Macroeconomics for Business	4

Choose one of the following two sequences (8 units):

ECON 303*	Intermediate Microeconomic Theory	4
ECON 305*	Intermediate Macroeconomic Theory, or	4
BUAD 350*	Macroeconomic Analysis for Business Decisions	4
BUAD 351*	Economic Analysis for Business Decisions	4

Choose two courses, one from each of the following groups (8 units):

MATH 118x*	Fundamental Principles of Calculus, or	
MATH 125*	Calculus I	4
MATH 218*	Probability for Business, or	
MATH 308*	Statistical Inference and Data Analysis II, or	
MATH 407*	Probability Theory, or	
ECON 317*	Introduction to Statistics for Economists	4

Choose two courses from the following list (8 units):

MATH 126* or MATH 127*; MATH 225* or MATH 245*; MATH 226* or MATH 227*; MATH 408* or MATH 467*

Choose one course from the following list (4 units):

BUAD 306*, BUAD 310, ECON 350*, ECON 357*, FBE 441*

Choose one course from the following list (4 units):

ECON 452*, ECON 457*, FBE 324*, FBE 421*, FBE 443*, FBE 445*, FBE 459*, FBE 462*

Choose one course from the following:

ITP 109x, ITP 110x, ITP 168x, CSCI 101L

**Prerequisite required*

Total requirements, for students with no prior course work: 42–43 units

Students majoring in business administration, economics or mathematics can meet many of these requirements with course work that also satisfies their majors. In addition to those classes, students in those majors must complete the following requirements:

- Business majors satisfy 24 units with course work that is also required for the major and need to complete only 18 units in MATH, ECON and ITP or CSCI
- Economics majors satisfy 20–24 units with course work required for the major (including one major elective), needing only 18–22 units in BUAD, FBE, ITP or CSCI and MATH
- Mathematics majors satisfy 16 units with course work required for the major, needing only 26 units in BUAD, ECON, FBE and ITP or CSCI

Progressive Degree Programs in Mathematics

See Mathematics for progressive degree requirements.

Master of Science in Mathematical Finance

The objective of this master of science program is to produce graduates with a rigorous foundation in the economic theory and mathematical modeling of financial markets. The program creates an integrated curriculum spanning four disciplines: economics, mathematics, econometrics/statistics and computational/numerical analysis. The program is designed for recent graduates in the fields of applied mathematics, physics and engineering — or for graduates in economics, business and finance with strong mathematical backgrounds — who wish to pursue high-tech finance careers in financial institutions, industry or government.

Admission Requirements

Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All applicants must take the GRE General Test. Complete transcripts of undergraduate and any graduate level courses are required, as well as a statement of purpose and three recommendation letters. A substantial undergraduate background in mathematics is required, which should include one semester of real analysis or advanced calculus, one semester of linear algebra and one semester of advanced probability/statistics. Candidates with weaker backgrounds may be required to take mathematics classes prior to admission to the program. An undergraduate knowledge of microeconomics and of macroeconomics, and partial differential equations is helpful, although it is not required for admission. Some experience in Matlab and C/C++ programming is also useful.

Foreign Language Requirement

There is no foreign language requirement.

Course Requirements

Thirty units of course work are required, six core courses and four to five elective courses. Students are required to satisfy a summative experience for degree completion. This will be in the form of registration in 1 unit of MATH 590 Directed Research with a summative report at the end of the term. Topics of research will be determined by the program director. The program consists of:

REQUIRED CORE COURSES (6 COURSES, 18 UNITS)		UNITS
Mathematics and Mathematical Finance:		
MATH 530ab	Stochastic Calculus and Mathematical Finance	3-3
MATH 512	Financial Informatics and Simulation (Computer Labs and Practitioner Seminar)	3
MATH 590	Directed Research	1
Financial Economics and Econometrics:		
ECON 613	Economic and Financial Time Series	4
ECON 659	Economics of Financial Markets I	4
ELECTIVE COURSES (4 COURSES, 12 UNITS)		UNITS
Computational and Empirical Finance (must take at least 2 courses)*:		
FBE 535	Applied Finance in Fixed Income Securities	3
FBE 554	Trading and Exchanges	3
FBE 555	Investment Analysis and Portfolio Management	3
FBE 559	Management of Financial Risk	3
FBE 589	Mortgages and Mortgage-Backed Securities and Markets	3
(FBE 555 highly recommended)		
Statistics*:		
MATH 541ab	Introduction to Mathematical Statistics	3-3
MATH 543L	Nonparametric Statistics	3
MATH 547	Methods of Statistical Inference	3
Numerical/Optimization/Other Methods*:		
MATH 501	Numerical Analysis and Computation	3
MATH 502ab	Numerical Analysis	3-3
MATH 504ab	Numerical Solution of Ordinary and Partial Differential Equations	3-3
MATH 505ab	Applied Probability	3-3
MATH 508	Filtering Theory	3
MATH 509	Stochastic Differential Equations	3
MATH 585	Mathematical Theory of Optimal Control	3
Computational and Financial Economics:		
ECON 614	Economic and Financial Time Series II	4
ECON 652	Economics of Financial Markets II	4
PM 511ab	Data Analysis	4-4

Prerequisites for any of the above courses can be waived based on students' knowledge of the subject area. Approval from the program director is required.

**The elective courses in statistics/numerical/optimization/other methods and computational and empirical finance have to be approved for each student by the program directors. Other electives, not on this list, may sometimes be approved after consultation*

**Recipient of university-wide or college teaching award.*

Degree Programs

The Department of Mathematics has designed its major to give students an understanding of the several areas of mathematics. The program of study allows students to use electives to prepare themselves for a specific field, whether in industry, teaching or advanced graduate research. The faculty is engaged in a wide variety of research activities and offers courses in many areas.

The department offers the B.S., B.A. and minor in mathematics; B.S. and B.A. in applied and computational mathematics; B.S. in mathematics/economics; minor in mathematical finance and minor in statistics; progressive degree programs in mathematics; M.S. in applied mathematics; M.S. in mathematical finance; M.S.

Dornsife College of Letters, Arts and Sciences

Mathematics

Undergraduate Degrees

Advanced Placement Examinations in Mathematics

The university grants four units of credit in mathematics for scores of 4 or 5.

Major Requirements for the Bachelor of Arts in Mathematics

Six math courses at the 400 level or above including MATH 410, MATH 425a and either MATH 434 or MATH 435, are required.

Major Requirements for the Bachelor of Science in Mathematics

Pre-major Requirements: MATH 125, MATH 126 or MATH 127, MATH 225, MATH 226 or MATH 227 are required. Eight math courses at the 400 level or above, excluding MATH 450, but including:

REQUIRED COURSES		UNITS
MATH 410	Fundamental Concepts of Modern Algebra	4
MATH 425ab	Fundamental Concepts of Analysis	4-4
MATH 471	Topics in Linear Algebra	4

REQUIRED PHYSICS COURSES		UNITS
PHYS 151L	Fundamentals of Physics I: Mechanics and Thermodynamics	4

Four additional courses in natural sciences or computer science, but excluding courses in mathematics, are required. At least one of these must be an upper-division course, and each of the four courses must be acceptable for the Bachelor of Science degree in the department in which it is offered.

Major Requirements for the Bachelor of Arts in Applied and Computational Mathematics

Pre-major Requirements: MATH 125, MATH 126, MATH 225 or MATH 245, MATH 226

In Mathematics: MATH 407, MATH 458

At Least Four More Courses From the Following: MATH 370, MATH 408, MATH 410, MATH 425a, MATH 430, MATH 432, MATH 435, MATH 445, MATH 466, MATH 467, MATH 471

In Computing: At least one programming course such as CSCI 101L, ITP 109x, ITP 110x, ITP 165x or other programming courses approved by the program advisers.

Electives: At least three additional courses with significant quantitative content, in mathematics, natural sciences, computer science, engineering, economics or other fields approved by the department. At least two of these must be outside the mathematics department; moreover, at least two of these three must be in the same department, one of which must be an upper-division course.

Major Requirements for the Bachelor of Science in Applied and Computational Mathematics

Pre-major Requirements: MATH 125, MATH 126 or MATH 127, MATH 225 or MATH 245, MATH 226 or

MATH 227.

In Mathematics: MATH 407, MATH 408, MATH 425a, MATH 458. At least three courses from MATH 370, MATH 410, MATH 425b, MATH 430, MATH 432, MATH 445, MATH 465, MATH 466, MATH 467, MATH 471.

Students contemplating a graduate degree in mathematics are advised to take MATH 410, MATH 425b and MATH 471.

In Computing: At least one programming course such as CSCI 101L, CSCI 103, ITP 109x, ITP 115, ITP 165x, ITP 168x or other programming course approved by the program advisers.

Electives: At least four additional courses with significant quantitative content in mathematics, natural sciences, computer science, engineering, economics or other fields approved by the department. At least three of the four must be outside the mathematics department; and at least one must be upper-division.

Grade Point Average Requirements

For each undergraduate degree an overall GPA of 2.0 in all upper-division courses taken for the degree is required. In addition, any upper-division course specifically listed as required must be passed with a grade of C (2.0) or better (e.g., MATH 410, MATH 425ab and MATH 471 for the B.S. degree).

Minor in Mathematical Finance

This interdisciplinary minor was created for students in business, economics and mathematics, whose majors already require some of the introductory course work. Students in other programs are welcome but should expect the minor to require more units than it does for students in these programs. For more information, see Mathematical Finance.

Minor in Statistics

Kaprielian Hall 104

(213) 740-2400

This interdisciplinary minor should appeal to students from any discipline who are interested in acquiring a basic understanding of the mathematics underlying modern statistical analysis and inference techniques, in learning how to handle and analyze large data sets, and in gaining insight into the applications of modern statistics. Students who complete this minor should be able to critically interpret statistically based conclusions, should be viable candidates for entry level positions requiring some knowledge of modern statistics and data analysis, and should be prepared to enter a graduate-level program in applied statistics. The only prerequisite for this minor is one semester of elementary calculus.

As with all minors, students must include at least four upper-division courses and four courses dedicated exclusively to this minor (which may be the same four courses). Finally, students must select four courses outside their major department. These may be the same four courses used to meet the first two conditions. Note that Math B.A. and B.S. economics/mathematics students may complete this minor by taking MATH 407 and MATH 408 and at least 16 additional upper-division units approved by the Department of Mathematics, which are not in their major department and not being used to satisfy a requirement for their major. Note also that if calculus must be taken to satisfy the prerequisite for MATH 307, 20 units would be required to complete the minor.

REQUIREMENTS

		UNITS
MATH 307	Statistical Inference and Data Analysis I (prerequisite: MATH 118 or MATH 125), and	4
MATH 308	Statistical Inference and Data Analysis II, or	4
MATH 407	Probability Theory (prerequisite: MATH 226) and	4
MATH 408	Mathematical Statistics	4
Electives*		8
Total		16 units

*Electives may be any upper-division or graduate level classes involving the theory or application of statistics approved by the

Department of Mathematics. The department maintains a list of currently pre-approved courses that students may choose from. Potential courses include: BISC 478 Computational Genome Analysis (4 units), ECON 318 Introduction to Econometrics (4 units), ECON 419 Advanced Econometrics (4 units) and PSYC 421L Applied Multivariate Statistical Methods (4 units).

Mathematics Minor Requirements

MATH 125, MATH 126 or MATH 127, MATH 225 or MATH 245, MATH 226 or MATH 227 and four math courses at the 400 level or above, one of which must be from MATH 410, MATH 425a, MATH 435, MATH 440 or MATH 471. These four courses at the 400 level or above must total at least 16 units.

Honors Program in Mathematics

Admission to the Program

The honors program is available for mathematics majors. A student must apply to the department for admission. A minimum grade point average of 3.5 is required in the first two years of university work as well as in the lower-division mathematics courses MATH 125, MATH 126 or MATH 127, MATH 225 and MATH 226 or MATH 227.

Requirements

The students must complete all requirements for the degree program in which they are enrolled. MATH 410, MATH 425ab and MATH 471 are required. The remaining courses at the 400 level or higher must be acceptable for the B.S. degree.

In addition, students in the honors program must register for at least four units of MATH 490x Directed Research. The student must have an overall GPA of at least 3.5 in all courses at the 400 level or higher.

Combined Mathematics/Economics Major Requirements for the Bachelor of Science

Students are required to take seven courses in economics, seven courses in mathematics and one course in computer programming languages.

Pre-major Requirement: MATH 125

In Economics: ECON 203, ECON 205, ECON 303, ECON 305, ECON 318 and at least two other ECON courses at the 400-level or above

In Mathematics: MATH 126 or MATH 127; MATH 225 or MATH 245; MATH 226 or MATH 227; MATH 407, MATH 408 and at least two other MATH courses at the 400-level or above

In Computing: At least one course chosen from ITP 110x, ITP 165x, CSCI 101L

Electives must be approved by the program advisers.

Language

Those students intending to go on to graduate school should satisfy the language requirement in French, German or Russian.

Progressive Degree Programs in Mathematics

Outstanding undergraduate students may apply for a master's degree in any area for which their major is relevant. If accepted into the master's degree program, the student may work simultaneously toward their bachelor's degree and the master's degree. To apply for a master's degree, a student must have completed at least 64 units, but fewer than 96 units, toward their major. The application requires two letters of recommendation from USC faculty, at least one of whom must be in the department of the student's major. For more information on progressive degree programs, see [here](#).

Mathematics

Graduate Degrees

Admission Requirements

All applicants must take the Graduate Record Examinations General Test.

Master of Arts and Doctor of Philosophy in Mathematics and in Applied Mathematics

A substantial undergraduate background in mathematics which includes one year of real analysis (MATH 425ab), one semester of abstract algebra (MATH 410) and one semester of upper-division linear algebra (MATH 471) is required. Students enrolled in one of the department's master of science or arts programs must complete the Ph.D. screening procedure prior to admission to a Ph.D. program.

Master of Science in Applied Mathematics, in Statistics and in Computational Molecular Biology

A substantial undergraduate background in mathematics which includes one semester of real analysis or advanced calculus and one semester of linear algebra is required.

Regular admission pending completion during the first year of graduate studies of prerequisite undergraduate mathematics may be considered for applicants who otherwise qualify for the program.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Science in Applied Mathematics

This program is intended for individuals who are seeking or currently hold positions which involve mathematical applications, or for mid-career people wishing to improve their skills in applied areas. Specific options in the program include: biomedicine, discrete mathematics, economics, finance and business economics, fluid dynamics, numerical analysis and computation, and systems and control. In addition, students may design their own option to suit specific needs.

On admission to the program, each student is assigned an option adviser. The adviser serves on the student's master's committee and assists the student in determining the courses of study in the selected option. Courses of instruction are drawn from the Department of Mathematics and other participating departments which include: aerospace engineering, biomedical engineering, civil engineering, computer science, economics, electrical engineering, business administration, mechanical engineering, physiology and biophysics, and preventive medicine.

REQUIRED COURSES

UNITS

MATH 501	Numerical Analysis and Computation	3
MATH 505ab	Applied Probability	3-3
MATH 570a	Methods of Applied Mathematics	3
MATH 601	Optimization Theory and Techniques	3

plus at least 15 units of elected option courses

In addition, registration in MATH 594ab and a master's thesis is required for all students. This thesis is the end product of a practicum in the selected option. The practicum is supervised by the student's master's committee.

For this program students are not required to take the screening examination or to satisfy a foreign language requirement.

Master of Science in Mathematical Finance

See Mathematical Finance.

Master of Science in Statistics

The object of this program is to provide academic instruction in statistical theory with a solid mathematical foundation while emphasizing applications to real world problems. Some probability theory is included to provide a rigorous foundation. The program is intended for individuals who are seeking or currently hold positions that involve statistical methodology and practice. A student may orient his or her course of study toward a particular field of application through appropriate selections from the program listings plus elective courses from other disciplines.

Course Requirements

Thirty units of course work are required, including:

REQUIRED COURSES

UNITS

MATH 541ab	Introduction to Mathematical Statistics	3-3
MATH 650	Seminar in Statistical Consulting	3

and one from each of options A, B, C:

(A)

MATH 505a	Applied Probability	3
MATH 507a	Theory of Probability	3

(B)

MATH 542L	Analysis of Variance and Design	3
MATH 545L	Introduction to Time Series	3

(C)

MATH 501	Numerical Analysis and Computation	3
MATH 502a	Numerical Analysis	3
PM 511a	Data Analysis	4

plus at least 12 units of adviser-approved courses

Students may opt for a master's thesis (and registration in MATH 594ab) or a written examination covering material from MATH 505a or MATH 507a, and MATH 541ab. The examination will normally be given at the end of the fall semester. Students must pass MATH 505a or MATH 507a, and MATH 541ab with a grade of B or higher. If a student receives a grade of B- or lower in any of these courses, the requirement can be waived upon passing the screening exam for the course at the master's level or higher.

Master of Science in Computational Molecular Biology

The computational molecular biology program is designed to attract recent graduates in either mathematics, statistics, biology or computer science, or scientists and engineers interested in retraining. A commercial or laboratory internship is required. Students will be prepared for employment in the rapidly expanding areas of computational molecular biology and bioinformatics. The program has two tracks, appropriate for different undergraduate backgrounds: biology and mathematical science. The required courses for each track are indicated below.

REQUIRED COURSES

UNITS

Biological Sciences

BISC 403***	Advanced Molecular Biology	4
BISC 478**	Computational Genome Analysis	4

BISC 505*	Genomics and Molecular Genetics	4
BISC 542*	Seminar in Molecular Biology	3
BISC 577ab*	Computational Molecular Biology Laboratory	2-2

Computer Science

CSCI 485**	File and Database Management	3
CSCI 570***	Analysis of Algorithms	3

Mathematics

MATH 407**	Probability Theory	4
MATH 408**	Mathematical Statistics	4
MATH 505a***	Applied Probability	3
MATH 541a***	Introduction to Mathematical Statistics	3
MATH 578a***	DNA and Protein Sequence Analysis	3
MATH 592*	Computational Molecular Biology Internship	3
MATH 650*	Seminar in Statistical Consulting	3
Total units		32-33

*Both tracks

**Biology track

***Mathematical science track

Students are required to demonstrate skill in C++, Java or Perl, and to demonstrate knowledge of molecular biology at the level of BISC 320L. A substantial report on the commercial or laboratory internship must be submitted (for which enrollment in MATH 592 is required).

Master of Arts in Mathematics and Master of Arts in Applied Mathematics

The objective of the Master of Arts program is to prepare students for research, teaching and other professional careers in mathematics and applied mathematics, respectively. In addition to the algebra requirement and differential geometry/topology option for the Master of Arts in Mathematics, the two programs differ in emphasis: the Master of Arts in Mathematics emphasizes the core courses in pure mathematics, and the Master of Arts in Applied Mathematics emphasizes courses in mathematics and affiliated fields that are fundamental in applied mathematics.

Relationship to Ph.D. Programs in Mathematics and in Applied Mathematics

The two year M.A. program is an expansion of the first year of graduate studies in the Ph.D. program in mathematics (respectively, the Ph.D. program in applied mathematics). The program provides a rigorous foundation in mathematics (applied mathematics) while affording students additional time for preparatory training. The comprehensive examinations for the M.A. program can serve as the preliminary qualifying examination for either Ph.D. program, and the written Ph.D. qualifying examinations serve as comprehensive examinations for the corresponding Master of Arts degree.

Requirements for the Master of Arts in Mathematics

At least 24 units are required, including:

REQUIRED COURSES		UNITS
MATH 510ab	Algebra	3-3
MATH 520	Complex Analysis	3
MATH 525a	Real Analysis	3

and one option from A, B, C or D:

<i>(A)</i>		
MATH 535a	Differential Geometry	3
MATH 540	Topology	3
<i>(B)</i>		
MATH 555a	Partial Differential Equations	3
MATH 565a	Ordinary Differential Equations	3
<i>(C)</i>		
MATH 507a	Theory of Probability	3
MATH 541b	Introduction to Mathematical Statistics	3
<i>(D)</i>		
MATH 502ab	Numerical Analysis	3-3

The degree is completed with either departmental examinations (two written examinations selected from the two required components and the optional component) or a thesis demonstrating research ability in pure mathematics (the thesis option requires four additional thesis units selected from MATH 594abz).

Requirements for the Master of Arts in Applied Mathematics

At least 24 units are required, including MATH 525a Real Analysis (3), and at least three from these courses:

MATH 502a	Numerical Analysis	3
MATH 502b	Numerical Analysis	3
MATH 505a	Applied Probability, or	
MATH 507a	Theory of Probability	3
MATH 505b	Applied Probability, or	
MATH 506	Stochastic Processes, or	
MATH 507b	Theory of Probability	3
MATH 541a	Introduction to Mathematical Statistics	3
MATH 541b	Introduction to Mathematical Statistics	3
MATH 555a	Partial Differential Equations	3
MATH 565a	Ordinary Differential Equations	3

Other elective courses, including those from other departments, have to be approved by the program adviser.

The degree is completed with either departmental comprehensive examinations (two examinations, one covering the required component MATH 525a, and the second covering one of the elective MATH courses) or a thesis demonstrating research ability in applied mathematics (the thesis option requires four additional thesis units selected from MATH 594abz).

Doctor of Philosophy in Applied Mathematics

Application deadline: December 15

The program requires a maximum effort by the student for a minimum of four years of full-time work.

Screening Procedure

The screening examination consists of four one-hour examinations covering the subject content of: MATH 502a Numerical Analysis; MATH 505a Applied Probability (or, at the student's discretion, MATH 507a Theory of Probability); MATH 525a Real Analysis; and MATH 541a Introduction to Mathematical Statistics.

The department offers the examinations twice a year, at the end of summer and at the beginning of the spring semester. All four parts of the screening examination must be attempted by the end of the third semester (not counting summer sessions) in the program. The students may take each of the exams as many times as they wish, but three of the exams must be successfully completed by the end of the fourth semester (not counting summer sessions) and all four must be successfully completed by the end of the sixth semester in the program. The qualifying examination should follow two or three semesters after the successful completion of the screening procedure.

Qualifying Exam Committee

No later than at the end of the first semester after passing the screening procedure the student must form a qualifying exam committee consisting of an adviser and four other faculty members, including at least one from another department.

Qualifying Examination

The written portion of the qualifying examination consists of a Ph.D. dissertation proposal. This document should include: introduction, statement of the problem, literature survey, methodology, summary of preliminary results, proposed research, references, appendix (including one or two fundamental references).

The oral portion of the qualifying examination consists of a presentation of the Ph.D. dissertation proposal. The student must demonstrate research potential.

Course Requirements

The student must complete, with no grade lower than B, a minimum of 60 units of courses carrying graduate credit and approved by the qualifying exam committee. These must include MATH 794ab and six courses from the following: MATH 502b, MATH 504ab, MATH 505b, MATH 507b, MATH 509, MATH 520, MATH 525b, MATH 530b, MATH 532, MATH 541b, MATH 542L, MATH 545, MATH 555a, MATH 565a, MATH 574, MATH 576, MATH 580, MATH 585.

Transfer of Credit

No transfer of credit will be considered until the screening examination is passed. A maximum of 30 units of graduate work at another institution may be applied toward the course requirements for the Ph.D. A grade of B- (A = 4.0) or lower will not be accepted and, at most, two grades of B will be accepted. A Ph.D. candidate may petition the department for transfer of additional credit, after he or she passes the qualifying examination.

Foreign Language Requirement

The student must demonstrate a reading comprehension of mathematics in one language (other than English) in which there is a significant body of research mathematics (such as Chinese, French, German, Japanese and Russian) by passing a written examination, administered by the Mathematics Department, in translation of mathematical content.

Dissertation

Following passage of the screening examination and approval of a dissertation topic by the qualifying exam committee, the student begins research toward the dissertation under the supervision of the dissertation committee. The primary requirement of the Ph.D. is an acceptable dissertation based on a substantial amount of original research conducted by the student.

Research Areas

Opportunities for research are available from the faculty in several areas of applied mathematics with an emphasis on: computational biology, control theory, financial mathematics, mathematical neurosciences, numerical analysis, optimization, scientific computing, statistical genetics, statistics and stochastic differential equations.

Doctor of Philosophy in Mathematics

Application deadline: December 15

The program requires the maximum endeavor by the student for normally a minimum of four years of full-time

work.

The student must choose between two concentrations: Pure Mathematics or Pure and Applied Mathematics.

Screening Procedure

Appointment of a qualifying exam committee and retention in the doctoral program are contingent on passing the preliminary qualifying examination by the end of the second semester. If a student fails the examination, the department, at its discretion, may permit the student to take it again during the third semester of graduate studies.

The preliminary qualifying exam is a written two-hour examination administered by the department. The student must choose between two options: analysis or algebra. Each option approximately covers the content of two one-semester graduate courses, with the precise list of possible topics made available to the student by the department.

Course Requirements

The student must complete with no grade lower than B a minimum of 60 units of courses carrying graduate credit and approved by the qualifying exam committee.

Pure Mathematics Concentration

REQUIRED COURSES		UNITS
MATH 510a	Algebra	3
MATH 525a	Real Analysis	3
MATH 535a	Differential Geometry	3
MATH 794ab	Doctoral Dissertation	2-2

Five courses selected from the following:

MATH 507a	Theory of Probability	3
MATH 510b	Algebra	3
MATH 520	Complex Analysis	3
MATH 525b	Real Analysis	3
MATH 532	Combinatorial Analysis	3
MATH 540	Topology	3
MATH 555a	Partial Differential Equations	3
MATH 565a	Ordinary Differential Equations	3

Pure and Applied Mathematics Concentration

REQUIRED COURSES		UNITS
MATH 502a	Numerical Analysis	3
MATH 510a	Algebra	3
MATH 525a	Real Analysis	3
MATH 794ab	Doctoral Dissertation	2-2

Five courses selected from the following:

MATH 502b	Numerical Analysis	3
MATH 507a	Theory of Probability	3
MATH 520	Complex Analysis	3
MATH 525b	Real Analysis	3

MATH 532	Combinatorial Analysis	3
MATH 541a	Introduction to Mathematical Statistics	3
MATH 555a	Partial Differential Equations	3
MATH 565a	Ordinary Differential Equations	3

Transfer of Credit

No transfer of credit will be considered until the screening examination is passed. Normally a maximum of 30 units of graduate work at another institution may be applied toward the course requirements for the Ph.D. A grade of B- or lower will not be accepted, and, at most, two grades of B will be accepted. A Ph.D. candidate may petition the department for transfer of additional credit after passing the qualifying examination.

Foreign Language Requirement

The student must demonstrate a reading comprehension of mathematics in one language (other than English) in which there is a significant body of research mathematics (such as Chinese, French, German, Japanese and Russian) by passing a written examination, administered by the department, in translation of mathematical content.

Qualifying Examination

The written portion of the qualifying examination is comprehensive, consisting of two, two-hour examinations administered by the department. These examinations cover two out of the following five options, excluding the option already selected for the preliminary examination: algebra, analysis, geometry/topology, probability/statistics, differential equations. Each option approximately covers the content of two, one-semester graduate courses, with the precise list of possible topics made available to the students by the department. The selection of options must be approved by the qualifying exam committee.

The oral portion of the qualifying examination covers one topic selected from department research areas in mathematics and approved by the qualifying exam committee. The student must demonstrate research potential in this field.

Dissertation

Following passage of the qualifying examination and approval of a dissertation topic by the qualifying exam committee, the student begins research toward the dissertation under the supervision of the dissertation committee. The primary requirement for the Ph.D. is an acceptable dissertation which is based on a substantial amount of original research conducted by the student.

Research Areas

Opportunities for research are offered in the areas of algebraic geometry, arithmetic geometry, combinatorics, complex geometry, control theory, differential equations, differential geometry, dynamical systems, functional analysis, geometric analysis, group theory, K-theory, nonlinear analysis, number theory, numerical analysis, optimization, probability, representation theory, ring theory and topology.

Dornsife College of Letters, Arts and Sciences

Mathematics

Courses of Instruction

MATHEMATICS (MATH)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MATH 040x Basic Mathematical Skills (4, FaSp) Review of Algebra. Real numbers, linear equations and inequalities, functions, graphs, systems of equations, exponents, polynomials, factoring, rational expressions, radicals, quadratic equations and solutions. Graded CR/NC.

MATH 108g Contemporary Precalculus (4, FaSp) Equations and inequalities; functions; graphs; polynomial and rational functions; exponential, logarithmic, and trigonometric function; analytic geometry. *Prerequisite:* MATH 040x or passing of placement exam.

MATH 114x Foundations of Statistics (4, FaSpSm) An introduction to the basic tools of statistics. Descriptive statistics; probability; expected value; normal approximation sampling; chance models; tests of significance. Not available for major credit to Math students. *Recommended preparation:* MATH 040x or math placement exam.

MATH 116 Mathematics for the Social Sciences (4, FaSp) Finite mathematics with application to the social sciences; elementary set theory and logic; counting techniques; probability; statistics; matrices and systems of linear equations. Selected topics.

MATH 117g Introduction to Mathematics for Business and Economics (4, FaSp) Functions, graphs, polynomial and rational functions, exponential and logarithmic functions, matrices, systems of linear equations. *Prerequisite:* MATH 040x or math placement exam.

MATH 118gx Fundamental Principles of Calculus (4, FaSp) Derivatives; extrema. Definite integral; fundamental theorem of calculus. Extrema and definite integrals for functions of several variables. Not available for credit toward a degree in mathematics. *Prerequisite:* MATH 108 or MATH 117 or placement exam in MATH.

MATH 125g Calculus I (4, FaSpSm) Limits; continuity, derivatives and applications; antiderivatives; the fundamental theorem of calculus; exponential and logarithmic functions. *Prerequisite:* MATH 108 or math placement exam.

MATH 126 Calculus II (4, FaSpSm) A continuation of MATH 125: trigonometric functions; applications of integration; techniques of integration; indeterminate forms; infinite series; Taylor series; polar coordinates. *Prerequisite:* MATH 125.

MATH 127 Enhanced Calculus II (4, FaSp) Applications of integration, review of techniques of integration, infinite sequences and series, some beginning linear algebra, ordinary differential equations. Designed for students who earn a score of 4 or 5 on the Advanced Placement Calculus AB Examination, or a score of 3 or 4 on the BC Examination. Admission to course by departmental approval. (Duplicates credit in MATH 126.)

MATH 200 Elementary Mathematics from an Advanced Standpoint (4, FaSp) An explication of arithmetic and geometry, including the algebraic operations, number bases, plane and solid figures; and coordinate geometry. *Prerequisite:* MATH 040x or math placement exam.

MATH 208x Elementary Probability and Statistics (4, FaSp) Descriptive statistics, probability, discrete and continuous random variables, expectation and variance, sampling, Central Limit Theorem, estimation, hypothesis testing, correlation and regression. Emphasis on health science. *Prerequisite:* MATH 118x or MATH 125.

MATH 218 Probability for Business (4, FaSpSm) Basic probability, discrete and continuous distributions, expectation and variance, independence. Sampling, estimation, confidence intervals, hypothesis testing. *Prerequisite:* MATH 118x or MATH 125.

MATH 225 Linear Algebra and Linear Differential Equations (4, FaSp) Matrices, systems of linear equations, vector spaces, linear transformations, eigenvalues, systems of linear differential equations. *Prerequisite:* MATH 126 or MATH 127.

MATH 226 Calculus III (4, FaSp) A continuation of 126; vectors, vector valued functions; differential and integral calculus of functions of several variables; Green's theorem. *Prerequisite:* MATH 126 or MATH 127.

MATH 227 Enhanced Calculus III (4, FaSp) A continuation of MATH 127; vectors and vector spaces

functions of several variables, partial differential equations, optimization theory, multiple integration; Green's Stokes', divergence theorems. (Duplicates credit in MATH 226.)

MATH 229 Calculus III for Engineers and Scientists (4, FaSpSm) A continuation of MATH 129; vectors, vector valued functions; differential and integral calculus of functions of several variables; Green's theorem. Engineering and physics applications. *Prerequisite:* MATH 125, or MATH 127, or MATH 129. (Duplicates credit in MATH 226 and MATH 227.)

MATH 245 Mathematics of Physics and Engineering I (4, FaSp) First-order differential equations; second-order linear differential equations; determinants and matrices; systems of linear differential equations; Laplace transforms. *Prerequisite:* MATH 226 or MATH 227.

MATH 265 Mathematical and Computational Methods for Neuroscience (4, FaSp) Differential calculus of multivariable functions, optimization, elementary linear algebra and matrix theory, principal component analysis, elementary differential equations, systems, qualitative theory, numerical methods, scientific computation. *Prerequisite:* MATH 125; *recommended preparation:* MATH 126 or MATH 127 or equivalent or AP credit for Calculus BC.

MATH 307 Statistical Inference and Data Analysis I (4, Fa) Probability, counting, independence, distributions, random variables, simulation, expectation, variance, covariance, transformations, law of large numbers, Central limit theorem, estimation, efficiency, maximum likelihood, Cramer-Rao bound, bootstrap. *Prerequisite:* MATH 118 or MATH 125 or MATH 126.

MATH 308 Statistical Inference and Data Analysis II (4, Sp) Confidence intervals, hypothesis testing, p-values, likelihood ratio, nonparametrics, descriptive statistics, regression, multiple linear regression, experimental design, analysis of variance, categorical data, chi-squared tests, Bayesian statistics. *Prerequisite:* MATH 307.

MATH 370 Applied Algebra (4, Sp) Induction, Euclidean algorithm, factorization, congruence classes, Rings, RSA algorithm, Chinese remainder theorem, codes, polynomials, fundamental theorem of algebra, polynomial multiplication, Fourier transform, and other topics. *Prerequisite:* MATH 226 or MATH 227, and MATH 225 or MATH 245.

MATH 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

MATH 395 Seminar in Problem Solving (2, max 8, FaSp) Systematic approach to solving non-standard and competition level math problems on inequalities, infinite sums and products, combinatorics, number theory, and games. *Recommended preparation:* MATH 126 or MATH 127.

MATH 400 Foundations of Discrete Mathematics (4, Fa) Methods of proof, predicate calculus, set theory, order and equivalence relations, partitions, lattices, functions, cardinality, elementary number theory and combinatorics. *Prerequisite:* MATH 225 or MATH 226 or MATH 227.

MATH 407 Probability Theory (4, FaSp) Probability spaces, discrete and continuous distributions, moments, characteristic functions, sequences of random variables, laws of large numbers, central limit theorem, special probability laws. *Prerequisite:* MATH 226 or MATH 227.

MATH 408 Mathematical Statistics (4, Sp) Principles for testing hypotheses and estimation, small sample distributions, correlation and regression, nonparametric methods, elements of statistical decision theory. *Prerequisite:* MATH 407.

MATH 410 Fundamental Concepts of Modern Algebra (4, FaSp) Sets; relations; groups; homomorphisms; symmetric groups; Abelian groups; Sylow's theorems; introduction to rings and fields. Not open to students with credit in MATH 470. *Prerequisite:* MATH 225; *recommended preparation:* One 400-level Mathematics course, excluding MATH 450.

MATH 425ab Fundamental Concepts of Analysis (a: 4, FaSp; b: 4, Sp) *a:* The real number system,

metric spaces, limits, continuity, derivatives and integrals, infinite series. *b*: Implicit function theorems, Jacobians, transformations, multiple integrals, line integrals. *Prerequisite*: MATH 226 or MATH 227; *recommended preparation*: one 400-level Mathematics course, excluding MATH 450.

MATH 430 Theory of Numbers (4, Fa) Introduction to the theory of numbers, including prime factorization, congruences, primitive roots, N-th power residues, number theoretic functions, and certain diophantine equations. *Prerequisite*: MATH 126 or MATH 127.

MATH 432 Applied Combinatorics (4, Sp) Mathematical induction, counting principles, arrangements, selections, binomial coefficients, generating functions, recurrence relations, inclusion-exclusion, symmetric groups, graphs, Euler and Hamiltonian circuits, trees, graph algorithms; applications. *Prerequisite*: MATH 225 or MATH 226 or MATH 227.

MATH 434 Geometry and Transformations (4, Fa) The Euclidean plane and its isometries. Models for the hyperbolic metric, isometries, linear fractional maps, geodesics. Gluing constructions. Knot theory and invariants. *Prerequisite*: MATH 226 or MATH 227.

MATH 435 Vector Analysis and Introduction to Differential Geometry (4, Sp) Vectors, elements of vector analysis, applications to curves and surfaces, standard material of differential geometry. *Prerequisite*: MATH 226 or MATH 227.

MATH 440 Topology (4, Fa) Cardinals, topologies, separation axioms. Compactness, metrizability, function spaces; completeness; Jordan curve theorem. *Recommended preparation*: upper-division MATH course.

MATH 445 Mathematics of Physics and Engineering II (4, FaSp) Vector field theory; theorems of Gauss, Green, and Stokes; Fourier series and integrals; complex variables; linear partial differential equations; series solutions of ordinary differential equations. *Prerequisite*: MATH 245.

MATH 450 History of Mathematics (4, Sp) Evolution of mathematical ideas and techniques as seen through a study of the contributions of eminent mathematicians to the formulation and solution of celebrated problems. *Prerequisite*: MATH 225 or MATH 245; *recommended preparation*: upper-division MATH course.

MATH 458 Numerical Methods (4, Fa) Rounding errors in digital computation; solution of linear algebraic systems; Newton's method for nonlinear systems; matrix eigenvalues; polynomial approximation; numerical integration; numerical solution of ordinary differential equations. *Prerequisite*: MATH 225 or MATH 245.

MATH 465 Nonlinear Dynamics in Science and Engineering (4, Sp) Nonlinear models, bifurcations, discrete and continuous dynamics, stability, dissipative and reversible systems, Poincare maps, Lyapunov exponents, fractal dimension. Applications stressed: Economics, Engineering, Biology, Physics. *Prerequisite*: MATH 225 or MATH 245.

MATH 466 Dynamic Modeling (4, Fa) Formulation and study of models arising in population dynamics, growth of plankton, pollution in rivers, highway traffic, morphogenesis and tidal dynamics: stability, oscillations, bifurcations, chaos. The lab will consist of computer simulation of models using commercially available software. *Prerequisite*: MATH 225 or MATH 245.

MATH 467 Theory and Computational Methods for Optimization (4, Fa) Methods for static, dynamic, unconstrained, constrained optimization. Gradient, conjugate gradient, penalty methods. Lagrange multipliers, least squares, linear, nonlinear dynamic programming. Application to control and estimation. *Prerequisite*: MATH 226 or MATH 227; MATH 225 or MATH 245.

MATH 471 Topics in Linear Algebra (4, Sp) Polynomial rings, vector spaces, linear transformations, canonical forms, inner product spaces. *Prerequisite*: MATH 225; *recommended preparation*: MATH 410.

MATH 475 Introduction to Theory of Complex Variables (4, Sp) Limits and infinite series; line integrals; conformal mapping; single-valued functions of a complex variable; applications. Primarily for advanced students in engineering. *Prerequisite*: MATH 226 or MATH 227.

MATH 490x Directed Research (1–8, max 12, FaSpSm) Individual research and readings. Not available

for graduate credit.

MATH 499 Special Topics (2–4, max 8) Lectures on advanced material not covered in regularly scheduled courses. No more than two registrations allowed.

MATH 500 Graduate Colloquium (2) Lectures directed to mathematics graduate students by faculty of the department and by outside speakers. Problem solving workshops. Graded CR/NC.

MATH 501 Numerical Analysis and Computation (3, Sp) Linear equations and matrices, Gauss elimination, error estimates, iteration techniques; contractive mappings, Newton's method; matrix eigenvalue problems; least-squares approximation, Newton-Cotes and Gaussian quadratures; finite difference methods. *Prerequisite:* linear algebra and calculus.

MATH 502ab Numerical Analysis (a: 3, Fa; b: 3, Sp) Computational linear algebra; solution of general nonlinear systems of equations; approximation theory using functional analysis; numerical solution of ordinary and partial differential equations. *Prerequisite:* MATH 425a and MATH 471.

MATH 504ab Numerical Solution of Ordinary and Partial Differential Equations (a: 3, Sp; b: 3, Fa) *a:* Initial value problems; multistep methods, stability, convergence and error estimation, automatic stepsize control, higher order methods, systems of equations, stiff problems; boundary value problems; eigenproblems. *Prerequisite:* MATH 501 or MATH 502a. *b:* Computationally efficient schemes for solving PDE numerically; stability and convergence of difference schemes, method of lines; fast direct and iterative methods for elliptic equations. *Prerequisite:* MATH 501 or MATH 502a.

MATH 505ab Applied Probability (a: 3, Fa; b: 3, Sp) *a:* Populations, permutations, combinations, random variables, distribution and density functions conditional probability and expectation, binomial, Poisson, and normal distributions; laws of large numbers, central limit theorem. *b:* Markov processes in discrete or continuous time; renewal processes; martingales; Brownian motion and diffusion theory; random walks, inventory models, population growth, queuing models, shot noise.

MATH 507ab Theory of Probability (a: 3, Fa; b: 3, Sp) *a:* Probability spaces; distributions and characteristic functions; laws of large numbers, central limit problems; stable and infinitely divisible laws; conditional distributions. *Prerequisite:* MATH 525a or MATH 570. *b:* Dependence, martingales, ergodic theorems, second-order random functions, harmonic analysis, Markov processes.

MATH 508 Filtering Theory (3) Theory of random differential equations and stochastic stability; optimum linear and nonlinear filtering, with discussion of asymptotic behavior of filter. *Prerequisite:* MATH 507a.

MATH 509 Stochastic Differential Equations (3) Brownian motion, stochastic integrals, the Ito formula, stochastic differential equations, analysis of diffusion processes, Girsanov transformation, Feynmann-Kac formula, applications. *Prerequisite:* MATH 505ab or MATH 507ab.

MATH 510ab Algebra (a: 3, Fa; b: 3, Sp) *a:* Group Theory: Isomorphism theorems, group actions, Sylow's theorems, simple and solvable groups; Field Theory: Galois correspondence, radical extensions, algebraic and transcendental extensions, finite fields. *b:* Commutative Algebra: Integrality, Hilbert Basis theorem, Hilbert Nullstellensatz; Modules: modules over PIDs, chain conditions, tensor products; Noncommutative Rings: Jacobson radical, Artin-Wedderburn theorem, Maschke's theorem. *Prerequisite:* MATH 410, MATH 471.

MATH 511abL Data Analysis (4-4) (Enroll in PM 511abL)

MATH 512 Financial Informatics and Simulation (Computer Labs and Practitioner Seminar) (3, FaSp) Experimental laboratory trading for financial markets using double auctions: handling statistical packages for data analysis. Practical training in virtual market environments, using financial trading system software.

MATH 520 Complex Analysis (3, Sp) Theory of analytic functions — power series and integral representations, calculus of residues, harmonic functions, normal families, approximation theorems, conformal mapping, analytical continuation. *Prerequisite:* MATH 425ab.

MATH 525ab Real Analysis (a: 3, Fa; b: 3, Sp) *a*: Measure and integration over abstract measure spaces, Radon-Nikodym theorem, Fubini's theorem, convergence theorems, differentiation. *Prerequisite*: MATH 425ab. *b*: Metric spaces, contraction principle, category, Banach spaces, Riesz representation theorem, properties of L_p Hilbert spaces, orthogonal expansions, Fourier series and transforms, convolutions. *Prerequisite*: MATH 525a.

MATH 530ab Stochastic Calculus and Mathematical Finance (a: 3, b: 3, Sp) *a*: Stochastic processes revisited, Brownian motion, Martingale theory, stochastic differential equations, Feynman-Kac formula, binomial models, basic concepts in arbitrage pricing theory, equivalent Martingale measure. (Duplicates credit in the former MATH 503.) *Recommended preparation*: MATH 225, MATH 407; *b*: Advanced topics in stochastic analysis, asset pricing in continuous time, stochastic control, Hamilton-Jacobi-Bellman equations, incomplete markets, American options, exotic options, term structure of interest rates. (Duplicates credit in the former MATH 506.)

MATH 532 Combinatorial Analysis (3, Fa) Inversion formulas, generating functions and recursions, partitions, Stirling numbers, distinct representatives, Ramsey's theorem, graph theory, block designs, difference sets, finite geometries, Latin squares, Hadamard matrices.

MATH 533 Combinatorial Analysis and Algebra (3, Sp) Advanced group theory; algebraic automata theory; graph theory; topics in combinatorial analysis.

MATH 535ab Differential Geometry (a: 3, Fa; b: 3, Sp) Elementary theory of manifolds, Lie groups, homogeneous spaces, fiber bundles and connections. Riemannian manifolds, curvature and conjugate points, second fundamental form, other topics. *Prerequisite*: MATH 440.

MATH 540 Topology (3, Sp) Initial and final topologies, function spaces, algebras in $C(Y)$, homotopy, fundamental group, fiber spaces and bundles, smashes, loop spaces, groups of homotopy classes, cw-complexes. *Prerequisite*: MATH 440.

MATH 541ab Introduction to Mathematical Statistics (a: 3, Sp; b: 3, Fa) *a*: Parametric families of distributions, sufficiency. Estimation: methods of moments, maximum likelihood, unbiased estimation. Comparison of estimators, optimality, information inequality, asymptotic efficiency. EM algorithm, jackknife and bootstrap. *Prerequisite*: MATH 505a or MATH 407 or MATH 408. *b*: Hypothesis testing, Neyman-Pearson lemma, generalized likelihood ratio procedures, confidence intervals, consistency, power, jackknife and bootstrap. Monte Carlo Markov chain methods, hidden Markov models. *Prerequisite*: MATH 541a.

MATH 542L Analysis of Variance and Design (3, Sp) Least squares estimation in the linear model, analysis of variance and covariance, F-test, multiple comparisons, multiple regression, selection of variables; introduction to experimental design. Includes laboratory. *Prerequisite*: MATH 225, MATH 226, and MATH 208x.

MATH 543L Nonparametric Statistics (3) Distribution-free methods for comparisons of two or more samples, tests of randomness, independence, goodness of fit; classification, regression. Comparison with parametric techniques. Includes laboratory. *Prerequisite*: MATH 226, MATH 208x.

MATH 544L Multivariate Analysis (3) (Enroll in PM 544L)

MATH 545L Introduction to Time Series (3, Fa) Transfer function models; stationary, nonstationary processes; moving average, autoregressive models; spectral analysis; estimation of mean, autocorrelation, spectrum; seasonal time series. Includes laboratory. *Prerequisite*: MATH 225, MATH 226, and MATH 208x.

MATH 547 Methods of Statistical Inference (3, Fa) Statistical decision theory: game theory, loss and risk functions; Bayes, minimax, admissible rules; sufficiency, invariance, tests of hypotheses, optimality properties. Inference for stochastic processes. *Prerequisite*: MATH 407 or MATH 408.

MATH 548 Sequential Analysis (3) Sequential decision procedures: sequential probability-ratio tests, operating characteristic, expected sample size, two-stage procedures, optimal stopping, martingales, Markov processes; applications to gambling, industrial inspection. *Prerequisite*: MATH 407 or MATH 408.

MATH 550 Sample Surveys (3, Sp) Theory of sampling and design of sample surveys; bias and precision; finite populations; stratification; cluster sampling; multistage, systematic sampling; non-sampling errors. *Prerequisite:* MATH 208x.

MATH 555ab Partial Differential Equations (a: 3, Fa; b: 3, Sp) Second-order partial differential equations of elliptic, parabolic, and hyperbolic type; in particular, potential and wave equations. *Prerequisite:* MATH 425ab.

MATH 565ab Ordinary Differential Equations (a: 3, Fa; b: 3, Sp) Existence, uniqueness and continuation of solutions, differential inequalities, linear systems, Sturm-Liouville theory, boundary value problems, Poincare-Bendixson theory, periodic solutions, perturbations, stability, fixed point techniques. *Prerequisite:* MATH 425ab.

MATH 570ab Methods of Applied Mathematics (a: 3, Fa; b: 3, Sp) *a:* Metric spaces, compactness, completion, fixed-point theorems, abstract spaces, linear operators, functionals, duality, conjugates, L_p spaces, Fourier transform. Applications from Engineering, Natural and Social sciences. *Recommended preparation:* Linear Algebra and Calculus. *b:* Measure theory, convergence, Lebesgue spaces, Riesz's theorem, Integration theorems, compact and self-adjoint operators, spectral theory, resolution of the identity, differential operators, quantum mechanics.

MATH 572 Applied Algebraic Structures (3, Fa) Elementary predicate logic, model theory, axiomatic set theory; relations, functions, equivalences; algebraic and relational structures; graph theory; applications of lattices, Boolean algebras; groups, rings, field.

MATH 574 Applied Matrix Analysis (3, Fa) Equivalence of matrices; Jordan canonical form; functions of matrices; diagonalization; singular value decomposition; applications to linear differential equations, stability theory, and Markov processes.

MATH 576 Applied Complex Analysis and Integral Transforms (3, Fa) Review of basic complex analysis; integral transforms of Laplace, Fourier, Mellin, and Hankel; applications to solutions of ordinary and partial differential equations; Wiener-Hopf technique. *Prerequisite:* MATH 475 or MATH 520.

MATH 577ab Computational Molecular Biology Laboratory (a: 2, Sp; b: 2, Fa) (Enroll in BISC 577ab)

MATH 578ab Computational Molecular Biology (3-3, FaSp) Applications of the mathematical, statistical and computational sciences to data from molecular biology. *a:* Algorithms for genomic sequence data: sequence and map assembly and alignment, RNA secondary structure, protein structure, gene-finding, and tree construction. *Prerequisite:* CSCI 570; *recommended preparation:* familiarity with the concepts of basic molecular biology as covered in BISC 320. *b:* Statistics for genomic sequence data: DNA sequence assembly, significance of alignment scores, hidden Markov models, genetic mapping, models of sequence evolution, and microarray analysis. *Prerequisite:* MATH 505a, MATH 541a.

MATH 580 Introduction to Functional Analysis (3) Basic functional analysis in Banach and Hilbert spaces. Weak topologies, linear operators, spectral theory, calculus of vector-valued functions. Banach algebras. *Prerequisite:* MATH 525ab.

MATH 585 Mathematical Theory of Optimal Control (3, Fa) Deterministic control: calculus of variations; optimal control; Pontryagin principle; multiplier rules and abstract nonlinear programming; existence and continuity of controls; problem of Mayer; dynamic programming. *Prerequisite:* MATH 570 and MATH 525a.

MATH 590 Directed Research (1–12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MATH 592 Computational Molecular Biology Internship (3) Industrial or genome-centered internship for students in the Computational Molecular Biology master's program. Real-world experience in applications. Open to M.S., Computational Molecular Biology students only.

MATH 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

MATH 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

MATH 595 Practicum in Teaching the Liberal Arts: Mathematics (2, FaSp) Practical principles for the long-term development of effective teaching within college disciplines. Intended for teaching assistants in Dornsife College. Graded CR/NC.

MATH 599 Special Topics (2-4, max 8, FaSpSm) Course content will be selected each semester to reflect current trends and developments in the field of mathematics.

MATH 600 Topics in Numerical Analysis (3, max 12)

MATH 601 Optimization Theory and Techniques (3, SpSm) Necessary and sufficient conditions for existence of extrema with equality constraints; gradient methods; Ritz methods; eigenvalue problems; optimum control problems; inequality constraints; mathematical programming. *Prerequisite:* MATH 502ab.

MATH 602 Galerkin Approximation Methods in Partial Differential Equations (3) Galerkin methods of approximating solutions of elliptic boundary value problems in one and several dimensions; includes the use of spline functions and triangularizations.

MATH 605 Topics in Probability (3, max 12)

MATH 606 Topics in Stochastic Processes (3, max 12, FaSpSm) Theoretic and applied topics of current interest in discrete and continuous time stochastic processes and in stochastic differential equations. *Recommended preparation:* graduate level course in probability theory or stochastic processes.

MATH 610 Topics in Algebra (3, max 12)

MATH 612 Topics in Commutative Ring Theory (3, max 12) Localization, structure of Noetherian rings, integral extensions, valuation theory, graded rings, characteristic functions, local algebra, dimension theory. *Prerequisite:* MATH 510ab.

MATH 613 Topics in Noncommutative Ring Theory (3, max 12) Jacobson radical, nil radical, nil rings and nil-potence, chain conditions, polynomial identity and group rings. Goldie theorems, current research. *Prerequisite:* MATH 510ab.

MATH 620 Topics in Complex Analysis (3, max 12)

MATH 625 Topics in Real Analysis (3, max 12)

MATH 630 Topics in Number Theory (3, max 12)

MATH 635 Topics in Differential Geometry (3, max 12) Topics to be chosen from the following: geometry of complex manifolds, relations between topology and curvature, homogeneous spaces, symmetric spaces, geometry of submanifolds. *Prerequisite:* MATH 535ab.

MATH 641 Topics in Topology (3, max 12)

MATH 650 Seminar in Statistical Consulting (3)

MATH 655 Topics in Partial Differential Equations (3, max 12, FaSpSm) Topics to be chosen from the following: Elliptic, Parabolic, Hyperbolic, and Dispersive PDEs, Conservation Laws, Mathematical Fluid Dynamics and Variational Methods. *Prerequisite:* MATH 525a; *recommended preparation:* MATH 555a.

MATH 665 Topics in Ordinary Differential Equations (3, max 12)

MATH 680 Nonlinear Functional Analysis (3) Calculus in Banach spaces, degree theory, fixed point theorems. Study of compact, monotone, accretive and nonexpansive operators. *Prerequisite:* MATH 580.

MATH 681 Selected Topics in Functional Analysis (3, max 12) Course content will vary with professor and academic year offered. It will include topics of current interest in both linear and nonlinear functional analysis and their applications.

MATH 685 Topics in Mathematical Control Theory (3, max 12)

MATH 689 Topics in Mathematical Physics (3, max 12)

MATH 700 Seminar in Numerical Analysis (3)

MATH 705 Seminar in Probability (3)

MATH 710 Seminar in Algebra (3)

MATH 725 Seminar in Analysis (3)

MATH 730 Seminar in Number Theory (3)

MATH 735 Seminar in Differential Geometry (3)

MATH 740 Seminar in Topology (3)

MATH 761 Seminar in Programming and Computability (3)

MATH 765 Seminar in Ordinary Differential Equations (3)

MATH 780 Seminar in Functional Analysis (3)

MATH 790 Research (1–12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

MATH 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Chair: Laurie A. Brand, Ph.D.

Faculty

Robert Grandford Wright Professor and Professor of International Relations and Middle East Studies: Laurie A. Brand, Ph.D. (International Relations)

Professor: Azade-Ayse Rorlich, Ph.D. (History)

Associate Professor: Ramzi Rouighi, Ph.D. (History)

Assistant Professor: Olivia Harrison, Ph.D. (French and Italian)

Lecturers: Hani Khafipour, Ph.D.; Suzan Wali

Associated Faculty

John Elliott Chair in Economics: M. Hashem Pesaran, Ph.D. (*Economics*)

Professors: Richard Dekmejian, Ph.D. (*Political Science*); Jeffrey B. Nugent, Ph.D. (*Economics and Business*); Bruce Zuckerman, Ph.D. (*Religion*)

Associate Professor: Sarah Gulatieri, Ph.D. (*History and American Studies and Ethnicity*)

Assistant Professor: Christelle Fischer-Bovet, Ph.D. (*Classics*)

Associate Professor of the Practice: Lynn Swartz Dodd, Ph.D. (*Religion*)

Assistant Professor (Teaching): Peyman Nojournian, Ph.D.

Lecturers: Fayez Hammad, Ph.D. (*Political Science*); Rym Kaki, Ph.D. (*Public Policy*)

Bachelor of Arts in Middle East Studies

This major is an interdisciplinary degree which draws on courses from anthropology, classics, economics, history, international relations, Judaic studies, linguistics, political science and religion. It offers students interested in exploring the richness and complexity of the Middle East, broadly defined as extending from Morocco through Iran, a framework for developing both expertise and wide-ranging critical perspectives on the region's past, present and future. The variety of courses will allow students to tailor their choices to a range of possible emphases. Two options are also available regarding language study. The first, which is strongly recommended for all students, but especially for those who seek to pursue a career using Middle East studies, stresses the importance of a regional language (at this point, Arabic, Hebrew or Persian), along with other disciplinary offerings. The second allows students to gain an in-depth understanding of the region, but without the requirement of a regional language.

Requirements for the degree are: HIST 180 (an introductory survey course) which is a prerequisite for the major. Students must also take: a) seven more courses, six of which must be upper-division courses, chosen from MDES courses or from the list below; b) an eighth course, which may be either an upper-division course from the MDES courses or from the list below or the fourth semester of Arabic or Hebrew for those studying a regional language.

No more than two courses may be counted toward this major and another major.

REQUIRED COURSES

	UNITS	
HIST 180	The Middle East	4

Seven of the following courses, six of which must be upper-division courses:

ANTH 327	Anthropology of the Middle East and Islam	4
ANTH 335	Comparative Muslim Societies	4
CLAS 360	Classical Arabic Literature in Translation	4
ECON 322	Economic History and Modernization of the Middle East	4
ECON 342	Economic Development of the Middle East	4
HEBR 315	Biblical Hebrew Literature (Hebrew IV)	4
HIST 275	The Worlds of the Silk Road	4
HIST 324	Islam in Russia and the Soviet Union	4
HIST 383	The Modern Middle East	4
HIST 384	Popular Culture in the Middle East	4
HIST 480	Seminar in Middle East History	4, max 8

JS 361	Scripture and Polemic in Judaism, Christianity and Islam	4
LING 295	The Ancient Near East: Culture, Archaeology, Texts	4

MDES 252*	Arabic IV	4
POSC 351	Middle East Politics	4
REL 315	Thought and Life of Islam	4
REL 317	The Bible in Its Ancient Context	4
REL 394	Archaeology of Egypt and the Near East	4
REL 494	Lab Methods and Theories in Archeology	4

*Counts as an upper-division course

Students majoring in Middle East studies are strongly encouraged to study in the Middle East in one of USC's study abroad programs. USC currently has programs at the American University in Cairo, the Hebrew University (Jerusalem) and Tel Aviv University.

Unlike the other majors offered through the School of International Relations, advisement for the Middle East major is through the Dornsife College Advising Office.

Minor in Iranian Studies

The Iranian Studies minor provides students with the foundation for an advanced understanding of Iran, its history, peoples and cultures, from antiquity to the present. Neighboring countries that participated in Persian culture are included, as well as non-Persian Iranian peoples such as the Kurds and Pashtuns. Students finishing this minor will also have at least an intermediate ability in Persian, the official language of Iran, widely used in neighboring countries as well.

The Middle East Studies Program offers a minor in Iranian Studies for students majoring in other disciplines.

REQUIRED COURSES, LOWER DIVISION		UNITS
MDES 120	Persian I	4
MDES 150	Persian II	4
MDES 220	Persian III	4
MDES 250	Persian IV	4
Some or all of these may be waived by placement examination.		

REQUIRED COURSES, UPPER DIVISION		UNITS
Four courses (16 units) from the following:		
MDES 312	Shadow of God on Earth: Religion/Politics in Medieval Persia	4
MDES 313	Modern Iran: Fall of Monarchies and Rise of Islamic Republic	4
MDES 320	Advanced Persian I	4
MDES 324	Classical Persian Literature in Translation	4
MDES 325	Modern Persian Literature in Translation	4
MDES 350	Advanced Persian II	4
MDES 461	Topics in Ancient Iranian Languages and Cultures	4

One of these four may alternatively be chosen from the following list of upper-division courses that cover material relevant to Iran or which situate an aspect of Iran in a broader context.

ANTH 335	Comparative Muslim Societies	4
CLAS 360	Classical Arabic Literature in Translation [covers period 500–1500]	4
HIST 324	Islam in Russia and the Soviet Union	4
HIST 382	The Middle East, 500–1500	4
POSC 351	Middle East Politics	4

REL 315	Thought and Life of Islam	4
REL 316	Women and the Islamic Tradition	4
REL 414	History of Islamic Law	4

Minor in Middle East Studies

Drawing on courses from nine different departments, this interdisciplinary minor offers students interested in exploring the richness and complexity of the Middle East, broadly defined as extending from Morocco through Iran, a framework for developing a basic but solid understanding of the region. Students may select courses that provide a broad introduction across disciplines, or they may choose courses that address a particular historical period or theme.

Twenty units (five courses) are required. All students must take HIST 180. To complete the minor a student must also take four upper-division courses from the list below from at least three departments. Students who are also studying Arabic may substitute MDES 252 Arabic IV for one of the four upper-division courses. However there is no language requirement for the minor.

REQUIRED COURSES		UNITS
HIST 180	The Middle East	4

Four of the following courses:

ANTH 327	Anthropology of the Middle East and Islam	4
ANTH 335	Comparative Muslim Societies	4
CLAS 360	Classical Arabic Literature in Translation	4
ECON 322	Economic History and Modernization of the Middle East	4
ECON 342	Economic Development of the Middle East	4
HEBR 315	Biblical Hebrew Literature (Hebrew IV)	4
HIST 324	Islam in Russia and the Soviet Union	4
HIST 382	The Middle East, 500–1500	4
HIST 384	Popular Culture in the Middle East	4
HIST 480	Seminar in Middle East History	4, max 8
IR 362	The International Relations of the Contemporary Middle East	4
IR 363	Middle East Political Economy	4
JS 361	Scripture and Polemic in Judaism, Christianity and Islam	4
JS 465	Medieval Jewish Philosophy	4
MDES 252	Arabic IV	4
POSC 351	Middle East Politics	4
REL 315	Thought and Life of Islam	4
REL 317	The Bible in Its Ancient Context	4
REL 394	Archaeology of Egypt and the Near East	4
REL 494	Advanced Near Eastern and Mediterranean Archaeology	4

Unlike the other minors offered through the School of International Relations, advisement for the Middle East minor is done through the Dornsife College Advising Office.

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ARABIC (ARAB)

ARAB 122 Arabic I (4, FaSpSm) Introduction to Modern Standard Arabic: Development of speaking, listening, reading, and writing skills in contemporary cultural contexts. (Duplicates credit in former MDES 122.)

ARAB 152 Arabic II (4, FaSp) Continuation of Arabic I. *Prerequisite:* ARAB 122. (Duplicates credit in former MDES 152.)

ARAB 222 Arabic III (4, FaSp) Intermediate Modern Standard Arabic. Continued development of speaking, listening, reading, and writing skills. *Prerequisite:* ARAB 152. (Duplicates credit in former MDES 222.)

ARAB 252 Arabic IV (4, FaSp) Continuation of Arabic III. Continued development of speaking, listening, reading, and writing skills in Modern Standard Arabic. *Prerequisite:* ARAB 222. (Duplicates credit in former MDES 252.)

ARAB 322 Advanced Arabic I (4) Advanced expression in written and spoken Arabic, including reading of original texts, understanding different registers, and exposure to modern Arabic cultures. *Prerequisite:* ARAB 252. (Duplicates credit in former MDES 322.)

ARAB 333 Colloquial Arabic: Regional Dialects (4, max 16) Introduction to a regional Arabic dialect, focusing primarily on verbal skills. *Prerequisite:* ARAB 152; *recommended preparation:* ARAB 222, ARAB 252. (Duplicates credit in former MDES 333.)

ARAB 334 Media Arabic (4, FaSp) Introduction and development of language skills encountered in print and broadcast media Arabic. *Prerequisite:* ARAB 222. (Duplicates credit in former MDES 334.)

ARAB 352 Advanced Arabic II (4, FaSp) Continuation of Advanced Arabic I. *Prerequisite:* ARAB 322. (Duplicates credit in former MDES 352.)

MIDDLE EAST STUDIES (MDES)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MDES 180g The Middle East (4, FaSpSm) (Enroll in HIST 180g)

MDES 312 Shadow of God on Earth: Religion/Politics in Medieval Persia (4, FaSp) Political and dynastic history of Iran from the Arab conquest in the 7th to the 18th century.

MDES 313 Modern Iran: Fall of Monarchies and Rise of Islamic Republic (4, FaSpSm) History and culture of modern Iran from the nineteenth century to present through historical and ethnographic approaches to Iran today, richly contextualizing events and people.

MDES 324 Classical Persian Literature in Translation (4, FaSp) Introduction to literary culture of pre-modern Persia, from about 800–1800 AD. Emphasis on poetry, the most extensive, prestigious, and influential medium of Persian literature.

MDES 325 Modern Persian Literature in Translation (4, FaSp) Modern Persian literature, covering the 19th, 20th, and 21st centuries, including the rise of diasporic literature in Persian. Includes poetry, but focused primarily on prose.

MDES 349g Ancient Empires (4, FaSpSm) (Enroll in CLAS 349g)

MDES 362 The International Relations of the Contemporary Middle East (4, Fa) (Enroll in IR 362)

MDES 363 Middle East Political Economy (4, Sp) (Enroll in IR 363)

MDES 378 Ptolemaic Egypt (4) (Enroll in CLAS 378)

MDES 382 The Middle East, 500–1500 (4) (Enroll in HIST 382)

MDES 383 The Modern Middle East (4, Sp) (Enroll in HIST 383)

MDES 384 Popular Culture in the Middle East (4, FaSpSm) (Enroll in HIST 384)

MDES 394 Archaeology of Egypt and the Near East (4) (Enroll in REL 394)

MDES 402 Cultural Heritage, Religion, and Politics in the Middle East (4, Fa) (Enroll in REL 402)

MDES 448m Islam in France (4, FaSp) (Enroll in FREN 448m)

MDES 454 Classical Arabic (4, max 20, FaSp) Introduction to reading and interpretation of pre-modern, classical Arabic, including literature from the 6th to 19th centuries. *Prerequisite:* MDES 252.

MDES 461 Topics in Ancient Iranian Languages and Cultures (4, max 20) Studies and readings in one or more pre-modern Iranian languages and their cultural and historical contexts. Specific topics vary; may be repeated for credit.

MDES 463 Islam and Arab Nationalism (4) (Enroll in IR 463)

MDES 464 U.S. Policy Towards the Middle East: 1950 to the Present (4) (Enroll in IR 464)

MDES 480 Seminar in Middle East History (4, max 8) (Enroll in HIST 480)

MDES 490x Directed Research (1–8, max 12, FaSpSm) Individual research and readings. Not for graduate credit.

MDES 492 Honors Thesis (4) Writing of the honors thesis; for students in the Middle East Studies Honors Program.

MDES 499 Special Topics (2–4, max 8, FaSpSm) Selected topics in Middle East studies.

PERSIAN (IRAN)

IRAN 120 Persian I (4) Introduction to contemporary Persian (Farsi). Oral practice, listening and reading comprehension, grammar and vocabulary necessary for simple spoken and written expression. (Duplicates credit in former MDES 120.)

IRAN 150 Persian II (4) Continuation of Persian I. *Prerequisite:* IRAN 120.

IRAN 220 Persian III (4) Intermediate Persian (Farsi). Building conversational skills, listening and reading comprehension, grammar and vocabulary necessary for intermediate level spoken and written expression. *Prerequisite:* IRAN 150. (Duplicates credit in former MDES 220.)

IRAN 250 Persian IV (4) Continuing Intermediate Persian (Farsi). Building conversational skills, listening and reading comprehension, grammar and vocabulary necessary for intermediate level spoken and written expression. *Prerequisite:* IRAN 120. (Duplicates credit in former MDES 250.)

IRAN 320 Advanced Persian I (4, FaSp) Advanced verbal and written expression in Persian, including deeper understanding of Persian culture. *Prerequisite:* IRAN 250. (Duplicates credit in former MDES 320.)

IRAN 350 Advanced Persian II (4, FaSp) Continuation of Advanced Persian I. *Prerequisite:* IRAN 320. (Duplicates credit in former MDES 350.)

Dornsife College of Letters, Arts and Sciences

Multidisciplinary Activities

Undergraduate Programs, USC Dornsife College

(213) 740-2961

Email: [✉ fliegel@dornsife.usc.edu](mailto:fliegel@dornsife.usc.edu)

Contact: Richard Fliegel, Ph.D.

Multidisciplinary Activities (MDA) courses are developed and taught by faculty from more than one program, department and/or school. These courses exist because of the college's interest in supporting interdisciplinary teaching and research. A student's transcript indicates enrollment in a multidisciplinary activities course.

Students who enroll in MDA courses share a common interest in the subject matter, but are not necessarily majors in those disciplines. These courses can be used as electives for certain degree requirements and, when indicated by the "g" suffix, for general education credit.

Collaborative Learning Projects (CLP) and Individual Programs of Study (IPOS)

See Learner Centered Curricula.

Courses of Instruction

MULTIDISCIPLINARY ACTIVITIES (MDA)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MDA 020 American Popular Culture (0, Sm) Introduction to the popular culture of the United States, including basic history, geography, literature and the arts, as understood by generally well-educated young Americans. Graded CR/NC.

MDA 100abcd Introduction to the Health Professions (1-1-1-1, FaSp) An introduction to the health professions, through lectures, discussions, clinical experiences, and visits to health care delivery sites; relationships with other clinicians and the community. Departmental approval required. Graded CR/NC.

MDA 101x Health Professions: Prospects and Preparation (1, Sp) Presentations by health professionals, introduced by faculty members from relevant academic units and followed by discussion with the speakers. Not available for degree credit. Graded CR/NC. *Recommended preparation:* BISC 120L or BISC 220L; CHEM 150aL.

MDA 105g Cultural Forms and Values I (4, FaSp) Norms and patterns of civilizations associated with the Greco-Roman and European traditions and the legacy of those traditions in North America.

MDA 110 Contemporary Issues and Cases in Health Care (2, FaSp) An introduction to the major areas of health care; the provider's relationship to choices in professional practice; ethics and historical context. (Duplicates credit in MDA 100abcd.) Graded CR/NC.

MDA 120 American Popular Culture (3, Sm) Introduction to the popular culture of the United States, including basic history, geography, literature and the arts, as understood by generally well-educated young Americans. Graded CR/NC.

MDA 125Lg Scientific Principles (4, FaSp) Fundamental principles underlying a body of scientific knowledge and their evolution; the nature of scientific inquiry; how scientific knowledge is obtained and evaluated. A field experience or practical component required.

MDA 140 Practicum in Multimedia Authorship (2, FaSp) Introduction to the expressive potential of multimedia as a critical and creative tool, supplementing traditional forms of academic work. Graded CR/NC.

MDA 155g Cultural Forms and Values II (4, FaSp) Cultural norms and patterns of civilizations associated with Africa, Asia, Latin America, the Middle East, Native America, and elsewhere, alternative to those of the Greco-Roman and European traditions.

MDA 165g Social Inquiry (4, FaSp) Analyses of compelling local, national, and/or international issues; analytical tools examined systematically in a broad range of social phenomena.

MDA 167g Marginal Groups in America (4, Fa) Sociological and historical analysis of marginal populations in American society, including racial and ethnic minorities, teenage mothers, drug abusers, criminals, and the mentally ill.

MDA 170g La Frontera: The U.S.-Mexico Borderlands (4) Provides student with a multidisciplinary understanding of the U.S./Mexico border region. Topics to be covered include: space and place, internationalization, physical environment, gender relations and culture.

MDA 175Lg Science and Technology (4, FaSp) The nature of science and technology, based on a focused study of a single area of research; scientific principles, their technological applications, and social significance.

MDA 200Lg The Cutting Edge: From Basic Science to the Marketplace (4, Sp) An introduction to the basic sciences of physics, chemistry, biology, and geology, examining the fundamental concepts, experimental approaches, and technological applications. Course will show the interrelationships among the fields and societal ramifications of these cutting edge technologies. (Duplicates credit in MDA 125L.)

MDA 205g Cities and Civilization (4, FaSp) Origins of cities, patterns of migration and resettlement, civic identities and the invention of public culture, from ancient Rome to contemporary Los Angeles.

MDA 250 Internship for Liberal Arts: Work and Career — Theory and Practice (1–2, max 4, FaSpSm) Students explore different understandings of work and career in American society while testing theories in an actual work setting.

MDA 260 Opportunities in the Global Marketplace (2-4, max 4, FaSp) Professional opportunities in a changing global system, preparing the successor generation for participation in the public, private, and citizen sectors of our global society. Graded CR/NC.

MDA 310 Peace and Conflict Studies (4, Sp) (Enroll in IR 310)

MDA 320 Global Ethics: Poverty, Health and the Human Condition (4, FaSp) Ethical challenges and moral obligations of the public and private sectors in global development, access to healthcare, and promotion of civil, political, and economic rights.

MDA 325 Case Studies in Modern Leadership (2 or 4, max 6, FaSp) Study of a single leader or small set of leaders, including the strengths and weaknesses that distinguish them and the cultural forces that nurture them.

MDA 330 The Armenian Heritage: History, Arts, and Culture (4, FaSp) A multidisciplinary exploration of the Armenian cultural heritage through the ages — folklore, traditions, religious practices, literature, architecture, painting, sculpture, music, theatre, film and dance.

MDA 333 Colloquium in Armenian Studies: Social and Cultural Issues (2, max 4, FaSpSm) Analysis of political, social, and cultural issues by the instructor and visiting lecturers with expertise in specific areas of the Armenian Republic and Diaspora community.

MDA 350 Community Health Scan (4, FaSpSm) The social context of health and its determinants; the uses of data analysis; community capacity building, and the impact of policy on community health improvement.

MDA 365 The Art and Adventure of Leadership (4, Sp) Areas of knowledge and kinds of competencies that are fundamental to the study and practice of leadership in a variety of settings.

MDA 399ab Team Research Communities (4-4, FaSp) Cross-disciplinary inquiry in the liberal arts. *a*: Research methodologies. *b*: Individual student and group projects contributing to the team's collaborative report.

MDA 450 Individual Program of Study (4–18, max 18, FaSpSm) An individual educational project

approved by a faculty committee, combining directed research with internships, service learning, artistic or literary production, and/or other relevant educational activities. Open only to students with sophomore, junior or senior standing.

MDA 460 Collaborative Learning Project (4–8, max 8, FaSpSm) A project approved by a faculty committee, requiring students to collaborate on research or an original work in the literary, plastic, or performing arts. Open only to students with sophomore, junior or senior standing. Graded CR/NC.

MDA 475 The Future of California (4) Challenges facing California; options for governmental and constitutional reform; opportunities for economic growth; demographic and cultural changes; education, environment, and other policy issues. *Recommended preparation:* junior or senior standing.

MDA 476 Policy Research on California (4, Sp) Research and proposed solutions concerning problems, policies, structural and constitutional challenges facing California. Open only to upper-division and master's students. *Prerequisite:* MDA 475.

MDA 490x Directed Research (1–8, max 12, FaSpSm) Individual research, reading, writing and project development.

MDA 494 Directed Creative Project (2–4, max 4, FaSpSm) Individual research, reading, writing and project development, guided by a faculty member with expertise in the area, who may be tenure-track or non-tenure-track. Open only to juniors and seniors.

MDA 495 Interdisciplinary Honors Seminar (2–4, max 4, Fa) The first part of an eight-unit sequence intended to award academic honors in a thematic area comparable to departmental honors in a single discipline. Open only to juniors and seniors.

MDA 496 Interdisciplinary Honors Thesis (4, Sp) The second part of an eight-unit sequence intended to award academic honors in a thematic area comparable to departmental honors in a single discipline. Open only to juniors and seniors. *Prerequisite:* MDA 495.

MDA 499 Special Topics (1-8, max 8) Selected topics in Multidisciplinary Activities.

MDA 501 Introduction to Visual Studies: Methods and Debates (4) A critical introduction to the field of visual studies focusing on interdisciplinary approaches to images, objects, and visual technologies as well as key texts and interpretive debates. Students must be enrolled in a Ph.D. program at USC.

MDA 593 Practicum in Teaching the Liberal Arts (2, FaSp) Practical principles for the long-term development of effective teaching within college disciplines. Intended for teaching assistants in Dornsife College. Graded CR/NC.

MDA 599 Special Topics (2–4, max 8, Fa) The multidisciplinary, team-taught seminar addresses issues at the intersection of literary, visual, and material culture. The faculty team and specific topics studied will change each time the course is offered.

Dornsife College of Letters, Arts and Sciences

Multimedia Scholarship

Honors in Multimedia Scholarship

This program offers qualified undergraduate students an opportunity to approach their discipline(s) of study through the critical application of multimedia expression and scholarship. The student experience will be characterized by smaller classes taught by leading faculty members and enriched by a program of lecture series, visiting scholars, symposia and conferences. For complete program requirements, see the USC School of Cinematic Arts section.

Grade Requirements

A grade of C- or higher is required to count toward major requirements.

CORE REQUIREMENTS (32 UNITS)

		UNITS
BISC 220L	General Biology: Cell Biology and Physiology, or	
BISC 221L	Advanced General Biology: Cell Biology and Physiology	4
BISC 421	Neurobiology	4
CHEM 103Lx	General Chemistry for the Environment and Life, or	
CHEM 105aL	General Chemistry	4
MATH 125	Calculus I	4
NEUR 408	Systems Neuroscience: From Synapses to Perception	4
PSYC 100	Introduction to Psychology	4
PSYC 274L*	Statistics	4
PSYC 440	Introduction to Cognitive Neuroscience	4

**An equivalent course may be substituted with permission.*

8 core + 4 or 5 elective courses: 48 units

Four or five upper-division elective courses (minimum 16 units) from the following list are required. At least one course in the upper-division electives must carry a lab (“L”) designation or be NEUR 490x. No more than 4 units of NEUR 490x may be used to fulfill the upper-division elective requirement.

ELECTIVES (16 UNITS)

		UNITS
BISC 307L	General Physiology	4
BISC 313	Evolution and Population Genetics	4
BISC 320L	Molecular Biology	4
BISC 325	Genetics	4

Honors Program in Neuroscience

An honors program is available to outstanding students who are pursuing a B.A. or B.S. degree in Neuroscience. This program offers students exceptional opportunities to participate in undergraduate research, culminating in the experience of writing an honors thesis summarizing their completed research. Honors students must register for 4 units of Directed Research (NEUR 490x). Honors students are also required to take two semesters of the Honors Seminar (BISC 493x as one of their upper-division electives, 1 unit/semester), in which small groups of students discuss recent findings in neuroscience literature and their own research. After completing the honors seminar, honors students also take one semester of Honors Thesis (BISC 494x, 2 units), in which students write their senior thesis. Students earning honors in neuroscience must have a minimum overall GPA of 3.5 at graduation. This program leads to the designation on the transcript of Bachelor of Arts/Science in Neuroscience

with Honors.

Bachelor of Science in Computational Neuroscience

Co-coordinators: Sarah Bottjer, Ph.D., and Irving Biederman, Ph.D.

Undergraduate Advisers: Eva Hinojoza, [✉ hinojoza@dornsife.usc.edu](mailto:hinojoza@dornsife.usc.edu); Briana Weiland, [✉ bweiland@dornsife.usc.edu](mailto:bweiland@dornsife.usc.edu)

The computational neuroscience major is designed for those students with an interest in applying mathematical and computational methodologies towards understanding the structure and functioning of the nervous system. The major will provide progressive training in interdisciplinary and inter-faculty aspects of neuroscience, and serve as a foundation for students interested in pursuing post-graduate education in graduate or professional schools or career opportunities in technically advanced occupations. Research is integral to this major and students are encouraged to engage in research with neuroscience faculty as early as possible in their undergraduate years.

Grade Requirements

A grade of C- or higher is required to count toward major requirements.

CORE REQUIREMENTS (48 UNITS)

		UNITS
BISC 220L	General Biology: Cell Biology and Physiology, or	
BISC 221L	Advanced General Biology: Cell Biology and Physiology	4
BISC 421	Neurobiology	4
CHEM 103Lx	General Chemistry for the Environment and Life, or	
CHEM 105aL	General Chemistry	4
MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 265	Mathematical and Computational Methods for Neuroscience	4
NEUR 408	Systems Neuroscience: From Synapses to Perception	4
PHYS 135aL	Physics for the Life Sciences, or	
PHYS 151L	Fundamentals of Physics I: Mechanics and Thermodynamics	4
PHYS 135bL	Physics for the Life Sciences, or	
PHYS 152L	Fundamentals of Physics II: Electricity and Magnetism	4
PSYC 100	Introduction to Psychology	4
PSYC 274	Statistics	4
PSYC 440	Introduction to Cognitive Neuroscience	4

Biological Area

ELECTIVES		UNITS
Choose 4 units of the BISC or NEUR courses listed below:		
BISC 424	Brain Architecture	4
BISC 461	Seminar in Molecular and Computational Biology	2, max 4
BISC 462	Seminar in Neurobiology	2, max 4
BISC 481	Structural Bioinformatics: From Atoms to Cells	4
NEUR 490x	Directed Research	1-8, max 12

Computational Area

Students are to take one language, one application and one advanced course, for a total of three courses. The language and application courses are listed as tracks according to the language of the courses. It is not obligatory that the language and application courses be from the same track, but the student should be aware that a

different language will likely be assumed if the language and application courses are from different tracks. Only one language course and one application course will be counted toward the major.

Matlab

Language: EE 150L (or AME 150L) Engineering Computational Methods (3)

Application: BME 210 Biomedical Computer Simulation Methods (3)

C++

Language: CSCI 101L Fundamentals of Computer Programming (3)

Logic Theory/C++/Java

Language: EE 101 Introduction to Digital Logic (3)

Application: CSCI 455x Introduction to Programming System Design (4)

Take one advanced course from the following:

BME 402	Control and Communication in the Nervous System	3
CSCI 300	Introduction to Intelligent Agents Using Science Fiction	3
CSCI 445L	Introduction to Robotics	3
CSCI 460	Introduction to Artificial Intelligence	3
CSCI 464	Foundations of Exotic Computation	3

A graduate-level advanced course from those listed below may be substituted for the undergraduate advanced course with permission:

BME 502	Advanced Studies of the Nervous System	4
BME 575L	Computational Neuroengineering	3
BME 670	Early Visual Processing	4
BME 671	Late Visual Processing	4
CSCI 561	Foundations of Artificial Intelligence	3
CSCI 564	Brain Theory and Artificial Intelligence	3
CSCI 574	Computer Vision	3
CSCI 662	Advanced Natural Language Processing	3

Psychology Area

Choose one course listed below:

PSYC 301L	Cognitive Processes	4
PSYC 304L	Sensation and Perception	4
PSYC 326	Behavioral Neuroscience	4
PSYC 424	Neuropsychology	4
PSYC 425	Functional Imaging of the Human Brain	4
PSYC 450L	Neural Network Models of Social and Cognitive Processes	4

Math Electives

Choose one additional course from the courses listed below or from those listed above not already counting for the major:

MATH 225	Linear Algebra and Linear Differential Equations	4
MATH 245	Mathematics of Physics and Engineering I	4

12 core (48 units) + 6 electives (21–22 units); 69–70 units

Minor in Neuroscience

Co-coordinators: Sarah Bottjer, Ph.D., and Irving Biederman, Ph.D.

Undergraduate Advisers: Eva Hinojoza, [✉ hinojoza@dornsife.usc.edu](mailto:hinojoza@dornsife.usc.edu); Briana Weiland, [✉ bweiland@dornsife.usc.edu](mailto:bweiland@dornsife.usc.edu)

Grade Requirements

A grade of C- or higher is required to count toward minor requirements.

CORE REQUIREMENTS (20 UNITS)

	UNITS
PSYC 274L* Statistics	4
BISC 421** Neurobiology	4
NEUR 408** Systems Neuroscience: From Synapses to Perception	4
PSYC 440*** Introduction to Cognitive Neuroscience	4
Electives A 300- or 400-level course from the elective list for majors	4

*An equivalent course may be substituted with permission

**Prerequisite: BISC 220 or BISC 221

***Prerequisite: PSYC 100

Recommended but not required: CHEM 103Lx (or CHEM 105La) plus MATH 125

Students who have not already taken the prerequisites (BISC 220/BISC 221 and PSYC 100) will need to take a total of 28 units to satisfy the requirements of a minor in neuroscience. Thus, the range of units will vary from 20 to 28 depending on a student's background.

Courses of Instruction

NEUROSCIENCE (NEUR)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

NEUR 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

NEUR 408 Systems Neuroscience: From Synapses to Perception (4, Sp) (Enroll in BISC 408)

NEUR 426 Principles of Neural Development (4, Sp) (Enroll in BISC 426)

NEUR 440 Introduction to Cognitive Neuroscience (4) (Enroll in PSYC 440)

NEUR 490x Directed Research (1–8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

NEUR 493x Neuroscience Honors Seminar (1, max 4, FaSp) Students attend lectures of distinguished neuroscientists visiting USC and give short, chalk-talk presentations summarizing the lecture. The presentations are critiqued by the students. Not available for graduate credit. *Prerequisite:* BISC 220L or BISC 221L; *recommended preparation:* BISC 421.

NEUR 494x Honors Thesis (2, FaSp) Not available for graduate credit. Programmatic approval.

NEUR 533 Cognitive Neuroscience (4, Sp) (Enroll in PSYC 540)

NEUR 534L Computational Neuroengineering (3) (Enroll in BME 575L)

NEUR 535 Brain Theory and Artificial Intelligence (3) (Enroll in CSCI 564)

NEUR 542 Hearing and Communication Neuroscience (4, Sp) (Enroll in BISC 521)

Email:  waite@usc.edu

oceansciences.usc.edu

Director: Douglas E. Hammond, Ph.D.

Participating Faculty: See Biological Sciences, Earth Sciences and Engineering in this catalogue.

Applications for the Ocean Sciences program should be routed through the affiliated departments and a separate letter sent to the Ocean Sciences Director, Douglas E. Hammond, USC Earth Sciences, Los Angeles, CA 90089-0740.

Degree Programs

The Graduate Program in Ocean Sciences (GPOS) provides interdisciplinary education and training to prepare professional ocean scientists for careers in academia, industry, and state and federal government. Students develop the ability to identify and solve significant problems in ocean sciences by using their training in several disciplines. They develop the ability to formulate and test hypotheses and integrate information and concepts about how the earth-ocean system is structured and how it functions. Training also is provided to develop skills in oral and written communication of technical and scientific information. Both M.S. and Ph.D. degree programs are offered; both require preparation of a thesis (M.S.) or dissertation (Ph.D.).

Admission Requirements

All rules and regulations described in the Graduate School section of this catalogue and Graduate Admission apply to students in the GPOS.

Official acceptance by the GPOS Admissions Committee is based on the recommendation of faculty from an affiliated department. Acceptance depends upon the applicant's letters of recommendation, research experience, intended area of research, personal interview (whenever possible), and the availability of a faculty member willing to advise and sponsor the applicant.

A B.S. or B.A. degree in an appropriate field of natural science, engineering or mathematics is required for admission.

It is expected that applicants to the GPOS will have attained a scholarship average of at least "B" (3.0 GPA on a 4.0 scale) preferably in the natural sciences or mathematics. Applicants must have taken the GRE aptitude test (verbal and quantitative). Successful applicants typically score in excess of 600 on both verbal and quantitative parts of the exam.

Applicants should contact the GPOS office by email or phone for an admission package. The GPOS admits students for both the fall and spring semesters; however, applicants for assistantships are encouraged to apply for the fall semester.

Graduate Degrees

Degree Requirements

Advanced degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Science in Ocean Sciences

The program does not accept applicants for a Master of Science degree in ocean sciences. The M.S. degree is intended only as a transitional degree in the process of completing requirements for the Ph.D. in ocean sciences.

Research Tool Requirements

None required.

Course Requirements

The M.S. degree in Ocean Sciences requires at least 24 units of course work, including two core courses (OS 512 and 582). Four thesis units (OS 594) are also required. At least 16 units of course work must be at the 500-level or higher; no more than six units can be directed research (OS 590); a maximum of four units with superior grades in approved course work may be transferred from an accredited graduate school. Students are required to maintain an overall GPA of 3.0 in all graduate work.

Thesis

Students should arrange for the appointment of a thesis adviser and committee after the first semester, or at the latest, after the first year of graduate work. The thesis committee should consist of the adviser plus two other faculty members, all of whom are generally selected from GPOS faculty. Once the committee is arranged, the student may make formal application to the Graduate School for the M.S. degree.

Doctor of Philosophy in Ocean Sciences

Research Tool Requirements

To be determined by qualifying exam committee.

Course Requirements

The Ph.D. degree in Ocean Sciences requires at least 27 units of formal course work (including seminars) of the 60 total units needed. Two core courses are required (OS 512, OS 582). No more than 15 units of 400-level course work may be applied. A maximum of 30 units may be transferred from an accredited graduate school.

Students are required to maintain an overall GPA of 3.0 in all graduate work.

Students may request permission to take the Ph.D. qualifying examination on completion of 24 units of course work, including two core courses in Ocean Sciences.

Screening Procedure

Students in the Ph.D. program must pass the screening procedure before their 25th unit of graduate credit. Screening consists of a review of the student's progress and is usually done by the GPOS Review Committee following a written recommendation by the student's adviser(s). Screening occurs at the end of each semester.

Qualifying Exam Committee

The doctoral qualifying exam committee is formed after the student has passed the screening procedure. The committee is appointed by the department with the advice of the student's research adviser. The five-member committee consists of the adviser, a minimum of three other members from the GPOS faculty, and one additional tenure-track faculty member. The committee must include faculty members from more than one academic department. A tenure-track faculty member must serve as research adviser or co-adviser. The committee consults with the student, recommends an appropriate program of study and administers written and oral qualifying examinations.

Qualifying Examination

The student may request permission to take the Ph.D. qualifying examination upon completion of 24 units of course work, including two core courses in ocean sciences. The qualifying examination consists of a written and an oral part, both parts prepared, conducted and evaluated by the student's examination committee. The written examination will consist of a number of questions given on two consecutive days. Questions will be comprehensive in scope with respect to the student's chosen area of specialization and will be designed to test the student's conceptual, analytical and integrative ability and preparation.

The written part of the qualifying examination must be taken before the oral examination. The oral examination will be in the area of the student's intended research and will be based on a research project selected and developed by the student into a written proposition. The oral examination will be conducted and evaluated by the student's examination committee. The oral examination must be taken within one month of the written examination.

Defense of the Dissertation

After the student has passed the qualifying examination, the qualifying exam committee recommends to the Graduate School that the student be admitted to candidacy for the Ph.D. degree. Following admission to candidacy the student must register for OS 794 Dissertation every semester, except summers, until the degree is awarded.

Once the qualifying examination is passed, the student is required, as soon as possible, to appoint a dissertation committee, using an appointment of committee form which can be found on the Graduate School Website (usc.edu/schools/GraduateSchool). All or some of the qualifying exam committee may be nominated. Until a dissertation committee is appointed, the qualifying exam committee will have responsibility for the student's program of study. The student must undertake an original investigation of a problem in ocean sciences. The topic must be approved by the student's dissertation committee and will usually be based on the written proposition presented in the qualifying examination.

A dissertation based on the student's research must be approved by the student's dissertation committee. The student must then defend the dissertation. The process for submission of the dissertation to the Graduate School can be found on the Graduate School Website under "Current Students — Thesis and Dissertations." This process should be started approximately one month before the defense, and the student must allow adequate time after the defense for final copy preparation.

The dissertation must conform to the general regulations described in *Regulations for Format and Presentation of Theses and Dissertations*, also available from the Graduate School Website. Additional regulations and information on the organization and preparation of the dissertation are provided in *Directions for Preparation of Dissertations and Research Reports as Required by the Graduate Program in Ocean Sciences/University of Southern California*, available in the GPOS office.

Interdisciplinary Programs

The Graduate Program in Ocean Sciences is designed to be interdisciplinary, reflecting the nature of the field that combines principles of physical, chemical, geological and biological oceanography to solve relevant problems in the ocean environment.

Courses of Instruction

OCEAN SCIENCES (OS)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

OS 512 Introduction to Chemical and Physical Oceanography (3, 2 years, Fa) Principles of physical, chemical, and geological oceanography including discussions of air-sea interaction, biogeochemical cycling and the role of the ocean in modulating climate and atmospheric composition; discussion section will cover formulation of basic calculations that illustrate these principles. *Prerequisite:* CHEM 105bL, MATH 126.

OS 582 Advanced Biological Oceanography (4, Fa) (Enroll in BISC 582)

OS 590 Directed Research (1–12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

OS 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

OS 599 Special Topics (2–4, max 8, Irregular) Course contents each semester will be selected to reflect current trends and new developments in the field of Ocean Sciences.

OS 790 Research (1–12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

OS 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Undergraduate Programs

The School of Philosophy offers courses in most areas of philosophy, including philosophy of mind, philosophy of language, epistemology, metaphysics, logic, philosophy of science, political philosophy, ethics, aesthetics, the

history of philosophy, phenomenology and existentialism. The major in philosophy is designed to acquaint students with the fundamental problems of Western thought and introduce them to the concepts and techniques necessary for independent philosophical thinking; it is equally intended to provide a broadening perspective for the various areas of specialization in the natural and social sciences and in literature and the arts. The school also offers minors in: ethics and moral philosophy; philosophy; philosophy for business, law, and the professions; and theories of art.

Graduate Programs

The School of Philosophy offers a Master of Arts in Philosophy, a Master of Arts in Philosophy and Law, a joint degree with the USC Gould School of Law and a Doctor of Philosophy in Philosophy.

Dornsife College of Letters, Arts and Sciences

Philosophy

Undergraduate Degrees

Major Requirements for the Bachelor of Arts in Philosophy

The School of Philosophy offers three major options: the major in philosophy, the major in philosophy with honors, and the major in philosophy, politics and law.

The major in philosophy requires eight courses in philosophy; six of these must be at the upper-division level. One of the eight courses must be a gateway course — PHIL 300, PHIL 315, PHIL 320, PHIL 340, or PHIL 360 — which must be taken before taking any 400-level courses. Students are strongly encouraged to take a course in logic: PHIL 250ab, PHIL 350, PHIL 351 or PHIL 352.

Distribution requirement: Students must take at least one course from each of the three categories listed below:

History of Philosophy: PHIL 315, PHIL 320, PHIL 345, PHIL 410, PHIL 411, PHIL 415, PHIL 421, PHIL 422, PHIL 423, PHIL 424, PHIL 427, PHIL 434

Ethics, Law and Value Theory: PHIL 330, PHIL 335, PHIL 337, PHIL 340, PHIL 345, PHIL 430, PHIL 437, PHIL 440, PHIL 442

Systematic Philosophy: PHIL 350, PHIL 351, PHIL 352, PHIL 360, PHIL 385, PHIL 427, PHIL 428, PHIL 460, PHIL 462, PHIL 463, PHIL 465, PHIL 470, PHIL 480, PHIL 485, PHIL 486

During the senior year, students enrolled in one of the three majors' programs in philosophy can take a capstone seminar. Students who are enrolled in one of the minors in philosophy may enroll in a capstone seminar only with the permission of the instructor. Enrollment in these seminars will not exceed 15 students. Students may enroll in a capstone seminar only if they have satisfied the following requirements: taken a course in logic (PHIL 250ab, PHIL 350, PHIL 351, or PHIL 352), taken at least one 400-level course in philosophy and have a GPA in philosophy of 3.0 or above.

Double Major

Double majors are encouraged but a student must work in close consultation with the undergraduate adviser.

Bachelor of Arts with a Combined Major in Linguistics and Philosophy

See Linguistics.

Bachelor of Arts in Philosophy, Politics and Law

This interdisciplinary major combines, in a systematic and structured way, basic education in philosophy,

political theory and elements of law. An interdisciplinary approach to the combination of these three disciplines may be of particular interest to students contemplating post-graduate work in law; those interested in a career in public service or politics; and those attracted by the rigor of philosophy and its attention to foundational issues, who are also interested in politics and law. Students are exposed to a wider range of conceptual and methodological approaches than they would in any single discipline, while learning enough philosophy and political science to leave a choice of options for graduate schools. The major requires nine classes, one of which must be a gateway course — PHIL 300, PHIL 315, PHIL 320, PHIL 340 or PHIL 360 — distributed as follows.

REQUIREMENTS		UNITS
One lower-division class from the following:		
PHIL 135	Legal Controversies and Ethical Principles	4
PHIL 140	Contemporary Moral and Social Issues	4
PHIL 141	The Professions and the Public Interest in American Life	4
PHIL 262	Mind and Self: Modern Conceptions	4
POSC 130	Law, Politics and Public Policy	4

Students who satisfy one of their general education requirements by taking a core, thematic options course of comparable scope and content, can, at the discretion of the director of the School of Philosophy and the philosophy undergraduate adviser for this major, substitute that course for one of the above.

One course in logic:

PHIL 350	Symbolic Logic	4
PHIL 351	Reasoning and Logic	4
PHIL 352	Logic and Language	4

One course in philosophy of law:

PHIL 430	Philosophy of Law	4
PHIL 431	Law, Society, and Politics	4

Two courses from Categories A, B and C below. The two courses must belong to different categories, and one of these courses must be a gateway course: PHIL 300, PHIL 315, PHIL 320, PHIL 340 or PHIL 360. *Students are required to take a gateway course before enrolling in any 400-level course in philosophy.*

A. Moral and political philosophy

PHIL 335	Theoretical Models of Leadership	4
PHIL 337	History of Modern Political Philosophy	4
PHIL 340	Ethics	4
PHIL 437	Social and Political Philosophy	4
PHIL 440	Contemporary Ethical Theory	4
PHIL 442	History of Ethics to 1900	4
PHIL 443	Value Theory	4

B. History of philosophy:

PHIL 300	Introduction to the Philosophical Classics	4
PHIL 315	History of Western Philosophy: Ancient Period	4
PHIL 317	History of Western Philosophy: Medieval Period	4
PHIL 320	History of Western Philosophy: Modern Period	4
PHIL 423	The Critical Philosophy of Kant	4
PHIL 426	20th Century European Philosophy	4
PHIL 427	20th Century Anglo-American Philosophy	4

PHIL 428 Anglo-American Philosophy since 1950 4

C. Systematic areas of philosophy:

PHIL 360	Epistemology and Metaphysics	4
PHIL 462	Philosophy of Mind	4
PHIL 463	Theories of Action	4
PHIL 465	Philosophy of Language	4
PHIL 470	Theory of Knowledge	4

One course in constitutional politics:

POSC 335	Political Parties, Campaigns, and Elections	4
POSC 340	Constitutional Law	4
POSC 426	The United States Supreme Court	4
POSC 444	Civil and Political Rights and Liberties	4

One course in comparative or international politics and law:

ANTH 345	Politics, Social, Organization and Law	4
POSC 345	International Law	4
POSC 440	Comparative Law and the Judicial Process	4
POSC 448a	The Politics of Peace: Human Rights	4

One course in politics, law, and public policy:

LING 412	Language and Law	4
POSC 347	Environmental Law	4
POSC 395	Directed Governmental and Political Leadership Internship	4
POSC 443	Law in Film	4
POSC 452	Critical Issues in Law and Public Policy	4
SWMS 349	Women and the Law	4

One course in law:

LAW 300	Concepts in American Law	4
---------	--------------------------	---

Note: Students in the major may enroll in a capstone seminar in philosophy if they have satisfied the general requirements: a GPA of 3.0 in major course work; a course in logic, and at least one 400-level course in philosophy, taken prior to the capstone seminar.

Philosophy Honors Program

Students who are considering the possibility of continuing their education at a graduate level in philosophy or similar disciplines, or students who wish to undertake a more intensive course of studies in philosophy, which includes original independent research, are strongly encouraged to take the major with honors.

The major with honors requires completion of the requirements for the Bachelor of Arts, with the following additional requirements:

- (a) Students must take a capstone seminar, having completed the prerequisites for taking it.
- (b) In addition to the required courses for the major, students must take PHIL 494 Senior Thesis during the fall term of their senior year. The senior thesis will be graded by the student's adviser and another member of the School of Philosophy, following an oral defense. The senior thesis must be completed with a grade of B or higher.
- (c) Students must have a GPA of 3.5 or higher in their philosophy courses.

Students who intend to complete the major with honors are encouraged to enroll in the program during their sophomore year (but no later than the end of the first term of their junior year), and should consult about their studies with the faculty adviser for the honors program on a continuous basis.

Minor in Ethics and Moral Philosophy

The aim of the minor is to provide students headed for medicine, biology, psychology and other health care professions with a broad humanistic perspective not found in professional education and the critical tools to deal with the ethical issues that may arise in their professional lives.

Students are required to take five courses in philosophy, at least four of which must be upper-division. Students must take at least one lower-division or 300-level course before taking any 400-level courses.

Students must take at least two courses from category one below, and at least one course from category two:

1. *Ethics, History of Ethics and Value Theory*: PHIL 140, PHIL 141, PHIL 340, PHIL 361, PHIL 430, PHIL 431, PHIL 440, PHIL 442
2. *Systematic Philosophy*: PHIL 262, PHIL 360, PHIL 385, PHIL 427, PHIL 428, PHIL 460, PHIL 462, PHIL 465, PHIL 470

Minor in Philosophy

The minor in philosophy requires the completion of five philosophy courses, at least four of which are upper-division courses. All minors must take a gateway course — PHIL 315, PHIL 320, PHIL 340, or PHIL 360 — before enrolling in any 400-level course.

Distribution requirement: Students must take at least one course from each of the three categories listed below:

History of Philosophy: PHIL 315, PHIL 320, PHIL 345, PHIL 410, PHIL 411, PHIL 415, PHIL 421, PHIL 422, PHIL 423, PHIL 424, PHIL 427

Ethics, Law and Value Theory: PHIL 330, PHIL 335, PHIL 337, PHIL 340, PHIL 345, PHIL 430, PHIL 437, PHIL 440, PHIL 442

Systematic Topics: PHIL 350, PHIL 351, PHIL 352, PHIL 360, PHIL 385, PHIL 427, PHIL 428, PHIL 460, PHIL 462, PHIL 463, PHIL 465, PHIL 470, PHIL 480, PHIL 485, PHIL 486

Minor in Theories of Art

Theorizing about the arts takes place in the discipline of philosophy (aesthetics) as well as in all the individual disciplines concerned with the individual arts. Some of the issues involved (is perspective a matter of convention?; how does acting differ in cinema and in theatre?) are specific to a particular discipline or disciplines, but their discussion typically involves very general issues (in the cases mentioned, issues about the nature of convention or of artistic media) and many of the issues manifest themselves in all these disciplines (the relation of intention to interpretation; the epistemological and moral status of the arts; the nature of evaluative judgments). The understanding of these issues can be greatly enhanced by studying them as they arise in different arts and in different theoretical traditions. The minor should be of interest to students with an interest in philosophy, or students in any of the arts who are interested in their theoretical dimensions.

There are no entrance requirements for the minor, which requires six courses (23 or 24 units, depending on course selection).

All students must take PHIL 242 Theories of Art (4 units) and select five courses from the following:

AHIS 250	Modernity and Difference: Critical Approaches to Modern Art	4
ARCH 314	Theory and Criticism: Recent Trends and Developments	3
COLT 391	Literary Criticism from Plato to Postmodernism	4
COLT 454	Aesthetic Philosophy and Theory	4

ENGL 479	History of Literary Criticism	4
ENGL 480	Modern Literary Criticism: Theory and Practice	4

Minor in Critical Approaches to Leadership

See Interdisciplinary Studies.

Minor in Philosophy for Business, Law, and the Professions

The aim of the minor is to provide students headed for business, law or the professions a strong set of critical, analytic and expository skills, while providing them with a broad humanistic perspective not found in professional education.

Students are required to take five courses, at least four of which must be upper-division. They must take one course from each of the following categories (1–4), and one additional course from either category 2 or 3. Students must take at least one lower-division or 300-level course before taking any 400-level courses.

1. *Logic*: PHIL 350, PHIL 351, PHIL 352
2. *Law, Leadership, and the Professions*: PHIL 141, PHIL 330, PHIL 335, PHIL 430, PHIL 431
3. *Ethics, History of Ethics, and Value*: PHIL 140, PHIL 340, PHIL 345, PHIL 361, PHIL 440, PHIL 442
4. *Systematic Philosophy*: PHIL 262, PHIL 360, PHIL 385, PHIL 427, PHIL 428, PHIL 460, PHIL 462, PHIL 465, PHIL 470

Dornsife College of Letters, Arts and Sciences

Philosophy

Graduate Degrees

The objective of the graduate program in philosophy is to equip suitably prepared and talented students to function effectively as teachers, thinkers and writers on philosophical topics in the Western tradition. The program provides for a wide range of studies within philosophy, but emphasizes the history of philosophy, both classical and modern, along with the traditional core disciplines: ethics, epistemology, metaphysics and logic.

Because philosophy is as much a special manner of intellectual activity as it is a special subject matter, the graduate student is expected not only to master major works in the historical and contemporary literature of philosophical thought, but also to develop the ability to engage in the ongoing process of philosophical research and dialogue.

Admission Requirements

An applicant for admission normally has an undergraduate major in philosophy, but programs may be arranged for promising students who do not. At least three letters of recommendation from the student's undergraduate teachers should be sent to the chair of graduate admissions of the School of Philosophy. All applicants are required to take the verbal and quantitative General Tests of the Graduate Record Examinations.

Degree Requirements

These degrees are awarded under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Arts in Philosophy

The department does not accept applicants for a Master of Arts degree in philosophy. The M.A. degree is intended only as a transitional degree in the process of completing requirements for the Ph.D. in philosophy.

A student may obtain an M.A. in philosophy by fulfilling the following requirements: a minimum of 36 units in the USC philosophy school, at least 24 of which must be at the 500 level. Requirements include: PHIL 500, PHIL 503 and a 500-level course in each of the following three areas: metaphysics and epistemology, ethics and other value theory, and history of philosophy. Of the remaining four required (4-unit) courses, only four units of PHIL 590 are applicable to the degree. A publishable research paper is also required.

Progressive Degree Program in Philosophy and Law

The progressive degree program permits exceptional undergraduate students with a major in philosophy to receive both an undergraduate degree and the Master of Arts in Philosophy and Law within five years. A minimum GPA of 3.5, two letters of recommendation and outstanding performance in philosophy courses are required for admission to this program. For other requirements of the progressive degree program, see here.

Master of Arts in Philosophy and Law

A total of 36 units are required for the degree, including at least 24 units in philosophy. Twelve of these must come from completing the specialization and breadth requirements. The former requires students to take a 4-unit, 500-level course in philosophy on a topic spanning philosophy and law. The latter requires students to take PHIL 500 or PHIL 503, plus another 4-unit, 500-level course in philosophy on a topic that does not span philosophy and law, including but not limited to topics in metaphysics, epistemology, philosophy of language, philosophy of science, ethics, aesthetics and history of philosophy. Students must also demonstrate a basic proficiency in symbolic logic, typically by passing, at a sufficiently high level, one of a specified range of 4-unit courses in logic offered by the School of Philosophy. The law requirement for this degree consists of two courses in the USC Gould School of Law. The first must be either LAW 503 Contracts or LAW 509 Torts I. The second must be either LAW 504 Criminal Law or LAW 508 Constitutional Law. Students who elect to take LAW 504 would normally also take 1 unit of PHIL 590 as an accompaniment. Degree candidates must also write a master's thesis on some subject in legal philosophy. At least one of the thesis advisers must have an appointment in the School of Philosophy.

Juris Doctor/Master of Arts, Philosophy

Students must complete 24 units in the USC School of Philosophy and 69 units in the USC Gould School of Law.

First Year: Required law school curriculum.

Second and Third Years: The School of Philosophy prefers that students take at least one philosophy course each semester. During the four semesters, students must take at least 16 units at the 500-level, including PHIL 450 Intermediate Symbolic Logic or PHIL 510 Philosophical Logic and PHIL 500, and PHIL 503, one 400- or 500-level course in ethics or social/political philosophy or aesthetics or philosophy of law; one 400- or 500-level course in metaphysics or epistemology or philosophy of language or philosophy of science or philosophy of mind; one 400- or 500-level course in the history of ancient or early modern philosophy; passage of the second year review that shall include a research paper based on a completed seminar paper and completion of a publishable research paper. Students must also complete 36 additional law units.

Doctor of Philosophy in Philosophy

Application deadline: January 1

Course Requirements

The minimum number of course credits required for the Ph.D. is 60 units. No more than 8 of these units may be from 590 courses and no more than 8 of these units may be from 400-level courses in the School of Philosophy. PHIL 450 does not count toward this maximum of 8 units of 400-level courses in the School of Philosophy. No more than eight of these units may be earned in 794 Doctoral Dissertation. Each student must pass PHIL 450 with a grade of B or better and must pass both PHIL 500 and PHIL 503 with a grade of B+ or better. PHIL 450 and both PHIL 500 and PHIL 503 must be satisfactorily completed by the end of the second year.

The student may take up to two courses in a field of study related to philosophy. The Ph.D. dissertation may be written in any area of philosophy for which adequate supervision is available from within the university. Ph.D. students are also required to show evidence of practical or editorial training, or their equivalent.

Foreign Language/Research Tool Requirement

A foreign language examination, specified by the school, in French, German, Latin or classical Greek is required. The faculty may approve a replacement of the language requirement by a research tool requirement, consisting of an approved course or examination in a subject essential to the student's research program. The course or examination must be passed before the qualifying examination is attempted.

There are three levels of evaluation in the Ph.D. program prior to the dissertation:

Distribution Requirement

There is a distribution requirement of six courses at the 500 level in the School of Philosophy, two each representing breadth within each of the following three areas: (1) metaphysics and epistemology (broadly construed, including philosophical logic; philosophy of science; philosophy of math, mind, and language), (2) value theory (broadly construed, including aesthetics, political philosophy, and the philosophy of law), and (3) pre-1879 history of philosophy. PHIL 500, PHIL 503 and PHIL 590 courses cannot count toward this requirement. Up to two 400-level courses may count by petition toward this requirement, provided that the departmental standards for graduate-level course work are met. For courses straddling two areas (for example, history of ancient philosophy and metaphysics; history of modern philosophy and ethics), instructors will indicate on the syllabus which requirement the course will satisfy. Courses dealing with subject matter within more than one of the areas listed may be used to satisfy any of the areas encompassed by the course although no single course may be used to satisfy two requirements at once. The two courses within each distribution area must represent breadth, as determined in advance by the graduate adviser and in accordance with departmental guidelines. All distribution requirements must be completed by the end of the fifth semester.

Screening Procedure

Students in the Ph.D. program must pass a screening procedure before undertaking their 25th unit (seventh course) of graduate credit. This will be based on a review of the student's work to date, and will take into account not only information acquired but also those intellectual qualities and capacities that are essential for good work in philosophy: the capacity to think and write on philosophical issues with clarity, consistency and thoroughness; the ability to understand in detail what is involved in the meaning and justification of philosophical claims or positions; the ability to recognize and to draw out fine conceptual distinctions and to perceive their logical relationships; and strong intellectual curiosity and independence of thought.

Student Reviews

Graduate student progress is reviewed on a regular basis each term. In addition, apart from the screening procedure, there are more formal reviews conducted at the end of the 4th and 6th semesters of study, as described below.

In the fourth semester of study, normally the spring of the second year, each student shall submit two papers, approximately 8,000 words each, in different fields of philosophy (ordinarily two substantially revised papers previously submitted in seminars). The choice of papers should be made in consultation with the Graduate Adviser. The second year evaluation will be made on the basis of faculty review of the submitted papers and consideration of the student's total record.

For the review following the sixth semester of study, students are to select one from a list of pre-designated areas in philosophy and master the material on a pre-assigned reading list of important works in that area. At the beginning of the sixth semester, each student will take a written examination, designed by the faculty of the School of Philosophy, on the materials covered in the relevant reading list followed by an oral examination exploring their knowledge of the field. This examination must be passed by the end of the sixth semester. The examining committee for each student will consist of faculty conversant with the field and appointed by the school.

Qualifying Examination

This examination consists of a written prospectus of the proposed dissertation and an in-depth oral examination

on the form and subject matter of the proposed dissertation. All faculty members may inspect the prospectus and be present at the oral, but evaluation of the qualifying examination is the responsibility of the student's qualifying exam committee. The examination is not passed if two or more members of the qualifying exam committee find it unsatisfactory.

The qualifying examination is not offered in the summer. Those who intend to take this examination must meet all the conditions specified in the section on general requirements for the Ph.D. Students are expected to pass the qualifying exam by the end of the seventh semester. Students who have not passed the qualifying exam by the end of the seventh semester will be subject to faculty review, and may not be allowed to continue in the program.

Doctoral Dissertation

When the student passes the qualifying examination, a dissertation committee (see Graduate Advisement), replacing the qualifying exam committee, is appointed by the director of the school in consultation with the student and the philosophy faculty. Normally, the qualifying exam committee simply becomes the dissertation committee. This committee and the candidate will then agree upon how the dissertation is to be developed and written. The dissertation must be an original contribution to some well-defined area in philosophy, and must give evidence of the student's ability to do respectable, large-scale research, thinking, and writing in the field. The school requires the defense oral when the research and writing of the dissertation is substantially complete. Attendance at this oral examination is open to all members of the university faculty, but the examination is conducted and evaluated by the candidate's dissertation committee. The faculty normally works with the dissertations only in the fall and spring semesters, and the student should plan accordingly.

Graduate Advisement

In addition to the departmental graduate adviser, who has the formal role in graduate advising, each student will be matched with a personal adviser, who will share responsibility with the graduate adviser for monitoring a student's progress semester by semester. The graduate adviser is available to counsel any graduate student on all aspects of the graduate program. A student's personal adviser will consult informally with the student semester by semester on how to interpret his or her grades and especially the written reports provided by the instructor for each course in which the student is enrolled, discuss informally the student's selection of courses each semester, and generally keep track of the student's progress in the program. At the appropriate time, the student will consult his or her adviser concerning the appointment of a faculty committee for guidance and supervision. An official qualifying exam committee will be appointed at the time the student passes the screening examination; for the rules governing its establishment and makeup, see General Requirements for the Doctor of Philosophy degree in the Graduate School section. The qualifying exam committee will meet with the student soon after its appointment, and at least once each academic year thereafter.

Dornsife College of Letters, Arts and Sciences

Philosophy

Courses of Instruction

PHILOSOPHY (PHIL)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PHIL 101g Philosophical Foundations of Modern Western Culture (4) The influence on modern Western culture of philosophical thought about reality, knowledge and morality as developed by such philosophers as Descartes, Leibniz and Kant.

PHIL 115g Ancient Greek Culture and Society (4) Focus on the literary achievement from the beginning of Greek literature to the fourth century with a special emphasis on the philosophers.

PHIL 122agbg Reasoning and Argument (2-2, FaSp) Techniques for constructing good arguments and for assessing and criticizing the arguments of others. (Duplicates credit in former PHIL 250ab.)

PHIL 130g The Physical World and Our Place In It (4) Exploration of basic questions about the nature of reality. Topics may include personal identity, freedom and determinism, causation and laws of nature.

PHIL 135g Legal Controversies and Ethical Principles (4) Philosophical theories of law and applications to controversies of importance to society and our legal system, such as free speech, civil disobedience, and self-defense.

PHIL 137gm Social Ethics for Earthlings and Others (4, FaSp) A systematic study of contemporary issues in social and political philosophy engaging multimedia works of science fiction to illuminate classic Western moral and political theories.

PHIL 140g Contemporary Moral and Social Issues (4, FaSpSm) Critical study of controversial social issues such as abortion, euthanasia, the death penalty, war and terrorism, pornography, and economic justice.

PHIL 141g The Professions and the Public Interest in American Life (4) The study of the nature and role of professionals in life and society, forces that shape and direct them, foundations and applications of professional ethics.

PHIL 155g Modern Philosophy and the Meaning of Life (4) Modern philosophical treatments of the problem of the meaning or purpose of human life; special attention to Existentialism.

PHIL 166g Current Moral and Social Issues (4, FaSp) Critical study of controversial social issues such as abortion, euthanasia, the death penalty, war and terrorism, sexual morality, affirmative action, and economic justice. (Duplicates credit in former PHIL 140g.)

PHIL 172gm Social Ethics for Earthlings and Others (4, FaSp) A systematic study of contemporary issues in social and political philosophy engaging multimedia works of science fiction to illuminate classic Western moral and political theories. (Duplicates credit in former PHIL 137g.)

PHIL 174gw Freedom, Equality, and Social Justice (4, FaSp) Explores the nature of justice, and how apparently conflicting ideals, such as freedom and equality, are to be balanced within a just society.

PHIL 178g Moral Dilemmas in the Legal Domain (4) Philosophical theories of law and applications to controversies of importance to society and our legal system, such as free speech, civil disobedience, and self-defense. (Duplicates credit in former PHIL 135g.)

PHIL 220g Science, Religion and the Making of the Modern Mind (4) Philosophical and religious implications of the scientific revolution of the 17th century and the Darwinian revolution in the 19th century.

PHIL 225g Love and its Representations in Western Literature, Philosophy, and Film (4, FaSp) Key works that have shaped the European and American cultural inheritance, with a special focus on the nature of love (and marriage or domesticity). *Concurrent enrollment:* MDA 140.

PHIL 242 Theories of Art (4) An introduction to general theories of art and to issues concerning particular arts such as literature and drama, photography and film, painting, architecture and music.

PHIL 250ab Elementary Formal Logic (2-2, FaSp) Critical reasoning skills and their many everyday applications; theory of logically correct reasoning and its associated formal techniques.

PHIL 256g Science, Religion, and the Making of the Modern Mind (4, FaSp) Exploration of the philosophical and religious implications of major scientific revolutions, such as those of Copernicus, Galileo, and Darwin. (Duplicates credit in former PHIL 220g.)

PHIL 260g Ethical Theory and Practice (4, FaSp) Explores various conceptions of morality and what makes actions right or wrong, together with the implications of these views for concrete ethical issues.

PHIL 262g Mind and Self: Modern Conceptions (4) Philosophical problems about the nature of mind associated with the rise of modern science; topics include the mind/body relation, personal identity, rationality and freedom.

PHIL 285Lg Knowledge, Explanation, and the Cosmos (4, FaSpSm) The nature and limits of knowledge and explanation, and challenges in understanding the origin of the universe and the place of intelligent life within it.

PHIL 286Lg Issues in Space and Time (4) Examining the nature of space and time, how they relate, and how material objects relate to them. Some included topics: substantivalism, temporal directionality, persistence, hyperspace.

PHIL 300 Introduction to the Philosophical Classics (4) An examination of philosophical works which have had a profound impact on the nature of Western thought.

PHIL 315 History of Western Philosophy: Ancient Period (4) Major figures in the history of Western philosophical thought from the pre-Socratics to the Hellenistic period; emphasis on Plato and Aristotle.

PHIL 317 History of Western Philosophy: Medieval Period (4) Central themes in Jewish, Christian and Islamic philosophy from late antiquity through the scholastic period.

PHIL 320 History of Western Philosophy: Modern Period (4) The development of philosophy from the 16th to the 19th centuries; emphasis on Continental Rationalism, British Empiricism, and the philosophy of Kant.

PHIL 330 Theories of Law (4) Examination of some of the major classical and contemporary theories of the nature and functions of law and of its relation to morality.

PHIL 335 Theoretical Models of Leadership (4, FaSp) Political philosophers and social theorists on leadership: political obligation; the art of government; leadership in civil society and counter-cultural dissent; models of cosmopolitan leadership.

PHIL 337 History of Modern Political Philosophy (4) Analysis of some of the main political philosophies of the modern era; emphasis on the ethical and metaphysical foundations of political philosophy.

PHIL 338 Political Economy and Social Issues (4, Sp) (Enroll in ECON 338)

PHIL 340 Ethics (4, FaSpSm) Study of major philosophical theories of moral right and wrong, such as utilitarianism, Kantianism, egoism, virtue ethics, and theological ethics.

PHIL 345 Greek Ethics (4) Examination of the progress of the ethical thought and legal and political institutions of ancient Greece with an emphasis on the Nichomachean Ethics of Aristotle.

PHIL 347 Philosophy in Literature (4) Philosophical content in representative European and American literature; philosophical problems about literature such as the nature of truth and meaning in fiction.

PHIL 350 Symbolic Logic (4) Introduction to basic techniques of propositional and quantificational logic, and elements of probability. Especially useful to philosophy, mathematics, science, and engineering majors.

PHIL 351 Reasoning and Logic (4) Study of reasoning as a strategy for arriving at knowledge in dependence upon logical theory. Logical theories are developed alongside historically influential strategies of reasoning. Not open to freshmen.

PHIL 352 Logic and Language (4) Introduction to modern symbolic logic, with applications to the philosophy of language, plus meta-logical and philosophical results about its scope and limits.

PHIL 355 Existentialism (4) A critical survey of major 19th and 20th century existentialist writers, including Kierkegaard, Dostoevsky, Tolstoy, Kafka, Nietzsche, Camus, and Sartre.

PHIL 360 Epistemology and Metaphysics (4) Examination of problems in metaphysics and/or

epistemology. Conducted at the intermediate level.

PHIL 361 Philosophy of Religion (4) The existence of God; mysticism, miracles and the possibility of disembodied existence; the problem of evil; religion and morality; the meaning of religious language.

PHIL 362 Possible Worlds (4) Introduction to possible worlds as a tool for asking and answering questions about what might be, what must be, and what can never be.

PHIL 363 Philosophy of Perception (4) Philosophical investigation of sense perception as it relates to issues in epistemology, metaphysics, the philosophy of mind, and the philosophy of science.

PHIL 385 Science and Rationality (4) Examination of the rationality of the scientific enterprise, and of the relation between science and human values.

PHIL 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

PHIL 410 Early Greek Thought (4) A study of the Greek thinkers from Homer to the age of Socrates; emphasis on the pre-Socratic philosophers.

PHIL 411 Plato (4) Detailed study of the evolution of Plato's thought as revealed in selected dialogues.

PHIL 415 Aristotle (4) Intensive study of selected topics taken from Aristotle's writings in natural philosophy, in metaphysics, and in other areas of philosophy.

PHIL 421 Continental Rationalism (4) Development of philosophy on the continent from the 17th to the 19th centuries; emphasis on the philosophical works of Descartes, Leibniz, and Spinoza.

PHIL 422 British Empiricism (4) Development of philosophy in Great Britain from the 17th to the 19th centuries; emphasis on Locke, Berkeley, and Hume.

PHIL 423 The Critical Philosophy of Kant (4) Intensive study of the philosophical works of Kant.

PHIL 424 19th Century Philosophy (4) Leading figures and movements in 19th century philosophy; works of such philosophers as Hegel, Schopenhauer, Mill, Nietzsche, and Bradley.

PHIL 425 American Philosophy (4) Leading figures and movements in American philosophy; works of such philosophers as Jonathan Edwards, Charles Peirce, William James, John Dewey, and C.I. Lewis.

PHIL 426 20th Century European Philosophy (4) Main philosophers and movements from 1900, including the major developments within phenomenology and existentialism, the emergence of structuralism and hermeneutics.

PHIL 427 20th Century Anglo-American Philosophy (4) The nature and function of analysis as a philosophical method; the development of major metaphysical, epistemological, and ethical views; Russell, Wittgenstein, Carnap, Quine and others.

PHIL 428 Anglo-American Philosophy Since 1950 (4) The maturing of the analytic tradition from the later Wittgenstein through Ryle, Strawson, Hare, Austin, Grice, Quine, Davidson, Kripke, and beyond.

PHIL 430 Philosophy of Law (4) Philosophical theories about the nature of law, relations between law and morality, and analysis of normative concepts central to law, such as responsibility, punishment, negligence.

PHIL 431 Law, Society, and Politics (4, Fa) A systematic presentation of the main philosophical perspectives on the interactions between law and the social-political aspects of our lives.

PHIL 437 Social and Political Philosophy (4) The nature of man and society, the nature and justification of state and government, political rights and political obligation, justice and equality.

PHIL 440 Contemporary Ethical Theory (4) Ethical theories in the 20th century; contemporary theories of value and obligation; metaethical theories; intuitionism, naturalism, and non-cognitivism; concepts of justice, human rights, and freedom.

PHIL 442 History of Ethics to 1900 (4) An historical and critical study of the great moral philosophers, including Plato, Aristotle, Aquinas, Kant, and the British moralists.

PHIL 443 Value Theory (4) The evaluation of individual and social ends; consideration of such topics as values and rational choice, the good of a person, hedonism, welfare, ideals, and utopias.

PHIL 445 Philosophy of the Arts (4) Principal theories of the nature of, and response to, art; examination of form and content in various arts; consideration of the role of criticism.

PHIL 446 Aesthetics and the Film (4) Problems in the philosophy of art raised by film, such as the notion of “cinematic”; the nature of interpretation of films; criteria for evaluating films.

PHIL 450 Intermediate Symbolic Logic (4) Systematic study of the metatheory of quantificational logic, with applications to questions of decidability and completeness of formal systems including Godel’s Incompleteness Theorems.

PHIL 452 Modal Logic (4) Elements of propositional and quantified modal logic and the logic of counterfactual conditionals with an eye to some of their applications in contemporary philosophy. *Prerequisite:* PHIL 350, or PHIL 351, or PHIL 352.

PHIL 455 Phenomenology and Existentialism (4, Irregular) Close study of major writings of Husserl, Heidegger, and Sartre.

PHIL 460 Metaphysics (4) Systematic introduction to basic concepts, including identity, difference, existence, individuals, substance, quality, and relation; emphasis on idealism, materialism, and the ontology of intentionality.

PHIL 462 Philosophy of Mind (4) Examination of contemporary theories of mind and its place in the natural world.

PHIL 463 Theories of Action (4) Systematic investigation of action, the mental states involved in action, the reasoning processes that lead to action, and related concepts including intentionality and free will.

PHIL 465 Philosophy of Language (4) The nature of communication, meaning, reference, truth, necessity, speech acts, convention, and language.

PHIL 470 Theory of Knowledge (4) Examination of contemporary accounts of the nature, scope, sources — and value — of human knowledge and justified belief.

PHIL 471 Metaphysics and Epistemology (4) Classic issues in epistemology and the philosophy of language, leading up to the application of context-sensitivity in language to the problem of skepticism. Open only to philosophy majors. *Prerequisite:* PHIL 250b or PHIL 350 or PHIL 351 or PHIL 352; *recommended preparation:* at least one 400-level PHIL course.

PHIL 472 Moral Philosophy (4) In-depth study of some important work from the last few decades concerning the nature and status of moral reasons, moral obligations, and moral discourse. Open only to philosophy majors. *Prerequisite:* PHIL 250b or PHIL 350 or PHIL 351 or PHIL 352; *recommended preparation:* at least one 400-level PHIL class.

PHIL 473 Wittgenstein (4) A detailed study of the philosophical works of Ludwig Wittgenstein.

PHIL 480 Philosophy of Mathematics (4) The nature of mathematical truth and the nature of mathematical entities.

PHIL 485 Development of Physical Science (4) Concepts central in the advance of physical science such as

the concepts of space, time, mass, force; philosophical problems concerning quantum mechanics.

PHIL 486 Methodologies of the Sciences (4) Comparison of the methodologies of the natural, social, and/or behavioral sciences; consideration of such topics as the concept of scientific law, prediction, explanation, confirmation.

PHIL 490x Directed Research (1–8, max 12) Individual research and readings. Not available for graduate credit.

PHIL 494 Senior Thesis (4) Independent studies for philosophy majors, and guidance in the preparation of the senior thesis for students who wish to graduate with honors in philosophy. Not open to graduate students.

PHIL 499 Special Topics (2–4, max 8) Selected topics in various specialty areas within philosophy.

PHIL 500 Introduction to Contemporary Philosophical Literature (4, Fa) Analysis of selected philosophical problems and theses of current interest; explication of major contemporary papers and/or books is emphasized.

PHIL 501 Seminar in Recent Philosophy (4, max 16, Sp) Contemporary philosophical issues and literature.

PHIL 503 Introduction to Contemporary Philosophical Literature on Value (4, Sp) Analysis of selected philosophical problems and theses of current interest; explication of major contemporary papers and/or books is emphasized.

PHIL 505 Pro-Seminar in Central Topics in Contemporary Philosophy (4, Irregular) Key developments in central areas of philosophy are used to provide training in philosophical analysis, criticism, and the writing of precise philosophical prose.

PHIL 510 Philosophical Logic (4, Sp) Applications of logical theory to contemporary philosophical research. Elements of model theory, recursion theory; Goedel's Incompleteness results; modal logic and its interpretations. *Recommended preparation:* PHIL 350.

PHIL 515 Studies in Ancient and Medieval Philosophy (4, max 16) Problems in research in selected portions of ancient and medieval philosophy.

PHIL 520 Studies in Modern Philosophy (4, max 16) Problems in research in selected portions of modern philosophy.

PHIL 525 Seminar in Phenomenology (4) The origin, principles, and development of the phenomenological movement from Brentano to Merleau-Ponty.

PHIL 530 Seminar in Philosophy of Law (4, max 12) Theories of the nature of law; emphasis on recent writing; legal concepts such as rights, powers, liability, legal responsibility, law, and morality.

PHIL 537 Seminar in Social and Political Philosophy (4, max 16) Advanced literature on selected topics in social and political philosophy, including the nature of law, man, and society; ideals such as justice and freedom.

PHIL 540 Seminar in Ethics (4, max 16) Advanced topics and literature in ethical theory.

PHIL 545 Seminar in Aesthetics (4) Advanced topics in the philosophy of the arts. Contemporary views on such problems as the nature of art and the role of criticism.

PHIL 550 Advanced Topics in Formal Logic (4) Consistency and completeness of the predicate calculus; truth and validity; rudiments of model logic. *Prerequisite:* PHIL 450.

PHIL 551 Seminar in the Philosophy of Logic (4) Advanced topics in logic and/or philosophy of logic.

PHIL 560 Seminar in Metaphysics (4, max 16, Fa) Advanced topics in metaphysics.

PHIL 562 Philosophy of Mind (4, max 12) Contemporary approaches to a variety of questions about the nature of mental states and our knowledge of them.

PHIL 565 Philosophy of Language (4, max 12, FaSp) Philosophical issues in the empirical study of language concerning the relationship between linguistic meaning and the use of sentences to assert and convey information.

PHIL 570 Seminar in Epistemology (4, max 16) Advanced topics in epistemology.

PHIL 585 Seminar in Philosophy of Science (4, max 16) Advanced topics in the philosophy of science.

PHIL 589 Writing for Publication in Philosophy (4, max 8, Sp) Intensive writing seminar in which students read cutting-edge philosophy and take supervised steps towards crafting critical essays for publication.
Prerequisite: PHIL 500, PHIL 505.

PHIL 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PHIL 593x Teaching Philosophy (2, Fa) Basic principles of philosophical pedagogy, with emphasis on practical applications and the importance of career-long skill development. Required for first-semester teaching assistants in philosophy. Not available for major credit. Open only to philosophy doctoral students. Graded CR/NC.

PHIL 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

PHIL 599 Special Topics (2–4, max 8) Major trends of current thought; specific topics to be announced.

PHIL 636 Seminar in Semantics (3, max 12) (Enroll in LING 636)

PHIL 700x Dissertation Seminar (2, max 12) A focused environment in which to present and evaluate dissertation work-in-progress. Focus on peer and faculty feedback, developing professional presentation skills, improving critical communication skills. Graded CR/NC. Open only to philosophy doctoral students.

PHIL 790 Research (1–12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PHIL 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Lecturers: Ian Culbertson, B.A.; Stephanie Eggert, M.S.; Steve Hsu, M.S.; John Jessee, M.S.; Isabelle Pilliere Mazumdar, B.A.

The physical education program provides a variety of offerings in fitness and activities classes designed to promote health and general fitness based upon individual goals and needs. Fitness classes focus primarily on development of muscle strength, muscle endurance, cardiorespiratory endurance, flexibility, general wellness principles and nutritional guidelines. Activities classes stress fundamental techniques, tactics, rules, etiquette and the importance of leisure time activities to physical, mental and social well-being.

General Requirements

No more than four units of physical education activity courses may be applied to a student's overall unit requirement, toward his or her USC degree.

Registration in courses PHED 102ab–163 is contingent upon assessment of students' knowledge and competence in performance during the first two class meetings. Students who wear glasses while participating in vigorous activities must secure departmental approval of provisions made for eye protection in courses PHED 140. Course PHED 165 is reserved for students who are reporting for regular freshman or varsity athletic squads.

To obtain a prerequisite waiver to take a *b* class before having taken the *a* section, the instructor's approval and signature are needed. Students should be aware that in the future they cannot take the prerequisite course in the activity for credit after having it waived.

Courses of Instruction

PHYSICAL EDUCATION (PHED)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PHED 102ab Weight Training (1-1, FaSp) *a:* Improvement of body shape, muscle endurance, and muscle strength; understanding of weight training and nutrition principles that can be utilized for future weight training development. *b:* Training techniques and application of advanced weight training principles through weekly workouts; personal trainer certification exam preparation.

PHED 104ab Self-Defense (1-1, FaSp) *a:* Basic instruction of self-defense for beginners; strategies for standing and ground fighting situations with and without weapons. *b:* Intermediate instruction involving more advanced fighting strategies and techniques.

PHED 106ab Physical Conditioning (1-1, FaSp) *a:* Improvement in cardiorespiratory endurance, body composition, muscle endurance and flexibility; running, circuit training, resistance exercises; fitness principles and nutrition to develop individualized program. *b:* Advanced training methods focusing on continuing gains in fitness level.

PHED 108 High Stress Physical Conditioning (1) Rigorous physical conditioning with emphasis on distance running and development of cardiovascular and upper body strength. A challenging regimen to enhance stamina and endurance. *Prerequisite:* PHED 106b or permission of instructor.

PHED 110ab Swimming (1-1, FaSp) *a:* Instruction and practice in basic strokes for beginners and intermediate swimmers; elementary springboard diving; water safety techniques; endurance training as a fitness program. *b:* Advanced instruction and practice of strokes; advanced endurance training.

PHED 114 Lifesaving (1) American Red Cross Senior Lifesaving. *Prerequisite:* PHED 110ab or ability to pass

PHED 115 Surfing (1, FaSp) Fundamental instruction of surfing skills; water safety and etiquette; wave recognition and forecast interpretation; surf culture; board selection; surf related strengthening and stretching.

PHED 120ab Yoga (1-1, FaSp) *a*: Introduction to meditation, breathing techniques and postures as a means towards relaxation; increase muscle flexibility; understanding of basic anatomy and nutritional guidelines. (Duplicates credit in former PHED 120.) *b*: A continuing study of intermediate and advanced yoga postures, breathing techniques and meditation as a means toward relaxation and stress-reduction.

PHED 121 Yoga for Athletic Performance (1, FaSpSm) Skills and strategies for injury prevention and recovery from athletic training; application of yoga principles to improve posture, strength, flexibility, core stability and concentration. *Prerequisite*: PHED 120a.

PHED 124 Walking for Fitness (1, FaSp) Develop a strong fitness foundation through walking; fitness assessment and individualized programs; gait biomechanics and power walking; injury prevention; strategies for special populations.

PHED 129ab Aerobic Fitness (1-1, FaSpSm) *a*: Aerobic exercise focusing on cardiorespiratory endurance encompassing a variety of training methods such as high/low impact aerobics, body sculpting, circuit training and nutritional guidelines. *b*: Group exercise teaching techniques and application of fitness principles through weekly workouts; group fitness certification exam preparation.

PHED 131 Step Aerobics (1, FaSp) Development of physical fitness components through step aerobics; total body workout utilizing step movements and body sculpting exercises.

PHED 133 Rock Climbing (1, FaSp) Acquisition of basic rock climbing skills, muscle strength, endurance and balance, climbing safety, ethics and environmental considerations; understanding equipment, problem solving.

PHED 138 Beach Volleyball (1, FaSpSm) Fundamental instruction of skills and tactics specific to sand volleyball and related physical conditioning; rules and strategies; history and culture.

PHED 139ab Volleyball (1-1, FaSp) *a*: Introduction to beginning and intermediate volleyball skills, rules, game tactics, and strategies. Emphasis on the development of: passing, setting, hitting, serving, blocking, and digging. *b*: Advanced techniques; focus on offenses and defenses used in game situations.

PHED 140abc Tennis (1-1-1, FaSp) *a*: Fundamental instruction of basic strokes for beginners and intermediate players; rules, scoring, court etiquette, strategies; singles and doubles; practice and match play. *b*: Reinforcement of basic strokes and instruction of advanced strokes; advanced strategies; singles and doubles; practice and match play. *c*: Development of strokes and strategies for advanced tournament players; drills and matches.

PHED 143ab Racquetball (1-1, FaSp) *a*: Instruction of basic stroke technique for beginners and intermediate players; rules, scoring, game tactics; practice of strokes and competition. *b*: Development of advanced skills and strategies; singles and doubles practice and competition.

PHED 150 Table Tennis (1, FaSp) Fundamental instruction of basic strokes for beginning and intermediate players; rules, scoring strategies; singles and doubles; practices and match play.

PHED 153 Futsal (1, FaSpSm) Fundamental instruction of skills and tactics specific to Futsal; rules; strategies; elements of play that differ from soccer; conditioning, drills, and games.

PHED 154ab Soccer (1-1, FaSp) *a*: Development of basic skills for beginners, intermediate and advanced players; rules, positioning elements of play, small group and team tactics; full field scrimmages. *b*: Advanced development of skills, positioning, tactics and conditioning.

PHED 155 Golf (1, FaSp) Basic skills development and knowledge in stance, grip and swing mechanics; course strategy; use of woods, irons and putting; history rules and etiquette.

PHED 156ab Basketball (1-1, FaSp) a: Basic skill development in dribbling, passing, shooting, rebounding and defense; rules, history, and etiquette; drills and full court games. *b:* Development of advanced skills; team strategy; offenses and zone defenses; drills and full court games.

PHED 160 Stress Management for Healthy Living (2, FaSp) Instruction on the effects of stress as it relates to work, sport and academics; coping strategies are discussed and applied through physical conditioning interventions.

PHED 161 First Aid (1) First Aid safety education and infant, child, and adult CPR; demonstrated proficiency and successful completion of exam prepares students for Red Cross certification. (Duplicates credit in former PHED 171.)

PHED 162 Principles of Athletic Coaching (2, FaSpSm) Introduction to coaching strategies; team management; philosophy; ethics; leadership. Methodologies in sport specific training; skill progression; conditioning; athlete motivation; budgeting; fundraising.

PHED 163 Health Coaching (2, FaSpSm) Skills and strategies of coaching principles promoting healthy lifestyle change. Motivational communication techniques; goal setting; designing safe, effective exercise program; health coach certification exam preparation.

PHED 165 Varsity Athletics (1, max 4) Participation in the university's inter-collegiate programs as sanctioned and governed by the PAC-10 Conference and/or the NCAA. Graded CR/NC.

Assistant Professor (Teaching): Vahe Perroomian, Ph.D.

Emeritus Professors: Robert K. Cole, Ph.D.; Melvin A. Daybell, Ph.D.; Tu-Nan Chang, Ph.D.

Emeritus Professor (Research): Chung-Yung (Robert) Wu, Ph.D.

*Recipient of university-wide or college teaching award.

Degree Programs

The Department of Physics and Astronomy offers the Bachelor of Science in Physics, Bachelor of Science in Astronomy, Bachelor of Science in Physics/Computer Science, Bachelor of Arts in Physics, Bachelor of Arts in Astronomy, Bachelor of Science in Biophysics, Bachelor of Science in Physical Sciences, a minor in physics or astronomy, Master of Science in Physics, Master of Science in Physics for Business Applications, Master of Arts in Physics and Doctor of Philosophy in Physics.

Dornsife College of Letters, Arts and Sciences

Physics and Astronomy

Undergraduate Degrees

Bachelor of Science in Physics

This program is intended primarily for students who are interested in a career in physics.

REQUIRED LOWER-DIVISION COURSES

		UNITS
CHEM 115aLbL**	Advanced General Chemistry	4-4
MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 226	Calculus III	4
MATH 245	Mathematics of Physics and Engineering I	4
PHYS 161L*	Advanced Principles of Physics I	4
PHYS 162L*	Advanced Principles of Physics II	4
PHYS 163L*	Advanced Principles of Physics III	4
PHYS 190	Physics Discovery Series	1

REQUIRED UPPER-DIVISION COURSES		UNITS
MATH 445	Mathematics of Physics and Engineering II	4
PHYS 304	Mechanics	4
PHYS 316	Thermodynamics and Statistical Mechanics	4
PHYS 408ab	Electricity and Magnetism	4-4
PHYS 438ab	Introduction to Quantum Mechanics and its Applications	4-4
PHYS 440	Introduction to Condensed Matter Physics	4
PHYS 492L	Senior Laboratory	4
PHYS 493L	Advanced Experimental Techniques	4
Total units		77

**PHYS 151L, PHYS 152L and PHYS 153L may be substituted for the sequence PHYS 161L, PHYS 162L and PHYS 163L.*

***CHEM 105aLbL may be substituted for the sequence CHEM 115aLbL.*

Bachelor of Science in Astronomy

This program is intended primarily for students who are interested in a career in astronomy.

REQUIRED LOWER-DIVISION COURSES		UNITS
MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 226	Calculus III	4
MATH 245	Mathematics of Physics and Engineering I	4
PHYS 161L*	Advanced Principles of Physics I	4
PHYS 162L*	Advanced Principles of Physics II	4
PHYS 163L*	Advanced Principles of Physics III	4
PHYS 190	Physics Discovery Series	4

REQUIRED UPPER-DIVISION COURSES		UNITS
ASTR 400	The Solar System	4
ASTR 422	Galaxies and Large-Scale Structures in the Universe	4
ASTR 424	Cosmology	4
ASTR 450	Stellar Astrophysics	4
MATH 445	Mathematics of Physics and Engineering II	4
PHYS 304	Mechanics	4
PHYS 316	Thermodynamics and Statistical Mechanics	4
PHYS 408a	Electricity and Magnetism	4
PHYS 438ab	Quantum Mechanics and its Applications	4-4
PHYS 493L	Advanced Experimental Techniques	4
Total units		73

**PHYS 151L, PHYS 152L and PHYS 153L may be substituted for the sequence PHYS 161L, PHYS 162L and PHYS 163L.*

Bachelor of Science in Physics/Computer Science

This program is intended for students with dual interests in physics and computer science who wish to complete the essential courses for both majors within their normal four-year career.

REQUIRED LOWER-DIVISION COURSES	UNITS
---------------------------------	-------

CSCI 103L	Introduction to Programming	3
CSCI 104L	Data Structures and Object Oriented Design	4
CSCI 170	Discrete Methods in Computer Science	4
CSCI 201L	Principles of Software Development	4
CSCI 270	Introduction to Algorithms and Theory of Computing	4
MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 225	Linear Algebra and Linear Differential Equations	4
MATH 226	Calculus III	4
MATH 245	Mathematics of Physics and Engineering I	4
PHYS 161L*	Advanced Principles of Physics I	4
PHYS 162L*	Advanced Principles of Physics II	4
PHYS 190	Physics Discovery Series	1

REQUIRED UPPER-DIVISION COURSES		UNITS
CSCI 350	Introduction to Operating Systems	4
EE 352L	Computer Organization and Architecture	3
MATH 445	Mathematics of Physics and Engineering II	4
PHYS 304	Mechanics	4
PHYS 408ab	Electricity and Magnetism	4-4
PHYS 438ab	Introduction to Quantum Mechanics and its Applications	4-4
PHYS 495	Senior Project	2
Total units		81

***PHYS 151L and 152L may be substituted for PHYS 161L and 162L respectively.*

Bachelor of Arts in Physics

This program is intended for students with an interest in physics who may not intend to pursue a career in physics.

REQUIRED LOWER-DIVISION COURSES		UNITS
CHEM 105aLbL**	General Chemistry	4-4
MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 226	Calculus III	4
MATH 245	Mathematics of Physics and Engineering I	4
PHYS 161L*	Advanced Principles of Physics I	4
PHYS 162L*	Advanced Principles of Physics II	4
PHYS 163L*	Advanced Principles of Physics III	4
PHYS 190	Physics Discovery Series	1

REQUIRED UPPER-DIVISION COURSES		UNITS
MATH 445	Mathematics of Physics and Engineering II	4
PHYS 304	Mechanics	4
PHYS 316	Thermodynamics and Statistical Mechanics	4

PHYS 408a	Electricity and Magnetism	4
PHYS 438a	Introduction to Quantum Mechanics and its Applications	4
PHYS 492L	Senior Laboratory	4
Choose one:		4
PHYS 408b	Electricity and Magnetism	
PHYS 438b	Introduction to Quantum Mechanics and its Applications	
PHYS 440	Introduction to Condensed Matter Physics	
PHYS 493L	Advanced Experimental Techniques	
Total units		65

**PHYS 151L, PHYS 152L and PHYS 153L may be substituted for the sequence PHYS 161L, PHYS 162L and PHYS 163L.*

***CHEM 115aLbL may be substituted for the sequence CHEM 105aLbL.*

Bachelor of Arts in Astronomy

This program is intended for students with an interest in astronomy who may not intend to pursue a career in the field.

REQUIRED LOWER-DIVISION COURSES		UNITS
MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 226	Calculus III	4
MATH 245	Mathematics of Physics and Engineering I	4
PHYS 161L*	Advanced Principles of Physics I	4
PHYS 162L*	Advanced Principles of Physics II	4
PHYS 163L*	Advanced Principles of Physics III	4
PHYS 190	Physics Discovery Series	4

REQUIRED UPPER-DIVISION COURSES		UNITS
ASTR 400	The Solar System	4
ASTR 422	Galaxies and Large-Scale Structures in the Universe	4
ASTR 424	Cosmology	4
ASTR 450	Stellar Astrophysics	4
PHYS 304	Mechanics	4
PHYS 316	Thermodynamics and Statistical Mechanics	4
PHYS 493L	Advanced Experimental Techniques	4
Total units		57

**PHYS 151L, PHYS 152L and PHYS 153L may be substituted for the sequence PHYS 161L, PHYS 162L and PHYS 163L.*

Bachelor of Science in Biophysics

This program is intended for students with an interest in the interdisciplinary field of biophysics. The degree program provides the physics and biology background necessary for the field while simultaneously fulfilling medical school entrance requirements.

REQUIRED LOWER-DIVISION COURSES		UNITS
BISC 120L	General Biology: Organismal Biology and Evolution	4
BISC 220L	General Biology: Cell Biology and Physiology	4
CHEM	Advanced General Chemistry	

115aLbL*		4-4
MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 226	Calculus III	4
MATH 245	Mathematics of Physics and Engineering I	4
PHYS 161L**	Advanced Principles of Physics I	4
PHYS 162L**	Advanced Principles of Physics II	4
PHYS 163L**	Advanced Principles of Physics III	4
PHYS 190	Physics Discovery Series	1

REQUIRED UPPER-DIVISION COURSES		UNITS
BISC 320L	Molecular Biology	4
BISC 330L	Biochemistry	4
CHEM 322abL	Organic Chemistry	4-4
MATH 445	Mathematics of Physics and Engineering II	4
PHYS 304	Mechanics	4
PHYS 316	Thermodynamics and Statistical Mechanics	4

PHYS 438a	Introduction to Quantum Mechanics and its Applications	4
PHYS 444	Physical Biology: From Molecules to Cells	4
Total units		56

*PHYS 151L, PHYS 152L and PHYS 153L may be substituted for the sequence PHYS 161L, PHYS 162L and PHYS 163L.

**PHYS 151L, PHYS 152L and PHYS 153L may be substituted for the sequence PHYS 161L, PHYS 162L and PHYS 163L.

Bachelor of Science in Physical Sciences

This program is intended for students with an interest in the physical sciences. The program is designed to allow students interested in teaching at the secondary level to enroll in courses required for the California Single Subject Teaching credential offered through the School of Education.

REQUIRED LOWER-DIVISION COURSES		UNITS
CHEM 115aLbL**	Advanced General Chemistry	4-4
GEOL 105L	Planet Earth	4
PHYS 151L	Fundamentals of Physics I: Mechanics and Thermodynamics	4
PHYS 152L	Fundamentals of Physics II: Electricity and Magnetism	4
PHYS 153L	Fundamentals of Physics III: Optics and Modern Physics	4

REQUIRED UPPER-DIVISION COURSES		UNITS
Astronomy elective*		4
Chemistry elective*		4
Earth Science elective*		4
Physics elective*		4
Three additional electives from these fields*		12

*Upper-division courses must be applicable to majors in their respective departments.

**CHEM 105aLbL may be substituted for the sequence CHEM 115aLbL.

OTHER COURSES		UNITS
MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 226	Calculus III	4
Total units		64

Department Requirements for a Minor in Physics

The physics minor is open to all students. Engineering students must take a minimum of three upper-division courses unique to the minor.

REQUIRED COURSES		28 UNITS
MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 226	Calculus III	4
MATH 245	Mathematics of Physics and Engineering I	4
PHYS 151L	Fundamentals of Physics I: Mechanics and Thermodynamics	4
PHYS 152L	Fundamentals of Physics II: Electricity and Magnetism	4
PHYS 153L	Fundamentals of Physics III: Optics and Modern Physics	4

ELECTIVES — CHOOSE 3		12 UNITS
PHYS 304	Mechanics	4
PHYS 316	Thermodynamics and Statistical Mechanics	4
PHYS 408a	Electricity and Magnetism	4
PHYS 438a	Introduction to Quantum Mechanics and its Applications	4
Total units		40

Department Requirements for a Minor in Astronomy

The astronomy minor is open to all students. A minimum of three courses taken toward the minor must be unique to the minor.

REQUIRED COURSES		24 UNITS
MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 226	Calculus III	4
PHYS 151L	Fundamentals of Physics I: Mechanics and Thermodynamics	4
PHYS 152L	Fundamentals of Physics II: Electricity and Magnetism	4
PHYS 153L	Fundamentals of Physics III: Optics and Modern Physics	4

ELECTIVES — CHOOSE 3		12 UNITS
ASTR 400	The Solar System	4
ASTR 422	Galaxies and Large-Scale Structures in the Universe	4
ASTR 424	Cosmology	4
ASTR 450	Stellar Astrophysics	4
Total units		36

Grade Point Average in Major Subject

A GPA of C (2.0) or higher is required in all upper-division courses taken in the department for all of the above

major degree programs. A grade of C (2.0) or higher is required in all courses in the department specifically listed as subject requirements.

Advisement

Advisement is required for all B.S. and B.A. degree candidates in the department. Students should meet with their departmental academic adviser at least once a semester to review the direction of their academic programs. Students who have not met with an adviser should contact the director of undergraduate affairs. Students are also encouraged to seek the advisement of faculty members whose specializations are appropriate to their intended field of graduate study.

Undergraduate Research Opportunities

Students are encouraged to become familiar with the research programs of the faculty in the department. Students who intend to pursue a Ph.D. and a career in research in physics or astronomy following graduation are strongly encouraged to become involved directly in one of the research programs, whether as summer research assistants or as part-time laboratory assistants during the academic year. Specific research opportunities will depend upon individual faculty research programs.

Dornsife College of Letters, Arts and Sciences

Physics and Astronomy

Graduate Degrees

The Department of Physics and Astronomy offers graduate study at the master's and doctoral degree levels. The graduate program prepares students for professional careers in research, teaching and developmental applications of physics.

Entering students spend time in intensive course work providing a broad background in advanced physics regardless of degree objective. Subsequent study involves a mix of course work, practical training and independent research (depending on degree objective). The doctoral program affords exceptionally close collaboration between students and faculty.

Research Areas: Experimental, Theoretical and Computational

Opportunities for research are offered in atomic, molecular and optical/laser physics, astrophysics, elementary particle theory, string theory, quantum field theory, earthquake physics, helioseismology, condensed matter physics, quantum electronics/nonlinear optics, space physics and ultralow temperature physics.

Degree Requirements

Graduate degrees in the Department of Physics and Astronomy are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Graduate study in physics is divided into three degree objectives:

Master of Science and Master of Arts in Physics

Admission Requirements

The prerequisite for admission for a master's degree in the Department of Physics and Astronomy is a bachelor's degree in physics or a related field. All applicants for admission must take the Graduate Record Examinations, including the Physics Subject Test. Transcripts of undergraduate records as well as transcripts of any graduate-level courses are required. The TOEFL or IELTS is required of international students applying for a teaching assistantship as well as for those applying for admission only. Applicants may be admitted as a degree candidate

at the beginning of fall or spring semester.

Residence

All M.S. and M.A. degree students normally take at least three courses for each of two semesters. A total of 24 units of credit is required for graduation. Admitted students may transfer a maximum of 4 units of credit to apply toward the degree requirements.

Foreign Language Requirement

There is no foreign language requirement for the M.S. or M.A.

Course Requirements

Option A M.S. in Physics: The M.S. degree requires satisfactory completion of seven courses (exclusive of PHYS 500 and PHYS 594), of which no more than one course may be PHYS 590 Directed Research. In addition, satisfactory completion of a thesis (and 4 units of PHYS 594) is required.

Option B M.A. in Physics: The M.A. degree requires satisfactory completion of eight courses (exclusive of PHYS 500 and PHYS 590) plus a high level of performance on the comprehensive examination.

The required courses for either option are PHYS 504, PHYS 508a and PHYS 558a. For either option at least five courses must be at the 500 level or higher and remaining courses at the 400 level or higher; at least five courses must be in physics. All required physics courses must be passed with a grade of B- or better. No upper-division courses required for the B.A. in physics at USC may be counted for credit toward the M.A. or M.S. degree.

Comprehensive Examination

All master's degree candidates are required to take the departmental screening examination not later than during their second semester (excluding summer). This examination serves as the required comprehensive examination for the M.A. degree. A high level of performance is required for the M.A. degree, and a superior level is required for admission to (or continuation in) the Ph.D. program.

Master of Science in Physics for Business Applications

Admission Requirements

The prerequisite for admission to the Master of Science in Physics for Business Applications is a bachelor's degree in physics, chemistry, mathematics, engineering or related field. Applicants should have previous upper-division course work in electricity and magnetism and quantum mechanics/modern physics. All applicants for admission must take the Graduate Record Examinations general test and are encouraged to take the Physics Subject Test. Transcripts of undergraduate records as well as transcripts of any graduate-level courses are required. The TOEFL or IELTS is required of international students applying for a teaching assistantship as well as for those applying for admission only. Applicants may be admitted to the program at the beginning of fall or spring semester.

Residence

All full-time M.S. degree students are expected to take three courses toward the degree for each of the first three semesters. Part-time students are expected to complete at least three courses per calendar year. A total of 36 units of credit is required for graduation. Admitted students may transfer a maximum of 8 units of credit to apply toward degree requirements.

Foreign Language Requirement

There is no foreign language requirement for the M.S. degree.

Computer Language Requirement

By the end of the first semester in residence, students are required to demonstrate a skill level in programming in C or C++. This skill may be demonstrated by a practical exam or by passing a relevant computer language course.

Course Requirements

The M.S. in Physics for Business Applications degree requires completion of 36 units of course work plus satisfactory submission of a final technical report. The physics requirement is 17 units of courses, including PHYS

516, PHYS 518, PHYS 520, PHYS 558a, PHYS 650 and PHYS 692. The business requirement is 12 units of courses. Business courses may be selected from one of three tracks: Corporate Finance (GSBA 510, GSBA 548 and one of GSBA 518 or GSBA 543 are required with electives chosen from FBE 529, FBE 531, FBE 532 and FBE 562); Information Systems (GSBA 518 or GSBA 543 required with electives chosen from IOM 533 and IOM 540); or Operations Management (GSBA 518 or GSBA 543 required with electives chosen from DSO 525, DSO 537, DSO 581, DSO 582 and DSO 583). Alternative business tracks can be taken with departmental approval. An additional 6 units of technical electives are required, to be chosen from PHYS 408b, PHYS 440, PHYS 504, PHYS 510, PHYS 558b, MATH 407 or MATH 408. Alternative technical electives can be taken with departmental approval. All required courses must be passed with a grade of B- or better.

Final Technical Report

All students in physics are required to submit a final technical report within one semester of completion of the internship PHYS 692. This report will be reviewed by the department to establish both its technical merit and the quality of written communication skills of the master's student. A grade will be registered for PHYS 692 upon satisfactory review of the final report.

Doctor of Philosophy in Physics

Application deadline: January 1

Admission Requirements

The prerequisite for admission to the doctoral program in the Department of Physics and Astronomy is a bachelor's (or master's) degree in physics or related field. All applicants for admission must take the Graduate Record Examinations, including the Physics Subject Test. Transcripts of undergraduate records as well as transcripts of any graduate-level courses are required. The TOEFL or IELTS is required of international students applying for a teaching assistantship as well as for those applying for admission only. Applicants may be admitted to the program at the beginning of the fall or spring semester.

Residence

Ph.D. students in physics normally enroll in three courses for each of the first four semesters in graduate school. A total of 60 units of credit is required for graduation. Students admitted to the Ph.D. program may transfer a maximum of 30 units of credit to apply toward degree requirements. For students admitted with Advanced Standing (entry with an appropriate completed graduate degree from an accredited institution), a minimum of 36 units of course work beyond that graduate degree, exclusive of PHYS 794, will be required.

Foreign Language Requirement

There is no foreign language requirement for the Ph.D.

Course Requirements

The student is expected to have prepared for understanding all branches of physics. A minimum of 11 graduate courses in physics, excluding graduate colloquium, dissertation and directed research courses, taken at this university and elsewhere, is required. The required courses for the Ph.D. are PHYS 504, 508ab, PHYS 510, PHYS 518 and PHYS 558ab plus four elective graduate courses in physics. In addition, four units of PHYS 500 and PHYS 794 are required. All required physics courses (except 500 and 794) must be passed with a grade of B- or better. After passing the qualifying examination the student must register for PHYS 794 Doctoral Dissertation each fall and spring semester.

Screening Procedure

Any student proceeding toward the Ph.D. in physics must pass the departmental screening examination at a superior level. The exam must be taken not later than during the second semester (excluding summers, but including time in the M.A./M.S. program) in the department. New advanced students who have passed an equivalent comprehensive examination at a well-recognized research university with superior grades may apply to the departmental examination committee for an oral interview in order to be exempted from the written screening examination. A faculty member who supervises the research of such a student in the department must support this application.

Qualifying Exam Committee

The graduate adviser serves as adviser to incoming students and assists in the appointment of the qualifying exam committee, which is formed after the screening examination has been passed. After the student passes the qualifying examination and a dissertation topic is approved, the five-member qualifying exam committee becomes known as the dissertation committee and is responsible for monitoring the candidate's progress and for approving the final content and form of the dissertation.

Qualifying Examination

The qualifying examination must be attempted not later than during the fifth semester (or in the case of advanced students, the third semester) in the department (excluding summer). The Ph.D. qualifying examination contains a written part and an oral part. The written part consists of a critical review by the student of a published work selected by the qualifying exam committee and of a research proposal prepared by the student on the area in which the student intends to do a doctoral dissertation. The oral part expands on the written part.

Dissertation

A doctoral dissertation in physics is expected to be an extensive description of original research carried out by the student. A complete discussion of reported research in relation to previous work by others is essential.

Defense of the Dissertation

The dissertation must be defended in a final oral examination. The candidate must be prepared to answer general questions in the field as well as specific questions regarding the dissertation.

Dornsife College of Letters, Arts and Sciences

Physics and Astronomy

Courses of Instruction

ASTRONOMY (ASTR)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ASTR 100Lgx The Universe (4, FaSp) Survey of the universe: planets, satellites, comets, stars, nebulae, galaxies. Practical component includes planetary observations and dark-sky field trip. Not available for major credit.

ASTR 104L Special Laboratory (1, FaSp) Laboratory component for ASTR 100Lgx for transfer students with equivalent lecture credit from another institution. For transfer students only. Graded CR/NC.

ASTR 200Lgx Earth and Space (4) Study of earth as a physical object and an object in space. Topics include seismic events, earth interior, other planets, formation of the sun and earth. Not available for major credit.

ASTR 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

ASTR 400 The Solar System (4, 2 years, Fa) Earth's motions; planets and their satellites; comets; meteorites; interplanetary matter; elementary celestial mechanics. *Prerequisite:* MATH 226.

ASTR 422 Galaxies and Large-Scale Structures in the Universe (4, 2 years, Sp) Galaxies and clusters of galaxies: their content, structure, dynamics, distribution, and motions; the cosmic microwave background: theory and observation; elements of observational cosmology. *Prerequisite:* PHYS 153L or PHYS 163L.

ASTR 424 Cosmology (4, 2 years, Sp) Concepts of space-time, general relativity applied to an homogeneous and expanding universe. Universe's content and thermal history. Introduction to current observational tests of

cosmology. *Prerequisite:* PHYS 153L or PHYS 163L.

ASTR 450 Stellar Astrophysics (4, 2 years, Fa) Observation and theory of stellar atmospheres and stellar interiors. Theory of stellar evolution. Physical and astronomical significance of the end states of stellar evolution. *Prerequisite:* PHYS 153L or PHYS 163L.

ASTR 490x Directed Research (1–8, max 12) Individual research and readings. Not available for graduate credit. *Prerequisite:* one upper-division course in astronomy and departmental approval.

ASTR 540 Advanced Cosmology (3) Perturbed Einstein's and Boltzman equations, Universe's content, anisotropies: initial conditions, linear evolution, comparison with observations. *Prerequisite:* PHYS 504, PHYS 508ab, PHYS 510, PHYS 518.

ASTR 740 Selected Topics in Astrophysics (3, max 6) Selected topics in cosmology. Course content includes dark matter, dark energy, gravitational lensing, the cosmic microwave background, inflation, galaxy and galaxy cluster surveys. *Prerequisite:* ASTR 540

PHYSICS (PHYS)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PHYS 051x Problem Solving in Mechanics and Thermodynamics (1) Intensive practice in solving elementary problems within a student-centered learning environment. Not available for degree credit. Graded CR/NC. *Concurrent enrollment:* PHYS 151L.

PHYS 100Lgx The Physical World (4, FaSp) The fundamentals of physics presented with emphasis on the structure and beauty of physical laws. Practical component will relate these laws to commonly encountered events. Not available for major credit.

PHYS 125Lg Physics for Architects (4, Sp) Fundamental laws and principles of physics with emphasis on the application of physical principles to the problems of architecture. Lecture, 4 hours; laboratory, 3 hours. (Duplicates credit in PHYS 135abL.) *Prerequisite:* MATH 108g.

PHYS 135agbL Physics for the Life Sciences (4-4, FaSpSm) Fundamental laws and principles of physics emphasizing areas related to life sciences; prerequisite for biological sciences, medicine, dentistry, and pharmacy. Lecture, 4 hours; laboratory, 3 hours. (Duplicates credit in PHYS 125L.) *Prerequisite:* Passing of Math Placement Exam or MATH 108g or MATH 125 or MATH 126 or MATH 226.

PHYS 141L Special Laboratory I (1, FaSpSm) Laboratory component for PHYS 151Lg for transfer students with equivalent lecture credit from another institution. For transfer students immediately after matriculation. Graded CR/NC.

PHYS 142L Special Laboratory II (1, FaSpSm) Laboratory component for PHYS 152L for transfer students with equivalent lecture credit from another institution. For transfer students immediately after matriculation. Graded CR/NC.

PHYS 143L Special Laboratory III (1, FaSpSm) Laboratory component for PHYS 153L for transfer students with equivalent lecture credit from another institution. For transfer students immediately after matriculation. Graded CR/NC.

PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics (4, FaSpSm) Gateway to the majors and minors in Physics and Astronomy. Statics and dynamics of particles and rigid bodies, conservation principles, gravitation, simple harmonic oscillators, thermodynamics, heat engines, entropy. Lecture, 3 hours; laboratory, 3 hours. *Prerequisite:* MATH 125 or MATH 126 or MATH 226.

PHYS 152L Fundamentals of Physics II: Electricity and Magnetism (4, FaSpSm) Electrostatics, magnetostatics, electrical circuits, wave motion, sound waves, electromagnetic waves. Lecture, 4 hours; laboratory, 3 hours. *Prerequisite:* PHYS 151L, MATH 126; *corequisite:* MATH 226.

PHYS 153L Fundamentals of Physics III: Optics and Modern Physics (4, FaSpSm) Geometrical optics, interference, diffraction, special relativity, quantum mechanics, atomic physics, solid state physics. Lecture, 3 hours; laboratory, 3 hours. *Prerequisite:* PHYS 152L.

PHYS 161Lg Advanced Principles of Physics I (4, Sp) Gateway to the majors and minors in Physics and Astronomy. Introductory treatment intended for well-qualified students. Dynamics of particles and rigid bodies, conservation laws, wave motion, thermodynamics, heat engines, entropy. Lecture, 4 hours; laboratory, 3 hours. *Prerequisite:* MATH 126; *corequisite:* MATH 226.

PHYS 162L Advanced Principles of Physics II (4, Fa) Electrostatics, magnetostatics, electrical circuits, electric and magnetic properties of matter, Maxwell's equations, electromagnetic waves, propagation of light. *Prerequisite:* MATH 226; *recommended preparation:* PHYS 161L.

PHYS 163L Advanced Principles of Physics III (4, Sp) Interference and diffraction of waves, special relativity, quantum mechanics, atomic physics, nuclear physics, condensed matter physics, elementary particles. Lecture, 3 hours; laboratory, 3 hours. *Prerequisite:* PHYS 162L.

PHYS 190 Physics Discovery Series (1, Fa) Introduction to current research activities of the faculty of the department; topics of current and popular interest among the wider community of physicists. Graded CR/NC.

PHYS 200Lgx The Physics and Technology of Energy (4, FaSp) Investigation of energy technologies, including development and implementation issues. Topics include the industrial revolution, electromagnetic induction, power transmission, combustion engines, fission and fusion. Not available for major credit.

PHYS 304 Mechanics (4, Fa) Dynamics of particles, kinematics of rotations, rigid body motion, Lagrangian and Hamiltonian formalism, theory of small vibrations. *Prerequisite:* PHYS 151L or PHYS 161L, MATH 245.

PHYS 316 Thermodynamics and Statistical Mechanics (4, 2 years, Sp) First, second, and third thermodynamic laws; thermodynamic potentials, applications; distribution laws, kinetic theory, transport phenomena, specific heats. *Prerequisite:* PHYS 152L or PHYS 161L, MATH 226.

PHYS 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

PHYS 408ab Electricity and Magnetism (a: 4, Fa; b: 4, Sp) *a:* Electrostatics; thermal, chemical, magnetic effects of steady currents; DC circuits. *b:* Electromagnetic induction; AC circuits; Maxwell's equations. *Prerequisite:* PHYS 152L or PHYS 162L; *Corequisite:* MATH 245 (for PHYS 408a), MATH 445 (for PHYS 408b).

PHYS 430 General Relativity and Gravitation (4, Sp) Geometry of the Universe, special relativity, curved metrics, black holes, equivalence principle, cosmology, Friedman-Robertson-Walker geometry, Einstein's equations. *Prerequisite:* PHYS 304.

PHYS 438ab Introduction to Quantum Mechanics and its Applications (a: 4, Sp; b: 4, Fa) *a:* Concepts and techniques of quantum mechanics; free and bound states, the hydrogen atom. *b:* Relativity, atomic spectra, quantum statistics, nuclear models, nuclear reactions, elementary particles. *Prerequisite:* PHYS 304; *corequisite:* MATH 445.

PHYS 440 Introduction to Condensed Matter Physics (4, Irregular, Sp) Crystal structures, x-ray diffraction, thermal properties of solids, diamagnetism and paramagnetism, free-electron model of metals, semiconductors, ferromagnetism, super-conductivity, imperfections in crystals. *Corequisite:* PHYS 438a.

PHYS 444 Physical Biology: From Molecules to Cells (4, Fa) Length, time, and energy scales of life; statistical mechanics of biomolecules and cellular processes; physics of cell shape; biological fluid dynamics; electron transfer and metabolism. *Prerequisite:* PHYS 152L or PHYS 162L; *recommended preparation:* BISC 220L.

PHYS 472 Introduction to Lasers and Laser Systems (3, Fa) (Enroll in EE 472)

PHYS 473L Lasers and Optics Laboratory (3, Sp) (Enroll in EE 473L)

PHYS 490x Directed Research (1–8, max 12) Individual research and readings. Not available for graduate credit.

PHYS 492L Senior Lab (4, Fa) Projects will include experiments in mechanics, thermodynamics, electricity and magnetism. Emphasis on laboratory work with discussion of theoretical background. Lecture, 2 hours; laboratory, 6 hours. *Prerequisite:* PHYS 152L.

PHYS 493L Advanced Experimental Techniques (4, Sp) Development of modern experimental techniques, including computer interface with data acquisition hardware and data analysis by software, applied specifically to experiments in modern physics. Emphasis on laboratory work with discussion of theoretical background. Lecture, 2 hours; laboratory, 6 hours. *Prerequisite:* PHYS 152L.

PHYS 495 Senior Project (2) An original project will be constructed applying computer technology (in either hardware or software) to produce a result useful in the physics classroom or laboratory.

PHYS 499 Special Topics (2–4, max 4) Lectures and discussions on specialized topics in physics.

PHYS 500 Graduate Colloquium (1, max 4, FaSp) Topics of current research interest in physics and astronomy. Lectures directed to physics graduate students by faculty of the department and by outside speakers. Graded CR/NC.

PHYS 502 Advanced Optics (3, Irregular) Interaction of light and matter; laser oscillation condition; optical resonators; spectroscopy; pumping mechanisms; characteristics of dielectric, semiconductor, gas, and liquid lasers; topics in nonlinear optics.

PHYS 504 Advanced Mechanics (3, Fa) Newtonian formulation of dynamics; Hamilton's principle; Lagrangian formulation; rigid body motion; Hamiltonian formulation; Hamilton-Jacobi theory; vibrations.

PHYS 508ab Advanced Electricity and Magnetism (a: 3, Sp; b: 3, Fa) *a:* Electrostatics, boundary value problems, multipole expansions, microscopic models of matter, magnetostatics. *b:* Maxwell's equations, potentials and gauge transformations; electromagnetic waves; wave guides; electromagnetic radiation; special relativity.

PHYS 510 Methods of Theoretical Physics (3, Fa) Vector analysis; infinite, asymptotic Fourier series; complete sets; Dirac delta function; Fourier, Laplace transforms; Legendre functions; spherical harmonics; Sturm-Liouville theory; orthogonal polynomials; gamma-factorial function; complex variables.

PHYS 514 Methods of Experimental Physics (3, Irregular) Techniques of general utility in contemporary physics research, with emphasis on the use of commercially available instrumentation.

PHYS 516 Methods of Computational Physics (3, Sp) Introduction to algorithm development. Integration of ordinary differential equations; chaotic systems; molecular dynamics; Monte Carlo integration and simulations; cellular automata and other complex systems. *Recommended preparation:* ability to program in C or C++.

PHYS 518 Thermodynamics and Statistical Mechanics (3, Fa) Principles of, and relations between, thermodynamics and statistical mechanics; ensembles, partition function formalism; quantum statistics of non-interacting particles; fluctuations.

PHYS 520 Methods for Complex Systems (3, Fa) Probabilities, random walks, generalized central limit theorems, probabilities in thermodynamics, critical phenomena, self organized criticality, phenomenology of catastrophies, dynamical systems and examples from outside physics.

PHYS 530 Relativity (3, Irregular) Fundamentals of the special theory and applications to classical and quantum physics; the principle of equivalence; tensor analysis and Einstein's theory of gravitation; relativistic cosmology. *Recommended preparation:* PHYS 504a, PHYS 508a.

PHYS 540 Solid State Physics (3, Fa) Fundamental concepts and techniques in solid state physics; electron gas at metallic densities; semiclassical transport; crystallography; band structure; phonons; screening;

superconductivity; magnetic ordering. *Recommended preparation:* PHYS 518a, PHYS 558a.

PHYS 558ab Quantum Mechanics (a: 3, Sp; b: 3, Fa) *a:* General formulation of quantum mechanics with applications; theory of measurement; exactly solvable problems; angular momentum formalism. *b:* Approximation schemes and applications to atomic and molecular physics and scattering theory; identical particles; electromagnetic properties of atoms.

PHYS 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PHYS 593 Practicum in Teaching Physics and Astronomy (2, Fa) Practical principles for the long-term development of effective teaching within the physical sciences. Intended for teaching assistants in Dornsife College. Graded CR/NC.

PHYS 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

PHYS 630 Science of Nanoscale Materials (3, Fa) Fundamental physics of low dimensional systems, with an emphasis on nanoscale materials (e.g. nanodot, nanowire, graphene) and state-of-the-art research topics, including characterization of nanostructure materials, and device concepts that take the advantage of low dimensionality. *Prerequisite:* PHYS 440; *recommended preparation:* knowledge of basic quantum mechanics.

PHYS 640 Advanced Condensed Matter Physics (3, Sp) Magnetism, magnons; superconductivity; transport phenomena; many-body effects; interacting electron gas; Hartree-Fock theory; neutron and X-ray scattering; and other selected topics. *Recommended preparation:* PHYS 540, PHYS 558b.

PHYS 650 Topics in Current Research (2, Fa) Course content will vary each year. It will include topics of current interest in research conducted in academia and industry.

PHYS 660 Quantum Information Science and Many-Body Physics (3, Sp) Introduction to advanced techniques in theoretical many-body physics based on quantum information theory. *Prerequisite:* PHYS 438ab; *recommended preparation:* Introduction to quantum information and computation, mathematical methods for theoretical physics.

PHYS 668 Advanced Quantum Mechanics (3, Sp) Relativistic wave equations; second quantization of Klein-Gordon, Dirac and Maxwell fields; applications in quantum electrodynamics and condensed matter physics. *Recommended preparation:* PHYS 558b.

PHYS 669ab Group Theory and Symmetries in Physics (3-3, Irregular) *a:* Abstract group theory; representation theory; point groups; selection rules; crystal tensors; molecular vibrations; rotation group; SU(2); Wigner-Eckart theorem; crystal-field splitting; time-reversal symmetry; gauge invariance; SU(3) and quarks. *b:* Application of group theory in field theory and particle physics: Lie groups and representations, Young tableaux, Dynkin diagrams, Poincare group, classical groups and supergroups, gauge theories. *Recommended preparation:* PHYS 558b.

PHYS 670 High Energy Physics (3, Irregular) Elementary particles and the fundamental forces acting on them. Quarks, leptons, symmetries, gauge invariance, spontaneously broken symmetry, electroweak theory, quantum chromodynamics grand unified theory, strings. *Recommended preparation:* PHYS 668.

PHYS 678 Relativistic Quantum Field Theory (3, Irregular) Computational methods in relativistic quantum field theory: Feynman path integral, covariant perturbation theory, regularization, renormalization group, and non-perturbative techniques. *Recommended preparation:* PHYS 668.

PHYS 680 Advanced Quantum Field Theory (3, Irregular) Renormalization, quantization of gauge theories, non-Abelian gauge theories, quantum chromodynamics, spontaneous symmetry breaking, the standard model, anomalies. *Recommended preparation:* PHYS 678.

PHYS 682 Supersymmetric Field Theory (3, Fa) Supersymmetry algebra, Coleman-Mandula theorem, N=1 and N=2 Yang-Mills theory, Seiberg duality, holomorphy, introduction to Seiberg-Witten theory, electromagnetic duality, BPS states. *Recommended preparation:* PHYS 678, PHYS 680.

PHYS 684 Advanced String Theory (3, Sp) Advanced string theory. Strong coupling and nonperturbative techniques. D-branes, black holes, duality, AdS/CFT. Applications in particle, nuclear and condensed matter physics, and quantum gravity. *Recommended preparation:* PHYS 530, PHYS 678, PHYS 680.

PHYS 690 Introduction to Physical Biology (3, Sp) Introduces students to the role of physics in biology. Considers both experimental and more fundamental points of view. Explores a few current research directions. *Recommended preparation:* good knowledge of basic statistical mechanics and thermodynamics.

PHYS 692 Internship (3 or 6, max 6, FaSpSm) Field application of physics in a business or industry setting; part-time employment. Project to be jointly defined by student, employer and professor. Open to M.S. Physics for Business Applications degree candidates only.

PHYS 710 Selected Topics in Experimental Physics (3, max 6) Course content will vary yearly with current interest. Topics covered may include superconducting quantum interference devices, scanning tunneling microscopy, and laser cooling and trapping of single atoms.

PHYS 720 Selected Topics in Theoretical Physics (3, max 6) Course content will vary yearly with current interest. Topics covered may include field theory, many body theory, Green's functions, dispersion theory, and group theory.

PHYS 730 Selected Topics in Particle Physics (3, max 6) Various advanced phases of particle physics. Content will vary yearly; emphasis on superstring theories, advanced topics in quantum gravity, and field theory. *Recommended preparation:* PHYS 678.

PHYS 740 Selected Topics in Condensed Matter Physics (3, max 6) Course content will vary yearly with current interest. Topics covered may include theory of superconductivity, high temperature superconductivity, Green's functions in condensed matter physics, magnetism and transport in disordered metals.

PHYS 7500 Off Campus Studies (3, max 9) Course work taken on campus at Caltech as part of the Caltech-USC cross-registration program. Graded CR/NC.

PHYS 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PHYS 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Blue Cross of California Chair in Health Care Finance and Professor of Policy, Planning and Development and Political Science: Glenn Melnick, Ph.D. (*Public Policy*)

C. Erwin and Ione L. Piper Dean's Chair and Professor of Policy, Planning and Development and Political Science: Dan Mazmanian, Ph.D. (*Public Policy*)

C. Erwin and Ione L. Piper Professor of Policy, Planning and Development and Political Science: Jack Knott, Ph.D.

Robert C. Packard Trustee Chair in Law and Professor of Law, Economics and Political Science: Edward McCaffery, J.D. (Law)

Emery Evans Olson Chair in Non-Profit Entrepreneurship and Public Policy and Professor of Public Policy and Political Science: James Ferris, Ph.D. (Public Policy)

Jeffrey J. Miller Chair in Government, Business and the Economy and Professor of Public Policy and Political Science: Elizabeth Graddy, Ph.D. (Public Policy)

Leon Benwell Professor of Law and Professor of Law and International Relations and Political Science: Edwin Smith, J.D. (Law)

Maria B. Crutcher Professor of Citizenship and Democratic Values: Terry L. Cooper, Ph.D. (Public Policy)

Robert Kingsley Professor in Law and Professor of Law and Political Science: Susan Estrich, J.D. (Law)

Walter Annenberg Chair in Communication and Professor of Political Science: Ernest J. Wilson III, Ph.D. (Communication)

Carmen H. and Louis Warschaw Chair in Practical Politics and Professor of the Practice of Political Science: Robert M. Shrum, Ph.D.

Professors: Dennis Chong, Ph.D.; Ann Crigler, Ph.D.; Richard H. Dekmejian, Ph.D.; Mary Dudziak, Ph.D. (Law); Philip Ethington, Ph.D. (History); Thomas Hollihan, Ph.D. (Communication); Jane Junn, Ph.D.; Sharon Lloyd, Ph.D. (Philosophy); Nancy Lutkehaus, Ph.D. (Anthropology); John Matsusaka, Ph.D. (Finance and Business Economics); Alison D. Renteln, Ph.D.*; Stanley Rosen, Ph.D.*; Eliz Sanasarian, Ph.D.*; Shui Yan Tang, Ph.D. (Public Policy); Priscilla Wohlstetter, Ph.D. (Education)*

Associate Professors: John E. Barnes, Ph.D.; Christian Grose, Ph.D.; Ange-Marie Hancock, Ph.D.; Juliet Musso, Ph.D. (Public Policy); Jefferey M. Sellers, Ph.D.*

Assistant Professors: Morris Levy, Ph.D.; Nicholas Weller, Ph.D.

Professor of the Practice: Bill Lockyer, J.D.; William Simon Jr., J.D.

Associate Professor of the Practice: Yael Wolinsky-Nahmias, Ph.D.

Assistant Professors (Teaching): Arthur Auerbach, Ph.D.; Anthony Kammas, Ph.D.

Assistant Professor of the Practice: Daniel Schnur, B.A.

Adjunct Assistant Professors: William Fahey, J.D.; Jose Gomez, Ph.D.; George Newhouse Jr., J.D.; Olu K. Orange, J.D.; Darry Sragow, J.D.

Professor Emeritus of Political Science and History and Associates Chair Emeritus in Social Science: Mark Kann, Ph.D.

Emeritus Professors: Nora Hamilton, Ph.D.; John R. Schmidhauser, Ph.D.

*Emeritus Associate Professor: Joseph L. Nyomarkay, Ph.D.**

**Recipient of university-wide or college teaching award.*

The Department of Political Science divides political science into four broad fields: American politics, political thought, comparative politics, and law and public policy. The department offers regional specialization in six areas: Latin America, East Asia, Western Europe, Russia and Eastern Europe, the Middle East, and Africa. The Jesse M. Unruh Institute of Politics provides local internships for students as part of their course work or as

independent study.

Degree Programs

The Department of Political Science offers: the B.A.; minors in political science; law and society; race, ethnicity and politics; human rights; and political organizing in the digital age. The department also offers M.A. and Ph.D. degrees under the jurisdiction of the Graduate School, as well as a dual Ph.D. in Political Science and International Relations/Juris Doctor with the USC Gould School of Law.

Dornsife College of Letters, Arts and Sciences

Political Science

Undergraduate Degrees

Advisement

The department has faculty and staff advisers who provide academic advisement, career counseling and advisement to pre-law students and those wishing to go on to graduate studies. All majors are encouraged to see their adviser.

Major Requirements for the Bachelor of Arts in Political Science

Department majors are required to take nine courses (36 units) in political science. At least two of the nine courses must be selected from the four 100-level core courses: POSC 100 Theory and Practice of American Democracy, POSC 110 Ideology and Political Conflict, POSC 120 Comparative Politics, POSC 130 Law, Politics and Public Policy.

In addition, at least six of the nine courses must be at the 300-level or above, including at least one course in each of the following four fields: American politics, political thought, comparative politics, and law and public policy. No more than one course (or four units) of POSC 395 or POSC 490x may be counted toward the 36 unit departmental requirements.

Students who have a double major in political science and in another department in the social sciences, may, with prior permission of the department undergraduate adviser, substitute one upper-division course from the second major for one upper-division political science course. In the development of an undergraduate program, students should consult periodically with the political science undergraduate adviser and/or with departmental faculty.

Area Specialization

While majoring in political science and fulfilling the department requirements, a student may elect to emphasize a particular regional area in the fields of comparative government, diplomacy and international politics. Regional specializations are offered in six areas: East Asia, Western Europe, Latin America, Middle East, Africa, Russia and Eastern Europe. With the approval of the faculty, a student may organize an academic program in such a way as to fulfill the general education language requirements with the language or languages of the regional area specialization. In addition, it is assumed the student will fulfill other social sciences and humanities requirements and electives with courses focusing on the history and culture of the particular area of specialization. Such a pattern of courses at the undergraduate level will strengthen a student's qualifications for graduate-level area programs, as well as for various forms of foreign service.

Bachelor of Arts, Philosophy, Politics and Law

This interdisciplinary program consists of nine courses chosen from PHIL, POSC, LAW and ANTH. See Philosophy.

Political Science Minor

Students who minor in political science must take five courses, 20 units, in political science. Students can either pursue course work in a traditional subfield (American politics, comparative politics, law and public policy, or political theory) or in a specific issue area of concentration (civil liberties and human rights, race, ethnicity, and gender, urban political problems, Asian politics, etc.).

Those who focus their studies on a traditional subfield must take the lower-level introductory course in that subfield: POSC 100 Theory and Practice of American Democracy (American politics); POSC 110 Ideology and Political Conflict (political theory); POSC 120 Comparative Politics (comparative politics) or POSC 130 Law, Politics and Public Policy (law and public policy).

Students pursuing the minor must also take four upper-division courses, three of which must be in the chosen subfield. Students choose from a predetermined list of courses divided by subfield in consultation with and approval of the department's undergraduate student adviser.

Those who pursue a specific issue area of concentration are required to take the department's designated gateway course, POSC 120 Comparative Politics, and at least three upper-division courses in the issue area of concentration. A fourth upper-division course must be taken in the issue area of concentration or a complementary area. The upper-division courses are chosen in consultation with and approval of the department's undergraduate student adviser.

Human Rights Minor

The protection of human rights has become a matter of international concern. Despite widespread media coverage of violations, flagrant abuses occur daily throughout the world. The human rights minor provides students with in-depth knowledge about various human rights issues.

Drawing together classes from a range of departments in and outside the USC Dornsife College of Letters, Arts and Sciences, this interdisciplinary minor will cover the theoretical foundations of human rights, historical and current developments, case studies and policies. Students will be required to take their learning outside the classroom through an internship or by teaching human rights in the community and will be encouraged to join relevant student organizations.

Total unit requirements for the minor are 18*. Students take one core course in human rights, POSC 448a The Politics of Peace. In addition, the minor requires two courses dealing with international human rights, one domestic human rights related course and a community involvement experience through the Department of Political Science.

Required Courses (16 units)

POSC 448a

Two international human rights courses selected from: ANTH 330, HIST 456, HIST 365, IR 310, IR 315, IR 316, IR 318, IR 325, POSC 366, POSC 440, POSC 456, PPD 382, REL 335

One domestic human rights course selected from: AMST 348, COMM 412, FREN 370, GERO 435, JOUR 466, POSC 333, POSC 380, POSC 441, POSC 444, PPD 342, PPD 439, SOCI 356, SOCI 360

Community Involvement (2 units)

Students are required to take their learning outside the classroom through an internship with a focus in human rights, teaching human rights in the community or an independent project. Students who choose the internship must enroll in POSC 395 and those who choose do an independent project must enroll in POSC 490x. Approval is needed to enroll in POSC 395 and POSC 490x.

POSC majors must take four courses (16 units) outside of the Political Science Department for a total of 22 units.

Law and Society Minor

This interdisciplinary program focuses on the effect of law on society as well as the ways in which social forces influence the legal system. The idea is that students will understand the law if they look beyond "law on the books" to "law in action." Thus, it is important to study key legal institutions such as the legal profession, the

judiciary, juries, the police, legislatures, and administrative agencies. In addition, the minor introduces students to legal policies like plea bargaining and the death penalty, and the constitutional principles that underlie political debates about them, e.g., equal protection, due process and privacy.

The requirements for the minor include seven courses (28 units). All students are required to take POSC 130 Law, Politics, and Public Policy. Three component political science upper-division courses are required, one from each category:

1. *Core* — POSC 130
2. *Constitutional Law* — POSC 340, POSC 426 or POSC 444
3. *International Law* — POSC 345 or POSC 448a
4. *Policy Analysis* — POSC 333, POSC 347, POSC 395, POSC 432, POSC 435, POSC 436, POSC 440, POSC 441, POSC 442, POSC 443, POSC 448b or POSC 452
5. *Humanistic/Historical* — PHIL 340, PHIL 430
6. *Sociology* — SOCI 351 or SOCI 353
7. *Other* — ANTH 345, COMM 421, ECON 434, LAW 200x or PSYC 355

At least four classes must be unique to the minor. Political science majors must take upper-division courses only from categories 5, 6 and 7. Non-political science majors must take at least one upper-division course from 5, 6 or 7.

Race, Ethnicity and Politics Minor

The interdisciplinary minor in race, ethnicity and politics helps students analyze and critically evaluate contemporary race relations and how race matters in politics today.

*Requirements: Five Courses (20 Units)**

All students are required to take POSC 421 Ethnic Politics. In addition, students must also take one course from each category: Race and Gender in a Global Context, Comparative Racial Politics, Social/Historical (Racial Perspective) and Racial Formation. The following is a list of courses that fulfill each category.

CORE REQUIREMENT		UNITS
POSC 421	Ethnic Politics	4
POLITICAL SCIENCE UPPER-DIVISION COURSES		UNITS
Choose one course from each of the groups below:		
<i>Race and Gender in a Global Context:</i>		
POSC 350	Politics of Latin America	4
POSC 351	Middle East Politics	4
POSC 352	Politics of Southeast Asia	4
POSC 354	Japanese Politics	4
POSC 356	Politics in the People's Republic of China	4
POSC 358	Politics of Sub-Saharan Africa	4
POSC 430	Political Economy of Mexico	4
POSC 431	Political Economy of Central America	4
POSC 452	Critical Issues in Law and Public Policy	4
POSC 456	Women in International Development	4
POSC 464	Politics of Russia and Eastern Europe	4

Comparative Racial Politics:

POSC 320	Urban Politics	4
POSC 328	Asian American Politics	4
POSC 424	Political Participation and American Diversity	4
POSC 427	Black Politics in the American Political System	4
POSC 428	Latino Politics	4
POSC 441	Cultural Diversity and the Law	4
POSC 442	The Politics of Human Differences: Diversity and Discrimination	4
POSC 444	Civil and Political Rights and Liberties	4

ELECTIVES **UNITS**

Choose one course from each of the groups below:

Social/Historical:

HIST 265	Understanding Race and Sex Historically	4
HIST 318	Early American Indian History	4
HIST 341	American Social History	4
HIST 347	Urbanization in the American Experience	4
HIST 357	The New South	4
SOCI 142	Diversity and Racial Conflict	4
SOCI 155	Immigrant America	4
SOCI 342	Race Relations	4
SOCI 432	Racial and Ethnic Relations in a Global Society	4

Racial Formation:

AMST 301	America, the Frontier, and the New West	4
AMST 320	Social Construction of Race and Citizenship	4
AMST 365	Leadership in the Community – Internship	4
AMST 385	African American Culture and Society	4

**Political science majors are required to take seven courses (28 units).*

Political science majors must take four courses (at least three must be upper-division) from the Social/Historical and the Racial Formation categories. At least four classes must be unique to the minor and not taken for additional major, minor or general education credit.

Political Organizing in the Digital Age Minor

The digital environment is changing the face of political organization, both in domestic American electoral politics and in the methods used by transnational social movements to call attention to problems around the globe. Howard Dean's use of the Internet to fund his 2004 presidential campaign has made other candidates aware of the political power of the Web in fundraising and grass-roots orchestration of local (and "global") events.

This minor should be of interest to students majoring in international relations, political science or other programs who plan to use technology to affect contemporary national and international affairs. As with all minors, students must choose four courses dedicated exclusively to this minor and four courses outside their major departments. These may, but need not be, the same four courses.

This minor is intended to help students engage in domestic and international political organizing by creating Websites, podcasting and using other new technologies. It should help students secure internships and jobs with political and international organizations, and generally improve their abilities to change the world.

Choose one class from each of the following five lists:

I. Domestic Political Organizing:

POSC 315	Regulation of Elections and Political Finance	4
POSC 335	Political Parties, Campaigns, and Elections	4
POSC 422	Political Attitudes and Behavior	4
POSC 424	Political Participation and American Diversity	4
POSC 437	Mass Media and Politics	4

II. Transnational Social Movements:

IR 305	Managing New Global Problems	4
IR 306	International Organizations	4
IR 324	Multinational Enterprises and World Politics	4
IR 371	Global Civil Society: Non-State Actors in World Politics	4

III. New Technologies in Organizing:

ITP 304	Technologies for Building Online Political Campaigns	4
---------	--	---

IV. The Context of Political Organizing:

COMM 321	Communication in the Virtual Group	4
COMM 489	Campaign Communication	4
IR 308	Economic Globalization	4
IR 325	North-South Relations in the Global Economy	4
IR 330	Politics of the World Economy	4
IR 444	Theories of Global Society	4
POSC 300	Principles, Institutions, and Great Issues of American Democracy	4
POSC 345	International Law	4
POSC 371	The Non-profit Sector and the Public Interest	4
POSC 427	Black Politics in the American Political System	4
POSC 428	Latino Politics	4
POSC 451	Politics of Resources and Development	4
POSC 456	Women in International Development	4
PPD 372	Public Service in an Urban Setting	4

V. Capstone Class:

The capstone class allows students to engage more deeply in one of the contributing areas of study.

COMM 487	Communication and Global Organizations	4
IR 327	International Negotiation	4
ITP 413x	Interactive Web Development	4
POSC 395	Directed Governmental and Political Leadership Internship	4

Total: Five courses, 20 units

Interdisciplinary Russian Area Studies Minor

See Department of Slavic Languages and Literatures.

Critical Approaches to Leadership Minor

See the Department of Interdisciplinary Studies.

Political Science Honors Program

The department offers an honors program for outstanding undergraduate students in the junior and senior years. The two semester program emphasizes a specialized topic (a different area each year) in political science. The organization of the course during the first semester follows the seminar model, emphasizing independent research, discussion, and oral and written reports. In the second semester, the student is required to write a thesis under the direction of a faculty member. Students are admitted to the program after careful screening on the basis of their academic record and a personal interview. Classes are limited to about 10 students.

The department also offers an honors sequence for freshmen and sophomores, POSC 190ab. The first semester is a small seminar of about 10 students. The second semester is a continuation with a major research paper due as the final.

Political Science Honor Societies

There are two honor societies of special interest to political science majors. Pi Sigma Alpha stimulates scholarship and interest in the subject of government by providing tangible recognition to students who have excelled in the field. Political science majors are eligible to join after successful completion of at least three upper-division courses in political science. An overall grade point average of 3.5 or higher is required, with a minimum of 3.5 in all political science classes.

The second honor society is Blackstonians. This is a pre-law honor society for undergraduate students designed to recognize academic excellence, assist the student in his or her preparation for law school, and expand the knowledge of the legal profession. Membership is restricted to students who have completed at least 32 units (16 of which must be from USC), but not more than 118 units, and have maintained at least a 3.5 grade point average.

Mock Trial Team

The department hosts the USC Mock Trial Team. This trial advocacy training program is designed to develop students' knowledge of substantive areas of civil law, criminal law and evidence. Additionally, public speaking skills are honed and societal mores are explored. Legal concepts, sociocultural theory and presentational skills are then applied through participation in courtroom advocacy competitions nationwide and local public interest advocacy assignments. Academic credit is earned through POSC 398. Membership on the team is required to enroll.

Political Science

Graduate Degrees

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

All graduate students are required to maintain regular contact with the graduate coordinator to assure compliance with departmental regulations.

Master of Arts in Political Science and International Relations

Only students who have a degree objective of obtaining the Ph.D. will be admitted into the Political Science and International Relations program. However, interested students can obtain a M.A. degree while pursuing the Ph.D. The degree is awarded upon successful completion of (a) 28 units, including three of the five courses in the program's core theory and methodology sequence, a master's thesis and registration in POSC 594ab or IR 594ab; and (b) the approval of the master's thesis by the thesis committee.

Juris Doctor/Doctor of Philosophy in Political Science and International Relations

Application deadline (for Ph.D.): December 1

The Political Science and International Relations program and the USC Gould School of Law jointly offer a dual degree program leading to the J.D./Ph.D. degree. Applicants must apply to the Political Science and International Relations program and the law school and meet the requirements for admission to both. In addition to the LSAT, students interested in this program are required to take the Graduate Record Examinations (GRE).

In the first year students take their course work in the law school exclusively. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law honors programs. The second and third years include a total of 40 units of courses in political science and international relations and 40 units of law. Students must complete a five-course core theory and methodology sequence. They must include a classics-oriented, two-semester political, social, comparative and international theory sequence (currently POSC 530 and IR 500), a multivariate statistics course (such as IR 514 or POSC 600) and a philosophies/methodologies in social inquiry course (IR 513 or POSC 500). Finally in their second, third or fourth year, they must take an approved advanced research methods course.

To obtain a Ph.D. in Political Science and International Relations, students must pass the screening process. After the completion of required field course work with a grade of B or better, a substantive paper or USC M.A. thesis relevant to the program, students must take a Ph.D. qualifying examination in two of their three fields of concentration. The third field will be completed by taking at least three courses and passing each with a grade of B or better. The final requirement, following successful completion of the qualifying examination, is a doctoral dissertation.

Dornsife College of Letters, Arts and Sciences

Political Science

Courses of Instruction

POLITICAL SCIENCE (POSC)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

POSC 100 Theory and Practice of American Democracy (4) Theoretical, institutional, and functional aspects of American national, state, and local government and politics; contemporary issues. Recommended for freshmen and sophomores.

POSC 110 Ideology and Political Conflict (4) Modern political ideologies; their assumptions, perceptions, and prescriptions regarding political stability and social injustice: anarchism, communism, socialism, liberalism, conservatism, and fascism.

POSC 120 Comparative Politics (4) Gateway to the major in political science. Comparative analysis of political institutions and processes in selected industrial, developing and socialist countries, in terms of contrasting ideologies, parties, elites, and economies.

POSC 130g Law, Politics and Public Policy (4) Interaction between law and politics; overview of the American legal system; value conflicts and public policy questions which arise within it.

POSC 165g Modern Times (4) Explores the current major social and political issues that confront scholars,

leaders, and citizens in today's modern world.

POSC 190ab Politics and Society (4-4) *a:* Honors seminar for freshmen and sophomores. *b:* Continuation of work begun in first semester. Open only to freshman and sophomore Political Science majors only.

POSC 201x Law and Politics: Electing a President (4) (Enroll in LAW 201x)

POSC 210gm Social Analysis of Gender (4) (Enroll in SWMS 210gm)

POSC 220g Critical Issues in American Politics (4) Examination of enduring political issues, as well as the political processes and institutions.

POSC 248gw Human Rights (4, FaSpSm) Overview of human rights controversies across the globe. Introduction to techniques of analysis for social issues, interdisciplinary research methods, and interpretation of complex political problems.

POSC 250 Critical Issues in Comparative Politics (4) Critical analysis of major issues in comparative politics such as dependency, crises in political legitimacy, political violence and terrorism, political corruption, genocide, and comparative revolutions.

POSC 255g Cultures, Civilizations and Ethnicities in World Politics (4) Theories and case studies of conflict and coexistence between cultures, civilizations and ethnic groups in the context of the countervailing force of Western socio-economic globalization.

POSC 260 Global Ethnic Politics (4) A comparative analysis of multi-ethnic societies through case studies of inter-ethnic conflict and coexistence, conflict resolution, prevention of genocide and defense of human rights.

POSC 265gw Environmental Challenges (4, Fa) Examination of the challenges of environmental problem-solving at the personal, local, national and global scales, focused on the issue of climate change.

POSC 270 Introduction to Environmental Law and Politics (4, Sp) Overview of environmental policy, law and politics at the international, domestic and local levels. Social science gateway to the environmental studies major. (Duplicates credit in POSC 347.) *Prerequisite:* ENST 100.

POSC 300 Principles, Institutions, and Great Issues of American Democracy (4) Underlying principles of American democracy; major issues of contemporary public policy in national and state institutions.

POSC 311 Political Analysis (4) Methodological and theoretical problems of micro-analytic studies in political science. Techniques of data collection and assimilation.

POSC 315 Regulation of Elections and Political Finance (4) The role money plays in elections and public decisions: disclosure requirements, limits on campaign contributions and expenditures, regulation of radio/television time, tax incentives, public funding.

POSC 320 Urban Politics (4) Evolution of contemporary institutions; differing views of community power; major policies; state and federal relations to local governments; metropolitan community problems.

POSC 321 Urban Political Problems (4) Social problems and governmental policy in the urban environment, emphasizing such problem areas as education, environment, race, police and the system of criminal justice, and poverty.

POSC 322 Social Construction of Race and Citizenship (4, FaSp) (Enroll in AMST 320)

POSC 323 Applied Politics (4, max 12, FaSpSm) Provides students with the knowledge and skills necessary to become active in politics based on understanding the history, theory, and practices of public participation.

POSC 325 State Politics (4) American state politics from a comparative perspective. Examines political processes, differing policy outcomes and the impact of social change on system performance.

POSC 326 Case Studies in Modern Leadership (4, FaSp) (Enroll in MDA 325)

POSC 328 Asian American Politics (4, FaSp) Examines political attitudes, behavior and participation of Asian Americans in diverse U.S. society.

POSC 333 Stigma and Society: Physical Disability in America (4) Political activity involving disabled persons; development of public policy regarding disabled citizens. (Duplicates credit in former POSC 233.)

POSC 334 Interest Groups and Elite Behavior (4) Introduction to interest group and elite views of the American system, including recent interest group theory and findings and the general critiques of power distribution in American society.

POSC 335 Political Parties, Campaigns, and Elections (4) Organization and function of political parties, nominations and elections, strategy and tactics of campaigning, professional candidate management finance, political machines, voting behavior.

POSC 340 Constitutional Law (4) Development of constitutional law by the courts; leading cases bearing on major constitutional issues; the federal system; powers of government; civil liberties.

POSC 345 International Law (4) Nature, origin, and development of international law; basic principles analyzed and illustrated with cases.

POSC 347 Environmental Law (4) Introduces students to central concepts and theories in environmental law and regulation; analyzes present environmental laws and regulations.

POSC 349 Women and the Law (4, Fa) (Enroll in SWMS 349)

POSC 350 Politics of Latin America (4) Theories of development and nation-building; revolutionary and evolutionary modernization; role of history, culture, socioeconomic conditions in affecting political structures and functions.

POSC 351 Middle East Politics (4) Political development in the Middle East, emphasizing historical, cultural, and socioeconomic conditions affecting political structures and functions; modernization and countervailing social, economic, and religious forces.

POSC 352 Politics of Southeast Asia (4) Theories of development and nation-building; revolutionary and evolutionary modernization; role of history, culture, socioeconomic conditions in affecting political structures and functions.

POSC 354 Japanese Politics (4) Contemporary Japanese politics, political economy, and political processes. How political systems are organized; roles of bureaucrats, politicians, interest groups, and social activists in policymaking. *Recommended preparation:* POSC 120.

POSC 355 Politics of East Asia (4) Institutions and processes of advanced societies; political culture, interest articulation and aggregation, the governmental process.

POSC 356 Politics in the People's Republic of China (4) The Chinese revolution; social, political, and economic developments in post-1949 China; China after Mao Zedong (Mao Tse-tung).

POSC 358 Politics of Sub-Sahara Africa (4) Theories of development and nation-building; revolutionary and evolutionary modernization; role of history, culture, socioeconomic conditions in affecting political structures and functions.

POSC 360 Comparative Political Institutions (4, FaSpSm) Institutions and processes of advanced industrial societies; political culture, interest articulation and aggregation, the governmental process.

POSC 363 Cities and Regions in World Politics (4) Cities and the rise of states; globalization and localization; federalism and decentralization; comparative politics of urban regions in developed and developing countries. *Recommended preparation:* comparative or urban politics.

POSC 365 World Political Leadership (4) Comparative analysis of theories of power and leadership; application to leaders from western democracies, Third World, and socialist countries. Societal consequences of their policies.

POSC 366 Terrorism and Genocide (4) Comparative analysis of the determinants of political violence, terrorism, and genocide and their social and moral consequences; application of theories to contemporary case studies.

POSC 370 European Political Thought I (4) Basic concepts of Western political thought from Plato through the contract theorists.

POSC 371 European Political Thought II (4) Western political thought since the French Revolution. Rise of Marxist socialism, communism, anarchism, fascism, National Socialism, other doctrines; the democratic tradition; new theories of the state.

POSC 374 The American Founders: Visions, Values and Legacy (4) Analysis of the political thought of the American Founders; consideration of alternative visions of patriarchy, republicanism, and liberal democracy; exploration of Founders' core values and their impact on issues of race, class, and gender.

POSC 375 American Political Thought (4) Historical and topical review of American political philosophy from the Puritans to the present. Special emphasis on such recurrent themes as equality, democracy, and racism.

POSC 377 Asian Political Thought (4) Major systems of political thought in Chinese, Japanese, and other Asian cultural traditions. Confucianism, Buddhism, Islam, and other classical systems and their present-day adaptations under the impact of communism and democracy.

POSC 380 Political Theories and Social Reform (2 or 4) Political theories and philosophies in modern times and their relation to public policy and social reform.

POSC 381 Sex, Power, and Politics (4) An evaluation of the ways in which different ideologies, institutions, and policies contribute to differences in political power between men and women.

POSC 385 Population, Society, and Aging (4) (Enroll in SOCI 385)

POSC 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

POSC 391 Honors I: Undergraduate Seminar (4, Fa) Selected topics in designated area of political science. Discussion of readings and presentation of papers.

POSC 392 Honors II: Undergraduate Thesis (4, Sp) Thesis written under supervision, based on research begun in Honors I.

POSC 395 Directed Governmental and Political Leadership Internship (2–8, max 8) Intensive experience in governmental and political offices. Minimum time requirement; evaluation by office and intern report required. Permission of the Director of the Institute of Politics and Government required.

POSC 398L Trial Advocacy: Theory and Practice (1, 2, 4, max 8, FaSp) Course covering substantive law, evidence, public speaking and use of societal mores in courtroom advocacy. Open only to Mock Trial team members.

POSC 420 Practicum in the American Political Process (4, max 12, FaSpSm) Fieldwork in governmental institutions and processes.

POSC 421 Ethnic Politics (4) Analysis of the political behavior and roles of ethnic and racial groups in the American political system; public policy issues and patterns of political action are examined.

POSC 422 Political Attitudes and Behavior (4) The citizen's political world; political socialization, opinion formation and dissemination; development of political cultures and subcultures; political mobilization;

personality and politics.

POSC 423 Presidents and the Presidency (4) Presidential coalition; sources of presidential power; recent leadership styles; decision-making within the presidency.

POSC 424m Political Participation and American Diversity (4, Fa) Examines how diverse groups in the U.S. interact with the American political system.

POSC 425 Legislative Process (4) Individual behavior and decision-making within legislatures; changing executive-legislative functions; legislative functions; relationships to political systems in comparative perspective.

POSC 426 The United States Supreme Court (4) Role of the court in American politics; overview of major decisions; the politics of appointment; the process of decision-making; impact of judicial decisions.
Recommended preparation: POSC 130.

POSC 427 Black Politics in the American Political System (4) The effects of the organization of the American political system and its operations on blacks and other minorities.

POSC 428 Latino Politics (4, Fa) Analysis of the historic and contemporary roles of Latinos in the American political system; patterns of political participation and representation are examined.

POSC 430 Political Economy of Mexico (4) Examination of contemporary Mexico: the role of the state in the Mexican economy; development of the government party and opposition groups.

POSC 431 Political Economy of Central America (4) Focus on economic, social, and political structures and processes in the region and in specific countries, especially Guatemala, El Salvador, and Nicaragua.

POSC 432 Politics of Local Criminal Justice (4) Roles and behavior of major legal and political participants in the criminal justice system including the police, the legal profession, judges, and the public.

POSC 435 Politics and the Economy (4) Major techniques, politics, and values involved in the allocation of social and economic resources. Includes such topics as determination of priorities in budgetary processes, economic regulation, control of environmental change, and policies for science.

POSC 436 Environmental Politics (4) The political realities of selected environmental issues; resolving and implementing social priorities; interests, attitudes, strategies, and tactics of pressure groups; institutional biases and opportunities.

POSC 437 Mass Media and Politics (4) Analysis of political content of mass media. Audience response to alternative sources of political information. Consideration of the institutional and economic as well as political aspects of the mass media.

POSC 439 Critical Issues in American Politics (4, max 12, FaSpSm) Intensive examination of critical issues of particular interest in the field of American politics.

POSC 440 Comparative Law and the Judicial Process (4) Analysis of courts in comparative perspective; judicial decision-making and development of public policy through the judicial process; theories of law and jurisprudence. *Recommended preparation:* POSC 340.

POSC 441m Cultural Diversity and the Law (4) Jurisprudential approach to the study of cultural differences. Consideration of circumstances under which law should accommodate cultural diversity in the United States and abroad.

POSC 442m The Politics of Human Differences: Diversity and Discrimination (4) A comparative perspective on social and cultural forces that affect American laws and policies concerning discrimination on the basis of race or ethnicity, gender, sexual orientation, age, and disability.

POSC 443 Law in Film (4) Analysis of the depiction of law in film; use of film to explore topics in

jurisprudence and the politics of law and courts. *Recommended preparation:* POSC 130.

POSC 444 Civil and Political Rights and Liberties (4) An examination of debates and controversies surrounding the nature and scope of civil rights and civil liberties. *Recommended preparation:* POSC 340 or POSC 440.

POSC 448ab The Politics of Peace (4-4) Issues of social justice, large-scale social change, high technology, impacts on human survival, and uses of national and international institutions. *a:* Human rights. *b:* Arms limitation, control, and disarmament.

POSC 449 Political Psychology (4) Psychological forces shaping politics and persons, processes and interactions; emphasis on political socialization and cognitive and affective orientations to politics.

POSC 450 Political Development (4) Choice of models in nation-building; party and other means of mass mobilization; elite recruitment and differentiation; peculiarities of cultures and subcultures; integration of ethnic and other minorities; political socialization and secularization; legitimization.

POSC 451 Politics of Resources and Development (4) Comparison of relationships between rich and poor countries involving political and economic resources and prospects for development; impact on industrialized states; interdependence; new international economic order.

POSC 452 Critical Issues in Law and Public Policy (4, max 12, FaSpSm) Intensive examination of special topics in the field of law and public policy.

POSC 453 Political Change in Asia (4) Modernization and political development in China and Japan; Asia's economic "miracles" (Taiwan, Japan, Korea, etc.); nationalism and communist movements in East and Southeast Asia.

POSC 456 Women in International Development (4) How various developmental theories analyze the role of women as producers and how Third World women are increasing their role in development.

POSC 463 European Politics (4) Institutions, cultures and politics of western Europe, eastern Europe and Russia; internationalization; historical and contemporary political, economic, and social change.

POSC 464 Politics of Russia and Eastern Europe (4) Culture, society, and politics in Russia and in Eastern Europe. Contemporary political institutions and processes.

POSC 469 Critical Issues in Comparative Politics (4, max 12, FaSpSm) Intensive examination of critical issues of particular interest in the field of comparative politics.

POSC 475 The Future of California (4) (Enroll in MDA 475)

POSC 476 Contemporary Political Thought (4) 20th century political philosophy dealing with major movements in psychological, existential, socialist, and nationalist thought as they bear upon the crisis of political authority in our time.

POSC 479 Critical Issues in Political Thought (4, max 12, FaSpSm) Intensive examination of critical issues of particular interest in the field of political thought.

POSC 490x Directed Research (1–8, max 12) Individual research and readings. Not available for graduate credit.

POSC 499 Special Topics (2–4, max 8)

POSC 500 Methods of Political Science (4) Empirical political research: social science logic; theory construction; measurement; research design; sampling; data generation; secondary analysis; report and proposal writing; research ethics.

POSC 512 Linkage Politics (4) Empirical and theoretical investigations of the points at which subnational,

national, and international politics converge, overlap, or are otherwise interdependent.

POSC 519 Field Research Methods in Comparative Politics and International Studies (4) (Enroll in IR 519)

POSC 525 Cities, Regions and Global Society (4) Comparative and historical examination of cities and regions as political settings, as elements of states and international relations, and as sites of transnational economic and social change.

POSC 535 Seminar in North African and Middle Eastern Politics (4) Comparative and area study approaches, nation-building; political cultures; mobilization of human and natural resources; political recruitment, integration, socialization, and conflict.

POSC 540 Law and Public Policy (4) National and comparative approaches to law and politics in organized societies; law as a policy science; administration of justice; political forces influencing legal change.

POSC 545 Critical Issues in Politics and Policy (4, Fa) Selected topics in politics and policy; focus on current issues shaping the U.S. and the world.

POSC 546 Seminar in Environmental Policy (4) Issues and theories involved in the formulation, implementation, and effectiveness of different environmental policies.

POSC 554 Women in Global Perspective (4) (Enroll in SWMS 554)

POSC 556 Seminar in Disability and Rehabilitation Policy (4) Examination of physical disability as a policy issue from a cross-national and multidisciplinary perspective; attitudes toward disability; income maintenance, health care, and related programs.

POSC 560 Feminist Theory (4) (Enroll in SWMS 560)

POSC 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

POSC 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

POSC 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

POSC 599 Special Topics (2, 4, 8, max 8, FaSpSm) Subjects in one or more fields in Political Science.

POSC 600 Seminar in Advanced Research Methods (4) Multivariate analysis of data, computer applications, and research report preparation; multiple regression; analysis of variance; factor analysis and related techniques; time series analysis. *Prerequisite:* POSC 500.

POSC 610 Seminar in Political Parties (4) Parties and the political system; formal and informal organization and roles; comparative party systems.

POSC 611 Seminar in the Executive and Legislative Processes (4) Selected research topics; comparative analyses.

POSC 612 Seminar in Urban Politics (4) Problems of government and politics in urban, county, and metropolitan areas. Comparative community politics.

POSC 618 Seminar in Problems of American Politics (4) Theoretical and methodological problems in American politics with emphasis on emerging research paradigms.

POSC 619 Seminar in Supreme Court Politics (4) Role of the Supreme Court in the American political system. Influences on judicial decision making; appointment and decision making processes; scope of judicial power. *Recommended preparation:* POSC 540.

POSC 621 Seminar in Public Law (4) Problems and research in American constitutional and administrative law and in modern jurisprudence.

POSC 622 Seminar in Political Attitudes and Behavior (4) Determinants, nature, and consequences of political attitudes and behavior exploring psychological-sociological models, political socialization and learning, and factors affecting trends in attitudes and behavior.

POSC 623 Seminar in American Constitutional Development (4) Evolution of American constitutional law; the influence of social, economic, and political changes on constitutional interpretation. *Prerequisite:* POSC 510 or POSC 540.

POSC 624 Seminar in American Constitutional Law and Theory (4) Contemporary debates and research on the nature of constitutional interpretation, separation of powers, federalism, civil and political rights and liberties.

POSC 630 Seminar in European Politics (4) Selected research topics in comparative European politics; political culture, socialization, parties, legislative and executive processes.

POSC 632 Seminar in Latin-American Politics (4) Comparative analysis of the political structure and institutions of Latin America; participation and alienation; democracies and dictatorships; political forces.

POSC 633 Seminar in East Asian Politics (4) Comparative analysis of revolutionary and evolutionary modernization; the roots of political thought and behavior; peripheral area relationships; present-day political processes.

POSC 634 Seminar in Southeast Asian Politics (4) Comparative analysis of political forces, ideologies, processes, and institutions.

POSC 636 Seminar in African Politics (4) Comparative analysis of political forces, ideologies, and institutions in African nations south of the Sahara.

POSC 637 Seminar in Chinese Politics (4) Guided research and discussion on the governmental process in the People's Republic of China including leadership, ideology, and popular participation.

POSC 640 Seminar in Problems of Comparative Politics (4) Theoretical and methodological problems in comparative politics; approaches to comparative analysis; problems and trends.

POSC 641 Seminar in Comparative Judicial Policies, Processes, and Behavior (4) Cross-national and intranational comparative analysis of judicial policies and processes; legal and judicial elites.

POSC 648 International Human Rights Law and Policy (4) Historical and contemporary consideration of human rights issues in world politics. Examination of the philosophical foundations of human rights and the institutions that enforce international standards.

POSC 650 Seminar in Western Political Philosophy (4) Research and special problems.

POSC 651 Seminar in Non-Western Political Philosophy (4) Research and special problems.

POSC 652 Seminar in American Political Philosophy (4) Research and special problems.

POSC 660 Seminar in Problems of Contemporary Political Thought (4) Research and special problems.

POSC 670 Seminar in International Law (4) Topics and cases illustrating general principles and problems. Special research.

POSC 695 Social Science Theory (4) Philosophic foundations of social science, empirical theories current in social science; the relationship between empirical theory and social research.

POSC 790 Research (1–12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

POSC 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Director: Christian Grose, Ph.D.

Doctor of Philosophy in Political Science and International Relations

USC Graduate School Requirements

The Ph.D. degree is awarded to students who have demonstrated in-depth knowledge of the disciplines of political science and international relations and the ability to make an original research contribution. The Ph.D. in Political Science and International Relations requirements are fulfilled by successfully completing a minimum of 70 units beyond the B.A., the Ph.D. screening process, three fields of concentration, a substantive paper, a foreign language requirement (if applicable), qualifying examinations, a dissertation proposal, and a written dissertation and its oral defense.

Admission

The faculty of the Department of Political Science and the School of International Relations welcome talented candidates from a variety of backgrounds. Although a prior degree in political science or international relations is not necessary, it is strongly recommended that applicants have completed at least some course work in related fields, including political theory, statistics and social science research methods.

Admission decisions are based on consideration of applicants' prior academic performance, as reflected in course grades, the results of the Graduate Record Examination, letters of recommendation, and a statement of intent that demonstrates a seriousness of purpose, a high level of motivation and a desire to benefit from our faculty's areas of expertise or interest. Applicants also are required to submit a sample of their written work in English, preferably a research-oriented paper. Business, government and other practical experiences may also be taken into account. Applicants whose native language is not English must take the TOEFL or IELTS examination.

Screening Process

Before completion of 24 units, students will be reviewed by a screening committee made up of the program director, one teacher of one of the core courses and one professor nominated by the student. This committee will review the student's progress, including grades and written faculty evaluations of course work.

The committee will be responsible for deciding, at an early stage in the student's career, if the student is likely to finish the Ph.D. program. After reviewing the student's record, the committee may decide to (1) continue the student, (2) not continue the student and admit the student into a terminal M.A. degree program, or (3) fail the student's performance in the screening process, i.e., not continue the student in either the M.A. or Ph.D. programs.

Course Requirements

All doctoral candidates must complete an approved sequence of four courses in core theory and methodology, including a classics-oriented course in political theory, a multivariate statistics course, a philosophies/methodologies of social inquiry course, and a course in advanced research methods.

The selection of additional courses should be guided by the distribution requirements of the Ph.D. program. The student will choose three fields of concentration, of which two will be examined fields. Each examined field of concentration requires completion of four graduate-level courses, including the core course in standard fields, with an average grade consistent with university and program requirements. The third non-examined field of concentration requires completion of three graduate-level courses with an average grade consistent with university and program requirements. Students are also advised to take an independent study course to work toward their substantive paper requirement. Additional courses necessary to complete the 70 units required by the *Guidelines for Graduate Study in Political Science and International Relations* should be taken in consultation with faculty advisers.

Fields of Concentration

The standing fields of concentration include: American politics; comparative politics; international political economy; and international security and foreign policy. The candidate must satisfy two of these four standing fields by passing a written field qualifying examination. The student may satisfy the third field by completing four courses in one of these four, or may propose another customized field of study to be approved by relevant faculty and the Ph.D. program director and steering committee. For example, students can design a third field that cuts across disciplinary boundaries or focuses on specific areas of political science and international relations beyond the standing fields. The guidelines and program director can provide illustrations of this type of third field.

Foreign Language

The student is required to demonstrate intermediate proficiency in a language other than English if the student's primary field requires it. Students should consult the guidelines and the program director.

Substantive Paper

To show evidence of the capacity to conduct original research and before taking the qualifying exam, each student will submit a substantive paper. The student will submit the draft of his or her substantive paper to the chair of the qualifying exam committee one month prior to the qualifying examinations. After consultation with the chair and necessary revisions, the student is to distribute the paper to all members of the qualifying exam committee at least 14 days prior to the oral defense. The substantive paper should be presented and defended in the oral component of the qualifying examination as a viable journal submission to a peer-reviewed professional journal. It is strongly encouraged that the paper should be submitted to a professional journal approved by the student's adviser within one year of the defense.

Qualifying Examinations

Ordinarily, students will take the qualifying exams no later than the fifth semester in the Ph.D. program. Students will be examined in two of their three fields of concentration. The third field will be completed by taking at least four courses and passing them with an average grade consistent with university and program requirements. The qualifying exam committee will evaluate the quality of these two written exams as evidence of the capacity to define and complete a Ph.D. dissertation.

The written examinations are closed book and will be administered over two days at least once per academic year. Examination questions will be written by a committee of the tenure track faculty in each field. The director of POIR graduate studies (program director), in consultation with the chair of the Department of Political Science and the director of the School of International Relations, will appoint one faculty member from each field to coordinate the writing of the relevant field exam. The field exam coordinators will then seek assistance from other faculty in their field, including those with whom the student has studied, to compose the written examination questions.

The oral portion of the student's qualifying examination will be administered by his or her qualifying exam committee. The oral examination will be based on the student's two written field exams and the substantive paper. The qualifying exam committee will be made up of five members. In consultation with his or her principal adviser, the student will select two members, one from each standing field in which he or she will be examined, and the other two field examiners and the outside member of the qualifying exam committee. Final approval of the qualifying exam committee requires the signature of the program director.

Students will pass the qualifying examinations if no more than one member of the qualifying exam committee dissents after reviewing the student's record at USC and performance on the written and oral parts of the

qualifying exams. At the discretion of the qualifying exam committee, students who do not pass the exams may be allowed to retake the qualifying exams the next time they are offered. Students are admitted to candidacy for the Ph.D. when they have completed the university residency requirement, passed the written and oral portions of the Ph.D. qualifying examinations, and defended their dissertation proposal.

Dissertation

Upon completion of the qualifying examinations, the student, in consultation with the principal adviser, selects a dissertation committee in accordance with university rules. Within six months of completing the qualifying examinations, students should have a formal defense of the dissertation proposal before their dissertation committee. The Ph.D. is earned upon the submission of the written dissertation and its successful defense before the dissertation committee.

Consult the Requirements for Graduation section and the Graduate School section of this catalogue regarding time limitations for completion of the degree and other Graduate School requirements.

All graduate students considering an academic career should generally have research, teaching and advisement experiences as part of their program of study.

Courses of Instruction

POLITICAL SCIENCE AND INTERNATIONAL RELATIONS (POIR)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

POIR 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

POIR 593 Practicum in Teaching Politics and International Relations (2, Fa) Practical principles for the long-term development of effective teaching within political science and international relations disciplines. Intended for teaching assistants in Dornsife College. Graded CR/NC. Open only to doctoral students.

POIR 599 Special Topics (2-8, max 8) Subjects in one or more fields in political science.

POIR 600 Political Theory (4) Survey of literature; examination of approaches, concepts, and issues in the field of political theory. Open only to doctoral students. (Duplicates credit in former POSC 530.)

POIR 610 Research Design (4) The course will cover the design of experimental and observational research. We will examine both quantitative and qualitative approaches to social science research. Open only to doctoral students.

POIR 611 Introduction to Regression Analysis (4) The course will introduce students to regression analysis and its application to social science research. Open only to doctoral students.

POIR 613 Topics in Quantitative Analysis (4) Introduces statistical models beyond the standard linear regression model. Topics include maximum likelihood estimation, generalized linear models, and advanced methods. Open only to doctoral students.

POIR 614 Experimental Political Science (4, FaSpSm) Introduction to experimental techniques and applications of experiments in political science. Addresses both the advantages and disadvantages of experiments in political science research. Open only to doctoral students.

POIR 620 American Politics and Policy Processes (4) Survey of literature; examination of approaches, concepts, and issues in the field of American politics and policy processes. Open only to doctoral students. (Duplicates credit in former POSC 510.)

POIR 621 American Politics Field Seminar Part II (4, FaSp) A theoretical and empirical overview of the American politics field. Theoretical topics include behavioralism, rational choice, political psychology; empirical

topics include causality. Open only to doctoral students.

POIR 640 Comparative Politics (4) Survey of literature; examination of approaches, concepts, and issues in the field of comparative politics. Open only to doctoral students. (Duplicates credit in former POSC 520.)

POIR 642 Institutions in Comparative and International Politics (4, Fa) Explores major strands of institutional theory and assesses scholars' views on design of institutions, institutional change, and effects of institutions on behavior and outcomes. Open only to doctoral students in POIR.

POIR 650 Comparative Politics of East and Southeast Asia (4, FaSp) Comparison of significant political phenomena between the countries in the East and Southeast Asia region and the long-term consequences of such comparisons. Open only to doctoral students.

POIR 660 Introduction to International Relations Theory (4) The primary objective of this course is to introduce Ph.D. students to theoretical and empirical issues related to the study of international relations. Open only to doctoral students.

POIR 661 International Relations Theory: Advanced (4) Examines the specialized nomenclature of international relations and the varied interpretations of basic concepts of international theory; conceptual analysis and criticism. Open only to doctoral students. (Duplicates credit in former IR 501.)

POIR 662 Governance in International Relations (4) Rules and rule structures in international relations; major theoretical perspectives and empirical research. Open only to doctoral students.

POIR 670 International Political Economy (4) Survey of approaches to international political economy. Intellectual roots; the management of collective goods; North-South relations are examined. Open only to doctoral students.

POIR 680 International Security and Foreign Policy (4) Examination of the interconnected fields of international security and foreign policy, including decision making and patterns of interaction regarding international conflict. Open only to doctoral students.

POIR 790 Research (1–12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

POIR 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded CR/NC.

Dornsife College of Letters, Arts and Sciences

Jesse M. Unruh Institute of Politics

Von KleinSmid Center 263

(213) 740-8964

FAX: (213) 740-3167

Email: [✉ unruhins@usc.edu](mailto:unruhins@usc.edu)

dornsife.usc.edu/unruh

Director: Dan Schnur, B.A.

Chief of Staff: Kerstyn Olson, M.A.

The Jesse M. Unruh Institute of Politics sponsors events designed to introduce students to the world of practical politics. Each semester, the institute facilitates internships with government, political and advocacy offices in the Los Angeles metropolitan area and beyond. The institute also sponsors numerous discussion series that bring prominent political and governmental leaders to USC to speak to small groups of students in an informal setting. In the spring, the institute organizes the Cerrell Seminar in Political Leadership — a trip to Sacramento at which USC students meet with legislators, lobbyists and members of the media to discuss important issues in state

politics.

Political Student Assembly

The Unruh Institute of Politics works closely with the Political Student Assembly (PSA). PSA was formed in January 2006 as a division of the Student Affairs Program Board and seeks to actively involve students in campus, state and national political issues.

Directed Government and Political Leadership Internship

Students volunteer to work in one of over 500 political and governmental offices throughout the Los Angeles area, in Sacramento and in Washington, D.C., enabling them to gain firsthand political experience. As interns, students acquire basic political understanding and skills in government, campaign, media or advocacy organizations. Through their assignments, students have the opportunity to develop an understanding of the many ways in which people are important to politics and politics to people.

By gaining hands-on experience in government and politics, student interns develop real-world political and job skills to assist them in their future careers. Many talented interns are fortunate enough to secure full-time employment based upon their internship experience.

Students enroll in POSC 395 Directed Governmental and Political Leadership Internship, for two to eight units. Students can enroll in POSC 395 during the fall, spring or summer. In the summer, students can apply for institute-sponsored fellowships to help defray tuition and living expenses.

Director: Brighde Mullins, MFA

Professor of the Practice: Brighde Mullins, MFA

Assistant Professors (Teaching): Prince Gomolvilas, MFA; Dinah Lenney, MFA

Senior Lecturers: M.G. Lord; Timothy Kirkman

Lecturer: Gina B. Nahai, MPW

Master of Professional Writing Program

The Master of Professional Writing Program develops students' mastery of craft across multiple genres and prepares students for writing careers. It is designed for students who want to explore a range of writerly possibilities, and aims to develop writing and writers across genre, including fiction, nonfiction, poetry, new media, and writing for stage and screen. Program faculty are working writers who bring their expertise to seminars, lectures and workshops.

The academic curriculum includes a range of courses that focus on all aspects of the writing life, as well as one-on-one tutorials geared to the completion of a professional quality final project. Although students will ultimately focus in one genre, the degree is specifically intended for writers interested in exploring the connections to be found in literature, entertainment and art. Program graduates include television writers, screenwriters, writers and teachers of literary fiction and poetry, Web content providers and designers, editors, publishers, and

technical writers.

Admission Requirements

Admission to the program is competitive and is based on the following: possession of a baccalaureate degree from an accredited college or university with a minimum 3.0 GPA; respectable scores on the General Test of the Graduate Record Examinations; three letters of recommendation; a writing sample including at least 20 original pages. Applicants focusing in poetry or writing for stage and screen must also submit a short prose sample of at least five original pages; this may be a college paper, essay or excerpt of short fiction. Campus visits during regularly scheduled open-houses are encouraged, but not required.

Degree Requirements

Thirty units of work are required to earn the MPW degree. MPW 500 Survey of Professional Writing (3 units) is required and should be taken in the first semester. Fifteen additional units must be earned in the student's major genre (fiction, nonfiction, poetry, or writing for stage and screen), including MPW 592abz Professional Writing Project or MPW 594abz Master's Thesis. While taking Professional Writing Project or Master's Thesis, with advisement from their faculty mentors, students will generate their master's professional projects in their respective genres. These projects may be a full length novel, a collection of short stories, a nonfiction manuscript, a collection of essays, a collection of poems, or a full length screenplay or stageplay. The remaining 12 units consist of electives from the MPW curriculum, and students are encouraged to choose widely.

Progressive Degree Program in Master of Professional Writing

The progressive degree program permits exceptional undergraduate students to receive both a Bachelor of Arts and a Master of Professional Writing within five years. It is intended for students with extraordinary MPW preparation and performance who demonstrate a superior level of overall scholarship.

Admission

Applicants may apply after the completion of 64 units of course work applicable to their undergraduate degree since graduating from high school. (AP units, IB units and course work taken prior to high school graduation are excluded). Applicants must submit their applications before completing 96 units of course work. Normally, the application is submitted in the fall semester of the third year of enrollment at USC. The application for admission to a progressive degree program must be accompanied by a departmentally approved course plan proposal and two letters of recommendation from USC faculty members in the Master of Professional Writing program.

Awarding of Degrees

Progressive degree program students must fulfill all of the requirements for both the bachelor's degree and the master's degree, including a professional writing project or a master's thesis. The unit requirement for the master's degree can be reduced by as much as one-third. The degrees may be awarded separately, but the master's degree will not be awarded before the undergraduate degree.

Time Limits

The time limit for completing a progressive degree program is 12 semesters.

Further details about progressive degrees can be found on the Requirements for Graduation page.

Courses of Instruction

PROFESSIONAL WRITING PROGRAM (MPW)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MPW 500 Survey of Professional Writing (3) Analysis of genres, characteristics of narration, stylistic editing, and the role of the writer in contemporary society. Required of all MPW majors. (Duplicates credit in former MPW 900.)

MPW 510 Writers and their Influences (3) Exploration of the notion of influence and its effect on

generating new writing.

MPW 511 Oral History: Witness and Writing (1, max 3) Transforming oral history into works of fiction and nonfiction, with emphasis on honoring the source material in the construction of an original narrative.

MPW 512 Writer's Marketplace (3) A cross-genre investigation of publishing and the marketplace, with the goal of familiarizing students with the practical aspects of writing and selling creative work. (Duplicates credit in former MPW 910.)

MPW 515 Functional Writing for the Marketplace (3) Practical writing and editing skills, language mechanics, and document development techniques that can be applied to reports, grants/proposals, brochures, résumés, and other workplace materials. (Duplicates credit in former MPW 950.)

MPW 520 Writing Humor: Literary and Dramatic (3) Analysis of the specifics of humor — wit, irony, satire, parody and farce — through examples taken from various genres; discussion/workshop on incorporating humor in students' work. (Duplicates credit in former MPW 915.)

MPW 525 Nonfiction Strategies in Poetry and Prose (3) A workshop devoted to shared concerns and possibilities in poems and essays, and to the development of skills as enhanced by nonfiction techniques.

MPW 526 Writing the Review (1, max 3) An investigation of the evolving role of the critic, focused on reviews as essays, and criticism as essential to a rich popular culture and conversation.

MPW 527 Mash-Ups: New Ways to Tell Stories (1, max 3) An examination of innovative storytelling, in which old and new media in tandem can extend our narrative capabilities, and connect us across the world.

MPW 530 Techniques of Fiction Writing (3) A nuts and bolts approach to craft, aiming to identify the requisite tools, and to develop skills necessary for writing vivid and convincing fiction.

MPW 535 Literature and Approaches to Writing the Novel (3) Discussion and analysis of literary classics and their influences as applicable to the writing of today's novel; development of book-length fiction. (Duplicates credit in former MPW 940.)

MPW 537 Fiction Writing Workshop (3, max 9) Development and analysis of book-length fiction; concentration on narration, characterization, point of view, and clarity of style. (Duplicates credit in former MPW 960.)

MPW 538 Approaches to Writing the Novel (1, max 3) A survey of literary classics, focusing on recurring techniques, with the goal of identifying strategies to inform the student's approach to narrative and craft.

MPW 540 Nonfiction Writing (3, max 6) The investigation of various forms in the genre, with attention to the literary value of thinking and making connections on the page.

MPW 541 The Nonfiction Experience (3, max 6) Introduction to nonfiction from reviewing to reporting to the personal essay, with a view towards creating the community essential in the solitary writer's life.

MPW 542 Writing About Place (3, max 6) An exploration of environment as it informs literature, fiction and nonfiction, with the understanding that a vivid evocation of place will enrich prose across genres.

MPW 543 Writing Science (3, max 6) Introduction to science writing with a view towards broadening approaches to story-telling in all genres.

MPW 544 New Media: Writing Online (3, max 6) An examination of literary forms online. Students will emulate great print stylists, shaping narrative and cultivating voice with the possibilities of new media in mind.

MPW 545 Memoir Writing (3, max 6) A workshop designed to hone voice, and determine the best way to approach personal narrative in cultural and historical contexts.

MPW 546 The Personal Essay (3, max 6) A look at first-person narrative, from memoir to criticism, with a

view towards cultivating favorite writerly strategies, and then trying less comfortable forms.

MPW 547 Selling the Nonfiction Book (3, max 6) From the proposal to the outline, a comprehensive look at selling a book-length work of nonfiction, including the completion of a first chapter and promotional précis.

MPW 552 Principles of Poetic Techniques (3, max 6) Beginning analysis and practice of poetic technique, including language and imagery; forms, devices, and conventions; developing voice; use of both traditional and open forms. (Duplicates credit in former MPW 970.)

MPW 554 Poetry Hybrids (3, max 6) Writing and reading poetry in combination with other genres. Forms may include prose poem, verse drama, verse novel, and epic.

MPW 557 Advanced Poetry Writing (3, max 6) Advanced topics in poetry, including wide reading in contemporary poets. Emphasis on the development of the individual voice and subject matter. (Duplicates credit in former MPW 980.)

MPW 560 Principles of Dramatic Structure (3, max 6) Analysis of techniques in preparing scripts for various media; practice in adapting materials from non-dramatic forms. (Duplicates credit in former MPW 920.)

MPW 561 Writing for Stage and Screen (3, max 6) A workshop that examines the art and craft of writing for stage and screen.

MPW 562 Story Conference (3, max 6) Writing the play, teleplay or screenplay, focusing on character development and scene structure, in collaboration with the workshop. (Duplicates credit in former MPW 930.)

MPW 567 Screenplay Workshop (3, max 6) Reading and viewing films with an eye toward the development and completion of the first 45–60 pages of an original screenplay.

MPW 568 Screenwriting across Genres (3, max 6) An investigation of varieties of storytelling through creative responses to both screenplay and non-screenplay forms.

MPW 575 In the Room: The Craft of Television Writing (1, 3, max 6) Introduction to television writing, from pitching to polishing, with all the responsibilities of a staff writer.

MPW 585 Seminar in Professional Writing (1 or 3, max 6) Seminar and workshop with adjustable focus on aspects of professional and creative writing in relation to the literary marketplace.

MPW 589 Internship: Writers in the Field (1–3, max 3) Practical experience in the writing world. Enables students to acquire skills and knowledge that cannot be gained in the classroom. Graded CR/NC.

MPW 590 Directed Research (1–3, max 9) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the program director. Graded CR/NC.

MPW 592abz Professional Writing Project (3-3-0) Supervised preparation of a full-length manuscript in student's major concentration: fiction, nonfiction, poetry, or writing for stage and screen. Credit upon completion of project. Graded IP/CR/NC.

MPW 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded CR/NC.

MPW 599 Special Topics (2–4, max 8) Studies in specific genres, techniques or aspects of the writing craft.

**Recipient of university-wide or college teaching award.*

The Department of Psychology offers five topical areas: (1) Brain and cognitive science, which analyzes the biological and social bases of phenomena and abilities such as appetitive behavior learning, memory, perception, decision making, social understanding, emotion, intelligence, behavior disorders, language development and language comprehension — among humans and related higher animals; (2) Developmental, which studies

changes in behavior — cognitive, linguistic, social and emotional — from childhood through adolescence and adulthood into old age; (3) Clinical science, which focuses on the ways people cope, or have difficulty coping, with problems in behavior, emotions, social interaction, aging, health-related behavior, and substance use and abuse; (4) Quantitative, which focuses on the methodological, statistical and practical tools to study human behavior; and (5) Social, which examines normal human nature and conduct, develops and tests theories concerning the consequences of our social condition and its potential improvement.

In addition, the department offers a joint major in linguistics/psychology and participates in the Dornsife College's interdisciplinary program in neuroscience.

Research is integral to psychology; it enables the faculty to make contributions in the field and to be more effective teachers. Undergraduate students are encouraged to work with members of the faculty on research projects. The most direct way for students to participate in research is to enroll in a directed research course, but it is also possible to take part in ongoing research in less formal ways. Further options for research training include the honors program for psychology majors and the progressive degree program that permits students to complete all requirements for both the B.A. and the M.A. degrees in psychological science in five years.

Dornsife College of Letters, Arts and Sciences

Psychology

Undergraduate Degrees

Major Requirements for the Bachelor of Arts in Psychology

Grade Requirement

A grade of C- or higher is required to count a class toward major requirements.

REQUIRED COURSES, LOWER-DIVISION		UNITS
MATH 114x*	Foundations of Statistics	4
PSYC 100	Introduction to Psychology	4
PSYC 274L**	Statistics	4

*At least one math course of 2.67 units or more is required. MATH 114x (or MATH 208x, MATH 218, or MATH 265) is required. Students with a strong math background may profit from a more advanced class.

Thirty-two upper-division psychology units are required, including:

REQUIRED COURSES, UPPER-DIVISION		UNITS
PSYC 314L**	Research Methods	4
PSYC 316L	Non-Experimental Research Methods	4

**It is recommended that no more than two upper-division psychology courses be taken prior to the completion of PSYC 274L and PSYC 314.

One course from each of four of the following five lists is also required:

COGNITIVE		UNITS
PSYC 301L	Cognitive Processes	4
PSYC 305	Learning and Memory	4
PSYC 440	Introduction to Cognitive Neuroscience	4

DEVELOPMENTAL		UNITS
PSYC 336L	Developmental Psychology	4
PSYC 337L	Adult Development and Aging	4
PSYC 339L	Origins of the Mind	4
CLINICAL		UNITS
PSYC 360	Abnormal Psychology	4
PSYC 361	Introduction to Clinical Psychology	4
PSYC 367	Stress, Health, and the Mind-Body Connection	4
BIOLOGICAL		UNITS
PSYC 304L	Sensation and Perception	4
PSYC 320	Principles of Psychobiology	4
PSYC 326	Behavioral Neuroscience	4
PSYC 404L	Psychophysiology of Emotion	4
PSYC 420	Animal Behavior	4
SOCIAL		UNITS
PSYC 355	Social Psychology	4

Two 400-level psychology courses other than 490x totaling eight units are also required. PSYC 404L and PSYC 420 may not count toward this requirement if used to satisfy the biological category above.

An additional psychology course, either upper or lower-division of at least 2.67 units is required.

Bachelor of Arts, Social Sciences, with an Emphasis in Psychology Requirements

The required courses are: PSYC 100, MATH 114*, PSYC 274L and eight upper-division courses in departments in the social sciences, including five in the Department of Psychology and three outside the department but within the division. These may be any 300- or 400-numbered courses.

*MATH 208, MATH 218 or MATH 265 may substitute for MATH 114.

Requirements for the Bachelor of Arts with a Combined Major in Linguistics and Psychology

For the lower division: LING 210, PSYC 100 and PSYC 274L are required. For the upper division the following courses are required: LING 301 and LING 302; PSYC 314L; two courses selected from LING 380, LING 401, LING 402, LING 403, LING 405, LING 406, LING 407, LING 410, LING 415, LING 466 and LING 485; three additional courses selected from LING 406, PSYC 301L, PSYC 326, PSYC 336L, PSYC 337L, PSYC 424 and PSYC 433. See Department of Linguistics.

Bachelor of Arts in Cognitive Science

Director: Toben Mintz, Ph.D.

Cognitive science is an interdisciplinary major that focuses on the mind and cognition from a variety of perspectives and approaches. The core and electives sample from courses from computer science, human and evolutionary biology, linguistics, mathematics, philosophy and psychology.

The major consists of four fixed core courses, plus two tiers of flexible core courses. The first tier generally consists of more introductory courses and the second tier of more advanced courses, although there are exceptions, and some courses satisfy either tier. Students must take two courses from the first tier and three courses from the second. The purpose of the flexible tiers is to structurally implement interdisciplinary breadth with some degree of flexibility. The flexible core is a subset of the electives, from which students can choose in order to complete the required number of units.

Students may elect to focus their curriculum from one of three tracks, which are suggested courses of study for focusing on a particular theme in cognitive science. This may be accomplished through individual advisement: language, reasoning and decision-making, and the computational mind.

Total required units for major: 43–48 units. Consisting of 16 core units, 18–20 flexible core units and 9–12 elective units.

CORE REQUIREMENTS (4 COURSES)		UNITS
PSYC 100	Introduction to Psychology	4
PSYC 274L	Statistics	4
PSYC 301L	Cognitive Processes	4
PSYC 339L	Origins of the Mind	4
		16

FLEXIBLE CORE REQUIREMENTS (5 COURSES)		UNITS
Two courses from:		
CSCI 455*	Introduction to Programming Systems Design	4
LING 210	Introduction to Linguistics	4
LING 301*	Introduction to Phonetics and Phonology	4
LING 302*	Introduction to Syntax and Semantics	4
PHIL 250ab	Elementary Formal Logic	2-2
PHIL 262	Mind and Self: Modern Conceptions	4
PSYC 304L	Sensation and Perception	4
PSYC 336L	Developmental Psychology	4

Three courses from:		
CSCI 460*	Introduction to Artificial Intelligence	3
HBIO 306	Primate Social Behavior and Ecology	4
HBIO 308	Origins and Evolution of Human Behavior	4
LING 405	Child Language Acquisition	4
LING 406	Psycholinguistics	4
LING 407	Atypical Language	4
PHIL 350	Symbolic Logic	4
PHIL 422	British Empiricism	4
PHIL 462	Philosophy of Mind	4
PHIL 465	Philosophy of Language	4
PSYC 304L	Sensation and Perception	4
PSYC 336L	Developmental Psychology	4
PSYC 401	Evolutionary Psychology	4
PSYC 420	Animal Behavior	4
PSYC 422*	Human Judgment and Decision Making	4
PSYC 433*	Children's Learning and Cognitive Development	4
PSYC 450L	Neural Network Models of Social and Cognitive Processes	4
PSYC 454	Social Cognition	4
		18–20

ELECTIVES (3 COURSES)		UNITS
CSCI 101L	Fundamentals of Computer Programming	3

CSCI 455x	Introduction to Programming Systems Design	3
CSCI 460*	Introduction to Artificial Intelligence	3
HBIO 200L	The Human Animal	4
HBIO 306	Primate Social Behavior and Ecology	4
HBIO 308	Origins and Evolution of Human Behavior	4
HBIO 406	Theory and Method in Human Evolutionary Biology	4
LING 210	Introduction to Linguistics	4
LING 301*	Introduction to Phonetics and Phonology	4
LING 302*	Introduction to Syntax and Semantics	4
LING 405	Child Language Acquisition	4
LING 406	Psycholinguistics	4
LING 407	Atypical Language	4
MATH 116	Mathematics for the Social Sciences	4
PHIL 250ab	Elementary Formal Logic	2-2
PHIL 262	Mind and Self: Modern Conceptions	4
PHIL 350	Symbolic Logic	4
PHIL 422	British Empiricism	4
PHIL 423	The Critical Philosophy of Kant	4
PHIL 462	Philosophy of Mind	4
PHIL 463	Theories of Action	4
PHIL 465	Philosophy of Language	4
PHIL 486	Methodologies of the Sciences	4
PSYC 304L	Sensation and Perception	4
PSYC 336L	Developmental Psychology	4
PSYC 401	Evolutionary Psychology	4
PSYC 420	Animal Behavior	4
PSYC 422*	Human Judgment and Decision Making	4
PSYC 424	Neuropsychology	4
PSYC 425	Functional Imaging of the Human Brain	4
PSYC 433*	Children's Learning and Cognitive Development	4
PSYC 440	Introduction to Cognitive Neuroscience	4
PSYC 450L	Neural Network Models of Social and Cognitive Processes	4
PSYC 454	Social Cognition	4
		9-12

**Prerequisite required*

Total units: 43-48

Note: A course that is listed in both flexible core categories can be taken in either one. Students must choose a minimum of 16 upper-division units from the flexible core and electives lists.

Minor in Psychology

The minor requires six courses: PSYC 100 and five additional courses:

One course is required in each of three of the five topic areas listed under Major Requirements. PSYC 314L may be used to fulfill one of these topic areas.

Two elective PSYC courses. One must be upper-division, 300-level or higher.

Limitations:

1. Students must complete at least 16 upper-division PSYC units.
2. No more than four units of PSYC 490x is applicable to the minor.
3. Each of the six courses must be at least 2.67 units.

Minor in Psychology and Law

This interdisciplinary minor brings together courses in psychology that focus on the social, clinical, cognitive and societal aspects of psychology and how it relates to law. This knowledge is augmented with courses from the USC Gould School of Law that identify the relationship between mental health, social psychology and law.

Twenty-four units are required for the minor. A minimum of four courses (16 units) must be unique to the minor. Psychology majors and students majoring in social sciences with an emphasis in psychology may “double count” up to two courses toward the major and minor; however, they must take a minimum of four courses that do not apply to the major.

Required Courses

PSYC 100 or LAW 200 (PSYC 100 is a prerequisite to upper-division PSYC classes). Psychology majors must take both courses.

Elective Requirements

At least two upper-division courses in Psychology taken from the following list: PSYC 301, PSYC 304, PSYC 355, PSYC 360, PSYC 363, PSYC 365, PSYC 454.

At least two upper-division Law classes from the following list: LAW 402, LAW 403, LAW 404.

No more than one course from the following list may be used to complete the four unique courses requirement: ANTH 355, ANTH 371, LING 412, LING 450, SOCI 350, SOCI 351, SOCI 353.

Minor in Consumer Behavior

This interdisciplinary minor explores consumer thinking from the perspective of psychology, marketing, economics, anthropology, sociology and other departments interested in popular culture. Why do people form the attitudes and impressions they do? How do individual factors, culture, mass media, economics and social trends influence people’s decisions? See USC Marshall School of Business.

Minor in Critical Approaches to Leadership

See the Department of Interdisciplinary Studies.

Honors Program

The department offers an honors program for outstanding students in the B.A., Psychology major who desire advanced research training in preparation for graduate work in the social sciences or in professional schools. The primary focus of the honors program is the completion of a research study under the guidance of a faculty adviser. Students are admitted to the program in the fall semester of their junior year and enter the program in the spring of their junior year by enrolling in PSYC 380. To be eligible for admission, a student must have an overall GPA of at least 3.5 at the time of application to the program. This program is not available to students majoring in Social Sciences with an emphasis in Psychology. Students in the honors program complete all major requirements, including PSYC 380 Junior Honors Seminar during the spring semester of their junior year and PSYC 480 Senior Honors Seminar during the spring semester of their senior year. Students complete an honors thesis proposal as part of the Junior Honors Seminar and must submit a completed senior honors thesis by April 1 of the senior year. Students are also expected to have an overall GPA of at least 3.5 at the time of graduation. For further information, contact the undergraduate adviser or the director of the program, Dr. JoAnn M. Farver.

Progressive Degree Program in Psychology

This progressive degree program permits superior students to complete all requirements for both the B.A. and the M.A. degrees in psychological science in five years. Students may apply on completion of 64 units of course work applicable to their undergraduate degrees since graduating from high school (AP units, IB units and course work taken prior to high school graduation are excluded), but not later than the end of their junior year (or the completion of 96 units). To be eligible for admission, students must have at least a 3.5 overall GPA and must have completed PSYC 274L Statistics and PSYC 314 Research Methods with at least a B+ in each. The application for admission to a progressive degree program must be accompanied by an approved course plan proposal and letters of recommendation from two USC faculty members (at least one in the Department of Psychology who agrees to mentor the student). The requirements for both the B.A. and M.A. degrees must be satisfied. Further details about progressive degrees can be found on the Requirements for Graduation page.

Psi Chi

Psi Chi is the national honor society in psychology. Membership is open to graduate and undergraduate men and women who meet the minimum qualifications. Psi Chi is a member of the Association of the College Honor Societies and is an affiliate of the American Psychological Association and the American Psychological Society.

Dornsife College of Letters, Arts and Sciences

Psychology

Graduate Degrees

The Department of Psychology offers an M.S. in Applied Psychology as well as a variety of programs leading to the Ph.D. degree. Programs leading to the Ph.D. degree fall within five major groupings: (1) clinical science, including specializations in adult clinical, clinical-aging and child and family; (2) developmental psychology, including child and adolescent development and adult development and aging; (3) brain and cognitive science, including cognitive neuroscience, behavioral neuroscience, clinical neuroscience and behavioral genetics; (4) quantitative methods; and (5) social psychology.

All five specialty Ph.D. areas provide training for careers in research, teaching and applied work.

Admission Requirements

Psychology courses required for admission to the Ph.D. program are an introductory course, a course in statistics, a course in research methods or experimental psychology and at least one course from each of the following lists: (1) one or more of comparative psychology, physiological psychology, sensation and perception, learning and memory, motivation, and emotion; and (2) one or more of developmental psychology, social psychology, abnormal psychology, personality, and history of psychology. Additional courses are desirable, as is work in the biological, physical and social sciences, in mathematics and in philosophy. Students with less background in psychology but outstanding undergraduate records in related fields are also encouraged to apply.

Students are selected on the basis of undergraduate records, scores on the Graduate Record Examinations General Test, course background, letters of evaluation, personal statement of interests and goals and evidence of research skills or interests (e.g., publications or participation in research projects).

The faculty of each specialty area select the students to be admitted in that area. Because of this procedure, applicants should designate the specialty area to which they seek admission.

Application for admission in psychology requires submission of two sets of material: special departmental forms and university application forms. Students are admitted only for study beginning in the fall semester; both sets of completed application forms must be submitted by December 1 for admission the following fall.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Arts in Psychology

The department does not admit students whose objective is this master's degree. However, if a student accepted in the doctoral program does not have a master's degree, the department strongly recommends completion of the requirements for the M.A. in Psychology in the course of work toward the Ph.D. degree. This involves 24 units of course work and a thesis.

Master of Science in Applied Psychology

Seeley G. Mudd, Room 706

(213) 740-2282

Fax: (213) 746-9082

Email:  appliedpsychology@usc.edu

dornsife.usc.edu/map

Program Director: Ellen L. Leggett, Ed.D.

The Master of Science in Applied Psychology program (MAP) is designed for individuals who wish to pursue or advance a career in a non-academic field where knowledge of human behavior is essential to effective job performance. The program stresses practical applications of psychological principles related to social influence, human motivation, interpersonal dynamics, decision-making, and performance improvement.

The program is especially appropriate for those who have majored in a behavioral science field, e.g., psychology, sociology, political science or anthropology. These applicants must have received their baccalaureate degree by the semester in which they begin the program.

Applicants must apply for admission to the Graduate School, and satisfy all requirements for admission. Details on the method for applying, admission criteria and deadlines can be found at *dornsife.usc.edu/map*.

Thirty-four units of course credit is required for the MAP degree. These units are taken from an inventory of courses that are specified for the MAP program. All students are required to take PSYC 505, PSYC 550ab, PSYC 552, PSYC 565, 4 to 8 units of PSYC 591, and 2 units of PSYC 592. The specific number of PSYC 591 units taken in a given semester will depend in part on what options are available from internship sponsors. In addition, students choose from the following courses to focus on either organizational psychology or on consumer psychology: PSYC 513, PSYC 517, PSYC 556, PSYC 622. MAP students may take up to 4 units of PSYC 590.

Based on the student's academic background, work experience and career goals, substitutions of up to two courses may be made from other courses eligible for graduate credit.

The program for a given cohort of students begins in the fall semester. The normal expectation is that full-time students will complete the program in two semesters plus the summer. Part-time students will generally take one or two courses per semester, and must complete the program within five years.

The Master of Science in Applied Psychology program is also available as a part-time, online degree. Students may enter this program in fall, spring or summer terms.

Doctor of Philosophy in Psychology

Residency Requirement

A minimum of 24 graduate units at USC is required for the doctoral degree.

Course Requirements

Each student must take at least 36 substantive units in psychology at USC during the first three years. Students must complete one statistics and/or research methods course as well as a set of core courses that cover topics in brain and cognitive sciences and clinical, developmental and social areas, the specifics of which are provided in the department's handbook for graduate students. Additional course requirements vary according to specialty

area.

Research Requirement

During the first and second year, students work on either a master's thesis or a research report of comparable scope and quality. A research project done at USC is required of all students (by the conclusion of the summer following the student's second year), regardless of prior graduate work.

Screening Procedure

The student's ability to master graduate-level course material is first evaluated after completion of no more than 24 units, and not later than the third semester of graduate work at USC. The final screening procedure is the successful completion of a second-year project requirement. This evaluation is based on the student's performance in courses taken and on an evaluation of the student's research competence as reflected in the second year research project. The project is evaluated by a committee of three faculty, including the student's primary adviser.

Additionally, students are evaluated each year based on adviser input, course work and research progress.

Qualifying Exam Committee

In preparation for the qualifying examination, each student assembles a five-person qualifying exam committee to direct the student's program of studies and evaluate research competence. The committee continues to serve until after the qualifying examination has been passed, the dissertation topic approved, and the student admitted to candidacy for the Ph.D. At that time the student assembles a dissertation committee of four or more members (usually consisting of members of the qualifying exam committee, one of whom must be a faculty member from outside the department), who advise on and evaluate the dissertation.

Qualifying Examination

The qualifying examination evaluates the student's ability to conduct independent scholarship and research. The student is evaluated based on oral and written presentation of two elements: a written review paper or written exam and the dissertation proposal. The qualifying examination is planned, administered and evaluated by the student's qualifying exam committee. It should be taken no later than during the fifth semester.

Doctoral Dissertation

A student is expected to engage in research activity throughout his or her graduate career, leading up to and culminating in the Ph.D. dissertation. The dissertation is based on an original investigation, usually involving empirical data.

Defense of the Dissertation

The student's doctoral dissertation is defended at either a defense oral, based on an approved preliminary copy of the dissertation, or a final oral, based on the final version of the dissertation.

Advisement

Each student has a major adviser who is usually in the specialty area. The qualifying exam committee should be formed at least one semester before the student takes the qualifying examination. Advisement concerning graduate school requirements may also be sought from the staff graduate adviser and the faculty member serving as director of graduate studies.

Internship Requirement

Students in the clinical science Ph.D. program need a minimum of three full-time in-residence academic years of graduate study plus one full year of internship at a facility approved by the clinical faculty.

Doctor of Philosophy in Psychology (Clinical) and Master of Public Health (Health Promotion)

The Ph.D./MPH dual degree combines knowledge of clinical psychology research and practice with an understanding of health from a population perspective. The student enrolls primarily in the clinical science doctoral program, while taking additional course work for the MPH. During the second and subsequent years, course work is taken in both programs. The dissertation is undertaken through the Department of Psychology.

Dornsife College of Letters, Arts and Sciences

Psychology

Courses of Instruction

PSYCHOLOGY (PSYC)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PSYC 100g Introduction to Psychology (4, FaSpSm) Factors that influence human behavior, including learning, thinking, perception, motivation, and emotion; analysis of determinants of development, adjustment, and maladjustment.

PSYC 165Lg Drugs, Behavior and Society (4, Irregular) An integrative systems perspective of drugs; including their historical, economic, and cultural importance, psychopharmacology, addiction, relationship to crime, and therapeutic use in treating psychological disorders.

PSYC 201Lg The Science of Happiness (4) Evaluates scientific research on human happiness. Integrates research from psychology, economics, and neuroscience in the evaluation of personal and public policy choices.

PSYC 210gm Social Analysis of Gender (4) (Enroll in SWMS 210gm)

PSYC 240gx Scientific Inquiry and Reasoning (4) Critical analysis and reasoning skills required to solve scientific problems in human behavior, including presentation of data, logic of research design, statistics, and research ethics. Not for major credit for psychology majors.

PSYC 274Lg Statistics (4, FaSpSm) Introduction to the use of statistics in psychology: basic ideas in measurement; frequency distributions; descriptive statistics; concepts and procedures in statistical inference. *Prerequisite:* MATH 114x, MATH 208, MATH 218, or MATH 265; *recommended preparation:* PSYC 100.

PSYC 275Lg Language and Mind (4, FaSp) (Enroll in LING 275Lg)

PSYC 290x Supervised Research in Psychology (2-8, max 8, FaSpSm) Supervised Research with department faculty. Not for major or minor credit. *Prerequisite:* PSYC 100.

PSYC 301L Cognitive Processes (4, Irregular) Experimental and theoretical aspects of human memory, perception, thinking, and language. Lectures, demonstrations, and individual experiments. *Prerequisite:* PSYC 100.

PSYC 304L Sensation and Perception (4, Irregular) Receptor processes and stimulus organization; traditional topics in the perception of objects, space, time. Laboratory demonstrations and exercises. *Prerequisite:* PSYC 100.

PSYC 305 Learning and Memory (4, Irregular) Principles involved in classical and operant conditioning. Concentration on basic causes of behavior; consideration of the relevance of simple behavioral laws to complicated human behavior. *Prerequisite:* PSYC 100.

PSYC 314L Research Methods (4, FaSpSm) Experimental research methods in psychology; nature and concepts of scientific method. Lab exercises, data analysis and preparation of APA style empirical report. *Prerequisite:* PSYC 100 and PSYC 274L.

PSYC 316L Non-Experimental Research Methods (4, FaSpSm) Non-experimental research methods in psychology. Observational, survey and data analysis exercises. *Prerequisite:* PSYC 100 and PSYC 314.

PSYC 320 Principles of Psychobiology (4, Irregular) The integrative study of bio-behavioral systems. Evolutionary, developmental, ecological, social, ethological, and physiological factors mediating representative behavioral and psychological phenomenon are examined in detail. *Prerequisite:* PSYC 100.

PSYC 326 Behavioral Neuroscience (4, FaSp) Neural bases of behavior. Concentration on sensory and motor processes and the interaction of neural, chemical, and hormonal systems. *Prerequisite:* PSYC 100.

PSYC 336L Developmental Psychology (4, FaSp) Child and adolescent behavior and associated theories; exploration of the continuity between child and adult behavior. Laboratory projects. *Prerequisite:* PSYC 100.

PSYC 337L Adult Development and Aging (4) Genetic, physical, and social influences during adult years on perception, learning and memory, intelligence, personality, social roles, and normal and deviant behavioral patterns. Laboratory demonstrations and exercises. *Prerequisite:* PSYC 100.

PSYC 339Lg Origins of the Mind (4, Sp) Exploration of ancient philosophical questions concerning the origins of human knowledge through empirical studies of infants, animals, and adults from diverse cultures.

PSYC 353g Close Relationships (4, FaSp) Scientific perspective of close relationships: intimate relationships, friendships and others, evolutionary and biological bases of attraction and love, historical, social, cultural influences. *Prerequisite:* PSYC 100.

PSYC 355 Social Psychology (4, FaSp) Theoretical and experimental analysis of human behavior. Social processes involved in attitudes, conformity, compliance, interpersonal perception, liking, affiliation, aggression, altruism, and group dynamics. *Prerequisite:* PSYC 100.

PSYC 359 Interpersonal Relations (4, FaSp) Theories and research on person perception, attribution processes, interpersonal attraction and romantic love, freedom and causality, social comparison phenomena. *Prerequisite:* PSYC 100.

PSYC 360 Abnormal Psychology (4, FaSp) The commonly diagnosed behavior pathologies; biological, social, cultural, and developmental antecedents of abnormal behavior; principles of learning, perception, and motivation, as they relate to psychopathology. *Prerequisite:* PSYC 100.

PSYC 361 Introduction to Clinical Psychology (4, Irregular) Introduction to the scientist-practitioner model of clinical psychology, including research methods, psychological assessment and diagnosis, psychotherapeutic interventions, and treatment of special populations. *Prerequisite:* PSYC 100.

PSYC 363 Criminal Behavior (4) Genetic, biological, psychological, and sociological characteristics of those who evidence criminal behavior; theoretical formulations to be reviewed and appraised. *Prerequisite:* PSYC 100. Duplicates credit in former PSYC 463.

PSYC 365 Introduction to Forensic Psychology (4, FaSpSm) Survey of current topics, technologies and techniques. Students acquire a basic understanding of how forensic psychologists contribute their unique expertise to the American legal system. *Prerequisite:* PSYC 100. Duplicates credit in former PSYC 465.

PSYC 367g Stress, Health, and the Mind-Body Connection (4) Introduction to psychological, biological, and behavioral processes affecting physical health, including stress, coping with disease, health behaviors, and socioeconomic and cultural influences on health. *Recommended preparation:* PSYC 100 or equivalent.

PSYC 372 Human Sexuality (4) Psychological and physiological base of sexuality; gender identity, childbearing, birth control, venereal diseases; dysfunctions and treatments.

PSYC 380 Junior Honors Seminar (2–4, max 8, Sp) Advanced study of scientific inquiry in psychology with in-depth analysis of current research by faculty in the Psychology Department. Preparation for senior honors thesis research. *Corequisite:* PSYC 314L.

PSYC 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

PSYC 391 Directed Field Experience in Psychology (1–4, max 4, FaSpSm) Individual field experience and independent study supervised by an on-site professional and USC faculty sponsor. Open only to psychology majors and minors. *Prerequisite:* PSYC 100; *recommended preparation:* minimum of three courses completed in psychology.

PSYC 401 Evolutionary Psychology (4) Evolutionary and genetic basis of human behavior, including intelligence, sexual behavior, criminal behavior, and violence. Etiology of human diversity, including sex, race, and individual differences. *Prerequisite:* PSYC 100; *recommended preparation:* PSYC 274L.

PSYC 404L Psychophysiology of Emotion (4, Irregular) Introduction to the scientific study of emotional behavior. Emphasizes research into relations between physiological and psychological variables underlying emotional experience. Demonstrations and laboratory. *Prerequisite:* PSYC 100, PSYC 274L, and PSYC 314.

PSYC 405 Child Language Acquisition (4) (Enroll in LING 405)

PSYC 406 Psycholinguistics (4) (Enroll in LING 406)

PSYC 407 Atypical Language (4) (Enroll in LING 407)

PSYC 415L Psychological Measurement (4) Classical and modern approaches to psychological measurement; scaling; test construction; true score reliability model; generalizability theory; validity; decision theoretic selection; item analysis; item response theory. *Prerequisite:* PSYC 314L.

PSYC 418 Experimental Exploration into the Origins of Cognition (4) Exploration of the origins of cognition via the basics of experimental design, 3D computer modeling, data analysis, and scientific presentation. *Recommended preparation:* PSYC 314 or background in experimental research.

PSYC 420 Animal Behavior (4) Exploration of human nature through studies of nonhuman animals, including topics of navigation, culture, object representation, social cognition, music, and morality. *Prerequisite:* PSYC 100.

PSYC 421L Data Analysis for Psychological Research (4, max 8) Multivariate analysis emphasizing model estimation and testing; topics vary, e.g., multiple regression, logistic regression, factor analysis, multilevel linear modeling, structural equation modeling, multiway frequency analysis. *Prerequisite:* PSYC 314L.

PSYC 422 Human Judgment and Decision Making (4) Descriptive and normative models of decision making; topics include probability judgments, inference, correlation, emotion, mental accounting, decision analysis, lens model, equity, social dilemmas, time, risk. *Prerequisite:* PSYC 314L.

PSYC 424 Neuropsychology (4, Irregular) Effects of brain damage on human behavior and abilities, particularly language, memory, and emotion. Open only to junior standing or higher. *Prerequisite:* PSYC 100.

PSYC 425 Functional Imaging of the Human Brain (4) Introduction to the physical and physiological bases of Magnetic Resonance Imaging (MRI), and principles of functional MRI, safety, design and analysis of experiments, and operation. *Prerequisite:* PSYC 100, PSYC 274.

PSYC 430 Social Development of Infants, Children and Adolescents (4) An analysis of selected topics and issues in child social development. *Prerequisite:* PSYC 100; *recommended preparation:* PSYC 274L, PSYC 314L, PSYC 336L.

PSYC 433 Children's Learning and Cognitive Development (4) Principles of cognitive development, learning, and motivation applied to the development of literacy; includes tutoring a child two hours per week. *Prerequisite:* PSYC 336L.

PSYC 434 Intelligence, Problem Solving and Creativity (4) Psychometric and experimental approaches to the study of intelligence, problem solving, reasoning and creativity, including analysis of mental test construction and validity. *Prerequisite:* PSYC 100 and PSYC 274L.

PSYC 437 Adolescent Development (4, FaSp) The adolescent years from both an applied and a research-

oriented perspective. Topics include physical, cognitive, and moral development; socialization; and sexual and sex-role development. *Prerequisite:* PSYC 100.

PSYC 438 Behavioral Genetics (4, Irregular) Inheritance and evolution of behavioral characteristics in man and other species. *Prerequisite:* PSYC 274L.

PSYC 440 Introduction to Cognitive Neuroscience (4, Sp) Introduction to the major components of cognition (perception, memory, intelligence) in terms of the neural coding characteristic of the relevant brain areas. *Prerequisite:* PSYC 100.

PSYC 450L Neural Network Models of Social and Cognitive Processes (4) Introduction to using neural network or connectionist models to simulate cognitive, social, emotional and motivational processes. Introduction of basic concepts and tools in computational neuroscience. *Prerequisite:* PSYC 100; *recommended preparation:* basic knowledge of programming is helpful, but not required.

PSYC 451 Formation and Change of Attitudes (4, Irregular) Effects of socialization, personal influence, propaganda and social structure on private attitudes and public opinion. *Prerequisite:* PSYC 100 and PSYC 355 or PSYC 359.

PSYC 453 Intergroup Relations (4) Examination of the nature of relations between human groups and the psychological mechanisms relating to intergroup conflict, war, genocide, stereotyping, prejudice, and discrimination. *Prerequisite:* PSYC 355.

PSYC 454 Social Cognition (4, Irregular) Theory and research on cognitive processes in social behavior, to include social inference, cognition and emotion, the Self, social categorization, person memory, and attribution processes. *Prerequisite:* PSYC 100; PSYC 355 recommended.

PSYC 456 Conservation Psychology (4, Fa) Examination of theories, research, interventions regarding psychology of environmental sustainability including cognition, emotion, behavior, attitudes, persuasion, values, social identity, consumerism, and science of happiness. *Prerequisite:* PSYC 100.

PSYC 459 Industrial/Organizational Psychology (4) I/O Psychologists develop and apply scientifically supported solutions to the workplace. “Industrial” deals with human resource functions, and “Organizational” with psychological aspects of the organization. *Prerequisite:* PSYC 100; *recommended preparation:* PSYC 316.

PSYC 462m Culture and Mental Health (4, Irregular) The influence of culture, ethnicity, race and gender on human behavior. Mental health issues relevant to ethnic minorities in the U.S. *Recommended preparation:* sophomore standing or higher; PSYC 100.

PSYC 464 Psychology of Marriage and the Family (4) Theories and research on family relationships across the life span, including research methods, cultural and developmental perspectives, communication, conflict, attachment, individual psychopathology and family violence. *Prerequisite:* PSYC 100.

PSYC 469 Schizophrenia Research (4, Irregular) Current research on possible causes of schizophrenia. Topics: history, diagnosis, genetics, neural development, obstetrics, psychosocial factors, brain imaging, psychopharmacology, premorbid signs and aging. *Prerequisite:* PSYC 100; *recommended preparation:* read current professional journals related to schizophrenia.

PSYC 480x Senior Honors Seminar (2–4, max 8, Sp) Advanced study of empirical approaches in psychology. Progress presentations and evaluations of Senior Honors Thesis research. In-depth exploration of issues in science. Not available for graduate credit. *Prerequisite:* senior standing in Psychology Undergraduates Honors Program.

PSYC 490x Directed Research (1–8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

PSYC 499 Special Topics (2–4, max 8, FaSp) Selected topics in the various specialty areas within psychology. Topic will vary from semester to semester. *Prerequisite:* PSYC 100.

PSYC 500L An Overview of Quantitative Methods in Psychology (4) Team taught introduction to analysis of variance, regression analysis, multivariate measurement, and significance testing. Computer laboratory linked to class material using SAS, SPSS, and R. Open only to psychology majors.

PSYC 501L Statistics in Psychological Research (4, Fa) Basic statistical principles and techniques as well as modern improvements on classic inferential methods.

PSYC 502L Analysis of Variance and Experimental Design (4, Sp) ANOVA, including three-way and within groups designs, multiple comparisons, ANCOVA, plus related methods based on robust smoothers and multivariate techniques. *Prerequisite:* PSYC 501L.

PSYC 503L Regression and the General Linear Model (4, Fa) Multiple regression as a tool in experimental and non-experimental data; analysis of variance and covariance as regression on coded variables. Computer applications Laboratory exercises. *Prerequisite:* PSYC 501.

PSYC 504 Research Design (4, Sp) Intensive review of research methods in the behavioral sciences. Problem analysis, formulation of research propositions, and procedures for research inference.

PSYC 505 Research Methods in Applied Social Psychology (4, FaSpSm) Various research techniques that are useful in a variety of different real world settings, such as business, governmental agencies and charities. Open only to Master of Science, Applied Psychology students.

PSYC 506 Learning and Cognition (4, Irregular) Survey of learning theory and research, including conditioning and information-processing approaches with human and animal subjects.

PSYC 508 Historical Foundations of Psychology (4, Irregular) History of psychology: clinical, cognitive, developmental, experimental, quantitative, and social; epistemology and philosophy of science as applied to psychology.

PSYC 510 Visual Cognition (4, Irregular) The behavioral, neural, and computational aspects of real-time shape recognition will be examined, along with implications for imagery, reading, concepts, and attention.

PSYC 512 Seminar in Social Psychology (4, max 8, Fa) Problems and theories of the person in the social context. Person perception, interpersonal relations, attitude dynamics, social systems.

PSYC 513 Attitudes and Social Influence (4, FaSpSm) Current theories of attitudes and behavior, measurement, attitudes as predictors of behaviors, effects on changing attitudes and behavior. Open only to Master of Science, Applied Psychology students.

PSYC 514 Psychopathology (4, Fa) Study of psychopathology: in-depth survey of theory and research concerning psychological disorders; introduction of diagnosis. (One of three clinical psychology core courses: PSYC 514, PSYC 515, PSYC 619.)

PSYC 515 Clinical Assessment (4, Fa) Study of clinical assessment: test construction, measurement and prediction of behavior, major cognitive and personality assessment instruments. (One of three clinical psychology core courses: PSYC 514, PSYC 515, PSYC 619.)

PSYC 517 Group Dynamics and Leadership (4, FaSpSm) Theory and research on effective teams and characteristics of strong leaders. Negotiation, morale-building, managing expectancies, utilization of cultural diversity as a strength. Open only to Master of Science, Applied Psychology students.

PSYC 520 Fundamentals of Psychological Measurement (4) Factor analysis; latent variable; scaling; test construction; classical true score reliability model; generalizability theory; validity; decision theoretic approaches to selection; item analysis; item response theory.

PSYC 521 Cross Cultural Psychology in Applied Settings (4, FaSpSm) Examination of major theoretical frameworks mapping worldwide cultures and values with a focus on applying that knowledge in organizations. Open only to masters students in Applied Psychology.

PSYC 524 Research Design in Developmental Psychology (4, Irregular) Review and practice in the analysis and design of experimental and quasiexperimental paradigms for research on ontogenetic age changes and generational differences in behavior.

PSYC 532 Affective Computing (3, Sp) (Enroll in CSCI 534)

PSYC 533 Cognitive Development in Children (4, Sp) Review of theories of cognitive development. Analysis of research on brain functioning, perception, memory, language, reasoning and academic skills from birth to adolescence.

PSYC 534 Social and Emotional Development in Children (4, Fa) Theories of social and emotional development, including sociocultural perspectives. Analysis of research on temperament, social relationships, individuation and moral development from birth to adolescence. Open to graduate students in psychology.

PSYC 538 Origins of Human Nature (4) Exploration of the evolutionary and developmental origins of human nature. Topics include navigation, object and number cognition, culture, sexual behavior, cooperation, language, and morality.

PSYC 540 Cognitive Neuroscience (4, Sp) An examination of the major components of cognition (e.g., perception, memory, intelligence) in terms of the neural coding characteristic of the relevant brain areas.

PSYC 544 Psychophysiology (4, max 8, Irregular) Recent research on relations between basic psychological states (e.g., cognition, learning, emotion) and physiological response processes (e.g., autonomic responses, covert muscle activity).

PSYC 545 Neuropsychology (4, Irregular) Brain mechanisms underlying perceptual and cognitive functioning: brain damage, loss of function, and clinical assessment.

PSYC 546 Current Topics in Cognitive Neuroscience (4, max 8) Analysis of selected, recent advances of perception, memory, attention, and conceptualization, as revealed by neuroimaging; behavioral, drug, primate single-unit studies; cognitive deficits and evolutionary perspectives. *Recommended preparation:* some background in behavior science, neuroscience, or computational science.

PSYC 547 Functional Neuroanatomy (4, Irregular) Regional organization and systems of the mammalian nervous system and their functions.

PSYC 550ab Proseminar in Human Behavior (4-4, FaSpSm) The nature of the human mind, social interactions, conflicts, cooperative behavior, mutual influence and effectiveness. Application of psychological principles to the dynamics of commercial entities. Open only to Master of Science, Applied Psychology students.

PSYC 551 Decision Neuroscience (4) Neuroscientific studies attempting to understand the neural basis of judgment and decision-making, social behavior, and market economies. *Recommended preparation:* PSYC 547.

PSYC 552 Principles of Consumer Psychology (4) Examination of the attitudes and decisions of consumers, and how to effectively reach consumers by using persuasion and proper positioning in the marketplace. Open only to Master of Science, Applied Psychology students.

PSYC 555 Introduction to Functional Magnetic Resonance Imaging (4, FaSp) The physical and physiological bases of MRI and fMRI. Design and analysis of fMRI experiments. Operation of a magnetic resonance imaging system.

PSYC 556 Psychology of Interactive Media (4) Examination of the diverse methods of communicating with a target audience with a special emphasis on the newest computer-based tools for providing information and influence. Open only to M.A., Communication; M.C.M.; and Master of Science, Applied Psychology students.

PSYC 565x Organizational Psychology (4, FaSpSm) Examination of the psychological factors that impact employee motivation, job satisfaction, teamwork, leadership, and organizational development. Open only to Master of Applied Psychology students. Not available for major credit for GSBA majors.

PSYC 575L Multivariate Analysis of Behavioral Data (4, Irregular) Multivariate statistical models and contemporary computer methods in multiple regression, multivariate analysis of variance, factor analysis, canonical correlation, repeated measures analysis, and structural equation modeling. *Prerequisite:* PSYC 500L.

PSYC 576 Psycholinguistics (3, Fa) (Enroll in LING 576)

PSYC 577 Analysis of Covariance Structures (4, Irregular) Multivariate analysis of non-experimental data, including structural equation modeling, path analysis, and confirmatory factor analysis. Computer applications using variety of optimization routines and purpose-written software. *Prerequisite:* PSYC 503.

PSYC 578 Workshop in Quantitative Methods (4, max 8) Practical, hands-on experience in the application of selected quantitative methods to empirical data. Includes training in use of relevant computer software. *Prerequisite:* PSYC 501 and either PSYC 502 or PSYC 503.

PSYC 586 Advanced Psycholinguistics (3, max 9) (Enroll in LING 586)

PSYC 590 Directed Research (1–12, FaSp) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PSYC 591 Applied Psychology Internship (2-8, max 8, FaSpSm) Internship in a non-university setting, such as business, governmental agency, or NGO. Graded CR/NC. Open only to M.S., Applied Psychology students.

PSYC 592 Applied Psychology Treatise (2, FaSpSm) Requires a research paper of substantial length and high quality that integrates the Internship experience with concepts and principles of human behavior. Graded CR/NC. Open only to M.S., Applied Psychology students.

PSYC 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

PSYC 594abz Master's Thesis (2-2-0, FaSp) Credit on acceptance of thesis. Graded IP/CR/NC.

PSYC 595 Practicum in Clinical Psychology (1–4, max 12, FaSp) Supervised experience in interviewing skills and assessment, including psychological test administration and the preparation of reports. Graded CR/NC.

PSYC 599 Special Topics (2–4, max 8) Selected topics in the various speciality areas within psychology at the graduate level. Topic will vary from semester to semester.

PSYC 602 Self-concept and Motivation (4) Graduate-level depth-and-breadth course using a social psychological perspective on self-concept.

PSYC 606 Seminar in Learning and Memory (4, max 8, Irregular) Basic problems and experimental data related to understanding the nature of learning processes.

PSYC 607 Seminar in Behavioral Neuroscience (4, max 8, Irregular) Selected topics considered in the contexts of recent experimental developments and current theoretical trends.

PSYC 610 Seminar in Information Processing in the Nervous System (4, max 8, Irregular) Current issues in research on short term retention, recognition, and recall; sensory filtering and attention; information processes in human skill; limits of capacity.

PSYC 612 Seminar in Advanced Social Psychology (4, max 16, Irregular) An intensive consideration of selected concepts, theories, and research problems in social psychology. *Prerequisite:* PSYC 512.

PSYC 616 Research Techniques for Non-Experimental Social Science (4, Irregular) Quasi-experimental designs; causal inference from correlational research, techniques for evaluating measures of attitude, personality, and social motives: observational methods; content analysis; sampling and survey techniques.

PSYC 619 Psychological Intervention (4, Sp) Study of clinical psychological treatment: research and theory about major psychological approaches to intervention. (One of three clinical psychology core courses: PSYC 514, PSYC 515, PSYC 619.)

PSYC 621 Seminar in Quantitative Psychology (4, max 12, Irregular) Selected topics in mathematical psychology.

PSYC 622 Decision Analysis and Behavioral Decision Theory (4, Irregular) Normative and descriptive theories and research on human decision-making, with special emphasis on applications to real social decision problems.

PSYC 625 Advanced Big Data Methods (4) Machine learning techniques, including Bayesian and Neural Networks, for analyzing different types of human-generated data. *Recommended preparation:* PSYC 501.

PSYC 626 Computational Social Sciences (4) Discussion of advances in computational social sciences, including automated text and network analysis. *Recommended preparation:* PSYC 625.

PSYC 660 Seminar in Clinical Psychology (4, max 8, Irregular) Selected topics in clinical psychology.

PSYC 663 Computational and Cognitive Neuroscience (4) (Enroll in CSCI 663)

PSYC 676 Seminar in Psycholinguistics (3, max 12) (Enroll in LING 676)

PSYC 680 Seminar in Psychopathology (4, max 8, Irregular) Selected topics in psychopathology.

PSYC 691ab Internship in Clinical Psychology (0-0, FaSp) Supervised clinical work in an approved mental health setting. Graded CR/NC. *Prerequisite:* good standing in clinical program and departmental approval.

PSYC 695 Advanced Practicum in Clinical Psychology (1-4, max 12, FaSp) Didactic practicum combining theory and research on psychological intervention with clinical practice in assessment and treatment, focused on particular client groups or disorders. Graded CR/NC.

PSYC 790 Research (1-12, FaSp) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

PSYC 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Associate Professors: Sheila Briggs, M.A.; James McHugh, Ph.D.; Sonya Lee, Ph.D. (East Asian Languages & Cultures); Lori Rachele Meeks, Ph.D.; Duncan Williams, Ph.D.

Assistant Professors: David Albertson, Ph.D.; Cavan W. Concannon, Ph.D.; Gerard Godard, Ph.D. (History); (Lei Kwan) Rondgao Lai, Ph.D.*

Associate Professor of the Practice: Lynn Swartz Dodd, Ph.D.

Adjunct Professors: Stephen Smith, Ph.D.; Varun Soni, Ph.D.

*Emeriti Professors: Robert Ellwood, Ph.D.; Ronald Hock, Ph.D.; John B. Orr, Ph.D.; J. Wesley Robb, Ph.D., LHD**

Emeriti Associate Professors: John P. Crossley, Jr., Th.D.; William W. May, Ph.D.; Alvin S. Rudisill, Ph.D.*

**Recipient of university-wide or college teaching award.*

The School of Religion offers undergraduate courses in biblical studies; ancient near eastern religion, east and south Asian religions, including Hinduism, Buddhism and Taoism; religions in Latin America; contemporary North American religions; the histories of Judaism, Christianity and Islam; the sociology of religion; religion and gender; and topics in religious ethics. Courses are designed to facilitate a critical and comparative understanding of religious traditions in the light of the most current scholarship.

Students also have the opportunity to receive regular USC course credit for courses taken at Hebrew Union College. Students have the option to take occasional courses at Hebrew Union College or to declare an emphasis in Judaic Studies (see the requirements indicated below for more information).

Degree Programs

The School of Religion offers the Bachelor of Arts in Religion, the Bachelor of Arts in Interdisciplinary Archaeology, a Bachelor of Arts with an emphasis in Judaic Studies, a minor in religion, a minor in interdisciplinary archaeology and the Doctor of Philosophy in Religion.

Dornsife College of Letters, Arts and Sciences

Religion

Undergraduate Degrees

Major Requirements for the Bachelor of Arts in Religion

The department major requires REL 301 Introduction to the Study of Religion (preferably taken at the beginning of the student's major courses) and REL 401 Seminar in Religious Studies. Further, students will select one or

two lower-division courses and four or five additional upper-division courses from the lists below. The total unit requirement for the major is 32 units (at least 24 to 28 units must be upper-division).

Lower-division Options: REL 111, REL 112, REL 121, REL 125, REL 131, REL 132, REL 133, REL 134, REL 135x, REL 136x, REL 137, REL 140, REL 150

Upper-division Options: CLAS 323, COMM 425, COMM 426, EALC 431, HIST 482, JS 321, JS 361, JS 382, JS 467, REL 311, REL 312, REL 315, REL 316, REL 317, REL 319, REL 325, REL 329, REL 330, REL 331, REL 332, REL 333, REL 334, REL 335, REL 336, REL 339, REL 341, REL 360, REL 364, REL 366, REL 375, REL 394, REL 414, REL 415, REL 417, REL 433, REL 435, REL 440, REL 442, REL 455, REL 460, REL 461, REL 462, REL 468, REL 469, REL 471, REL 473, REL 474, REL 479, REL 481, REL 483, REL 493, REL 494, REL 495, REL 499

Students who intend to do graduate work in some area of religious studies are encouraged to concentrate their course selections in the area of their preference and to begin learning the languages that are essential for study in that area. This includes modern languages such as French, German, Chinese or Japanese, and perhaps an ancient language.

Religion Major with Honors

Majors who wish to graduate from the university with honors in religion must achieve a minimum 3.5 grade point average in the major at the time of graduation. In addition to completing the required 32 units listed above, candidates for honors must register for REL 491x Undergraduate Honors Research, in which they must complete an acceptable senior honors project in religion. The total unit requirement to graduate with honors is 36 upper-division units.

Honor Society

Theta Alpha Kappa is a national honor society for those involved in the study of religion at the undergraduate and graduate level. It is open to declared majors who have completed at least three semesters of college and at least 12 units of religion courses. Students must have a GPA of at least 3.5 in major courses and an overall GPA of at least 3.0.

Judaic Studies Emphasis Major

A Bachelor of Arts in Religion with an emphasis in Judaic Studies is offered cooperatively with the School of Religion and Hebrew Union College-Jewish Institute of Religion. Students will complete all requirements for the bachelor of arts in religion. In fulfilling these requirements, students who choose the Judaic Studies emphasis will select any three of the following courses: REL 312; JS 321, JS 361, JS 382, JS 467.

As a prerequisite for participation in the Judaic Studies emphasis, students must enroll in either JS 100 Jewish History or JS 180 Introduction to Judaism. In addition, students who elect the Judaic Studies emphasis must complete HEBR 120, HEBR 150, and HEBR 220, which may be used to fulfill the college's language requirement.

The total number of units to graduate with the Judaic Studies emphasis major is 36 units. This does not include the Hebrew language requirement.

Bachelor of Arts in Interdisciplinary Archaeology

Director: Lynn Swartz Dodd, Ph.D.

Archaeology deepens our understanding of peoples and societies across space and time, in all parts of the world, while expanding our knowledge of issues relevant in contemporary society. Archaeologists interpret material culture and action from our shared human past using a range of tools and approaches whether the discovery occurs with trowel in hand, or through laboratory analysis, artifact study, remote sensing, or by documenting heritage.

Archaeology majors strengthen their skills in critical thinking, assessing evidence, and formulating clear and persuasive arguments, both oral and written. Students from a wide range of disciplines will gain perspective on their own intellectual and professional interests through the study of the past.

In addition to the general education requirements, the following courses are required:

REQUIRED LOWER DIVISION (4 UNITS)		UNITS
ANTH 202	Archaeology: Our Human Past	4
ADDITIONAL LOWER DIVISION REQUIREMENTS (4 UNITS)		UNITS
<i>One course from the following (4 units):</i>		
AHIS 201	Digging into the Past	4
ANTH 140	Mesoamerican Cosmvision and Culture	4
CLAS 212L	Archaeology: Interpreting the Past	4
HBIO 200L	The Human Animal	4
LING 295	The Ancient Near East: Culture, Archaeology, Texts	4
<i>One course from the following area specializations (4 units):</i>		
AHIS 120	Foundations of Western Art	4
AHIS 125	Arts of Asia I: Antiquity to 1300	4
AHIS 126	Arts of Asia II: 1300 to present	4
AHIS 127	Arts of the Ancient Americas	4
AHIS 128	Arts of Latin America	4
CHEM 105bL*	General Chemistry	4
CLAS 150	Greeks and Legacies	4
CLAS 151	Civilization of Rome	4
CLAS 280	Classical Mythology	4
ENST 100	Introduction to Environmental Studies	4
HIST 101	State and Society in the Ancient World	4
MASC 110L	Materials Science	4
REL 111	The World of the Hebrew Bible	4
REL 112	Religions of Ancient Egypt and the Near East	4
REL 114	The Mediterranean: A Religious History	4
REL 115	Jerusalem, City of Three Faiths	4
REL 121	The World of the New Testament	4
REL 132	Origins of Western Religions	4
REL 135x	Chinese Religions and Culture	4
REL 137	Introduction to Islam	4
SSCI 265L	The Water Planet	4

*Prerequisite required

UPPER DIVISION REQUIREMENTS (28 UNITS)		UNITS
<i>Five courses from the following three lists (20 units):</i>		
<i>Culture/History</i>		
AHIS 321	Greek Art and Archaeology	4
AHIS 322	Roman Art and Archaeology	4
AHIS 330	Medieval Art	4
AHIS 381	Visual Culture of Asia	4
AHIS 384	Early Chinese Art	4
ANTH 310	Archaeology of the Americas	4

ANTH 311	Old World Archaeology	4
ANTH 314	The Nature of Maya Civilization	4
CLAS 323	Aegean Archaeology	4
CLAS 324	Late Antique Art and Archaeology	4
CLAS 328	Archaeology of Religion in the Greco-Roman World	4
REL 302	Religions of Ancient Egypt and the Near East	4
REL 325	Religious Experience in the Greco-Roman World	4
REL 326	Historical Jesus	4
REL 394	Archaeology of Egypt and the Near East	4

Topical/Thematic

AHIS 420	Studies in Ancient Art	4
ANTH 304	Prehistoric Archaeology	4
ANTH 329	Archaeology and Global Cultural Heritage	4
ANTH 337	Anthropology of Warfare	4
ANTH 360	Symbolic Anthropology	4
ANTH 372	Interpretation of Myth and Narrative	4
CLAS 338	Warfare, State, and Society in the Ancient World	4
CLAS 339	Ancient Science	4
CLAS 349	Ancient Empires	4
JS 378	Jewish Magic in the Ancient World	4
REL 402	Cultural Heritage, Religion and Politics in the Middle East	4
REL 475	Religion, Material Culture and the Senses	4
REL 493	The Art and Archaeology of Religion	4

Applied/Analytical

ANTH 376	Scientific Analysis in Archaeology	4
ANTH 481L*	GIS for Archaeologists	4
CHEM 300L*	Analytical Chemistry	4
ENST 320ab	Water and Soil Sustainability; Energy and Air Sustainability	4-4
GEOL 305L	Introduction to Engineering Geology	4
GEOL 320L*	Surficial Processes and Stratigraphic Systems	4
GEOL 412	Oceans, Climate and the Environment	4
HBIO 300	Evolution, Ecology, and Culture	4
HBIO 308	Origins and Evolution of Human Behavior	4
SSCI 301L	Maps and Spatial Reasoning	4
SSCI 382*	Principles of Geographic Information Science	4
SSCI 483L*	Spatial Science Practicum	4

Two courses from Theory and Methods (8 units):

AHIS 325	Roman Archaeological Excavation: Methods and Practice	4
AHIS 415	Object-Worlds: Histories and Theories of Things	4
AHIS 425	Interdisciplinary Studies in Classical Art and Archaeology: Research and Methodology	4
AHIS 427	Archaeological Theories, Methods, and Practice	4
ANTH 400	Maya Resilience: Conducting Past and Present Identities	4
ANTH 440	History of Anthropological Theory	4

ANTH 450	Field Research in Maya Archaeology	4
ANTH 481L*	GIS for Archaeologists	4
REL 303	Exploring Ancient Ways of Living: Experimental Archaeology	4
REL 494	Lab Methods and Theories in Archaeology	4
REL 495	Field Methods and Theories in Archaeology	4

**Prerequisite required*

Capstone course

CLAS 465	Archaeology and Society	4
----------	-------------------------	---

Total requirements: 10 courses (40 units)

Minor in Interdisciplinary Archaeology

The minor in interdisciplinary archaeology is available to students in all schools and departments. Students from a wide range of disciplines will gain perspective on their own intellectual and professional interests through the study of the past.

Lower-division Requirements: ANTH 202 and one course from the list of lower-division electives (8 units).

Upper-division Requirements: four courses (16 units) as follows:

Archaeological Theories and Methods – one upper-division course (4 units)

And either:

one additional upper-division course from the Archaeological Theories and Methods list and two upper-division courses from those listed in Topical/Thematic and Culture/History – three courses (12 units), or

one upper-division course from Culture/History and Thematic/Topical and two upper-division courses from the Applied/Analytical lists – three courses (12 units)

Total requirements: 6 courses (24 units)

Religion Minor

Students taking the religion minor must enroll in REL 301 Introduction to the Study of Religion. In addition, they must complete one lower-division course and three upper-division courses selected from those listed in the religion major requirements. The total unit requirement for the minor is 20 units; 16 of those units must be upper-division.

Students who wish to focus their minor in Jewish studies must minor in Judaic Studies.

Judaic Studies Minor

See Judaic Studies for a full description of the minor.

Critical Approaches to Leadership Minor

See the Department of Interdisciplinary Studies for a full description of the minor.

Dornsife College of Letters, Arts and Sciences

Religion

Graduate Degrees

The School of Religion offers graduate study at the doctoral degree level in the field of religion with three tracks: Asia Pacific Religions, Comparative Christianities and Global Islam. Graduate work in the field of religion is designed to develop competencies and critical apparatuses in the distinct tracks and religious traditions as well as in religions' interactions with society, culture and the major themes that transcend the boundaries of geography, history and tradition.

The three tracks include:

Track I: Asia Pacific Religions

Trains students in the foundational texts, histories, worldviews, socio-political and cultural impact of religions in the pre-modern and modern Asia Pacific. These religious traditions include Hinduism, Buddhism and other religious movements in the region as well as their global manifestations.

Track II: Comparative Christianities

Trains students in the vast global range of historical and contemporary Christian traditions often grouped together homogeneously as Christianity. Rather than focusing exclusively on textual and intellectual traditions, this track integrates the social, cultural and material dimensions of religion in its study of plural Christianities, and challenges students to frame their research in transnational and transhistorical terms as a matter of course.

Track III: Global Islam

Trains students in the "global" dimensions of the Islamic tradition, from the traditional confines of the Middle East, Africa and South and Southeast Asia to include Islam, Islamic thought, Muslim culture and Muslim communities in the modern Western world. In addition to the acquisition of traditional skills for the study of religious texts, doctrine and spiritual life of believers, students will learn how Muslims negotiate concrete spaces and contexts they inhabit in the modern world.

Degree Requirements

The degree is conferred under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School. Decisions regarding the number of transfer credits to be awarded will be made on a case-by-case basis by the faculty of the School of Religion.

Doctor of Philosophy in Religion

Course Requirements

Sixty-four units of course work are required for the Ph.D. degree, including units of previous graduate work for which credit is allowed. No more than two language courses at the 400-level and no more than two non-language courses at the 400-level (i.e., 16 units) may be applied to the total requirement of 64 units. Time of residency is contingent upon the background and preparation of the student.

Core requirements for all doctoral students regardless of track include REL 500, REL 502, REL 592, REL 593, and a maximum of 8 units of REL 794 Doctoral Dissertation to be applied toward the 64-unit total requirement.

Additionally, mandatory courses for students in the Asia Pacific Religions track include REL 545, REL 645, and a one course from the REL 652/REL 653/REL 654/REL 655 series. Mandatory courses for students in the Comparative Christianities track include REL 535, REL 635 and REL 651. Mandatory courses for students in the Global Islam track include REL 525, REL 625 and REL 650.

In addition to the mandatory courses, students are expected to take elective courses in areas that will support their dissertation work. Such courses may be offered in related departments in the university as well as in the School of Religion and should be selected in consultation with the primary adviser.

Each student entering the Ph.D. program will select a primary academic adviser before classes begin. The adviser must be a member of one of the three tracks that the student envisions specializing in. In addition, at least one other faculty member from that track is selected to constitute, along with the primary adviser, the student's

“mentoring committee.” The mentoring committee is responsible for overseeing the student’s program of course work, course of language study, timing of qualifying exams and so on. The membership of the mentoring committee can be changed at any time with the agreement of the student, the student’s primary adviser, and the School of Religion director of Graduate Studies. The dissertation Committee (see below) will replace the mentoring committee once candidacy is achieved. Students are expected to maintain a 3.5 GPA in course work.

The mentoring committee conducts an annual review of the student’s academic performance and progress toward the degree in the spring of each year, before the end of the spring term. Should a student’s performance be considered unsatisfactory, following consultation with the director of Graduate Studies, the student will be placed on probation for one year and given the opportunity to improve his or her performance. If a student’s performance is still considered unsatisfactory at the end of the probationary year, the student will be dismissed from the program. Only after a successful annual review in the second year will the student be permitted to convene their qualifying examination committee.

Foreign Language Requirements

Language competencies vary by track and are determined in consultation with the mentoring committee. Here are some general guidelines:

Asia Pacific Religions Track: Advanced facility in at least one Asian language is considered essential to the Asia Pacific Religions Track. Each student selects a primary language area. The Mentoring Committee determines which possible additional languages are necessary for the student’s course of study, and the procedures for the evaluation of proficiency in those languages. The following is provided as a guideline depending on the area of sub-specialization.

- *Chinese:* Classical and modern Chinese, as well as modern Japanese (as a research language) and a modern European research language.
- *Japanese:* Classical (Bungo) and modern Japanese, as well as Kanbun, and one modern research language (European, modern Chinese, or modern Korean)
- *Korean:* Advanced Korean, as well as either modern Japanese (as a research language) or a European modern research language.
- *Sanskrit and Hindi:* Advanced competency in two South Asian languages, classical or modern, plus a modern research language judged relevant to the student’s research.

Comparative Christianities Track: Students are required to demonstrate advanced ability in two languages other than English in order to enable comparative research. Given the temporal and global span of Christian traditions, the specific languages will be determined on a case-by-case basis by the student’s mentoring committee. Customarily the committee will select one or two ancient languages and one or two modern languages. The following are the languages most frequently studied in the Comparative Christianities Track, but the mentoring committee can select others as needed:

- Ancient: *Hebrew, Greek, Syriac, Latin*, as well as medieval vernaculars
- Modern: *French, Spanish, Italian, German, Portuguese, Korean*

Global Islam Track: Required to demonstrate advanced ability in the primary lingua franca of Islamic civilization to ensure the ability to conduct original research. Secondly, students are generally encouraged to acquire facility in a secondary language within traditional Muslim religious and secular literature. Students are also encouraged to acquire facility in one European research language where deemed appropriate.

- *Arabic:* Classical and Modern Standard, as the primary research language.
- *Persian:* Classical and Modern, as a possible secondary research language.
- *French or Spanish:* (Elective) a reading knowledge to conduct research on or in specific modern communities.

Qualifying Examination and Dissertation Prospectus

The qualifying examination process consists of five stages: (1) constituting the qualifying examination committee (this would normally include the members of the mentoring committee), (2) determining the three exam areas by

the student and the qualifying examination committee, (3) taking the written examinations, (4) submission of the dissertation prospectus, (5) the qualifying oral examination.

Preparation for these exams should begin early in the student's course work. In consultation with the mentoring committee the students will select their primary area and also take an exam in the other two cognate areas. Preparation for the qualifying exam continues with supplementary readings based on a bibliography prepared by the student in conjunction with the qualifying examination committee. This committee is responsible for setting the exam questions for the cognate written exams. The student is given 24 hours to write on a total of three questions for each exam. Each of the written exams is evaluated by all members of the examination committee.

The dissertation prospectus should begin with a general review of the scholarship in the field, and situate the thesis within that field. It should clearly articulate the thesis and program of research, identifying the available source material to be consulted. The prospectus must include a chapter outline, and a full bibliography of primary and secondary sources.

The oral examination will occur shortly after the submission of the dissertation prospectus. It will focus on the content of the written exams, the basic literature in the student's primary field, as well as the content and cogency of the prospectus.

Dissertation

The dissertation committee, consisting of three faculty members, is formed immediately following advancement to candidacy. The committee consists of at least two faculty members in the track of the student's specialization as well as one other School of Religion faculty member. Candidates may also add an additional faculty member external to the School of Religion if appropriate. This final stage of the program requires the submission of an acceptable dissertation based on original investigation. The dissertation must show technical mastery expected in each track, evidence of independent research, and the analytical and interpretive ability expected of a scholar.

Dornsife College of Letters, Arts and Sciences

Religion

Courses of Instruction

RELIGION (REL)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

REL 111g The World of the Hebrew Bible (4) The Hebrew Bible in the cultural setting of the Ancient Near East; the formation of theological and ethical concepts which have shaped Western culture.

REL 112g Religions of Ancient Egypt and the Near East (4) Religions, cultures, and values of ancient Egypt and Near East (Iran, Iraq, Israel, Syria, Lebanon, Arabia, Turkey) and their legacies in contemporary society.

REL 114g The Mediterranean: A Religious History (4) Explores multiple religious traditions of the Mediterranean as networks that emerge within and among the landscapes, cultures, and politics of this highly interconnected geographic space.

REL 115g Jerusalem, City of Three Faiths (4) History of Jerusalem as a window onto the nature of the three Abrahamic faiths.

REL 121g The World of the New Testament (4) Historical investigation of New Testament characters, events, ethics and theology in relation to its social, intellectual, and religious contexts in the Jewish and Greco-

Roman world.

REL 125g Introduction to Christianity (4) Survey of the changing beliefs and practices of the Christian religion from obscure origins to globalized present, with special attention to the varieties of Christian literature.

REL 132g Origins of Western Religions (4) Examination of Judaism, Christianity, and Islam in their origins and their development in relation to Western civilization.

REL 134gx Introduction to Buddhism (4) Focus primarily on works of Buddhist literature written in a variety of genres. Introduction of basic teachings that link Buddhist traditions across time and space.

REL 135gx Chinese Religions and Culture (4) Historical and thematic survey of Chinese religious history from earliest times to the present.

REL 136gx Sense and Sensuality in Indian Religions and Culture (4) Exploration of the senses and the technologies of pleasure in India, relating this material to some fascinating examples of Hindu, Jain, and Buddhist literature. Not for major credit for Religion or Religion (Judaic Studies) majors.

REL 137g Introduction to Islam (4) Introduction to Islam, emphasizing its historical and cultural development since the seventh century C.E., and the basic teachings of Islam.

REL 138g Japanese Religions and Culture (4) Major religious traditions of Japan (such as Buddhism, Shinto, Christianity, Confucianism) and their broader social and cultural contexts.

REL 141g Global Religions in Los Angeles (4) Congregational and individual expressions of religion in Los Angeles.

REL 146g American Spirituality: Radicals, Rebels and Freethinkers (4) Examination of the historical continuities and disjunctions between “spiritual but not religious” Americans; the relationship between spirituality, politics, social change, and the role of media.

REL 147g Religion, Media and Popular Culture (4) Exploration of the manner in which the media frame discussions and understandings of ethical issues, moral dilemmas, spirituality and religious imagination.

REL 301 Introduction to the Study of Religion (4, Fa) Survey of academic approaches to the study of religion. When possible this course will be taken during the first year of the major or minor.

REL 302 Religions of Ancient Egypt and the Near East (4) Religious experience and values of ancient Egypt and Near East through material culture, literature, art, and cultic practices; and their legacies in contemporary society.

REL 311g The Bible in Western Literature (4) Comparative analysis of biblical works and how they were employed by various writers in major works of Western literature.

REL 312 Biblical Wisdom Literature (4) Survey of and inquiry into the biblical wisdom literature; emphasis on the Book of Job.

REL 314 Introduction to Shiism (4) Examination of the major branches of Shiism, the second largest articulation of Islam, both historically and in the world today.

REL 315 Thought and Life of Islam (4) History, thought, institutions, and religious practices of Islam.

REL 316 Women and the Islamic Tradition (4, Fa) Overview of social and legal status of women in Islamic society, past and present. Examination of social roles established both for and by Muslim women.

REL 317g The Bible in Its Ancient Context (4) A close consideration of ancient Near Eastern myths — especially those from Mesopotamia and Canaan — with special attention to their influence on the Bible.

REL 319 Religious and Ethical Issues in Death and Dying (4) Analysis of religious and ethical

approaches to death and dying, including refusal of treatment for competent and incompetent patients, voluntary and involuntary euthanasia, and resuscitation.

REL 323 Aegean Archaeology (4) (Enroll in CLAS 323)

REL 325 Religious Experience in the Greco-Roman World (4) Varieties of religious experience as reflected in the literature, art, and cultic practices of the Hellenistic world.

REL 326gp Historical Jesus (4) Examination of the question of how ancient and modern Christians and scholars have reconstructed the life of Jesus of Nazareth, founding figure of Christianity.

REL 328 Archaeology of Religion in the Greco-Roman World (4) (Enroll in CLAS 328)

REL 329 Themes in the Religions of China (4) A study of selected themes in the history of Chinese religions and culture. Compares cases and materials from several historical periods and religious traditions.

REL 330 Introduction to the Religions of India (4, FaSpSm) History, teaching, and practice of Hinduism, Buddhism, and other religious traditions of India.

REL 331 Religions of East Asia (4) History, teaching, and practice of the religions of China, Tibet, and Japan.

REL 332 Religions of Japan (4) The development of religious thought and practice in the Japanese islands, with Buddhism and Shinto being the most prominent.

REL 333 Religion in the Borderlands (4) Survey of religious history of U.S./Mexico borderlands. Emphasis is given to definitions of place and transformations in culture and forms of belief.

REL 334 Religion and Colonial Encounter (4) Survey of religious responses to colonial encounter in the Americas. Emphasis given to study of religious innovations of Amerindians, Africans, and Europeans.

REL 335 Gender, Religion, and Sexuality (4) The construction of gender and sexuality in Western religious traditions; its continued impact on contemporary intellectual, cultural, and social life.

REL 336 Re-viewing Religion in Asian America (4) Interdisciplinary analysis of the religions traditions, institutions, and experiences of Asians and Pacific Islanders in the U.S.

REL 337 Islam in Black America: From Slavery to Hip Hop (4) (Enroll in AMST 337)

REL 338 Mysticism and Religious Desire (4) How human appetites for sex, food, community or immortality are articulated as mystical desires in different religions, either within institutional structures or working against them.

REL 339 Studies in the History of Christianity (4) In-depth exploration of one of the pivotal moments in the history of Christianity and Western society.

REL 340 Introduction to Indian Philosophy (4) An introduction to Indian philosophy, including major schools of thought in Hindu, Buddhist, and Jain philosophies. No previous knowledge of Indian religions or philosophy required.

REL 341 Technology, Culture, and Ethics (4) Examination of value questions arising from the impact of technology on individuals, social institutions, and culture.

REL 344 Islamic Law and American Society (4) (Enroll in AMST 344)

REL 359g Culture in Diaspora: The Jews of Spain (4) Course traces the Jewish diaspora from Spain and Portugal with particular attention to how Sephardic Jews maintained ties of culture, commerce, language, and identity.

REL 360 Ethical Issues in the New Medical Revolution (4) Multimedia-oriented analysis of issues; definition of life and death; research on human subjects, health care delivery, euthanasia, abortion, genetic counseling, behavior control.

REL 364 Religion and Ethics (4) Traces the development of how religious ideas have informed ethics, or accounts of the good life, including notions of justice, righteousness, virtue, duty, charity and happiness.

REL 366 Religion and Social Change (4) Empirical and theoretical analysis of social change and its effect on religious institutions as well as the impact of religious movements on society.

REL 370 Religion and Visuality (4) Examination of the deep connections between visuality and religions, including visions, controversies over religious images, and other connections between religion and visual art.

REL 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

REL 394 Archaeology of Egypt and the Near East (4) Study of archaeology and excavated artifacts from Egypt and the Near East.

REL 401 Seminar in Religious Studies (4, Sp) Survey of methods and selected issues in the field of religious studies; required of all majors during their junior or senior year. (Duplicates credit in former REL 399.) *Recommended preparation:* REL 301.

REL 402 Cultural Heritage, Religion, and Politics in the Middle East (4, Fa) In-depth exploration of archaeology and heritage issues in the Middle East and their implications for politics and practice in modern Islam, Judaism and Christianity.

REL 414 History of Islamic Law (4, Sp) Examines legal methods and religious sources used in Islamic law. Emphasis is placed on the way cultural developments affect legal thought and the administration of justice.

REL 415 Seminar in Buddhism (4) Seminar on selected aspects of the Buddhist tradition.

REL 417 Seminar in South Asian Religions (4) Exploration of particular themes and/or traditions in South Asian religions.

REL 425 Communicating Religion (4) (Enroll in COMM 425)

REL 426 Religion, Media and Hollywood: Faith in TV (4) (Enroll in COMM 426)

REL 431 The Taoist Tradition (4) (Enroll in EALC 431)

REL 435 Religious Thought After the Enlightenment (4) Changes in religious thought between the late 18th and early 20th centuries in the wake of the emergence of modernity in the West.

REL 440 Christian Thought in the 20th Century (4) Examination of dynamic new directions taken by Christian understandings of self, God, and salvation in response to the novel conditions of modern culture, politics and philosophy.

REL 441 Origins of Modern Theology (4) 19th century liberal, rationalist, and historical theology.

REL 442 Religion and Science (4) Explores whether religion and science offer competing or complementary models for understanding the world and the human place within it.

REL 448m Islam in France (4, FaSp) (Enroll in FREN 448m)

REL 455 Philosophy of Religion: Bases of Belief and Disbelief (4) Rational and empirical foundations for religious faith and for skepticism.

REL 460 Senior Seminar: Medical Ethics (4) Analysis of ethical problems related to new developments in

medical science. Graded CR/NC.

REL 462 Religion and Violence (4) Religious and moral perspectives on war, pacifism, violent and non-violent protest, and religion-based terrorism and militia.

REL 465 Archaeology and Society (4, FaSpSm) (Enroll in CLAS 465)

REL 468 Sociology of Religion (4) The role of religion in modern society from the standpoint of sociological theory and research.

REL 469 Black Religion in America (4) Historical, sociological, and theological analysis of the nature and role of black religion in the American setting.

REL 471 Jesus (4) A study of major interpretations of the figure of Jesus, with focus on the interaction between religious traditions and culture.

REL 473 Advanced Hebrew Bible Studies (4) Consideration of specific topics in Old Testament studies; particular topics determined each semester.

REL 474 Advanced New Testament Studies (4) Consideration of specific topics in New Testament studies. Particular topics determined each semester.

REL 475 Religion, Material Culture and the Senses (4) A comparative study of the role of material culture and the senses in religions based on a number of case studies and problem sets.

REL 479 Seminar in Christian Thought (4) Studies a theme, period, or problem from the history of Christian thought within its intellectual and social context.

REL 481 History of Religion in America (4) Intellectual, institutional, and social history of religion in America from colonial times to the present.

REL 482 Jesus in American History and Culture (4) (Enroll in HIST 482)

REL 483 Religion and Popular Culture in the United States (4, Sp) Critical analysis of the relationship between religion, mass media, and popular cultural forms in the U.S. *Recommended preparation:* REL 301.

REL 484 American Religion, Foreign Policy and the News Media (4, Sp) (Enroll in JOUR 484)

REL 490x Directed Research (1–8, max 12) Individual research and readings. Not available for graduate credit.

REL 491x Undergraduate Honors Research (4) Individual research for honors in the major leading to a substantial project. Open only to religion majors at the junior or senior level.

REL 493 Art and Archaeology of Religion (4, FaSp) The history of religion through its material expression: art, architecture and artifact. Exploration of different themes and time periods.

REL 494 Lab Methods and Theories in Archaeology (4) Archaeological research design, data recovery, artifact analysis, interpretation and analogy, publication and ethics.

REL 495 Field Methods and Theories in Archaeology (4, max 12, FaSpSm) Archaeological field study emphasizing current paradigms of data collection and evaluation; social scientific study of material culture and its relationship to religious expression.

REL 499 Special Topics in Religion (2–4, max 8) Selected topics in religious studies.

REL 500 Methods and Theories in the Study of Religion (4) Introduction to the major topics, trends, and theoretical approaches in the study of religion.

REL 502 Themes in the Study of Religion (4, max 8) Thematic approaches to the study of religion and religions transcending particular traditions, time periods and geographic regions. Course topic varies by semester according to faculty.

REL 525 Colloquium in Global Islam (4) Introduces major issues that have defined Islamic Studies in premodern and modern periods. Generally taken in the first year.

REL 535 Colloquium in Comparative Christianities (4)
Research methods in the comparative study of Christian religions; recent scholarship in Christian studies.

REL 545 Colloquium in Asia Pacific Religions (4) Research methods, tools and current scholarship in the study of Asian Pacific Religions.

REL 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

REL 592 Professionalization Proseminar in Religious Studies (2) Offers students a structured environment in which to consider issues in professional development and to discuss their dissertation proposals. Graded CR/NC.

REL 593 Practicum in Teaching the Liberal Arts (2) Practical principles for the long-term development of effective teaching within liberal arts disciplines. Graded CR/NC.

REL 599 Special Topics (2–4, max 8)

REL 625 Advanced Graduate Seminar in Global Islam (4) Exploration of themes and traditions of Islam as they appear globally in a variety of specific country contexts

REL 626 Seminar in Jewish Ethics (4) (Enroll in JS 626)

REL 635 Advanced Graduate Seminar in Comparative Christianities (4) Comparative and transhistorical methods for understanding the most prominent developments in premodern or modern globalized Christianity.

REL 645 Advanced Graduate Seminar in Asia Pacific Religions (4) Application of comparative and transhistorical methods for understanding the most prominent themes in Asian Pacific Religions.

REL 650 Readings in Islamic Texts (4) Study of Islamic religious texts in multiple genres, primarily in Arabic, though other languages may be offered. *Recommended preparation:* Advanced Arabic language ability.

REL 651 Readings in Christian Texts (4) Survey of the different genres of texts in the history of Christian spirituality from ancient Christianity to the present.

REL 652 Readings in Buddhist Texts (4) Study of varied Asian Buddhist texts in translation and in original languages. Exploration of the major secondary literature on Buddhist texts.

REL 653 Readings in Indic Religious Texts (4) Study of varied Hindu, Buddhist, and Jain texts, primarily in Sanskrit. The class covers multiple genres from Puranas to Tantra. *Recommended preparation:* Two years of previous study of Sanskrit.

REL 654 Readings Chinese Religious Texts (4) Study of Chinese religious texts primarily in literary Chinese. The class covers multiple genres of texts from Buddhist sutras to Daoist texts. *Recommended preparation:* Advanced Chinese language ability is recommended. Students are expected to have at least one year of training in classical Chinese.

REL 655 Readings in Japanese Religious Texts (4) Study of Japanese Buddhist texts in classical or modern Japanese and/or kambun. The class covers multiple genres from sutras to vernacular text. *Recommended preparation:* Advanced Japanese language ability; REL 652.

REL 790 Directed Research (1–12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

REL 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Assistant Professors (Teaching) of German: John W. Arensmeyer Jr., Ph.D.; Eve Lee, Ph.D.

Lecturer: John Adam Peters III

Emeritus Professor: Anthony M. Mlikotin, Ph.D.

**Recipient of university-wide or college teaching award.*

Undergraduate Programs

The Department of Slavic Languages and Literatures offers a major in Russian at the undergraduate level and minors in Russian and Russian Area Studies. The major combines thorough preparation in the Russian language with the study of Russian literature, art and culture. Particular emphasis is placed on developments in contemporary Russia. Students are required to study four semesters of Russian language as a prerequisite to the major. The major itself requires an additional three semesters of language study, three semesters of an advanced seminar on Russian culture (with varying content), and two elective courses, either in Russian literature and culture (in translation or Russian, depending on course scheduling) or in Russian area studies.

Graduate Programs

The Department of Linguistics offers, under the jurisdiction of the Graduate School, the Doctor of Philosophy in Linguistics (Specialization in Slavic Linguistics).

The Department of Comparative Studies in Literature and Culture offers, under the jurisdiction of the Graduate School, the Master of Arts and the Doctor of Philosophy in Comparative Studies in Literature and Culture (Slavic Languages and Literatures).

Dornsife College of Letters, Arts and Sciences

Slavic Languages and Literatures

Undergraduate Degrees

Department Major Requirements for the Bachelor of Arts in Russian

REQUIRED COURSES, LOWER-DIVISION		UNITS
SLL 120	Beginning Russian I	4
SLL 150	Beginning Russian II	4
SLL 220	Intermediate Russian I	4
SLL 250	Intermediate Russian II, or	
SLL 255	Business Russian	4

REQUIRED COURSES, UPPER-DIVISION		UNITS
SLL 310	Advanced Russian in Popular Culture	4
SLL 321	Russian Culture, or	
SLL 330	Russian Thought and Civilization	4
SLL 340	Intercultural Communication in Russian	4
SLL 465	Seminar in Russian Studies (taken three times, with varying content)	4, max 12

And two elective courses approved by the undergraduate adviser.

Bachelor of Arts in Central European Studies

The major in Central European studies combines background in relevant languages (Russian plus either German or Polish, or more intensive study of Russian) with course work in international relations and the history, culture and politics of the region.

No longer an imperial backwater, Central Europe has risen from its Cold War stasis to become one of the world's most dynamic and important regions. Stretching from the Baltic Sea to the Balkan Peninsula, and from the Eastern lands of Germany to the Western regions of Russia, this onetime great-power battleground is now a vital trade and energy corridor, a mosaic of languages and cultures, a place of both successful state-building and persistent ethnic frictions, and a promising but still-precarious bridge between the former Soviet Union and the West. Central Europe rivals the Far East and Southwest Asia as one of the world's most strategically important regions — now, and over the coming decades. Those who master its history and politics, its economic, cultural and linguistic diversity, will be well positioned for fellowships, graduate work, business or analytical careers centered on this fascinating region.

The objectives of this interdisciplinary major are to provide students with: 1) the historical background and linguistic-cultural skills necessary for in-depth study of Central Europe; 2) knowledge of its main post-Cold War political, ethnic, and economic trends; and 3) understanding of current issues from nationalism and immigration to trade, military-diplomatic and alliance politics.

Requirements

The fundamental linguistic background of the major is Russian (12 units).

REQUIRED COURSES		UNITS
SLL 120	Beginning Russian I	4
SLL 150	Beginning Russian II	4
SLL 220	Intermediate Russian I	4

Beyond the second year of Russian, students may choose from among three options: further work on Russian; or a year of German; or a year of Polish (8 units).

COURSES		UNITS
<i>Russian</i>		
SLL 250	Intermediate Russian II	4
SLL 310	Advanced Russian in Popular Culture, or	
SLL 340	Intercultural Communication in Russian	4
<i>German</i>		
GERM 101	German I	4
GERM 102	German II	4
<i>Polish</i>		
SLL 122	Elementary Polish I	4
SLL 152	Elementary Polish II	4

Required upper-division courses in international relations: two courses must be chosen from among the following (8 units):

REQUIRED COURSES, UPPER-DIVISION		UNITS
IR 345	Russian and Post-Soviet Foreign Policy	4
IR 346	Communism and Post-Communism: Eastern Europe and the Balkans	4
IR 385	European Foreign Policy and Security Issues	4

In addition three electives are required from among the following. At least one course must be at the 400 level. With prior approval, IR 490x, Directed Research (4 units) or SLL 490x, Directed Research (4 units) may be substituted for one of these courses (12 units):

ELECTIVE COURSES		UNITS
HIST 320	Russian and Soviet Rebels: The Moral Dilemma and the Continuity of Dissent	4
HIST 323	The Holocaust in 20th Century Europe	4
HIST 324	Islam in Russia and the Soviet Union	4
HIST 328	Poland and the Western Tradition	4
HIST 365	The Second World War	4
HIST 414	Contemporary Europe	4
HIST 416	History of Imperial Russia: 1689–1917	4
HIST 417	History of Soviet Russia: 1917–1991	4
HIST 422	European Intellectual and Cultural History: the 20th Century, 1920 to the Present	4
HIST 427	The German Question: Nation and Identity in Modern Central Europe	4
IR 369	Post-War European Relations	4
IR 439	Political Economy of Russia and Eurasia	4
IR 468	European Integration	4
POSC 366	Terrorism and Genocide	4
POSC 371	European Political Thought II	4
POSC 463	European Politics	4
POSC 464	Politics of Russia and Eastern Europe	4
SLL 302	Modern Russian Literature	4

SLL 303	Contemporary Russian Literature	4
SLL 330	Russian Thought and Civilization	4
SLL 397	Literature and Film in Eastern European Historical Experience	4
SLL 465	Seminar in Russian Studies	4

Minor in Russian

Lower-division requirements for the major plus three upper-division elective courses chosen from the following (at least two of the areas must be represented): Russian language (SLL 310, SLL 340, SLL 420); Russian literature and culture taught in Russian (SLL 321, SLL 465); Russian literature, art and culture taught in translation (SLL 330, SLL 344, SLL 345, SLL 348, SLL 378).

Minor in Russian Area Studies

Lower-division Requirements

Four semesters of Russian language (SLL 120, SLL 150, SLL 220 and either SLL 250 or SLL 255), or its equivalent.

Upper-division Requirements

The core course, SLL 330 Russian Thought and Civilization; one course outside the Slavic department, from among the following: HIST 324, HIST 328, HIST 415, HIST 416, HIST 417, HIST 424; IR 345, IR 346, IR 439, IR 483; POSC 464; and one elective, to be chosen from among: any upper-division SLL course in Russian literature, art or culture; HIST 320, HIST 324, HIST 415, HIST 416, HIST 417, HIST 424; IR 345, IR 346, IR 439, IR 483; POSC 464.

Note: the course taken to fulfill the requirement outside the Slavic department cannot also count as an elective.

Dornsife College of Letters, Arts and Sciences

Slavic Languages and Literatures

Graduate Degrees

Master of Arts in Comparative Studies in Literature and Culture (Slavic Languages and Literatures)

See Comparative Studies in Literature and Culture in this catalogue.

Doctor of Philosophy in Slavic Languages and Literatures

The doctorate in Slavic languages and literatures is designed to prepare students for a career of teaching and scholarship at the university level. It provides a thorough grounding in Russian literary and cultural history as well as in the theoretical perspectives current in the field. Elective course work, particularly at the upper level, allows students to take advantage of the department's expertise in such additional areas as Russian art, Russian theater, and eastern European cinema. The linguistic component of the curriculum together with the experience as a teaching assistant in Russian language courses that many students gain also serves as preparation for positions involving language teaching. Depending on departmental offerings, further study in a second Slavic language and culture may also be possible.

Admission Requirements

An undergraduate major in Russian or its equivalent is a prerequisite for graduate work.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation page and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Arts in Slavic Languages and Literatures

The department does not accept applicants for a Master of Arts degree in Slavic Languages and Literatures. The M.A. degree is intended only as a transitional degree in the process of completing requirements for the Ph.D. in Slavic Languages and Literatures. The M.A. portion of the program comprises 30 units.

First-year Review

The program conducts a thorough review of all first-year students at the end of the second semester. To be permitted to continue doctoral work, students must receive a satisfactory evaluation in this review.

Language Requirements

Non-native speakers of Russian must successfully complete 8 units (4 semesters) of SLL 500 Topics in Advanced Russian and pass a proficiency exam in the language.

Field Examination

A written exam based on a reading list, followed by an oral exam, must be successfully passed before the M.A. can be awarded. It is normally taken at the end of the semester in which M.A. course work is completed.

REQUIRED M.A.-LEVEL COURSES		UNITS
SLL 500	Topics in Advanced Russian	8
SLL 501	Proseminar in Russian Literature	3
SLL 512	History of the Russian Language	3
SLL 532	18th Century Russian Literature	3
SLL 546	The Russian Novel	3

Doctor of Philosophy in Slavic Languages and Literatures

Students pursuing the Ph.D. in Slavic Languages and Literatures are required to complete a minimum of 60 units of course work beyond the baccalaureate. In addition to the 30 units completed toward the M.A., students are required to complete the courses listed below; to demonstrate proficiency in spoken and written Russian; to demonstrate reading knowledge of French and German (in exceptional cases a second Slavic language may substitute for either French or German; instruction in Slavic languages other than Russian is not scheduled on a regular basis); to pass the qualifying examination, which must be taken after all course work has been completed; to complete and successfully defend a dissertation.

REQUIRED PH.D.-LEVEL COURSES		UNITS
SLL 516	Structure of Modern Russian: Morphology	3
SLL 545	19th Century Russian Poetry	3
SLL 550	Russian Modernism	3
SLL 555	Soviet Literature I (1917-1953)	3

Two of the following courses (6 units):

SLL 650	Seminar in Russian Literature	3
SLL 660	Seminar in a Single Author or Work	3
SLL 665	Seminar in Russian Culture and the Arts	3

Plus electives, from SLL or relevant offerings in CSLC, COLT, ENGL, FREN, SPAN etc. as approved by the department. At least 9 of these units must be completed in SLL.

Dissertation Defense

An oral defense of the dissertation must be satisfactorily completed before the dissertation can be filed with the

Graduate School.

Awarding of Degree

The degree of Ph.D. in Slavic Languages and Literatures is conferred when all of the degree requirements have been completed satisfactorily.

Doctor of Philosophy in Linguistics (Specialization in Slavic Linguistics)

Application deadline: January 1

See Linguistics in this catalogue.

Certificate in Foreign Language Teaching

The Certificate in Foreign Language Teaching provides certification in the theory and practice of second or foreign language teaching for student language teachers concurrently enrolled in graduate degree programs in foreign languages or related graduate programs at USC; for graduates of such programs who are teaching languages; for external candidates concurrently enrolled in similar programs at accredited colleges or universities; or for graduates of such programs who are teaching languages. The certificate is meant to supplement graduate study in the literature or linguistics of foreign languages. It is also meant to supplement classroom teaching. Refer to the Department of Spanish and Portuguese for course work requirements.

Dornsife College of Letters, Arts and Sciences

Slavic Languages and Literatures

Courses of Instruction

SLAVIC LANGUAGES AND LITERATURES (SLL)

For the courses offered during any given term, consult the *Schedule of Classes*.

SLL 020 Course in Reading Russian (2) For graduate students wishing to use Russian as a scholarly tool. Emphasis on basic grammar and reading skills. Graded CR/NC.

SLL 025 Course in Reading Russian (2) Continuation of SLL 020. Reading of authentic materials from Russian press and students' areas of interest. For graduate students only. Graded CR/NC. *Prerequisite:* SLL 020.

SLL 120 Beginning Russian I (4) Introduction to the Russian language with emphasis on basic conversational skills, major points of grammar, and reading.

SLL 122 Elementary Polish I (4) Structure of the language, pronunciation, basic communication, and reading in modern Polish.

SLL 130ab Elementary Czech (4-4) *a:* Structure of the language, basic grammar, pronunciation, and oral communication. Readings in Czech; discussion of Czech history and culture. *b:* Continuation of SLL 130a. *Prerequisite:* SLL 130a.

SLL 150 Beginning Russian II (4) Continuation of SLL 120. *Prerequisite:* SLL 120.

SLL 152 Elementary Polish II (4) Continuation of SLL 122. *Prerequisite:* SLL 122.

SLL 199 Chess and Critical Thinking (2) Analysis of significant chess games, reflecting societal attitudes toward science, competition, art, gender, psychology, politics, and technology. Graded CR/NC.

SLL 200 Russian Moral Dilemmas in the 20th Century (4) Examines the primary moral experiences of

Russian society in its transition from tsarism through communism and beyond.

SLL 201 Contemporary Russian Culture and Society (4) (SS only) Introduction to the culture, politics, and economics of contemporary Russia. Offered only as part of the International Summer Session in Russia. *Prerequisite:* SLL 120.

SLL 210 Masterpieces of the Russian Short Story (4) Critical reading of selected masterpieces of the Russian short story; works by Gogol, Turgenev, Dostoevsky, Tolstoy, Babel, Pasternak, Solzhenitsyn, and others. In English.

SLL 220 Intermediate Russian I (4) Development of thematic conversational skills with emphasis on extended dialogue. Review of basic morphology with special attention to verbs of motion. Reading of authentic material is emphasized. *Prerequisite:* SLL 120, SLL 150.

SLL 222 Readings in Polish Literature I (4) Continuation of elementary Polish and introduction to outstanding works in Polish literature. *Prerequisite:* SLL 122 and SLL 152.

SLL 250 Intermediate Russian II (4) Continuation of SLL 220. Development of proficiency in conversation skills, reading, and writing. *Prerequisite:* SLL 220.

SLL 252 Readings in Polish Literature II (4) Continuation of SLL 222. *Prerequisite:* SLL 222.

SLL 255 Business Russian (4) Language and culture course for intermediate Russian level students interested in business. Prepares students to communicate in Russian-speaking business settings in a linguistically sensitive manner. *Prerequisite:* SLL 220.

SLL 260x The Trans-Siberian Experience (2, Sp) Introduction to Russian language and culture by means of a study-tour on the Trans-Siberian Railway.

SLL 270ab Russian for Native Speakers (4-4) *a:* For native Russian speakers who cannot read or write Russian. Emphasis on essentials of grammar, vocabulary, and orthography, and the reading and writing of simple texts in Russian. *b:* Continuation of SLL 270*a*.

SLL 299 Chess — Advanced Thinking Techniques (2) Development of advanced understanding of the game of chess. Critical analysis of games and of the problem-solving techniques applicable in various game situations. Graded CR/NC. *Prerequisite:* SLL 199.

SLL 300 The Russian Novel (4) The rise of the novel as the dominant form in Russian literature of the 19th century. Major works by Gogol, Turgenev, Dostoevsky, Tolstoy, and others. In English.

SLL 301 Russian Literary Avant-Garde (4) Russian modernism and the avant-garde: development of modern sensibility in literature and the arts from 1880 to 1930. Readings in Chekhov, Sologub, Bely, Mayakovsky, and others. Conducted in English.

SLL 302g Modern Russian Literature (4) Survey of the major developments in Russian literature during the 20th century, from modernism to the post-Soviet era. Readings in English.

SLL 303 Contemporary Russian Literature (4) Developments in Russian Literature from the 1960s to the present. Literature of moral resistance directed against official cultural models. In English.

SLL 310 Advanced Russian in Popular Culture (4) Advanced conversation topics, readings and analysis of Russian press, films and other popular materials. Advanced grammar. Conducted in Russian. *Prerequisite:* SLL 250; *recommended preparation:* SLL 120, SLL 150, SLL 220.

SLL 321 Russian Culture (4) Survey of Russian civilization from the beginnings to the Soviet period focusing on major cultural and artistic trends. Lectures and readings in Russian. *Prerequisite:* four semesters of Russian.

SLL 330gp Russian Thought and Civilization (4) Russian cultural identity from its beginnings until today. The Eastern Orthodox tradition, its traumatic confrontation with Western culture, and their continuous

interaction. *Concurrent enrollment*: MDA 140.

SLL 340 Intercultural Communication in Russian (4) Advanced language training focusing on specific issues of communication with Russians. Analysis and translation of literary texts. Advanced syntax. Conducted in Russian. *Prerequisite*: SLL 250; *recommended preparation*: SLL 120, SLL 150, SLL 220.

SLL 344g Tolstoy: Writer and Moralist (4) Tolstoy's major works in the context of his ethical views. Readings and lectures in English.

SLL 345g Literature and Philosophy: Dostoevsky (4) Dostoevsky's novels as psychological and philosophical analyses of modern alienated man. Readings in Dostoevsky and selections from Gide, Kafka, Camus, and Sartre. Conducted in English.

SLL 346 Russian Drama and the Western Tradition (4) Representative plays from the 18th century to the present. Development of the Russian theater in the European context. Conducted in English.

SLL 348g The Novels of Vladimir Nabokov (4) Survey of Vladimir Nabokov's novels written in Europe and America from the 1920s–1960s. Primary focus on the structure of the novels and their themes of art and emigration. Readings in English.

SLL 370 Advanced Russian for Native Speakers (4) For students with basic oral proficiency in Russian who need to develop native fluency in an array of genres and situations. Emphasis on advanced grammar, reading (literary and scholarly texts), written expression (scholarly, administrative, and business genres), spelling, and punctuation.

SLL 378 Modern Russian Art (4) Changing concepts of aesthetic value as expressed in the development of 19th and 20th century Russian art (painting and architecture).

SLL 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

SLL 397 Literature and Film in Eastern European Historical Experience (4) Exploration of key moments in the recent historical experience of Eastern Europe through close readings of literature and film. Taught in English.

SLL 420 Seminar in the Russian Language (4) Survey and detailed analysis of selected topics in the Russian language. *Prerequisite*: SLL 310 or SLL 340.

SLL 465 Seminar in Russian Studies (4, max 12) Readings and discussion in Russian of current topics in Russian culture, politics and society. Content varies each time offered. *Prerequisite*: SLL 250.

SLL 490x Directed Research (1–8, max 12) Individual research and readings. Not available for graduate credit.

SLL 499 Special Topics (2–4, max 8)

SLL 500 Topics in Advanced Russian (2, max 8) Study of Russian required for graduate work and professional activities. *Prerequisite*: four years of college Russian.

SLL 501 Proseminar in Russian Literature (3) Introduction to graduate study of Russian literature: research methods, bibliography, transliteration, development of critical writing skills.

SLL 510 Old Church Slavonic (3) Study of the earliest recorded Slavic language; linguistic interpretation of original texts; knowledge of a Slavic language or general linguistics will be helpful.

SLL 512 History of the Russian Language (3) Phonetic, morphological, syntactical changes from common Slavic to the present. Russian literary language; influence of 19th century Russian authors and old church Slavic on contemporary Russian.

SLL 514 Structure of Modern Russian: Phonology (3) Articulatory phonetics, phonemics, morphophonemics, and intonational patterns of modern Russia. *Prerequisite:* three years of college Russian.

SLL 516 Structure of Modern Russian: Morphology (3) Essential issues in current linguistic description of the syntax and morphology of modern Russian. Considers word order, negation, verbal aspect.

SLL 530 Early Russian Literature and Culture (11th–17th Centuries) (3) Major monuments of medieval Russian literature examined in their cultural, literary, and theological context, with special emphasis on issues of genre. Focus on problems of Russian cultural identity and Russia's complex relationship to Byzantine and Western traditions. *Prerequisite:* SLL 510 and SLL 514.

SLL 532 18th Century Russian Literature (3) Major works and genres of the 18th century. The development of a "modern" literary tradition, focusing on problems of Russia's indigenization of Western literary movements (classicism and sentimentalism).

SLL 542 Symbolism (3) Russian symbolist literature; cultural and philosophical background of this late 19th and early 20th century movement. *Prerequisite:* three years of college Russian.

SLL 544 Russian Short Story (3) Pushkin, Gogol, Dostoevsky, Turgenev, Tolstoy, Chekhov. *Prerequisite:* three years of college Russian.

SLL 545 19th Century Russian Poetry (3) Analysis of major works of 19th century Russian poetry in the context of developing aesthetic principles and cultural history. *Prerequisite:* SLL 501.

SLL 546 The Russian Novel (3) Genre of the novel as exemplified in the works of one or more Russian authors. Readings from Gogol, Turgenev, Tolstoy, Dostoevsky, and others. *Prerequisite:* three years of college Russian.

SLL 548 History of Russian Literary Criticism (3) History and principles of literary criticism in Russia with attention to major periods and movements from the early 19th century through the Formalists.

SLL 550 Russian Modernism (3) "Russian Modernism" subsumes theoretical ideas, practical achievements, and stylistic movements which contributed to Russia's cultural renaissance between ca. 1890 and ca. 1925. *Prerequisite:* SLL 340.

SLL 555 Soviet Literature I (1917–1953) (3) The course surveys the major writers and literary schools of Soviet literature in the crucial period from the Revolution to the death of Stalin.

SLL 557 Soviet Literature II (1953–present) (3) De-Stalinization of Soviet culture, the reappropriation of Russia's literary past, and new directions in contemporary literature.

SLL 575 Socialist Realism (3) The course examines the origins, doctrine, and ideology of socialist realism, the predominant, and officially prescribed, aesthetic of Soviet literature.

SLL 584 Russian Fiction and the West (3) A survey of major Russian fiction in the context of Western European literary movements from the late 18th through late 19th centuries. The course presumes the students' basic acquaintance with the major monuments.

SLL 585 20th Century Russian Literary Criticism (3) Relationship between practical and theoretical literary criticism: Formalism and Structuralism, Sociological school, and Bakhtin; theoretical approaches applied to specific literary texts.

SLL 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SLL 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

SLL 599 Special Topics (2–4, max 8)

SLL 650 Seminar in Russian Literature (3, max 9) Detailed study of single literary period, movement or genre; two or more selected authors; specific school of literary criticism. May be repeated, with departmental permission, if content of the seminar is different. *Prerequisite:* three years of college Russian; *recommended preparation:* one year of graduate study.

SLL 660 Seminar on a Single Author or Work (3, max 9) Theme varies from year to year. An author or major work will be selected for intensive study; research paper required. May be repeated, with departmental permission, if content of the seminar is different. *Prerequisite:* three years of college Russian; *recommended preparation:* one year of graduate study.

SLL 665 Seminar in Russian Culture and the Arts (3, max 9) Subject varies from year to year. A trend or major figure will be studied in its cultural and artistic contexts. May be repeated, with departmental permission, if content of the seminar is different. *Prerequisite:* three years of college Russian; *recommended preparation:* one year of graduate study.

SLL 790 Research (1–12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SLL 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

*Recipient of university-wide or college teaching award.

Degree Programs

The Department of Sociology offers bachelor's degrees in sociology as well as in non-governmental organizations and social change. The Department of Sociology also offers a number of minors and the Doctor of Philosophy in Sociology.

Dornsife College of Letters, Arts and Sciences

Sociology

Undergraduate Degrees

Students of sociology examine the patterns of social life, focusing on the relationship of individuals to society and the interaction of culture, economy and politics in shaping social life. The greater Los Angeles area provides a natural laboratory for students to explore such sociological themes as race relations, work and workplace, immigration, the family in a changing society, population trends, globalization, religion, and the criminal justice system.

Matching the special strengths of our faculty and cutting edge research in the discipline, USC's sociology program offers two central areas of concentration — social inequality, and social change and public policy. Many of our undergraduate courses include opportunities to engage actively with the community and to pursue multi-faceted independent research projects.

Honors Program

Seniors with 3.5 GPAs in the major and 3.25 overall are encouraged to participate in the sociology honors program consisting of two intensive senior honors seminars (SOC 494 and SOC 495). Under faculty guidance, honors students design and complete a significant piece of original sociological research.

Juniors and seniors who have made substantial progress toward completion of the program and have achieved a 3.3 GPA in sociology and a 3.0 GPA overall are eligible for the Alpha Kappa Delta International Sociology Honors Society.

Major Requirements for the Bachelor of Arts in Sociology

Nine courses (36 units) are required to complete the major.

All sociology majors must complete the four core courses of sociology:

CORE COURSES		UNITS
SOCI 200	Introduction to Sociology	4
SOCI 313	Sociological Research Methods	4
SOCI 314	Analyzing Social Statistics	4
SOCI 370	Sociological Theory	4

Five additional courses are required for the major. These are to be chosen from the elective upper-division sociology courses grouped into two theme areas:

- Theme Area I: *Social Inequality*
- Theme Area II: *Social Change and Public Policy*

All students are required to take at least one course from each of the two theme areas.

All students must achieve an overall average of C (2.0) or better in the nine courses required for completion of the major.

Theme Areas and Theme Area Specialization

Students who complete four upper-division courses in a single theme area will receive departmental recognition and documentation of their “expertise” in their chosen area of specialization — social inequality, or social change and public policy.

Social Inequality — courses address the character, causes and consequences of social inequality, paying particular attention to immigration, race, ethnicity, gender, sexualities and/or class. These courses include:

SOCIAL INEQUALITY COURSES		UNITS
AMST 357	Latino Social Movements	4
SOCI 305	Sociology of Childhood	4
SOCI 342	Race Relations	4
SOCI 350	Social Exclusion, Social Power, and Deviance	4
SOCI 355	Immigrants in the United States	4
SOCI 356	Mexican Immigrants in Sociological Perspective	4
SOCI 360	Social Inequality: Class, Status, and Power	4
SOCI 366	Chicana and Latina Experiences	4
SOCI 375	Asian Americans: Ethnic Identity	4
SOCI 376	Contemporary Issues in Asian American Communities	4
SOCI 430	Work and the Workplace	4
SOCI 432	Racial and Ethnic Relations in a Global Society	4
SOCI 435	Women in Society	4
SOCI 437	Sexuality and Society	4
SOCI 460	Key Issues in Contemporary International Migration	4
SOCI 464	Sociology of Gender and Work	4
SOCI 470	Development and Social Change in the Third World	4
SWMS 385	Men and Masculinity	4

Note: Honors students may substitute SOCI 494 Honors Seminar I for one social inequality course.

Social Change and Public Policy — courses address the character, causes and consequences of social change, paying particular attention to the role of human agency, grassroots organizing and/or political action, as well as the implications for public policy. These courses include:

SOCIAL CHANGE AND PUBLIC POLICY COURSES		UNITS
JS 382	Judaism as an American Religion	4
SOCI 320	Social Psychology	4
SOCI 331	Cities	4
SOCI 335	Society and Population	4
SOCI 340	Organizations: Bureaucracy and Alternatives to Bureaucracy	4
SOCI 351	Public Policy and Juvenile Justice	4
SOCI 353	Public Policy and Criminal Justice	4
SOCI 365	Visual Sociology of the City and Its Residents	4
SOCI 369	The Family in a Changing Society	4
SOCI 385	Population, Society, and Aging	4

SOCI 408	Volunteers, Non-Governmental Organizations, and Everyday Politics	4
SOCI 420	Sociology of Violence	4
SOCI 425	Crowds, Publics, and Social Movements	4
SOCI 475	Medical Sociology	4

Note: Honors students may substitute SOCI 495 Honors Seminar II for one social change and public policy course.

Bachelor of Arts in Non-Governmental Organizations and Social Change

This interdisciplinary program focuses on the roots of social conflict, on theories and methods for understanding them, and on the non-governmental organizations (NGOs) and nonprofits that address them. To remedy social problems, we need to examine their economic, political and social roots, as well as the varied forms of organizations that aim to fix them. Students will engage in various methods of analysis, from investigations of everyday interactions to explorations of larger economic, political and social structures. In classrooms and internships, students will learn how people in NGOs and nonprofits promote new forms of citizenship and governance, aiming to protect the environment and to lessen the suffering of people around the world.

The major requires nine courses (36 units) chosen from the specific lists of requirements below. As with all interdisciplinary majors, students may double-count no more than three courses from this degree to satisfy any other major.

COURSE REQUIREMENTS **UNITS**

A. Lower division requirement

Choose one course (4 units) from the following list:

AMST 252	Black Social Movements in the U.S.	4
COMM 201	Rhetoric and the Public Sphere	4
ECON 238x	Political Economy and Social Issues	4
ENST 150x	Environmental Issues in Society	4
ENST 255	American Environmentalism	4
ENST 270	Introduction to Environmental Law and Politics	4
GEOG 108L	Crises of a Planet	4
IR 101x	International Relations	4
IR 210	International Relations: Introductory Analysis	4
PHIL 141g	The Professions and the Public Interest in American Life	4
POSC 248	Human Rights	4
POSC 255	Cultures, Civilizations and Ethnicities in World Politics	4
POSC 265	Environmental Challenges	4
SOCI 100	Los Angeles and the American Dream	4
SOCI 150	Social Problems	4
SOCI 200	Introduction to Sociology	4
SOCI 225	Sociology of Health and the Body	4
SOCI 255	Sociology of Globalization	4
SWMS 210	Social Analysis of Gender	4
SWMS 215	Gender Conflict across Cultural Contexts	4

B. Core methods

Choose one course (4 units) from the following two:

SOCI 313	Sociological Research Methods	4
SOCI 314	Analyzing Social Statistics	4

C. Core theory

Choose one course (4 units) from the following four:

PHIL 337	History of Modern Political Philosophy	4
PHIL 437	Social and Political Philosophy	4
POSC 380	Political Theories and Social Reform	2-4
SOCI 370	Sociological Theory	4

D. Perspectives on NGOs

Choose one course (4 units) from the following three:

IR 371	Global Civil Society: Non-State Actors in World Politics	4
SOCI 250	Grassroots Participation in Global Perspective	4
SOCI 408	Volunteers, Non-Governmental Organizations, and Everyday Politics	4

E. Analyzing and identifying roots of social conflict

Choose two courses (8 units):

ANTH 355	Urban Anthropology	4
ANTH 316	North American Indians in American Public Life	4
ANTH 357	Cultures of Genocide	4
ANTH 371	Cross-Cultural Research on Urban Gangs	4
ANTH 380	Sex and Gender in Anthropological Perspective	4
BISC 427	The Global Environment	4
ECON 340*	Economics of Less Developed Countries	4
ECON 344*	Economic Development of Sub-Saharan Africa	4
ECON 350*	The World Economy	4
GERO 340	Policy, Values, and Power in an Aging Society	4
GERO 483	Global Health and Aging	4
HIST 323	The Holocaust in 20th Century Europe	4
HIST 372	Modern Latin America	4
IR 308	Economic Globalization	4
IR 315	Ethnicity and Nationalism in World Politics	4
IR 323	Politics of Global Environment	4
IR 324	Multinational Enterprises and World Politics	4
IR 325	North-South Relations in the Global Economy	4
IR 344	Developing Countries in World Politics	4
IR 349	International Law and Politics	4
IR 364	Political Economy of Latin American Development	4
IR 367	Africa in International Affairs	4
PHIL 340	Ethics	4
POSC 320	Urban Politics	4
POSC 321	Urban Political Problems	4
POSC 345	International Law	4
POSC 347	Environmental Law	4
POSC 350	Politics of Latin America	4
POSC 363	Cities and Regions in World Politics	4
POSC 381	Sex, Power, and Politics	4
POSC 436	Environmental Politics	4

SOCI 362	Global and Transnational Sociology	4
SOCI 402	Human Trafficking	4
SOCI 429	Immigration, Work, and Labor	4
SOCI 430	Work and the Workplace	4
SOCI 432	Racial and Ethnic Relations in a Global Society	4
SOCI 460	Key Issues in Contemporary International Migration	4
SOCI 464	Sociology of Gender and Work	4

**Prerequisite required*

F. Addressing social conflict and organizing advocacy.

Choose two courses (8 units):

AMST 357	Latino Social Movements	4
BAEP 491	Introduction to Social Entrepreneurship	4
BUCO 485	Business Communication Management for Nonprofits	4
COMM 322	Argumentation and Advocacy	4
COMM 366	Designing Media and Communication Projects for Social Change	4
COMM 402	Public Communication Campaigns	4
COMM 412	Communication and Social Movements	4
COMM 413	Propaganda, Ideology and Public Controversy	4
COMM 487	Communication and Global Organizations	4
GERO 350	Administrative Problems in Aging	4
GERO 451	Policy and Program Development in Aging	4
IR 306	International Organizations	4
IR 318	Violent Conflict	4
IR 337	The Impact of Remittances on Development in Mexico	4
JS 360	Identity, Community, and Service: Jews and Other Americans	4
POSC 323	Applied Politics	4
PPD 318	Financial Accounting in Public and Nonprofit Organizations	4
PPD 353	Introduction to Philanthropy and Grant-writing	4
SOCI 340	Organizations: Bureaucracy and Alternatives to Bureaucracy	4
SOCI 445*	Political Sociology	4
SOCI 425	Crowds, Publics, and Social Movements	4
SOWK 350	Adolescent Gang Intervention	4
THTR 488	Theatre in the Community	4

**Prerequisite required*

G. Internship experience

One course (4 units) required

SOCI 450	Non-Governmental Organizations/Non-profits Field Practicum	4
----------	--	---

Total course requirements: 36 units

Sociology Minor Requirements

Five courses (20 units) are required to complete the minor in sociology.

All minors are required to take at least two of the core courses in sociology:

CORE COURSES		UNITS
SOCI 200	Introduction to Sociology	4
SOCI 313	Sociological Research Methods	4
SOCI 314	Analyzing Social Statistics	4
SOCI 370	Sociological Theory	4

The remaining three courses may be chosen from among the upper-division courses in the two theme areas — social inequality, and social change and public policy (see sociology theme areas listed above).

Minor in Forensics and Criminality

The interdisciplinary minor in forensics and criminality was designed for students interested in the study of law, deviant behavior or careers in the criminal justice system. In this program, students study psychological and/or ethical issues related to criminal behavior, consider criminality in the context of social class analysis, and learn about the American system of criminal justice. Twenty units are required, 4 at the lower-division and 16 at the upper-division level. Contact Dornsife College Advising for further details.

Students should choose a curriculum for their minor based on their academic interests. Those students interested in white collar crime, for example, might choose POSC 130 Law, Politics, and Public Policy at the lower-division level, REL 375 Conflict and Change and the Ethics of Business, SOCI 350 Social Exclusion, Social Power, and Deviance, PHIL 340 Philosophy of Law and PPD 342 Crime and Public Policy.

Those who are interested in the criminal justice system might choose LAW 200x Law and Society, REL 341 Ethics in a Technological Society, SOCI 351 Public Policy and Juvenile Justice, POSC 340 Constitutional Law and POSC 432 The Politics of Local Criminal Justice.

Those interested in individual and social determinants of deviancy might take PSYC 100 Introduction to Psychology, PSYC 360 Abnormal Psychology, or PSYC 363 Criminal Behavior, or PSYC 365 Introduction to Forensic Psychology; SOCI 360 Social Inequality: Class, Status, and Power, LAW 402 Psychology and Law and SOCI 353 Public Policy and Criminal Justice.

LOWER-DIVISION REQUIREMENT (4 UNITS)		UNITS
Choose one course from:		
AMST 101	Race and Class in Los Angeles	4
LAW 200x	Law and Society	4
PHIL 140	Contemporary Moral and Social Issues	4
POSC 130	Law, Politics and Public Policy	4
PSYC 100	Introduction to Psychology	4
PSYC 165L	Drugs, Behavior and Society	4
SOCI 142	Diversity and Racial Conflict	4
SOCI 150	Social Problems	4
SOCI 200	Introduction to Sociology	4

UPPER-DIVISION REQUIREMENTS (16 UNITS)		UNITS
Choose one course from each group below:		
<i>The Individual in Society</i>		
LAW 404	Law and Psychology: Examining the Criminal Justice Process	
LING 412	Language and Law	4
LING 450	New Horizons in Forensic Speaker Identification	4
PSYC 355*	Social Psychology, or	
SOCI 320	Social Psychology	4
POSC 441	Cultural Diversity and the Law	4

PSYC 360*	Abnormal Psychology	4
PSYC 363*	Criminal Behavior	4
PSYC 365*	Introduction to Forensic Psychology	4
REL 341	Technology, Culture, and Ethics	4
REL 375	Conflict and Change and the Ethics of Business	4

*Prerequisite: PSYC 100

Social Class and Criminality

ANTH 371	Cross-Cultural Research on Urban Gangs	4
SOCI 350	Social Exclusion, Social Power, and Deviance	4
SOCI 351	Public Policy and Juvenile Justice	4
SOCI 360	Social Inequality: Class, Status, and Power	4
SOWK 350	Adolescent Gang Intervention	4

The System of Criminal Justice

LAW 402	Psychology and Law	4
LAW 403	Mental Health Law	4
PHIL 430	Philosophy of Law	4
PHIL 437	Social and Political Philosophy	4
POSC 340	Constitutional Law	4
POSC 426	The United States Supreme Court	4
POSC 444	Civil and Political Rights and Liberties	4
PPD 340	The American System of Justice	4

Crime and Punishment

POSC 432	The Politics of Local Criminal Justice	4
PPD 342	Crime and Public Policy	4
SOCI 353	Public Policy and Criminal Justice	4

Total requirements: five courses (20 units)

Minor in Managing Human Relations College Academic Services Building

(213) 740-2534

This interdisciplinary minor is intended for students in all schools with an interest in human relations as a subject of study or professional goal. In addition to course work in organizational behavior, social psychology and management, this minor includes attention to questions of ethics and leadership.

As with all minors, students must include at least four upper-division courses and four courses dedicated exclusively to this minor (not used for credit toward a major, another minor or general education requirements). Finally, students must select four courses outside their major department. Students seeking the Bachelor of Arts in Sociology must choose four courses outside of sociology; those seeking the Bachelor of Science in Business Administration must choose four courses outside the USC Marshall School of Business.

REQUIREMENTS

UNITS

Choose one course from the following (4 units):

BUAD 304	Organizational Behavior and Leadership	4
----------	--	---

PSYC 355*	Social Psychology	4
SOCI 320	Social Psychology	4

Choose one course from the following (4 units):

MOR 431*	Interpersonal Competence and Development	4
PSYC 457*	Applied Social Psychology	4
SOCI 340	Organizations: Bureaucracy and Alternatives to Bureaucracy	4
SOCI 342	Race Relations	4
SOCI 345	Social Institutions	4

Choose one course from the following list of classes on leadership (4 units):

CLAS 370	Leaders and Communities: Classical Models	4
IR 303	Leadership and Diplomacy	4
MDA 325	Case Studies in Modern Leadership	4
MDA 365	The Art and Adventure of Leadership	4
MOR 470*	Global Leadership	4
PHIL 335	Theoretical Models of Leadership	4

Choose one course from the following list of classes on ethics (4 units):

BUCO 425*	Public Communication in Ethics and Research	4
MOR 421*	Social and Ethical Issues in Business	4
PHIL 340	Ethics	4
REL 341	Technology, Culture, and Ethics	4
REL 375	Conflict and Change and the Ethics of Business	4

Choose one of the following three capstone classes (4 units):

ECON 332*	Contracts, Organizations, and Institutions	4
ECON 471*	Economics of Labor Markets and Human Capital	4
MOR 471	Managing and Developing People	4
SOCI 340	Work and the Workplace	4

**Course has prerequisite or corequisite*

Total requirements: five courses, 20 units

Minor in Photography and Social Change

This minor explores the potential of photography as an instrument of social change that allows individuals to document their circumstances, share their stories and change their lives. Students have the opportunity to examine the impact of images and the power of storytelling both in the classroom and in the field and study the issues raised by this kind of social exploration and commentary.

Students learn techniques of digital photography and theories of culture to help them understand diverse cultural phenomena and navigate their own cultural biases. In the field, students apply these techniques and theories by developing their own body of work. In addition, students can mentor individuals in the community to use photography and digital media to share their personal narratives, thus empowering community members to reflect critically upon their circumstances and to participate in their visual representation.

This interdisciplinary minor brings together students from schools and majors across the USC campus, allowing them to interact with one another and with scholars, artists and professionals associated with key organizations such as the Institute for Photographic Empowerment and Venice Arts.

LOWER-DIVISION REQUIREMENT		UNITS
Select one course, based on prior preparation (4 units):		
AHIS 255	Culture Wars: Art and Social Conflict in the USA, 1900–Present	4
ANTH 240	Collective Identity and Political Violence: 9/11	4
FAIN 210	Introduction to Digital Photography	4
SOCI 250	Grassroots Participation in Global Perspective	4

UPPER-DIVISION REQUIREMENTS	UNITS
-----------------------------	-------

Select two courses in each category below, from different departments (16 units):		
<i>Understanding Culture and Change</i>		
(8 units, in 2 courses — each from a different department)		
AMST 348	Race and Environmentalism	4
AMST 357	Latino Social Movements	4
COLT 303	Globalization: Culture, Change, Resistance	4
IR 371	Global Civil Society: Non-State Actors in World Politics	4
JS 330	Jewish Power, Powerlessness, and Politics in the Modern Era	4
POSC 323	Applied Politics	4
POSC 441	Cultural Diversity and the Law	4
REL 336	Re-viewing Religion in Asian America	4
REL 366	Religion and Social Change	4
SOCI 360	Social Inequality: Class, Status, and Power	4
SOCI 470	Development and Social Change in the Third World	4

<i>Media and Message</i>		
(8 units, in 2 courses — each from a different department)		
AHIS 373	History and Theory of Photography	4
AHIS 469	Critical Approaches to Photography	4
ANTH 472	Visual Techniques in Anthropology: Stills	4
COLT 487	Critical Image	4
COMM 366	Designing Media and Communication Projects for Social Change	4
COMM 451	Visual Communication and Social Change	4
JOUR 422	Visual Journalism	4

Students in this program will also have opportunities for special access to USC Annenberg’s Public Diplomacy classes.

Total requirements: 20 units

Minor in Science, Technology, and Society

The beginning of the 21st century has witnessed a number of public controversies at the intersection of science, technology and society. Such discussions are characterized by divergent views on the role of science and technology in contemporary life. Over the next decades many of the most crucial challenges we face will require the integration of societal values with scientific and technological developments — whether in managing end-of-life care, preserving the environment, or continuing to nurture scientific innovation. This minor introduces students to a number of approaches to these questions, taking advantage of the diverse offerings in this area at USC.

Lower-division Requirement (4 units)

SOCI 210 Science, Technology and Social Conflict (4)

Upper-division Requirement (minimum 16 units)

Four or five* classes, selected from at least two of the three categories:

SCIENCE AS A SOCIAL INSTITUTION		UNITS
AHIS 429	Studies in Art, Science and Technology	4
ANTH 373	Magic, Witchcraft, and Healing	4
CLAS 339	Ancient Science	4
HIST 329	Madness and Society in the Modern Age	4
HIST 330	Drugs, Disease and Medicine in History	4
PHIL 385	Science and Rationality	4
PHIL 486	Methodologies of the Sciences	4
REL 442	Religion and Science	4
SOCI 475	Medical Sociology	4

TECHNOLOGY AND MODERN LIFE		UNITS
COLT 474	Desire, Literature, Technology	4
COMM 306	Innovation, Entertainment, and the Arts	4
COMM 340	The Cultures of New Media	4
COMM 345	Social and Economic Implications of Communication Technologies	4
CTCS 478	Culture, Technology and Communications	4
ENGL 375	Science Fiction	4
REL 319	Religious and Ethical Issues in Death and Dying	4
REL 341	Technology, Culture, and Ethics	4
REL 360	Ethical Issues in the New Medical Revolution	4

HEALTH, ENVIRONMENT AND SCIENCE POLICY		UNITS
CE 469*	Sustainable Design and Construction	3
CE 473*	Engineering Law, Finance and Ethics	3
HP 412	Health Promotion and Prevention Policy	4
LAW 403	Mental Health Law	4
POSC 436	Environmental Politics	4
PPD 330	Introduction to Health Care Systems	4
PPD 360	Urban Transportation Planning and Policy	4
PPD 413	Administration of Health Care Organizations	4
REL 460	Senior Seminar: Medical Ethics	4

*CE 469 and CE 473 are 3-unit courses; choosing one of these courses requires students to take six total courses for the minor.

Total requirements: five or six courses (minimum 20 units)

University Requirements for All Minors

To satisfy the university's minor requirements, students must choose at least four courses (16 units) outside their major department and at least four courses (16 units) of upper-division course work. In addition, at least four courses (16 units) must be dedicated to the minor (not counting for credit toward a major, another minor or USC core requirements).

Interdisciplinary Minors

American Studies and Ethnicity (see American Studies and Ethnicity).

Law and Society (see Political Science).

Race, Ethnicity and Politics (see Political Science).

Dornsife College of Letters, Arts and Sciences

Sociology

Graduate Degrees

The Department of Sociology offers programs of study leading to the Doctor of Philosophy degree. The Ph.D. is directed toward the training of theoretically and methodologically sophisticated sociologists who have an enduring commitment to the practice and teaching of sociology.

Deadline

Applicants must complete their applications by December 1. Consideration for university fellowships is possible as early as November for students whose applications are complete.

Prerequisites

All applicants must have a bachelor's degree, a GPA of at least 3.0, and one or more courses in either undergraduate statistics or college algebra.

Criteria

Admission to regular graduate status ordinarily requires possession of a bachelor's degree, a GPA of at least 3.0, one or more courses in undergraduate statistics and/or college algebra, and three letters of recommendation. The GRE is also required. International applicants must also submit their score on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS). Approximately 5–8 students enroll each year from the available pool of applicants. Each application receives careful attention and is judged in terms of the full set of criteria.

A limited number of graduate course units taken elsewhere may be considered for transfer into the graduate program. These units are transferred in on a course-by-course basis.

Application Procedures

The following materials should be submitted to apply for graduate study:

1. an online USC application form (available at usc.edu/admission/graduate) plus a check for the admission fee;
2. official transcripts of all undergraduate and graduate work;
3. the official results of the general aptitude scores of the Graduate Record Examinations (verbal, quantitative, and analytical);
4. for international students, a TOEFL or IELTS score;
5. a completed Sociology Department Graduate Application form (please save and upload);
6. one example of written work (normally a paper written for a course) of no more than 20 pages;

7. three letters of recommendation from persons who can write about your academic performance and your potential as a social scientist;

8. a personal statement describing (1) your present sociological interest, (2) the instructors, books, and/or journals that have had the greatest influence on your interests in sociology, and (3) what you hope to be doing in the field of sociology 10 years after you receive your degree. Please include any other aspect of your experience that you want to include.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Residence

All graduate students must be in residence and must take at least eight units of graduate work each semester (except during Advanced and Qualifying Examinations), prior to work on the dissertation.

Master of Arts in Sociology

The department does not admit students whose objective is a master's degree. However, if a student accepted in the program does not have a master's degree, the department strongly recommends completion of the requirements for the M.A. in the course of work toward the Ph.D. degree.

Doctor of Philosophy in Sociology

Course Requirements

A minimum of 60 graduate units is necessary for the Ph.D., among which are the following required courses: SOCI 510, SOCI 520, SOCI 521, SOCI 525, SOCI 511, and SOCI 621 or 620. In addition, each student must specialize in two subareas of sociology and must take at least 8 units in each area such as: urban sociology, complex organizations, stratification, ethnic relations, sociology of aging, medical sociology, communication and culture, deviance, sociology of gender, demography, and so on.

Screening Procedure

Normally, students must complete the screening procedure during the third semester of enrollment. Students will have completed two full semesters of work by this point and, hence, will have taken no fewer than 16 and no more than 32 units, including at least the following: SOCI 510, SOCI 525, and SOCI 511. Students are evaluated on subject matter competence and satisfactory progress. When the screening procedure is successfully completed, the student has one semester in which to form a qualifying exam committee.

Empirical Paper

Each student is required to complete an independent empirical research project which is approved by two members of his or her qualifying exam committee. In some instances, this requirement may be met by acceptance of a satisfactory master's thesis from some other university.

Foreign Language Requirement

The department does not generally require proficiency in a foreign language; however, as with other courses outside the department, a student's qualifying exam committee may in some cases require proficiency in a foreign language.

Qualifying Examinations

Following the completion of their empirical papers and most of their course work, students are required to take a written and oral examination in their two standard areas. If the written examination is passed, the oral part of the examination can be devoted to a preliminary discussion of dissertation plans. When these are completed successfully, the student is advanced to Ph.D. candidacy.

Dissertation

After the dissertation is completed, the student and the dissertation committee, in conjunction with the

department chair, may elect either a defense oral or a final oral examination in defense of the dissertation. The defense oral is normally chosen in sociology.

Dornsife College of Letters, Arts and Sciences

Sociology

Courses of Instruction

SOCIOLOGY (SOCI)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

SOCI 100gm Los Angeles and the American Dream (4) Los Angeles as a metaphor for the American Dream, exploring the city's history and potential futures, including economic opportunity, social justice, spatial organization, and environmental sustainability. (Duplicates credit in the former AMST 100gm and GEOG 100gm.)

SOCI 142gm Diversity and Racial Conflict (4, FaSp) Introduction to the causes and effects of contemporary race relations in a diverse U.S. society. Exploration of racial conflict at the personal and institutional levels.

SOCI 150gm Social Problems (4, Fa) Analysis of factors in current American social problems: crime, delinquency, prostitution, family disorganization, race relations, mental illness.

SOCI 155gm Immigrant America (4, FaSp) Examination of the immigrant experience in the United States. Comparative analysis of social context of migration, formation of immigrant communities, and social integration of immigrants.

SOCI 169gm Changing Family Forms (4, FaSp) The peculiarity of the "modern" Western family system in historical and cross cultural perspective; focus on the "postmodern" family crisis in the United States.

SOCI 200gm Introduction to Sociology (4) Basic concepts of sociology with special reference to group life, social institutions, and social processes.

SOCI 210g Science, Technology, and Social Conflict (4) Science and technology change society and how we understand ourselves. In turn, social struggles influence science. We will explore the interplay between these forces.

SOCI 220gm Questions of Intimacy (4, FaSp) Analysis of conditions of intimacy and intimate personal relationships as lenses for understanding social inequalities of race, social class, gender, sexuality, and nation.

SOCI 225gw Sociology of Health and the Body (4, FaSp) Investigation of health as a social category and the varied ways that social and cultural factors shape bodies and health.

SOCI 242g Sociology, Human Behavior, and Health (4, FaSpSm) Sociological concepts and approaches that are important in explaining human behaviors and interactions to gain insights to the sociological causes of disease, health and wellness.

SOCI 250gmw Grassroots Participation in Global Perspective (4) Theory and history behind the ideal of "the local, grassroots volunteer": a direct link between theory and research using Los Angeles as a case study.

SOCI 255g Sociology of Globalization (4, FaSp) This course examines globalization through social and economic processes and its consequences for social conflict, economic development, human rights, social

movements, and national identity.

SOCI 275 Sociology of Everyday Life (4) The social philosophy of understanding everyday life; describing and analyzing forms of interaction, emotions, knowledge, and the social self.

SOCI 305m Sociology of Childhood (4) Social construction of childhoods; children's social relations and cultures; issues of childcare, poverty, violence, and children's rights; effects of children on adults.

SOCI 313 Sociological Research Methods (4, FaSp) Logic of theory construction, research design, elementary data collection and analysis. Lecture and laboratory.

SOCI 314 Analyzing Social Statistics (4, FaSp) Sociological measurement, univariate description, elementary correlation, introduction to statistical inference.

SOCI 315 Sociology of Sport (4) Relationship between sport and politics, racism, and sexism; player and fan violence; sports for children; sport in the educational setting; drug abuse among athletes.

SOCI 320 Social Psychology (4) Process of interaction and communication by which persons influence and are influenced by others; development of self, role behavior, attitudes and values, social norms, cultural conditioning.

SOCI 331 Cities (4) Organization of urban society, including such topics as segregation, urban decay, local politics, residential change, and community conflict.

SOCI 335 Society and Population (4) World population trends and their consequences: determinants of fertility, mortality, and migration; development of elementary models of population change.

SOCI 340 Organizations: Bureaucracy and Alternatives to Bureaucracy (4) Importance of organizations in social life; techniques for using and changing organizations; examination of strategies for building and sustaining nonbureaucratic organizations.

SOCI 342m Race Relations (4, FaSp) Past and present relations between the White majority and the "conquered minorities" (Blacks, Chicanos, American Indians), as well as Asian immigrants; conflict vs. assimilation perspectives.

SOCI 345 Social Institutions (4) Cultural and interactional aspects of social institutions as complex social systems; religious, political, industrial, and familial institutions.

SOCI 350 Social Exclusion, Social Power, and Deviance (4, Fa) Current theories of origin, distribution, and control of deviant behavior; examination of processes involved in the career deviance of drug addicts, alcoholics, sexual deviants, gamblers, and mentally disordered.

SOCI 351 Public Policy and Juvenile Justice (4) Past and current theories of youth crime; gangs and other forms of youth deviance; the changing response of the police, courts, and public to these behaviors.

SOCI 353 Public Policy and Criminal Justice (4) Nature and trends in crime, policing, courts, and correctional agencies in relation to past, current, and prospective changes in society.

SOCI 355m Immigrants in the United States (4) Social construction of historical and contemporary immigration to the United States, including causes of migration, immigration policies, and the socioeconomic integration of immigrants.

SOCI 356m Mexican Immigrants in Sociological Perspective (4) Effects of class, global inequality, legal status, gender, racial/ethnic, and language differences in distinguishing Mexican immigrant populations from the U.S.-born population; differentiation among Mexican immigrants.

SOCI 357m Latino Politics (4) (Enroll in AMST 357m)

SOCI 360m Social Inequality: Class, Status, and Power (4, FaSp) Inequalities in wealth, prestige, and

power in the United States; the American class structure and the extent of upward mobility in that structure.

SOCI 362 Global and Transnational Sociology (4, FaSp) Examines key issues in global and transnational sociology. Globalization is the empirical phenomenon where social, economic, and political interconnectedness across countries impacts the world.

SOCI 364m Racial and Ethnic Women in America (4, FaSp) (Enroll in SWMS 364m)

SOCI 365 Visual Sociology of the City and Its Residents (4) Students examine images of urban America and use the camera to produce visual representation in their analysis of social relations.

SOCI 366m Chicana and Latina Sociology (4) Sociological examination of Chicana and Latina experiences in the western region of the United States; issues of family, work, media, education and sexuality.

SOCI 369 The Family in a Changing Society (4, Fa) Changing family patterns; personality development; family unity, predicting success in marriage; the family in transition; crises such as economic changes, death, divorce; family reorganization.

SOCI 370 Sociological Theory (4, FaSp) Historical and contemporary approaches to sociological theory; analysis of conceptual frameworks applied to the study of society and social interaction.

SOCI 375m Asian Americans: Ethnic Identity (4) Cultural images and stereotypes, gender, immigration history, social class, politics, and social problems in Asian American communities.

SOCI 376m Contemporary Issues in Asian American Communities (4) Survey of current social and political issues facing Asian American communities with emphasis on Los Angeles region; design and implementation of community-based research projects.

SOCI 379gm Mixing and Matching: Intermarriage in 21st Century (4, Sp) (Enroll in JS 379gm)

SOCI 382 Judaism as an American Religion (4) (Enroll in JS 382)

SOCI 385 Population, Society, and Aging (4, Fa) Study of population characteristics related to the problems and processes of aging.

SOCI 386m Men and Masculinity (4) (Enroll in SWMS 385m)

SOCI 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

SOCI 402 Human Trafficking (4, FaSp) Interrogates the social construction of the legal category “human trafficking,” examining the ideological foundations, the social contentions, and political issues surrounding the issue.

SOCI 408 Volunteers, Non-Governmental Organizations, and Everyday Politics (4, FaSpSm) Theory, practice, and history of civic life. Examines communication, personal obligation, collective imagination, and political representation, in grassroots, state-sponsored, and non-governmental organization-sponsored civic associations around the world. *Prerequisite:* SOCI 370.

SOCI 410 The Sociology of Popular Culture (4) From the entertainment capital of the world, course surveys sociological research on artistic producers and critical theories of the connections between popular culture and society.

SOCI 420 Sociology of Violence (4, FaSp) Theoretical, conceptual and analytical skills in the study of collective violence, its legacies, and how society deals with it.

SOCI 425 Crowds, Publics, and Social Movements (4, FaSp) Spontaneous, expressive and creative forms that support or revolutionize society, including topics such as audiences, student unrest, tax revolts, patriotism, uprisings, and women’s movements.

SOCI 429 Immigration, Work and Labor (4, FaSp) Examination of the experiences of racial minorities in the labor market, niche concentration, the effects of globalization on labor migration, entrepreneurship, discrimination, and minorities in white-collar occupations.

SOCI 430m Work and the Workplace (4) Contrasting views of work in contemporary societies; technological change in the workplace; opportunity, inequality, conflict, and alienation in different occupations.

SOCI 432m Racial and Ethnic Relations in a Global Society (4, FaSp) Examination of race/ethnic relations with U.S. and selected countries from a global perspective, causes and social effects of globalization on people's lives and on U.S. attitudes and political policies.

SOCI 435m Women in Society (4) Women today in the labor force, in politics, and in the family. Past and contemporary attempts to expand the position of women in society.

SOCI 437 Sexuality and Society (4) Historical and contemporary sexual issues (pornography, prostitution, rape) examined in light of Victorianism, Freudianism, Marxism, scientific sexology, feminism, gay liberationism, and sexual conservatism.

SOCI 445 Political Sociology (4, Irregular) Political power, conflict and apathy; public symbols, debate and discourse; nationalism; relations between politics, provision of social services and economics in comparative and historical perspective. *Prerequisite:* SOCI 370.

SOCI 450 Non-Governmental Organizations/Non-profits Field Practicum (4, FaSp) Internship in a Non-Governmental Organization (NGO). Students will conduct sociological research on issues surrounding NGOs and the work they do. *Prerequisite:* SOCI 313 and SOCI 314. Open only to juniors and seniors.

SOCI 455m Gender and Sport (4) (Enroll in SWMS 455m)

SOCI 460 Key Issues in Contemporary International Migration (4, Irregular) Overview of contemporary patterns of international migration and its implications for receiving and sending countries, with a special emphasis on immigration to the United States.

SOCI 464 Sociology of Gender and Work (4, FaSp) Examination of gender inequality in the U.S. labor market; work-family conflict; employer remedies; comparative social policy.

SOCI 468 Sociology of Religion (4) (Enroll in REL 468)

SOCI 470 Development and Social Change in the Third World (4) Theories and case studies on social, economic, political, and cultural development and change in the Third World: Latin America, Asia, or Africa.

SOCI 475 Medical Sociology (4) Social and cultural factors in causation of disease, health care utilization and health care delivery.

SOCI 480 The Sociology of Risk and Disaster (4, FaSp) Is there such a thing as a "natural" disaster? Examination of both natural and technological disasters, and exploration of the centrality of risk in industrialized societies.

SOCI 490x Directed Research (1–8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

SOCI 494 Sociology Honors Seminar I (4, Fa) Advanced seminar involving extensive reading, research and discussions. Selected subjects; offered in fall only and restricted to honors students. Acceptance into the Honors Program.

SOCI 495 Sociology Honors Seminar II (4, Sp) Seminar in workshop form to accompany completion of Senior Honors Thesis under faculty guidance. Acceptance into Honors Program. *Prerequisite:* SOCI 313, SOCI 494.

SOCI 499 Special Topics (2–4, max 8) An interdisciplinary examination of selected emerging issues.

SOCI 510 Sociological Theory I (4, Fa) Developments in sociological theory from the discipline's 19th century origins to World War II.

SOCI 511 Sociological Theory II (4) Developments in sociological theory from World War II to the present. (Duplicates credit in former SOCI 610.)

SOCI 520 Qualitative Research Methods (4, Fa) Seminar in epistemologies, ethics, and techniques of qualitative research. Critical reading and practice in social observation, interviewing, fieldwork, and research design. Preparation of IRB proposal.

SOCI 521 Quantitative Methods and Statistics (4, Fa) Introduction to the logic and methods of quantitative analysis in sociology; covers the basic elements of designing and research, summarizing and exploring patterns in data, and making generalizations about populations based on characteristics of samples.

SOCI 525 Sociology Proseminar: Approaches to Sociological Research (4, FaSp) Graduate students begin their customized literature reviews and develop a paper that will frame the research they pursue in the empirical paper requirement. Open only to Sociology doctoral students.

SOCI 554 Women in Global Perspective (4) (Enroll in SWMS 554)

SOCI 560 Feminist Theory (4) (Enroll in SWMS 560)

SOCI 590 Directed Research (1–12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SOCI 593 Practicum in Teaching the Liberal Arts (2, Fa) Practical principles for the long-term development of effective teaching within college disciplines. Intended for teaching assistants in Dornsife College.

SOCI 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

SOCI 599 Special Topics (2–4, max 8, FaSp) Seminar in selected topics in sociology.

SOCI 620 Advanced Methods – Qualitative Research (4, FaSp) Seminar and practicum in conducting and interpreting original qualitative research. *Prerequisite:* SOCI 520. (Duplicates credit in former SOCI 524.)

SOCI 621 Quantitative Methods and Statistics II (4, Sp) Casual modeling and the inter-relationships among social phenomena: covers the basic elements of casual inference and generalizability, linear regressions analysis, and categorical data analysis. *Prerequisite:* SOCI 521.

SOCI 622 Advanced Methods – Quantitative Research (4, FaSp) Advanced research methodology in survey technique, evaluation research, instrument construction, and demographic analysis. (Duplicates credit in former SOCI 523.)

SOCI 625 Demographic Methods (4, FaSp) Procedures and techniques for the collection, evaluation, and analysis of demographic data; census and vital registration systems; basic measures of demographic components, and the construction of life tables and population projections. *Prerequisite:* SOCI 521. (Duplicates credit in former SOCI 540.)

SOCI 628 Theories of Aging (4) (Enroll in GERO 628)

SOCI 635 Seminar in Social Structure (4) Research and theory development on the interrelations among the various structures that comprise social systems. An examination of large societal units. *Prerequisite:* advanced graduate standing.

SOCI 640 Sociology of Gender and Sexuality (4, FaSp) Approaches to gender and sexuality within sociology and social theory, highlighting contemporary empirical research on sexualities. Open only to master and doctoral students. (Duplicates credit in former SOCI 530.)

SOCI 642 Sex and Gender in Society (4, FaSpSm) The social organization of gender in the contexts of

work, families, intimacy, sexuality, reproduction, violence. Variations by race, ethnicity, social class. Processes of social change. (Duplicates credit in former SOCI 552.)

SOCI 643 Sociology of Labor (4, FaSp) Viewing labor and labor movements from a macro/meso/micro perspective. Examination in the formation of labor markets, global economy, organization of work, conditions of work, movements.

SOCI 644 Population Trends: Public and Private Policies (4, FaSp) World and national population trends; causes and implications for economic, health, and social policies. (Duplicates credit in former SOCI 544.)

SOCI 645 Seminar in World Population Problems (4, FaSp) Demographic characteristics of the major regions of the world; social, economic, and political implications of population trends and methods of demographic analysis. *Prerequisite:* 335g. (Duplicates credit in former SOCI 545.)

SOCI 647 Political Sociology: Politics, Symbols and Everyday Life (4, FaSp) Political power, conflict and apathy; public symbols, debate and discourse; nationalism; relations between politics, provision of social services and economics in comparative and historical perspective. (Duplicates credit in former SOCI 537.)

SOCI 648 Fertility Control Policies (4, FaSp) Fertility control policies, and their consequences, including family planning and other pronatalist and antinatalist programs. (Duplicates credit in former SOCI 548.)

SOCI 649 Migration Policies (4, FaSp) Analysis of migration and population redistribution; policies affecting such migration and redistribution. (Duplicates credit in former SOCI 549.)

SOCI 650 Topical Issues in Crime and Delinquency (2–4) Seminar in selected topics in criminology.

SOCI 651 Seminar in Social Stratification (4, FaSp) Critique of research literature and research methods in the area of social class and social stratification; major theories and theoretical implications of current research. (Duplicates credit in former SOCI 551.)

SOCI 653 Seminar in Science and Technology Studies (4, max 8, FaSp) Introduction to key concepts and theories in the interdisciplinary field of Science and Technology Studies. (Duplicates credit in former SOCI 532.)

SOCI 655 Seminar in Race Relations (4, FaSp) Current racial problems in the United States and other countries; critiques of literature on race relations. (Duplicates credit in former SOCI 555.)

SOCI 656 Social Demography (4, FaSp) Theoretical perspectives of population, historical and contemporary accounts of population trends and statistics, and the latest research on the causes and consequences of demographic processes. *Recommended preparation:* enrollment in a Ph.D. program.

SOCI 657 Sociology of Culture (4, FaSpSm) Cultural theories and forms of cultural analysis appropriate for sociological research; critical examination of theory and research on how culture relates to social structure, social inequality, politics, institutions, and everyday interaction. *Recommended preparation:* SOCI 510 or prior undergraduate or graduate coursework in social science or communication studies. (Duplicates credit in former SOCI 535.)

SOCI 667 Seminar in Social Deviance (4, FaSp) Deviance and social rules in groups and communities; contemporary social policies involving ethnic, cultural, and social factors. (Duplicates credit in former SOCI 566.)

SOCI 670 Seminar in Organizational Analysis (4, FaSp) Literature evaluation, theory building, and research in the area of large-scale organizations and other types of institutionalized groups. (Duplicates credit in former SOCI 550.)

SOCI 671 Urban Sociology (4, FaSp) Examination of theories and research on cities in the United States, examining issues such as politics, race, development, and inequality. Open only to graduate students. (Duplicates credit in former SOCI 571.)

SOCI 675 Seminar in Immigration (4, FaSpSm) Survey of key theoretical approaches and relevant issues

in immigration studies. Themes include: transnationalism, globalization, gendered migration, segmented assimilation, immigrant labor markets, social incorporation and citizenship. Open to Ph.D. in Sociology students only. (Duplicates credit in former SOCI 575.)

SOCI 680 Writing for Publication in Sociology (4, Sp) Prepares graduate students to publish in peer reviewed journals. *Prerequisite:* SOCI 620 or SOCI 622. Graded CR/NC.

SOCI 685 Seminar in Aging (4, FaSp) Research seminar to review identification of problems, issues of theory, and methodology and implications for research designs. (Duplicates credit in former SOCI 580.)

SOCI 790 Research (1–12, FaSp) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SOCI 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC. dit on acceptance of dissertation. Graded IP/CR/NC.

Dornsife College of Letters, Arts and Sciences

Sophomore Seminars

Sophomore Seminars focus on topics of current interest in research and scholarship. They are small classes that encourage close interaction between faculty and students.

During the fall and spring semesters, sophomores earn 2 units of credit through participation in these weekly seminars. During intensive special sessions, sophomores earn 1 unit of credit. These courses emphasize active exploration of the life of the mind through a variety of classroom activities and assignments.

To encourage a relaxed interchange of information and ideas, each seminar is graded credit/no credit and limited in enrollment to 18 students.

Sophomore Seminars will be offered for the fall and spring semesters in a variety of subjects. They will also be offered during intensive special sessions. Individual topics will be indicated in the *Schedule of Classes* under the SSEM designation.

Courses of Instruction

SOPHOMORE SEMINARS (SSEM)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

SSEM 200 Sophomore Seminar (1–2, max 2, FaSp and Special Sessions) Special seminar courses for sophomores; limited to 18 students; topics will vary; graded CR/NC. Open to sophomores only.

*Emeritus Professors: Paul Ilie, Ph.D.; Carmen Silva-Corvalán, Ph.D.**

Emeritus Associate Professor: J. Ramón Araluce, Ph.D.

**Recipient of university-wide or college teaching award.*

Undergraduate Programs

The Department of Spanish and Portuguese offers both a major and a minor in Spanish, emphasizing the language, linguistics and culture of Spain and Latin America.

With an intellectual commitment to multiculturalism and interdisciplinarity, the undergraduate program actively explores the transnational intersection of various aspects of Spanish and Latin American culture, including literature, folklore, cinema, art, music and architecture. While living and studying in 21st century Los Angeles — the ideal site for thinking about the planet’s increasingly transcultural condition — students are challenged to consider and reconsider a number of important issues: the growing importance of popular culture in Iberia, Latin America and Latino USA; the role of race, class and gender within Spanish and Latin American society; the crucial impact of diasporas and migrations on our contemporary cultural landscape; among many others.

The department encourages students to combine a Spanish major with a double major or minor in another discipline either within the USC Dornsife College of Letters, Arts and Sciences or other schools at USC. Faculty undergraduate advisers are available to help provide information and assistance to students wishing to explore these various options.

The department also offers basic language instruction in both Spanish and Portuguese through which students can satisfy their foreign language requirement.

Graduate Programs

The Ph.D. in Linguistics (Hispanic Linguistics) is offered through the Linguistics Department. See here for degree requirements. The M.A. and Ph.D., Comparative Studies in Literature and Culture (Spanish and Latin American Studies) are offered through the Comparative Studies in Literature and Culture program. See here for degree requirements.

Spanish Undergraduate Students Association (SUSA)

Students majoring or minoring in Spanish are eligible to join SUSA, the Spanish Undergraduate Students

Association. Each year SUSA sponsors a variety of activities which enrich the cultural, intellectual and academic experience of the undergraduate student.

Dornsife College of Letters, Arts and Sciences

Spanish and Portuguese

Undergraduate Degrees

General Information

Spanish Language Proficiency Examination

Students with previous exposure to Spanish are required to take a placement test, administered by the Center for Testing and Assessment. Students with no record of previous exposure to Spanish are not required to take the placement examination and should contact the department for assistance.

Courses in Spanish

All courses at the 200, 300 and 400 levels are conducted in Spanish unless otherwise noted in the course descriptions that follow. Courses are kept small to allow for maximum interaction between students and professors.

Advisement

A college undergraduate adviser is assigned to provide academic advisement prior to registration and throughout the academic year.

Major Requirements for the Bachelor of Arts in Spanish

REQUIRED COURSES — LOWER-DIVISION (8 UNITS)*		UNITS
--	--	-------

SPAN 260**	Advanced Spanish: Arts and Sciences	4
SPAN 261**	Advanced Spanish: Society and the Media	4

REQUIRED COURSES — UPPER-DIVISION (16 UNITS)		UNITS
--	--	-------

Four of the following courses:		
SPAN 301	Introduction to Hispanic Literature and Film	4
SPAN 310	Structure of Spanish	4
One other SPAN literature, culture, film course		4
One 400-level SPAN course		4

Electives (16 units):

Four other upper-division SPAN courses.

Only one section of SPAN 316x may be taken for major or minor credit.

Honors Program

The B.A. in Spanish with Honors is available to students who have a GPA of at least 3.5 in courses counted for major credit and an overall GPA of 3.0 (by the time of graduation). Desire to complete the major with honors typically should be approved by a department faculty member no later than the second semester of the junior year. To complete the honors program the student must write an honors thesis in Spanish in conjunction with a 400-level course. The thesis, in the range of 25–30 pages (6,250–7,500 words), must be endorsed by a departmental honors committee by April 1 of the senior year.

Majors and minors may request a waiver of one or both courses (SPAN 260 and/or SPAN 261) if they meet one or more of the following prerequisites: a) a score of 5 on the Spanish language or literature advanced placement (AP) exam; b) a score of 6 or 7 on the Spanish International Baccalaureate Higher-Level exam (IBHL); c) a score of 800 in the Spanish SAT subject exam; or d) demonstrate advanced proficiency in spoken and written Spanish. Departmental approval is required in every case.

***SPAN 260 and SPAN 261 may be taken concurrently. The second of these courses may be taken concurrently with a 300-level course.*

Minor in Spanish

REQUIRED COURSES — LOWER-DIVISION (8 UNITS)		UNITS
SPAN 265	Spanish for Communication: Society and the Media	4
SPAN 266*	Spanish for Communication: Arts and Sciences	4
UPPER-DIVISION (16 UNITS)		UNITS
Any four courses at the 300- or 400-level		
BASIC LANGUAGE **		UNITS
SPAN 120	Spanish I	4
SPAN 150	Spanish II	4
SPAN 220	Spanish III	4

**The second 260-type course may be taken concurrently with upper-division courses.*

Majors and minors may request a waiver of one or both courses (SPAN 265 and/or SPAN 266) if they meet one or more of the following prerequisites: a) a score of 5 on the Spanish language or literature advanced placement (AP) exam, b) a score of 6 or 7 on the Spanish International Baccalaureate Higher-Level exam (IBHL), c) a score of 800 in the Spanish SAT subject exam or d) demonstration of advanced proficiency in spoken and written Spanish. Departmental approval is required in every case.

SPAN 265 and SPAN 266 may be taken concurrently. The second of these courses may be taken concurrently with a 300-level course.

Minor in Latin American Studies

The Latin American Studies minor recognizes the lasting importance of U.S.-Latin American relations. The overriding goal is to encourage students to learn more about Latin America by combining conceptual, area and language studies during their time at USC. The purpose of this 20-unit minor is to deepen students' knowledge of Latin America by offering courses from multiple disciplines within a context of close faculty guidance. The gateway requirement of one 4-unit course provides the student with options in both humanities and the social sciences, and the designated electives are similarly meant to allow students to blend these specialties.

For fulfillment of the requirements for the minor a student must choose four classes outside of his or her major department dedicated exclusively to the minor (which may be the same four classes). After the gateway course, these elective courses must be spread across at least two disciplines and/or departments.

Required Courses

One of the following 4-unit gateway introductory courses: REL 133, COLT 250, HIST 273, HIST 372, IR 364, IR 365, POSC 350

If the student has chosen a lower-division (100- or 200-level) course among the introductory choices, all area electives must be at the upper-division (300- or 400-) level.

Elective Requirements

Four courses (16 units) from the following list: AHIS 127, AHIS 128, AHIS 318, AHIS 319, AHIS 411, AMST 448, ANTH 425, COLT 250, ECON 340, GEOG 335, HIST 272, HIST 370, HIST 371, HIST 372, HIST 374, HIST 451, HIST 456, HIST 470, HIST 473, HIST 474, IR 364, IR 365, IR 408, IR 426, IR 454, IR 465, IR 466, PORT 250,

Dornsife College of Letters, Arts and Sciences

Spanish and Portuguese

Graduate Degrees

The Ph.D. in Linguistics (Hispanic Linguistics) is offered through the Linguistics Department. See here for degree requirements. The M.A. and Ph.D., Comparative Studies in Literature and Culture (Spanish and Latin American Studies) are offered through the Comparative Studies in Literature and Culture program. See here for degree requirements.

Certificate in Foreign Language Teaching

The Certificate in Foreign Language Teaching provides certification in the theory and practice of second or foreign language teaching for student language teachers concurrently enrolled in graduate degree programs in foreign languages or related graduate programs at USC; for graduates of such programs who are teaching languages; for external candidates concurrently enrolled in similar programs in accredited colleges or universities; or for graduates of such programs who are teaching languages. The certificate is meant to supplement graduate study in the literature or linguistics of foreign languages. It is also meant to supplement classroom teaching. Therefore all candidates for this certificate are required to have taught a second or foreign language for at least one academic year at USC or elsewhere. At USC, this requirement and the course work requirements can be fulfilled concurrently, but external candidates are required to show proof of such teaching experience as a condition of admission.

In addition to teaching, certificate candidates must complete a minimum of four courses (minimum of 12 units) in four areas of study — linguistics, language acquisition, language teaching methodology, and the teaching of literacy or the literature or culture of a second or foreign language.

Requirements for Completion

The program consists of a practicum and a minimum of four courses: one each in linguistics, language acquisition, language teaching methods, and the teaching of literacy, literature or culture.

Linguistics: (minimum of 3 units) LING 411x Linguistics and Education or, with permission of instructor, an appropriate course in the linguistics of a particular language

Language Acquisition: (minimum of 3 units) LING 527 Second Language Acquisition or an appropriate alternative course

Language Teaching Methods: (minimum of 3 units) MDA 593 Practicum in Teaching the Liberal Arts or EALC 562 Teaching of the East Asian Languages or SPAN 511 Techniques and Procedures of Teaching Spanish as a Second Language or an appropriate alternative course

Literacy/Literature/Culture: (minimum of 3 units) An appropriate course in teaching of the literature or culture of a particular language

Spanish and Portuguese

Courses of Instruction

SPANISH AND PORTUGUESE

SPANISH (SPAN)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

SPAN 020x Spanish for Reading Knowledge (0) Preparation for the ETS standardized examination, with readings related to the student's major area. Offered upon sufficient demand. Not available for degree credit. Graded CR/NC.

SPAN 120 Spanish I (4) For students with limited proficiency in Spanish. Practice in listening comprehension, oral communication, elementary reading and writing. *Prerequisite:* Spanish placement exam.

SPAN 150 Spanish II (4) Continuation of SPAN 120; increased emphasis on listening comprehension, oral communication, reading, and writing. *Prerequisite:* SPAN 120.

SPAN 220 Spanish III (4) Continuation of SPAN 150; intensive work in listening comprehension, oral communication, reading and writing, with emphasis on free expression; readings related to Hispanic culture and civilization. *Prerequisite:* SPAN 150.

SPAN 231x Spanish for Business Communication: The Job Search (2) Four-skills language and culture course. Culminating tasks executed in Spanish; professional dossier, simulated job search, formal face-to-face job interview, and telephone job interview. Not open to Spanish majors. Not available for major credit to Spanish majors. (Duplicates credit in SPAN 250.) *Prerequisite:* SPAN 220.

SPAN 232x Spanish for Business Communication: The Business (2) Four-skills language and culture course. Culminating tasks executed in Spanish; written company profiles and a critical analysis of an NGO presented orally to the class. Not open to Spanish majors. Not available for major credit to Spanish majors. (Duplicates credit in SPAN 250.) *Prerequisite:* SPAN 220.

SPAN 233x Spanish for Business Communication: The Case Study (2) Four-skills language and culture course. Culminating tasks executed in Spanish; case studies analyzed and presented in writing and orally. Not open to Spanish majors. Not available for major credit to Spanish majors. (Duplicates credit in SPAN 250.) *Prerequisite:* SPAN 220.

SPAN 240 Spanish IV (4, FaSp) Intensive review of Spanish grammar with emphasis on four skills. Audiovisual materials and readings related to Hispanic culture and civilization. *Prerequisite:* SPAN 220.

SPAN 245 Spanish Through Social Issues in Costa Rica (4, Sm) (Costa Rica Summer Program only). Intensive review of Spanish grammar with emphasis on four skills. Audiovisual materials, guest speakers, and readings related to the history and culture of Costa Rica. *Concurrent enrollment:* SPAN 220.

SPAN 250x Spanish for Business Communication (4) Four-skills language and culture course for intermediate-high Spanish students interested in Business/Communications. Prepares students to communicate in the Spanish-speaking commercial market in a linguistically sensitive manner. Not available for credit to Spanish majors and minors. *Prerequisite:* SPAN 240.

SPAN 260 Advanced Spanish: Arts and Sciences (4, FaSpSm) Development of students' oral and writing skills using literary and scientific materials; grammar review. (Duplicates credit in the former SPAN 266.) *Prerequisite:* SPAN 220.

SPAN 261 Advanced Spanish: Society and the Media (4, FaSpSm) Analysis of cultural issues in the Spanish-speaking world. Discussions, presentations, writing assignments, and grammar instruction designed to improve students' proficiency in Spanish. (Duplicates credit in the former SPAN 265.) *Prerequisite:* SPAN 220.

SPAN 270 Spanish for Native Speakers (4, FaSp) For speakers with an advanced level of oral proficiency, but no previous formal study of Spanish. Focus on grammar, spelling and punctuation, reading, and writing.

SPAN 280x Conversational Spanish (2, max 4, FaSp) Discussions of short films, cultural and literary texts and other activities designed to improve conversational skills. Not for credit for Spanish majors.
Prerequisite: SPAN 220.

SPAN 301 Introduction to Hispanic Literature and Film (4, FaSpSm) Introduction to critical reading and interpretation of poetry, narrative fiction, drama, and film from Spain and Latin America. *Prerequisite:* SPAN 260, SPAN 261.

SPAN 302 Survey of Film (4, FaSpSm) A survey of Spanish and Latin American cinema from the silent film era to the present, acquainting students with various critical and theoretical approaches to cinema studies.
Prerequisite: SPAN 260, SPAN 261; *recommended preparation:* SPAN 301.

SPAN 304 Survey of Fiction (4, FaSp) A survey of Spanish and Latin American fiction from the Middle Ages to the present, acquainting students with various critical and theoretical approaches to narrative. *Prerequisite:* SPAN 260 and SPAN 261.

SPAN 306 Survey of Drama (4, FaSp) A survey of Spanish and Latin American plays from the Middle Ages to the present, acquainting students with various critical and theoretical approaches to drama. (Duplicates credit in former SPAN 305.) *Prerequisite:* SPAN 260 and SPAN 261.

SPAN 308 Survey of Poetry (4, FaSp) A survey of Spanish and Latin American poetry from the Middle Ages to the present, acquainting students with various critical and theoretical approaches to verse. (Duplicates credit in former SPAN 305.) *Prerequisite:* SPAN 260 and SPAN 261.

SPAN 310 Structure of Spanish (4, FaSp) A systematic study of the structure of Spanish. Topics include fundamental aspects of the sound system; word classes; sentences and their meaning; linguistic change and variation; standard and colloquial usage. *Prerequisite:* SPAN 260 and SPAN 261.

SPAN 311 Advanced Spanish Through Contemporary Issues: Oral Emphasis (4, Sm) (Summer sessions abroad) Advanced Spanish with emphasis on grammar and oral communication. *Recommended preparation:* SPAN 260 or SPAN 261.

SPAN 315 Advanced Grammar and Translation (4, FaSp) Contrastive study of Spanish and English structures designed to explore the similarities and differences between the two languages and to familiarize students with translation techniques. Emphasis on a variety of text types with the aim of increasing linguistic and cultural appreciation of the Spanish language. *Prerequisite:* SPAN 260 and SPAN 261.

SPAN 316x Spanish for the Professions (4, max 8, FaSp) The language and culture of a particular area of study or profession, such as medicine and healthcare, political and social sciences, business and the law. Limited to 4 units for major or minor credit. *Prerequisite:* SPAN 260 and SPAN 261.

SPAN 320 Iberian and Latin American Cultures: Readings on Society (4, FaSp) Introduction to the study of Iberian and Latin American cultural patterns through readings on such topics as history, gender, ethnicity, and politics. (Duplicates credit in former SPAN 360 and former SPAN 370.) *Prerequisite:* SPAN 260 and SPAN 261.

SPAN 321 Iberian and Latin American Cultures: Readings on the Arts (4, FaSp) Introduction to the study of Iberian and Latin American cultural forms through readings on the visual arts, cinema, architecture and music. (Duplicates credit in former SPAN 360 and former SPAN 370.) *Prerequisite:* SPAN 260 and SPAN 261.

SPAN 341 Advanced Conversation and Culture (4) (Madrid Summer Program) Conversation based on study of Spanish art and architecture. Field trips.

SPAN 350 Cultural Cross-Currents of the Iberian Middle Ages (4, FaSp) Selected readings from 1040 to 1499 examining the rich cultural diversity of the Iberian Middle Ages in the symbiosis of Christian, Moslem and Jewish traditions. (Duplicates credit in former SPAN 377 and former SPAN 450.) *Recommended*

preparation: SPAN 304 or SPAN 306 or SPAN 308.

SPAN 352 The Transatlantic Golden Age: New Worlds Real and Imagined (4, FaSp) Selected readings from 1500 to 1700 exploring Renaissance and baroque visions of the classical and new worlds.

Recommended preparation: SPAN 304 or SPAN 306 or SPAN 308.

SPAN 372 Modern and Contemporary Latin American Fiction (4, FaSp) Study of major trends in Latin American fiction from the 1930s to the present with a focus on narrative experimentation. *Recommended*

preparation: SPAN 304 or SPAN 306 or SPAN 308.

SPAN 373 Modern and Postmodern Spanish Fiction (4, FaSp) An exploration of the literary and filmic narratives of contemporary Spain focusing on the major historical and cultural movements of the 20th century.

(Duplicates credit in former SPAN 378.) *Recommended preparation:* SPAN 304 or SPAN 306 or SPAN 308.

SPAN 375 Latin American Cultural and Literary Theory (4) (Enroll in COLT 375)

SPAN 380g Literature of Mexico (4) Principal writers and their works from Colonial times to the present. Non-majors may write assignments in English. *Recommended preparation:* advanced comprehension of oral and written Spanish.

SPAN 381 Narco-World (4, Sp) Study of the contemporary situation in Mexico through the lens of global terror, neoliberal economy, and postmodern aesthetics (film, literature, television, music). *Prerequisite:* SPAN 260 and SPAN 261.

SPAN 385 The Culture of Food in Hispanic Los Angeles (4, FaSp) Experiential learning and project-based course designed to familiarize students with the food culture of Hispanic Los Angeles. Students create Spanish language blogs about their experiences. *Prerequisite:* SPAN 260 and SPAN 261.

SPAN 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

SPAN 391 Introduction to Contemporary Spanish Literature (USC Madrid Center) (4) Readings in contemporary Spanish literature. Includes lectures by recognized Spanish writers and scholars.

SPAN 405 History of the Spanish and Portuguese Languages (4) Development of sounds, forms, words, meanings and structures from their origins to modern Spanish and Portuguese. *Prerequisite:* SPAN 310 or SPAN 315.

SPAN 412 Spanish Rhetoric and Style (4, FaSp) Close grammatical and rhetorical analysis of a variety of text types (general, literary, technical, journalistic) as the basis for practice in advanced written and oral expression as well as translation. *Prerequisite:* SPAN 310 or SPAN 315.

SPAN 413m Social and Geographic Varieties of Spanish (4, Fa) Historical, social, and cultural elements represented in the dialectal diversity of the Spanish language; fieldwork in bilingual communities in the United States. Majors prepare assignments in Spanish, non-majors in English. Conducted in Spanish and English. *Prerequisite:* reading knowledge of Spanish.

SPAN 420 Spanish Language Acquisition (4, FaSp) A study of the bilingual acquisition of Spanish and English by children, and of Spanish as a second language by adults; focus on linguistic, psychological and social factors. *Prerequisite:* SPAN 310 or SPAN 315.

SPAN 455 Picaresque Itineraries: Empire and Its Discontents (4, FaSp) A study of the rise of the picaresque novel in Spain and Latin America as a medium for social, political, and cultural criticism.

Recommended preparation: SPAN 304 or SPAN 306 or SPAN 308.

SPAN 460 Don Quijote: Text and Film (4, FaSpSm) A close reading of Cervantes' masterpiece and analysis of film adaptations of the novel. *Prerequisite:* SPAN 301.

SPAN 462 Literary Cartographies of Latin America and Spain, 1810–1898 (4, FaSp) Comparative

analysis of Spanish and Latin American literatures with a focus on trans-Atlantic relations and the rise of such movements as romanticism, realism, and modernismo. *Recommended preparation:* SPAN 304 or SPAN 306 or SPAN 308.

SPAN 464 Introduction to Contemporary Spanish Theatre (4) (Madrid Center only) Historical evolution of the contemporary Spanish theatre; readings of dramatic texts supported by attendance at live stage performances. *Recommended preparation:* SPAN 304 or SPAN 306 or SPAN 308.

SPAN 465 Cultural Perspectives of the Iberian Peninsula (4, Sm) (Madrid Summer Program) Study of cultural plurality in the Iberian Peninsula. *Recommended preparation:* SPAN 260 or SPAN 261.

SPAN 466 Argentina, Society and the Arts (4, Sm) Study of the arts in the cultural landscape of Argentina and in the context of developments in Europe, Latin America and the United States. *Recommended preparation:* SPAN 260 or SPAN 261.

SPAN 469 Immigration in Spain (4, Sm) Sociopolitical issues of immigration in Spain, including economic impact, legal evolution, history, geographic location, and culture. *Prerequisite:* SPAN 220; *recommended preparation:* SPAN 260 or SPAN 261.

SPAN 470 Literature and Media in Latin America (4) (Enroll in COLT 470)

SPAN 472 The Sixties in Latin America (4, Fa) Study of the explosive Latin American cultural formations of the sixties (literary “boom,” third cinema, protest song, theories of armed struggle). *Prerequisite:* SPAN 304 or SPAN 306 or SPAN 308.

SPAN 481 Literature and Popular Culture (4, FaSp) An examination of popular culture and literary genres with an emphasis on the evolving canons and identities of Latin America and Spain. *Recommended preparation:* SPAN 304 or SPAN 306 or SPAN 308.

SPAN 482 Literature and the City (4, FaSp) An examination of the literary representations of urban spaces and cultures within the context of Iberian, Latin American, and U.S. Latino societies. *Recommended preparation:* SPAN 304 or SPAN 306 or SPAN 308.

SPAN 483 Literature and Gender (4, FaSp) An examination of gender, sexuality, and power in Iberian and Latin American literatures and cultures. *Recommended preparation:* SPAN 304 or SPAN 306 or SPAN 308.

SPAN 484 Studies in Visual and Material Culture (4, FaSp) An examination of the role of visual and material culture in cultural and social context in the Hispanic world, focusing on a selected time period and geographical region. *Recommended preparation:* SPAN 260 and SPAN 261 if taken for Spanish major credit.

SPAN 490x Directed Research (1–8, max 12) Individual research and readings. Not available for graduate credit.

SPAN 495 Seminar for Majors and Minors (4) Two options: (1) Study of a major work or writer, a principal literary theme or movement; or (2) a selected topic in Spanish language and linguistics. *Recommended preparation:* two courses in the upper division in the same area as the seminar topic (e.g., language or literature).

SPAN 499 Special Topics (2–4, max 8)

SPAN 501 Cultural Narratives of Spain and Latin America (4) Theoretical and methodological approaches to cultural narratives in Spanish and Latin American literary and cultural studies.

SPAN 511 Techniques and Procedures of Teaching Spanish as a Second Language (3) Practical classroom application of language teaching methods; evaluation of available textbooks; critique of master classes.

SPAN 513 Spanish Morphology and Phonology (3, FaSp) A survey of research on the interaction between Spanish morphology and phonology in light of critical readings and discussion of selected studies as contributions to the general theory of grammar. (Duplicates credit in former SPAN 512.)

SPAN 514 Spanish Syntax (3, FaSp) A survey of Spanish syntax in the light of critical readings and discussion of selected studies and their comparative contribution to grammatical theory.

SPAN 515 Spanish Grammar in Discourse (3, FaSp) Semantic and pragmatic approaches to the analysis of the structure of Spanish sentences and discourse.

SPAN 516 Historical Aspects of Spanish and Portuguese (3, FaSp) Processes of language change in the development of the Spanish and Portuguese languages from their origin in spoken Latin to their modern stage.

SPAN 517 Spanish Applied Linguistics (3, FaSp) Modern theories of first and second language acquisition and their application to Spanish.

SPAN 518 Spanish Sociolinguistics (3, FaSp) Principles of sociolinguistics and dialectology: sociolinguistic patterns in the Hispanic languages.

SPAN 525 Medieval and Early Modern Spanish World (4, max 8) Study of literature and other cultural artifacts pertaining to the Middle Ages in Spain and the early modern world in both Spain and the Americas.

SPAN 529 The Transatlantic 19th Century (4, max 8) Study of authors, texts and literary and cultural currents in Spain and Latin America in the 19th century.

SPAN 539 20th and 21st Century Spanish Literature and Culture (4, max 8) Study of cultural currents, authors, literary texts, films and other media in Spain in the 20th and 21st centuries.

SPAN 545 20th and 21st Century Latin American Literature and Culture (4, max 8) Study of cultural currents, authors, literary texts, films and other media in Latin America in the 20th and 21st centuries.

SPAN 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SPAN 592 Practicum in Teaching Spanish (2) Approaches and techniques in the teaching of Spanish and/or Portuguese as a second language. Open only to Master and Doctoral students in Comparative Literature, Comparative Culture in Literature and Studies (Spanish and Latin American Studies), Linguistics (Hispanic Linguistics) and Spanish.

SPAN 593 Practicum in Teaching the Liberal Arts (2, FaSp) (Enroll in MDA 593)

SPAN 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

SPAN 596 Research Methods in Spanish Linguistics (3) Examination of various research methods as applied to the study of the Spanish language; mechanics of organizing, conducting and presenting research in Spanish linguistics.

SPAN 602 Seminar in Spanish and Latin American Critical Theory (4, max 8) Major developments in literary criticism in Spain and Latin America from the early modern period to the present.

SPAN 603 Seminar in the Cultural History of Spain and Latin America (4, max 8) Literary and cultural currents in Spain and Latin America, with varying focus on genres, periods, movements and problems.

SPAN 604 Seminar in Gender and Sexuality in Spain and Latin America (4, max 8) Construction and representation of gender and sexuality in Spanish and Latin American literature and culture.

SPAN 606 Seminar in Visual Culture in Spain and Latin America (4, max 8) Major currents in film and other media in Spain and Latin America.

SPAN 650 Topics in Spanish and Latin American Literature and Culture (4, max 8) Study of topics in Spanish and Latin American literature and culture across periods, genres and nations.

SPAN 652 Seminar on a Major Topic in Hispanic Linguistics (3, max 9, FaSp) Analysis of selected

topics of current interest as reflected primarily in the most recent literature.

SPAN 672 Seminar in Spanish Morphophonology (3, max 9, FaSp) Selected topics in Spanish morphology and phonology.

SPAN 674 Seminar on Spanish Syntax and Semantics (3, max 9, FaSp) Detailed analysis of topics in modern Spanish syntax and semantics.

SPAN 676 Seminar in Diachronic Aspects of the Hispanic Languages (3, max 9, FaSp) In-depth analysis of a particular topic in the historical development of the Hispanic languages.

SPAN 677 Seminar in Spanish Applied Linguistics (3, FaSp) Critical study and analysis of major issues related to the teaching and learning of Spanish as a first or a second language.

SPAN 678 Seminar in Hispanic Sociolinguistics (3, max 9, FaSp) Selected topics in Hispanic sociolinguistics: social and geographic language varieties, language contact, discourse analysis, synchronic variation and processes of change in Spanish.

SPAN 700 Colloquium in Hispanic Literature and Linguistics (1, max 3) Discussion and presentation of papers on a variety of topics in the areas of Hispanic language and literature. Graded CR/NC. *Prerequisite:* any 600 level Spanish seminar.

SPAN 790 Directed Research (1–12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SPAN 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

PORTUGUESE (PORT)

PORT 120 Portuguese I (4, FaSp) For students with no proficiency in Portuguese. Practice in listening comprehension, oral communication, elementary reading and writing.

PORT 150 Portuguese II (4, FaSp) For students with some language proficiency in Portuguese; increased emphasis on listening, comprehension, oral communication, reading, and writing. Students will be required to take a Portuguese placement exam in the Spanish and Portuguese Department. *Prerequisite:* PORT 120.

PORT 220 Portuguese III (4, FaSp) Intensive work in listening comprehension, oral communication, reading and writing, with emphasis on free expression; readings related to Portuguese culture and civilization. *Prerequisite:* PORT 150.

PORT 240 Portuguese IV (4) Four-skills course with review of grammar. Writing and reading intensive. Authentic materials related to Lusobrazilian culture and civilization. *Prerequisite:* PORT 220.

PORT 250g Cultures of Brazil and Lusophone Africa (4, FaSp) Comparative study of Brazil in the context of the Lusophone (Portuguese-speaking) world, especially Portugal's former colonies in Africa. Materials drawn from literature, visual culture, music and cultural theory.

PORT 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

PORT 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Lecturers: Yao-Yi Chiang, Ph.D.; Su Jin Lee, Ph.D.; Katsuhiko Oda, Ph.D.; Tarek Rashed, Ph.D.; Robert O. Vos, Ph.D.

**Recipient of university-wide or college teaching award.*

The programs and courses affiliated with the Spatial Sciences Institute explore the various ways in which space is used to acquire, represent, organize, analyze, model and visualize information. They seek to engage students enrolled in a range of academic programs in the natural and social sciences, the humanities and the professional schools.

The Bachelor of Science in GeoDesign is an interdisciplinary major offered by the Dornsife College of Letters, Arts and Sciences, the USC School of Architecture and the USC Price School of Public Policy. This degree prepares students for professional careers and/or graduate study.

The undergraduate minor in spatial studies explores how maps and related geospatial techniques may be used to describe, explore and interpret specific places and the natural and human processes.

The M.S. in Geographic Information Science and Technology provides state-of-the-art training in the core geographic information technologies (GIS, GPS and remote sensing, among others) and the underlying scientific principles and concepts that guide their design and use. This is an online program and may be taken by undergraduate students majoring in other disciplines as a progressive master's degree.

The Graduate Certificate in Geographic Information Science and Technology incorporates the same online core courses and electives as the master's degree and may be taken by master's and doctoral students majoring in other disciplines.

Undergraduate Program

Bachelor of Science in GeoDesign

The Bachelor of Science in GeoDesign is an interdisciplinary major offered by the Dornsife College of Letters, Arts and Sciences, the USC School of Architecture, and the USC Price School of Public Policy. This degree prepares students for professional careers and/or graduate study by engaging them in the acquisition, representation, analysis, modeling and visualization of spatial information set in the context of the built environment and policy. The underlying spatial principles, methods and tools can be used to support sustainable planning, facility and infrastructure management, the design of livable and healthy communities, and a series of regional planning applications to address pollution, water and energy needs, and the impact of population growth on the environment. The major electives provide students with opportunities to explore one or more facets of the built environment and a series of complementary analytical and visualization tools in more detail. Finally, the major is structured to provide students with sufficient elective credits to explore minors or other programs at USC so they can broaden their education to better prepare themselves for the next stage of their lives.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core.

Major Requirements

A minimum grade of C, 2.0 (A = 4.0) must be earned in each of the core courses and the capstone course. In addition, a minimum grade point average of C (2.0) or higher must be achieved in the major to earn the geodesign degree. No more than 16 units of core courses may be taken prior to the successful completion of the geodesign pre-major requirements.

Pre-major Requirements

Both pre-major requirements must be taken for a letter grade and a minimum grade of C, 2.0 (A = 4.0), must be earned in each of the pre-major courses.

PRE-MAJOR COURSES (8 UNITS)		UNITS
ECON 203	Principles of Microeconomics	4
MATH 116	Mathematics for the Social Sciences	4
CORE COURSES + CAPSTONE COURSE (44 UNITS)		UNITS
ARCH 203	Visualizing and Experiencing the Built Environment	4
ARCH 303	Principles of Spatial Design I	4
ARCH 403	Principles of Spatial Design II	4
PPD 227	Urban Planning and Development	4
PPD 417	History of Planning and Development	4
PPD 425	Designing Livable Communities	4
SOCI 314	Analyzing Social Statistics	4
SSCI 301L	Maps and Spatial Reasoning	4
SSCI 382L	Principles of Geographic Information Science	4
SSCI 412L	GeoDesign Practicum (capstone course)	4
SSCI 483L	Spatial Science Practicum	4

Capstone Course

All students will take four units of a capstone experience during their senior year. This may be fulfilled by taking SSCI 412L GeoDesign Practicum (4 units) which may be offered by any of the three units cross-listed (SSCI,

ARCH, PPD) and will require students to use their knowledge and skills on a real project with a real client.

Major Electives (24 Units)

A suite of courses that further the development of practical, theoretical, and field knowledge and skills, including computer graphics, drawing, policy analysis, public finance, and statistics. Choose additional electives from the two lists equal to at least six courses (24 units) in all. At least two courses must come from Group A and two courses from Group B.

GROUP A: BUILT ENVIRONMENT		UNITS
ARCH 361L	Ecological Factors in Design	3
ARCH 432	People, Places and Culture: Architecture of the Public Realm	4
HIST 347	Urbanization in the American Experience	4
POSC 363	Cities and Regions in World Politics	4
PPD 410	Comparative Urban Development	4
PPD 420	Environmental Impact Assessment	4
PPD 461	Sustainable Communities, Policy and Planning	4
SOCI 331	Cities	4

GROUP B: DESIGN, ANALYSIS AND COMPUTATION		UNITS
ANTH 481	GIS for Archaeologists	4
ARCH 307	Digital Tools for Architecture	3
ARCH 370	Architectural Studies — Expanding the Field	2
FADN 102	Design Fundamentals	4
HIST 393g	Quantitative Historical Analysis	4
PPD 306	Visual Methods in Policy, Management, Planning and Development	4
PPD 427L	Geographic Information Systems and Planning Applications	4
SOCI 365	Visual Sociology of the City and Its Residents	4

Honors

Candidates for the B.S. in GeoDesign can receive an honors degree by meeting these requirements: a 3.7 GPA in department courses at the time of graduation; completion of an honors research project or thesis under the guidance of a faculty member (SSCI 412L). Admission to the program is granted by the departmental undergraduate adviser in the semester preceding enrollment in SSCI 412L; students should have a 3.7 GPA in the major at this time.

Minor in Spatial Studies

The spatial studies minor requires a minimum of 20 units, consisting of one lower-division elective, three required courses and an upper-division elective. The minor offers students an opportunity to examine some of the major challenges of the 21st century (climate change, human health and sustainability, urbanization and cultural homogenization, among others) through a spatial lens.

REQUIRED COURSES (12 UNITS)		UNITS
SSCI 301L	Maps and Spatial Reasoning	4
SSCI 382L	Principles of Geographic Information Science	4
SSCI 483L	Spatial Sciences Practicum	4

LOWER-DIVISION ELECTIVES (4 UNITS)		UNITS
ANTH 201	Principles of Human Organization	4
ANTH 202	Archaeology: Our Human Past	4

ARCH 105L	Fundamentals of Design Communication	2
ARCH 114	Architecture: Culture and Community	2
ARCH 220	The Architect's Sketchbook	2
BISC 102Lx	Humans and Their Environment	4
BISC 140	Human Impact on the Ocean Planet	4
CLAS 212L	Archaeology: Interpreting the Past	4
GEOL 108L	Crises of a Planet	4
GEOL 150L	Climate Change	4
HIST 240	The History of California	4
POSC 265	Environmental Challenges	4
PPD 245	The Urban Context for Policy and Planning	4
SOCI 100	Los Angeles and the American Dream	4
SOCI 200	Introduction to Sociology	4
SSCI 265L	The Water Planet	4

UPPER-DIVISION ELECTIVES (4 UNITS)		UNITS
ANTH 481L	GIS for Archaeologists	4
ARCH 432	People Places Culture: Architecture of the Public Realm	4
JOUR 422	Visual Journalism	4
PPD 306	Visual Methods in Policy, Management, Planning and Development	4
PPD 427L	Geographic Information Systems and Planning Applications	4
SOCI 314	Analyzing Social Statistics	4
SOCI 365	Visual Sociology of the City and Its Residents	4
SSCI 397	Spatial Sciences Internship	2-4

Graduate Degrees

Master of Science in Geographic Information Science and Technology

AHF B55B

(213) 740-8298

Email: [✉ watsonke@usc.edu](mailto:watsonke@usc.edu)

Director: John P. Wilson, Ph.D.

The online M.S. in Geographic Information Science and Technology requires 28 units of graduate work and provides state-of-the-art training in the core geographic information technologies (geographic information systems, global positioning systems and remote sensing, among others) and the underlying scientific principles and concepts that guide their design and use. The individual courses incorporate multiple curricular pathways tailored to the increasingly diverse backgrounds, occupations and applications that rely on geospatial data, analysis and visualization.

Course Requirements

Twenty-eight units of graduate work are required.

CORE COURSES (16 UNITS)		UNITS
SSCI 581	Concepts for Spatial Thinking	4
SSCI 582	Spatial Databases	4
SSCI 587	Spatial Data Acquisition	4
SSCI 594ab	Master's Thesis	2-2

ELECTIVES (12 UNITS)		UNITS
SSCI 583	Spatial Analysis	4
SSCI 584	Spatial Modeling	4
SSCI 585	Geospatial Technology Project Management	4
SSCI 586	GIS Programming and Customization	4
SSCI 588	Remote Sensing for GIS	4
SSCI 589	Cartography and Visualization	4
SSCI 591	Web GIS	4
SSCI 592	Mobile GIS	4
SSCI 593	Geospatial Data Integration	4

All electives are chosen in direct consultation with the student's academic adviser based on background, academic interests, etc.

The courses in this program are open to students living and/or working anywhere, including students at USC's Los Angeles, Orange County, Sacramento and Washington, D.C. centers. The master's program can be completed in two to three years as long as students take one or two courses in each of the fall, spring and summer semesters. Continuous enrollment in the fall, spring and summer terms is required in this program, including SSCI 594abz summer registration.

Admission Requirements

Four groups of students are served by this program:

1. New students who wish to apply directly to the geographic information science and technology master's program.
2. Students currently enrolled in the geographic information science and technology graduate certificate program since this certificate program may serve as a possible "stepping stone" toward the master's program.
3. Students currently matriculated in a USC master's or doctoral degree program.
4. USC undergraduate students who want to stay for a fifth year and earn both bachelor's and master's degrees.

Candidates for admission among the first two groups of students must have: (1) a B.A. or B.S. degree or its international equivalent; (2) a minimum 3.0 GPA (A = 4.0). All course work taken at the undergraduate level is used to calculate the GPA. Exceptions will be made in cases of very high GRE scores or some other compelling evidence of potential to excel in graduate studies (e.g., outstanding letters of recommendation). Preference will be given to candidates with significant professional experience working with geographic information systems and related geospatial technologies.

Application Procedures

Applicants are required to submit the following documents: (1) completed application for admission, which can be found online at usc.edu/admission/graduate; (2) statement of purpose; (3) a writing sample; (4) official transcripts from all schools previously attended; (5) two letters of recommendation; and (6) results of the GRE General Test. International students must submit TOEFL scores with a minimum score of 100 on the Internet-based examination, or an IELTS score of 7.

The statement of purpose should be uploaded into the online application. This statement should: (1) describe the student's motivation, field of interest and career goals; and (2) identify potential projects that the student might pursue for the master's thesis project.

The master's program utilizes rolling admissions and enrollment based on the standard academic calendar. This means that students may start the program in either the fall, spring or summer semesters.

Those interested in learning more about this program should contact Kate Kelsey, University of Southern California, 3616 Trousdale Parkway, AHF B55B, Los Angeles, CA 90089-0374.

Graduate Certificate in Geographic Information Science and Technology

The certificate program can be completed in one to two years as long as students take one or two courses in each of the fall, spring and summer semesters. The graduate certificate program can serve as a possible "stepping stone" toward the geographic information science and technology master's degree program. Continuous enrollment in the fall, spring and summer terms is required in this program.

Graduate Certificate in Geospatial Intelligence

AHF B55B

(213) 740-8298

Email: [✉ watsonke@usc.edu](mailto:watsonke@usc.edu)

Director: John P. Wilson, Ph.D.

The online Graduate Certificate in Geospatial Intelligence requires 16 units of graduate work and provides state-of-the-art training in some of the core geospatial technologies and the underlying scientific concepts and analytical methods that guide their design and use to solve a variety of human security problems and challenges.

Course Requirements

Sixteen units of graduate work are required.

CORE COURSES (8 UNITS)		UNITS
SSCI 579	Geospatial Intelligence Tradecraft	4
SSCI 581	Concepts for Spatial Thinking	4

ELECTIVES (8 UNITS)		UNITS
SSCI 583	Spatial Analysis	4
SSCI 584	Spatial Modeling	4
SSCI 588	Remote Sensing for GIS	4
SSCI 589	Cartography and Visualization	4

The courses in this program are open to students living and/or working anywhere, including students at USC's Los Angeles, Orange County, Sacramento and Washington, D.C. centers. The certificate program can be completed in as few as two and no more than four semesters depending on the numbers of courses taken in each of the fall, spring and summer semesters. The graduate certificate program can serve as a possible "stepping stone" toward the geographic information science and technology master's degree program. Continuous enrollment, including summer, is required.

Graduate Certificate in Geospatial Leadership

AHF B55B

(213) 740-8298

Email: [✉ watsonke@usc.edu](mailto:watsonke@usc.edu)

Director: John P. Wilson, Ph.D.

The online Graduate Certificate in Geospatial Leadership requires 16 units of graduate work. The capstone course focuses on the cultivation of leadership skills and practices, and the electives afford students the opportunity to strengthen their knowledge of selected geospatial technologies, the underlying scientific concepts and analytical methods, and the ways they can be used in decision-making.

Course Requirements

Sixteen units of graduate work are required.

CORE COURSES (4 UNITS)		UNITS
SSCI 578	The Practice of Geospatial Leadership	4

ELECTIVES (12 UNITS)		UNITS
SSCI 579	Geospatial Intelligence Tradecraft	4
SSCI 583	Spatial Analysis	4
SSCI 584	Spatial Modeling	4
SSCI 585	Geospatial Technology Project Management	4
SSCI 586	GIS Programming and Customization	4
SSCI 588	Remote Sensing for GIS	4
SSCI 589	Cartography and Visualization	4
SSCI 591	Web GIS	4
SSCI 592	Mobile GIS	4
SSCI 593	Geospatial Data Integration	4

The courses in this program are open to students living and/or working anywhere, including students at USC's Los Angeles, Orange County, Sacramento and Washington, D.C. centers. The certificate program can be completed in as few as two and no more than four semesters depending on the numbers of courses taken in each of the fall, spring and summer semesters. Continuous enrollment, including summer, is required.

Admission Requirements

Two groups of students are served by this program:

1. New students who wish to apply directly to one of the spatial sciences graduate certificate program.

2. Students currently matriculated in a USC master's or doctoral degree program (other than the M.S. in geographic information science and technology).

Candidates for admission among the first group of students must have: (1) a B.A. or B.S. degree or its international equivalent; (2) a minimum 3.0 GPA (A = 4.0) undergraduate GPA. All course work taken at the undergraduate level is used to calculate the GPA. Exceptions will be made in cases of very high GRE scores or some other compelling evidence of potential to excel in graduate studies (e.g., outstanding letters of recommendation). Preference will be given to candidates with significant professional experience working with geographic information systems and related geospatial technologies.

Application Procedures

Applicants are required to submit the following documents: (1) completed application for admission, which can be found online at usc.edu/admission/graduate; (2) statement of purpose; (3) official transcripts from all schools previously attended. International students must submit TOEFL scores with a minimum score of 100 on the Internet-based examination, or an IELTS score of 7.

The graduate certificate program utilizes rolling admissions and enrollment based on the standard academic calendar. This means that students may start the program in either the fall, spring or summer semesters.

Those interested in learning more about this program should contact Kate Kelsey, University of Southern California, 3616 Trousdale Parkway, AHF B55B, Los Angeles, CA 90089-0374.

Graduate Certificate in Spatial Analytics

AHF B56C

(213) 740-8298

Email:  watsonke@usc.edu

Director: John P. Wilson, Ph.D.

The Graduate Certificate in Spatial Analytics requires 12 units of graduate work and provides doctoral students with an opportunity to learn about the fundamental guiding principles (i.e. spatial cognition, positioning, spatial representations and data models, map projections and datums, modifiable unit area problems, remote sensing, spatial analysis and modeling techniques and cartographic principles) and a series of rapidly evolving geospatial technologies that take advantage of the Cloud and the Web as well as advances in analytical techniques, modeling tools and online data sources.

Course Requirements

Twelve units of graduate work are required.

COURSES (12 UNITS)		UNITS
SSCI 680	Advanced Spatial Computing	4
SSCI 683	Principles of Spatial Data Analysis	4
SSCI 684	Spatial Modeling with GIS	4

The courses in this program are open to students enrolled in any one of USC's doctoral programs. The three courses that make up this graduate certificate provide a vibrant and evolving series of learning opportunities for doctoral students wishing to look at their own disciplines and potential research topics through a spatial lens.

Sustainable Cities Graduate Certificate

This multidisciplinary certificate program provides USC master's and doctoral students with a specialization in urban sustainability problems resulting from the growth of cities caused by natural population increase and massive rural-to-urban population flows. See the USC Price School of Public Policy.

Courses of Instruction

SPATIAL SCIENCES INSTITUTE (SSCI)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

SSCI 101 Workshop in Spatial Analysis (2, FaSp) Introduction to geospatial technologies and data as creative tools for supplementing traditional forms of academic work across the sciences, social sciences, and the humanities.

SSCI 135Lg Numbers and Maps (4, FaSpSm) The role of formal reasoning, abstract representation and empirical analysis in building maps for sharing knowledge across the physical, life and social sciences and humanities.

SSCI 165Lgp Sustainability Science in the City (4, FaSp) The influence of sustainability science on public policy and vice versa in the context of social/ethical theories, analytical methods and solutions.

SSCI 265Lg The Water Planet (4, FaSpSm) An exploration of earth's water, ranging from water properties, chemistry, and pollution, to groundwater dynamics, watershed processes, and oceanic-atmospheric circulation. Implications for past and future societies. Lecture and laboratory.

SSCI 301L Maps and Spatial Reasoning (4, Fa) Role of maps and spatial reasoning in the production and use of geographic information for representing and analyzing human and environmental activities and events.

SSCI 350 International GeoDesign (4, max 12, FaSpSm) Intensive living-learning research and field experience in Los Angeles and abroad; application of GeoDesign strategies to local societal challenges.

SSCI 382L Principles of Geographic Information Science (4, Sp) The various ways in which geography can be used to acquire, represent, organize, analyze, model and visualize information. Laboratories are organized around ArcGIS software suite. *Recommended preparation:* SSCI 301L.

SSCI 397 Spatial Sciences Internship (2-4, FaSpSm) Intensive experience in local public agency, private firm, or nonprofit agency engaged in applied geospatial analysis, modeling and mapping work. Graded CR/NC.

SSCI 412L GeoDesign Practicum (4, FaSp) Application of design concepts, planning protocols and spatial analysis skills to a complex planning or design problem sponsored by a local public, private or not-for-profit client in a studio setting. Open only to seniors in GeoDesign major. *Prerequisite:* ARCH 403, PPD 425, SOCI 314, SSCI 483L.

SSCI 483L Spatial Science Practicum (4, Sp) Application of GIS concepts and skills to a local opportunity or problem in a studio setting. May involve site visits, community contact, and presentations. *Prerequisite:* SSCI 382L.

SSCI 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit. Open only to juniors and seniors.

SSCI 499 Special Topics (2-4, max 8) Intensive study of selected topics or regions.

SSCI 578 The Practice of Geospatial Leadership (4, Sm) The geospatial value proposition and the qualities and skills leaders will need to help their geospatial information management groups and organizations achieve success. *Recommended preparation:* SSCI 581.

SSCI 579 Geospatial Intelligence Tradecraft (4, FaSpSm) Typical geospatial intelligence tasks and their use in military operations, national and homeland security, international relief work and disaster management. *Recommended preparation:* SSCI 581.

SSCI 580 Spatial Computing (4, FaSp) Theoretical foundations, methods, techniques, and software systems for spatial computing, including geospatial semantic web and linked data, spatial data mining, geocoding, and document linking. *Recommended preparation:* SSCI 581 or INF 510.

SSCI 581 Concepts for Spatial Thinking (4, FaSpSm) The unique characteristics and importance of spatial information as they relate to the evolving science, technology, and applications of Geographic Information

Systems. (Duplicates credit in the former GEOG 581.)

SSCI 582 Spatial Databases (4, FaSpSm) Design, implementation, and interrogation of relational, object-oriented and other types of geospatial databases. (Duplicates credit in the former GEOG 582.) *Recommended preparation:* SSCI 581.

SSCI 583 Spatial Analysis (4, FaSp) Provides the knowledge and skills necessary to investigate the spatial patterns which result from social and physical processes operating at or near the Earth's surface. *Recommended preparation:* SSCI 581. (Duplicates credit in former GEOG 583.)

SSCI 584 Spatial Modeling (4, SpSm) The use of spatial models to describe social and environmental processes, patterns and systems at multiple spatial and temporal scales. *Recommended preparation:* SSCI 583.

SSCI 585 Geospatial Technology Project Management (4, FaSm) Concepts, principles, and use of project management tools and the people issues encountered running GIS projects. (Duplicates credit in the former GEOG 585.) *Recommended preparation:* SSCI 581.

SSCI 586 GIS Programming and Customization (4, FaSp) Design, coding, and implementation of GIS-based software and models using the Python programming language. *Recommended preparation:* SSCI 582. (Duplicates credit in former GEOG 586.)

SSCI 587 Spatial Data Acquisition (4, FaSpSm) Role of global positioning systems, maps, geocoding, and other kinds of sensors as geospatial data sources. Includes field data acquisition excursion on Catalina Island. *Recommended preparation:* SSCI 581. (Duplicates credit in former GEOG 587.)

SSCI 588 Remote Sensing for GIS (4, FaSp) Principles of remote sensing, satellite systems, and role of remote sensing data in GIS applications. (Duplicates credit in the former GEOG 588.) *Recommended preparation:* SSCI 581.

SSCI 589 Cartography and Visualization (4, FaSm) Principles of visual perception, spatial cognition and cartographic design and their contributions to the maps, animations, virtual reality and multimedia displays produced with modern GIS. (Duplicates credit in the former GEOG 589.) *Recommended preparation:* SSCI 581.

SSCI 590 Directed Research (1–12, FaSpSm) Research leading to the master's degree in cognate fields. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

SSCI 591 Web GIS (4, FaSm) Design and implementation of locally served and cloud-based geospatial web applications. Construction of web maps, mashups, and Volunteered Geographic Information interfaces. (Duplicates credit in the former GEOG 591.) *Recommended preparation:* SSCI 581.

SSCI 592 Mobile GIS (4, SpSm) Design, coding, and implementation of mobile GIS applications using the Java and Javascript object-oriented programming languages. *Recommended preparation:* SSCI 591.

SSCI 593 Geospatial Data Integration (4, SpSm) Role of crowdsourcing, volunteered geographic information, spatial data infrastructures, and web portals in helping with the collection, storage, curation, and distribution of geospatial data assets. *Recommended preparation:* SSCI 587.

SSCI 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded CR/NC.

SSCI 596 Internship in Spatial Sciences (1, max 4, FaSpSm) Part-time or full-time practical work experience in the student's field of study at an off-campus facility under faculty direction. Graded CR/NC.

SSCI 599 Special Topics (2–4, max 8) Seminar in selected topics in the spatial sciences.

SSCI 680 Advanced Spatial Computing (4, FaSpSm) The role of spatial computing in understanding the world, in knowing and communicating our relationships to specific places, and for navigating through those places.

SSCI 683 Principles of Spatial Data Analysis (4, Sp) The theoretical foundations and techniques of spatial

analysis and the ways in which they have been used to identify spatial processes and patterns. *Recommended preparation:* Enrollment in a USC PhD Program.

SSCI 684 Spatial Modeling with GIS (4, Sp) An introduction to spatial models identifying the key issues influencing the success of these models in simulating key social and environmental processes and health exposures.

SSCI 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of Dissertation. Open only to doctoral students in Population, Health, and Place major. Graded: IP/CR/NC.

Professors (Teaching): Diana Blaine, Ph.D.; Geoffrey Middlebrook, Ph.D.

Associate Professors (Teaching): Norah Ashe, Ph.D.; Stephanie Bower, Ph.D.; Andrew De Silva, MPW; Kevin Egan, Ph.D.; William Feuer, Ph.D.; Phyllis Franzek, Ph.D.; Nathalie Joseph, Ph.D.; Stephen Mack, Ph.D.; Matthew Manson, Ph.D.; Mark Marino, Ph.D.; Indra Mukhopadhyay, Ph.D.; John Murray, Ed.D.; Erika Nanes, Ph.D.; Eric Rawson, Ph.D.; Sandra Ross, M.A.; Scott Smith, Ph.D.; David Tomkins, Ph.D.; Robert Waller Jr., MPW; William Wyatt, MPW

Assistant Professors (Teaching): Michael Bunn, Ph.D.; Jessica Wells Cantiello, Ph.D.; LauraAnne Carroll-Adler, Ph.D.; Jeffrey Chisum, Ph.D.; James Condon VII, Ph.D.; Jay Fisher, MPW; Farida Habeeb, Ph.D.; Steve Posner, MPW; Shefali Rajamannar, Ph.D.; Deborah Sims, Ph.D.; Ellen Wayland-Smith, Ph.D.

Lecturers: Jennifer Sopchockchai Bankard, Ph.D.; James Clements, Ph.D.; Carlos Delgado, Ph.D.; Elizabeth Durst, Ph.D.; Antonio Elefano, J.D.; William Gorski, Ph.D.; Amanda Hobmeier, Ph.D.; Ashley Karlin, Ph.D.; Rory Lukins, Ph.D.; Philip McNiff, MPW; Sarah Mesel, Ph.D.; Amy Meyerson, MPW; Cory Nelson, Ph.D.; Daniel Pecchenino, Ph.D.; DeAnna Rivera, J.D.; Atia, Sattar, Ph.D.; Brandon Som; John James Strong, MPW

Writing Program courses are designed to help students develop practices of reading, writing and critical reasoning that are necessary for success in academic and professional discourse. Writing Program pedagogy emphasizes small classes and frequent conferences in order to provide the highly individualized instruction and careful feedback necessary to extend the writing process and enhance the rhetorical judgment of each student. To meet the university's writing requirement, students must complete WRIT 150 (or its equivalent) and an advanced writing course, WRIT 340.

Lower-Division Requirement

WRIT 150 Writing and Critical Reasoning – Thematic Approaches focuses on the rhetorical principles and techniques necessary for successful college-level writing. Special attention is paid to critical thinking and reading, sentence-level fluency, research techniques, and the elements of academic argument and reasoning. WRIT 150 will not satisfy the lower-division writing requirement if taken on a Pass/No Pass basis.

Advanced Writing Requirement

All students at USC, except those who satisfy their general education requirements through the Thematic Option Program, must complete WRIT 340 Advanced Writing, an upper-division course designed to help students write

on topics related to their disciplinary or professional interests. Students usually enroll in WRIT 340 in their junior year, and may not take the course earlier than their sophomore year. Different schools within the university offer sections of this course. Students should consult their major departments to determine which version of WRIT 340 best complements their program of study. WRIT 340 will not satisfy the university's advanced writing requirement if taken on a Pass/No Pass basis.

All classes that meet the university's advanced writing requirement teach students to write clear, grammatical, well-structured prose; to discover and convey complex ideas critically; and to appreciate the nuances of effective argumentation. The principal aim of the requirement is to develop a student's capacity to formulate thoughtful and compelling writing for specific academic, professional and public audiences.

Preparatory Course Work

Some students are better served by taking a preparatory course before they enroll in WRIT 150. Entering freshmen who score below a specified level on the verbal portion of the SAT take the University Writing Examination. Based on the results of this examination, certain students enroll in WRIT 120 Introduction to College Writing or WRIT 121 Introduction to College Writing in a Second Language during their first semester at USC.

International students take the University Writing Examination after having completed any course work required by the American Language Institute.

Transfer Credit

Students may complete the lower-division requirement by completing an equivalent second-semester composition course that is taken for a letter grade option (not Pass/No Pass) at another institution after high school graduation and prior to enrolling at USC. Equivalent transfer credit is determined by the university's articulation officer. The advanced writing requirement must be completed at USC.

Time Limits

Students should complete the lower-division writing course requirement by the end of their first year at USC and must complete it before they enroll in their sixty-fifth unit. Transfer students who have not completed the lower-division requirement prior to entering USC should enroll in WRIT 150 during their first semester at USC, and must enroll in WRIT 150 no later than their nineteenth unit (second semester) at USC.

Courses of Instruction

WRITING (WRIT)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

WRIT 095x Writing Tutorial (1, FaSpSm) Individualized instruction in writing to support instruction in WRIT 130 or WRIT 150. Graded CR/NC. Not available for degree credit. *Concurrent enrollment:* WRIT 130 or WRIT 150.

WRIT 120 Introduction to College Writing (4, FaSpSm) Intensive instruction and practice in the writing process. Focuses upon the formal conventions and conceptual expectations of college writing, with emphasis upon the grammatical, stylistic, and rhetorical techniques required in successful writing. Graded CR/NC. Limited to and required of students who score below specified level on the USC Writing Examination.

WRIT 121 Introduction to College Writing in a Second Language (4, FaSp) Intensive instruction and practice in the writing process for non-native speakers of English. Focuses on the formal and conceptual conventions of college writing, with emphasis upon the grammatical, stylistic, and rhetorical techniques required in successful writing. Graded CR/NC. Limited to and required of students who score below specified level on the USC Writing Examination.

WRIT 130 Analytical Writing (4, Sp) Focuses on analytical and argumentative writing skills requisite to

academic and professional writing. Emphasizes logical analysis of texts and other data, effective use of evidence, ethical argumentation, and stylistic and grammatical fluency. Enrollment limited to specified groups of students. Students must achieve a satisfactory score on the verbal portion of the SAT, the USC Writing Examination, or credit for WRIT 120 or WRIT 121 before enrolling in WRIT 130.

WRIT 133 College Writing for International Students (4) College writing for International Students, emphasizing the expectations of academic discourse in U.S. higher education while drawing upon a context informed by cross-cultural perspectives. *Recommended preparation:* International Academy course work.

WRIT 150 Writing and Critical Reasoning—Thematic Approaches (4, FaSpSm) Academic writing, emphasizing analysis and argumentation, rhetorical judgment, critical reasoning, creative insight, the careful use of evidence, ethical perspectives, logical organization, stylistic and grammatical fluency. (Duplicates credit in WRIT 130 and former WRIT 140.)

WRIT 340 Advanced Writing (3-4, FaSpSm) Instruction in writing for various audiences on topics related to a student's professional or disciplinary interests, with some emphasis on issues of broad public concern. *Prerequisite:* WRIT 130 or WRIT 150.

WRIT 440 Writing in Practical Contexts (4, FaSpSm) Advanced training in analytical and argumentative writing for particular purposes, in professional and practical contexts. *Prerequisite:* CORE 112 or WRIT 340.

WRIT 501ab Theory and Practice in Teaching Expository Writing (1-1, Fa) Pedagogical application of rhetorical and linguistic theory to teaching university-level expository writing. Accompanies supervised teaching. Limited to assistant lecturers and teaching assistants. Graded CR/NC.

Thematic Option

College Academic Services Building 200

(213) 740-2961

(800) 872-2961

Email:  thematicoption@dornsife.usc.edu

dornsife.usc.edu/thematic-option

Director: Penelope Von Helmolt, Ph.D.

Lecturer: Trisha Tucker, Ph.D.

Thematic Option, the university's general education core honors program, is an alternative to regular core general education requirements. The program is interdisciplinary and provides a strong intellectual community.

The program teaches students to formulate ethical questions, to analyze and understand the reasoning behind views that differ from their own, to recognize the roles that historical, political and social forces play in matters of personal choice, and to express their views coherently in writing. Thematic Option can be arranged to fit any major.

To maintain small classes and allow for extensive discussion, Thematic Option is limited to 200 students each year. Students must be highly motivated, with a record of academic achievement. The average Thematic Option student has cumulative SAT scores above 2200 and an "A" high school GPA. The program is rigorous and requires extensive reading and writing.

Program Requirements

The Thematic Option honors curriculum consists of four interdisciplinary core classes taught around distinct themes: CORE 101 Symbols and Conceptual Systems; CORE 102 Culture and Values; CORE 103 The Process of Change in Science; and CORE 104 Change and the Future.

CORE 111 Writing Seminar I and CORE 112 Writing Seminar II make up the eight units of writing to meet the university requirement. The classes are accompanied by individual, bi-weekly tutorials. CORE 111, which requires concurrent enrollment with an affiliated CORE 102, focuses on critical thinking and analysis, focusing on academic argument and reasoning through close reading of primary texts. CORE 112 teaches students to convey complex ideas and to advance sophistication of essay structure, grounded argument, and to identify and address specific audiences persuasively in academic discourse.

The core Thematic Option curriculum is supplemented by four additional courses taken from the General Education Program: one in Quantitative Reasoning, one in The Arts, one in Social Analysis, and one chosen in consultation with a Thematic Option adviser from either the Life Sciences or Physical Sciences. Completion of CORE 102 and CORE 111 with a passing grade satisfies the University's General Education Seminar requirement.

Liberal Arts Modules

Liberal Arts Modules are a college-wide honors opportunity that bring together students with substantial training in their respective disciplines to study a common subject area using multiple approaches while participating in a cross-disciplinary dialogue.

Liberal Arts Modules provide a unique opportunity for interdisciplinary study with peers and faculty from different disciplines. The themes and topics change each semester depending on faculty participation. Students are exposed to different approaches to societal issues, gain experience working collaboratively with peers from other academic areas, apply their knowledge to new subject areas and focus sustained critical attention on disciplinary methods of inquiry.

A typical module includes four classes: three small seminars and one CORE 498 course. The program requires simultaneous enrollment in one of the three seminars and in CORE 498, for a total of 8 units.

Students with at least junior standing and a major/minor GPA of at least 3.0 are eligible to apply. Preference is given to students pursuing double majors or other major/minor combinations in the liberal arts. Students graduating with a B.A. or USC Dornsife College of Letters, Arts and Sciences B.S. degree who complete a module and maintain a cumulative GPA of 3.5 will have "Distinction in Liberal Arts" listed on their USC Transcript.

REQUIREMENTS (8 UNITS)

Simultaneous registration in CORE 498 and a Special Topics 499 class that is part of the Liberal Arts Module.

Thematic Approaches to Humanities and Society Minor

The interdisciplinary minor in Thematic Approaches to Humanities and Society allows students to examine a range of thematic and theoretical approaches to understanding culture and society from multiple standpoints in the humanities. The minor is rich in course and schedule options, enabling students with an interest in the humanities to continue their studies. It also includes co-curricular events and advisement from Thematic Option staff. Thematic approaches to humanities and society builds on the intellectual community developed in the Thematic Option honors program and is open to all interested students.

The minor focuses on themes such as interdisciplinary perspectives and modes of inquiry; approaches to criticism and history; reification, ideology, contextualization; and knowledge, human diversity and social relations. Students choose six 4-unit classes, including one lower-division elective, one upper-division Thematic Option class (CORE 301 Modes of Inquiry), and four upper-division electives. Students also complete a 2-unit reading salon (CORE 200 Liberal Arts Reading Salon).

REQUIREMENTS, LOWER-DIVISION (CHOOSE ONE, 4 UNITS)

CLAS 150, CLAS 151, CORE 102, HIST 101, HIST 102, PHIL 115, REL 132

COURSE REQUIREMENTS (6 UNITS)

		UNITS
CORE 200	Liberal Arts Reading Salon	2
CORE 301	Modes of Inquiry	4

REQUIREMENTS, UPPER-DIVISION (16 UNITS)

Enroll in four of the following, at least one from List A, one from List B and not more than one from List C. Not more than two may come from any one department. Courses must be chosen in consultation with a Thematic Option adviser.

LIST A

Early: CLAS 310, CLAS 320, CLAS 333, CLAS 470, EALC 340, EALC 345, EALC 350, EALC 355, EALC 365, PHIL 345, REL 311, REL 315, REL 317

Modern: COLT 426, COLT 445, EALC 332, EALC 335, EALC 342, EALC 352, EALC 354, FREN 446, GERM 370, GERM 372, PHIL 337, PHIL 355, PHIL 437, REL 340, SLL 330, SLL 344

LIST B

Humanities and Society: COLT 448, COLT 475, ENGL 473, ENGL 474, FREN 370, REL 366, REL 462, SLL 345, SLL 348

Critical Approaches: CLAS 380, COLT 391, COLT 401, COLT 454, ENGL 472, ENGL 479, ENGL 480, LING 466, PHIL 361, PHIL 445

LIST C

Social Science Approaches: ANTH 372, HIST 201, HIST 329, IR 325, POSC 381, POSC 476, SOCI 350, SOCI 360

Courses of Instruction**THEMATIC OPTION (CORE)**

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

CORE 101g Symbols and Conceptual Systems: Thematic Option Honors Program (4, FaSp) Study of the structures through which we shape our experience in religion, philosophy, literature, music, and the visual arts, and of competing theories of interpretation. Students may not take this course on a P/NP basis.

CORE 102gp Culture and Values: Thematic Option Honors Program (4, Fa) Systematic reasoning about values and ways of living; close reading of major texts within the Western tradition; Biblical and classical through contemporary sources. Students may not take this course on a P/NP basis.

CORE 103g The Process of Change in Science: Thematic Option Honors Program (4, FaSp) Critical problems in the development of scientific thought, studied as vehicles for understanding the content and structure of the sciences. Specific subject matter in selected scientific disciplines will be presented. Students may not take this course on a P/NP basis.

CORE 104gw Change and the Future: Thematic Option Honors Program (4, FaSp) Analysis of historical change; social and political theory and revolutionary thought; introduction to competing images of future states of affairs; the continuing process of change. Students may not take this course on a P/NP basis.

CORE 111 Writing Seminar I: Thematic Option Honors Program (4, Fa) Students may not take this course on a P/NP basis.

CORE 112 Writing Seminar II: Thematic Option Honors Program (4, Sp) Students may not take this course on a P/NP basis.

CORE 195 Summer Seminar (3, Sm) An honors course for high school students in summer; each section focuses on a topic in the arts or humanities, social or natural sciences.

CORE 200 Liberal Arts Reading Salon (2, FaSp) Critical readings of a series of texts in the liberal arts designed to promote discussion of important themes, theoretical approaches, research directions, and interdisciplinary connections. Graded CR/NC.

CORE 301 Modes of Inquiry (4, FaSp) Modern tools of cultural and discursive analysis which seek to demystify “the natural,” as it appears in the formation of cultures, their institutions, and individuals.

CORE 498 Honors in Liberal Arts (4, FaSp) Advanced interdisciplinary course on the development of a general theme or topic. Critical analysis of the relation between modes of inquiry and objects of study. Students must be simultaneously enrolled in a selected special topics 499 course that has been approved as part of the College’s Liberal Arts Modules project.

CORE 499 Special Topics (2–4, max 12) Intensive interdisciplinary exploration of a selected theme, problem process, or period.

CORE 601 Teaching Analytical Writing Through Readings in the Humanities (1, max 4, Fa) Theories and practices in the university-level teaching of close-reading and analytical writing, using texts central to Western tradition. Graduate student professionalism through topical workshops and discussions. Open to assistant lecturers and teaching assistants only. Graded CR/NC.

USC Annenberg School for Communication and Journalism

Journalism graduate students Brianna Sacks and Victor Figueroa work on breaking stories for the afternoon news show produced by Annenberg Radio News. Students at the USC Annenberg School for Communication and Journalism create and publish news and information across platforms through engaging, hands-on experiences.

The USC Annenberg School for Communication and Journalism is a national leader in education and scholarship in the fields of communication, journalism, public diplomacy and public relations. The school offers a comprehensive curriculum emphasizing the core skills of leadership, innovation, service and entrepreneurship and drawing upon the resources of a networked university located in the media capital of the world. USC Annenberg’s commitment to the converged practice of communication and journalism, interdisciplinary studies, and collaboration makes it unique among peer institutions. Students learn from theory and practice, and the school’s programs put it at the crossroads of media, entertainment technology, and globalization.

The USC Annenberg’s nationally accredited School of Journalism provides experience for students in all media platforms, with a digital newsroom, state-of-the-art editing equipment for radio and television news production and the opportunity to work at on-campus media outlets. The school’s public relations program prepares students to thrive in advocacy communication, learning to write and communicate targeted messages across media platforms. The School of Communication’s multidisciplinary curriculum explores how human interaction and technology affect communities, businesses, nations and the world, preparing students for careers in communication, persuasion and leadership. USC Annenberg’s active internship program and study abroad

opportunities give students the broad, global perspective required to be successful professionals.

USC Annenberg alumni fill top posts in the communication and media industries, and remain an invaluable resource to students and faculty. USC Annenberg's more than 100 faculty members have been recognized in diverse fields, and their expertise challenges students to become communication leaders.

Emeritus Professor: Walter R. Fisher, Ph.D.

**Recipient of university-wide or school teaching award.*

Degree Programs

The School of Communication offers programs of study leading to a B.A. in Communication; minors in Sports Media Studies, Communication and the Entertainment Industry, Communication Technology Practices and Platforms, Global Communication, Health Communication, Media Economics and Entrepreneurship, Professional and Managerial Communication, Communication Law and Media Policy, Cultural Studies and Interdisciplinary Law and Society; progressive degrees in Master of Communication Management and Master of Public Diplomacy; a Master of Science in Digital Social Media; an M.A. and Ph.D. in Communication; M.A. in Global Communication (in conjunction with the London School of Economics); a Master of Communication Management and two Masters of Public Diplomacy. The Master of Public Diplomacy combines the resources of the Annenberg School for Communication and Journalism and the USC Dornsife College of Letters, Arts and Sciences' School of International Relations. The Communication Management Program has established dual degree programs with the USC Gould School of Law and Hebrew Union College.

Annenberg School for Communication and Journalism

Undergraduate Degrees

The School of Communication offers programs of study leading to a B.A. degree and minors in Communication and the Entertainment Industry, Communication Technology Practices and Platforms, Global Communication, Health Communication, Media Economics and Entrepreneurship, Professional and Managerial Communication, Sports Media Studies, and Communication Law and Media Policy. Many communication majors pursue, with the school's encouragement, a double major with another discipline or a minor to complement the major. Through careful planning, students can complete these options within four years.

Students must consult with an undergraduate academic adviser at least once each semester to explore course selections within the major, the minor, general education offerings and electives.

Admission

Admission is competitive. Fall 2014 incoming freshmen had an average GPA of 3.73 with an SAT score of 1960–2180 (middle 50%). Transfer students had an average college GPA of 3.70. For application instructions and deadlines, refer to the USC Admission Website. All transfer applicants must review the transfer admission application guidelines on the Annenberg Website. Contact the Annenberg Admissions Office for more information. USC exclusively uses the Common Application for freshman and transfer admission. Applicants must submit the Common Application and USC Supplement, both of which can be accessed at commonapp.org. In addition to the university writing samples, a 250-word statement of intent is required; instructions are included with the USC Supplement.

Students currently enrolled at USC who wish to change their major to communication must file a formal application with all supporting documents through the Annenberg Student Services Office. Students who entered USC as freshmen must have 32 units completed with a minimum GPA of 3.0. Students who entered USC as transfers must have 16 units completed at USC with a minimum GPA of 3.0. The 3.0 GPA is a minimum standard and does not guarantee admission.

For current USC students, the application period is the first week of classes each fall and spring semester. No applications will be accepted after the first week of classes.

Students who have not been admitted to the communication major or one of the minors may complete a maximum of 20 communication (COMM) units at USC. No further communication course work may be taken until the student is admitted. Students who complete the maximum number of units without gaining admission to the school will be advised to select another major. Students are encouraged to contact the Annenberg Student Services Office, ASC 140, (213) 740-0900, for advisement on change of major criteria and major requirements. In certain cases, students may be referred to Dornsife College Advising, CAS 120, (213) 740-2534, to consult with an adviser to select another major.

Bachelor of Arts in Communication

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing, foreign language and diversity requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

COMM 202	Communication and Technology	4
COMM 203	Communication and Mass Media	4
COMM 206	Communication and Culture	4
COMM 207	Economic Thinking for Communication and Journalism, and	2
COMM 208	Media Economics: Perspectives on Communication Industries	2

and two of the following three:

COMM 204	Public Speaking	4
COMM 301L	Empirical Research in Communication	4
COMM 322	Argumentation and Advocacy	4

ELECTIVES		UNITS
Upper division COMM courses		16
Lower or upper division COMM or ASCJ courses		4
One 400-level non-cross-listed COMM course (excluding COMM 443, COMM 490, COMM 494, and COMM 499)		4

Students must maintain a minimum 2.0 overall GPA in upper division course work applied toward the major. Further, no more than 16 upper division elective units may be taken prior to completion of the entire core. No more than 4 units of COMM 380 may be counted toward the department major. The School of Communication is committed to ensuring that all declared communication majors follow the necessary requirements. Mandatory advisement is required of all communication majors each semester prior to registration. All students taking communication classes are held to the highest academic integrity standards and may be denied admission or have admission revoked as a result of conduct violations.

Qualified non-majors (generally, students with junior/senior status, a minimum 3.0 GPA and a declared major elsewhere at the university) with appropriate academic preparation may be permitted to enroll in communication electives without fulfilling prerequisite requirements. Application for a waiver should be made to an undergraduate adviser.

Academic Integrity Policy

The School of Communication maintains a commitment to the highest standards of ethical conduct and academic excellence. Any student found responsible for plagiarism, fabrication, cheating on examinations, or purchasing papers or other assignments will be reported to the Office of Student Judicial Affairs and Community Standards and may be dismissed from the School of Communication. There are no exceptions to the school's policy.

Curriculum Areas of Study

By design, the courses in the curriculum tend to cluster into different areas of study. These areas represent important foci in the communication discipline and are areas in which the school's faculty possess special expertise. Four such areas of study are described below. They are not mutually exclusive, nor do they exhaust the curriculum; rather, they represent partially overlapping areas of unusual depth. Students may specialize in one of these areas or may design individual programs of study by choosing other combinations of electives that best meet their needs and career objectives. Relevant courses for the clusters are posted on the Annenberg School for Communication and Journalism Website.

Communication and Culture Option: This option will be attractive to a broad range of students whose careers have an international or multicultural dimension, from those interested in foreign service, travel and consulting to those seeking careers in the arts. In addition, students taking this option will be well prepared for advanced graduate study. Courses emphasize: communication as an essential component of culture and cultural production; cultural forces that shape communication practices; cultural barriers to communication; gender and diversity issues in human and mass communication and cultural production; media representations of race, ethnicity and gender; the production of meaning in diverse modes such as art, religion, popular culture and technology; and cultural criticism.

Entertainment, Communication and Society Option: This option is for students who wish to pursue careers in the entertainment industry, as well as students interested in the relationship of communication and entertainment to popular culture, globalization, cultural studies, marketing, advertising and ethics. Students taking this option will be well prepared for graduate study; they will also be able to enter the entertainment industry with a grounding in the theory, roles, issues and effects of entertainment. Courses emphasize: the theoretical underpinnings of entertainment studies; the historical context of entertainment; the roles and effects of entertainment concepts in “high art” and popular culture; the impact of entertainment on politics; advertising in an entertainment society; the blurring of marketing and entertainment and the effects of this on culture; the effects of entertainment in general and specifically on constructions of race and childhood; issues in the blurring of fact and fiction; ethical dilemmas; and the globalization of entertainment industries.

Media, Law and Politics Option: This option is designed for students who are interested in careers in government and public service, the law, and political and legal consulting, as well as advanced graduate study. Students examine communication processes in the public sphere and learn how to participate competently in these practices. Courses emphasize: the role of persuasion in the political and legal processes; the techniques used by individuals, institutions and social movements to influence public affairs; the history, design, implementation and evaluation of political campaigns; the role of public opinion; ethical issues in public communication, including the influence of media in the political and justice systems, the role of the First Amendment and the changing nature of freedom of expression in a mass-mediated environment, and problems of public participation.

Organizational and Interpersonal Communication Option: This option is most relevant to students interested in careers in business, management, human resources and development, corporate communication, and consulting, as well as advanced graduate study. Courses emphasize: interpersonal communication processes that affect and reflect personality, motives, beliefs, attitudes and values; communication’s role in the development, maintenance and disintegration of social, family and intimate relationships; managing interpersonal conflict; communication between superiors and subordinates and in teams; communication’s role in determining organizational culture; managing information in organizations; and the role of information technology in processes of globalization.

Progressive Degree Program

This progressive degree program allows USC students to complete a bachelor’s degree and a Master of Communication Management or a Master of Public Diplomacy in as little as five years. Students with a 3.0 overall GPA or higher in all classes taken at the university level are eligible to apply for admission to the degree program during their junior year, if a minimum of 24 semester hours will be completed in the final year of undergraduate enrollment. However, a 3.0 GPA does not guarantee acceptance.

Current students must attend a mandatory information session conducted by Annenberg Admissions and a member of the faculty before initiating the application process. Students admitted into the progressive degree program begin taking master’s level courses in their senior year and may complete the master’s degree in year five. For information on the application process, refer to the Annenberg Website, annenberg.usc.edu/currentstudents. Click on progressive degree. For further details on progressive degree programs, see the Requirements for Graduation page.

Annenberg School for Communication and Journalism

School of Communication

Minor in Communication and the Entertainment Industry

This minor offers courses that examine the theory, social impact and economics of the music, film and television industries. Students will learn strategies for analyzing popular culture texts; management and public relations in the entertainment field; and social, cultural and political issues related to entertainment. USC provides a broad array of courses that equip students with tools to evaluate the marketing of entertainment and the cultural

products of the film, television, theatre and music industries. This minor is intended to encourage students in a variety of majors to draw upon these properties in preparation for different careers in the entertainment industry.

Admission requirements are a minimum 3.0 grade point average and completion of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

REQUIRED CORE COMMUNICATION COURSES (CHOOSE THREE OF FOUR)		UNITS
COMM 300	Entertainment, Communication and Society	4
COMM 310	Media and Society	4
COMM 384	Interpreting Popular Culture	4
COMM 395	Gender, Media and Communication	4
ELECTIVES		UNITS
Choose 3-4 courses (12 units). One (4-unit) course must be in COMM; 8 units must be in an outside area.		
COMM 306	Innovation, Entertainment, and the Arts	4
COMM 339	Communication Technology and Culture	4
COMM 340	The Cultures of New Media	4

Total units: 24

Minor in Communication Law and Media Policy

The rapid advance in information and communication technologies raises serious questions about the limits of free speech, censorship, and the impact of present and emerging communication policies on domestic and international industries. To address these developments, this cross-departmental minor combines courses from communication, law, economics, political science and journalism. This minor not only enables students to understand what is occurring in the communication revolution, it also prepares them to participate in the movement as critics and advocates. Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

REQUIRED CORE COMMUNICATION COURSES		UNITS
COMM 371	Censorship and the Law: From the Press to Cyberspace	4
COMM 322	Argumentation and Advocacy	4
COMM 421	Legal Communication	4

ELECTIVE COURSES		UNITS
Choose three from the following. One must be in COMM; two must be in an outside area.		
COMM 324	Intercultural Communication	4
COMM 345	Social and Economic Implications of Communication Technologies	4
COMM 370	The Rhetoric of Ideas: Ideology and Propaganda	4
COMM 388	Ethics in Human Communication	4

COMM 412	Communication and Social Movements	4
COMM 422	Legal Issues and New Media	4
COMM 489	Campaign Communication	4
ECON 330	The Political Economy of Institutions	4
ECON 434	Economic Analysis of Law	4
JOUR 373	Journalism Ethics Goes to the Movies	4
JOUR 460	Social Responsibility of the News Media	4
LAW 200x	Law and Society	4
LAW 201x	Law and Politics: Electing a President	4
POSC 441	Cultural Diversity and the Law	4
POSC 442	The Politics of Human Differences: Diversity and Discrimination	4

Total units: 24

Minor in Communication Technology Practices and Platforms

Students in this minor trace the roots and dynamics of contemporary networked technologies and learn how to participate and excel within media cultures, online networks and organizational workplaces. The minor focuses on three areas: cultures (connecting communication technologies to histories, values, and ethics of social relationships and civic communities); networks (developing qualitative and quantitative skills to model, explain and influence relationships among media and people at local and global scales); institutions (tracing the legal, organizational, economic and interpersonal contexts that produce and transform communication technologies). The field of communication technology requires individuals who can critique, cultivate, build and influence new relationships among people, platforms and practices. Whether starting careers in strategic consulting, medical informatics, non-profit management, social media design, public sector service or new media entrepreneurship, students are encouraged to utilize skills and foundational concepts underlying 21st century communication technologies.

Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

REQUIRED CORE COMMUNICATION COURSES		UNITS
COMM 202	Communication and Technology	4
COMM 339	Communication Technology and Culture	4
COMM 340	The Cultures of New Media	4

ELECTIVES — CHOOSE TWO FROM THE FOLLOWING		UNITS
COMM 310	Media and Society	4
COMM 321	Communication in the Virtual Group	4
COMM 345	Social and Economic Implications of Communication Technologies	4
COMM 350	Video Games: Content, Industry, and Policy	4
COMM 422	Legal Issues and New Media	4

CTIN 462	Critical Theory and Analysis of Videogames	4
CTIN 463	Anatomy of a Game	4
CTIN 488	Game Design Workshop	4

Total units: 20

Minor in Media Economics and Entrepreneurship

In recognition of the dislocation and restructuring underway in contemporary media and information industries, this 24-unit minor introduces students to the microeconomics and trends of the sector and gives them an understanding of the role that entrepreneurship plays in the new economy. Students with professional media industry aspirations will learn basic economic literacy and discover the key factors that shape competition in information markets. Further, the minor fosters an entrepreneurial mindset in students and helps them to develop the entrepreneurial skills required to build successful careers and ventures in the media and information sector. Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing).

REQUIRED COURSES (8 UNITS)		UNITS
BAEP 450	Fundamentals of Entrepreneurship, or	
BAEP 451	The Management of New Enterprises	4
COMM 207	Economic Thinking for Communication and Journalism	2
COMM 208	Media Economics: Perspectives on Communication Industries	2

ELECTIVE COURSES – CHOOSE 16 UNITS FROM THE FOLLOWING		UNITS
4 units must be in BAEP:		
BAEP 452*	Feasibility Analysis	4
BAEP 454**	Venture Initiation: Launching and Scaling Your Startup	4
BAEP 460	Seminar in Entrepreneurship	2-4
BAEP 470	The Entrepreneurial Mindset – Taking the Leap	2

*Prerequisite: BAEP 450 or BAEP 451

**Prerequisite: BAEP 452

4-8 units must be in COMM:

COMM 306	Innovation, Entertainment, and the Arts	4
COMM 345	Social and Economic Implications of Communication Technologies	4
COMM 430	Global Entertainment	4
COMM 431	Global Strategy for the Communications Industry	4
COMM 432	American Media and Entertainment Industries	4
COMM 433	Home Entertainment	4
COMM 454	Media, Money, and Society	4

4-8 units must be in JOUR:

JOUR 381	Entertainment, Business and Media in Today's Society	4
JOUR 429*	Business and Economic Foundations of Public Relations	4
JOUR 469	Money, Markets and Media	4
JOUR 473	Emerging Media Strategies for Communication and Public Relations	4
JOUR 494	Transmedia, New Media and Strategic Communication	4

*Prerequisite: JOUR 351a

Total units: 24

Minor in Professional and Managerial Communication

The ability to succeed in today's workplace necessitates a growing number of communication skills. As today's increasingly global and highly competitive marketplace grows in complexity, the need to understand intercultural differences, the power of structure in the workplace and other issues such as dealing with interpersonal conflicts continues to increase. This minor will provide students interested in the management of people, resources or products with these necessary tools. Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing).

REQUIRED CORE COMMUNICATION COURSES		UNITS
COMM 320	Small Group and Team Communication	4
COMM 375	Business and Professional Communication	4
COMM 385	Survey of Organizational Communication	4

ELECTIVES — CHOOSE THREE FROM THE FOLLOWING:		UNITS
COMM 302	Persuasion	4
COMM 304	Interpersonal Communication	4
COMM 308	Communication and Conflict	4
COMM 315	Health Communication	4
COMM 321	Communication in the Virtual Group	4
COMM 322	Argumentation and Advocacy	4
COMM 324	Intercultural Communication	4
COMM 345	Social and Economic Implications of Communication Technologies	4
COMM 388	Ethics in Human Communication	4
COMM 431	Global Strategy for the Communications Industry	4
COMM 486	Human and Technological Systems in Organizations	4
COMM 487	Communication and Global Organizations	4

Total units: 24

Minor in Sports Media Studies

USC has a unique historical relationship to sports and sports media, and is near the center of the current sports media capital of Los Angeles. The courses examine the role of sports and sports media in culture, how the presentation of sports in media has evolved, has been shaped by cultural issues and, itself, impacted culture. This minor will enhance students' skills in working and interacting with, sports media.

Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

REQUIRED CORE COMMUNICATION COURSES		UNITS
COMM 381	Issues in Contemporary Sport	4
COMM 383	Sports, Communication and Culture	4

Minor in Cultural Studies

See the Department of English.

Minor in Global Communication

See the School of International Relations for complete course requirements.

Minor in Health Communication

See the Department of Preventive Medicine, Keck School of Medicine for complete course requirements.

Minor in Law and Society

See the Department of Political Science.

Minor in Photography and Social Change

See the Department of Sociology.

Annenberg School for Communication and Journalism

School of Communication

Other Programs

Debate Squad

The Trojan Debate Squad provides an opportunity for outstanding students (3.0 GPA or better), both communication majors and non-majors, to compete in an intensive intercollegiate laboratory setting. Whatever the student's intended career, the skills he or she develops in research, critical thinking and oral advocacy will be invaluable. The team has an excellent record in team policy debate and is now also offering British parliamentary (worlds format) debating. The team competes at both regional and national competitions.

Honors Program

The School of Communication offers an 8-unit honors program for exceptional students. To qualify, students must have a 3.5 GPA both overall and in the COMM major after completing the core courses (16 units from COMM 200, COMM 201, COMM 202, COMM 203, COMM 206, COMM 207 and COMM 208 and two of COMM 204, COMM 301L and COMM 322). To graduate with School of Communication honors, a student must maintain a 3.5 overall and COMM major GPA and receive at least a B+ or higher in the two honors courses. Students either take COMM 495 Honors Seminar or work with a professor to customize a 400-level COMM course for honors status (4 units). All honor students complete COMM 497x Honors Thesis (4 units). Contact an undergraduate adviser for further information and application forms.

Honor Society

Lambda Pi Eta is a national communication/journalism honor society that is open to declared communication, journalism and public relations majors who have completed (or are currently registered for) at least 60 units, at least 12 of which are in the major. To be eligible, students must have a USC GPA and a major GPA of 3.5 or higher.

Honors in Multimedia Scholarship

This program offers qualified undergraduate students an opportunity to approach their discipline(s) of study through the critical application of multimedia expression and scholarship. The student experience will be characterized by smaller classes taught by leading faculty members and enriched by a program of lecture series, visiting scholars, symposia and conferences. For complete program requirements, see the School of Cinematic Arts.

Annenberg Career Development

The USC Annenberg Career Development Office has listings for paid and unpaid internships from around the country. Career advisers conduct mandatory advisement appointments for all sophomores and offer career workshops, guest speakers and mentoring opportunities. Students are advised to participate in at least two internships before graduation.

Annenberg International Programs

Semester in Amsterdam

Through the Council on International Education Exchange, students study at the University of Amsterdam. The first week students spend in orientation sessions that include an overview of the academic program, an introduction to Amsterdam and to Dutch society and culture, as well as excursions in and around the city. Students enroll in the offerings taught in English at the University of Amsterdam. Such courses include communication, art, history, economics, environmental sciences, computer science, history, philosophy, literature, social science and theology. Students may earn a maximum of 12 USC units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program.

Spring Semester in Australia

This semester program offers students the chance to study at one of Australia's premier universities, in one of the country's most exciting cities. Students take communication courses that count for major credit at USC at the University of New South Wales (UNSW) and can choose from a wide variety of elective courses. UNSW is located in Kensington, just south of the center of Sydney and its commercial hub. The program gives students the chance to explore mass media and communication in a challenging environment with a distinct worldview, very different from that of the United States. Students may earn a maximum of 12 USC units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program.

Fall Semester in Buenos Aires

This semester program offers students the opportunity to study Latin American culture and study at the Universidad de San Andrés, a small liberal arts college in the suburbs of Buenos Aires. Students will live and learn in this vibrant metropolis while taking communication courses that count toward major credit at USC. Buenos Aires is one of the largest cities in Latin America and will give students the chance to explore the worldview of Latin America and how it relates to communication, mass media and the world at large. The program will immerse students in South American culture. With classes being taught exclusively in Spanish, this program requires a high degree of proficiency in Spanish, both written and oral (five semesters of college-level Spanish or the equivalent required). A minimum USC cumulative GPA of 3.0 is required for this program.

Semester in Hong Kong

The semester program offers students the opportunity to learn about Chinese culture at the Chinese University in Hong Kong, a bilingual institution. The program also gives students the experience of living in Hong Kong where they can witness the “one country, two systems” experiment. Courses in English are offered in fine arts, literature, history, Japanese studies, intercultural studies, music, philosophy, computer science, anthropology, economics, international relations, as well as journalism and communication. For students interested in Chinese language, courses are offered in Putonghua (Mandarin) or Cantonese. Extracurricular activities include the opportunity to teach English in rural China, monthly dinner talks with Asian studies specialists and excursions to local areas of interest. Students may earn a maximum of 12 USC units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program.

Semester in London

The semester program offers students the opportunity to study communication in London, the most important center of media in Europe. Many of the communication courses offered include British media guest lecturers and site visits. The program includes one-day visits to such places as Oxford, Cambridge and Liverpool. Planned activities within London include theatre and museum visits. Students may earn 16 units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program. Please visit the Annenberg International Programs Website for more information on additional program requirements.

Spring Semester in New Zealand

Annenberg’s New Zealand program offers students the opportunity to travel to the Southern Hemisphere. Each spring, students can study at the Auckland University of Technology (AUT), a world-class institution that offers students the chance to take communication courses that count toward major credit at USC, all the while exploring the beautiful city of Auckland and the surrounding countryside. The AUT program offers communication students an exciting way to broaden their understanding of media and mass communication in a challenging environment with an outlook distinctly different from that of the United States and Southern California. Students may earn 12 units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program.

Semester in Rio de Janeiro

The semester program offers students the opportunity to learn about Brazilian culture through an intensive pre-semester Portuguese language course (*does not count for USC language requirement) and through civic engagement projects that benefit the local communities in Rio de Janeiro. Through the Council on International Educational Exchange (CIEE), USC students enroll in 20 USC units in courses offered by CIEE and at the Escola Superior de Propaganda e Marketing, Brazil’s top communication and journalism school. Students may earn 12 units of upper-division COMM elective credit; please visit the Annenberg International Programs Website for more information on language prerequisites. A minimum USC cumulative GPA of 3.0 is required for this program.

International Communication Studies — London, Paris, Prague, Istanbul and Rome

The International Communication Studies program (ICS) allows undergraduate students to study a range of approaches to public communication media across Europe.

Students divide the five-week course into stays in Los Angeles, London, Paris, Prague, Istanbul and Rome. In addition to regular class meetings, students discuss the interplay of current world issues and international media practices with communication practitioners from international news and public relations media, government

institutions, private industry and global organizations.

Students enroll in JOUR 482 Comparative Media in Europe (4 units), which will count as 4 units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program.

For further information, contact Annenberg International Programs at (213) 821-1276, email [✉ ascintl@usc.edu](mailto:ascintl@usc.edu) or visit annenberg.usc.edu/international.

Annenberg School for Communication and Journalism

School of Communication

Graduate Degrees

Degree Programs

The School of Communication offers programs of study leading to a professional Master of Communication Management, an M.A./M.Sc. in Global Communication in collaboration with the London School of Economics, a Master of Science in Digital Social Media, two Masters of Public Diplomacy and research-oriented Master of Arts and Doctor of Philosophy degrees in Communication. The Master of Public Diplomacy combines the resources of the Annenberg School for Communication and Journalism and the USC Dornsife College of Letters, Arts and Sciences' School of International Relations. In addition, special programs enable students to earn dual degrees in communication management and law (USC Gould School of Law) and in communication management and Jewish nonprofit management (Hebrew Union College).

The degree programs are designed to ensure that students are educated in substantive studies that constitute the discipline of communication and provide a basis for competing effectively in the job market.

All students seeking the degrees in communication management and global communication will take a range of courses that prepare them for successful professional management careers in communication-related businesses, organizations and fields.

All students pursuing the research-oriented degree (Ph.D. in Communication) are required to take two theory courses that introduce them to inquiry in human communication and two research methods courses that acquaint them with the historical/critical and social scientific techniques available to conduct scholarly research. These requirements strengthen the student's appreciation of the intellectual bases of human communication study and further the concept of a community of scholars and practitioners in the profession. Students specialize in one of seven available tracks: Global and Transnational Communication; Groups, Organizations and Networks; Health Communication and Social Dynamics; Information, Political Economy and Entertainment; Media, Culture and Community; New Media and Technology; or Rhetoric, Politics and Publics. In addition, students are encouraged to sample courses in the remaining tracks, thus obtaining an education of unparalleled breadth and depth.

Admission Requirements

Master of Communication Management, Master of Arts in Global Communication, Master of Science in Digital Social Media, Master of Public Diplomacy and Master of Public Diplomacy (Practitioner and Mid-Career Professional)

The school accepts students from a broad range of academic backgrounds in social sciences, humanities, physical sciences or professional schools. Some are employed or have work experience in communication-related fields. Others apply immediately after completing baccalaureate degrees.

Criteria: All applicants must submit the online USC Graduate Admission Application. The faculty admission committees consider many criteria in the admission selection process: the academic record and professional and

work-related accomplishments are taken into account. The minimum criteria are the equivalent of a U.S. bachelor's degree and a 3.0 GPA for all undergraduate and graduate work completed. The Master of Arts in Global Communication requires a minimum 3.5 (on a 4.0 scale) cumulative GPA or international equivalent for admission. For admission to communication management, digital social media and public diplomacy, scores on the General Test of the Graduate Record Examinations (GRE) are required. Applicants to the communication management degree program may submit Graduate Management Admissions Test (GMAT) scores in lieu of the GRE. Scores on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required for applicants whose undergraduate degree was not completed in a country where English is the only official language. Letters of recommendations from those persons familiar with the applicant's work — preferably academically — are required also. In addition, applicants must submit a statement of purpose, transcripts of all previous college and university work attempted, résumé and writing samples.

Applicants to the global communication degree program must apply to USC and the London School of Economics (LSE). Participation in this degree program requires that students simultaneously gain admission to LSE and USC. GRE or GMAT scores are not required for admission. All students will begin their studies in London at the LSE.

Procedure: Refer to the Annenberg Website for application checklist, admission guidelines, deadlines and filing periods.

Doctor of Philosophy

Students may enter from a variety of academic fields and majors. Applicants whose undergraduate work was in fields other than communication may be admitted on the condition that adequate preparation in directly relevant areas is evident. Completion of a master's degree in communication is not required for admission to the Doctor of Philosophy.

Criteria: All applicants must submit the online USC Graduate Admission Application. The faculty admission committee reviews each application comprehensively. Three letters of recommendation from faculty qualified to comment on an applicant's capacities for a rigorous program of study are required. Completion of a basic descriptive statistics course is recommended. In addition, a personal statement, transcripts from all colleges/universities attended, a résumé and a sample of scholarly writing are required. The M.A. in Communication is earned as part of the Ph.D. program.

Procedure: Admission is granted for the fall semester only. Applicants are strongly encouraged to take the Graduate Record Examinations prior to October 1. Refer to the Annenberg Website for application guidelines and deadline.

Degree Requirements

The Global Communication, Master of Arts in Communication and Doctor of Philosophy in Communication are awarded under the jurisdiction of the Graduate School. Refer to the Graduate School section of this catalogue and the Requirements for Graduation section for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Communication Management

Each student builds a program of study with faculty academic advisors, drawing on earlier academic and work experience in order to achieve desired professional goals.

Residence

Students may pursue the Master of Communication Management on either a full- or part-time basis. Full time, the degree can be finished in one year and four months (across four terms, including the summer session); part-time, all course work can be finished in two to three years. With permission from a School of Communication committee, a maximum of 4 graduate units may be transferred from another accredited institution.

Foreign Language Requirement

There are no foreign language requirements for this degree.

Course Requirements

Thirty-two units in approved graduate-level course work are required.

Students will take a required 4-unit research methods course in their first semester. In their second semester, students will take a required 4-unit core conceptual foundation course. During their course of study, students take 4 units from a list of approved theory-practice integration courses.

A maximum of two courses may be taken in the first semester. In the second and subsequent semesters, with approval from the director of the Master of Communication Management program, students may take up to three courses.

Among the remaining courses, at least 12 units must be from Communication Management elective areas of focus. Up to 8 may be taken at USC outside the Communication Management program; these courses must be approved by the director of the Master of Communication Management program, and may be selected from a variety of disciplines, depending upon academic and career interests.

Any given course may be taken at most three times, after which the student is no longer eligible to take the course.

Master of Science in Digital Social Media

The School of Communication in the Annenberg School for Communication and Journalism offers a Master of Science in Digital Social Media degree, which is an intensive program focused on leadership and management of digital and social media, and online communities. Students learn to be digital and social media executives, leaders and entrepreneurs through a sequence of classes that teach conceptualization, management of development and analytics, creation of content, and implementation of digital products. Students take 32 units over the course of one calendar year including a funded, final project in which teams receive a budget to develop and launch a working, dynamic, social media product. An internship is highly recommended as students are expected to gain relevant, professional experience while enrolled in the program. No engineering skills are required, but the program provides instruction in collaborating with, and managing, developers.

The program begins in spring semester, and includes courses during summer and fall. Students applying for this program are required to take the Graduate Record Examinations (GRE).

The completion of this degree program requires 32 units including the successful development and launch of a digital social media product. Core courses are taught in the School for Communication and Journalism. With approval of the program director, students may select electives from the entire USC graduate curriculum.

DIGITAL AND SOCIAL MEDIA CORE REQUIREMENTS (12 UNITS) **UNITS**

DSM 510	Introduction to Digital Social Media	4
DSM 520	Managing Technologies for Digital Media	4
DSM 596	Final Project Capstone	4

RESEARCH AND PRACTICUM REQUIRED CLASSES (8 UNITS) **UNITS**

DSM 550	Analytics and Research Methodology	4
DSM 560	Digital Media Policy, Law, Practices, and Regulation	4

SPECIALIZATION CLASSES **4-8 UNITS**

Students choose one to three classes (4-8 units) that help them specialize their area of expertise within the realm of digital social media. Approval from the director is required for these classes. Student may choose from the director's list or request approval for other classes.

ELECTIVES — COMMUNICATION OR OTHER RELEVANT CLASSES **4-8 UNITS**

Students may elect to take classes in related topics within the Annenberg School for Communication and

Journalism, or from engineering, business, cinema, music, or other area related to digital and social media or related to the sector of implementation that interests the students. Students are strongly encouraged to acquire relevant experience through an internship and may earn degree credit by enrolling in CMGT 591 Communication Internship. With the permission of the program director, students may take up to 8 elective units within the Annenberg School, or from other USC programs.

Graduate Certificate in Health Communication Management

This certificate program is for students holding master’s degrees who wish to pursue or expand careers in health communication. Students will study the most recent theoretical and practical developments in the area of health communication and how this information can be used to improve public health as well as individual behavior.

Students take 16 units of graduate course work beyond the master’s degree, of which 4 units may be cognate courses. One course must be from a preventive medicine, public health, pharmacology or other health science program that focuses on “what is communicated” in health communication. A partial list of courses includes:

CMGT 510	Communication, Values, Attitudes, and Behavior	4
CMGT 511	Health Communication	4
CMGT 520	Social Roles of Communication Media	4
CMGT 541	Integrated Communication Strategies	4
CMGT 578	Non-profit Advocacy	4
CMGT 581	Media in Social Services: Design and Evaluation of Campaigns	4
CMGT 583	Social Marketing and Entertainment Education	4

Graduate Certificate in International and Intercultural Communication Management

This certificate program is for students holding master’s degrees who wish to pursue or expand careers in international and intercultural communication management. Students will study the latest developments in information and communication technologies, markets and cultures, and industry practices within cross-nation, cross-cultural contexts.

Students take 16 units of graduate course work beyond the master’s degree, of which 4 units may be cognate courses. A partial list of courses includes:

CMGT 531	Communication and the International Economy	4
CMGT 545	Communication and Global Competition	4
CMGT 556	Global Marketing Communication	4
CMGT 558	The International Entertainment Marketplace	4
CMGT 559	Global Hollywood	4
CMGT 580	Chinese Media and Society	4
CMGT 582	Communication for International Development	4
CMGT 584	Communication and the Multicultural Marketplace	4
COMM 559	Globalization, Communication and Society	4
COMM 561	Leading and Communicating Change in Global Organizations	4

Graduate Certificate in Marketing Communication Management

This certificate program is for students holding master’s degrees who wish to pursue or expand careers in marketing communication. Students will study the latest developments in marketing communication research and theory and the application to marketing communication issues.

Students take 16 units of graduate course work beyond the master’s degree, of which 4 units may be cognate courses. A partial list of courses includes:

CMGT 510	Communication, Values, Attitudes and Behavior	4
CMGT 541	Integrated Communication Strategies	4
CMGT 544	Creating Organizational Identity: Meaning Through Messages	4
CMGT 554	Copywriting and Creativity	4
CMGT 555	Online Marketing Communication Development and Analysis	4
CMGT 556	Global Marketing Communication Development and Analysis	4
CMGT 578	Non-profit Advocacy	4
CMGT 581	Media in Social Service: Design and Evaluation of Campaigns	4
CMGT 583	Social Marketing and Entertainment Education	4
CMGT 584	Communication and the Multicultural Marketplace	4
CMGT 587	Audience Analysis	4

Graduate Certificate in Media and Entertainment Management

This certificate program is for students who have already earned master's degrees and who wish to pursue or expand careers in the entertainment industry. Students will study the latest areas of entertainment-related research, theory and application. They will have a strong grounding in the theory, roles, issues and effects of entertainment as well as the impact of entertainment and new entertainment technologies on society, behavior and the entertainment industry.

Students take 16 units of graduate course work that may not be used or have been used for any other degree or certificate program, of which 4 units may be cognate courses. A partial list of courses includes:

CMGT 537	The Industry, Science and Culture of Video Games	4
CMGT 542	Business Strategies of Communication and Entertainment Firms	4
CMGT 543	Managing Communication in the Entertainment Industry	4
CMGT 546	Sports Media and Society	4
CMGT 547	Distribution of Recordings: Media, Retail and Online Channels	4
CMGT 549	Case Studies in Digital Entertainment	4
CMGT 550	Hollywood 3.0 – Entertainment Industry in the Convergence Age	4
CMGT 551	Communicating Entertainment Media Identities	4
CMGT 558	The International Entertainment Marketplace	4
CMGT 559	Global Hollywood	4
CMGT 574	Tele-Media: Strategic and Critical Analysis	4
CMGT 581	Media in Social Services: Design and Evaluation of Campaigns	4
CMGT 583	Social Marketing and Entertainment Education	4
CMGT 586	Entertainment Media: Content, Theory and Industry Practices	4
COMM 570	Economics of the Communication Industries	4
COMM 579	Entrepreneurship in the New Media	4

Graduate Certificate in New Communication Technologies

This certificate program is for students holding master's degrees who wish to pursue or expand careers in communication technologies. Students will study the latest developments in new communication and media technologies and their application in a variety of organizational and social contexts.

Students take 16 units of graduate course work beyond the master's degree, of which 4 units may be cognate courses. A partial list of courses includes:

CMGT 515	Innovation and the Information Economy	4
CMGT 530	Social Dynamics of Communication Technologies	4

CMGT 533	Emerging Communication Technologies	4
CMGT 547	Distribution of Recordings: Media, Retail and Online Channels	4
CMGT 571	Communications Technologies	4
COMM 534	The Culture of New Technologies	4
COMM 544	The Arts and New Media	4
COMM 570	Economics of the Communication Industries	4
COMM 579	Entrepreneurship in the New Media	4

Graduate Certificate in Strategic Corporate and Organizational Communication Management

This certificate program is for students holding master's degrees who wish to pursue or expand careers in corporate communication and communication consulting. Students will study the latest developments in organizational communication research and theory and the application to business communication issues.

Students take 16 units of graduate course work beyond the master's degree, of which 4 units may be cognate courses. A partial list of courses includes:

CMGT 500	Managing Communication	4
CMGT 502	Strategic Corporate Communication	4
CMGT 503	Strategic Communication Consulting	4
CMGT 504	Writing for Strategic Communication	4
CMGT 505	Communication in Work Settings	4
CMGT 508	Communicating Strategy and Change	4
CMGT 510	Communication, Values, Attitudes, and Behavior	4
CMGT 536	Team Communication and Leadership	4
CMGT 573	Evaluating Communication Needs	4
CMGT 576	Communication Strategies for Conflict Management	4
CMGT 577	Communicating Corporate Social Responsibility	4
COMM 561	Leading and Communicating Change in Global Organizations	4

Master of Arts in Global Communication

The USC Annenberg School for Communication and Journalism collaborates with the London School of Economics and Political Science (LSE) to provide the course work necessary for students to become fully engaged with the phenomenon of global communication through this dual master's degree program. Upon satisfaction of all program requirements, students will be awarded a Master of Arts (M.A.) in Global Communication by USC as well as a Master of Science (M.Sc.) in Global Media and Communications by the LSE.

Residence

This is a two-year program during which students spend their first year at the LSE and their second year at USC.

Foreign Language/Research Tool Requirements

There are no foreign language requirements. Students take a one-term research methods course as part of their course work at the LSE.

Course Requirements

The Master of Arts in Global Communication requires 42 units; the equivalent of 18 units earned at the LSE and 24 units earned at USC.

Year One at LSE: The LSE academic year has three terms. Students will complete classes approved by faculty at the LSE. Students must earn at least 3 units at the LSE, which articulates as 18 units at USC.

Year Two at USC: Students must complete COMM 598 as well as 20 elective units (5 courses) from the School of

Communication graduate curriculum, excluding COMM 525, COMM 526, COMM 550 and COMM 552.

Students may choose one of their elective courses from a department outside Annenberg with the approval of their advisers.

Students will produce a final research project on global communication that will be the product of work done both at the LSE and Annenberg. Students complete a research project during the summer after their year at the LSE for which grades are awarded by LSE faculty. A passing grade is required. They will continue to develop this project during the year at Annenberg in COMM 598 and must earn a grade of B minus or higher.

Master of Arts in Communication

Individuals seeking the Master of Arts in Communication are expected to acquire and demonstrate a general knowledge of human communication, including humanistic and social scientific approaches.

Students must apply to the Ph.D. program in Communication and complete all application requirements. The faculty admission committee determines candidates appropriate for the M.A.

The program, arranged in consultation with the school's director of doctoral studies, provides two options: degree with comprehensive examination requires a total of 32 units (normally eight courses), including core courses COMM 525, COMM 526, COMM 550 and COMM 552 and four electives; or degree with thesis requires successful completion of core courses, three electives and 4 units of COMM 594ab Master's Thesis.

Not more than two approved 400-level courses may be applied to a student's program and a maximum of 4 semester units with grades of B or better may be accepted by transfer from another institution of higher learning. The minimum acceptable GPA for successful completion of this program is 3.0.

The majority of students choose the comprehensive examination option. The examination consists of six hours of writing, taken on two different days. Permission to take an M.A. degree with thesis can be obtained only by application to the school screening committee.

Master of Public Diplomacy

The Master of Public Diplomacy combines the resources of the Annenberg School for Communication and Journalism and the USC Dornsife College of Letters, Arts and Sciences' School of International Relations. This program is designed for students who already have a substantial undergraduate background in social sciences or relevant professional experience in subjects such as communications, film and media studies, journalism, political science, public relations and international relations. Students in the program may decide to emphasize public diplomacy training most appropriate for a career in public service, the corporate world or in a nongovernmental organization (NGO) working in the ever-expanding global civil society. USC is a member of the Association of Professional Schools of International Affairs (APSIA).

Requirements for the completion of this degree program are 49 units, including the required substantive paper or alternative project. The course requirements are as follows:

PUBLIC DIPLOMACY REQUIREMENTS (12 UNITS)		UNITS
PUBD 502	Historical and Comparative Approaches to Public Diplomacy	4
PUBD 504	Global Issues and Public Diplomacy	4
PUBD 596	Practicum in Public Diplomacy Research	4
PUBLIC DIPLOMACY TOOLBOX COURSES (12 UNITS)		UNITS
Any three approved PUBD courses		
INTERNSHIP (1 UNIT)		UNITS
IR 591	Field Study	1
COMMUNICATION AND INTERNATIONAL RELATIONS ELECTIVES (16 UNITS)		UNITS

Any two approved IR courses	8
Any two approved COMM or CMGT courses	8

OTHER ELECTIVES (COGNATE, COMM, CMGT, IR) (8 UNITS) UNITS

These units may be taken from the School of Communication, School of International Relations or any graduate program at USC. Courses must be approved by the Public Diplomacy program director.

Master of Public Diplomacy (Practitioner and Mid-Career Professional)

This program is designed for students who already have at least five years experience working in public diplomacy (engaged in international advocacy, international publicity/public relations, international broadcasting, cultural and/or exchange work or other work which the admissions committee deems to fall within their definition of public diplomacy). The program is taught over a single calendar year beginning with a summer course introducing the advanced study of public diplomacy and ending in the middle of the following summer with the submission of a piece of research work. Refer to the application guidelines on the Annenberg Prospective Student Web pages.

Requirements for the completion of this degree program are 32 units including a substantive paper or alternative project. Core courses are taught in the School of Communication and the School of International Relations, USC Dornsife College of Letters, Arts and Sciences. With approval of the program director, students may select electives from the entire USC graduate curriculum.

PUBLIC DIPLOMACY CORE REQUIREMENTS (8 UNITS) UNITS

PUBD 500	Introduction to the Advanced Study of Public Diplomacy	4
PUBD 596	Practicum in Public Diplomacy Research	4

PUBLIC DIPLOMACY TOOLBOX COURSES (8 UNITS) UNITS

Select two approved PUBD courses

ELECTIVES (8 UNITS FROM COMMUNICATION OR INTERNATIONAL RELATIONS) UNITS

Approved IR courses
Approved COMM or CMGT courses

OTHER ELECTIVES (COGNATE, COMM, CMGT, IR) (8 UNITS) UNITS

These units may be taken from the School of Communication, School of International Relations or any graduate program at USC.

Doctor of Philosophy in Communication

Students in the doctoral program learn theories that guide research into communication processes and effects and into institutions and technologies that lend pattern to communication. Applicants for the Ph.D. are expected to acquire and demonstrate humanistic and behavioral knowledge of communication while acquiring skills requisite to scholarly research in the discipline.

Screening Procedures

Student progress is carefully monitored by the School of Communication faculty. Students are normally screened at the end of their first year of graduate study. At that time they must have completed no fewer than 16 and no more than 24 units, including COMM 525, COMM 526, COMM 550 and COMM 552. Students are evaluated on subject matter competence, teaching potential and their ability to conduct independent research. Upon successful passage of the screening procedure, the student has 30 days in which to form a qualifying exam committee.

Course Requirements

The student is required to take a minimum of 76 units and write an approved dissertation. Four core courses — COMM 525, COMM 526, COMM 550 and COMM 552 — and COMM 794ab Doctoral Dissertation are required for

all students.

Students specialize in one of five tracks by completing a minimum of three courses (12 units) in one of the following:

- (1) Rhetoric and Political Communication: COMM 509, COMM 511, COMM 512, COMM 513, COMM 514, COMM 515, COMM 517, COMM 518, COMM 521, COMM 522, COMM 580, COMM 599, COMM 610;
- (2) Media, Culture and Community: CMGT 587, COMM 516, COMM 519, COMM 534, COMM 544, COMM 575, COMM 580, COMM 584, COMM 599, COMM 605, COMM 618, COMM 620, COMM 629, COMM 653, COMM 654, COMM 660, COMM 662;
- (3) Interpersonal and Health Communication: CMGT 587, COMM 504, COMM 524, COMM 562, COMM 599, COMM 602, COMM 615, COMM 620, COMM 625, COMM 650;
- (4) Organizational Communication: COMM 508, COMM 524, COMM 585, COMM 599, COMM 620, COMM 635, COMM 636, COMM 637, COMM 638, COMM 640, COMM 641, COMM 645, COMM 648, COMM 652;
- (5) Information and Society: COMM 546, COMM 553, COMM 570, COMM 582, COMM 599, COMM 605, COMM 620, COMM 630, COMM 631, COMM 635, COMM 645, COMM 647, COMM 660, COMM 662.

In addition, students must take at least two courses in one other track outside their specialization (8 units total). Students also pursue an approved cognate elective program of study in which at least two courses (normally 8 units) are taken in a related field outside USC Annenberg School. Students entering the School of Communication with a master's degree may, with permission, apply part of their previous graduate course work to the cognate requirement. Students in the organizational communication track are required to take at least two methods classes in addition to the core courses, COMM 550 and COMM 552. If taken in a department or unit other than the School of Communication, these courses cannot also be counted toward the student's cognate requirement.

Research Tool Requirement

Doctoral students are expected to demonstrate methodological competence in an area of specialization prior to taking the qualifying examination. Such competence is usually demonstrated through course work (the successful completion, with grade B or better, of selected course work in addition to their content courses that is approved by the Ph.D. qualifying exam committee taken in the school and/or related departments), and by completion of a preliminary research project. Under special circumstances, students with an exceptional prior background in research methods may demonstrate their competence by successfully passing a research tool examination designed and administered by the Ph.D. qualifying exam committee.

Qualifying Exam Committee

This committee is composed of five USC faculty members, at least three of whom are from the School of Communication. Students are expected to work closely with the members of their qualifying exam committee, especially their committee chair, in selecting advanced course work and shaping areas of interest and research. In addition to helping the student plan a program, the committee administers the oral portion of the qualifying examination and approves the dissertation committee.

Qualifying Examination

Qualifying examinations for the Ph.D. usually are taken in the third year of study following completion of all required courses and a preliminary research paper. The examination includes both written and oral portions. The written portion is composed by committees of faculty in the relevant areas of study; the oral portion is administered by the student's qualifying exam committee. Students must pass both portions to be advanced to candidacy. Students must confer with their qualifying exam committee chair, not later than the second week of the semester during which the examinations are to be taken, regarding distribution of written examination hours among subject matter areas.

Doctoral Dissertation

The dissertation is an original research project contributing to knowledge about human communication and

should demonstrate a high level of competence in methodologies of scholarly inquiry.

Defense of Dissertation

Dissertations are defended in a formal meeting with the three-member dissertation committee. The school prefers that the defense oral be taken prior to final typing so that recommended changes can be made in the final manuscript.

Dual Degree in Law (J.D.) and Master of Communication Management

Academic training in law and in communication management provides a powerful background for careers in business, entertainment or government life. The USC Gould School of Law and the USC Annenberg School of Communication collaborate in a program that enables these educational opportunities. Students complete both the J.D. and the Master of Communication Management in three years, the time normally required for the law degree alone.

Students must complete 20 units (five courses) of communication courses at the School of Communication: one required research methods course; one required core conceptual foundation course; one approved theory-practice integration course; and two courses from approved CMGT elective areas of focus.

To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean of the USC Gould School of Law may make exceptions to this rule for students enrolled in law school honors programs.

First Year: Required law school courses.

Second and Third Years: 20 units of communication courses, including the 4-unit required research methods course in the first semester of the second year, and the 4-unit required core conceptual foundation course in the second semester of the second year, and an approved 4-unit theory-practice integration course; 38 units of law courses, of which 8 units must be approved as appropriate for acceptance by the School of Communication toward its degree.

Application to pursue the dual degree should be made before completion of 15 units of work in law or 8 units toward the Master of Communication Management degree. Admission by the law school to its J.D. degree will be evaluated as a substitute for GRE scores.

Dual Degree in Master of Communication Management/Jewish Nonprofit Management

The dual degree program, Communication Management/Jewish Nonprofit Management, offers students the opportunity for advanced study of sophisticated communication processes and technologies in the context of the nonprofit arena. The program has been developed by the USC Annenberg School for Communication and Journalism and Hebrew Union College-Jewish Institute of Religion's School of Jewish Nonprofit Management (formerly the HUC-JIR School of Jewish Communal Service) to combine the study of communication theory, processes and technologies with postgraduate education in Jewish nonprofit management and leadership. The goal of this program is for graduates to perform more effectively in the nonprofit sector, having received specific training in areas such as organizational communication, media impacts and policy.

Students of this program are admitted separately to each school. Students are required to complete 52 units of graduate course work at Hebrew Union College, which include the School of Jewish Nonprofit Management's thesis requirements. Four of the 52 required credits of graduate course work at Hebrew Union College are used to fulfill the School of Communication's cognate option.

In addition, students are required to take 24 units (six courses) at the School of Communication, including one required research methods course in the first semester; one required core conceptual foundation course in the second semester; one approved theory-practice integration course; and three courses from approved CMGT elective areas of focus.

Those interested in this program should contact the Office of Admissions, Hebrew Union College-Jewish Institute of Religion, 3077 University Avenue, Los Angeles, CA 90007-3796 for comprehensive information about the application process.

Annenberg School for Communication and Journalism

School of Communication

Courses of Instruction

ANNENBERG SCHOOL FOR COMMUNICATION AND JOURNALISM (ASCJ)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ASCJ 020x Annenberg Skills (1) Intensive skills boot camps teach the verbal, written, and digital skills needed for “real world” jobs. Not available for degree credit.

ASCJ 100 The Changing World of Communication and Journalism (2, Fa) Survey of major themes in media and communication; exploring what it means to be a professional in the fields of communication, journalism, and public relations.

ASCJ 200 Navigating Media and News in the Digital Age (4, FaSp) Students will be engaged as discriminating media/news consumers and contributors. Emphasis on critical skills needed to understand, employ, enjoy and help shape our media landscape.

ASCJ 220x Annenberg Experimental (0-2, max 6) Cutting-edge, experimental, experiential, interdisciplinary, results-based classes taught in new ways and places.

ASCJ 420 Annenberg Collaboratory (0-4, max 8) Collaborative, cutting-edge, experimental, experiential, interdisciplinary, results-based classes taught in new ways and places. *Recommended preparation:* ASCJ 220.

ASCJ 440 Engaging Urban Communities in the Digital Era (2) Explores how to engage urban communities through participatory journalism and communication strategies. Focuses on pioneering digital journalism, social media, and community organizing initiatives.

COMMUNICATION (COMM)

COMM 200 Communication and Social Science (4, FaSp) Social scientific inquiry into human communication; core theories of message production and reception in interpersonal, group and organizational contexts.

COMM 201 Rhetoric and the Public Sphere (4, FaSp) Humanistic approaches to inquiry in communication; qualitative research techniques; core theories of message production and reception in social, political, and mediated contexts.

COMM 202 Communication and Technology (4) Survey of cultural, social, political, and economic impacts of new communication technologies, including written language, the printing press, the telephone, television, and cyberspace.

COMM 203 Communication and Mass Media (4, FaSp) Survey of mass communication research; history, content, effects, theories and policy implications of various media.

COMM 204 Public Speaking (4) Principles and practices of effective oral communication; analysis of the speaking-listening process; selection and organization of speech materials; use of new presentation technologies.

COMM 205x Communication Practicum (1, 2, max 4) Students address communication issues in a field setting. They will evaluate communication practices using appropriate methodology. Projects are jointly evaluated by internship supervisor and professor. Sophomore standing. Not for major credit for communication

majors. Graded CR/NC.

COMM 206 Communication and Culture (4, FaSpSm) Examines cultural institutions, ideologies, artifacts, and productions; role of culture in everyday life; cultural studies as methodology; culture and power.

COMM 207 Economic Thinking for Communication and Journalism (2) Introduction to microeconomic and macroeconomic principles; analysis of contemporary issues in media, communication and journalism industries from an economic perspective.

COMM 208 Media Economics: Perspectives on Communication Industries (2) Application of economic principles in the areas of media ownership, market structure, industry regulations, media convergence, and entrepreneurship in new media. *Prerequisite:* COMM 207.

COMM 300 Entertainment, Communication and Society (4, FaSp) Theoretical foundation for understanding the construction, consumption, and consequences of entertainment from classical to contemporary times; situates entertainment within the ecology of information and communication.

COMM 301L Empirical Research in Communication (4) Experimental and survey methods for communication study; basic statistical concepts, procedures, and tests. *Prerequisite:* COMM 200.

COMM 302 Persuasion (4) Theories and research in social influence; strategies and tactics of persuasive communications in such settings as politics, public relations, advertising, business.

COMM 303 Learning from Case Studies in Communication (4) Case study approaches to communication research; reliability, validity, generalizability, and ethics in qualitative social research; cases in communication policy and practices.

COMM 304 Interpersonal Communication (4) Analysis of face-to-face interaction; role of communication in the development, maintenance and destruction of relationships; communication processes in managing interpersonal conflict.

COMM 305 Understanding Social Science Research (4) Students learn to be consumers rather than creators of social science research. Examines the challenges and opportunities of communicating research through mass media.

COMM 306 Innovation, Entertainment, and the Arts (4, FaSpSm) Explorations of innovation in the entertainment business. The effects of digital mobile media on TV, movies, music, advertising, social networks and art.

COMM 307 Sound Clash: Popular Music and American Culture (4) Music as inter-cultural communication and method for exploring race and ethnicity in the constitution of American culture and American self; role of music industry.

COMM 308 Communication and Conflict (4) Nature and functions of communication in human conflict; development of communication skills for managing conflict productively in interpersonal, organizational and intercultural contexts.

COMM 310 Media and Society (4) Interplay between media and society, including family and children's socialization, inter-group relations and community, pornography and violence, gender and race, media ethics, conduct of politics.

COMM 312 The Business and Culture of Celebrity (4) Employs the concept of "celebrity" as an optic through which to view and assess some of the key aspects of the communication revolution.

COMM 315 Health Communication (4) Behavioral approaches to health communication; communication competencies in health care settings, theories of risky behaviors, and behavioral change programs; special emphasis on AIDS-related issues. *Recommended preparation:* COMM 301L.

COMM 320 Small Group and Team Communication (4) Group process theories relevant to

communicative behavior in small group/team settings, including information exchange, decision making, leadership, and meetings; student team projects testing theoretic propositions.

COMM 321 Communication in the Virtual Group (4) Communication processes in global computer networks; formation, maintenance, and decline of virtual groups; privacy and access; introduction to computer networks for communication students and researchers.

COMM 322 Argumentation and Advocacy (4) Basic argumentation theory including analysis, research and evidence, case construction, refutation; discursive and visual argument; diverse fields of advocacy including law, politics, organizations, interpersonal relations.

COMM 323 Public Deliberation (4) Introduction to deliberative democracy in culture and governance; examines historical and contemporary institutions of democratic discourse and emerging communication norms.

COMM 324m Intercultural Communication (4) Cultural variables and social psychological processes that influence intercultural interaction; relationship between communication and culture in diverse settings including business, medicine, and education.

COMM 325 Intercultural Britain: Media, History and Identity (4) Examines urgent social and political issues as they are shaped, represented and expressed by the institutions of media, culture and communication within the United Kingdom.

COMM 330 Rhetoric in Classical Culture (4) Theories of communication and persuasion in ancient Greece and Rome; cultural and social contexts of classical rhetorical theory; major historical figures and concepts. *Recommended preparation:* COMM 201.

COMM 335 Rhetoric in Contemporary Culture (4) Theories of communication and persuasion in contemporary society; cultural and social contexts of contemporary rhetorical theory; major theorists, concepts and controversies. *Recommended preparation:* COMM 201.

COMM 339 Communication Technology and Culture (4) Examination of philosophies and popular representations of technology from the origins of western culture to the present and identifies the complex attitudes toward technology.

COMM 340 The Cultures of New Media (4) Cultural implications of computer-mediated communication and related media. Ideological responses to media innovation; debates over artificial intelligence, virtual communities, and virtual reality. *Recommended preparation:* COMM 339.

COMM 345 Social and Economic Implications of Communication Technologies (4) Social and economic impacts of information and communication technologies; social factors that shape technological change; issues include access, privacy, freedom of expression, productivity, democratic control.

COMM 350 Video Games: Content, Industry, and Policy (4) Introduction to the medium; history of video games; video games as aesthetic products, cultural products, economic outputs; policy issues, effects, and sites of community.

COMM 355 Advertising and Communication (4) Advertising as a mode of communication; U.S. advertising history and institutions; economic and policy contexts (domestic and global); critical analysis of advertising texts.

COMM 360 The Rhetoric of Los Angeles (4) Representations of Los Angeles communicated in diverse media; the city as a rhetorical text; analysis of cultural identities, art, architecture, and representations in popular culture.

COMM 363 Media Consumption (4) Theoretical approaches to the study of media consumption and audiences; examines international media and consumption practices; explores new media's impact on consumption.

COMM 364 Comparative Media: United States and the United Kingdom (4) Cross-national

approaches to the study of U.S. and U.K. media; focuses on news and entertainment media products; examines content, industries, technologies and audiences.

COMM 365 The Rhetoric of London (4, FaSpSm) Examination of the modern city as a communicative text with London as the case study.

COMM 366 Designing Media and Communication Projects for Social Change (4, FaSpSm) Students explore the theoretical and practical issues involved in designing effective media and communication projects for social change in international contexts.

COMM 370 The Rhetoric of Ideas: Ideology and Propaganda (4) Techniques of propaganda in public discourse; communication strategies through which ideas become ideologies; case studies in wartime and corporate propaganda, imperialism, and cultural colonialism.

COMM 371 Censorship and the Law: From the Press to Cyberspace (4) The study of current and historical battles over the limits of free expression from press and public parks to television, movies, music and cyberspace. (Duplicates credit in former JOUR 371.)

COMM 372 The Image of the Journalist in Popular Culture (4) (Enroll in JOUR 375)

COMM 375 Business and Professional Communication (4, FaSpSm) Oral and written communication skills demanded in the workplace including informative and persuasive speeches; interviewing; team communication; and training material preparation. *Recommended preparation:* COMM 204.

COMM 380 Forensics Laboratory (1–4, max 8) Directed individual research studies of contemporary problems. Supervised laboratory experience. Open only to members of the University debate squad.

COMM 381 Issues in Contemporary Sport (4) Explores social, political and ethical issues in elite sports and how issues are addressed through popular media; examination includes the relationship between sports and politics.

COMM 382 Sports, Business and Media in Today's Society (4) (Enroll in JOUR 380)

COMM 383m Sports, Communication and Culture (4) Rhetorical and critical approaches to sports and public discourse; application to sports organizations, the news and popular media; representations of gender and race in sports.

COMM 384 Interpreting Popular Culture (4) Popular culture as an indicator of cultural values, a producer and reflection of cultural meaning, and a means of communication; theory and case studies.

COMM 385 Survey of Organizational Communication (4) The role of information, persuasion, and meanings in organizations. Topics include organizational culture, leadership, decision-making, networks, power, diversity and the global workplace.

COMM 387 Sports and Social Change (4) Application of critical, sociological and rhetorical theories to sports events and sport media; examination of the role of sports in enacting social change.

COMM 388 Ethics in Human Communication (4) Value perspectives on communication in varied settings: interpersonal, organizational, and public. Issues of truth and responsibility in family and social interactions, advertising, and governmental communication.

COMM 390 Special Problems (1–4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

COMM 395m Gender, Media and Communication (4) Issues of gender in communication, including: media representations of femininity and masculinity; and gender's role in communication at the interpersonal, public, and cultural levels.

COMM 396 Fashion, Media and Culture (4) Fashion as a form of communication and culture; fashion's

role in identity, body politics, art, nationhood, celebrity and Hollywood culture, youth cultures and subversive practices.

COMM 400 Seminar in Communication (4, max 12) Advanced readings in communication theory and research (broadly defined); specialized interest areas of individual faculty on the frontiers of knowledge; seminar topics change each semester.

COMM 401 Audience Analysis (4) Examines audience analysis methodologies including focus groups, shadow juries, surveys, test marketing and content analysis; application of statistical sampling procedures, data analysis, interpretation and presentation. *Prerequisite:* COMM 301L.

COMM 402 Public Communication Campaigns (4) Theory and research in public health communication campaigns; design, implementation, and evaluation; extensive discussion of historical case studies and reasons for success or failure.

COMM 411 Communication Criticism (4) Methods and functions of criticism in forms of public communication; historical-contextual, textual, and interpretive procedures; diverse theoretical approaches including formalism, dramatism, genre, and ideology. *Prerequisite:* COMM 201.

COMM 412 Communication and Social Movements (4) Social and political movements as rhetorical phenomena; ideology, organization, and influence of such movements as civil rights, “New Left,” feminism, “New Right,” environmentalism.

COMM 413 Propaganda, Ideology and Public Controversy (4) Seminar examining the relationship between propaganda, ideology, critical thinking and rhetoric; application to contemporary controversies, both domestic and global; role of public argument. (Duplicates credit in COMM 370.)

COMM 414 Communication and Social Change in China (4) Examines social, political, and cultural implications of media and communication on Chinese society; regulations relevant to Chinese communication; market reforms, telecommunication, Internet and creative industries.

COMM 415m African American Rhetoric and Image (4) Interactive course addresses how people of color use symbols to construct identities and communities and disrupt networks through media, politics, entertainment and technology. *Recommended preparation:* COMM 201.

COMM 421 Legal Communication (4) Analytical and communicative aspects of judicial argument; philosophy and techniques of jury trials, cross examination, and appellate advocacy; research, preparation, and presentation of case briefs. *Prerequisite:* COMM 322.

COMM 422 Legal Issues and New Media (4) Examines laws and regulatory policies shaping new media, especially the Internet; impact of regulation on development and use of communication technology.

COMM 424 Millennium in the Media (4, FaSpSm) The new millennium in history, religion and mass media. Utopian and apocalyptic conceptions of the future from oral culture to printing, film, broadcasting, and Internet. *Recommended preparation:* COMM 201.

COMM 425 Communicating Religion (4) Genres of religious communication, including sermon, prayer, ritual, polemic, and revival. Impact of technological and cultural change on religious advocacy, beliefs, and practices.

COMM 426 Religion, Media and Hollywood: Faith in TV (4) How religion, ethics and spirituality are embedded, embodied and emplotted in television drama; how secular texts represent “lived religion” to increasingly diverse audiences.

COMM 430 Global Entertainment (4) Survey of economic, political, and cultural dimensions of the global entertainment marketplace; focuses on the international production and distribution of media products and services.

COMM 431 Global Strategy for the Communications Industry (4) Addresses the practical and

theoretical aspects of the international economy that are most relevant to management strategy in the communications industry.

COMM 432 American Media and Entertainment Industries (4) Examines the history, technology, regulations and business practices of American broadcast and entertainment industries.

COMM 433 Home Entertainment (4) History and impact of television and ancillary home entertainment (pay television, cable television, home video, DVD, DVR, video-on-demand, etc.) on media industries and consumer experience.

COMM 440 Music as Communication (4) Examines music's unique characteristics as a communicative form and the cultural, economic, political and social influences in music interpretation and production.

COMM 443 Communicating Health Messages and Medical Issues (4) How communication — interpersonal, mass media, and information technologies — shapes health behavior. Topics: doctor-patient consults; public campaigns; health issues in entertainment, news, and on the Internet.

COMM 444 Critical Theories of Sport (4) Focuses on critical theories that examine social and political roles of sport in society and how these roles play out in media and broadcast platforms.

COMM 449 Perspectives on the Networked Press (4) Critical survey of the forces defining today's networked press, examining the people, technologies, and institutions that produce news in today's online environments. *Recommended preparation:* COMM 202.

COMM 450 Visual Culture and Communication (4) Examines issues of visual images in communication related to history, modernity, cityscapes, news media, advertising, evidence, science, digital technology, and globalization.

COMM 451 Visual Communication and Social Change (4) Analysis of photography's evolution; new strategies for the photographic image, photo documentary work and global social issues; analysis of images on blogs and Websites.

COMM 454 Media, Money, and Society (4) Money as communication; social scientific analysis of money and financial markets; money and popular culture; the business press; representations of Wall Street in Hollywood cinema.

COMM 455 Advertising and Society (4) Examination of the role of advertising in contemporary society as an economic force and a cultural form of representation. *Recommended preparation:* COMM 200, COMM 201.

COMM 456 Entertainment, Marketing and Culture (4) Explores blurring of entertainment, marketing and culture in advanced information economies; intersections of culture and media and their social ramifications.

COMM 457 Children and Media (4) Explores construction of "childhood" in media and popular culture, including television, movies, video games, toys, magazines, and music. Examines children as a unique audience. *Prerequisite:* COMM 300; *recommended preparation:* COMM 200, COMM 201.

COMM 458m Race and Ethnicity in Entertainment and the Arts (4, FaSpSm) Examines how race and ethnicity as social categories are shaped by communication media; focuses on how race and ethnicity sustain entertainment and media industries. *Prerequisite:* COMM 206.

COMM 459 Fact and Fiction: From Journalism to the Docudrama (4) (Enroll in JOUR 459)

COMM 460 Collaboration and Group Decision Making (4) Advanced seminar examining the theoretical, empirical and practical aspects of human and technological communication in group processes; experiential and/or field experiences in group observation.

COMM 465m Gender in Media Industries and Products (4) Examination of the effect of gender stratification in media industries upon the cultural products they create, especially gender and gender/race role

portrayals.

COMM 466m People of Color and the News Media (4) (Enroll in JOUR 466m)

COMM 467 Gender and the News Media (4) (Enroll in JOUR 467)

COMM 468 Cross-Cultural Negotiations: Communication and Strategy (4) Application of intercultural communication theories and negotiation theories in the preparation and execution of global negotiations; strategies for creating mutual gains and sustained partnerships.

COMM 470 Information and Communication Technologies Strategic Analysis (4) Frameworks for strategically analyzing information and communication technologies; issues of regulation, control and social impacts of evolving ICTs; original research project of ICT strategy. (Duplicates credit in COMM 345.)

COMM 473 Advanced Issues in Communication and Technology (4) Advanced level readings into human-computer interfaces; social interaction with artifacts; concept of presence, and emerging social and psychological issues of new communication and computer technologies. *Prerequisite:* 301L.

COMM 475 Environmental Communication (4) Communication about environmental controversies in the public sphere: history of environmentalism; forms of citizen participation; media coverage; advocacy campaigns and movements; scientific and industrial discourses.

COMM 480 Nonverbal Communication (4) Theory and research; examination of the influence of environmental factors, physical behavior, and vocal cues on human communication.

COMM 482 Comparative Media in Europe (4, Sm) (Enroll in JOUR 482)

COMM 486 Human and Technological Systems in Organizations (4) How communication and information technologies are linked to organizational control, design, cultures; technology and competitive advantage; ethics and policy issues; technology-mediated work. *Recommended preparation:* COMM 385.

COMM 487 Communication and Global Organizations (4) The role of communication in global organizations; information, networks, and communication technologies for global organizing; computer-based collaborative work and virtual organizations. *Recommended preparation:* COMM 385.

COMM 488 Communication Research in Organizations (4) Seminar in application of communication research tools; diagnosis and analysis of communication problems; current topics in organizational communication scholarship; students complete original research projects. *Recommended preparation:* COMM 385.

COMM 489 Campaign Communication (4) Problems in political communication: creating an informed electorate, use of mass media, factors in voter persuasion. Guest experts in political analysis, opinion polling, communication evaluation.

COMM 490x Directed Research (1–8, max 12) Individual research and readings. Not available for graduate credit.

COMM 494x Research Practicum (2–4, max 4) Students gain research experience in the design, implementation, analysis, and reporting of communication research. Students serve as research assistants to faculty members. Not available for graduate credit.

COMM 495 Honors Seminar (4, max 8) Advanced study of issues in communication; recent developments in communication and rhetorical theories. Open only to students in COMM Honors Program. Recommended for seniors. *Recommended preparation:* COMM 301L.

COMM 497x Honors Thesis (4, FaSp) Writing of the honors thesis. Not available for graduate credit. Open only to COMM honors students; seniors only.

COMM 498 Ethical Issues in Entertainment and Communication (4, FaSpSm) Examines social and

political controversies over conflicting ethical standards for communication in a variety of media: mass-media, communication technology, and entertainment. *Prerequisite:* COMM 310.

COMM 499 Special Topics (2–4, max 8) Selected topics in communication.

COMM 502 Theoretical Approaches to Multidisciplinary Design Projects (4) Focuses on theories and research in communication and social sciences to bridge disciplines to produce a proposal, business plan, publication, or a research project. Open only to M.S., Communication Informatics, students. Not available for degree credit in Ph.D., Communication.

COMM 504x Interpersonal Communication (4) Theories of communication behavior in relatively unstructured, face-to-face situations; examination of decoder-encoder, message, channel, and situational variables. Not available for Master of Communication Management students.

COMM 508x Power, Politics and Conflict in Communication (4) Human communicative behavior involving the creation and resolution of conflict in interpersonal, small group, and formal organizational settings. Not available for Master of Communication Management students.

COMM 509x Classical Rhetorical Theory (4) Theories of rhetoric from the fifth century B.C. through the fifth century A.D.; emphasis on the Sophists, Plato, Aristotle, Cicero, Quintilian, and St. Augustine. Not available for Master of Communication Management students.

COMM 511x Contemporary Rhetorical Theory (4) Theories of rhetoric from the 18th century to the present; emphasis on Perelman, Burke, Habermas, Grassi, and Booth. Not available for Master of Communication Management students.

COMM 512x Rhetorical Criticism (4) Theories and methods of assessing popular persuasive art forms such as contemporary drama, music, poetry, and journalism as well as traditional forms of public address. Not available for Master of Communication Management students.

COMM 513x Neoclassical Rhetorical Theory (4) Theories of rhetoric from the fifth century A.D. through the 18th century; emphasis on dictamin, praedicandi, poetriaae, Alquin, Ramus, Port-Royalists, Bacon, Campbell, Blair, and Whately. Not available for Master of Communication Management students.

COMM 514x Social Movements as Rhetorical Form (4) Study of the rhetoric of social change; methodologies for analysis and appraisal; investigation of specific collective protest and reform movements. Not available for Master of Communication Management students.

COMM 515x Postmodern Rhetorical Theory (4) Implications of postmodernity for rhetorical theory and criticism; issues of textuality, agency, and subjectivity in communication; study of selected postmodern figures. Not available for Master of Communication Management students.

COMM 516x Feminist Theory and Communication (4) Implications of feminist theory for communication; topics include epistemology, critique of science/technology, women and language, feminist approaches to media and film, women and the workplace. Not available for Master of Communication Management students.

COMM 517x Rhetorical Theory and Culture (4) Issues of culture in recent rhetorical theory; in-depth examination of representative idealist, pragmatist, structuralist, critical, and post-modern accounts of the symbolic construction of cultural forms. Not available for Master of Communication Management students.

COMM 518x American Public Address (4) History and criticism of major American speakers and speeches with reference to the social, political, and intellectual background of their times. Not available for Master of Communication Management students.

COMM 519x Cultural Studies in Communication (4) Theoretical foundations, history, and development of cultural studies in communication; implications of issues of nationalism, colonialism, technologies, popular culture, and politics of bodies for communication. Not available for Master of Communication Management students.

COMM 521x Argumentation (4) Foundation of critical deliberation; the nature of informal reasoning; logical and ethical problems; analysis and appraisal of naturalistic argument. Not available for Master of Communication Management students.

COMM 522x Kenneth Burke's Dramatistic Theory (4) Studies the contributions of Kenneth Burke, among the most significant figures in the development of contemporary rhetorical theory and criticism. Not available for Master of Communication Management students.

COMM 524x Small Group Process (4) Contemporary theoretical models; problems in determination and measurement of variables in small group communication environments; assessment of recent research. Not available for Master of Communication Management students.

COMM 525x Humanistic and Social Scientific Approaches to Human Communication I (4) Overview of the humanistic and social scientific approaches to the study of communication; emphasis on rhetorical/critical and macro social scientific perspectives. Not available for Master of Communication Management students.

COMM 526x Humanistic and Social Scientific Approaches to Human Communication II (4) Overview of the humanistic and social scientific approaches to the study of communication; emphasis on macro and micro social scientific, symbolic and structural perspectives. Not available for Master of Communication Management students.

COMM 534 The Culture of New Technologies (4) In-depth approach to cultural impact of the Internet, multimedia, digital imaging, CD-ROM and virtual reality in context with photographic realism, artificial intelligence and virtual communities.

COMM 544 The Arts and New Media (4) Organization, economics, and policy of arts as affected by new technologies. Architecture, design, advertising, and fashion as context. Implications for arts promotion, management, and funding.

COMM 546 Diffusion Theory and Research (4) Diffusion of new ideas over time among the members of a system. Emphasis upon the spread and adoption of new communication technologies.

COMM 550 Quantitative Research Methods in Communication (4) Epistemological assumptions, design, and beginning methods of quantitative analysis in communication research. Not open to Master of Communication Management students.

COMM 552 Qualitative Research Methods in Communication (4) Developing expertise in qualitative methods, including participant-observation, ethnography, discourse analysis and historiography in communication research. Not open to Master of Communication Management students.

COMM 553 Political Economy of Global Telecommunications and Information (4) The political, economic, regulatory, and technological changes that are together creating a new world information economy. The politics of international telecommunications is emphasized.

COMM 554 Regression and Multivariate Communication Research (4) Advanced analysis of variance, regression models, path analysis, MANOVA, and discriminant analysis. Not open to Master of Communication Management students.

COMM 556 Advanced Methods in Communication Research (4) Structural Equation Modeling, LISREL, log linear and other advanced statistical methods used in contemporary communication research. Not open to Master of Communication Management students.

COMM 559 Globalization, Communication and Society (4) Comparative analysis of social, cultural and political impacts of communication technology and media; emphasis given to communication's influence in the social dimensions of globalization.

COMM 560 Critical Approaches to Global Media and Communication (4) The characteristics of global communication in global capitalism and the political economic processes within which policies, interests, and

implications of global communication are embedded.

COMM 561 Leading and Communicating Change in Global Organizations (4) Communication perspectives on the process and outcomes of globalization; role of large media organizations in the global flow of information; and leadership and multiculturalism.

COMM 562x Cognitive Approaches to Communication (4) Cognitive theory and research and its application to communication phenomena and processes. Not available for Master of Communication Management students.

COMM 570 Economics of the Communication Industries (4) The economic forces that determine the structure and outputs of communication and media industries, including newspapers, broadcasting, cable, and telecommunications.

COMM 575 Advocacy and Social Change in Entertainment and the Media (4) Examines how diverse groups (i.e., governmental agencies, advertisers, health organizations, advocacy groups, actors, social scientists) attempt to influence audiences through entertainment and traditional media channels.

COMM 578 New Media Literacies (4) Examines intersection of education and participatory culture, literacy and media change, the participation gap, informal learning and knowledge communities, emerging social skills and cultural competencies.

COMM 579 Entrepreneurship in the New Media (4) Examination of how the digital revolution is creating news media entrepreneurs, and changing the way news is disseminated by journalists and heard by consumers.

COMM 580 Media and Politics (4) Mass media in American political life, including political reporting, election campaigns, non-electoral politics, and the media as a political issue.

COMM 582 International Communication: National Development (4) Roles of media institutions and communications behavior in national development, including political, economic, and social spheres; Western and non-Western conceptions of development processes.

COMM 584 Interpreting Popular Culture (4) The use of semiotic, literary, psychoanalytic, and other approaches for describing and interpreting popular cultural phenomena, including television, advertising, film, music, and fashion.

COMM 585x Organizational Communication (4) Theory and research; field experience in analyzing and solving communication problems in organizations. Not available for Master of Communication Management students.

COMM 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the school. Graded CR/NC. (Duplicates credit in former COMM 590.)

COMM 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

COMM 598 Practicum in Global Communication Research (4) Development and assessment of research into global communication; selection of appropriate research methodologies; and production of scholarly research. Open to M.A. in Global Communication students only.

COMM 599 Special Topics (2–4, max 8)

COMM 602 Seminar in Persuasion (4) Classical and contemporary theories of persuasion, attitude formation and change; impact of cognition, affect and emotions; cultural and group influences; message strategies and framing. Not open to Master of Communication Management students.

COMM 605 Advanced Macro Theories of Communication I (4) Advanced macro theories of communication and culture creation/change; emphasis on structural-functionalism, neo-Marxism, critical theory, symbolic interactionism, phenomenology, post-structuralism, deconstruction.

COMM 610 Studies in Rhetorical Theory (4, max 12) Problems in rhetorical theory and criticism; advanced, specialized interest areas of individual faculty on the frontiers of knowledge.

COMM 615 Health Communication (4) Evaluation of research about communication in patient care, health campaigns for diverse publics, tools for disease management, and outreach to producers in mass media.

COMM 616 Health Communication for Prevention (4) Examination of health communication efforts for the prevention of diseases or other adverse physical or mental health outcomes by the promotion of behavior change.

COMM 618 Mass Media Effects (4) Theoretical and research questions about mass communication effects; criticism and interpretation of current research and theory, and formulation of new theory.

COMM 620 Studies in Communication Theory (4, max 12) Current problems in communication theory and research: advanced, specialized interest areas of individual faculty on the frontiers of knowledge.

COMM 625 Theory Construction in Communication (4) The nature of theories; conceptual and methodological problems in theory construction; application to contemporary issues in communication research.

COMM 629 Global Culture (4) Examines the relationship of culture to globalization, ranging from nationalism and colonialism to global cultural products, multinational cultural production, diasporic cultures, global media, and cosmopolitanism.

COMM 630 Communication Technology and Social Change (4) Impact of technological advances on human communication practices and theories; trends, forecasts, implications.

COMM 631x Minds and Media (4) Sociopsychological consequences of human interaction with media and computers; evolution of minds; effects of media forms and contents on cognition and affection; concept of presence. Not available for Master of Communication Management students.

COMM 635 Economics of Information (4) Applications of macro and microeconomic principles: economic role of the information sector; production, distribution, and pricing of information products; information in the functioning of markets.

COMM 636 Interpretive and Cultural Approaches in Organizational Communication (4) Interpretive, critical and cultural research in organizational communication; emphasis on narrative approaches to ethnographic studies, critical essays, and quantitative intercultural research in organizational communication.

COMM 637 Current Readings in Organizational Communication (4) Recent developments in organizational communication theory and research; emerging issues and methodologies; future directions.

COMM 638 Global, International and Intercultural Communication in Organizations (4) Communication processes in global organizational transformation; influences of information technology, intercultural variables, and globalization on decision-making, operations and practices of international and transnational organizations.

COMM 640 Communication and Organizational Change (4) Analysis of communication and information networks in organizations and their relationships with communication technologies, organizational behavior, and management.

COMM 641 Organizations and Communication Technologies (4) Communication technology impacts on organizations; organizational influence on technology development and deployment; methods for organizational communication technology studies; critiques and implications for theory and research.

COMM 645 Communication Networks (4) Conceptual and analytic issues in network perspectives; emphasis on communication patterns, processes, content, influences and impacts.

COMM 646 Negotiating Boundaries in Environmental Research (2) Examines how environmental disciplines are discursively constructed; explores problems of utilizing scientific/technical results in policy-

making arenas; and introduces strategic communication skills.

COMM 647x Network Society (4) Advanced research seminar examining the interaction between communication technology, society, economy, politics and culture from interdisciplinary and cross-cultural perspectives. Not available for Master of Communication Management students.

COMM 648 Online Communities and Networks (4) Examination of academic research on the social, cultural, political, and economic effects of online communities; policy implications of this research; mobile technology's role in community building. Not open to Master of Communication Management students.

COMM 650 Survey Construction and Validation (4) Principles of survey construction and validation; format selection, sampling, question wording, adaptation for international audiences, response option formats, order, and avoiding acquiescence bias and breakoffs.

COMM 652 Field Research in Communication (4) Examines quantitative and qualitative field methods in communication research; survey development and scaling, content analysis, ethnographic study; quasi-experimental design; time series analysis.

COMM 653 Research, Practice and Social Change (4) Examination of theoretical models and best practices of academic research and advocacy relationships; students conduct a community-based research project using a model of community-based participatory research.

COMM 654 Art, Artists and Society (4) Cultural and temporal differences in defining arts, artists and audiences; transmitting cultural beliefs through art; understanding aesthetic responses; experiences of alienation and incomprehension with art.

COMM 660 Entertainment and Games (4) Contemporary meaning of "entertainment," historical and cultural developments of entertainment; entertainment as psychological process of responding to/interacting with various media. Not open to Master of Communication Management students.

COMM 662 Video Games Research (4) History and content, motivation and selection, reception and reaction processes, and effects of video games; students conduct original research into video game usage and effects. Not open to Master of Communication Management students.

COMM 670 Culture and Economy (4) Explores and analyzes the interaction between culture and economy by observing different types of economic practices.

COMM 675 Independent Study (1-4) A supervised course tailored to specific student interests. The professor and student develop a syllabus that permits exploration of advanced or specialized topics. Graded CR/NC.

COMM 694 Preliminary Research Paper (2) Independent research designed to demonstrate the student's ability to conceptualize, conduct, and present scholarly research. Parallel to COMM 794. Graded CR/NC.

COMM 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the school. Graded CR/NC.

COMM 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

COMMUNICATION MANAGEMENT (CMGT)

CMGT 500 Managing Communication (4) Production and distribution of information within large organizations; information networks, organization structure, control and decision-making functions. Resources necessary for effective organizational communication systems.

CMGT 501 Communication Management Pro-Seminar (4) Central issues of theory and practice in the management of communication; broad introduction to all areas of the program. Open to Master of Communication Management students only.

CMGT 502 Strategic Corporate Communication (4) Roles, responsibilities and requirements of communication functions within corporations; design and implementation of communication plans; strategic message production for internal and external audiences.

CMGT 503 Strategic Communication Consulting (4) Communication consulting skills including facilitation, training, presentation coaching, benefits writing, speech writing, and communicating organizational change; consulting basics, proposals, cost estimating, and final reports.

CMGT 504 Writing for Strategic Communication (4) Writing skills necessary for an organizational communicator; review of strategic writing fundamentals; development of portfolio of diverse media applications based on strategic corporate communication requirements.

CMGT 505 Communication in Work Settings (4) How work settings determine communication: basic structures of communication, influence of technology, social contexts, and physical space. Applications to management.

CMGT 506 Images and Image Management (4) Examines images and image manipulation in communication, management and social control. Synthesizes work ranging from cognition and interpersonal behavior to mass media and popular culture.

CMGT 507 Information Management (4) Develops conceptual frameworks for understanding information, uncertainty, ambiguity, and knowledge. Principles for decision-making, awareness of biases, mathematics of risk-taking, and practices for sense-making. (Duplicates credit in former COMM 507.)

CMGT 508 Communicating Strategy and Change (4) Examination of role of communication in developing and implementing business strategy; critical assessment and practice with models, tools, and techniques for communicating change.

CMGT 509 Influential Communication in the Marketplace (4) Promotional messages as both creative expressions and agents for behavioral change; application of social science theories of persuasion and compliance in interpersonal and mass-media venues.

CMGT 510 Communication, Values, Attitudes and Behavior (4) Theory and research on value and attitude formation and change; consequences for communication and behavior.

CMGT 511 Health Communication (4) Connections between health providers' communication and patients' well-being; consultation language, nonverbal behavior, physical settings, design of media messages, information technologies in patient education and care.

CMGT 512 Unintended Consequences of Communication (4) A multidisciplinary examination of the unintended consequences of interpersonal, mass media, political, commercial and social communication by analyzing tactical and strategic errors in communication campaigns.

CMGT 515 Innovation and the Information Economy (4) Analysis of the innovation dynamics fueled by the information and communication technology revolution; economic, technological, institutional and personal underpinnings of innovation and entrepreneurship.

CMGT 520 Social Roles of Communication Media (4) How mass media shape public images of groups, channel political power, promote consumption of goods. Social and political theories as tools in evaluating media impact.

CMGT 528 Web Designs for Organizations (4) Students learn to assess organizations' online needs, to examine the use of the Internet in terms of electronic commerce and global pressures, and design Web page strategies.

CMGT 530 Social Dynamics of Communication Technologies (4) Impact of television, satellites, computers, and other new technologies; competing theories about the role of technology in society; historical effects of introducing new technologies.

CMGT 531 Communication and the International Economy (4) Examines the impact of global economic changes on communications industries, the political and economic forces shaping these industries and the roles of its managers.

CMGT 532 Development of American Electronic Media Industry (4) Origins of American radio and television broadcasting industry and analysis of its development into the contemporary media industry; covers history, technology, regulation, and business practices.

CMGT 533 Emerging Communication Technologies (4) Basics of multimedia; new forms of audio and video interactive technologies; computer communication networks; social, political, cultural, interpersonal, organizational issues related to emerging communication technologies. (Duplicates credit in former COMM 533.)

CMGT 535 Online Communities for Organizations (4) How Web-based technologies affect organizational communication, including issues related to collaboration, innovation and knowledge management, forecasting, and networking. (Duplicates credit in former COMM 535.)

CMGT 536 Team Communication and Leadership (4) Theories of effective team communication and leadership; case studies of effective and ineffective teams and leaders; teamwork and communication development; and distributed work teams.

CMGT 537 The Industry, Science and Culture of Video Games (4) History, social dynamics, and cultural impact of video games; developments in technology and design; issues confronting the video game industry and organizations.

CMGT 540 Uses of Communication Research (4) Applications of both data and interpretation in communications management. Topics include: audience ratings, surveys, experimental tests of programs and campaigns, formative evaluation, secondary data sources.

CMGT 541 Integrated Communication Strategies (4) Communication strategies for product marketing and advertising; communication's role in developing domestic and international marketplaces; practical applications of persuasion theory.

CMGT 542 Business Strategies of Communication and Entertainment Firms (4) An overview of business strategies in media industries. Emphasis on Internet and changing business models. Case studies. Students prepare business plans for digital start-ups.

CMGT 543 Managing Communication in the Entertainment Industry (4) Examination, application and critique of traditional and contemporary organizational communication theory as it applies to the entertainment industry's unique internal and external environments.

CMGT 544 Creating Organizational Identity: Meaning Through Messages (4) Use of rhetorical theories and communication models to create organizational identification with internal and external audiences; the role of values and ethics in creating identities.

CMGT 545 Communication and Global Competition (4) How communication technologies are used to secure competitive advantage; how firms use communication systems to sustain effective positioning in an industry; convergence of communication industries.

CMGT 546 Sports Media and Society (4) History and evolution of sports media industry; traditional, new and alternative sports media; globalization of sports; sports promotions and personalities.

CMGT 547 Distribution of Recordings: Media, Retail and Online Channels (4) Cultural and critical analyses of radio and recording industry development and business strategy; influence of legal and regulatory institutions, impact of new forms of distribution.

CMGT 548 Issues in Children's Media (4) Historical review of children's programming; programming genres; ethical and business issues of marketing to children; children's uses of various media.

CMGT 549 Case Studies in Digital Entertainment (4) Explores foundation of U.S. media policy in the

digital age; students prepare White Papers on an urgent issue of contemporary digital media and entertainment policy.

CMGT 550 Hollywood 3.0 – Entertainment Industry in the Convergence Age (4) In-depth analysis of the challenges confronting the entertainment industry in the wake of media convergence including a survey of media convergence history and theories.

CMGT 551 Communicating Entertainment Media Identities (4) Understanding dynamics in entertainment markets enabled by emerging digital technologies; broad and niche strategies to target appropriate audiences, building audience engagement with entertainment content identities.

CMGT 552 Visual Storytelling: Production, Management and Culture (4) Focuses on management, production and distribution of scripted film, television and web stories to understand visual storytelling as a communicative strategy for advertising and education.

CMGT 554 Copywriting and Creativity (4) Foundational and advanced practices for copywriting and related design in communication; integrated analysis of concepts and pragmatics surrounding creativity for communication effectiveness.

CMGT 555 Online Marketing Communication Development and Analysis (4) Analysis and development of online communication and marketing campaigns; exploration of current Internet best practices in social media, SEM, privacy, location-based marketing, and online measurement.

CMGT 556 Global Marketing Communication (4) Communication strategies in a global marketing environment; analysis of global-local challenges and opportunities; effective global integrated communication to create and sustain competitive advantage.

CMGT 557 Communication Policy in the Global Marketplace (4) Comparative analysis of various countries' communication and information technology policies; examines developments in telecommunications, broadcasting, and entertainment industries and policy questions for global media marketplace.

CMGT 558 The International Entertainment Marketplace (4) Global influences on entertainment industries (broadcasting, film, telecommunications, Internet, video games, and music); case analyses of specific organizations and geographic regions; impact on local cultures.

CMGT 559 Global Hollywood (4) Examines the influence of the transglobal flow of media between the U.S. entertainment industries and other national media industries.

CMGT 560 Communications Policy (4) Evolving regulation of telephone, radio, television, cable, print, and other media. Major policy-makers and decision points in policy-making at local, state, national, and international levels.

CMGT 565 Communication Law and Broadcasting (4) History and present status of broadcast regulations; emphasizes on First Amendment, character of regulatory agencies, impact of court decisions, influence of technological advances.

CMGT 566 Communication Law and New Technologies (4) Development of law in newer technologies. Cases include cable television, low power television, direct broadcast satellites, teletext, video cassettes, telephone, data networks, computer regulation.

CMGT 567 Internet Policy, Practice and Regulation (4) Examines how legal decisions impact commercial and personal uses of the Internet; regulatory responses to court decisions.

CMGT 571 Communications Technologies (4) Basic technological concepts necessary to understand the workings of modern communications products and services, to include frequency, bandwidth, electricity, modulation, and digital conversion.

CMGT 573 Evaluating Communication Needs (4) Participation as consultants in field projects. Use of organizational, interpretive, and statistical methods to design organizational communication systems is

emphasized.

CMGT 574 Tele-Media: Strategic and Critical Analysis (4) Strategic and critical analyses of emerging and new communication technologies from historical, business, financial, consumer, and policy perspectives.

CMGT 576 Communication Strategies for Conflict Management (4) Communication strategies for effective negotiation, mediation and facilitation of disputes; structures for public interventions; emergence of online dispute resolution systems.

CMGT 577 Communicating Corporate Social Responsibility (4) Evolution, models, metrics and stakeholders. Key communication issues in designing and implementing initiatives, CSR reporting, strategic partnerships and online communities. Analysis of communication paradoxes.

CMGT 578 Non-profit Advocacy (4) Examines non-profit advocacy (vs. for-profit communication) marked by different rhythmic and creative drivers; non-profit audience analysis; creation of conversations for viral communication impact.

CMGT 580 Chinese Media and Society (4) The political economy of communications and information in China's broader process of development and reentry into global capitalism; particular media and communication conditions and policies.

CMGT 581 Media in Social Services: Design and Evaluation of Campaigns (4) Theory and research issues in the use of media for changing behavior in health, public safety, welfare, and other areas of social services. (Duplicates credit in former COMM 581.)

CMGT 582 Communication for International Development (4) Comparison of traditional communication programs and newer information and communication technologies for analyzing needs of international communities; design, implementation, monitoring, and evaluation of development-related projects.

CMGT 583 Social Marketing and Entertainment Education (4) Theoretical foundations of social marketing and entertainment education; uses of dramatic serials, telenovelas and animation to promote human rights; program design, evaluation.

CMGT 584 Communication and the Multicultural Marketplace (4) Popular culture and marketing communication; race, gender, sexual orientation and consumer culture; consumption patterns and identity, loyalty and self-actualization; cultural marketing campaigns and sociopolitical conflict.

CMGT 585 Communication Leadership in the Entertainment Industry (4) Examination of the communicative elements of leadership in entertainment products and processes; the role of communication experts in supporting, coaching and facilitating entertainment leadership.

CMGT 586 Entertainment Media: Content, Theory, and Industry Practices (4) Examination of social scientific theory and research on patterns of media content; effects of mass media exposure on individuals and society; and industry practices.

CMGT 587 Audience Analysis (4) Fundamental principles of audience research; critique of existing methodologies; implications for global audiences and mass media markets.

CMGT 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the school. Graded CR/NC. (Duplicates credit in former COMM 590.)

CMGT 591 Communication Internship (1–3, max 3, FaSpSm) Field experience in applying communication principles to settings in organizations, campaigns, or other contexts; analysis and assessment of issues and problems. Open to master's degree students in the School of Communication.

CMGT 592 Theory and Practice of Professional Presentations (2) Application of communication and persuasion theories in the creation of oral presentations; critical assessment of the role of new technologies for professional presentations. Not available for students in the M.A. and Ph.D. programs in communication. Graded

CMGT 597ab Communication Research Practicum (2, FaSpSm) Students design and produce an original project appropriate for their emphasis area within the Master of Communication degree. Open to Master of Communication Management students only. *Prerequisite:* CMGT 501 and CMGT 540. (Duplicates credit in former CMGT 597.)

CMGT 599 Special Topics (2–4, max 8)

DIGITAL SOCIAL MEDIA (DSM)

DSM 510 Introduction to Digital Social Media (4, Sp) Explores the sector of digital social media and online communities, with a focus on user experience, social impact, strategic content creation, and models for success. (Duplicates credit in former CMGT 534.) Open only to digital social media majors.

DSM 520 Managing Technologies for Digital Media (4, Sp) Students learn strategy and decision-making for the technical development and management of online sites and mobile apps, including management of platforms, languages, products, and tools. (Duplicates credit in former CMGT 538.) Open only to digital social media majors.

DSM 550 Analytics and Research Methodology (4, Sm) Teaches the use and interpretation of digital analytics as well as the use of research design, methodology, and basic statistics for digital sites and apps. *Prerequisite:* DSM 510 and DSM 520. Open only to digital social media majors.

DSM 560 Digital Media Policy, Law, Practices, and Regulation (4, Fa) Explores laws, policies, and regulations affecting digital social media, including intellectual property, finances, digital content, and gaming. *Prerequisite:* DSM 550. Open only to digital social media majors.

DSM 596 Final Project Capstone (4, Fa) Teams of students develop working sites or apps. Development includes pitching, conceptualizing, developing, and launching of funded, final projects. *Prerequisite:* DSM 510, DSM 520, DSM 550. Open only to digital social media majors.

PUBLIC DIPLOMACY (PUBD)

PUBD 500 Introduction to the Advanced Study of Public Diplomacy (4) Introduction to the advanced academic study of public diplomacy from multidisciplinary perspectives: including media and communication, international relations and history.

PUBD 502 Historical and Comparative Approaches to Public Diplomacy (4) Examines historical and comparative approaches to public diplomacy. Explores public diplomacy operations in public and private settings, by individuals and institutions. Reviews traditional, critical, war, and peace perspectives.

PUBD 504 Global Issues and Public Diplomacy (4) Focuses on critical global issues/challenges that require some form of intervention from the international community. Taught with active learning strategies: case studies and “problem-based learning.”

PUBD 508 The Rhetoric of War and Peace (4) Special exercise in “Think Tank” procedure that explores rhetorics of war and peace from a 21st century perspective.

PUBD 509 Advocacy in Public Diplomacy: Argumentation and Debate (4) Skills and theory based approach to the criticism and development of public diplomacy campaigns. Emphasizes the instruction of advocacy skills to assess the utility of specific campaigns.

PUBD 510 Technologies and Public Diplomacy (4) Explores relationship between diplomacy and technological change. Emphasis on question of how new media may force us to rethink traditional frameworks of public diplomacy.

PUBD 512 Cultural Diplomacy (4) Provides overview of formal cultural diplomacy and concentrates on ways in which non-governmental entities communicate across international boundaries and the effects of those

interchanges.

PUBD 514 Corporate Diplomacy (4) Provides basic public diplomacy and public relations tools for global organizations and their foreign publics.

PUBD 515 Transnational Diplomacy and Global Security (4) Examination of the historical and theoretical basis of diplomatic relationships between states, international organizations, and transnational non-state actors in developing global peace and security policies.

PUBD 516 International Broadcasting (4) History, context and practice of global international broadcasting strategies; technological and financial parameters that shape future international broadcasting strategies; use of radio, television, and Internet.

PUBD 518 International Exchanges and Public Diplomacy (4) Examination of educational and cultural exchanges; variety and experience of participants, flagship exchange programs, economic and social implications of the programs, and measurement of outcomes.

PUBD 519 News Media and the Foreign Policy Process (4) Analysis of news media's role in contemporary diplomacy; historical context; consideration of the professional practices of journalists and those who devise and implement foreign policy.

PUBD 520 Regional Studies in Public Diplomacy (4, max 16) In-depth examination of historical, political, economic, cultural factors that influence public diplomacy efforts within specific geographic regions.

PUBD 522 Hard Power, Soft Power and Smart Power (4) Institutional and cultural perspectives on instruments of state power: military, intelligence, trade, and traditional diplomacy; strategic analyses for determining proper use; desirability of combining resources.

PUBD 524 The Public Diplomacy of Trade (4) Public diplomacy's role in shaping ideas about trade and development and in creating trade agreements, and the use of trade agreements as public diplomacy.

PUBD 526 Public Diplomacy Evaluation (4) Critical examination of challenges and benefits of measuring public diplomacy's impact; terminology and mechanics of evaluation, the measurement community, and varying approaches for evaluation.

PUBD 590 Directed Research (1–12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the school. Graded CR/NC.

PUBD 596 Practicum in Public Diplomacy Research (4) Development and production of original research-based project in the area of public diplomacy. Graded CR/NC.

PUBD 599 Special Topics (2–4, max 8) Special topics in the area of public diplomacy.

Lecturers: Alan Abrahamson, J.D.; Dana Chinn, MBA; Vince Gonzales, M.A.; Rebecca Haggerty, M.S.

Emeritus Professors: Ed Cray, B.A.; Murray Fromson; Felix Gutierrez, Ph.D.; Bryce Nelson, M.Phil.; Clancy Sigal, B.A.

Emeritus Associate Professor: William Robert Faith, Ph.D.

**Recipient of university-wide or college teaching award.*

Degree Programs

The School of Journalism offers Bachelor of Arts degrees in Broadcast and Digital Journalism, Print and Digital Journalism and Public Relations. It also offers minors in News Media and Society and in Advertising. The school stresses a broad-based liberal arts education to enhance writing and reporting and encourages undergraduate students to pursue double majors or minors in disciplines outside the school.

At the graduate level, a Master of Science degree is offered in Journalism and Master of Arts degrees are offered in Specialized Journalism, Specialized Journalism (The Arts) and Strategic Public Relations. The M.S. in Journalism degree is designed for students who have some journalism experience. The program emphasizes multi-platform journalism, but also allows students to build on the specialty of their choice including long-form video, news video, audio, text or digital. The Specialized Journalism degree is designed for experienced professionals and recent journalism graduates interested in developing specialized reporting expertise. The Specialized Journalism (The Arts) degree is designed for experienced professional and art practitioners interested in arts and culture criticism and reporting. The Strategic Public Relations degree emphasizes the requisite skills of that discipline, with an emphasis on strategic problem solving, public relations theory and techniques, writing, research-based planning and analysis, case studies, and the application of the discipline to specific industry categories.

Students are required to practice journalism principles and improve their multimedia skills by writing and reporting for *neontommy.com* (*Annenberg Digital News*), *atvn.org* (*Annenberg TV News*), *annenbergradio.org* (*Annenberg Radio News*), *intersectionssouthla.org* (*Intersections South LA*) and *impact.uscannenberg.org* (*Impact newsmagazine program*). Journalism majors are also encouraged to write and report for the

independent student newspaper, the *Daily Trojan*, at dailytrojan.com.

The school offers several international study programs to undergraduate and graduate students. The USC Annenberg Career Development Office has listings for paid and unpaid internships from around the country. Career advisers conduct mandatory advisement appointments for all sophomores and offer career workshops, guest speakers and mentoring opportunities. Students are advised to participate in at least two internships before graduation.

USC Annenberg School for Communication and Journalism

School of Journalism

Undergraduate Degrees

The School of Journalism offers Bachelor of Arts degrees in Print and Digital Journalism, Broadcast and Digital Journalism and Public Relations. The school also offers minors in Advertising and News Media and Society. Journalism students are encouraged to pursue double majors or minors in other areas of study. They must consult with an undergraduate journalism adviser at least once each semester to receive academic advisement covering major course selection and university degree requirements.

To meet accrediting guidelines, a minimum of 72 units must be completed outside the major area of journalism. A maximum of 16 units of course work taken prior to high school graduation and a combined 32 units of AP, IB and pre-high school graduation course work will count toward this requirement. Journalism and public relations majors can take up to a maximum of 48 journalism units; however, the major unit total (44 units) cannot be exceeded, unless the student has fulfilled the accreditation requirement.

A grade point average of at least C (2.0) on all baccalaureate units attempted at USC, as well as on the combined USC-transfer GPA, is required for undergraduate degrees. A minimum cumulative grade point average of 2.0 in all upper division courses applied toward the major is also required. Students must complete each journalism class with at least a grade of C- in order to count the course toward a major requirement. Journalism courses with a grade of D+ or below must be repeated; courses may only be retaken once.

Admission Requirements

Admission is competitive. Fall 2014 incoming freshmen had an average GPA of 3.94 with an SAT score of 2120-2250 (middle 50%). Transfer students had an average college GPA of 3.70. For admission information and deadlines, refer to the USC Admission Website. All transfer applicants must review the transfer admission application guidelines on the Annenberg Website; contact the Annenberg Admissions Office for more information. USC exclusively uses the Common Application for freshman and transfer admission. Applicants must submit the Common Application and the USC Supplement, both of which can be accessed at commonapp.org. In addition to the university writing samples, a 250-word statement of intent is required; instructions are included with the USC Supplement. Upon admission to the School of Journalism, students will lose transfer credits earned in journalism and public relations course work completed at another college or university.

Students currently enrolled at USC who wish to change their major to journalism must file a formal application with all supporting documents through the Annenberg Student Services Office. Students must have 16 units completed at USC with a minimum GPA of 3.0 in order to be eligible to apply to journalism major. The 3.0 GPA is a minimum standard and does not guarantee admission. Students must have a minimum GPA of 2.0 and a declared major in order to be eligible to apply to journalism minor.

General Education Requirements

The university's general education program provides coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated

person. This program requires six courses in different categories, plus writing, foreign language and diversity requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

Core Curriculum

The School of Journalism’s core curriculum prepares students to write and report for print, broadcast and online media. Print and digital journalism, and broadcast and digital journalism students are required to complete both print and broadcast newswriting and print and broadcast reporting classes. Print and digital journalism majors must complete a newspaper editing and design class; broadcast and digital journalism majors must complete a broadcast production class. In addition to the online media elements integrated into the newswriting and reporting classes, print and digital journalism and broadcast and digital journalism majors must complete an introduction to online media course.

Grammar, Spelling and Punctuation (GSP) Requirement

Journalism majors enrolled in JOUR 202 and public relations majors enrolled in JOUR 209 are required to complete the Grammar, Spelling and Punctuation (GSP) online tutorial before the end of the semester. This test must be taken and passed by the last day of class. Students who do not pass the test will be allowed to retake it once. Students who fail to complete the GSP tutorial within the allotted time frame will not be allowed to progress in the program and will be dismissed from the major.

Note: Students with disabilities may register with the Disability Services and Programs office (DSP) so the DSP staff can assess the nature of the students’ disabilities and recommend the appropriate accommodations to be provided for each student.

Advertising Minor

The advertising minor is designed for students interested in building a career in, or developing a better understanding of, the field of advertising. It explores the key role played by advertising in today's global economy. At no time has advertising been more successful or more controversial than it is today, and this program will explore both the positives and the negatives. Emphasis is placed throughout the program on both the practical skills required to meet the demands of the marketplace and the theoretical underpinnings of those practices. Program content includes: the history of advertising; creation of written and visual advertising elements; the measurement, selection and analysis of media; the concept of "branding;" the role of advertising in creating and maintaining successful brands; the analysis of advertising campaign case studies; and the creation of integrated marketing communications campaigns.

REQUIRED COURSES	UNITS

Select one additional course from the following:

MKT 402	Research Skills for Marketing Insights	4
MKT 405	Advertising and Promotion Management	4
MKT 425	Marketing on the Internet	4
Total units		24

News Media and Society Minor

News media and society is a journalism minor that explores the responsibilities, the influence, the ethics and the diversity of the news media. It explores the myths about news media in the United States and explains what the news media are, how they work, what they do wrong and what they do right, and why they are important to a society whose citizens depend on the free and unfettered flow of information. This minor will help all students in all majors to understand one of the most important and misunderstood forces in American society: the news media.

News media and society benefits every student at the university because it gives students a new appreciation and understanding of the news media that so much influence their lives on a daily basis.

REQUIRED COURSE, LOWER DIVISION		UNITS
JOUR 201	History of News in Modern America	4

REQUIRED COURSES, UPPER DIVISION		UNITS

Total units		24

Students are urged to choose their 16 upper division units from these classes:

JOUR 373	Journalism Ethics Goes to the Movies	4
JOUR 375	The Image of the Journalist in Popular Culture	4
JOUR 460	Social Responsibility of the News Media	4
JOUR 466	People of Color and the News Media	4
JOUR 467	Gender and the News Media	4

Minor in Media Economics and Entrepreneurship

The interdisciplinary minor in media economics and entrepreneurship is available to students in all schools and departments. It introduces students to the trends of the contemporary media and information industries and gives them an understanding of the role that entrepreneurship plays in the new economy. Students with professional media industry aspirations will learn basic economic literacy and discover the key factors that shape competition in information markets. Further, the minor fosters an entrepreneurial mindset in students and helps them to develop the entrepreneurial skills required to build successful careers and ventures in the media and information sector. For more details see the School of Communication.

Minor in Nonprofits, Philanthropy and Volunteerism

This four course minor enables students to learn about the nonprofit sector — its organizations, philanthropy and voluntary action. See complete description in the USC Price School of Public Policy section.

Annenberg International Programs

Spring Semester in London (Journalism)

The semester program offers students the opportunity to study at City University in London. Participants will be

close observers of the British media and will have an opportunity for personal and direct comparison between the more structured and governmentally controlled media system of the United Kingdom and the *laissez faire* approach to media regulation in the United States. Students earn 8 USC journalism elective units and 8 social sciences units.

Spring Semester in London (Public Relations)

In the spring of their junior year, USC Annenberg public relations students can spend a spring semester at the University of Westminster in London, one of the leading British institutions for the academic and professional study of public relations and media, culture and society. Students will be integrated into the University of Westminster, and will take courses across the four Westminster campus locations around central London. Students will live in the central London district of Marylebone, and will be immersed into the public relations and media hub that is London.

Students earn a total of 16 units at Westminster; up to 8 USC upper division journalism elective units toward their public relations major and 8 general electives units.

Spring Semester in New Zealand (Journalism and Public Relations)

The semester program offers students the opportunity to study at the Auckland University of Technology in New Zealand, a leading southern hemisphere school of journalism and media studies. Fully integrated into the university and its vibrant urban surroundings with strong connections to the nation's indigenous heritage, the program allows students to earn 8 units that fulfill journalism electives and 8 units of general electives.

Summer Internship in South Africa (Advanced Journalism Majors)

Students participating in this three-week program will report extensively on the National Arts Festival in Grahamstown, South Africa. The festival is the largest of its kind on the continent and attracts performers from all over the world. Students report for *Cue Magazine*, a publication managed and run by Rhodes University. Students will receive one unit of internship credit.

International Communication Studies — London, Paris, Prague and Rome

The International Communication Studies program (ICS) allows undergraduate students to study a range of approaches to public communication media across Europe.

Students divide the five-week course into stays in Los Angeles, London, Paris, Prague and Rome. In addition to regular class meetings, students discuss the interplay of current world issues and international media practices with communication practitioners from international news and public relations media, government institutions, private industry and global organizations.

Students enroll in JOUR 482 Comparative Media in Europe (4 units).

For further information, contact Annenberg International Programs at (213) 821-1276, email [✉ ascintl@usc.edu](mailto:ascintl@usc.edu) or visit annenberg.usc.edu/international.

Honor Society

Lambda Pi Eta is a national communication/journalism honor society that is open to declared communication, journalism and public relations majors who have completed (or are currently registered for) at least 60 units, at least 12 of which are in the major. To be eligible, students must have a USC GPA and a major GPA of 3.5 or higher.

Academic Integrity Policy

Since its founding in 1971, the USC School of Journalism has maintained a commitment to the highest standards of ethical conduct and academic excellence. Any student found plagiarizing, fabricating, cheating on examinations, and/or purchasing papers or other assignments faces sanctions ranging from an "F" on the assignment to dismissal from the School of Journalism.

Graduate Degrees

The School of Journalism offers one Master of Science degree program in Journalism, one certificate in Journalism and three Master of Arts degree programs in Specialized Journalism, Specialized Journalism (The Arts) and Strategic Public Relations.

Students enrolled in the M.S. in Journalism will learn how to write, report, produce, code, publish and promote (through social media) cross-platform stories in a converged news environment under intense deadline pressure. Students are also offered courses that provide a specialty in an area of interest which may prepare them for more specific careers in television news, radio news, long-form audio and video documentary production, online video and audio news production, and various forms of text reporting (including newspapers, magazines and online webtext). Classes are also offered that allow students to build on basic digital skills and embark on careers in data journalism, data visualization, app creation, online design and publishing, and coding.

The M.A. in Specialized Journalism is a program geared toward experienced journalists seeking subject-matter expertise and toward experienced professionals in other fields seeking journalism skills to advance their expertise. The program is also open to recent journalism school graduates with records of excellence and a demonstrated aptitude and commitment to developing an expertise in a specialized field of reporting.

The professionally oriented M.A. in Strategic Public Relations degree is designed to train both recent graduates interested in the PR/communication field and young professionals considering transitions into, or seeking to advance their careers, in that field, for management-level positions in all types of organizations. In their first year, all students take a core group of courses focusing on strategic problem-solving, research-based actionable insight, business acumen and skills, and in their second year they choose from a wide variety of highly specialized electives.

Admission Requirements

Prerequisites

An applicant must have the equivalent of a four-year bachelor's degree from an accredited college or university for the M.S. or M.A. degree. This is not required for the graduate journalism certificate.

Criteria

Minimum recommended criteria are a 3.0 GPA for undergraduate work and all graduate work, and valid Graduate Record Examinations (GRE) General Test scores; the GMAT is not accepted in lieu of the GRE. International applicants are required to take the Test of English as a Foreign Language (TOEFL) and should receive a score of at least 114-115 on the Internet-based exam; or the International English Language Testing System (IELTS). All completed applications are reviewed by the faculty admission committee even if the applicant's academic quality is below the minimum recommendations. Applicants are strongly encouraged to take the Graduate Record Examinations one month prior to the application deadline. GRE scores are valid for five years; TOEFL and IELTS are valid for two years.

In addition, applicants are judged on a statement of purpose, résumé, writing sample and three letters of recommendation submitted on their behalf. Professional journalism or internship experience is expected for the M.S. in Journalism and required for the nine-month degree program in Specialized Journalism. A professional work bibliography and samples must be uploaded to the online application. No professional public relations work experience is required for the M.A. in Strategic Public Relations.

Procedure

Applicants must complete and submit the online USC Graduate Admission Application. Refer to the Annenberg graduate application guidelines on the Annenberg Website for details before initiating the application. In addition, international students must submit official TOEFL or IELTS scores for admission consideration and, after submitting the online graduate admission application, a Confidential Statement for Financing Studies at USC.

Applicants must upload the following supporting materials to the online USC Graduate Admission Application: statement of purpose, unofficial copy of all transcripts, writing sample and résumé. Letters of recommendation must be submitted online. Official GRE and TOEFL or IELTS scores must be reported electronically from the Educational Testing Service (ETS) to USC (institution code 4852). Paper copies of score reports are not required or accepted in lieu of the official ETS report. Official transcripts must be mailed to USC Graduate Admission.

New students are admitted to the M.S. in Journalism, the M.A. in Specialized Journalism and the M.A. in Specialized Journalism (The Arts) for the summer session only. Refer to the graduate application guidelines on the Annenberg Website for application filing dates.

New students are admitted to the M.A. in Strategic Public Relations degree programs for the fall semester only. Refer to the Annenberg Website for application filing dates.

Degree Requirements

All course work applied toward a degree must be approved by the School of Journalism and the Graduate School.

Master of Science and Master of Arts

Studies toward the Master of Science in Journalism require 36 units of prescribed courses and approved electives in the student's field of study. No more than 12 units of 400-level course work may be applied toward the Master of Science in Journalism. Studies toward the Master of Arts in Specialized Journalism require 34 units of prescribed courses and approved electives. No more than 10 units of 400-level course work may be applied toward the Master of Arts in Specialized Journalism. Studies toward the Master of Arts in Strategic Public Relations require 40 units of prescribed courses and approved electives in the student's field of study. Students may take, with prior approval, two of their electives outside the school. No more than 12 units of 400-level course work may be applied toward the Master of Arts in Strategic Public Relations.

Students who earn a GPA of below 3.0 will be placed on academic probation and must improve according to established terms if they are to remain in the school. In the case of courses offered on Credit/No Credit (CR/NC) basis, faculty review of competence will be substituted for grades.

Residence

Students in the Master of Science in Journalism can complete the program in nine months by enrolling in the four-week summer immersion course and enrolling in 16 units in the fall and spring semesters. The School of Journalism will accept only 4 units of approved transferred graduate credit.

The Master of Arts in Specialized Journalism can be completed in a nine-month enrollment cycle that includes the three-week summer session, plus the fall and spring semesters. These programs may be attended on a part-time basis.

Normally, full-time students in the Master of Arts in Strategic Public Relations can complete the program in four semesters.

Foreign Language/Research Tool Requirements

There is no foreign language or research tool requirement for the master's degree.

Grammar, Spelling and Punctuation (GSP)

Journalism and strategic public relations graduate students are required to complete an online tutorial about Grammar, Spelling and Punctuation (GSP) and pass the GSP test before the end of the fall semester of their first year. Students who fail to complete the GSP tutorial and pass the test within the stated time frame will not be allowed to progress in the program and will be dismissed from the School of Journalism. Specialized journalism graduate students are not required to take this online tutorial or the GSP test.

Note: Students with disabilities may register with the Disability Services and Programs office (DSP) so the DSP staff can assess the nature of the students' disabilities and recommend the appropriate accommodations to be provided for each student.

Capstone Project

M.S. in Journalism students must enroll in JOUR 598 Journalism Capstone Project (2 units) in order to graduate.

Master's Thesis

M.A. in Specialized Journalism students normally enroll in JOUR 594ab (2-2 units) in their single year of study.

Master's Thesis/Comprehensive Examination

M.A. in Strategic Public Relations students have the option of completing a master's thesis or taking a comprehensive exam. The thesis option takes two forms: (1) a professional project presenting the results of an extensive public relations project completed by the student; or (2) a research thesis presenting the results of primary research undertaken by the student. In either case, students must establish a guidance committee of three faculty members. The chair must be a full-time faculty member in the School of Journalism. The second member will usually be a full-time Journalism faculty member but may be a person connected with USC in other positions who has specific knowledge of the student's topic. In the latter case, the chair of the committee will submit for the director's approval a detailed presentation of the qualifications of the proposed committee member that justify his or her inclusion. In exceptional circumstances, this committee member may come from outside USC. A detailed presentation of qualifications will be required. The third committee member should be a full-time USC faculty member from outside the School of Journalism. The committee is ultimately subject to the approval of the school dean.

Students must secure approval of the professional project or thesis prior to enrollment in JOUR 594a. Students who elect the thesis option are required to enroll in JOUR 594ab (2-2 units), normally during their second year of study. The 4 units will count toward the approved elective units.

The comprehensive examination option allows students to complete the degree by passing a comprehensive examination in their last semester of course work. The comprehensive examination option is not available to students in the journalism or specialized journalism degree program. Master of Science students must specifically complete a Journalism Capstone Project in order to graduate.

Master of Science in Journalism Curriculum

Students enrolled in the Master of Science in Journalism are required to take 4 units in the summer and 16 units of required journalism courses in the spring and fall. These courses provide intensive preparation considered necessary for graduate studies in journalism at USC. In the 21st century, it is imperative that all journalists understand the basic techniques of writing, reporting and production for text, video, audio and digital media. Upon graduation, students will be routinely expected to function in all news media whether it be in traditional media such as television, radio, newspapers and magazines, or whether it be in new media such as electronic publications, Websites and new video and audio environments. The four required journalism courses in the summer and fall are:

JOUR 528 Summer Digital News Immersion enables students in a four-week intensive course to learn the basics of newswriting, news judgment and technology skills for text, video-audio, and digital environments. Students also learn the fundamentals of journalism ethics, law and covering a diverse society.

JOUR 531L Fall Digital News Immersion gives students a more in-depth experience in digital journalism by providing direct instruction about reporting and writing across multiple platforms and placing them in Annenberg's Converged Media Center to produce professional stories and packages under intense daily deadline pressure.

JOUR 599 Special Topics. Students enroll in the section titled ***Special Assignment Reporting***, which allows students to work on one of six beats in the Media Center: Urban Affairs; Science and Technology; Business and Economics; Sports; Education; and Arts, Culture and Entertainment. Through this class, students will have time to work on more long-term and long-form reporting projects. Students must tell those stories in a variety of mediums (video, audio, webtext, digital elements). The main focus of this class is story and contact development, advanced reporting work, constant critique from instructors and rewriting of stories until they are ready to be published or aired.

JOUR 505 The Practice: Journalism's Evolution as a Profession gives students an appreciation for and an understanding of the relationship between journalism's past and the present, linked by the evolution of journalism as a profession. A special emphasis will be placed on ethics and changing standards and practices in the digital age.

JOUR 560 Seminar in Mass Communication Law gives students the opportunity to study the key legal issues facing journalists today. Students are expected to learn the basic workings of the legal system in the United States, the legal rules that apply to journalists in the United States, how to avoid being sued, and how to write clearly about legal issues.

The three required journalism courses in the spring are:

JOUR 547 The Business of News teaches how the business model of news organizations has evolved over time and how it is being reinvented for the future. The course also explores different strategies for monetizing content.

JOUR 546 News, Numbers and Introduction to Data Journalism provides an overview of the basic quantitative analysis tools and techniques essential to give perspective to a story or to put it in context.

JOUR 598 Journalism Capstone Project guides students through the production of a multimedia journalism capstone project for a master's degree.

JOUR 589	Specialized Reporting: The Changing U.S Population	3
JOUR 596	Follow the Money: Business and Economics Reporting	3
Plus 18 units of approved elective courses		18*

**One elective course must be taken from an Annenberg School program in COMM, CMGT, JOUR or PUBD.*

The Master of Arts in Specialized Journalism is a program geared toward experienced journalists seeking subject-matter expertise and toward experienced professionals in other fields seeking journalism skills to advance their expertise. The program is also open to recent School of Journalism graduates with records of excellence in their university classes and internships and a demonstrated aptitude and commitment to developing an expertise in a specialized field of reporting.

Students must begin the program in summer term, enrolling in a required 4-unit, intensive session course focused on journalism and society and on digital media. In addition to the formal classes, the course includes multimedia skills workshops. This gateway course provides the master's students with a working knowledge of the specialized journalism and the multimedia storytelling skills necessary for study in the program. It sets the stage for two semesters of access to courses as substantively broad as a major research university such as USC makes available and for advanced courses in the School of Journalism's graduate program.

In the fall semester, students will enroll in two courses in the School of Journalism, including a critical thinking course for journalists and a specialized reporting course. With the advice of their academic adviser and faculty mentors, students will select elective course work totaling 8 units appropriate to their fields of specialization. These courses will be drawn from regular graduate and 400-level courses taught across the university. Students also will begin research for their master's professional project. Thesis topics must be approved in advance by faculty. These projects will be extended works of journalism, such as a full-length magazine article, similar radio, television or multimedia treatments or the equivalent in their professional field.

In the spring semester, students will enroll in a journalism seminar focused on the reporting and analysis of decision-making and typically an approved elective in the Annenberg School. Students will also enroll in elective course work totaling 8 units, chosen again from offerings across the university and in consultation with their faculty mentors. Finally, students will complete their master's professional project.

The nine-and-a-half-month program has been designed for a fall and spring semester enrollment cycle; however, students may also elect to complete the program on a part-time basis, but must start with the intensive summer course.

Master of Arts in Specialized Journalism (The Arts)

COURSE REQUIREMENTS (34 UNITS)		UNITS
JOUR 580	Introduction to Specialized Journalism	4
JOUR 591	Arts Writing Practicum	3
JOUR 592	Specialized Journalism: Reporting the Arts	2
JOUR 593	Arts Criticism and Commentary	3
JOUR 594ab	Master's Thesis	2-2
Approved elective courses*		18

**The elective course work must be taken from faculty-recommended lists. One elective must be taken from within the USC Annenberg School for Communication and Journalism. The other electives must be in at least two arts schools, with at least 8 units from one school. The arts schools are Architecture, Art and Design, Cinematic Arts, Dance, Dramatic Arts and Music.*

The Master of Arts in Specialized Journalism (The Arts) is geared toward experienced arts journalists as well as recent graduates holding bachelor's degrees in journalism or one of the arts with records of excellence in their university classes and internships and a demonstrated aptitude and commitment to specializing in arts journalism. The program is also open to experienced artists and practitioners with a highly developed background in at least one art form who want to acquire journalism skills toward a future specializing in the coverage of arts and culture. Those with a focus on lifestyle, popular culture and many forms of criticism not strictly associated with the arts, such as food, will also be able to advance their subject expertise as journalists in this program.

Students will complete 16 units of specialized journalism course work, including a master's professional project and 18 units of approved elective course work from faculty-recommended lists, including one course from the USC Annenberg School for Communication and Journalism. Other electives must be in at least two arts schools with at least 8 units from one school. The arts schools are Architecture, Art and Design, Cinematic Arts, Dance, Dramatic Arts and Music.

Students must begin the program in summer term, enrolling in a required 4-unit intensive summer session course focused on journalism and society and digital media. In addition to the formal classes, the course includes discussions, workshops and field reporting. This gateway course provides master's students with a working knowledge of the specialized journalism background and the multimedia and digital storytelling skills necessary for study in the program. It sets the stage for two semesters of access to courses as substantively broad as a major research university such as USC makes available.

In the fall semester, students will enroll in an arts writing practicum and an arts reporting seminar. With the advice of their academic adviser and faculty mentors, students will select elective course work appropriate to their fields of specialization. These courses will be drawn from regular graduate and 400-level courses taught across the arts schools and within the USC Annenberg School for Communication and Journalism. Students also will begin research for their master's professional project. These projects may be full-length magazine (print or broadcast) treatments of issues in their field or similar professional work.

In the spring semester, students will enroll in a journalism course focused on arts criticism and commentary. Students will enroll in elective course work, chosen again from offerings across the arts schools and from the USC Annenberg School for Communication and Journalism in consultation with the academic adviser and mentors. Finally, students will complete their master's professional project.

The nine-and-a-half-month program has been designed for a fall and spring semester enrollment cycle; however, students also may elect to complete the program on a part-time basis with the approval of the director of the School of Journalism, but must start with the intensive summer course.

Master of Arts in Strategic Public Relations

COURSE REQUIREMENTS (40 UNITS)		UNITS
GSBA 520	Business Fundamentals for Non-Business Professionals	3
JOUR 504	Strategic Public Relations Research, Evaluation and Insights	3
JOUR 508	Introduction to Strategic Public Relations	3
JOUR 510	Legal, Ethical and Social Foundations of Strategic Public Relations	3
JOUR 527	Multimedia Content Creation for Strategic Public Relations	3
JOUR 535	Writing for Strategic Public Relations	3
Plus 22 units of approved elective courses*		

*Students electing the thesis option are required to enroll in JOUR 594ab (2-2 units) and must complete 18 units of approved elective courses. Students electing the comprehensive examination option must complete 22 units of approved elective courses.

Annenberg International Programs

Graduate Journalism Internships — China (Hong Kong or Shanghai), South Africa or United Kingdom
Journalism master's degree students may spend eight weeks at internships in Cape Town, Hong Kong, London or

Shanghai during the summer after their first year of graduate study at USC. Students apply to Annenberg International Programs in the fall semester of their first year. From mid-May to mid-July, they then enroll in JOUR 540 International Journalism Seminar I and JOUR 545 International Internships in the Media while working full-time at internships with prominent media organizations.

Graduate Strategic Public Relations Internships — China (Hong Kong or Shanghai), South Africa or United Kingdom

Strategic Public Relations master's degree students may spend eight weeks at internships in Cape Town, Hong Kong, London or Shanghai during the summer after their first year of graduate study at USC. Students apply in the fall semester of their first year. From mid-May to mid-July, they then enroll in JOUR 540 International Journalism Seminar I and JOUR 545 International Internships in the Media while working full-time at internships with prominent public relations organizations.

For further information, contact Annenberg International Programs at (213) 821-1276, email [✉ ascintl@usc.edu](mailto:ascintl@usc.edu) or visit annenberg.usc.edu/international.

Academic Integrity Policy

Since its founding, the USC School of Journalism has maintained a commitment to the highest standards of ethical conduct and academic excellence. Any student found plagiarizing, fabricating, cheating on examinations and/or purchasing papers or other assignments faces sanctions ranging from an “F” on the assignment to dismissal from the School of Journalism.

USC Annenberg School for Communication and Journalism

School of Journalism

Courses of Instruction

ANNENBERG SCHOOL FOR COMMUNICATION AND JOURNALISM (ASCJ)

ASCJ 100 The Changing World of Communication and Journalism (2, Fa) Survey of major themes in media and communication; exploring what it means to be a professional in the fields of communication, journalism, and public relations.

JOURNALISM (JOUR)

The terms indicated are expected but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

JOUR 190 Introduction to Journalism (2, Fa) Survey of all media and outlets including print, broadcasting, public relations and online journalism, plus analysis of what it means to be a professional journalist.

JOUR 201 History of News in Modern America (4, FaSp) Understanding news today. A survey of how news is gathered, weighed, and disseminated and how historical events have shaped news in the 20th century.

JOUR 202 Newswriting: Print (3, Fa) Introduction to basic skills of print newswriting, news judgment, construction of print news stories. Social responsibility and ethical framework for print journalists. Typing ability required. *Concurrent enrollment:* JOUR 203.

JOUR 203 Newswriting: Broadcast (3, Fa) Introduction to broadcast newswriting with emphasis on the ear and eye. News judgment. Social responsibility and ethical framework for broadcast journalists. Typing ability required. *Concurrent enrollment:* JOUR 202.

JOUR 205 Journalism Practicum (1-2, max 2, FaSpSm) Field experience in journalism, public relations, or related field. Graded CR/NC.

JOUR 209 Effective Writing for Strategic Public Relations (4, FaSp) Focus on the unique writing requirements of social, online, broadcast, print and other media in public relations/strategic communication; emphasis on judgment, context and audience understanding.

JOUR 210x Basics of News Production for Non-Majors (2, max 6, FaSp) Introduction to television, radio, and/or digital news production. Examination of issues in journalism. Graded CR/NC.

JOUR 250 Strategic Public Relations: An Introduction (4, FaSp) Strategies and practices in the growing field of public relations/strategic communication, including landmark cases; special emphasis on historical roots, evolution, current and future practice. (Duplicates credit in former JOUR 350.)

JOUR 253 Theoretical Foundations of Strategic Public Relations (4, FaSp) Emphasis on conceptual, intellectual and analytical skills; knowledge of applied theory for the changing field of public relations/strategic communication. (Duplicates credit in former JOUR 353.) *Prerequisite:* JOUR 250.

JOUR 302 Reporting: Print (3, Sp) Introduction to basic reporting techniques, public records reporting and beginning investigative journalism. Social responsibility and ethical framework for print journalists. *Prerequisite:* JOUR 202, JOUR 203; *concurrent enrollment:* JOUR 303.

JOUR 303 Reporting: Broadcast (3, Sp) Introduction to field reporting, audio and visual media. Social responsibility and ethical framework for broadcast journalists. *Prerequisite:* JOUR 202, JOUR 203; *concurrent enrollment:* JOUR 302.

JOUR 306 Production: Broadcast (3, Fa) Studio and field production for audio and visual media. Social responsibility and ethical framework involving broadcast non-fiction production. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 308 Newspaper Editing and Design (3, Fa) Copyediting and newspaper production layout. Headline and caption writing. Design. Social responsibility and ethical framework involving print production. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 309 Introduction to Online Media (3, FaSp) Convergence journalism and online skill sets. Blogs and Web content production. Social responsibility and ethical framework in digital information technology. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 310 Investigative Reporting (4, FaSp) Reportorial and analytical skills and techniques required for portraying and evaluating contemporary newsworthy events; lectures, discussions. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 330 Photojournalism (4, FaSp) Emphasis on fundamental skills necessary for photojournalism including camera techniques, story ideas and digital darkroom.

JOUR 340 Introduction to Advertising (4, FaSp) History and development of advertising; basic advertising campaigns showing relationships of marketing, creative, print and electronic media.

JOUR 341 Advertising Copywriting (4, Fa) Writing and editing for advertising and commercial copy for all media. *Prerequisite:* JOUR 340.

JOUR 342 Advertising Media and Analysis (4, Fa) Selling, planning, buying for the media; advertising's relationship to society and business; media choice. *Prerequisite:* JOUR 340.

JOUR 343 Advertising Design and Production (4, Sp) Production of advertising materials; emphasis on the creation and design of advertising elements. *Prerequisite:* JOUR 340.

JOUR 351ab Strategic Public Relations Media and Content (4-4, FaSp) a: Introduction to media relations, social media and influencer engagement; intensive writing and creating multimedia content for

traditional, emerging and social media. *Prerequisite:* JOUR 209 and JOUR 250. *b:* Advanced course in writing, digital content and multimedia creation; production of communications collateral for social and owned media channels targeting an array of audiences.

JOUR 371 Censorship and the Law: From the Press to Cyberspace (4) (Enroll in COMM 371)

JOUR 373 Journalism Ethics Goes to the Movies(4, Sp) Ethical issues facing journalists in the complex world of legacy media, social media and the Internet as dramatized in the movies and in the newsroom.

JOUR 375 The Image of the Journalist in Popular Culture (4) The impact of conflicting images of reporters in movies and television on the American public's perception of newsgatherers in the 20th century. A decade-by-decade evaluation.

JOUR 380 Sports, Business and Media in Today's Society (4, FaSp) An inside look at the symbiotic relationship of sports and the media — from the interdependence of sports and media, to the coverage of sports in newspapers, magazines, radio and television. The economic and ethical issues involved, the conflicts of interest, the history and current status of sports coverage in American media today.

JOUR 381 Entertainment, Business and Media in Today's Society (4, FaSp) An examination of the symbiotic relationship of the entertainment business and the media; press coverage of the entertainment industry; Hollywood's relationship with news media.

JOUR 390 Special Problems (1–4, Irregular) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

JOUR 400 Interpretive Writing (4) Weekly assignments in the shorter forms of newspaper and magazine writing: essays, reviews, editorials, opinion-page articles, profiles; analyses of major 20th century journalists. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 401L Online Site Management and Production for Journalists (4, FaSp) Work as executive producers and manage NeonTommy.com, a major website; operate its content management system, produce, curate and aggregate journalism.

JOUR 402 Advanced Television Reporting (4, FaSp) Role of the broadcast journalism reporter; similarities and differences between print and electronic media; application of audio-video equipment; analysis and practical experience. *Prerequisite:* JOUR 306.

JOUR 403 Television News Production (4, FaSp) Production of television news programs; preparation and treatment of form and content; procedures, problems, and practice in planning and producing broadcast news materials. *Prerequisite:* JOUR 306.

JOUR 405 Non-Fiction Television (4, FaSp) Presentation and selection in non-fiction television programs including documentaries, electronic magazines and news series; ethical problems, field research, reporting, interviewing, pre-production. *Prerequisite:* JOUR 306.

JOUR 407 Newsradio (4) Production of radio news: research, reporting, writing, preparation and treatment of form and content: procedures, problems and practice in producing radio news programs.

JOUR 409 Radio News Production (4, Sp) Reporting for public radio news: writing newsgathering, editing, vocal delivery. Study of standards, content and ethics. *Prerequisite:* JOUR 202, JOUR 203.

JOUR 410 Radio Documentary (4) In-depth reporting for public radio news: writing, editing, advanced vocal delivery. Production of long-form radio features and short documentaries. *Prerequisite:* JOUR 409.

JOUR 412 Introduction to Online Publishing (4) Introduction to the methods, theory and production of news publishing on the World Wide Web including basic HTML, graphics production and news design.

JOUR 420 Advanced Photojournalism (4) Emphasis on advanced photojournalism techniques for complex photo storytelling; focus on style, content, design, expression and ethics. *Prerequisite:* JOUR 330.

JOUR 421 Photo Editing for News Media (4) Emphasis on understanding, selection and power of photographs; how they work in concert with words and graphics to inform the public.

JOUR 422 Visual Journalism (4) Emphasis on photographic storytelling in print, video and Web-based media; understanding of visual thinking and imagery techniques.

JOUR 425 Advanced Radio News Production (4) Production of public radio news: producing real-time newscasts for Annenberg Radio News. Newsgathering, assigning stories, anchoring, interviewing, working with reporters, editing and producing live programming. *Prerequisite:* JOUR 409.

JOUR 428 Social, Legal and Ethical Foundations of Public Relations (4, FaSp) Covers the complex intersection of legal standards and regulations, ethical practices and decision making, and social responsibilities for public relations/strategic communication practitioners. *Prerequisite:* JOUR 250.

JOUR 429 Business and Economic Foundations of Public Relations (4, FaSp) Relationship between public relations/strategic communication and other organizational disciplines; understanding business goals and objectives; economic literacy; financial/investor relations; how PR/communication agencies are built and managed. *Prerequisite:* JOUR 351a.

JOUR 430 Writing the Film Review (4, Sp) Techniques of writing the film review; preparation and treatment of form and content; problems, responsibilities and ethics of film reviewing. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 431 Feature Writing (4, FaSp) Techniques of writing newspaper feature stories, including the profile, the light feature, the news feature, the in-depth story; the art of narrative writing. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 432 Sports Commentary (4, Fa) Techniques of reporting and writing sports columns and commentary for print, video, radio and Web-based media.

JOUR 433 Writing About Science (4, Sp) Techniques of writing about science, including news, profiles, features and commentary.

JOUR 435 Writing Magazine Non-Fiction (4, FaSp) A seminar in “how to” interview, research, write — and place — professional quality articles for a full range of magazines/newspapers including women’s, sports, ethnic, local and national. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 436 Magazine Production (4) Publishing and production technologies; economics of magazine publishing including cost analysis, marketing, advertising, and circulation. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 440 Environmental Journalism (4, Sp) Techniques of reporting and writing about the environment. Includes both theory and practice needed for reporters specializing in this area of journalism. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 441 Sports Reporting (2, Sp) News and feature coverage of sporting events, including social and economic factors influencing sports in America. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 443 Business Reporting (2) Techniques of reporting and writing about business, economics and finance. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 444 Reporting on Religion (4) Provides print, online and broadcast journalists with basic tools for reporting on the religion angle of news stories. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 446 Entertainment Reporting (2, Sp) Techniques of reporting and writing about the entertainment business, economics and finances. Analysis of the skills and background needed for reporters specializing in this area of the news. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 447 Arts Reporting (2, Sp) Techniques of reporting and writing about the arts, including television, film, theatre, music, graphic arts, architecture and design. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 448 Government and Public Affairs Reporting (4, Fa) Techniques for covering beats that are the foundation of daily newspaper reporting, including crime, education, immigration and local government.

Prerequisite: JOUR 302, JOUR 303.

JOUR 449 Reporting Los Angeles (2, FaSp) Specialized reporting class focused on Los Angeles that requires intensive fieldwork in the neighborhoods, ethnic communities, and/or among local institutions. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 450 Advanced Strategic Public Relations (4, FaSp) In-depth study of methods for planning, managing and evaluating strategic communication campaigns; critical analysis of contemporary cases; development of campaigns for real world clients. *Prerequisite:* JOUR 351b, JOUR 463.

JOUR 451 Promotional Public Relations (4) Principles and practices of public relations as a basic component in the promotion and marketing of goods and services; regulatory considerations; consumerism. *Prerequisite:* JOUR 250.

JOUR 452 Public Relations in Entertainment (4, Sp) Public relations in the design, promotion, and presentation of popular entertainment, including films, broadcasting, music, expositions, amusement parks, resorts and arenas.

JOUR 454 Sports Public Relations (2, FaSpSm) Introduction to the field of sports information and promotion, including lectures, media assignments, role-playing, and presentations by sports professionals.

JOUR 455 Public Relations for Non-Profit Organizations (4, FaSpSm) Introduction to the specialized field of public relations for non-profit and non-governmental organizations; emphasis on case studies, strategic and critical thinking, and campaign development.

JOUR 456 Public Relations for Diverse Audiences (4, FaSpSm) Researching, planning, executing and evaluating communications campaigns aimed at audiences segmented by culture, lifestyle and other factors. *Prerequisite:* JOUR 250.

JOUR 457 The Role of Celebrity in Public Relations (4) Understanding of the history and application of celebrity in public relations, focusing on the entertainment industry and the notoriety attached to politics and the media.

JOUR 458 Public Relations in Politics and Political Campaigns (4, Fa) Application of public relations principles to the context of political campaigns; emphasis on message development and delivery; relationship between candidate, news media, and electorate.

JOUR 459 Fact and Fiction: From Journalism to the Docudrama (4) Historical, legal and ethical limitations to the misrepresentation of fact. Includes print and broadcast journalism, books, theatre, cinema and new technology.

JOUR 460 Social Responsibility of the News Media (4, Sp) News media as instruments of constructive social change; standards of ethics and aesthetics; interactions between news media and cultural settings; social responsibility of news media personnel.

JOUR 462 Law of Mass Communication (4, FaSp) Press law; government controls on the news media; legal responsibilities of the journalist.

JOUR 463 Strategic Public Relations Research, Analysis and Insights (4, FaSp) Identification of key strategic insights that drive successful communication campaigns, based on research techniques including surveys, content evaluation and social media monitoring. *Prerequisite:* JOUR 351a.

JOUR 465m Latino News Media in the United States (4, Fa) History and growing importance of Latino print and broadcast news media in covering immigration, discrimination, culture, social differences and other aspects of U.S. Latino life.

JOUR 466m People of Color and the News Media (4, Sp) Reporting and portrayal of people of color in

the United States; impact of racial diversity on media, employment and access, and development of media for individuals and communities of color. Open to non-majors.

JOUR 467 Gender and the News Media (4) Gender and news media evolving images of women and men in print and electronic media. Impact of gender in content and style of news, television and cinema. Open to non-majors.

JOUR 468m The American Press and Issues of Sexual Diversity (4, Fa) Examines how news media reflect and affect perception of gay/lesbian issues; provides historical-contemporary context; arms students to bypass rhetoric and knowledgeably evaluate facts.

JOUR 469 Money, Markets and Media (4, Sp) Practical approach to understanding and writing about economic concepts through current events, case studies and historical examples.

JOUR 470 Community Journalism (2, FaSp) Survey of how local journalism functions in a community. Students work as editors/mentors to high school students, writing for school newspaper and other media. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 471 Advanced Multimedia Storytelling (2, Sp) Students create and manage advanced online story packages with multiple digital elements including text, visuals (videos, photos, graphics, etc.), audio, interactivity and navigation. *Recommended preparation:* JOUR 309.

JOUR 473 Emerging Media Strategies for Communication and Public Relations (4, Sp) In-depth, hands-on study of emerging tradigital, social and owned media channels; Emphasis on the evaluation of such media as effective tools for audience engagement. Open only to juniors and seniors in the School for Communication and Journalism.

JOUR 474 Interviewing and Profile Writing (2, Sp) Techniques of, and intensive application in researching and writing interviews and profiles for newspapers and magazines. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 475 Publications Design and Technology (4, FaSp) Art, typography, and other graphic elements in publication design; traditional, contemporary, and advanced production methods, processes, and equipment; representative examples; practice in design.

JOUR 476 Reporting Urban Affairs (4, Sp) Examination of U.S. urban issues with an eye toward history for context; study of emerging 21st century solutions for urban communities. *Prerequisite:* JOUR 302, JOUR 303.

JOUR 477 Web Analytics for News and Nonprofit Organizations (2, FaSp) Introduction to using Web traffic and other audience behavior data to manage Websites and social media for news and nonprofit organizations.

JOUR 481 Careers and Strategies in Health Communication (4) Understanding of the dynamic, changing world of U.S. healthcare; knowledge of healthcare audiences and how to reach them; creating effective strategic communications initiatives.

JOUR 482 Comparative Media in Europe (4, Sm) Examines print, broadcast and public relations media and their interactive roles in multi-national and supra-national settings at sites in both Western and Eastern Europe.

JOUR 483 Negotiating and Reporting Global Change (4, FaSpSm) In-depth multimedia reporting on social, economic and political processes of global impact; combining intense fieldwork and specialized background knowledge.

JOUR 484 American Religion, Foreign Policy and the News Media (4, Sp) Exploration of the influence of American religion on foreign policy from Colonial Era to present; how the news media, reporting on international stories, shapes public opinion.

JOUR 485 Multimedia PR Content: Digital/Social Media Lab (2, Fa) Hands-on lab; Web and new

social distribution platforms; development and management of online content and personal brands; social media trends and applications.

JOUR 486 Multimedia PR Content: Introduction to Digital Design Tools (2, Sp) Hands-on lab; producing multimedia content; basic principles of design; tools and techniques to create digital images and layouts.

JOUR 487 Multimedia PR Content: Introduction to Audio/Video Tools (2, Fa) Hands-on lab; audio/video tools for conceiving, shooting, editing, delivering and archiving compelling stories for online audiences; personal brand building; digital storytelling trends and applications.

JOUR 488 Multimedia PR Content: Visual Communication of Information (2) Overview of tools and techniques available to convey messages and experiences; exploration into graphic design, visual branding, design methods and processes.

JOUR 490x Directed Research (1–8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

JOUR 491 Transmedia, New Media and Strategic PR/Communication (4, Sp) Study of the new rules of message development and dissemination in strategic communication and marketing: Participatory Culture, Transmedia Branding, Spreadable Media, and Crowdsourcing. Open only to seniors and master students in public relations and strategic public relations.

JOUR 492 Personal Branding (4, Fa) Learn to build, promote and manage a personal brand through critical analysis, case study, interactive interpretation and creative problem solving.

JOUR 494 Transmedia, New Media and Strategic Communication (4) Examines nature of consumption and storytelling within a networked culture and how participatory culture, transmedia branding, and spreadable media are changing strategic communication practice.

JOUR 498 Honors Seminar (2, Sp) Intensive study of a subject of contemporary relevance or of professional importance to journalists. *Prerequisite:* admission to Honors Program.

JOUR 499 Special Topics (2–4, max 8, FaSpSm) Selected topics in journalism.

JOUR 500 Media and Society (3, Fa) Analysis of major theories on the role of communication media and society with special emphasis on the role and responsibility of the news media.

JOUR 501 Advocacy Communications (4) Study and evaluation of communications campaigns by civil society actors to influence public policy with a focus on messaging and efforts to shape news coverage.

JOUR 504 Strategic Public Relations Research, Evaluation and Insights (3) Covers use of primary and secondary research methods, analysis, web monitoring and analytics, pre- and post-campaign testing, and other techniques in program planning and evaluation. *Prerequisite:* JOUR 508.

JOUR 505 The Practice: Journalism's Evolution as a Profession (2, Fa) Analyzes the history, ethics and evolution of journalism; Students will be introduced to key innovations and innovators in journalism history as well as multimedia platforms. Open only to journalism majors.

JOUR 506 Multimedia Journalism I: Text (2, Fa) Basics of newswriting and news judgment for text. Fundamentals of journalism ethics, covering a diverse society, pitching stories, blogging and Web aggregation. *Concurrent enrollment:* JOUR 507, JOUR 509.

JOUR 507 Multimedia Journalism I: Video and Audio (2, Fa) Basics of video journalism for broadcast and the Web. Newswriting, shooting and editing images and audio into television and Web news reports. Videography and editing. *Concurrent enrollment:* JOUR 506, JOUR 509.

JOUR 508 Introduction to Strategic Public Relations (3, Fa) A survey of the profession, focusing on the key role of strategic public relations in today's information-based society; provides a social, economic and

political context for the program.

JOUR 509 Multimedia Journalism I: Digital (2, Fa) Basics of multimedia literacy including still photography, video and audio. Contemporary digital storytelling. Legal, ethical and business implications of digital media and journalism. *Concurrent enrollment:* JOUR 506, JOUR 507.

JOUR 510 Legal, Ethical and Social Foundations of Strategic Public Relations (3, FaSp) Explores the origins, effects of, and processes for adhering to the complex network of legal, ethical and social responsibilities of the contemporary PR practitioner.

JOUR 512 Advanced Interpretive Writing (3, Sp) Analysis and writing of editorials, essays, Op-Ed page articles, profiles, and other shorter forms of journalism, combined with study of historic practitioners of those forms.

JOUR 513 Advanced Newswriting and Reporting (3) Reportorial and analytical skills and techniques required in searching out and evaluating newsworthy events. Research and publication of stories.

JOUR 514 Multimedia Journalism II: Text (2, Sp) Reporting and writing daily news and feature stories on deadline for text. Beat reporting, interviewing, sourcing, research, fact checking, Web aggregation, blogging, search optimization skills. *Prerequisite:* JOUR 506; *concurrent enrollment:* JOUR 516, JOUR 518.

JOUR 516 Multimedia Journalism II: Video and Audio (2, Sp) Reporting and writing for television, radio and Internet. Pitch, shoot, write, and produce video and audio news packages, incorporating standups and creative visual storytelling techniques. *Prerequisite:* JOUR 507, *concurrent enrollment:* JOUR 514, JOUR 518.

JOUR 517 Advanced Investigative Reporting (3, Fa) Advanced reportorial and analytical skills and techniques required for evaluating newsworthy events. Group research and publication of stories on important current topics.

JOUR 518 Multimedia Journalism II: Digital (2, Sp) Online story packages with multiple elements including text, visuals, audio, interactivity and navigation. Online ethics and basics of copyright law, design, typography, color, photo usage. *Prerequisite:* JOUR 509; *concurrent enrollment:* JOUR 514, JOUR 516.

JOUR 519 Advanced Magazine Writing (3, Fa) Reporting and preparation of articles for publication; analysis of magazine non-fiction markets; research and writing, techniques, and analysis of magazine markets.

JOUR 520 Advanced Broadcast Newswriting (3) Writing for broadcast, preparation and presentation. Responsibility and ethics of broadcast newswriting. Form and content of broadcast news presentation. Similarities and differences between media.

JOUR 521 Documentary Pre-Production (2, Fa) Pre-production of video documentary including selection of topic, diversity, ethical and legal problems, research and reporting techniques, interviewing, writing, balanced presentation, visual and audio literacy. Open only to journalism majors.

JOUR 522 Video Documentary Production (4, Sp) Production of video documentary including research and reporting techniques, writing, interviewing, field work, editing, legal issues, economics, aesthetics, balanced presentation, ethics, diversity and production problems.

JOUR 523 Public Radio Reporting (2, Fa) Reporting for public radio-style news: writing, newsgathering, editing, vocal delivery. Techniques applicable for broadcast or Web audio stories. Open only to journalism majors.

JOUR 524 Advanced Broadcast Reporting (4) Reporting and writing broadcast news; analysis and practical experience; role of the broadcast journalism reporter; similarities and differences between media; application of audio-visual equipment.

JOUR 525 Public Radio Documentary (4, Sp) Advanced production techniques for public radio-style reports: writing, sound, editing, narrative voice. Techniques applicable for broadcast features or Web audio documentaries. *Prerequisite:* JOUR 523.

JOUR 526 Advanced Broadcast News Production (3) Production of television news programs; preparation and treatment of form and content; procedures, problems and practice in planning and producing broadcast news materials.

JOUR 527 Multimedia Content Creation for Strategic Public Relations (3, FaSpSm) Covers the conceptualization and creation of strategy-based, engaging, primarily web-based multimedia content for use by organizations of all types. *Prerequisite:* JOUR 508 and JOUR 535.

JOUR 528 Summer Digital News Immersion (4, Sm) A journalism immersion experience that orients and familiarizes students with the best practices and standards of cutting-edge multimedia, multi-platform fact gathering, reporting and storytelling. Open only to Journalism majors.

JOUR 529 International Journalism and Public Relations Seminar (2) Preparatory course for Annenberg's summer international internships programs. Introduction to the history, politics, culture and media landscape of the internship country.

JOUR 530 Strategic Public Relations Management (3, Sp) An analytical, case study-based approach to strategic campaign planning, management and execution, with heavy emphasis on problem solving and the role of research.

JOUR 531L Fall Digital News Immersion (6, Fa) Students write, report, produce, code, promote (through social media), and publish/air cross-platform stories in a converged news environment. *Prerequisite:* JOUR 528. Open only to Journalism majors.

JOUR 532 International Public Relations (3) Public information policies and practices of national and supranational government units and national and multinational corporations involved in international relations.

JOUR 533 Web Journalism and Editorial Site Management (2, Fa) Report, edit, and manage a major news Website while operating its content management system; understand best standards and practices in online site management. Open only to journalism majors.

JOUR 534 Case Studies in Public Relations (3, Sp) Analysis of landmark and contemporary public relations cases; evaluation of current literature, programs, and professional personnel; identification of emerging issues.

JOUR 535 Writing for Strategic Public Relations (3, FaSpSm) Intensive focus on the specialized writing requirements of online, broadcast, print and other public relations media; includes content analysis of strategic public relations materials.

JOUR 536 Digital, Social and Mass Media Public Relations Strategies (3, FaSp) Analysis of shifting media environment; development and execution of multi-platform campaigns based on organizational goals and audience characteristics.

JOUR 537 Public Relations and Branding (3, Fa) Concept of branding, including brand definition, brand engagement, brand management and the role of public relations in creating brand value.

JOUR 538 Image Management in Entertainment (3, FaSpSm) In-depth study of the creation and protection of reputations for entertainment properties of all types and the characteristics that distinguish it from other disciplines.

JOUR 539 Introduction to Investigative Reporting (2) Focus on basic investigative reporting; understand its history, how to access records, identify sources, use computer assisted reporting, report in a fair and ethical manner. Open only to journalism majors.

JOUR 540 International Journalism Seminar I (3) Historical perspective of foreign correspondence; examination of the working conditions, problems and consequences of reporting from abroad.

JOUR 542 Foreign Reporting (3) News stories analyzed, researched, and critiqued for validity and background; projects to include editorials, news stories, magazine articles or broadcast reports.

JOUR 545 International Internships in the Media (1, Sm) Intensive field experience at international news media and public relations organizations. Graded CR/NC.

JOUR 546 News, Numbers and Introduction to Data Journalism (2, Sp) An overview of the basic quantitative analysis tools and techniques essential to give perspective to a journalistic story or to put it in context.

JOUR 547 The Business of News (2) Analysis of how the business model of news organizations has evolved over time and, more importantly, how it is being reinvented for the future. Open only to journalism majors.

JOUR 550 Introduction to Online Publishing (3) Methods, theory and publishing of online news; HTML skills, graphics production and design theory.

JOUR 551 Intermediate Online Publishing (4, Sp) Advanced concepts in online publishing; focus on databases, editing, scripting and authoring applications for news Websites.

JOUR 552 Television Reporting and Production (2, Fa) Writing, reporting and producing content for video and digital platforms; similarities and differences between media; application of audio-visual and digital equipment. Open only to journalism majors.

JOUR 553 Coding and Programming for Storytelling (2, Fa) Sketch, design and code a website from scratch, using HTML, CSS and jQuery plug-ins to tell a rich multimedia story. Open only to journalism majors.

JOUR 555 Multimedia and Graphics in Online Publishing (4, Sp) Focuses on the process of creating multimedia, images and graphics for news storytelling on the Web; integration of interactive content, animation and video. *Prerequisite:* JOUR 551.

JOUR 556 Online Journalism Seminar (3, Sp) Writing and reporting for the Internet and other technology platforms; computer-assisted reporting; multimedia storytelling. *Prerequisite:* JOUR 551.

JOUR 560 Seminar in Mass Communication Law (2, Fa) Analysis of major elements of mass communication law, legal issues in contemporary mass communication, and the impact of legal trends on professional journalists. Open only to journalism majors.

JOUR 563 Promotional and Product Public Relations (3, Sp) Planning, managing and evaluating integrated communications campaigns utilizing public relations strategies in concert with advertising and other marketing disciplines; emphasis on research, case studies and campaign development.

JOUR 565 Corporate Public Relations and Reputation (3) Learn all aspects of corporate communications and reputation management through real-time news analysis, cases and senior guest speakers from the world's largest, most admired companies.

JOUR 566 Public Relations for Multicultural and Niche Audiences (2) Developing, managing and evaluating campaigns designed to reach audiences segmented by culture, lifestyle and other factors.

JOUR 568 Crisis Management in Strategic Public Relations (3, FaSpSm) Focuses on theories, concepts and practices in risk assessment, issues monitoring, and crisis anticipation/management in a wide variety of organizational contexts, and from multiple perspectives.

JOUR 569 Ethics in Public Relations (3) Application of public relations principles to ethical conduct in a business, government agency, non-profit organization or consulting entity; emphasis on applicable cases and dialogue.

JOUR 571 Advanced Sports Reporting (3, Fa) Seminar in how to report and write sports: news, previews, profiles, features, columns.

JOUR 572 Reporting on Entertainment and Popular Culture (3, Fa) Reporting about entertainment, popular culture and their impact on American society; survey of past media coverage and current practices.

JOUR 573 Graduate Journalism Practicum (1-4, Sm) Developing work experience through the M.S. in Journalism practicum. Open only to Journalism majors.

JOUR 574 Sports and Society (3) Develop and refine print and multimedia skills to work as a sports journalist. Gain perspective, context and background in how sports intersect with society.

JOUR 575 Converged Media Center (4, Sp) Advanced multimedia news production; preparation and treatment of form and content; procedures, problems, ethics, and practice in operating a daily, 24-7 news outlet.

JOUR 576 The Image of the Journalist in Popular Culture Seminar (2, Sp) Study and analysis of the conflicting images of the journalist in popular culture and its impact on the public's perception of the media and news gatherers.

JOUR 577 Monetization and the New Media (3) Understanding new media through an economic lens. Applying knowledge by creating, reporting and delivering a communications or business strategy model.

JOUR 578 Reporting on Globalization (3) Understanding globalization, its origins, history and major characteristics. Developing skills in reporting, describing, analyzing, and responding to globalization.

JOUR 579 Journalism Internship (1-2, max 2, FaSpSm) Field experience in journalism, public relations, or related field.

JOUR 580 Introduction to Specialized Journalism (4, Sm) Understanding the role of specialized journalism and its changing role in U.S. news media; audience interest in areas of specialized coverage. Open only to specialized journalism (the arts) and specialized journalism majors.

JOUR 581 Specialized Journalism: Research Methods (3, Fa) Advanced skills in the use of expert sources, scholarly resources, computer-assisted and investigative reporting in specialized journalism; social and ethical issues in specialized reporting.

JOUR 582 Specialized Journalism: Reporting Decisions (2, FaSpSm) Reporting and analysis of decision making; case studies and analytical tools in dissecting decisions for readers, listeners and viewers. Open only to specialized journalism (the arts) and specialized journalism majors.

JOUR 583 Managing Communication in the Entertainment Industry (4, Fa) (Enroll in CMGT 543)

JOUR 584 Specialized Reporting: Education, Youth and Learning (3, Fa) Reporting and writing on education; survey of historical and contemporary issues affecting children, families and public education.

JOUR 585 Specialized Reporting: Religion (3, Sp) Reporting and writing on religion; survey of world religion, religion and public life — including politics, gender and science.

JOUR 586 Specialized Reporting: Science (3, Fa) Reporting and writing on science; survey of scientific research fields and evaluation of evidence and claims.

JOUR 587 Audience Analysis (4, Fa) (Enroll in CMGT 587)

JOUR 588 Cities, Climate and Risk (3, FaSpSm) Reporting and writing on urbanization, climate change and environmental harm.

JOUR 589 Specialized Reporting: The Changing U.S. Population (3, Fa) Reporting and writing on immigration and other forms of demographic change; survey of immigration, the journalism it has generated and the impact of coverage.

JOUR 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

JOUR 591 Arts Writing Practicum (3, Fa) Intensive writing workshop on the craft of arts criticism and persuasive writing of different arts genres.

JOUR 592 Specialized Journalism: Reporting the Arts (3, Fa) Reporting and writing on the arts; strategies for arts journalism in the digital era; survey of essays and reviews by great critics.

JOUR 593 Arts Criticism and Commentary (3, Sp) Writing workshops and independent fieldwork; development of critical skills to write socially valuable criticism and commentary about art, entertainment and culture. *Prerequisite:* JOUR 591.

JOUR 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

JOUR 595 Critical Thinking: The Art and Science of Not Getting Fooled (3, Fa) Researching and writing about how not to get fooled as a journalist; includes research, writing and discussion. Open only to journalism and specialized journalism majors.

JOUR 596 Follow the Money: Business and Economics Reporting (3, Fa) Reporting and writing on business, economics and public finance; students produce a series of professional projects for publication. Open only to journalism and specialized journalism majors.

JOUR 597 Financial and Investor Communications (3, Fa) Provides a practical, working understanding of financial communications, concerned primarily with articulating a company's value. This applies to matters of corporate image and financial/investment environment. Open only to public relations and strategic public relations majors. *Prerequisite:* JOUR 508.

JOUR 598 Journalism Capstone Project (2, Sp) Production of a journalism capstone project with multimedia elements for a master's degree. Projects can be single stand-alone pieces, or series of pieces. Open only to Journalism majors.

JOUR 599 Special Topics (2-4, max 8, FaSpSm) Seminar in selected topics in journalism.

USC Kaufman School of Dance

Established in 2012, the USC Glorya Kaufman School of Dance offers students a rigorous curriculum within a conservatory style environment. Students have opportunities to study and collaborate with world-renowned artists. USC Kaufman welcomes its inaugural cohort of BFA candidates in fall 2015.

The USC Glorya Kaufman School of Dance is the newest school at the University of Southern California. Founded in 2012 by a transformational gift from visionary philanthropist Glorya Kaufman, whose commitment to dance and dance education is widely celebrated in both the United States and abroad, USC Kaufman offers a wide variety of classes in a range of dance styles, from ballet to hip hop, contemporary dance and ballroom. Classes are available to all USC students.

Beginning in the fall of 2015, USC Kaufman will offer a Bachelor of Fine Arts degree to a select number of highly competitive undergraduate students. This four-year degree will be housed in the Glorya Kaufman International Dance Center, which is scheduled to open in Spring 2016. Applications to the BFA program are due December 1 of each year.

The BFA curriculum is designed to prepare students to be artists, innovators and entrepreneurs. The hallmark of USC Kaufman will be the development of a new movement model for dance, where intersecting dance techniques create hybrid forms to be expressed in new media, scholarship, studio practice and choreography. USC Kaufman provides students with foundational insight into the creative process, nurtures personal intellectual and artistic development, offers a robust performance repertory and emphasizes the importance of conditioning for dancers and physical wellness. An unparalleled world-class faculty facilitates student interaction with renowned, practicing artists; engages students in interdisciplinary projects; and prepares students for successful futures by providing strategic career venture skills. With opportunities for interdisciplinary study interwoven into the curriculum, students are able to explore collaborations and innovations with established partners, including Glorya Kaufman Presents Dance at the Music Center and the Cedars-Sinai Glorya Kaufman Dance Medicine Center.

USC Kaufman offers minors in dance, which serve as thought provoking supplements to major fields of study in other departments and schools. Students may minor in (1) Dance, or (2) Dance in Popular Culture: Hip Hop, Urban and Social Dances. Information about how to apply for a dance minor is available at kaufman.usc.edu. Students interested in pursuing a minor in dance in USC Kaufman will be counseled by both an academic adviser and a faculty mentor.

As one of the world's creative capitals, Los Angeles offers a wealth of opportunities to students, from conducting internships to performing and collaborating with artists across the city.

USC Kaufman School of Dance

Undergraduate Degree

Bachelor of Fine Arts

USC Kaufman will enroll its first freshman class in fall 2015. The BFA is a four-year intensive program designed to prepare students for careers in dance, choreography for stage and cinematic arts, music and/or related fields of pursuit. A diverse array of electives emphasizing a variety of media, in combination with a rigorous established core curriculum, provides students in the BFA with ample opportunity to explore and develop strong personal visions of dance.

Introductory courses focus on technique, performance and composition, while also building a solid foundational knowledge of history and critical theory. Upperclassmen continue to work on technique and performance while also pursuing individual interests under the guidance of faculty mentors.

In the junior and senior years, USC Kaufman students explore one of three concentrations: Dance Performance, Choreography for Stage and Cinematic Arts, or Dance and Music. They are mentored by faculty and assisted by academic advisers in selecting electives that support their personal and professional goals.

Emphasis in the final year of study is placed on the development of a professional quality project in the areas of performance, choreography, music, media, scholarship or entrepreneurship.

Dance Performance Concentration

The Dance Performance concentration is designed for students who are interested in careers as professional dancers or in other performance mediums. Emphasis is placed on providing students with the skills to succeed in a variety of entertainment positions. Students work with artists and scholars in the field, learning essential tools needed for a successful career in dance performance.

Dance and Music Concentration

The Dance and Music concentration provides students with a unique perspective on dance by combining dance training with substantial study in music. Courses in songwriting and music history, as well as in instrumental and vocal training, equip students interested in choreography or dance performance with the knowledge to explore careers in the music and larger entertainment industries.

Choreography for Stage and Cinematic Arts Concentration

The Choreography for Stage and Cinematic Arts concentration is designed to guide students who are interested in the field of dance for the stage, motion pictures, television, digital media and animation. Students are mentored in experimental types of dance media, both as individual performers and in collaboration with other visual and performing artists.

General Requirements

Dance training in one or more dance styles at an intermediate or advanced level of technique. Dance styles

recommended are ballet, classic modern, hip hop, classic jazz and contemporary. Proficiency in ballet and/or hip hop dance is recommended.

Applicants must submit the USC Kaufman Supplement, which includes a video recording and detailed dance resume. All final applicants complete a live audition and interview. Specific audition requirements, along with other entrance requirements, are reviewed on an annual basis and published in the Admission section online at kaufman.usc.edu. A more detailed video recording may be submitted in lieu of a live audition for international students.

Curriculum Requirements

The BFA requires a total of 130 units.

All BFA students are introduced to courses in dance performance, music and choreography for stage and cinematic arts as part of the core curriculum. In addition to required courses, BFA students are encouraged to explore an area of dance performance, choreography for stage and cinematic arts or dance and music in greater depth. Students should select electives based on their personal and professional goals and in consultation with faculty and academic advisers. Electives are typically clustered in a particular field, but may be spread across different areas.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge expected of a well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

Entrance to the Degree Program

Admission to a degree program is granted through USC's admission process, described in the Admission section of this catalogue. A supplementary application form is also required for students seeking admission to the Kaufman School of Dance, which can be obtained from the School of Dance Office of Admission.

Audition

A performance audition is required of applicants to the BFA degree program in the Kaufman School of Dance. Refer to individual curriculum listings for details.

Minors in Dance

Minor in Dance in Popular Culture: Hip Hop, Urban and Social Dance

Dance in Popular Culture delves into the historical, social and aesthetic issues of dance in the contemporary settings of entertainment, concert, vernacular and recreational forms. This minor is designed to explore the foundations and structures of hip hop, urban and social dances and to introduce and orient non-major students to the language of dance in contemporary society. In the hip hop culture dance has become a major avenue of expression, acceptance and power. This minor will address issues of art, race and politics within the parameters of dance as an art form, entertainment and personal expression.

This minor consists of one lower-division course, two upper-division courses and four units of elective courses. Students must be in good academic standing to be admitted. No previous dance experience is required.

REQUIRED LOWER DIVISION COURSES (4 UNITS) UNITS

DANC 280	Introduction to Dance as an Art Form	4
----------	--------------------------------------	---

REQUIRED UPPER DIVISION COURSES (8 UNITS) UNITS

DANC 402	Urban Folk and Street Dance: History and Culture	4
DANC 412	African American Dance	4

ELECTIVE COURSES (4 UNITS) UNITS

DANC 107	World Perspective on Dance Performance	2
DANC 212	Dance in Popular Culture	2
DANC 432	Creativity, Culture, Commerce and Community	4
DANC 462	Dancing on the Screen	2
Dance Technique Course*		2
Required dance units		16

TECHNIQUE COURSES UNITS

DANC 185	Hip Hop Dance	2
DANC 181ab	Modern Dance	2
DANC 182ab	Advanced Modern Dance	2
DANC 183abcd	Ballet	2
DANC 184abc	Jazz Dance	2
DANC 188ab	International Style Ballroom Dance	2

**Students may only apply one technique course from this list toward the minor.*

Minor in Dance

The minor in dance presents undergraduate students with a broad yet deep foundation in dance. The program offers a variety of courses in dance technique, history, culture, critical theory, choreography and performance.

The minor is open to all undergraduates. A minimum of 20 units are required to complete the program. Students applying to this minor must have a minimum GPA of 2.0.

REQUIRED LOWER DIVISION COURSES (4 UNITS) UNITS

DANC 280	Introduction to Dance as an Art Form	4
----------	--------------------------------------	---

REQUIRED UPPER DIVISION COURSES (4 UNITS) UNITS

DANC 442a	International and Historical Perspectives in Dance	4
-----------	--	---

ELECTIVE COURSES (12 UNITS)		UNITS
DANC 107	World Perspective on Dance Performance	2
DANC 212	Dance in Popular Culture	2
DANC 285L	Elements of Dance Production	4
DANC 380	Historical Approaches to Dance	4
DANC 385L	Choreography and Performance	4
DANC 388	Senior Seminar in Dance	4
DANC 432	Creativity, Culture, Commerce and Community	4
DANC 452	Dancing with Words	4
DANC 462	Dancing on the Screen	2
DANC 482	Choreography for Television	4
DANC 483	Dance Performance	2
DANC	Technique Course	2-6*

TECHNIQUE COURSES*		UNITS
DANC 181ab	Modern Dance	2
DANC 182ab	Advanced Modern Dance	2
DANC 183abcd	Ballet	2
DANC 184abc	Jazz Dance	2
DANC 185	Hip Hop Dance	2
DANC 188ab	International Style Ballroom Dance	2
Total units required: 20 units		

*Up to 6 units of technique courses may be applied toward the minor.

USC Kaufman School of Dance

Courses of Instruction

DANCE (DANC)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

DANC 101 Colloquium: What is the Medium of Dance Today? (1, max 2, FaSpSm) Topics related to dance techniques, repertory and varied art forms. Aimed at the interdisciplinary expansion of dance literacy and connections to allied art forms. Open only to Dance majors.

DANC 103 Conditioning for Dancers (2, max 4, FaSpSm) Designed for the specific needs of the dancer in preparation for professional training, combining somatic work with the foundation of scientific principles.

DANC 105 Dance Science: Analysis of Dance Movement (4, FaSpSm) A broad overview of the scientific principles of exercise physiology, functional anatomy, kinesiology, and bio-mechanics with applications to dance. *Prerequisite:* DANC 103.

DANC 107 World Perspective on Dance Performance (2, max 4, FaSpSm) The practice and aesthetics of international dance styles through lecture and participant-driven interaction.

DANC 110 Dance Technique I (3, max 12, FaSpSm) Fundamental technique studies in a studio setting. Concentration on classical ballet, hip hop and its derivatives, partnering and contemporary techniques essential

to the dancers' development. *Recommended preparation:* Ballet, hip hop, pointe, modern dance, and/or jazz studies. Placement audition required. Open only to dance majors.

DANC 120 Repertory and Performance I (2, max 4, FaSpSm) Study and guided practice of traditional and contemporary choreographic repertory. Emphasis in choreographic intention, stylistic approaches and performance technique. *Recommended preparation:* Ballet, hip hop, pointe, modern dance, and/or jazz studies. Open only to dance majors.

DANC 130 Improvisation and Composition I: Introduction (2, FaSpSm) An introduction to improvisational and composition skills that start to prepare students for the creative processes of dancing, dance-making and performance. *Recommended preparation:* Extensive Ballet Training. Open only to dance majors.

DANC 131 Improvisation and Composition II: Introduction (2, FaSpSm) Continued investigation and introduction to improvisational and compositional skills in preparation for the creative processes of dancing, dance-making and performance. *Prerequisite:* DANC 130; *recommended preparation:* Extensive Ballet Training. Open only to dance majors.

DANC 181ab Modern Dance (2-2, FaSpSm) *a:* Techniques of modern dance; elements of dance composition. *b:* Advanced techniques of modern dance; elements of choreography and production. (Duplicates credit in former THTR 181ab.)

DANC 182ab Advanced Modern Dance (2-2, FaSpSm) *a:* A continuing study of modern dance skills toward an advanced level of competency. *b:* Advanced technique and composition. (Duplicates credit in former THTR 182ab.)

DANC 183abcd Ballet (2-2-2-2, FaSpSm) *a:* Beginning techniques of classical ballet consisting of basic barre and center work; basic body and arm positions, port de bras, allegro and elementary adagio. *b:* Intermediate techniques of classical ballet with intermediate barre, adagio, allegro combinations and pirouettes; development of a working knowledge of ballet terminology. *c:* Advanced techniques of classical ballet; emphasis on clarity and precision with execution of movement. Study of beats, tours, advanced adagio and allegro, grand combinations, pointe-work. *d:* Elementary to intermediate level ballet technique en pointes for women and men; conditioning and barre exercises; variations from classical and modern ballets. (Duplicates credit in former THTR 183abcd.)

DANC 184abc Jazz Dance (2-2-2, FaSpSm) *a:* Beginning techniques and practice of jazz dance. *b:* Continuing study in the techniques of jazz dance. *c:* Advanced techniques of jazz dance: advanced warm up, rhythmic and isolation exercises, turns and advanced jazz sequences or combinations. (Duplicates credit in former THTR 184abc.)

DANC 185 Hip Hop Dance (2, max 4, FaSpSm) Elements of Hip-Hop dance, including technique, movement, musical rhythm, tempo and phrasing required to develop the skills needed to perform this unique dance form. (Duplicates credit in former THTR 185.)

DANC 188ab International Style Ballroom Dance (2-2, FaSpSm) Representative ballroom dances: waltz, slow foxtrot, tango, and quickstep. *a:* Beginning. *b:* Intermediate. Graded CR/NC. (Duplicates credit in former THTR 188ab.)

DANC 189ab Tap Dance (2-2, FaSpSm) *a:* Basic tap rhythms developed into elementary dances with progression of time steps and other combinations of sound. *b:* Continuing study of tap dancing including more complicated rhythmic patterns and combinations; polishing technique; combinations to varied music and introduction to advanced steps and combinations. (Duplicates credit in former THTR 189ab.)

DANC 201 Colloquium: History of Performance and Cultural Context (1, max 2, FaSpSm) Study of the historical and cultural context of selected dance techniques. Guest lectures and student presentations will inform class discussions. *Prerequisite:* DANC 101. Open only to Dance majors.

DANC 210 Dance Technique II (3, max 12, FaSpSm) Intermediate technique studies in a studio setting. Concentration on classical ballet, hip hop and its derivatives, partnering and contemporary techniques essential

to the dancers' development. *Prerequisite:* DANC 110; *recommended preparation:* Ballet, hip hop, pointe, modern dance, and/or jazz studies. Open only to dance majors.

DANC 212g Dance in Popular Culture (2, max 4, FaSpSm) Examination of the role of dance in popular culture in a studio setting. Practical studies in styles and their evolution in recreational and professional settings.

DANC 218 Introduction to Dance for the Camera: New Media and Editing (2, FaSpSm) Effective navigation and utilization of ubiquitous, portable digital technologies in film to create an individualized archive and portfolio of their choreographic projects and performances.

DANC 220 Repertory and Performance II (2, max 4, FaSpSm) Continued studies and guided practice of choreographic repertory. Investigation of choreographic vocabulary, intention, stylistic approaches, and performance technique for group work. *Prerequisite:* DANC 120; *recommended preparation:* Ballet, hip hop, pointe, modern dance, and/or jazz studies. Open only to dance majors.

DANC 230 Improvisation and Composition III: Intermediate (2, FaSpSm) Expansion of improvisation and composition skills for the creative processes of dancing, dance-making and performance. *Prerequisite:* DANC 131; *recommended preparation:* Extensive Ballet Training. Open only to dance majors.

DANC 231 Improvisation and Composition IV: Intermediate (2, FaSpSm) Further development of improvisation and composition skills for the creative processes of dancing, dance-making and performance. *Prerequisite:* DANC 230; *recommended preparation:* Extensive Ballet Training. Open only to dance majors.

DANC 280g Introduction to Dance as an Art Form (4, FaSpSm) Gateway to the minor in dance. Concepts of art exemplified in dance; origins and evolution of classic and contemporary dance forms; elements of art criticism applied to dance productions. Required attendance at dance concerts and art exhibits. (Duplicates credit in former THTR 280.)

DANC 282 Activities for Professional Preparation: Dance (1) Fundamental movements and composition in modern and aerobic dance; study of popular social dance forms; teaching and evaluation methodologies; course and class planning. (Duplicates credit in former THTR 282.)

DANC 285L Elements of Dance Production (4) Theoretical aspects of creativity, choreography, accompaniment, dance notation, and production; application in individual and group composition. Lecture, 2 hours; performance laboratory, 6 hours. (Duplicates credit in former THTR 285.)

DANC 301 Colloquium: The Role of the Dance Artist in Society (1, max 2, FaSpSm) Examination of the role of the artist in society. Development of an individual understanding and guiding philosophy for professional development in the dance field. *Prerequisite:* DANC 201. Open only to dance majors.

DANC 302g Urban Folk and Street Dance: History and Culture (4, max 8, FaSp) Introduction to the history and practice of Urban Folk Dance including hip hop, freestyle, street dance and the relevant social dances of the 20th century. (Duplicates credit in former DANC 402.)

DANC 310 Dance Technique III (3, max 12, FaSpSm) Advanced technique studies in a studio setting. Concentration on classical ballet, hip hop and its derivatives, partnering and contemporary techniques essential to the dancers' development. *Prerequisite:* DANC 210; *recommended preparation:* Ballet, hip hop, pointe, modern dance, and/or jazz studies. Open only to dance majors.

DANC 320 Repertory and Performance III (2, max 4, FaSpSm) Study and guided practice of new works and developing roles. Emphasis on the dancer as collaborator in the creative process. *Prerequisite:* DANC 220; *recommended preparation:* Ballet, hip hop, pointe, modern dance, and/or jazz studies. Open only to dance majors.

DANC 330 Improvisation and Composition V: Advanced (2, max 4, FaSpSm) Students will learn a series of intermediate improvisational and compositional systems for generating and modifying movement. *Prerequisite:* DANC 231; *recommended preparation:* Extensive Ballet Training. Open only to dance majors.

DANC 331 Improvisation and Composition VI: Advanced (2, max 4, FaSpSm) Further development in

a series of advanced improvisational and compositional systems for generating and modifying movement. *Prerequisite:* DANC 330; *recommended preparation:* Extensive Ballet Training. Open only to dance majors.

DANC 342g International and Historical Perspectives in Dance (4, FaSp) Exploration of dance as an art form in its artistic, political, and socio-cultural climate. Studies of the continuum of dance within its historical context. (Duplicates credit in former DANC 442a.)

DANC 345 Artist in Residence (1-4, max 8, FaSpSm) Investigation and development of choreographic methods and practices through observation and active participation with the guest artist. *Prerequisite:* DANC 110, DANC 120, DANC 131. Open only to Dance majors.

DANC 347 Artist Collaborative (1-4, max 8, FaSpSm) Development of an artistic work of two or more media, working with colleagues and or faculty in allied disciplines. Open only to Dance majors.

DANC 355 Solo/Partnering and Performance (2, max 4, FaSpSm) Intermediate and advanced partnering techniques in classical and contemporary repertory. Solo work and acting techniques studied, developing character and style through gesture and movement. *Prerequisite:* DANC 110, DANC 120, DANC 131. Open only to dance majors.

DANC 362 Pilates Mat Training (2, max 4, FaSpSm) Mat exercises designed to promote healthy movement practices, develop strength, balance, flexibility and coordination.

DANC 363g Dancing on the Screen (2, max 4, FaSpSm) The study of dance in movies, television, internet, mobile devices and new media. Examining dance on screen, influenced by storytelling, camera technology and editing.

DANC 380 Historical Approaches to Dance (4) Roles of dance in pre-technological societies; development of classic and romantic ballet from medieval, baroque, and renaissance periods to contemporary forms. (Duplicates credit in former THTR 380.)

DANC 385L Choreography and Performance (4) Aesthetic concepts in dance and related arts; integration of concepts in choreography, performance, and production; philosophical bases of dance criticism; critical analysis of performances. Lecture, 3 hours; performance laboratory, 3 hours. (Duplicates credit in former THTR 385.)

DANC 388 Senior Seminar in Dance (4) Synthesis of principles, philosophy, and history of dance, culminating in senior individual project. (Duplicates credit in former THTR 388.)

DANC 402 Urban Folk and Street Dance: History and Culture (4, max 8, FaSp) Introduction to the history and practice of Urban Folk Dance including hip hop, freestyle, street dance and the relevant social dances of the 20th century.

DANC 410 Dance Technique IV (3, max 12, FaSpSm) Pre-professional technique studies in a studio setting with concentration on classical ballet, hip hop and its derivatives, and contemporary techniques essential to the dancers' development. *Prerequisite:* DANC 310; *recommended preparation:* Ballet, hip hop, pointe, modern dance, and/or jazz studies. Open only to dance majors.

DANC 412 African American Dance (4, max 8, FaSp) Exploration of the discursive foundations, political motivations, and aesthetic strategies of dance writers and artists whose works have enabled the category of "black dance."

DANC 420 Repertory and Performance IV (2, max 4, FaSpSm) Study and guided practice of significant roles in new and existing choreography. Emphasis on refinement of partnering, solo and group performance technique. *Prerequisite:* DANC 320; *recommended preparation:* Ballet, hip hop, pointe, modern dance, and/or jazz studies. Open only to dance majors.

DANC 430 Improvisation and Composition VII: Upper Level (2, max 4, FaSpSm) Delving into complex strategies for creating and analyzing choreographic composition, as well as processing and composing embodied information in real-time at the upper level. *Prerequisite:* DANC 331; *recommended preparation:*

Extensive Ballet Training. Open only to dance majors.

DANC 431 Improvisation and Composition VIII: Upper Level (2, max 4, FaSpSm) Continued studies of complex strategies for creating and analyzing choreographic composition, as well as processing and composing embodied information in real-time at an upper level. *Prerequisite:* DANC 430; *recommended preparation:* Extensive Ballet Training. Open only to dance majors.

DANC 432 Creativity, Culture, Commerce and Community (4, FaSpSm) Exploration of artistic entrepreneurial mechanisms to initiate innovative endeavors in the professional dance world which are relevant to today's culture, communities, customs, and business landscape.

DANC 442ab International and Historical Perspectives in Dance (4-4, FaSpSm) Exploration of dance as an art form in its artistic, political, and socio-cultural climate. Studies of the continuum of dance within its historical context.

DANC 452 Dancing with Words (4, FaSpSm) Development of descriptive and analytical skills for dance writing (journalism, education, scholarship, audience development, marketing) and refinement of social-media expertise to connect with relevant audiences.

DANC 470 Dance Leadership (2, FaSpSm) Preparation for leadership in the dance world including structuring companies, marketing choreography, obtaining financing as a dance-maker, collaborating dance initiatives, and leading in dance education.

DANC 480 Advanced Performance Studies: Senior Seminar (1, FaSpSm) Seminar and studio course in preparation of the senior project to be presented in spring semester, in performance, choreography, scholarship or entrepreneurship. *Recommended preparation:* DANC 218, DANC 301, DANC 310, DANC 320, DANC 370. Open only to senior Dance majors.

DANC 482 Choreography for Television (4) Creative choreography of theatrical dance for television. Emphasis on rhythmic analysis, versatility, composition, notation techniques, and stylizing. (Duplicates credit in former THTR 482.)

DANC 483 Dance Performance (2, max 8, FaSpSm) Preparation, rehearsal, and performance of experimental choreography in main stage repertory. (Duplicates credit in former THTR 483.)

DANC 485 Advanced Performance Studies: Senior Project (1, FaSpSm) Development and presentation of senior project in performance, choreography, media, music, scholarship or entrepreneurial enterprise. Senior projects presented to faculty panel in open performance venue. *Prerequisite:* DANC 480; *recommended preparation:* DANC 301, DANC 310, DANC 320, DANC 370, DANC 218, DANC 342 and Directed Research. Open only to senior dance majors.

DANC 490x Directed Research (1-12, max 12, FaSpSm) Individual research and readings. Open only to juniors and seniors. Not available for graduate credit.

DANC 495 Dance Internship (1-4, max 4, FaSpSm) Practical experience linked with information and learned skills. Providing supervised field application of dance theories and practices within a part-time employment context in dance. Open only to junior and senior Dance majors.

DANC 499 Special Topics (2-4, max 8) Selected topics of current interest.

DANC 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

DANC 599 Special Topics (2-4, max 8) Seminars in selected areas of study.

DANC 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

Herman Ostrow School of Dentistry of USC

Herman Ostrow School of Dentistry DDS students care for a patient in the Norris Dental Science Center. Under the supervision of expert faculty, dental students and residents provide a wide range of oral health care services to patients, from routine checkups and cleanings to fitting braces and treating oral diseases.

Since 1897, the Herman Ostrow School of Dentistry of USC has provided students with unique, intensive clinical experiences using the most advanced techniques and technologies in the field. Graduates form a tightly knit community of proud alumni, provide top-notch patient care, conduct world-class research and lead the oral health field.

The school's strength is its educators. Their world-renowned expertise, combined with innovative curricula, gives students the strong clinical education they need to become great oral health professionals. The curricula include the Doctor of Dental Surgery program, the baccalaureate in dental hygiene program and postdoctoral advanced and specialty programs: endodontics, general practice residency, operative dentistry, oral and maxillofacial surgery, oral medicine, orofacial pain, orthodontics, pediatric dentistry, periodontology and prosthodontics. Other programs include an advanced standing program for international dentists; a master of science degree in dental hygiene; online master of science degrees in geriatric dentistry, orofacial pain and oral medicine; an online graduate certificate program in geriatric dentistry, and master's and doctor of philosophy degrees in craniofacial biology.

The Herman Ostrow School of Dentistry's celebrated status as a well-funded dental and craniofacial research unit allows students to enrich their education through laboratory activities and bolster their clinical skills with strong scientific foundations.

Through community service, the Herman Ostrow School of Dentistry provides valuable clinical experiences to the students while helping disadvantaged individuals improve their oral health. Serving the surrounding community helps students develop clinical competency and learn to treat all members of diverse communities with care and compassion.

Faculty

G. Donald and Marian James Montgomery Dean's Chair in Dentistry: Avishai Sadan, DMD, MBA

George and Mary Lou Boone Chair in Craniofacial Molecular Biology: Yang Chai, DDS, Ph.D.

Don and Sybil Harrington Foundation Chair in Esthetic Dentistry: Pascal Magne, DMD, Ph.D.

Sykes Family Chair in Pediatric Physical Therapy, Health and Development: Linda Fetters, Ph.D.

Ralph W. and Jean L. Bleak Professor of Restorative Dentistry: Winston Wan-Li Chee, BDS

Charles M. Goldstein Professor of Community Dentistry: Roseann Mulligan, DDS, M.S.

Mrs. T.H. Chan Professorship in Occupational Science and Occupational Therapy: Florence Clark, Ph.D.

Professors: Yang Chai, DDS, Ph.D.; Chih-Kuang (Casey) Chen, DDS, Ph.D.; Glenn Clark, M.S., DDS; Tina F. Jaskoll, Ph.D.; Michael Melnick, DDS, Ph.D.; Cedric Minkin, Ph.D.; Roseann Mulligan, M.S., DDS; Mahvash Navazesh, DMD; Janet Moradian-Oldak, Ph.D.; Michael Paine, BDS, Ph.D.; Pragna Patel, Ph.D.; Ilan Rotstein, DDS; Avishai Sadan, DMD, MBA; Michael L. Schneir, M.S., Ph.D.; Jorgen Slots, MBA, DDS, Ph.D., DMD; Malcolm L. Snead, DDS, Ph.D.

Associate Professors: Winston Wan-Li Chee, BDS; George C. Cho, DDS; Sillas Duarte, Jr., DDS, Ph.D.; Robert G. Keim, DDS, Ed.D.; Ralph L. Leung, M.S., DDS; Pascal Magne, DMD, Ph.D.; Glenn Sameshima, DDS, Ph.D.; Arnold Tiber, DDS, Ph.D.; Homayoun H. Zadeh, DDS, Ph.D.

Associate Professor (Librarianship): John P. Glueckert, MLIS

Assistant Professors of Dentistry: Ruchi Bajpai, Ph.D.; Amy Merrill-Brugger, Ph.D.; Ramiro Murata, DDS, Ph.D.; Parish P. Sedghizadeh, DDS; Jian Xu, Ph.D.; Jiang Zhong, Ph.D.

Professors of Clinical Dentistry: Jane Forrest, RDH, Ed.D.; Michael Jorgensen, DDS; Diane Melrose, BSDH, M.A.; Michael J. Mulvehill III, DDS, MBA; Douglas Solow, DDS, MBA

Associate Professor (Clinical Scholar): Stephen Yen, DMD, Ph.D.

Associate Professors of Clinical Dentistry: Loris Abedi, DDS*; Gardner Beale, DDS; Linda Brookman, RDH,

MSHS; Reyes Enciso, Ph.D.; Richard Furuichi, DDS; Joyce Galligan, R.N., DDS; Richard Green, M.S. Ed., DDS; Michelle Ikoma, DDS; Kian Kar, M.S., DDS; Thomas Allen Levy, M.S., DDS; Niel Nathason, MPH, M.A.; Saravanan Ram, DDS, MDS; Ramon Roges, DDS; Eddie Sheh, DDS; Donna Smith, RDH, M.S.Ed.; Piedad Suarez, DDS; Joyce Sumi, RDH, M.S.; Richard Udin, DDS; Mark Urata, DDS, M.D.

Assistant Professors of Clinical Dentistry: Tae Ahn, DDS; Lupe Arevalo, RDH; Kim Austin, DDS; Nissim Benbassat, DDS; Yaara Berdan, DDS; Jucheng Chen, DDS, Ph.D.; Nam Cho, DDS, M.D.; Christine Edwards, Ph.D.; Laura Elizondo, DDS; Sharon Faust, DDS; Alon Frydman, DDS; Dan Grauer, DDS, Ph.D.; Ripsik Gukasyan, DDS; Phuu Han, DDS, Ph.D.; Tran Han, DDS; Helia Hooshangi, DDS; Annie Huang, DMD; Julie Jenks, M.S., MPH, DDS; Boris Keselbrenner, DDS*; Tae Kim, DDS; Janet Lent, DDS; Richard S. Lin, DDS; Bethany Lowe, DDS; W. Michael Madden, DDS; Ali Ostadali Makhmalbaf, DDS; Chris Mayeda, DDS; Mehdi Mohammadi, MPH, DDS; John Morzov, DDS; Lisa Pedersen, MSW; Jose Polido, DDS; Elham Radan, DMD, M.Sc.; Rafael Roges, DDS; Gelareh Ronaghi, DDS; Neimar Sartori, DDS, Ph.D.; Santosh Sundaresan, DDS*; Marlene Talley, DDS; Thomas Tanbonliong, Jr., DDS; Antonia Teruel, DDS, Ph.D.; Anita Tourah, DDS; Natalie Tung, DDS, M.D.; Tomoko Wada, DDS

Research Assistant Professors: Matthew K. Lee, M.D.; Alireza Moshaverinia, DDS, Ph.D.; Yan Zhou, Ph.D.

Clinical Professors: Ralph B. Allman, M.S., DDS; David Good, DDS; John J. Lytle, DDS, M.D.; Gayle Macdonald, Ph.D.; Dennis-Duke R. Yamashita, DDS; Margarita Zeichner-David, Ph.D.

Clinical Associate Professors: Barbara D. Edwards, RDH; Mina Habibian, DMD, Ph.D.; John Kishibay, DMD, Ph.D.; Bach Le, DDS, M.D.; Michael Padilla, DDS; Anthony Park, DDS; Richard Phillips Jr., DDS*; M. Hazem Seirawan, DDS, M.S., MPH; Hovhanness Shnorhokian, DMD, Ph.D.; Ann Spolarich, Ph.D.; James W. Tom, DDS, M.S.; Arman Torbati, DDS; Leon Unterman, DDS; Stefan Zweig, DDS

Clinical Assistant Professors: Mainul Ahsan, Ph.D.; Alexander Alcaraz, DMD; Gabriela Anderson, DDS; Vartuhi Avanesian, DDS; Nasrin Bahari Chopiuk, Ph.D.; Ting Cho, DDS; Simon Choyee, DDS; Chloe Cohen, DDS; Xiao Mei Cui, DDS; Sibel Dincer, DDS, M.S.; Irene Esteves, RDH; Andrea Gamble, DDS, M.S.; Ellen M. Grady, B.A.; Melina Gregorian, DDS; Stan Hanes, DDS; Lisa Hou, DDS; Steven Kallman, DDS; David Kang, DDS; Parabeet Kaur, DDS; Alena Knezevic, DMD, Ph.D.; Theresia Laksmana, DMD, M.S.; Jennifer I-Chen Lo, DDS; Stacy Love, DDS; Michael Mashni, DDS; Joel McPherson, DDS; (Mehdi) Mohammad Mohammadi, MPH, DDS; Brett Nagatani, DDS; Camille Nakamura, DDS; Naomi Nguyen, DDS, M.S.; Lisa Oshiro, RDH; Vanessa Pardi, DDS, Ph.D.; Kristine Parungao, BSDH; Dieu Pham, DDS, M.D.; Vanthi Pham, DDS; Lisa Popkoff, DDS; Narendranath Ravindranath, Ph.D.; Adrine Reganian, RDH, M.S.; Lucille Rotstein, B.Ch.D.; Liane K. Sakai, DDS; Mary Satuito, DDS; Daniel Schechter, DDS; Daniela Schmid, DDS, Ph.D.; Natalia Slusky, DDS; Jenny Son, M.S., DDS; Flora Stay, DDS; Judith Tefft, Ph.D.; Jeremy Teoh, MPH, DDS; Christopher Truhan, DDS; Fabiana Varjao, Ph.D.; Lois Velasco, DDS; Xun Sean Xu, Ph.D., DDS; Kiyomi Yamazaki, DDS, Ph.D.

Clinical Instructors: Amelia Andrade-Garcia, RDH; Joiakim Bakhoum, DDS; Joan Beleno, RDH; Katheryn Bowns, RDH; Linus Chong, DDS, M.S.; Patricia Denny, M.A.; Shahrokh Jedian, DDS; Gerald McClellan, DDS; Albert Mizrahi, DDS; Michaela Nguyen, RDH; Carlos Sanchez, RDH; Eugene Zakaryan, DDS

**Recipient of university-wide or school teaching award.*

Degrees Offered

The Herman Ostrow School of Dentistry awards the following degrees: the Bachelor of Science, Dental Hygiene; the Master of Science, Dental Hygiene; the Master of Science, Geriatric Dentistry; the Master of Science, Orofacial Pain and Oral Medicine; the Doctor of Dental Surgery; the Advanced Operative Dentistry Certificate/M.S., Craniofacial Biology; the Advanced Orthodontics Certificate/M.S., Craniofacial Biology; the Advanced Pediatric Dentistry Certificate/M.S., Craniofacial Biology; the Advanced Pediatric Dentistry Certificate/Ph.D., Craniofacial Biology; the Advanced Periodontology Certificate/M.S., Craniofacial Biology; Advanced Dental Education Certificate programs in Endodontics, Geriatric Dentistry, Operative Dentistry, Oral and Maxillofacial Surgery, Orofacial Pain, Oral Medicine, Pediatric Dentistry, Periodontology, and Prosthodontics; Master of Science in Craniofacial Biology; and the Doctor of Philosophy in Craniofacial Biology. The school also offers a minor in craniofacial and dental technology.

Herman Ostrow School of Dentistry

General Information

The Grading System

Grades are issued by members of the faculty to indicate to students their level of achievement and to provide information to committees given the responsibility of reviewing a student's total academic record and assigning honor or deficient status.

Newly admitted students to the Doctor of Dental Surgery (DDS) program, the Advanced Standing Program for International Dentists and Bachelor of Science in Dental Hygiene (B.S.) students are bound by the university grading system (excluding plus/minus grades), which is detailed in the Academic Standards section of this catalogue.

Grades used by course directors of required advanced specialty classes are: "Cr" — credit, "CrH" — credit with honors and "NCr" — no credit. Other notations appearing on the transcript are: "IP" — indicates that the grade in a course is not issued until a subsequent trimester; "IN" — incomplete work; "ICW" — incomplete clinical work; "MG" — missing grade; "W" — withdraw. Students pursuing a Master of Science, Doctor of Philosophy in Craniofacial Biology and students in dental hygiene, doctoral and international classes should refer to the Academic Standards section of this catalogue.

Probation and Disqualification

A student evaluation policy has been developed that outlines methods by which the faculty can recognize outstanding achievements by students and identify those who have difficulty meeting the school's academic standards.

In this policy, the procedures dealing with the assignment and consequences of academic status, including academic probation and disqualification, are outlined in detail. It is hoped that the development of specific guidelines will eliminate confusion and minimize the amount of time spent in determining the student's status, thus allowing faculty and students to concentrate on their primary responsibility — the training of dental health professionals. Copies of student professional performance evaluation committee guidelines are available online on the dental school Website intranet.

DDS (includes Advanced Standing Program for International Dentists)

A student will be placed on academic warning if the GPA of a given Academic Time Unit (ATU) falls below a 2.0; if a failing course grade in a course of 1 unit or less is received; if a student does not successfully pass National Board Part I and National Board Part II or does not take the exams during the time-frame designated, and if in the judgment of the student professional performance evaluation committee, such a warning is warranted for other reasons, such as poor attendance or consistent tardiness.

A student will be placed on academic probation if a failing grade is received in 2 or more units completed in one ATU; if a second consecutive academic warning is warranted; if two conditions that justify academic warning are met in a single ATU or if a single condition is met twice in an ATU, or if a student receives an F in a module that results in an MG, or freshman students in trimesters I, II or III will be placed on academic probation if the quality of preclinical work is unsatisfactory as reflected by a failing (F) grade in the module or if the quality of preclinical work is poor enough to jeopardize student's timely transition to clinic with the rest of the class or if warranted by other factors related to the quality of preclinical/clinical work such as poor attendance, unprofessional behavior and/or poor performance in written examinations or, if in the judgment of the student professional performance evaluation committee, probation is warranted by other academic factors; or if recommended by the group practice director, due to quality and/or quantity of clinical work.

A student will be placed on clinical probation upon recommendation of the group practice director if a grade of "F" is received in any of the graded categories of group practice performance, or, in the judgment of the group practice director, probation is warranted by other factors related to the delivery of health care or clinical accomplishment.

A student will be considered for disqualification if (1) at the end of any trimester during the freshman year (trimesters I,II, III) a student's continued lack of preclinical accomplishment is significant enough to suggest a deterioration of preclinical skills; (2) a second academic probation is warranted; (3) a failing grade is not reconciled; (4) at the end of the academic year the grade point average for the preceding year is below 2.0; (5) academic probation is warranted while repeating a trimester on probation; (6) a deficiency in any area is determined by the Student Professional Performance Evaluation Committee to be insurmountable; (7) at the end of the second trimester of the Advanced Standing Program for International Dentists (ASPID) the cumulative average is less than 2.0; (8) it is recommended by the group practice director, based on severe and irreconcilable deficiencies relating to the quality and/or quantity of patient treatment; and (9) if, at the end of any trimester following trimester VII, a student's ongoing lack of clinical accomplishment is significant enough to suggest a deterioration of skills and/or inadequate treatment of patients assigned to his/her care.

B.S., Dental Hygiene Students

A student will be placed on academic warning if (1) the GPA for any given Academic Time Unit (ATU) is less than 2.0; (2) a failing grade is received in a 1-unit (or less) course; (3) a grade of "D" is received in a 3-, 4- or 5-unit course. A student will be placed on academic probation if 2 units or more of failure are recorded at the end of any trimester; if a second consecutive academic warning is warranted; or if, in the judgment of the Student Professional Performance Evaluation Committee, probation is warranted.

A student will be placed on clinical probation if a grade of "F" is received in any of the graded categories of group practice performance, or, in the judgment of the group practice director, probation is warranted by other factors related to the delivery of health care or clinical accomplishment.

A student will be considered for disqualification if (1) a third probation is warranted at the end of any trimester; (2) a failing grade is not reconciled; (3) at the end of the academic year the grade point average for the preceding year is below 2.0; (4) academic probation is warranted while repeating a trimester on probation; and (5) a deficiency in any area is determined by the Student Professional Performance Evaluation Committee to be insurmountable. In addition to the Dental School evaluation policy (which evaluates courses taken in the Dental School), students in the Dental Hygiene Program are also bound by the university's academic status requirements.

Advanced Specialty Students

A student will be placed on academic probation if a failing grade is received in any course or if, in the judgment of the program director, a student's performance warrants such status due to academic or other factors. A student may be disqualified if the stipulations of a probationary period are not met by the required deadline, a failing grade is not reconciled in the period specified by the course director, or if a deficiency in any area is acquired which is determined by the program director to be insurmountable. A student who is placed on academic probation a second time can continue in the program only with the approval of the program director and the Advanced Student Professional Performance Evaluation Subcommittee.

Honor Status

The Herman Ostrow School of Dentistry recognizes excellence in achievement by assigning special honor status during the course of study and by presentation of awards upon graduation.

Dean's List

Students who complete all course work by a prescribed deadline and earn a grade point average of 3.5 or above for a trimester are placed on the Dean's List. Students shall not be placed on the Dean's list if they are on deficient academic status during that trimester (i.e., academic warning, academic probation and continued academic probation).

Omicron Kappa Upsilon Honor List

The local chapter of Omicron Kappa Upsilon (OKU), a national dental honor fraternity recognizes the top 10 percent of each doctoral dental class at the end of each academic year (August) by including these students on the OKU Honor List. The determination of the top 10 percent is based on a yearly GPA. It should be noted that placement on the OKU Honor List has no relationship to membership in OKU, which is based on overall academic achievement and professional development.

Graduation Awards

There are numerous awards made each year at graduation to recognize excellence in members of the graduating doctoral, dental hygiene and ASPID classes. A complete listing is available at the Herman Ostrow School of Dentistry.

Voluntary Withdrawal/Leave of Absence

The Herman Ostrow School of Dentistry recognizes that in some special instances it may be necessary or beneficial for a student to interrupt or discontinue dental education. A student wishing to withdraw from school or request a leave of absence must contact the Office of Academic Affairs for procedures to be followed. An approved leave of absence will not be granted for more than one year.

Students at the School of Dentistry who have not been formally dropped by the school, are considered enrolled each term unless they have submitted a letter of intent to withdraw. A student's verbal indication that he or she intends to withdraw or failure to settle a fee bill are not sufficient to eliminate the student from class rosters. Final course grades will be collected for students who do not have a letter of intent to withdraw on file with the Office of Academic Affairs.

A student who withdraws at any time during the first three weeks of a trimester will receive no grades for enrolled courses. A student who withdraws after three full weeks of an Academic Time Unit (ATU) will receive a mark of "W" for all enrolled courses not completed. Withdrawal is not permitted after the 12th week of a trimester.

Family Educational Rights and Privacy Act

The University of Southern California recognizes and acts in full compliance with regulations set in accordance with the Family Educational Rights and Privacy Act of 1974 (The Buckley Amendment). A student may have access to all records about him or her maintained by the university except those considered confidential under the act. Students of the School of Dentistry wishing to review records or to appeal for a change in those records should contact the Herman Ostrow School of Dentistry of USC Registrar. A small charge may be made to cover the time and costs of duplication of the record.

Tuition and Fees (Estimated)

Tuition at the Herman Ostrow School of Dentistry is charged on a flat fee basis for enrollment in the regular degree and advanced certificate programs of the school. Exceptions do not apply to students who have courses waived based on their prior education. In such cases, students are charged the standard flat fee for the program in which they are enrolled.

Auditors pay the regular tuition rate. Auditors are not required to participate in class exercises (discussions and examinations); they receive no grades or credit.

The information outlined here is for Herman Ostrow School of Dentistry fees and tuition deposits only. For information about Herman Ostrow School of Dentistry tuition and university fees, refer to the Tuition and Fees section of this catalogue. The university reserves the right to assess new fees or charges as it may determine.

Processing Fee (not refundable):

Domestic applicants	\$85.00
Graduates of foreign dental schools or students requiring a student visa	145.00
Commitment Deposit (not refundable)

Financial Aid

Detailed information concerning financial aid programs available to dental students can be obtained by contacting the Herman Ostrow School of Dentistry of USC Office of Financial Aid at (213) 740-2841, [✉ uscdfa@usc.edu](mailto:uscdfa@usc.edu) or visit dentistry.usc.edu/admission.

Herman Ostrow School of Dentistry

Undergraduate Degree

Bachelor of Science in Dental Hygiene

The mission of the USC Department of Dental Hygiene is to educate and prepare dental hygiene leaders for careers in a diverse and changing health care environment. Implicit in this is a desire to provide a liberal education as well as outstanding clinical experiences. The baccalaureate dental hygiene program is a combination of dental and dental hygiene sciences, supporting sciences and general education.

The curriculum reflects the core values of the profession in private and public health settings. The program is committed to creating a humanistic, educational environment that will facilitate the development of responsible, ethical, oral health professionals who are sensitive to the patient needs and competent in the dental hygiene process of care.

Educational and clinical services provided by dental hygiene students include dental health education, patient assessment, disease prevention and non-surgical periodontal therapy for a diverse population of patients. The program strives to produce graduates who will advance the profession of dental hygiene and improve dental

health care through evidence-based research and scholarly activities. Finally, graduates are competent in self-assessment and scientific methodology in preparation for lifelong learning.

The Bachelor of Science degree in Dental Hygiene requires two academic years of pre-dental hygiene courses followed by two additional years of enrollment in the dental hygiene program.

Admission

Two applications are required, one for the USC Undergraduate Admission Office and one for the School of Dentistry. See the Undergraduate Education Admission section of this catalogue.

Admission to the dental hygiene program of the Herman Ostrow School of Dentistry of USC is granted through the Office of Dental Admissions and Student Affairs that receives and processes all applications, evaluates credentials and mails letters of acceptance to applicants who qualify for entrance. Because of the university's selective admissions policy and limited enrollment, only those applicants are accepted who present evidence of intellectual promise and strong personal qualifications, including good moral character and sound health. Prior to enrollment, accepted students must provide evidence of sound health and meet the school's health requirements. (Before registration, the Student Health Service form, signed by the applicant's attending physician, must be filed with the Student Health Center.)

Application Procedure:

The ADEA Dental Hygiene Centralized Application Service (DHCAS) is the centralized application service for applicants to dental hygiene programs. Please review the instructions for the application at adeadhcas.org. All applicants must select the "Entry Level Bachelor's" as a designation.

In order to begin the ADEA DHCAS application, every applicants will need an email address and a DentPin. The DentPin is a personal identification number used in place of the social security number. To receive a DentPin visit the American Dental Association website at ada.org/dentpin.

At the same time, applicants must apply and gain admission to the University of Southern California, which is granted in all cases by the USC Office of Admission. Applicants must submit a USC Transfer Application online through the Common Application at commonapp.org. Only a letter from the university Office of Admission grants official university admission.

Applications for the Bachelor of Science in Dental Hygiene should be filed well in advance of February 1 of the year in which the student wishes to be admitted. The program begins in the fall.

Although students may transfer to USC at any time and begin prerequisite course work, the dental hygiene curriculum begins in the junior year. Admission to the university does not guarantee admission to the dental hygiene program.

Admission Requirements

Between 30 and 40 students are admitted each year for the curriculum that leads to the Bachelor of Science in Dental Hygiene.

The Committee on Admissions examines credentials and bases its decision on the objective evaluation of these factors: preprofessional training, evidence of scholarship and personal evaluation of the student.

Minimum entrance requirements include: graduation from an accredited secondary school and completion of the following courses which may be transferred in from another college or university or taken at USC prior to being admitted to the dental hygiene program.

General Biology

One semester with lab is required.

Anatomy

One semester with lab is required.

General Chemistry with Lab

One year is required.

English Composition

One year is required. Must include course work equivalent to WRIT 150 and one semester of any transferable English course.

General Physiology Lab

One semester is required.

General Microbiology

One semester is required.

Nutrition

One semester is required.

Introduction to Sociology

One semester is required.

General Psychology

One semester is required.

Public Speaking

One semester is required.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

All dental hygiene students must follow the university's general education requirements.

There is no minimum number of transfer units you must complete before applying to admissions. No foreign course work will be accepted. Dental hygiene prerequisites must be completed prior to the beginning of classes in the dental hygiene program and lower division general education categories must be completed by the time of graduation. All prerequisite course work including required general education course work must be completed with a grade of "C" or better.

The following courses are not transferable: dental assisting, dental technology, secretarial science (typing, shorthand, etc.), or other technically or vocationally related courses.

All entrance requirements must be completed by June 15 preceding the September of admission, and complete final credentials must be on file in the Herman Ostrow School of Dentistry of USC and the USC Office of Admission by July 15 preceding enrollment. Notification of conditional acceptance will be sent by the Ostrow Office of Admission and Student Affairs after May 1.

Orientation

Students who have been accepted into the program and who have reserved their place in the class by paying the appropriate tuition deposit will be forwarded orientation materials by July 15.

Orientation is traditionally scheduled during the week before the first week of classes. The purpose of the program is to acquaint incoming students with the School of Dentistry, its policies, programs, faculty and facilities. Incoming students receive financial counseling and purchase their initial equipment issue as part of orientation activities.

Graduation Requirements

A student is eligible for the Bachelor of Science in Dental Hygiene after attaining the qualitative and quantitative level expected in the dental hygiene curriculum. This specifically includes: no marks of “F,” “IN,” “IP” or “MG”; no conditions existing at the termination of the final trimester that would result in academic probation, clinical probation or academic disqualification. In addition, each student must have demonstrated the characteristics expected of a health professional and have fulfilled the financial and other obligations required for graduation.

In addition to meeting the academic requirements indicated above, students must have a completed administrative clearance form on file in the Office of Academic Affairs before a degree can be conferred. This administrative clearance indicates that the student has met other obligations to the university and to the student’s patients.

Curriculum

Courses listed are required for completion of the degree. Course listings are current as of 2013–2014 and are subject to change without notice by action of the Herman Ostrow School of Dentistry and the university.

Progressive Degree Programs

The following progressive degrees are available for students enrolled in the Dental Hygiene program: MPH at the Keck School of Medicine, M.A. in Gerontology from the Davis School of Gerontology, and a MSDH from the Herman Ostrow School of Dentistry. Applicants to the program must have completed 64 units of course work and must submit their applications prior to completion of 96 units of course work. Applicants do not have to submit GRE scores, but are expected to have a minimum GPA of 3.0 at the time of application. The application for admission to a progressive degree program must be accompanied by an approved course plan proposal and letters of recommendation from two USC faculty members. The requirements for both the bachelor's degree and the progressive degrees must be satisfied. For further details on progressive degree programs, see the Requirements for Graduation page.

Minor in Craniofacial and Dental Technology

The Herman Ostrow School of Dentistry, the Viterbi School of Engineering Department of Biomedical Engineering and the Dornsife College of Letters, Arts and Sciences Department of Biological Sciences jointly offer the minor in craniofacial and dental technology. This minor is designed to prepare engineering, pre-dental, pre-medical and biological sciences undergraduates to enter the dental biotechnology industry as well as to introduce them to recent innovations in craniofacial sciences and therapeutics. The course work introduces students to concepts in craniofacial histology and embryology, head-and-neck anatomy, genetics, biochemistry and biotechnology as well as applications to dental diagnostics, imaging and dental therapies (dental implants, restorative dentistry, craniofacial genetics).

This minor requires 16 core units and a minimum of 4 units of electives. Students who have not fulfilled prerequisite requirements for core or elective courses will have to take additional units, depending on their major. In addition, students must take at least 16 units not used for their major or offered by their major department.

Please see a biomedical engineering, biological sciences or Herman Ostrow School of Dentistry adviser for specific program requirements.

CORE REQUIRED COURSES, UPPER DIVISION		UNITS
DENT 412	Fundamentals of Craniofacial and Dental Technology	3
DHIS 310	Basic Tissues and Histology and Embryology	2

MASC 310	Materials Behavior and Processing	3
Total elective units:		4-8

**Prerequisite required*

Herman Ostrow School of Dentistry

Professional Degrees

Doctor of Dental Surgery

The Doctor of Dental Surgery (DDS) program covers 11 consecutive 14-week trimesters. The course of study maximizes the interrelationship of all basic sciences and clinical detail sciences required by the Commission on Dental Accreditation of the American Dental Association.

USC's reputation for excellent preparation of its graduates for private practice has been enhanced by curriculum changes that permit students to begin clinical experience in their first year. At the same time, opportunity and encouragement are given to those who might elect to pursue careers in teaching and research.

Admission

The Herman Ostrow School of Dentistry of USC admits 144 students each year for the curriculum leading to the Doctor of Dental Surgery. Admission to the school is granted through the Office of Admission and Student Affairs which receives and processes all applications, evaluates credentials and notifies applicants who qualify for entrance by forwarding letters of acceptance. Students are selected by the Admissions Committee, which bases its decision on consideration of an applicant's personal qualities, aptitude and superior scholarship necessary for the successful study and practice of dentistry. Candidates who have received or will receive a baccalaureate or higher degree will be considered more favorably than applicants who have fulfilled only minimum requirements. As a precondition of enrollment, accepted students must undergo a background screening and provide evidence of sound health and meet the school's health requirements.

Admission information may be obtained by mail, online or in person. Address inquiries to: Herman Ostrow School of Dentistry of USC, Office of Admission and Student Affairs, 925 W. 34th Street, Room 201, Los Angeles, CA 90089-0641, (213) 740-2841, email: [✉ uscscdadm@usc.edu](mailto:uscscdadm@usc.edu) or access the school's Website at dentistry.usc.edu.

Admission Requirements

Minimum entrance requirements include: (1) graduation from an accredited secondary school, with credit for at least 12 academic units, including three in English, three in one laboratory science course, two in one foreign language and two in college preparatory mathematics; (2) a minimum of 60 semester units, or the equivalent completed or in progress, at the time of application, in an accredited college or university in the United States or Canada. A baccalaureate or higher degree is preferred. No more than 60 semester hours earned at a community college will be accepted and preference is given to candidates who complete the science prerequisites at a four year institution; (3) required courses, semester hours with laboratory required: 8 units each — one year's completed course — of general biology (zoology), inorganic chemistry, organic chemistry, physics; other courses: English composition (8 units or one year), philosophy, history or fine arts (8 units or one year). All prerequisite course work must be completed with a grade of "C" or better; (4) it is strongly suggested that students take additional upper division courses. Biochemistry, human or comparative anatomy, embryology, histology, genetics, physiology, psychology, sociology and economics are examples of recommended courses; (5) all students who apply for admission to the School of Dentistry are required to take the Dental Admission Test

(DAT), given under the auspices of the Council on Dental Education of the American Dental Association. The Dental Admission Test must be taken no later than February 1 of the year for which formal application is made.

To expedite the admissions process, it is recommended that the DAT be taken during a testing period before filing formal application through the Associated American Dental Schools Application Service (AADSAS). Test scores more than two years old will not be accepted. Applicants should check with the Dental Admissions Office. Full information about the test is sent to all applicants upon request, or can be obtained from the Division of Educational Measurements, Council on Dental Education, American Dental Association, 211 East Chicago Avenue, Chicago, IL 60611. No action can be taken on the application until DAT scores have been received.

(6) An interview at the School of Dentistry may be required of all applicants who appear qualified for consideration as determined by the Office of Admission and Student Affairs, although this interview may be waived for exceptionally qualified candidates as determined by the Dental Admissions Committee; a manual dexterity test may be required as part of an interview process; (7) complete transcripts of undergraduate and graduate work, including degree notations, must be on file in the Office of Admission and Student Affairs by July 15 prior to enrolling; (8) residency requirements: as a private institution, USC seeks a culturally and geographically diverse population. Therefore, out-of-state applicants are evaluated and selected based on the same criteria as California residents.

No applicant will be denied admission on the basis of race, religion, creed or disability. All admitted students must provide evidence that functional health is sufficient to meet professional demands, both in the student role and as an entry-level practitioner.

Application Procedure

(1) An application form should be obtained from the Associated American Dental Schools Application Service (AADSAS) online at adea.org. (2) The AADSAS application form must be completed and returned to AADSAS. USC requires that the application be received by AADSAS no later than February 1 of the year in which enrollment is anticipated. Early application and file completion is recommended. Do not send the application form to USC directly. In addition to submitting the ADEA AADSAS application, applicants must submit DAT scores and one official transcript from every college/university attended directly to AADSAS. Application evaluation cannot begin until these items are received by ADEA AADSAS. (3) Applicants are required to pay a nonrefundable \$85 processing fee, which should be forwarded directly to the Ostrow Office of Admissions (international students requiring a student visa must submit a \$145 processing fee). (4) Notification from the Office of Admissions and Student Affairs will be sent, indicating that the application has been received from AADSAS. (5) Candidates who are being seriously considered for acceptance will be sent an invitation for an interview and will be required to submit additional information. No interview can be granted unless the file is complete, including DAT scores. The interview may be waived for exceptional candidates as determined by the admissions committee. (6) Notification of acceptance will be sent by the Office of Admissions and Student Affairs sometime after December 1. (7) A non-refundable commitment fee of \$1,500 is required from admitted students by the deadline indicated in the acceptance letter to hold a place in the entering class. A second commitment fee of \$1,500 is required by May 1. Applicants accepted after May 15 are required to pay a flat fee of \$3,000 within 15 days from the date of their acceptance letter to hold a place in the entering class; applicants accepted after July 1 are required to pay a \$3,000 commitment fee within two days. These non-refundable fees will be applied toward tuition upon enrollment. (8) Preregistration for the first year dental class is held before orientation. (9) All entering students are required to prepay \$3,000 toward the initial tuition by July 1. (10) As a precondition of enrollment, accepted students undergo a background screening conducted by Certiphi Screening, Inc. to help ensure patient safety and compliance with state laws and regulations and provide evidence of sound health and meet the school's health requirements.

Orientation

Students who have been accepted into the predoctoral dental program and who have reserved their place in the class will receive information on orientation during the first two weeks in July.

Orientation takes place prior to the first week of classes. The purpose of the orientation program is to acquaint incoming students with the school, its policies, programs, faculty and facilities. Incoming students receive financial counseling and receive their initial equipment issue during this orientation period.

Graduation Requirements

A student is eligible for the Doctor of Dental Surgery after successfully attaining the qualitative and quantitative level expected in the doctoral curriculum, specifically: has met the 2.0 GPA requirement for graduation; has no conditions existing at the termination of the final academic time unit that would qualify him or her for academic probation, clinical probation or academic disqualification; has no marks of “F,” “IN” or “MG”; has passed Part I and Part II of the National Dental Board Examinations; has demonstrated the personal characteristics expected of a professional; has fulfilled his or her financial obligations as well as all other obligations and requirements for graduation.

In addition to meeting the academic requirements indicated above, students must have a completed administrative clearance form on file in the Office of Academic Affairs before a degree can be conferred. This administrative clearance indicates that the student has met other obligations to the university and to the student’s patients.

Curriculum

The curriculum leading to the Doctor of Dental Surgery degree undergoes constant change to meet the challenges of modern dental practice. Course listings are current as of 2013–2014 and are subject to change without notice by action of the Herman Ostrow School of Dentistry and the university.

Five units of selective courses are required in addition to the above.

Advanced Placement Doctoral Dental Degree

The Advanced Placement DDS program allows the outstanding student who has completed a Bachelor of Science in Dental Hygiene to waive several courses in order to complete the doctoral dental degree in 151 units rather than the 185 units for the regular program.

Admission Requirements

In addition to the entrance requirements to the Herman Ostrow School of Dentistry, the following additional requirements must be met: (1) bachelor's degree from the USC dental hygiene program completed within five years of the projected date of entry into the doctoral dental program; (2) a minimum grade point average of 3.0 (A = 4.0) in the dental hygiene program and a minimum "C" grade in each of the courses waived; (3) two letters of recommendation from faculty in the dental hygiene program.

Degree Requirements

The student in the Advanced Placement DDS program must complete all the DDS required courses except for the following: DPBL 501ab, DPBL 502ab, DPBL 503ab and DPBL 504ab.

Six-Year Program

The School of Dentistry offers a six-year pre dental/dental program.

The main purposes of the Accelerated Dental Acceptance Program Track (ADAPT) are (1) to continue to attract high quality applicants to the Herman Ostrow School of Dentistry of USC, (2) to encourage students interested in dentistry to take their pre dental education at USC, and (3) to offer an opportunity for quality students to complete their education at an outstanding private university. Only students who are completing their senior year in high school are eligible to apply.

Application Procedures

(1) Complete and submit the USC undergraduate admissions application by the priority deadline of December 15. (2) Complete and submit the ADAPT application and essay to the Ostrow School of Dentistry of USC by February 1. (3) In addition, forward the following items directly to the School of Dentistry: (a) \$85 application fee, (b) 2" x 2" passport-style photograph, (c) two letters of recommendation from high school science teachers, (d) copies of SAT scores and high school transcripts, and copy of acceptance letter from USC.

For additional information and an application, contact: Herman Ostrow School of Dentistry of USC, Office of Admission and Student Affairs, 925 W. 34th Street, Room 201, Los Angeles, CA 90089-0641, (213) 740-2841, email:  uscscadm@usc.edu or access the school's Website at dentistry.usc.edu.

Advanced Standing Program for International Dentists

This program is designed to teach qualified dentists from other countries the knowledge and skills available in the United States. Time necessary to complete the program depends upon the doctor's ability; a minimum of two years is usually required. About eight months will be devoted to fundamental, technical and academic procedures. The remaining time is devoted to clinical training as necessary to achieve graduation qualifications. Graduation from the Advanced Standing Program for International Dentists leads to a DDS degree but does not give automatic licensure to practice dentistry. However, graduates are eligible to take the State Board Dental Examinations in most of the United States. (A few states still require U.S. citizenship.)

Additional information may be requested from the Herman Ostrow School of Dentistry of USC, Office of Admissions and Student Affairs, 925 W. 34th Street, Room 201, Los Angeles, CA 90089-0641, (213) 740-2841, email:  uscscadm@usc.edu or access the school's Website at dentistry.usc.edu.

Admission

Prospective students must apply to the Advanced Standing Program for International Dentists through the ADEA Centralized Application for Advanced Placement for International Dentists (ADEA CAAPIDSM). The application is available online *only*. You can access the ADEA CAAPIDSM application at <https://portal.caapid.org>.

Selected applicants will be interviewed and tested in October and accepted based on the following requirements: (1) completion of the formal application (before August 15 for admission to the program in April). A \$145 processing fee must accompany the application. (2) Successful completion of the National Board Part I examination of the American Dental Association (ADA). A score of 75 percent must be attained in each category. Higher scores are advantageous in evaluation of the candidate's academic level. (3) Applicants are strongly encouraged to submit scores from the National Board Part II and competitive scores on both the quantitative and verbal sections of the Graduate Record Examinations. For information about the GRE test visit ets.org/gre. (4)

Applicants for the Advanced Standing Program for International Dentists must demonstrate English-language proficiency by submitting either Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores. Competitive applicants should submit an Internet Based TOEFL (iBT) score of 100, with no less than 20 on each section, or an IELTS score of 7, with at least 6 on each band. Official scores must be received directly from the testing service and dated no earlier than two years (24 months) prior to the start of the student's intended first term at USC. For TOEFL, the institution code for USC is 4852 (no department code is required). To submit IELTS scores, please choose USC from the list of available institutions. Additional information about these exams can be found at *ets.org* for the TOEFL and at *ielts.org* for the IELTS. (5) A small group problem-based interview evaluation session with members of the School of Dentistry. (6) Two letters of recommendation from dental school faculty submitted with the CAAPID application. (7) A brief but accurate account of clinical experience and a personal statement submitted with the CAAPID application. (8) Documentary proof of license to practice from a Ministry of Health or proper governing body. (9) Satisfactory completion of and competence in the following academic and artistic entrance examinations to be given to invited applicants in October: (a) fixed prosthodontics (practical); (b) operative dentistry (practical). In addition, a separate written examination may be administered. (10) Complete official documents (transcripts) of all college and university course work, including dental education in the original language accompanied by certified English translation when necessary. (11) Certification of dental degree. Candidates chosen will be those who demonstrate the best qualifications in all academic and practical skills. (12) Submit a course-by-course World Education Services evaluation. (13) As a precondition of enrollment, accepted students must undergo a background screening conducted by Certiphi Screening, Inc. to help ensure patient safety and compliance with state laws and regulations and all students must provide evidence of sound health and meet the school's health requirements.

Student Visas

The I-20 Student Visa is issued to the applicant only after complete admission and acceptance has been granted. Before the papers can be processed, the applicant must present a copy of the I-94 form (white sheet in the passport) and a notarized statement of financial support for tuition and expenses for one year (\$120,000) to the Advanced Standing Program for International Dentists. These materials must be submitted at the time of application. The International Admission Office will issue the I-20 visa upon receipt and approval of these documents.

Financial Assistance

The United States government requires all international applicants to provide proof of ability to pay tuition and living expenses before a formal letter of admission or the forms needed to obtain a visa will be issued.

International students are not eligible to participate in U.S. federal financial aid programs. Please contact the Herman Ostrow School of Dentistry of USC Office of Financial Aid to discuss other financing options at (213) 740-2841, [✉ uscdfa@usc.edu](mailto:uscdfa@usc.edu) or visit usc.edu/admission/fa/loans/private.html.

Curriculum

Each candidate for the DDS degree should complete the course of instruction in two years, however, some individuals may need more time. The first four to eight months will be spent in preclinical exercises to acquaint the student with the fundamental technical procedures used at USC. The balance will be used for clinical procedures related to diagnosis and treatment of patients.

Grade Point Average Standards

Since this is a short program and highly concentrated, a GPA of 2.0 (A = 4.0) must be maintained each trimester. Therefore, each applicant will be provisionally accepted. If a doctor is unable to maintain an average GPA of 2.0, he or she will be asked to resign.

Each trimester Advanced Standing Program for International Dentists students are evaluated by the student professional performance evaluation committee. From these meetings, recommendations are made regarding advancement, special programs and disqualification.

Graduation Requirements

In order to receive the Doctor of Dental Surgery (DDS) degree, students in the Advanced Standing Program for

International Dentists must: (1) successfully complete all the required courses and clinical patient care assigned in trimesters VI, VII, VIII, IX, X and XI of the Problem Based Learning DDS curriculum; (2) pass Part I and Part II of the National Dental Board Examinations; and (3) achieve all of the competencies defined for the DDS curriculum and complete all required clinical performance evaluations. All assessments of progress to degree completion will be equivalent for all students seeking the DDS degree.

In addition to meeting the academic requirements indicated above, students must have a completed administrative clearance form on file in the Office of Academic Affairs before a degree can be conferred. This administrative clearance indicates that the student has met other obligations to the university and to the student's patients.

Herman Ostrow School of Dentistry

Advanced Programs in Dental Education

The Herman Ostrow School of Dentistry offers advanced dental education programs in dental hygiene, general dentistry, endodontics, general practice residency, operative dentistry, orofacial pain, oral medicine, oral and maxillofacial surgery, pediatric dentistry, periodontology and prosthodontics, all leading to a certificate. The Herman Ostrow School of Dentistry in conjunction with the Graduate School also offers combined programs in operative dentistry and craniofacial biology, in orthodontics and craniofacial biology, in pediatric dentistry and craniofacial biology, and in periodontology and craniofacial biology leading to a Master of Science degree and a certificate. In conjunction with the Keck School of Medicine, the Herman Ostrow School of Dentistry offers a combined program leading to an M.D. degree and certificates in oral and maxillofacial surgery, orofacial pain, and oral medicine. The Herman Ostrow School of Dentistry also offers an online master's degree in orofacial pain and oral medicine and geriatric dentistry. In addition to clinical seminars and clinical experience, students take basic science courses with advanced students from other departments.

The certificate curriculum consists of a core of basic science subjects plus clinical seminars and clinical experience. Elective subjects may also be selected by the student with the approval of the program director.

The estimated lengths of programs are as follows:

- Endodontics, 24 months

- General Dentistry, 12 months
- General Practice Residency, 12 months
- Geriatric Dentistry, 12 months (Certificate)
- Operative Dentistry, 24 months
- Oral and Maxillofacial Surgery, 48 months
- Oral and Maxillofacial Surgery/M.D., 72 months
- Orofacial Pain, 24 months
- Oral Medicine, 24 months
- Orofacial Pain and Oral Medicine (online), 36 months
- Orthodontics, 36 months
- Pediatric Dentistry, 24 or 36 months
- Periodontology, 36 months
- Prosthodontics, 36 months

All programs will begin in June (date to be determined).

Admission Requirements

Applicants must hold the Doctor of Dental Surgery or Doctor of Medical Dentistry degree (or equivalent degree if educated overseas) and must present the appropriate degrees, approved transcripts and affidavits as prescribed by the Office of Dental Admissions and Student Affairs.

Admission Procedures

Prospective students must apply through the Postdoctoral Application Support Service (PASS) at adea.org/dental_education_pathways/pass/Applicants/Pages/default.aspx. The ADEA PASS application requires the submission of an essay, one or more Professional Evaluations, one Personal Potential Index (PPI) evaluation, an Institution Evaluation from the dental school dean, and official dental school transcripts. The application cannot be processed until all required documents are submitted.

Applicants for the integrated M.D. degree/oral and maxillofacial surgery certificate program must apply through the American Medical College Application Service (AMCAS) at amcas.com.

For selection and admission to the operative/CBY, periodontics/CBY, orthodontics/CBY, and pediatrics/CBY dentistry programs, applicants are required to take the Aptitude Section of the Graduate Record Examinations; and submit competitive scores on both the quantitative and verbal sections of the examination. Likewise, all applicants for the pediatric dentistry program must take and submit competitive GRE scores. Information about this examination can be found at ets.org/gre. The last acceptable test date is in September of the year preceding desired admission.

The following material is also required to complete the application: (1) payment of an \$85 processing fee (graduates of foreign dental schools or students requiring a visa must submit a \$145 processing fee) directly to the Herman Ostrow School of Dentistry Office of Admissions and Student Affairs; (2) applicants for General Dentistry, General Practice Residency, Orthodontic, Pediatric Dentistry and Oral Surgery programs must submit applicant agreement forms to the Postdoctoral Dental Matching Program. Information and forms can be obtained online at natmatch.com/dentres; (3) board scores Part I and Part II for all programs with the exception of the operative dentistry certificate and operative dentistry/CBY programs; MCATs are required for the Integrated M.D. degree/oral maxillofacial surgery certificate. GRE scores are required for operative dentistry/CBY, orthodontics, periodontics/CBY and pediatric/CBY programs. International students are required to take GREs for the two-year certificate program. These requirements may be waived at the discretion of the program director; (4) a biographical statement; (5) applicants may be asked to be available for an interview. If one is necessary, applicants will be contacted by the director of the individual advanced program; (6) applicants will be required to pay a non-refundable \$1,500 tuition deposit upon notification of acceptance. (7) As a

precondition to enrollment, accepted students must undergo a background screening conducted by Certiphi Screening, Inc. to help ensure patient safety and compliance with state laws and regulations and all students must provide evidence of sound health and meet the school's health requirements.

Timetable for Applications

Applications for admission to advanced programs must be received as follows:

- Endodontics, Sept. 1
- General Practice Residency, Oct. 15
- Geriatric Dentistry (online graduate certificate)
- Geriatric Dentistry (online Master of Science)
- Master of Science in Dental Hygiene, Feb. 1
- Operative Dentistry, Nov. 1
- Oral and Maxillofacial Surgery, Oct. 1
- Orofacial Pain, Oct. 1
- Oral Medicine, Oct. 1
- Orofacial Pain and Oral Medicine (online Master of Science), Oct. 1
- Orthodontics, Oct. 1
- Pediatric Dentistry, Nov. 1
- Periodontology, Sept. 1
- Prosthodontics, Nov. 1

Completed applications and related information are reviewed first by the faculty of the department of interest. In selecting applicants for admission the faculty considers academic records and personal qualifications. Final approval for admission rests with the advanced education coordinating committee. Responsibility for advising the student after admission rests with the department chair.

Orientation

A departmental orientation session is usually held the first week of classes, beginning in late June. Incoming students are acquainted with the Herman Ostrow School of Dentistry, its policies, procedures, faculty and facilities.

Student Issue — Advanced Programs

Dental units in the school's clinics are equipped with Midwest Company type tubing and couplers for low and high speed air hand pieces. Advanced students must provide their own adapters to fit the school's couplers unless the students' present hand pieces are already so modified. The Dental Bookstore will assist in such conversions, if necessary. The bookstore has some low speed air hand pieces available for purchase.

Students accepted into an advanced program should consult their program directors about needed equipment.

Advanced Endodontics

The advanced endodontics certificate program is a 24-month course of study. This program provides students with the background information and clinical experience necessary for a specialist in the practice of endodontics, and also offers activities in research and teacher-training for students interested in academic endodontics.

Students are prepared for certification examination by the American Board of Endodontists.

Emphasis is placed on the interaction of this specialty with other specialties and with general dentistry.

The program in endodontics is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education.

ANAT 701	Advanced Head and Neck Anatomy	1
DHIS 701	Advanced Oral Histology	2
DMAT 701	Advanced Biomaterials	2
DPHR 701	Advanced Pharmacology	1
ENDO 521	Preclinical Endodontics	3
ENDO 701abcd	Seminar: Biological Basis of Endodontic Therapy	1-1-1-1
ENDO 702	Seminar: Advanced Clinical Endodontics	2
ENDO 703abcd	Seminar: Review of Endodontic Literature	1-1-1-1
ENDO 704ab	Seminar: Surgical Endodontics	2-2
ENDO 705ab	Seminar: Endodontic Case Presentation	4-4
ENDO 710	Seminar: Endodontic Practice Management	2
ENDO 711	Alternatives in Endodontics	4
ENDO 761abcdef	Clinic: Advanced Endodontics	1-9 each
ENDO 790	Directed Research: Endodontics	1-12
PTHL 601	Advanced Oral Pathology Seminar	2

Advanced Operative Dentistry

The advanced program in operative dentistry offers a 24-month, 143-unit course culminating in a Certificate in Operative Dentistry or a combined 36-month, 162-unit program leading to a Certificate in Operative Dentistry and Master of Science in Craniofacial Biology.

The objective of the program is to produce skilled dental professionals with in-depth knowledge, technical and scientific background to become cutting-edge clinicians, professors and researchers. The program is structured to provide proficiency in scientific methodology and clinical expertise in mastering the most advanced techniques in preventive, operative, digital (CAD/CAM), esthetic, and adhesive dentistry.

The curriculum provides a solid foundation and proficiency in diagnosis, prognosis, prevention, treatment, restoration, management of developmental defects and discoloration, and rehabilitation of severely damaged dentition using a myriad of restorative techniques customized for the patient needs. Strong emphasis will be placed on meeting the patient's biological, functional and esthetic wishes.

Research is an integral part of the program. A strong, clinically relevant and fundamental research component is provided for long-term evaluation of restorative techniques and materials. Residents must perform and complete original research projects. The program encourages the residents to present their research in renowned scientific meetings and to submit for publication. The residents of the combined operative dentistry certificate/Master of Science in craniofacial biology are required to defend a master's thesis to fulfill the thesis requirements.

Additionally residents will gain teaching experience through assisting in the DDS teaching program. The experience gained in clinical dentistry, research and teaching will provide graduates the skills and the background needed to pursue academic careers.

Advanced Operative Dentistry Certificate (143 units)

Advanced Oral and Maxillofacial Surgery

The advanced education program in oral and maxillofacial surgery is a continuous 48-month course of study that prepares the graduate for the practice of oral and maxillofacial surgery. The program in oral surgery is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. The program also meets the requirements of the American Association of Oral and Maxillofacial Surgeons.

The program is conducted at the Herman Ostrow School of Dentistry and at the LAC+USC Medical Center. The course provides graduates with the necessary background for certification by the American Board of Oral and Maxillofacial Surgery. Certificates are awarded upon successful completion of the 48-month course.

Advanced Oral and Maxillofacial Surgery Curriculum

REQUIRED COURSES		UNITS
ADNT 702	Physical Diagnosis	2
ADNT 704c	Oral Biology	1
ADNT 710	Internship: Dental Education	1-5
PTHL 601	Advanced Oral Pathology Seminar	2
PTHL 701	Clinicopathologic Conference	3-12
SURG 701ab	Seminar: Advanced Oral Surgery	2-2
SURG 702ab	Seminar: Review of the Oral Surgery Literature	2-2
SURG 708ab	Orthognathic Surgery	2-2
SURG 761abcd	Clinic: Advanced Oral Surgery	1-10 each
SURG 763abcd	Clinic: Advanced Hospital Oral Surgery and Anesthesia	1-10 each

Integrated M.D. Degree/Oral and Maxillofacial Surgery Certificate Program

The Herman Ostrow School of Dentistry of USC and the Keck School of Medicine of USC offer a continuous 72-month integrated course of study leading to a medical degree in addition to a certificate in oral and maxillofacial

surgery that prepares the graduate for the practice of oral and maxillofacial surgery. The program is fully integrated and will include advanced placement into the established medical school curriculum.

During the first three years, the student will function in the capacity of a medical student as well as a resident in the oral and maxillofacial surgery program. After the completion of the medical school curriculum, the M.D. degree will be awarded. This is required before the student can continue in the general surgery internship portion of the program. At the completion of the surgical internship, the student is qualified for medical licensure. During the fourth through sixth year, all required rotations and surgical training will be completed to fulfill the educational requirements of the Commission of Dental Accreditation of the American Dental Association and the American Association of Oral and Maxillofacial Surgeons.

The program is conducted at the Schools of Dentistry and Medicine and at the LAC+USC Medical Center. The course of study provides the graduates with the necessary background for certification by the American Board of Oral and Maxillofacial Surgery. The oral and maxillofacial surgery certificates are awarded upon successful completion of the entire 72-month course.

Advanced Oral Medicine

The Herman Ostrow School of Dentistry's 24-month, certificate residency program in advanced oral medicine trains one to two residents per year to be expert clinicians in oral medicine with an emphasis on orofacial pain. The program is fully accredited by the Commission on Dental Accreditation (CODA) of the American Dental Association (ADA). The certificate curriculum is designed with a series of didactic courses where students will gain knowledge about the diagnosis, pathobiology and treatment of different oral diseases in the field of oral medicine. The field of oral medicine is concerned with the diagnosis and treatment of oral mucosal diseases and infections, burning mouth, immunopathologic diseases, neoplastic diseases, osseous diseases including bisphosphonate osteonecrosis, salivary gland disorders and dysfunction, pharmacologic-related and systemic disorders that cause oral disease. The courses and clinical experiences covered in the intensive two-year program are listed below.

REQUIRED COURSES		UNITS
ADNT 701	Research Methodologies in Dentistry	2
OFPM 701	CPR, Blood and Airborne Infections and Common Emergencies for Dental Residents	1
OFPM 702ab	Soft Tissue Disease for Dental Residents	1, 2
OFPM 703	Local Anesthesia, Minor Surgery, and Biopsy Procedures for Dental Residents	1
OFPM 704	Bony Pathology, Radiology, and Advanced Imaging for Dental Residents	1
OFPM 705	Neurogenic-based Oral and Facial Pains for Dental Residents	2
OFPM 706	TMD, Orthopedics, Rheumatology and Physical Therapy for Dental Residents	2
OFPM 707	Pharmacology Series for Dental Residents	2
OFPM 721	Neurosciences for Dental Residents	2
OFPM 722	Internal Medicine and Systemic Disease for Dental Residents	2
OFPM 723	Systems Physiology, Motor Disorders, and Sleep Apnea for Dental Residents	2
OFPM 724	Psychological and Psychometric Assessment for Dental Residents	2
OFPM 725	Epidemiology, Nutrition, and Aging for Dental Residents	2
OFPM 726	Immunology and Immunosuppression for Dental Residents	2
OFPM 727	Infectious Disease, Oral Microbiology, and Virology for Dental Residents	2
OFPM 728	Case Presentations by OFP-OM Residents	2

Advanced Orofacial Pain

The Herman Ostrow School of Dentistry's 24-month, certificate residency program in advanced orofacial pain trains one to two residents per year to be expert clinicians in orofacial pain with an emphasis on oral medicine.

The program has received initial accreditation from the Commission on Dental Accreditation (CODA) of the American Dental Association (ADA). The certificate curriculum is designed with a series of didactic courses where students will gain knowledge about the diagnosis, pathobiology and treatment of different oral diseases in the field of orofacial pain. The field of orofacial pain encompasses masticatory musculoskeletal pain, neurogenic orofacial pain, sleep disorders related to orofacial pain, temporomandibular disorders, headaches, orofacial motor disorders including orofacial dystonias and bruxism, intraoral, intracranial, extracranial and systemic disorders that cause orofacial pain. The courses and clinical experiences covered in the intensive two-year program are listed below.

REQUIRED COURSES		UNITS
ADNT 701	Research Methodologies in Dentistry	2
OFPM 701	CPR, Blood and Airborne Infections and Common Emergencies for Dental Residents	1
OFPM 702ab	Soft Tissue Disease for Dental Residents	1, 2
OFPM 704	Bony Pathology, Radiology, and Advanced Imaging for Dental Residents	1
OFPM 705	Neurogenic-Based Oral and Facial Pains for Dental Residents	2
OFPM 706	TMD, Orthopedics, Rheumatology and Physical Therapy for Dental Residents	2
OFPM 707	Pharmacology Series for Dental Residents	2
OFPM 709	Headaches for Dental Residents	1
OFPM 721	Neurosciences for Dental Residents	2
OFPM 722	Internal Medicine and Systemic Disease for Dental Residents	2
OFPM 723	Systems Physiology, Motor Disorders, and Sleep Apnea for Dental Residents	2
OFPM 724	Psychological and Psychometric Assessment for Dental Residents	2
OFPM 725	Epidemiology, Nutrition, and Aging for Dental Residents	2
OFPM 726	Immunology and Immunosuppression for Dental Residents	2
OFPM 727	Infectious Disease, Oral Microbiology, and Virology for Dental Residents	2
OFPM 728	Case Presentations by OFP-OM Residents	2

Advanced Orofacial Pain and Oral Medicine

Master of Science, Advanced Orofacial Pain and Oral Medicine

The Master of Science degree in orofacial pain and oral medicine program consists of a 36-month hybrid program (online and face-to-face) leading to a master's degree in orofacial pain and oral medicine (OFPOM). The curriculum is designed to provide practicing dentists with advanced knowledge and training in the areas of orofacial pain and oral medicine including sleep medicine.

The program consists of a series of 14 online didactic courses where the students will gain knowledge about the underlying science as well as the diagnosis, pathobiology and treatment of different oral and maxillofacial diseases and disorders. In addition to these courses, the student will attend USC for two weeks each summer during the three-year period for an additional three face-to-face assessment courses where they will be tested for knowledge acquisition using a set of objective standardized clinical examinations, oral interviews and written examinations. They will also be required to prepare a final portfolio of cases and conduct and present a research project report. During their visits to USC, the residents will gain experience diagnosing and treating patients in the USC OFOPM center.

During the year, the residents will attend weekly video conferences where online students are required to analyze, diagnose and prepare treatment plan cases that are posted for analysis. These cases will cover the following diseases: temporomandibular disorders; infectious, dysplastic, neoplastic proliferative, erosive and ulcerative oral and pharyngeal mucosal diseases. Students will also learn about and work with patients who have various salivary, neurogenic, osseous, and odontogenic infections, tumors and diseases including oral neuropathic pain, oral spasticity, migraine, tension type and chronic daily headache and sleep apnea disorders.

Advanced Orthodontics

The advanced orthodontics certificate program is a 34-month course of study leading to a certificate in orthodontics and a Master of Science degree in craniofacial biology. The program in orthodontics is accredited by the Commission on Dental Accreditation of the American Dental Association, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. Upon completion of all requirements, the graduate is eligible for examination and certification by the American Board of Orthodontics.

The program has as its primary mission the preparation and training of residents for clinical practice in the specialty of orthodontics. This is achieved through a broad, in-depth curriculum designed to develop proficiency in clinical orthodontics with a solid foundation in fundamental and advanced biological and mechanical principles. Graduate-level courses in the basic sciences are the core didactic component of the program. Research is also an integral part of the program, and each resident must complete an original research project to fulfill a thesis requirement.

Advanced Orthodontics/Craniofacial Biology Curriculum

REQUIRED COURSES		UNITS
ADNT 710	Internship: Dental Education	1-5
CBY 574	Statistical Methods in Bioexperimentation	3
CBY 578	Pathological Conditions of the Craniofacial Complex	3
CBY 579L	Craniofacial Molecular Genetics	4
CBY 585	Systematic Research Writing	3
CBY 590	Directed Research	3
CBY 594abz*	Master's Thesis	2-2-0
CBY 671	Epistemology and Ethos of Bioscience	2
ORTH 701ab	Cephalometrics: Growth and Development	2-4 each
ORTH 702	Seminar: Review of Orthodontic Literature	5
ORTH 703abcdefhi	Seminar: Advanced Orthodontics	2-8 each
ORTH 704abc**	Seminar: Orthodontics in Theory and Practice	2-2-2

ORTH 705abc	Orthodontic Practice Management	2-2-2
ORTH 706	Surgical Orthodontics	2
ORTH 707	Interdisciplinary Aesthetic Treatment	2
ORTH 708	Information Technology in Orthodontic Practice	2
ORTH 709	Advanced Information Technology in Orthodontic Practice	2
ORTH 721	Biomechanics and Orthodontic Technic	8
ORTH 751abcdefhi	Clinic: Advanced Orthodontics	1-10 each
PERI 752	Interdisciplinary Treatment: An Orthodontic Perspective	2

**Students will be re-enrolled in CBY 594z until completion of the thesis. Tuition will be charged in each trimester of enrollment beyond Summer Session II.*

***Elective course*

Advanced Pediatric Dentistry

The advanced pediatric dentistry certificate program is a 24-month course of study designed to provide students with the background information and clinical experience necessary for the practice of pediatric dentistry. The program in pediatric dentistry is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. The program also meets the educational requirements of the American Board of Pediatric Dentistry.

First-year studies emphasize advanced pediatric dentistry theory and clinical treatment of the “healthy” child. Students develop a sound basis in genetics, growth and development, nonpharmacologic and pharmacologic behavior guidance, physical evaluation, research methodology, statistics, interceptive orthodontics, prevention and a review of the pediatric dental literature. Second year studies concentrate on dental care of children with physical, medical, intellectual and emotional disabilities. The second year student serves as a hospital-based resident at Children’s Hospital Los Angeles, Long Beach Memorial Medical Center or Children’s Hospital of Orange County. Residents also rotate to Rancho Los Amigos National Rehabilitation Center. Students gain experience in performing operating room procedures, oral conscious sedation, participating on interdisciplinary/multidisciplinary teams, providing emergency treatment and treating children with medical disabilities and pathologies in the hospital environment.

In addition to the two-year program, opportunities are available to combine the basic certificate program with a master’s or doctoral degree in Craniofacial Biology (CBY).

The purpose of the combined pediatric dentistry/craniofacial biology program is to prepare highly qualified specialists in pediatric dentistry who can assume leadership positions in dental education, service to the community, dental research and oral health care of children with developmental disabilities and medically compromising conditions. The structured curriculum of this three-year program offers a strong didactic component in basic biological science and in clinical sciences as well as intensive clinical pediatric dentistry training.

An individual who elects to apply to the combined program in craniofacial biology and advanced pediatric dentistry would submit a simultaneous application to the Herman Ostrow School of Dentistry and the Graduate School. See the Craniofacial Biology section of this catalogue for further information. The first year of the program would be spent in craniofacial biology and the second and third years spent in the pediatric dentistry program. After successful completion of the craniofacial biology program the student would be reviewed by the Pediatric Dentistry Admissions Committee and admitted into the certificate program. The student must satisfactorily complete the Master of Science program to be eligible for the Pediatric Dentistry Certificate.

Advanced Pediatric Dentistry Certificate

REQUIRED COURSES		UNITS
ADNT 701	Research Methodologies in Dentistry	2

ADNT 706	Seminar: Diseases of Childhood	2
ADNT 707	Behavior of the Child Patient	2
ADNT 710	Internship: Dental Education	1-5
AMED 750abc	Physical Evaluation and Anesthesia	2-2-1
DMAT 701	Advanced Biomaterials	2
DPHR 701	Advanced Pharmacology	1
PEDO 701ab	Seminar: Advanced Pediatric Dentistry	8-15 each
PEDO 702ab	Comprehensive Review of Pediatric Dentistry	5-7 each
PEDO 703abcde	Interceptive Orthodontics	2-5 each
PEDO 704ab	Prevention in Pediatric Dentistry	2-2
PEDO 705	Pediatric Diseases	2
PEDO 706	Dental Care for Pediatric Patients with Disabilities	2
PEDO 707	Seminar: Cleft Palate Rehabilitation	1-9
PEDO 708	Practice Management	1
PEDO 709	Conscious Sedation in Pediatric Dentistry	1
PEDO 721	Pediatric Physical Evaluation	2
PEDO 761abcde*	Clinic: Advanced Pediatric Dentistry	2-10 each
PEDO 771abcdef*	Clinic: Hospital Pediatric Dentistry	2-15 each
PEDO 772abcde	Clinic: Interceptive Orthodontics	1-3 each
PEDO 773	Hospital Pediatric Clinics	2-4
PEDO 774	Clinical Genetics in Pediatric Dentistry	9
PEDO 790ab	Directed Research: Pediatric Dentistry	1-6 each

**In addition to the required courses, a combined minimum of 36 units of PEDO 761 and PEDO 771 must be satisfactorily completed, as directed by the program director.*

Advanced Periodontology

The advanced periodontology program offers two options: (1) a 36-month, 183-unit course of study leading to a certificate in periodontology, or (2) a dual 36-month, 183-unit program leading to both a certificate and a Master of Science in Craniofacial Biology. The program in periodontology is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation, and the United States Department of Education. The program also meets the educational requirements of the American Board of Periodontology. Preparation for the certification process is an integral part of the curriculum, and all graduates are expected to become diplomates.

The curriculum provides a sound foundation in those basic sciences and medical subjects which apply directly to clinical periodontics. Emphasis is placed on the interaction of periodontics with other specialties and general dentistry. The central theme of the curriculum is that periodontology is the scientific basis to all of clinical dentistry.

The program is structured to produce skilled periodontists with the technical and scientific abilities to provide periodontal services to the community and to prepare students for teaching careers. This program also provides a portion of the requirements necessary for an advanced degree in a basic science.

A core oral biology curriculum combined with fundamentals of physical diagnosis, anatomy, pathology, microbiology, research interpretation and design, and pharmacology constitute the biological foundation upon which the advanced postdoctoral student builds his or her skills. The program provides knowledge and clinical expertise in all types of periodontal treatment required for the practice of oral health care including the placement and care of dental implants. Clinical experience in pharmacosedation and treatment of special care patients is available for those who are interested in these fields.

The program faculty believe that graduates should be dedicated to the concept of being a continuous student and should contribute to periodontics and to dentistry by practice, education, publication and/or research.

Advanced Prosthodontics

The program in advanced prosthodontics is a 36-month course of study designed to teach didactic and clinical skills leading to competency in the specialized practice of prosthodontics. The program provides a basic science foundation, incorporating studies in physical diagnosis, anatomy, oral pathology, pharmacology and oral biology. Proficiency in fixed, removable and implant prosthodontics will be developed during the course of study from a practical and didactic aspect. There is a strong emphasis on applying principles of esthetics toward oral reconstructions and implant prosthodontics. Periodontally compromised patients are frequently encountered, so the program is closely allied with the advanced program in periodontology. Treatment planning and integrated care with allied specialties is a strength of the program.

In addition to developing clinical skills, the program requires a research methodology course and a research project.

Clinical experience in implant placement and didactic study in maxillofacial prosthetics are offered: students who want more experience in clinical care may devote more time to treating these patients. The program in advanced prosthodontics is accredited by the Commission on Dental Accreditation, a special accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. The program also meets the requirements of the American Board of Prosthodontics. A certificate is awarded upon successful completion of the program.

General Practice Residency

The General Practice Residency program consists of a 12-month first-year, full-time residency program, which is designed in conformance with the guidelines of the Council on Dental Education and the Commission on Dental Accreditation of the American Dental Association. The program is structured to increase diagnostic acumen, general knowledge and clinical ability in dentistry.

The program is conducted primarily at the Los Angeles County + USC Medical Center, one of the nation's largest teaching hospitals, and at the Veterans Administration Los Angeles Ambulatory Care facility in downtown Los Angeles. Some of the training is also conducted at Rancho Los Amigos Medical Center, West Los Angeles Veterans Administration Hospital, the Herman Ostrow School of Dentistry of USC and other community facilities.

The program emphasizes the treatment of a wide range of oral health disorders, medical considerations related to dental care, the ability to treat medically compromised and disabled patients and teaches how to provide dental care in a hospital environment interacting with health care providers of various disciplines. Inherent in the year of training, a philosophy of practice addresses the medical psychosocial and oral health care needs of the patient.

The program in general practice is accredited by the American Dental Association's Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education.

Associate Professors: Winston Chee, DDS; George Cho, DDS; Roger De Filippo, M.D. (*Medicine*); Sillas Duarte, DDS, Ph.D.; Kian Kar, DDS, M.S.; Robert Keim, DDS, Ph.D.; Saravanan Ram, DDS; Glenn Sameshima, DDS, Ph.D.; Wei Shi, M.D., Ph.D. (*Medicine*); Arnold Tiber, DDS, Ph.D.; Stephen Yen, DMD, Ph.D.; Homayoun Zadeh, DDS, Ph.D.

Assistant Professors: Ruchi Bajpai, M.S., Ph.D.; Ahmed El-Hashash, Ph.D.; Denise Al-Alma, Ph.D.; Reyes Enciso, Ph.D.; Mark Frey, Ph.D. (*Medicine*); Dan Grauer, DDS, Ph.D.; Ching-Ling Lien, Ph.D., (*Medicine*); Amy Merrill-Brugger, Ph.D.; Ramiro Murata, DDS, Ph.D.; Laura Perin, Ph.D., (*Medicine*); Parish P. Sedghizadeh, M.S., DDS; Mark Urata, M.D., DDS; Jian Xu, Ph.D.; Yan Zhou, Ph.D.

Craniofacial biology is concerned with the evolution, growth, structure and function of oral tissues and the oral region; and with the etiology and pathogenesis of numerous diseases and malformations. These involve studies at various levels of biological organization, from the molecular and subcellular to the organismic. Craniofacial

biology comprises a large, rapidly increasing body of knowledge that has both clinical and academic importance. The objective of the program is primarily, but not exclusively, to prepare health science graduates for entry into careers in academic environments as clinical scholars or as members of multidisciplinary teams of health professionals in academic centers of clinical and basic health science research.

Admission Requirements

The graduate program in craniofacial biology offers academic graduate training to individuals with a Doctor of Dental Surgery (DDS), Medical Doctor (M.D.) or equivalent degree. Applicants with Bachelor of Science degrees in areas such as biology and chemistry are also encouraged to apply.

All applications are evaluated individually in search of the most promising students in terms of intellectual distinction and professional merit in the sciences and/or dentistry. Beyond this, the committee looks for academic trends, documented potential and evidence of good character. Priority consideration for admission is given to applications that are complete by December 1.

Applications

Formal application to the USC Office of Graduate Admission and the graduate program in craniofacial biology is required for Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) objectives. The Craniofacial Biology graduate programs are administered by the USC Graduate School whose catalogue provides additional information about specific application requirements and courses that must be completed in order to graduate.

Requirements for M.S. and Ph.D. applications include:

- Statement of purpose.
- Three letters of recommendation describing academic abilities, personal attributes and research (if applicable).
- Original postsecondary transcripts from all schools attended.
- A grade point average (GPA) of 3.0 or higher on a 4.0 scale, and grades of A or B in science courses.
- Graduate Records Examination (GRE) general test scores no older than five years.
- Test of English as a Foreign Language (TOEFL) is required for all applicants whose native language is not English to test their ability to use and understand English in an academic setting. Official scores must be received directly from the testing service and date no earlier than 2 years (24 months) prior to the start of the intended first term at USC.
- Personal interviews may be required.

The Master of Science requires a minimum GRE verbal score of 40 percent rank and quantitative score of 50 percent rank. For non-native English speakers, a minimum combined TOEFL score of 90 is required with no less than 20 on each section (reading, listening, speaking and writing). Most accepted students score higher than the minimum requirement.

The Doctor of Philosophy requires a minimum GRE verbal score of 60 percent rank and quantitative score of 60 percent rank. For non-native English speakers, a minimum combined TOEFL score of 100 is required with no less than 20 on each section (reading, listening, speaking and writing). Many accepted students score higher than the minimum requirement.

Master of Science in Craniofacial Biology

This degree is under the jurisdiction of the Graduate School. Students should also refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School. The Master of Science degree in craniofacial biology offers the clinician (DDS, M.D. or equivalent) the opportunity to obtain clinical research knowledge and skills in the area of craniofacial biology. Such training will include research into the causes of craniofacial diseases and anomalies, as well as normal development and function. The course of study is particularly directed

toward those clinicians committed to pursuing a career in research and teaching.

Degree Requirements

A total of 32 units is required that includes eight courses in craniofacial biology, four units of 594ab Thesis and necessary units of 590 Thesis Research. All students must achieve a 3.0 grade point average in the craniofacial biology courses. Four core courses in craniofacial biology are required for all students: CBY 574, CBY 579L, CBY 585 and CBY 671. The four remaining courses required may be selected from any offered by the craniofacial biology program or other graduate programs and selected by the students and their mentors to best support their research interests. All students are required to complete a thesis based on the student's research following a thesis protocol approved by a committee of craniofacial biology faculty. An advisory committee, comprising the research adviser and two additional faculty members, will establish thesis requirements to be completed by the student.

Graduate Certificate in Craniofacial Biology

The Certificate in Craniofacial Biology is intended to provide dentists in post-graduate dental education with experience in graduate education and insight into the requirements to complete a graduate degree. This will provide the students with additional information relative to selecting academic careers. All certificate students must have a dental degree and have been admitted to a post-graduate dental education program sponsored by the Herman Ostrow School of Dentistry of USC.

Degree Requirements

A total of six CBY courses and 18 units of course work is required for the certificate. The six courses may be selected from the following list: CBY 573, CBY 574, CBY 575, CBY 576, CBY 579L, CBY 583, CBY 585, CBY 587, CBY 672, CBY 673, CBY 674. The credit received for these classes may be applied toward either the M.S. or Ph.D. in Craniofacial Biology should the student decide later to pursue an advanced degree.

Admissions Criteria

Only residents enrolled in the following advanced dental education and specialty programs are eligible for the Certificate in Craniofacial Biology: General Practice Residency, Endodontics, Orofacial Pain/Oral Medicine, Oral and Maxillofacial Surgery, Orthodontics, Pediatric Dentistry, Periodontology, Prosthodontics. Residents must complete all admission requirements for dental advanced education programs and have been accepted to these programs in accordance with criteria established by the advanced dental education program faculty.

Doctor of Philosophy in Craniofacial Biology

The Doctor of Philosophy degree in craniofacial biology is awarded under the jurisdiction of the Graduate School. Students should also refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School. This program is designed to provide health science-oriented training for the professional with interests in academic, as well as clinical, aspects of craniofacial biology. Appointment to the Ph.D. program are designated each year for all semester admission.

New Student Orientation Committee

All new students seeking Master of Science and/or Doctor of Philosophy degree objectives will be assigned to an orientation committee. This committee will function to advise and guide new students through their first semester. Thereafter, each student will identify a mentor and assemble a qualifying exam committee.

Qualifying Exam Committee

During the second semester of study each graduate student should select a qualifying exam committee. The qualifying exam committee must include five faculty members who will be of assistance in the student's education. The student's mentor will serve as chair of the qualifying exam committee. One committee member must be a USC faculty member from outside the program. The graduate program director will be an *ex officio* member of all qualifying exam committees. The qualifying exam committee will monitor the student's progress, recommend readings or additional training, and determine when the student is ready for the qualifying

examination. It is the student's responsibility to meet with the qualifying exam committee at least once during every semester of each academic year. The results of these formal meetings should be summarized by the student in a written statement and submitted to the program director each semester.

Screening Procedure

As soon as the student has satisfactorily completed the core courses and selected the committee, a screening meeting with the qualifying exam committee should be called. The screening procedure may consist of an oral examination; the student will outline his research progress and be examined on academic development. The committee may recommend that the student take specific additional course work and that readings in certain areas be initiated to remedy deficiencies. A brief report will be given to the student and included in his or her file. The student will meet with the committee each semester; they shall agree when the student is prepared to take the qualifying examination in the next semester or if the student should resign or be dropped from the program.

Course Requirements

A total of 60 units are required for the Ph.D. Eight didactic courses at the graduate level are required. The core required CBY courses are CBY 574 or PM 510L, CBY 579L, CBY 585 and INTD 571. The remaining graduate-level courses may be selected from courses offered by any department, following consultation with the graduate mentor and graduate program director. It is highly recommended that Ph.D. students take the PIBBS core curriculum on the Health Sciences Campus. Students must achieve a 3.0 GPA or better in their course work. Students with a Doctor of Dental Surgery or other professional degree may be granted waivers for having completed equivalent course work. It is the student's responsibility to obtain from the Graduate School the Request for Permission to Take the Ph.D. Qualifying Examination form which must be signed by all committee members. This form must be completed 60 days before the qualifying examination.

Qualifying Examination

The Ph.D. qualifying examination is offered during the fall or spring semesters. A written examination will cover specific subject areas of the core curriculum, as well as topics selected by the qualifying exam committee. After successfully completing all parts of the written examination, the student will prepare and submit an original research proposal to the qualifying exam committee which presents, in National Institutes of Health (NIH) format, the student's proposed dissertation research. If the submitted proposal is acceptable, an oral examination will be conducted. This examination will include a defense of the proposal and could also include material from the written examination and related topics. A student failing any part of the examination may be allowed one additional opportunity to pass that portion, at the discretion of the qualifying exam committee, within the regulations of the Graduate School governing the repetition of qualifying examinations.

Dissertation

The doctoral dissertation is to focus upon an original research problem which reflects the creative scholarly abilities of the candidate and contributes to the general advancement of biological understanding, as well as to an understanding of the theoretical basis of disease and its treatment.

Defense of the Dissertation

An oral examination on a rough or final copy of the dissertation is conducted within one month following submission of the manuscript to the committee.

Master of Science in Geriatric Dentistry

The Master of Science in Geriatric Dentistry online program consists of a 36.5-month program leading to a master's degree in geriatric dentistry. The curriculum is designed to prepare students to work in the area of geriatric dentistry. The program consists of a series of didactic courses where the students will gain in-depth knowledge about older adults from a variety of perspectives that will include learning about the aging process and how it affects and is affected by social, behavioral and health factors commonly seen with aging. The program will focus on the most common medical and oral health conditions seen in older adults and their treatments, as well as cognitive changes, mental disorders, and social factors that will impact and thus require adjustments to oral health care delivery.

REQUIRED COURSES		UNITS
ADNT 701	Research Methodologies in Dentistry	2
GDEN 710	Knowledge Assessment for GDEN Students	1
GDEN 711abcde	Case Portfolio Preparation for GDEN Students	2.5
GDEN 712abcd	Capstone Research Project for GDEN Students	2
GDEN 713	Common Systemic Conditions in Older Patients	2
GDEN 714	Topics in Gerontology	2
GDEN 715	Geriatric Dentistry Issues	2
OFPM 702ab	Soft Tissue Disease for Dental Residents	3
OFPM 704	Bony Pathology, Radiology and Advanced Imaging for Dental Residents	1
OFPM 705	Neurogenic Based Oral and Facial Pains for Dental Residents	2
OFPM 707	Pharmacology Series for Dental Residents	2
OFPM 710a	Knowledge Assessment for OFPOM Residents	1
GDEN 722	Internal Medicine and Systemic Disease for Dental Residents	2
OFPM 723	Systems Physiology, Motor Disorders and Sleep Apnea for Dental Residents	2
GDEN 725	Epidemiology, Nutrition and Aging for Dental Residents	2
OFPM 726	Immunology and Immunosuppression for Dental Residents	2
Total		30.5

Graduate Certificate in Geriatric Dentistry

The graduate certificate in geriatric dentistry program is designed to prepare practicing dentists and dental hygienists who have already completed their professional trainings in general or advanced dentistry or dental hygiene to acquire a greater understanding of gerontology and geriatrics. A dental hygienist must have a minimum of a baccalaureate degree in order to apply for the program. The program consists of 12 units of courses delivered online and in person in which students will gain knowledge about older adults from a variety of perspectives, focusing on those topics that will have a direct impact on professional practice.

Clinical privilege status is not required for any of the course work. Students admitted to the non-degree certificate program are expected to enroll each semester until the program is completed.

There are seven required courses (6 online and one residential) and no electives. As part of the required curriculum, all students will attend USC for a two-week period during the summer trimester following completion of the didactic courses for a knowledge assessment course (GDEN 716). This course will consist of reviews, practical demonstrations and assessment activities.

REQUIRED COURSES (12 UNITS)		UNITS
GDEN 711ab	Case Portfolio Preparation for GDEN Students	1
GDEN 713	Common Systemic Conditions in Older Patients	2
GDEN 714	Topics in Gerontology	2
GDEN 715	Geriatric Dentistry Issues	2

Total		12

Master of Science in Dental Hygiene

The Master of Science in Dental Hygiene is designed as a 16-month full-time program, but can be taken as a part-

time program. The program is designed to train graduate dental hygiene students to become leaders in the field who will help to advance the art and science of the discipline of dental hygiene. Students will learn how to integrate research findings into the dental hygiene process of care to form strategies to decrease oral disease risks and promote oral health among individuals, families and communities. The first three trimesters are devoted to course work that progressively leads to the formation and acceptance of a project plan for implementation in the field in the final trimester. All students will complete 26 units of required core course work, plus four additional units of elective studies in an area of emphasis, which support their interests and future career plans. Emphasis areas include education, geriatric dentistry and pediatric dentistry. Courses in education will be offered through the Department of Dental Hygiene, while electives in geriatric dentistry and pediatric dentistry will be offered through existing graduate programs at the Herman Ostrow School of Dentistry. Students will learn program planning, advanced research methodology and statistical data management, and apply these skills into the design and implementation of their project as the basis for their scholarly capstone project. Students will demonstrate active learning through interactive classes, peer teaching, and the design and use of educational technology. Courses include traditional lecture, case studies, and student written and oral presentations.

Admission Requirements

All applicants to the Master of Science in Dental Hygiene program must satisfy the following general criteria:

- Successfully graduated from an accredited dental hygiene program in North America.
- Possess a baccalaureate degree in dental hygiene or related area from an accredited university.
- Minimum GPA: 3.0
- Scores for the Graduate Record Examinations (GRE);
- Submit three letters of recommendation: one from the undergraduate dental hygiene director and the other two from individuals who can attest to general character. These letters maybe from professors, and/or an employer, a representative from a service organization, or from a respected member of the dental hygiene or dental profession.
- Submit a career statement
- Submit a current curriculum vitae

Applicants who meet these requirements will be invited to interview for the program. The interview may take place in person, by telephone, or through a live, interactive electronic communication.

Application Deadlines

In order to be reviewed, the application and required application materials must be received by the division's admissions committee prior to February 15 for a fall semester start. Submit the application well in advance of the deadline and note that transcripts and other application materials may take three weeks or more to be processed by the Office of Admissions and then made available to the office. Applications received after February 15 are also welcome and will be processed on a space available basis.

Application Procedures

The ADEA Dental Hygiene Centralized Application Service (DHCAS) is the centralized application service for applicants to dental hygiene programs. Please review the instructions for the application at adeadhcas.org. Applicants for the Master of Science in Dental Hygiene must select "Graduate" as the designation.

In order to begin the ADEA DHCAS application, every applicant will need an email address and a DentPin. The DentPin is a personal identification number used in place of the social security number. To receive a DentPin, visit the American Dental Association Website at ada.org/dentpin.

At the same time, applicants must apply and gain admission to the University of Southern California, which is granted in all cases by the USC Office of Admission. Applicants must apply online at usc.edu/admission/graduate/apply at least three weeks before the departmental application deadline to allow adequate time for processing.

Be sure to complete the supplemental portion that relates to dental hygiene. Arrange to have transcripts and test

scores sent to USC in time to meet this deadline.

Only a letter from the university Office of Admission grants official university admission.

Materials to Be Submitted by Applicants

Send official transcripts from all colleges attended and GRE test scores via USC's ETS code (school code is 4852) to:

University of Southern California USC Office of Graduate Admission 3601 South Flower Street Room 112 Los Angeles, CA 90089-0915

Supplemental Materials to be Submitted to:

Herman Ostrow School of Dentistry of USC Office of Admissions Room 201 925 W. 34th Street Los Angeles, CA 90089-0641

Supplemental Materials Include:

- Three letters of recommendation. Letters of recommendation must be in a sealed envelope with a signature across the back.
- Career statement
- Current résumé / curriculum vitae

Degree Requirements

Completion of the degree requires satisfactory completion of a minimum of 30 credits of course work at the 500 level or above including a capstone project, which consists of a comprehensive written scholarly report suitable for publication and a defended oral presentation.

REQUIRED COURSES		UNITS
CBY 585	Systematic Research Writing	3
EDU 622	Educational Theory and Instructional Design	2
EDU 632	Technology in Higher Education	2
DHYG 501	Dental Hygiene Theory and Science I	3
DHYG 502	Dental Hygiene Seminar I	1
DHYG 504	Dental Hygiene Theory and Science II	3
DHYG 505	Dental Hygiene Seminar II	1

DHYG 510	Capstone Project	4

Areas of Emphasis (must choose four units within one area)

Education

DHYG 511	Classroom and Clinical Instruction Design	2
DHYG 512	Student Teaching	2

Geriatrics

GDEN 713	Common Systemic Conditions in Older Patients	2
GDEN 714	Topics in Gerontology	2
GDEN 715	Geriatric Dentistry Issues	2

Pediatrics

PEDO 704a	Prevention in Pediatric Dentistry	2
PEDO 704b	Prevention in Pediatric Dentistry	2
PEDO 705	Pediatric Diseases	2

A minimum grade point average of 3.0 on all graduate work is required.

Progressive Degree Program

Applicants for a progressive degree program must have completed 64 units of course work applicable to their undergraduate degree since graduating from high school. (AP units, IB units and course work taken prior to high school graduation are excluded.) Applicants must submit their application before completing 96 units of course work. Normally, the application is submitted in the fall semester of the third year of enrollment at USC.

Applicants do not have to submit GRE scores but are expected to have at least a 3.0 GPA at the time of application. The application for admission to a progressive master's program must be approved by the deans of the bachelor's and the master's degree-granting schools at USC and submitted to the Degree Progress Department. An approved course plan proposal and letters of recommendation from two USC faculty members must be submitted with the application, with at least one of the recommendations coming from a faculty member in the student's bachelor's degree major department.

Herman Ostrow School of Dentistry

Continuing Education

The Office of Continuing Education provides education courses, participation programs and national and international symposia in many areas of the dental profession. These educational activities are designed to offer updated and innovative concepts to dentists, dental hygienists, dental technicians and auxiliary personnel, and to provide the dental community with the opportunity for lifelong learning from outstanding scholars. In addition, the courses fulfill continuing education requirements of the California Board of Dental Examiners for relicensure of dentists and auxiliaries. The Herman Ostrow School of Dentistry of USC is a recognized American Dental Association (ADA) and a Continuing Education Recognition Program (CERP) provider.

Courses are given at regular intervals in the various subjects of dentistry: oral health, dental esthetics, oral medicine, physical diagnosis, dental materials, dental laboratory techniques, dental management, endodontics, periodontics, implants, oral surgery, restorative dentistry, fixed and removable prosthodontics, instrumentation, occlusion, oral pathology, dental hygiene, dental auxiliary education, patient education, pharmacology, principles of dental practice, radiology, sedation and emergencies.

Information on schedules of classes may be obtained by writing to: Herman Ostrow School of Dentistry of USC, Office of Continuing Education, Room 201J, University Park, Los Angeles, CA 90089-0641, (213) 821-2127, FAX: (213) 740-3973, email: [✉ cedental@usc.edu](mailto:cedental@usc.edu) or refer to the school's Website at uscdentalce.org.

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

Courses:

- Dentistry (DENT)
- Advanced Dental Education Conjoint Program (ADNT)

- Anatomy (ANAT)
- Anesthesia and Medicine (AMED)
- Biochemistry (DBIO)
- Craniofacial Biology (CBY)
- Community Dentistry (CMDT)
- Dental Hygiene (DHYG)
- Oral Diagnosis and Radiology (DIAG)
- Dental Materials (DMAT)
- Dental Problem Based Learning (DPBL)
- Endodontics (ENDO)
- Fixed Prosthodontics (FPRO)
- General Practice Residency (GPR)
- Geriatric and Special Patient Dentistry (GSPD)
- Geriatric Dentistry (GDEN)
- Histology (DHIS)
- Human Behavior (HBHV)
- Interdisciplinary – Basic Sciences (INTB)
- Interdisciplinary – Developmental Dentistry (INDD)
- Interdisciplinary – Practice Dynamics (INTP)
- Interdisciplinary – Restorative Dentistry (INTR)
- Interdisciplinary – Surgical Sciences (INTS)
- Interdisciplinary – Diagnostic Sciences (INTX)
- Microbiology and Immunology (MBIO)
- Occlusion (OCCI)
- Orofacial Pain Oral Medicine (OFPM)
- Oral Medicine Oral Diagnosis (OMOD)
- Operative Dentistry (OPER)
- Orthodontics (ORTH)
- Pathology (PTHL)
- Pediatric Dentistry (PEDO)
- Periodontics (PERI)
- Pharmacology (DPHR)
- Restorative Dentistry (REST)
- Removable Prosthodontics (RPRO)
- Oral Surgery (SURG)

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

DENTISTRY (DENT)

DENT 221 Introduction to Dentistry (1) History and current role of dental science in the health services field; review of research; overview of dental procedures with laboratory experience and practice observation.

DENT 402 Formal Science-Writing (2) A scientist-taught, lecture-workshop-tutorial format for developing skills in formal science-writing (e.g., abstracts, journal articles, grants). Not open to students in the School of Dentistry. *Prerequisite:* upper division standing in science and preprofessional majors.

DENT 412 Fundamentals of Craniofacial and Dental Technology (3, Sp) Biomedical engineering and technology applied to oral health professions. Dental biomaterials, CAD-CAM, digital dental technology and tissue engineering applications to craniofacial diseases, disorders, and enhancements. Junior standing. (Duplicates credit in former BME 412.)

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ADVANCED DENTAL EDUCATION CONJOINT PROGRAM (ADNT)

ADNT 701 Research Methodologies in Dentistry (2) Critical evaluation of the scientific principles in the development, execution, and interpretation of methodologies used in dentistry.

ADNT 702 Physical Diagnosis (2) Didactic and clinical experience in physical diagnosis relevant to practice of the dental specialties. Lecture, 1 hour; demonstration, 1 hour.

ADNT 703abcdefhij Seminar: Combined Treatment Planning (2 each) Interdisciplinary consideration of complex cases which involve several of the dental specialties.

ADNT 704abc Oral Biology (1-13 each) Interdisciplinary consideration of contemporary biology of the cell, bone, teeth, periodontium, occlusion, dental pulp, pain and human growth and development.

ADNT 706 Seminar: Diseases of Childhood (2) Intraoral hard and soft tissue pathologic conditions in children, common bacterial and viral diseases and their transmission in the pediatric dental environment. Seminar, 2 hours. Graded CR/NC.

ADNT 707 Behavior of the Child Patient (2) Child and adolescent psychological growth and development: Human communication, needs, motivation, and learning. Critical analysis of patient management, team treatment, and practice administration. Lecture, 2 hours.

ADNT 710 Internship: Dental Education (1-5) Practical experience teaching predoctoral students. Units and hours variable.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult

the *Schedule of Classes*.

ANATOMY (ANAT)

ANAT 321 Head and Neck Anatomy (2) Anatomy of the head and neck with lecture and laboratory demonstration for dental hygienists.

ANAT 501 Functional Neuroanatomy-Neurophysiology (3) Structure and function of the human nervous system. Includes participation in neurology clinics at LAC+USC Medical Center.

ANAT 521 Head and Neck Anatomy (2, Fa) Detailed morphology of the head and neck emphasizing considerations applicable to dentistry; morphology of the thorax; osteology of the skull.

ANAT 522 Systemic Human Anatomy (3) Structure and function of the human body; organ systems and morphology of the abdomen and pelvis; axilla and arm; osteology of the skull.

ANAT 523 Head and Neck Dissection (1) Laboratory experience in dissection of the structures of the human head and neck with emphasis on the osteology and morphology of the face.

ANAT 701 Advanced Head and Neck Anatomy (1) Detailed study of structure and function of the orofacial region including recent research and advances in dentistry.

ANAT 722 Advanced Head and Neck Anatomy Laboratory (1) Dissection of the head and neck with emphasis on the osteology and morphology of the face. *Prerequisite:* ANAT 701 enrollment.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ANESTHESIA AND MEDICINE (AMED)

AMED 421 Seminar: Teaching Local Anesthesia (1) Techniques of teaching local anesthesia to dental hygiene students.

AMED 502 Emergency Medicine (2) Recognition and management of life-threatening emergencies, including unconsciousness, altered consciousness, respiratory distress, convulsions, drug-related emergencies, and chest pain.

AMED 523 Pharmacosedation II (1) Introduction to intravenous sedation; evaluation of patient, selection of technique and procedure; prevention of complications, recognition and management of complications; introduction to general anesthesia.

AMED 524 Pain and Anxiety Control (2, Sp) Theory and techniques for pain control, anxiety includes: local anesthetics; drugs, adjunctive premedication, techniques in oral, rectal, intramuscular, inhalation sedation, prevention, management of complications. (Duplicates credit in the former AMED 521 and AMED 522.)

AMED 610 Physical Diagnosis/Cardiology (1) Participation in the Cardiac Clinic at LAC+USC Medical Center; experience in cardiac auscultation, abnormal breath sounds, use of cardiac drugs, and prosthetic valve management.

AMED 750abc Physical Evaluation and Anesthesia (2-2-1) In-depth examination of physical evaluation, emergency medicine, basic life support, inhalation sedation, intravenous sedation, local anesthesia, and patient monitoring; includes clinical experience.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

BIOCHEMISTRY (DBIO)

DBIO 310 Oral Biochemistry (2, Fa) Biochemical insight into oral tissues and saliva — emphasizing anti-microbial protection (systemic and therapeutic) against demineralization and connective tissue destruction.

DBIO 501 Biochemistry and Molecular Biology (2) Biochemical properties of carbohydrates, lipids, amino acids, proteins, and nucleic acids — emphasizing molecular structure-function interrelatedness, integrated metabolism, and molecular biology of the cell.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

CRANIOFACIAL BIOLOGY (CBY)

CBY 561 Molecular Biology (4, Fa) (Enroll in INTD 561)

CBY 571 Biochemistry (4, Fa) (Enroll in INTD 571)

CBY 573 Molecular Embryology (4) Principles of developmental biology; emphasis on molecular genetics and cell and molecular mechanisms of tissue interaction and morphodifferentiation.

CBY 574 Statistical Methods in Bioexperimentation (3) Experimental design and analysis as applied to all levels of biologic organization; hypothesis construction; probability; univariate and multivariate analysis; basic epidemiology.

CBY 575 Biologic Basis of Oral-facial Disease (3, FaSpSm) Cell and molecular biology of oral tissues in disease: emphasis on immunopathology. (Duplicates credit in former CBY 575a).

CBY 576 Biochemical Aspects of Periodontal Disease (3, FaSpSm) Cell and molecular biology of oral tissues in disease; emphasis on molecular oral pathology. (Duplicates credit in former CBY 575b).

CBY 578 Pathological Conditions of the Craniofacial Complex (3, FaSpSm) Acquired and inherited, systemic and local disease resulting in clinical craniofacial morbidity: cellular and molecular expression as related to etiology, diagnosis, treatment, and prognosis.

CBY 579L Craniofacial Molecular Genetics (4) Principles and methodologies of mammalian molecular genetics; laboratory exercises applied to pre- and postnatal craniofacial growth and development.

CBY 580ab Seminars in Craniofacial Biology (2-2) Seminars presented by recognized researchers in the various disciplines relating to craniofacial biology; selected readings in preparation for discussion. Graded CR/NC.

CBY 582L Laboratory Methods (3) Contemporary methods of laboratory analysis, including theoretical and practical exposure to procedures and equipment in the research laboratory.

CBY 583 Craniofacial Clinical Genetics (4) Principles of human genetics; clinically oriented normal and abnormal human embryology; diagnosis and natural history of human craniofacial birth defects; genetic counseling and bioethics.

CBY 585 Systematic Research Writing (3, FaSpSm) Enhancement of critical research thinking by fulfilling anticipated conceptual components of the journal article; perfection of writing skills by correcting inter- and intrasentence flaws.

CBY 586x Scientific Writing Practicum (3) Development of writing skill while completing a discipline-required project (proposal, dissertation, journal article). Seminar and tutorial format. Not for graduate credit. *Prerequisite:* CBY 585 or DENT 402.

CBY 587 Cell and Molecular Biology of Craniofacial Tissues (3) Contemporary cell and molecular biology as applied to the development, structure, and function of craniofacial tissues.

CBY 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

CBY 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

CBY 599 Special Topics (2-4, max 8) Seminars on craniofacial biology in subject areas of special interest to faculty and students.

CBY 671 Epistemology and Ethos of Bioscience (2) Classical and contemporary thought on knowledge acquisition, truth, and method as applied to bioscience; characteristic spirit, beliefs, and moral assumptions of bioscientists in modern history.

CBY 672 Advances in Development and Differentiation (2) Integration of recent advances in cell and molecular developmental biology into classical and emerging thematic frameworks.

CBY 673 Biomineralization (2) Fundamental principles and mechanisms of matrix mediated biomineralization in model systems from bacteria to humans.

CBY 674 Advanced Oral Microbiology (2) Cell and molecular aspects of microbiology as applied to oral infections: microbial physiology and genetics; oral microbial ecology; host resistance factors in oral infections.

CBY 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

CBY 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

COMMUNITY DENTISTRY (CMDT)

CMDT 501 Introduction to Community Dentistry Programs (1) Lectures and practical field experiences introducing the role of the dentist in a variety of organized public health programs.

CMDT 502ab Contemporary Dental Practice (2-2) Economic, legal, and professional aspects of dental practice; alternative careers in dentistry.

CMDT 507abc Ethical Issues in the Practice of Dentistry (0-0-1) Examination of the major ethical issues

in the current practice of dentistry; study of effective and proper methods of addressing the issues.

CMDT 601 Mobile Clinic (1) Clinic experience in provision of dental care for children of low income agricultural workers through use of mobile dental clinic on location.

CMDT 603 Multiphasic Experiences in Extramural Dentistry (1) Community responsibilities of dentists in a dynamic society. Practical experiences include consultations and visitations to private offices, group practices, hospitals, and neighborhood health clinics.

CMDT 606 Business Principles in Dentistry (2) Overview of basic business administration principles, including economics, accounting, marketing, finance, entrepreneurship, and strategic planning as relevant to the practice of dentistry.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

DENTAL HYGIENE (DHYG)

DHYG 311ab Fundamentals of Clinical Dental Hygiene Practice (3-3) Principles and techniques of clinical dental hygiene with emphasis on preventive dentistry; laboratory and preclinical experience in techniques of complete oral prophylaxis services; and clinical application thereof.

DHYG 314L Dental Morphology Laboratory (1) Fundamentals of tooth morphology and characteristics of the deciduous and permanent dentition. Laboratory, 3 hours.

DHYG 316 Patient Education in Preventive Dental Care (1) Principles and methods for teaching and motivating patients to practice effective oral care.

DHYG 318 Dental Specialties (2) Procedures performed in selected dental specialty areas with emphasis on the role of the dental hygienist.

DHYG 320 Preventive Dental Therapy (2, Sp) Study of etiology, risk factors and preventive management of periodontal disease and dental caries. Setting up community and individual preventive oral health care programs.

DHYG 401 Introduction to Advanced Dental Hygiene (2) Principles and techniques of advanced dental hygiene with emphasis on advanced root instrumentation and dental hygiene treatment planning.

DHYG 410abc Clinic: Dental Hygiene (2-7 each) Application of advanced techniques with emphasis on increased proficiency in skills: principles of prevention; periodontal examination; root planing; soft tissue curettage; local anesthesia; inhalation sedation.

DHYG 411ab Dental Literature Review (2-2) Seminar-discussion and analysis of current dental literature in selected topics related to dental hygiene practice.

DHYG 412 Preventive Dental Care Programs (1) Methods for development and implementation of programs involved with the delivery of preventive dental care.

DHYG 413ab Dental Hygiene Educational Concepts (2-2) Educational concepts for development of dental hygiene curriculum, including teaching and learning strategies, curriculum design, course development and evaluation methods.

DHYG 414ab Advanced Dental Hygiene (2-2) Advanced dental hygiene techniques: treatment, referral and

maintenance of the advanced periodontitis patient emphasizing treatment planning and patient management.

DHYG 415ab Directed Clinical Teaching (2-2) Experience in clinical teaching with supervision and evaluation of undergraduate dental hygiene and doctoral dental students engaging in patient care.

DHYG 417 Issues in Dental Health Care Delivery (1) Study of current trends in public health care delivery, manpower, finance mechanisms, and quality assurance.

DHYG 422 Essentials of Dental Hygiene Practice (1) A review of the moral, legal, and ethical responsibilities of the dental hygienist. Other topics: securing a position, dental economics, taxes, insurance, and human relationships in the dental office. Lecture, 1 hour.

DHYG 424 Research Methods (2, Sm) Research design and methods, scientific database searching, evidence resources and evaluating information based on evidence-based principles. Application of basic research design methodology for analysis of literature. Duplicates credit in former DHYG 424ab.

DHYG 430 Seminar: Initial Periodontal Therapy (2) Presentation of selected clinical cases with documentation of clinical findings, diagnosis, treatment planning, and therapy.

DHYG 431 Seminar: Periodontal Treatment Planning (2) Periodontal treatment planning; case presentations of uncomplicated periodontitis progressing to complex treatment involving multidisciplinary approach.

DHYG 460abcd Clinic: Advanced Dental Hygiene (2-2-1-1) Clinical experience in advanced dental hygiene; preventive and therapeutic skills with emphasis on advanced periodontal instrumentation and expanded functions for the registered dental hygienist.

DHYG 501 Dental Hygiene Theory and Science I (3, Fa) Issues related to professional development and the advancement of the discipline of dental hygiene. *Concurrent enrollment:* DHYG 502.

DHYG 502 Dental Hygiene Seminar I (1, Fa) Ethical principles guiding research and practice in the health care setting, with an emphasis on the rights and protection of human subjects. *Concurrent enrollment:* DHYG 501.

DHYG 504 Dental Hygiene Theory and Science II (3, Sp) Issues related to oral health promotion and disease prevention, and health services research. Includes epidemiology, health disparities, quality assurance, literacy and cultural competency. *Concurrent enrollment:* DHYG 505.

DHYG 505 Dental Hygiene Seminar II (1, Sp) Design of community health programs and health research. Includes project and study design, and applying methodological and statistical knowledge to project development. *Concurrent enrollment:* DHYG 504.

DHYG 506 Research Methodologies and Statistics (3, Fa) Process and fundamentals of research protocol design and statistical methods. Includes research design and methods, scientific database searching and evidence-based resources.

DHYG 507 Dental Hygiene Theory and Science III (3, Sm) Analysis of disease diagnoses, medical complications, pharmacologic interventions and therapeutic treatment modalities associated with a variety of system diseases. *Concurrent enrollment:* DHYG 508.

DHYG 508 Dental Hygiene Seminar III (1, Sm) Strategies for project data management and analysis, and dissemination of scholarly information through journal publications and oral and poster scientific presentations. *Concurrent enrollment:* DHYG 507.

DHYG 510 Capstone Project (4, Fa) Students will complete independent field work to implement planned scholarly activities in their professional area of interest, culminating in a written paper and an oral defense.

DHYG 511 Classroom and Clinical Instruction Design (2, Sp) Apply teaching and learning theories to the development of educational interventions to teach clinical dental hygiene skills in both clinical and laboratory

classroom settings.

DHYG 512 Student Teaching (2, Sm) Applied study of dental hygiene education, with practical experience teaching in the classroom and laboratory settings, and teaching in the dental hygiene clinic. *Prerequisite:* DHYG 511.

DHYG 513 Educational Theory and Instructional Design (2, Fa) (Enroll in EDUC 622)

DHYG 514 Technology in Higher Education (2, Sm) (Enroll in EDUC 632)

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ORAL DIAGNOSIS AND RADIOLOGY (DIAG)

DIAG 415 Radiographic Techniques (1) Clinical application of radiographic chairside and dark room techniques and quality control.

DIAG 521 Principles of Oral Radiology (2) Introduction to ionizing radiation and its use in the health professions; radiation biology, physics and hygiene; descriptive terms used in radiography, with illustrations; documentation.

DIAG 522 Radiographic Techniques (1) Clinical applications of radiographic chairside and darkroom techniques; quality control and evaluation of the radiograph.

DIAG 523 Oral Maxillofacial Imaging (2, Sm) Clinical application of intraoral and extraoral radiographic techniques; emphasis upon radiation physics, biology, safety, film and digital imaging and image interpretation.

DIAG 615 Digital and Oral Maxillofacial Imaging (2-4, FaSp) Introduction to computer based imaging in dentistry. Student will learn to use video cameras, scanners, intraoral sensors and advanced imaging technology. Open to dentistry and dental hygiene majors only. *Prerequisite:* DIAG 521, DIAG 522.

DIAG 621 CAD/CAM in Dentistry (1) Modern principles of dental Computer Assisted Design/Computer Assisted Manufacturing and will fabricate such restorations in the laboratory.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

DENTAL MATERIALS (DMAT)

DMAT 316L Dental Materials and Clinical Procedures (2) Biomechanical principles, properties, and manipulation of dental materials; armamentarium for various dental procedures.

DMAT 505 Dental Materials Update (1) Biocompatibility of dental materials, restorative materials and techniques update, critical analysis of published literature. Includes specific laboratory testing research methodology and design of clinical trials.

DMAT 521ab Dental Materials (2-2) Properties, biomechanical function, manipulation, and clinical application of dental materials. Correlates restorative, biological, and materials sciences.

DMAT 701 Advanced Biomaterials (2) Fundamental principles of materials science and clinical dentistry relative to proper selection and manipulation of dental materials.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

DENTAL PROBLEM BASED LEARNING (DPBL)

DPBL 501abc Dental Problem Based Learning — Human Structure I (3-3-3, FaSpSm) Problem based learning presentation of normal and abnormal structures including anatomy, cell biology, embryology, histology, pathology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. Acceptance to DDS program required.

DPBL 502abc Dental Problem Based Learning — Human Function I (8-8-8, FaSpSm) Problem based learning presentation of normal and abnormal function including biochemistry, endocrinology, genetics, immunology, microbiology, nutrition, pharmacology, physiology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. Acceptance to DDS program required.

DPBL 503abc Dental Problem Based Learning — Human Behavior I (2-2-2, FaSpSm) Problem based learning presentation of normal and abnormal behavior including communication, ethics, multiculturalism, patient management, phobias associated with treatment of patients with and without special needs. All material discussed with direct relationship to a well-characterized human clinical case. Acceptance to DDS program required.

DPBL 504abc Dental Problem Based Learning — Human Clinical Dentistry I (4-4-4, FaSpSm) Problem based learning approach to the delivery of dental health care. Didactic, preclinical and clinical principles of endodontics, geriatrics, oral diagnosis, oral pathology, oral radiology, oral surgery, orthodontics, pediatric dentistry, periodontics, prosthodontics and restorative dentistry will be presented with a direct relationship to a well-characterized human clinical case. Acceptance to DDS program required.

DPBL 511abc Dental Problem Based Learning — Human Structure II (2-2-2, FaSpSm) Problem based learning presentation of normal and abnormal structures including anatomy, cell biology, embryology, histology, pathology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 502c.

DPBL 512abc Dental Problem Based Learning — Human Function II (5-5-5, FaSpSm) Problem based learning presentation of normal and abnormal function including biochemistry, endocrinology, genetics, immunology, microbiology, nutrition, pharmacology, physiology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 502c.

DPBL 513abc Dental Problem Based Learning — Human Behavior II (3-3-2, FaSpSm) Problem based learning presentation of normal and abnormal behavior including communication, ethics, multiculturalism, patient management, phobias associated with treatment of patients with and without special needs. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 502c.

DPBL 514abc Dental Problem Based Learning — Human Clinical Dentistry II (7-7-8, FaSpSm)

Problem based learning approach to the delivery of dental health care. Didactic, preclinical and clinical principles of endodontics, geriatrics, oral diagnosis, oral pathology, oral radiology, oral surgery, orthodontics, pediatric dentistry, periodontics, prosthodontics and restorative dentistry will be presented with a direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 504c.

DPBL 521abc Dental Problem Based Learning – Human Structure III (1-1-1, FaSpSm) Problem based learning presentation of normal and abnormal structures including anatomy, cell biology, embryology, histology, pathology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 511c.

DPBL 522abc Dental Problem Based Learning – Human Function III (1-1-1, FaSpSm) Problem based learning presentation of normal and abnormal function including biochemistry, endocrinology, genetics, immunology, microbiology, nutrition, pharmacology, physiology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 512c.

DPBL 523abc Dental Problem Based Learning – Human Behavior III (1-1-1, FaSpSm) Problem based learning presentation of normal and abnormal behavior including communication, ethics, multiculturalism, patient management, phobias associated with treatment of patients with and without special needs. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 502c.

DPBL 524abc Dental Problem Based Learning – Human Clinical Dentistry III (14-14-14, FaSpSm) Problem based learning approach to the delivery of dental health care. Didactic, preclinical and clinical principles of endodontics, geriatrics, oral diagnosis, oral pathology, oral radiology, oral surgery, orthodontics, pediatric dentistry, periodontics, prosthodontics and restorative dentistry will be presented with a direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 502c.

DPBL 531ab Dental Problem Based Learning – Human Structure IV (1-1, FaSp) Problem based learning presentation of normal and abnormal structures including anatomy, cell biology, embryology, histology, pathology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 502c.

DPBL 532ab Dental Problem Based Learning – Human Function IV (1-1, FaSp) Problem based learning presentation of normal and abnormal function including biochemistry, endocrinology, genetics, immunology, microbiology, nutrition, pharmacology, physiology from cells, tissues and organs of the human body. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 512c.

DPBL 533ab Dental Problem Based Learning – Human Behavior IV (1-1, FaSp) Problem based learning presentation of normal and abnormal behavior including communication, ethics, multiculturalism, patient management, phobias associated with treatment of patients with and without special needs. All material discussed with direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 523c.

DPBL 534ab Dental Problem Based Learning – Human Clinical Dentistry IV (13-13, FaSp) Problem based learning approach to the delivery of dental health care. Didactic, preclinical and clinical principles of endodontics, geriatrics, oral diagnosis, oral pathology, oral radiology, oral surgery, orthodontics, pediatric dentistry, periodontics, prosthodontics and restorative dentistry will be presented with a direct relationship to a well-characterized human clinical case. *Prerequisite:* DPBL 502c.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ENDODONTICS (ENDO)

ENDO 501 Clinical Endodontics (1) Diagnosis and treatment procedures for basic clinical endodontics, including management of endodontic emergencies; relationship of endodontics to the various dental disciplines.

ENDO 502 Advanced Endodontics (1) Theoretical principles for the treatment of advanced endodontic cases; alternative methods of endodontic therapy; introduction to interspecialty cases.

ENDO 521 Preclinical Endodontics (3) Theoretical principles of endodontic therapy related to pulpal and periapical disease; training in procedures of localizing, preparing, and filling the root canal of human teeth.

ENDO 562abcd Clinic: Concentrated Early Endodontics (0-0-0-1) Early clinical experience including assigned clinic demonstration block.

ENDO 563ab Clinic: Endodontic Therapy (0-2) Clinical experience emphasizing diagnosis, treatment planning, and endodontic patient management.

ENDO 610 Clinical Advanced Endodontics (2) In-depth discussion of endodontic surgery, retreatment, and hemisection cases; includes clinical experience in advanced endodontic cases.

ENDO 701abcd Seminar: Biological Basis of Endodontic Therapy (1-1-1-1) Investigation of the theoretical and biological bases of clinical endodontic procedures.

ENDO 702 Seminar: Advanced Clinical Endodontics (2) Course designed to train students in the management of simple and complex endodontic cases.

ENDO 703abcd Seminar: Review of Endodontic Literature (1-1-1-1) Critical review and analysis of classical and current endodontic literature.

ENDO 704ab Seminar: Surgical Endodontics (2-2) Indications, principles, and techniques of surgical endodontics.

ENDO 705ab Seminar: Endodontic Case Presentation (4-4) Student presentation of cases for critique and analysis.

ENDO 710 Seminar: Endodontic Practice Management (2) Organizing, staffing, and evaluation of an endodontic practice. Modes and patterns of management including use of auxiliaries. Emphasis on endodontist-general practitioner relationship; legal aspects of dental practice. Seminar, 2 hours.

ENDO 711 Alternatives in Endodontics (4) Alternative endodontic techniques presented by guest clinicians. Emphasis on endodontics and its relationship with periodontal, restorative, and surgical disciplines.

ENDO 761abcdef Clinic: Advanced Endodontics (1-9 each) Advanced clinical experience emphasizing the diagnosis and management of complicated endodontic cases.

ENDO 790 Directed Research: Endodontics (1-12) Principles of planning, organizing, and executing a clinical or educational research project. Graded CR/NC.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

FIXED PROSTHODONTICS (FPRO)

FPRO 520 Preclinical Fixed Prosthodontics (ISP) (2) Basic fundamentals of fixed prosthodontics; preparation for clinical procedures in posterior PFM's, posterior mandibular FPD's and in restoring endodontically treated teeth.

FPRO 521 Preclinical Fixed Prosthodontics I (3) Fundamentals and principles of posterior prosthodontic procedures, including diagnosis, biomechanic principles, and construction of fixed prosthodontic restorations.

FPRO 522 Preclinical Fixed Prosthodontics II (3) Fundamentals of aesthetic restorations; fabrication of posterior and anterior porcelain-fused-to-metal restorations and anterior porcelain jacket crown; restoration of endodontically treated teeth.

FPRO 561abcd Clinic: Fixed Prosthodontics I (0-0-0-3) Clinical application of fixed prosthodontic principles in patient treatment.

FPRO 562ab Clinic: Fixed Prosthodontics II (0-3) Clinical application of fixed prosthodontic principles in patient treatment.

FPRO 601 Advanced Fixed Prosthodontics (4) Critical review and evaluation of the fixed prosthodontic literature; guided experience in the laboratory and clinical phases of fixed prosthodontic therapy.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

GENERAL PRACTICE RESIDENCY (GPR)

GPR 601 Hospital Dentistry I (1, FaSpSm) Residents learn the nature of performing dentistry within a hospital setting. Graded CR/NC.

GPR 603abcd Dental Ethics (a: .5, FaSpSm; b: .5, Fa; c: .5, Sp; d: .5, SpSm) Residents prepare for ethical dilemmas which may occur when they are practicing dentistry. Graded CR/NC.

GPR 604abcd Practice Management (a: .5, FaSm; b-d: .5, FaSpSm) Residents learn the tools and principles of running or working in a private practice. Graded CR/NC.

GPR 605abcd Review of General Dentistry Literature (1-1-1-1, FaSpSm) Residents learn how to research various topics and to critically review each article in order to practice evidence-based dentistry. Graded CR/NC.

GPR 611abcd Emergency Medicine (.5-.5-.5-.5, FaSm) Residents utilize medical knowledge to detect and identify early signs of medical emergencies. Graded CR/NC.

GPR 622 Forensic Dentistry (1, FaSpSm) Introduction to Forensic Odontology. Residents to learn the principles of Dental Forensics. Graded CR/NC.

GPR 701 Treating Medically Compromised Dental Patients (1, FaSpSm) Residents learn of various medical problems, how they relate to dental treatment and how to manage patients with various medical problems. Graded CR/NC.

GPR 702 General Dentistry Overview (1, FaSpSm) Residents demonstrate the most appropriate and ideal restorative treatment utilizing various dental materials. Graded CR/NC.

GPR 705abcd Periodontal Treatment Procedures (.5-.5-.5-.5, FaSpSm) Presentation of various techniques in current periodontal treatment. Graded CR/NC.

GPR 706abcd Treatment Planning (a: 1, Sm; b: 1, Fa; c, d: 1, Sp) Residents lead seminars with case presentations of complex multidisciplinary treatment plans, completed therapy and staff conferences. Graded CR/NC.

GPR 710abcd Oral and Maxillofacial Surgery (1-1-1-1, FaSpSm) More advanced instruction in oral and maxillofacial surgery and related diseases as appropriate to the practice of general dentistry; extensive clinical experience. Graded CR/NC.

GPR 711ab Implantology (a: 1; b: 1, FaSpSm) Residents recognize the importance of implant dentistry and various implant systems and their restorative options. Graded CR/NC.

GPR 722 Occlusion, TMJ Dysfunction, Orofacial Pain (1, FaSpSm) Residents review the important role that Occlusion plays in General Dentistry and neuromuscular problems of the head and neck. Graded CR/NC.

GPR 733abcd Advanced and Maxillofacial Prosthodontics (.5-.5-.5-.5, FaSpSm) Residents train to treat patients requiring various types of removable and fixed prosthetics, including Maxillofacial prostheses. Graded CR/NC.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

GERIATRIC AND SPECIAL PATIENT DENTISTRY (GSPD)

GSPD 504 Dental Treatment of the Geriatric and Special Patient (2) Social, psychological, economic and health factors which influence dental care for the geriatric and special patient populations; specific considerations and modifications of conventional dental treatment.

GSPD 562abc Clinic: Geriatric Dentistry (0-0-1) Clinical experience in dental treatment of geriatric patients at an extramural site.

GSPD 563abc Clinic: Special Patient Care (0-0-1) Clinical experience in treatment of the physically, medically, or mentally disabled patient.

GSPD 610 Clinical Gerontology (1) Clinical application of principles of geriatric dentistry. Evaluation, treatment planning, and clinical care of elderly patients at residential and skilled-nursing care facilities.

GSPD 612 Special Patient Care Clinic (1) Clinical experience in the evaluation, diagnosis, treatment planning and management of oral problems in special needs patients.

GERIATRIC DENTISTRY (GDEN)

GDEN 710 Knowledge Assessment for GDEN Students (1, Sm) Review of topics explored in the first two years of the program, including lectures and practical demonstrations or simulations and examinations of overall discipline knowledge. Open only to GDEN students. Graded CR/NC. *Prerequisite:* ADNT 701, GDEN 713, GDEN 714, OFPM 710a, OFPM 725 and OFPM 726.

GDEN 711abcde Case Portfolio Preparation for GDEN Students (.5-.5-.5-.5-.5, FaSpSm) Examination of clinical cases of geriatric patients through online conferences. Development and defense of portfolio of multiple cases. Open only to master's and professional dental students.

GDEN 712abcd Capstone Research Project for GDEN Students (.5-.5-.5-.5, FaSpSm) Production and defense of a research plan that demonstrates significant understanding of a topic in geriatric dentistry. Credit on

acceptance of capstone project. Open only to GDEN students. Graded IP/CR/NC. *Prerequisite:* ADNT 701.

GDEN 713 Common Systemic Conditions in Older Patients (2, FaSpSm) Lectures on topics pertinent to the aging patient that highlight the differences between aging physiologic changes and disease-caused conditions most common to this demographic. Open only to master's and professional dental students.

GDEN 714 Topics in Gerontology (2, FaSpSm) Gerontology topics for dentists including clinical assessment tools for aging patients, policy issues, myths, social supports, and consent and communication issues in the clinical setting. Open only to master's and professional dental students.

GDEN 715 Geriatric Dentistry Issues (2, FaSpSm) Common geriatric dentistry topics including epidemiology of oral diseases, common dental diseases, their management and prevention protocols for older adult patients. Open only to master's and professional dental students.

GDEN 716 Knowledge Assessment for GDEN Certificate Students (1, Sm) Review of topics explored in the certificate program, including lectures and practical demonstrations or simulations and examinations of overall discipline knowledge. Open only to certificate in Geriatric Dentistry students. *Prerequisite:* GDEN 711ab, GDEN 713, GDEN 714, GDEN 715, OFPM 722, OFPM 725.

GDEN 722 Internal Medicine and Systemic Disease for Dental Residents (2, FaSpSm) (Enroll in OFPM 722)

GDEN 725 Epidemiology, Nutrition and Aging for Dental Residents (2, FaSpSm) (Enroll in OFPM 725)

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

HISTOLOGY (DHIS)

DHIS 310 Basic Tissues and Histology and Embryology (2, Fa) Histology of basic tissues, oral histology, orofacial embryology, orofacial clefts and functional correlates.

DHIS 701 Advanced Oral Histology (2) Microscopic anatomy, ultrastructure and histochemistry of developing and functional oral tissues; based on recent advanced in oral LM, TEM, and SEM histology.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

HUMAN BEHAVIOR (HBHV)

HBHV 310 Interactional Skills in Dental Hygiene (1) Training in the application of behavioral and communication skills.

HBHV 501 Behavioral Skills in Dentistry (1) Introduction to key personal, interpersonal, and professional factors that shape the doctor-patient relationship; ways interactional skills influence the effectiveness, durability,

and satisfaction of the doctor-patient relationship.

HBHV 502 Interactional Skills (1) Introduction to purpose, objectives, and principles of clinical interviewing.

HBHV 504 Patient Education and Management (1) Management of difficult patients; psychology and behavioral treatment of pain; patient education of treatment planning; smoking cessation program.

HBHV 550 Communications in Clinical Dentistry (1) Verbal and nonverbal communication in clinical dentistry; clinical experience in use of manual, verbal, and non-verbal communication skills during a traumatic injection procedure.

HBHV 561abcde Clinic: Behavioral Dentistry (0-0-0-0-1) Clinical application of behavioral dentistry principles. Data collection, case presentation, fear reduction (iatrosedation), and tobacco cessation.

HBHV 601 Understanding Stress in Dental Practice (2) Investigation of the approaches to understanding and managing stress, especially the stress issues in dentistry.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

INTERDISCIPLINARY — BASIC SCIENCES (INTB)

INTB 504 Human Craniofacial Development and Genetics (3) Principles of human embryology and genetics; craniofacial developmental biology; molecular genetics, cytogenetics, clinical orofacial genetics, genetic counseling; bioethics.

INTB 521 Basic and Medical Microbiology (2) Fundamentals of microbial structure, growth and physiology; major bacterial, viral and fungal diseases, symptoms, course, control and treatment; emphasis on diseases related to dental management.

INTB 601 Advances in Oral Biology (2) Review of basics of scientific methodology; comparison between and indications for scientific studies and case reports; critical review of current dental literature.

INTB 603 Systematic Approach to Scientific Writing (2) Study of dental research publication and review of writing principles; focus on logical arrangement of information, avoidance of common writing flaws, attainment of syntactical fluency.

INTB 604 Clinics in Craniofacial Malformations (2) Diagnosis, treatment, and rehabilitation of craniofacial malformations; principles of health care of craniofacial malformation patients. Includes hospital clinical observation.

INTB 650abcdef Dental Research Participation (1-6 each) Assist in research in basic science, biomedical, or clinical dental areas. Experience in research strategy, design and methods using practical scientific problem solving.

INTB 651abcd Experience in Dental Teaching (1-6 each) Practical teaching experience in dental laboratory and clinic settings under faculty supervision. Includes instruction in effective methods.

INTB 652 Externship (1-6) Dental experience at an off-site location — not limited to clinical experience. Student participation must be approved by Associate Dean, Academic Affairs.

INTB 690abcdef Directed Dental Research (1-12 each) Dental clinical and/or basic science research

under faculty guidance; proposal developed, research conducted, conclusion drawn, paper written. Units determined by extent of research. Graded CR/NC.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

INTERDISCIPLINARY — DEVELOPMENTAL DENTISTRY (INDD)

INDD 501 Applied Growth and Development (1) Clinical relevance of chronological and biological assessment of maturation related primarily to diagnosis and prognosis.

INDD 650abcdef Dental Research Participation (1-6 each) Assist in research in basic science, biomedical, or clinical dental areas. Experience in research strategy, design and methods using practical scientific problem solving.

INDD 651abcd Experience in Dental Teaching (1-6 each) Practical teaching experience in dental laboratory and clinic settings under faculty supervision. Includes instruction in effective methods.

INDD 652 Externship (1-6) Dental experience at an off-site location — not limited to clinical experience. Student participation must be approved by Associate Dean for Student and Academic Life.

INDD 690abcdef Directed Dental Research (1-12 each) Dental clinical and/or basic science research under faculty guidance; proposal developed, research conducted, conclusion drawn, paper written. Units determined by extent of research. Graded CR/NC.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

INTERDISCIPLINARY — PRACTICE DYNAMICS (INTP)

INTP 501 Behavioral Strategies in Dentistry (2) Improvement of time and stress management and effectiveness in working with others; establishment of goals in dentistry; effective presentation of ideas. For Advanced Standing Program for International Dentists.

INTP 502ab Human Relations in Dental Practice (2-2) Introduction to behavioral concepts related to pain, fear, sedation; interviewing, treatment planning; care of geriatric and handicapped patients; patient education; includes principles of clinical application.

INTP 503ab Evaluation of Scientific Information in Clinical Practice (0-1) Practical guidelines for critically appraising scientific information applicable to the clinical practice of dentistry. Seminars will complement lectures with examples.

INTP 650 Dental Research Participation (1-6) Assist in research in basic science, biomedical, or clinical dental areas. Experience in research strategy, design and methods using practical scientific problem solving.

INTP 651 Experience in Dental Teaching (1-6) Practical teaching experience in dental laboratory and clinic

settings under faculty supervision. Includes instruction in effective methods.

INTP 652 Externship (1-6) Dental experience at an off-site location — not limited to clinical experience. Student participation must be approved by Associate Dean for Student and Academic Life.

INTP 690 Directed Dental Research (1-12) Dental clinical and/or basic science research under faculty guidance; proposal developed, research conducted, conclusion drawn, paper written. Units determined by extent of research. Graded CR/NC.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

INTERDISCIPLINARY — RESTORATIVE DENTISTRY (INTR)

INTR 503 Preclinical Diagnosis and Treatment Planning (2) Interdisciplinary course focusing on diagnosis and treatment planning through didactic course work and workshops which will include data collection/assessment, diagnosis and treatment planning methodologies, and specialty considerations.

INTR 524abcdef Clinical Practice (0-0-0-0-0-3, FaSpSm) The clinical component of existing didactic courses in Practice Management and Human Behavior. Graded IP.

INTR 550ab Introduction to Clinical Dentistry (0-1) Clinical operatory preparation; asepsis and sterilization; preventive dentistry; introduction to physical evaluation, extra- and intra-oral examinations, treatment sequencing, dental specialty areas; includes clinical assisting.

INTR 551abcde Clinical Diagnosis and Treatment Planning (0-0-0-0-1) Large and small group seminars focusing on diagnosis and treatment planning involving multiple specialty case presentations; integrated therapy, contingency plans and case presentations will be included.

INTR 553abcdef Clinic: Diagnosis and Treatment Planning (0-0-0-0-0-2) Clinical experience in diagnostic procedures and treatment planning in care of dental patients. Includes student preparation of documentation of patient care and seminar.

INTR 652 Externship (1-6) Dental experience at an off-site location — not limited to clinical experience. Student participation must be approved by Associate Dean for Student and Academic Life.

INTR 690abcdef Directed Dental Research (1-12 each) Dental clinical and/or basic science research under faculty guidance; proposal developed, research conducted, conclusion drawn, paper written. Units determined by extent of research. Graded CR/NC.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

INTERDISCIPLINARY — SURGICAL SCIENCES (INTS)

INTS 651abcd Experience in Dental Teaching (1-3, max 6) Practical teaching experience in dental

laboratory and clinic settings under faculty supervision. Includes instruction in effective methods.

INTS 652 Externship (1-6) Dental experience at an off-site location — not limited to clinical experience. Student participation must be approved by Associate Dean for Student and Academic Life.

INTS 690abcdef Directed Dental Research (1-12 each) Dental clinical and/or basic science research under faculty guidance; proposal developed, research conducted, conclusion drawn, paper written. Units determined by extent of research. Graded CR/NC.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

INTERDISCIPLINARY — DIAGNOSTIC SCIENCES (INTX)

INTX 501abcdefgh Integrated Basic and Applied Science I (1-1-2-2-2-2-1) Principles of anatomy, histology, physiology, pathology applied to patient evaluation and management. Focuses on cell and connective tissue biology, neuromuscular, blood, endocrine and cardiovascular systems.

INTX 502abcdef Integrated Basic and Applied Science II (1-1-2-3-1-2) Principles of anatomy, histology, physiology, pathology applied to patient evaluation and management. Focuses on respiratory, genito-urinary, gastrointestinal, hepato-biliary systems, oral biology, nutrition and hospital dentistry.

INTX 651abcd Experience in Dental Teaching (1-6 each) Practical teaching experience in dental laboratory and clinic settings under faculty supervision. Includes instruction in effective methods.

INTX 690abcdef Directed Dental Research (1-12 each) Dental clinical and/or basic science research under faculty guidance; proposal developed, research conducted, conclusion drawn, paper written. Units determined by extent of research. Graded CR/NC.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

MICROBIOLOGY AND IMMUNOLOGY (MBIO)

MBIO 310 Principles of Microbiology and Immunology (2) Fundamental concepts of microbiology and immunology. Bacterial, viral and fungal diseases are correlated with host responses; oral manifestations of infectious disease. Emphasis on sanitation and sterilization.

MBIO 501 Immunology (2) Fundamentals of immunology; basic immunopathology, especially concerning the oral cavity, including immunogenetics; hypersensitivities and inflammation; auto-immune diseases.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

OCCLUSION (OCCL)

OCCL 310 Fundamentals of Dental Morphology (1) Fundamentals of tooth form; carving of the permanent teeth.

OCCL 502 Occlusion (1) Principles of occlusion as related to clinical application of techniques and procedures to diagnose and treatment plan malfunctions of the stomatognathic system.

OCCL 521ab Dental Morphology and Function (3-2) Fundamentals of tooth form; principles of occlusion.

OCCL 522 Occlusion Laboratory (1) Laboratory experience in functional analysis and correction of occlusal disharmonies.

OCCL 601 Advanced Concepts of Occlusion (1) Historical perspective of occlusion; occlusal equilibration, effect of occlusal adjustment, instrumentation useful in occlusal therapy. Includes clinic and laboratory experience.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

OROFACIAL PAIN ORAL MEDICINE (OFPM)

OFPM 701 CPR, Blood and Airborne Infections and Common Emergencies for Dental Residents (1, Sm) CPR training, review of common dental emergencies, and blood and airborne pathogens in dental patients.

OFPM 702ab Soft Tissue Disease for Dental Residents (a: 1, Sm; b: 2, Fa) Seminars on the various mucosal, cutaneous, gingival and salivary diseases and lesions in the oral and maxillofacial region.

OFPM 703 Local Anesthesia, Minor Surgery and Biopsy Procedures for Dental Residents (1, Sm) Seminars on local anesthesia methods and minor surgical procedures appropriate for the oral and maxillofacial region.

OFPM 704 Bony Pathology, Radiology and Advanced Imaging for Dental Residents (1, Sm) Review of the oral and maxillofacial region osseous and odontogenic pathologies and the various imaging methods used to examine this anatomic region.

OFPM 705 Neurogenic Based Oral and Facial Pains for Dental Residents (2, Sp) Seminars on the diagnostic and therapeutic procedures appropriate for chronic neurogenic based pain disorders that occur in the orofacial region.

OFPM 706 TMD, Orthopedics, Rheumatology and Physical Therapy for Dental Residents (2, Fa) Seminars on various topics relating to the diagnosis and management of Temporomandibular disorders.

OFPM 707 Pharmacology Series for Dental Residents (2, Fa) Seminars on common medications used in the practice of oral medicine and chronic orofacial pain.

OFPM 709 Headaches for Dental Residents (1, Sp) Seminars on the diagnosis, prevention and management (including pathophysiologic mechanisms) of episodic and chronic headache disorders.

OFPM 710ab Knowledge Assessment for OFPOM Residents (1-1, Sm) Assessment and feedback summarizing knowledge base acquired in online courses. Open only to master's students. *Recommended preparation:* OFPM 702b, OFPM 703, OFPM 704, OFPM 705, OFPM 706, OFPM 707, and OFPM 721.

OFPM 721 Neurosciences for Dental Residents (2, Fa) Seminars on the neurophysiologic and neuroanatomic bases of chronic orofacial pain disorders.

OFPM 722 Internal Medicine and Systemic Disease for Dental Residents (2, Sp) Seminars on common systemic diseases and the potential interactions with oral disease and treatment.

OFPM 723 Systems Physiology, Motor Disorders and Sleep Apnea for Dental Residents (2, Fa) Seminars on various topics relating to oral motor disorders and sleep disordered breathing (as it relates to the mandible and tongue.)

OFPM 724 Psychological and Psychometric Assessment for Dental Residents (2, Sm) Seminars on various topics relating to biobehavioral diagnosis and, where appropriate, psychological management of patients with chronic illness in the orofacial region.

OFPM 725 Epidemiology, Nutrition and Aging for Dental Residents (2, Sm) Seminar on the epidemiology of oral disease and nutritional topics as related to the aging patient.

OFPM 726 Immunology and Immunosuppression for Dental Residents (2, Fa) Seminar course on immunology and immunosuppression as it relates to diseases in the oral and maxillofacial region.

OFPM 727 Infectious Disease, Oral Microbiology and Virology for Dental Residents (2, Sm) Seminar organized around infectious diseases in the oral, pharyngeal and nasal region.

OFPM 728 Case Presentations by OFP-OM Residents (2, Sp) Case presentations by Orofacial Pain/Oral Medicine residents in which each resident presents and defends the diagnostic and treatment methods selected for a particular case.

OFPM 729abcd Capstone Project for OFPOM Residents (.5-.5-.5-.5, Fa) In the first three trimesters (OFPM 729abc) students will present their progress towards the final trimester (OFPM 729d) goal of defending their capstone research reports. Graded IP/NC/CR, with full credit on acceptance of the capstone research report. Open only to master's students.

OFPM 730abcde Case Portfolio Preparation by Online OFPOM Residents (.5-.5-.5-.5-.5, Sm) In the first four trimesters (OFPM 730abcd) students will present their progress towards the final trimester (OFPM 730e) goal of defending a portfolio of 18 clinical cases. Graded IP/NC/CR with full credit on acceptance of final case portfolio. Open only to master's students.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ORAL MEDICINE ORAL DIAGNOSIS (OMOD)

OMOD 501 Emergency Dental Treatment (1) Dental emergencies in a general dental practice; emphasis on diagnosis of pain, trauma, infections, abscesses, myofacial problems, pulpal considerations, restorative goals; interrelationship of these areas.

OMOD 502 Chronic Orofacial Pain (2) Current concepts of pain mechanisms; application to differential diagnosis, treatment, and management of chronic head, neck, and dental pain.

OMOD 505 Oral Medicine (2) Detection, recognition, assessment, management and treatment modification of medical conditions presented by dental patients.

OMOD 506 Infection Control (1) Infection control and clinical asepsis in the dental office; ethical and legal aspects; specific agents of disease; epidemiology.

OMOD 551abcd Clinic: Physical Evaluation (0-0-0-1) Obtaining medical history, performing modified physical exams and clinical laboratory tests, establishing physical status. Understanding rationale and indications for modifying dental therapy; clinic and seminar.

OMOD 562abcd Clinic: Hospital Dentistry (0-0-0-1) Clinical experience in dentistry for the medically compromised and physically handicapped patient in a hospital environment.

OMOD 563abcdef Clinic: Emergency Dental Treatment (0-0-0-0-0-1) Experience in management and treatment of emergency dental problems, including diagnosis of the pain cause, provision of appropriate therapy, and post operative instructions to the patient.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

OPERATIVE DENTISTRY (OPER)

OPER 520 Preclinical Operative Dentistry (ISP) (3) Preparation for clinical work through study of fundamentals of cavity design and restoration of cavity preparations on extracted teeth mounted in a manikin.

OPER 521ab Preclinical Operative Dentistry I (1-3) Introduction to terminology, materials, and instruments used in operative dentistry; fundamentals of amalgam restoration; principles of cavity preparation; amalgam manipulation, condensation, and carving using extracted teeth.

OPER 522 Preclinical Operative Dentistry II (3) Fundamentals of cavity design; restoration of cavity preparations on extracted teeth mounted in the manikin.

OPER 561abcd Clinic: Operative Dentistry I (0-0-0-6) Clinical experience treating patients using all modalities of operative dentistry.

OPER 562ab Clinic: Operative Dentistry II (0-6) Clinical experience treating patients using all modalities of operative dentistry.

OPER 620 Conservative Cast Gold Restorations (2) Principles of cavity preparation, fabrication technique and finishing for conservative cast gold restorations; includes lab and clinic.

OPER 701ab Seminar: Advanced Operative Dentistry I (2-2, Fa) In-depth study of the biomechanics applied to cavity preparation according to material selection, bonding procedures, and protection of the pulp-dentin. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

OPER 702abL Advanced Dental Morphology for Esthetic Restorations (a: 3, Sm; b: 3, Fa) In-depth study of the dental morphology, dental optical properties, and laboratorial procedures for restorative replication of esthetical and morphological aspects found in the natural tooth. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

OPER 705L Dental Photography (1, Fa) Basic principles of dental photography and its use in clinical dentistry for shade selection, replication of dental esthetic components, and clinical case documentation. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

OPER 710abcdeh Seminar: Advanced Operative Dentistry II (1-1-1-1-1-1, FaSpSm) Advanced knowledge and scientific background of the principles of adhesion to dental structures and analysis of bonding effectiveness of different adhesive methods and bonding degradation. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

OPER 720abcdeh Seminar: Advanced Operative Dentistry III (1-1-1-1-1-1, FaSpSm) Advanced studies, technical, and scientific background of esthetic bonded direct restorations with in-depth analysis of mechanical, physical, and optical properties of resin composite restorations. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

OPER 730abcd Seminar: Advanced Operative Dentistry IV (1-1-1-1, FaSpSm) In-depth study, analysis, and treatment involved in the management of discolored and developmental defects of the teeth. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

OPER 740abc Seminar: Advanced Operative Dentistry V (2-2-2, FaSpSm) Cariology and proficiency of dental caries management using preventive methods and minimally invasive restorative techniques. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

OPER 750abc Seminar: Advanced Operative Dentistry VI (2-2-2, FaSpSm) Advanced studies of restorative techniques of severely damaged teeth, selection and use of different post systems, core build-up, and bonding to the root canal. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

OPER 760abcdeh Seminar: Advanced Operative Dentistry VII (1-1-1-1-1-1, FaSpSm) Proficiency in advanced esthetic indirect restorations for anterior and posterior teeth, including preparation designs, material selection, cementation and bonding procedures, and alternative resin-bonded fixed-partial dentures. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

OPER 765abcd Seminar: Advanced Operative Dentistry VIII (1-1-1-1, FaSpSm) Advanced studies of computer-generated restorations (CAD/CAM) and digital imaging in dentistry for anterior and posterior teeth. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

OPER 770abcdehL Scientific Investigation in Operative Dentistry (1-3, max 14, FaSpSm) Enhancement of critical research thinking by development and experimentation of different scientific methodologies in operative dentistry, journal article writing and submission for publication. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

OPER 780abcdef Treatment Planning in Operative Dentistry (2-2-2-2-2-2, FaSpSm) Seminars led by students and invited guests to discuss, analyze and propose a treatment sequence for esthetic challenge clinical cases involving complex multidisciplinary treatment. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

OPER 795abcdehij Clinic: Advanced Operative Dentistry (1-3, max 14, FaSpSm) Advanced clinical and laboratorial treatment of patients in need of complex multidisciplinary treatment, with special emphasis on esthetic and bonded restorations. Graded CR/NC. Open only to Advanced Operative Dentistry Certificate students.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ORTHODONTICS (ORTH)

ORTH 501ab Seminar: Orthodontics (0-1) Clinical use of cephalometrics and orthodontic prediction; removable orthodontic appliances and their design; case analysis; mixed dentition cases; adult tooth positioning; orthodontic banding; molar uprighting.

ORTH 521 Preclinical Orthodontics (2) Evaluation, prevention, and treatment of dento-facial malformations. Construction of basic appliances to treat orthodontic problems encountered by the general practitioner.

ORTH 561abcdef Clinic: Orthodontic Therapy (0-0-0-0-0-2) Diagnosis and limited treatment of orthodontic problems encountered in general practice. Diagnosis of complex orthodontic problems requiring treatment by a specialist. *Prerequisite:* ORTH 521 for *a*; *a* before *b*, etc.

ORTH 674 Clinical and Molecular Bone Biology (2, Sp) Explore the impact of the application of new molecular techniques to bone biology research on our understanding of osteoporosis, osteosarcoma, hypercalcemias, etc. Open to advanced program students in dentistry only.

ORTH 701ab Cephalometrics: Growth and Development (2-4; 2-4) Principles and mechanics; measurement techniques; developmental morphology; analysis and diagnosis; treatment rationales; gross radiological anatomy and osteology; facial growth. Hours vary.

ORTH 702 Seminar: Review of the Orthodontic Literature (5) Two trimester Course Review of current orthodontic literature.

ORTH 703abcdefghi Seminar: Advanced Orthodontics (2-8 each, FaSpSm) Advanced diagnosis and treatment of complex orthodontic cases. Asymmetrical treatment. Hours vary.

ORTH 704abc Seminar: Orthodontics in Theory and Practice (2-2-2) Review of various approaches to orthodontic treatment; includes presentation of cases.

ORTH 705abc Orthodontic Practice Management (2-2-2, FaSpSm) Office management and patient relations in orthodontic practice.

ORTH 706 Surgical Orthodontics (2) Diagnosis, treatment, prognosis, and management of orthognathic problems. Lecture and demonstration, 2 hours.

ORTH 707 Interdisciplinary Aesthetic Treatment (2, Sp) Commonly encountered interdisciplinary aesthetic problems. Communication and teamwork between orthodontists and general dentists, as well as other specialists will be emphasized.

ORTH 708 Information Technology in Orthodontic Practice (2, Fa) Practical applications of information technology in contemporary orthodontics. Topics include office management systems, videocephalometrics, and video imaging in orthodontic practice.

ORTH 709 Advanced Information Technology in Orthodontic Practice (2, Sm) Follows ORTH 708 and is designed to provide background and up-to-date information on advanced technologies in orthodontic practice.

ORTH 721 Biomechanics and Orthodontic Technic (8) Primary orthodontic techniques and basic diagnostic procedures. Typodont treatment of malocclusion, record taking, retention appliances, and beginning biomechanics.

ORTH 751abcdefghi Clinic: Advanced Orthodontics (1-10 each, FaSpSm) Clinical orthodontics; clinical techniques, diagnostic procedures, and applied clinical therapy to selected cases of malocclusion with emphasis on therapy and supervised treatment.

ORTH 791 Library Research (1-6) Organized literature searching and compiling of published data for purposes of developing writing and investigative skills.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PATHOLOGY (PTHL)

PTHL 312abc Medicine and Pathology (1-3-2, FaSpSm) An integrated approach to clinical, gross and microscopic study of basic disease processes, systemic pathology, oral pathology, internal medicine, pathophysiology, physical evaluation and emergency medicine for significant organ systems. Clinical-pathologic correlation stressed. Evaluation, classification, and differential diagnosis of oral lesions; disease recognition and dental treatment modification.

PTHL 501 Oral Pathology (4, Sm) Clinical radiographic, gross and microscopic characteristics of mucosal, skin, fibroseous and salivary gland diseases; odontogenic tumors and cysts; benign and malignant neoplasms and iatrogenic conditions.

PTHL 504ab Seminar: Oral Pathology (0-0) Clinico-pathologic discussion of oral pathosis cases. A variety of “unknown” cases representing diagnostic problems are analyzed. Etiology, pathogenesis, clinical/radiographic features, therapy and prognosis are stressed.

PTHL 601 Advanced Oral Pathology Seminar (2) Detailed discussion and analysis of many cases representing a wide variety of oral pathologic conditions stressing differential diagnosis and clinical-pathologic correlations.

PTHL 701 Clinicopathologic Conference (3-12) Clinicopathologic correlation of diseases of the head and neck. Seminar, 1 hour. Presented at LAC+USC Medical Center.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PEDIATRIC DENTISTRY (PEDO)

PEDO 310 Principles of Dentistry for Children (1) Role of the dental hygienist in dental care for the child patient. Principles of pediatric dentistry as related to education of the child patient and the parent. Lecture, 1 hour.

PEDO 501 Clinical Pediatric Dentistry (1) Scientific principles underlying contemporary pediatric dentistry, including prevention of disease; dental anomalies; habits and other problems in occlusal development; behavior management; child abuse.

PEDO 521 Preclinical Pediatric Dentistry (2) Principles and techniques of cavity preparations in primary teeth; pulpal therapy; stainless steel crowns; space maintenance; diagnosis, treatment planning.

PEDO 551abc Clinic: Dentistry for Children I (0-0-2) Structured clinical experience in caring for the dental needs of the child patient. Includes special case seminars.

PEDO 561abc Clinic: Dentistry for Children II (0-0-1) Dental treatment of the child patient; preventive and restorative dentistry; space maintenance and interceptive orthodontic procedures.

PEDO 701ab Seminar: Advanced Pediatric Dentistry (8-15 each, FaSpSm) Discussions of literature related to pediatric dentistry. Biologic considerations in operative dentistry, odontogenesis, dental trauma, physiology of occlusion, pulpal biology. Graded CR/NC.

PEDO 702ab Comprehensive Review of Pediatric Dentistry (5-7 each, FaSpSm) Critical analysis of current pediatric dentistry literature and case conferences related to the application of contemporary issues in dentistry for the complex child patient.

PEDO 703abcde Interceptive Orthodontics (2-5 each) Recognition, evaluation, and treatment of developing orthodontic problems appropriate to the pediatric dentist; emphasis on diagnosis; laboratory experience included.

PEDO 704ab Prevention in Pediatric Dentistry (2-2) Discussions and readings pertaining to the analysis and incorporation of the many components of prevention into the contemporary pediatric dentistry practice.

PEDO 705 Pediatric Diseases (2) Discussion of medical conditions seen by the pediatric dentist in the hospital environment. Conditions include childhood cancer, HIV, heart disease, diabetes mellitus and blood dyscrasias. Graded CR/NC.

PEDO 706 Dental Care for Pediatric Patients with Disabilities (2) Medical, dental, psychological, and social problems of children with developmental disabilities; effect of problems on delivery of pediatric dentistry. Graded CR/NC.

PEDO 707 Seminar: Cleft Palate Rehabilitation (1-9) Three trimester course discussions and case conferences related to treatment of patients with oral and facial anomalies: includes interceptive and corrective orthodontics, preventive and restorative treatment, and selected oral surgery-prosthetic rehabilitative procedures. Seminar, 3 hours.

PEDO 708 Practice Management (1, FaSpSm) Discussion of issues related to the contemporary practice of pediatric dentistry (seminars and office visitations). Topics include: purchasing a practice, associateships, hospital affiliations, practice administration and marketing, computers, jurisprudence and auxiliary utilization.

PEDO 709 Conscious Sedation in Pediatric Dentistry (1, Sm) Seminar topics include: review of pharmacology and effectiveness of commonly used oral agents, methods of administration, regulatory guidelines, patient monitoring, management of sedation related emergencies.

PEDO 721 Pediatric Physical Evaluation (2) Assessment of patient health status; evaluation and management of acute and chronic disease states which may be observed in the pediatric dental practice.

PEDO 761abcde Clinic: Advanced Pediatric Dentistry (2-10 each, FaSpSm) Clinical application of advanced pediatric dentistry techniques in routine and special problem cases in the outpatient environment. Hours vary. Graded CR/NC.

PEDO 771abcdef Clinic: Hospital Pediatric Dentistry (2-15 each, FaSpSm) Treatment of the child patient in the hospital environment. Emphasis placed on treatment and management with physical, mental, or emotional disabilities.

PEDO 772abcde Clinic: Interceptive Orthodontics (1-3 each) Clinical application and treatment procedures for tooth guidance, preventative and interceptive orthodontics.

PEDO 773 Hospital Pediatric Clinics (2-4) Observation and participation in affiliated hospital clinics: anesthesiology, hematology, and genetic clinics; grand pediatric rounds and other conferences.

PEDO 774 Clinical Genetics in Pediatric Dentistry (9) Genetic principles of oral, facial and cranial malformations; technique and theory of clinical genetics, differential diagnosis and treatment of disorders of the craniofacial complex.

PEDO 790ab Directed Research: Pediatric Dentistry (1-6 each) An examination and analysis of clinical and laboratory problems in dentistry for children leading to completion of an original research project. Graded

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PERIODONTICS (PERI)

PERI 310ab Introduction to Periodontal Diseases (1-1, FaSp) Introduction to periodontal disease; emphasis on identification of normal periodontium, distinguishing of gingival and periodontal diseases; includes data collection and classification of gingival and periodontal diseases.

PERI 415 Basic Periodontal Therapy (1) Basic therapeutic modalities of periodontal treatment; general principles and methods of surgical periodontal treatment.

PERI 502 Periodontal Diseases and Elements of Therapeutic Judgment (2) Periodontal pathologic processes; pathogenesis, classification and clinical features of gingivitis; periodontitis; other related diseases of periodontium including diagnosis and initial phases of treatment.

PERI 504 Advanced Periodontics (1) Periodontics as related to endodontics, orthodontics, and restorative dentistry; bone induction, osseous grafting, splinting, management of furcation lesions; maintenance, recall, and referral.

PERI 521 Periodontal Surgery (2) General principles and methods of surgical periodontal treatment; includes laboratory exercises.

PERI 550ab Clinic: Introductory Periodontal Therapy (1-1) Laboratory and clinical development of periodontal therapy procedures; basic instrumentation principles.

PERI 561abcd Clinic: Periodontal Therapy I (0-0-0-1) Supervised treatment of periodontal disease at all levels of complexity.

PERI 562ab Clinic: Periodontal Therapy II (0-2) Supervised treatment of periodontal disease at all levels of complexity.

PERI 602 Current Controversies in Periodontology (2) Examination of the major controversies in the field of periodontology; emphasis on the efficacy of current treatment modalities and future trends.

PERI 701ab Seminar: Review of Current Periodontal Literature (2-3) Review and critical evaluation of the current periodontal literature.

PERI 702ab Seminar: Periodontal Treatment Procedures (2-2) Presentation of various techniques in current periodontal treatment.

PERI 703ab Seminar: Periodontal Case Presentation (1-2) Formalized presentation and discussion of clinical cases treated by advanced students.

PERI 704abcdefghij Seminar: Periodontal Therapy (2 each) Presentation and discussion of treatment of clinical cases involving soft tissue and osseous management; rationale for the therapy; surgical wound healing; dental implant surgery.

PERI 708 Seminar: Clinical Basis of Periodontics (4) Evaluation of the literature dealing with various types of therapy including the objectives of treatment.

PERI 710 Clinical Periodontal Photography (1) Demonstration of techniques used in intraoral photography for periodontal purposes, emphasis on proper clinical case documentation in seminar presentation and Specialty Board Certification.

PERI 711 Occlusal Therapy in Periodontics (2) Anatomy of the TMJ mandibular movements; occlusal anatomy and their interrelationships; methods of occlusal correction using anatomy and mandibular movements as a guide.

PERI 713abcdefghij Treatment Planning in Periodontics (2 each) Presentation of clinical findings, diagnoses, and plan of treatment of clinical cases by advanced students.

PERI 715 Treatment of Special Care Patients (3) Periodontal care and treatment of older population groups, handicapped patients, and other types of special patients, settings, and situations.

PERI 716ab Seminar: Special Topics in Periodontal Disease (3-3) Discussion of topics of immediate importance and controversy. Experts in the field are invited to participate as guest speakers.

PERI 750 Advanced Periodontal Instrumentation (3) Advanced root preparation techniques including design and manufacturing characteristics of various instruments, sharpening techniques, and root morphology as it relates to advanced instrumentation principles.

PERI 752 Interdisciplinary Treatment: An Orthodontic Perspective (2) Effective recognition, evaluation and understanding of the orthodontic treatment phase required in interdisciplinary treatment plans; includes laboratory and clinical experience; applicable to orthodontics, periodontology, prosthodontics.

PERI 761abcdefghij Clinic: Advanced Periodontics (1-10 each) Clinical experience in the treatment of patients with all types and degrees of involvement of periodontal disease. Includes placement of dental implants. Graded CR/NC.

PERI 771ab Periodontal Therapy in the Hospital (1-1) Role of the periodontist in hospital therapy. Treatment of complex cases in the hospital environment.

PERI 790ab Directed Research: Periodontics (1-6 each) Research in clinical and experimental periodontology. Graded CR/NC.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

PHARMACOLOGY (DPHR)

DPHR 410 Principles of Pharmacology (2) Basic principles of drug action; application of drugs in the prevention and treatment of disease; harmful effects of drugs on biological systems. Lecture, 2 hours.

DPHR 501 Pharmacology (3) General principles of drug action: prescription writing; toxicology; pharmacology of drugs affecting cardiovascular, autonomic, endocrine, and central nervous systems; drug control of pain, anxiety, infection.

DPHR 601 Clinical Drug Therapy in Dentistry (2) Clinical pharmacology of drug therapy important to dental practice using case history disease signs and symptoms and attendant drug therapy.

DPHR 701 Advanced Pharmacology (1) Pharmacologic principles and practice of drug use to control anxiety, pain, and infection. Treatment of drug and medical emergencies as they relate to dental specialty practice.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

RESTORATIVE DENTISTRY (REST)

REST 314 Physiology of Occlusion for Hygienists (1) Biology and function of the gnathostomatic system. Role of the hygienist in diagnosis and treatment of occlusal dysfunctions.

REST 501 Preclinical Operative and Fixed Prosthodontics (Conjoint) (2) Fundamental concepts of restoring an individual tooth with a cast restoration; principles of cavity preparation; casting fabrication and cementation.

REST 503ab Clinical Restorative Dentistry (1-1) Application of pre-clinical procedures in operative dentistry, fixed prosthodontics, removable prosthodontics, and dental materials.

REST 504 Diagnosis and Treatment Planning (1) Utilizing a restorative approach, enhance students' knowledge and ability to choose treatment best suited for existing dental conditions, patients' requests and their financial ability.

REST 521 Preclinical Operative/Fixed Prosthodontics Laboratory (3) Experience in cavity preparation; casting fabrication and cementation on extracted teeth and plastic dentiforms.

REST 522 Aesthetics in Dentistry (1) Definition and relationship of elements of aesthetics; application in patient motivation and care.

REST 602ab Participation in Advanced Dental Care (0-3) Participation in advanced dental treatment in Faculty Private Practice Clinic, techniques of difficult case presentation and efficiency in practice. Clinic and seminar.

REST 701 Orientation to Advanced Prosthodontics (5) Preclinical overview of materials, techniques, instrumentation, and treatment procedures necessary for providing advanced prosthodontic care in the clinical environment.

REST 702abcdefghi Seminar: Treatment Planning (2 each) Seminars led by students with case presentations of complex multidisciplinary treatment plans, completed therapy and staff conferences.

REST 703abcdefh Seminar: Review of the Prosthodontic Literature — Fixed (1 each) Weekly two hour seminars devoted to review of the historic, classic, and current literature in fixed prosthodontics.

REST 704abcdefh Seminar: Review of the Prosthodontic Literature — Removable (1 each) Weekly two hour seminars devoted to review of the historic, classic, and current literature in removable prosthodontics.

REST 705 Advanced Fixed Prosthodontics Techniques (1) Tooth preparation and advanced laboratory techniques necessary to implement full mouth rehabilitation.

REST 706 Advanced Complete Denture Techniques (1) Advanced laboratory and clinical skills for a specialty prosthodontic practice.

REST 708ab Dental Ceramics, Color, and Aesthetics (2-2) Theory of color and dental aesthetics; history and development of dental ceramics; design and techniques in fabrication of ceramo-metal restorations.

REST 709ab Seminar: Removable Partial Dentures (1-2) Diagnosis, treatment planning, and design of

removable partial dentures using extracoronal and intracoronal retainers.

REST 710abcd Implant Dentistry (1-1-1-1) Implant modalities and types; basis for selection; techniques of placement and of supervision of prosthodontic restoration. Includes a review of classic implant literature.

REST 712 Maxillofacial Prosthodontics (2) Theory and techniques for fabrication of prostheses to correct maxillofacial deformities including cleft palate.

REST 721ab Principles of Occlusion (2-2) Application of current occlusal concepts in removable prosthodontics. Techniques of occlusal adjustment and additive waxing for development of occlusal morphology.

REST 761abcdefghij Clinic: Advanced Prosthodontics (1-10 each) Students treat patients with complex interdisciplinary problems. A minimum of five full mouth reconstructions and 10 sets of complete dentures will be completed.

REST 781 Clinic: Maxillofacial Prosthetics (1-8) Clinical experience in fabrication of prostheses to correct maxillofacial deformities.

REST 782abcde Clinic: Implant Prosthodontics (1-10 each) Clinical procedures in implants for prosthodontic rehabilitation.

REST 790 Directed Research: Prosthodontics (1-12) Opportunities for research in clinical and experimental prosthodontics. Graded CR/NC.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

REMOVABLE PROSTHODONTICS (RPRO)

RPRO 501 Preclinical Removable Complete Prosthodontics (1) Fundamental theory for the fabrication of removable complete dentures.

RPRO 502 Removable Complete Prosthodontics (1) Complete denture treatment: phases, clinical procedures, philosophy, concept, rationale, and need.

RPRO 503ab Preclinical Removable Prosthodontics and Implants (2-1) Introduction to disciplines of removable complete and partial dentures and implants, including classification and progress of edentulism, support sources and principles, design, fabrication and evaluation.

RPRO 510 Implant Dentistry (1) Principles and use of implants in dentistry: includes history, biological basis, types, diagnosis and treatment planning, surgical and restorative procedures, and limitations.

RPRO 511 Preclinical Removable Partial Prosthodontics I (1) Partial denture diagnosis and treatment planning; basic principles of partial denture design, fabrication, and function.

RPRO 512 Preclinical Removable Partial Prosthodontics II (1) Partial denture design, fabrication, and function; repair; patient education.

RPRO 513 Removable Partial Prosthodontics (1) Clinical removable partial prosthodontic treatment including diagnosis, treatment planning and clinical techniques.

RPRO 521 Preclinical Removable Complete Prosthodontics Laboratory (1) Fundamental theory for the fabrication of removable complete dentures.

RPRO 523ab Preclinical Removable Prosthodontics and Implants Laboratory (1-1) Laboratory experience in the fabrication of removable complete and partial dentures and implants.

RPRO 532 Preclinical Removable Partial Prosthodontics Laboratory II (1) Laboratory experience in fabrication of removable partial dentures.

RPRO 550 Removable Complete Prosthodontics Clinic I (1) Clinical demonstration with supervised clinic experience in construction, repair, and evaluation of the removable complete denture.

RPRO 561abcd Clinic: Removable Complete Prosthodontics I (0-0-0-2) Diagnosis, treatment planning, and care of edentulous patients. Complex cases involving temporo-mandibular joint dysfunction, surgical and congenital defects; seminars on clinical treatment.

RPRO 562ab Clinic: Removable Complete Prosthodontics II (0-3) Diagnosis, treatment planning, and care of edentulous patients. Complex cases involving temporomandibular joint dysfunction, surgical and congenital defects; seminars on clinical treatment.

RPRO 571abcdef Clinic: Removable Partial Prosthodontics (0-0-0-0-0-2) Clinical experience in diagnosis, treatment planning, and laboratory procedures necessary for the treatment of the partially edentulous patient. Includes seminars related to clinical treatment.

RPRO 602 Advanced Removable Prosthodontics (4) Critical review and evaluation of the removable prosthodontic literature; guided experience in the laboratory and clinical phases of removable prosthodontic therapy. (Duplicates credit in 604abc.)

RPRO 603 The Edentulous Patient — Conventional or Implant Prosthesis (1) Effective management of the edentulous patient who is unable to adapt to a prosthesis; includes a review of implant dentistry with a hands-on session.

RPRO 604abc Advanced Removable Prosthodontics (0-0-4) Critical review and evaluation of the removable prosthodontic literature; guided experience in the laboratory and clinical phases of removable prosthodontic therapy. (Duplicates credit in 602.)

RPRO 605 Prosthodontic Seminar: Removable Partial Prosthodontics (1) Provides fourth year dental students with an advanced didactic foundation for treating the partially edentulous patient with a removable partial.

Herman Ostrow School of Dentistry

Courses of Instruction

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ORAL SURGERY (SURG)

SURG 501 Oral Surgery (2) Introduction to surgical dentistry, armamentarium and procedures; exodontics; infection; post operative care; repair of bone and soft tissue; acute injury; cysts, sinuses, nerve injury, biopsy.

SURG 562abc Clinic: Oral Surgery I (0-0-1) Supervised clinical experience in health history, surgical evaluation, extraction of teeth, and minor oral surgery procedures. Includes special case seminars.

SURG 563abc Clinic: Oral Surgery II (0-0-1) Supervised clinical experience in health history, surgical evaluation, extraction of teeth, and minor oral surgery procedures. Includes special case seminars.

SURG 564abcd Clinic: Hospital Oral Surgery (0-0-0-1) Observation of inpatient and outpatient oral and maxillofacial surgery, participation in clinic care of patients with dento-alveolar pathology, introduction to

management of medically compromised patient.

SURG 611abc Oral and Maxillofacial Surgery (0-0-4) More advanced instruction in oral and maxillofacial surgery and related diseases as appropriate to the practice of general dentistry; extensive clinical experience.

SURG 701ab Seminar: Advanced Oral Surgery (2-2) Problems in advanced oral surgery and hospital oral surgery including student presentations and critique of clinical cases.

SURG 702ab Seminar: Review of the Oral Surgery Literature (2-2) Critical analysis of recent oral surgery and other related literature.

SURG 708ab Orthognathic Surgery (a: 2, Fa; b: 2, Sp) Surgical planning and treatment of patients with skeletal deformities.

SURG 721 Surgical Anatomy (2) Intensive review of anatomy relevant to the practice of oral surgery. Includes dissections and animal surgery.

SURG 761abcd Clinic: Advanced Oral Surgery (1-10 each) Clinical evaluation and surgical treatment of dento-alveolar disease in out-patient clinic.

SURG 763abcd Clinic: Advanced Hospital Oral Surgery and Anesthesia (1-10 each) Surgical treatment of patients and service in medical anesthesia at the LAC+USC Medical Center.

USC School of Dramatic Arts

The USC School of Dramatic Arts produces a diverse range of plays each academic year. These two dozen productions embody an integral part of our curriculum that provides our student artists a learning experience that is both challenging and thought provoking. Here Kimberli Flores (MFA 2015) portrays a young woman with a dubious past in "The Time of Your Life," the Pulitzer Prize-winning drama by William Saroyan which centers on the good-hearted patron of a San Francisco dive bar as he encourages the colorful denizens that drift through the rundown saloon. Photo by Craig Schwartz.

One of the premier dramatic arts schools in the United States, the USC School of Dramatic Arts provides the necessary education and training for graduates to excel in the professional arts. The school promotes and supports innovative and flexible ways to achieve students' educational and professional goals.

The dramatic arts are both a collaborative endeavor and a universal means of communication. The school educates students in the history of theatre, while preparing them to add to that history, to use their talents, skill and imagination to explore the limitless possibilities the dramatic arts offer.

The USC School of Dramatic Arts is significantly enhanced by its location in Los Angeles, the entertainment

capital of the world. Visiting guest artists frequently teach seminars, mentor students and participate in School of Dramatic Arts productions.

Graduates of the school work professionally in all aspects of the entertainment industry. The school's faculty are dynamic teachers who are also artists working at the highest level of their profession.

The breadth of learning opportunities offered at the school prepares students for the spectrum of careers in the dramatic arts, including performance, production, design, sound design, management and teaching. The School of Dramatic Arts also strives to instill confidence, integrity, excellence and artistic sensitivity into each of its students — traits that are essential to success in any field.

Faculty

Professors: Sharon M. Carnicke, Ph.D.; Velina Hasu Houston, Ph.D.

Associate Professors: Meiling Cheng, DFA; Oliver Mayer, MFA

Assistant Professors: Luis Alfaro; Takeshi Kata, MFA; Tom Ontiveros, MFA; Sibyl Wickersheimer, MFA

Professors of Theatre Practice: Andrei Belgrader, MFA; Natsuko Ohama; Andrew J. Robinson

Associate Professors of Theatre Practice: Philip G. Allen; Paul Backer, Ph.D.; Brent Blair, Ph.D.; David Bridel; Elsbeth M. Collins; Anita Dashiell-Sparks, MFA; Christina Haatainen-Jones; Joseph Hacker, MFA; Duncan Mahoney; Mary-Joan Negro; Jack R. Rowe; Stephanie Shroyer, MFA; Eric Trules

Assistant Professors of Theatre Practice: John De Mita, MFA; Randy Mell; David Warshofsky, MFA

Adjunct/Part-Time Faculty of Theatre Practice: Tony Abatemarco; Rob Adler; Michael Arabian; Patricia Bahia, M.M.; Robert Bailey; Corbett Barklie; Joe Bays, MFA; Andrew Borba, MFA; Jason Robert Brown; Tom Buderwitz; Anne Burk, MFA; Frank Catalano, MPW; Julian S. Cha, Ph.D.; Paula Cizmar; Jennifer Cool, Ph.D.; Anastasia Coon, MFA; Eugene Cordero; Debra DeLiso, MFA; Kathleen S. Dunn-Muzingo, MFA; Frank Dwyer, M.A.; Kirstin Eggers; Dan Fishbach; Laura Flanagan, MFA; Jeff Flowers, MFA; Parmer Fuller, Ph.D.; Terry Gordon, MFA; Andrew Henkes, Ph.D.; Elizabeth Hogan, MFA; Paula Holt, M.A.; Michael Keenan; Mary K Klinger; Shishir Kurup, MFA; Edgar Landa; Vicki Lewis; Helene Lorenz, Ph.D.; Heather Lyle, M.M.; Susan Main; Marjo-Riikka Makela, MFA; Babette Markus; Kevin McCorkle; Laural Meade, MFA; Lauren Murphy, MFA; Ntare Guma Mbaho Mwine, MFA; Shawn Nelson; Patrick Pankhurst; Leah Piehl, MFA; John Rubinstein; Mady Schutzman, Ph.D.; Colin Sieburgh; Ella Turenne, MSW; Laura Vena, MFA; Matt Walker; Julie Welch

Courtesy Joint Appointments: Thomas G. Cummings, Ph.D.; Larry E. Greiner, Ph.D.; Bruce Smith, Ph.D.

Emeritus Professors: Don Llewellyn Jr., MFA; Eve Roberts, MFA; Robert R. Scales, Ph.D.; James Wilson, MFA

School of Dramatic Arts

General Information

Degree Programs

The School of Dramatic Arts offers professional and academic degrees at the Bachelor and Master of Fine Arts levels as well as a Master of Arts in Applied Theatre Arts. USC offers two degree programs to undergraduate students interested in the study of theatre arts. The professional degree programs, the Bachelor of Fine Arts (BFA) in Acting, Design/Technical Direction, Sound Design, and Stage Management, offer a conservatory approach to training for students committed to pursuing careers in the professional theatre, film and television industries. The Bachelor of Arts degree program (B.A.) incorporates a broad, general education in addition to a thorough study of drama. The Bachelor of Arts in Visual and Performing Arts Studies provides students with a broad understanding of the various disciplines. The School of Dramatic Arts also offers minor programs in applied theatre arts, theatre, musical theatre, performing arts studies and playwriting.

Bachelor of Arts

The Bachelor of Arts (B.A.) degree is ideal for students who want a broad education in addition to production and performance experience. The degree is offered in cooperation with the USC Dornsife College of Letters, Arts and Sciences.

Bachelor of Fine Arts

Acting: The BFA acting degree is a four-year professional training program with opportunities for performances beginning with the sophomore year. The program comprises an integrated sequence of training in acting, voice and body movement, based on the belief that an actor's emotional and imaginative abilities cannot be released without control over vocal and physical resources. This training is combined with course work in critical and historical studies, stagecraft, technical theatre, scenic design, costume and lighting. An audition is required for admission. The BFA acting program is highly competitive.

Design/Technical Direction: The BFA program in design/technical production offers two areas of study: design — incorporating study in scenic, lighting and costume design; and technical production — incorporating the study of theatrical design with training in the professional skills needed to execute stage designs. An interview is required for admission.

Sound Design: The BFA program in sound design offers the student a combination of technical, management and design training in sound design. The student is also introduced to sound recording and mixing through a series of courses offered by the USC Thornton School of Music. Students begin using this training as early as the second semester of the second year of enrollment. The skills acquired in the classroom are further explored through sound design assignments on School of Dramatic Arts public productions in each subsequent semester of the student's program. Students in the sound design program build and design the sound component for the majority of the School of Dramatic Arts' productions under the supervision of a professional staff of designers and theatre technicians. An interview is required for admission.

Stage Management: The BFA program in stage management offers the student a combination of technical, management and design training. Students begin using this training as early as the first year of enrollment. The skills acquired in the classroom are further explored through stage management assignments in each year of the student's program. An interview is required for admission.

Students in the design/technical production and stage management programs design, build and stage manage the majority of the School of Dramatic Arts' productions under the supervision of a professional staff of designers and theatre technicians.

Bachelor of Arts in Visual and Performing Arts Studies

The Bachelor of Arts in Visual and Performing Arts Studies is an interdisciplinary degree offered jointly by the School of Dramatic Arts, the School of Architecture, the School of Cinematic Arts, the Roski School of Art and

Design, the Thornton School of Music, and the Dornsife College of Letters, Arts and Sciences.

Minor Programs

Theatre This general minor in theatre invites students to explore the many facets of this exciting field. Students have the opportunity to take a variety of classes in acting, applied theatre arts, applied theatre arts/education, playwriting, literature, stage management, directing, costume design and production. The curriculum is very flexible and encourages students to develop a primary interest for upper-division course work. All minor students are eligible to participate in performance and production projects.

Applied Theatre Arts The minor in applied theatre arts addresses the theory and practice of applying theatre arts in non-traditional settings with emphases that include education, therapy and social change.

Comedy The minor in comedy (performance) is a 20-unit minor that focuses on the theory and practice of comedy-making from the performer's perspective. Beginning with a foundation in the history of comic performance, and supplemented by courses in the fundamentals of acting and performance, the progression of the minor offers students a comprehensive theoretical and experiential education in the many differing disciplines of comedy.

Musical Theatre The minor in musical theatre, interdisciplinary in nature, is a 27-unit program incorporating the study of acting, dance or movement, vocal arts and related musical subjects presented in association with the Thornton School of Music.

Performing Arts Studies The minor in performing arts provides an interdisciplinary inquiry into the nature and aesthetics of the performing arts. It combines the disciplines of cinematic arts, dance, music and theatre. The minor is a unique course of study that looks at how the performing arts contribute to a culturally literate society.

Playwriting The minor in playwriting presents undergraduate students who are not theatre majors with a concentration in the discipline of playwriting as a means for broadening and deepening expression using the literary and performing arts. This minor offers a foundation for extended expression in dramatic writing and creative writing genres in general.

Master of Fine Arts

The Master of Fine Arts with a major in theatre requires 48–64 units of course work at the 400 or 500 level. The areas of emphasis include acting, theatrical design, dramatic writing and directing. These programs provide a high level of practical experience. To ensure this, the number of students accepted in each area of emphasis is strictly limited. An interview is required for admission.

Master of Arts, Applied Theatre Arts

The Master of Arts in Applied Theatre Arts explores the intersection of theatre arts and cultural fieldwork, encompassing the fields of theatre and therapy, theatre in education and theatre for social change/community-based theatre. Practitioners of applied theatre arts supplement their work as classroom teachers, therapists, social workers, case managers, community organizers and social activists.

Auditions and Entrance to the Degree Programs

Admission to the various degree programs is granted through the university's regular admission procedures in conjunction with the School of Dramatic Arts supplementary application procedure. See the Admission section of this catalogue, Undergraduate and Graduate.

Admission to the B.A. program is determined by academic record, experience in theatre, and information required on the USC application for admission and the School of Dramatic Arts supplementary application. Students applying for the B.A. program must contact the School of Dramatic Arts directly to obtain the supplementary application.

In addition to submitting a USC application for admission, a dramatic arts supplementary application and an in-person audition are required for the BFA and MFA programs. Auditions are held during January and February. Applicants should contact the School of Dramatic Arts directly to obtain supplementary application materials and

to arrange for their audition.

The acting audition requires two monologues: one contemporary and one classical (preferably verse).

Auditions and interviews for all programs are held in major cities around the country including Los Angeles, Chicago and New York.

Students wishing to transfer from a community college or another four-year college or university into the Bachelor of Fine Arts curriculum must present training equivalent to their level of transfer or be prepared to take remedial work in acting, voice, movement, dramatic literature and stagecraft.

Admission to the BFA and MFA Design/Technical Direction, Stage Management and Sound Design programs is based on a personal interview and/or review of a portfolio. In addition, the student must submit a USC application for admission and a dramatic arts supplementary application.

Applicants for the design programs must present a portfolio of their work at the time of their interview with the design faculty.

Interviews are held beginning in January for the following fall semester.

Admission to full graduate standing will be granted after the satisfactory completion of one semester. A satisfactory test score on the Graduate Record Examinations and a satisfactory grade point average are also required.

Application materials and details about audition dates and locations may be obtained from the Office of Admissions and Recruitment, School of Dramatic Arts, University of Southern California, Los Angeles, CA 90089-0791, (213) 740-1286.

International Study

In conjunction with Sarah Lawrence College and the British American Drama Academy, USC students have the opportunity to study theatre in London. For additional information, see International Study Options.

School of Dramatic Arts

Degree Requirements

Bachelor of Arts

The Bachelor of Arts with a major or minor in theatre is a comprehensive theatre degree offered in cooperation with the USC Dornsife College of Letters, Arts and Sciences. Candidates for the degree must complete the university general education requirements in addition to the courses in the major prescribed by the School of Dramatic Arts. A total of 128 units is required for completion of the degree.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing, foreign language and diversity requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

School Majors

Students who choose the school major are required to complete a minimum of 52 units in theatre as specified:

REQUIRED COURSES		UNITS
THTR 101	Introduction to Acting	4
THTR 125	Text Studies for Production	4
THTR 130	Introduction to Theatrical Production	4
THTR 210	Theory and Practice of World Theatre I	4
THTR 211	Theory and Practice of World Theatre II	4
THTR 212	Theory and Practice of World Theatre III	4
THTR 305a	Directing	4
		28

One course (3 units) from:

THTR 230	Communicating Theatrical Design Concepts	3
THTR 231a	Costume Construction	3
THTR 232	Stage Lighting	3
THTR 335	Scenic Construction	3

One course (4 units) from:

THTR 300	Introduction to Modern Drama	4
THTR 301	Greek and Roman Theatre	4
THTR 302	Shakespeare in His World	4
THTR 313	Comedy of Manners	4
THTR 314	Advanced Topics in Modern Drama	4
THTR 395	Drama as Human Relations	4
THTR 396	God, Drama and Entertainment	4
THTR 403	The Performing Arts	4
THTR 404	Acting Theory	4
THTR 405	Performing Identities	4
THTR 406	Theatre on the Edge	4
THTR 476	African American Theatre, Dance and Performance	4

Required upper division theatre electives: 17

Total required theatre units: 52

Required Courses for the B.A. Emphasis in Acting (59 units):

REQUIRED COURSES		UNITS
THTR 101	Introduction to Acting	4
THTR 125	Text Studies for Production	4
THTR 130	Introduction to Theatrical Production	2/2
THTR 210	Theory and Practice of World Theatre I	4
THTR 211	Theory and Practice of World Theatre II	4
THTR 212	Theory and Practice of World Theatre III	4
THTR 216	Movement for Actors	2
THTR 252ab	Intermediate Acting	2/2
THTR 305a	Directing	4
THTR 342a	Basic Voice	2
THTR 352a	Intermediate Acting II	2

Total Required Units **38**

One course (3 units) from:

THTR 230	Communicating Theatrical Design Concepts	3
THTR 231a	Costume Construction	3
THTR 232	Stage Lighting	3
THTR 335	Scenic Construction	3

One course (4 units) from:

THTR 300	Introduction to Modern Drama	4
THTR 301	Greek and Roman Theatre	4
THTR 302	Shakespeare in His World	4
THTR 313	Comedy of Manners	4
THTR 314	Advanced Topics in Modern Drama	4
THTR 395	Drama as Human Relations	4
THTR 396	God, Drama and Entertainment	4
THTR 403	The Performing Arts	4
THTR 404	Acting Theory	4
THTR 405m	Performing Identities	4
THTR 406	Theatre on the Edge	4
THTR 476m	African American Theatre, Dance, and Performance	4

Select 6 units from the following:

THTR 342b	Basic Voice	2
THTR 352b	Intermediate Acting II	2
THTR 354	Acting Shakespeare	2
THTR 454	Acting Shakespeare II	2
THTR 408a	Dialects	2
THTR 408b	Dialects	2
THTR 480a	Performance for Camera	2

Select 8 units from the following:

THTR 316	Advanced Movement for Actors	2
THTR 343	Musical Theatre Audition	3
THTR 365	Playwriting I	4
THTR 397	Theatre Practicum	2
THTR 417	Stage Combat	2
THTR 419	Alexander Technique for Performers	2
THTR 442	Voice-over Acting	2
THTR 452a	Advanced Acting	4
THTR 475	Acting on Camera: The Collaborative Process	4
THTR 472	Professional Preparation for Actors	2
THTR 480b	Performance for Camera	2
THTR 495	Experimental Theatre Workshop I	4
THTR 497	Advanced Theatre Practicum	2

Total required Theatre Units: **59**

Total required General Education **32**

Total Elective Units	37
Total Units	128

Required Courses for the B.A. Emphasis in Design (55-56 units):

REQUIRED COURSES		UNITS
THTR 101	Introduction to Acting	4
THTR 125	Text Studies for Production	4
THTR 130	Introduction to Theatrical Production	2/2
THTR 210	Theory and Practice of World Theatre I	4
THTR 211	Theory and Practice of World Theatre II	4
THTR 212	Theory and Practice of World Theatre III	4
THTR 230	Communicating Theatrical Design Concepts	3
THTR 305a	Directing	4
THTR 397	Theatre Practicum	2
Total Required Units		33

Select two courses (5-6 units) from:

THTR 231a	Costume Construction	3
THTR 232	Stage Lighting	3
THTR 236	Stage	2

One course (4 units) from:

THTR 300	Introduction to Modern Drama	4
THTR 301	Greek and Roman Theatre	4
THTR 302	Shakespeare in His World	4
THTR 313	Comedy of Manners	4
THTR 314	Advanced Topics in Modern Drama	4
THTR 395	Drama as Human Relations	4
THTR 396	God, Drama and Entertainment	4
THTR 403	The Performing Arts	4
THTR 404	Acting Theory	4
THTR 405	Performing Identities	4
THTR 406	Theatre on the Edge	4
THTR 476	African American Theatre, Dance, and Performance	4

Select 13-units from the following:

THTR 231b	Costume Construction	3
THTR 330	Scene Design I	4
THTR 331	Costume Design I	4
THTR 332	Lighting Design I	4
THTR 336	Introduction to Sound Design	3
THTR 407a	Drawing and Rendering for the Theatre	2
THTR 432ab	Scene Design II	3/3
THTR 433ab	Costume Design II	3/3
THTR 434ab	Lighting Design II	3/3

THTR 435	Advanced Theatrical Drafting	3
THTR 436	Sound for Theatre	3
THTR 441	Advanced Sound Design	3
Total required Theatre Units		55-56
Total required General Education		32
Total Elective Units		40-41
Total Units		128

School of Dramatic Arts

Degree Requirements

Bachelor of Fine Arts

The Bachelor of Fine Arts provides four years of intensive training at the undergraduate level in performance studies including acting, design, sound design, stage management and technical direction. A total of 128 units of course work is required for this degree, including a minimum range of 75–84 theatre units depending on the requirements of each program.

All BFA Theatre majors are required to earn a grade point average of 2.75 (A = 4.0) in their theatre courses each semester. BFA students who fail to earn a GPA of 2.75 in their theatre courses will be placed on probation the following semester. Students who remain on probation for a consecutive second semester will be disqualified from the BFA program.

A student disqualified from continued study in the BFA program for failing to meet the GPA standards outlined above will be given the option of transferring into the B.A. program.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

School of Dramatic Arts

Degree Requirements

Bachelor of Arts in Visual and Performing Arts Studies

The Bachelor of Arts in Visual and Performing Arts Studies is an interdisciplinary degree offered jointly by the Kaufman School of Dance, the School of Dramatic Arts, the School of Architecture, the School of Cinematic Arts, the Roski School of Art and Design, the Thornton School of Music, and the Dornsife College of Letters, Arts and Sciences. Candidates for the degree must complete the university general education requirements in addition to the courses in the major. Students in this major complete a core of required courses that provides them with a broad understanding of the various disciplines. The work in the major is completed by choosing courses from a wide array of course offerings from all the participating schools. A total of 128 units is required for completion of the degree.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing, foreign language and diversity requirements, which together comprise the USC Core. See [The USC Core](#) and the [General Education Program](#) for more information.

REQUIRED CORE COURSES (SURVEY OF THE ARTS)		UNITS
AHIS 120	Foundations of Western Art	4
ARCH 304x	Intensive Survey: Prehistory to the Present	4
CTCS 393	History of the American Film, 1946–1975	4
DANC 380	Historical Approaches to Dance	4
FACS 150	Visual Culture and Literacy I	4
MUHL 315x	Music and Culture	4
THTR 125	Text Studies for Production	4
Total:		28

CASE STUDIES IN THE ARTS:

12 units of upper division course work from the following:		
<i>Architecture:</i>		
ARCH 314	History of Architecture: Contemporary Issues	3
ARCH 432	People, Places and Culture: Architecture of the Public Realm	4
ARCH 434	City Cine: Visuality, Media and Urban Experience	4
ARCH 440	Literature and the Urban Experience	4
ARCH 444	Great Houses of Los Angeles	4
ARCH 454	Contemporary Asian Architecture	4
<i>Cinematic Arts:</i>		
CTAN 451	History of Animation	2
CTCS 392	History of the American Film, 1925–1950	4
CTCS 394	History of the American Film, 1977–present	4
CTCS 406	History of American Television	4
CTCS 407	African-American Cinema	4
CTCS 409	Censorship in Cinema	4
CTCS 411	Film, Television, and Cultural Studies	4
CTCS 412	Gender, Sexuality, and Media	4
CTCS 414	Latina/o Screen Cultures	4
ENGL 471	Literary Genres and Film	4
PHIL 446	Aesthetics and the Film	4
<i>Fine Arts:</i>		
AHIS 319	Mesoamerican Art and Culture	4
AHIS 321	Greek Art and Archaeology	4
AHIS 322	Roman Art and Archaeology	4
AHIS 330	Medieval Art	4
AHIS 343	Renaissance Art	4
AHIS 364	Myths, Arts, Realities: Visual Culture in California 1849 to the Present	4
AHIS 368	Modern Art I: 1700–1850	4

AHIS 369	Modern Art II: 1851–1940	4
AHIS 370	Modern Art III: 1940 to the Present	4
AHIS 373	History and Theory of Photography	4
AHIS 384	Early Chinese Art	4
AHIS 385	Later Chinese Art	4
FACS 350	Art Theory and Criticism	4
FAIN 330	Ideas in Intermedia	4
PAS 371	Art in the Public Realm: Contemporary Issues	4
PAS 400	New Models of Art in City-Space	4
<i>Music:</i>		
MUHL 331	Music History III	3
MUHL 332	Studies in Musical Culture	3
MUHL 476	Music Criticism	2
MUJZ 419	The Jazz Experience: Myths and Culture	4
MUSC 400	The Broadway Musical: Reflection of American Diversity, Issues, and Experiences	4
MUSC 420	Hip-Hop Music and Culture	4
MUSC 444	American Roots Music: History and Culture	4
MUSC 460	Film Music: History and Function from 1930 to the Present	4
MUSC 465	Music, Television and American Culture	4
<i>Theatre:</i>		
COLT 354	Revolutions in Theater	4
THTR 301	Greek and Roman Theatre	4
THTR 302	Shakespeare in His World	4
THTR 313	Comedy of Manners	4

THTR 405	Performing Identities	4
THTR 406	Theatre on the Edge	4
THTR 476	African-American Theatre, Dance and Performance	4
THTR 481	From the Border to Broadway	4
<i>Other Courses:</i>		
COLT 381	Psychoanalysis and the Arts	4
PHIL 445	Philosophy of the Arts	4
<i>Overseas Study Opportunities:</i>		
FREN 432	French Theatre (Paris Semester)	4
SPAN 464	Introduction to Contemporary Spanish Theatre (Madrid Center)	4

School of Dramatic Arts

Degree Requirements

Minor Programs

Minor in Applied Theatre Arts

Applied theatre arts is a field of study addressing the theory and practice of applying theatre arts in non-traditional settings with emphases that include education, therapy and social change. The minor in applied theatre arts (ATA) addresses the theory and practice of applying theatre skills in these environments to promote engaged and enlivened interactive critical thinking and community development from a performative perspective. ATA minors learn how to turn passive spectators into more active participants through the process of theatre.

Courses taken for this minor may not duplicate requirements for a student's major or other minor program requirements:

FOUNDATION SKILLS COURSES (8 UNITS)

UNITS

It is recommended these be taken first:

THTR 101	Introduction to Acting	4
THTR 305a	Directing	4

ATA FOCUS COURSES (12 UNITS)

UNITS

It is recommended these be taken after foundation skills courses:

THTR 468	Theatre in Education	4
THTR 477	Theatre and Therapy	4
THTR 488	Theatre in the Community	4

Minor in Comedy (Performance)

The minor in comedy (performance) is a 20-unit minor that focuses on the theory and practice of comedy-making from the performer's perspective. Beginning with a foundation in the history of comic performance, and supplemented by courses in the fundamentals of acting and performance, the progression of the minor offers students a comprehensive theoretical and experiential education in the many differing disciplines of comedy.

REQUIRED COURSES

UNITS

THTR 101	Introduction to Acting	4
THTR 122	Improvisation and Theatre Games	2
THTR 197	Comedy and Performance	4
THTR 216	Movement for Actors	2
THTR 342a	Basic Voice	2
THTR 470	Sketch Comedy for Theatre	2
THTR 479	Solo Performance	4

Total units: **20**

Minor in Musical Theatre

The minor in musical theatre, interdisciplinary in nature, is a 27-unit program incorporating the study of acting, dance or movement, vocal arts and related musical subjects. Admission to the minor requires an audition for music but not for theatre. See the Thornton School of Music for requirements.

Minor in Performing Arts Studies

The minor in performing arts provides an interdisciplinary inquiry into the nature and aesthetics of the performing arts. It combines the disciplines of cinematic arts, dance, music and theatre. The minor is a unique course of study that looks at how the performing arts contribute to a culturally literate society. The minor in performing arts studies is a 20-unit program.

REQUIRED COURSES		UNITS
Required capstone course:		
THTR 403	The Performing Arts	4
Plus a minimum of four courses (16 units) from the following list. Three courses (12 units) must be upper division. One course (4 units) must be selected from each school.		
CTCS 190	Introduction to Cinema	4
CTCS 200	History of the International Cinema I	4
CTCS 201	History of the International Cinema II	4
CTCS 392	History of the American Film, 1925–1950	4
CTCS 393	History of the American Film, 1946–1975	4
CTCS 404	Television Criticism and Theory	4
CTCS 464	Film and/or Television Genres	4
CTCS 469	Film and/or Television Style Analysis	4
DANC 280	Introduction to Dance as an Art Form	4
DANC 380	Historical Approaches to Dance	4
DANC 385L	Choreography and Performance	4
MUHL 302	Musical Cultures of the World	4
MUJZ 100x	Jazz: America’s Music	4
MUSC 400	The Broadway Musical: Reflection of American Diversity, Issues, and Experiences	4
THTR 201	Introduction to the Theatre	4
THTR 300	Introduction to Modern Drama	4
THTR 301	Greek and Roman Theatre	4
THTR 302	Shakespeare in His World	4
THTR 404	Acting Theory	4
THTR 493ab	Periods and Styles	2-2
Total units required:		20

Note for cinematic arts, music and theatre majors: cinema majors take 8 units of music and 8 units of theatre; music majors take 8 units of cinema and 8 units of theatre; theatre majors take 8 units of cinema and 8 units of music.

Minor in Playwriting

The minor in playwriting presents undergraduate students who are not theatre majors with a concentration in the discipline of playwriting as a means for broadening and deepening expression using the literary and performing arts. This minor offers a foundation for extended expression in dramatic writing and creative writing genres in general; fostering skills in research, development, communication, collaboration and craftsmanship in the process of preparing a play for its realization on stage. The minor in playwriting is a 20-unit program.

REQUIRED COURSES		UNITS
THTR 101	Introduction to Acting, or	
THTR 125	Text Studies for Production	4
THTR 305a	Directing	4
THTR 365	Playwriting I	4
THTR 366	Playwriting II	4
THTR 479	Solo Performance	4

Minor in Theatre

This general minor in theatre invites students to explore the many facets of this exciting field. Students have the opportunity to take a variety of classes in acting, playwriting, literature, stage management, directing, costume design and production. The curriculum is very flexible and encourages students to develop a primary interest for upper-division course work. All minor students are eligible to participate in performance and production projects.

REQUIRED COURSES		UNITS
THTR 101	Introduction to Acting, or	
THTR 125	Text Studies for Production	4
THTR 130	Introduction to Theatrical Production	2
One of the following:		
THTR 301	Greek and Roman Theatre	4
THTR 302	Shakespeare in His World	4
THTR 313	Comedy of Manners	4
THTR 314	Advanced Topics in Modern Drama	4
THTR 476	African American Theatre	4
Required upper-division THTR electives:		14
Required theatre units:		24

School of Dramatic Arts

Degree Requirements

Master of Fine Arts

The Master of Fine Arts in theatre allows the choice of an area of emphasis in theatre performance studies including acting, directing, dramatic writing or theatrical design.

Seventy-two units of study at the 400- or 500-level are required for the acting emphasis, 72 units for the dramatic writing emphasis and 48 units for the directing and theatrical design emphases. Regardless of the emphasis, at least two-thirds of the units must be at the 500 level or higher. In design, instead of a conventional thesis, the MFA student completes a final project in the area of design and defends it orally before the design faculty. A grade point average of 3.0 must be achieved in all graduate work taken in the School of Dramatic Arts. Graduate candidates whose undergraduate degrees are in disciplines other than theatre may be required to satisfy undergraduate prerequisites in theatre as determined by School of Dramatic Arts faculty.

Curricula for the Master of Fine Arts Degree

ACTING EMPHASIS		UNITS
THTR 480ab	Performance for the Camera	2-2
THTR 504	The Art of Collaboration and Ensemble	2
THTR 515abcde	Advanced Movement	10
THTR 520abcde	Advanced Acting	16
THTR 529ab	Textual Studies for Performance	8
THTR 540abcdef	Advanced Voice Diction	12
THTR 541	Diction and Dialects	2

THTR 542	Singing for Actors	2
THTR 571	Professional Seminar	2
THTR 575	Creative Production Projects	6
THTR 597	Theatre Practicum	8
		72

DIRECTING EMPHASIS **UNITS**

THTR 520ab	Advanced Acting	8
THTR 525	Seminar in Contemporary Theatre	4
THTR 528	Seminar in Dramatic Analysis	4
THTR 555	Directing Fundamentals	2
THTR 556ab	Directing	4
THTR 558ab	Design for Directors	4
THTR 567a	Studies in Playwriting	4
THTR 591	Seminar in Producing Theatre	4
THTR 593	MFA Project	4
Electives by advisement		10
		48

THEATRICAL DESIGN EMPHASIS **UNITS**

Two courses from:

THTR 550a	Seminar in Scene Design	3
THTR 552a	Seminar in Costume Design	3
THTR 553a	Seminar in Lighting Design	3

Two continuing courses from:

THTR 550b	Seminar in Scene Design	3
THTR 552b	Seminar in Costume Design	3
THTR 553b	Seminar in Lighting Design	3

One remaining course from:

THTR 550a	Seminar in Scene Design	3
THTR 552a	Seminar in Costume Design	3
THTR 553a	Seminar in Lighting Design	3

All of the following:

THTR 407ab	Drawing and Rendering for the Theatre	2-2
THTR 435	Advanced Theatrical Drafting	3
THTR 493ab	Periods and Styles	2-2
THTR 593	MFA Project	4

Two seminars, one of which must be

THTR 528	Seminar in Dramatic Analysis (4)	8
----------	----------------------------------	---

400- or 500-level electives by advisement, 5 units of which must be at the 500 level		10
		48

DRAMATIC WRITING EMPHASIS **UNITS**

CTWR 513	Writing the Short Script	2
CTWR 514ab	Basic Dramatic Screenwriting	2-2
THTR 500	Dramaturgical Perspectives and Approaches	2, max 10
THTR 501	Poetry and Prose into Drama	4
THTR 506	Advanced Creating Characters	2
THTR 527	Writing the Pacific Rim: Global and Western Dramatic Writing	4
THTR 529a	Textual Studies for Performance	4
THTR 566	Dramatic Writing Studio	4, max 20
THTR 590	Directed Research	2, max 4
THTR 596	Thesis Development and Attainment	2, max 10
Electives		10
		72

A minimum of 72 units of graduate course work must be completed prior to the degree being granted. Thesis Requirement: The student is required to complete a thesis portfolio consisting of four theatre projects: (1) a full-length original play, (2) a full-length original play or an adaptation, (3) a full-length screenplay, (4) a project that is either a play of any length, or a short subject or feature length script, a set of television speculative scripts (either in three half-hour short form of drama from the same TV program or a set of characters; or one-hour long form) or an interdisciplinary/multimedia project (approved in advance by the dramatic writing faculty.) An oral defense and review by program faculty and the developing portfolio is required when the student has completed two-thirds of the program, generally in the fall term of the student's third year.

School of Dramatic Arts

Degree Requirements

Master of Arts, Applied Theatre Arts

The Master of Arts in Applied Theatre Arts explores the intersection of theatre and cultural fieldwork, encompassing the fields of theatre and therapy, theatre in education and theatre for social change/community-based theatre. This combined area of study weaves all three disciplines together under the aegis of training practitioners in the *art* of popular theatre with primarily marginalized communities. Practitioners of applied theatre arts supplement their work as classroom teachers, therapists, social workers, case managers, community organizers and social activists to engage public groups to obtain their goals and desires by using the tools of theatre to expedite dialogue and foster an atmosphere of greater critical consciousness and increased agency. A written and oral examination is required upon completion of course work.

International Study

All students will participate in an international externship during the summer following their academic year. This externship takes place in an approved overseas site where the practice of applied theatre arts is well established, with whom the university has a contractual agreement for supervised observation. This externship intends to provide a supervisory, logistical and theoretical container for students to explore cultural fieldwork in the international arena.

Curricula for the Master of Arts Degree

APPLIED THEATRE ARTS		UNITS
THTR 505	Staging Community-based Theatre	3
THTR 521	Engaging Community Narratives	3

THTR 544	Embodied Poetics	2
THTR 568	Popular Theatre for Education and Development	3
THTR 577	Theatre and Therapy for Cultural Fieldwork	3
THTR 578	Theatre of the Oppressed Theory, Games, and Techniques	4
THTR 579	Writing Culture	3
THTR 586ab	Applied Theatre Arts: Los Angeles Residency	2-2
THTR 587	Liberation Arts and Community Engagement — Theory	4
THTR 588	Liberation Arts and Community Engagement — Praxis	3
THTR 592ab	Participatory Action Research for Community-based Theatre	2-2
THTR 598	Applied Theatre Arts: International Externship	2
		38

School of Dramatic Arts

Courses of Instruction

THEATRE (THTR)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

THTR 101 Introduction to Acting (4, FaSp) Study of genres, terminology, and disciplines of acting; fundamental techniques necessary for performance; scene study from contemporary plays.

THTR 110 Dramatic Analysis (2, Fa) Actors work on the text: analysis in rehearsal of scripts drawn from contemporary realism for dramatic characterization. *Corequisite:* THTR 115, THTR 120a, THTR 140a.

THTR 115 Movement I (2, Fa) Basic training for the actor's body for expression and communication. Awareness and control through mind-body techniques. *Corequisite:* THTR 110, THTR 120a, THTR 140a.

THTR 120ab Acting I (2-2, Sp) Basic principles and techniques of acting through theatre games and improvisation. Introduction to contemporary texts, basic characterization and cold reading techniques. Open to BFA majors only. *Corequisite:* a: THTR 110, THTR 115, THTR 140a; b: THTR 140b.

THTR 121abx Fundamentals of Acting (2-2, FaSp) a: The elements of the actor's imaginative skills. b: Continuation of THTR 121a. Not available for credit to theatre majors.

THTR 122 Improvisation and Theatre Games (2, max 4, FaSp) Individual and group exercise to free the actor physically and emotionally and to stimulate creativity, imagination, and self-expression.

THTR 124abx Character Acting (2-2, FaSp) a: Concentration of imaginative processes which develop the individual characteristics of a dramatic role. b: Continuation of THTR 124a. Not available for credit to theatre majors.

THTR 125 Text Studies for Production (4, Fa) Focuses on the questions, artistic choices, methodologies, and approaches of an actor/director/designer in the preparation of a production score prior to rehearsal.

THTR 130 Introduction to Theatrical Production (2, max 4, FaSp) Introduction to the non-performance areas of theatrical production (administrative, design, and technical fields) through hands-on participation in USC productions.

THTR 132ab Art of Theatrical Design (2-2, FaSp) a: A guided student exploration of the fundamentals of applied design elements and their use as creative tools in the design process; b: Development of the artistic

process and theatrical design vocabulary of the individual within the environment of collaborative storytelling.

THTR 140ab Voice I (2-2, Fa) Physiological mechanism of voice: breath control, phonation, resonance, articulation of language for the stage; expressive use of stress, intonation and rhythm. *Corequisite: a: THTR 110, THTR 115, THTR 120a; b: THTR 120b.*

THTR 152 Introduction to Scene Study (2, FaSp) Application and consolidation of the skills, knowledge and techniques acquired in the study of fundamentals of acting encountered in THTR 101. *Prerequisite: THTR 101.*

THTR 195g Theatre on Film (4, FaSp) Introduction to the theatre and its relationship to society through major plays in film versions. Separate screenings to be arranged.

THTR 196g Shakespeare on Film (4) Introduction to the formalized plays of William Shakespeare as texts for performance through reading, viewing and analysis of selected plays in textual and film versions.

THTR 197g Comedy and Performance (4) Comedy and Performance traces the history of comedy in performance from its earliest incarnations to the present day.

THTR 201 Introduction to the Theatre (4, Sp) Gateway to the majors and minors in theatre. Introduction to and exploration of the creative elements of theatre art: playwriting, acting, directing, and design of scenery, lighting, and costume. Research on a selected area. (Duplicates credit in former THTR 100.)

THTR 210 Theory and Practice of World Theatre I (4, Fa) A multicultural and transnational examination of the history, theory and practice of theatre from its origins to the age of Shakespeare and Zeami. *Recommended preparation: THTR 125.*

THTR 211g Theory and Practice of World Theatre II (4, Sp) A multicultural and transnational examination of the history, theory and practice of theatre from the Renaissance to the 19th Century. (Duplicates credit in former THTR 311.) *Recommended preparation: THTR 125.*

THTR 212 Theory and Practice of World Theatre III (4, Sp) A multicultural and transnational examination of the history, theory and practice of theatre from the late 19th century to the present date. *Recommended preparation: THTR 125.*

THTR 215ab Movement II (a: 2, Fa; b: 2, Sp) *a:* Training of the actor's body with focus on development of precision and strength. *Prerequisite: THTR 115; corequisite: THTR 220a, THTR 240a.* *b:* Training of the actor's body with focus on mask work for the development of precision, strength and expressiveness. *Prerequisite: THTR 215a; corequisite: THTR 220b, THTR 240b.*

THTR 216 Movement for Actors (2, FaSp) Training and practice in the coordination of the physical apparatus of the actor utilizing various movement techniques through improvisation.

THTR 220ab Intermediate Acting I (2-2, FaSp) Continuing development of imagination leading to an increased range of dramatic expression through the formalized text of William Shakespeare. *Prerequisite: THTR 120b.*

THTR 222 Stage Make-up (2, FaSp) Principles of stage make-up materials and skills allowing the actors to enhance their features and techniques for moderate and extreme aging, injuries, and character roles.

THTR 230 Communicating Theatrical Design Concepts (3, FaSp) The visualization and communication of design ideas through free-hand and mechanical drawing, including orthographics, isometrics, perspective, shades and shadows, plans, sections and elevations.

THTR 231ab Costume Construction (3-3, FaSp) Historical survey, theory and practice in construction of costume, emphasis on period and style. *Recommended preparation: THTR 125, THTR 201.*

THTR 232 Stage Lighting (3, FaSp) Theory and practice of theatrical lighting design including electricity, radiant energy, refraction, reflection, absorption, chromatic variation, and electronic controls. *Prerequisite:*

THTR 131.

THTR 236 Stage Sound (2, FaSp) Basic audio engineering science, how sound is measured, basic transducers and signal flow. Operation of recording and playback equipment used in theatrical sound design/mixing.

THTR 240ab Voice II (2-2, FaSp) Development of the voice using material which explores the techniques of Shakespeare and his contemporaries. *Prerequisite:* THTR 140b; *corequisite: a:* THTR 215a, THTR 220a; *b:* THTR 215b, THTR 220b.

THTR 241 Methods and Materials (2, FaSp) Cutting-edge and traditional methods and materials that enhance both the planning stages and realization of the theatrical design.

THTR 252ab Intermediate Acting I (2-2, FaSp) *a:* Polishing the actor's skills through analysis and class performance of scenes from plays. *b:* Continuation of THTR 252a.

THTR 295 Theatre in America (2, max 8, FaSp) Current state of American theatre, through a study of acting, playwriting, criticism, stage design, lighting, and dramatic styles.

THTR 300 Introduction to Modern Drama (4, Fa) An investigation of the ideas, forms, genres, and thematic concerns of modern drama. Equal emphasis is placed on the plays and their historical contexts. (Duplicates credit in former THTR 200.)

THTR 301 Greek and Roman Theatre (4, Fa) Examines the function of theatre, production and acting conventions, and the drama of classical Greece and Rome. (Duplicates credit in former THTR 213.) *Recommended preparation:* THTR 125, THTR 201.

THTR 302 Shakespeare in His World (4, Sp) The plays and theatre of Shakespeare, the influences on his work and his contemporary world. (Duplicates credit in former THTR 214.) *Recommended preparation:* THTR 201, THTR 210, THTR 211.

THTR 305ab Directing (4-4, FaSp) Examination of basic directorial principles. Pre-production analysis and rehearsal procedures; relationship of the director to actor; integration of technical aspects of production. *Prerequisite:* THTR 305a before b.

THTR 313 Comedy of Manners (4, Fa) Study of the development of Comedy of Manners, with primary focus on Restoration Comedy of Manners. *Recommended preparation:* THTR 201, THTR 210, THTR 211.

THTR 314 Advanced Topics in Modern Drama (4, Sp) 20th century realism and the avant-garde. *Recommended preparation:* THTR 201, THTR 210, THTR 211.

THTR 315ab Physical Theatre I (2-2, FaSp) Actor training anchored by rigorous physical movements. Activities include comedy, clowning, juggling, and mask work. Open to BFA Acting majors only.

THTR 316 Advanced Movement for Actors (2, FaSp) Advanced physical training for the B.A. actor utilizing various movement techniques through improvisation. For B.A., Theatre (Acting) students only. *Prerequisite:* THTR 216.

THTR 320ab Intermediate Acting II (2-2, FaSp) Further development of range and breadth of performance skills with emphasis on texts of heightened language and style. Open to BFA Acting majors only. *Prerequisite:* THTR 220b; *corequisite: a:* THTR 315a, THTR 340a; *b:* THTR 315b, THTR 340b.

THTR 330 Scene Design I (4, Fa) Historical styles, methods, and dramatic analysis for scene design as applied in contemporary practice. *Recommended preparation:* THTR 130ab.

THTR 331 Costume Design I (4, Sp) Historical styles, methods, and dramatic analysis in costume design as applied in contemporary practice. Execution of costume designs for assigned works. *Recommended preparation:* THTR 231.

THTR 332 Lighting Design I (4, FaSp) Historical styles, methods, and dramatic analysis in lighting design as applied in contemporary practice.

THTR 333 Stage Management I (3, Fa) Basic skills, including assembly of prompt book, blocking notation, and organizational and communication procedures applied in theatre production.

THTR 335 Scenic Construction (3, FaSp) Technology, organization, and operation of the theatrical scene shop centered around the proper and safe use of tools, the choosing of materials, and methods of construction. (Duplicates credit in former THTR 131.)

THTR 336 Introduction to Sound Design (3, FaSp) The art and techniques of theatrical sound design. The use of music and ambient sound in theatrical presentations. Design elements as metaphor.

THTR 340ab Intermediate Voice (2-2, FaSp) Extended development of vocal freedom and range, acquisition of articulate speech. Enhancement of vocal power and resonance, techniques for performing with a dialect. Open to BFA Acting majors only. *Concurrent enrollment:* THTR 315ab, THTR 320ab.

THTR 341x Voice for the Non-Theatre Major (2, Fa) Designed for the non-theatre major focusing on the range, color, texture, and projection of the human voice in a variety of situations. Not available for credit to theatre majors.

THTR 342ab Basic Voice (2-2, FaSp) *a:* Examination of the individual voice centering on resonance, tone, flexibility, and support through dramatic selections for transmitting meaning and emotion of character. *b:* Continuation of THTR 342a.

THTR 343 Musical Theatre Audition (3, FaSpSm) Designed to give students confidence and integrity for auditions in musical theatre. Choosing appropriate material and preparation for the audition and performance. Audition required.

THTR 352ab Intermediate Acting II (2-2, FaSp) *a:* Building and sustaining character in drama. *b:* Continuation of world drama. Class performance and critique. *Prerequisite:* THTR 252b.

THTR 354 Acting Shakespeare (2, FaSp) Basic approach to the acting and analysis of the highly formalized texts of William Shakespeare. *Prerequisite:* THTR 101; *recommended preparation:* THTR 252b.

THTR 365 Playwriting I (4, FaSp) Essential elements of playwriting through weekly assignments, students' initiative, occasional productions of scenes, and extensive classroom analysis.

THTR 366 Playwriting II (4, FaSp) Continuation of the work begun in THTR 365. *Prerequisite:* THTR 365.

THTR 390 Special Problems (1-4, FaSp) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

THTR 395m Drama as Human Relations (4) A focus on American ethnic and multicultural diversity from the perspectives of gender, race, and myth as revealed in plays, film, and other performance media.

THTR 396 God, Drama and Entertainment (4, FaSp) An exploration of money, power, sex and love in relation to secular and spiritual values represented by contemporary theatre media.

THTR 397 Theatre Practicum (1-4, max 12, FaSpSm) Substantive participation in productions sponsored by the school and supervised by the faculty.

THTR 403 The Performing Arts (4, FaSp) An interdisciplinary inquiry into the aesthetics of the performing arts. Examines a dramatic classic and its adaptation into musical theatre, opera, ballet, and film. (Duplicates credit in the former THTR 303.)

THTR 404 Acting Theory (4, FaSp) Examination of the theoretical foundations of acting as an art form through the reading of primary historical texts.

THTR 405m Performing Identities (4, FaSp) This course explores the live performance medium as a creative means of social redress and personal expression. (Duplicates credit in the former THTR 393m.)

THTR 406 Theatre on the Edge (4, FaSp) An exploration of the art of theatre at the edge of possibilities.

THTR 407ab Drawing and Rendering for the Theatre (2-2, FaSp) Drawing and rendering techniques appropriate for theatre designers. *a*: Drawing and drawing theory. *b*: Drawing and rendering. (Duplicates credit in former FA 407ab.)

THTR 408ab Dialects (2-2, FaSpSm) *a*: The study of standard American stage dialect using the international phonetic alphabet. *b*: The study of accents and regional dialects. *Prerequisite for b*: THTR 408a.

THTR 415ab Physical Theatre II (2-2, FaSp) Advanced Physical Acting focusing on principles of verbal/non-verbal improvisation and communication. Elements of textual analysis, including development of character mask and of the ensemble. Open to BFA Acting majors only. *Prerequisite*: THTR 315b.

THTR 417 Stage Combat (2, FaSp) Introduction to safe and effective portrayals of violence for the stage. Training and practice of unarmed stage combat skills. *Recommended preparation*: THTR 216.

THTR 419 Alexander Technique for Performers (2, FaSp) Training and practice in the work of F.M. Alexander. A clear and systematic look into the underlying principles that govern human movement.

THTR 420ab Advanced Acting (2-2, FaSp) Contemporary material from plays and screenplays with an emphasis on individual challenges and problems. Open to BFA acting majors only. *Prerequisite*: THTR 320b; *corequisite*: *a*: THTR 415a, THTR 440a; *b*: THTR 415b, THTR 440b.

THTR 421 Public Speaking as Performance: A Course for Non-Actors (2, FaSpSm) Public speaking approached as performance, using acting techniques to communicate with confidence, clarity and charisma.

THTR 430 Stage Management II (3, Sp) Application of stage management procedures required in the professional theatre. *Prerequisite*: THTR 333.

THTR 431 Seminar in Theatre Design (2, FaSp) Research into the application of contemporary topics relevant to theatrical design within the diverse cultural environment of the greater Los Angeles area.

THTR 432ab Scene Design II (3-3, FaSp) Continuation of THTR 330. Evolution of scene design through analysis of script, environmental factors, and styles. *Prerequisite*: THTR 330.

THTR 433ab Costume Design II (3-3, FaSp) Evolution of costume design through analysis of script, environmental factors, and styles. *Prerequisite*: THTR 331.

THTR 434ab Lighting Design II (3-3, FaSp) Continuation of THTR 332. Evolution of lighting design through analysis of script, environmental factors, and styles. *Prerequisite*: THTR 332.

THTR 435 Advanced Theatrical Drafting (3) Drafting style and complex graphic communication. Emphasis on creating professional plates, developing an individual style and graphic problem solving.

THTR 436 Sound for Theatre (3, Fa) Introduction to electronic sound and sound reinforcement, including basic equipment, recording, editing, and show operation.

THTR 437 Scene Painting (3, Sp) Techniques, materials, and equipment of the scenic artist, including both historic and modern methods. *Recommended preparation*: paint and drawing experience.

THTR 438 Technical Theatre (3, Sp) Theory and practice of technical theatre. Emphasis is on technical problem solving and graphic solutions to technical theatre. *Prerequisite*: THTR 230.

THTR 439 Stage Properties (3, Sp) Organization, management, and construction of properties for the theatre.

THTR 440ab Advanced Voice (2-2, FaSp) Continuation of exercises related to the individual student for the stage. Open to BFA students only. *Prerequisite:* THTR 340ab.

THTR 441 Advanced Sound Design (3, Sp) Advanced exploration of theatrical sound design theory and related technology; creative uses of music, sound effects, and audio equipment in modern theatres. *Prerequisite:* THTR 436.

THTR 442 Voice-over Acting (2, FaSp) Acting techniques, recording studio technology and editing for the field of voice acting and voice-overs. *Prerequisite:* THTR 342a or THTR 408a.

THTR 443 Production Management (4) The context and scope of work done by a Theatrical Production Manager. Students will learn about different types of theatrical organizations and how they are structured. *Prerequisite:* THTR 333; *recommended preparation:* two units of THTR 397.

THTR 444 Applied Voice: Speech and Text (3, Fa) Intensive study of speech and voice regarding text, context, environment, dynamics, range, and accent. *Recommended preparation:* THTR 342ab.

THTR 445 Accent Reduction for the Professional-Theory and Practice (2) Speaking Professional English clearly and expressively. Working on pronunciation, intonation, phrasing and clarity of thought. Developing clear, spontaneous and expressive verbal communication.

THTR 452ab Advanced Acting (4-4, FaSp) Intensive investigation and performance of audition techniques. Scene study skills developed, including cold readings, first readings, rehearsal procedure, performance process, camera/taping. *Prerequisite:* THTR 352b.

THTR 453 Taking it on the Road and Beyond (4, Sp) Specific instruction to prepare Stage Managers for the rigors and processes of Touring and Opera productions as well as other non-theatrical team-based collaborations in entertainment. *Prerequisite:* THTR 333 and THTR 430; *recommended preparation:* 2 units of THTR 397.

THTR 454 Acting Shakespeare II (2, FaSp) A continuation and deeper investigation of the analysis and performance of the highly formalized texts of William Shakespeare. *Prerequisite:* THTR 354.

THTR 458 Visiting Artist Workshop (2, max 4, FaSp) A workshop course taught by the visiting artist holding the George Burns chair. Course topics will be determined by the instructor.

THTR 459 Songwriting for the Musical Theatre (2, FaSp) Structure, character and intention in songwriting for the musical theatre. Writing for the voice and examination of how form follows content. Portfolio submission required.

THTR 465 Playwriting III (4) Analysis of a full-length play or its equivalent with continued production opportunity. *Prerequisite:* THTR 366.

THTR 466 Playwriting IV (4) Continuation of the work begun in THTR 465. *Prerequisite:* THTR 465.

THTR 468 Theatre in Education (4, Sp) Exploration of the theory and practice of theatre arts in the learning environment. Design and implement projects to support elementary and secondary education. *Recommended preparation:* THTR 201, EDUC 200.

THTR 470 Sketch Comedy for Theatre (2) A writing-performance workshop in which the students create, rehearse, and perform original sketch comedy material.

THTR 471 Senior Showcase (2) Designed to provide the graduating students with an opportunity to select, prepare and perform for agents, directors and producers in film, television and theatre. Audition required. Open to Theatre majors only.

THTR 472 Professional Preparation for Actors (2, FaSp) Introduction to the skills, knowledge, and promotional materials that will enable the student to manage an independent career in the performing arts. Open only to theatre majors at the senior level. *Recommended preparation:* THTR 101, THTR 252ab.

THTR 473 Sketch Comedy in Performance (2, Sp) A workshop in the techniques of performing humorous sketches, in collaboration with writers, directors, and technicians in the production of a live sketch comedy show. *Recommended preparation:* THTR 101, THTR 122, THTR 470.

THTR 475 Acting on Camera: The Collaborative Process (4, max 8) Acting students will learn to develop on-camera acting skills and to collaborate with student directors and cinematographers from the School of Cinematic Arts. *Recommended preparation:* 300-level acting course.

THTR 476mw African American Theatre, Dance, and Performance (4) A survey of African American theatre and cultural performance traditions as a reflection of both African American culture and American history.

THTR 477 Theatre and Therapy (4, Fa) Explores theatre as a healing art form. Techniques include games, improv, playback theatre, Boal's and Moreno's drama therapy, and Jungian dream theatre to name a few. Work with incarcerated youth, gay/lesbian/bi teens, elderly, disabled and other populations.

THTR 478ab Theatre for Youth (2-2) *a:* Theory and practice of youth theatre, including development and rehearsal of mainstage productions. Emphasis on multicultural and bilingual pieces. Enroll by audition or interview only. *b:* Continuation of *a*, bringing developed pieces into production for regional K–12.

THTR 479 Solo Performance (4, Fa) A writing-performance workshop in which students write, develop, and rehearse original, autobiographical and character monologues and perform them at the end of the semester.

THTR 480ab Performance for Camera (2-2, FaSpSm) *a:* Structured to address the dynamics of acting in relation to film/television. Refining the students' understanding of the similarities/differences between acting on stage/film. (Duplicates credit in former THTR 480.) *b:* Continued exploration of acting for film/television. Furthering the student's understanding of the similarities/differences between acting on stage/film.

THTR 481 From The Border to Broadway (4, Fa) An investigation of the role that Latina/o plays and performances have played in creating and documenting a contemporary American experience of the theatre.

THTR 484 Acting in Television Commercials (2, FaSm) An on-camera, workshop-style introduction to techniques, perspectives and theories unique to performing in television commercials. *Recommended preparation:* a 300-level acting or voice class.

THTR 485 Advanced Solo Performance (4, Sp) An advanced writing and performance workshop. Students will write and rehearse an extended personal monologue to be presented at the end of the semester. *Prerequisite:* THTR 479.

THTR 486 Creating Characters (4) A writing workshop devoted to the creation of living, breathing characters, exploring a range of techniques designed to develop authenticity.

THTR 487 Promotion for the Performing Arts (4, Fa) Introduction and overview of all aspects of marketing the arts including both non-profit and commercial organizations.

THTR 488mw Theatre in the Community (4, Fa) Research and actively develop the theory of theatre as a moving political, social, economic and spiritual force of change within the local community.

THTR 489 Theatre Internship (2–6, max 12, FaSpSm) Practical experience in the entertainment industry.

THTR 490x Directed Research (1–8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

THTR 491 Theatre Organization and Administration (4, Fa) Budgets, contracts, box-office procedures, public relations; personnel and executive policies of the school, community, and professional theatre.

THTR 492 Producing Theatre (4, Sp) Analysis of all procedures involved in producing theatre (commercial or non-profit) including legal and business guidelines and contracts. *Prerequisite:* THTR 491.

THTR 493ab Periods and Styles (2-2, FaSp) A survey of the influence of historical and cultural events on the evaluation of theatrical styles. *a*: Classical to Jacobean. *b*: Restoration to 20th century.

THTR 494 Raising Money for the Arts (4, Sp) Overview of fundraising techniques for non-profit theatre including grantsmanship, board development, direct mail soliciting, and money raising activities and events.

THTR 495 Experimental Theatre Workshop I (4, max 8, FaSp) Guidance and direction in the production of new and experimental plays for a public audience.

THTR 496 Experimental Theatre Workshop II (4, max 8, FaSp) Continuation of THTR 495*ab*. Enrollment by audition only.

THTR 497 Advanced Theatre Practicum (2, max 4, FaSp) Intensive participation in a production sponsored by the school and supervised by the faculty, to increase and develop artistic growth. *Prerequisite*: THTR 397.

THTR 498 Production Analysis and Performance (4) Investigation and analysis of the work of a major dramatist and his milieu; production of one of his plays.

THTR 499 Special Topics (2-4, max 8, FaSp) Studies in selected areas of theatre art. Intensive practice in role and script interpretation and its psychological relationship to the audience.

THTR 500 Dramaturgical Perspectives and Approaches (2, max 10) Investigates art and craft of dramatic writing initiated/completed in other MFA in Dramatic Writing courses or that was submitted as a sample for program entry.

THTR 501 Poetry and Prose into Drama (4, Sp) Plays for the stage shall be written using public-domain poetry and prose as inspiration and source material, complemented with exploring poetry, prose, and varied dramas as context for the student writer. Students should be well-versed in literature, and have written in one or more genres. *Recommended preparation*: reading poetry and novels.

THTR 504 The Art of Collaboration and Ensemble (2, FaSp) An investigation of the role that collaboration plays in making ensemble work. MFA Actors will collaborate with MFA Dramatic Writers in creating an ensemble company.

THTR 505 Staging Community-based Theatre (3, Sp) Explores the theory and practice of staging community-based popular theatre, including Theatre of the Oppressed, street theatre, witness theatre, agit-prop and festival theatre events.

THTR 506 Advanced Creating Characters (2) An advanced writing workshop that focuses on continuing development of the crafting of character, centering on depth, breadth, dimensionality, and authenticity.

THTR 510 Writing the Short Drama (2, FaSp) The art and craft of dramatic writing. In particular exploring its dimensions with regard to character and story development in the ten minute play.

THTR 512 Studies in Dramatic Analysis (2, FaSp) A skill-based workshop that uses a historical survey of theatre texts to develop critical reading skills along two different tracks: Acting and Dramatic Writing.

THTR 513 Seminar in History of the Theatre (4) Bibliography, historical evolution, patterns, and techniques of the theatre from primitive to modern times.

THTR 515abcdef Advanced Movement (2-2-2-2-2-2, FaSp) Advanced exercises in movement for the use of the body in relation to the stage. *Corequisite for e*: THTR 480, THTR 540e, THTR 555, THTR 575; *corequisite for f*: THTR 520e, THTR 540f, THTR 597.

THTR 520abcde Advanced Acting (4-4-2-4-2, FaSp) Advanced training in acting skills; emphasis upon individual needs. *Corequisite for e*: THTR 515f, THTR 540f, THTR 571, THTR 597.

THTR 521 Engaging Community Narratives (3, Fa) Provides training for actor/artists who partner with

non-actors in community-based theatre projects.

THTR 525 Seminar in Contemporary Theatre (4, SpSm) Analysis of trends, problems, and the work of major figures in the contemporary theatre.

THTR 526 Seminar in Dramatic Literature (4) Study and analysis of world drama best representing changes in philosophies, aesthetics, and tastes of audiences.

THTR 527 Writing the Pacific Rim: Global and Western Dramatic Writing (4) Writing dramatically, utilizing the Pacific Rim and the Western United States as cultural sites of knowledge and as inspirations.

THTR 528 Seminar in Dramatic Analysis (4, Fa) Drama as a living art; reading, analysis, and discussion of plays which best illustrate principles of effective playwriting.

THTR 529ab Textual Studies for Performance (a: 4, Fa; b: 4, Sp) Close textual reading of dramatic texts as a fundamental tool for rehearsal and performance.

THTR 530 Seminar in Dramatic Criticism (4) Dramatic criticism from the classical Greek period to the modern.

THTR 533 Seminar in the American Theatre (4, 2 years, SpSm) History and literature of the American theatre from its beginning to the present day.

THTR 535 Seminar in Aesthetics of the Theatre (4) Aesthetic theories which apply to the art of the theatre; emphasis upon acting and play direction.

THTR 540abcdef Advanced Voice Diction (2-2-2-2-2-2, FaSp) Advanced individual vocal development and application to a variety of professional and performance circumstances. *Corequisite for e:* THTR 515e, THTR 575, THTR 480, THTR 555; *corequisite for f:* THTR 515f, THTR 520e, THTR 571, THTR 597.

THTR 541 Diction and Dialects (2, Fa) Fundamentals of speech, diction, dialects and accents, including work in the International Phonetic Alphabet.

THTR 542 Singing for Actors (2) An introduction to the various facets of singing in theatrical performance.

THTR 544 Embodied Poetics (2, Fa) Explores the relationship between vocal and physical expression and the spontaneity of human impulse within the community-based context.

THTR 545 Visiting Artists Master Seminar (4, Sp) A workshop taught by a master visiting artist, concentrating on his/her specific expertise in relation to dramatic writing. Course topics determined by the instructor. *Recommended preparation:* reading or viewing the work of the visiting master artist.

THTR 550ab Seminar in Scene Design (3-3, FaSp) Theory and practice of scene design; an intensive investigation into the relationship of a script to the visual statement.

THTR 552ab Seminar in Costume Design (3-3, FaSp) Theory and practice of costume design; intensive investigation into the relationship of a script to the visual statement.

THTR 553ab Seminar in Lighting Design (3-3, FaSp) Theory and practice of lighting design; intensive investigation into the relationship of a script to the visual statement.

THTR 554 Visual and Spatial Relationship (2, FaSp) The illustration and understanding of how space can be used to add emotional undertone, contextual information and strong staging ideas to a production.

THTR 555 Directing Fundamentals (2) To provide the basic foundations for the conceptualization and execution of works for the stage.

THTR 556ab Directing (2-2) A seminar/workshop in developing and testing directorial skills: text, design, acting, producing, and communication with an audience. *Prerequisite:* a: THTR 555; b: THTR 556a.

THTR 558ab Design for Directors (2-2) Basic elements of scenic, costume, props, lighting, sound, and make-up design, as they apply to the art of directing. *Prerequisite: a: THTR 555; b: THTR 558a.*

THTR 566 Dramatic Writing Studio (18) Investigates gestalt of the student dramatic writer's professional development from the empty page and writing fundamentals to the first-draft script, business affairs, and dramaturgical advancement.

THTR 567ab Studies in Playwriting (4-4) *a:* Extensive examination of playwriting, dramaturgical development process, and readings of work toward the completion of professionally promising plays. *b:* Continued extensive examination of playwriting, dramaturgy, development, and readings of work toward the completion of professionally promising plays.

THTR 568 Popular Theatre for Education and Development (3, Sp) Theory and practice of Theatre in Education and Theatre for Development as resources for conscientization and liberation of communities at the margins of power.

THTR 570 Acting on Camera: The Collaborative Process (2) Study of acting methods and techniques for the camera, focusing on collaboration with directors in the realization of screenplays.

THTR 571 Professional Seminar (2, Sp) Introduction to the world of the professional actor.

THTR 572 Global Dramatic Writing (4, FaSp) "Tour" of non-European and non-European American cultures with regard to their dramatic subject matter and traditions.

THTR 574 Dramatic Writing Across Media for the Playwright (4, FaSp) Intensive overview of career paths for playwrights in a wide array of media as they exist now, and as new opportunities arise.

THTR 575 Creative Production Projects (6) Advanced creative projects for production with emphasis on theatre as a synthesis of the performing arts.

THTR 576 Creative Process for Dramatic Writers (4, Sp) An advanced writing workshop that focuses on critical and deep development of plays that are the centerpieces of student's thesis portfolios.

THTR 577 Theatre and Therapy for Cultural Fieldwork (3, Sp) Explores the theory and practice of theatre and therapy in the cultural fieldwork and community development settings. *Recommended preparation: THTR 587.*

THTR 578 Theatre of the Oppressed: Theory, Games, and Techniques (4, FaSpSm) Basic theoretical foundations of game playing for populations at the margins of power. *Recommended preparation: THTR 521, THTR 544.*

THTR 579 Writing Culture (3, FaSpSm) Borrows from anthropology, popular/community-based theatre, cultural studies, and literature to provide an array of methodologies and approaches to artistic collaboration across cultures and difference.

THTR 586ab Applied Theatre Arts: Los Angeles Residency (2-2, FaSp) *a:* Academic and group process context for students' work in their chosen local internships to help students engage with communities as cultural fieldworkers. *b:* Supervisory, logistical, and theoretical container for THTR 586a. Engages students in their curricular experiences in the cultural field in partnership with their community-based organizations.

THTR 587 Liberation Arts and Community Engagement — Theory (4, Fa) Historical foundations of liberatory movements using expressive arts towards community-based goals of reciprocal and collaborative empowerment, civil rights, psychological or political freedom and justice.

THTR 588 Liberation Arts and Community Engagement — Praxis (3, Sp) Theory and practice of developing liberatory and Theatre of the Oppressed events, from first community contact to staged public event. *Prerequisite: THTR 587.*

THTR 590 Directed Research (1–12, FaSpSm) Research leading to the master's degree. Maximum units

which may be applied to the degree to be determined by the department. Graded CR/NC.

THTR 591 Seminar in Producing Theatre (4) A seminar in the theories and processes of producing theatre (commercial and non-profit).

THTR 592ab Participatory Action Research for Community-based Theatre (a: 2, FaSp; b: 2, Sm)
a: Examination of theories and practices of Participatory Action Research (PAR) to better understand its various forms in community-based contexts using theatre as the research mode. *b:* Implements the theories and practices of THTR 592a towards the creation of a summative research paper on the local and international applied theatre arts experience.

THTR 593 MFA Project (2, max 4, FaSpSm) Credit awarded upon completion of project. Graded CR/NC.

THTR 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded CR/NC.

THTR 595ab Graduate Playwrights' Workshop (4-4) *a:* Development of thesis plays utilizing faculty dramaturgical support and involvement of student actors/directors. Includes readings with/without audiences. Simulates professional development process. *b:* Continued development of thesis plays in a simulated professional development workshop process utilizing dramaturgy and involvement of student actors/directors. Culminates in staged readings.

THTR 596 Thesis Development and Attainment (2, max 10) Designed to guide the MFADW student toward refinement of thesis including vision, development, and execution.

THTR 597 Theatre Practicum (1-4, max 12, FaSpSm) Preparation, rehearsal, and performance of dramatic works in main stage repertory.

THTR 598 Applied Theatre Arts: International Externship (2) Supervisory, logistical and theoretical container for students exploring cultural fieldwork in international settings. *Prerequisite:* THTR 588.

THTR 599 Special Topics (2-4, max 8) Studies in selected areas of theatre art.

USC Rossier School of Education

USC Rossier School of Education graduate Renee Roberson (Master of Arts in Teaching '08) speaks with her students at Synergy Charter Academy. The Rossier School created the MAT online program in 2009, offering a top teacher preparation program to students regardless of where they reside. Today, MAT online has more than 1,800 graduates in 47 states and 38 countries.

The USC Rossier School of Education is one of the world's premier centers for the study of urban education. The school is committed to preparing teachers, researchers, counselors, administrators and curricular specialists for leadership positions. The mission of the USC Rossier School of Education is to improve learning in urban education locally, nationally and globally. Urban areas often face challenges associated with equity and access, poverty, density, mobility and immigration, environmental degradation and strained social conditions around housing, health care and crime. Urban education takes place in many contexts including pre-kindergarten through high school, human services, higher education and workplace settings.

We seek to transform urban education by:

- Leading the search for innovative, efficacious and just solutions by engaging in collaborative translational research.
- Preparing and developing educational leaders who are change agents committed to urban education and who possess the competencies needed to address complex educational and social issues.
- Creating mutually beneficial partnerships to ensure our work is field-based and incorporates a diversity of perspectives and experiences.

Our vision is a world where every student, regardless of personal circumstance, is able to learn and succeed. We believe that USC Rossier, as a top-tier research institution, has the responsibility and the ability to train the education leaders and to develop the innovative practices inclusive of equity and access that will help realize this vision.

The Rossier School of Education is committed to our four academic themes of leadership, diversity, learning and accountability that guide all academic, research and service efforts within our school.

Professors of Clinical Education: Reynaldo R. Baca, Ph.D.; Rudy Castruita, Ed.D.; Ginger Clark, Ph.D.; Michael Escalante, Ed.D.; Raymond John Gallagher, Ph.D.; Pedro Garcia, Ed.D.; Dennis Hocevar, Ph.D.; Sandra N. Kaplan, Ed.D.; Anthony B. Maddox, Ph.D.; Azad Madni, Ph.D. (*Viterbi*); Susan Metros, MFA (*Technology Enhanced Learning*); Eugenia Mora-Flores, Ed.D.; Maria Ott, Ed.D.; Margo Pensavalle, Ed.D.; Mark Power Robison, Ph.D.; Darlene Robles, Ph.D.; Sylvia Rousseau, Ed.D.; Julietta Shakhbagova, Ph.D.; Julie Slayton, J.D., Ph.D.; Kathy Stowe, Ed.D.; Melora Sundt, Ph.D.; Kristan Venegas, Ph.D.; Adlai Wertman, MBA (*Marshall*); Kenneth Yates, Ed.D.

Associate Professors of Clinical Education: Shafiqah Ahmadi, J.D.; Mary Andres, Psy.D.; Ruth Gim Chung, Ph.D.; Jenifer Crawford, Ph.D.; Robert Filback, Ph.D.; Frederick W. Freking, Ph.D.; Alan G. Green, Ph.D.; Angela Hasan, Ph.D.; Kimberly Hirabayashi, Ph.D.; Helena Seli, Ph.D.; John Pascarella, Ph.D.; Tracy Poon Tambascia, Ed.D.; Patricia Tobey, Ph.D. (*Student Affairs*)

Assistant Professors of Clinical Education: Uju Anya, Ph.D.; Paula Carbone, Ph.D.; Lynne Goldfarb, Ph.D.; Briana Hinga, Ph.D.; Jaimie Hoffman, Ed.D.; Lynnette Merriman, Ed.D. (*Student Affairs*); Emmy Min, Ph.D.; Artineh Samkian, Ed.D.

Associate (Teaching) Professors of Clinical Education: Michael Genzuck, Ph.D.; Kimberly Ferrario, Ph.D.; Corinne Hyde, Ed.D.

Assistant (Teaching) Professor of Clinical Education: Monique Datta, Ed.D.

Associate Research Professor: Zoe Corwin, Ph.D.

Senior Lecturer: Kate O'Connor

Senior Fellow: Douglas Lynch, Ph.D.

Emeritus Professors: Earl Carnes, Ph.D.; Richard Clark, Ed.D.; Myron H. Dembo, Ph.D.; Mike Diamond, Ph.D. (*Marshall*); Robert Ferris, Ed.D.; Mabel E. Hayes, Ph.D.; Edward J. Kazlauskas, Ph.D.; Frederick Knirk, Ed.D.; Steven Krashen, Ph.D.; Johanna K. Lemlech, Ed.D.; James Magary, Ph.D.; Merle Marks, Ed.D.; William G. Millington, Ed.D.; William F. O'Neill, Ph.D.; Donald E. Polkinghorne, Ph.D.; William M. Rideout, Jr., Ph.D.; Audrey J. Schwartz, Ed.D.; Robert A. Smith, Ph.D.; Eddie Williams, Ed.D.; Kathleen Wulf, Ph.D.

Emeritus Professor of Clinical Education: Stuart E. Gothold, Ed.D.

Emeritus Professor of Clinical Psychology: Rodney K. Goodyear, Ph.D.

Stoops Dean and Cooper Chair Emeritus: Guilbert C. Hentschke, Ph.D.

Emeritus Associate Professor of Clinical Education: William Maxwell, Ph.D.

Research Professor Emeritus of Education: Allen Munro, Ph.D.

Minor and Degree Programs

The Rossier School of Education offers the following degree programs: Master of Arts, Teaching; Master of Arts, Teaching: Teaching English to Speakers of Other Languages; Master of Education, Teacher Leadership; Master of Education, Educational Counseling; Master of Education, Learning Design and Technology; Master of Education, Postsecondary Administration and Student Affairs; Master of Education, School Counseling; Master of Education, School Leadership; Master of Marriage and Family Therapy; Doctor of Education/Master of Business

Administration (Ed.D./MBA); Doctor of Education (Ed.D.); Organizational Change and Leadership (Ed.D.); Global Executive (Ed.D.); and Doctor of Philosophy (Ph.D.) in Urban Education Policy. The Rossier School of Education also offers minors in Education and Society and Teaching English to Speakers of Other Languages (TESOL).

Rossier School of Education

Degree Requirements

Minor Programs

Education and Society Minor

The education and society minor seeks to examine education and its role in society. The minor is intended to help students develop broad perspectives on the purposes and forms of education and schooling, including the purpose and history of schooling; the provision of equitable opportunities for all; the factors impacting teaching, learning and achievement; and the development of engaged citizenship for more just societies through education. Students enrolled in this minor will gain multiple perspectives on education locally, nationally and internationally, including technology's role in educational outcomes. The minor provides resources for students who may want to pursue careers in education after graduation — teaching, educational advocacy through non-profits or non-governmental organizations, university research, policymaking or educational entrepreneurship.

UPPER-DIVISION REQUIREMENTS		UNITS
EDUC 421	Global Issues: Impact on Educational Outcomes	4
EDUC 422	Social Change, Difference and Access to Schooling	4
EDUC 423	Unrealized Promise and Hope for Education in 21st Century	4
EDUC 425	Educational Inquiry	4

Minor in Teaching English to Speakers of Other Languages (TESOL)

The Rossier School of Education offers an interdisciplinary minor in Teaching English to Speakers of Other Languages (TESOL). This minor is targeted to those undergraduates who wish to gain expertise in the field of English as a Second Language (ESL) or English as a Foreign Language (EFL) teaching. The minor in TESOL also prepares students for short- and long-term careers in ESL and EFL teaching in both U.S. and international contexts.

While students can combine the TESOL courses with any major, the curriculum will particularly benefit students in linguistics, English, foreign languages, communication, international studies and other related fields. However, with its emphasis on language and culture, as well as its focus on effective teaching and inquiry, the minor in TESOL will complement almost any field of study.

Units required to complete minor: 24

UPPER-DIVISION REQUIREMENTS (20 UNITS)		UNITS
EDUC 411	Foundation of TESOL	4
EDUC 412	Instructional Methods in TESOL	4
EDUC 425	Educational Inquiry	4
LING 210	Introduction to Linguistics	4
LING 410	Second Language Acquisition	4

ELECTIVE COURSES (4 UNITS)	UNITS
----------------------------	-------

At least one of the following upper-division linguistics courses needs to be chosen:

LING 375	Sociolinguistics	4
LING 405	Child Language Acquisition	4
LING 422	Language Contact and Language Acquisition	4

Rossier School of Education

Graduate Degrees

Admission

Applicants for admission to graduate degree programs must have a bachelor's degree or its equivalent from an accredited institution. Admission to graduate programs in the Rossier School of Education is highly selective and competitive. A grade point average of 3.0 (A = 4.0) is usually expected as well as satisfactory scores on the Graduate Record Examinations (GRE) General Test and three letters of recommendation. Specific testing and recommendation requirements vary by program. For specific information on admission and application procedures, contact the Office of Admission and Recruitment, (213) 740-0224.

Satisfactory Academic Progress

Students must maintain a grade point average of 3.0 (A = 4.0) or better to stay in good academic standing. Consistent with USC's overall policies for graduate students, factors other than satisfactory grades may also be taken into consideration in decisions regarding a student's continuation in a graduate degree program. These factors include satisfactory performance in fieldwork or credentialing requirements, or meeting program-defined professional standards, which are communicated to students at the beginning of the program.

Students who do not earn or maintain a 3.0 (A = 4.0) grade point average in an academic term will be given an academic warning in the following term. Students may also be given an academic warning if they have not fulfilled non-GPA related requirements, as defined by their degree program. The academic warning provides notification that the student is subject to dismissal. A student who is not in good academic standing is subject to dismissal, and may be dismissed from a program whenever, in the judgment of the associate dean for academic programs and the program director of the program in question, it is unlikely that the student will successfully complete his or her program.

Time Limit for Degree Completion

The time limit for completing a master's degree is five years. The time limit for completing a doctoral degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the doctorate, the time limit for completion is six years.

The time limit begins with the first course at USC applied toward a specified degree and ends the semester during which all requirements are met.

A primary consideration of the setting of time limits is the currency of the course work and research with respect to the date the degree is to be conferred. Equally important is the concern that the faculty members serving as advisers or committee members be available to the student for the duration of graduate studies at USC.

Occasionally a student finds it impossible to comply with prescribed time limits for completion of a degree. If a significant delay is likely to occur, the student must make arrangements in advance by petitioning for an extension of time. Such petitions will be considered when there is clear justification based on sound academic or critical personal reasons. An academic department may grant an extension of up to one year at a time for a maximum of two years.

Graduate Degrees

Master's Degrees

Master of Arts in Teaching, Multiple Subject, Single Subject and Single Subject (Music Education)

The Master of Arts in Teaching is designed for individuals who wish to complete requirements for a California preliminary teaching credential or to strengthen their ability to facilitate learning for all students in a K–12 environment (non-credential). Three programs are available: Multiple Subject, Single Subject and Single Subject (Music Education).

Multiple Subject

The MAT Multiple Subject is designed for those interested in teaching at the elementary level. The non-credential option requires a minimum of 30 units; the credential option requires a minimum of 32 units.

Single Subject

The MAT Single Subject is designed for those interested in teaching at the secondary level. The emphasis offers specializations in English, science (biological sciences, chemistry, geoscience or physics), mathematics and social science. The non-credential option requires a minimum of 30 units; the credential option requires a minimum of 32 units.

Single Subject (Music Education)

The MAT Single Subject (Music Education) offers two tracks: choral/general and instrumental. A minimum of 35 units is required.

The Multiple Subject and Single Subject emphases are available online.

CORE COURSES		UNITS
EDUC 501	Instruction for Teaching English as a New Language	3
EDUC 516	Framing the Social Context of High Needs Schools	3
EDUC 518	The Application of Theories of Learning to Classroom Practice	3
EDUC 519	Human Differences	3

Additional course work for the Bilingual Authorization:

EDUC 558	Culture Learning in Schools: Latino	3
----------	-------------------------------------	---

MULTIPLE SUBJECT		UNITS
EDUC 504	Foundations of Literacy Development and Instruction	2
EDUC 551	Teaching Physical Education	1
EDUC 554	Visual and Performing Arts in Elementary Subjects	2
EDUC 556	Integrating English Language Arts and Social Studies	5
EDUC 566	Teaching Mathematics and Science	4

Credential Track

EDUC 568ab	Guided Practice	3-3
------------	-----------------	-----

Non-Credential Track

EDUC 569ab	Capstone Portfolio in Learning and Instruction	2-2
------------	--	-----

SINGLE SUBJECT		UNITS
EDUC 505	Integrating Literacy in Secondary Content Instruction	2

EDUC 506	New Media Literacies in High Needs Schools	2
Additional course work in the subject matter area to be approved by the subject area faculty lead		3
Select one of the following:		
EDUC 502ab	Teaching Science in Secondary Classrooms	3-4
EDUC 509ab	Teaching Mathematics in Secondary Classrooms	3-4
EDUC 513ab	Teaching English Language Arts in Secondary Classrooms	3-4
EDUC 541ab	Teaching Social Studies in Secondary Classrooms	3-4

Credential Track

EDUC 568ab	Guided Practice	3-3
------------	-----------------	-----

Non-Credential Track

EDUC 569ab	Capstone Portfolio in Learning and Instruction	2-2
------------	--	-----

SINGLE SUBJECT (MUSIC EDUCATION)

UNITS

EDUC 512	Reading and Writing Methods for Secondary Teaching	2
MUED 510	Leading a Music Program in a Public School Setting	2
MUED 515	Using Technology in the Classroom	2
MUED 540	Motivation and Discipline in the Music Classroom	2
MUED 549ab	Directed Teaching: Public School Music	2-2

Additional course work for Instrumental Track

MUED 522ab	Teaching Public School Instrumental Music	3-2
MUED 524	Teaching and Conducting Public School Instrumental Ensembles	4
MUED 526	Teaching General/Choral Music for Instrumentalists	2

Additional course work for Choral/General Track

MUED 532	Teaching General Music K–8	3
MUED 534	Teaching and Conducting Public School Choral Ensembles	4
MUED 536	Teaching Instrumental Music for Vocalists	2
MUED 547	Vocal Pedagogy in the Public School Classroom	2

Alternative Certification Master of Arts in Teaching, Multiple Subject and Single Subject

The Alternative Certification Master of Arts in Teaching is designed for individuals who wish to complete requirements for a California preliminary teaching credential while teaching full-time in an approved K-12 school district. Two programs are available: Multiple Subject and Single Subject. The Multiple Subject and Single Subject emphases are available online.

Multiple Subject

The Alternative Certification MAT Multiple Subject is designed for current full-time teachers interested in teaching at the elementary level. A minimum of 30 units is required.

REQUIRED COURSES

UNITS

EDUC 501	Instruction for Teaching English as a New Language	3
EDUC 518	Application of Theories of Learning to Classroom Practice	3
EDUC 519	Human Differences	3

EDUC 551	Teaching Physical Education	1
EDUC 554	Visual and Performing Arts in Elementary Subjects	2
EDUC 556	Integrating English Language Arts and Social Studies	5
EDUC 566	Teaching Mathematics and Science	4
EDUC 597	K-12 Teaching and Learning in Context	2
EDUC 598abc	Coached Practice	2-2-3

Single Subject

The Alternative Certification MAT Single Subject is designed for current full-time teachers who are interested in teaching at the secondary level. The emphasis offers specializations in English, science (biological sciences, chemistry, geoscience or physics), mathematics and social science. A minimum of 30 units is required.

REQUIRED COURSES		UNITS
<i>Core Courses</i>		
EDUC 501	Instruction for Teaching English as a New Language	3
EDUC 518	Application of Theories of Learning to Classroom Practice	3
EDUC 519	Human Differences	3
EDUC 550	Multimedia Literacy	3
EDUC 597	K-12 Teaching and Learning in Context	2
EDUC 598abc	Coached Practice	2-2-3

Concentration Courses (Select one of the following):

EDUC 502ab	Teaching Science in Secondary Classrooms	3-4
EDUC 509ab	Teaching Mathematics in Secondary Classrooms	3-4
EDUC 513ab	Teaching English Language Arts in Secondary Classrooms	3-4
EDUC 541ab	Teaching Social Studies in Secondary Classrooms	3

Single Subject Elective (Select one of the following):

EDUC 504	Foundations of Literacy Development and Instruction	2
EDUC 505	Integrating Literacy in Secondary Content Instruction	2

Master of Arts in Teaching, Teaching English to Speakers of Other Languages

The MAT, Teaching English to Speakers of Other Languages is designed to prepare aspiring English language teachers, domestic and international, to successfully provide instruction for children, youth or adults in the United States or abroad. This is a non-credential option. A minimum of 30 units is required. The program may be completed on campus or online.

REQUIRED COURSES		UNITS
EDUC 501	Instruction for Teaching English as a New Language	3
EDUC 505	Integrating Literacy in Secondary Content Instruction	2
EDUC 506	New Media Literacies for High Needs Schools	2
EDUC 510	Foundations of Learning for the TESOL Classroom	3
EDUC 516	Framing the Social Context of High Needs Schools, or	
EDUC 563	Teaching from a Comparative and International Perspective	3
EDUC 521	Assessment and Instruction for Diverse English Learners	3
EDUC 526ab	Capstone in Teaching English Learners, or	
EDUC 540ab	Practicum in Teaching English as a Second or Foreign Language	2-2
EDUC 561	Teaching English to Speakers of Other Languages Pedagogy I	3
EDUC 562	Teaching English to Speakers of Other Languages Pedagogy II	4

Master of Education, Teacher Leadership

The Master of Education in Teacher Leadership provides current teachers with an in-depth exposure to pedagogy and teacher leadership development. The curriculum is designed to challenge experienced teachers to utilize technology in student-centered ways to improve learning outcomes, provide access to advanced interdisciplinary pedagogical practice, develop their capacity to initiate leadership with peers around improving instruction, and increase their understanding of successful instruction for learners with diverse needs.

Applicants to the program should have significant teaching experience. Public school teachers must hold a current teaching credential; private school teachers without a credential must be able to demonstrate at least three years of full-time teaching experience. Two letters of recommendation are required.

There are four areas of concentration in the Teacher Leadership program: (1) Differing Abilities, which focuses on understanding the range of learner needs in today's classroom; (2) Education Specialist Credential, for graduates of the Rossier MAT program seeking to add a Mild/Moderate Disabilities authorization; (3) Secondary Curriculum concentration provides Social Studies and English teachers with methods for integrating the arts, literacy and civics; and (4) Teaching Science, Technology, Engineering, and Mathematics (STEM) provides an opportunity for teachers to foster and engage in an advanced, interdisciplinary study of instruction in STEM.

Degree Requirements

The Teacher Leadership program requires a minimum of 32 units including required core courses and completion of a concentration area.

REQUIRED CORE		UNITS
EDUC 506	New Media Literacies in High Needs Schools	2
EDUC 516	Framing the Social Context of High Needs Schools	3
EDUC 518	Application of Theories of Learning to Classroom Practice	3
EDUC 529	Political and Academic Issues Affecting Gifted Students	3
EDUC 550	Multimedia Literacy	3
EDUC 564	Teacher Leadership	2
EDUC 569ab	Capstone Portfolio in Learning and Instruction	2-2
EDUC 573	Introduction to Special Education	3

Concentration Areas

Students select a concentration area from one of the following:

DIFFERING ABILITIES		UNITS
EDUC 530	Differentiated Curriculum and Pedagogy for Gifted Students	3
EDUC 575	Assessment and Curriculum for Students with Disabilities	3
EDUC 576	Establishing and Maintaining an Effective Classroom Ecology	3

EDUCATION SPECIALIST CREDENTIAL		UNITS
EDUC 530	Differentiated Curriculum and Pedagogy for Gifted Students	3
EDUC 574	Collaboration, Families and Case Management	3
EDUC 575	Assessment and Curriculum for Students with Disabilities	3
EDUC 576	Establishing and Maintaining an Effective Classroom Ecology	3
EDUC 577	Guided Practice: Mild/Moderate Disabilities	3

THE SECONDARY CURRICULUM		UNITS
EDUC 552	Literacies in the Content Area	3

EDUC 557	Civics Education	3
EDUC 578	Integrating the Arts into the Secondary Curriculum	3

TEACHING SCIENCE, TECHNOLOGY, ENGINEERING, AND MATHEMATICS (STEM)		UNITS
EDUC 555	STEM Education in Secondary Classrooms	3
EDUC 559	Discourse Analysis and Technology in STEM Classrooms	3
EDUC 580	Transforming STEM Education into Teaching Science	3

Master of Education, Educational Counseling

The Master of Education degree in Educational Counseling is designed for individuals seeking a career or advancement opportunities in postsecondary education as an academic or outreach counselor. The degree includes a theoretical and practical background in student affairs and counseling.

The program meets current requirements for postsecondary counseling positions in the California state system, particularly for those who wish to work in the public community college system. A minimum of 48 units is required.

REQUIRED COURSES		UNITS
EDCO 503	Ethical and Legal Issues in Counseling	3
EDCO 541	Theories in Counseling	3
EDHP 500	Foundations of Higher, Adult, and Professional Education	3
EDHP 552	The Politics of Difference	3
EDHP 563	Student Affairs Work in College	3
EDHP 580	The Community College	3
EDHP 587	Fieldwork in Higher, Adult, and Professional Education	3
EDHP 593ab	Master's Seminar, or	
EDHP 594ab	Master's Thesis	4
EDHP 687	Student Development in Higher Education	3
EDPT 502	Learning and Individual Differences	3
EDUC 500	The Counseling Process	3
EDUC 508	Creating Communities of Interest	2
EDUC 547	Career Development: Theory and Process	3
EDUC 570	Research Methods and Data Analysis	3
EDUC 609	Academic Advising in Postsecondary Education	3
EDUC 637	Group Counseling: Theory and Process	3

Master of Education, Learning Design and Technology

The Master's in Learning Design and Technology program is designed for people who want to significantly improve learning and performance outcomes within their organization. Graduates will be prepared to design, implement, and evaluate learning environments and outcomes for various formal (e.g., K-12 and higher education), non-formal (e.g., corporate, military and government organizations) and informal settings (e.g., museums, science centers and public spaces). The program draws from learning and motivation research, as well as knowledge of how to leverage technology, to design face-to-face, technology-enabled, and blended learning experiences. Through the project-based capstone, students will gain practical experience by designing a learning experience or evaluating an existing learning design. The program consists of 30 units and is delivered online only.

REQUIRED COURSES		UNITS
EDUC 508	Creating Communities of Interest	2
EDUC 503	Learning and Motivation	3

EDUC 589	Human Lifespan Development	3
EDUC 591	Diversity: Power, Equity and Inclusion	3
EDUC 570	Research Methods and Data Analysis	3
EDUC 582	Assessment and Evaluation	2
EDUC 595	Instructional Design	3
EDUC 579	Media Selection and Evaluation	2
EDUC 586	Design of Learning Environments	3
EDUC 587	Master's Studio A	2
EDUC 588	Master's Studio B	4

Master of Education, Postsecondary Administration and Student Affairs

The Master of Education, Postsecondary Administration and Student Affairs provides current and prospective professionals working in various capacities within two-year, four-year and professional postsecondary institutions with the theoretical foundation and practical applications to excel in a variety of higher education administrative and students services positions (academic advising and support services). Students will have an opportunity to develop an area of proficiency such as student affairs, athletic administration or academic advising. A minimum of 41 units of graduate-level course work is required.

REQUIRED COURSES		UNITS
EDHP 500	Foundations of Higher, Adult, and Professional Education	3
EDHP 551	Applied Educational Ethnography	3
EDHP 552	The Politics of Difference	3
EDHP 563	Student Affairs Work in College	3
EDHP 587	Fieldwork in Higher, Adult, and Professional Education	3
EDHP 594ab	Master's Thesis, or	2-2
EDUC 616	Higher Education Seminar	3
EDHP 657	Management of Student Services in Higher Education	3
EDHP 679	Legal Issues in the Administration of Higher Education	3
EDHP 687	Student Development in Higher Education	3
EDUC 508	Creating Communities of Interest	2
EDUC 570	Research Methods and Data Analysis	3
Approved electives		9

Master of Education, School Counseling

The Master of Education, School Counseling is geared toward socially responsible individuals who are aware that many of the issues pupils confront have societal origins. Designed to prepare educators interested in becoming school counselors in grades pre-K through grade 12, successful candidates will obtain the Master of Education, School Counseling degree along with USC recommendation for the Pupil Personnel Services School Counseling Credential. Forty-nine units of course work, 100 clock hours in a practicum experience and 600 clock hours of supervised field experience are required.

REQUIRED COURSES		UNITS
EDCO 503	Ethical and Legal Issues in Counseling	3
EDCO 505	Counseling and Collaborative Consultation in the School Setting	3
EDCO 541	Theories in Counseling	3
EDCO 574	School Counseling Practicum	2
EDCO 575	School Counseling Field Experience	4
EDUC 500	The Counseling Process	3
EDUC 508	Creating Communities of Interest	2

EDUC 511	Introduction to Counseling	3
EDUC 520	Counseling for College and Career Readiness I	2
EDUC 570	Research Methods and Data Analysis	3
EDUC 600	Counseling for College and Career Readiness II	2
EDUC 607	Role of School Counselors in Student Learning and Motivation	3
EDUC 608	School Connectedness, Climate, and Classroom Management	2
EDUC 612	Application of Human Development Theory in School Counseling	3
EDUC 618	School Counseling Professional Portfolio	2
EDUC 621	Measurement and Evaluation for School Counselors	3
EDUC 637	Group Counseling: Theory and Process	3
EDUC 638	Cross-Cultural Counseling: Research and Practice	3

Master of Education, School Leadership

School leadership matters. The Master of Education in School Leadership will prepare educational leaders with the knowledge and skills to lead effectively in urban school settings and to accelerate student achievement. Graduates will demonstrate that they can create a high achievement school culture and solve complex performance problems in K–12 schools by being able to advocate for a shared community-driven vision; create a high performance school culture and educational goals; collect data to diagnose causes of achievement gaps; plan appropriate research-based solutions; gather and manage resources; effectively communicate the plan to school administration, faculty, staff and community; and provide support for implementing, monitoring and evaluating progress toward achieving school improvement. All courses are taught through field-based experiences where problems are solved in real work settings, applying research to practice. Students who graduate from the program will be ready to work within the constantly evolving educational landscape of California and other states. A national trip is integrated into the program's curriculum.

The program is open to teachers, counselors, psychologists and other school-based personnel who have worked for a minimum of two years in such positions. Two letters of recommendation are required.

The program is only available online.

REQUIRED COURSES		UNITS
EDUC 508	Creating Communities of Interest	2
EDUC 533	School Leadership: Theory and Practice	3
EDUC 537	Leading with the Community and Culture in Context	3
EDUC 538	Entrepreneurial School Leadership	2
EDUC 548	Data-driven Leadership for Schools	3
EDUC 549	Supervising Instruction for Optimal Learning	3
EDUC 570	Research Methods and Data Analysis	3
EDUC 604	National Perspective on School Leadership	1
EDUC 641	Human Capital and School Organization	3
EDUC 643	Advancing Community Support Through Social Media	2
EDUC 647	School Leadership Seminar	2
EDUC 648ab	Apprenticeship in School Administration and Leadership	2-2

Master of Marriage and Family Therapy

The program for the Master of Marriage and Family Therapy is offered for those students seeking to prepare for the practice of marriage and family therapy. Students who complete this specialized professional degree program and who fulfill the additional state-mandated requirements are eligible for the State of California's Marriage and Family Therapy license. A minimum of 60 units is required.

REQUIRED COURSES		UNITS
EDCO 541	Theories in Counseling Psychology	3
EDUC 500	The Counseling Process	3
EDUC 507	Professional Identity, Law and Ethics for Counselors	3
EDUC 508	Creating Communities of Interest	2
EDUC 515	Theories of Marriage and Family Therapy	3
EDUC 544	Measurement Procedures for Counselors	3
EDUC 546	Psychopathology for Marriage and Family Therapists	3
EDUC 547	Career Development: Theory and Process	3
EDUC 553	Psychopharmacology and the Effects of Substance Abuse	3

EDUC 646ab	Marriage and Family Therapy Capstone: Leadership Project	1-1

Rossier School of Education

Graduate Degrees

Certificate Programs

Certificate in School Counseling

The School Counseling Certificate program is designed for students enrolled in the Master of Marriage and Family Therapy (MMFT) program who wish to complete additional requirements to earn USC recommendation for a Pupil Personnel Services: School Counseling Credential. Application information is available in the Master's Program Office.

REQUIRED COURSES		UNITS
EDCO 505	Counseling and Collaborative Consultation in the School Setting	3
EDCO 574	School Counseling Practicum	2
EDCO 575	School Counseling Field Experience	4
EDUC 511	Introduction to Counseling	3
EDUC 520	Counseling for College and Career Readiness I	2
EDUC 600	Counseling for College and Career Readiness II	2
EDUC 607	Role of School Counselors in Student Learning and Motivation	3
EDUC 608	School Connectedness, Climate, and Classroom Management	2
EDUC 618	School Counseling Professional Portfolio	2
EDUC 621	Measurement and Evaluation for School Counselors	3

Certificate in Gifted Education

Aligned with USC Rossier's mission to serve high-need students in urban centers, the Certificate in Gifted Education provides graduates of the Master of Arts in Teaching program with the competencies to respond to the needs, interests and abilities of gifted students in either heterogeneous regular classrooms or specific magnet school classrooms defined for gifted and high-ability students.

The Certificate in Gifted Education enables graduates to recognize the manifestations of giftedness among cultural, linguistic and economically diverse students in urban schools, to facilitate the identification of underrepresented students as gifted and to provide differentially appropriate curriculum for them.

*Internal Applicants Credential Track**

REQUIRED COURSES		UNITS
EDUC 529	Political and Academic Issues Affecting Gifted Students	3
EDUC 530	Differentiated Curriculum and Pedagogy for Gifted Students	3

EDUC 550	Multimedia Literacy	3
EDUC 569ab	Capstone Portfolio in Learning and Instruction	2, 2

*External Applicants***

REQUIRED COURSES		UNITS
EDUC 529	Political and Academic Issues Affecting Gifted Students	3
EDUC 530	Differentiated Curriculum and Pedagogy for Gifted Students	3
EDUC 550	Multimedia Literacy	3
EDUC 569ab	Capstone Portfolio in Learning and Instruction	2, 2
EDUC 574	Collaboration, Families and Case Management	3

**Internal Applicants are students enrolled in the MAT Program*

***External Applicants are students not admitted to USC or enrolled in the MAT Program who wish to complete the certificate.*

Certificate in Special Education

The Certificate in Special Education provides graduates of the Rossier School of Education with the competencies to respond to the needs, interests and abilities of special needs students in either regular classrooms or specific school classrooms defined for students with documented learning differences. It widens the range of the graduates' knowledge about teaching and learning allowing them to compete in the contemporary professional marketplace. A certificate in special education is mandatory in some states, and in other states, it is a criterion for consideration to teach special needs students in any type of learning environment. The certificate may be completed concurrently with requirements for the MAT or the M.E. in Teacher Leadership. It is also available online.

REQUIRED COURSES		UNITS
EDUC 573	Introduction to Special Education	3
EDUC 574	Collaboration, Families and Case Management	3
EDUC 575	Assessment and Curriculum for Students with Disabilities	3
EDUC 576	Establishing and Maintaining an Effective Classroom Ecology	3
EDUC 577	Guided Practice: Mild/Moderate Disabilities	3

Certificates in STEM Education

Aligned with the Rossier School of Education mission to serve the changing landscape of high needs and urban school districts, two STEM certificate programs are available to strengthen the instructional skills of novice and current teachers at the elementary or secondary level, so that they can have a positive impact on student learning in mathematics and the sciences. Both certificates widen graduates' knowledge about teaching and learning in order to compete in the contemporary professional marketplace.

Applicants must be currently enrolled in the MAT, M.E. in Teacher Leadership or capstone option of the MAT, or have a prior Master of Teaching degree and demonstrate three years of teaching experience.

*Certificate in Elementary STEM Education (Internal Applicants)**

REQUIRED COURSES		UNITS
EDUC 550	Multimedia Literacy	3
EDUC 581	STEM Education from a Project-Based Learning Approach	3
EDUC 584	Facilitating Creativity and Innovation in STEM Classrooms	3
EDUC 585	Action Research Project	3

*Certificate in Elementary STEM Education (External Applicants)***

REQUIRED COURSES		UNITS
EDUC 550	Multimedia Literacy	3
EDUC 569ab	Capstone Portfolio in Learning and Instruction	2, 2

EDUC 580	Transforming STEM Education into Teaching Science	3

**Internal Applicants are students enrolled in the MAT Program*

***External Applicants are students not admitted to USC or enrolled in the MAT Program who wish to complete the certificate.*

Rossier School of Education

Graduate Degrees

Dual Degree Program

Doctor of Education/Master of Business Administration

The Rossier School of Education and the USC Marshall School of Business jointly offer a dual degree program that emphasizes educational leadership and management competencies across the wide variety of education-related organizations in the public, non-profit and for-profit sectors and is designed to prepare students to assume executive leadership positions in these organizations, including schools, universities, educating businesses, regional, state and federal education agencies, education research institutions, and private foundations with education missions. Graduates of the Ed.D. in Educational Leadership/MBA program will be prepared to significantly improve the scope and quality of educational services to targeted populations through the application of management skills to the field of education and of education principles to business enterprises.

A total of 90 units is required for the dual degree: 48 units in the Marshall School of Business and 42 units in the Rossier School of Education.

Students must apply to both the Marshall School of Business and the Rossier School of Education.

Rossier School of Education

Graduate Degrees

Doctoral Degrees

The Rossier School of Education offers the Doctor of Philosophy in Urban Education Policy (Ph.D.) and the Doctor of Education (Ed.D.). Both doctoral programs place strong emphasis on the acquisition of inquiry skills and on the collaborative and interdisciplinary study of issues mutually engaging to both students and the Rossier School of Education faculty members. Both degrees emphasize the acquisition of appropriate research and inquiry skills, but the application of these skills is expected to differ. The Ed.D. student is trained to use educational inquiry skills to solve contemporary educational problems, while the Ph.D. student is trained to contribute to the general and theoretical knowledge about educational issues. The Ed.D. is administered by the Rossier School of Education; the Ph.D. is administered by the Graduate School.

Ph.D. students must *also* consult the Graduate School section of this catalogue for regulations and requirements pertaining to the degree.

Doctor of Education (Ed.D.)

The Doctor of Education (Ed.D.) is a three-year degree program that equips practitioner-scholars with the skills needed to lead high-performing organizations, connect research with practice and help all students to learn. The program is geared toward working professionals who aspire to be leaders in urban education. Admission requires a master's degree and a minimum of three years of work experience in a related field.

Preliminary Review

The Ed.D. preliminary review must be passed before the student has completed more than 21 units. Passing the preliminary review is prerequisite to continuing in the program.

Advisement Committee

The student selects a three-member advisement committee in consultation with the adviser upon applying to take the qualifying examination.

The committee chair must have a full-time appointment in the Rossier School of Education. One member of the committee may be a faculty member elsewhere or a full-time professional educator holding a doctorate and with strength in the area of the dissertation topic, if nominated by the committee chair and approved by the director of the Ed.D. program.

Areas of Concentration

There are four areas from which students must select a specialization: K–12 Leadership in Urban School Settings, Educational Psychology, Higher Education Administration and Teacher Education in Multicultural Societies.

Unit Requirement

The Ed.D. requires completion of 60 units of course work. A maximum of 4 dissertation units (794 Doctoral Dissertation) may be applied toward the degree. Students admitted with Advanced Standing complete a minimum of 43 units.

Core Program

Ed.D. students are required to complete 13 units of core course work: EDUC 605 Framing Educational Leadership, EDUC 522 Challenges in Urban Education: Accountability, EDUC 523 Challenges in Urban Education: Diversity, EDUC 524 Challenges in Urban Education: Leadership, and EDUC 525 Challenges in Urban Education: Learning.

Methods

All Ed.D. students must complete EDUC 532 Inquiry Methods I and EDUC 536 Inquiry Methods II for a total of 6 units.

Research

Students must complete 6 units of research course work (EDUC 792 Critique of Research in Education and EDUC 790 Research).

Electives

In consultation with assigned advisers, students take 14 units of elective course work.

Admission to Candidacy

Admission to candidacy is a formal action taken by the faculty of the Rossier School of Education. That action is based upon passing the qualifying examination.

Doctoral Dissertation

A dissertation based upon original research is required. An acceptable dissertation must show technical mastery of a special field, capacity for independent research and scholarly ability. The student must be enrolled in 794 Doctoral Dissertation each fall and spring semester after admission to candidacy until the dissertation has been approved. A minimum of two semesters (4 units) is required. Enrollment in 794 prior to admission to candidacy is not permitted and such registration is invalid.

Ed.D. in Organizational Change and Leadership

The Education Doctorate in Organizational Change and Leadership is a three-year degree program that prepares current and future leaders to create conditions that foster continuous improvement in themselves and their organizations. It emphasizes how learning occurs informally and formally in workplaces and serves as a mechanism for change and innovation in organizations and systems. Arranged by four topical streams – problem solving, leadership, dispositions of leaders and reflection – the program seeks to attract a diverse student body of

current and emerging leaders who are interested in fostering learning that leads to systemic improvement in their workplaces. The primary emphasis will be on those individuals who currently hold or are seeking leadership positions within colleges/universities, traditional and non-traditional K-12 environments, chief learning officers and their related human resources staff, non-profits and governmental organizations. The degree is not linked to the credentials typically needed to become an administrator in a K-12 environment, including becoming a principal or superintendent. The degree requires a minimum of 60 units. Students with a prior master's may enter with Advanced Standing, reducing their units to 43. It is delivered only online.

REQUIRED COURSES		UNITS
EDUC 522	Challenges in Urban Education Accountability	3
EDUC 523	Challenges in Urban Education Diversity	3
EDUC 524	Challenges in Urban Education Leadership	3
EDUC 532	Inquiry Methods I	3
EDUC 619	Framing Educational Leadership in a Global Context	4
EDUC 620	Understanding the Fundamentals of Creativity, Innovation, and Entrepreneurship	2
EDUC 627	Education Performance Problems Role of Learning	3
EDUC 714	Measurement and Evaluation for Decision-Making	3
EDUC 723	Evaluating and Assessing Educational System Outcomes	3
EDUC 725	Analyzing Effectiveness of Educational Systems	3
EDUC 730	Using Communication to Facilitate Organizational Change	3
EDUC 731	Economics of Organizational Change and Learning Environments	3
EDUC 732	Building Capacity for Organizational Change	3
EDUC 794a	Doctoral Dissertation	2
EDUC 794b	Doctoral Dissertation	2

Global Executive (Ed.D.)

The Global Executive Ed.D. prepares tomorrow's transformational educational leaders, policy makers, administrators and change agents for their challenging task of improving individual and national educational outcomes. The curriculum is designed to enhance the professional experience of senior educational leaders and policy makers by:

- Increasing their understanding of global trends and the implications of those trends for their work;
- Challenging them to utilize evidence and theory-based approaches in problem solving;
- Developing their capacity to effectively use complex data in decision making; and
- Providing access to key leaders and leading education scholars.

The program will focus on achieving large-scale improvements across educational systems through strategic use of policy, innovative practice and assessment. The curriculum stresses the examination of educational solutions from around the world as participants work with their own, local challenges.

Classes are delivered in Los Angeles and in Hong Kong. The total units required for the degree is 60. A maximum of 4 project units (EDUC 764 Consulting Project) may be applied toward the degree. Students admitted with advanced standing complete a minimum of 50 units.

REQUIRED COURSES		UNITS
EDUC 619	Framing Educational Leadership in a Global Context	4
EDUC 620	Fundamentals of Creativity, Innovation, and Entrepreneurship	2
EDUC 623	Understanding Research That Informs Leadership	3
EDUC 624	Educational Organizations: Governance and Finance I	2
EDUC 626	Fostering Entrepreneurship in Educational Systems	2

EDUC 627	Education Performance Problems: Role of Learning	3
EDUC 628	Educational Organizations: Governance and Finance II	2
EDUC 629	Consulting Practicum Context Analysis	3
EDUC 631	Locating Educational Performance Problems	3
EDUC 723	Evaluating and Assessing Educational System Outcomes	3
EDUC 724	Creating Policy Alternatives for Educational Settings	3
EDUC 725	Analyzing Effectiveness of Educational Systems	3
EDUC 726	Making Choices: Deciding Among Policy Alternatives	3
EDUC 727	Implementing Policy in Educational Systems	3
EDUC 728	Global Trends: Emerging Ideas, Emerging Markets	3
EDUC 729	Assessing Policy Impact in Educational Settings	3
EDUC 764abcdz	Consulting Project	1-1-1-1-0
EDUC 790	Research	1
Additional course work to be approved by program faculty		10

Doctor of Philosophy in Urban Education Policy (Ph.D.)

Program Requirements

The Ph.D. program requires a minimum of 63 units of course work, comprising the following elements: Core Block (16 units), Concentration Block (15 units), Research Block (15 units), Cognate Block (12 units) and Dissertation Proposal and Dissertation Block (5 units).

Core Block

The core represents the essential knowledge that serves as the groundwork for later course work and for other research and scholarly activities within the program and beyond with a particular focus on urban education. This work is completed in the first year of full-time study.

REQUIRED COURSES		UNITS
EDUC 630	Organization and Policy: Current Issues	4
EDUC 640	The Research University in the 21st Century	4
EDUC 642	Controversies in Learning and Instruction	4
EDUC 650	Globalization and the Nation-State: Theories of Change	4

Concentration Block

Courses in this block are linked to two of the four areas of concentrations available in the Rossier School of Education (higher education/community college leadership and leadership in urban education settings). Courses in this block permit students to consider applied problems in collaboration with advanced Ed.D. students.

Research Block

Courses in this block provide the basic tools to pursue systematic, programmatic, empirical investigation. It includes qualitative and quantitative elements with the understanding that complex educational problems require a variety of investigative approaches. Areas required include research design, analysis of variance/multiple regression, qualitative methods, and one elective in measurement, advanced qualitative or quantitative analysis, or a related area. Courses may be taken inside or outside the Rossier School of Education.

Cognate Block

This block is designed for students to pursue interdisciplinary approaches to educational issues, and may consist of courses inside or outside the Rossier School of Education. The specific courses are determined in conjunction with the adviser.

Dissertation Block

This block includes preparation for the qualifying examination and initial dissertation proposal. It is taken during the semester of the qualifying examination and EDUC 794ab Dissertation (minimum of 4 units taken after a student passes the qualifying examination and has advanced to candidacy). The dissertation block is designed to prepare students for their dissertation research and continues through the writing and defense of the dissertation. The process involves intensive collaboration with the adviser and the qualifying exam committee.

Transfer of Course Work

The maximum number of transfer credits that can be applied toward the degree is 20 units. The faculty of the student's degree program determines whether transfer credit is applicable toward a specific graduate degree.

Faculty Adviser

A designated faculty member provides the academic advisement for entering graduate students at the point of admission. A faculty member is appointed to serve as the adviser until an approved qualifying exam committee is established.

Screening Process

When students have completed the core course work, the doctoral screening committee assesses their performance and makes a decision about their readiness to continue in the program. Students are notified of the results by the Ph.D. program chair. If the decision is to continue, a formal program of studies and a qualifying exam committee is established.

Qualifying Exam Committee

The qualifying exam committee is composed of at least five members. A minimum of three, including the chair, must be from the Rossier School; one must be a faculty member from outside the Rossier School. Normally, all members of the qualifying exam committee are regular faculty with the rank of assistant professor or above in departments offering the Ph.D.

Qualifying Examinations

As a prerequisite to candidacy for the Ph.D., students must pass written and oral qualifying examinations. The written qualifying examination is designed to assess a student's readiness to undertake dissertation research and to assess the student's ability to critically analyze and synthesize theoretical and methodological knowledge. The oral portion consists, in part, of a teaching and research portfolio. The teaching portfolio documents and reflects the student's development and productivity in thinking about course content and instructional delivery. The research portfolio documents and reflects the student's development and productivity in research and writing from the point of entry into the program.

Admission to Candidacy

Admission to candidacy is a formal action taken by the faculty that is based upon passing the qualifying examination and completing all Ph.D. course requirements (with the exception of 794 Doctoral Dissertation). Notification of admission or denial of admission to candidacy is by letter from the associate vice provost for graduate programs.

Dissertation Committee

After admission to candidacy and approval of the dissertation proposal, the Ph.D. qualifying exam committee is known as the dissertation committee and is usually reduced to three members. The committee will include one faculty member from outside the Rossier School of Education and will be chaired by a tenure track faculty member.

Doctoral Dissertation

After the qualifying examination is passed, students must enroll in 794 Doctoral Dissertation each semester, except summer session, after admission to candidacy until all degree requirements have been completed. A minimum of two semesters (4 units) is required. A maximum of 4 dissertation units may be applied to satisfy the degree requirement. While enrolled in 794a, students will develop a dissertation proposal in collaboration with the adviser. The dissertation committee grants final approval for the proposal. Credit for 794a and permission to enroll in 794b will only be given after the dissertation proposal is approved. IRB (Human Subjects Institutional Review Board) approval is required for all dissertation studies.

Rossier School of Education

Credential Programs

A credential is a license issued by the California Commission on Teacher Credentialing (CCTC) to persons wishing to legally teach or perform certain other professional services in California's public schools. USC is one of several institutions authorized to recommend qualified persons to the CCTC for receipt of credentials.

There are two categories of credentials offered in the Rossier School: teaching and service. Requirements for these credentials may be obtained by calling the appropriate phone number listed below. *Credential requirements may change due to state law.* Students are advised to consult periodically with the Rossier School of Education for current credential requirements.

Teaching Credentials

California has a two-tier credential structure. A five-year preliminary credential is the first credential issued after an individual meets basic credential requirements. A clear credential is issued when all credential requirements have been completed.

Multiple Subject Teaching (MST) authorizes the holder to teach in a self-contained classroom such as the classrooms in most elementary schools. A teacher authorized for multiple subject instruction may be assigned to teach in any self-contained classroom (preschool, grades K–12 or many subjects within a self-contained classroom). This classroom situation is generally found in preschool and elementary grades or in classes organized primarily for adults. In addition, the holder of a Multiple Subject Teaching Credential may serve in a core or team teaching setting.

Single Subject Teaching (SST) authorizes the holder to teach a specific subject(s) named on the credential in departmentalized classes such as those in most middle schools academic area. This classroom situation is generally found in middle and senior high schools. A teacher authorized for single subject instruction may be assigned to teach any subject on his or her authorized fields at any grade level: preschool, grades K–12 or in classes organized primarily for adults.

All teacher candidates must meet the following requirements in order to be recommended/endorsed for a teaching credential: successful evidence of completion and passing of the TPA (Teaching Performance Assessment) and verification of training in cardiopulmonary resuscitation (CPR) that covers infant, child and adult CPR skills.

Teacher certification rules and requirements vary greatly by state. Completion of a CCTC-approved program does not guarantee certification or licensure in another state. Prospective teacher candidates are strongly advised to learn about their state's requirements and to review the following accreditation statements:

Indiana

Accredited in Indiana by the Indiana Commission on Proprietary Education (CPE).

Minnesota

The University of Southern California is registered as a private institution with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Registration does not mean that credits earned at the institution can be transferred to all other institutions.

Washington

University of Southern California is authorized by the Washington Student Achievement Council and meets the requirements and minimum educational standards established for degree-granting institutions under the Degree-Granting Institutions Act. This authorization is subject to periodic review and authorizes University of Southern California to offer specific degree programs. The Council may be contacted for a list of currently authorized programs. Authorization by the Council does not carry with it an endorsement by the Council of

institution or its programs. Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the Council at P.O. Box 43430, Olympia, WA 98504-3430.

Prospective Washington state students are advised to contact the Office of the Superintendent of Public Instruction at (360) 725-6320 or [✉ profed@k12.wa.us](mailto:profed@k12.wa.us) to determine whether this education program is approved for teacher certification or endorsements in Washington state. In addition, teachers are advised to contact their individual school district as to whether this program may qualify for salary advancement.

Missouri

USC is approved by the Missouri Coordinating Board for Higher Education to deliver its online program to residents.

Tennessee

USC is authorized by the Tennessee Higher Education Commission. This authorization must be renewed each year and is based on an evaluation by minimum standards concerning quality of education, ethical business practices, health and safety, and fiscal responsibility.

If a complaint is not settled at the institutional level, the student may contact the Tennessee Higher Education Commission, Nashville, TN 37243-0830, (615) 741-5293. If the institution uses a mediation clause in its enrollment agreement, the catalogue must describe the steps required of the student and/or the institution to initiate the mediation process.

For inquiries, contact the MAT@USC office at (213) 743-2127.

Services Credentials

The *Administrative Services Credential* authorizes the holder to provide a variety of services in grades 12 and below, including preschool, and in classes organized primarily for adults. USC recommends candidates for the Clear Preliminary Administrative Services Credential. A prerequisite for admission to this program is admission to the Ed.D. program.

For inquiries, contact the Ed.D. Program Office, (213) 740-9323.

The *Pupil Personnel Services: School Counseling Credential* allows the holder to provide the following services:

- Techniques for facilitating individual growth and development to achieve academic success
- Human assessments
- Problem prevention and early intervention
- Consultation services
- Psychological education
- Coordination and development of school services
- Legal enablement and constraints
- Referral and utilization of services

USC recommends candidates for the School Counseling Credential that also authorizes the holder to perform the following duties:

- Develop, plan, implement and evaluate a school counseling and guidance program that includes academic, career, personal and social development.
- Advocate for the high academic achievement and social development of all students.
- Provide schoolwide prevention and intervention strategies and counseling services.
- Provide consultation, training and staff development to teachers and parents regarding students' needs.
- Supervise a district-approved advisory program as described in California Education Code, Section 40600.

Rossier School of Education

Special Programs

Professional Development

The Office of Professional Development offers a variety of non-degree and certificate programs for the professional educator.

Certificate programs are offered in blended formats and include: Professional Preparation for Reading, Differentiated Curriculum for Gifted and High-Ability Learners, Differentiating the Common Core State Standards, School Business Management, Induction for New Teachers, Preliminary Administrative Credential and an Equity Educators Certificate.

Professional Development also offers the in-person, two-day Summer Gifted Institute and Teacher Demonstration School intended for teachers, administrators and academic coaches of gifted and high-ability learners.

New areas to be introduced will include Early Childhood, Individualized Learning Experiences for Educators and Side-by-Side, a course for children and their families.

The Office for Professional Development provides fully custom programs as well as customized versions of its open enrollment programs. Some key areas of expertise include adult learning; teaching and learning with technology; differentiated curriculum; school district leadership development; and data-driven decision-making. The office also offers programs for international student teachers, faculty and administrators, K-12 classroom teachers, and teacher educator scholars seeking immersion in an American education environment.

For further information, contact the Office of Professional Development at (213) 740-8536.

Rossier School of Education

Courses of Instruction

The terms listed are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

EDUCATION (EDUC)

EDUC 140m Mind, Belief and Behavior: Learning in a Diverse World (4, FaSpSm) Examination of current research about learning and motivation in the context of human diversity.

EDUC 200 Introduction to the Teaching Profession (2) Identification and discussion of current issues and trends in schools and the teaching profession. Introduction to the development of a professional portfolio.

EDUC 204L Sociological Foundations of Education (3, FaSp) Introduction to the sociological foundations of education through focused study of schools, teacher-student relations, and classroom processes as they relate to social stratification.

EDUC 205L Child Development and Learning in Schools (3, FaSp) Introduction to processes of development and learning in school aged children, with an emphasis on school contexts.

EDUC 392 Undergraduate Research Methods (2, Sp) (Enroll in AMST 392)

EDUC 409 Foundations of Language Education (3, FaSp) Overview of research and current theories in bilingual, second language, and foreign language instruction.

EDUC 410 The Teaching of Reading and Writing (4, FaSp) Analysis of reading/writing processes; methods/materials for teaching literacy in elementary schools; issues in biliteracy and instruction; classroom observation/participation in small-group instruction. Admission to the major.

EDUC 411 Foundation of TESOL (4, FaSp) Introduction to the ways in which sociocultural context, language systems and acquisition influence English language learning and teaching.

EDUC 412 Instructional Methods in TESOL (4, FaSp) Introduction to approaches in Teaching English to Speakers of Other Languages and methods for teaching reading, writing, listening, speaking, along with a practical fieldwork component.

EDUC 413 Methods and Models of Instruction for Language Minority Students (2, FaSp) Curriculum materials and teaching strategies for use in successfully teaching language minority students in both elementary and secondary schools.

EDUC 415 Content to Pedagogy: Mathematics in the Elementary School (2, FaSp) Bridging college-level mathematics content and elementary school curricula to design developmentally appropriate mathematics instruction. *Concurrent enrollment:* EDUC 424a or EDUC 424b.

EDUC 416 Content to Pedagogy: Art in the Elementary School (2, Sp) Transformation of content in art to curriculum in the elementary classroom. *Corequisite:* EDUC 424b.

EDUC 417 Content to Pedagogy: From Science Content to Science Curriculum (2, FaSp) An overview of the goals and content of science instruction at the elementary level coupled with appropriate science curricular and pedagogical models. *Concurrent enrollment:* EDUC 424a or EDUC 424b.

EDUC 418 Content to Pedagogy: From Social Sciences to Social Studies (2, FaSp) Content, concepts, methods, and values for integrating the social sciences in the social studies. *Concurrent enrollment:* EDUC 424a or EDUC 424b.

EDUC 419 Content to Pedagogy: P.E. for Elementary Students (2, Sp) Transformation of content in Physical Education to curriculum in the elementary classroom. *Corequisite:* EDUC 424b.

EDUC 421 Global Issues: Impact on Educational Outcomes (4, FaSpSm) Situates U.S. education

within the global context and examines the impact of global issues on national and international schooling in the 21st Century.

EDUC 422 Social Change, Difference and Access to Schooling (4, FaSp) Examines access to schooling and quality education in international contexts across student difference indexed by race, class and gender.

EDUC 423 Unrealized Promise and Hope for Education in 21st Century (4, FaSpSm) Investigation of how educational promise has been historically realized and derailed is reviewed, with focus on technologies of new media in designing equitable social futures. *Recommended preparation:* Freshman Seminar on a topic in education.

EDUC 424ab Curriculum and Methods in Elementary Education (2-2, FaSp) Curriculum materials and teaching procedures in the elementary school. *Prerequisite:* EDUC 410; *concurrent enrollment:* a: EDUC 425a; b: EDUC 425b.

EDUC 425ab Observation and Directed Teaching in Elementary Schools (3-3, FaSp) Observation and experience in teaching under supervision in elementary schools (one semester at the kindergarten-primary level and one semester in the intermediate or upper grades). *Concurrent enrollment:* a: EDUC 424a; b: EDUC 424b.

EDUC 426 Educational Inquiry (4, FaSp) Introduction to the skills and knowledge required to be competent consumers and producers of education research. Students will be asked to design an educational study.

EDUC 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

EDUC 499 Special Topics (2-4, max 8, FaSp) Seminar in selected topics in education. Specific topics to be determined at the time seminar is offered.

EDUC 500 The Counseling Process (3) Theoretical foundations, models, values, and assumptions underlying psychological counseling; cross-cultural perspectives, ethical and legal considerations. (Duplicates credit in former EDCO 500.) *Concurrent enrollment:* EDUC 507.

EDUC 501 Instruction for Teaching English as a New Language (3, FaSpSm) Teaching linguistically and culturally responsively to linguistic minority students. Topics include learning theories, sociocultural contexts of language development, and assessment of language and non-language competencies. (Duplicates credit in EDUC 543ab.) Open only to MAT and MAT (online) students.

EDUC 502ab Teaching Science in Secondary Classrooms (3-4, FaSpSm) Strategies, methods, and materials for teaching science to all learners in secondary classrooms. *b:* (Duplicates credit in EDUC 539.) Open only to MAT Single Subject and Single Subject (online) students.

EDUC 503 Learning and Motivation (3, FaSpSm) Design and advancement of learning and motivation outcomes in various environments through a systematic examination and application of current research.

EDUC 504 Foundations of Literacy Development and Instruction (2, FaSpSm) Application of a balanced, integrated, interactive perspective to teaching reading in an elementary classroom. Foundational skills needed in the developmental phase of learning to read. Open only to MAT Multiple Subject and Multiple Subject (online) students.

EDUC 505 Integrating Literacy in Secondary Content Instruction (2, FaSpSm) Facilitation, mediation and intervention in the development of literacy and language integrated within the content areas. Connection between language and literacy to developing content knowledge. Open only to MAT Single Subject, Single Subject (online), TESOL and TESOL (online) students.

EDUC 506 New Media Literacies in High Needs Schools (2, FaSpSm) Instructional procedures and resources for encouraging secondary students' interests in communications, cultural studies, media production, and literacy education. Open only to MAT Single Subject, Single Subject (online), TESOL and TESOL (online)

students.

EDUC 507 Professional Identity, Law and Ethics for Counselors (3) History of the field of counseling and professional identity development for counselors are addressed. Examination of current legal, ethical, and other professional issues in counseling. *Concurrent enrollment:* EDUC 500.

EDUC 508 Creating Communities of Interest (2, FaSpSm) Framing the graduate experience for master's students. Establishing a professional foundation and philosophy as educators.

EDUC 509ab Teaching Mathematics in Secondary Classrooms (3-4, FaSpSm) Strategies, methods, and materials for teaching mathematics to all learners in secondary classrooms. *b:* (Duplicates credit in EDUC 545.) Open only to MAT Single Subject and Single Subject (online) students.

EDUC 510 Foundations of Learning for the TESOL Classroom (3, FaSpSm) Relationship of learning theories to second language learning and to student assessment, motivation, self-regulation, and classroom management in the TESOL classroom. Open only to MAT TESOL and TESOL (online) students.

EDUC 511 Introduction to Counseling (3, Fa) The role of the school counselor. An overview of key elements in increasing access to and equity for primary and secondary education for all students.

EDUC 512 Reading and Writing Methods for Secondary Teaching (2, Fa) Analysis of reading/writing processes; methods for teaching literacy in grades 9–12; issues in biliteracy and instruction.

EDUC 513ab Teaching English Language Arts in Secondary Classrooms (3-4, FaSpSm) Strategies, methods, and materials for teaching English to all learners in secondary classrooms. *b:* (Duplicates credit in EDUC 535.) Open only to MAT Single Subject and Single Subject (online) students.

EDUC 514 School Counseling Seminar (3, Sp) Current issues and problems in school counseling; emphasis is on K–12 learning and achievement.

EDUC 515 Theories of Marriage and Family Therapy (3) Major psychotherapeutic orientations relating to family systems, marital relationships, and communications theory applied to the family unit. (Duplicates credit in former EDCO 515.) *Prerequisite:* EDUC 500, EDUC 507, EDCO 541.

EDUC 516 Framing the Social Context of High Needs Schools (3, FaSpSm) Introduction to the Master of Arts in Teaching Program. Relationship between the actions of the teacher and student learning in the classroom and school context. (Duplicates credit in EDUC 517ab.) Open only to MAT and MAT (online) students.

EDUC 517ab Understanding the Social Context of Urban Schools (2-2, FaSpSm) Examination of critical issues in diverse contemporary classrooms (social class, language, race, ethnicity, and ability); includes practices in relation to schools and community. Open only to MAT and MAT (online) students.

EDUC 518 Application of Theories of Learning to Classroom Practice (3, FaSpSm) Learning theories and instructional practices for teaching. Procedures involved in curriculum development, planning, evaluation, and practical application. Open only to MAT and MAT (online) students.

EDUC 519 Human Differences (3) Equity and diversity in learning environments. Issues in teaching special populations. Beliefs about how people learn. Inclusive environment for special populations in the general classroom. Open only to MAT and MAT (online) students.

EDUC 520 Counseling for College and Career Readiness I (2, Fa) Theoretical foundations of individual and systemic characteristics that impact college and career choices. Consideration of economic, political, social, and policy issues.

EDUC 521 Assessment and Instruction for Diverse English Learners (3, FaSpSm) Assessment practices and strategies in English language instruction with special attention to learner differences (social, cultural, physical, intellectual) that influence academic performance. Open only to MAT TESOL and TESOL (online) students.

EDUC 522 Challenges in Urban Education: Accountability (3, Sp) Issues related to accountability theory and practice in urban education settings. Open only to Ed.D. students.

EDUC 523 Challenges in Urban Education: Diversity (3, Fa) Diversity issues in urban educational settings. Open only to Ed.D. students.

EDUC 524 Challenges in Urban Education: Leadership (3, Sp) Theories, principles, and concepts of leadership in urban K–12 schools and institutions of higher education. Open only to Ed.D. students.

EDUC 525 Challenges in Urban Education: Learning (3, Fa) Theory and research in learning, motivation, and instruction for diverse educational settings. Open only to Ed.D. students.

EDUC 526ab Capstone in Teaching English Learners (2-2, FaSpSm) The culminating experience for in-service teachers in the Master of Arts in Teaching, Teaching English to Speakers of Other Languages Program. Open only to MAT TESOL and TESOL (online) students. Graded CR/NC.

EDUC 527 Assessment in the Language Classroom (2, Sm) Introduces students to relevant research in language assessment, reviews concepts of reliability and validity and examines assessment practices in the classroom.

EDUC 528 Course Proposal Project (2, Sm) Using a framework of course development, students present a course proposal, linking the theoretical, methodological and practical principles gained from all course work in the program.

EDUC 529 Political and Academic Issues Affecting Gifted Students (3, FaSpSm) Examination of the political and academic issues affecting gifted and high-ability students. Psychosocial reasons contributing to achievement and underachievement. Institutional and personal factors inhibiting potential. Open only to MAT students.

EDUC 530 Differentiated Curriculum and Pedagogy for Gifted Students (3, FaSpSm) Recognizing the talent and potential of gifted and high ability students. How gifted education can be generalized to affect the education of all students. Open only to MAT students.

EDUC 531 Student Disability Issues in Higher Education (3, Fa) History of the disability movement; current research on the success of students with disabilities in higher education; legal and management issues.

EDUC 532 Inquiry Methods I (3, Sp) Logic and methods of quantitative data analysis in the examination of educational issues and the framing of solutions for them. Open only to Ed.D. students.

EDUC 533 School Leadership: Theory and Practice (3, Fa) Theories and principles of leadership and the application of principles to solve authentic problems in elementary and secondary schools.

EDUC 535 Teaching Secondary English and Language Arts (4, FaSpSm) Instructional procedures, techniques, strategies, and resources for teaching English in secondary classrooms. Open only to MAT students.

EDUC 536 Inquiry Methods II (3, Sp) Logic and methods of qualitative data analysis in the examination of educational issues and the framing of solutions for them. Open only to Ed.D. students. *Prerequisite:* EDUC 532.

EDUC 537 Leading with the Community and Culture in Context (3, Sp) Creating a positive culture of learning to promote student success. Strategies to engage diverse communities.

EDUC 538 Entrepreneurial School Leadership (2, Fa) Entrepreneurial opportunities in education. Developing the skills and knowledge for entrepreneurial leadership to improve educational outcomes.

EDUC 539 Teaching Secondary Science (4, FaSpSm) Instructional procedures, techniques, strategies, and resources for teaching science in secondary classrooms. Open only to MAT students.

EDUC 540ab Practicum in Teaching English as a Second or Foreign Language (2) The culminating experience for beginning teachers in the Master of Arts in Teaching, Teaching English to Speakers of Other

Languages Program. Open only to MAT TESOL and TESOL (online) students. Graded CR/NC.

EDUC 541ab Teaching Social Studies in Secondary Classrooms (3) Strategies, methods, and materials for teaching social studies to all learners in secondary classrooms. *a*: (Duplicates credit in former EDUC 534.) *b*: (Duplicates credit in former EDUC 542*b*.) Open only to MAT Single Subject and Single Subject (online) students.

EDUC 542 Teaching Secondary Social Studies (4, FaSpSm) Instructional procedures, techniques, strategies, and resources for teaching social studies in secondary classrooms. Open only to MAT students.

EDUC 543ab Methods in Teaching English as a New Language (1-1) Teaching linguistically and culturally responsively to linguistic minority students. Topics include learning theories, sociocultural contexts of language development, and assessment of language and non-language competencies. Open only to MAT students. (Duplicates credit in former EDUC 543.)

EDUC 544 Measurement Procedures for Counselors (3) Educational and psychological instruments; psychometric concepts and the rationale for the use of psychological instruments in the counseling relationship. (Duplicates credit in former EDCO 544.)

EDUC 545 Teaching Secondary Mathematics (4, FaSpSm) Instructional procedures, techniques, strategies, and resources for teaching mathematics in secondary classrooms. Open only to MAT students.

EDUC 546 Psychopathology for Marriage and Family Therapy (3) Theories of psychological impairment emphasizing diagnosis of child and family dysfunction. Practice in utilizing DSM-IV classification of case studies. (Duplicates credit in former EDCO 546.)

EDUC 547 Career Development: Theory and Process (3) Theories and process of career development; principles of career and leisure planning and counseling applicable throughout life. (Duplicates credit in former EDCO 548.)

EDUC 548 Data-Driven Leadership for Schools (3, Sm) Analyzing, interpreting, and using data to increase effectiveness of instruction and programs, improve student learning, and reduce or eliminate the achievement gap.

EDUC 549 Supervising Instruction for Optimal Learning (3, Sm) Application of adult learning theory to evaluate instruction. Appropriate professional development to improve student achievement.

EDUC 550 Multimedia Literacy (3, FaSpSm) Applying new technology in the classroom. Exploration of the use of multimedia tools to increase literacy. Examination of multiple forms of technology to facilitate learning. Open only to MAT and Gifted Education Certificate students.

EDUC 551 Teaching Physical Education (1, FaSpSm) Instructional approaches for integrating physical education content across the elementary curriculum. Open only to MAT students.

EDUC 552 Literacies in the Content Area (3, FaSpSm) Literacy and language within content areas. Developing reading, writing, speaking and listening skills for real audiences. Academic language.

EDUC 553 Psychopharmacology and the Effects of Substance Abuse (3, Sp) Focus on the effects of psychotropic medication, alcohol, and other substances on behavior. The professional and ethical issues for marriage and family therapists.

EDUC 554 Visual and Performing Arts in Elementary Subjects (2, FaSpSm) Instructional approaches for integrating visual and performance arts content across the elementary curriculum. Open only to MAT students.

EDUC 555 STEM Education in Secondary Classrooms (3, FaSpSm) Developing innovative practices in designing inquiry-based lesson plans to facilitate integrating the STEM disciplines as a foundation for teaching.

EDUC 556 Integrating English Language Arts and Social Studies (5, FaSpSm) Strategies and methods for integrating English language arts in social studies classrooms. Reinforces the concept of social studies as a

conduit to further student learning. (Duplicates credit in EDUC 567.) Open only to MAT Multiple Subject and Multiple Subject (online) students.

EDUC 557 Civics Education (3, FaSpSm) Uses of pedagogical practices for increasing student engagement in the study of history and civics. Becoming critical thinkers, problem solvers, and effective citizens.

EDUC 558 Culture Learning in Schools: Latino (3) History, values, beliefs, and the demography of Spanish-speaking people; implications for the American classroom. Conducted in Spanish.

EDUC 559 Discourse Analysis and Technology in STEM Classrooms (3, FaSpSm) Using multiple assessment strategies and technology to assess mathematical and scientific thinking and performance.

EDUC 560 Primary Language Instruction in a Bilingual Setting (3, Fa) Bilingual programs, their goals, personnel, teaching methods, and materials.

EDUC 561 Teaching English to Speakers of Other Languages Pedagogy I (3) Overview of approaches in Teaching English to Speakers of Other Languages and methods for teaching reading, writing, listening, speaking, along with grammar, vocabulary, and pronunciation. Open only to MAT TESOL and TESOL (online) students.

EDUC 562 Teaching English to Speakers of Other Languages Pedagogy II (4) Introduction to micro-components of effective teaching, including curriculum and lesson planning, lesson sequencing and delivery, and creating a classroom environment conducive to English language learning.

EDUC 563 Teaching from a Comparative and International Perspective (3, FaSpSm) Examines the social context of schooling from a comparative and international perspective, connections between cultural beliefs and societal values; issues of social stratification and marginalization.

EDUC 564 Teacher Leadership (2, FaSpSm) Strategies of leadership that lead from influencing learning in the classroom to influencing learning across an entire school. Becoming an instructional leader.

EDUC 566 Teaching Mathematics and Science (4, FaSpSm) Instructional approaches for integrating mathematics and science with other content areas in elementary and secondary classrooms. Open only to MAT students.

EDUC 567 English and Language Arts in Elementary Social Studies (4, FaSpSm) Integrating English and language arts development with learning in elementary social studies classrooms. Factors affecting the teaching and learning of social studies and language arts. Open only to MAT students.

EDUC 568ab Guided Practice (3-3) Supervised practicum in observation and teaching. Focus on planning, implementing, and assessing instruction for whole classes and individual students. Open only to MAT students. Graded CR/NC. (Duplicates credit in former EDUC 568.)

EDUC 569ab Capstone Portfolio in Learning and Instruction (2-2) The culminating experience in the Master of Arts in Teaching Program for students in the non-credential track. Open only to MAT students. (Duplicates credit in former EDUC 569.)

EDUC 570 Research Methods and Data Analysis (3, FaSpSm) Various research designs and their appropriateness for addressing different research questions. Threats to validity and other challenges in research. Basic statistical methods and their use. *Recommended preparation:* beginning statistics course.

EDUC 571 Systems of the English Language (3) Exploration of English language systems including words, sounds, sentence structure, and discourse and application of this knowledge to teaching English as second or foreign language.

EDUC 572ab Teaching in an International and Intercultural Context (2-2, Fa) Examines social context of education from an international and intercultural perspective, linkages between societal values, culture, and schooling, and implications for the role of teachers.

EDUC 573 Introduction to Special Education (3, FaSpSm) Effective and appropriate educational settings for students with disabilities. Legal and professional responsibilities. Components for an inclusive classroom.

EDUC 574 Collaboration, Families and Case Management (3, FaSpSm) Planning and implementing effective educational services for students receiving special education services. Potential interventions for family support. Coordination of services.

EDUC 575 Assessment and Curriculum for Students with Disabilities (3, FaSpSm) Developing effective educational interventions for students with disabilities. Formal and informal assessment. Curriculum strategies.

EDUC 576 Establishing and Maintaining an Effective Classroom Ecology (3, FaSpSm) Environmental and personal factors affecting student achievement. Intervention methodologies. Creating an effective learning environment.

EDUC 577 Guided Practice: Mild/Moderate Disabilities (3, FaSpSm) Supervised practicum in observation and teaching. Focus on planning, implementing, and assessing instruction for whole classes and individual students with mild/moderate disabilities.

EDUC 578 Integrating the Arts into the Secondary Curriculum (3, FaSpSm) Methods for integrating the arts into secondary classroom instruction. Critical and creative thinking, aesthetic education.

EDUC 579 Media Selection and Evaluation (2, FaSpSm) Selection and evaluation of media and technologies in support of instructional design based on a survey of current research and recommendations.

EDUC 580 Transforming STEM Education into Teaching Science (3, FaSpSm) The convergence of science, technology, engineering, and mathematics (STEM) as a foundation for teaching science.

EDUC 581 STEM Education from a Project-Based Learning Approach (3, FaSpSm) Model-based reasoning and inquiry as a means of integrating STEM disciplines.

EDUC 582 Assessment and Evaluation (2, FaSpSm) Overview of the concepts and procedures for assessment and evaluation of individual and overall performance in various learning environments.

EDUC 583 Counseling through the Lifespan (3) Developmental issues and life events from infancy to old age and their effect upon individuals, couples, and family relationships.

EDUC 584 Facilitating Creativity and Innovation in STEM Classrooms (3, FaSpSm) The role of creativity in STEM education. Theories and approaches to facilitating creative and innovative thinking.

EDUC 585 Action Research Project (3, FaSpSm) Design and implementation of a STEM-based project.

EDUC 586 Design of Learning Environments (3, FaSpSm) Design of learning environments through application of design principles; project-based practice in aligning instructional design, media selection, and the features of learning spaces.

EDUC 587 Master's Studio A (2, FaSpSm) Students propose and design a capstone project that applies knowledge and skills learned throughout the program and prepare a coursework portfolio.

EDUC 588 Master's Studio B (4, FaSpSm) Students implement the capstone project and submit a portfolio that integrates program coursework.

EDUC 589 Human Lifespan Development (3, FaSpSm) Fundamentals of human physical, motor, mental, social, and emotional development, spanning the prenatal period through late adulthood. (Duplicates credit in the former EDPT 520.)

EDUC 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

EDUC 591 Diversity: Power, Equity and Inclusion (3, FaSpSm) Appraises practices that maintain power; creates strategies to empower individuals and marginalized groups by intervening to achieve equitable outcomes in education, professions and communities.

EDUC 593ab Master's Seminar (2-2) An examination and analysis of research and literature in the student's area of focus. Graded IP/CR/NC. (Duplicates credit in former EDCO 593ab.)

EDUC 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

EDUC 595 Instructional Design (3, FaSpSm) Formulation and design of effective instruction; emphasis on analysis of media characteristics and instrumentation requirements. (Duplicates credit in the former EDPT 520.)

EDUC 597 K-12 Teaching and Learning in Context (2, Sm) Prepares candidates to understand the relationship between the actions of the teacher and the extent to which students learn in classroom and school contexts.

EDUC 599 Special Topics (1-4, max 9, FaSpSm) Selected topics in various areas of education.

EDUC 598abc Coached Practice (2-2-3, FaSpSm) Apply theory in practice, to deepen understanding of the teaching-learning process, and to engage in critical reflection. Graded CR/NC.

EDUC 600 Counseling for College and Career Readiness II (2, Fa) Planning and implementing theoretical foundations of college and career counseling. The application of contextually relevant strategies for assisting in college and career choices.

EDUC 601 Seminar in Social Psychology (4, max 8, Fa) (Enroll in PSYC 512)

EDUC 602 Self-concept and Motivation (4) (Enroll in PSYC 602)

EDUC 604 National Perspective on School Leadership (1, Sm) Students will examine the cultural, political, and economic issues pertinent to urban education within the national context to prepare them to be effective school leaders.

EDUC 605 Framing Educational Leadership (1, Fa) Critical analysis and creative expression applied to problems of practice. Supported and unsupported assertions. Evidence-based decision-making. The quality of evidence used to support arguments. Graded CR/NC. Open only to doctoral students.

EDUC 606 International Studies Seminar (1, FaSpSm) Analyzing educational challenges and opportunities in international and global contexts. Understanding the global context of international education and issues facing international and global urban education. Course includes an overseas trip. Open only to doctoral students. Graded CR/NC.

EDUC 607 Role of School Counselors in Student Learning and Motivation (3, FaSpSm) The process of identifying and assessing learning and motivational issues in schools, the application of research-based interventions, and the evaluation of effectiveness of these interventions.

EDUC 608 School Connectedness, Climate, and Classroom Management (2, Fa) Prevention, education, and training for achievement. Data collection for assessment and evaluation of school climate, crisis and classroom management conducive to learning and success.

EDUC 609 Academic Advising in Postsecondary Education (3, Fa) Contemporary issues in academic advising in postsecondary education. Examines and analyzes relevant theories, policies, and practices related to academic advising.

EDUC 610 Higher Education Administration in China (3, Sm) Examination of student affairs and higher education administration practices in the People's Republic of China. Course concludes with a trip to China.

EDUC 611 Athletic Administration (3, Sp) Analysis and discussion of critical issues in intercollegiate

athletics. Student-athlete academic and social accountability; challenges of NCAA policies; commercialization, marketing, and fundraising in college athletics.

EDUC 612 Application of Human Development Theory in School Counseling (3, FaSpSm) A theoretical perspective of human development across the lifespan. Issues and challenges faced by school counselors.

EDUC 613 Gender Issues in Athletic Administration (3, Sp) Overview of Title IX and gender issues in institutions of higher education and implications for public schools.

EDUC 614 Research and Assessment in Higher Education (3, Sm) Theory and practice of outcomes assessment, program evaluation, and research design in postsecondary educational administration.

EDUC 615 Ethics in Athletic Administration (3, Fa) Ethical concerns in intercollegiate athletics. Review, analysis, and discussion of ethical and moral conduct in sports. Relevance of social justice to ethical behaviors.

EDUC 616 Higher Education Seminar (3, FaSp) Capstone seminar course focused on the future of student affairs and higher education.

EDUC 617 The Student Athlete in Higher Education (3, Fa) Examination of student athletes in higher education. Effective strategies for counseling and advising college student athletes; issues and challenges of athletic amateurism.

EDUC 618 School Counseling Professional Portfolio (2, Fa) Preparation of an electronic resource portfolio that addresses a field based practice. The culminating experience for the M.Ed., School Counseling program.

EDUC 619 Framing Educational Leadership in a Global Context (4, Sm) Globalization as a distinct phenomenon. Assessment of impact of globalization on educational systems and institutions. Open only to doctoral students.

EDUC 620 Fundamentals of Creativity, Innovation, and Entrepreneurship (2, Sm) The genesis and facilitation of creative ideas in educational practice. The transformation of creativity into innovation and entrepreneurship. Open only to doctoral students.

EDUC 621 Measurement and Evaluation for School Counselors (3, Fa) The use of formal and informal assessments to improve student achievement and well-being. Use of assessment data for intervention and evaluation.

EDUC 622 Educational Theory and Instructional Design (2, Fa) Theories and elements of learning. Application in educational settings. Methodology for course development and evaluation. Emphasis on strategies, tools, and use of technology.

EDUC 623 Understanding Research That Informs Leadership (3, Fa) Understanding, interpreting, and applying education research. Open only to doctoral students.

EDUC 624 Educational Organizations: Governance and Finance I (2, Fa) Overview of economic concepts of education. Linkages between economic growth, development, and education. Impact of globalization. Open only to doctoral students.

EDUC 625ab Induction Plan and Assessment of Candidate Competence (1-1, FaSpSm) The development of an individualized induction plan and assessment of competence for meeting requirements for the Clear Administrative Services Credential. (EDUC 625a duplicates credit in former EDUC 595; EDUC 625b duplicates credit in former EDUC 596.) Graded CR/NC.

EDUC 626 Fostering Entrepreneurship in Educational Systems (2, Fa) The role of entrepreneurship in education and conditions that support entrepreneurship within an educational organization. How social entrepreneurship partnerships improve educational outcomes. Open only to doctoral students.

EDUC 627 Education Performance Problems: Role of Learning (3, Sp) Contemporary perspectives on learning and motivation. Strategies and tools for identifying, diagnosing, and solving learning and motivational challenges and opportunities. *Prerequisite:* EDUC 631. Open only to doctoral students.

EDUC 628 Educational Organizations: Governance and Finance II (2, Sp) Diversification and differentiation of educational institutions globally. The finances of higher education. Open only to doctoral students. *Prerequisite:* EDUC 624.

EDUC 629 Consulting Practicum Context Analysis (3, Sm) Preparation, design, and analysis of an education-related problem. *Prerequisite:* EDUC 723. Open only to doctoral students.

EDUC 630 Organizations and Policy: Current Issues (4, FaSp) Study of contemporary issues in educational organizations, policy and change in K–12 and higher education with an explicit focus on the improvement of urban education. Open to students admitted to the Ph.D. only.

EDUC 631 Locating Educational Performance Problems (3, Sp) Development and implementation of strategies for locating, solving and evaluating solutions to performance problems in educational organizations. Open only to doctoral students.

EDUC 632 Technology in Higher Education (2, Sm) The integration of technology in higher education and the relationship to quality of teaching, access to learners, and cost-effectiveness for universities and colleges.

EDUC 633 Child and Elder Abuse and Domestic Violence (2) A review of laws governing mandated reporting of child and elder abuse, the procedures involved, as well as etiology, effects, and treatment interventions.

EDUC 634 Couples Counseling (3) Examines relational development and change, strategies for intervention with couples, and selected issues in couples relationship functioning. *Prerequisite:* EDUC 500, EDUC 507, EDCO 541.

EDUC 635 Psychotherapy with Children and Adolescents (3) Training in unique diagnostic considerations in working with children and adolescents. Exposure to empirically supported treatment modalities for children and adolescents. (Duplicates credit in former EDCO 554.) *Prerequisite:* EDUC 500, EDUC 507, EDCO 541.

EDUC 636 Perspectives on Human Sexuality (3) The physiological-psychological and socio-cultural variables associated with sexual identity and sexual behavior with an emphasis upon sexual dysfunctions. (Duplicates credit in former EDCO 516.) *Prerequisite:* EDUC 507.

EDUC 637 Group Counseling: Theory and Process (3) Theory, research, and practice of group counseling. Includes laboratory experience. (Duplicates credit in former EDCO 542.) *Prerequisite:* EDUC 500, EDUC 507, EDCO 541.

EDUC 638 Cross-Cultural Counseling: Research and Practice (3) An examination of the cultural, socioeconomic, and language factors that may affect culturally differentiated populations; alternative cross-cultural counseling approaches. (Duplicates credit in former EDCO 551.)

EDUC 640 The Research University in the 21st Century (4, FaSp) An examination of the current transformation of the American research university with a focus on key issues that confront academics who work in research universities. Open to students admitted to the Ph.D. only.

EDUC 641 Human Capital and School Organization (3, Fa) School leadership, organization, management and development of school personnel. Capitalizing on school resources to meet school goals.

EDUC 642 Controversies in Learning and Instruction (4, FaSp) An introduction to learning research and theory, issues in learning and educational psychology situated in the context of diverse, urban settings. Open to students admitted to the Ph.D. only.

EDUC 643 Advancing Community Support through Social Media (2, Fa) Use of social media to

communicate school vision. Incorporating objectives, strategies, assessment, and accountability measures in communication plans.

EDUC 644 Practicum in Counseling (3) Supervised clinical work with clients, including adults, couples, children, and families. (Duplicates credit in former EDCO 560.) *Prerequisite:* EDUC 500, EDUC 507, EDUC 546, EDCO 541.

EDUC 645ab Fieldwork in Counseling (3-3) Supervised field experience in a clinical setting. Graded CR/NC. (Duplicates credit in former EDCO 561.) *Prerequisite:* EDUC 644.

EDUC 646ab Marriage and Family Therapy Capstone: Leadership Project (1-1, FaSp) An evidence-based leadership project, designed to enhance fieldwork site functioning. Includes needs assessment, literature review, project design, implementation, and evaluation.

EDUC 647 School Leadership Seminar (2, Sp) Planning, design, and development of an action research plan for school improvement using multiple measures of project assessment.

EDUC 648ab Apprenticeship in School Administration and Leadership (2-2, FaSp) Supervised field experience in administrative areas of K–12 schools. Development of Administrative Services Portfolio.

EDUC 650 Globalization and the Nation-State: Theories of Change (4, FaSp) The impact of globalization on educational public policies and practices: an examination of technology, information and communications, and their influence on transnational and national politics. Open to students admitted to the Ph.D. only.

EDUC 651 Introduction to Qualitative Research Methods (3, FaSpSm) Introduces qualitative methodologies, qualitative data collection and analysis techniques, support in drafting research proposals, and paradigms on how to critically think about inquiry.

EDUC 653 Advanced Qualitative Research (3, Sp) Interactive seminar that explores the theoretical underpinnings and practicalities of interviews, portraiture, focus groups, life histories, and cultural biographies. *Recommended preparation:* introductory statistics.

EDUC 654 Advanced Qualitative Research Methods II (3, FaSpSm) Designed to follow Advanced Qualitative Research, focuses on data analysis in the qualitative research tradition, writing and publishing from qualitative data.

EDUC 657 Social Foundations of Research (3, Fa) Foundations in social science research with exposure to broad cross-section of research methods, design, and analytical techniques. Open only to doctoral students.

EDUC 658 Hierarchical Linear Models (3, Fa) Application of two- and three-level multilevel models in educational settings, fixed and random effects, growth models. *Recommended preparation:* a working understanding and knowledge of regression analysis and related Stata software.

EDUC 689 Fiscal Support and Expenditure in Higher Education (3, Sp) Analyses of private and public financial support and expenditure patterns; includes recent trends in state and federal legislation related to higher education.

EDUC 700 Research and Practice in the Preparation of Teachers (3) Research on the preparation of teachers for diverse populations. Measures of teacher quality and student achievement. Existing practices in teacher education from multiple perspectives.

EDUC 701 Pedagogy in Teacher Education (3) A critical examination of pedagogical practices in teacher education. The design of pedagogical approaches and programs for diverse and underserved students in urban schools.

EDUC 702 Curriculum, Teacher Preparation, and Student Learning (3) The process and role of curriculum in a variety of urban settings, teacher preparation, and professional growth. The philosophical and psychological foundations of curriculum development. Open to doctoral students only.

EDUC 703 Examining Literacy Theories and Practice (3) Literacy theories as practiced in urban, teacher education and professional development settings using an inquiry approach to examine best practice. Open to doctoral students only.

EDUC 704 Evaluation and Assessment in Teacher Education (3, Fa) Evaluation and assessment in the context of public schools, teacher preparation and professional growth in urban settings. Policy implications of data-based decision making and program implementation.

EDUC 706 Proseminar in Higher Education (3) Critical issues in urban higher education from historical and philosophical perspectives.

EDUC 707 Administration in Higher Education (3, Fa) Administrative issues in higher education. Academic leadership related to undergraduate and graduate education. Quality standards and assessment. How administrators create efficiency, effectiveness, performance, and change.

EDUC 708 Advanced Student Development Theory (3, Fa) Examination of traditional and emergent student development theories.

EDUC 709 Finance in Higher Education (3) Local, national, and global economic and policy environments and their effect on institutional policies and practices.

EDUC 710 Assessment, Organizational Learning and Performance (3) The role of assessment in higher education. An analysis of the purpose and value of particular assessment approaches and instruments, in particular those addressing classroom learning and institutional effectiveness.

EDUC 711 Social Factors Influencing Learning and Motivation (3) Social psychological principles and research techniques applied to educational problems; school environment, group behavior, teacher effectiveness, teacher-student interaction, behavioral change. Open to doctoral students only.

EDUC 712 Issues in Human Motivation (3) Analysis of motivational principles; diagnosis and solutions to motivation gaps in learning environments; and motivation and efficacy theories and principles. Open to doctoral students only.

EDUC 713 Issues in Lifespan Development (3) An examination of issues related to the development of diverse students and the development of environments that promote motivated behavior. Open to doctoral students only.

EDUC 714 Measurement and Evaluation for Decision-Making (3, Sm) Collecting, analyzing, and using quantitative data to solve problems of practice and in evaluating educational institutions, programs, and policies. Open only to doctoral students.

EDUC 715 Current Research in Learning (3) Current research in the application of learning theories, and the applicability of this research across a variety of contexts. Open to doctoral students only.

EDUC 716 Instructional Leadership (3, Sm) Examines the role of instructional leaders in improving student performance; current issues in curriculum design and implementation; and effective instructional leadership approaches for school improvement. (Duplicates credit in former CTSE 688.) Open only to doctoral students.

EDUC 717 Schooling as an Economic Enterprise (3, Fa) Applying economic theory to the study of education. Application of market theory to education, partnerships, allocation of resources, and the examination of educational enterprises. (Duplicates credit in former EDPA 615.) Open only to doctoral students.

EDUC 718 Maximizing Human Resources in Education (3, Sm) Strategically understanding the management of human capital to ensure high student performance. How to attract and retain top quality teachers. (Duplicates credit in former EDPA 610.) Open only to doctoral students.

EDUC 719 The Policies and Politics of Education Governance (3, Fa) Major issues facing educators in the 21st century. Emphasis on how educational policy can focus on incentives for schools to improve student

learning. (Duplicates credit in former EDPA 613.) Open only to doctoral students.

EDUC 720 Leadership for Principals (3, Sm) The role of the principal as an instructional leader with a focus on improving student achievement. (Duplicates credit in former EDPA 600.) Open only to doctoral students.

EDUC 721 Leadership for Superintendents (3, Sm) The role of the superintendent in establishing a focus on student achievement and holding school sites accountable. How superintendents support student learning through leadership. (Duplicates credit in former EDPA 618.) Open only to doctoral students.

EDUC 723 Evaluating and Assessing Educational System Outcomes (3, Sm) Evaluating impact. Examination of key assessment theories; planning and implementation of learning and program effectiveness. *Prerequisite:* EDUC 631. Open only to doctoral students.

EDUC 724 Creating Policy Alternatives for Educational Settings (3, Sm) Effective policy-making and constructing alternatives. Open only to doctoral students.

EDUC 725 Analyzing Effectiveness of Educational Systems (3, Fa) Organizational change and development in the context of educational settings. How change and reform occur. How to foster change and transformation. Open only to doctoral students.

EDUC 726 Making Choices: Deciding Among Policy Alternatives (3, Fa) Models of decision making including cost-benefit analysis, risk-benefit analysis, and decision analysis. Ethical considerations and the political environment. Open only to doctoral students.

EDUC 727 Implementing Policy in Educational Systems (3, Sp) Effective policy-making. Human and financial resources to support implementation. Targeting resources to support implementation to attain policy goals. *Prerequisite:* EDUC 726. Open only to doctoral students.

EDUC 728 Global Trends: Emerging Ideas, Emerging Markets (3, Sp) Examination of a range of emerging markets in education. Global efforts of institutions of higher education to access new markets through collaborations and offshore endeavors. Open only to doctoral students.

EDUC 729 Assessing Policy Impact in Educational Settings (3, Sp) Theory and practice of educational policy evaluation. Limits of rationality and the political forces that shape policy. Preparation of an evaluation design. *Prerequisite:* EDUC 727. Open only to doctoral students.

EDUC 730 Using Communication to Facilitate Organizational Change (3, FaSpSm) Addresses communication strategies that leaders use to facilitate positive change in their organization. Reinforces written, non-verbal, and verbal communication skills through leadership situations.

EDUC 731 Economics of Organizational Change and Learning Environments (3, FaSpSm) Leadership, problem solving, communication, research, reflection, and professional dispositions will concurrently expand. Candidates will acquire the knowledge and skills to identify and implement economic change.

EDUC 732 Building Capacity for Organizational Change (3, FaSpSm) Focuses on learning issues related to building organizational capacity for change through leadership and development of personnel within an organization.

EDUC 764abcdz Consulting Project (1-1-1-1-0, FaSpSm) Credit on acceptance of consulting project. Graded CR/NC. Open only to doctoral students. *Prerequisite:* EDUC 629.

EDUC 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

EDUC 791 Proposal for Doctoral Dissertation (1, FaSpSm) Preparation of initial dissertation proposal. Graded CR/NC.

EDUC 792 Critique of Research in Education (3, FaSp) A survey and critical analysis of selected research and literature. Graded CR/NC. Open to students admitted to the Ed.D. only.

EDUC 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSp) Credit on acceptance of dissertation. Graded IP/CR/NC.

Rossier School of Education

Courses of Instruction

The terms listed are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

EDUCATION COUNSELING (EDCO)

EDCO 030x The Process of Paraprofessional Counseling for Young Adults (2, Sp) Explores the theoretical processes involved in paraprofessional counseling with specific application to issues faced by young adults. Graded CR/NC.

EDCO 324m Asian American Psychology (4, Sp) Psychological issues of Asian Americans such as cultural identity, intergenerational conflict, stereotypes, interracial dating and marriage, educational achievement, and mental health.

EDCO 503 Ethical and Legal Issues in Counseling (3, Sp) Examination of current legal, ethical, and other professional issues in the practice of counseling and psychotherapy. *Prerequisite:* EDUC 500.

EDCO 504 Behavior Management in the Classroom (3, Sp) Analysis of student behavior in school settings. Emphasis is on a problem-solving functional approach to behavioral changes.

EDCO 505 Counseling and Collaborative Consultation in the School Setting (3, Sp) Theory and practice of collaborative consultations provided by school counselors and school psychologists to improve student achievement and the learning environment.

EDCO 506 Development, Administration and Evaluation of Pupil Personnel Services (3, Fa) Develop skills in the evaluation and management of pupil personnel services programs in the public schools for comprehensive support of student learning and achievement.

EDCO 541 Theories in Counseling (3, FaSp) Theory, research, and practice of psychological counseling. *Corequisite:* EDUC 500.

EDCO 574 School Counseling Practicum (1-2, max 2, FaSpSm) Supervised practice in school counseling. Graded CR/NC. *Prerequisite:* EDCO 503, EDCO 541.

EDCO 575 School Counseling Field Experience (1-4, max 4, FaSpSm) Supervised field experience in applying knowledge and skills within a K–12 school setting. Graded CR/NC. *Prerequisite:* EDCO 574.

Rossier School of Education

Courses of Instruction

The terms listed are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

CURRICULUM, TEACHING AND SPECIAL EDUCATION (CTSE)

CTSE 593ab Master's Seminar (2-2, FaSpSm) An examination and analysis of research and literature from the student's area of focus. Required of all master's candidates who do not enroll in the Master's Thesis (594abz). Graded CR/NC.

Rossier School of Education

Courses of Instruction

The terms listed are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

EDUCATIONAL POLICY, PLANNING AND ADMINISTRATION (EDPA)

EDPA 308 Politics and American Education (4, FaSp) Historical study of political, legislative, judicial decisions that have shaped American education; interaction of educators, courts, legislative bodies; emphasis on in-depth analysis of current issues.

EDPA 612 Qualitative Methods in Educational Research (3, SpSm) Overview of the assumptions, methods and techniques of qualitative educational research; discussion and application of analytical tools derived from anthropology, sociology, history, and related social sciences.

Rossier School of Education

Courses of Instruction

The terms listed are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

EDUCATIONAL PSYCHOLOGY AND TECHNOLOGY (EDPT)

EDPT 110 Motivation and Learning Strategies (4, FaSp) Applying research in cognitive psychology and motivation theory to improve students' learning in different academic disciplines.

EDPT 310 Parental Influences on Children's Educational Development (4, FaSp) Basic principles and theories of child development and learning with emphasis on parent-child, parent-school, and child-school relationships.

EDPT 502 Learning and Individual Differences (3, FaSpSm) Theory and research in learning, development, and individual differences, and social psychology related to education or training contexts.

EDPT 540 Introduction to Educational Measurement and Evaluation (3, FaSp) Survey of theories, concepts, and procedures for assessing intellectual and non-intellectual characteristics and for evaluating individual and program performances.

EDPT 550 Statistical Inference (3, FaSpSm) Application of statistical techniques in education; emphasis on underlying principles and concepts coupled with selected inferential techniques using desk-top computer software.

EDPT 570 Language and Cultural Diversity in Learning (3, Fa) Analysis of current research and theory regarding the influences of language and culture on learning and cognition, with a special focus on academic achievement and instructional transactions.

EDPT 576 Technology in Contemporary Education and Training (3, FaSp) Development and scope of instructional technology and its role in modern educational and training systems; overview of instructional

development; innovation and trends in the field.

EDPT 642 Measurement Theory (3, Fa) Mathematical concepts and psychometric theory underlying test construction and interpretation; emphasis on current research in the area. *Prerequisite:* EDPT 652.

EDPT 652 Multiple Regression (3, Sp) Multiple regression, factorial analysis of variance, path analysis. *Prerequisite:* introductory statistics.

EDPT 654 Multivariate Statistical Techniques (3, FaSpSm) Multivariate statistical procedures in the analysis of behavioral inquiries; particular emphasis on multivariate analysis of variance. *Prerequisite:* EDPT 652.

EDPT 655 Advanced Research Methods in Education (3, Sp) Focuses on principles of research design in education including literature synthesis, formulation of research problem and questions, selection of methodology and integration of research proposal. *Prerequisite:* EDPT 550.

Rossier School of Education

Courses of Instruction

The terms listed are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

HIGHER AND POSTSECONDARY EDUCATION (EDHP)

EDHP 500 Foundations of Higher, Adult, and Professional Education (3, Fa) Contemporary issues in higher, adult, and professional education in the United States; analytic perspectives from various disciplines (history, philosophy, sociology); implications for policy and practice.

EDHP 502 Administration of Higher, Adult, and Professional Education (3, Sp) Policies and theories for governance and management. Relations between historical and contemporary organizational processes in postsecondary education. Critique and applications of current research.

EDHP 503 Curriculum, Teaching, and Learning in Higher, Adult, and Professional Education (3, Sp) Curriculum, teaching, and learning strategies for general, vocational, and professional education; planning for lifelong learning; theories, policies, and practices for higher, adult, and professional education.

EDHP 551 Applied Educational Ethnography (3, Fa) Research for improving leadership in higher, adult, and professional education. Ethnographically motivated field designs, observations, focused and unstructured interviews and unobtrusive techniques.

EDHP 552 The Politics of Difference (3) Explores strategies for restructuring institutions of higher education to improve student support and achievement among historically marginalized groups.

EDHP 560 Feminist Theory (4, FaSpSm) (Enroll in SWMS 560)

EDHP 563 Student Affairs Work in College (3, Fa) Principles, services, and organizational patterns of student affairs programs and services for two-year, four-year and professional higher education institutions.

EDHP 565 Intervention Strategies in College Student Development (3, Sp) Exploration of current campus issues such as violence, diversity and academic remediation, and their related intervention strategies (policy-based, programmatic, and counseling-based).

EDHP 580 The Community College (3, SpSm) The community college movement; history; aims; curriculum; types of administrative organization; teaching procedures; relation to lower and higher institutions; profiles of faculty and students; evaluation.

EDHP 587 Fieldwork in Higher, Adult, and Professional Education (1-8, max 8, FaSpSm) Structured participation in supervised teaching or administrative activities. Assignments matched with student's goals, training, experience. Graded CR/NC. *Recommended preparation:* EDHP 563, EDHP 565.

EDHP 593ab Master's Seminar (2-2, FaSpSm) An examination and analysis of research and literature in the student's area of focus. Required for all master's candidates who do not enroll in the Master's Thesis (594abz). Graded CR/NC.

EDHP 594abz Master's Thesis (2-2-0, FaSpSm) Required for all master's candidates who do not enroll in the Master's Seminar (593ab). Credit on acceptance of thesis. Graded IP/CR/NC.

EDHP 657 Management of Student Services in Higher Education (3, Sp) Delivery of student services and programs in higher education, organizational behavior, management systems, administrative procedures, and alternative leadership styles.

EDHP 679 Legal Issues in the Administration of Higher Education (3, Sm) Analysis of legal issues related to the administration of higher education; emphasis on relations with students, faculty, staff, alumni, and campus communities. *Prerequisite:* EDHP 500 or appropriate experience.

EDHP 687 Student Development in Higher Education (3, Sp) Theories of college student development and application of developmental models to program design, interventions, outreach, and research programs.

USC Viterbi School of Engineering

Faculty and undergraduates from the USC Viterbi School of Engineering show their spirit in the Piazza Trilussa in Trastevere, Rome as part of the school's summer European program. While taking two major-related courses and exploring the local environs, students learn more about other cultures as well as gain perspective on technology issues in other countries. As evidenced in this photo, a growing number of women are entering the engineering field; 38 percent of the Viterbi School's 2013 freshman class was female, which is almost exactly twice the national average for undergraduate engineering enrollments.

The USC Viterbi School of Engineering is innovative, elite and internationally recognized for creating new models of education, research and commercialization that are firmly rooted in real world needs. The school's first priorities are the education of outstanding students and the pursuit and publication of new research.

As the school's faculty and students extend the frontiers of engineering knowledge through their research, they also apply engineering and technology to address societal challenges. The school stimulates and encourages qualities of scholarship, leadership, ambition and character that mark the true academic and professional engineer — to serve California, the nation and the world. At USC Viterbi, we call this the enabling power of Engineering+.

Courses in engineering were first offered at USC in the 1905–06 academic year in the basement of one of the oldest buildings on campus. Today, 210 full-time, tenure track faculty (and more than 330 total full-time faculty) serve over 3,000 undergraduates in major and minor programs and more than 5,100 graduate students, utilizing extensive and technically advanced laboratories, classrooms and live interactive high-speed Internet broadcast systems. Government and industry annually fund nearly \$188 million worth of research.

Viterbi undergraduate support programs complement and strengthen the academic experience, enhancing both depth and scope. Viterbi graduate education is outstanding preparation for advanced research and professional careers. The Ph.D. program is built around fellowships, teaching assistantships and research appointments, and produces a steadily growing core of doctoral graduates across the disciplines. The master's and professional programs are national and global leaders in advanced training for professional engineers.

Viterbi School of Engineering

Degrees and Requirements

The Viterbi School of Engineering offers the following undergraduate curricula leading to the Bachelor of Science in: Aerospace Engineering; Applied Mechanics; Astronautical Engineering; Biomedical Engineering; Chemical Engineering; Civil Engineering; Computer Engineering and Computer Science; Computer Science; Computer Science/Business Administration (with the Marshall School of Business); Computer Science (Games); Electrical Engineering; Environmental Engineering; Industrial and Systems Engineering; Mechanical Engineering; and Physics/Computer Science (with the Dornsife College of Letters, Arts and Sciences).

Minor programs are offered in: 3-D Animation; Applied Computer Security; Astronautical Engineering; Computer and Digital Forensics; Computer Programming; Computer Science; Construction Planning and Management (with the Price School of Public Policy); Craniofacial and Dental Technology (with the Herman Ostrow School of Dentistry and the Dornsife College of Letters, Arts and Sciences); Engineering Management; Enterprise Information Systems; Environmental Engineering; Innovation: The Digital Entrepreneur (with the Marshall School of Business); Mobile App Development; Petroleum Engineering; Technology Commercialization

(with the Marshall School of Business); Video Game Design and Management; Video Game Programming; Web Technologies and Applications.

Graduate curricula leading to the Master of Science in: Aerospace Engineering; Aerospace and Mechanical Engineering (Computational Fluid and Solid Mechanics); Aerospace and Mechanical Engineering (Dynamics and Control); Analytics; Astronautical Engineering; Biomedical Engineering; Biomedical Engineering (Medical Imaging and Imaging Informatics); Chemical Engineering; Civil Engineering; Civil Engineering (Construction Engineering); Civil Engineering (Structural Engineering); Civil Engineering (Transportation Engineering); Civil Engineering (Transportation Systems); Civil Engineering (Water and Waste Management); Computer Engineering; Computer Science; Computer Science (Computer Networks); Computer Science (Computer Security); Computer Science (Data Science); Computer Science (Game Development); Computer Science (High Performance Computing and Simulations); Computer Science (Intelligent Robotics); Computer Science (Multimedia and Creative Technologies); Computer Science (Scientists and Engineers); Computer Science (Software Engineering); Computer Science (Technical Professionals); Cyber Security Engineering; Data Informatics; Electrical Engineering; Electrical Engineering (Computer Networks); Electrical Engineering (Electric Power); Electrical Engineering (Multimedia and Creative Technologies); Electrical Engineering (Telecommunications); Electrical Engineering (VLSI Design); Electrical Engineering (Wireless Health Technology); Electrical Engineering (Wireless Networks); Engineering Management; Environmental Engineering; Financial Engineering; Global Supply Chain Management (with the Marshall School of Business); Green Technologies; Health Systems Management Engineering (with the Price School of Public Policy, not currently accepting applications); Industrial and Systems Engineering; Manufacturing Engineering; Materials Engineering; Materials Science; Mechanical Engineering; Mechanical Engineering (Energy Conversion); Mechanical Engineering (Nuclear Power: not currently accepting applications); Medical Device and Diagnostic Engineering; Operations Research Engineering; Petroleum Engineering; Petroleum Engineering (Geoscience Technologies); Petroleum Engineering (Smart Oilfield Technologies); Product Development Engineering; Spatial Informatics; and Systems Architecting and Engineering.

Graduate curricula leading to the Master of Construction Management and the Master of Communication Informatics.

Graduate curricula leading to dual degrees in: Master of Science Aerospace Engineering / Master of Science Engineering Management, Master of Science Electrical Engineering / Master of Science Engineering Management, Master of Science Industrial and Systems Engineering / Master of Business Administration and Master of Science Mechanical Engineering / Master of Science Engineering Management.

Graduate curricula leading to the Engineer degree in: Aerospace Engineering; Astronautical Engineering; Chemical Engineering; Civil Engineering; Electrical Engineering; Environmental Engineering; Industrial and Systems Engineering; Materials Science; Mechanical Engineering; and Petroleum Engineering.

Through the Graduate School, graduate curricula leading to the Doctor of Philosophy in: Aerospace Engineering; Astronautical Engineering; Biomedical Engineering; Chemical Engineering; Civil Engineering; Computer Engineering; Computer Science; Electrical Engineering; Engineering (Environmental Engineering); Industrial and Systems Engineering; Materials Science; Mechanical Engineering; and Petroleum Engineering.

Graduate certificates in: Astronautical Engineering; Health Systems Operations (with the Price School of Public Policy); Health, Technology and Engineering (with the Keck School of Medicine); Network Centric Systems; Smart Oilfield Technologies; Software Architecture; Systems Architecting and Engineering; and Transportation Systems (with the Price School of Public Policy).

Undergraduate Program Accreditation

The Bachelor of Science degrees in aerospace engineering, astronautical engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering and computer science, electrical engineering, environmental engineering, industrial and systems engineering, and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET, *abet.org*. The Bachelor of Science degrees in computer engineering and computer science and in computer science are accredited by the Computing Accreditation Commission of ABET, *abet.org*.

Undergraduate Program Student Outcomes

By the time of graduation from Bachelor of Science degree programs accredited by the Engineering Accreditation Commission of ABET, students will develop at least the following abilities and knowledge:

- an ability to apply knowledge of mathematics, science and engineering
- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multidisciplinary teams
- an ability to identify, formulate and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context
- a recognition of the need for, and an ability to engage in life-long learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills and modern engineering tools necessary for engineering practice

By the time of graduation from Bachelor of Science degree programs accredited by the Computing Accreditation Commission of ABET, students will develop at least the following abilities and knowledge:

- an ability to apply knowledge of mathematics appropriate to the program's student outcomes and to the discipline
- an ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
- an ability to design, implement and evaluate a computer-based system, process, component or program to meet desired needs
- ability to function effectively on teams to accomplish a common goal
- an understanding of professional, ethical, legal, security and social issues and responsibilities
- an ability to communicate effectively with a range of audiences
- ability to analyze the local and global impact of computing on individuals, organizations and society
- recognition of the need for and an ability to engage in continuing professional development
- an ability to use current techniques, skills and tools necessary for computing practice
- an ability to apply mathematical foundations, algorithmic principles and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the trade-offs involved in design choices
- an ability to apply design and development principles in the construction of software systems of varying complexity

Viterbi School of Engineering

Undergraduate Degrees

Change of Major to Engineering

USC undergraduate students who have not been admitted to the Viterbi School of Engineering may apply to add an engineering major with the approval of the Associate Dean for Admission for the Viterbi School. Students seeking approval to add an engineering major must complete required prerequisite courses and submit a Request to Change Major to Engineering form to the Admission and Student Affairs Office in Ronald Tutor Hall 110. Approval is granted on the basis of academic performance at USC and in the required prerequisite courses in the Viterbi School within a specific number of semesters.

Non-engineering students may complete a maximum of four engineering courses. No further engineering courses may be taken unless admission has been approved.

Common Requirements

Certain general requirements are common to all undergraduate curricula for Bachelor of Science degrees in Engineering. These are as follows:

Total Units

A minimum total of 128 acceptable units is required to earn the Bachelor of Science in Engineering. Exceptions are: aerospace engineering, 130 units; biomedical engineering with an emphasis in electrical engineering, 133 units; biomedical engineering with an emphasis in mechanical engineering, 132 units; chemical engineering, 133 units; chemical engineering with an emphasis in biochemical engineering, 133 units; chemical engineering with an emphasis in environmental engineering, 136 units; chemical engineering with an emphasis in nanotechnology, 132 units; chemical engineering with an emphasis in petroleum engineering, 137 units; chemical engineering with an emphasis in polymer/materials science engineering, 137 units; civil engineering, 131 units; civil engineering with an emphasis in building science, 135–36 units; civil engineering with an emphasis in environmental engineering, 129–130 units; civil engineering with an emphasis in structural engineering, 131 units; electrical engineering, 131 units; environmental engineering, 131–134 units.

Not more than 4 units may be physical education activity courses, provided the department allows it in the program.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires eight courses in six Core Literacies, plus writing and two courses in Global Perspectives (which may double-count with courses in the Core Literacies). See here or the General Education Program for more information. .

Students in the Viterbi School of Engineering must satisfy the general education requirements. Students satisfy Core Literacy requirements in life sciences, physical sciences, and quantitative reasoning with the basic science and mathematics elements of their undergraduate engineering programs.

Students in the engineering "3-2" program are not required to satisfy general education requirements or the lower-division writing requirement for USC; these students are understood to have satisfied USC's general education requirements when they have satisfied the general education requirements and lower level writing requirement at their previous institution. All students must, however, complete the WRIT 340 requirement.

Mathematics (16 units minimum)

Sixteen units or more, including three semesters of calculus, are required.

Basic Sciences (16 units minimum)

Sixteen units or more of biology, chemistry or physics are required.

Residence Requirement

All students must complete a minimum of 64 units at USC in order to receive a USC degree. In addition, the Viterbi School of Engineering requires that students complete all upper division units required for the major in

residence.

For students in the Viterbi School of Engineering “3-2” Program, at least 48 units must be earned in courses taken at USC.

Scholarship Requirement in Major Subject

For graduation with a bachelor’s degree, a grade point average of C (2.0) or higher is required in all upper division courses applied toward the major including any approved substitutes for these courses taken at USC. Additional scholarship requirements for the various majors are listed under the departmental headings.

Grade Point Requirement

A grade point average of at least 2.0 is required on all course work attempted at USC.

Transfer students must meet these averages, both on residence work attempted and on combined transferred and residence courses attempted.

Probation/Disqualification

A student whose overall GPA falls below 2.0 is placed on academic probation. Continued enrollment requires clearance from an academic review counselor.

Each semester, students on academic probation are required to receive academic advisement. Proof of advisement must be filed with the Academic Review Department before any registration requests will be processed. The only acceptable proof of advisement is an official academic review advisement record signed by the student’s academic adviser and a representative from the Viterbi Admission and Student Affairs Division. Academic review advisement forms may be obtained from Tutor Hall of Engineering (RTH) 110 or John Hubbard Hall 113.

Students on probation are encouraged to utilize the academic services (advisement and free tutoring) provided by the Viterbi Admission and Student Affairs Division.

Students on academic probation who do not raise their overall GPA to 2.0 after two semesters of enrollment (excluding summers) will be academically disqualified from the university. However, if a student earns a minimum semester GPA of 2.3 in the second or any subsequent probation semester but has not yet reached an overall 2.0 GPA, the student will not be disqualified and will be allowed to enroll an additional semester.

Petitions for readmission after academic disqualification are initiated by the student through the Academic Review Department. All grade issues (IN, MG, etc.) must be resolved prior to the submission of such a petition. Before petitioning for readmission, a student must complete a minimum of 12 semester units of transferable course work (applicable to USC degree requirements) with a minimum 3.0 GPA. University residency requirements will determine whether these units are accepted as transfer credit.

As readmission to the university is never guaranteed, any indication of strong academic performance beyond the 12 unit minimum would strengthen a readmission petition.

Students must petition for readmission by December 30 for the spring semester, by May 1 for the summer session and by August 15 for the fall semester. Late petitions will not be accepted. A non-refundable fee determined by the Academic Review Office must accompany all readmission petitions.

Special Educational Opportunities

Viterbi Admission and Student Affairs Division

The Viterbi Admission and Student Affairs Division, located in Ronald Tutor Hall of Engineering (RTH) 110, begins to assist students as soon as they express an interest in engineering and continues working with them until, and in some cases after, they graduate.

The office is not only responsible for working with prospective students, but with continuing students as well. It directs special services and programs, provides a variety of support services, sponsors student organizations, is involved with student government and acts as a liaison with other university offices.

The Viterbi Admission and Student Affairs Division enables engineering students to have a successful experience at USC.

Center for Engineering Diversity and Women in Engineering Program (WIE)

The Center for Engineering Diversity (CED) provides a variety of services for historically underrepresented students in engineering (African-American, Hispanic and Native American students, including women). Prior to their first semester in Viterbi, freshmen can participate in a four-week summer residential program (Summer Institute).

Contact the Center for Engineering Diversity at (213) 740-1999 for more information.

The Women in Engineering Program (WIE) offers professional, academic and co-curricular support to the women of the Viterbi School. The goal of the Viterbi Women in Engineering Program is to recognize the unique challenges that female engineering students will face, provide resources and overall support to address these challenges, and allow our female students to find academic and personal success during their Viterbi career and beyond.

Klein Institute for Undergraduate Engineering Life

The Klein Institute for Undergraduate Engineering Life (KIUEL) was established to provide Viterbi undergraduates with a variety of personal and professional activities designed to enhance undergraduate engineering student life experiences outside the classroom. The KIUEL Programming Board implements programs around leadership, service learning and globalization, and cross-disciplinary learning. Past KIUEL events have included the KIUEL Weekend for Leaders, the KIUEL Showcase and the Senior Design Expo. For more information, visit viterbi.usc.edu/kiuel.

Merit Research Program

Every year, a select group of promising incoming freshmen are invited by faculty to work on projects in their research laboratories. These student researchers actively participate in the development of new technology throughout their undergraduate careers.

In addition to giving students excellent first-hand experience, this program can help offset the cost of education since each participant earns wages for his or her work. This renewable award is separate from other financial assistance offered by the university.

The student must apply for renewal of his or her award by March 1 of each year. Continuing students can use the same application form to apply for the award starting in their sophomore year.

First Year Excellence

The First Year Excellence (FYE) program helps first-year students develop strong connections to the university and the Viterbi School of Engineering. FYE promotes academic exploration and success through its co-curricular programs, support services and resources during students' first year. Freshman academies, introductory courses and the Viterbi Spotlight Series help guide students as they explore engineering. Academic advisers work with all freshman students to ensure they are on track academically and to assist with acclimating to college life and USC. Free tutoring, group-led supplemental instruction sessions, workshops and seminars on time management and networking with faculty are available to students to assist them in accomplishing their goals.

Viterbi Career Connections

The Viterbi School of Engineering provides extensive career services to all students. Students are encouraged to register with Viterbi Career Connections their first year at USC. By doing so, they will be kept informed of all career-related events such as company information sessions, career preparation workshops, industry luncheons and career fairs. In addition, students are able to participate in the school's extensive on-campus interview

program.

USC's Viterbi School of Engineering attracts employers not only from Southern California, but from across the country. A few of the many companies that have recently hired Co-ops, interns and permanent employees from the Viterbi school include: Accenture, Amgen, Alcon Laboratories, Inc., The Boeing Company, Chevron Corporation, Cisco Systems, Inc., Clark Construction, Google, IBM, Intel, Jet Propulsion Laboratory, Kiewit Corporation, Lockheed Martin Corporation, Microsoft Corporation, Morley Builders, NASA, Northrop Grumman Corporation, Parsons Corporation, Raytheon, Turner Construction Company, Walt Disney Imagineering and Yahoo.

Cooperative Education

By participating in the Co-op Program, students can earn degree credit and industry work experience before they graduate. Co-op improves students' understanding of the relationship between theory and practice, helps them fine-tune their career goals and aids in the acquisition of important engineering skills. Students' work assignments are closely related to their specific degree program and are appropriate to their current academic level.

Participation in the program is open to all full-time undergraduate engineering majors. Students are eligible to apply for Co-op the second semester of their sophomore year. Though the sequence may vary, students typically have one summer work experience in addition to one semester immediately preceding or following one of the summer sessions. While on assignment, students enroll in a 1–2 unit course (ENGR 395) that aids in the integration of both on-campus and off-campus learning. With departmental approval, credit toward a degree may be earned upon completion of this course.

3-2 Program

For those students wishing greater depth and breadth in the liberal arts, the Viterbi School of Engineering has developed agreements with more than 20 liberal arts colleges nationwide in which a student attends a liberal arts institution for his or her first three years of college, pursuing pre-engineering courses in addition to a solid program in the liberal arts. At the end of the three years, upon recommendation from the liberal arts college, the student applies to the Viterbi School of Engineering as a junior and, if admitted, completes the remaining requirements for a B.S. degree typically within two years. After degree requirements for both schools are complete, the student will receive two degrees — a B.A. from the liberal arts college and a B.S. from USC.

Engineering Overseas Programs

Every summer the Viterbi School of Engineering sponsors a seven-week academic program in either Florence, London, Paris, Madrid, Rome or another location that provides students with the opportunity to enroll in engineering and humanities courses, as well as participate in a directed studies project. This program is open to all engineering majors.

International Exchange Programs

The Viterbi School of Engineering International Exchange Program gives undergraduate students the opportunity to broaden their exposure to the global context of engineering theory and practice by spending a semester abroad in a challenging academic environment at an international host institution. The International Exchange Program allows students to satisfy technical electives and/or approved degree requirements by attending approved partner institutions. This program is open to students entering their junior or senior year. Students apply at the Viterbi Student Affairs Office. Candidates must meet all admission requirements of both the Viterbi School of Engineering as well as those of the international host institution. Contact the Admission and Student Affairs Office for a complete list of international exchange partners.

Honor Societies

The Viterbi School of Engineering has established a variety of honor societies to recognize academic excellence, creativity and service. These are: Alpha Pi Mu (industrial and systems engineering), Chi Epsilon (civil engineering), Eta Kappa Nu (electrical engineering), Omega Chi Epsilon (chemical engineering), Omega Rho (industrial and systems engineering), Pi Tau Sigma (mechanical engineering), Sigma Gamma Tau (aerospace engineering), Tau Beta Pi (nationwide honor society) and Upsilon Pi Epsilon (computer science).

Minor in Technology Commercialization

This interdisciplinary minor includes courses from both the business and engineering schools and provides education in the economic, technological and entrepreneurial aspects of commercializing new technologies. The minor is designed for students from a range of backgrounds (e.g., majors in engineering, life sciences or business) who are interested in starting their own technology-based ventures, working for technology-based start-up companies or pursuing corporate careers that may involve the commercialization of new technologies. In the minor, students learn about conceptualizing, developing, and managing new, technology-based ventures and projects.

To enroll, students must have completed a minimum of 32 units of college-level course work and have a minimum overall GPA of 2.75. To complete the minor, students are required to complete the two required courses (7 units) and enough elective courses to achieve a total of 16 units outside of their major. Business majors thus require 23 total units and other majors 16 total units to complete the minor.

Viterbi School of Engineering

Graduate Degrees

General Requirements

The Viterbi School of Engineering recommends candidates for the Master of Science degree in: aerospace engineering, astronautical engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering, computer science, cyber security engineering, data informatics, electrical engineering, engineering management, environmental engineering, financial engineering, green technologies, health systems management engineering, industrial and systems engineering, manufacturing engineering, materials

engineering, materials science, mechanical engineering, medical device and diagnostic engineering, operations research engineering, petroleum engineering, product development engineering, spatial informatics, sustainable infrastructure systems, and systems architecting and engineering; and the Master's degree in construction management and in communication informatics. Several areas of emphasis and specialization are available within these disciplines.

All graduate work in the Viterbi School of Engineering is under the jurisdiction of the Viterbi School except the Doctor of Philosophy degree, which is under the jurisdiction of the USC Graduate School. All prospective graduate engineering students should apply to the USC Office of Graduate Admission.

Admission

Two classes of students are admitted to take courses for graduate credit: admitted and conditionally admitted students. These classifications are determined by the Office of Graduate Admission on the recommendations of the appropriate department in the Viterbi School of Engineering.

Admitted Students

This is the status of a graduate student pursuing work leading toward an advanced degree. The student has been accepted into the degree program without any conditions.

Conditionally Admitted

The chair of a major department in the Viterbi School of Engineering may recommend that a student be admitted under certain conditions. Conditional admission is granted when a student's admission records are incomplete or when deficiency courses must be taken but the student appears to be otherwise admissible. The conditions must be met before the completion of two semesters of enrollment or 12 units of course work, whichever comes first. If the conditions on admission are not met within the given time period, the student may not be allowed to register for course work in subsequent semesters. When the conditions have been met, the academic department will remove the restrictions that have been placed on the student's registration.

Criteria

To qualify for admission, applicants are expected to present strong academic records and show superior accomplishment in their engineering and related courses. Admission decisions will be based on Graduate Record Examinations test scores and transcripts of previous school work. Individual departments may set higher admission standards than the Graduate School. Some programs also require letters of recommendation and a statement of purpose. Doctor of Philosophy applicants who have published professional papers in their field may forward copies to the department, and they will be considered together with the other credentials submitted.

Procedure

Applicants to graduate programs must present credentials to the Office of Graduate Admission showing that they have completed an acceptable curriculum for the bachelor's degree. In some departments students with outstanding records will be admitted for the doctoral program without first receiving the Master of Science degree. If the previous degree is not in the field in which the student wishes to pursue graduate study, it may be necessary to make up undergraduate deficiencies in the area of the desired specialty. Applicants must take the Graduate Record Examinations. Satisfactory scores on the general test are required for admission to full graduate standing in most programs. Consult the department office for further information.

Once the application for admission has been sent, arrangements should be made immediately to have official transcripts of all previous undergraduate and graduate school work forwarded directly to the Office of Graduate Admission from the schools attended. If the Graduate Record Examinations general and subject tests, as well as the TOEFL or IELTS exams, have been taken the scores should be sent to the Office of Graduate Admission by arrangement with the Educational Testing Service. If the tests have not been taken, the applicant should register to take them on the earliest available date. The departments will review the application files and select for admission those students offering the greatest promise for completing graduate studies.

Progressive Degree Programs

The progressive degree program allows qualified undergraduate students the opportunity to complete an integrated program of study joining a bachelor's degree program and a master's degree program in the same or

different departments. Applicants for a progressive degree program must have completed 64 units of course work applicable to their undergraduate degree since graduating from high school. (Credit by exam and course work taken prior to high school graduation are excluded). Applicants must submit their application prior to completion of 96 units of course work. Normally, the application is submitted in the fall semester of the third year of enrollment at USC. The application for admission to a progressive master's program must be accompanied by a departmentally approved course plan proposal and two letters of recommendation. All application materials can be obtained from the Viterbi Admission and Student Affairs Office (RTH 110, viterbi.usc.edu/pdp).

Progressive degree program students must fulfill all the requirements for both the bachelor's degree and the master's degree. The total number of units for the master's degree, however, may be reduced by a maximum of one-third. A minimum of two-thirds of the units required for the master's degree must be at or above the 500 level, excluding any 590 courses. Students will be subject to undergraduate academic progress standards and policies while in undergraduate status and master's academic progress standards and policies while in graduate status. The degrees may be awarded separately, but the master's degree will not be awarded before the undergraduate degree. The time limit for completing a progressive degree program is 12 semesters. For more information, refer to the Requirements for Graduation page.

General Requirements for the Master of Science

Residence Requirements

Viterbi students are allowed up to five years to earn a master's degree. Depending on the specific degree, the typical time required varies from between one and one-half to two years for students in M.S. programs on-campus to three years for M.S. students completing their degrees online via DEN@Viterbi. Master's degrees other than the Master of Science typically require more course work, and may take more time to complete.

Students entering the Viterbi School of Engineering with course or credit deficiencies require a correspondingly longer period. A candidate must complete the last four semester units of course work at USC. Up to four transferred units will be accepted from another engineering school upon verification by the Office of Degree Progress and the approval of the major department.

Prerequisites

Prerequisite is a bachelor's degree in engineering, allied fields or science. If the graduate field is different from the field of the bachelor's degree, there may be undergraduate deficiencies assigned by the major department, and these must be made up by taking and passing the assigned courses before proceeding with the graduate courses.

Deficiency Courses

New students may be required to demonstrate satisfactory preparation for the graduate program with previously completed course work. In cases where preparation is not demonstrated, up to 9 units of deficiency course work may be required in addition to the normal degree requirements.

Credit for required deficiency courses may not be applied toward a graduate degree. A deficiency course within the same discipline taken after the higher level course has been passed will not be available for unit or grade point credit.

Placement Examinations

Enrollment in certain 500- and 600-level courses in the disciplines of computer engineering and electrical engineering will require a student to either take and pass the corresponding 400-level prerequisite at USC, or pass a placement exam in the corresponding course.

Not all 400-level prerequisite courses taken instead of a placement exam are available for degree credit. No unit or grade point credit is given for placement exams. Please consult with an academic adviser or refer to the department Website for information on specific courses and placement exam details.

Grade Point Average Requirements

A grade point average (GPA) of 3.0 (A = 4.0) is required for the master's degree in all engineering programs. The minimum GPA must be earned on all course work applied toward the master's degree and on all 400-level and

above course work attempted at USC beyond the bachelor's degree. A minimum grade of C (2.0) is required in a course to receive graduate credit. Work graded C- or below is not acceptable for subject or unit credit toward any graduate degree. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average.

Course Selection

There are two program options for the master's degree, one with a thesis and the other without. Courses are selected to fit the special needs of individual students, must form an integrated program leading to a definite objective and must be approved in advance by the department. Only courses numbered 400 and above may be applied for degree credit.

Program without Thesis

The minimum requirement is 27 units; 18 of these units must be at the 500 level and at least 18 units must be in the major department and closely related departments. Prior department approval is required for all non-major courses. Specific requirements are listed under each department.

Program with Thesis

The minimum requirement is 27 units; four of these units are to be thesis. At least 16 units, not including thesis, must be at the 500 level or higher, and at least 18 units must be in the major department. A total of not less than four nor more than eight units of 590 Directed Research and 594ab Master's Thesis must be included in the program. The minimum thesis requirement in 594a is two units; in 594b, two units.

Master's Thesis

The thesis, when it is required, is regarded as an important part of the work of the candidate for a master's degree. It is not intended to be a piece of highly recondite research, but it must be a serious, considerable and publishable piece of work demonstrating the writer's power of original thought, thorough grasp of the subject matter and ability to present material in a scholarly manner and style.

The thesis presents the results of an investigation of an approved subject in the major department. It is supervised throughout by a thesis committee, appointed by the chair of the student's major department. The committee is usually composed of two members of the major department and one other member of the faculty.

The student will register in courses 594a and b respectively during the final two semesters of the master's program as determined by discussion with an adviser. (Concurrent registration for 594a and b during the same semester is permitted when a student's progress makes completion of all requirements likely within one semester.) If the thesis has not been completed within these two semesters, the candidate must register for 594z each semester until the thesis has been accepted but no additional unit credit will be earned. Units of 594ab Master's Thesis may not be converted to units of 590 Directed Research.

A student readmitted to candidacy by petition to the Graduate School must reregister for 594a and 594b. Final acceptance of the thesis is based upon the recommendation of all members of the thesis committee. For requirements concerning format of master's thesis see the Graduate School section of this catalogue.

Candidates who find it necessary to be excused from registration in 594a or 594b for a semester must formally report before the beginning of the semester to the Viterbi Office of Graduate and Professional Programs that they will be inactive during that semester and request a leave of absence. During a leave of absence a candidate will not be entitled to assistance from the thesis committee or to the use of university facilities. The granting of a leave of absence does not change the candidate's responsibility for meeting the time schedule for the completion of degree requirements. Leave will be granted only under exceptional circumstances.

Progress Toward the Degree

Graduate students are expected to make regular progress toward their degrees as defined by the faculty of their respective departments and within the time limits allowed. Graduate students' progress and performance are reviewed each semester. Students making unsatisfactory progress receive a formal written warning and are placed on a semester of academic warning with specific conditions to be met for continuation in the program. Please refer to catalogue sections Academic Warning and Dismissal of Graduate Students; Grade Point Average Requirements; and the Website of the Office of Graduate and Professional Programs (GAPP) at

Department Approval for Non-major Courses

Prior departmental approval is required for non-major courses to be taken and applied toward a graduate degree. Students must consult with the faculty adviser for formal written permission to take courses outside the major department for degree credit.

A copy of the faculty adviser's written approval must be kept in the department file and retained by the student until graduation.

Time Limit

It is expected that work for a Master of Science in Engineering will be completed within a maximum of five calendar years. An academic department may grant an extension of up to one year at a time for a maximum of two years. Courses taken more than seven years prior to the date upon which the degree is to be awarded cannot be included for the degree.

Admission to Candidacy

Application for admission to candidacy for the Master of Science is a separate step from admission to graduate standing. The requirements for admission to candidacy are: (1) the applicant must be admitted to regular graduate standing and must have removed all undergraduate deficiencies, and (2) the applicant must submit a complete program approved by the major department showing the course work, research and thesis (if required).

Application for graduation should be made at the beginning of the semester in which the requirements for the master's degree are to be completed. Students are strongly advised to file for graduation as soon as the registration process has been completed so that their names may appear in the printed Commencement program and so that any discrepancies in their records may be resolved. Late filing may delay conferral of the degree.

Application forms for graduation with the master's degree may be obtained from the student's academic department. This application should be returned to the student's academic department. Changes in the program after admission to candidacy are made by petition to the student's academic department.

Second Master's Degree

A graduate student who already holds a master's degree from USC may apply a limited number of previously earned units toward the second master's degree.

The maximum number of units allowed for transfer is: 4 units in degree programs requiring 24–32 units; 8 units in programs requiring 33–40 units; 12 units in programs requiring 41 or more units. In all cases, permission of the chair of the major department is required. All credit, including the units from the first master's degree, must be earned within seven calendar years.

For students who earned their first master's degree at another institution, no course work may be repeated from the first program of study and no unit credit from the first program of study may be counted toward the second master's degree.

General Requirements for the Master of Engineering Degree

The Viterbi School does not currently offer degree programs with the Master of Engineering designation.

General Requirements for the Engineer Degree

The Engineer degree is awarded under the jurisdiction of the Viterbi School of Engineering. This degree is granted upon completion of a comprehensive curriculum beyond the general course requirements for the Master of Science and after successfully passing an engineer's qualifying examination. The required curriculum is intended to give students broad preparation in two areas of engineering, together with a minimum number of units in these areas to prepare them for the interdisciplinary nature of the many complex problems they will encounter in practice today. The degree is also intended to fulfill a growing need in industry for students with comprehensive advanced engineering training, but not necessarily with the research orientation developed by the Ph.D. student.

The Engineer degree is a terminal degree. Students who complete the Engineer degree will not be considered for admission to the Ph.D. program.

The Engineer degree is offered in aerospace engineering, astronautical engineering, chemical engineering, civil engineering, electrical engineering, environmental engineering, industrial and systems engineering, materials science, mechanical engineering and petroleum engineering.

Prerequisites

There are three basic prerequisites for the Engineer Degree Program: a Master of Science degree or completion of 27 units of acceptable course work, application for admission to the Viterbi School of Engineering and acceptance to the program by the appropriate department.

Course Requirements

The Engineer degree requires a minimum of 30 units of graduate course work beyond the Master of Science degree; up to 6 units at the 400 level may be counted at the discretion of the student's qualifying exam committee if the committee finds them necessary for the student's program. The course work must form a balanced program of study leading to a definite concentration in two fields of engineering, a minimum of 12 units in one field, nine in another; nine units are elective and may be taken outside the Viterbi School of Engineering, but must be acceptable for graduate credit. The distribution of course work will be governed by the student's qualifying exam committee and should be considered in conjunction with the course work done for the Master of Science degree. A candidate for the Engineer degree may substitute a project under the supervision of a faculty member for 6 units of course work. To have the project credited toward the degree, the student must register in 690 Directed Research during the course of the project; total 690 Directed Research registration should be 6 units. A student wishing to work on a project must make arrangements with a member of the faculty to supervise and evaluate work, and obtain the approval of the committee chair prior to completing more than 15 units of course work. In many cases the project may be related to the candidate's work outside the university but must still be supervised by a faculty member. Distribution of the course work should take into account the nature of the project.

Grade Point Average Requirement

A minimum grade point average of 3.0 must be earned on all course work applied toward the Engineer degree. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree. A minimum grade of C (2.0) is required in a course to receive graduate credit. Work graded C- or below is not acceptable for subject or unit credit toward any graduate degree. Transfer units count as credit (CR) toward the Engineer degree and are not computed in the grade point average.

Residence Requirements

A candidate must complete the last four units of course work at USC. At least 26 units must be taken in residency at USC. A maximum of four transfer units not counted toward a previous degree may be allowed with adviser approval.

Guidance Committee

After being granted graduate standing the student must form a guidance committee. The committee is made up of three full-time faculty members who are specialists in the student's areas of concentration, with at least two from the major department. Forms for appointment of the committee are available from the student's academic department. The student is responsible for finding a faculty member from one area of concentration who will act as the chair of the guidance committee. The chair will assist in selection of the other members. Advisement of the student after formation of the committee will be by the committee chair.

Qualifying Examination

The student must satisfactorily complete an engineer's qualifying examination administered by his or her guidance committee. This examination will cover both areas of concentration and will consist of at least one written and one oral examination. This examination is normally taken during the last semester of course work toward the degree. Students who choose to take the examination in the semester following the completion of course requirements may do so up until the end of the third week of classes without registering. After that date they must register for GRSC 810 to maintain continuous enrollment in the program. Results of the examination are reported to the Viterbi Office of Graduate and Professional Programs and forwarded to the Office of Academic Records and Registrar.

Transfer Credits

Up to four units of graduate course work may be transferred from an accredited institution to be applied toward the Engineer degree. Transfer work must have been done after receipt of the Master of Science degree and must be approved by the qualifying exam committee.

Reserving Course Credit

A student who receives the Master of Science degree at USC may reserve a limited number of units taken prior to the receipt of the Master of Science degree for credit toward the Engineer degree. To reserve credit, the course must have been taken during the last semester as a Master of Science candidate, not used toward the Master of Science degree, be acceptable to the student's committee, and approved by the Office of Degree Progress.

Time Limit

The student must complete all requirements within five calendar years.

Admission to Candidacy

After satisfactorily completing the qualifying examination, and no later than the beginning of the last semester of course work, the student must file for candidacy. This is a separate and distinct step which sets forth the entire academic program fulfilling the degree requirements and is used as a working basis for awarding the degree.

General Requirements for the Doctor of Philosophy

This degree is granted under the jurisdiction of the USC Graduate School. Students should also refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School.

Thirteen Doctor of Philosophy (Ph.D.) programs are offered: aerospace engineering, astronautical engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering, computer science, electrical engineering, engineering (environmental engineering), industrial and systems engineering, materials science, mechanical engineering and petroleum engineering.

Deficiency Courses

New students may be required to demonstrate satisfactory preparation for the graduate program with previously completed course work. In cases where preparation is not demonstrated, up to 9 units of deficiency course work may be required in addition to the normal degree requirements.

Credit for required deficiency courses may not be applied toward a graduate degree. A deficiency course within the same discipline taken after the higher level course has been passed will not be available for unit or grade point credit.

Placement Examinations

Enrollment in certain 500- and 600-level courses in the disciplines of computer engineering and electrical engineering will require a student to either take and pass the corresponding 400-level prerequisite at USC, or pass a placement exam in the corresponding course.

Not all 400-level prerequisite courses taken instead of a placement exam are available for degree credit. No unit or grade point credit is given for placement exams. Please consult with an academic adviser or refer to the department Website for information on specific courses and placement exam details.

Foreign Language Requirements

There is no foreign language requirement for engineering majors.

Course Requirements

Satisfactory completion of at least 60 units of approved graduate level course work with a cumulative grade point average of at least 3.0 is required of all Ph.D. students in engineering. A minimum grade of C (2.0) is required in a course to receive graduate credit. Work graded C- or below is not acceptable for subject or unit credit toward any graduate degree. Undergraduate prerequisites and graduate course work will be required in accordance with the regulations of the major department or program and the recommendations of the student's qualifying exam

committee. Transfer units are subject to approval by the Office of Degree Progress (for course work taken at institutions in the United States) or by the Office of Graduate Admission (for course work taken at institutions outside the United States) and by the qualifying exam committee.

Screening Procedure

The original admission decision admitting a student to the Ph.D. program is based on the student's previous academic records, Graduate Record Examinations scores and other evidence of scholastic abilities indicating promise for completing graduate studies. It is also a prerequisite that all Ph.D. students successfully complete the screening procedures designated by the department. These usually consist of a written and an oral examination administered by the faculty. Students who fail the screening procedure will be advised that they are not recommended to continue in the Ph.D. program and that any additional work may not be counted toward the degree.

Qualifying Exam Committee

The Ph.D. student's program of study is supervised by the qualifying exam committee, which is formed immediately after passing the screening examination. The committee consists of five tenure-track faculty members, four from the major department and one from outside the department. Reporting the screening procedures and forming the qualifying exam committee are accomplished by filing the appropriate forms obtainable from the Graduate School Website, usc.edu/schools/GraduateSchool.

Qualifying Examinations

The qualifying examinations are taken during the last semester of the second year of graduate study or, at the latest, in the fifth semester or equivalent. The Request to take the Qualifying Examinations must be filed in the semester prior to taking the examinations and at least 30 days before beginning the examinations. The examinations are intended to determine the extent of the student's knowledge in basic science and engineering areas as well as the ability to do original and scholarly research. The qualifying exam committee decides the nature of the qualifying examinations (both oral and written portions) according to the policies applicable in each department.

If not otherwise enrolled, a student must enroll in GRSC 800 during the semester in which the qualifying examination is to be taken. Students are strongly encouraged to take the qualifying examination during the first semester in which they are enrolled in GRSC 800, and should not enroll in more than two semesters of GRSC 800 before taking the qualifying examination.

The examinations may be scheduled at any time during the semester provided that all members of the committee are available to administer them. All portions of the examinations must be completed within 60 days. After passing the qualifying examinations the Ph.D. student is admitted to candidacy by the Graduate School and the dissertation committee is established. After this step students will normally engage in at least one year of full-time graduate study and research on campus.

Doctoral Dissertation

An acceptable dissertation based on original investigation and supervised directly by the dissertation committee is required. The dissertation must show mastery of a special field, capacity for independent research and a scholarly result. Candidates are expected to keep all members of the dissertation committee informed of their progress at all stages of the dissertation.

Defense of the Dissertation

After satisfactorily meeting all other requirements and after the research and writing of the dissertation are substantially complete, the Ph.D. candidate must pass a general final oral examination devoted to the major field and to the topic of the dissertation. The examination will be conducted in such a manner as to determine to the satisfaction of the dissertation committee that the candidate has attained the stage of scholarly advancement and power of investigation demanded by the university for final recommendation to the doctorate. The faculty are invited to attend and to participate in the final oral examination. However, only the dissertation committee may vote. Unanimous approval of the committee is required for the student to upload the dissertation to the Graduate School.

Departmental Requirements

The requirements and regulations set forth in this portion of the catalogue are to be construed as the minimal requirements only as established by the Graduate School. In addition, students must meet all the requirements established by their department.

Progress Toward the Degree

Graduate students are expected to make regular progress toward their degrees as defined by the faculty of their respective departments and within the time limits allowed. Graduate students' progress and performance are reviewed each semester. Students making unsatisfactory progress receive a formal written warning and are placed on a semester of academic warning with specific conditions to be met for continuation in the program. Please refer to catalogue sections Academic Warning and Dismissal of Graduate Students; Grade Point Average Requirements; and the Website of the Office of Graduate and Professional Programs (GAPP) at viterbi.usc.edu/gapp.

Special Educational Opportunities

DEN@Viterbi

Established in 1972, DEN@Viterbi, the USC Viterbi School of Engineering's online delivery system is a pioneer in the distance learning arena, using cutting-edge technology to enable professional engineers to take USC engineering courses for graduate degree credit without coming to the campus. DEN@Viterbi students enrolled around the world are pursuing over 40 graduate degree programs online — more choices than at any other research university. DEN@Viterbi breaks down geographical and scheduling barriers, allowing students to take classes anytime and anywhere, with the option for live interactivity. DEN@Viterbi students receive support from administrative and technical staff, and enjoy access to all services the Viterbi School has to offer.

The Viterbi School has made it possible for all on-campus students enrolled in the school's graduate courses to receive free access to the archived lectures of courses offered via DEN@Viterbi. This valuable study aid enables students to review lectures throughout the semester.

For more information about the Viterbi School graduate programs and DEN@Viterbi, visit viterbi.usc.edu/gapp.

Viterbi School of Engineering

Engineering

The courses listed in the following section have been designed for specific groups of students for various purposes as indicated in the course descriptions. Certain courses have restrictions related to their applicability for degree credit. Students should consult the academic adviser in the major department for further information.

Courses of Instruction

ENGINEERING (ENGR)

ENGR 100abcd Engineering Honors Colloquium (1-1-1-1) Recent developments in a highly technological society with emphasis on selected topics. Enrollment limited to members of the Viterbi School of Engineering Honors Program. Graded CR/NC.

ENGR 101 Introduction to Engineering (3, Fa) Gateway to the majors and minors in engineering. Introduction to engineering disciplines. Historical and current trends in engineering; ethical and societal factors in engineering solutions. Hands-on design experiences; USC laboratory tours.

ENGR 102 Engineering Freshman Academy (2) Introduction to the profession of engineering. Ethical, political and societal consequences of engineering innovations and the impact of engineering on everyday life. Team projects and guest lectures. Open to freshmen only.

ENGR 150L Engineering Science and Systems: From Humans to Robots (3, Fa) Hands-on multidisciplinary engineering course that uses robotics as a theme to cover material from all areas of engineering. Laboratory; programming; team projects; end-of-semester exhibition. Open only to freshmen. *Recommended preparation:* Basic programming experience (e.g., C, C++, C#, Java, Python).

ENGR 301 Technical Entrepreneurship (3) (Enroll in BUAD 301)

ENGR 305 Engineering Biology Matters (3, Fa) Engineering students will learn biological phenomena in the context of engineering principles and explore biological mechanisms and processes as analogies for designing engineered systems. *Recommended preparation:* CHEM 105aL, MASC 110L.

ENGR 345 Principles and Practices of Global Innovation (3, Sp) Learner-centered, cross-cultural, technology-enabled approaches to principles and industrial practices leveraging cultural diversity to inspire innovations for competitive global markets. Requires an extended semester of 22 weeks, including 2-week overseas project in early summer.

ENGR 395abcdx Cooperative Education Work Experience (1 or 2, max 5) Supervised work experience in a professional environment related to a specific degree program, academic level, and career objective. Acceptance into Cooperative Education Program required. Graded IP/CR/NC. Degree credit by departmental approval.

ENGR 400 Engineering Honors Project (1-3, max 12, FaSpSm) Supervised interdisciplinary studies and projects. Enrollment limited to members of the Viterbi School of Engineering Honors Program. Graded CR/NC.

ENGR 401x Communicating Science and Engineering to Children (3, max 6, FaSp) Engineering students communicate their knowledge, collaborate constructively with peers, and inspire underserved children to develop a curiosity and persistence for science and engineering. Open only to junior and senior engineering students.

ENGR 493x Dean's Seminar in Entrepreneurship (2, Sp) Overview of starting and developing a new business. Discussions with successful business leaders and entrepreneurs. Not available for students admitted to the Entrepreneur Program. Open only to seniors or graduate students in business or engineering. Graded CR/NC. (Duplicates credit in former BUAD 493x.)

ENGR 499 Special Topics (2-4, max 8) Current developments in the field of engineering.

ENGR 501x Engineering Writing and Communication for Master's Students (3, FaSp) Academic and discipline-specific writing skills. Emphasis on structure of discourse and writing process. Presentation and oral communication skills also addressed. Graded CR/NC. Credit Restrictions: May be taken for degree credit only toward M.S. degrees in Industrial and Systems Engineering; Engineering Management; Manufacturing Engineering and Entrepreneurship; Operations Research Engineering; and the Master of Engineering in Environmental Quality Management.

ENGR 502x Writing Skills for Engineering Ph.D. Students (2, max 4, FaSpSm) Writing of engineering curriculum- and research-related projects for Ph.D. students. Focus is on conference papers, dissertations and proposals, journal articles, and other forms. Graded CR/NC. Not available for credit to master's students.

ENGR 503x Oral Communication Skills for Engineering Ph.D. Students (2, max 4, FaSpSm) Academic and professional presentation skills for Ph.D. students. Preparation for qualifying exams, conference paper presentations, and other forms of oral communication. Use of visual aids and poster displays included. Graded CR/NC. Not available for degree credit to master's students.

ENGR 504x Fellowship Proposal Writing for Engineering Ph.D. Students (2, FaSp) Preparation of essays and other materials for research fellowship applications. Graded CR/NC. Open only to Ph.D. engineering students. Not available for degree credit.

ENGR 509 Patent Law for Scientists and Engineers (3, Sp) Tools for engineering and science graduate

students to make informed decisions about obtaining and enforcing patent protection for their future inventions: validity, infringement, unenforceability. *Recommended preparation:* EE 682 or ISE 565.

ENGR 555 Invention and Technology Development (3) (Enroll in ISE 555)

ENGR 596 Internship in Engineering (1, max 3, FaSpSm) Part-time or full-time, practical work experience in the student's field of study. The internship must be located at an off-campus facility. Students are individually supervised by faculty. May not be taken until the student has completed at least one semester of enrollment in the graduate program. Graduate standing in engineering. Graded CR/NC.

ENGR 599 Special Topics (2-4, max 9) Current developments in the field of engineering; topics to be selected each semester.

Viterbi School of Engineering

Aerospace and Mechanical Engineering

Degree Requirements

Educational Mission

The degree programs of the Department of Aerospace and Mechanical Engineering provide the educational foundation for success in all walks of life whether or not one's career path includes employment as a professional engineer, work in a field outside of engineering, or pursuit of further education.

Undergraduate Program Educational Objectives

Graduates of the undergraduate programs in Aerospace and Mechanical Engineering are expected to attain the following objectives within a few years after graduation:

- Work as professionals within engineering or a related area in both small- and large-scale businesses;
- Pursue further education through graduate school or professional development courses; and
- Become leaders within their chosen profession whether it be industry, academia or service.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Aerospace Engineering prepares graduates to have a knowledge of aerodynamics, aerospace materials, structures, propulsion, flight mechanics, and stability and control. The program also prepares graduates to have design competence that includes integration of aeronautical topics.

The program leading to a Bachelor of Science in Mechanical Engineering requires students to apply principles of

engineering, basic science and mathematics (including multivariate calculus and differential equations); to model, analyze, design and realize physical systems, components or processes; and prepares students to work professionally in both thermal and mechanical systems areas.

MAJOR ELECTIVES

	UNITS
AME core electives**	3
Technical electives***	6
Total units:	130

*Satisfies GE Category III requirement.

**Any upper division AME courses.

***Technical electives consist of (1) any upper division course in engineering except CE 404, CE 412 and ISE 440, or (2) an upper division course in chemistry, physics or mathematics and MATH 225. No more than 3 units of 490 Directed Research course work can be used to satisfy the technical elective requirement.

+The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

Master of Science in Aerospace Engineering

In addition to the general requirements listed in this catalogue, the department has identified requirements in the following areas of specialization: aerodynamics/fluid dynamics; aerospace controls; aerospace design; aerospace structures; computational fluid dynamics; hypersonics/kinetics of gases and plasmas; propulsion; and space science. Core requirements and elective requirements are defined for each area of specialization. Information on the current approved courses that comprise these core and elective requirements is available from the department.

Master of Science, Aerospace and Mechanical Engineering (Computational Fluid and Solid Mechanics)

The program prepares students for professional careers in engineering companies that develop products using computational tools of fluid and solid mechanics. The program also provides the necessary background for pursuing higher degrees, Engineer and Ph.D., in aerospace and mechanical engineering with specializations in computational fluid mechanics, computational solid mechanics and computational heat transfer. The degree course work provides a necessary background in basic aerospace and mechanical engineering disciplines (solid mechanics, fluid mechanics, heat transfer), engineering mathematics and numerical methods. The advanced computational technical electives provide practical examples using existing numerical programs to simulate structures, heat transfer and fluid flows as well as commercial mathematical packages for analyzing data and simulations.

Admission requirements follow the general admission rules for aerospace and mechanical engineering graduate programs. The program requires completion of a minimum of 27 units and a cumulative GPA of at least 3.0 for graduation. The program with thesis requires 28 units, four of which are thesis units.

REQUIRED CORE COURSES (21 UNITS)		UNITS
AME 404	Computational Solutions to Engineering Problems	3
AME 509	Applied Elasticity, or	
CE 507	Mechanics of Solids I	3
AME 525	Engineering Analysis	3
AME 526	Engineering Analytical Methods	3
AME 530a	Dynamics of Incompressible Fluids	3
AME 535a	Introduction to Computational Fluid Mechanics	3
CE 529a	Finite Element Analysis	3

Select a computational technical elective from the following list or another approved by a graduate adviser: 3 units.

COMPUTATIONAL TECHNICAL ELECTIVE (3 UNITS)		UNITS
AME 415	Turbine Design and Analysis	3
AME 535b	Introduction to Computational Fluid Mechanics	3
ASTE 545	Computational Techniques in Rarefied Gas Dynamics	3
CE 529b	Finite Element Analysis	3
CE 551	Computer-Aided Engineering Project	3
MASC 575	Basics of Atomistic Simulation of Materials	3
MASC 576	Molecular Dynamics Simulations of Materials and Processes	3
MATH 504ab	Numerical Solution of Ordinary and Partial Differential Equations	3

Select a technical elective from the following list or other electives approved by a graduate adviser: 3 units.

TECHNICAL ELECTIVES (3 UNITS)		UNITS
AME 511	Compressible Gas Dynamics	3
AME 516	Convection Processes	3
AME 590	Directed Research	1-12
AME 599	Special Topics	2-4, max 9
CE 541a	Dynamics of Structures	3
CE 542	Theory of Plates	3

One core class requirement may be waived at the discretion of a graduate adviser if a student documents that he or she completed or is enrolled in an equivalent course. The waived class must be replaced by a technical elective. Credit for one course of not more than 4 units from another accredited institution may be approved by a graduate adviser. The Master's Thesis (4 units) may be substituted for a technical elective class (3 units).

Master of Science in Product Development Engineering

See the listing under Product Development Engineering

Master of Science in Systems Architecting and Engineering

See the listing under Systems Architecting and Engineering.

Master of Science in Aerospace Engineering/Master of Science in Engineering Management

The department of Aerospace and Mechanical Engineering in conjunction with the Daniel J. Epstein Department of Industrial and Systems Engineering offers programs leading to the degree of Master of Science in Aerospace Engineering/Master of Science in Engineering Management. This program is designed for graduate aerospace engineers whose career objectives lead to increasing technical management responsibilities.

In addition to the general requirements of the Viterbi School of Engineering, the dual degree of Master of Science in Aerospace Engineering/Master of Science in Engineering Management is also subject to the following requirements:

1. All applicants must meet the admission requirements of both the Department of Aerospace and Mechanical Engineering and the Department of Industrial and Systems Engineering;
2. A minimum of 48 units is required;
3. A minimum of 18 units must be graduate-level course work in AME, approved by an AME graduate student adviser;
4. A minimum of 18 units must be graduate level course work in ISE, approved by the ISE Engineering Management graduate student adviser and chosen from the course list under Master of Science in Engineering Management;
5. A minimum additional 12 units of acceptable course work must be chosen with the consent of the ISE Engineering Management graduate student adviser to form a coherent program.

Engineer in Aerospace Engineering

Requirements for the Engineer in Aerospace Engineering are the same as the general requirements. Also, 3 to 6 of the units required for the degree must be AME 690. Prior approval must be obtained from the qualifying exam committee before registration in AME 690.

Doctor of Philosophy in Aerospace Engineering

The Doctor of Philosophy with a major in aerospace engineering is also offered. See general requirements for graduate degrees.

Viterbi School of Engineering

Aerospace and Mechanical Engineering

Mechanical Engineering Degrees

The department offers a Bachelor of Science degree in Mechanical Engineering. Additionally, petroleum engineering exists as an emphasis within the mechanical engineering program. An area of emphasis appears in parenthesis after the primary major name on the transcript.

Bachelor of Science in Mechanical Engineering

The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees section.

*Satisfies GE Category III requirement.

**Any upper division course in AME.

+The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

Minor in Music Recording

A minor in music recording is offered through the USC Thornton School of Music to provide undergraduate students with the background necessary to enter the field of recording engineering and to familiarize them with the design needs of modern recording equipment. The minor is recommended to mechanical engineering majors with extensive musical training who would like to combine their technical and musical abilities while learning the engineering applications of physical and mathematical principles to the art of music recording. See the listing under the USC Thornton School of Music.

Master of Science in Mechanical Engineering

Requirements for the Master of Science in mechanical engineering are the same as set forth in the general requirements. Six of the required units must be in AME 525 and AME 526 or courses in engineering analysis approved in advance in writing by the Department of Mechanical Engineering.

The specific sequence of courses that constitutes an acceptable program must be approved in advance.

Requirements for Graduation Without Thesis, 27 units total with 3.0 GPA: AME 525 and AME 526 or approved mathematics (6); 500 level courses in major department (12); approved 400 or 500 level courses (9).

With Thesis, 27 units total with 3.0 GPA: AME 525 and AME 526 or approved mathematics (6); 500 or 600 level courses in major department (12) not including thesis; maximum AME 594ab — thesis (4); approved 400 or 500 level units (5) (a maximum total of 8 units combining AME 590 and AME 594ab).

Recommended Programs of Study

The program of study depends upon the student's interest and background. During the first semester at USC, students must consult with a departmental adviser about an area of concentration and draw up a plan of study, which must be approved by the adviser. Besides the common requirements, listed below are several areas in mechanical engineering with specific courses identified as core and core electives. Groups of courses in other combinations and from other departments within the university may be approved if a particular coordinated interest can be demonstrated. In some instances students whose background is not in mechanical engineering may be required to take additional course work.

Common Requirements

Engineering Analysis (6 units): AME 525, AME 526

Engineering electives (3–6 units): Approved 400-, 500- or 600-level courses

Engineering Design

Core courses (9 units): AME 503, AME 505, AME 509

Core electives (6 units): Two courses from AME 404, AME 527, AME 541, ASTE 520, ASTE 523, CE 529, SAE 549

Thermal and Fluid Sciences

Core courses (12 units): Four courses from one of the selected areas:

Combustion: AME 436, AME 513, AME 514, AME 530a

Fluid Dynamics: AME 457, AME 511, AME 530a, AME 535a

Heat Transfer: AME 457, AME 515, AME 516, AME 517

Core electives (6 units): Take two courses from the following list, not duplicating the above selection: AME 436, AME 457, AME 511, AME 513, AME 514, AME 515, AME 516, AME 517, AME 530a, AME 533, AME 535a, AME 535b, AME 537

Mechanics and Materials

Core courses (12 units): AME 509, AME 559, AME 560, AME 584

Core elective (3 units): One of AME 542, AME 588, CE 529a

Microelectromechanical Systems (MEMS)

Core courses (12 units): AME 455, AME 537, BME 551, EE 607

Core elective (3 units): One of AME 535a, ASTE 501a, ASTE 545

Dynamics and Control

Students interested in this area may follow the M.S., Aerospace and Mechanical Engineering (Dynamics and Control) described below.

Master of Science in Mechanical Engineering (Nuclear Power)

The program offers the degree of Master of Science in mechanical engineering with specialization in nuclear power. It is structured so that students who have all the prerequisites can complete the entire program through distance education. It is intended for students with an undergraduate degree in engineering. However, students with a physics and/or chemistry background can be accommodated with the completion of certain prerequisites.

FUNDAMENTAL		UNITS
AME 525	Engineering Analysis	3
AME 526	Engineering Analytical Methods	3
CORE		UNITS
AME 534	Nuclear Thermal-Hydraulics	3
AME 581	Introduction to Nuclear Engineering	3
AME 582	Nuclear Reactor Physics	3
AME 583	Effects of Radiation on Health	3
CE 571	Nuclear Safety and Security: Human Performance and Safety Culture	3
ELECTIVES — CHOOSE 6 UNITS		UNITS
AME 457	Engineering Fluid Dynamics	3
AME 515	Advanced Problems in Heat Conduction	3
AME 516	Convection Processes	3
AME 517	Radiation Heat Transfer	3
AME 530a	Dynamics of Incompressible Fluids	3
AME 530b	Dynamics of Incompressible Fluids	3

AME 533	Multi-Phase Flows	3
AME 535a	Introduction to Computational Fluid Mechanics	3
AME 577	Survey of Energy and Power for a Sustainable Future	3
AME 578	Modern Alternative Energy Conversion Devices	3
CHE 502	Numerical Methods for Diffusive and Convective Transport	3
EE 526	Renewable Energy in Power Systems	3
ENE 516	Hazardous Waste Management	3
Total units:		27

Master of Science in Mechanical Engineering (Energy Conversion)

See Sustainable Infrastructure Systems.

Master of Science in Aerospace and Mechanical Engineering (Dynamics and Control)

The Master of Science with emphasis in dynamics and control educates and trains multidisciplinary professionals in the modeling, analysis, simulation and control of complex time-evolutionary systems. It is a program of study that encompasses advanced analytical dynamics, nonlinear dynamical systems, linear and nonlinear dynamics and vibrations, and linear and nonlinear control. The program equips students to apply their knowledge to a variety of complex systems encountered in nature and society, especially those in civil, mechanical and aerospace engineering and applied mechanics.

Students will be given advisement in the first semester of their study. In addition to AME 525 and AME 526, students are required to take the following core courses: AME 521, AME 522, AME 524, AME 541, AME 552. Elective courses can be chosen in areas of specific interest to the student such as orbital dynamics, spacecraft control, aircraft dynamics and control, chaos and chaotic dynamics, random vibrations, computer control of mechanical systems and robotics. The program provides the graduate student with a broad, well-rounded, advanced education that can be applied to many specific, technologically advanced fields in which dynamics and control play a pivotal role.

Master of Science in Aerospace and Mechanical Engineering (Computational Fluid and Solid Mechanics)

See listing under Aerospace Engineering Degrees.

Master of Science in Mechanical Engineering/Master of Science in Engineering Management

The department of Aerospace and Mechanical Engineering in conjunction with the Daniel J. Epstein Department of Industrial and Systems Engineering offers programs leading to the degree of Master of Science in Mechanical Engineering/Master of Science in Engineering Management. This program is designed for graduate mechanical engineers whose career objectives lead to increasing technical management responsibilities.

In addition to the general requirements of the Viterbi School of Engineering, the dual degree of Master of Science in Mechanical Engineering/Master of Science in Engineering Management is also subject to the following requirements:

1. All applicants must meet the admission requirements of both the Department of Aerospace and Mechanical Engineering and the Department of Industrial and Systems Engineering;
2. A minimum of 48 units is required;
3. A minimum of 18 units must be graduate level course work in AME, approved by an AME graduate student adviser;
4. A minimum of 18 units must be graduate level course work in ISE, approved by the ISE Engineering Management graduate student adviser and chosen from the course list under Master of Science in Engineering Management;
5. A minimum additional 12 units of acceptable course work must be chosen with the consent of the ISE Engineering Management graduate student adviser to form a coherent program.

Engineer in Mechanical Engineering

Requirements for the Engineer in Mechanical Engineering degree are the same as set forth in the general requirements. Six of the units required for the degree must be AME 690. Prior approval must be obtained from the committee before registration in AME 690.

Doctor of Philosophy in Mechanical Engineering

The Doctor of Philosophy in Mechanical Engineering is also offered. See general requirements for graduate degrees.

Viterbi School of Engineering

Aerospace and Mechanical Engineering

Courses of Instruction

AEROSPACE AND MECHANICAL ENGINEERING (AME)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

AME 101L Introduction to Mechanical Engineering and Graphics (3, Fa) Gateway to the bachelor of science degree in mechanical engineering. Introduction to mechanical engineering disciplines and practice; graphical communication and layout of machine parts; introduction to computer-aided drafting and drawing.

AME 105 Introduction to Aerospace Engineering (4, Fa) Gateway to the Aerospace Engineering major. Introduction to flight vehicle performance and propulsion. Elements of the physics of gases. Laboratory: computers and graphics; model rocket and glider test flights.

AME 150L Introduction to Computational Methods (4, Sp) Computer programming; organization of problems for computational solution; introduction to software for computation and graphics; applications to engineering problems. *Corequisite*: MATH 125.

AME 201 Statics (3, FaSp) Analysis of forces acting on particles and rigid bodies in static equilibrium; equivalent systems of forces; friction; centroids and moments of inertia; introduction to energy methods. *Prerequisite*: MATH 125; *recommended preparation*: AME 101, PHYS 151L.

AME 204 Strength of Materials (3, FaSp) Stress, strain and deflection of mechanical elements due to tension, shear, bending, or torsion; combined loads; energy methods, statically indeterminate structures; strength-based design. *Prerequisite*: AME 201 or CE 205.

AME 222 Fundamentals of Audio Engineering (3, Fa) (Enroll in EE 222)

AME 231L Mechanical Behavior of Materials (3, Sp) Material properties of metals, ceramics, and composites; stress-strain relationships; microstructural characteristics; fracture, fatigue, and creep; effects of processing. *Corequisite*: AME 204.

AME 261 Basic Flight Mechanics (4, Sp) Performance of flight vehicles; maximum speed, rate-of-climb, range, and endurance; basic stability and control, weight, and balance; computer exercises. *Recommended preparation*: AME 150L.

AME 291 Undergraduate Design Projects I (1, max 4, FaSp) Analysis, design, fabrication, and evaluation of devices intended for entry in local and national design competitions. Intended for lower division students or those with little prior project experience. Graded CR/NC.

AME 301 Dynamics (3, FaSp) 2-D and 3-D kinematics and dynamics of particles and rigid bodies; systems of particles and rigid bodies; coupled rigid bodies; introduction to vibrations. *Prerequisite:* AME 201 or CE 205; *recommended preparation:* PHYS 151L.

AME 302 Dynamic Systems (3, FaSp) Modeling of lumped parameter elements and systems; free and forced response of first and second order systems; design oriented approach to dynamic systems. *Prerequisite:* MATH 245; *recommended preparation:* AME 309 or CE 309; AME 301 or CE 325.

AME 303 Dynamics of Machinery (3, FaSpSm) Kinematics and dynamics of machines; balancing of rotating and reciprocating machinery; gyroscopic effects; critical speeds; energy variation in machinery; introduction to mechanism design. *Prerequisite:* AME 301 or CE 235.

AME 305 Mechanical Design (3, Fa) Design and analysis of mechanical elements including shafts, bearings, springs, screws, belts and gears; strength, fatigue and deflection considerations in machine design. *Prerequisite:* AME 204 or CE 225.

AME 308 Computer-Aided Analyses for Aero-Mechanical Design (3, FaSpSm) Introduction to the finite element method; practical application of computer analysis tools for structural analysis and design. *Prerequisite:* AME 204; *corequisite:* AME 301.

AME 309 Dynamics of Fluids (4, FaSp) Fluid statics; conservation of mass, momentum, and energy in integral and differential form; applications. Laminar and turbulent pipe flow; compressible flow; potential flow over bodies. *Recommended preparation:* AME 310.

AME 310 Engineering Thermodynamics I (3, FaSp) Fundamental laws of thermodynamics applied to actual and perfect gases and vapors; energy concepts, processes, and applications. *Prerequisite:* MATH 226; *recommended preparation:* PHYS 151L, high-level programming language.

AME 312 Engineering Thermodynamics II (3, Sp) Application of thermodynamic principles to fluid flow, power cycles, and refrigeration. *Prerequisite:* AME 310; *recommended preparation:* high-level programming language.

AME 331 Heat Transfer (3, Sp) General principles underlying heat transfer by conduction, convection, and radiation; steady and transient conditions; heat exchangers. *Prerequisite:* AME 310; *corequisite:* AME 309 or CE 309.

AME 341abL Mechoptronics Laboratory I and II (3-3, FaSp) A coordinated laboratory and lecture sequence on aeromechanical instrumentation and device control stressing the symbiotic integration of mechanical, optical and electronic components. *Prerequisite:* PHYS 152L, MATH 126.

AME 353 Aerospace Structures I (3, Irregular) Shear and bending in symmetrical and unsymmetrical sections; torsion, column, and thin sheet analysis and design, including plastic failures and open section crippling.

AME 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

AME 403 Stress Analysis (3, Sp) Theories of failure, shear center, unsymmetrical bending, curved beams, torsion of non-circular sections; cylinders, rotating discs, thermal stresses, inelastic strains, energy methods. *Prerequisite:* AME 204.

AME 404 Computational Solutions to Engineering Problems (3, Fa) Mathematical aspects of the solutions to typical advanced mechanical engineering problems. Modeling, simulation, computational aspects, computer solutions, and computational tools. *Recommended preparation:* FORTRAN, MATLAB and Maple.

AME 408 Computer-Aided Design of Mechanical Systems (3, FaSp) Design of mechanical systems using advanced graphics techniques; computer-aided drafting, design optimization, elements of computer graphics, solids modeling; introduction to computer-aided manufacturing. *Prerequisite:* AME 204 or CE 225; *recommended preparation:* AME 308.

AME 409 Senior Design Project (4, Sp) Modeling, analysis, integration, layout and performance analysis of a mechanical system to meet specified design requirements. *Prerequisite:* senior standing.

AME 410 Engineering Design Theory and Methodology (3, Fa) Product planning and task clarification, voice of customers, quality function deployment, conceptual and embodiment design, axiomatic theory of design, product quality and manufacturability, design decision-making. Junior standing. *Recommended preparation:* AME 305.

AME 412 Molecular Theory of Gases (3, Irregular) Molecular structure; intermolecular potentials; molecular processes in gases; molecular interpretation of concepts of classical thermodynamics; radiative transport phenomena in gases. *Prerequisite:* AME 310.

AME 415 Turbine Design and Analysis (3, Fa) Physics of turbine operation; design and analysis for the development of turbine hardware for propulsion and power generation. *Recommended preparation:* familiarity with Matlab.

AME 420 Engineering Vibrations I (3, Fa) Theory of free and forced vibrations with and without damping; systems of single and multiple degrees of freedom; iteration; methods; vibration isolation; instrumentation. *Prerequisite:* MATH 245.

AME 423L Loudspeaker and Sound-System Design (3, Sp) (Enroll in EE 423L)

AME 428 Mechanics of Materials (3) (Enroll in CE 428)

AME 430 Thermal Systems Design (3, Fa) Design methodology for thermal systems; boilers, condensers, air conditioning, power generation, air pollution control, combustion and alternative fuels. *Prerequisite:* AME 331; *recommended preparation:* AME 312.

AME 436 Energy and Propulsion (3, Fa) Performance and analysis of reciprocating, jet, rocket engines, and hybrid systems. Characteristics of inlets, compressors, combustors, turbines, nozzles and engine systems. Energy and environmental problems. *Prerequisite:* AME 310; AME 309 or CE 309.

AME 441abL Senior Projects Laboratory (3-3, FaSp) Individual engineering projects designed and constructed to model and test a physical principle or system. *Prerequisite:* AME 341bL.

AME 443 Control Systems Laboratory (3, Sp) Vibration measurement and analysis; simulation, design, and experimental verification of mechanical control systems; identification of system parameters, implementation of controllers, verification of closed-loop performance via experimentation and stimulation. (Duplicates credit in former AME 442bL.) *Prerequisite:* AME 420 or AME 451 or EE 482.

AME 451 Linear Control Systems I (3) Transform methods, block diagrams; transfer functions; stability; root-locus and frequency domain analysis and design; state space and multiloop systems. *Prerequisite:* AME 302 and MATH 245. (Duplicates credit in EE 482.)

AME 453 Engineering Dynamics (3, Sp) Principles of dynamics applied to mechanical and aerospace problems. Introduction to gyroscopic motion and rigid body dynamics. *Prerequisite:* MATH 245.

AME 455 Introduction to MEMS (3, Sp) Introduction to micro-electro-opto-mechanical systems; scaling effects on material properties, fluid flows, dynamical behavior; fabrication methods; design considerations for MEMS sensors and actuators. *Recommended preparation:* AME 301, AME 309 and AME 310.

AME 457 Engineering Fluid Dynamics (3, Fa) Laminar and turbulent boundary layer flow with and without heat transfer; boundary layer separation, stability, transition and control; introduction to compressible fluid flow. *Prerequisite:* AME 310; AME 309 or CE 309.

AME 458 Theory of Structures II (3) (Enroll in CE 458)

AME 459 Flight Mechanics (3, Fa) Applications of basic aerodynamics to aircraft and missile performance, power and thrust, stability and control, compressibility effects. *Recommended preparation:* AME 309.

AME 460 Aerodynamic Theory (3) Basic relations describing the inviscid flow field about bodies and wings moving at subsonic and supersonic speeds. *Prerequisite:* AME 309.

AME 461 Formation Evaluation (3) (Enroll in PTE 461)

AME 462 Economic, Risk and Formation Productivity Analysis (4) (Enroll in PTE 462)

AME 463L Introduction to Transport Processing in Porous Media (3) (Enroll in PTE 463L)

AME 464L Petroleum Reservoir Engineering (3) (Enroll in PTE 464L)

AME 465L Drilling Technology and Subsurface Methods (3) (Enroll in PTE 465L)

AME 481 Aircraft Design (4, Sp) Aircraft design and analysis, design requirements and specifications; integration of structure, propulsion, control system, and aerodynamic configuration; performance analysis and prediction. *Recommended preparation:* AME 309, AME 353.

AME 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

AME 491 Undergraduate Design Projects II (1, max 4, FaSp) Analysis, design, fabrication, and evaluation of devices intended for entry in local and national design competitions. Intended for students with prior project experience. Upper division standing. Graded CR/NC.

AME 499 Special Topics (2-4, max 8, FaSp) Course content to be selected each semester from recent developments in mechanical engineering and related fields.

AME 502 Modern Topics in Aerospace Design (3, Fa) Current topics in Aerospace Engineering are addressed by a number of industry panelists. Students, under panelists' supervision and guidance, complete independent research reports and briefings. *Recommended preparation:* AME 261, AME 441, AME 481 or equivalents. Genuine interest in design of flight vehicles. Open only to senior, master, and doctoral students.

AME 503 Advanced Mechanical Design (3, Fa) Specific problems and methods of analysis in mechanical systems design.

AME 505 Engineering Information Modeling (3, Sp) Symbolic and object-oriented modeling, product and process modeling for design and manufacturing, information models for computer integrated and collaborative engineering, information modeling for life-cycle engineering.

AME 507 Mechanics of Solids I (3) (Enroll in CE 507)

AME 509 Applied Elasticity (3, Sp) Condensed treatment dealing with engineering applications of the principles of elasticity, using the theories of elasticity, elastic stability, and plates and shells. *Prerequisite:* AME 403.

AME 511 Compressible Gas Dynamics (3, Sp) Thermodynamics, kinetic theory, compressible flow equations, shock and expansion waves, similarity, shock-expansion techniques and linearized flow applied to bodies, characteristics, theory of boundary layers.

AME 513 Principles of Combustion (3, Fa) Thermochemistry, equilibrium, chemical kinetics, flame temperature, flame velocity, flame stability, diffusion flames spray combustion, detonation. Equations of motion including reaction, heat transfer, and diffusion.

AME 514 Applications of Combustion and Reacting Flows (3, Sp) Advanced topics and modern developments in combustion and reacting flows including ignition and extinction, pollutant formation, microscale and microgravity combustion, turbulent combustion and hypersonic propulsion. *Recommended preparation:* AME 513.

AME 515 Advanced Problems in Heat Conduction (3, Sp) Review of analytical methods in heat

conduction; moving boundaries melting and freezing; sources and sinks, anisotropic and composite media; numerical methods for steady and unsteady problems. *Recommended preparation:* AME 331, AME 526.

AME 516 Convection Processes (3, Sp) Analysis of isothermal and nonisothermal boundary layers. Exact and approximate solutions of laminar and turbulent flows. Variable-property and high-speed effects; dimensional analysis. *Prerequisite:* AME 457; *recommended preparation:* AME 526, AME 331.

AME 517 Radiation Heat Transfer (3, Fa) Radiation properties; black body radiation; shape factors of radiation network analogy and solar radiation. *Prerequisite:* AME 331; *corequisite:* AME 525 or AME 526.

AME 520 Modeling of Bio-Systems (3, Sp) Interacting population dynamics, Cheyne-Stokes respiration, reaction kinetics, biological switches, neuronal models, BZ reaction, phase locking, reaction diffusion, chemotaxis, biological waves, and animal coat patterns. *Recommended preparation:* MATH 245.

AME 521 Engineering Vibrations II (3, Fa) Multi-degree of freedom systems; modal analysis. Rayleigh's quotient. Continuous systems; modal analysis. Beams, rods, membranes. Colocations, Galerkin, Rayleigh Ritz methods; finite elements. *Prerequisite:* AME 420.

AME 522 Nonlinear Dynamical Systems, Vibrations, and Chaos (3, Fa) Lagrange equations; nonlinear maps and differential equations; fixed points; periodic motion; qualitative/quantitative and local/global analysis; higher order systems; stability; bifurcations; chaos; fractals.

AME 523 Random Vibrations (3, Irregular) Random processes, ergodic theory. Ito calculus. Linear systems under stationary and nonstationary excitations. Fokker-Planck equations. Failure analysis and first passage problems. *Prerequisite:* AME 420, basic probability (or MATH 407), AME 451 recommended.

AME 524 Advanced Engineering Dynamics (3, Fa) Principle of virtual work, constraints, Lagrange's equations, Gibbs-Appell equations, Gauss's Principle, Theory of Rotations, dynamics of rigid bodies, Hamiltonian mechanics, Hamilton-Jacobi equation. *Recommended preparation:* AME 521, AME 525.

AME 525 Engineering Analysis (3, FaSpSm) Typical engineering problems discussed on a physical basis. Vector analysis; functions of complex variables, infinite series, residues.

AME 526 Engineering Analytical Methods (3, FaSpSm) Typical engineering problems discussed on a physical basis. Fourier series; Fourier integrals; Laplace transform; partial differential equations; Bessel function.

AME 527 Elements of Vehicle and Energy Systems Design (3, Irregular) Design synthesis of aero/hydro/mechanical systems; techniques of design; conceptual thinking; problem definition, configurational development, analytic engineering approximation, oral briefings and group problem solving. Graduate standing.

AME 529 Aircraft Structures Analysis (3, Sp) The direct stiffness (finite element) method for analysis of semimonocoque structures; energy methods; elasticity, plates and shells, vibration, and stability; system identification.

AME 530ab Dynamics of Incompressible Fluids (3-3, FaSp) A unified discussion of low-speed fluid mechanics including exact solutions; approximation techniques for low and high Reynolds numbers; inviscid flows; surface waves; dynamic stability; turbulence.

AME 532ab Flight Vehicle Stability and Control (3-3, FaSp) Response of flight to linear, nonlinear, and randomly defined disturbances. Generation and measurement of error signals in navigational systems. Stability and control techniques. *Recommended preparation:* AME 459.

AME 533 Multi-Phase Flows (3, Sp) Physics of the interaction between phases, empirical and analytical methods of solution to relevant technological problems. *Prerequisite:* AME 457.

AME 534 Nuclear Thermal-Hydraulics (3, Fa) Thermal-fluid phenomena for nuclear power stations. Heat generation by nuclear reactions, conduction in fuel rods, and transport of generated heat by convection, boiling, and condensation. Open only to master's and doctoral students. *Prerequisite:* AME 457 or AME 530a; and AME

526 and AME 581; *recommended preparation*: undergraduate degree in engineering.

AME 535ab Introduction to Computational Fluid Mechanics (3-3, FaSp) *a*: Convergence, consistency, stability: finite difference, finite element, and spectral methods; direct and iterative procedures for steady problems; linear diffusion and advection problems; non-linear advection problems. *Recommended preparation*: AME 526. *b*: Generalized curvilinear coordinates; grid generation; numerical techniques for transonic and supersonic inviscid flows; boundary layer flows; reduced Navier-Stokes equations; compressible and incompressible viscous flows. *Recommended preparation*: AME 511 or AME 530a, AME 535a.

AME 537 Microfluidics (3, Fa) Introduction to fluid dynamics in the microscale. Scaling parameters, dynamic, thermodynamic, electroosmotic and electrochemical forces. Flow in microdevices, external flow measurement and control, microvalves and micropumps. Limited to students with graduate standing. *Recommended preparation*: AME 309, MATH 445.

AME 539 Multi-body Dynamics (3, Sp) Kinematics and kinetics of rigid body motion, quaternions; elastic vibrations of continua; geometric and material nonlinearities; Galerkin methods; meshless finite elements; complex dynamical systems; computational methods.

AME 541 Linear Control Systems II (3, Fa) State space representation, linearization, solution of state equations; controllability and observability; state feedback, state observers; optimal control; output feedback. *Prerequisite*: AME 451. (Duplicates credit in EE 585.)

AME 542 Theory of Plates (3) (Enroll in CE 542)

AME 543 Stability of Structures (3) (Enroll in CE 543)

AME 544 Computer Control of Mechanical Systems (3, Sp) Computer control as applied to machine tools, mechanical manipulators, and other mechanical machinery; discrete time controller design; microprocessor implementation of motion and force control servos. *Prerequisite*: AME 451.

AME 545 Modeling and Control of Distributed Dynamic Systems (3, Sp) Modeling and analysis of complex flexible mechanical systems; distributed transfer function synthesis; frequency-domain control methods; smart structure design; applications in vibration and noise control. *Prerequisite*: AME 521 and AME 541.

AME 548 Analytical Methods in Robotics (3, Irregular) Homogeneous transformations; formal description of robot manipulators; kinematic equations and their solution; differential relationships; dynamics; control; static forces; compliance. *Prerequisite*: EE 545; EE 482 or AME 451; knowledge of linear algebra.

AME 549 Systems Architecting (3, FaSm) (Enroll in SAE 549)

AME 550ab Seminar in Aerospace and Mechanical Engineering (1-1, FaSp) Recent developments and research in aerospace and mechanical engineering and related fields. Oral and written reports. Graded CR/NC. Open only to AME graduate students.

AME 551 Mechanical Behavior of Engineering Materials (3) (Enroll in MASC 551)

AME 552 Nonlinear Control Systems (3, Sp) Phase plane, describing functions, applications to mechanical and aerospace systems. Lyapunov direct and indirect methods, applications; Popov circle criteria applications. *Prerequisite*: AME 541.

AME 553abL Digital Control Systems (3-1) (Enroll in EE 543abL)

AME 559 Creep (3, Fa) Behavior of engineering materials at elevated temperatures; thermal stresses; creep mechanisms; interpretation of creep data; methods of predicting long-term strains.

AME 560 Fatigue and Fracture (3, Sp) Behavior of materials under cyclic and static fatigue; plastic instability; life-time predictions; brittle and ductile fracture; crack propagation and plastic blunting.

AME 561 Dislocation Theory and Applications (3) (Enroll in MASC 561)

AME 567 Collaborative Engineering Principles and Practice (3, Sp) (Enroll in ISE 567)

AME 572L Experimental Engineering Projects (3) Experimental methods appropriate to engineering research, emphasizing interdisciplinary investigations. Individual projects.

AME 573 Aerosol Physics and Chemistry (3, Sp) Examination of the fundamentals of aerosol formation and evolution, aerosol effects on health and climate, and the principles of aerosol measurement. Open only to master's and doctoral students.

AME 575 Advanced Engineering Analysis (3, Fa) Solution of engineering problems by methods of calculus variations, integral equations, asymptotic expansions. *Prerequisite:* CE 525ab or AME 525 and AME 526.

AME 576 Advanced Engineering Analytical Methods (3, Sp) Solution of engineering problems by methods of linear and nonlinear partial differential equations of first and second order; perturbations. *Prerequisite:* AME 525 or AME 526 or CE 525 or CE 526.

AME 577 Survey of Energy and Power for a Sustainable Future (3, FaSp) Power production includes conventional fossil fuels, synthetic fuels, hydroelectric, solar, wind, geothermal, biomass and nuclear. The environmental consequences of various energy sources are discussed. (Duplicates credit in CHE 510.)

AME 578 Modern Alternative Energy Conversion Devices (3, FaSp) Alternative energy/power conversion including fuel cells, photovoltaic, batteries, and biologically inspired energy processes; biomass conversion and utilization; Environmental implications of alternative energy processes.

AME 579 Combustion Chemistry and Physics (3, Sp) Thermodynamics of combustion processes. Reaction mechanisms of hydrocarbon combustion. Pollutant formation. Theories and application of thermochemical kinetics and reaction rate theories. Transport in reacting flows.

AME 581 Introduction to Nuclear Engineering (3, Fa) Review of basic nuclear physics, binding energy, reactor kinetics, thermal transport in reactor systems, radioactivity, shielding, reactor safety and health effects of radiation, risk assessment. Open only to graduate students. *Recommended preparation:* Undergraduate degree in engineering; AME 310, MATH 245, PHYS 153L.

AME 582 Nuclear Reactor Physics (3, Sp) Neutron-induced fission chain reactions, reactor criticality. Neutron transport and diffusion in nuclear reactors. Mathematical/computational foundation for diffusion theory and transport calculations for fission reactor design/analysis. Open only to master's and doctoral students. *Prerequisite:* AME 526 and AME 581; *recommended preparation:* undergraduate degree in engineering and PHYS 153L.

AME 583 Effects of Radiation on Health (3, Sp) Nuclear physics relevant to human health. Biological effects of radiation, quantification and measurement of different types of radiation affecting living tissue, radiation protection, nuclear accidents. Open only to master's and doctoral students. *Prerequisite:* AME 526 and AME 581; *recommended preparation:* undergraduate degree in engineering and PHYS 153L.

AME 584 Fracture Mechanics and Mechanisms (3, Fa) Failure modes, stress concentrations, complex stress analysis, linear elastic fracture mechanics, yielding fracture mechanics, experimental methods, environmental assisted fracture and fatigue. *Prerequisite:* AME 403.

AME 588 Materials Selection (3, Sp) Materials selection in relationship to design and fabrication, economic considerations, methodology of selection, performance parameter; case studies.

AME 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

AME 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

AME 599 Special Topics (2-4, max 9, FaSp) Course content will be selected each semester to reflect current

trends and developments in the field of mechanical engineering.

AME 620 Aero and Hydrodynamic Wave Theory (3) Linear and nonlinear wave motion in fluids: group velocity, dispersion, wave action, wave patterns, evolution equations, solitons and solitary waves, resonance phenomena. *Recommended preparation:* AME 526 and CE 309.

AME 621 Stability of Fluids (3) Linear and nonlinear stability analysis applied to free shear layers, boundary layers and jets; Rayleigh-Benard convective instabilities and centrifugal instability of rotating flows. *Recommended preparation:* AME 530b.

AME 623 Dynamics of Stratified and Rotating Flows (3) Fluid motions in which density gradients and/or rotation are important, including internal wave motions with rotation, flow past obstacles, viscous effects, singular perturbations. *Recommended preparation:* AME 530b.

AME 624 The Fluid Dynamics of Natural Phenomena (3) Application of the basic concepts of rotating, stratified fluid motion to problems in meteorology, oceanography, geophysics and astrophysics.

AME 626 Singular Perturbation Methods (3) Asymptotic series, W.K.B. approximation, method of steepest descent, stationary phase; matched asymptotic expansions and method of multiple scales applied to ordinary and partial differential equations. *Recommended preparation:* AME 526.

AME 630 Transition to Chaos in Dynamical Systems (3) Bifurcation theory and universal routes to chaos in deterministic systems; application to maps and differential flows; characterization of strange attractors. *Recommended preparation:* AME 526.

AME 640 Advanced Theory of Elasticity (3) (Enroll in CE 640)

AME 645 Uncertainty Modeling and Stochastic Organization (3) (Enroll in CE 645)

AME 647 Multiscale Methods in Mechanics (3) (Enroll in CE 647)

AME 651 Statistical Theories of Turbulence (3) Stationary stochastic processes. Isotropic turbulence; governing equations for the velocity correlation and spectrum functions. Turbulent diffusion. Scalar fluctuations in a turbulent field. *Recommended preparation:* AME 530b.

AME 652 Turbulent Shear Flows (3) Free shear layers. Turbulent flows in pipes and channels. Turbulent boundary layers. Effects of compressibility. Sound radiation by turbulence. *Recommended preparation:* AME 530b.

AME 690 Directed Research (1-4, max 8) Laboratory study of specific problems by candidates for the degree Engineer in Mechanical Engineering. Graded CR/NC.

AME 694abz Thesis (2-2-0) Required for the degree Engineer in Aerospace Engineering. Credit on acceptance of thesis. Graded IP/CR/NC.

AME 790 Research (1-12) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

AME 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Astronautical Engineering

Degree Requirements

Undergraduate Program Educational Objectives

The Bachelor of Science degree program in Astronautical Engineering has the following objectives:

Within a few years of graduation, graduates will:

- Establish themselves as practicing professionals, or undertake advanced study, in astronautical engineering or a related field;
- Demonstrate their ability to perform successfully as members of a team and function effectively as responsible professionals.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Astronautical Engineering prepares graduates to have knowledge of orbital mechanics, space environment, attitude determination and control, telecommunications, space structures and rocket propulsion. The program also prepares graduates to have design competence that includes integration of astronautical topics.

Bachelor of Science in Astronautical Engineering

The Bachelor of Science in Astronautical Engineering prepares students for engineering careers in the space industry, for research and development in industry and government centers and laboratories, and for graduate study. The program combines a core in the fundamentals of engineering, specialized work in astronautics and space technology, and technical electives to broaden and/or deepen the course work.

The requirement for this degree is 131 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken. See also the common requirements for undergraduate degrees section.

COMPOSITION/WRITING REQUIREMENTS		UNITS
WRIT 130	Analytical Writing	4
WRIT 340	Advanced Writing	4
		8

GENERAL EDUCATION	UNITS
General education* +	24

REQUIRED LOWER DIVISION COURSES		UNITS
AME 150L	Introduction to Computational Methods	4
AME 201	Statics	3
AME 204	Strength of Materials	3
ASTE 101L	Introduction to Astronautics	4
ASTE 280	Foundations of Astronautical Engineering	3
CHEM 105aL	General Chemistry, or	
CHEM 115aL	Advanced General Chemistry, or	
MASC 110L	Materials Science	4
ENGR 102	Freshman Academy	2
MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 226	Calculus III	4
MATH 245	Mathematics of Physics and Engineering I	4
PHYS 151L*	Fundamentals of Physics I: Mechanics and Thermodynamics	4
PHYS 152L	Fundamentals of Physics II: Electricity and Magnetism	4
PHYS 153L	Fundamentals of Physics III: Optics and Modern Physics	4

REQUIRED UPPER DIVISION COURSES		UNITS
AME 301	Dynamics	3
AME 308	Computer-Aided Analysis for Aero-Mechanical Design	3
AME 341abL	Mechoptronics Laboratory I and II	3-3
AME 404	Computational Solutions to Engineering Problems	3
AME 441aL	Senior Projects Laboratory	3
AME 451	Linear Control Systems I	3
ASTE 301ab	Thermal and Statistical Systems	3-3
ASTE 330	Introduction to Spacecraft Systems and the Space Environment	3
ASTE 421x	Space Mission Design	3
ASTE 470	Spacecraft Propulsion	3
ASTE 480	Spacecraft Dynamics	3
Elective	Technical elective**	9

*Satisfies GE Category III requirement.

**Technical electives consist of (1) any upper division course in engineering except CE 404, CE 412 and ISE 440, or (2) an upper division course in chemistry, physics or mathematics and MATH 225. No more than 3 units of 490 course work can be used to satisfy the technical elective requirement.

+The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

Minor in Astronautical Engineering

This program is for USC students who wish to work in the space industry and government space research and development centers and who are pursuing bachelor's degrees in science, mathematics or engineering with specializations other than in astronautical engineering.

The space industry employs a wide variety of engineers (electrical, mechanical, chemical, civil, etc.); scientists (physicists, astronomers, chemists); and mathematicians. These engineers participate in development of advanced space systems but they usually lack the understanding of basic fundamentals of astronautics and space systems. The minor in astronautical engineering will help overcome this deficiency and provide unique opportunities for USC engineering, science and mathematics students, by combining their basic education in their major field with the industry specific minor in astronautical engineering.

Required course work consists of a minimum of 18 units. Including prerequisites, the minor requires 46 units. Three courses, or 9 units, at the 400 level will be counted toward the minor degree. The course work is a balanced program of study providing the basic scientific fundamentals and engineering disciplines critically important for contributing to development of complex space systems.

Prerequisite courses: MATH 125, MATH 126, MATH 226 and MATH 245; PHYS 151L, PHYS 152L and PHYS 153L.

REQUIRED COURSES

		UNITS
ASTE 280	Foundations of Astronautical Engineering	3
ASTE 301a	Thermal and Statistical Systems I	3
ASTE 330	Introduction to Spacecraft Systems and the Space Environment	3
ASTE 421x	Space Mission Design	3
ASTE 470	Spacecraft Propulsion	3
ASTE 480	Spacecraft Dynamics	3
Total minimum units:		18

Master of Science in Astronautical Engineering

This degree is in the highly dynamic and technologically advanced area of astronautics and space technology. The program is designed for those with B.S. degrees in science and engineering who wish to work in the space sector of the defense/aerospace industry, government research and development centers, and laboratories and academia. The program is available through the USC Distance Education Network (DEN).

The general portion of the Graduate Record Examinations (GRE) and two letters of recommendation are required.

Required courses: 27 units

CORE REQUIREMENT (12 UNITS)

		UNITS
ASTE 470	Spacecraft Propulsion	3
ASTE 520	Spacecraft System Design	3
ASTE 535	Space Environments and Spacecraft Interactions	3

ASTE 580	Orbital Mechanics I	3
----------	---------------------	---

CORE ELECTIVE REQUIREMENT (6 UNITS — CHOOSE TWO COURSES)		UNITS
---	--	--------------

ASTE 501ab	Physical Gas Dynamics	3-3
ASTE 523	Design of Low Cost Space Missions	3
ASTE 527	Space Studio Architecting	3
ASTE 529	Safety of Space Systems and Space Missions	3
ASTE 552	Spacecraft Thermal Control	3
ASTE 553	Systems for Remote Sensing from Space	3
ASTE 554	Spacecraft Sensors	3
ASTE 556	Spacecraft Structural Dynamics	3
ASTE 557	Spacecraft Structural Strength and Materials	3
ASTE 570	Liquid Rocket Propulsion	3
ASTE 572	Advanced Spacecraft Propulsion	3
ASTE 581	Orbital Mechanics II	3
ASTE 583	Space Navigation: Principles and Practice	3
ASTE 584	Spacecraft Power Systems	3
ASTE 585	Spacecraft Attitude Control	3
ASTE 586	Spacecraft Attitude Dynamics	3

TECHNICAL ELECTIVE REQUIREMENT (6 UNITS)

Two 3-unit courses. Students are advised to select these two elective courses from the list of core electives or from other courses in astronautical engineering or from other science and engineering graduate courses, as approved by the faculty adviser. No more than 3 units of directed research (ASTE 590) can be applied to the 27-unit requirement. New courses on emerging space technologies are often offered; consult the current semester's course offerings, particularly for ASTE 599 Special Topics.

ENGINEERING MATHEMATICS REQUIREMENT (CHOOSE ONE COURSE: 3 UNITS)		UNITS
---	--	--------------

AME 525	Engineering Analysis	3
AME 526	Engineering Analytical Methods	3
CE 529a	Finite Element Analysis	3
EE 517	Statistics for Engineers	3
PHYS 510	Methods of Theoretical Physics	3

At least 21 units must be at the 500 or 600 level.

Areas of Concentration:

Students choose core elective and technical elective courses that best meet their educational objectives. Students can also concentrate their studies in the desired areas by selecting corresponding core elective courses. Presently, ASTE faculty suggest the following areas of concentration:

SPACECRAFT PROPULSION	UNITS
------------------------------	--------------

Choose two core electives from:		
ASTE 501ab	Physical Gas Dynamics	3-3
ASTE 570	Liquid Rocket Propulsion	3
ASTE 572	Advanced Spacecraft Propulsion	3
ASTE 584	Spacecraft Power Systems	3

SPACECRAFT DYNAMICS		UNITS
Choose two core electives from:		
ASTE 556	Spacecraft Structural Dynamics	3
ASTE 557	Spacecraft Structural Strength and Materials	3
ASTE 581	Orbital Mechanics II	3
ASTE 583	Space Navigation: Principles and Practice	3
ASTE 585	Spacecraft Attitude Control	3
ASTE 586	Spacecraft Attitude Dynamics	3

SPACE SYSTEMS DESIGN		UNITS
Choose two core electives from:		
ASTE 523	Design of Low Cost Space Missions	3
ASTE 527	Space Studio Architecting	3
ASTE 529	Safety of Space Systems and Space Missions	3
ASTE 557	Spacecraft Structural Strength and Materials	3

SPACECRAFT SYSTEMS		UNITS
Choose two core electives from:		
ASTE 552	Spacecraft Thermal Control	3
ASTE 553	Systems for Remote Sensing from Space	3
ASTE 554	Spacecraft Sensors	3
ASTE 584	Spacecraft Power Systems	3

SPACE APPLICATIONS		UNITS
ASTE 527	Space Studio Architecting	3
ASTE 553	Systems for Remote Sensing from Space	3
ASTE 554	Spacecraft Sensors	3

Engineer in Astronautical Engineering

Requirements for the Engineer degree in Astronautical Engineering are the same as set forth in the general requirements. See the general requirements for Viterbi graduate degrees.

Doctor of Philosophy in Astronautical Engineering

The Ph.D. in Astronautical Engineering is awarded in strict conformity with the general requirements of the USC Graduate School. See general requirements for graduate degrees. The degree requires a concentrated program of study, research and a dissertation. Each student wishing to undertake a doctoral program must first be admitted to the program and then take the screening examination. This examination will emphasize comprehension of fundamental material in the graduate course work. Further guidance concerning admission, the screening exam and the full completion of courses, including those given outside the Department of Astronautical Engineering, can be obtained from the ASTE student adviser and program coordinators.

Certificate in Astronautical Engineering

The Certificate in Astronautical Engineering is designed for practicing engineers and scientists who enter space-related fields and/or want to obtain training in specific space-related areas. Students enroll at USC as limited status students; they must apply and be admitted to the certificate program after completion of no more than 9 units of required course work. The required course work consists of 12 units; students will choose four 3-unit courses from the following:

REQUIRED COURSES (CHOOSE FOUR)		UNITS
ASTE 501ab	Physical Gas Dynamics	

		3-3
ASTE 520	Spacecraft System Design	3
ASTE 523	Design of Low Cost Space Missions	3
ASTE 527	Space Studio Architecting	3
ASTE 529	Safety of Space Systems and Space Missions	3
ASTE 535	Space Environments and Spacecraft Interactions	3
ASTE 552	Spacecraft Thermal Control	3
ASTE 553	Systems for Remote Sensing from Space	3
ASTE 554	Spacecraft Sensors	3
ASTE 556	Spacecraft Structural Dynamics	3
ASTE 557	Spacecraft Structural Strength and Materials	3
ASTE 570	Liquid Rocket Propulsion	3
ASTE 572	Advanced Spacecraft Propulsion	3
ASTE 580	Orbital Mechanics I	3
ASTE 581	Orbital Mechanics II	3
ASTE 583	Space Navigation: Principles and Practice	3
ASTE 584	Spacecraft Power Systems	3
ASTE 585	Spacecraft Attitude Control	3
ASTE 586	Spacecraft Attitude Dynamics	3
ASTE 599	Special Topics	3

Most classes are available through the USC Distance Education Network (DEN).

Credit for classes may be applied toward the M.S., Engineer or Ph.D. in Astronautical Engineering, should the student decide later to pursue an advanced degree. In order to be admitted to the M.S. program, the student should maintain a B average or higher in courses for the certificate and must satisfy all normal admission requirements. All courses for the certificate must be taken at USC. It is anticipated that other classes on emerging space technologies will be added to the list of the offered classes in the future.

Viterbi School of Engineering

Astronautical Engineering

Courses of Instruction

ASTRONAUTICS AND SPACE TECHNOLOGY (ASTE)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

ASTE 101L Introduction to Astronautics (4, Fa) Gateway to the Astronautical Engineering major. Introduction to space, space exploration and the space business. Elements of orbits, spacecraft systems, rocket propulsion, and communications. Laboratory: introduction to graphics, computation and simulation.

ASTE 280 Foundations of Astronautical Engineering (3, Sp) Coordinate systems and transformations. Spherical trigonometry. Orientation angles. Spacecraft orbits and orbital maneuvers. Introduction to rocket propulsion, spacecraft attitude dynamics and control, and space environment. *Prerequisite:* MATH 226 and PHYS 152L. *Recommended preparation:* Skill in MATLAB programming.

ASTE 291 Team Projects I (1, max 4, FaSp) Participation in ASTE undergraduate student team projects. Intended for lower-division students or those with little prior project experience.

ASTE 301ab Thermal and Statistical Systems (3-3, FaSp) Thermodynamics and statistical mechanics; kinetics of atoms, molecules, and photons; compressible fluid dynamics. (Duplicates credit in former AME 311ab.) *Prerequisite:* MATH 245, PHYS 153L.

ASTE 330 Introduction to Spacecraft Systems and the Space Environment (3, Fa) Spacecraft systems: attitude determination and control, power, thermal, command and data handling, telecommunication, structures and mechanisms, propulsion. Space environment: atmosphere, gravity gradients, radiation. *Prerequisite:* ASTE 280 and PHYS 153.

ASTE 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

ASTE 421x Space Mission Design (3, Sp) Space systems engineering process: requirements definition; trade studies; system integration; technical reviews; cost and schedule development; case studies; ethics. Capstone design experience. Open only to seniors. Not for graduate credit. *Prerequisite:* ASTE 330.

ASTE 445 Molecular Gas Dynamics (3) Physical description of kinetic nature of gas flows; distribution function; introduction to the Boltzmann equation; free-molecule flow; surface and molecular reflection properties; Monte Carlo flow calculations. (Duplicates credit in former AME 485.) *Recommended preparation:* AME 309 or ASTE 301b.

ASTE 470 Spacecraft Propulsion (3) Introduction to rocket engineering. Space missions and thrust requirements. Compressible gas dynamics. Propellant chemistry and thermodynamics. Liquid- and solid-fueled rockets. Nuclear and electric propulsion. *Prerequisite:* senior or graduate standing.

ASTE 480 Spacecraft Dynamics (3) Two-body motion, rigid-body motion, attitude dynamics and maneuvers, spacecraft stabilization: gravity gradient, reaction wheels, magnetic torques, thruster attitude control. *Prerequisite:* senior standing.

ASTE 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit.

ASTE 491 Team Projects II (1, max 4, FaSp) Participation in ASTE undergraduate student team projects. Intended for students with prior project experience.

ASTE 499 Special Topics (2-4, max 8) Course content to be selected each semester from current developments in astronautics, space technology, and related fields.

ASTE 501ab Physical Gas Dynamics (3-3, FaSp) *a:* Molecular structure; radiative processes; microscopic description of gas phenomena; translational, rotational, vibrational, and electronic freedom degrees; particle energy distributions; microscopic representation of thermodynamic functions. *Prerequisite:* graduate standing or departmental approval. *b:* Kinetic concepts in gas physics; thermal non-equilibrium; intermolecular potentials; transport of radiation and particles in high-temperature gas; dissociation and ionization equilibrium; energy relaxation. *Prerequisite:* ASTE 501a.

ASTE 505ab Plasma Dynamics (3-3, FaSp) Charged particle dynamics. Kinetic fluid theories. Rarefied and collisional plasma flows. Plasma-surface interactions. Waves, instabilities, turbulence. Applications in engineering and space technology. Recommended preparation: Graduate standing in engineering or physics. (Duplicates credit in EE 572ab).

ASTE 520 Spacecraft System Design (3) System components; vehicle structure, propulsion systems, flight dynamics, thermal control, power systems, telecommunication. Interfaces and tradeoffs between these components. Testing, system reliability, and integration.

ASTE 523 Design of Low Cost Space Missions (3, Sp) Reviews all aspects of space mission design for practical approaches to reducing cost. Examines "LightSat" mission experience and potential applicability to

large-scale missions. Graduate standing in engineering or science. *Recommended preparation:* ASTE 520 or some experience in space engineering.

ASTE 527 Space Studio Architecting (3, Sp) Programmatic/conceptual design synthesis/choice creation methods for complex space missions. Aerospace system engineering/architecture tools to create innovative projects. Evaluated by faculty/industry/NASA experts. Graduate standing in engineering or science. *Recommended preparation:* ASTE 520 or experience in space industry.

ASTE 529 Safety of Space Systems and Space Missions (3) Engineering methodology and analysis techniques for safety certification and mission assurance of robotic and human space systems and space missions by government and commercial industry. *Recommended preparation:* ASTE 520 or some experience in space engineering. Open only to Engineering graduate students.

ASTE 535 Space Environments and Spacecraft Interactions (3) Space environments and interactions with space systems. Vacuum, neutral and ionized species, plasma, radiation, micrometeoroids. Phenomena important for spacecraft operations.

ASTE 545 Computational Techniques in Rarefied Gas Dynamics (3, Irregular) Particle-based computational simulation methods for rarefied, high-speed flows. Molecular collision kinetics. Monte Carlo direct simulation and related techniques. *Recommended preparation:* ASTE 501a and skill in FORTRAN programming.

ASTE 546 Computational Plasma Dynamics (3, Sp) Plasma simulation techniques; particle-in-cell (PIC); PIC with Monte Carlo; computational electromagnetics; computational magnetohydrodynamics. Parallelization. Applications in engineering and space plasma physics. *Prerequisite:* ASTE 505a.

ASTE 552 Spacecraft Thermal Control (3, Sp) Spacecraft and orbit thermal environments; design, analysis, testing of spacecraft thermal control system and components; active and passive thermal control, spacecraft and launch vehicle interfaces. Graduate standing in engineering or science.

ASTE 553 Systems for Remote Sensing from Space (3) The operation, accuracy, resolution, figures of merit, and application of instruments which either produce images of ground scenes or probe the atmosphere as viewed primarily from space. Graduate standing in engineering or physics.

ASTE 554 Spacecraft Sensors (3, Fa) Spacecraft sensors from concept and design to building, testing, interfacing, integrating, and operations. Optical and infrared sensors, radiometers, radars, phased arrays, signal processing, noise reduction. Graduate standing in engineering or science. *Recommended preparation:* ASTE 520.

ASTE 556 Spacecraft Structural Dynamics (3) Applied analytical methods (vibrations of single and multi-degree of freedom systems, finite element modeling, spacecraft applications); requirements definition process; analytical cycles; and design verification. Graduate standing in engineering or science.

ASTE 557 Spacecraft Structural Strength and Materials (3) Spacecraft structural strength analysis and design concepts overview; spacecraft material selection; analysis of composite materials; finite element method; spacecraft configuration; structural testing; bolted joint design. Open only to master's, professional, and doctoral students.

ASTE 570 Liquid Rocket Propulsion (3, Sp) Liquid-propelled rocket propulsion systems. Capillary devices for gas-free liquid acquisition in zero gravity. Ground and in-orbit operations. Propellant life predictions and spacecraft end-of-life de-orbiting strategies. *Prerequisite:* ASTE 470.

ASTE 572 Advanced Spacecraft Propulsion (3, Sp) Nuclear, electric, sails, and far-term propulsion systems. Overviews of nozzles, heat transfer, electromagnetics, rarefied gases, and plasma physics. Analysis of electrothermal, electrostatic and electromagnetic thrusters. Graduate standing in engineering or science. *Recommended preparation:* ASTE 470.

ASTE 580 Orbital Mechanics I (3) Physical principles; two-body and central force motion; trajectory

correction maneuvers; position and velocity in conic orbits; Lambert's problem; celestial mechanics; orbital perturbations.

ASTE 581 Orbital Mechanics II (3, Fa) Theory of perturbations of orbits; numerical methods in orbital mechanics; satellite dynamics; averaging methods; resonance; mission analysis. *Prerequisite:* ASTE 580.

ASTE 583 Space Navigation: Principles and Practice (3, Sp) Statistical orbit determination: (weighted) least squares, batch and sequential (Kalman) processing, illustrative examples; online ephemeris generation: potentially hazardous asteroids, comets, satellites; launch: vehicles, payloads, staging. Graduate standing in engineering or science. *Recommended preparation:* ASTE 580.

ASTE 584 Spacecraft Power Systems (3, Sp) Introduction to solar arrays, batteries, nuclear power sources, mechanical energy storage. Application theory of operation, practical considerations. Subsystem topologies and performance. Design optimization techniques. Graduate standing in engineering or science.

ASTE 585 Spacecraft Attitude Control (3, SpSm) Review of attitude dynamics, gravity gradient stabilization, attitude stabilization with a spin, attitude maneuvers, control using momentum exchange devices, momentum-biased stabilization, reaction thruster control. *Prerequisite:* AME 451 or EE 482; *recommended preparation:* a course in dynamics.

ASTE 586 Spacecraft Attitude Dynamics (3) Dynamics of systems of particles and rigid bodies; spacecraft attitude systems; attitude maneuvers (spin, precession, nutation, etc.); attitude stabilization and attitude determination; simulation methods.

ASTE 590 Directed Research (1-12, FaSpSm) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the division. Graded CR/NC.

ASTE 594abz Master's Thesis (2-2-0, FaSpSm) Credit on acceptance of thesis. Graded IP/CR/NC.

ASTE 599 Special Topics (2-4, max 9) Course content to be selected each semester from current developments in astronautics, space technology, and related fields.

ASTE 683 Advanced Spacecraft Navigation (3) Advanced topics in spacecraft navigation: rendezvous, frozen/sun synchronous orbits, stationkeeping. Nonlinear filtering for orbit and attitude determination. Optical navigation. Mission applications. *Prerequisite:* ASTE 580 and ASTE 583; *recommended preparation:* skill in MATLAB programming.

ASTE 690 Directed Research (1-4, max 8, FaSpSm) Laboratory studies of specific problems by candidates for the degree Engineer in Astronautical Engineering. Graded CR/NC.

ASTE 694abz Thesis (2-2-0, FaSpSm) Required for the degree Engineer in Astronautical Engineering. Credit on acceptance of thesis. Graded IP/CR/NC.

ASTE 790 Research (1-12, FaSpSm) Research leading to the doctorate. Maximum units which may be applied to the degree to be determined by the division. Graded CR/NC.

ASTE 794abcdz Doctoral Dissertation (2-2-2-2-0, FaSpSm) Credit on acceptance of dissertation. Graded IP/CR/NC.

Assistant Professors of Research: Tracy C. Grikscheit, M.D. (Surgery and Children's Hospital); Bo Han, Ph.D. (Surgery); Natasha Leporé, Ph.D. (Radiology and Children's Hospital); Rex A. Moats, Ph.D. (Pathology, Radiology)

Adjunct Professors: Sophia Chun, M.D. (VA Long Beach Healthcare System); Norberto Grzywacz, Ph.D. (Georgetown University)

Adjunct Research Professor: Daniel Farkas, Ph.D. (Spectral Molecular Imaging/The Brain Window)

Adjunct Assistant Professors: Alireza Dibazar, Ph.D. (General Electric, Global Research); Arkadiusz Gertych, Ph.D. (Cedars-Sinai Medical Center); Leonid Litvak, Ph.D. (Advanced Bionics Corp.); Philip Requejo, Ph.D. (Rancho Los Amigos Medical Center and Kinesiology)

Emeritus Professors: George A. Bekey, Ph.D. (Electrical Engineering, Computer Science and Speech Science); H. K. Huang, D.Sc. (Radiology)

**Recipient of university-wide or school teaching award.*

Viterbi School of Engineering

Biomedical Engineering

Degree Requirements

Undergraduate Program Educational Objectives

Graduates of the undergraduate program in Biomedical Engineering are expected to attain the following objectives within a few years after graduation:

- engage in a professional career in the biomedical or other related industries, or enroll in advanced graduate studies including medical school;
- work in a technically competent manner to address challenges in engineering or their chosen professions, taking into consideration ethical and societal concerns;
- work in multidisciplinary teams and communicate effectively with other engineers and professionals;
- continue to develop their technical knowledge and professional skills, as evidenced by participation or leadership in relevant professional societies; continuing education; or attendance at relevant workshops, meetings or seminars.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Biomedical Engineering provides both breadth and depth across the range of engineering topics implied by the title. The program prepares graduates to have an understanding of biology and physiology; and the capability to apply advanced mathematics (including differential equations and statistics), science and engineering to solve the problems at the interface of engineering and biology. The curriculum prepares graduates with the ability to make measurements on and interpret data from living systems, addressing the problems associated with the interaction between living and non-living materials and systems.

Bachelor of Science in Biomedical Engineering

The Department of Biomedical Engineering offers a Bachelor of Science degree in Biomedical Engineering.

Additionally, there are three possible areas of emphasis within this biomedical engineering program major. These are biochemical engineering, electrical engineering, and mechanical engineering. An area of emphasis appears in parenthesis after the primary major name on the transcript. The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken.

See common requirements for undergraduate degrees.

Technical electives are to be selected from an approved list available in the department office.

Minor in Craniofacial and Dental Technology

For a complete listing, see the Herman Ostrow School of Dentistry of USC.

Master of Science in Biomedical Engineering

The Master of Science in Biomedical Engineering is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. At least 28 approved units must be satisfactorily completed, of which at least 19 units must be at the 500 level or above. Four of these units may be thesis BME 594abz.

The master's degree program provides students with a broad background, linking physiology with engineering science, necessary for entering interdisciplinary careers in medical technology or pursuing further graduate

studies in a related field.

REQUIRED COURSES		UNITS
BME 501	Advanced Topics in Biomedical Systems	4
BME 502	Advanced Studies of the Nervous System	4
BME 511	Physiological Control Systems	3
BME 513*	Signal and Systems Analysis	3
BME 533	Seminar in Bioengineering	1
BME 594abz	Master's Thesis (2-2-0), or Technical Elective (4)	4
Electives	Technical	9
		28

*Students who have taken an advanced undergraduate or master's level course in system and signal analysis may substitute BME 523 for BME 513 with departmental approval.

Master of Science in Biomedical Engineering (Medical Imaging and Imaging Informatics)

Completion of the Master of Science in Biomedical Engineering (Medical Imaging and Imaging Informatics) requires that at least 28 approved units must be satisfactorily completed of which at least 19 units must be at the 500 level or above.

REQUIRED COURSES		UNITS
BME 501	Advanced Topics in Biomedical Systems	4
BME 513	Signal and Systems Analysis	3
BME 525	Advanced Biomedical Imaging	3
BME 527	Integration of Medical Imaging Systems	3

Master of Science in Medical Device and Diagnostic Engineering

This program is designed to provide the knowledge and skills needed for the development of medical devices and diagnostic techniques, including aspects of medical product regulation and product development. The course of study requires successful completion of 28 units of course work and has been designed to be completed in three semesters of full-time study. Students in the program will complete a 19-unit core as well as selecting a 6-unit specialization (or "track") and one elective from a list provided by the department.

REQUIRED COURSES		UNITS
BME 501	Advanced Topics in Biomedical Systems, or	
BME 502	Advanced Studies of the Nervous System	4
BME 513	Signal and Systems Analysis	3
BME 650	Biomedical Measurement and Instrumentation	3
MPTX 511	Introduction to Medical Product Regulation, or	
BME 416	Development and Regulation of Medical Products	3
MPTX 515	Quality Systems and Standards, or	
ISE 527	Quality Management for Engineers	3
ISE 545	Technology Development and Implementation	3
Technical elective		3

Complete 6 units from one track from the following lists:		6
<i>Regulation Track</i>		
MPTX 513	Regulation of Medical Devices and Diagnostics	3
RSCI 527	Medical Product Safety	3
<i>Medical Technology and Device Science Track</i>		
BME 535	Ultrasonic Imaging	3
BME 551	Introduction to Bio-MEMS and Nanotechnology	3
BME 552	Neural Implant Engineering	3
BME 620L	Applied Electrophysiology	4
<i>Product Development Track</i>		
ISE 515	Engineering Project Management	3
ISE 555	Invention and Technology Development	3
		28

Technical Elective (one course)

Applicable courses include: AME 503, BME 511, BME 535, BME 551, ISE 507, ISE 508, ISE 544, MPTX 517 and courses listed in alternate tracks to that chosen. Other courses may be applicable; please see an adviser for approval.

Doctor of Philosophy in Biomedical Engineering

The objective of the Doctor of Philosophy is to produce independent investigators who can make original scholarly contributions and apply advanced engineering concepts and techniques to the understanding and solution of biomedical problems. This program is intended to prepare the student for a career in academic research and teaching, or as an independent investigator in industrial or government laboratories.

The requirements listed are special to this department and must be read in conjunction with the general requirements of the Graduate School.

This program is designed to be normally completed in four years of full-time work beyond the Bachelor of Science degree (including summers). The first two years are devoted primarily to formal course work and the last two to research. In view of the flexible program, each student is assigned an adviser who will guide him or her in the selection of courses. By the end of the third semester of graduate study the student must have completed the Ph.D. screening examination. Subsequently, he or she is required to make a tentative major field selection (e.g., biomedical imaging, signal processing, neural engineering) and pass a qualifying examination. In accordance with the requirements of the Graduate School, at least 60 units of credit beyond the Bachelor of Science degree are required, with a minimum grade point average of 3.0. Students are required to take BME 533, the graduate biomedical engineering seminar course, for three semesters during their studies.

Requirements for Admission

Bachelor of Science degree in engineering or a natural science, and satisfactory scores on the Graduate Record Examinations. Undergraduate work should include a basic course in biology, physics, organic chemistry, biochemistry, differential equations and digital computation. Students lacking any of these will be required to make up the deficiency during the first two years of graduate work.

Students who have completed all requirements for the Master of Science degree offered in this department may apply for admission to the Ph.D. program. In this case, all courses taken in the M.S. program may be applied toward the requirements of the doctoral degree.

Screening Examination Process

By the end of the third semester of graduate study, all students must have completed the screening examination process to determine whether or not they will be allowed to continue in the Doctor of Philosophy program. Those

who fail will be dropped from the program, although they may be permitted to complete the additional requirements necessary to obtain the Master of Science degree.

Qualifying Exam Committee

During the third semester, the student must make a tentative major field selection as described above and form a qualifying exam committee. The latter administers the qualifying examination.

Qualifying Examination

The qualifying examination will normally be taken during the fourth semester of full-time academic study. The examination requires the preparation of a comprehensive written research proposal that presents a research question, critically reviews the pertinent literature and outlines the proposed experimental, analytical and computational procedures required to answer the question. The proposal must be defended in an oral examination.

Graduate Certificate in Health, Technology and Engineering (HTE@USC)

Academic Director: Terry Sanger, M.D., Ph.D., *Provost Associate Professor of Biomedical Engineering, Neurology, Biokinesiology, and Physical Therapy*

Administrative Director: George Tolomiczenko, Ph.D., *Assistant Professor, Neurology*

This program offers current second-year USC Ph.D. engineering students and first-year M.D. students an opportunity to learn about and gain experience in medical device and process innovation. Through project-based and interdisciplinary collaboration, students will augment their current programs with a set of courses and lab experiences linking medical and engineering research groups. By applying design-informed approaches toward problem identification and solution prototyping, students will be involved in all the steps of medical device or process innovation from conception to commercialization. The program aims to create interdisciplinary, boundary-spanning, inventive entrepreneurs seeking early practical experience with device and method innovation in health care. Program participants will form bonds with a group of like-minded medical students and engineers who will be their mentors, colleagues and contacts as they advance in their careers.

The courses unique to the program include a seminar sequence (Topics in Health, Technology and Engineering), which must be taken during the first two years of involvement with the HTE@USC program, a case studies sequence taken during the second year and a research course to earn project-related credits:

COURSES		UNITS
BME 566abcd	Topics in Health, Technology and Engineering:	2-2-2-2
BME 567ab	Case Studies in Health, Technology and Engineering	1-1
790	Research (in the student's major department)	2-8

Other required courses that are part of the M.D. curriculum (Ph.D. students enroll in INTD course versions of the same courses open only to HTE students on CR/NC basis):

INTD 621ab	Introduction to Clinical Medicine (ICM) for HTE	3-3
INTD 622L	Pre-clinical System Block for Health, Technology and Engineering	3-5

Candidates interested in applying should contact HTE@USC via email at [✉ hte@usc.edu](mailto:hte@usc.edu).

Viterbi School of Engineering

Biomedical Engineering

Courses of Instruction

BIOMEDICAL ENGINEERING (BME)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

BME 101 Introduction to Biomedical Engineering (3, Fa) Historical development and survey of major areas comprising biomedical engineering: theoretical neurobiology and systems physiology, biomedical instrumentation, artificial organ and prosthetic devices, biomedical computer applications.

BME 201 Biomedical Engineering Practice (2, Fa) Examination of the technical and practical challenges involved in the development of medical devices, including neural implants, in industry and the clinical setting. *Recommended preparation:* BME 101.

BME 210 Biomedical Computer Simulation Methods (3, Sp) Computational methods for simulation of circulatory, respiratory, pharmacokinetic, and neural models. Quadrature, differential equations, systems of linear equations, simulation languages, experimental statistics. *Prerequisite:* EE 150L; *corequisite:* MATH 245.

BME 302L Medical Electronics (4, Sp) Electronic design and measurements for medical applications. Use of integrated circuits, biopotential measurements, static and dynamic calibration of physiological transducers. *Prerequisite:* EE 202L.

BME 350 Biomedical Engineering Industrial Project (3, Sp) Training in specific skills relevant to biomedical industry. Placement in summer internship following successful completion of the course. Junior standing. *Prerequisite:* BME 210.

BME 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

BME 402 Control and Communication in the Nervous System (3, Sp) An introduction to the structural and functional elements common to nervous systems, with emphasis on cellular dynamics, interneuronal communication, sensory and effector systems. *Prerequisite:* BISC 220L, BME 210, MATH 245.

BME 403 Physiological Systems (3, Fa) A thorough bioengineering treatment of the physiological properties of various mammalian organ systems: e.g., cardiovascular, respiratory, renal, and musculoskeletal. *Prerequisite:* BISC 220L, MATH 245; *corequisite:* EE 202L.

BME 404 Biomechanics (3, Fa) Mechanical properties of biological tissues and fluid transport in physiological systems: blood rheology; bioviscoelastic solids and fluids; gas flow and mixing; prosthesis design. *Prerequisite:* PHYS 151L; MATH 245; AME 201.

BME 405L Senior Projects: Measurements and Instrumentation (4, FaSp) Application of instrumentation and measurement techniques to biomedical engineering projects involving measurement, replacement or augmentation of biomedical systems. *Prerequisite:* BME 210, EE 202L.

BME 410 Introduction to Biomaterials and Tissue Engineering (3, Fa) Application of principles of physical chemistry, biochemistry, and materials engineering to biomedical problems, e.g., materials selection and design for implants and tissue replacement. *Prerequisite:* CHEM 322aL.

BME 412 Craniofacial and Dental Technology (4) (Enroll in DENT 412)

BME 414 Rehabilitation Engineering (3, Sp) An introduction to rehabilitation technology: limb and spinal orthoses; limb prostheses; functional electrical stimulation; sensory aids. *Recommended preparation:* AME 201.

BME 416 Development and Regulation of Medical Products (3, Sp) An introduction to the process of medical product development with emphasis on the regulations that govern the design, fabrication, and maintenance of medical products. Junior standing.

BME 423 Statistical Methods in Biomedical Engineering (3, Fa) Applications of parametric and non-parametric tests, analysis of variance, linear regression, time-series analysis, and autoregressive modeling, with

biomedical applications to statistical analysis of biomedical data. *Prerequisite:* BME 210.

BME 425 Basics of Biomedical Imaging (3, Fa) Engineering, clinical applications and modern physics concepts underlying X-ray imaging, Computed Tomography (CT), nuclear medicine, positron emission tomography, Magnetic Resonance Imaging (MRI), ultrasound imaging. *Prerequisite:* PHYS 152L.

BME 451 Fundamentals of Biomedical Microdevices (3, Fa) Introduction to biomedical microdevices with emphasis on microtechnologies and biomedical microelectromechanical systems (bioMEMS). Principles for measurement of small-scale biological phenomena and clinical applications. *Prerequisite:* EE 202L; *recommended preparation:* basic biology and electronics.

BME 452 Introduction to Biomimetic Neural Engineering (3, Fa) Engineering principles, biology, technological challenges and state-of-the-art developments in the design of implantable biomimetic microelectronic devices that interface with the nervous system. *Prerequisite:* EE 202; *recommended preparation:* basic biology and electronics.

BME 453 Engineering Biomedical Innovations (3, Sp) Engineering principles in design, modeling, and analysis of biomedical innovations will be presented to develop creative solutions for real-world medical problems or treatment implementation. *Corequisite:* BME 405L; *recommended preparation:* BME 416.

BME 489 Biochemical Engineering (3, Sp) (Enroll in CHE 489)

BME 490x Directed Research (1-8, max 12) Individual research and readings. Not available for graduate credit.

BME 499 Special Topics (2-4, max 8) Current trends and developments in the field of biomedical engineering.

BME 501 Advanced Topics in Biomedical Systems (4, FaSp) Advanced topics in selected biomedical systems: cardiopulmonary, neuromuscular, renal and endocrine.

BME 502 Advanced Studies of the Nervous System (4, Fa) Advanced topics on the structure and function of the nervous system examined from the viewpoint of computational systems science.

BME 504 Neuromuscular Systems (3, Fa) Introduces the fundamentals of mathematical, Newtonian, and robotic analysis applicable to multi-muscle biomechanical systems. Combines physiology with numerical simulations to understand and predict motor function. *Recommended Preparation:* Matlab programming, fundamentals of mechanics, linear algebra.

BME 505abL Laboratory Projects in Biomedical Engineering (4, FaSpSm) Integration of biomedical science, engineering principles and state-of-the-art technology for the study of selected physiological systems in the laboratory setting. Laboratory. Graded CR/NC.

BME 511 Physiological Control Systems (3, Fa) Application of control theory to physiological systems; static analysis of closed-loop systems; time-domain analysis of linear control identification methods; nonlinear control. *Recommended preparation:* BME 513.

BME 513 Signal and Systems Analysis (3, Fa) Classification; representation; statistical analysis; orthogonal expansions; least-squares estimation; harmonic analysis; Fourier, Laplace, and Z transforms; the linear system; filtering; modeling and simulation; linear control theory.

BME 520 Modeling of Bio-Systems (3, Sp) (Enroll in AME 520)

BME 523 Measurement and Processing of Biological Signals (3, Sp) Acquisition, analysis, and display of biological data using digital computers; laboratory applications of digital signal processing and real time analysis. *Prerequisite:* BME 513.

BME 525 Advanced Biomedical Imaging (3, Sp) Advanced scientific and engineering principles of biomedical imaging including magnetic resonance, X-ray computed tomography, ultrasound, and single photon

and positron emission tomography. Open only to master's and doctoral students. *Prerequisite:* BME 513 or EE 483.

BME 527 Integration of Medical Imaging Systems (3, Fa) Medical imaging quality, compression, data standards, workflow analysis and protocols, broadband networks, image security, fault tolerance, picture archive communication system (PACS), image database and backup.

BME 528 Medical Imaging Informatics (3, Sp) Picture archive communication system (PACS) design and implementation; clinical PACS-based imaging informatics; telemedicine/teleradiology; image content indexing, image data mining; grid computing in large-scale imaging informatics; image-assisted diagnosis, surgery and therapy. *Prerequisite:* BME 425 or BME 525, BME 527.

BME 533 Seminar in Bioengineering (1, max 3, FaSp) Graded CR/NC.

BME 535 Ultrasonic Imaging (3, Sp) All aspects of ultrasonic imaging including ultrasound and tissue interaction, ultrasonic transducers, instrumentation, imaging methods, clinical applications, bioeffects, safety, and recent developments in the field.

BME 536 Ultrasonic Transducers (3, Fa) Background and foundation covering the design, fabrication and testing of ultrasonic transducers and arrays. Design approaches, modeling tools will be discussed. Design project assigned.

BME 551 Introduction to Bio-MEMS and Nanotechnology (3, Sp) Principles and biomedical applications of micro-electromechanical systems (MEMS) and nanotechnology, including microfluidics, nanowire sensors, nanomotors, quantum dots, biofuel cells and molecular imaging. *Recommended preparation:* Basic biology and electronics.

BME 552 Neural Implant Engineering (3, Sp) Advanced studies of the basic neuroscience, engineering design requirements and technological issues associated with implantable neural prostheses, with particular emphasis on retinal and cortical function.

BME 566abcd Topics in Health, Technology and Engineering (a: 2, Fa; b: 2, Sp; c: 2, Fa; d: 2, Sp) Interdisciplinary approach to impart the skills, knowledge and familiarity with stages of collaborative projects related to medical device and methods innovation in health care settings. Open only to health, technology and engineering majors. *c: Concurrent enrollment: BME 567a. d: Concurrent enrollment: BME 567b.*

BME 567ab Case Studies in Health, Technology and Engineering (a: 1, Fa; b: 1, Sp) Learning from cases illustrating paths from health care problems to solutions. Faculty, students and invited guests will provide examples of both successful and unsuccessful innovation attempts. Open only to health, technology and engineering students. *a: Concurrent enrollment: BME 566c. b: Concurrent enrollment: BME 566d.*

BME 575L Computational Neuroengineering (3, Sp) Introduction to computational modeling in neuroengineering, anchored in examples of brain function. Topics include transduction, synapses, spiking, networks, normalization, learning, Bayesian models, and Kalman filtering. *Prerequisite:* BME 502.

BME 590 Directed Research (1-12) Research leading to the master's degree. Maximum units which may be applied to the degree to be determined by the department. Graded CR/NC.

BME 594abz Master's Thesis (2-2-0) Credit on acceptance of thesis. Graded IP/CR/NC.

BME 599 Special Topics (2-4, max 9) Current trends and developments in the field of biomedical engineering.

BME 620L Applied Electrophysiology (4, Fa) The theoretical basis and applied design principles for medical devices and instrumentation that interact with electrically excitable tissues of the body. *Prerequisite:* BME 502.

BME 650 Biomedical Measurement and Instrumentation (3, Sp) Design of measurement systems and biomedical instrumentation; architecture of electronic instruments used to measure physiological parameters,

analysis of major process functions integrated in these instruments. Open to M.S., Medical Device and Diagnostic Engineering and biomedical engineering Ph.D. students only. *Recommended preparation:* BME 513.

BME 670 Early Visual Processing (4, Fa) Interdisciplinary topics in biological and artificial low-level visual processing. Retina, lateral geniculate nucleus; computer vision; neurophysiology, retinal prosthesis; molecular biology, phototransduction; edge detection; movement. Open to graduate students only. *Prerequisite:* NSCI 524 or BME 502 or CSCI 574.

BME 671 Late Visual Processing (4, Sp) Interdisciplinary topics in biological and artificial high-level visual processing. Visual cortex; computer vision; neurophysiology; psychophysics; MRI; computational models; orientation selectivity; stereopsis; motion; contours; object recognition. Open to graduate students only. *Prerequisite:* NSCI 524 or BME 502 or CSCI 574.

BME 680 Modeling and Simulation of Physiological Systems (3, Irregular) Mathematical theories and computation techniques for modeling physiological systems, with emphasis on cardiorespiratory, metabolic-endocrine, and neuronal functions.

BME 790 Research (1-12) Research applicable to the doctorate. Graded CR/NC.

BME 794abcdz Doctoral Dissertation (2-2-2-2-0) Credit on acceptance of dissertation. Graded IP/CR/NC.

Chemical Engineering Honor Society: Omega Chi Epsilon

Viterbi School of Engineering

Chemical Engineering — Mork Family Department of Chemical Engineering and Materials Science

Degree Requirements

Undergraduate Program Educational Objectives

Chemical engineering is the only engineering discipline that makes extensive use of chemical transformations (reactions) in addition to physical transformations (refining, molding or machining) to achieve added value. Chemical engineers are employed in virtually all manufacturing industries, from the basic chemical, biochemical, materials, energy, food, pharmaceutical and microelectronics industries to the myriad consumer product industries. Our various curricula are designed to produce graduates who are broadly educated as well as highly adaptable.

Graduates of the undergraduate program in Chemical Engineering are expected to attain the following objectives within a few years after graduation:

- To obtain employment and succeed in organizations where physical, chemical or biochemical transformations are utilized to produce products and services that benefit society.
- To pursue graduate or professional education in a variety of related fields.
- To engage in continuous personal and professional development through lifelong learning.
- To assume leadership roles in their employment organization or community.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Chemical Engineering provides a thorough grounding in the basic sciences including chemistry, physics and/or biology, with some content at an advanced level, as appropriate to the objectives of the program. The curriculum includes the engineering application of these basic sciences to the design, analysis and control of chemical, physical and/or biological processes, including the hazards associated with these processes.

Bachelor of Science in Chemical Engineering Degree

The Mork Family Department of Chemical Engineering offers a Bachelor of Science degree in Chemical

Engineering. Additionally, there are five possible areas of emphasis within this chemical engineering program major. These are: biochemical engineering (133 units); environmental engineering (136 units); nanotechnology (132 units); petroleum engineering (137 units); and polymer/materials science (137 units). An area of emphasis appears in parentheses after the primary major name on the transcript.

Sample student schedules are located on the department Web page (*chems.usc.edu*).

Common Requirements for the B.S. Degree and All Areas of Emphasis (112 units)

See also common requirements for undergraduate degrees.

COMPOSITION/WRITING COURSES		UNITS
WRIT 150*	Writing and Critical Reasoning — Thematic Approaches	4
WRIT 340	Advanced Writing	3
GENERAL EDUCATION**		UNITS
General education+		24
CHEMISTRY COURSES		UNITS
CHEM 105aL	General Chemistry, or	
CHEM 115aL	Advanced General Chemistry	4
CHEM 105bL	General Chemistry, or	
CHEM 115bL	Advanced General Chemistry	4
CHEM 300L	Analytical Chemistry	4
CHEM 322aL	Organic Chemistry	4
CHEM 430a	Physical Chemistry	4
MATH COURSES		UNITS
MATH 125	Calculus I	4
MATH 126	Calculus II	4
MATH 226	Calculus III	4
MATH 245	Mathematics of Physics and Engineering I	4
PHYSICS COURSES		UNITS
PHYS 151***	Fundamentals of Physics I: Mechanics and Thermodynamics	4
PHYS 152	Fundamentals of Physics II: Electricity and Magnetism	4
CHEMICAL ENGINEERING COURSES		UNITS
CHE 120	Introduction to Chemical Engineering	3
CHE 205	Numerical Methods in Chemical Engineering	3
CHE 330	Chemical Engineering Thermodynamics	3
CHE 350	Introduction to Separation Processes	3
CHE 442	Chemical Reactor Analysis	3
CHE 443	Viscous Flow	3
CHE 444abL	Chemical Engineering Laboratory	3-3
CHE 445	Heat Transfer in Chemical Engineering Processes	2
CHE 446	Mass Transfer in Chemical Engineering Processes	2
CHE 460L	Chemical Process Dynamics and Control	3
CHE 480	Chemical Process and Plant Design	3

*GE Category VI is taken concurrently with WRIT 150.

**Diversity course must double count as a GE course in calculating the total unit count for the degree.

***Satisfies GE Category III requirement.

+The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

Additional Requirements for Individual Degrees

Bachelor of Science in Chemical Engineering

The requirement for the degree in the absence of an area of emphasis is 133 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses:

CHEMISTRY TECHNICAL ELECTIVE		UNITS
CHEM 322bL	Organic Chemistry, or	
CHEM 430b	Physical Chemistry	4

CHEMICAL ENGINEERING COURSES		UNITS
CHE 405	Applications of Probability and Statistics for Chemical Engineers	3
CHE 476	Chemical Engineering Materials	3

CHE Technical Elective

An upper division CHE course	3
------------------------------	---

ADDITIONAL ELECTIVES (8-9 UNITS)		UNITS
<i>Suggested Courses</i>		
CE 205	Statics	2
EE 438L	Processing for Microelectronics	3
ISE 460	Engineering Economy, or	
BUAD 301	Technology Entrepreneurship	3

Bachelor of Science in Chemical Engineering

Emphasis in Biochemical Engineering

The requirement for the degree with an emphasis in biochemical engineering is 133 units.* A scholarship average of C (2.0) or higher is required for all upper division courses taken in chemical engineering, biomedical engineering and biological sciences. In addition to the previously listed common requirements, students must also take the following courses:

BIOLOGICAL SCIENCES COURSES		UNITS
BISC 300L	Introduction to Microbiology	4
BISC 320L	Molecular Biology	4
BISC 330L	Biochemistry	4

BIO-ELECTIVES		UNITS
BISC 403	Advanced Molecular Biology, or	
approved bio-engineering elective**		3-4
BME 410	Introduction to Biomaterials and Tissue Engineering	3
CHE 489	Biochemical Engineering	3

ENGINEERING ELECTIVE		UNITS
CHE 405	Applications of Probability and Statistics for Chemical Engineers, or	
ISE 460	Engineering Economy	3

*Students in the biochemical engineering option must take a minimum of 48 engineering units total to graduate.

**Student may combine a 3-unit approved bio-engineering elective with 1 unit of free elective.

Bachelor of Science in Chemical Engineering

Emphasis in Environmental Engineering

The requirement for the degree with an emphasis in environmental engineering is 136 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied toward the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses:

CHEMICAL ENGINEERING COURSES		UNITS
CHE 405	Applications of Probability and Statistics for Chemical Engineers	3
CHE 476	Chemical Engineering Materials	3
CHE 486	Design of Environmentally Benign Process Plants	3

OTHER COURSES		UNITS
CE 453	Water Quality Control	3
CE 463L	Water Chemistry and Analysis	3
ISE 460	Engineering Economy, or	
BUAD 301	Technology Entrepreneurship	3
PTE 463L	Introduction to Transport Processes in Porous Media	3

Air Pollution Elective

ENE 428	Air Pollution Fundamentals, or	
ENE 429	Air Pollution Control	3

Bachelor of Science in Chemical Engineering

Emphasis in Nanotechnology

The requirement for the degree with an emphasis in nanotechnology is 132 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied toward the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses:

CHEMISTRY		UNITS
CHEM 453	Advanced Inorganic Chemistry	4

CHEMICAL ENGINEERING AND MATERIALS SCIENCE (11 UNITS)		UNITS
CHE 487	Nanotechnology and Nanoscale Engineering through Chemical Processes	3
CHE 391L	Introduction to Nanotechnology Research (2) and	
CHE 491	Nanotechnology Research for Undergraduates (2) or approved upper division undergraduate electives (4)	4
MASC 350L	Nanostructured Materials: Design, Synthesis, and Processing	4

NANOTECHNOLOGY ELECTIVES		UNITS
EE 438L	Processing for Microelectronics, or	
CHE 489	Biochemical Engineering, or	

PTE 463L	Introduction to Transport Processes in Porous Media	3
OTHER ELECTIVES		UNITS
CHE 405	Applications of Probability and Statistics for Chemical Engineers, or	
ISE 460	Engineering Economy, or	
BUAD 301	Technology Entrepreneurship	3

Bachelor of Science in Chemical Engineering

Emphasis in Petroleum Engineering

The requirement for the degree with an emphasis in petroleum engineering is 137 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied toward the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses:

CHEMISTRY COURSE		UNITS
<i>Chemistry Technical Elective</i>		
CHEM 322bL	Organic Chemistry, or	
CHEM 430b	Physical Chemistry	4

CHEMICAL ENGINEERING COURSES		UNITS
CHE 405	Applications of Probability and Statistics for Chemical Engineers	3
CHE 476	Chemical Engineering Materials	3

PETROLEUM ENGINEERING COURSES		UNITS
PTE 461	Formation Evaluation	3
PTE 463L	Introduction to Transport Processes in Porous Media	3
PTE 464L	Petroleum Reservoir Engineering	3
PTE 465L	Drilling Technology and Subsurface Methods	3

OTHER COURSE		UNITS
ISE 460	Engineering Economy, or	
BUAD 301	Technology Entrepreneurship	3

Bachelor of Science in Chemical Engineering

Emphasis in Polymer/Materials Science

The requirement for the degree with an emphasis in polymer/materials science is 137 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied toward the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses:

CHEMISTRY COURSES		UNITS
CHEM 322bL	Organic Chemistry, or	
CHEM 430b	Physical Chemistry	4

OTHER CHEMICAL ENGINEERING/MATERIALS SCIENCE COURSES		UNITS
CHE 472	Polymer Science and Engineering	3
CHE 476	Chemical Engineering Materials, or	
MASC 310	Materials Behavior and Processing	3
MASC 350L	Nanostructured Materials: Design, Synthesis, and Processing	3

POLYMER/MATERIALS ELECTIVES (CHOOSE THREE COURSES)		UNITS
BME 410	Introduction to Biomaterials and Tissue Engineering	3
CHE 474L	Polymer Science and Engineering Laboratory	3
CHE 475	Physical Properties of Polymers	3
CHE 477	Computer Assisted Polymer Engineering and Manufacturing	3
CHE 487	Nanotechnology and Nanoscale Engineering through Chemical Processes	3
EE 438L	Processing for Microelectronics	3
MASC 440	Materials and the Environment	3
OTHER COURSE		UNITS
CHE 405	Applications of Probability and Statistics for Chemical Engineers, or	
ISE 460	Engineering Economy, or	
BUAD 301	Technology Entrepreneurship	3

Viterbi School of Engineering

Chemical Engineering — Mork Family Department of Chemical Engineering and Materials Science

Graduate Degrees

Master of Science in Chemical Engineering

The Master of Science in chemical engineering is awarded in strict conformity with the general requirements of the USC Viterbi School of Engineering with the exception that the minimum unit requirement is 28. Registration in either CHE 550ab or CHE 590 is required.

Engineer in Chemical Engineering

Requirements for the Engineer in chemical engineering are the same as set forth in the general requirements. See general requirements for graduate degrees. Only available to graduate students currently enrolled.

Doctor of Philosophy

The Doctor of Philosophy (Ph.D.) degree in chemical engineering is awarded in conformity with the general requirements of the Graduate School. See general requirements for graduate degrees.

Departmental Policies and Requirements

In addition to the general requirements for the Ph.D. described in this catalogue, candidates in chemical engineering are required to demonstrate proficiency in the following fields: thermodynamics, fluid flow, heat and mass transfer and chemical engineering kinetics. Registration in CHE 550ab is required of all students. More detailed statements of the departmental requirements may be found in a brochure available upon request from the Mork Family Department of Chemical Engineering and Materials Science office.

Chemical Engineering Three-Two Plan

A special curriculum is available for obtaining a Bachelor of Science degree in chemical engineering and a Bachelor of Science or Bachelor of Arts degree in a letters, arts and sciences major in five years. For further information see departmental advisers.

Similar programs are available in cooperation with certain liberal arts colleges. Such programs are particularly suited for obtaining a Bachelor of Science in chemistry at the liberal arts college and a Bachelor of Science in

Viterbi School of Engineering

Chemical Engineering — Mork Family Department of Chemical Engineering and Materials Science

Courses of Instruction

CHEMICAL ENGINEERING (CHE)

The terms indicated are *expected* but are not *guaranteed*. For the courses offered during any given term, consult the *Schedule of Classes*.

CHE 120 Introduction to Chemical Engineering (3, Sp) Problem-solving techniques in chemical engineering using graphics and computers. Mass and heat balances. *Corequisite*: MATH 125; CHEM 105aL or CHEM 115aL.

CHE 205 Numerical Methods in Chemical Engineering (3, Sp) Computational tools for solving numerical problems in Chemical Engineering. *Prerequisite*: MATH 125.

CHE 301g Introduction to Engineering Biology (4, Fa) Engineering methods to understand and design molecules, cells, and living organisms. Techniques to analyze biological systems at the molecular and microscopic level. Computational analysis. *Prerequisite*: CHEM 105a or CHEM 115a or MASC 110; *recommended preparation*: basic understanding of chemistry, atoms, and molecules. Open only to engineering majors.

CHE 330 Chemical Engineering Thermodynamics (3, Fa) Elements of chemical engineering thermodynamics, including generalized correlations of properties of materials, phase behavior, physical and chemical equilibria. *Corequisite*: MATH 226.

CHE 350 Introduction to Separation Processes (3, Sp) Use of equilibrium phase relations and principles of material and energy balance for design, operation, and optimization of separation procedures such as distillation, absorption, etc. *Prerequisite*: CHEM 105bL or CHEM 115bL; *recommended preparation*: CHE 330.

CHE 390 Special Problems (1-4) Supervised, individual studies. No more than one registration permitted. Enrollment by petition only.

CHE 391L Introduction to Nanotechnology Research (2) Planning and execution of an experiment, and presentation of findings through oral presentations and a written report. Application of the scientific method learned through immersion in a lab environment. Graded CR/NC.

CHE 405 Applications of Probability and Statistics for Chemical Engineers (3, Fa) Principles of probability and statistics, random variables and random functions. Application to chemical engineering problems, including process design, process safety, heterogeneous materials and processes. *Prerequisite*: MATH 245.

CHE 410 Introduction to Biomaterials and Tissue Engineering (3, Fa) (Enroll in BME 410)

CHE 442 Chemical Reactor Analysis (3, Fa) Basic concepts of chemical kinetics and chemical reactor design. *Prerequisite*: MATH 245.

CHE 443 Viscous Flow (3, Sp) Constitutive equations and rate laws, momentum equations and kinetic theory of Newtonian, Non-Newtonian and complex flows. Applications to chemical engineering systems. *Corequisite*: CHE 350, MATH 245.

CHE 444abL Chemical Engineering Laboratory (3-3, FaSp) Resolution of chemical engineering problems that require original planning, observations, and data interpretation. Written and oral reports. *Prerequisite:* CHE 330, CHE 350, CHE 442; *corequisite:* CHE 443.

CHE 445 Heat Transfer in Chemical Engineering Processes (2) Phenomenological rate laws, differential and macroscopic equations, and elementary kinetic theory of heat transfer processes with emphases on conduction and convection. (Duplicates credit in AME 331.) *Prerequisite:* CHE 443, MATH 245.

CHE 446 Mass Transfer in Chemical Engineering Processes (2, Sp) Molecular and continuum approaches to diffusion and convection in fluids and multicomponent mixtures; simultaneous mass, heat and momentum transfer; steady-state and time-dependent diffusion; Maxwell-Stefan equations. *Prerequisite:* MATH 245, CHE 443, CHE 445.

CHE 460L Chemical Process Dynamics and Control (3, Sp) Simulation, stability, and automatic control of chemical processes. Open and closed loop control schemes and introduction to optimal control theory. Computer implementation and laboratory application. *Prerequisite:* CHE 120; *corequisite:* MATH 245.

CHE 461 Formation Evaluation (3) (Enroll in PTE 461)

CHE 462 Economic, Risk and Formation Productivity Analysis (4) (Enroll in PTE 462)

CHE 463L Introduction to Transport Processes in Porous Media (3) (Enroll in PTE 463L)

CHE 464L Petroleum Reservoir Engineering (3) (Enroll in PTE 464L)

CHE 465L Drilling Technology and Subsurface Methods (3) (Enroll in PTE 465L)

CHE 472 Polymer Science and Engineering (3,Sp) The preparation, characterization, and properties of synthetic polymers. An interdisciplinary approach to polymers as materials. *Recommended preparation:* CHEM 322aL.

CHE 474L Polymer Science and Engineering Laboratory (3, Sp) Experimental methods for the preparation, characterization, and properties of synthetic polymers. *Recommended preparation:* CHE 472.

CHE 475 Physical Properties of Polymers (3, Fa) Theoretical methods and semi-empirical correlations for estimating mechanical, thermodynamic, transport, optical, and electrical properties of polymer solutions, melts, networks, glasses, polymer blends and semi-crystalline polymers. *Recommended preparation:* CHE 472 and CHEM 430a.
