The Master of Science in Applied Behavior Analysis (MABA) is designed for students who wish to pursue a career in Applied Behavior Analysis. The mission of the program is that all graduating students will become scientist-practitioners, who will be leaders in the provision of services that improve the quality of life of individuals with autism and other developmental disorders. The program satisfies all requirements of the Behavior Analyst Certification Board, including 270 instructional hours of course work in applied behavior analysis, and 1,500 hours of supervised practicum work. After graduating from the program, students will have completed all of the course work and fieldwork requirements to sit for the Board Certified Behavioral Analyst (BCBA) certification. A unique component of the program is the provision of two courses in developmental psychology that provide students with an up-to-date survey of theory and research in cognitive, social and emotional development of children and adolescents. The program is especially appropriate for individuals who have majored in a behavioral science field, such as psychology and sociology, or who have a background in teaching or special education. Applicants must have received their baccalaureate degree by the semester in which they enter the program. Admission is competitive and based on grade point average, course work, GRE scores and practical experience with children. There are openings for approximately 24 students in each year of the program. The program requires 42 units. Applicants must apply for admission to the Graduate School, and satisfy all requirements for admission. Details on the method for applying, admission criteria and deadlines can be found at dornsife.usc.edu/maba.

Sample Student Curriculum
The following is a representative curriculum:

Fall, First Year
• PSYC 530 Concepts and Principles of Behavior Analysis Units: 3
• PSYC 531 Behavioral Assessment Units: 2
• PSYC 532 Ethics for Behavior Analysts Units: 3
• PSYC 533 Cognitive Development in Children Units: 4
• PSYC 535 Research Methods in Behavior Analysis Units: 3
• PSYC 536 Behavioral Interventions Units: 3
• PSYC 537 Development and Supervision of Intervention Systems Units: 2
• PSYC 538 Practicum in Applied Behavior Analysis Units: 2
  – 18 hours per week – 15 weeks (270 hours)

Spring, First Year
• PSYC 534 Social and Emotional Development in Children Units: 4
• PSYC 535 Research Methods in Behavior Analysis Units: 3
• PSYC 536 Behavioral Interventions Units: 3
• PSYC 537 Development and Supervision of Intervention Systems Units: 2
• PSYC 538 Practicum in Applied Behavior Analysis Units: 2
  – 18 hours per week – 15 weeks (270 hours)

Summer, First Year
• PSYC 538 Practicum in Applied Behavior Analysis Units: 2
  – 30 hours per week, 13 weeks (390 hours)

Fall, Second Year
• PSYC 534 Social and Emotional Development in Children Units: 4
• PSYC 535 Research Methods in Behavior Analysis Units: 3
• PSYC 536 Behavioral Interventions Units: 3
• PSYC 537 Development and Supervision of Intervention Systems Units: 2
• PSYC 538 Practicum in Applied Behavior Analysis Units: 2
  – 18 hours per week, 15 weeks (270 hours)
• PSYC 594a Master's Thesis Units: 2
The Master of Science in Applied Psychology program is also available as a part-time, online degree. Students may enter this program in fall, spring or summer terms.

**Psychology (MA)**

The department does not admit students whose objective is this master's degree. However, if a student accepted in the doctoral program does not have a master's degree, the department strongly recommends completion of the requirements for the MA in Psychology in the course of work toward the PhD degree. This involves 24 units of course work and a thesis.

**Dual Degree**

**Doctor of Philosophy in Psychology (Clinical) and Master of Public Health (Health Promotion) (PhD/MPH)**

The PhD/MPH dual degree combines knowledge of clinical psychology research and practice with an understanding of health from a population perspective. The student enrolls primarily in the clinical science doctoral program, while taking additional course work for the MPH. During the second and subsequent years, course work is taken in both programs. The dissertation is undertaken through the Department of Psychology.

**Doctoral Degree**

**Psychology (PhD)**

**Residency Requirement**

A minimum of 24 graduate units at USC is required for the doctoral degree.

**Course Requirements**

Each student must take at least 36 substantive units in psychology at USC during the first three years. Students must complete one statistics and/or research methods course as well as a set of core courses that cover topics in brain and cognitive sciences and clinical, developmental and social areas, the specifics of which are provided in the department's handbook for graduate students. Additional course requirements vary according to specialty area.

**Research Requirement**

During the first and second year, students work on either a master's thesis or a research report of comparable scope and quality. A research project done at USC is required of all students (by the conclusion of the summer following the student's second year), regardless of prior graduate work.

**Screening Procedure**

The student's ability to master graduate-level course material is first evaluated after completion of no more than 24 units, and not later than the third semester of graduate work at USC. The final screening procedure is the successful completion of a second-year project requirement. This evaluation is based on the student's performance in courses taken and on an evaluation of the student's research competence as reflected in the second year research project. The project is evaluated by a committee of three faculty, including the student's primary adviser. Additionally, students are evaluated each year based on adviser input, course work and research progress.
Qualifying Exam Committee
In preparation for the qualifying examination, each student assembles a five-person qualifying exam committee to direct the student's program of studies and evaluate research competence. The committee continues to serve until after the qualifying examination has been passed, the dissertation topic approved, and the student admitted to candidacy for the PhD. At that time the student assembles a dissertation committee of four or more members (usually consisting of members of the qualifying exam committee, one of whom must be a faculty member from outside the department), who advise on and evaluate the dissertation.

Qualifying Examination
The qualifying examination evaluates the student's ability to conduct independent scholarship and research. The student is evaluated based on oral and written presentation of two elements: a written review paper or written exam and the dissertation proposal. The qualifying examination is planned, administered and evaluated by the student's qualifying exam committee. It should be taken no later than during the fifth semester.

Doctoral Dissertation
A student is expected to engage in research activity throughout his or her graduate career, leading up to and culminating in the PhD dissertation. The dissertation is based on an original investigation, usually involving empirical data.

Defense of the Dissertation
The student's doctoral dissertation is defended at either a defense oral, based on an approved preliminary copy of the dissertation, or a final oral, based on the final version of the dissertation.

Advisement
Each student has a major adviser who is usually in the specialty area. The qualifying exam committee should be formed at least one semester before the student takes the qualifying examination. Advisement concerning graduate school requirements may also be sought from the staff graduate adviser and the faculty member serving as director of graduate studies.

Internship Requirement
Students in the clinical science PhD program need a minimum of three full-time in-residence academic years of graduate study plus one full year of internship at a facility approved by the clinical faculty.

Religion
The School of Religion offers undergraduate courses in biblical studies; ancient near eastern religion, east and south Asian religions, including Hinduism, Buddhism and Taoism; religions in Latin America; contemporary North American religions; the histories of Judaism, Christianity and Islam; the sociology of religion; religion and gender; and topics in religious ethics. Courses are designed to facilitate a critical and comparative understanding of religious traditions in the light of the most current scholarship. The School of Religion offers the Bachelor of Arts in Interdisciplinary Archaeology, the Bachelor of Arts in Jewish Studies, the Bachelor of Arts in Religion, the minor in Interdisciplinary Archaeology, the minor in Jewish Studies, the minor in Religion, and the Doctor of Philosophy in Religion. Students also have the opportunity to enroll in USC courses offered by faculty of the Louchheim School for Judaic Studies, and receive regular USC course credit.

Adjunct Professors: Stephen Smith, PhD; Varun Soni, PhD
Emeriti Professors: Robert Ellwood, PhD; Ronald Hock, PhD; John B. Orr, PhD; J. Wesley Robb, PhD, LHD*
Emeriti Associate Professors: John P. Crossley, Jr., ThD*; William W. May, PhD; Alvin S. Rudisill, PhD
University Professor, Professor Emeritus of Religion, and Dean Emeritus, Rossier School of Education: John Orr
*Recipient of university-wide or college teaching award.

Undergraduate Degrees
Religion Major with Honors
 Majors who wish to graduate from the university with honors in religion must achieve a minimum 3.5 grade point average in the major at the time of graduation. In addition to completing the required 32 units listed above, candidates for honors must register for REL 491 x Undergraduate Honors Research, in which they must complete an acceptable senior honors project in religion. The total unit requirement to graduate with honors is 36 upper-division units.

Honor Society
Theta Alpha Kappa is a national honor society for those involved in the study of religion at the undergraduate and graduate level. It is open to declared majors who have completed at least three semesters of college and at least 12 units of religion courses. Students must have a GPA of at least 3.5 in major courses and an overall GPA of at least 3.0.

**Judaic Studies Minor**

See Jewish Studies for a full description of the minor.

**Critical Approaches to Leadership Minor**

See the Department of Interdisciplinary Studies for a full description of the minor.

**Graduate Degrees**

The School of Religion offers graduate study at the doctoral degree level in the field of religion with three tracks: Asia Pacific Religions, Comparative Christianities and Global Islam. Graduate work in the field of religion is designed to develop competencies and critical apparatuses in the distinct tracks and religious traditions as well as in religions' interactions with society, culture and the major themes that transcend the boundaries of geography, history and tradition.

The three tracks include:

**Track I: Asia Pacific Religions**

Trains students in the foundational texts, histories, worldviews, socio-political and cultural impact of religions in the pre-modern and modern Asia Pacific. These religious traditions include Hinduism, Buddhism and other religious movements in the region as well as their global manifestations.

**Track II: Comparative Christianities**

Trains students in the vast global range of historical and contemporary Christian traditions often grouped together homogeneously as Christianity. Rather than focusing exclusively on textual and intellectual traditions, this track integrates the social, cultural and material dimensions of religion in its study of plural Christianities, and challenges students to frame their research in transnational and transhistorical terms as a matter of course.

**Track III: Global Islam**

Trains students in the "global" dimensions of the Islamic tradition, from the traditional confines of the Middle East, Africa and South and Southeast Asia to include Islam, Islamic thought, Muslim culture and Muslim communities in the modern Western world. In addition to the acquisition of traditional skills for the study of religious texts, doctrine and spiritual life of believers, students will learn how Muslims negotiate concrete spaces and contexts they inhabit in the modern world.

**Degree Requirements**

The degree is conferred under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and The Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School. Decisions regarding the number of transfer credits to be awarded will be made on a case-by-case basis by the faculty of the School of Religion.

**Bachelor's Degree**

**Interdisciplinary Archaeology (BA)**

**Director:** Lynn Swartz Dodd, PhD

Archaeology deepens our understanding of peoples and societies across space and time, in all parts of the world, while expanding our knowledge of issues relevant in contemporary society. Archaeologists interpret material culture and action from our shared human past using a range of tools and approaches whether the discovery occurs with trowel in hand, or through laboratory analysis, artifact study, remote sensing or by documenting heritage. Archaeology majors strengthen their skills in critical thinking, assessing evidence, and formulating clear and persuasive arguments, both oral and written. Students from a wide range of disciplines will gain perspective on their own intellectual and professional interests through the study of the past.

In addition to the general education requirements, the following courses are required:

**Lower-Division Requirement (8 units)**

**Required Course (4 units)**

- ANTH 202g Archaeology: Our Human Past Units: 4

Select one additional lower-division course from the following list (4 units):

- AHIS 120gp Foundations of Western Art Units: 4
- AHIS 125gp Arts of Asia I: Antiquity to 1300 Units: 4
- AHIS 126g Arts of Asia II: 1300 to the Present Units: 4
- AHIS 127g Arts of the Ancient Americas Units: 4
- AHIS 128g Arts of Latin America Units: 4
- AHIS 201g Digging into the Past Units: 4
- ANTH 140g Mesoamerican Cosmovision and Culture Units: 4
- CHEM 105bL General Chemistry Units: 4
- CLAS 150g The Greeks and their Legacies Units: 4
- CLAS 151gp The Legacy of Rome Units: 4
- CLAS 212L Archaeology: Interpreting the Past Units: 4
- CLAS 280gp Classical Mythology in Art and Literature Units: 4
- ENST 100g Introduction to Environmental Studies Units: 4
- ENST 150gx Environmental Issues in Society Units: 4
- HBIO 200Lg The Human Animal Units: 4
- HIST 101g State and Society in the Ancient World Units: 4
- LING 295g The Ancient Near East: Culture, Archaeology, Texts Units: 4
- MASC 110L Materials Science Units: 4
- REL 111g The World of the Hebrew Bible Units: 4
• REL 112g Religions of Ancient Egypt and the Near East Units: 4
• REL 114g The Mediterranean: A Religious History Units: 4
• REL 115g Jerusalem, City of Three Faiths Units: 4
• REL 121g The World of the New Testament Units: 4
• REL 125g Introduction to Christianity Units: 4
• REL 132g Origins of Western Religions Units: 4
• REL 135g Chinese Religions and Culture Units: 4
• REL 137g Introduction to Islam Units: 4
• SSCI 165Lgw Sustainability Science in the City Units: 4
• SSCI 265Lg The Water Planet Units: 4

Upper-Division Requirement (28 units)
Select two courses from Theories and Methods (8 units):
• AHIS 325 Roman Archaeological Excavation: Methods and Practice Units: 4
• AHIS 415 Object-Worlds: Histories and Theories of Things Units: 4
• AHIS 425 Interdisciplinary Studies in Classical Art and Archaeology: Research and Methodology Units: 4
• AHIS 427 Archaeological Theories, Methods, and Practice Units: 4
• ANTH 400 Maya Resilience: Constructing Past and Present Identities Units: 4
• ANTH 440 History of Anthropological Theory Units: 4
• ANTH 450 Field Research in Maya Archaeology Units: 4
• ANTH 481L GIS for Archaeologists Units: 4
• REL 303g Exploring Ancient Ways of Living: Experimental Archaeology Units: 4
• REL 494 Lab Methods and Theories in Archaeology Units: 4
• REL 495 Field Methods and Theories in Archaeology Units: 4

Select four courses from the following two areas (16 units):
Cultural/Historical
• AHIS 321 Greek Art and Archaeology Units: 4
• AHIS 322 Roman Art and Archaeology Units: 4
• AHIS 330 Medieval Art Units: 4
• AHIS 381g Visual Cultures of Asia Units: 4
• AHIS 384 Early Chinese Art Units: 4
• AHIS 420 Studies in Ancient Art Units: 4
• ANTH 304 Prehistoric Archaeology Units: 4
• ANTH 310 Archaeology of the Americas Units: 4
• ANTH 311 Old World Archaeology Units: 4
• ANTH 314g The Nature of Maya Civilization Units: 4
• ANTH 329 Archaeology and Global Cultural Heritage Units: 4
• ANTH 337 Anthropology of Warfare Units: 4
• ANTH 360 Symbolic Anthropology Units: 4
• ANTH 372 Interpretation of Myth and Narrative Units: 4
• CLAS 323 Aegean Archaeology Units: 4
• CLAS 324 Late Antique Art and Archaeology Units: 4
• CLAS 328 Archaeology of Religion in the Greco-Roman World Units: 4
• CLAS 338 Warfare, State, and Society in the Ancient World Units: 4
• CLAS 339 Ancient Science Units: 4
• CLAS 349g Ancient Empires Units: 4
• CLAS 371 From Alexander to Cleopatra: The Mediterranean in an Age of Expansion Units: 4
• JS 378 Jewish Magic in the Ancient World Units: 4
• MDES 316p The Great Muslim Empires of the Near East and India Units: 4
• REL 302 Religions of Ancient Egypt and the Near East Units: 4
• REL 317g The Bible in Its Ancient Context Units: 4
• REL 325 Religious Experience in the Greco-Roman World Units: 4
• REL 326gp Historical Jesus Units: 4
• REL 394 Archaeology of Egypt and the Near East Units: 4
• REL 402 Cultural Heritage, Religion, and Politics in the Middle East Units: 4
• REL 475 Religion, Material Culture and the Senses Units: 4
• REL 493 Art and Archaeology of Religion Units: 4
• ANTH 376 Scientific Analysis in Archaeology Units: 4
• ANTH 481L GIS for Archaeologists Units: 4
• CHEM 300L Analytical Chemistry Units: 4
• ENST 320a Water and Soil Sustainability; Energy and Air Sustainability Units: 4
• ENST 320b Water and Soil Sustainability; Energy and Air Sustainability Units: 4
• GEOL 305L Introduction to Engineering Geology Units: 4
• GEOL 320L Surficial Processes and Stratigraphic Systems Units: 4
• GEOL 412 Oceans, Climate, and the Environment Units: 4
• HBIO 300 Evolution, Ecology, and Culture Units: 4
• HBIO 308 Origins and Evolution of Human Behavior Units: 4
• SSCI 301L Maps and Spatial Reasoning Units: 4
• SSCI 382L Principles of Geographic Information Science Units: 4
• SSCI 483L Spatial Science Practicum Units: 4

Take Capstone Course (4 units):
• CLAS 465 Archaeology and Society Units: 4

Total Requirement: 9 courses (36 units)

Jewish Studies (BA)
The interdisciplinary major in Jewish Studies investigates the
study of Jewish religion, history, culture and languages
through a variety of academic perspectives. Students can
work with scholars in the School of Religion in USC
Dornsife College, the Louchheim School for Judaic Studies
at Hebrew Union College-Jewish Institute of Religion and
faculty across the USC campus trained in religious studies,
Jewish thought, history, linguistics, literature, international
relations, political science, music and sociology. The
curriculum is designed to allow students options in
combining courses that focus on Judaism as a religion with
those that focus on history, literature and other forms of
Jewish culture and civilization.

Major Requirements
Students choose among courses that focus on Judaism as a
living religious system and those that focus on Jewish
history, culture and society in its global setting.
Three core courses are required: REL 301 Introduction to the
Study of Religion, REL 401 Seminar in Religious Studies,
and either JS 100 Introduction to Jewish History or JS
180 Judaism.
In addition, students choose five courses from the Judaism as
a Religious Tradition track and the Jewish History and
Culture track listed below for a total of eight courses and 32
units.
Students may choose one lower-division course and four
upper-division courses or five upper-division courses.

A. Core Courses (three courses
required)
• JS 100gp Jewish History Units: 4
• REL 301 Introduction to the Study of Religion Units: 4
• REL 401 Seminar in Religious Studies Units: 4

B. Judaism as a Religious Tradition
(at least one course required)
• JS 180gp Introduction to Judaism Units: 4
• JS 258gp Food, Faith and Conflict Units: 4
• JS 314gp Holy War And History: Jews, Christians, Muslims Units: 4
• JS 321 Gender and Judaism Units: 4
• JS 361 Scripture and Polemic in Judaism, Christianity and Islam Units: 4
• JS 374 Messiah: The History of an Idea Units: 4
• JS 382 Judaism as an American Religion Units: 4
• JS 467 Modern Jewish Thought Units: 4
• JS 378 Jewish Magic in the Ancient World Units: 4
• REL 111g The World of the Hebrew Bible Units: 4
• REL 112g Religions of Ancient Egypt and the Near East Units: 4
• REL 114g The Mediterranean: A Religious History Units: 4
• REL 115g Jerusalem, City of Three Faiths Units: 4
• REL 121g The World of the New Testament Units: 4
• REL 311g The Bible in Western Literature Units: 4
• REL 312 Biblical Wisdom Literature Units: 4
• REL 317g The Bible in Its Ancient Context Units: 4
• REL 359g Culture in Diaspora: The Jews of Spain Units: 4
• REL 364 Religion and Ethics Units: 4
• REL 394 Archaeology of Egypt and the Near East Units: 4
• REL 473 Advanced Hebrew Bible Studies Units: 4

C. Jewish History and Culture (at
least one course required)
• HEBR 315 Modern Hebrew Language (Hebrew IV) Units: 4
• HIST 305 From Goddesses to Witches: Women in Premodern Europe Units: 4
• HIST 323 The Holocaust in 20th Century Europe Units: 4
• HIST 383 The Modern Middle East Units: 4
• HIST 402 Cultural Heritage, Religion, and Politics in the Middle East Units: 4
• HIST 443 Race and Religious Riots in Modern World History Units: 4
• HIST 444 Mass Violence and Comparative Genocide in Modern World History Units: 4
• HIST 446 Resistance to Genocide Units: 4
• ITAL 352 The Holocaust in Italian Fiction and Film Units: 4
D. Major Electives (three courses required)

In addition to the three core courses in Area A and one required course in each of Areas B and C, student must complete three additional courses chosen from the lists above. No more than two courses in total may come from the lower-division (100- and 200-) levels.

As a prerequisite for participation in the Judaic Studies emphasis, students must enroll in either JS 100 Jewish History or JS 180 Introduction to Judaism. In addition, students who elect the Judaic Studies emphasis must complete HEBR 120, HEBR 150, and HEBR 220, which may be used to fulfill the college's language requirement. The total number of units to graduate with the Judaic Studies emphasis major is 36 units. This does not include the Judaic Studies emphasis major.

Religion (BA)
The department major requires REL 301 Introduction to the Study of Religion (preferably taken at the beginning of the student's major courses) and REL 401 Seminar in Religious Studies. Further, students must take six additional courses from the list below. The total unit requirement for the major is 32 units (at least 24 to 28 units must be upper-division).

Lower-division Options:

- REL 111g The World of the Hebrew Bible Units: 4
- REL 112g Religions of Ancient Egypt and the Near East Units: 4
- REL 114g The Mediterranean: A Religious History Units: 4
- REL 115g Jerusalem, City of Three Faiths Units: 4
- REL 121g The World of the New Testament Units: 4
- REL 125g Introduction to Christianity Units: 4
- REL 132g Origins of Western Religions Units: 4
- REL 134g Introduction to Buddhism Units: 4
- REL 135g Chinese Religions and Culture Units: 4
- REL 136g Sense and Sensuality in Indian Religions and Culture Units: 4
- REL 137g Introduction to Islam Units: 4
- REL 138g Japanese Religions and Culture Units: 4
- REL 141g Global Religions in Los Angeles Units: 4
- REL 147g Religion, Media and Popular Culture Units: 4

Upper-division Options:

- CLAS 323 Aegean Archaeology Units: 4
- COMM 425 Communicating Religion Units: 4
- COMM 426 Religion, Media and Hollywood: Faith in TV Units: 4
- EALC 431 The Taoist Tradition Units: 4
- HIST 482 Jesus in American History and Culture Units: 4
- JS 321 Gender and Judaism Units: 4
- JS 361 Scripture and Polemic in Judaism, Christianity and Islam Units: 4
- JS 382 Judaism as an American Religion Units: 4
- JS 467 Modern Jewish Thought Units: 4

Judaic Studies Emphasis (BA)

A Bachelor of Arts in Religion with an emphasis in Judaic Studies is offered cooperatively with the School of Religion and Hebrew Union College-Jewish Institute of Religion. Students will complete all requirements for the bachelor of arts in religion. In fulfilling these requirements, students who choose the Judaic Studies emphasis will select any three of the following courses: REL 312; JS 321, JS 361, JS 382, JS 467.
students who intend to do graduate work in some area of religious studies are encouraged to concentrate their course selections in the area of their preference and to begin learning the languages that are essential for study in that area. This includes modern languages such as Arabic, Chinese, French, German or Japanese, and perhaps an ancient language.

**Minor**

**Religion Minor**
Students taking the religion minor must enroll in REL 301 Introduction to the Study of Religion. In addition, they must complete four additional religion courses, at least three of which must be upper-division courses. The total unit requirement for the minor is 20 units; 16 of those units must be upper-division. Students who wish to focus their minor in Jewish studies must minor in Judaic Studies.

**Interdisciplinary Minors**

For Business

**Interdisciplinary Archaeology Minor**
The minor in interdisciplinary archaeology is available to students in all schools and departments. Students from a wide range of disciplines will gain perspective on their own intellectual and professional interests through the study of the past.

**Lower-Division Requirement (8 units)**

**Required Course (4 units)**
ANTH 202g Archaeology: Our Human Past
Units: 4

Select one additional lower-division course from the following list (4 units):

- AHIS 120gp Foundations of Western Art
Units: 4
- AHIS 125gp Arts of Asia I: Antiquity to 1300
Units: 4
- AHIS 126g Arts of Asia II: 1300 to the Present
Units: 4
- AHIS 127g Arts of the Ancient Americas
Units: 4
- AHIS 128g Arts of Latin America
Units: 4
- ANTH 140g Mesoamerican Cosmovision and Culture
Units: 4
- CHEM 105bL General Chemistry
Units: 4
- CLAS 150g The Greeks and their Legacies
Units: 4
- CLAS 151gp The Legacy of Rome
Units: 4
- CLAS 212L Archaeology: Interpreting the Past
Units: 4
- CLAS 280gp Classical Mythology in Art and Literature
Units: 4
- ENST 100g Introduction to Environmental Studies
Units: 4
- ENST 150gx Environmental Issues in Society
Units: 4
- HBIO 200Lg The Human Animal
Units: 4
- HIST 101g State and Society in the Ancient World
Units: 4
- LING 295g The Ancient Near East: Culture, Archaeology, Texts
Units: 4
- MASC 110L Materials Science
Units: 4
- REL 111g The World of the Hebrew Bible
Units: 4
- REL 112g Religions of Ancient Egypt and the Near East
Units: 4
- REL 114g The Mediterranean: A Religious History
Units: 4
- REL 115g Jerusalem, City of Three Faiths
Units: 4
- REL 121g The World of the New Testament
Units: 4
- REL 125g Introduction to Christianity
Units: 4
- REL 132g Origins of Western Religions
Units: 4
- REL 135g Chinese Religions and Culture
Units: 4
- REL 137g Introduction to Islam
Units: 4
- SSCI 165Lgw Sustainability Science in the City
Units: 4
- SSCI 265Lg The Water Planet
Units: 4

Upper-Division Requirement (16 units)

Select one course from Theories and Methods (4 units):

- AHIS 325 Roman Archaeological Excavation: Methods and Practice
Units: 4
- AHIS 415 Object-Worlds: Histories and Theories of Things
Units: 4
- AHIS 425 Interdisciplinary Studies in Classical Art and Archaeology: Research and Methodology
Units: 4
- AHIS 427 Archaeological Theories, Methods, and Practice
Units: 4
- ANTH 400 Maya Resilience: Constructing Past and Present Identities
Units: 4
- ANTH 440 History of Anthropological Theory
Units: 4
- ANTH 450 Field Research in Maya Archaeology
Units: 4
- ANTH 481L GIS for Archaeologists
Units: 4
- REL 303g Exploring Ancient Ways of Living: Experimental Archaeology
Units: 4
- REL 494 Lab Methods and Theories in Archaeology
Units: 4
- REL 495 Field Methods and Theories in Archaeology
Units: 4

Additionally, select any two upper-division courses from those listed under Interdisciplinary Archaeology Major (8 units):

Required Capstone Course (4 units)

- CLAS 465 Archaeology and Society
Units: 4

Total Requirement: 6 courses (24 units)

Doctoral Degree

Religion (PhD)

Course Requirements

Sixty-four units of course work are required for the PhD degree, including units of previous graduate work for which credit is allowed. No more than two language courses at the 400-level and no more than two non-language courses at the 400-level (i.e., 16 units) may be applied to the total requirement of 64 units. Time of residency is contingent upon the background and preparation of the student. Core requirements for all doctoral students regardless of track include REL 500, REL 502, REL 592, REL 593, and a maximum of 8 units of REL 794 Doctoral Dissertation to be applied toward the 64-unit total requirement. Additionally, mandatory courses for students in the Asia Pacific Religions track include REL 545, REL 645, and a one course from the REL 652/REL 653/REL 654/REL 655 series. Mandatory courses for students in the Comparative Christianities track include REL 535, REL 635 and REL 651. Mandatory courses for students in the Global Islam track include REL 525, REL 625 and REL 650.
In addition to the mandatory courses, students are expected to take elective courses in areas that will support their dissertation work. Such courses may be offered in related departments in the university as well as in the School of Religion and should be selected in consultation with the primary adviser. Each student entering the PhD program will select a primary academic adviser before classes begin. The adviser must be a member of one of the three tracks that the student envisions specializing in. In addition, at least one other faculty member from that track is selected to constitute, along with the primary adviser, the student's "mentoring committee." The mentoring committee is responsible for overseeing the student's program of course work, course of language study, timing of qualifying exams and so on. The membership of the mentoring committee can be changed at any time with the agreement of the student, the student's primary adviser, and the School of Religion director of Graduate Studies. The dissertation Committee (see below) will replace the mentoring committee once candidacy is achieved. Students are expected to maintain a 3.5 GPA in course work.

The mentoring committee conducts an annual review of the student's academic performance and progress toward the degree in the spring of each year, before the end of the spring term. Should a student's performance be considered unsatisfactory, following consultation with the director of Graduate Studies, the student will be placed on probation for one year and given the opportunity to improve his or her performance. If a student's performance is still considered unsatisfactory at the end of the probationary year, the student will be dismissed from the program. Only after a successful annual review in the second year will the student be permitted to convene their qualifying examination committee.

Foreign Language Requirements

Language competencies vary by track and are determined in consultation with the mentoring committee. Here are some general guidelines:

Asia Pacific Religions Track: Advanced facility in at least one Asian language is considered essential to the Asia Pacific Religions Track. Each student selects a primary language area. The Mentoring Committee determines which possible additional languages are necessary for the student's course of study, and the procedures for the evaluation of proficiency in those languages. The following is provided as a guideline depending on the area of sub-specialization.

- **Chinese**: Classical and modern Chinese, as well as modern Japanese (as a research language) and a modern European research language.
- **Japanese**: Classical (Bungo) and modern Japanese, as well as Kanbun, and one modern research language (European, modern Chinese, or modern Korean)
- **Korean**: Advanced Korean, as well as either modern Japanese (as a research language) or a European modern research language.
- **Sanskrit and Hindi**: Advanced competency in two South Asian languages, classical or modern, plus a modern research language judged relevant to the student's research.

Comparative Christianities Track: Students are required to demonstrate advanced ability in two languages other than English in order to enable comparative research. Given the temporal and global span of Christian traditions, the specific languages will be determined on a case-by-case basis by the student's mentoring committee. Customarily the committee will select one or two ancient languages and one or two modern languages. The following are the languages most frequently studied in the Comparative Christianities Track, but the mentoring committee can select others as needed:

- **Ancient**: Hebrew, Greek, Syriac, Latin, as well as medieval vernaculars
- **Modern**: French, Spanish, Italian, German, Portuguese, Korean

Global Islam Track: Required to demonstrate advanced ability in the primary lingua franca of Islamic civilization to ensure the ability to conduct original research. Secondly, students are generally encouraged to acquire facility in a secondary language within traditional Muslim religious and secular literature. Students are also encouraged to acquire facility in one European research language where deemed appropriate.

- **Arabic**: Classical and Modern Standard, as the primary research language.
- **Persian**: Classical and Modern, as a possible secondary research language.
- **French or Spanish**: (Elective) a reading knowledge to conduct research on or in specific modern communities.

Qualifying Examination and Dissertation Prospectus

The qualifying examination process consists of five stages: (1) constituting the qualifying examination committee (this would normally include the members of the mentoring committee), (2) determining the three exam areas by the student and the qualifying examination committee, (3) taking the written examinations, (4) submission of the dissertation prospectus, (5) the qualifying oral examination. Preparation for these exams should begin early in the student's course work. In consultation with the mentoring committee the students will select their primary area and also take an exam in the other two cognate areas. Preparation for the qualifying exam continues with supplementary readings based on a bibliography prepared by the student in conjunction with the qualifying examination committee. This committee is responsible for setting the exam questions for the cognate written exams. The student is given 24 hours to write on a total of three questions for each exam. Each of the written exams is evaluated by all members of the examination committee.

The dissertation prospectus should begin with a general review of the scholarship in the field, and situate the thesis within that field. It should clearly articulate the thesis and program of research, identifying the available source material to be consulted. The prospectus must include a chapter outline, and a full bibliography of primary and secondary sources.

The oral examination will occur shortly after the submission of the dissertation prospectus. It will focus on the content of
the written exams, the basic literature in the student's primary field, as well as the content and cogency of the prospectus. **Dissertation** The dissertation committee, consisting of three faculty members, is formed immediately following advancement to candidacy. The committee consists of at least two faculty members in the track of the student's specialization as well as one other School of Religion faculty member. Candidates may also add an additional faculty member external to the School of Religion if appropriate. This final stage of the program requires the submission of an acceptable dissertation based on original investigation. The dissertation must show technical mastery expected in each track, evidence of independent research, and the analytical and interpretive ability expected of a scholar. **Other Programs** **Jewish Studies Minor** Students taking the Jewish studies minor must enroll in either JS 100 or JS 180. In addition, they must complete four upper-division courses selected from the Judaism as a Religious Tradition track and the Jewish History and Culture track listed in the Jewish studies major description. The total unit requirement for the minor is 20 units; 16 of those units must be upper-division.

**Slavic Languages and Literatures** The Department of Slavic Languages and Literatures offers a major in Russian at the undergraduate level and minors in Russian and Russian Area Studies. The major combines thorough preparation in the Russian language with the study of Russian literature, art, and culture. Particular emphasis is placed on developments in contemporary Russia. Students are required to study four semesters of Russian language as a prerequisite to the major. The major itself requires an additional three semesters of language study, three semesters of an advanced seminar on Russian culture (with varying content), and two elective courses, either in Russian literature and culture (in translation or Russian, depending on course scheduling) or in Russian area studies. **Taper Hall of Humanities 255** (213) 740-2735 FAX: (213) 740-8550 Email: slavic@dornsife.usc.edu dornsife.usc.edu/sll **Chair:** Thomas Seifrid, PhD **Faculty** Professors: John Bowlt, PhD*; Sharon Carnicke, PhD (Dramatic Arts); Marcus Levitt, PhD*; Sarah Pratt, PhD*; Azade-Ayse Rorlich, PhD (History); Thomas Seifrid, PhD*; Alexander Zhokhovsky, PhD* Associate Professors: Robert English, PhD (International Relations); Roumyana Pancheva, PhD (Linguistics) Assistant Professor: Anna Krakus, PhD; Greta Matzner-Gore, PhD Professor (Teaching) of Russian: Tatiana Akishina, PhD Associate Professor (Teaching) of German: Britta Bothe, PhD Assistant Professors (Teaching) of German: John W. Arensmeyer Jr., PhD; Eve Lee, PhD Lecturer: John Adam Peters III Emeritus Professor: Anthony M. Mikotin, PhD *Recipient of university-wide or college teaching award. **Graduate Degrees** **Master of Arts in Comparative Studies in Literature and Culture (Slavic Languages and Literatures)** See Comparative Studies in Literature and Culture in this catalogue. **Doctor of Philosophy in Linguistics (Specialization in Slavic Linguistics)** Application deadline: January 1 See Linguistics in this catalogue. **Certificate in Foreign Language Teaching** The Certificate in Foreign Language Teaching provides certification in the theory and practice of second or foreign language teaching for student language teachers concurrently enrolled in graduate degree programs in foreign languages or related graduate programs at USC; for graduates of such programs who are teaching languages; for external candidates concurrently enrolled in similar programs at accredited colleges or universities; or for graduates of such programs who are teaching languages. The certificate is meant to supplement graduate study in the literature or linguistics of foreign languages. It is also meant to supplement classroom teaching. Refer to the Department of Spanish and Portuguese for course work requirements. **Bachelor's Degree** **Central European Studies (BA)** The major in Central European studies combines background in relevant languages (Russian plus either German or Polish, or more intensive study of Russian) with course work in international relations and the history, culture and politics of the region. No longer an imperial backwater, Central Europe has risen from its Cold War stasis to become one of the world's most dynamic and important regions. Stretching from the Baltic Sea to the Balkan Peninsula, and from the Eastern lands of Germany to the Western regions of Russia, this onetime great-power battleground is now a vital trade and energy corridor, a mosaic of languages and cultures, a place of both successful state-building and persistent ethnic frictions, and a promising but still-precarious bridge between the former Soviet Union and the West. Central Europe rivals the Far East and Southwest Asia as one of the world's most strategically important regions — now, and over the coming decades. Those who master its history and politics, its economic, cultural and linguistic diversity, will be well positioned for fellowships, graduate work, business or analytical careers centered on this fascinating region.
The objectives of this interdisciplinary major are to provide students with: 1) the historical background and linguistic-cultural skills necessary for in-depth study of Central Europe; 2) knowledge of its main post-Cold War political, ethnic, and economic trends; and 3) understanding of current issues from nationalism and immigration to trade, military-diplomatic and alliance politics.

**Requirements**
The fundamental linguistic background of the major is Russian (12 units).

**Required Courses**
- SLL 120 Beginning Russian I Units: 4
- SLL 150 Beginning Russian II Units: 4
- SLL 220 Intermediate Russian I Units: 4

**Courses**
Beyond the second year of Russian, students may choose from among three options: further work on Russian; or a year of German; or a year of Polish (8 units).

**Russian**
- SLL 250 Intermediate Russian II Units: 4
- SLL 310 Advanced Russian in Popular Culture Units: 4
- SLL 340 Intercultural Communication in Russian Units: 4

**German**
- GERM 101 German I Units: 4
- GERM 102 German II Units: 4

**Polish**
- SLL 122 Elementary Polish I Units: 4
- SLL 152 Elementary Polish II Units: 4

**Required Courses, Upper-Division**
Required upper-division courses in international relations: two courses must be chosen from among the following (8 units):
- IR 345 Russian and Post-Soviet Foreign Policy Units: 4
- IR 346 Communism and Post-Communism: Eastern Europe and the Balkans Units: 4
- IR 385 European Foreign Policy and Security Issues Units: 4

**Elective Courses**
In addition three electives are required from among the following. At least one course must be at the 400 level. With prior approval, IR 490x Directed Research (4 units) or SLL 490x Directed Research (4 units) may be substituted for one of these courses (12 units):
- HIST 323 The Holocaust in 20th Century Europe Units: 4
- HIST 324g Islam in Russia, the USSR, and Independent States Units: 4
- HIST 365 The Second World War Units: 4, 2 years
- HIST 414 Contemporary Europe Units: 4
- HIST 416 History of Imperial Russia: 1689–1917 Units: 4
- HIST 417 History of Soviet Russia: 1917–1991 Units: 4, 2 years
- HIST 422 European Intellectual and Cultural History: The 20th Century, 1920 to the Present Units: 4
- HIST 427 The German Question: Nation and Identity in Modern Central Europe Units: 4
- IR 369 Post-War European Relations Units: 4
- IR 439 Political Economy of Russia and Eurasia Units: 4
- IR 468 European Integration Units: 4
- POSC 366 Terrorism and Genocide Units: 4
- POSC 371 European Political Thought II Units: 4
- POSC 463 European Politics Units: 4
- POSC 464 Politics of Russia and Eastern Europe Units: 4
- SLL 302g Modern Russian Literature Units: 4
- SLL 303 Contemporary Russian Literature Units: 4
- SLL 330gp Russian Thought and Civilization Units: 4
- SLL 397 Literature and Film in Eastern European Historical Experience Units: 4
- SLL 465 Seminar in Russian Studies Units: 4

**Russian (BA)**

**Required Courses, Lower-Division**
- SLL 120 Beginning Russian I Units: 4
- SLL 150 Beginning Russian II Units: 4
- SLL 220 Intermediate Russian I Units: 4
- SLL 250 Intermediate Russian II Units: 4
- SLL 310 Advanced Russian in Popular Culture Units: 4
- SLL 321 Russian Culture Units: 4 or
- SLL 330gp Russian Thought and Civilization Units: 4
- SLL 465 Seminar in Russian Studies Units: 4 max

**Required Courses, Upper-Division**
- SLL 310 Advanced Russian in Popular Culture Units: 4
- SLL 321 Russian Culture Units: 4 or
- SLL 330gp Russian Thought and Civilization Units: 4
- SLL 340 Intercultural Communication in Russian Units: 4
- SLL 465 Seminar in Russian Studies Units: 4 max

**Minor**

**Russian Area Studies Minor**
Lower-division Requirements

Four semesters of Russian language

- SLL 120 Beginning Russian I Units: 4
- SLL 150 Beginning Russian II Units: 4
- SLL 220 Intermediate Russian I Units: 4 and either
  - SLL 250 Intermediate Russian II Units: 4 or
  - SLL 255 Business Russian Units: 4 or its equivalent

Upper-division Requirements

The core course

- SLL 330gp Russian Thought and Civilization
  Units: 4

One course outside the Slavic department, from among the following:

- HIST 324g Islam in Russia, the USSR, and Independent States
  Units: 4
- HIST 415 Medieval and Early Modern Russia
  Units: 4, 2 years
- HIST 416 History of Imperial Russia: 1689–1917
  Units: 4
  Units: 4, 2 years
- HIST 424 Family, Work, and Leisure in Russian History
  Units: 4
- IR 345 Russian and Post-Soviet Foreign Policy
  Units: 4
- IR 346 Communism and Post-Communism: Eastern Europe and
  the Balkans Units: 4
- IR 439 Political Economy of Russia and Eurasia
  Units: 4
- IR 483 War and Diplomacy: The U.S. in World Affairs
  Units: 4
- POSC 464 Politics of Russia and Eastern Europe
  Units: 4

Note:
The course taken to fulfill the requirement outside the Slavic department cannot also count as an elective.

Russian Minor

Lower-division requirements for the major plus three upper-division elective courses chosen from the following (at least two of the areas must be represented): Russian language (SLL 310, SLL 340, SLL 420); Russian literature and culture taught in Russian (SLL 321, SLL 465); Russian literature, art and culture taught in translation (SLL 330, SLL 344, SLL 345, SLL 348, SLL 378).

Doctoral Degree

Slavic Languages and Literatures (PhD)

The doctorate in Slavic languages and literatures is designed to prepare students for a career of teaching and scholarship at the university level. It provides a thorough grounding in Russian literary and cultural history as well as in the theoretical perspectives current in the field. Elective course work, particularly at the upper level, allows students to take advantage of the department's expertise in such additional areas as Russian art, Russian theater, and eastern European cinema. The linguistic component of the curriculum together with the experience as a teaching assistant in Russian language courses that many students gain also serves as preparation for positions involving language teaching. Depending on departmental offerings, further study in a second Slavic language and culture may also be possible.

Admission Requirements

An undergraduate major in Russian or its equivalent is a prerequisite for graduate work.

Degree Requirements

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation page and the Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Master of Arts in Slavic Languages and Literatures

The department does not accept applicants for a Master of Arts degree in Slavic Languages and Literatures. The MA degree is intended only as a transitional degree in the process of completing requirements for the PhD in Slavic Languages and Literatures. The MA portion of the program comprises 30 units.

First-year Review

The program conducts a thorough review of all first-year students at the end of the second semester. To be permitted to
Sociology

The Department of Sociology offers bachelor's degrees in sociology, health and the human sciences, and non-governmental organizations and social change. The Department of Sociology also offers a number of minors and the Doctor of Philosophy in Sociology. Students of sociology examine the patterns of social life, focusing on the relationship of individuals to society and the interaction of culture, economy and politics in shaping social life. The greater Los Angeles area provides a natural laboratory for students to explore such sociological themes as race relations, work and the workplace, immigration, the family in a changing society, population trends, globalization, religion and the criminal justice system. Matching the special strengths of our faculty and cutting edge research in the discipline, USC's sociology program offers students the opportunity to learn about social issues locally, nationally, and internationally, as well as develop empirical research tools to conduct research, and analyze and interpret data in order to create social change. Many of our undergraduate courses include opportunities to engage actively with the community and to pursue multi-faceted independent research projects.

Hazel and Stanley Hall 314
(213) 740-3533
FAX: (213) 740-3535

Required MA - Level Courses

- SLL 500 Topics in Advanced Russian: 2
- SLL 501 Proseminar in Russian Literature Units: 3
- SLL 512 History of the Russian Language Units: 3
- SLL 532 18th Century Russian Literature Units: 3
- SLL 546 The Russian Novel Units: 3

Required PhD - Level Courses

- SLL 516 Structure of Modern Russian: Morphology Units: 3
- SLL 545 19th Century Russian Poetry Units: 3
- SLL 550 Russian Modernism Units: 3
- SLL 555 Soviet Literature I (1917–1953) Units: 3

Two of the following courses (6 units):

- SLL 650 Seminar in Russian Literature Units: 3
- SLL 660 Seminar on a Single Author or Work Units: 3
- SLL 665 Seminar in Russian Culture and the Arts Units: 3

Additional Requirements

Plus electives, from SLL or relevant offerings in CSLC, COLT, ENGL, FREN, SPAN etc. as approved by the department. At least 9 of these units must be completed in SLL.

Dissertation Defense

An oral defense of the dissertation must be satisfactorily completed before the dissertation can be filed with the Graduate School.

Awarding of Degree

The degree of PhD in Slavic Languages and Literatures is conferred when all of the degree requirements have been completed satisfactorily.

Chair: Timothy Biblarz, PhD*

Faculty

University Professor, Wallis Annenberg Chair of Communication Technology and Society and Professor of Communication, Sociology, Planning and International Relations: Manuel Castells, PhD (Communications)
Turpanjian Chair in Civil Society and Social Change and Professor of Sociology and American Studies and Ethnicity: Manuel Pastor, PhD*

Professors: Lynne Casper, PhD; Nina Eliasoph, PhD; Pierrette Hondagneu-Sotelo, PhD*; Paul Lichterman, PhD; Michael Messner, PhD*; Dowell Myers, PhD (Policy, Planning and Development); Rhacel Salazar Parreñas, PhD; Camille Rich, JD (Law); Avelardo Valdez, PhD (Social Work); John P. Wilson, PhD

Associate Professors: Timothy Biblarz, PhD*; Jennifer Hook, PhD; Elaine Bell Kaplan, PhD; Andrew Lakoff, PhD; Leland Saito, PhD; Jody Agius Vallejo, PhD*

Assistant Professors: Jennifer Ailshire, PhD (Gerontology); Katie Hasson, PhD; Alwyn Lim, PhD; Ann Owens, PhD; Emily Ryo, PhD (Law); Emily Smith-Greenaway, PhD
Professor (Research): Brian Finch, PhD
Undergraduate Degrees

Honors Program
Seniors with 3.5 GPAs in the major and 3.25 overall are encouraged to participate in the sociology honors program consisting of two intensive senior honors seminars (SO CI 494 and SO CI 495). Under faculty guidance, honors students design and complete a significant piece of original sociological research. Juniors and seniors who have made substantial progress toward completion of the program and have achieved a 3.3 GPA in sociology and a 3.0 GPA overall are eligible for the Alpha Kappa Delta International Sociology Honors Society.

University Requirements for All Minors
To satisfy the university's minor requirements, students must choose at least four courses (16 units) outside their major department and at least four courses (16 units) of upper-division course work. In addition, at least four courses (16 units) must be dedicated to the minor (not counting for credit toward a major, another minor or USC core requirements).

Interdisciplinary Minors
American Studies and Ethnicity (see American Studies and Ethnicity).
Law and Society (see Political Science).
Race, Ethnicity and Politics (see Political Science).

Graduate Degrees
The Department of Sociology offers programs of study leading to the Doctor of Philosophy degree. The PhD is directed toward the training of theoretically and methodologically sophisticated sociologists who have an enduring commitment to the practice and teaching of sociology.

Deadline
Applicants must complete their applications by December 1. Consideration for university fellowships is possible as early as November for students whose applications are complete.

Prerequisites
All applicants must have a bachelor's degree, a GPA of at least 3.0, and one or more courses in either undergraduate statistics or college algebra.

Criteria
Admission to regular graduate status ordinarily requires possession of a bachelor's degree, a GPA of at least 3.0, one or more courses in undergraduate statistics and/or college algebra, and three letters of recommendation. The GRE is also required. International applicants must also submit their score on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS). Approximately 5-8 students enroll each year from the available pool of applicants. Each application receives careful attention and is judged in terms of the full set of criteria.

A limited number of graduate course units taken elsewhere may be considered for transfer into the graduate program. These units are transferred in on a course-by-course basis.

Application Procedures
The following materials should be submitted to apply for graduate study:
1. an online USC application form (available at usc.edu/admission/graduate) plus a check for the admission fee;
2. official transcripts of all undergraduate and graduate work;
3. the official results of the general aptitude scores of the Graduate Record Examinations (verbal, quantitative, and analytical);
4. for international students, a TOEFL or IELTS score;
5. a completed Sociology Department Graduate Application form (please save and upload);
6. one example of written work (normally a paper written for a course) of no more than 20 pages;
7. three letters of recommendation from persons who can write about your academic performance and your potential as a social scientist;
8. a personal statement describing (1) your present sociological interest, (2) the books, articles or ideas that have had the greatest influence on your interests in sociology, and (3) what you hope to be doing in the field of sociology 10 years after you receive your degree. We welcome you to include other aspects of your experience that you think are important sources of your sociological interests. We stress, though, that an effective personal statement will illustrate your intellectual engagement and your interest in producing high-quality scholarship.

Degree Requirements
These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and The Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

Residence
All graduate students must be in residence and must take at least eight units of graduate work each semester (except during Advanced and Qualifying Examinations), prior to work on the dissertation.

Master of Arts in Sociology
The department does not admit students whose objective is a master's degree. However, if a student accepted in the program does not have a master's degree, the department strongly recommends completion of the requirements for the MA in the course of work toward the PhD degree.

Bachelor's Degree

Health and the Human Sciences (BA)
Lower-Division Core Requirements (20 Units)
• BISC 150Lgx The Nature of Human Health and Disease Units: 4 or
• BISC 220Lg General Biology: Cell Biology and Physiology Units: 4

• CHEM 105aLg General Chemistry Units: 4

• MATH 114x Foundations of Statistics Units: 4 or
• MATH 125g Calculus I Units: 4 or
• MATH 208x Elementary Probability and Statistics Units: 4

• PSYC 240gx Scientific Inquiry and Reasoning in Health Care Units: 4

• SOCI 242g Sociology, Demography, and Health Units: 4

**Modules in the Human Sciences (16 Units)**

Choose one module among the six below:

1. **Health, Gender and Ethnicity**
   • ANTH 125g Social Issues in Human Sexuality and Reproduction Units: 4 or
   • SWMS 225 Gender, Sex, and Science: A Gender Studies Approach Units: 4

   • ANTH 305 Childhood, Birth and Reproduction Units: 4
   • PSYC 462m Culture and Mental Health Units: 4

   • SWMS 336 Health, Gender and Ethnicity Units: 4 or
   • SWMS 420 Woman, Nature, Culture: The Behavioral Ecology of Women Units: 4

2. **Health and the Mind**
   • PSYC 100Lg Introduction to Psychology Units: 4
   • PSYC 336L Developmental Psychology Units: 4
   • PSYC 360 Abnormal Psychology Units: 4
   • PSYC 361 Introduction to Clinical Psychology Units: 4

3. **International Health**
   • ANTH 101g Illness and Healing: The Cross-Cultural Perspective Units: 4 or
   • ANTH 105g Culture, Medicine and Politics Units: 4

   • IR 339 Public Health and International Relations Units: 4
   • IR 306 International Organizations Units: 4 or
   • IR 371 Global Civil Society: Non-State Actors in World Politics Units: 4

   • SOCI 362 Global and Transnational Sociology Units: 4

4. **Sociology of Health**

   • SOCI 225gw Sociology of Health and the Body Units: 4
   • SOCI 314 Analyzing Social Statistics Units: 4
   • SOCI 470 Development and Social Change in the Third World Units: 4
   • SOCI 475 Medical Sociology Units: 4

5. **Health and Aging**
   • GERO 320g Psychology of Adult Development Units: 4 or
   • GERO 330 Society and Adult Development Units: 4

   • GERO 340 Policy, Values, and Power in an Aging Society Units: 4 or
   • GERO 437 Social and Psychological Aspects of Death and Dying Units: 2 or 4

   • GERO 380m Diversity in Aging Units: 4 or
   • GERO 435m Women and Aging: Psychological, Social and Political Implications Units: 4

   • GERO 416 Health Issues in Adulthood Units: 4

6. **Biology of Health**
   • BISC 120Lg General Biology: Organismal Biology and Evolution Units: 4
   • HBIO 300 Evolution, Ecology, and Culture Units: 4
   • HBIO 301L Human Anatomy Units: 4
   • HBIO 302 Nutrition and Metabolism Units: 4

**Experiential Learning Component (1-4 Units)**

Choose one course from the list below:

• AMST 365 Leadership in the Community — Internship Units: 4
• GERO 495 Practicum in Geriatric Care Units: 4
• MDA 250 Internship for Liberal Arts: Work and Career — Theory and Practice Units: 1, 2 (4 Units Required)
• POSC 395 Directed Governmental and Political Leadership Internship Units: 2, 3, 4, 5, 6, 7, 8 (4 Units Required)
• SOCI 450 Non-Governmental Organizations/Non-profits Field Practicum Units: 4
• SWMS 311 Gender Studies and the Community: Internship Units: 4

**Upper-Division Electives (8 Units)**

Choose two courses from the list below, or one from this list and one upper-division course from a module not yet chosen, above.

• BISC 499 Special Topics Units: 2, 3, 4 (4 Units Required)
• CHEM 499 Special Topics Units: 2, 3, 4 (4 Units Required)
• HIST 330 Drugs, Disease, and Medicine in History Units: 4
• HBIO 405 Evolutionary Medicine Units: 4
• MDA 320 Global Ethics: Poverty, Health and the Human Condition Units: 4
• MDA 350 Community Health Scan Units: 4
• REL 460 Senior Seminar: Medical Ethics Units: 4
• SOCI 450 Non-Governmental Organizations/Non-profits Field Practicum Units: 4

Total units required for the BA in Health and the Human Sciences: 45-48
(at least 20 upper-division)

Non-Governmental Organizations and Social Change (BA)
This interdisciplinary program focuses on the roots of social conflict, on theories and methods for understanding them, and on the non-governmental organizations (NGOs) and nonprofits that address them. To remedy social problems, we need to examine their economic, political and social roots, as well as the varied forms of organizations that aim to fix them. Students will engage in various methods of analysis, from investigations of everyday interactions to explorations of larger economic, political and social structures. In classrooms and internships, students will learn how people in NGOs and nonprofits promote new forms of citizenship and governance, aiming to protect the environment and to lessen the suffering of people around the world.
The major requires nine courses (36 units) chosen from the specific lists of requirements below. As with all interdisciplinary majors, students may double-count no more than three courses from this degree to satisfy any other major.

Course Requirements

A. Lower division requirement
Choose one course (4 units) from the following list:
• AMST 252gmw Black Social Movements in the U.S. Units: 4
• ECON 238xg Political Economy and Social Issues Units: 4
• ENST 150gx Environmental Issues in Society Units: 4
• ENST 255 American Environmentalism Units: 4
• ENST 270 Introduction to Environmental Law and Politics Units: 4
• GEOL 108Lg Crises of a Planet Units: 4
• IR 101gxw International Relations Units: 4
• IR 210gw International Relations: Introductory Analysis Units: 4
• PHIL 141gp The Professions and the Public Interest in American Life Units: 4

B. Core methods
Choose one course (4 units) from the following two:
• SOCI 313 Sociological Research Methods Units: 4
• SOCI 314 Analyzing Social Statistics Units: 4

C. Core theory
Choose one course (4 units) from the following four:
• PHIL 337 History of Modern Political Philosophy Units: 4
• PHIL 437 Social and Political Philosophy Units: 4
• POSC 380 Political Theories and Social Reform Units: 2 or 4
• SOCI 370 Sociological Theory Units: 4

D. Perspectives on NGOs
Choose one course (4 units) from the following three:
• IR 371 Global Civil Society: Non-State Actors in World Politics Units: 4
• SOCI 250gmw Grassroots Participation in Global Perspective Units: 4
• SOCI 408 Volunteers, Non-Governmental Organizations, and Everyday Politics Units: 4

E. Analyzing and identifying roots of social conflict
Choose two courses (8 units):
• ANTH 355 Urban Anthropology Units: 4
• ANTH 316gmp North American Indians in American Public Life Units: 4
• ANTH 357g Cultures of Genocide Units: 4
• ANTH 371gm Cross-Cultural Research on Urban Gangs Units: 4
• ANTH 380 Sex and Gender in Anthropological Perspective Units: 4
• BISC 427 The Global Environment Units: 4
• ECON 340 Economics of Less Developed Countries Units: 4 *
• ECON 344 Economic Development of Sub-Saharan Africa Units: 4 *
• ECON 350 The World Economy Units: 4 *
• GERO 340 Policy, Values, and Power in an Aging Society Units: 4
• GERO 483 Global Health and Aging Units: 4
• HIST 323 The Holocaust in 20th Century Europe Units: 4
• HIST 372 Modern Latin America Units: 4
• IR 308w Economic Globalization Units: 4
• IR 315 Ethnicity and Nationalism in World Politics Units: 4
• IR 323 Politics of Global Environment Units: 4
• IR 324 Multinational Enterprises and World Politics Units: 4
• IR 325 North-South Relations in the Global Economy Units: 4
• IR 344 Developing Countries in World Politics Units: 4
• IR 349 International Law and Politics Units: 4
• IR 364 The Political Economy of Latin American Development Units: 4
• IR 367 Africa in International Affairs Units: 4
• PHIL 340 Ethics Units: 4
• POSC 320 Urban Politics Units: 4
• POSC 321 Urban Political Problems Units: 4
• POSC 345 International Law Units: 4
• POSC 347 Environmental Law Units: 4
• POSC 350 Politics of Latin America Units: 4
• POSC 363 Cities and Regions in World Politics Units: 4
• POSC 381 Sex, Power, and Politics Units: 4
• POSC 436 Environmental Politics Units: 4
• SOCI 362 Global and Transnational Sociology Units: 4
• SOCI 402 Urban Politics Units: 4
• SOCI 404 Human Trafficking Units: 4
• SOCI 429 Immigration, Work and Labor Units: 4
• SOCI 430m Work and the Workplace Units: 4
• SOCI 432m Racial and Ethnic Relations in a Global Society Units: 4
• SOCI 460 Key Issues in Contemporary International Migration Units: 4
• SOCI 464 Sociology of Gender and Work Units: 4

Note:

*Prerequisite required

F. Addressing social conflict and organizing advocacy

Choose two courses (8 units):

• AMST 357m Latino Social Movements Units: 4

Note:

*Prerequisite required

G. Internship experience

One course (4 units) required

• SOCI 450 Non-Governmental Organizations/Non-profits Field Practicum Units: 4

Total course requirements: 36 units

Sociology (BA)

Ten courses (40 units) are required to complete the major. All sociology majors must complete the five core courses of sociology.

Core Courses

All sociology majors must complete five core courses of sociology.
• SOCI 200gm Introduction to Sociology Units: 4
• SOCI 313 Sociological Research Methods Units: 4
• SOCI 314 Analyzing Social Statistics Units: 4
• SOCI 325 Applied Social Research Methods Units: 4 or
• SSCI 301L Maps and Spatial Reasoning Units: 4
• SOCI 370 Sociological Theory Units: 4

300-level Electives
Three 300-level (or higher) courses are required for the major.
All students must achieve an overall average of C (2.0) or better in the 10 courses required for completion of the major.
• AMST 357m Latino Social Movements Units: 4
• JS 379gm Mixing and Matching: Intermarriage in the 21st Century Units: 4
• JS 382 Judaism as an American Religion Units: 4
• SOCI 305m Sociology of Childhood Units: 4
• SOCI 315 Sociology of Sport Units: 4
• SOCI 320 Social Psychology Units: 4
• SOCI 331 Cities Units: 4
• SOCI 340 Organizations: Bureaucracy and Alternatives to Bureaucracy Units: 4
• SOCI 342m Race Relations Units: 4
• SOCI 345 Social Institutions Units: 4
• SOCI 350 Social Exclusion, Social Power, and Deviance Units: 4
• SOCI 351 Public Policy and Juvenile Justice Units: 4
• SOCI 353 Public Policy and Criminal Justice Units: 4
• SOCI 355m Immigrants in the United States Units: 4
• SOCI 360m Social Inequality: Class, Status, and Power Units: 4
• SOCI 369 The Family in a Changing Society Units: 4
• SOCI 375m Asian Americans: Ethnic Identity Units: 4
• SOCI 376m Contemporary Issues in Asian American Communities Units: 4
• SWMS 385m Men and Masculinity Units: 4

400-level Senior Seminars
Two 400-level (senior seminar) courses are required for the major.
All students must achieve an overall average of C (2.0) or better in the 10 courses required for completion of the major.
• REL 468 Sociology of Religion Units: 4
• SOCI 402 Social Psychology Units: 4
• SOCI 408 Volunteers, Non-Governmental Organizations, and Everyday Politics Units: 4
• SOCI 425 Crowds, Publics, and Social Movements Units: 4
• SOCI 429 Immigration, Work and Labor Units: 4
• SOCI 435m Women in Society Units: 4
• SOCI 437 Sexuality and Society Units: 4
• SOCI 445 Political Sociology Units: 4
• SOCI 450 Non-Governmental Organizations/Non-profits Field Practicum Units: 4
• SOCI 460 Key Issues in Contemporary International Migration Units: 4
• SOCI 464 Sociology of Gender and Work Units: 4
• SOCI 470 Development and Social Change in the Third World Units: 4
• SOCI 480 The Sociology of Risk and Disaster Units: 4
• SOCI 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8
• SOCI 494 Sociology Honors Seminar I Units: 4
• SOCI 495 Sociology Honors Seminar II Units: 4
• SOCI 499 Special Topics Units: 2, 3, 4
• SWMS 455m Gender and Sport Units: 4

Note:
Honors students may substitute SOCI 494 Honors Seminar I for one social inequality course.

Social Change and Public Policy — courses address the character, causes and consequences of social change, paying particular attention to the role of human agency, grassroots organizing and/or political action, as well as the implications for public policy.

Social Change and Public Policy Courses
• JS 382 Judaism as an American Religion Units: 4
• SOCI 320 Social Psychology Units: 4
• SOCI 331 Cities Units: 4
• SOCI 335 Society and Population Units: 4
• SOCI 340 Organizations: Bureaucracy and Alternatives to Bureaucracy Units: 4
• SOCI 351 Public Policy and Juvenile Justice Units: 4
• SOCI 353 Public Policy and Criminal Justice Units: 4
• SOCI 365 Visual Sociology of the City and Its Residents Units: 4
• SOCI 369 The Family in a Changing Society Units: 4
• SOCI 385 Population, Society, and Aging Units: 4
• SOCI 408 Volunteers, Non-Governmental Organizations, and Everyday Politics Units: 4
• SOCI 420 Sociology of Violence Units: 4
• SOCI 425 Crowds, Publics, and Social Movements Units: 4
• SOCI 475 Medical Sociology Units: 4

Note:
Honors students may substitute SOCI 495 Honors Seminar II for one social change and public policy course.

**Minor**

**Forensics and Criminality Minor**
The interdisciplinary minor in forensics and criminality was designed for students interested in the study of law, deviant behavior or careers in the criminal justice system. In this program, students study psychological and/or ethical issues related to criminal behavior, consider criminality in the context of social class analysis, and learn about the American system of criminal justice. Twenty units are required, 4 at the lower-division and 16 at the upper-division level. Contact Dornsife College Advising for further details.

Students should choose a curriculum for their minor based on their academic interests. Those students interested in white collar crime, for example, might choose POSC 130 Law, Politics, and Public Policy at the lower-division level, REL 375 Conflict and Change and the Ethics of Business, SOCI 350 Social Exclusion, Social Power, and Deviance, PHIL 340 Philosophy of Law and PPD 342 Crime and Public Policy.

Those who are interested in the criminal justice system might choose LAW 200x Law and Society, REL 341 Ethics in a Technological Society, SOCI 351 Public Policy and Juvenile Justice, POSC 340 Constitutional Law and POSC 432 The Politics of Local Criminal Justice.

Those interested in individual and social determinants of deviancy might take PSYC 100 Introduction to Psychology, PSYC 360 Abnormal Psychology, or PSYC 363 Criminal Behavior, or PSYC 365 Introduction to Forensic Psychology; SOCI 360 Social Inequality: Class, Status, and Power, LAW 402 Psychology and Law and SOCI 353 Public Policy and Criminal Justice.

**Lower-Division Requirement (4 Units)**
- PHIL 340 Ethics Units: 4

**Choose one course from:**
- AMST 101gmw Race and Class in Los Angeles Units: 4
- LAW 200w Law and Society Units: 4
- POSC 130g Law, Politics and Public Policy Units: 4
- PSYC 100Lg Introduction to Psychology Units: 4
- PSYC 165Lg Drugs, Behavior and Society Units: 4
- SOCI 142gm Diversity and Racial Conflict Units: 4
- SOCI 150gm Social Problems Units: 4
- SOCI 200gm Introduction to Sociology Units: 4

**Upper-Division Requirements (16 Units)**

**Choose one course from each group below:**

**The Individual in Society**
- LAW 404 Law and Psychology: Examining the Criminal Justice Process Units: 4

- LING 412 Language and Law Units: 4
- LING 450 New Horizons in Forensic Speaker Identification Units: 4
- PSYC 355 Social Psychology Units: 4 * or
- SOCI 320 Social Psychology Units: 4
- POSC 441m Cultural Diversity and the Law Units: 4
- PSYC 360 Abnormal Psychology Units: 4 *
- PSYC 363 Criminal Behavior Units: 4 *
- PSYC 365 Introduction to Forensic Psychology Units: 4 *
- REL 341 Technology, Culture, and Ethics Units: 4
- REL 375 Conflict and Change and the Ethics of Business Units: 4

**Note:**
*Prerequisite: PSYC 100*

**Social Class and Criminality**
- ANTH 371gm Cross-Cultural Research on Urban Gangs Units: 4
- SOCI 350 Social Exclusion, Social Power, and Deviance Units: 4
- SOCI 351 Public Policy and Juvenile Justice Units: 4
- SOCI 360m Social Inequality: Class, Status, and Power Units: 4
- SOWK 350 Adolescent Gang Intervention Units: 4

**The System of Criminal Justice**
- LAW 402 Psychology and Law Units: 4
- LAW 403 Mental Health Law Units: 4
- PHIL 430 Philosophy of Law Units: 4
- PHIL 437 Social and Political Philosophy Units: 4
- POSC 340 Constitutional Law Units: 4
- POSC 426 The United States Supreme Court Units: 4
- POSC 444 Civil and Political Rights and Liberties Units: 4
- PPD 340 The American System of Justice Units: 4

**Crime and Punishment**
- POSC 432 Politics of Local Criminal Justice Units: 4
- PPD 342 Crime and Public Policy Units: 4
- SOCI 353 Public Policy and Criminal Justice Units: 4

**Total requirements: five courses (20 units)**

**Managing Human Relations Minor**

College Academic Services Building
This interdisciplinary minor is intended for students in all schools with an interest in human relations as a subject of study or professional goal. In addition to course work in organizational behavior, social psychology and management, this minor includes attention to questions of ethics and leadership.

As with all minors, students must include at least four upper-division courses and four courses dedicated exclusively to this minor (not used for credit toward a major, another minor or general education requirements). Finally, students must select four courses outside their major department. Students seeking the Bachelor of Arts in Sociology must choose four courses outside of sociology; those seeking the Bachelor of Science in Business Administration must choose four courses outside the USC Marshall School of Business.

Requirements

Choose one course from the following (4 units):

- BUAD 304 Organizational Behavior and Leadership Units: 4
- PSYC 355 Social Psychology Units: 4 *
- SOCI 320 Social Psychology Units: 4

Choose one course from the following (4 units):

- MOR 431 Interpersonal Competence and Development Units: 4 *
- PSYC 457* Applied Social Psychology Units: 4
- SOCI 340 Organizations: Bureaucracy and Alternatives to Bureaucracy Units: 4
- SOCI 342m Race Relations Units: 4
- SOCI 345 Social Institutions Units: 4

Choose one course from the following list of classes on leadership (4 units):

- CLAS 370 Leaders and Communities: Classical Models Units: 4
- IR 303 Leadership and Diplomacy Units: 4
- MDA 325 Case Studies in Modern Leadership Units: 2 or 4
- MDA 365 The Art and Adventure of Leadership Units: 4
- MOR 470 Global Leadership Units: 4 *
- PHIL 335 Theoretical Models of Leadership Units: 4

Choose one course from the following list of classes on ethics (4 units):

- BUOC 425 Ethics and Professional Communication Units: 4 *
- MOR 421 Social and Ethical Issues in Business Units: 4 *
- PHIL 340 Ethics Units: 4
- REL 341 Technology, Culture, and Ethics Units: 4
- REL 375 Conflict and Change and the Ethics of Business Units: 4

Choose one of the following three capstone classes (4 units):

- ECON 332 Contracts, Organizations and Institutions Units: 4 *
- ECON 471 Economics of Labor Markets and Human Capital Units: 4 *
- MOR 471 Managing and Developing People Units: 4
- SOCI 340 Organizations: Bureaucracy and Alternatives to Bureaucracy Units: 4

Note:

*Course has prerequisite or corequisite

Total requirements: five courses, 20 units

Photography and Social Change Minor

This minor explores the potential of photography as an instrument of social change that allows individuals to document their circumstances, share their stories and change their lives. Students have the opportunity to examine the impact of images and the power of storytelling both in the classroom and in the field and study the issues raised by this kind of social exploration and commentary. Students learn techniques of digital photography and theories of culture to help them understand diverse cultural phenomena and navigate their own cultural biases. In the field, students apply these techniques and theories by developing their own body of work. In addition, students can mentor individuals in the community to use photography and digital media to share their personal narratives, thus empowering community members to reflect critically upon their circumstances and to participate in their visual representation.

This interdisciplinary minor brings together students from schools and majors across the USC campus, allowing them to interact with one another and with scholars, artists and professionals associated with key organizations such as the Institute for Photographic Empowerment and Venice Arts.

Lower-Division Requirement

Select one course, based on prior preparation (4 units):

- AHIS 255g Culture Wars: Art and Social Conflict in the Modern World Units: 4
- ANTH 240gm Collective Identity and Political Violence: 9/11 Units: 4
- FAIN 210 Introduction to Digital Photography Units: 4
- SOCI 250gmw Grassroots Participation in Global Perspective Units: 4

Upper-Division Requirements
Select two courses in each category below, from different departments (16 units):

**Understanding Culture and Change**
(8 units, in 2 courses — each from a different department)
- AMST 348m Race and Environmentalism Units: 4
- AMST 357m Latino Social Movements Units: 4
- COLT 303 Globalization: Culture, Change, Resistance Units: 4
- IR 371 Global Civil Society: Non-State Actors in World Politics Units: 4
- JS 330 Jewish Power, Powerlessness, and Politics in the Modern Era Units: 4
- POSC 323 Applied Politics Units: 4
- POSC 441m Cultural Diversity and the Law Units: 4
- REL 336 Re-viewing Religion in Asian America Units: 4
- REL 366 Religion and Social Change Units: 4
- SOCI 360m Social Inequality: Class, Status, and Power Units: 4
- SOCI 470 Development and Social Change in the Third World Units: 4

**Media and Message**
(8 units, in 2 courses — each from a different department)
- AHIS 373g History and Theory of Photography Units: 4
- AHIS 469 Critical Approaches to Photography Units: 4
- ANTH 472 Visual Techniques in Anthropology: Stills Units: 4
- COLT 487 Critical Image Units: 4
- COMM 366 Designing Media and Communication Projects for Social Change Units: 4
- COMM 451 Visual Communication and Social Change Units: 4
- JOUR 422 Visual Journalism Units: 4

**Note:**
Students in this program will also have opportunities for special access to USC Annenberg's Public Diplomacy classes.

**Total requirements: 20 units**

**Science, Technology, and Society Minor**
The beginning of the 21st century has witnessed a number of public controversies at the intersection of science, technology and society. Such discussions are characterized by divergent views on the role of science and technology in contemporary life. Over the next decades many of the most crucial challenges we face will require the integration of societal values with scientific and technological developments — whether in managing end-of-life care, preserving the environment, or continuing to nurture scientific innovation. This minor introduces students to a number of approaches to these questions, taking advantage of the diverse offerings in this area at USC.

**Lower-division Requirement (4 units)**
- SOCI 210 Science, Technology and Social Conflict (4)

**Upper-division Requirement (minimum 16 units)**
Four or five* classes, selected from at least two of the three categories:

**Science As A Social Institution**
- AHIS 429 Studies in Art, Science, and Technology Units: 4
- ANTH 373 Magic, Witchcraft and Healing Units: 4
- CLAS 339 Ancient Science Units: 4
- HIST 329 Madness and Society in the Modern Age Units: 4
- HIST 330 Drugs, Disease, and Medicine in History Units: 4
- PHIL 385 Science and Rationality Units: 4
- PHIL 486 Methodologies of the Sciences Units: 4
- REL 442 Religion and Science Units: 4
- SOCI 475 Medical Sociology Units: 4

**Technology And Modern Life**
- COLT 474 Desire, Literature, Technology Units: 4
- COMM 306 Innovation, Entertainment, and the Arts Units: 4
- COMM 340 The Cultures of New Media Units: 4
- COMM 345 Social and Economic Implications of Communication Technologies Units: 4
- CTCS 478 Culture, Technology and Communications Units: 4
- ENGL 375 Science Fiction Units: 4
- REL 319 Religious and Ethical Issues in Death and Dying Units: 4
- REL 341 Technology, Culture, and Ethics Units: 4
- REL 360 Ethical Issues in the New Medical Revolution Units: 4

**Health, Environment and Science Policy**
- CE 469 Sustainable Design and Construction Units: 3 *
- CE 473 Engineering Law, Finance and Ethics Units: 3 *
- HP 412 Health Promotion and Prevention Policy Units: 4
- LAW 403 Mental Health Law Units: 4
- POSC 436 Environmental Politics Units: 4
• PPD 330 Introduction to Health Care Systems
  Units: 4
• PPD 360 Urban Transportation Planning and Policy
  Units: 4
• PPD 413 Administration of Health Care Organizations
  Units: 4
• REL 460 Senior Seminar: Medical Ethics
  Units: 4

Note:
*CE 469 and CE 473 are 3-unit courses; choosing one of these courses requires students to take six total courses for the minor.

Total requirements: five or six courses (minimum 20 units)

Sociology Minor
Five courses (20 units) are required to complete the minor in sociology.
All minors are required to take at least two of the core courses in sociology:
Core Courses
  • SOCI 200gm Introduction to Sociology
    Units: 4
  • SOCI 313 Sociological Research Methods
    Units: 4
  • SOCI 314 Analyzing Social Statistics
    Units: 4
  • SOCI 370 Sociological Theory
    Units: 4

Note:
The remaining three courses may be chosen from among the upper-division courses in the two theme areas — social inequality, and social change and public policy (see sociology theme areas listed above).

Doctoral Degree
Sociology (PhD)
Course Requirements
A minimum of 60 graduate units is necessary for the PhD, among which are the following required courses: SOCI 510, SOCI 520, SOCI 521, SOCI 525, SOCI 511, and SOCI 621 or 620. In addition, each student must specialize in two subareas of sociology and must take at least 8 units in each area such as: urban sociology, complex organizations, stratification, ethnic relations, sociology of aging, medical sociology, communication and culture, deviance, sociology of gender, demography, and so on.

Screening Procedure
Normally, students must complete the screening procedure during the third semester of enrollment. Students will have completed two full semesters of work by this point and, hence, will have taken no fewer than 16 and no more than 32 units, including at least the following: SOCI 510, SOCI 525, and SOCI 511. Students are evaluated on subject matter competence and satisfactory progress. When the screening procedure is successfully completed, the student has one semester in which to form a qualifying exam committee.

Empirical Paper
Each student is required to complete an independent empirical research project which is approved by two members of his or her qualifying exam committee. In some instances, this requirement may be met by acceptance of a satisfactory master's thesis from some other university.

Foreign Language Requirement
The department does not generally require proficiency in a foreign language; however, as with other courses outside the department, a student's qualifying exam committee may in some cases require proficiency in a foreign language.

Qualifying Examinations
Following the completion of their empirical papers and most of their course work, students are required to take a written and oral examination in their two standard areas. If the written examination is passed, the oral part of the examination can be devoted to a preliminary discussion of dissertation plans. When these are completed successfully, the student is advanced to PhD candidacy.

Dissertation
After the dissertation is completed, the student and the dissertation committee, in conjunction with the department chair, may elect either a defense oral or a final oral examination in defense of the dissertation. The defense oral is normally chosen in sociology.

Sophomore Seminars
Sophomore Seminars focus on topics of current interest in research and scholarship. They are small classes that encourage close interaction between faculty and students. During the fall and spring semesters, sophomores earn 2 units of credit through participation in these weekly seminars. During intensive special sessions, sophomores earn 1 unit of credit. These courses emphasize active exploration of the life of the mind through a variety of classroom activities and assignments. To encourage a relaxed interchange of information and ideas, each seminar is graded credit/no credit and limited in enrollment to 18 students. Sophomore Seminars will be offered for the fall and spring semesters in a variety of subjects. They will also be offered during intensive special sessions. Individual topics will be indicated in the Schedule of Classes under the SSEM designation.

Sophomore Seminars
SSEM 200 Sophomore Seminar
Units: 1, 2
Terms Offered: FaSp and Special Sessions
Special seminar courses for sophomores; limited to 18 students; topics will vary;
Instruction Mode: Lecture
Grading Option: Credit/No Credit
Spanish and Portuguese

The Department of Spanish and Portuguese offers both a major and a minor in Spanish, emphasizing the language, linguistics and culture of Spain and Latin America. With an intellectual commitment to multiculturalism and interdisciplinary, the undergraduate program actively explores the transnational intersection of various aspects of Spanish and Latin American culture, including literature, folklore, cinema, art, music and architecture. While living and studying in 21st century Los Angeles — the ideal site for thinking about the planet’s increasingly transculural condition — students are challenged to consider and reconsider a number of important issues including: the growing importance of popular culture in Iberia, Latin America and Latino USA; the role of race, class and gender within Spanish and Latin American society; and the crucial impact of diasporas and migrations on our contemporary cultural landscape.

The department encourages students to combine a Spanish major with a double major or minor in another discipline either within the USC Dornsife College of Letters, Arts and Sciences or other schools at USC. Faculty undergraduate advisers are available to help provide information and assistance to students wishing to explore these various options.

The department also offers basic language instruction in both Spanish and Portuguese through which students can satisfy their foreign language requirement.

Faculty

Professors: Erin Graff Zivin, PhD; Sherry Marie Velasco, PhD
Associate Professors: Roberto Ignacio Diaz, PhD*; Julián Daniel Gutiérrez-Albilla, PhD
Assistant Professors: Brenno Kenji Kaneyasu-Maranhao, PhD; Natalia Perez, PhD; Samuel Steinberg, PhD
Associate Professors (Teaching): Marianna Chodorowska-Plich, PhD; Consuelo Siguenza-Ortiz, PhD; Liana Stepanyan, PhD
Assistant Professors (Teaching): Vianey Cano Brito Cabrera, PhD; Carolina Castillo Larrea, MA; Maura Crowley, PhD; Gayle Fiedler Vierna, PhD; Ivette M. Gómez, PhD; Anahit Hakouapian, PhD; Leah Kemp, PhD; Ana Teresa Martínez-Sequeira, PhD; Ellen Oliveira, PhD; Andrea Parra, PhD; Charles Paus, PhD; David Zarazúa, PhD
Master Lecturer: Lorena Gallego, MA
Senior Lecturer: Maria Fages Agudo
Lecturers: Jaelyn Cohen-Steinberg, PhD; Marie Enright, PhD; Jamie Fudacz, PhD; Lori Mesrobian, PhD; Martin Ocon-Gamarra, PhD; Karen Perez, PhD; Sarah Portnoy, PhD; Natalie Thurman, PhD; Maria Del Mar Windeler, PhD

Emeritus Professors: Paul Ilie, PhD; Carmen Silva-Corvalán, PhD*
Emeritus Associate Professor: J. Ramón Araluze, PhD
*Recipient of university-wide or college teaching award.

Undergraduate Degrees

General Information

Spanish Language Proficiency Examination
Students with previous exposure to Spanish are required to take a placement test, administered by the Dornsife Language Center. Students with no record of previous exposure to Spanish are not required to take the placement examination and should contact the department for assistance.

Courses in Spanish
All courses at the 200, 300 and 400 levels are conducted in Spanish unless otherwise noted in the course descriptions that follow. Courses are kept small to allow for maximum interaction between students and professors.

Advisement
A college undergraduate adviser is assigned to provide academic advisement prior to registration and throughout the academic year.

Honors Program
The BA in Spanish with Honors is available to students who have a GPA of at least 3.5 in courses counted for major credit and an overall GPA of 3.0 (by the time of graduation). Desire to complete the major with honors typically should be approved by a department faculty member no later than the second semester of the junior year. To complete the honors program the student must write an honors thesis in Spanish in conjunction with a 400-level course. The thesis, in the range of 25–30 pages (6,250–7,500 words), must be endorsed by a departmental honors committee by April 1 of the senior year.

Spanish Undergraduate Students Association (USA)
Students majoring or minoring in Spanish are eligible to join USA, the Spanish Undergraduate Students Association. Each year USA sponsors a variety of activities which enrich the cultural, intellectual and academic experience of the undergraduate student.

Graduate Degrees

The PhD in Linguistics (Hispanic Linguistics) is offered through the Linguistics Department. See here for degree requirements. The MA and PhD, Comparative Studies in Literature and Culture (Spanish and Latin American Studies) are offered through the Comparative Studies in Literature and Culture program. See here for degree requirements.

Certificate in Foreign Language Teaching
The Certificate in Foreign Language Teaching provides certification in the theory and practice of second or foreign language teaching for student language teachers concurrently enrolled in graduate degree programs in foreign languages or related graduate programs at USC; for graduates of such programs who are teaching languages; for external candidates concurrently enrolled in similar programs in accredited...
colleges or universities; or for graduates of such programs who are teaching languages. The certificate is meant to supplement graduate study in the literature or linguistics of foreign languages. It is also meant to supplement classroom teaching. Therefore all candidates for this certificate are required to have taught a second or foreign language for at least one academic year at USC or elsewhere. At USC, this requirement and the course work requirements can be fulfilled concurrently, but external candidates are required to show proof of such teaching experience as a condition of admission.

In addition to teaching, certificate candidates must complete a minimum of four courses (minimum of 12 units) in four areas of study — linguistics, language acquisition, language teaching methodology, and the teaching of literacy or the literature or culture of a second or foreign language.

**Requirements for Completion**

The program consists of a practicum and a minimum of four courses: one each in linguistics, language acquisition, language teaching methods, and the teaching of literacy, literature or culture.

**Linguistics:** (minimum of 3 units) LING 411 Language and Education or, with permission of instructor, an appropriate course in the linguistics of a particular language.

**Language Acquisition:** (minimum of 3 units) LING 527 Second Language Acquisition or an appropriate alternative course.

**Language Teaching Methods:** (minimum of 3 units) MDA 593 Practicum in Teaching the Liberal Arts or EALC 562 Teaching of the East Asian Languages or SPAN 511 Techniques and Procedures of Teaching Spanish as a Second Language or an appropriate alternative course.

**Literacy/Literature/Culture:** (minimum of 3 units) An appropriate course in teaching of the literature or culture of a particular language.

**Bachelor's Degree**

**Spanish (BA)**

**Required Courses - Lower Division (8 Units)**

- SPAN 260 Advanced Spanish: Arts and Sciences Units: 4 **
- SPAN 261 Advanced Spanish: Society and the Media Units: 4 **

**Required Courses - Upper Division (16 Units)**

Four of the following courses:

- SPAN 301 Introduction to Hispanic Literature and Film Units: 4
- SPAN 310 Structure of Spanish Units: 4
- One other SPAN literature, culture, film course Units: 4
- One 400-level SPAN course Units: 4

**Electives (16 units):**

Four other upper-division SPAN courses.

Only one section of SPAN 316x may be taken for major or minor credit.

**Note:**

*Majors and minors may request a waiver of one or both courses (SPAN 260 and/or SPAN 261) if they meet one or more of the following prerequisites: a) a score of 5 on the Spanish language or literature advanced placement (AP) exam; b) a score of 6 or 7 on the Spanish International Baccalaureate Higher-Level exam (IBHL); c) a score of 800 in the Spanish SAT subject exam; or d) demonstrate advanced proficiency in spoken and written Spanish. Departmental approval is required in every case.

**SPAN 260 and SPAN 261 may be taken concurrently. The second of these courses may be taken concurrently with a 300-level course.**

**Minor**

**Latin American Studies Minor**

The Latin American Studies minor recognizes the lasting importance of U.S.-Latin American relations. The overriding goal is to encourage students to learn more about Latin America by combining conceptual, area and language studies during their time at USC. The purpose of this 20-unit minor is to deepen students' knowledge of Latin America by offering courses from multiple disciplines within a context of close faculty guidance. The gateway requirement of one 4-unit course provides the student with options in both humanities and the social sciences, and the designated electives are similarly meant to allow students to blend these specialties.

For fulfillment of the requirements for the minor a student must choose four classes outside of his or her major department dedicated exclusively to the minor (which may be the same four classes). After the gateway course, these elective courses must be spread across at least two disciplines and/or departments.

**Required Courses**

One of the following 4-unit gateway introductory courses:

- COLT 250g Cultures of Latin America Units: 4
- HIST 273g Colonial Latin America Units: 4
- HIST 372 Modern Latin America Units: 4
- IR 364 The Political Economy of Latin American Development Units: 4
- IR 365 Politics and Democracy in Latin America Units: 4
- POSC 350 Politics of Latin America Units: 4

**Note:**

If the student has chosen a lower-division (100- or 200-level) course among the introductory choices, all area electives must be at the upper-division (300- or 400-) level.

**Elective Requirements**

Four courses (16 units) from the following list:

- AHIS 127g Arts of the Ancient Americas Units: 4
- AHIS 128g Arts of Latin America Units: 4

475
• AHIS 318 Arts of the Ancient Andes Units: 4
• AHIS 319 Mesoamerican Art and Culture Units: 4
• AMST 448m Chicano and Latino Literature Units: 4
• ANTH 425 Peoples and Cultures of Latin America Units: 4
• COLT 250g Cultures of Latin America Units: 4
• ECON 340 Economics of Less Developed Countries Units: 4
• HIST 370 Spanish America, 1492–1821 Units: 4
• HIST 371 Culture in Diaspora: The Jews of Spain Units: 4
• HIST 372 Modern Latin America Units: 4
• HIST 374 History of Mexico Units: 4
• HIST 451 The Mexican Revolution Units: 4
• HIST 456 Race, Slavery, and the Making of the Atlantic World Units: 4
• HIST 470 The Spanish Inquisition in the Early Modern Hispanic World Units: 4, 2 years
• HIST 473 Colonial Latin America Seminar Units: 4
• HIST 474 Sex, Gender, and Colonialism in Latin America, 1492 to 1820 Units: 4, 2 years
• IR 364 The Political Economy of Latin American Development Units: 4
• IR 365 Politics and Democracy in Latin America Units: 4
• IR 408 Global Democratization Units: 4
• IR 426 Trade Politics in the Western Hemisphere Units: 4
• IR 454 The International Political Economy of Development Units: 4
• IR 465 Contemporary Issues in United States-Latin America Relations Units: 4
• IR 466 Contemporary Issues in Latin American Politics Units: 4
• PORT 250g Cultures of Brazil and Lusophone Africa Units: 4
• POSC 350 Politics of Latin America Units: 4
• POSC 430 Political Economy of Mexico Units: 4
• POSC 431 Political Economy of Central America Units: 4
• SOCI 366m Chicana and Latina Sociology Units: 4
• SOCI 420 Sociology of Violence Units: 4
• SPAN 320 Iberian and Latin American Cultures: Readings on Society Units: 4
• SPAN 321 Iberian and Latin American Cultures: Readings on the Arts Units: 4
• SPAN 372 Modern and Contemporary Latin American Fiction Units: 4
• SPAN 462 Literary Cartographies of Latin America and Spain, 1810–1898 Units: 4
• SPAN 495 Seminar for Majors and Minors Units: 4

**Luso-Brazilian Studies Minor**

The Luso-Brazilian Studies minor offers students the opportunity to further the study of the Portuguese language and take significant steps toward its mastery both as a richly layered expressive tool in the contexts of literary and cultural analysis and in the interpretation and articulation of critical thinking, as well as a highly effective instrument tailored to the practical needs of business interactions in a world that is increasingly more diverse and globalized.

Building on a solid basis of four semesters of Portuguese language (or equivalent), which serves as a prerequisite for the Luso-Brazilian Studies minor, students will have the opportunity to choose from a rich selection of core courses spanning cultural, literary and social aspects of the Portuguese-speaking world, as well as Portuguese applied to the context of professions. In addition to the core offerings, students will be able to choose from a wide array of electives in order to fulfill the required number of units for the Luso-Brazilian Studies minor, as well as have the opportunity to fulfill some of the requirements in one of the exciting Study Abroad options in Brazil.

The Luso-Brazilian Studies minor will require 20 units beyond the basic language requirements.

**Required Courses (8-units): select two of the following three courses**

- PORT 300 Introduction to Social and Literary Studies Units: 4
- PORT 302 Introduction to Brazilian Literature Units: 4
- PORT 316 Portuguese for Business and the Professions Units: 4

**Elective Courses (12-units): select three from the following list**

A total of 12-units of courses should be selected with the guidance of the director of the Luso-Brazilian Studies program. The following courses are among the elective options:

- PORT 342 Brazilian Cinema Units: 4
- SPAN 372 Modern and Contemporary Latin American Fiction Units: 4
- SPAN 405 History of the Spanish and Portuguese Languages Units: 4
- SPAN 482 Literature and the City Units: 4

**Note:**

Study Abroad courses and courses offered by other departments at USC may also count as elective options, as long as a Portuguese-speaking country and/or the Lusophone world is among the objects of study. (The following list of courses is subject to change, according to course availability.)

- AMST 353m Race and Racism in the Americas Units: 4

---

476
The programs and courses affiliated with the Spatial Sciences Institute explore the various ways in which space is used to acquire, represent, organize, analyze, model and visualize information. They seek to engage students enrolled in a range of academic programs in the natural and social sciences, the humanities and the professional schools. The Bachelor of Science in GeoDesign is an interdisciplinary major offered by the Dornsife College of Letters, Arts and Sciences, the USC School of Architecture and the USC Price School of Public Policy. This degree prepares students for professional careers and/or graduate study.

The undergraduate minor in spatial studies explores how maps and related geospatial techniques may be used to describe, explore and interpret specific places and the natural and human processes. The MS in Geographic Information Science and Technology provides state-of-the-art training in the core geographic information technologies (GIS, GPS and remote sensing, among others) and the underlying scientific principles and concepts that guide their design and use. This is an online program and may be taken by undergraduate students majoring in other disciplines as a progressive master's degree.

The Graduate Certificate in Geographic Information Science and Technology incorporates the same online core courses and electives as the master's degree and may be taken by master's and doctoral students majoring in other disciplines.

Email: spatialsciences@dornsife.usc.edu
Director: John P. Wilson, PhD
Associate Director: Susan Kamei, JD
Faculty
Professors: Myles Cockburn, PhD (Preventive Medicine); Maged Dessouky, PhD (Industrial and Systems Engineering); Philip Ettington, PhD (History); Matthew E. Kahn, PhD (Economics); Kelly Shannon, PhD (Architecture); John P. Wilson, PhD (Sociology)*
Associate Professors: Francois Bar, PhD (Communications); Elizabeth Currid-Halkett, PhD (Public Policy); Jennifer Hook, PhD (Sociology); Lon Kurashige (History); Mandour Rahimi, PhD (Industrial and Systems Engineering)
Assistant Professors: Jennifer Ailshire, PhD (Gerontology); George Bank-Weiss, PhD (Civil & Environmental Engineering); Meredith Franklin, PhD (Preventive Medicine); Travis R. Longeore, PhD (Architecture); Ann Owens, PhD (Sociology); Nathan Perl-Rosenthal, PhD (History); Alexander Robinson, PhD (Architecture); Kelly Sanders, PhD (Civil & Environmental Engineering); Emily Smith-Greenaway, PhD (Sociology)
Professors of the Practice of Spatial Science: Steven D. Fleming, PhD; Karen K. Kemp, PhD
Professors (Research): Brian Finch, PhD (Sociology); Craig Knoblock, PhD (Computer Science)
Associate Professor (Research): Tatiana Tatarinova, PhD (Pediatrics)
Associate Professor (Teaching): Jennifer N. Swift, PhD
Assistant Professor (Research): Yao-Yi Chiang, PhD

Spatial Sciences Institute

The programs and courses affiliated with the Spatial Sciences Institute explore the various ways in which space is used to acquire, represent, organize, analyze, model and visualize information. They seek to engage students enrolled in a range of academic programs in the natural and social sciences, the humanities and the professional schools. The Bachelor of Science in GeoDesign is an interdisciplinary major offered by the Dornsife College of Letters, Arts and Sciences, the USC School of Architecture and the USC Price School of Public Policy. This degree prepares students for professional careers and/or graduate study.

The undergraduate minor in spatial studies explores how maps and related geospatial techniques may be used to describe, explore and interpret specific places and the natural and human processes. The MS in Geographic Information Science and Technology provides state-of-the-art training in the core geographic information technologies (GIS, GPS and remote sensing, among others) and the underlying scientific principles and concepts that guide their design and use. This is an online program and may be taken by undergraduate students majoring in other disciplines as a progressive master's degree.

The Graduate Certificate in Geographic Information Science and Technology incorporates the same online core courses and electives as the master's degree and may be taken by master's and doctoral students majoring in other disciplines.

Spanish Minor
Required Courses - Lower-Division (8 Units)
• SPAN 265 Spanish for Communication: Society and the Media Units: 4

Upper-Division (16 Units)
• Any four courses at the 300- or 400-level

Basic Language**
• SPAN 120 Spanish I Units: 4
• SPAN 150 Spanish II Units: 4
• SPAN 220 Spanish III Units: 4

Note:
*The second 260-type course may be taken concurrently with upper-division courses.
Majors and minors may request a waiver of one or both courses (SPAN 265 and/or SPAN 266) if they meet one or more of the following prerequisites: a) a score of 5 on the Spanish language or literature advanced placement (AP) exam, b) a score of 6 or 7 on the Spanish International Baccalaureate Higher-Level exam (IBHL), c) a score of 800 in the Spanish SAT subject exam or d) demonstration of advanced proficiency in spoken and written Spanish. Departmental approval is required in every case. SPAN 265 and SPAN 266 may be taken concurrently. The second of these courses may be taken concurrently with a 300-level course.
how maps and related geospatial techniques may be used to describe, explore and interpret specific places and the natural and human processes that help to shape them.

Graduate Degrees
The online MS in Geographic Information Science and Technology provides state-of-the-art training in the core geographic information technologies (GIS, GPS and remote sensing, among others) and the underlying scientific principles and concepts that guide their design and use. This MS may be taken by undergraduate students majoring in other disciplines as a progressive master's degree. The Graduate Certificate in Geographic Information Science and Technology incorporates the same online core courses and electives as the MS. The online graduate certificates in Geospatial Intelligence and Geospatial Leadership include some of the same online courses and specialized courses focused on a variety of human security problems and challenges and leadership principles, respectively. All three of these online graduate certificates may be taken by master's and doctoral students in other disciplines. The courses in these online programs are offered year-round and students can start these programs in the fall, spring or summer semesters.

Students interested in the GeoHealth track in the Keck School of Medicine's online MPH degree should contact the Department of Preventive Medicine and those interested in the MS in Spatial Informatics should contact the Department of Computer Science.

The Graduate Certificate in Spatial Analytics provides doctoral students with customized opportunities to learn about the fundamental geographic information science principles and a series of rapidly evolving geospatial technologies that take advantage of the Cloud and the Web along with advances in analytical techniques, modeling tools and online geographic data sources. The learning goals and outcomes in the courses that contribute to this certificate can be customized to match the student's disciplinary interests and research needs.

The Spatial Sciences Institute also serves as the administrative lead for the PhD in Population, Health and Place (PHP). This interdisciplinary doctoral program draws on faculty and courses in the departments of Preventive Medicine and Sociology as well as the Spatial Sciences Institute. The students in this program will take core courses that span the population sciences, public health and the spatial sciences as well as electives guided by their prior academic training and research interests. This one-of-a-kind interdisciplinary doctoral program provides training for careers in research, teaching and applied work.

PhD Admission Requirements
The courses required for admission are an introductory geography or sociology course, a course in statistics, a course in research methods or experimental design and at least one course from each of the following lists: (1) one or more of social demography, society and population, medical sociology; (2) one or more of cartography, human geography, medical geography, spatial analysis; and (3) one or more of climatology, hydrology, environment and health. Additional courses are desirable, as is work in the biological, physical and social sciences, in mathematics and in philosophy.

Students with less background in public health, sociology or
the spatial sciences, but outstanding undergraduate records in related fields are also encouraged to apply. Students are selected on the basis of undergraduate records, scores on the Graduate Record Examinations' General Test, course background, three letters of evaluation, personal statement of interests and goals, and evidence of research skills or interests (e.g., publications or participation in research projects).

Application for admission to the PhD Program in Population, Health and Place requires submission of two sets of material: special program forms and university application forms. Students are admitted only for study beginning in the fall semester; both sets of completed application forms must be submitted by December 1 for admission the following fall.

**Degree Requirements**

These degrees are under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the The Graduate School section of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

**Bachelor's Degree**

**GeoDesign (BS)**

The Bachelor of Science in GeoDesign is an interdisciplinary major offered by the Dornsife College of Letters, Arts and Sciences, the USC School of Architecture, and the USC Price School of Public Policy. This degree prepares students for professional careers and/or graduate study by engaging them in the acquisition, representation, analysis, modeling and visualization of spatial information set in the context of the built environment and policy. The underlying spatial principles, methods and tools can be used to support sustainable planning, facility and infrastructure management, the design of livable and healthy communities, and a series of regional planning applications to address pollution, water and energy needs, and the impact of population growth on the environment. The major electives provide students with opportunities to explore one or more facets of the built environment and a series of complementary analytical and visualization tools in more detail. Finally, the major is structured to provide students with sufficient elective credits to explore minors or other programs at USC so they can broaden their education to better prepare themselves for the next stage of their lives.

**General Education Requirements**

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core.

**Major Requirements**

A minimum grade of C, 2.0 (A = 4.0) must be earned in each of the core courses and the capstone course. In addition, a minimum grade point average of C (2.0) or higher must be achieved in the major to earn the geodesign degree. No more than 16 units of core courses may be taken prior to the successful completion of the geodesign pre-major requirements.

**Pre-major Requirements**

Both pre-major requirements must be taken for a letter grade and a minimum grade of C, 2.0 (A = 4.0), must be earned in each of the pre-major courses.

**Pre-Major Courses (8 Units)**

- ECON 203g Principles of Microeconomics Units: 4
- MATH 116 Mathematics for the Social Sciences Units: 4

**Core Courses + Capstone Course (44 Units)**

- ARCH 203 Visualizing and Experiencing the Built Environment Units: 4
- ARCH 303 Principles of Spatial Design I Units: 4
- ARCH 403 Principles of Spatial Design II Units: 4
- PPD 227 Urban Planning and Development Units: 4
- RED 417 History of Planning and Development Units: 4
- RED 425 Designing Livable Communities Units: 4
- SOCI 314 Analyzing Social Statistics Units: 4
- SSCI 301L Maps and Spatial Reasoning Units: 4
- SSCI 382L Principles of Geographic Information Science Units: 4
- SSCI 412L GeoDesign Practicum Units: 4 (capstone course)
- SSCI 483L Spatial Science Practicum Units: 4

**Additional Requirements**

**Capstone Course**

All students will take four units of a capstone experience during their senior year. This may be fulfilled by taking SSCI 412L GeoDesign Practicum (4 units) which may be offered by any of the three units cross-listed (SSCI, ARCH, PPD) and will require students to use their knowledge and skills on a real project with a real client.

**Major Electives (24 Units)**

A suite of courses that further the development of practical, theoretical, and field knowledge and skills, including computer graphics, drawing, policy analysis, public finance, and statistics. Choose additional electives from the two lists equal to at least six courses (24 units) in all. At least two courses must come from Group A and two courses from Group B.

**Group A: Built Environment**

- ARCH 361L Ecological Factors in Design Units: 3
- ARCH 432 People, Places and Culture: Architecture of the Public Realm Units: 4
- HIST 347 Urbanization in the American Experience Units: 4
• POSC 363 Cities and Regions in World Politics Units: 4
• PPD 361 Sustainable Communities, Policy and Planning Units: 4
• PPD 410 Comparative Urban Development Units: 4
• PPD 420 Environmental Impact Assessment Units: 4
• SOCI 331 Cities Units: 4

Group B: Design, Analysis And Computation
• ANTH 481L GIS for Archaeologists Units: 4
• ARCH 307 Digital Tools for Architecture Units: 3
• ARCH 370 Architectural Studies — Expanding the Field Units: 2
• FADN 102 Design Fundamentals Units: 4
• HIST 393g Quantitative Historical Analysis Units: 4
• PPD 306 Visual Methods in Policy, Management, Planning and Development Units: 4
• PPD 427L Geographic Information Systems and Planning Applications Units: 4
• SOCI 365 Visual Sociology of the City and Its Residents Units: 4

Additional Requirements
Honors
Candidates for the BS in GeoDesign can receive an honors degree by meeting these requirements: a 3.7 GPA in department courses at the time of graduation; completion of an honors research project or thesis under the guidance of a faculty member (SSCI 412L). Admission to the program is granted by the departmental undergraduate adviser in the semester preceding enrollment in SSCI 412L; students should have a 3.7 GPA in the major at this time.

Minor
Human Security and Geospatial Intelligence Minor
The interdisciplinary minor in Human Security and Geospatial Intelligence aims to educate future leaders in location-based analytics to gather, interpret, and implement actionable intelligence to promote human security and serves to connect many collaborative and interrelated disciplines to provide a framework for students interested in learning how to develop and deliver analytical and spatial solutions.

Lower-Division Elective (4 units)
• ENST 100g Introduction to Environmental Studies Units: 4
• GEOL 108Lg Crises of a Planet Units: 4
• IR 100gx The United States and World Affairs Units: 4
• IR 101gxw International Relations Units: 4
• IR 210gw International Relations: Introductory Analysis Units: 4

Required Core (12 units)
• IR 381 Introduction to International Security Units: 4
• SSCI 301L Maps and Spatial Reasoning Units: 4
• SSCI 401L Geospatial Intelligence Units: 4

Upper-Division Elective (4 units)
• AEST 400a Aerospace Studies IV: National Security Forces in Contemporary American Society Units: 3
• AEST 400b Aerospace Studies IV: National Security Forces in Contemporary American Society Units: 3
• IR 304 Espionage and Intelligence Units: 4
• IR 386 Terrorism and Counterterrorism Units: 4
• MDES 314 Political Thought in the Middle East Units: 4
• MS 401 Leadership and Management I Units: 3
• MS 402 Leadership and Management II Units: 3
• NSC 453 Leadership and Management I Units: 2
• NSC 454 Leadership and Management II Units: 2
• POSC 351 Middle East Politics Units: 4
• SSCI 382L Principles of Geographic Information Science Units: 4

Note:
ROTC courses (AEST, MS, NSC) are not open to non-ROTC students.

Spatial Studies Minor
The spatial studies minor requires a minimum of 20 units, consisting of one lower-division elective, three required courses and an upper-division elective. The minor offers students an opportunity to examine some of the major challenges of the 21st century (climate change, human health and sustainability, urbanization and cultural homogenization, among others) through a spatial lens.

Required Courses (12 Units)
• SSCI 301L Maps and Spatial Reasoning Units: 4
• SSCI 382L Principles of Geographic Information Science Units: 4
• SSCI 483L Spatial Science Practicum Units: 4

Lower-Division Electives (4 Units)
• ANTH 201g Principles of Human Organization Units: 4
• ANTH 202g Archaeology: Our Human Past Units: 4
• ARCH 105L Fundamentals of Design Communication Units: 2
• ARCH 114 Architecture: Culture and Community Units: 2
• ARCH 220 The Architect's Sketchbook Units: 2
• BISC 102Lgx Humans and Their Environment Units: 4
• BISC 140 Our Blue Planet in a Changing Climate Units: 4
• CLAS 212L Archaeology: Interpreting the Past Units: 4
• GEOL 108Lg Crises of a Planet Units: 4
• GEOL 150Lg Climate Change Units: 4
• HIST 240gp The History of California Units: 4
• POSC 265gw Environmental Challenges Units: 4
• PPD 245g The Urban Context for Policy and Planning Units: 4
• SOCI 100gm Los Angeles and the American Dream Units: 4
• SOCI 200gm Introduction to Sociology Units: 4
• SSCI 265Lg The Water Planet Units: 4
• SSCI 135Lg Maps in the Digital World Units: 4
• SSCI 165Lgw Sustainability Science in the City Units: 4

Upper-Division Electives (4 Units)
• ANTH 481L GIS for Archaeologists Units: 4
• ARCH 432 People, Places and Culture: Architecture of the Public Realm Units: 4
• JOUR 422 Visual Journalism Units: 4
• PPD 306 Visual Methods in Policy, Management, Planning and Development Units: 4
• PPD 427L Geographic Information Systems and Planning Applications Units: 4
• SOCI 314 Analyzing Social Statistics Units: 4
• SOCI 365 Visual Sociology of the City and Its Residents Units: 4
• SSCI 397 Spatial Sciences Internship Units: 2, 3, 4

Master's Degree

Geographic Information Science and Technology (MS)
AHF B55B
(213) 740-8298

Email: watsonke@usc.edu
Director: John P. Wilson, PhD
The online MS in Geographic Information Science and Technology requires 28 units of graduate work and provides state-of-the-art training in the core geographic information technologies (geographic information systems, global positioning systems and remote sensing, among others) and the underlying scientific principles and concepts that guide their design and use. The individual courses incorporate multiple curricular pathways tailored to the increasingly diverse backgrounds, occupations and applications that rely on geospatial data, analysis and visualization.

Course Requirements
Twenty-eight units of graduate work are required.

Core Courses (16 Units)
• SSCI 581 Concepts for Spatial Thinking Units: 4
• SSCI 582 Spatial Databases Units: 4
• SSCI 587 Spatial Data Acquisition Units: 4
• SSCI 594a Master's Thesis Units: 2
• SSCI 594b Master's Thesis Units: 2

Electives (12 Units)
• SSCI 583 Spatial Analysis Units: 4
• SSCI 584 Spatial Modeling Units: 4
• SSCI 585 Geospatial Technology Project Management Units: 4
• SSCI 586 GIS Programming and Customization Units: 4
• SSCI 588 Remote Sensing for GIS Units: 4
• SSCI 589 Cartography and Visualization Units: 4
• SSCI 591 Web GIS Units: 4
• SSCI 592 Mobile GIS Units: 4
• SSCI 593 Geospatial Data Integration Units: 4

Additional Requirements
All electives are chosen in direct consultation with the student's academic adviser based on background, academic interests, etc. The courses in this program are open to students living and/or working anywhere, including students at USC's Los Angeles, Orange County, Sacramento and Washington, D.C. centers. The master's program can be completed in two to three years as long as students take one or two courses in each of the fall, spring and summer semesters. Continuous enrollment in the fall, spring and summer terms is required in this program, including SSCI 594abz summer registration.

Admission Requirements
Four groups of students are served by this program:
1. New students who wish to apply directly to the geographic information science and technology master's program.
2. Students currently enrolled in the geographic information science and technology graduate certificate program since this certificate program may serve as a possible "stepping stone" toward the master's program.
3. Students currently matriculated in a USC master's or doctoral degree program.
4. USC undergraduate students who want to stay for a fifth year and earn both bachelor's and master's degrees.

Candidates for admission among the first two groups of students must have: (1) a BA or BS degree or its international equivalent; (2) a minimum 3.0 GPA (A = 4.0). All course work taken at the undergraduate level is used to calculate the GPA. Exceptions will be made in cases of very high GRE scores or some other compelling evidence of potential to excel in graduate studies (e.g., outstanding letters of recommendation). Preference will be given to candidates with significant professional experience working with geographic information systems and related geospatial technologies.

**Application Procedures**

Applicants are required to submit the following documents: (1) completed application for admission, which can be found online at usc.edu/admission/graduate; (2) statement of purpose; (3) a writing sample; (4) official transcripts from all schools previously attended; (5) two letters of recommendation; and (6) results of the GRE General Test. International students must submit TOEFL scores with a minimum score of 100 on the Internet based examination, or an IELTS score of 7.

The statement of purpose should be uploaded into the online application. This statement should: (1) describe the student's motivation, field of interest and career goals; and (2) identify potential projects that the student might pursue for the master's thesis project. The master's program utilizes rolling admissions and enrollment based on the standard academic calendar. This means that students may start the program in either the fall, spring or summer semesters. Those interested in learning more about this program should contact Kate Kelsey, University of Southern California, 3616 Trousdale Parkway, AHF B55B, Los Angeles, CA 90089-0374.

**University Certificate**

**Geographic Information Science and Technology Graduate Certificate**

**AHF B55B**

(213) 740-8298

**Email:** Watsonke@usc.edu

**Director:** John P. Wilson, PhD

The online Graduate Certificate in Geographic Information Science and Technology requires 16 units of graduate work and provides state-of-the-art training in some of the core geographic information science technologies and the underlying scientific principles and concepts that guide their design and use.

**Course Requirements**

Sixteen units of graduate work are required.

**Core Courses (12 Units)**

- SSCI 581 Concepts for Spatial Thinking Units: 4
- SSCI 582 Spatial Databases Units: 4
- SSCI 587 Spatial Data Acquisition Units: 4

**Electives (4 Units)**

- SSCI 583 Spatial Analysis Units: 4
- SSCI 584 Spatial Modeling Units: 4
- SSCI 585 Geospatial Technology Project Management Units: 4
- SSCI 586 GIS Programming and Customization Units: 4
- SSCI 588 Remote Sensing for GIS Units: 4
- SSCI 589 Cartography and Visualization Units: 4
- SSCI 591 Web GIS Units: 4
- SSCI 592 Mobile GIS Units: 4
- SSCI 593 Geospatial Data Integration Units: 4

**Note:**

The courses in this program are open to students living and/or working anywhere, including students at USC's Los Angeles, Orange County, Sacramento and Washington, D.C. centers. The certificate program can be completed in one to two years as long as students take one or two courses in each of the fall, spring and summer semesters. The graduate certificate program can serve as a possible "stepping stone" toward the geographic information science and technology master's degree program. Continuous enrollment in the fall, spring and summer terms is required in this program.

**Geospatial Intelligence Graduate Certificate**

**AHF B55B**

(213) 740-8298

**Email:** Watsonke@usc.edu

**Director:** John P. Wilson, PhD

The online Graduate Certificate in Geospatial Intelligence requires 16 units of graduate work and provides state-of-the-art training in some of the core geospatial technologies and the underlying scientific concepts and analytical methods that guide their design and use to solve a variety of human security problems and challenges.

**Course Requirements**

Sixteen units of graduate work are required.

**Core Courses (8 Units)**

- SSCI 581 Concepts for Spatial Thinking Units: 4
- SSCI 588 Remote Sensing for GIS Units: 4

**Electives (4 Units)**

- SSCI 583 Spatial Analysis Units: 4
- SSCI 584 Spatial Modeling Units: 4
- SSCI 588 Remote Sensing for GIS Units: 4
- SSCI 589 Cartography and Visualization Units: 4

**Capstone Course (4 units)**

- SSCI 579 Geospatial Intelligence Tradecraft Units: 4

**Note:**

The courses in this program are open to students living and/or working anywhere, including students at USC's Los Angeles, Orange County, Sacramento and Washington, D.C. centers. The certificate program can be completed in as few
as two and no more than four semesters depending on the
numbers of courses taken in each of the fall, spring and
summer semesters. The graduate certificate program can
serve as a possible "stepping stone" toward the geographic
information science and technology master's degree program.
Continuous enrollment, including summer, is required.

Geospatial Leadership Graduate
Certificate
AHF B55B
(213) 740-8298
Email: watsonke@usc.edu
Director: John P. Wilson, PhD
The online Graduate Certificate in Geospatial Leadership
requires 16 units of graduate work. The capstone course
focuses on the cultivation of leadership skills and practices,
and the electives afford students the opportunity to strengthen
their knowledge of selected geospatial technologies, the
underlying scientific concepts and analytical methods, and
the ways they can be used in decision-making.

Course Requirements
Sixteen units of graduate work are required.

Core Courses (4 Units)
• SSCI 578 The Practice of Geospatial Leadership
  Units: 4

Electives (12 Units)
• SSCI 579 Geospatial Intelligence Tradecraft
  Units: 4
• SSCI 583 Spatial Analysis Units: 4
• SSCI 584 Spatial Modeling Units: 4
• SSCI 585 Geospatial Technology Project
  Management Units: 4
• SSCI 586 GIS Programming and Customization
  Units: 4
• SSCI 588 Remote Sensing for GIS Units: 4
• SSCI 589 Cartography and Visualization Units: 4
• SSCI 591 Web GIS Units: 4
• SSCI 592 Mobile GIS Units: 4
• SSCI 593 Geospatial Data Integration Units: 4

Additional Requirements
The courses in this program are open to students living
and/or working anywhere, including students at USC's Los
Angeles, Orange County, Sacramento and Washington, D.C.
centers. The certificate program can be completed in as few
as two and no more than four semesters depending on the
numbers of courses taken in each of the fall, spring and
summer semesters. Continuous enrollment, including summer, is required.

Admission Requirements
Two groups of students are served by this program:
1. New students who wish to apply directly to one of
   the spatial sciences graduate certificate program.
2. Students currently matriculated in a USC master's
   or doctoral degree program (other than the MS in
   geographic information science and technology).

Candidates for admission among the first group of students
must have: (1) a BA or BS degree or its international
equivalent; (2) a minimum 3.0 GPA (A = 4.0) undergraduate
GPA. All course work taken at the undergraduate level is
used to calculate the GPA. Exceptions will be made in cases
of very high GRE scores or some other compelling evidence
of potential to excel in graduate studies (e.g., outstanding
letters of recommendation). Preference will be given to
candidates with significant professional experience working
with geographic information systems and related geospatial
technologies.

Application Procedures
Applicants are required to submit the following documents:
(1) completed application for admission, which can be found
online at usc.edu/admission/graduate; (2) statement of
purpose; (3) official transcripts from all schools previously
attended. International students must submit TOEFL scores
with a minimum score of 100 on the Internet-based
examination, or an IELTS score of 7.

The graduate certificate program utilizes rolling admissions
and enrollment based on the standard academic calendar.
This means that students may start the program in either the
fall, spring or summer semesters.

Those interested in learning more about this program should
contact Kate Kelsey, University of Southern California, 3616
Trousdale Parkway, AHF B55B, Los Angeles, CA 90089-0374.

Spatial Analytics Graduate Certificate
AHF B56C
(213) 740-8298
Email: watsonke@usc.edu
Director: John P. Wilson, PhD
The Graduate Certificate in Spatial Analytics requires 12
units of graduate work and provides doctoral students with an
opportunity to learn about the fundamental guiding principles
(i.e. spatial cognition, positioning, spatial representations and
data models, map projections and datums, modifiable unit
area problems, remote sensing, spatial analysis and modeling
techniques and cartographic principles) and a series of
rapidly evolving geospatial technologies that take advantage
of the Cloud and the Web as well as advances in analytical
techniques, modeling tools and online data sources.

Course Requirements
Twelve units of graduate work are required.

Courses (12 Units)
• SSCI 680 Advanced Spatial Computing Units: 4
• SSCI 683 Principles of Spatial Data Analysis
  Units: 4
• SSCI 684 Spatial Modeling with GIS Units: 4

Note:
The courses in this program are open to students enrolled in
any one of USC's doctoral programs. The three courses that
make up this graduate certificate provide a vibrant and
evolving series of learning opportunities for doctoral students
wishing to look at their own disciplines and potential
research topics through a spatial lens.

Doctoral Degree
Population, Health and Place (PhD)
Residency Requirement
A minimum of 24 graduate units at USC is required for the doctoral degree.

Course Requirements
Each student must take at least 44 substantive units in preventive medicine (health), sociology (population) and the spatial sciences (place) at USC during the first three years. Students must complete two laboratory rotations (4 units total) as well as a set of core courses that cover topics in biostatistics, demography, epidemiology and spatial sciences, the specifics of which are provided in the Spatial Sciences Institute's handbook for graduate students. Additional course requirements vary according to specialty area and/or dissertation topic.

Research Requirement
During the first and second year, students work on either a refereed journal article, book chapter or a research report of comparable scope and quality. A research project done at USC is required of all students (by the conclusion of the summer following the student's second year), regardless of prior graduate work.

Screening Procedure
The student's ability to master graduate-level course material is first evaluated after completion of no more than 24 units, and not later than the third semester of graduate work at USC. The final screening procedure is the successful completion of a second-year project requirement. This evaluation is based on the student's performance in courses taken and on an evaluation of the student's research competence as reflected in the first- and second-year research projects. The projects are evaluated by a committee of three faculty, including the student's primary adviser. Additionally, students are evaluated each year based on adviser input, course work and research progress.

Guidance Committee
In preparation for the qualifying examination, each student assembles a five-person guidance committee to direct the student's program of studies and evaluate research competence. The committee must include at least one member from the lists of eligible faculty in Demography, Preventive Medicine and Spatial Sciences listed in the each of the contributing fields specified in the Spatial Sciences Institute's handbook for graduate students. The committee continues to serve until after the qualifying examination has been passed, the dissertation topic approved, and the student admitted to candidacy for the PhD. At that time the student assembles a dissertation committee of four or more members (usually consisting of members of the guidance committee, one of whom must be a faculty member from outside the three contributing departments), who advise on and evaluate the dissertation.

Qualifying Examination
The qualifying examination evaluates the student's ability to conduct independent scholarship and research. The student is evaluated based on oral and written presentation of two elements: a written review paper or written exam and the dissertation proposal. The qualifying examination is planned, administered and evaluated by the student's guidance committee. It should be taken no later than during the sixth semester.

Doctoral Dissertation
A student is expected to engage in research activity throughout his or her graduate career, leading up to and culminating in the Ph.D. dissertation. The dissertation is based on an original investigation, usually involving empirical data.

Defense of the Dissertation
The student's doctoral dissertation is defended at either a defense oral, based on an approved preliminary copy of the dissertation, or a final oral, based on the final version of the dissertation.

Advisement
Each student has a major adviser who is usually in the specialty area. The guidance committee should be formed at least one semester before the student takes the qualifying examination. Advisement concerning graduate school requirements may also be sought from the Spatial Sciences staff student adviser and the faculty member serving as director of graduate studies.

Courses
- PM 501 Foundations in Health Education and Promotion Units: 4
- PM 512 Principles of Epidemiology Units: 4
- PM 529 Environmental Health: An Epidemiological Approach Units: 4
- SOCI 621 Quantitative Methods and Statistics II Units: 4
- SOCI 625 Demographic Methods Units: 4
- SOCI 656 Social Demography Units: 4
- SSCI 600 The Geography of Life and Death Units: 4
- SSCI 601a Population, Health and Place Research Practicum Units: 2
- SSCI 601b Population, Health and Place Research Practicum Units: 2
- SSCI 680 Advanced Spatial Computing Units: 4
- SSCI 683 Principles of Spatial Data Analysis Units: 4
- SSCI 684 Spatial Modeling with GIS Units: 4
- SSCI 790 Research Units: 1
- SSCI 794a Doctoral Dissertation Units: 2
- SSCI 794b Doctoral Dissertation Units: 2
- SSCI 794c Doctoral Dissertation Units: 2
- SSCI 794d Doctoral Dissertation Units: 2
- SSCI 794z Doctoral Dissertation Units: 0
Thematic Option

Thematic Option, the university's general education core honors program, is an alternative to regular core general education requirements. The program is interdisciplinary and provides a strong intellectual community. The program teaches students to formulate ethical questions, to analyze and understand the reasoning behind views that differ from their own, to recognize the roles that historical, political and social forces play in matters of personal choice, and to express their views coherently in writing. Thematic Option can be arranged to fit any major.

To maintain small classes and allow for extensive discussion, Thematic Option is limited to 200 students each year. Students must be highly motivated, with a record of academic achievement. The average Thematic Option student has cumulative SAT scores above 2200 and an "A" high school GPA. The program is rigorous and requires extensive reading and writing.

College Academic Services Building 200
(213) 740-2961
(800) 872-2961
Email: thematicoption@dornsife.usc.edu
dornsife.usc.edu/thematic-option
Director: Pennelope Von Helmolt, PhD
Lecturer: Trisha Tucker, PhD

Program Requirements

The Thematic Option honors curriculum consists of four interdisciplinary core classes taught around distinct themes:

- CORE 101g Symbols and Conceptual Systems: Thematic Option Honors Program;
- CORE 102gp Culture and Values: Thematic Option Honors Program;
- CORE 103g The Process of Change in Science: Thematic Option Honors Program;
- CORE 104gw Change and the Future: Thematic Option Honors Program.

CORE 111 Writing Seminar I: Thematic Option Honors Program and CORE 112 Writing Seminar II: Thematic Option Honors Program make up the 8 units of writing to meet the university requirement. The classes are accompanied by individual, bi-weekly tutorials. CORE 111, which requires concurrent enrollment with an affiliated CORE 102, focuses on critical thinking and analysis, focusing on academic argument and reasoning through close reading of primary texts. CORE 112 teaches students to convey complex ideas and to advance sophistication of essay structure, grounded argument, and to identify and address specific audiences persuasively in academic discourse. The course Thematic Option curriculum is supplemented by four additional courses taken from the General Education Program: one in Quantitative Reasoning, one in The Arts, one in Social Analysis, and one in the Physical Sciences.

Completion of CORE 102 and CORE 111 with a passing grade satisfies the University’s General Education Seminar requirement.

Liberal Arts Modules

Liberal Arts Modules provide a unique opportunity for interdisciplinary study with peers and faculty from different disciplines. The themes and topics change each semester depending on faculty participation. Students are exposed to different approaches to societal issues, gain experience working collaboratively with peers from other academic areas, apply their knowledge to new subject areas and focus sustained critical attention on disciplinary methods of inquiry.

A typical module includes four classes: three small seminars and one CORE 498 course. The program requires simultaneous enrollment in one of the three seminars and in CORE 498, for a total of 8 units.

Thematic Option, the university’s general education core honors program, is an alternative to regular core general education requirements. The program is interdisciplinary and provides a strong intellectual community. The program teaches students to formulate ethical questions, to analyze and understand the reasoning behind views that differ from their own, to recognize the roles that historical, political and social forces play in matters of personal choice, and to express their views coherently in writing. Completion of CORE 102 and CORE 111 with a passing grade satisfies the University’s General Education Seminar requirement.

Liberal Arts Modules

Liberal Arts Modules provide a unique opportunity for interdisciplinary study with peers and faculty from different disciplines. The themes and topics change each semester depending on faculty participation. Students are exposed to different approaches to societal issues, gain experience working collaboratively with peers from other academic areas, apply their knowledge to new subject areas and focus sustained critical attention on disciplinary methods of inquiry.

A typical module includes four classes: three small seminars and one CORE 498 course. The program requires simultaneous enrollment in one of the three seminars and in CORE 498, for a total of 8 units.

Students with at least junior standing and a major/minor GPA of at least 3.0 are eligible to apply. Preference is given to students pursuing double majors or other major/minor combinations in the liberal arts. Students graduating with a BA or USC Dornsife College of Letters, Arts and Sciences BS degree who complete a module and maintain a cumulative GPA of 3.5 will have "Distinction in Liberal Arts" listed on their USC Transcript.

Requirements (8 Units)

Simultaneous registration in CORE 498 and a CORE 499 Special Topics class that is part of the Liberal Arts Module.

Minor

Thematic Approaches to Humanities and Society Minor

The interdisciplinary minor in Thematic Approaches to Humanities and Society allows students to examine a range of thematic and theoretical approaches to understanding culture and society from multiple standpoints in the humanities. The minor is rich in course and schedule options, enabling students with an interest in the humanities to continue their studies. It also includes co-curricular events and advisement from Thematic Option staff. Thematic approaches to humanities and society builds on the intellectual community developed in the Thematic Option honors program and is open to all interested students.

The minor focuses on themes such as interdisciplinary perspectives and modes of inquiry; approaches to criticism and history; reification, ideology, contextualization; and knowledge, human diversity and social relations. Students choose six 4-unit classes, including one lower-division elective, one upper-division Thematic Option class (CORE 301 Modes of Inquiry), and four upper-division electives. Students also complete a 2-unit reading salon (CORE 200 Liberal Arts Reading Salon).

Requirements, Lower-Division

(Choose One, 4 Units)

- CLAS 150g The Greeks and their Legacies Units: 4
- CLAS 151gp The Legacy of Rome Units: 4
- CORE 102gp Culture and Values: Thematic Option Honors Program Units: 4
• HIST 101g State and Society in the Ancient World Units: 4
• HIST 102gm Medieval People: Early Europe and Its Neighbors, 400–1500 Units: 4
• PHIL 115g Ancient Greek Culture and Society Units: 4
• REL 132g Origins of Western Religions Units: 4

Course Requirements (6 Units)
• CORE 200 Liberal Arts Reading Salon Units: 2
• CORE 301 Modes of Inquiry Units: 4

Requirements, Upper-Division (16 Units)
Enroll in four of the following, at least one from List A, one from List B and not more than one from List C. Not more than two may come from any one department. Courses must be chosen in consultation with a Thematic Option adviser.

List A

Early:
• CLAS 310 Pagans and Christians Units: 4
• CLAS 320gmp Diversity and the Classical Western Tradition Units: 4
• CLAS 333 Cult and City in Ancient Greece Units: 4
• CLAS 470 Democracies Ancient and Modern Units: 4
• EALC 340gp Japanese Civilization Units: 4
• EALC 345 Korean Civilization Units: 4
• EALC 350gp Chinese Civilization Units: 4
• EALC 355 Studies in Chinese Thought Units: 4
• EALC 365 Studies in Japanese Thought Units: 4
• PHIL 345 Greek Ethics Units: 4
• REL 311g The Bible in Western Literature Units: 4
• REL 315 Thought and Life of Islam Units: 4
• REL 317g The Bible in Its Ancient Context Units: 4

Modern:
• COLT 426 Utopias Units: 4
• COLT 445 Europe and the Writing of Others Units: 4
• EALC 332 Modern Korean Literature in Translation Units: 4
• EALC 335m Korean American Literature Units: 4
• EALC 342gp Japanese Literature and Culture Units: 4
• EALC 352g Chinese Literature and Culture Units: 4
• EALC 354g Modern Chinese Literature in Translation Units: 4
• FREN 446 Contemporary French Thought Units: 4
• GERM 370 Literature and Culture in Vienna at the Turn of the Century Units: 4
• GERM 372g Literature and Culture in Berlin in the 1920s Units: 4
• PHIL 337 History of Modern Political Philosophy Units: 4
• PHIL 355 Existentialism Units: 4
• PHIL 437 Social and Political Philosophy Units: 4
• REL 340 Introduction to Indian Philosophy Units: 4
• SLL 330gp Russian Thought and Civilization Units: 4
• SLL 344g Tolstoy: Writer and Moralist Units: 4

List B

Humanities and Society:
• COLT 448 Multilingual Encounters Units: 4
• COLT 475 Politics and the Novel Units: 4
• ENGL 473 Literature and Society Units: 4
• ENGL 474m Literature, Nationality and Otherness Units: 4
• FREN 370gm Equality and Difference around the Enlightenment Units: 4
• REL 366 Religion and Social Change Units: 4
• REL 462 Religion and Violence Units: 4
• SLL 345g Literature and Philosophy: Dostoevsky Units: 4
• SLL 348g The Novels of Vladimir Nabokov Units: 4

Critical Approaches:
• CLAS 380 Approaches to Myth Units: 4
• COLT 391 Literary Criticism from Plato to Postmodernism Units: 4
• COLT 401
• COLT 454 Aesthetic Philosophy and Theory Units: 4
• ENGL 472 Literature and Related Arts Units: 4
• ENGL 479 History of Literary Criticism Units: 4
• ENGL 480 Modern Literary Criticism: Theory and Practice Units: 4
• LING 466 Word and Phrase Origins Units: 4
• PHIL 361 Philosophy of Religion Units: 4
• PHIL 445 Philosophy of the Arts Units: 4

List C

Social Science Approaches:
• ANTH 372 Interpretation of Myth and Narrative Units: 4
• HIST 201 Approaches to History Units: 4
• HIST 329 Madness and Society in the Modern Age Units: 4
• IR 325 North-South Relations in the Global Economy Units: 4
The Writing Program

Writing Program courses are designed to help students develop practices of reading, writing and critical reasoning that are necessary for success in academic and professional discourse. Writing Program pedagogy emphasizes small classes and frequent conferences in order to provide the highly individuated instruction and careful feedback necessary to extend the writing process and enhance the rhetorical judgment of each student. To meet the university's writing requirement, students must complete WRIT 150 (or its equivalent) and an advanced writing course, WRIT 340.

Jefferson Building 150 (JEF 150, mc 1293)
(213) 740-1980

Email: writprog@usc.edu
dornsife.usc.edu/writing-program

Director: John Holland

Professors (Teaching): Diana Blaine, PhD; Geoffrey Middlebrook, PhD

Associate Professors (Teaching): Norah Ashe, PhD; Stephanie Bower, PhD; Michael Bunn, PhD; Jeffrey Chisum, PhD; James Condon VII, PhD; Andrew De Silva, MPW; Kevin Egan, PhD; William Feuer, PhD; Nathalie Joseph, PhD; Stephen Mack, PhD; Matthew Manson, PhD; Mark Marino, PhD; Indra Mukhopadhyay, PhD; John Murray, EdD; Erika Nanes, PhD; Shefali Rajamannar, PhD; Eric Rawson, PhD; Sandra Ross, MA; Scott Smith, PhD; David Tomkins, PhD; Robert Waller Jr., MPW; William Wyatt, MPW

Assistant Professors (Teaching): Jennifer Sopchockchak Bankard, PhD; Jessica Wells Cantiello, PhD; LauraAnne Carroll-Adler, PhD; Elizabeth Durst, PhD; Jay Fisher, MPW; Farida Habeeb, PhD; Amy Meyerson, MPW; Daniel Pecchenino, PhD; Steve Posner, MPW; Deborah Sims, PhD; Ellen Wayland-Smith, PhD; John James Strong, MPW

Lecturers: Amanda Bloom, PhD; Brent Chappelow, PhD; James Clements, PhD; Carlos Delgado, PhD; Antonio Elefano, JD; William Gorski, PhD; Amanda Hobmeier, PhD; Ashley Karlin, PhD; Rory Lukins, PhD; Philip McNiff, MPW; Sarah Mesel, PhD; Cory Nelson, PhD; Benjamin Pack, MPW; DeAnna Rivera, JD; Atia, Sattar, PhD; Brandon Som

Lower-Division Requirement
WRIT 150 Writing and Critical Reasoning—Thematic Approaches focuses on the rhetorical principles and techniques necessary for successful college-level writing. Special attention is paid to critical thinking and reading, sentence-level fluency, research techniques, and the elements of academic argument and reasoning. WRIT 150 will not satisfy the lower-division writing requirement if taken on a Pass/No Pass basis.

Advanced Writing Requirement

All students at USC, except those who satisfy their general education requirements through the Thematic Option Program, must complete WRIT 340 Advanced Writing, an upper-division course designed to help students write on topics related to their disciplinary or professional interests. Students usually enroll in WRIT 340 in their junior year, and may not take the course earlier than their sophomore year. Different schools within the university offer sections of this course. Students should consult their major departments to determine which version of WRIT 340 best complements their program of study. WRIT 340 will not satisfy the university's advanced writing requirement if taken on a Pass/No Pass basis.

All classes that meet the university's advanced writing requirement teach students to write clear, grammatical, well-structured prose; to discover and convey complex ideas critically; and to appreciate the nuances of effective argumentation. The principal aim of the requirement is to develop a student's capacity to formulate thoughtful and compelling writing for specific academic, professional and public audiences.

Preparatory Course Work

Some students are better served by taking a preparatory course before they enroll in WRIT 150. Entering freshmen who score below a specified level on the verbal portion of the SAT take the University Writing Examination. Based on the results of this examination, certain students enroll in WRIT 120 Introduction to College Writing or WRIT 121 Introduction to College Writing in a Second Language during their first semester at USC.

International students take the University Writing Examination after having completed any course work required by the American Language Institute.

Transfer Credit

Students may complete the lower-division requirement by completing an equivalent second-semester composition course that is taken for a letter grade option (not Pass/No Pass) at another institution after high school graduation and prior to enrolling at USC. Equivalent transfer credit is determined by the university's articulation officer. The advanced writing requirement must be completed at USC.

Time Limits

Students should complete the lower-division writing course requirement by the end of their first year at USC and must complete it before they enroll in their sixty-fifth unit. Transfer students who have not completed the lower-division requirement prior to entering USC should enroll in WRIT 150 during their first semester at USC, and must enroll in WRIT 150 no later than their nineteenth unit (second semester) at USC.
USC Annenberg School for Communication and Journalism

The USC Annenberg School for Communication and Journalism is a national leader in education and scholarship in the fields of communication, journalism, public diplomacy and public relations. The school offers a comprehensive curriculum emphasizing the core skills of leadership, innovation, service and entrepreneurship and drawing upon the resources of a networked university located in the media capital of the world. USC Annenberg's commitment to the converged practice of communication and journalism, interdisciplinary studies, and collaboration makes it unique among peer institutions. Students learn from theory and practice, and the school's programs put it at the crossroads of media, entertainment technology, and globalization.

USC Annenberg's nationally accredited School of Journalism provides experience for students in all media platforms, with a digital newsroom, state-of-the-art editing equipment for radio and television news production and the opportunity to work at on-campus media outlets. The school's public relations program prepares students to thrive in advocacy communication, learning to write and communicate targeted messages across media platforms. The School of Communication's multidisciplinary curriculum explores how human interaction and technology affect communities, businesses, nations and the world, preparing students for careers in communication, persuasion and leadership.

USC Annenberg's active internship program and study abroad opportunities give students the broad, global perspective required to be successful professionals. USC Annenberg alumni fill top posts in the communication and media industries, and remain an invaluable resource to students and faculty. USC Annenberg's more than 100 faculty members have been recognized in diverse fields, and their expertise challenges students to become communication leaders.

Degree Programs
The School of Journalism offers Bachelor of Arts degrees in Journalism and Public Relations. It also offers minors in Advertising, News Media and Society, and Public Relations. The school stresses a broad-based liberal arts education to enhance writing and reporting and encourages undergraduate students to pursue double majors or minors in disciplines outside the school.

At the graduate level, a Master of Science degree is offered in Journalism and Master of Arts degrees are offered in Specialized Journalism, Specialized Journalism (The Arts) and Strategic Public Relations. The MS in Journalism degree is an intense, deadline-driven program in which students learn to write, report, produce, code, publish and promote cross-platform stories in a converged news environment. Cutting-edge digital courses cater to students interested in careers in social media, data journalism, data visualization, app creation, online design and publishing, emerging mobile platforms and coding. The Specialized Journalism degree is designed for experienced professionals and recent journalism graduates interested in developing specialized reporting expertise. The Specialized Journalism (The Arts) degree is designed for experienced professionals, art practitioners, and recent journalism graduates interested in arts and culture criticism and reporting. The Strategic Public Relations degree emphasizes the requisite skills of that discipline, with an emphasis on strategic problem solving, public relations theory and techniques, writing, research-based planning and analysis, case studies, and the application of the discipline to specific industry categories.

**Student Services**

Students must meet with an advisor at least once each semester to receive academic advisement covering university degree requirements and major course selection. The school also offers several international study programs to students. The USC Annenberg Career Development Office has listings for paid and unpaid internships from around the country. Career advisers conduct mandatory advisement appointments for all sophomores and offer career workshops, guest speakers and mentoring opportunities. Students are advised to participate in at least two internships before graduation.

**Undergraduate Degrees**

The School of Journalism offers Bachelor of Arts degrees in Journalism and Public Relations. The school also offers minors in Advertising, News Media and Society, and Public Relations. Journalism students are encouraged to pursue double majors or minors in other areas of study.

To meet accrediting guidelines, a minimum of 72 units must be completed outside the major area of journalism. A maximum of 16 units of course work taken prior to high school graduation and a combined 32 units of AP, IB and pre-high school graduation course work will count toward this requirement. Journalism and public relations majors can take up to a maximum of 48 journalism units; however, the major unit total (44 units) cannot be exceeded, unless the student has fulfilled the accreditation requirement.

A grade point average of at least C (2.0) on all baccalaureate units attempted at USC, as well as on the combined USC-transfer GPA, is required for undergraduate degrees. A minimum cumulative grade point average of 2.0 in all upper-division courses applied toward the major is also required.

Students must complete each journalism class with at least a grade of C- in order to count the course toward a major requirement. Journalism courses with a grade of D+ or below must be repeated; courses may only be reattempted once.

**Admission Requirements**

Admission is competitive. Fall 2015 incoming freshmen had an average GPA of 3.61 with an SAT score of 1920–2180 (middle 50%). Transfer students had an average college GPA of 3.66. For admission information and deadlines, refer to the USC Admission Website. All transfer applicants must review the transfer admission application guidelines on the Annenberg Website; contact the Annenberg Admissions Office for more information. USC exclusively uses the Common Application for freshman and transfer admission. Applicants must submit the Common Application and the USC Supplement, both of which can be accessed at commonapp.org. In addition to the university writing samples, a 250-word statement of intent is required; instructions are included with the USC Supplement.

Students currently enrolled at USC who wish to change their major to journalism must file a formal application with all supporting documents through the Annenberg Student Services Office. Students must have 16 units completed at USC with a minimum USC cumulative GPA of 3.0 in order to be eligible to apply to the journalism major. The 3.0 GPA is a minimum standard and does not guarantee admission. In order to be eligible to apply for the Advertising or New Media and Society minors, students must have a minimum USC cumulative GPA of 2.0 and a declared major. To apply to the Public Relations minor, students must have a minimum USC cumulative GPA of 2.5 and a declared major.

**General Education Requirements**

The university's general education program provides coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. For more information about USC's general education requirements, see the General Education Program.

**Grammar, Spelling and Punctuation (GSP) Requirement**

All undergraduate journalism and public relations majors are required to complete the Grammar, Spelling and Punctuation (GSP) online learning module and exam. The GSP exam is administered in PR 209 for public relations majors. Depending on when a journalism student enters the degree program, the GSP exam may be administered in JOUR 201, JOUR 207 or ASCJ 200. This exam must be taken and passed by the end of the semester. Students who do not pass the exam will be allowed to retake it. Students who fail to pass the GSP will not be allowed to progress in the program until they pass the exam.

Note: Students with disabilities may register with the Disability Services and Programs office (DSP) so the DSP staff can assess the nature of the students' disabilities and
recommend the appropriate accommodations to be provided for each student.

**Annenberg International Programs**

**Spring Semester in London, England (Journalism and Public Relations)**

Undergraduate Journalism and Public Relations students may spend the spring semester of their Junior year at a dedicated study center, where they enroll in 16 units of upper-division Annenberg course work, eight of which are for major credit. In addition to their studies, students tour publishing and broadcasting companies, meet communication executives and government policy-makers and gain exposure to British media, culture and civilization. The program also includes group excursions to such places as Bath, Oxford, Liverpool and Hampton Court. A minimum USC cumulative GPA of 3.0 is required for this program.

**Spring Semester in Auckland, New Zealand (Journalism and Public Relations)**

This undergraduate semester program offers students the opportunity to study at the Auckland University of Technology in New Zealand, a leading southern hemisphere school of journalism and media studies. Fully integrated into the university and its vibrant urban surroundings with strong connections to the nation's indigenous heritage, the program allows students to earn 8 units that fulfill journalism electives and eight units of general electives. A minimum USC cumulative GPA of 3.0 is required for this program.

**Spring Semester in Rio de Janeiro, Brazil (Journalism and Public Relations)**

This semester program offers students the opportunity to learn about Brazilian culture through an intensive pre-semester Portuguese-language course* and through civic engagement projects that benefit the local communities in Rio de Janeiro. (*This course does not count for a USC language requirement.) Through the Council on International Educational Exchange (CIEE), USC Annenberg students enroll in 18-20 USC units in courses offered by CIEE and at the Escola Superior de Propaganda e Marketing, Brazil's top communication and journalism school. The program is open to Journalism and Public Relations majors. Visit the Annenberg International Programs Website for more information on language and other prerequisites. A minimum USC cumulative GPA of 3.0 is required for this program.

**Spring Semester in Rome, Italy (Journalism and Public Relations)**

Undergraduate Journalism and Public Relations students may spend a spring semester at a dedicated study center, where they enroll in 16 units of upper-division Annenberg course work, eight of which are for major credit. In addition to their studies, students tour publishing and broadcasting companies, meet communication executives and government policy-makers and gain exposure to Italian media, culture and civilization. A minimum USC cumulative GPA of 3.0 is required for this program.

The International Communication Studies Program (ICS) allows undergraduate students to study a range of approaches to public communication media across Europe. Students divide the five-week course into stays in Los Angeles, London, Paris, Istanbul, Prague and Rome. In addition to regular class meetings, students discuss the interplay of current world issues and international media practices with communication practitioners from international news and public relations media, government institutions, private industry and global organizations. Students enroll in JOUR 482 Comparative Media in Europe (4 units). A minimum USC cumulative GPA of 3.0 is required for this program. For further information, contact Annenberg International Programs at (213) 821-1276, email ascintl@usc.edu or visit annenberg.usc.edu/international.

**Departmental Honors**

Undergraduate students who are nominated by journalism faculty to participate in JOUR 498 – Honors Seminar (2 units) their senior year are eligible for departmental honors. Nominations are based on academic achievement, performance in the classroom, leadership, and involvement in the school. Students who successfully complete JOUR 498 with a B+ or higher and achieve no less than a USC cumulative GPA of 3.0 and a journalism major GPA of 3.5 at the time of graduation will receive departmental honors.

**Honor Society**

Lambda Pi Eta is a national communication/journalism honor society that is open to declared communication, journalism and public relations majors who have completed (or are currently registered for) at least 60 units, at least 12 of which are in the major. To be eligible, students must have a USC cumulative GPA and an Annenberg major GPA of 3.5 or higher.

**Academic Integrity Policy**

Since its founding, the USC School of Journalism has maintained a commitment to the highest standards of ethical conduct and academic excellence. Any student found plagiarizing, fabricating, cheating on examinations, and/or purchasing papers or other assignments faces sanctions ranging from an "F" on the assignment to dismissal from the School of Journalism.

**Progressive Degree Program**

The School of Journalism offers progressive degree options for the Master of Science in Journalism, Master of Arts in Specialized Journalism, and Master of Arts in Specialized Journalism (The Arts). The progressive degree program allows USC students to complete a bachelor's degree and master's degree in as little as five years. Students with a USC cumulative GPA of 3.0 or higher in all classes taken at the university level are eligible to apply for admission to the degree program during their junior year. The 3.0 GPA is a minimum standard and does not guarantee acceptance. Current students should attend an information session conducted by Annenberg Admissions and a member of the faculty before initiating the application process. Students admitted into the progressive degree program begin taking master's level courses in their senior year and may complete the master's degree in year five. For further information on the application process, visit annenberg.usc.edu/progressive.

**Graduate Degrees**
The School of Journalism offers one Master of Science degree program in Journalism, three Master of Arts degree programs in Specialized Journalism, Specialized Journalism (The Arts) and Strategic Public Relations, and two certificates in Journalism and Public Policy Advocacy. The nine-month, 36-unit MS in Journalism is an intense, deadline-driven program in which students learn to write, report, produce, code, publish and promote cross-platform stories in a converged news environment. Students also choose a specialty area that prepares them for careers in broadcast television and radio news, long-form audio and video documentaries, in-depth reporting and writing or multimedia news production. Cutting-edge digital courses cater to students interested in careers in social media, data journalism, data visualization, app creation, online design and publishing, emerging mobile platforms and coding.

The MA in Specialized Journalism is a program geared toward experienced journalists seeking subject-matter expertise and toward experienced professionals in other fields seeking journalism skills to advance their expertise. The program is also open to recent journalism school graduates with records of excellence and a demonstrated aptitude and commitment to developing an expertise in a specialized field of reporting.

The MA in Specialized Journalism (The Arts) is geared toward experienced arts journalists as well as recent graduates with a demonstrated commitment to specializing in arts journalism. The program is also open to experienced artists and practitioners with a highly developed background in at least one art form who want to acquire journalism skills toward a future specializing in the coverage of arts and culture.

The professionally oriented MA in Strategic Public Relations degree is designed to train both recent graduates interested in the PR/communication field and young professionals considering transitions into, or seeking to advance their careers, in that field, for management-level positions in all types of organizations. In their first year, all students take a core group of courses focusing on strategic problem-solving, research-based actionable insight, business acumen and skills, and in their second year they choose from a wide variety of highly specialized electives.

Admission Requirements
Prerequisites
An applicant must have the equivalent of a four-year bachelor's degree from an accredited college or university for the MS or MA degree. This is not required for the graduate journalism certificate.

Criteria
Minimum recommended criteria are a 3.0 GPA for undergraduate work and all graduate work, and valid Graduate Record Examinations (GRE) General Test scores; the GMAT is not accepted in lieu of the GRE. International applicants are required to take the Test of English as a Foreign Language (TOEFL) and should receive a score of at least 114 on the Internet-based exam; the International English Language Testing System (IELTS) is accepted in lieu of the TOEFL and the minimum recommended score is 8.5. All completed applications are reviewed by the faculty admission committee even if the applicant's academic quality is below the minimum recommendations. Applicants are strongly encouraged to complete admission testing at least one month prior to the application deadline. GRE scores are valid for five years; TOEFL and IELTS are valid for two years.

In addition, applicants are judged on a statement of purpose, résumé, writing sample and three letters of recommendation submitted on their behalf. Professional journalism or internship experience is expected for the MS in Journalism and required for the nine-month MA degree program in Specialized Journalism. A professional work bibliography and samples must be uploaded to the online application. No professional public relations work experience is required for the MA in Strategic Public Relations.

Procedure
Applicants must complete and submit the online USC Graduate Admission Application. Refer to the Annenberg graduate application guidelines on the Annenberg Website for details before initiating the application. In addition, international students must submit official TOEFL or IELTS scores for admission consideration and, after submitting the online graduate admission application, a Confidential Statement for Financing Studies at USC.

Applicants must upload the following supporting materials to the online USC Graduate Admission Application: statement of purpose, copy of official transcripts from college/university attended, writing sample and résumé. Letters of recommendation must be submitted online. Official GRE and TOEFL or IELTS scores must be reported electronically from the Educational Testing Service (ETS) to USC (institution code 4852). Paper copies of score reports are not required or accepted in lieu of the official ETS report. Official transcripts must be mailed to USC Graduate Admission.

New students are admitted to the MS in Journalism, the MA in Specialized Journalism and the MA in Specialized Journalism (The Arts) for the summer session only. Refer to the graduate application guidelines on the Annenberg Website for application filing dates. New students are admitted to the MA in Strategic Public Relations degree program for the fall semester only. Refer to the Annenberg Website for application filing dates.

Degree Requirements
All course work applied toward a degree must be approved by the School of Journalism and the Graduate School.

Academic Integrity Policy
Since its founding, the USC School of Journalism has maintained a commitment to the highest standards of ethical conduct and academic excellence. Any student found plagiarizing, fabricating, cheating on examinations and/or purchasing papers or other assignments faces sanctions ranging from an "F" on the assignment to dismissal from the School of Journalism.

Bachelor's Degree

Journalism (BA)

Required Courses, Lower Division

• ASCJ 200 Navigating Media and News in the Digital Age Units: 4
• JOUR 201 Culture of Journalism: Past, Present and Future Units: 4
• JOUR 207 Reporting and Writing I Units: 4
• JOUR 208 Media Law and Ethics Units: 2

**Required Courses, Upper Division**

• ASCJ 440 Engaging Diverse Communities in the Digital Era Units: 2
• JOUR 307 Reporting and Writing II Units: 4
• JOUR 320 Introduction to Coding for Storytelling Units: 2
• JOUR 321 Visual Journalism Units: 2
• JOUR 322 Data Journalism Units: 2
• JOUR 323 Creating your Digital Footprint and Brand Units: 2
• JOUR 408 Advanced Media Law in the Digital Age Units: 2
• JOUR 414 Advanced Digital Media Storytelling Units: 2

**Upper-Division Electives**

Complete 12 upper-division journalism or public relations elective units chosen in consultation with your adviser.

Public Relations (BA)

**Total units: 44**

**Required Courses, Lower Division**

• PR 209 Effective Writing for Strategic Public Relations Units: 4
• PR 250 Strategic Public Relations: An Introduction Units: 4
• PR 253 Theoretical Foundations of Strategic Public Relations Units: 4

**Required Courses, Upper Division**

• PR 351a Strategic Public Relations Media and Content Units: 4
• PR 351b Strategic Public Relations Media and Content Units: 4
• PR 428 Social, Legal and Ethical Foundations of Public Relations Units: 4
• PR 429 Business and Economic Foundations of Public Relations Units: 4
• PR 450 Advanced Strategic Public Relations Units: 4
• PR 463 Strategic Public Relations Research, Analysis and Insights Units: 4

Plus 8 upper-division PR or JOUR elective units chosen in consultation with an adviser

**Required Courses**

• PR 340 Introduction to Advertising Units: 4
• PR 341 Advertising Copywriting Units: 4
• PR 342 Advertising Media and Analysis Units: 4
• PR 343 Advertising Design and Production Units: 4
• MKT 406 Practicum in Advertising and Promotion Design Units: 4

Select one additional course from the following:

• MKT 402 Research Skills for Marketing Insights Units: 4
• MKT 405 Advertising and Promotion Management Units: 4
• MKT 425 Marketing on the Internet Units: 4

**Total units: 24**

**Media Economics and Entrepreneurship Interdisciplinary Minor**

The interdisciplinary minor in media economics and entrepreneurship is available to students in all schools and departments. It introduces students to the trends of the contemporary media and information industries and gives them an understanding of the role that entrepreneurship plays in the new economy. Students with professional media industry aspirations will learn basic economic literacy and discover the key factors that shape competition in information markets. Further, the minor fosters an entrepreneurial mindset in students and helps them to develop the entrepreneurial skills required to build successful careers and ventures in the media and information sector. For more details see the School of Communication.

**News Media and Society Minor**

News media and society is a journalism minor that explores the responsibilities, the influence, the ethics and the diversity of the news media. It explores the myths about news media in the United States and explains what the news media are, how they work, what they do wrong and what they do right, and why they are important to a society whose citizens depend on the free and unfettered flow of information. This minor will help all students in all majors to understand one of the most important and misunderstood forces in American society: the news media.
News media and society benefits every student at the university because it gives students a new appreciation and understanding of the news media that so much influence their lives on a daily basis.

**Required Course, Lower Division**
- JOUR 201 Culture of Journalism: Past, Present and Future Units: 4

**Required Courses, Upper Division**
- COMM 371 Censorship and the Law: From the Press to Cyberspace Units: 4
- 16 upper-division journalism units chosen in consultation with an adviser Units: 16

**Total units: 24**

Students are urged to choose their 16 upper-division units from these classes:
- JOUR 373 Journalism Ethics Goes to the Movies Units: 4
- JOUR 375 The Image of the Journalist in Popular Culture Units: 4
- JOUR 460 Social Responsibility of the News Media Units: 4
- JOUR 466m People of Color and the News Media Units: 4
- JOUR 467 Gender and the News Media Units: 4

**Nonprofits, Philanthropy and Volunteerism Interdisciplinary Minor**
This four-course minor enables students to learn about the nonprofit sector — its organizations, philanthropy and voluntary action. See complete description in the USC Price School of Public Policy section.

**Public Relations Minor**
The public relations minor is designed for students interested in building a career in, or developing a better understanding of, the field of public relations. At no time has public relations been more successful or more visible than it is today. Emphasis is placed throughout the program on both the practical skills required to meet the demands of the marketplace and the critical thinking required to be a successful entry-level public relations practitioner.

**Required Courses**
- PR 209 Effective Writing for Strategic Public Relations Units: 4
- PR 250 Strategic Public Relations: An Introduction Units: 4
- PR 352 Public Relations Media and Content for Non-Majors Units: 4

**Elective Courses**
Choose 12 units of PR or JOUR 300-499 level electives.

**Master's Degree**

**Journalism (MS)**

**Master of Science**
Studies toward the Master of Science in Journalism require 36 units of prescribed courses and approved electives in the student's field of study. No more than 12 units of 400-level course work may be applied toward the Master of Science in Journalism.

- Students who earn a GPA of below 3.0 will be placed on academic probation and must improve according to established terms if they are to remain in the school. In the case of courses offered on Credit/No Credit (CR/NC) basis, faculty review of competence will be substituted for grades.

**Residence**
Students in the Master of Science in Journalism can complete the program in nine months by enrolling in the four-week summer immersion course and enrolling in 16 units in the fall and spring semesters. The School of Journalism will accept only 4 units of approved transferred graduate credit.

**Foreign Language/Research Tool Requirements**
There is no foreign language or research tool requirement for the master's degree, but fluency in the English language is needed for success in the program.

**Grammar, Spelling and Punctuation (GSP)**
Journalism students are required to complete an online tutorial about Grammar, Spelling and Punctuation (GSP) and pass the GSP test before the end of the spring semester. Students who fail to complete the GSP tutorial and pass the test within the stated timeframe will not be allowed to progress in the program and will be dismissed from the School of Journalism.

**Note:** Students with disabilities may register with the Disability Services and Programs office (DSP) so the DSP staff can assess the nature of the students' disabilities and recommend the appropriate accommodations to be provided for each student.

**Capstone Project**
MS in Journalism students must enroll in JOUR 598 (4 units) in order to graduate. Completed projects are judged by a committee appointed by the director of the School of Journalism and degrees are conferred based on the committee's review.

**Course Requirements (36 units)**
- JOUR 505 The Practice: Journalism's Evolution as a Profession Units: 1
- JOUR 528 Summer Digital News Immersion Units: 4
- JOUR 531L Fall Digital News Immersion Units: 4
- JOUR 546 News, Numbers and Introduction to Data Journalism Units: 2
- JOUR 547 The Business of News Units: 1
- JOUR 553 Coding and Programming for Storytelling Units: 2
- JOUR 560 Seminar in Mass Communication Law Units: 2
- JOUR 599 Special Topics Units: 2, 3, 4
- JOUR 598 Journalism Capstone Project Units: 4
Note:
Students should enroll in the section titled "Special Assignment Reporting" for JOUR 599.

Emphases
Students interested in specific journalistic platforms are encouraged to select an emphasis and complete the recommended courses for that emphasis:

Long-Form Video
- JOUR 521 Documentary Pre-Production Units: 2
- JOUR 522 Video Documentary Production Units: 4
- JOUR 575 Converged Media Center Units: 2, 4

News Video
- JOUR 517 Advanced Investigative Reporting Units: 3
- JOUR 524 Advanced Broadcast Reporting Units: 4
- JOUR 539 Introduction to Investigative Reporting Units: 2
- JOUR 552 Television Reporting and Production Units: 2
- JOUR 575 Converged Media Center Units: 2, 4

Audio
- JOUR 523 Public Radio Reporting Units: 2
- JOUR 525 Public Radio Documentary Units: 4
- JOUR 575 Converged Media Center Units: 2, 4

Text
- JOUR 539 Introduction to Investigative Reporting Units: 2
- JOUR 575 Converged Media Center Units: 2, 4
- JOUR 577 Monetization and the New Media Units: 3
- JOUR 585 Specialized Reporting: Religion Units: 3
- JOUR 596 Follow the Money: Business and Economics Reporting Units: 3

Digital
- JOUR 533 Web Journalism and Editorial Site Management Units: 2
- JOUR 551 Intermediate Online Publishing Units: 4
- JOUR 555 Advanced Coding for Creative Storytelling Units: 4
- JOUR 575 Converged Media Center Units: 2, 4

Specialized Journalism (MA)

Master of Arts
The Master of Arts in Specialized Journalism is a program geared toward experienced journalists seeking subject matter expertise and toward experienced professionals in other fields seeking journalism skills to advance their expertise. The program is open to recent School of Journalism graduates with records of excellence in their university classes and internships and a demonstrated aptitude and commitment to developing an expertise in a specialized field of reporting.

Students must begin the program in summer term, enrolling in a required 4-unit, intensive session course focused on journalism and society and on digital media. In addition to the formal classes, the course includes multimedia skills workshops. This gateway course provides the master's students with working knowledge of the specialized journalism and the multimedia storytelling skills necessary for study in the program. It sets the stage for two semesters of access to courses as substantively broad as a major research university such as USC makes available and for advanced courses in the School of Journalism's graduate program.

In the fall semester, students will enroll in two courses in the School of Journalism, including a critical thinking course for journalists and a specialized reporting course. With the advice of their academic adviser and faculty mentors, students will select elective course work totaling 8 units appropriate to their fields of specialization. These courses will be drawn from regular graduate and 400-level courses taught across the university. Students also will begin research for their master's professional project. Thesis topics must be approved in advance by faculty. These projects will be extended works of journalism, such as a full-length magazine article, similar radio, television or multimedia treatments or the equivalent in their professional field.

In the spring semester, students will enroll in a journalism seminar focused on the reporting and analysis of decision-making and typically an approved elective in the Annenberg School. Students will also enroll in elective course work totaling 8 units, chosen again from offerings across the university and in consultation with their faculty mentors. Finally, students will complete their master's professional project.

The nine-and-a-half-month program has been designed for a fall and spring semester enrollment cycle; however, students may also elect to complete the program on a part-time basis, but must start with the intensive summer course. Studies toward the Master of Arts in Specialized Journalism require 34 units of prescribed courses and approved electives. No more than 10 units of 400-level course work may be applied toward the Master of Arts in Specialized Journalism.

Residence
The Master of Arts in Specialized Journalism can be completed in a nine-month enrollment cycle that includes the four-week summer session, plus the fall and spring semesters. These programs may be attended on a part-time basis.

Foreign Language/Research Tool Requirements
There is no foreign language or research tool requirement for the master's degree.

Grammar, Spelling and Punctuation (GSP)
Journalism and strategic public relations graduate students are required to complete an online tutorial about Grammar, Spelling and Punctuation (GSP) and pass the GSP test before the end of the fall semester of their first year. Students who fail to complete the GSP tutorial and pass the test within the...
stated time frame will not be allowed to progress in the program and will be dismissed from the School of Journalism.

Note: Students with disabilities may register with the Disability Services and Programs office (DSP) so the DSP staff can assess the nature of the students' disabilities and recommend the appropriate accommodations to be provided for each student.

Master's Thesis
MA in Specialized Journalism students normally enroll in JOUR 594a (2 units), JOUR 594b (2 units) in their single year of study.

Course Requirements (34 Units)

- JOUR 580 Introduction to Specialized Journalism Units: 4
- JOUR 582 Specialized Journalism: Reporting Decisions Units: 2
- JOUR 594a Master's Thesis Units: 2
- JOUR 594b Master's Thesis Units: 2
- JOUR 595 Critical Thinking: The Art and Science of Not Getting Fooled Units: 3

One course from:

- JOUR 571 Advanced Sports Reporting Units: 3
- JOUR 572 Reporting on Entertainment and Popular Culture Units: 3
- JOUR 578 Reporting on Globalization Units: 3
- JOUR 584 Specialized Reporting: Education, Youth and Learning Units: 3
- JOUR 585 Specialized Reporting: Religion Units: 3
- JOUR 586 Specialized Reporting: Science Units: 3
- JOUR 588 Cities, Climate and Risk Units: 3
- JOUR 589 Specialized Reporting: The Changing U.S. Population Units: 3
- JOUR 596 Follow the Money: Business and Economics Reporting Units: 3
- Plus 18 units of approved elective courses Units: 18*

Note:
*One elective course must be taken from an Annenberg School program in COMM, CMGT, JOUR or PUBD.

Specialized Journalism (The Arts) (MA)

Master of Arts
The Master of Arts in Specialized Journalism (The Arts) is geared toward experienced arts journalists as well as recent graduates holding bachelor's degrees in journalism or one of the arts with records of excellence in their university classes and internships and a demonstrated aptitude and commitment to specializing in arts journalism. The program is also open to experienced artists and practitioners with a highly developed background in at least one art form who want to acquire journalism skills toward a future specializing in the coverage of arts and culture. Those with a focus on lifestyle, popular culture and many forms of criticism not strictly associated with the arts, such as food, will also be able to advance their subject expertise as journalists in this program.

Students will complete 16 units of specialized journalism course work, including a master's professional project and 18 units of approved elective course work from faculty-recommended lists, including one course from the USC Annenberg School for Communication and Journalism. Other electives must be in at least two arts schools with at least 8 units from one school. The arts schools are Architecture, Art and Design, Cinematic Arts, Dance, Dramatic Arts and Music.

Students must begin the program in summer term, enrolling in a required 4-unit intensive summer session course focused on journalism and society and digital media. In addition to the formal classes, the course includes discussions, workshops and field reporting. This gateway course provides master's students with a working knowledge of the specialized journalism background and the multimedia and digital storytelling skills necessary for study in the program. It sets the stage for two semesters of access to courses as substantively broad as a major research university such as USC makes available.

In the fall semester, students will enroll in an arts writing practicum and an arts reporting seminar. With the advice of their academic adviser and faculty mentors, students will select elective course work appropriate to their fields of specialization. These courses will be drawn from regular graduate and 400-level courses taught across the arts schools and within the USC Annenberg School for Communication and Journalism. Students also will begin research for their master's professional project. These projects may be full-length magazine (print or broadcast) treatments of issues in their field or similar professional work.

In the spring semester, students will enroll in a journalism course focused on arts criticism and commentary. Students will enroll in elective course work, chosen again from offerings across the arts schools and from the USC Annenberg School for Communication and Journalism in consultation with the academic adviser and mentors. Finally, students will complete their master's professional project. The nine-and-a-half-month program has been designed for a fall and spring semester enrollment cycle; however, students also may elect to complete the program on a part-time basis with the approval of the director of the School of Journalism, but must start with the intensive summer course.

Studies toward the Master of Arts in Specialized Journalism require 34 units of prescribed courses and approved electives. No more than 10 units of 400-level course work may be applied toward the Master of Arts in Specialized Journalism.

Residence
The Master of Arts in Specialized Journalism can be completed in a nine-month enrollment cycle that includes the four-week summer session, plus the fall and spring semesters. These programs may be attended on a part-time basis.

Foreign Language/Research Tool Requirements

Note: 18* units of approved elective courses Units: 18*
There is no foreign language or research tool requirement for the master's degree.

**Grammar, Spelling and Punctuation (GSP)**

Journalism and strategic public relations graduate students are required to complete an online tutorial about Grammar, Spelling and Punctuation (GSP) and pass the GSP test before the end of the fall semester of their first year. Students who fail to complete the GSP tutorial and pass the test within the stated time frame will not be allowed to progress in the program and will be dismissed from the School of Journalism.

Note: Students with disabilities may register with the Disability Services and Programs office (DSP) so the DSP staff can assess the nature of the students' disabilities and recommend the appropriate accommodations to be provided for each student.

**Master’s Thesis**

MA in Specialized Journalism students normally enroll in JOUR 594a (2 units), JOUR 594b (2 units) in their single year of study.

**Course Requirements (34 Units)**

- JOUR 580 Introduction to Specialized Journalism Units: 4
- JOUR 591 Arts Writing Practicum Units: 3
- JOUR 592 Specialized Journalism: Reporting the Arts Units: 3
- JOUR 593 Arts Criticism and Commentary Units: 3
- JOUR 594a Master's Thesis Units: 2
- JOUR 594b Master's Thesis Units: 2
- Approved elective courses* Units: 18

**Note:**

*The elective course work must be taken from faculty-recommended lists. One elective must be taken from within the USC Annenberg School for Communication and Journalism. The other electives must be in at least two arts schools, with at least 8 units from one school. The arts schools are Architecture, Art and Design, Cinematic Arts, Dance, Dramatic Arts and Music.*

**Strategic Public Relations (MA)**

Studies toward the Master of Arts in Strategic Public Relations require 40 units of prescribed courses and approved electives in the student's field of study. Students may take, with prior approval, two of their electives outside the school. No more than 12 units of 400-level course work may be applied toward the Master of Arts in Strategic Public Relations.

Students who earn a GPA of below 3.0 will be placed on academic probation and must improve according to established terms if they are to remain in the school. In the case of courses offered on Credit/No Credit (CR/NC) basis, faculty review of competence will be substituted for grades.

**Residence**

Normally, full-time students in the Master of Arts in Strategic Public Relations can complete the program in four semesters.

**Foreign Language/Research Tool Requirements**

There is no foreign language or research tool requirement for the master's degree.

**Grammar, Spelling and Punctuation (GSP)**

Journalism and strategic public relations graduate students are required to complete an online tutorial about Grammar, Spelling and Punctuation (GSP) and pass the GSP test before the end of the fall semester of their first year. Students who fail to complete the GSP tutorial and pass the test within the stated time frame will not be allowed to progress in the program and will be dismissed from the School of Journalism.

Note: Students with disabilities may register with the Disability Services and Programs office (DSP) so the DSP staff can assess the nature of the students' disabilities and recommend the appropriate accommodations to be provided for each student.

**Master's Thesis/Comprehensive Examination**

MA in Strategic Public Relations students have the option of completing a master's thesis or taking a comprehensive exam. The thesis option takes two forms: (1) a professional project presenting the results of an extensive public relations project completed by the student; or (2) a research thesis presenting the results of primary research undertaken by the student. In either case, students must establish a guidance committee of three faculty members. The chair must be a full-time faculty member in the School of Journalism. The second member will usually be a full-time Journalism faculty member but may be a person connected with USC in other positions who has specific knowledge of the student's topic. In the latter case, the chair of the committee will submit for the director's approval a detailed presentation of the qualifications of the proposed committee member that justify his or her inclusion. In exceptional circumstances, this committee member may come from outside USC. A detailed presentation of qualifications will be required. The third committee member should be a full-time USC faculty member from outside the School of Journalism. The committee is ultimately subject to the approval of the school dean.

Students must secure approval of the professional project or thesis prior to enrollment in PR 594a. Students who elect the thesis option are required to enroll in PR 594a (2 units), PR 594b (2 units), normally during their second year of study. The 4 units will count toward the approved elective units. The comprehensive examination option allows students to complete the degree by passing a comprehensive examination in their last semester of course work.

**Master of Arts**

Studies toward the Master of Arts in Strategic Public Relations require 40 units of prescribed courses and approved electives in the student's field of study. Students may take, with prior approval, two of their electives outside the school. No more than 12 units of 400-level course work may be applied toward the Master of Arts in Strategic Public Relations.

Students who earn a GPA of below 3.0 will be placed on academic probation and must improve according to established terms if they are to remain in the school. In the
case of courses offered on Credit/No Credit (CR/NC) basis, faculty review of competence will be substituted for grades.

**Residence**

Normally, full-time students in the Master of Arts in Strategic Public Relations can complete the program in four semesters.

**Foreign Language/Research Tool Requirements**

There is no foreign language or research tool requirement for the master's degree.

**Grammar, Spelling and Punctuation (GSP)**

Journalism and strategic public relations graduate students are required to complete an online tutorial about Grammar, Spelling and Punctuation (GSP) and pass the GSP test before the end of the fall semester of their first year. Students who fail to complete the GSP tutorial and pass the test within the stated time frame will not be allowed to progress in the program and will be dismissed from the School of Journalism.

*Note:* Students with disabilities may register with the Disability Services and Programs office (DSP) so the DSP staff can assess the nature of the students' disabilities and recommend the appropriate accommodations to be provided for each student.

**Master's Thesis/Comprehensive Examination**

MA in Strategic Public Relations students have the option of completing a master's thesis or taking a comprehensive exam. The thesis option takes two forms: (1) a professional project presenting the results of an extensive public relations project completed by the student; or (2) a research thesis presenting the results of primary research undertaken by the student. In either case, students must establish a guidance committee of three faculty members. The chair must be a full-time faculty member in the School of Journalism. The second member will usually be a full-time Journalism faculty member but may be a person connected with USC in other positions who has specific knowledge of the student's topic. In the latter case, the chair of the committee will submit for the director's approval a detailed presentation of the qualifications of the proposed committee member that justify his or her inclusion. In exceptional circumstances, this committee member may come from outside USC. A detailed presentation of qualifications will be required. The third committee member should be a full-time USC faculty member from outside the School of Journalism. The committee is ultimately subject to the approval of the school dean.

Students must secure approval of the professional project or thesis prior to enrollment in PR 594a. Students who elect the thesis option are required to enroll in PR 594a (2 units) and PR 594b (2 units), normally during their second year of study. The 4 units will count toward the approved elective units.

The comprehensive examination option allows students to complete the degree by passing a comprehensive examination in their last semester of course work.

**Course Requirements (40 Units)**

- GSBA 520 Business Fundamentals for Non-Business Professionals Units: 3, 4
- PR 504 Strategic Public Relations Research, Evaluation and Insights Units: 3
- PR 508 Introduction to Strategic Public Relations Units: 3
- PR 510 Legal, Ethical and Social Foundations of Strategic Public Relations Units: 3
- PR 527 Multimedia Content Creation for Strategic Public Relations Units: 3
- PR 535 Writing for Strategic Public Relations Units: 3
- Plus 22 units of approved elective courses*

*Note:*

*Students electing the thesis option are required to enroll in PR 594a (2 units) and PR 594b (2 units) and must complete 18 units of approved elective courses. Students electing the comprehensive examination option must complete 22 units of approved elective courses.

**University Certificate**

**Journalism Certificate**

The certificate program requires students to complete a 4-unit course in the summer and then complete 16 units during the fall semester, for a total of 20 units.

**Course Requirements (20 Units)**

- JOUR 505 The Practice: Journalism's Evolution as a Profession Units: 1
- JOUR 528 Summer Digital News Immersion Units: 4
- JOUR 531L Fall Digital News Immersion Units: 4
- JOUR 553 Coding and Programming for Storytelling Units: 2
- JOUR 560 Seminar in Mass Communication Law Units: 2
- JOUR 599 Special Topics Units: 2, 3, 4
- Plus 5 approved elective units

*Note:*

*Students should enroll in the section titled "Special Assignment Reporting" of JOUR 599.

**Public Policy Advocacy Graduate Certificate**

The graduate certificate is offered jointly by the Sol Price School of Public Policy and the Annenberg School of Communication and Journalism. The certificate provides students with knowledge of the increasingly important role played by information flows in politics and governance. Students will assess the structure of campaigns designed to influence public opinion, the messaging strategies utilized by political players and civic society organizations and new scholarship on the pathways of persuasion in the digital age. The certificate is especially appropriate for students who intend to pursue work with elected officials, think tanks, foundations, community-based
organizations, consulting firms and corporate offices that aim to shape public policy through advocacy.

Applicants for the Certificate in Public Policy Advocacy must be currently enrolled in a graduate program at USC and in good standing, with a 3.0 GPA. Students can apply for the certificate through the student services office at the Price or the Annenberg School.

The Certificate in Public Policy Advocacy requires a minimum of 14 units for students taking two 3-unit electives in the Strategic Public Relations Program. More typically students will earn 15 or 16 units by taking one or two 4-unit electives. All units earned in pursuit of the certificate can be applied towards the completion of degree requirements if they fall within existing criteria. However, courses taken solely for certificate purposes will not substitute for degree requirements.

**Required Courses**

- PPD 693 Communicating Public Policy Units: 4
- PR 501 Advocacy Communications Units: 4

**Elective Courses**

Pick any two courses from the following:

**Annenberg**

- CMGT 508 Communicating Strategy and Change Units: 4
- CMGT 581 Media in Social Services: Design and Evaluation of Campaigns Units: 4
- COMM 561 Leading and Communicating Change in Global Organizations Units: 4
- PR 534 Case Studies in Public Relations Units: 3
- PR 536 Digital, Social and Mass Media Public Relations Strategies Units: 3
- PR 568 Crisis Management in Strategic Public Relations Units: 3

**Price**

- PPD 555 Public Policy Formulation and Implementation Units: 4
- PPD 616 Participatory Methods in Planning and Policy Units: 4
- PPD 657 Political Leadership in Public Organizations Units: 4
- PPDE 647 Civic Engagement in Governance Units: 4

*Recipient of university-wide or school teaching award.

Degree Programs
The School of Communication offers programs of study leading to a BA in Communication; minors in Sports Media Studies; Culture, Media and Entertainment; Communication Technology Practices and Platforms; Global Communication; Health Communication; Media Economics and Entrepreneurship; Professional and Managerial Communication; Communication Policy and Law; Cultural Studies; and Interdisciplinary Law and Society; progressive degrees in Master of Communication Management and Master of Public Diplomacy; a Master of Science in Digital Social Media; an MA and PhD in Communication; MA in Global Communication (in conjunction with the London School of Economics); a Master of Communication Management and two Masters of Public Diplomacy. The Master of Public Diplomacy combines the resources of the Annenberg School for Communication and Journalism and the USC Dornsife College of Letters, Arts and Sciences' School of International Relations. The Communication Management Program has established dual degree programs with the USC Gould School of Law and Hebrew Union College.

Undergraduate Degrees
The School of Communication offers programs of study leading to a BA degree and minors in Culture, Media and Entertainment; Communication Technology Practices and Platforms; Global Communication; Health Communication; Media Economics and Entrepreneurship; Professional and Managerial Communication; Sports Media Studies; and Communication Policy and Law. Many communication majors pursue, with the school's encouragement, a double major with another discipline or a minor to complement the major. Through careful planning, students can complete these options within four years.

Students must consult with an undergraduate academic adviser at least once each semester to explore course selections within the major, the minor, general education offerings and electives.

Admission
Admission is competitive. Fall 2015 incoming freshmen had an average GPA of 3.61 with an SAT score of 1920-2180 (middle 50%). Transfer students had an average college GPA of 3.66. For admission information and deadlines, refer to the USC Admission Website. All transfer applicants must review the transfer admission application guidelines on the Annenberg Website; contact the Annenberg Admissions Office for more information. USC exclusively uses the Common Application for freshman and transfer admission. Applicants must submit the Common Application and the USC Supplement, both of which can be accessed at commonapp.org. In addition to the university writing samples, a 250-word statement of intent is required; instructions are included with the USC Supplement.

Students currently enrolled at USC who wish to change their major to communication must file a formal application with all supporting documents through the Annenberg Student Services Office. Students who entered USC as freshmen must have 32 units completed with a minimum GPA of 3.0. Students who entered USC as transfers must have 16 units completed at USC with a minimum GPA of 3.0. The 3.0 GPA is a minimum standard and does not guarantee admission. For current USC students, the application period is the first week of classes each fall and spring semester. No applications will be accepted after the first week of classes. Students who have not been admitted to the communication major or one of the minors may complete a maximum of 20 communication (COMM) units at USC. No further communication course work may be taken until the student is admitted. Students who complete the maximum number of units without gaining admission to the school will be advised to select another major. Students are encouraged to contact the Annenberg Student Services Office, ASC 140, (213) 740-0900, for advisement on change of major criteria and major requirements. In certain cases, students may be referred to Dornsife College Advising, CAS 120, (213) 740-2534, to consult with an adviser to select another major.

Academic Integrity Policy
The School of Communication maintains a commitment to the highest standards of ethical conduct and academic excellence. Any student found responsible for plagiarism, fabrication, cheating on examinations, or purchasing papers or other assignments will be reported to the Office of Student Judicial Affairs and Community Standards and may be dismissed from the School of Communication. There are no exceptions to the school's policy.

Curriculum Areas of Study
By design, the courses in the curriculum tend to cluster into different areas of study. These areas represent important foci in the communication discipline and are areas in which the school's faculty possess special expertise. Four such areas of study are described below. They are not mutually exclusive, nor do they exhaust the curriculum; rather, they represent partially overlapping areas of unusual depth. Students may specialize in one of these areas or may design individual programs of study by choosing other combinations of electives that best meet their needs and career objectives. Relevant courses for the clusters are posted on the Annenberg School for Communication and Journalism Website.

Communication and Culture Option: This option will be attractive to a broad range of students whose careers have an international or multicultural dimension, from those interested in foreign service, travel and consulting to those seeking careers in the arts. In addition, students taking this option will be well prepared for advanced graduate study. Courses emphasize: communication as an essential component of culture and cultural production; cultural forces that shape communication practices; cultural barriers to communication; gender and diversity issues in human and mass communication and cultural production; media representations of race, ethnicity and gender; the production of meaning in diverse modes such as art, religion, popular culture and technology; and cultural criticism.
Entertainment, Communication and Society Option: This option is for students who wish to pursue careers in the entertainment industry, as well as students interested in the relationship of communication and entertainment to popular culture, globalization, cultural studies, marketing, advertising and ethics. Students taking this option will be well prepared for graduate study; they will also be able to enter the entertainment industry with a grounding in the theory, roles, issues and effects of entertainment. Courses emphasize: the theoretical underpinnings of entertainment studies; the historical context of entertainment; the roles and effects of entertainment concepts in "high art" and popular culture; the impact of entertainment on politics; advertising in an entertainment society; the blurring of marketing and entertainment and the effects of this on culture; the effects of entertainment in general and specifically on constructions of race and childhood; issues in the blurring of fact and fiction; ethical dilemmas; and the globalization of entertainment industries.

Media, Law and Politics Option: This option is designed for students who are interested in careers in government and public service, the law, and political and legal consulting, as well as advanced graduate study. Students examine communication processes in the public sphere and learn how to participate competently in these practices. Courses emphasize: the role of persuasion in the political and legal processes; the techniques used by individuals, institutions and social movements to influence public affairs; the history, design, implementation and evaluation of political campaigns; the role of public opinion; ethical issues in public communication, including the influence of media in the political and justice systems, the role of the First Amendment and the changing nature of freedom of expression in a mass-mediated environment, and problems of public participation.

Organizational and Interpersonal Communication Option: This option is most relevant to students interested in careers in business, management, human resources and development, corporate communication, and consulting, as well as advanced graduate study. Courses emphasize: interpersonal communication processes that affect and reflect personality, motives, beliefs, attitudes and values; communication's role in the development, maintenance and disintegration of social, family and intimate relationships; managing interpersonal conflict; communication between superiors and subordinates and in teams; communication's role in determining organizational culture; managing information in organizations; and the role of information technology in processes of globalization.

Progressive Degree Program

This progressive degree program allows USC students to complete a bachelor's degree and a Master of Communication Management or a Master of Public Diplomacy in as little as five years. Students with a 3.0 overall GPA or higher in all classes taken at the university level are eligible to apply for admission to the degree program during their junior year, if a minimum of 24 semester hours will be completed in the final year of undergraduate enrollment. However, a 3.0 GPA does not guarantee acceptance.

Current students must attend a mandatory information session conducted by Annenberg Admissions and a member of the faculty before initiating the application process. Students admitted into the progressive degree program begin taking master's level courses in their senior year and may complete the master's degree in year five. For information on the application process, refer to the Annenberg Website, annenberg.usc.edu/currentstudents. Click on progressive degree. For further details on progressive degree programs, see the Requirements for Graduation page.

Minor in Cultural Studies
See the Department of English.

Minor in Global Communication
See the School of International Relations for complete course requirements.

Minor in Health Communication
See the Department of Preventive Medicine, Keck School of Medicine of USC for complete course requirements.

Minor in Law and Society
See the Department of Political Science.

Minor in Photography and Social Change
See the Department of Sociology.

Other Programs

Debate Squad

The Trojan Debate Squad provides an opportunity for outstanding students (3.0 GPA or better), both communication majors and non-majors, to compete in an intensive intercollegiate laboratory setting. Whatever the student's intended career, the skills he or she develops in research, critical thinking and oral advocacy will be invaluable. The team has an excellent record in team policy debate and is now also offering British parliamentary (worlds format) debating. The team competes at both regional and national competitions.

Honors Program

The School of Communication offers an 8-unit honors program for exceptional students. To qualify, students must have a 3.5 GPA both overall and in the COMM major after completing the core courses (COMM 200 or COMM 313, COMM 206 or COMM 311, COMM 209 or COMM 309, COMM 204 or COMM 322, COMM 301 or COMM 305, ASCJ 200 or ASCJ 210). To graduate with School of Communication honors, a student must maintain a 3.5 overall and COMM major GPA and receive at least a B+ or higher in the two honors courses. Students either take COMM 495 Honors Seminar or work with a professor to customize a 400-level COMM course for honors status (4 units). All honor students complete COMM 497 x Honors Thesis (4 units). Contact an undergraduate adviser for further information and application forms.

Honor Society

Lambda Pi Eta is a national communication/journalism honor society that is open to declared communication, journalism and public relations majors who have completed (or are currently registered for) at least 60 units, at least 12 of which are in the major. To be eligible, students must have a USC GPA and a major GPA of 3.5 or higher.

Honors in Multimedia Scholarship

This program offers qualified undergraduate students an opportunity to approach their discipline(s) of study through the critical application of multimedia expression and
scholarship. The student experience will be characterized by smaller classes taught by leading faculty members and enriched by a program of lecture series, visiting scholars, symposia and conferences. For complete program requirements, see the USC School of Cinematic Arts.

**Annenberg Career Development**

The USC Annenberg Career Development Office has listings for paid and unpaid internships from around the country. Career advisers conduct mandatory advisement appointments for all sophomores and offer career workshops, guest speakers and mentoring opportunities. Students are advised to participate in at least two internships before graduation.

**Annenberg International Programs**

**Semester in Amsterdam**

Through the Council on International Education Exchange, students study at the University of Amsterdam. The first week students spend in orientation sessions that include an overview of the academic program, an introduction to Amsterdam and to Dutch society and culture, as well as excursions in and around the city. Students enroll in the offerings taught in English at the University of Amsterdam. Such courses include communication, art, history, economics, environmental sciences, computer science, history, philosophy, literature, social science and theology. Students may earn a maximum of 12 USC units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program.

**Spring Semester in Australia**

This semester program offers students the chance to study at one of Australia’s premier universities, in one of the country’s most exciting cities. Students take communication courses that count for major credit at USC at the University of New South Wales (UNSW) and can choose from a wide variety of elective courses. UNSW is located in Kensington, just south of the center of Sydney and its commercial hub. The program gives students the chance to explore mass media and communication in a challenging environment with a distinct worldview, very different from that of the United States. Students may earn a maximum of 12 USC units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program.

**Fall Semester in Buenos Aires**

This semester program offers students the opportunity to study Latin American culture and study at the Universidad de San Andrés, a small liberal arts college in the suburbs of Buenos Aires. Students will live and learn in this vibrant metropolis while taking communication courses that count toward major credit at USC. Buenos Aires is one of the largest cities in Latin America and will give students the chance to explore the worldview of Latin America and how it relates to communication, mass media and the world at large. The program will immerse students in South American culture. With classes being taught exclusively in Spanish, this program requires a high degree of proficiency in Spanish, both written and oral (five semesters of college-level Spanish or the equivalent required). A minimum USC cumulative GPA of 3.0 is required for this program.

**Semester in Hong Kong**

The semester program offers students the opportunity to learn about Chinese culture at the Chinese University in Hong Kong, a bilingual institution. The program also gives students the experience of living in Hong Kong where they can witness the “one country, two systems” experiment. Courses in English are offered in fine arts, literature, history, Japanese studies, intercultural studies, music, philosophy, computer science, anthropology, economics, international relations, as well as journalism and communication. For students interested in Chinese language, courses are offered in Putonghua (Mandarin) or Cantonese. Extracurricular activities include the opportunity to teach English in rural China, monthly dinner talks with Asian studies specialists and excursions to local areas of interest. Students may earn a maximum of 12 USC units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program.

**Semester in London**

The semester program offers students the opportunity to study communication in London, the most important center of media in Europe. Many of the communication courses offered include British media guest lecturers and site visits. The program includes one-day visits to such places as Oxford, Cambridge and Liverpool. Planned activities within London include theatre and museum visits. Students may earn 16 units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program. Please visit the Annenberg International Programs Website for more information on additional program requirements.

**Spring Semester in New Zealand**

Annenberg's New Zealand program offers students the opportunity to travel to the Southern Hemisphere. Each spring, students can study at the Auckland University of Technology (AUT), a world-class institution that offers students the chance to take communication courses that count toward major credit at USC, all the while exploring the beautiful city of Auckland and the surrounding countryside. The AUT program offers communication students an exciting way to broaden their understanding of media and mass communication in a challenging environment with an outlook distinctly different from that of the United States and Southern California. Students may earn 12 units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program.

**Semester in Rio de Janeiro**

The semester program offers students the opportunity to learn about Brazilian culture through an intensive pre-semester Portuguese language course (*does not count for USC language requirement) and through civic engagement projects that benefit the local communities in Rio de Janeiro. Through the Council on International Educational Exchange (CIEE), USC students enroll in 20 USC units in courses offered by CIEE and at the Escola Superior de Propaganda e Marketing, Brazil’s top communication and journalism school. Students may earn 12 units of upper-division COMM elective credit; please visit the Annenberg International Programs Website for more information on language prerequisites. A minimum USC cumulative GPA of 3.0 is required for this program.

The International Communication Studies program (ICS) allows undergraduate students to study a range of approaches to public communication media across Europe. Students divide the five-week course into stays in Los Angeles, London, Paris, Prague, Istanbul and Rome. In addition to regular class meetings, students discuss the interplay of current world issues and international media practices with communication practitioners from international news and public relations media, government institutions, private industry and global organizations. Students enroll in JOUR 482 Comparative Media in Europe (4 units), which will count as 4 units of upper-division COMM elective credit. A minimum USC cumulative GPA of 3.0 is required for this program.

For further information, contact Annenberg International Programs at (213) 821-1276, email ascintl@usc.edu or visit annenberg.usc.edu/international.

**Graduate Degrees**

**Degree Programs**

The School of Communication offers programs of study leading to a professional Master of Communication Management, an MA/MSc in Global Communication in collaboration with the London School of Economics, a Master of Science in Digital Social Media, two Masters of Public Diplomacy and research-oriented Master of Arts and Doctor of Philosophy degrees in Communication. The Master of Public Diplomacy combines the resources of the Annenberg School for Communication and Journalism and the USC Dornsife College of Letters, Arts and Sciences' School of International Relations. The School of Communication also collaborates with the USC Viterbi School of Engineering to offer a Master of Communication Informatics (MCI) which gives students the opportunity to innovate at the intersection of communication and engineering. For more information, please see Communication Informatics (MCI). In addition, special programs enable students to earn dual degrees in communication management and law (USC Gould School of Law) and in communication management and Jewish nonprofit management (Hebrew Union College).

The degree programs are designed to ensure that students are educated in substantive studies that constitute the discipline of communication and provide a basis for competing effectively in the job market.

All students seeking the degrees in communication management and global communication will take a range of courses that prepare them for successful professional management careers in communication-related businesses, organizations and fields.

All students pursuing the research-oriented degree (PhD in Communication) are required to take two theory courses that introduce them to inquiry in human communication and two research methods courses that acquaint them with the historical/critical and social scientific techniques available to conduct scholarly research. These requirements strengthen the student's appreciation of the intellectual bases of human communication study and further the concept of a community of scholars and practitioners in the profession. Students specialize in one of seven available tracks: Global and Transnational Communication; Groups, Organizations and Networks; Health Communication and Social Dynamics; Information, Political Economy and Entertainment; Media, Culture and Community; New Media and Technology; or Rhetoric, Politics and Publics. In addition, students are encouraged to sample courses in the remaining tracks, thus obtaining an education of unparalleled breadth and depth.

**Admission Requirements**

**Master of Communication Management, Master of Arts in Global Communication, Master of Science in Digital Social Media, Master of Public Diplomacy and Master of Public Diplomacy (Practitioner and Mid-Career Professional)**

The school accepts students from a broad range of academic backgrounds in social sciences, humanities, physical sciences or professional schools. Some are employed or have work experience in communication-related fields. Others apply immediately after completing baccalaureate degrees.

**Criteria:** All applicants must submit the online USC Graduate Admission Application. The faculty admission committees consider many criteria in the admission selection process: the academic record and professional and work-related accomplishments are taken into account. The minimum criteria are the equivalent of a U.S. bachelor's degree and a 3.0 GPA for all undergraduate and graduate work completed. The Master of Arts in Global Communication requires a minimum 3.5 (on a 4.0 scale) cumulative GPA or international equivalent for admission. For admission to communication management, digital social media and public diplomacy, scores on the Graduate Record Examinations (GRE) General Test are required. Applicants to the communication management degree program may submit Graduate Management Admissions Test (GMAT) scores in lieu of the GRE. Scores on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required for applicants whose undergraduate degree was not completed in a country where English is the only official language. Letters of recommendations from those persons familiar with the applicant's work — preferably academically — are required also. In addition, applicants must submit a statement of purpose, transcripts of all previous college and university work attempted, résumé and writing samples.

Applicants to the global communication degree program must apply to USC and the London School of Economics (LSE). Participation in this degree program requires that students simultaneously gain admission to LSE and USC. GRE or GMAT scores are not required for admission. Scores on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required for applicants whose undergraduate degree was not completed in a country where English is the only official language. All students will begin their studies in London at the LSE.

**Procedure:** Refer to the Annenberg Website for degree program admission application guidelines, deadlines and filing periods.

**Doctor of Philosophy**

Students may enter from a variety of academic fields and majors. Applicants whose undergraduate work was in fields other than communication may be admitted on the condition that adequate preparation in directly relevant areas is evident.
Completion of a master's degree in communication is not required for admission to the Doctor of Philosophy.

**Criteria:** All applicants must submit the online USC Graduate Admission Application. The faculty admission committee reviews each application comprehensively. Three letters of recommendation from faculty qualified to comment on an applicant's capacities for a rigorous program of study are required. Completion of a basic descriptive statistics course is recommended. In addition, a personal statement, transcripts from all colleges/universities attended, a résumé and a sample of scholarly writing are required. The MA in Communication is earned as part of the PhD program.

**Procedure:** Admission is granted for the fall semester only. Applicants are strongly encouraged to take the Graduate Record Examinations prior to November 1.

**Degree Requirements**
The Global Communication, Master of Arts in Communication and Doctor of Philosophy in Communication are awarded under the jurisdiction of the Graduate School. Refer to The Graduate School section of this catalogue and the Requirements for Graduation section for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

**Bachelor's Degree**

**Communication (BA)**

**General Education Requirements**
The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. See the General Education Program for more information.

**Course Requirements**

**Required Courses**

**Theoretical and Foundational Classes (12 units total)**
These courses introduce students to theories and subject matter that provide foundational understanding for the Communication major. Each area below broadly explores the way messages and meanings are socially and culturally produced, received by individuals and society, and transformed through technological and industrial shifts.

**Communication Interaction, Influence and Impact (4 units)**

- COMM 200 Communication and Social Science Units: 4
- OR
- COMM 313 Communication and Mass Media Units: 4

**Communication, Civic Life and Culture (4 units)**

- COMM 206 Communication and Culture Units: 4
- OR
- COMM 311 Rhetoric and the Public Sphere Units: 4

**Economics and Technologies of Communication (4 units)**

- COMM 209 Communication and Media Economics Units: 4
- OR
- COMM 309 Communication and Technology Units: 4

**Methods of Communication Practice (8 units total)**
The courses in this area help to provide students with the critical thinking, tools, and methods of inquiry necessary for the interpretation, development, and expression of messages, systematic arguments, and empirical evidence.

**Four units that center on the design and execution of arguments**

- COMM 204 Public Speaking Units: 4
- OR
- COMM 322 Argumentation and Advocacy Units: 4

**Four units that center on the design, execution and interpretation of empirical evidence**

- COMM 301L Empirical Research in Communication Units: 4
- OR
- COMM 305 Understanding Social Science Research Units: 4

**Annenberg Experience (4 units)**
Students are required to take one 4-unit course that prepares Annenberg students to enhance their digital literacy and contextualize modern communication controversies, contemplating changes in the way we process and produce information.

- ASCJ 200 Navigating Media and News in the Digital Age Units: 4
- OR
- ASCJ 210 Contours of Change in Media and Communication Units: 4

**Electives (24 units total)**

- Upper-division COMM courses: 16 units
- Lower- or upper-division COMM or ASCJ courses: 4 units
- One 400-level non-cross-listed COMM course (excluding COMM 443, COMM 490, COMM 494 and COMM 499): 4 units

**Additional Requirements**
Students must maintain a minimum 2.0 overall GPA in upper-division course work applied toward the major. No more than 4 units of COMM 380 may be counted toward the department major. The School of Communication is committed to ensuring that all declared communication majors follow the necessary requirements. Mandatory advisement is required of all communication majors each
semester prior to registration. All students taking communication classes are held to the highest academic integrity standards and may be denied admission or have admission revoked as a result of conduct violations. Qualified non-majors (generally, students with junior/senior status, a minimum 3.0 GPA and a declared major elsewhere at the university) with appropriate academic preparation may be permitted to enroll in communication electives without fulfilling prerequisite requirements. Application for a waiver should be made to an undergraduate adviser.

**Minor**

**Communication Policy and Law Minor**

Information and communication practices and technologies have an increasingly powerful impact on nearly every aspect of our lives. From the level of privacy in our personal lives to the way we govern our communities or manage our businesses, the legal and policy issues in the communication field are ever-changing and increasingly complex. To prepare students to navigate this dynamic and complicated world, the minor in communication policy and law combines courses in communication, law, ethics, and the business of communication taught at both the School of Communication and the School of Journalism at USC Annenberg. Students can choose to focus on policy or legal issues that affect communication technologies, strategies, and uses. This minor will not only enable students to understand the revolution in media and telecommunications technology and practice, it will ground them in the fundamentals of free speech, intellectual property and the local, state and federal role in the regulation of communication platforms ranging from emerging social media to the legacy media of broadcasting and newspapers. This is an ideal minor for students interested in law or advanced communication scholarship. Admission requirements are a minimum 3.0 grade point average and completion of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

**Required Core Courses (8 units)**

- ASCJ 210 Contours of Change in Media and Communication Units: 4
- COMM 322 Argumentation and Advocacy Units: 4

**Choose three electives (12 units)**

- COMM 345 Social and Economic Implications of Communication Technologies Units: 4
- COMM 371 Censorship and the Law: From the Press to Cyberspace Units: 4
- COMM 402 Public Communication Campaigns Units: 4
- COMM 412 Communication and Social Movements Units: 4
- COMM 421 Legal Communication Units: 4
- COMM 422 Legal Issues and New Media Units: 4
- COMM 427 Topics in Media Economics, Law and Policy Units: 4
- COMM 489 Campaign Communication Units: 4
- JOUR 462 Law of Mass Communication Units: 4

**Communication Technology Practices and Platforms Minor**

Students in this minor trace the roots and dynamics of contemporary networked technologies and learn how to participate and excel within media cultures, online networks and organizational workplaces. The minor focuses on three areas: cultures (connecting communication technologies to histories, values, and ethics of social relationships and civic communities); networks (developing qualitative and quantitative skills to model, explain and influence relationships among media and people at local and global scales); institutions (tracing the legal, organizational, economic and interpersonal contexts that produce and transform communication technologies). The field of communication technology requires individuals who can critique, cultivate, build and influence new relationships among people, platforms and practices. Whether starting careers in strategic consulting, medical informatics, non-profit management, social media design, public sector service or new media entrepreneurship, students are encouraged to utilize skills and foundational concepts underlying 21st century communication technologies.

Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

**Required Core Communication Courses**

- COMM 309 Communication and Technology Units: 4
- COMM 339 Communication Technology and Culture Units: 4
- COMM 340 The Cultures of New Media Units: 4

**Electives—Choose Two From The Following**

- COMM 310 Media and Society Units: 4
- COMM 321 Communication and Social Media Units: 4
- COMM 345 Social and Economic Implications of Communication Technologies Units: 4
- COMM 350 Video Games: Content, Industry, and Policy Units: 4
- COMM 422 Legal Issues and New Media Units: 4
- COMM 431 Global Strategy for the Communications Industry Units: 4
- COMM 449 Perspectives on the Networked Press Units: 4
- COMM 465m Gender in Media Industries and Products Units: 4
- COMM 486 Human and Technological Systems in Organizations Units: 4
• COMM 498 Ethical Issues in Entertainment and Communication Units: 4
• CTIN 462 Critical Theory and Analysis of Games Units: 4
• CTIN 463 Anatomy of a Game Units: 4
• CTIN 488 Game Design Workshop Units: 4

Total units: 20

Culture, Media and Entertainment Minor
This 20-unit minor offers courses that examine the theory, content, social impact and economics of a range of creative, media, culture and entertainment industries. Through the lens of music, film, television, advertising, digital media, games, comics and fashion, students will learn strategies for analyzing popular culture and entertainment texts, mechanisms and platforms of content distribution, as well as the historical, social, cultural and political issues shaping these entertainment fields. Taking into account shifts and disruptions in contemporary media and entertainment, students will further examine consumption, audience engagement and participation that necessarily shape our individual and collective identities. These courses will highlight the production, consumption and meanings inscribed in entertainment media industries and products. Depending on the courses selected, the minor will prepare students for a variety of careers in and/or further critical scholarship about media and entertainment industries. Admission requirements are a minimum 3.0 grade point average and completion of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

Required Core Courses (8 Units)
• COMM 300 Entertainment, Communication and Society Units: 4
• COMM 384 Interpreting Popular Culture Units: 4

Choose Three Electives (12 units)
• COMM 306 Innovation, Entertainment, and the Arts Units: 4
• COMM 307 Sound Clash: Popular Music and American Culture Units: 4
• COMM 310 Media and Society Units: 4
• COMM 312 The Business and Culture of Celebrity Units: 4
• COMM 350 Video Games: Content, Industry, and Policy Units: 4
• COMM 355 Advertising and Communication Units: 4
• COMM 360 The Rhetoric of Los Angeles Units: 4
• COMM 363 Media Consumption Units: 4
• COMM 395m Gender, Media and Communication Units: 4
• COMM 396 Fashion, Media and Culture Units: 4
• COMM 426 Religion, Media and Hollywood: Faith in TV Units: 4
• COMM 430 Global Entertainment Units: 4
• COMM 432 American Media and Entertainment Industries Units: 4
• COMM 433 Home Entertainment Units: 4
• COMM 440 Music as Communication Units: 4
• COMM 456 Entertainment, Marketing and Culture Units: 4
• COMM 457 Youth and Media Units: 4
• COMM 458m Race and Ethnicity in Entertainment and the Arts Units: 4
• COMM 465m Gender in Media Industries and Products Units: 4
• COMM 465p Gender in Media Industries and Products Units: 4
• COMM 470 Race and Ethnicity in Entertainment and the Arts Units: 4
• COMM 498 Ethical Issues in Entertainment and Communication Units: 4
• CTCS 482 Transmedia Entertainment Units: 4
• JOUR 381 Entertainment, Business and Media in Today's Society Units: 4
• JOUR 493 Comics and Graphic Storytelling Units: 4

Total units: 20

Media Economics and Entrepreneurship Minor
In recognition of the dislocation and restructuring underway in contemporary media and information industries, this 24-unit minor introduces students to the microeconomics and trends of the sector and gives them an understanding of the role that entrepreneurship plays in the new economy. Students with professional media industry aspirations will learn basic economic literacy and discover the key factors that shape competition in information markets. Further, the minor fosters an entrepreneurial mindset in students and helps them to develop the entrepreneurial skills required to build successful careers and ventures in the media and information sector. Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing).

Required Courses (8 Units)
• BAEP 450 Fundamentals of Entrepreneurship Units: 4 or
• BAEP 451 The Management of New Enterprises Units: 4
• COMM 209 Communication and Media Economics Units: 4

Elective Courses—Choose 16 Units
From The Following
4 units must be in BAEP:
• BAEP 452 Feasibility Analysis Units: 4 *
• BAEP 454 Venture Initiation: Launching and Scaling Your Startup Units: 4 **
• BAEP 460 Seminar in Entrepreneurship Units: 2
• BAEP 470 The Entrepreneurial Mindset — Taking the Leap Units: 2
Note:
*Prerequisite: BAEP 450 or BAEP 451
**Prerequisite: BAEP 452

4-8 units must be in COMM:
- COMM 306 Innovation, Entertainment, and the Arts Units: 4
- COMM 345 Social and Economic Implications of Communication Technologies Units: 4
- COMM 427 Topics in Media Economics, Law and Policy Units: 4
- COMM 430 Global Entertainment Units: 4
- COMM 431 Global Strategy for the Communications Industry Units: 4
- COMM 432 American Media and Entertainment Industries Units: 4
- COMM 433 Home Entertainment Units: 4
- COMM 454 Media, Money, and Society Units: 4

4-8 units must be in JOUR:
- JOUR 381 Entertainment, Business and Media in Today's Society Units: 4
- JOUR 469 Money, Markets and Media Units: 4
- PR 429 Business and Economic Foundations of Public Relations Units: 4
- PR 473 Emerging Media Strategies for Communication and Public Relations Units: 4
- PR 494 Transmedia, New Media and Strategic Communication Units: 4

Note:
*Prerequisite: PR 351a or JOUR 351a

Total units: 24

Professional and Managerial Communication Minor
The ability to succeed in today's workplace necessitates a growing number of communication skills. As today's increasingly global and highly competitive marketplace grows in complexity, the need to understand intercultural differences, the power of structure in the workplace and other issues such as dealing with interpersonal conflicts continues to increase. This minor will provide students interested in the management of people, resources or products with these necessary tools. Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing).

Required Core Communication Courses
- COMM 320 Small Group and Team Communication Units: 4
- COMM 375 Business and Professional Communication Units: 4
- COMM 385 Survey of Organizational Communication Units: 4

Electives-Choose Three From The Following:
- COMM 302 Persuasion Units: 4
- COMM 304 Interpersonal Communication Units: 4
- COMM 308 Communication and Conflict Units: 4
- COMM 315 Health Communication Units: 4
- COMM 321 Communication and Social Media Units: 4
- COMM 322 Argumentation and Advocacy Units: 4
- COMM 324m Intercultural Communication Units: 4
- COMM 345 Social and Economic Implications of Communication Technologies Units: 4
- COMM 388 Ethics in Human Communication Units: 4
- COMM 431 Global Strategy for the Communications Industry Units: 4
- COMM 486 Human and Technological Systems in Organizations Units: 4
- COMM 487 Communication and Global Organizations Units: 4

Total units: 24

Sports Media Studies Minor
USC has a unique historical relationship to sports and sports media, and is near the center of the current sports media capital of Los Angeles. The courses examine the role of sports and sports media in culture, how the presentation of sports in media has evolved, been shaped by cultural issues and, itself, impacted culture. This minor will enhance students' skills in working and interacting with, sports media.

Requirements for admission are a minimum 3.0 GPA and completion of a minimum of 32 units (sophomore standing). The 3.0 GPA is a minimum standard and does not guarantee admission.

Required Core Communication Courses
- COMM 381 Issues in Contemporary Sport Units: 4
- COMM 383m Sports, Communication and Culture Units: 4

Electives
Choose four classes from the following:
- COMM 300 Entertainment, Communication and Society Units: 4
- COMM 310 Media and Society Units: 4
- COMM 363 Media Consumption Units: 4
- COMM 387 Sports and Social Change Units: 4
- COMM 444 Critical Theories of Sport Units: 4
During their course of study, students take 4 units from a list of approved theory-practice integration courses. A maximum of two courses may be taken in the first semester. In the second and subsequent semesters, with approval from the director of the Master of Communication Management program, students may take up to three courses. Among the remaining courses, at least 12 units must be from Communication Management elective areas of focus. Up to 8 may be taken at USC outside the Communication Management program; these courses must be approved by the director of the Master of Communication Management program, and may be selected from a variety of disciplines, depending upon academic and career interests. Any given course may be taken at most three times, after which the student is no longer eligible to take the course.

Digital Social Media (MS)
The School of Communication in the Annenberg School for Communication and Journalism offers a Master of Science in Digital Social Media degree, which is an intensive program focused on leadership and management of digital and social media, and online communities. Students learn to be digital and social media executives, leaders and entrepreneurs through a sequence of classes that teach conceptualization, management of development and analytics, creation of content, and implementation of digital products. Students take 32 units over the course of one calendar year including a funded, final project in which teams receive a budget to develop and launch a working, dynamic, social media product. An internship is highly recommended as students are expected to gain relevant, professional experience while enrolled in the program. No engineering skills are required, but the program provides instruction in collaborating with, and managing, developers.

The program begins in the spring semester, and includes courses during summer and fall. Students applying for this program are required to take the Graduate Record Examinations (GRE).

The completion of this degree program requires 32 units including the successful development and launch of a digital social media product. Core courses are taught in the School for Communication and Journalism. With approval of the program director, students may select electives from the entire USC graduate curriculum.

Digital And Social Media Core Requirements (12 Units)

- DSM 510 Introduction to Digital Social Media Units: 4
- DSM 520 Managing Technologies for Digital Media Units: 4
- DSM 596 Final Project Capstone Units: 4

Research And Practicum Required Classes (8 Units)

- DSM 550 Analytics and Research Methodology Units: 4
- DSM 560 Digital Media Policy, Law, Practices, and Regulation Units: 4

Specialization Classes (4-8 Units)
Students choose one to three classes (4-8 units) that help them specialize their area of expertise within the realm of digital social media. Approval from the director is required for these classes. Student may choose from the director's list or request approval for other classes.

**Electives—Communication or Other Relevant Classes (4-8 Units)**

Students may elect to take classes in related topics within the Annenberg School for Communication and Journalism, or from engineering, business, cinema, music, or other area related to digital and social media or related to the sector of implementation that interests the students. Students are strongly encouraged to acquire relevant experience through an internship and may earn degree credit by enrolling in CMGT 591 Communication Internship. With the permission of the program director, students may take up to 8 elective units within the Annenberg School, or from other USC programs.

**Global Communication (MA)**

The USC Annenberg School for Communication and Journalism collaborates with the London School of Economics and Political Science (LSE) to provide the course work necessary for students to become fully engaged with the phenomenon of global communication through this dual master's degree program. Upon satisfaction of all program requirements, students will be awarded a Master of Arts (MA) in Global Communication by USC as well as a Master of Science (MSc) in Global Media and Communications by the LSE.

**Residence**

This is a two-year program during which students spend their first year at the LSE and their second year at USC.

**Foreign Language/Research Tool Requirements**

There are no foreign language requirements. Students take a one-term research methods course as part of their course work at the LSE.

**Course Requirements**

The Master of Arts in Global Communication requires 42 units; the equivalent of 18 units earned at the LSE and 24 units earned at USC.

- **Year One at LSE:** The LSE academic year has three terms. Students will complete classes approved by faculty at the LSE. Students must earn at least 3 units at the LSE, which articulates as 18 units at USC.
- **Year Two at USC:** Students must complete COMM 598 as well as 20 elective units (5 courses) from the School of Communication graduate curriculum, excluding COMM 525, COMM 526, COMM 550 and COMM 552. Students may choose one of their elective courses from a department outside Annenberg with the approval of their advisers. Students will produce a final research project on global communication that will be the product of work done both at the LSE and Annenberg. Students complete a research project during the summer after their year at the LSE for which grades are awarded by LSE faculty. A passing grade is required. They will continue to develop this project during the year at Annenberg in COMM 598 and must earn a grade of B minus or higher.

**Public Diplomacy (MPD)**

The Master of Public Diplomacy combines the resources of the Annenberg School for Communication and Journalism and the USC Dornsife College of Letters, Arts and Sciences' School of International Relations. This program is designed for students who already have a substantial undergraduate background in social sciences or relevant professional experience in subjects such as communications, film and media studies, journalism, political science, public relations and international relations. Students in the program may decide to emphasize public diplomacy training most appropriate for a career in public service, the corporate world or in a nongovernmental organization (NGO) working in the ever-expanding global civil society. USC is a member of the Association of Professional Schools of International Affairs (APSIA).

Requirements for the completion of this degree program are 49 units, including the required substantive paper or alternative project. The course requirements are as follows:

**Public Diplomacy Requirements (12 Units)**

- PUBD 502 Historical and Comparative Approaches to Public Diplomacy Units: 4
- PUBD 504 Global Issues and Public Diplomacy Units: 4
- PUBD 596 Practicum in Public Diplomacy Research Units: 4

**Public Diplomacy Toolbox Courses (12 Units)**

- Any three approved PUBD courses

**Internship (1 Unit)**

- IR 591 Field Study Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12

**Communication And International Relations Electives (16 Units)**

- Any two approved IR courses Units: 8
- Any two approved COMM or CMGT courses Units: 8

**Other Electives (COGNATE, COMM, CMGT, IR) (8 Units)**

These units may be taken from the School of Communication, School of International Relations or any graduate program at USC. Courses must be approved by the Public Diplomacy program director.

**Public Diplomacy (Practitioner and Mid-Career Professional) (MPD)**

This program is designed for students who already have at least five years experience working in public diplomacy (engaged in international advocacy, international publicity/public relations, international broadcasting, cultural and/or exchange work or other work which the admissions
committee deems to fall within their definition of public diplomacy. The program is taught over a single calendar year beginning with a summer course introducing the advanced study of public diplomacy and ending in the middle of the following summer with the submission of a piece of research work. Refer to the application guidelines on the Annenberg Prospective Student Web pages. Requirements for the completion of this degree program are 32 units including a substantive paper or alternative project. Core courses are taught in the School of Communication and the School of International Relations, USC Dornsife College of Letters, Arts and Sciences. With approval of the program director, students may select electives from the entire USC graduate curriculum.

Public Diplomacy Core Requirements (8 Units)
- PUBD 500 Introduction to the Advanced Study of Public Diplomacy Units: 4
- PUBD 596 Practicum in Public Diplomacy Research Units: 4

Public Diplomacy Toolbox Courses (8 Units)
- Select two approved PUBD courses

Electives (8 Units From Communication Or International Relations)
- Approved IR courses
- Approved COMM or CMGT courses

Other Electives (COGNATE, COMM, CMGT, IR) (8 Units)
These units may be taken from the School of Communication, School of International Relations or any graduate program at USC.

University Certificate

Health Communication Management Graduate Certificate
This certificate program is for students holding master's degrees who wish to pursue or expand careers in health communication. Students will study the most recent theoretical and practical developments in the area of health communication and how this information can be used to improve public health as well as individual behavior. Students take 16 units of graduate course work beyond the master's degree, of which 4 units may be cognate courses.

A partial list of courses includes:
- CMGT 510 Communication, Values, Attitudes and Behavior Units: 4
- CMGT 511 Health Communication Units: 4
- CMGT 520 Social Roles of Communication Media Units: 4
- CMGT 541 Integrated Communication Strategies Units: 4
- CMGT 578 Non-profit Advocacy Units: 4
- CMGT 581 Media in Social Services: Design and Evaluation of Campaigns Units: 4
- CMGT 583 Social Marketing and Entertainment Education Units: 4

International and Intercultural Communication Management Graduate Certificate
This certificate program is for students holding master's degrees who wish to pursue or expand careers in international and intercultural communication management. Students will study the latest developments in information and communication technologies, markets and cultures, and industry practices within cross-nation, cross-cultural contexts. Students take 16 units of graduate course work beyond the master's degree, of which 4 units may be cognate courses.

A partial list of courses includes:
- CMGT 531 Communication and the International Economy Units: 4
- CMGT 545 Communication and Global Competition Units: 4
- CMGT 556 Global Marketing Communication Units: 4
- CMGT 558 The International Entertainment Marketplace Units: 4
- CMGT 559 Global Hollywood Units: 4
- CMGT 580 Chinese Media and Society Units: 4
- CMGT 582 International Communication: National Development Units: 4
- CMGT 584 Communication and the Multicultural Marketplace Units: 4
- COMM 559 Globalization, Communication and Society Units: 4
- COMM 561 Leading and Communicating Change in Global Organizations Units: 4

Marketing Communication Management Graduate Certificate
This certificate program is for students holding master's degrees who wish to pursue or expand careers in marketing communication. Students will study the latest developments in marketing communication research and theory and the application to marketing communication issues. Students take 16 units of graduate course work beyond the master's degree, of which 4 units may be cognate courses.

A partial list of courses includes:
- CMGT 510 Communication, Values, Attitudes and Behavior Units: 4
- CMGT 511 Health Communication Units: 4
- CMGT 520 Social Roles of Communication Media Units: 4
- CMGT 541 Integrated Communication Strategies Units: 4
- CMGT 578 Non-profit Advocacy Units: 4
- CMGT 581 Media in Social Services: Design and Evaluation of Campaigns Units: 4
- CMGT 583 Social Marketing and Entertainment Education Units: 4
Media and Entertainment

Management Graduate Certificate
This certificate program is for students who have already earned master's degrees and who wish to pursue or expand careers in the entertainment industry. Students will study the latest areas of entertainment-related research, theory and application. They will have a strong grounding in the theory, roles, issues and effects of entertainment as well as the impact of entertainment and new entertainment technologies on society, behavior and the entertainment industry.

Students take 16 units of graduate course work that may not be used or have been used for any other degree or certificate program, of which 4 units may be cognate courses.

A partial list of courses includes:

- CMGT 537 The Industry, Science and Culture of Video Games Units: 4
- CMGT 542 Business Strategies of Communication and Entertainment Firms Units: 4
- CMGT 543 Managing Communication in the Entertainment Industry Units: 4
- CMGT 546 Sports Media and Society Units: 4
- CMGT 547 Distribution of Recordings: Media, Retail and Online Channels Units: 4
- CMGT 549 Case Studies in Digital Entertainment Units: 4
- CMGT 550 Hollywood 3.0 — Entertainment Industry in the Convergence Age Units: 4
- CMGT 551 Communicating Entertainment Media Identities Units: 4
- CMGT 558 The International Entertainment Marketplace Units: 4
- CMGT 559 Global Hollywood Units: 4
- CMGT 574 Tele-Media: Strategic and Critical Analysis Units: 4
- CMGT 581 Media in Social Services: Design and Evaluation of Campaigns Units: 4

New Communication Technologies Graduate Certificate
This certificate program is for students holding master's degrees who wish to pursue or expand careers in communication technologies. Students will study the latest developments in new communication and media technologies and their application in a variety of organizational and social contexts.

Students take 16 units of graduate course work beyond the master's degree, of which 4 units may be cognate courses.

A partial list of courses includes:

- CMGT 515 Innovation and the Information Economy Units: 4
- CMGT 530 Social Dynamics of Communication Technologies Units: 4
- CMGT 533 Emerging Communication Technologies Units: 4
- CMGT 547 Distribution of Recordings: Media, Retail and Online Channels Units: 4
- CMGT 571 Communications Technologies Units: 4
- COMM 570 Economics of the Communication Industries Units: 4
- COMM 579 Entrepreneurship in the New Media Units: 4

Strategic Corporate and Organizational Communication Management Graduate Certificate
This certificate program is for students holding master's degrees who wish to pursue or expand careers in corporate communication and communication consulting. Students will study the latest developments in organizational communication research and theory and the application to business communication issues.

Students take 16 units of graduate course work beyond the master's degree, of which 4 units may be cognate courses.

A partial list of courses includes:

- CMGT 500 Managing Communication Units: 4
- CMGT 502 Strategic Corporate Communication Units: 4
- CMGT 503 Strategic Communication Consulting Units: 4
- CMGT 504 Writing for Strategic Communication Units: 4
substitute for GRE scores.

by the law school to its JD degree will be evaluated as a Master of Communication Management degree. Admission completion of 15 unit School of Communication toward its degree.

8 units must be approved as appropriate for acceptance by the practice integration course; 38 units of law courses, of which semester of the second year, and an approved 4 required core conceptual foundation course in the second course in the first semester of the second year, and the 4 courses, including the 4 Second and Third Years:

• COMM 561 Leading and Communicating Change in Global Organizations

Dual Degree Juris Doctor/Master of Communication Management (JD/MCG)

Academic training in law and in communication management provides a powerful background for careers in business, entertainment or government life. The USC Gould School of Law and the USC Annenberg School of Communication collaborate in a program that enables these educational opportunities. Students complete both the JD and the Master of Communication Management in three years, the time normally required for the law degree alone. Students must complete 20 units (five courses) of communication courses at the School of Communication: one required research methods course; one required core conceptual foundation course; one approved theorypractice integration course; and two courses from approved CMGT elective areas of focus.

To earn the JD, all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean of the USC Gould School of Law may make exceptions to this rule for students enrolled in law school honors programs.

First Year: Required law school courses.

Second and Third Years: 20 units of communication courses, including the 4-unit required research methods course in the first semester of the second year, and the 4-unit required core conceptual foundation course in the second semester of the second year, and an approved 4-unit theorypractice integration course; 38 units of law courses, of which 8 units must be approved as appropriate for acceptance by the School of Communication toward its degree.

Application to pursue the dual degree should be made before completion of 15 units of work in law or 8 units toward the Master of Communication Management degree. Admission by the law school to its JD degree will be evaluated as a substitute for GRE scores.

Master of Communication Management/Jewish Nonprofit Management (MCM/MA)

The dual degree program, Communication Management/Jewish Nonprofit Management, offers students the opportunity for advanced study of sophisticated communication processes and technologies in the context of the nonprofit arena. The program has been developed by the USC Annenberg School for Communication and Journalism and Hebrew Union College-Jewish Institute of Religion's School of Jewish Nonprofit Management (formerly the HUC-JIR School of Jewish Communal Service) to combine the study of communication theory, processes and technologies with postgraduate education in Jewish nonprofit management and leadership. The goal of this program is for graduates to perform more effectively in the nonprofit sector, having received specific training in areas such as organizational communication, media impacts and policy.

Students of this program are admitted separately to each school. Students are required to complete 52 units of graduate course work at Hebrew Union College, which include the School of Jewish Nonprofit Management's thesis requirements. Four of the 52 required credits of graduate course work at Hebrew Union College are used to fulfill the School of Communication's cognate option. In addition, students are required to take 24 units (six courses) at the School of Communication, including one required research methods course in the first semester; one required core conceptual foundation course in the second semester; one approved theorypractice integration course; and three courses from approved CMGT elective areas of focus.

Those interested in this program should contact the Office of Admissions, Hebrew Union College-Jewish Institute of Religion, 3077 University Avenue, Los Angeles, CA 90007-3796 for comprehensive information about the application process.

Doctoral Degree Communication (PhD)

Students in the doctoral program learn theories that guide research into communication processes and effects and into institutions and technologies that lend pattern to communication. Applicants for the PhD are expected to acquire and demonstrate humanistic and behavioral knowledge of communication while acquiring skills requisite to scholarly research in the discipline.

Screening Procedures

Student progress is carefully monitored by the School of Communication faculty. Students are normally screened at the end of their first year of graduate study. At that time they must have completed no fewer than 16 and no more than 24 units, including COMM 525, COMM 526, COMM 550 and COMM 552. Students are evaluated on subject matter competence, teaching potential and their ability to conduct independent research. Upon successful passage of the screening procedure, the student has 30 days in which to form a qualifying exam committee.

Course Requirements

- CMGT 505 Communication in Work Settings
  Units: 4
- CMGT 508 Communicating Strategy and Change
  Units: 4
- CMGT 510 Communication, Values, Attitudes and Behavior
  Units: 4
- CMGT 536 Team Communication and Leadership
  Units: 4
- CMGT 573 Evaluating Communication Needs
  Units: 4
- CMGT 576 Communication Strategies for Conflict Management
  Units: 4
- CMGT 577 Communicating Corporate Social Responsibility
  Units: 4
- COMM 561 Leading and Communicating Change in Global Organizations
The student is required to take a minimum of 76 units and write an approved dissertation.

**Four core courses**
- COMM 525x Humanistic and Social Scientific Approaches to Human Communication I Units: 4
- COMM 526x Humanistic and Social Scientific Approaches to Human Communication II Units: 4
- COMM 550 Quantitative Research Methods in Communication Units: 4
- COMM 552 Qualitative Research Methods in Communication Units: 4

**And Doctoral Dissertation**
- COMM 794a Doctoral Dissertation Units: 2 are required for all students
- COMM 794b Doctoral Dissertation Units: 2 are required for all students

**Students specialize in one of seven tracks by completing a minimum of three courses (12 units) in one of the following:**

1. **Rhetoric, Politics and Publics:**
   - COMM 509x Classical Rhetorical Theory Units: 4
   - COMM 511x Contemporary Rhetorical Theory Units: 4
   - COMM 512x Rhetorical Criticism Units: 4
   - COMM 513x Neoclassical Rhetorical Theory Units: 4
   - COMM 514x Social Movements as Rhetorical Form Units: 4
   - COMM 515x Postmodern Rhetorical Theory Units: 4
   - COMM 517x Rhetorical Theory and Culture Units: 4
   - COMM 518x American Public Address Units: 4
   - COMM 520 The Rhetoric of the Presidential Campaign Trail Units: 4
   - COMM 521x Argumentation Units: 4
   - COMM 522x Kenneth Burke's Dramatistic Theory Units: 4
   - COMM 573 Networked Publics: Theories and Encounters Units: 4
   - COMM 576 Civic Media and Participatory Politics Units: 4
   - COMM 580 Media and Politics Units: 4

2. **Media, Culture and Community:**
   - CMGT 587 Audience Analysis Units: 4
   - COMM 510x Feminist Theory and Communication Units: 4
   - COMM 517x Rhetorical Theory and Culture Units: 4
   - COMM 519x Cultural Studies in Communication Units: 4
   - COMM 564 Communication, Culture and Capitalism Units: 4
   - COMM 573 Networked Publics: Theories and Encounters Units: 4
   - COMM 575 Advocacy and Social Change in Entertainment and the Media Units: 4
   - COMM 580 Media and Politics Units: 4
   - COMM 605 Advanced Macro Theories of Communication Units: 4
   - COMM 618 Mass Media Effects Units: 4
   - COMM 629 Global Culture Units: 4
   - COMM 653 Research, Practice and Social Change Units: 4
   - COMM 654 Art, Artists and Society Units: 4
   - COMM 655 Studies in Sound, Music and Communication Units: 4
   - COMM 656 Theorizing Race, Culture, Cross-Cultural Exchange Units: 4
   - COMM 662 Video Games Research Units: 4
   - COMM 672 Experiments in Critical Writing Units: 4

3. **Health Communication and Social Dynamics:**
   - CMGT 581 Media in Social Services: Design and Evaluation of Campaigns Units: 4
   - CMGT 583 Social Marketing and Entertainment Education Units: 4
   - CMGT 587 Audience Analysis Units: 4
   - CMGT 588 Global Storytelling: The Power of Narrative Units: 4
   - COMM 554 Regression and Multivariate Communication Research Units: 4
   - COMM 602 Seminar in Persuasion Units: 4
   - COMM 611 Communication Technology and Healthcare Units: 4
   - COMM 612 Designing Health Communication Interventions Units: 4
   - COMM 613 Grant Writing in Communication Units: 4
   - COMM 614 Computational Approaches in Health Communication Units: 4
   - COMM 615 Health Communication Units: 4
   - COMM 616 Health Communication for Prevention Units: 4
   - COMM 650 Survey Construction and Validation Units: 4
   - COMM 651 Experimental and Quasi-Experimental Designs Units: 4

4. **Groups, Organizations and Networks:**
   - COMM 508x Power, Politics and Conflict in Communication Units: 4
   - COMM 524x Small Group Process Units: 4
• COMM 585x Organizational Communication Units: 4
• COMM 635 Economics of Information Units: 4
• COMM 636 Interpretive and Cultural Approaches in Organizational Communication Units: 4
• COMM 637 Current Readings in Organizational Communication Units: 4
• COMM 638 Global, International and Intercultural Communication in Organizations Units: 4
• COMM 640 Communication and Organizational Change Units: 4
• COMM 641 Organizations and Communication Technologies Units: 4
• COMM 645 Communication Networks Units: 4
• COMM 648 Online Communities and Networks Units: 4
• COMM 652 Field Research in Communication Units: 4

(5) Political Economy of Global Communication:
• COMM 546 The Political Economy of Innovation Units: 4
• COMM 553 Political Economy of Global Telecommunications and Information Units: 4
• COMM 559 Globalization, Communication and Society Units: 4
• COMM 560 Global Media and Communication in China and Asia Units: 4
• COMM 561 Leading and Communicating Change in Global Organizations Units: 4
• COMM 567 The Political Economy of Privacy and Cybersecurity Units: 4
• COMM 570 Economics of the Communication Industries Units: 4
• COMM 582 Information and Communication Technology for Development Units: 4
• COMM 629 Global Culture Units: 4
• COMM 630 Communication Technology and Social Change Units: 4
• COMM 635 Economics of Information Units: 4
• COMM 645 Communication Networks Units: 4
• COMM 647x Network Society Units: 4
• PUBD 504 Global Issues and Public Diplomacy Units: 4
• PUBD 510 Technologies and Public Diplomacy Units: 4
• PUBD 515 Transnational Diplomacy and Global Security Units: 4
• PUBD 516 International Broadcasting Units: 4
• PUBD 522 Hard Power, Soft Power and Smart Power Units: 4

(6) Information, Political Economy and Entertainment:
• CMGT 582 International Communication: National Development Units: 4
• COMM 516x Feminist Theory and Communication Units: 4
• COMM 559 Globalization, Communication and Society Units: 4
• COMM 560 Global Media and Communication in China and Asia Units: 4
• COMM 563 Black Popular Culture: Theory and Central Debates Units: 4
• COMM 564 Communication, Culture and Capitalism Units: 4
• COMM 566 Using Theory to Craft Policies to Affect Change Units: 4
• COMM 570 Economics of the Communication Industries Units: 4
• COMM 630 Communication Technology and Social Change Units: 4
• COMM 647x Network Society Units: 4
• COMM 654 Art, Artists and Society Units: 4
• COMM 660 Entertainment and Games Units: 4
• COMM 662 Video Games Research Units: 4
• COMM 670 Economic Cultures Units: 4

(7) New Media and Technology:
• CMGT 530 Social Dynamics of Communication Technologies Units: 4
• CMGT 531 Communication and the International Economy Units: 4
• CMGT 537 The Industry, Science and Culture of Video Games Units: 4
• COMM 524x Small Group Process Units: 4
• COMM 570 Economics of the Communication Industries Units: 4
• COMM 572 Theories of Computer-Mediated Communication Units: 4
• COMM 573 Networked Publics: Theories and Encounters Units: 4
• COMM 576 Civic Media and Participatory Politics Units: 4
• COMM 577 Fandom, Participatory Culture and Web 2.0 Units: 4
• COMM 578 New Media Literacies Units: 4
• COMM 611 Communication Technology and Healthcare Units: 4
• COMM 641 Organizations and Communication Technologies Units: 4
• COMM 647x Network Society Units: 4

Additional Requirements
In addition, students must take at least two courses in one other track outside their specialization (8 units total). Students also pursue an approved cognate elective program.
of study in which at least two courses (normally 8 units) are taken in a related field outside USC Annenberg School. Students entering the School of Communication with a master's degree may, with permission, apply part of their previous graduate course work to the cognate requirement. Students in the organizational communication track are required to take at least two methods classes in addition to the core courses, COMM 550 and COMM 552. If taken in a department or unit other than the School of Communication, these courses cannot also be counted toward the student's cognate requirement.

Research Tool Requirement

Doctoral students are expected to demonstrate methodological competence in an area of specialization prior to taking the qualifying examination. Such competence is usually demonstrated through course work (the successful completion, with grade B or better, of selected course work in addition to their content courses that is approved by the PhD qualifying exam committee taken in the school and/or related departments), and by completion of a preliminary research project. Under special circumstances, students with an exceptional prior background in research methods may demonstrate their competence by successfully passing a research tool examination designed and administered by the PhD qualifying exam committee.

Qualifying Exam Committee

This committee is composed of five USC faculty members, at least three of whom are from the School of Communication. Students are expected to work closely with the members of their qualifying exam committee, especially their committee chair, in selecting advanced course work and shaping areas of interest and research. In addition to helping the student plan a program, the committee administers the oral portion of the qualifying examination and approves the dissertation committee.

Qualifying Examination

Qualifying examinations for the PhD usually are taken in the third year of study following completion of all required courses and a preliminary research paper. The examination includes both written and oral portions. The written portion is composed by committees of faculty in the relevant areas of study; the oral portion is administered by the student's qualifying exam committee. Students must pass both portions to be advanced to candidacy. Students must confer with their qualifying exam committee chair, not later than the second week of the semester during which the examinations are to be taken, regarding distribution of written examination hours among subject matter areas.

Doctoral Dissertation

The dissertation is an original research project contributing to knowledge about human communication and should demonstrate a high level of competence in methodologies of scholarly inquiry.

Defense of Dissertation

Dissertations are defended in a formal meeting with the three-member dissertation committee. The school prefers that the defense oral be taken prior to final typing so that recommended changes can be made in the final manuscript.

USC Kaufman School of Dance

USC Kaufman's Bachelor of Fine Arts offers dancers a rigorous conservatory experience within one of the world's leading private research universities. The BFA program is designed to prepare the artist, the innovator, and the entrepreneur. The hallmark of USC Kaufman is the development of a new movement model for dance, where intersecting dance techniques create hybrid forms expressed in new media, scholarship, studio practice and choreography. USC Kaufman provides students with foundational insight into the creative process; nurtures personal intellectual and artistic development; offers a robust performance repertory; and emphasizes the importance of conditioning for dancers and physical wellness. An unparalleled world-class faculty facilitates student interaction with renowned, practicing artists; engages students in interdisciplinary projects; and prepares students for successful futures by providing strategic career venture skills. With opportunities for interdisciplinary study interwoven into the curriculum, students are able to explore collaborations and innovations with established partners, including the USC Thornton School of Music, USC School of Cinematic Arts, Gloriya Kaufman Presents Dance at the Music Center and Hubbard Street Dance Chicago. USC Kaufman offers a wide variety of classes open to all USC students in dance technique, theory, choreography and performance. Technique classes range from ballet to hip-hop, contemporary dance to ballroom. General Education classes on the history and culture of dance provide a rewarding introduction to field. The school's two minors serve as thought provoking supplements to major programs of study in other departments and schools. Students may minor in (1) Dance, or (2) Dance in Popular Culture: Hip-Hop, Urban and Social Dances. Information about how to apply for a dance minor—which does not include an audition—is available at kaufman.usc.edu.

Artists in Residence: Zippora Karz; Fiona Lummis; Victor Quijada; Desmond Richardson

Undergraduate Degree

General Education Requirements
The university’s general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. For more information about USC's general education requirements, see General Education.

Entrance to the Degree Program
Admission to a degree program is granted through USC’s admission process, described in the Admission section of this catalogue. A supplementary portfolio of dance materials is also required for students seeking admission to the BFA program of USC Kaufman. This portfolio is submitted online.

Audition
Performance auditions are required of applicants to the BFA program in the USC Glorya Kaufman School of Dance. These auditions take place in two stages. The first stage includes video auditions. The second stage, an in-person audition, is granted to final candidates. Refer to individual curriculum listings for details.

Bachelor's Degree
Dance (BFA)
The BFA is a four-year intensive program designed to prepare students for careers in dance, choreography for stage and cinematic arts, music and/or related fields of pursuit. A diverse array of electives emphasizing a variety of media, in combination with a rigorous established core curriculum, provides students in the BFA with ample opportunity to explore and develop strong personal visions of dance. Introductory courses focus on technique, performance and composition, while also building a solid foundational knowledge of history and critical theory. Upperclassmen continue to work on technique and performance while also pursuing individual interests under the guidance of faculty mentors.

In the junior and senior years, USC Kaufman students explore one of three concentrations: Dance Performance, Choreography for Stage and Cinematic Arts, or Dance and Music. They are mentored by faculty and assisted by academic advisers in selecting electives that support their personal and professional goals.

Emphasis in the final year of study is placed on the development of a professional quality project in the areas of performance, choreography, music, media, scholarship or entrepreneurship.

Dance Performance Concentration
The Dance Performance concentration is designed for students who are interested in careers as professional dancers or in other performance mediums. Emphasis is placed on providing students with the skills to succeed in a variety of entertainment positions. Students work with artists and scholars in the field, learning essential tools needed for a successful career in dance performance.

Dance and Music Concentration
The Dance and Music concentration provides students with a unique perspective on dance by combining dance training with substantial study in music. Courses in songwriting and music history, as well as in instrumental and vocal training, equip students interested in choreography or dance performance with the knowledge to explore careers in the music and larger entertainment industries.

Choreography for Stage and Cinematic Arts Concentration
The Choreography for Stage and Cinematic Arts concentration is designed to guide students who are interested in the field of dance for the stage, motion pictures, television, digital media and animation. Students are mentored in experimental types of dance media, both as individual performers and in collaboration with other visual and performing artists.

General Requirements
Dance training in one or more dance styles at an intermediate or advanced level of technique. Dance styles recommended are ballet, classic modern, hip-hop, classic jazz and contemporary. Proficiency in ballet and/or hip-hop dance is recommended.

Applicants must submit the USC Kaufman Supplement, which includes a video recording and detailed dance resume. All final applicants complete a live audition and interview. Specific audition requirements, along with other entrance requirements, are reviewed on an annual basis and published in the Admission section online at kaufman.usc.edu.

Curriculum Requirements
The BFA requires a total of 132 units.

All BFA students will receive foundational training and insight through the core curriculum. In addition to required courses, BFA students are encouraged to explore an area of dance performance, choreography for stage and cinematic arts or dance and music in greater depth. Students should select electives based on their personal and professional goals and in consultation with faculty and academic advisers. Electives are typically clustered in a particular field, but may be spread across different areas.

Curriculum Requirements

- General Education Units: 24
- Writing Units: 8

Core Requirements

Lower Division
• DANC 101 Colloquium: What is the Medium of Dance Today? Units: 1
• DANC 103 Conditioning for Dancers Units: 2
• DANC 105 Dance Science: Analysis of Dance Movement Units: 4
• DANC 107 World Perspective on Dance Performance Units: 2
• DANC 110 Dance Technique I Units: 3
• DANC 120 Repertory and Performance I Units: 2
• DANC 130 Improvisation and Composition I: Introduction Units: 2
• DANC 131 Improvisation and Composition II: Introduction Units: 2
• DANC 201 Colloquium: History of Performance and Cultural Context Units: 1
• DANC 210 Dance Technique II Units: 3
• DANC 212g Dance in Popular Culture Units: 4
• DANC 218 Introduction to Dance for the Camera: New Media and Editing Units: 2
• DANC 220 Repertory and Performance II Units: 2
• DANC 230 Improvisation and Composition III: Intermediate Units: 2
• DANC 231 Improvisation and Composition IV: Intermediate Units: 2
• MU CO 140 Music for Dancers Units: 2

Upper Division
• DANC 301 Colloquium: The Role of the Dance Artist in Society Units: 1
• DANC 310 Dance Technique III Units: 3
• DANC 320 Repertory and Performance III Units: 2
• DANC 342g International and Historical Perspectives in Dance Units: 4
• DANC 470 Dance Leadership Units: 2
• DANC 480 Advanced Performance Studies: Senior Seminar Units: 1
• DANC 485 Advanced Performance Studies: Senior Project Units: 1

Total units: 65

Concentrations

Choreography for Stage and Cinematic Arts

Required Concentration Electives (8 Units)
• DANC 330 Improvisation and Composition V: Advanced Units: 2
• DANC 331 Improvisation and Composition VI: Advanced Units: 2
• DANC 430 Improvisation and Composition VII: Upper Level Units: 2
• DANC 431 Improvisation and Composition VIII: Upper Level Units: 2

Suggested Concentration Electives (11 units including a minimum of 5 units outside of DANC)
• CTAN 495 Visual Music Units: 2
• CTPR 327 Motion Picture Camera Units: 3
• CTPR 454 Acting for Film and Television Units: 4
• DANC 285L Elements of Dance Production Units: 4
• DANC 302g Hip Hop Don't Stop: Exploring Black Vernacular Dance Units: 4
• DANC 312g African American Dance Units: 4
• DANC 345 Artist in Residence Units: 1, 2, 3, 4
• DANC 347 Artist Collaborative Units: 1, 2, 3, 4
• DANC 363g Dancing on the Screen Units: 4
• DANC 410 Dance Technique IV Units: 3
• DANC 420 Repertory and Performance IV Units: 2
• DANC 430 Creativity, Culture, Commerce and Community Units: 4
• DANC 442 International and Historical Perspectives on Dance II Units: 4

Total: 132

Minor
Dance in Popular Culture: Hip-Hop, Urban and Social Dance Minor

Dance in Popular Culture delves into the historical, social and aesthetic issues of dance in the contemporary settings of entertainment, concert, vernacular and recreational forms. This minor is designed to explore the foundations and structures of hip-hop, urban and social dances and to introduce and orient non-major students to the language of dance in contemporary society. In the hip-hop culture dance has become a major avenue of expression, acceptance and power. This minor will address issues of art, race and politics within the parameters of dance as an art form, entertainment and personal expression.

This minor consists of one lower-division course, one upper-division course and eight units of elective courses. Students must be in good academic standing to be admitted. No previous dance experience is required.

Required Lower-Division Course (4 Units)
- DANC 280g Introduction to Dance as an Art Form Units: 4

Required Upper-Division Course (4 Units)
- DANC 302g African American Dance Units: 4

Elective Courses (8 Units)
- DANC 302g African American Dance Units: 4
- DANC 363g Dancing on the Screen Units: 4
- DANC 385 Choreography and Performance Units: 2
- DANC 392 Creativity, Culture, Commerce and Community Units: 4
- DANC 452 Dancing with Words Units: 4
- DANC 490 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- Dance Technique Course* Units: 2
- DANC 495 Dance Internship Units: 1, 2, 3, 4
- DANC 499 Special Topics Units: 2, 3, 4

Required dance units: 16

Technique Courses
Note:

*Students may only apply one technique course from this list toward the minor.

Dance Minor

The minor in dance presents undergraduate students with a broad yet deep foundation in dance. The program offers a variety of courses in dance technique, history, culture, critical theory, choreography and performance. This minor consists of one lower-division course, one upper-division course and 12 units of elective courses. Students must be in good academic standing to be admitted. No previous dance experience is required.

Required Lower Division Course (4 Units)

- DANC 280g Introduction to Dance as an Art Form Units: 4

Required Upper Division Course (4 Units)

- DANC 342g International and Historical Perspectives in Dance Units: 4

Elective Courses (12 Units)

- DANC 103 Conditioning for Dancers Units: 2
- DANC 105 Dance Science: Analysis of Dance Movement Units: 4
- DANC 107 World Perspective on Dance Performance Units: 2

Total units required: 20 units

*Up to 6 units of technique courses may be applied toward the minor.
Herman Ostrow School of Dentistry of USC

Since 1897, the Herman Ostrow School of Dentistry of USC has provided students with unique, intensive clinical experiences using the most advanced techniques and technologies in the field. Graduates form a tightly knit community of proud alumni, provide top-notch patient care, conduct world-class research and lead the oral health field. The school's strength is its educators. Their world-renowned expertise, combined with innovative curricula, gives students the strong clinical education they need to become great oral health professionals. The curricula include the Doctor of Dental Surgery program, the baccalaureate in dental hygiene program and postdoctoral advanced and specialty programs: endodontics, general practice residency, operative dentistry, oral and maxillofacial surgery, oral medicine, orofacial pain, orthodontics, pediatric dentistry, periodontology and prosthodontics. Other programs include an advanced standing program for international dentists; a master of science degree in geriatric dentistry, orofacial pain and oral medicine; an online graduate certificate program in geriatric dentistry, and master's and doctor of philosophy degrees in craniofacial biology.

The Herman Ostrow School of Dentistry's celebrated status as a well-funded dental and craniofacial research unit allows students to enrich their education through laboratory activities and bolster their clinical skills with strong scientific foundations. Through community service, the Herman Ostrow School of Dentistry provides valuable clinical experiences to the students while helping disadvantaged individuals improve their oral health. Serving the surrounding community helps students develop clinical competency and learn to treat all members of diverse communities with care and compassion.

Charles M. Goldstein Professor of Community Dentistry: Roseann Mulligan, DDS, MS
Phillip Maurer Tennis Professorship in Clinical Dentistry: George C. Cho, DDS

Professors: Yang Chai, DDS, PhD; Chih-Kuang (Casey) Chen, DDS, PhD; Glenn Clark, MS, DDS; Tina F. Jaskoll, PhD; Michael Melnick, DDS, PhD; Cedric Minkin, PhD; Roseann Mulligan, MS, DDS; Mahvash Navazesh, DMD; Janet Moradian-Oldak, PhD; Michael Paine, BDS, PhD; Pragna Patel, PhD; Ilan Rotstein, DDS; Avishai Sadan, DMD, MBA; Michael L. Schneir, MS, PhD; Jorgen Slots, MBA, DDS, PhD; Malcolm L. Snead, DDS, PhD

Associate Professors: Winston Wan-Li Chee, BDS; George C. Cho, DDS; Sillas Duarte, Jr., DDS, PhD; Robert G. Keim, DDS, EdD; Ralph L. Leung, MS, DDS; Pascal Magne, DMD, PhD; Glenn Sameshima, DDS, PhD; Arnold Tiber, DDS, PhD; Homayoun H. Zadeh, DDS, PhD

Assistant Professors of Dentistry: Ruchi Bajpai, PhD; Amy Merrill-Bragger, PhD; Ramiro Murata, DDS, PhD; Parish P. Sedghizadeh, DDS; Jian Xu, PhD; Jiang Zhong, PhD

Professors of Clinical Dentistry: Jane Forrest, RDH, EdD; Michael Jorgensen, DDS; Diane Melrose, BSDH, MA; Michael J. Mulvehill III, DDS, MBA; Douglas Solow, DDS, MBA

Associate Professor (Clinical Scholar): Stephen Yen, DMD, PhD

Associate Professors of Clinical Dentistry: Loris Abedi, DDS; Garten Beale, DDS; Linda Brookman, RDH, MS; Reyes Enciso, PhD; Richard Furuchi, DDS; Joyce Galligan, RN, DDS; Richard Green, MS Ed, DDS; Michelle Ikoma, DDS; Kian Kar, MS, DDS; Thomas Allen Levy, MS, DDS; Niel Nathanson, MPH, MA; Saravanay Ram, DDS, MDS; Ramon Roges, DDS; Eddie Sheh, DDS; Donna Smith, RDH, MSED; Piedad Suarez, DDS; Joyce Sumi, RDH, MS; Richard Udin, DDS; Mark Urata, DDS, MD

Assistant Professors of Clinical Dentistry: Tae Ahn, DDS; Lupe Arevalo, RDH; Kim Austin, DDS; Nissim Benbassat, DDS; Yaara Berdan, DDS; Jucheng Chen, DDS, PhD; Nam Cho, DDS, MD; Christine Edwards, PhD; Laura Elizondo,
DDS, Sharon Faust, DDS; Alon Friedman, DDS; Dan Grauer, DDS, PhD; Ripsik Gukasyan, DDS; Phuu Han, DDS, PhD; Tran Han, DDS; Helia Hooshanghi, DDS; Annie Huang, DMD; Julie Jenks, MS, MPH, DHR; Boris Kesselbrner, DDS; Tae Kim, DDS; Janet Lent, DDS; Richard S. Lin, DDS; Bethany Lowe, DDS; W. Michael Madden, DDS; Ali Ostadali Makhmalbaf, DDS; Chris Mayeda, DDS; Mehdi Mohammadi, MPH, DDS; John Morzov, DDS; Lisa Pedersen, MSW; Jose Polido, DDS; Elham Radan, DMD, MSc; Rafael Roges, DDS; Gelareh Ronaghi, DDS; Neimam Sartori, DDS; PD; Santosh Sundaesan, DDS*; Marlene Talley, DDS; Thomas Tanbonliong, Jr., DDS; Antonia Tereul, DDS, PhD; Anita Tourah, DDS; Natalie Tung, DDS, MD; Tomoko Wada, DDS

Research Assistant Professors: Matthew K. Lee, MD; Alireza Moshaeri, DDS, PhD; Yan Zhou, MD
Clinical Professors: Ralph B. Allman, MS, DDS; David Good, DDS; John J. Lytle, MD, MD; Gayle Macdonald, PhD; Dennis-Duke R. Yamashita, DDS; Margarita Zeichner-David, PhD
Clinical Associate Professors: Barbara D. Edwards, RDH; Mina Habibian, DMD, PhD; John Kishibay, DMD, PhD; Bach Le, DDS, MD; Michael Padilla, DDS; Anthony Park, DDS; Richard Phillips Jr., DDS*; M. Hazem Seirawan, DDS, MS, MPH; Hovhannes Shnorhokian, DMD, PhD; Ann Spolarich, PhD; James W. Tom, DDS, MS; Arman Torbati, DDS; Leon Unterman, DDS; Stefan Zweig, DDS
Clinical Assistant Professors: Mainal Absan, PhD; Alexander Alcaraz, DMD; Gabriela Anderson, DDS; Vartuhi Avanesian, DDS; Nasrin Bahari Chopiu, PhD; Ting Cho, DDS; Simon Choy, DDS; Chloé Cohen, DHR; Xio Mei Cui, DDS; Sibel Dincer, DDS, MS; Irene Esteves, RDH; Andrea Gamble, DDS, MS; Ellen M. Grady, BA; Melina Gregorian, DDS; Stan Hanes, DDS; Lisa Hou, DDS; Steven Kallman, DDS; David Kang, DDS; Parabjeet Kaur, DDS; Alena Knezevic, DMD, PhD; Theresia Laksmana, DMD, MS; Jennifer I-Chen Lo, DDS; Stacy Love, DDS; Michael Mashni, DDS; Joel McPherson, DDS; (Mehdi) Mohammad Mohammadi, MPH, DDS; Brett Nagatani, DDS; Camille Nakamura, DDS; Naomi Nguyen, DDS, MS; Lisa Oshiro, RDH; Vanessa Pardi, DDS, PhD; Kristine Parungao, BSDH; Dieu Pham, DDS, MD; Vanthi Pham, DDS; Lisa Popkoff, DDS; Narendranath Ravindranath, PhD; Adrine Reganian, RDH, MS; Lucille Rotstein, BChD; Liane K. Sakai, DDS; Mary Saitou, DDS; Daniel Schechter, DDS; Daniela Schmid, DDS, PhD; Natalia Slusky, DDS; Jenny Son, MS, DDS; Flora Stay, DDS; Judith Tefft, PhD; Jeremy Teoh, MPH, DDS; Christopher Truhan, DDS; Fabiana Varjao, PhD; Lois Velasco, DDS; Xin Sean Xu, PhD, DDS; Kiyomi Yamazaki, DDS, PhD
Clinical Instructors: Amelina Andrade-Garcia, RDH; Joaikim Bakhoun, DDS; Joan Beleno, RDH; Katheryn Bowns, RDH; Linus Chong, DDS, MS; Patricia Denny, MA; Shahrokhe Jedian, DDS; Gerald McClellan, DDS; Albert Mizrahi, DDS; Michaela Nguyen, RDH; Carlos Sanchez, RDH; Eugene Zakaryan, DDS

*Recipient of university-wide or school teaching award.

Degrees Offered
The Herman Ostrow School of Dentistry awards the following degrees: the Bachelor of Science, Dental Hygiene; the Master of Science, Dental Hygiene; the Master of Science, Geriatric Dentistry; the Master of Science, Orofacial Pain and Oral Medicine; the Doctor of Dental Surgery; the Advanced Operative and Adhesive Dentistry Certificate/MS, Craniofacial Biology; the Advanced Orthodontics Certificate/MS, Craniofacial Biology; the Advanced Pediatric Dentistry Certificate/MS, Craniofacial Biology; the Advanced Pediatric Dentistry Certificate/PhD, Craniofacial Biology; the Advanced Periodontology Certificate/MS, Craniofacial Biology; Advanced Dental Education Certificate programs in Endodontics, Geriatric Dentistry, Operative and Adhesive Dentistry, Oral and Maxillofacial Surgery, Orofacial Pain, Oral Medicine, Pediatric Dentistry, Periodontology, and Prosthodontics; Master of Science in Craniofacial Biology; and the Doctor of Philosophy in Craniofacial Biology. The school also offers a minor in craniofacial and dental technology.

General Information
Grades are issued by members of the faculty to indicate to students their level of achievement and to provide information to committees given the responsibility of reviewing a student's total academic record and assigning honor or deficient status.

Newly admitted students to the Doctor of Dental Surgery (DDS) program, the Advanced Standing Program for International Dentists and Bachelor of Science in Dental Hygiene (BS) students are bound by the university grading system (excluding plus-minus grades), which is detailed in the Academic Standards section of this catalogue.

Grades used by course directors of required advanced specialty classes are: "Cr" — credit, "CrH" — credit with honors and "NCr" — no credit. Other notations appearing on the transcript are: "IP" — indicates that the grade in a course is not issued until a subsequent trimester; "IN" — incomplete work; "ICW" — incomplete clinical work; "MG" — missing grade; "W" — withdraw. Students pursuing a Master of Science, Doctor of Philosophy in Craniofacial Biology and students in dental hygiene, doctoral and international classes should refer to the Academic Standards section of this catalogue.

Probation and Disqualification
A student evaluation policy has been developed that outlines methods by which the faculty can recognize outstanding achievements by students and identify those who have difficulty meeting the school's academic standards.

In this policy, the procedures dealing with the assignment and consequences of academic status, including academic probation and disqualification, are outlined in detail. It is hoped that the development of specific guidelines will eliminate confusion and minimize the amount of time spent in determining the student's status, thus allowing faculty and students to concentrate on their primary responsibility — the training of dental health professionals. Copies of student professional performance evaluation committee guidelines are available online on the dental school Website intranet.

DDS (includes Advanced Standing Program for International Dentists)
A student will be placed on academic warning if the GPA of a given Academic Time Unit (ATU) falls below a 2.0; if a failing course grade in a course of 1 unit or less is received; if
a student does not successfully pass National Board Part I and National Board Part II or does not take the exams during the time-frame designated, and if in the judgment of the student professional performance evaluation committee, such a warning is warranted for other reasons, such as poor attendance or consistent tardiness.

A student will be placed on academic probation if a failing grade is received in 2 or more units completed in one ATU; if a second consecutive academic warning is warranted; if two conditions that justify academic warning are met in a single ATU or if a single condition is met twice in an ATU, or if a student receives an F in a module that results in an MG, or if freshman students in trimesters I, II or III will be placed on academic probation if the quality of preclinical work is unsatisfactory as reflected by a failing (F) grade in the module or if the quality of preclinical work is poor enough to jeopardize student's timely transition to clinic with the rest of the class or if warranted by other factors related to the quality of preclinical/clinical work such as poor attendance, unprofessional behavior and/or poor performance in written examinations or, if in the judgment of the student professional performance evaluation committee, probation is warranted by other academic factors; or if recommended by the group practice director, due to quality and/or quantity of clinical work.

A student will be placed on clinical probation if a grade of "F" is received in any of the graded categories of group practice performance, or, in the judgment of the group practice director, probation is warranted by other factors related to the delivery of health care or clinical accomplishment.

A student will be considered for disqualification if (1) at the end of any trimester during the freshman year (trimesters I, II, III) a student's continued lack of preclinical accomplishment is significant enough to suggest a deterioration of preclinical skills; (2) a second academic probation is warranted; (3) a failing grade is not reconciled; (4) at the end of the academic year the grade point average for the preceding year is below 2.0; (5) academic probation is warranted while repeating a trimester on probation; (6) a deficiency in any area is acquired which is determined by the Student Professional Performance Evaluation Committee to be insurmountable; (7) at the end of the second trimester of the Advanced Standing Program for International Dentists (ASPID) the cumulative average is less than 2.0; (8) it is recommended by the group practice director, based on severe and irreconcilable deficiencies relating to the quality and/or quantity of patient treatment; and (9) if, at the end of any trimester following trimester VII, a student's ongoing lack of clinical accomplishment is significant enough to suggest a deterioration of skills and/or inadequate treatment of patients assigned to his/her care.

BS, Dental Hygiene Students

A student will be placed on academic warning if (1) the GPA for any given Academic Time Unit (ATU) is less than 2.0; (2) a failing grade is received in a 1-unit (or less) course; (3) a grade of "D" is received in a 3-, 4- or 5-unit course. A student will be placed on academic probation if 2 units or more of failure are recorded at the end of any trimester; if a second consecutive academic warning is warranted; or if, in the judgment of the Student Professional Performance Evaluation Committee, probation is warranted.

A student will be placed on clinical probation if a grade of "F" is received in any of the graded categories of group practice performance, or, in the judgment of the group practice director, probation is warranted by other factors related to the delivery of health care or clinical accomplishment.

A student will be considered for disqualification if (1) a third probation is warranted at the end of any trimester; (2) a failing grade is not reconciled; (3) at the end of the academic year the grade point average for the preceding year is below 2.0; (4) academic probation is warranted while repeating a trimester on probation; and (5) a deficiency in any area is determined by the Student Professional Performance Evaluation Committee to be insurmountable. In addition to the Dental School evaluation policy (which evaluates courses taken in the Dental School), students in the Dental Hygiene Program are also bound by the university's academic status requirements.

Advanced Specialty Students

A student will be placed on academic probation if a failing grade is received in any course or if, in the judgment of the program director, a student's performance warrants such status due to academic or other factors. A student may be disqualified if the stipulations of a probationary period are not met by the required deadline, a failing grade is not reconciled in the period specified by the course director, or if a deficiency in any area is acquired which is determined by the program director to be insurmountable. A student who is placed on academic probation a second time can continue in the program only with the approval of the program director and the Advanced Student Professional Performance Evaluation Subcommittee.

Honor Status

The Herman Ostrow School of Dentistry recognizes excellence in achievement by assigning special honor status during the course of study and by presentation of awards upon graduation.

Dean's List

Students who complete all course work by a prescribed deadline and earn a grade point average of 3.5 or above for a trimester are placed on the Dean's List. Students shall not be placed on the Dean's list if they are on deficient academic status during that trimester (i.e., academic warning, academic probation and continued academic probation).

Omicron Kappa Upsilon Honor List

The local chapter of Omicron Kappa Upsilon (OKU), a national dental honor fraternity recognizes the top 10 percent of each doctoral dental class at the end of each academic year (August) by including these students on the OKU Honor List. The determination of the top 10 percent is based on a yearly GPA. It should be noted that placement on the OKU Honor List has no relationship to membership in OKU, which is based on overall academic achievement and professional development.

Graduation Awards

There are numerous awards made each year at graduation to recognize excellence in members of the graduating doctoral,
dental hygiene and ASPID classes. A complete listing is available at the Herman Ostrow School of Dentistry.

**Voluntary Withdrawal/Leave of Absence**
The Herman Ostrow School of Dentistry recognizes that in some special instances it may be necessary or beneficial for a student to interrupt or discontinue dental education. A student wishing to withdraw from school or request a leave of absence must contact the Office of Academic Affairs for procedures to be followed. An approved leave of absence will not be granted for more than one year.

Students at the School of Dentistry who have not been formally dropped by the school, are considered enrolled each term unless they have submitted a letter of intent to withdraw. A student's verbal indication that he or she intends to withdraw or failure to settle a fee bill are not sufficient to eliminate the student from class rosters. Final course grades will be collected for students who do not have a letter of intent to withdraw on file with the Office of Academic Affairs.

A student who withdraws at any time during the first three weeks of a trimester will receive no grades for enrolled courses. A student who withdraws after three full weeks of an Academic Time Unit (ATU) will receive a mark of "W" for all enrolled courses not completed. Withdrawal is not permitted after the 12th week of a trimester.

**Family Educational Rights and Privacy Act**

Processing Fee (not refundable):
- Domestic applicants: $85.00
- Graduates of foreign dental schools or students requiring a student visa: 145.00

Commitment Deposit (not refundable):
- Dentistry: 3,000.00
- Dental Hygiene: 2,000.00
- International Dental: 3,000.00
- Advanced Dental: 1,500.00

Pre-Tuition Payment (refundable in accordance with the refund policy): 1,500.00

Mandatory Fees (School of Dentistry fees only; for other fees, refer to the Tuition and Fees (Estimated), Fall 2015 section of this catalogue.):
- CDA Dues: 5.00
- Doctoral dental and Advanced Standing Program for International Dentists students only; spring only.
- ASDA Dues: 80.00
- Doctoral dental program and Advanced Standing Program for International Dentists students only; fall only.

Special Fees:
- Transcript Fee: 10.00
- Gown Usage Fee: 165.00
- Disability Insurance (Doctoral, Advanced Standing Program for International Dentists and Advanced Certificate): 108.00

Scrub (first year only): 350.00

**Student Issue**

Figures shown below are approximate. The School of Dentistry reserves the right to change fees at any time.

**Financial Aid**

Detailed information concerning financial aid programs available to dental students can be obtained by contacting the Herman Ostrow School of Dentistry of USC Office of Financial Aid at (213) 740-2841, uscsdfa@usc.edu or visit dentistry.usc.edu/admission.

**Undergraduate Degree**

**Progressive Degree Programs**

The following progressive degrees are available for students enrolled in the Dental Hygiene program: MPH at the Keck School of Medicine, MA in Gerontology from the Davis School of Gerontology, and a MSDH from the Herman...
Ostrow School of Dentistry. Applicants to the program must have completed 64 units of course work and must submit their applications prior to completion of 96 units of course work. Applicants do not have to submit GRE scores, but are expected to have a minimum GPA of 3.0 at the time of application. The application for admission to a progressive degree program must be accompanied by an approved course plan proposal and letters of recommendation from two USC faculty members. The requirements for both the bachelor's degree and the progressive degrees must be satisfied. For further details on progressive degree programs, see the Requirements for Graduation page.

Continuing Education
The Office of Continuing Education provides education courses, participation programs and national and international symposia in many areas of the dental profession. These educational activities are designed to offer updated and innovative concepts to dentists, dental hygienists, dental technicians and auxiliary personnel, and to provide the dental community with the opportunity for lifelong learning from outstanding scholars. In addition, the courses fulfill continuing education requirements of the California Board of Dental Examiners for relicensure of dentists and auxiliaries. The Herman Ostrow School of Dentistry of USC is a recognized American Dental Association (ADA) and a Continuing Education Recognition Program (CERP) provider.

Courses are given at regular intervals in the various subjects of dentistry: oral health, dental esthetics, oral medicine, physical diagnosis, dental materials, dental laboratory techniques, dental management, endodontics, periodontics, implants, oral surgery, restorative dentistry, fixed and removable prosthodontics, instrumentation, occlusion, oral pathology, dental hygiene, dental auxiliary education, patient education, pharmacology, principles of dental practice, radiology, sedation and emergencies.

Information on schedules of classes may be obtained by writing to: Herman Ostrow School of Dentistry of USC, Office of Continuing Education, Room 2127, FAX: (213) 740-3973, email: cedental@usc.edu or refer to the school's Website at uscdentalce.org.

Minor

Craniofacial and Dental Technology Minor

The Herman Ostrow School of Dentistry, the Viterbi School of Engineering Department of Biomedical Engineering and the Dornsife College of Letters, Arts and Sciences Department of Biological Sciences jointly offer the minor in craniofacial and dental technology. This minor is designed to prepare engineering, pre-dental, pre-medical and biological sciences undergraduates to enter the dental biotechnology industry as well as to introduce them to recent innovations in craniofacial sciences and therapeutics. The course work introduces students to concepts in craniofacial histology and embryology, head-and-neck anatomy, genetics, biochemistry and biotechnology as well as applications to dental diagnostics, imaging and dental therapies (dental implants, restorative dentistry, craniofacial genetics).

This minor requires 16 core units and a minimum of 4 units of electives. Students who have not fulfilled prerequisite requirements for core or elective courses will have to take additional units, depending on their major. In addition, students must take at least 16 units not used for their major or offered by their major department. Please see a biomedical engineering, biological sciences or Herman Ostrow School of Dentistry adviser for specific program requirements.

Core Required Courses, Upper Division

- DENT 412 Fundamentals of Craniofacial and Dental Technology Units: 3
- DHIS 310 Basic Tissues and Histology and Embryology Units: 2
- BISC 320L Molecular Biology Units: 4
- BISC 325 Genetics Units: 4 *
- BME 410 Introduction to Biomaterials and Tissue Engineering Units: 3 *

Total core units: 16

Electives

Enroll in at least two courses from the following:

- BISC 330L Biochemistry Units: 4 *
- BISC 403 Advanced Molecular Biology Units: 4 *
- BISC 406L Biotechnology Units: 4 *
- BISC 410 Applications of Molecular Biology to Medicine Units: 4 *
- BISC 435 Advanced Biochemistry Units: 4 *
- BME 404 Biomechanics Units: 3 *
- BME 416 Development and Regulation of Medical Products Units: 3
- BME 451 Fundamentals of Biomedical Microdevices Units: 3 *
- DENT 221 Introduction to Dentistry Units: 1
- ENGR 305 Engineering Biology Matters Units: 3
- HP 340L Health Behavior Statistical Methods Units: 4
- HP 350L Health Behavior Research Methods Units: 4
- MASC 310 Materials Behavior and Processing Units: 3

Total elective units: 4-8

Note:

*Prerequisite required

Master's Degree

Dental Hygiene (MS)

The Master of Science in Dental Hygiene is designed as a 16-month full-time program, but can be taken as a part-time program. The program is designed to train graduate dental hygiene students to become leaders in the field who will help
to advance the art and science of the discipline of dental hygiene. Students will learn how to integrate research findings into the dental hygiene process of care to form strategies to decrease oral disease risks and promote oral health among individuals, families and communities. The first three trimesters are devoted to course work that progressively leads to the formation and acceptance of a project plan for implementation in the field in the final trimester. All students will complete 26 units of required core course work, plus four additional units of elective studies in an area of emphasis, which support their interests and future career plans. Emphasis areas include education, geriatric dentistry and pediatric dentistry. Courses in education will be offered through the Department of Dental Hygiene, while electives in geriatric dentistry and pediatric dentistry will be offered through existing graduate programs at the Herman Ostrow School of Dentistry. Students will learn program planning, advanced research methodology and statistical data management, and apply these skills into the design and implementation of their project as the basis for their scholarly capstone project. Students will demonstrate active learning through interactive classes, peer teaching, and the design and use of educational technology. Courses include traditional lecture, case studies, and student written and oral presentations.

**Admission Requirements**

All applicants to the Master of Science in Dental Hygiene program must satisfy the following general criteria:

- Successfully graduated from an accredited dental hygiene program in North America.
- Possess a baccalaureate degree in dental hygiene or related area from an accredited university.
- Minimum GPA: 3.0
- Scores for the Graduate Record Examinations (GRE);
- Submit three letters of recommendation: one from the undergraduate dental hygiene director and the other two from individuals who can attest to general character. These letters may be from professors, and/or an employer, from a service organization, or from a respected member of the dental hygiene or dental profession.
- Submit a career statement
- Submit a current curriculum vitae

Applicants who meet these requirements will be invited to interview for the program. The interview may take place in person, by telephone, or through a live, interactive electronic communication.

**Application Deadlines**

In order to be reviewed, the application and required application materials must be received by the division's admissions committee prior to February 15 for a fall semester start. Submit the application well in advance of the deadline and note that transcripts and other application materials may take three weeks or more to be processed by the Office of Admissions and then made available to the office.

Applications received after February 15 are also welcome and will be processed on a space available basis.

**Application Procedures**

The ADEA Dental Hygiene Centralized Application Service (DHCA) is the centralized application service for applicants to dental hygiene programs. Please review the instructions for the application at adeahcas.org. Applicants for the Master of Science in Dental Hygiene must select "Graduate" as the designation.

In order to begin the ADEA DHCAS application, every applicant will need an email address and a DentPin. The DentPin is a personal identification number used in place of the social security number. To receive a DentPin, visit the American Dental Association Website at ada.org/dentpin.

At the same time, applicants must apply and gain admission to the University of Southern California, which is granted in all cases by the USC Office of Admission. Applicants must apply online at usc.edu/admission/graduate/apply at least three weeks before the departmental application deadline to allow adequate time for processing. Be sure to complete the supplemental portion that relates to dental hygiene. Arrange to have transcripts and test scores sent to USC in time to meet this deadline. Only a letter from the university Office of Admission grants official university admission.

**Materials to Be Submitted by Applicants**

Send official transcripts from all colleges attended and GRE test scores via USC's ETS code (school code is 4852) to:

University of Southern California
USC Office of Graduate Admission
3601 South Flower Street Room 112
Los Angeles, CA 90089-0915

**Supplemental Materials to be Submitted to:**

Herman Ostrow School of Dentistry of USC Office of Admissions Room 201
925 W. 34th Street
Los Angeles, CA 90089-0641

**Supplemental Materials Include:**

- Three letters of recommendation. Letters of recommendation must be in a sealed envelope with a signature across the back.
- Career statement
- Current résumé / curriculum vitae

**Degree Requirements**

Completion of the degree requires satisfactory completion of a minimum of 30 credits of course work at the 500 level or above including a capstone project, which consists of a comprehensive written scholarly report suitable for publication and a defended oral presentation.

**Required Courses**

- CBY 585 Systematic Research Writing Units: 3
- EDUC 622 Educational Theory and Instructional Design Units: 2
- EDUC 632 Technology in Higher Education Units: 2
- DHYG 501 Dental Hygiene Theory and Science I Units: 3
- DHYG 502 Dental Hygiene Seminar I Units: 1
- DHYG 504 Dental Hygiene Theory and Science II Units: 3
- DHYG 505 Dental Hygiene Seminar II Units: 1
- DHYG 506 Research Methodologies and Statistics Units: 3
- DHYG 507 Dental Hygiene Theory and Science III Units: 3
- DHYG 508 Dental Hygiene Seminar III Units: 1
- DHYG 510 Capstone Project Units: 4

Areas of Emphasis (must choose four units within one area)

Education
- DHYG 511 Classroom and Clinical Instruction Design Units: 2
- DHYG 512 Student Teaching Units: 2

Geriatrics
- GDEN 713 Common Systemic Conditions in Older Patients Units: 2
- GDEN 714 Topics in Gerontology Units: 2
- GDEN 715 Geriatric Dentistry Issues Units: 2

Pediatrics
- PEDO 704a Prevention in Pediatric Dentistry Units: 2
- PEDO 704b Prevention in Pediatric Dentistry Units: 2
- PEDO 705 Pediatric Diseases Units: 2

Note:
A minimum grade point average of 3.0 on all graduate work is required.

Geriatric Dentistry (MS)
The Master of Science in Geriatric Dentistry online program consists of a 36.5-month program leading to a master's degree in geriatric dentistry. The curriculum is designed to prepare students to work in the area of geriatric dentistry. The program consists of a series of didactic courses where the students will gain in-depth knowledge about older adults from a variety of perspectives that will include learning about the aging process and how it affects and is affected by social, behavioral and health factors commonly seen with aging. The program will focus on the most common medical and oral health conditions seen in older adults and their treatments, as well as cognitive changes, mental disorders, and social factors that will impact and thus require adjustments to oral health care delivery.

Required Courses
- ADNT 701 Research Methodologies in Dentistry Units: 2
- GDEN 710 Knowledge Assessment for GDEN Students Units: 1
- GDEN 711a Case Portfolio Preparation for GDEN Students Units: .5
- GDEN 711b Case Portfolio Preparation for GDEN Students Units: .5
- GDEN 711c Case Portfolio Preparation for GDEN Students Units: .5
- GDEN 711d Case Portfolio Preparation for GDEN Students Units: .5

University Certificate

Geriatric Dentistry Graduate Certificate

The graduate certificate in geriatric dentistry program is designed to prepare practicing dentists and dental hygienists who have already completed their professional trainings in general or advanced dentistry or dental hygiene to acquire a greater understanding of gerontology and geriatrics. A dental hygienist must have a minimum of a baccalaureate degree in order to apply for the program. The program consists of 12 units of courses delivered online and in person in which students will gain knowledge about older adults from a variety of perspectives, focusing on those topics that will have a direct impact on professional practice.
Clinical privilege status is not required for any of the course work. Students admitted to the non-degree certificate program are expected to enroll each semester until the program is completed.

There are seven required courses (6 online and one residential) and no electives. As part of the required curriculum, all students will attend USC for a two-week period during the summer trimester following completion of the didactic courses for a knowledge assessment course (GDEN 716). This course will consist of reviews, practical demonstrations and assessment activities.

**Required Courses (12 Units)**

- GDEN 711a Case Portfolio Preparation for GDEN Students Units: .5,
- GDEN 711b Case Portfolio Preparation for GDEN Students Units: .5,
- GDEN 713 Common Systemic Conditions in Older Patients Units: 2
- GDEN 714 Topics in Gerontology Units: 2
- GDEN 715 Geriatric Dentistry Issues Units: 2
- GDEN 716 Knowledge Assessment for GDEN Certificate Students Units: 1
- OFPM 722 Internal Medicine and Systemic Disease for Dental Residents Units: 2
- OFPM 725 Epidemiology, Nutrition and Aging for Dental Residents Units: 2

**Total units: 12**

**Doctoral Degree**

**Dental Surgery (DDS)**

The Doctor of Dental Surgery (DDS) program covers 11 consecutive 14-week trimesters. The course of study maximizes the interrelationship of all basic sciences and clinical detail sciences required by the Commission on Dental Accreditation of the American Dental Association. USC's reputation for excellent preparation of its graduates for private practice has been enhanced by curriculum changes that permit students to begin clinical experience in their first year. At the same time, opportunity and encouragement are given to those who might elect to pursue careers in teaching and research.

**Admission**

The Herman Ostrow School of Dentistry of USC admits 144 students each year for the curriculum leading to the Doctor of Dental Surgery. Admission to the school is granted through the Office of Admission and Student Affairs which receives and processes all applications, evaluates credentials and notifies applicants who qualify for entrance by forwarding letters of acceptance. Students are selected by the Admissions Committee, which bases its decision on consideration of an applicant's personal qualities, aptitude and superior scholarship necessary for the successful study and practice of dentistry. Candidates who have received or will receive a baccalaureate or higher degree will be considered more favorably than applicants who have fulfilled only minimum requirements. As a precondition of enrollment, accepted students must undergo a background screening and provide evidence of sound health and meet the school's health requirements.

Admission information may be obtained by mail, online or in person. Address inquiries to: Herman Ostrow School of Dentistry of USC, Office of Admission and Student Affairs, 925 W. 34th Street, Room 201, Los Angeles, CA 90089-0641, (213) 740-2841, email: uscsadadm@usc.edu or access the school's Website at dentistry.usc.edu.

**Admission Requirements**

Minimum entrance requirements include: (1) graduation from an accredited secondary school, with credit for at least 12 academic units, including three in English, three in one laboratory science course, two in one foreign language and two in college preparatory mathematics; (2) a minimum of 60 semester units, or the equivalent completed or in progress, at the time of application, in an accredited college or university in the United States or Canada. A baccalaureate or higher degree is preferred. No more than 60 semester hours earned at a community college will be accepted and preference is given to candidates who complete the science prerequisites at a four year institution; (3) required courses, semester hours with laboratory required: 8 units each — one year's completed course — of general biology (zoology), inorganic chemistry, organic chemistry, physics; other courses: English composition (8 units or one year), philosophy, history or fine arts (8 units or one year). All prerequisite course work must be completed with a grade of "C" or better; (4) it is strongly suggested that students take additional upper division courses. Biochemistry, human or comparative anatomy, embryology, histology, genetics, physiology, psychology, sociology and economics are examples of recommended courses; (5) all students who apply for admission to the School of Dentistry are required to take the Dental Admission Test (DAT), given under the auspices of the Council on Dental Education of the American Dental Association. The Dental Admission Test must be taken no later than February 1 of the year for which formal application is made.

To expedite the admissions process, it is recommended that the DAT be taken during a testing period before filing formal application through the Associated American Dental Schools Application Service (AADSAS). Test scores more than two years old will not be accepted. Applicants should check with the Dental Admissions Office. Full information about the test is sent to all applicants upon request, or can be obtained from the Division of Educational Measurements, Council on Dental Education, American Dental Association, 211 East Chicago Avenue, Chicago, IL 60611. No action can be taken on the application until DAT scores have been received.

(6) An interview at the School of Dentistry may be required of all applicants who appear qualified for consideration as determined by the Office of Admission and Student Affairs, although this interview may be waived for exceptionally qualified candidates as determined by the Dental Admissions Committee; a manual dexterity test may be required as part of an interview process; (7) complete transcripts of undergraduate and graduate work, including degree notations, must be on file in the Office of Admission and Student Affairs by July 15 prior to enrolling; (8) residency requirements: as a private institution, USC seeks a culturally
and geographically diverse population. Therefore, out-of-state applicants are evaluated and selected based on the same criteria as California residents. No applicant will be denied admission on the basis of race, religion, creed or disability. All admitted students must provide evidence that functional health is sufficient to meet professional demands, both in the student role and as an entry-level practitioner.

Application Procedure
(1) An application form should be obtained from the Associated American Dental Schools Application Service (AADSAS) online at adea.org. (2) The AADSAS application form must be completed and returned to AADSAS. USC requires that the application be received by AADSAS no later than February 1 of the year in which enrollment is anticipated. Early application and file completion is recommended. Do not send the application form to USC directly. In addition to submitting the ADEA AADSAS application, applicants must submit DAT scores and one official transcript from every college/university attended directly to AADSAS. Application evaluation cannot begin until these items are received by ADEA AADSAS. (3) Applicants are required to pay a nonrefundable $85 processing fee, which should be forwarded directly to the Ostrow Office of Admissions (international students requiring a student visa must submit a $145 processing fee). (4) Notification from the Office of Admissions and Student Affairs will be sent, indicating that the application has been received from AADSAS. (5) Candidates who are being seriously considered for acceptance will be sent an invitation for an interview and will be required to submit additional information. No interview can be granted unless the file is complete, including DAT scores. The interview may be waived for exceptional candidates as determined by the admissions committee. (6) Notification of acceptance will be sent by the Office of Admissions and Student Affairs sometime after December 1. (7) A non-refundable commitment fee of $1,500 is required from admitted students by the deadline indicated in the acceptance letter to hold a place in the entering class. A second commitment fee of $1,500 is required by May 1. Applicants accepted after May 15 are required to pay a flat fee of $3,000 within 15 days from the date of their acceptance letter to hold a place in the entering class; applicants accepted after July 1 are required to pay a $3,000 commitment fee within two days. These non-refundable fees will be applied toward tuition upon enrollment. (8) Preregistration for the first year dental class is held before orientation. (9) All entering students are required to prepay $3,000 toward the initial tuition by July 1. (10) As a precondition of enrollment, accepted students undergo a background screening conducted by Certiphi Screening, Inc. to help ensure patient safety and compliance with state laws and regulations and provide evidence of sound health and meet the school's health requirements.

Orientation
Students who have been accepted into the predoctoral dental program and who have reserved their place in the class will receive information on orientation during the first two weeks in July. Orientation takes place prior to the first week of classes. The purpose of the orientation program is to acquaint incoming students with the school, its policies, programs, faculty and facilities.Incoming students receive financial counseling and receive their initial equipment issue during this orientation period.

Graduation Requirements
A student is eligible for the Doctor of Dental Surgery after successfully attaining the qualitative and quantitative level expected in the doctoral curriculum, specifically: has met the 2.0 GPA requirement for graduation; has no conditions existing at the termination of the final academic time unit that would qualify him or her for academic probation, clinical probation or academic disqualification; has no marks of "F," "IN" or "MG"; has passed Part I and Part II of the National Dental Board Examinations; has demonstrated the personal characteristics expected of a professional; has fulfilled his or her financial obligations as well as all other obligations and requirements for graduation.)

In addition to meeting the academic requirements indicated above, students must have a completed administrative clearance form on file in the Office of Academic Affairs before a degree can be conferred. This administrative clearance indicates that the student has met other obligations to the university and to the student's patients.

Curriculum
The curriculum leading to the Doctor of Dental Surgery degree undergoes constant change to meet the challenges of modern dental practice.

Doctor of Dental Surgery — Learner-Centered Curriculum

Required Courses
- DPBL 501a Dental Problem Based Learning — Human Structure I Units: 3
- DPBL 501b Dental Problem Based Learning — Human Structure I Units: 3

DentPin is a personal identification number used in place of applicants who apply through the "Entry Level Bachelor's" as a designation. To receive a DentPin visit the American Dental Association website at ada.org/dentpin. At the same time, applicants must apply and gain admission to the University of Southern California, which is granted in all cases by the USC Office of Admission. Applicants must submit a USC Transfer Application online through the Common Application at commonapp.org. Only a letter from the university Office of Admission grants official university admission. Applications for the Bachelor of Science in Dental Hygiene should be filed well in advance of February 1 of the year in which the student wishes to be admitted. The program begins in the fall. Although students may transfer to USC at any time and begin prerequisite course work, the dental hygiene curriculum begins in the junior year. Admission to the university does not guarantee admission to the dental hygiene program.

Admission Requirements
Between 30 and 40 students are admitted each year for the curriculum that leads to the Bachelor of Science in Dental Hygiene. The Committee on Admissions examines credentials and bases its decision on the objective evaluation of these factors: preprofessional training, evidence of scholarship and personal evaluation of the student. Minimum entrance requirements include: graduation from an accredited secondary school and completion of the following courses which may be transferred in from another college or university or taken at USC prior to bring admitted to the dental hygiene program.

General Biology
One semester with lab is required.

Anatomy
One semester with lab is required.

General Chemistry with Lab
One year is required.

English Composition
One year is required. Must include course work equivalent to WRIT 150 and one semester of any transferable English course.

General Physiology Lab
One semester is required.

General Microbiology
One semester is required.

Nutrition
One semester is required.

Introduction to Sociology
One semester is required.

General Psychology
One semester is required.

Public Speaking
One semester is required.

General Education Requirements

Department of Dental Hygiene
The mission of the USC Department of Dental Hygiene is to educate and prepare dental hygiene leaders for careers in a diverse and changing health care environment. Implicit in this is a desire to provide a liberal education as well as outstanding clinical experiences. The baccalaureate dental hygiene program is a combination of dental and dental hygiene sciences, supporting sciences and general education. The curriculum reflects the core values of the profession in private and public health settings. The program is committed to creating a humanistic, educational environment that will facilitate the development of responsible, ethical, oral health professionals who are sensitive to the patient needs and competent in the dental hygiene process of care. Educational and clinical services provided by dental hygiene students include dental health education, patient assessment, disease prevention and non-surgical periodontal therapy for a diverse population of patients. The program strives to produce graduates who will advance the profession of dental hygiene and improve dental health care through evidence-based research and scholarly activities. Finally, graduates are competent in self-assessment and scientific methodology in preparation for lifelong learning. The Bachelor of Science degree in Dental Hygiene requires two academic years of pre-dental hygiene courses followed by two additional years of enrollment in the dental hygiene program.

Application Procedure:
The ADEA Dental Hygiene Centralized Application Service (DHCA) is the centralized application service for applicants to dental hygiene programs. Please review the instructions for the application at adeadhcas.org. All applicants must select the "Entry Level Bachelor's" as a designation. In order to begin the ADEA DHCA application, every applicant will need an email address and a DentPin. The DentPin is a personal identification number used in place of the social security number. To receive a DentPin visit the American Dental Association website at ada.org/dentpin. At the same time, applicants must apply and gain admission to the University of Southern California, which is granted in all cases by the USC Office of Admission. Applicants must submit a USC Transfer Application online through the Common Application at commonapp.org. Only a letter from the university Office of Admission grants official university admission. Applications for the Bachelor of Science in Dental Hygiene should be filed well in advance of February 1 of the year in which the student wishes to be admitted. The program begins in the fall. Although students may transfer to USC at any time and begin prerequisite course work, the dental hygiene curriculum begins in the junior year. Admission to the university does not guarantee admission to the dental hygiene program.

before a degree can be conferred. This administrative clearance form on file in the Office of Academic Affairs above, students must have a completed administrative clearance. In addition to meeting the academic requirements indicated above, students must have a completed administrative clearance that indicates that the student has met other obligations to the university and to the student's patients.

**Progressive Degree Programs**

The following progressive degrees are available for students enrolled in the Dental Hygiene program: MPH at the Keck School of Medicine, MA in Gerontology from the Davis School of Gerontology, and a MSDH from the Herman Ostrow School of Dentistry. Applicants to the program must have completed 64 units of course work and must submit their applications prior to completion of 96 units of course work. Applicants do not have to submit GRE scores, but are expected to have a minimum GPA of 3.0 at the time of application. The application for admission to a progressive degree program must be accompanied by an approved course plan proposal and letters of recommendation from two USC faculty members. The requirements for both the bachelor's degree and the progressive degrees must be satisfied. For further details on progressive degree programs, see the Requirements for Graduation page.

**Bachelor's Degree**

**Dental Hygiene (BS)**

Curriculum

Courses listed are required for completion of the degree.

**Bachelor of Science in Dental Hygiene**

Curriculum

**Required Courses**

- AMED 502 Emergency Medicine Units: 2
- AMED 524 Pain and Anxiety Control Units: 2
- ANAT 521 Head and Neck Anatomy Units: 2
- DBIO 310 Oral Biochemistry Units: 2
- DHIS 310 Basic Tissues and Histology and Embryology Units: 2
- DHYG 311a Fundamentals of Clinical Dental Hygiene Practice Units: 3
- DHYG 311b Fundamentals of Clinical Dental Hygiene Practice Units: 3
- DHYG 314L Dental Morphology Laboratory Units: 1
- DHYG 316 Patient Education in Preventive Dental Care Units: 1
- DHYG 318 Dental Specialties Units: 2
- DHYG 320 Preventive Dental Therapy Units: 2
- DHYG 401 Introduction to Advanced Dental Hygiene Units: 2
- DHYG 410a Clinic: Dental Hygiene Units: 2, 3, 4, 5, 6, 7 each
- DHYG 410b Clinic: Dental Hygiene Units: 2, 3, 4, 5, 6, 7 each
- DHYG 410c Clinic: Dental Hygiene Units: 2, 3, 4, 5, 6, 7 each
- DHYG 412 Preventive Dental Care Programs Units: 1
- DHYG 414a Advanced Dental Hygiene Units: 2

Director: Michael L. Paine, BDS, PhD

Faculty

Professors: Yang Chai, DDS, PhD; Casey Chen, DDS, PhD; Cheng-Ming Chuong, MD, PhD (Medicine); Glenn Clark, DDS, PhD; Tina Jaskoll, PhD; Michael Melnick, DDS, PhD; Cedric Minkin, PhD; Mahvash Navazesh, DMD; Janet Moradian-Oldak, PhD; Michael Paine, BDS, PhD; Pragna Patel, PhD; Michael Schneir, PhD; Jorgen Slots, DDS, PhD; Malcolm Snead, DDS, PhD; David Warburton, MD (Medicine)

Associate Professors: Winston Chee, DDS; George Cho, DDS; Roger De Filippo, MD (Medicine); Sillas Duarte, DDS, PhD; Kian Kar, DDS, MS; Robert Keim, DDS, PhD; Saravanan Ram, DDS; Glenn Sameshima, DDS, PhD; Wei Shi, MD, PhD (Medicine); Arnold Tiber, DDS, PhD; Stephen Yen, DMD, PhD; Homayoun Zadeh, DDS, PhD

Assistant Professors: Ruchi Bajpai, MS, PhD; Ahmed El-Hashash, PhD; Denise Al-Alma, PhD; Reyes Enciso, PhD; Mark Frey, PhD (Medicine); Dan Grauer, DDS, PhD; Ching-Ling Lien, PhD, (Medicine); Amy Merrill-Brugger, PhD; Ramiro Murata, DDS, PhD; Laura Perin, PhD, (Medicine); Parish P. Sedghizadeh, MS, DDS; Mark Urata, MD, DDS; Jian Xu, PhD; Yan Zhou, PhD

Craniofacial biology is concerned with the evolution, growth, structure and function of oral tissues and the oral region; and with the etiology and pathogenesis of numerous diseases and malformations. These involve studies at various levels of biological organization, from the molecular and subcellular to the organismic. Craniofacial biology comprises a large, rapidly increasing body of knowledge that has both clinical and academic importance. The objective of the program is primarily, but not exclusively, to prepare health science graduates for entry into careers in academic environments as clinical scholars or as members of multidisciplinary teams of health professionals in academic centers of clinical and basic health science research.

Admission Requirements

The graduate program in craniofacial biology offers academic graduate training to individuals with a Doctor of Dental Surgery (DDS), Medical Doctor (MD) or equivalent degree. Applicants with Bachelor of Science degrees in areas such as biology and chemistry are also encouraged to apply. All applications are evaluated individually in search of the most promising students in terms of intellectual distinction and professional merit in the sciences and/or dentistry. Beyond this, the committee looks for academic trends, documented potential and evidence of good character. Priority consideration for admission is given to applications that are complete by December 1.

Applications

Formal application to the USC Office of Graduate Admission and the graduate program in craniofacial biology is required for Master of Science (MS) and Doctor of Philosophy (PhD) objectives. The Craniofacial Biology graduate programs are administered by the USC Graduate School whose catalogue provides additional information about specific application requirements and courses that must be completed in order to graduate.

Requirements for MS and PhD applications include:

- Statement of purpose.
- Three letters of recommendation describing academic abilities, personal attributes and research (if applicable).
- Original postsecondary transcripts from all schools attended.
- A grade point average (GPA) of 3.0 or higher on a 4.0 scale, and grades of A or B in science courses.
- Graduate Record Examinations (GRE) general test scores no older than five years.
- Test of English as a Foreign Language (TOEFL) is required for all applicants whose native
language is not English to test their ability to use and understand English in an academic setting. Official scores must be received directly from the testing service and date no earlier than two years (24 months) prior to the start of the intended first term at USC.

- Personal interviews may be required.

The Master of Science requires a minimum GRE verbal score of 40 percent rank and quantitative score of 50 percent rank. For non-native English speakers, a minimum combined TOEFL score of 90 is required with no less than 20 on each section (reading, listening, speaking and writing). Most accepted students score higher than the minimum requirement.

The Doctor of Philosophy requires a minimum GRE verbal score of 60 percent rank and quantitative score of 60 percent rank. For non-native English speakers, a minimum combined TOEFL score of 100 is required with no less than 20 on each section (reading, listening, speaking and writing). Many accepted students score higher than the minimum requirement.

**Progressive Degree Program**

Applicants for a progressive degree program must have completed 64 units of course work applicable to their undergraduate degree since graduating from high school. (AP units, IB units and course work taken prior to high school graduation are excluded.) Applicants must submit their application before completing 96 units of course work. Normally, the application is submitted in the fall semester of the third year of enrollment at USC. Applicants do not have to submit GRE scores but are expected to have at least a 3.0 GPA at the time of application. The application for admission to a progressive master's program must be approved by the deans of the bachelor's and the master's degree-granting schools at USC and submitted to the Degree Progress Department. An approved course plan proposal and letters of recommendation from two USC faculty members must be submitted with the application, with at least one of the recommendations coming from a faculty member in the student's bachelor's degree major department.

**Master's Degree**

**Craniofacial Biology (MS)**

This degree is under the jurisdiction of the Graduate School. Students should also refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School. The Master of Science degree in craniofacial biology offers the clinician (DDS, MD or equivalent) the opportunity to obtain clinical research knowledge and skills in the area of craniofacial biology. Such training will include research into the causes of craniofacial diseases and anomalies, as well as normal development and function. The course of study is particularly directed toward those clinicians committed to pursuing a career in research and teaching.

**Degree Requirements**

A total of 32 units is required that includes eight courses in craniofacial biology, four units of 594ab Thesis and necessary units of 590 Thesis Research. All students must achieve a 3.0 grade point average in the craniofacial biology courses. Four core courses in craniofacial biology are required for all students: CBY 574, CBY 579L, CBY 585 and CBY 671. The four remaining courses required may be selected from any offered by the craniofacial biology program or other graduate programs and selected by the students and their mentors to best support their research interests. All students are required to complete a thesis based on the student's research following a thesis protocol approved by a committee of craniofacial biology faculty. An advisory committee, comprising the research adviser and two additional faculty members, will establish thesis requirements to be completed by the student.

**University Certificate**

**Craniofacial Biology Certificate**

The Certificate in Craniofacial Biology is intended to provide dentists in post-graduate dental education with experience in graduate education and insight into the requirements to complete a graduate degree. This will provide the students with additional information relative to selecting academic careers. All certificate students must have a dental degree and have been admitted to a post-graduate dental education program sponsored by the Herman Ostrow School of Dentistry of USC.

**Degree Requirements**

A total of six CBY courses and 18 units of course work is required for the certificate. The six courses may be selected from the following list: CBY 573, CBY 574, CBY 575, CBY 576, CBY 579L, CBY 583, CBY 585, CBY 587, CBY 672, CBY 673, CBY 674. The credit received for these classes may be applied toward either the MS or PhD in Craniofacial Biology should the student decide later to pursue an advanced degree.

**Admissions Criteria**

Only residents enrolled in the following advanced dental education and specialty programs are eligible for the Certificate in Craniofacial Biology: General Practice Residency, Endodontics, Orofacial Pain/Oral Medicine, Oral and Maxillofacial Surgery, Orthodontics, Pediatric Dentistry, Periodontology, Prosthodontics. Residents must complete all admission requirements for dental advanced education programs and have been accepted to these programs in accordance with criteria established by the advanced dental education program faculty.

**Doctoral Degree**

**Craniofacial Biology (PhD)**

The Doctor of Philosophy degree in craniofacial biology is awarded under the jurisdiction of the Graduate School. Students should also refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School. This program is designed to provide health science-oriented training for the professional with interests in academic, as well as clinical, aspects of craniofacial biology. Appointment to the PhD program are designated each year for all semester admission.

**New Student Orientation Committee**
All new students seeking Master of Science and/or Doctor of Philosophy degree objectives will be assigned to an orientation committee. This committee will function to advise and guide new students through their first semester. Thereafter, each student will identify a mentor and assemble a qualifying exam committee.

**Qualifying Exam Committee**
During the second semester of study each graduate student should select a qualifying exam committee. The qualifying exam committee must include five faculty members who will be of assistance in the student's education. The student's mentor will serve as chair of the qualifying exam committee. One committee member must be a USC faculty member from outside the program. The graduate program director will be an *ex officio* member of all qualifying exam committees. The qualifying exam committee will monitor the student's progress, recommend readings or additional training, and determine when the student is ready for the qualifying examination. It is the student's responsibility to meet with the qualifying exam committee at least once during every semester of each academic year. The results of these formal meetings should be summarized by the student in a written statement and submitted to the program director each semester.

**Screening Procedure**
As soon as the student has satisfactorily completed the core courses and selected the committee, a screening meeting with the qualifying exam committee should be called. The screening procedure may consist of an oral examination; the student will outline his research progress and be examined on academic development. The committee may recommend that the student take specific additional course work and that readings in certain areas be initiated to remedy deficiencies. A brief report will be given to the student and included in his or her file. The student will meet with the committee each semester; they shall agree when the student is prepared to take the qualifying examination in the next semester or if the student should resign or be dropped from the program.

**Course Requirements**
A total of 60 units are required for the PhD. Eight didactic courses at the graduate level are required. The core required CBY courses are CBY 574 or PM 510L, CBY 579L, CBY 585 and INTD 571. The remaining graduate-level courses may be selected from courses offered by any department, following consultation with the graduate mentor and graduate program director. It is highly recommended that PhD students take the PIBBS core curriculum on the Health Sciences Campus. Students must achieve a 3.0 GPA or better in their course work. Students with a Doctor of Dental Surgery or other professional degree may be granted waivers for having completed equivalent course work. It is the student's responsibility to obtain from the Graduate School the Request for Permission to Take the PhD Qualifying Examination form which must be signed by all committee members. This form must be completed 60 days before the qualifying examination.

**Qualifying Examination**
The PhD qualifying examination is offered during the fall or spring semesters. A written examination will cover specific subject areas of the core curriculum, as well as topics selected by the qualifying exam committee. After successfully completing all parts of the written examination, the student will prepare and submit an original research proposal to the qualifying exam committee which presents, in National Institutes of Health (NIH) format, the student's proposed dissertation research. If the submitted proposal is acceptable, an oral examination will be conducted. This examination will include a defense of the proposal and could also include material from the written examination and related topics. A student failing any part of the examination may be allowed one additional opportunity to pass that portion, at the discretion of the qualifying exam committee, within the regulations of the Graduate School governing the repetition of qualifying examinations.

**Dissertation**
The doctoral dissertation is to focus upon an original research problem which reflects the creative scholarly abilities of the candidate and contributes to the general advancement of biological understanding, as well as to an understanding of the theoretical basis of disease and its treatment.

**Defense of the Dissertation**
An oral examination on a rough or final copy of the dissertation is conducted within one month following submission of the manuscript to the committee.

---

**Advanced Programs in Dental Education**
The Herman Ostrow School of Dentistry offers advanced dental education programs in dental hygiene, general dentistry, endodontics, general practice residency, operative dentistry, orofacial pain, oral medicine, oral and maxillofacial surgery, pediatric dentistry, periodontology and prosthodontics, all leading to a certificate. The Herman Ostrow School of Dentistry in conjunction with the Graduate School also offers combined programs in operative dentistry and craniofacial biology, in orthodontics and craniofacial biology, in pediatric dentistry and craniofacial biology, and in periodontology and craniofacial biology leading to a Master of Science degree and a certificate. In conjunction with the Keck School of Medicine, the Herman Ostrow School of Dentistry offers a combined program leading to an MD degree and certificates in oral and maxillofacial surgery, orofacial pain, and oral medicine. The Herman Ostrow School of Dentistry also offers an online master's degree in orofacial pain and oral medicine and geriatric dentistry. In addition to clinical seminars and clinical experience, students take basic science courses with advanced students from other departments.

The certificate curriculum consists of a core of basic science subjects plus clinical seminars and clinical experience. Elective subjects may also be selected by the student with the approval of the program director. The estimated lengths of programs are as follows:

- Endodontics, 24 months
- General Dentistry, 12 months
- General Practice Residency, 12 months
• Geriatric Dentistry, 12 months (Certificate)
• Operative Dentistry, 24 months
• Oral and Maxillofacial Surgery, 48 months
• Oral and Maxillofacial Surgery/M.D., 72 months
• Orofacial Pain, 24 months
• Oral Medicine, 24 months
• Orofacial Pain and Oral Medicine (online), 36 months
• Orthodontics, 36 months
• Pediatric Dentistry, 24 or 36 months
• Periodontology, 36 months
• Prosthodontics, 36 months

All programs will begin in June (date to be determined).

**Admission Requirements**

Applicants must hold the Doctor of Dental Surgery or Doctor of Medical Dentistry degree (or equivalent degree if educated overseas) and must present the appropriate degrees, approved transcripts and affidavits as prescribed by the Office of Dental Admissions and Student Affairs.

**Admission Procedures**

Prospective students must apply through the Postdoctoral Application Support Service (PASS) at adea.org/dental_education_pathways/pass/Applicants/Pages/default.aspx. The ADEA PASS application requires the submission of an essay, one or more Professional Evaluations, one Personal Potential Index (PPI) evaluation, an Institution Evaluation from the dental school dean, and official dental school transcripts. The application cannot be processed until all required documents are submitted.

Applicants for the integrated MD degree/oral and maxillofacial surgery certificate program must apply through the American Medical College Application Service (AMCAS) at amcas.com.

For selection and admission to the operative/CBY, periodontics/CBY, orthodontics/CBY, and pediatrics/CBY dentistry programs, applicants are required to take the Aptitude Section of the Graduate Record Examinations; and submit competitive scores on both the quantitative and verbal sections of the examination. Likewise, all applicants for the pediatric dentistry program must take and submit competitive GRE scores. Information about this examination can be found at ets.org/gre. The last acceptable test date is in September of the year preceding desired admission.

The following material is also required to complete the application: (1) payment of an $85 processing fee (graduates of foreign dental schools or students requiring a visa must submit a $145 processing fee) directly to the Herman Ostrow School of Dentistry Office of Admissions and Student Affairs; (2) applicants for General Dentistry, General Practice Residency, Orthodontic, Pediatric Dentistry and Oral Surgery programs must submit applicant agreement forms to the Postdoctoral Dental Matching Program. Information and forms can be obtained online at natmatch.com/dentres; (3) board scores Part I and Part II for all programs with the exception of the operative dentistry certificate and operative dentistry/CBY programs; MCATs are required for the Integrated MD degree/oral maxillofacial surgery certificate. GRE scores are required for operative dentistry/CBY, orthodontics, periodontics/CBY and pediatric/CBY programs. International students are required to take GREs for the two-year certificate program. These requirements may be waived at the discretion of the program director; (4) a biographical statement; (5) applicants may be asked to be available for an interview. If one is necessary, applicants will be contacted by the director of the individual advanced program; (6) applicants will be required to pay a non-refundable $1,500 tuition deposit upon notification of acceptance. (7) As a precondition to enrollment, accepted students must undergo a background screening conducted by Certiﬁpi Screenin, Inc. to help ensure patient safety and compliance with state laws and regulations and all students must provide evidence of sound health and meet the school’s health requirements.

**Timetable for Applications**

Applications for admission to advanced programs must be received as follows:

- Endodontics, Sept. 1
- General Practice Residency, Oct. 15
- Geriatric Dentistry (online graduate certificate)
- Geriatric Dentistry (online Master of Science)
- Master of Science in Dental Hygiene, Feb. 1
- Operative Dentistry, Nov. 1
- Oral and Maxillofacial Surgery, Oct. 1
- Orofacial Pain, Oct. 1
- Oral Medicine, Oct. 1
- Orofacial Pain and Oral Medicine (online Master of Science), Oct. 1
- Orthodontics, Oct. 1
- Pediatric Dentistry, Nov. 1
- Periodontology, Sept. 1
- Prosthodontics, Nov. 1

Completed applications and related information are reviewed first by the faculty of the department of interest. In selecting applicants for admission the faculty considers academic records and personal qualifications. Final approval for admission rests with the advanced education coordinating committee. Responsibility for advising the student after admission rests with the department chair.

**Orientation**

A departmental orientation session is usually held the first week of classes, beginning in late June. Incoming students are acquainted with the Herman Ostrow School of Dentistry, its policies, procedures, faculty and facilities.

**Student Issue — Advanced Programs**

Dental units in the school's clinics are equipped with Midwest Company type tubing and couplers for low and high speed air hand pieces. Advanced students must provide their own adapters to fit the school's couplers unless the students' present hand pieces are already so modified. The Dental Bookstore will assist in such conversions, if necessary. The bookstore has some low speed air hand pieces available for purchase.

Students accepted into an advanced program should consult their program directors about needed equipment.
Master's Degree
Advanced Orofacial Pain and Oral Medicine (MS)
The Master of Science degree in orofacial pain and oral medicine program consists of a 36-month hybrid program (online and face-to-face) leading to a master's degree in orofacial pain and oral medicine (OFPOM). The curriculum is designed to provide practicing dentists with advanced knowledge and training in the areas of orofacial pain and oral medicine including sleep medicine.
The program consists of a series of 14 online didactic courses where the students will gain knowledge about the underlying science as well as the diagnosis, pathobiology and treatment of different oral and maxillofacial diseases and disorders. In addition to these courses, the student will attend USC for two weeks each summer during the three-year period for an additional three face-to-face assessment courses where they will be tested for knowledge acquisition using a set of objective standardized clinical examinations, oral interviews and written examinations. They will also be required to prepare a final portfolio of cases and conduct a research project report. During their visits to USC, the residents will gain experience diagnosing and treating patients in the USC OFPOM center.
During the year, the residents will attend weekly video conferences where online students are required to analyze, diagnose and prepare treatment plan cases that are posted for analysis. These cases will cover the following diseases: temporomandibular disorders; infectious, dysplastic, neoplastic proliferative, erosive and ulcerative oral and pharyngeal mucosal diseases. Students will also learn about and work with patients who have various salivary, neurogenic, osseous, and odontogenic infections, tumors and diseases including oral neuropathic pain, oral spasticity, migraine, tension type and chronic daily headache and sleep apnea disorders.

Required Courses
- ADNT 701 Research Methodologies in Dentistry Units: 2
- OFPM 702a Soft Tissue Disease for Dental Residents Units: 1
- OFPM 702b Soft Tissue Disease for Dental Residents Units: 2
- OFPM 704 Bony Pathology, Radiology and Advanced Imaging for Dental Residents Units: 1
- OFPM 705 Neurogenic Based Oral and Facial Pains for Dental Residents Units: 2
- OFPM 706 TMD, Orthopedics, Rheumatology and Physical Therapy for Dental Residents Units: 2
- OFPM 707 Pharmacology Series for Dental Residents Units: 2
- OFPM 710a Knowledge Assessment for OFPOM Residents Units: 1
- OFPM 710b Knowledge Assessment for OFPOM Residents Units: 1
- OFPM 721 Neurosciences for Dental Residents Units: 2
- OFPM 722 Internal Medicine and Systemic Disease for Dental Residents Units: 2
- OFPM 723 Systems Physiology, Motor Disorders and Sleep Apnea for Dental Residents Units: 2
- OFPM 724 Psychological and Psychometric Assessment for Dental Residents Units: 2
- OFPM 725 Epidemiology, Nutrition and Aging for Dental Residents Units: 2
- OFPM 726 Immunology and Immunosuppression for Dental Residents Units: 2
- OFPM 727 Infectious Disease, Oral Microbiology and Virology for Dental Residents Units: 2
- OFPM 729a Capstone Project for OFPOM Residents Units: .5,
- OFPM 729b Capstone Project for OFPOM Residents Units: .5,
- OFPM 729c Capstone Project for OFPOM Residents Units: .5,
- OFPM 729d Capstone Project for OFPOM Residents Units: .5,
- OFPM 730a Case Portfolio Preparation by Online OFPOM Residents Units: .5,
- OFPM 730b Case Portfolio Preparation by Online OFPOM Residents Units: .5,
- OFPM 730c Case Portfolio Preparation by Online OFPOM Residents Units: .5,
- OFPM 730d Case Portfolio Preparation by Online OFPOM Residents Units: .5,
- OFPM 730e Case Portfolio Preparation by Online OFPOM Residents Units: .5,

Total units: 32.5

University Certificate
Advanced Endodontics Certificate
The advanced endodontics certificate program is a 24-month course of study. The program provides advanced students with the academic background information and clinical experience necessary for the specialty practice of endodontics. The program also requires activities in research and teaching to expose the advanced students interested to these areas of endodontics.
Advanced students are encouraged to pursue Board Certification by the American Board of Endodontics and are prepared for the certification examinations. Emphasis is also placed on the interaction of endodontics with other specialties and general dentistry. The program in endodontics is accredited by the Commission on Dental Accreditation (CODA), which serves as the only nationally recognized accrediting body for dentistry and the related dental field. The Commission receives its accreditation authority from the acceptance of all stakeholders within the dentistry community and recognition by the United States Department of Education. Since its inception in 1937, the Commission and its predecessors have
operated within the parameters of the ADA Bylaws. The Commission serves the profession and the public by establishing and applying high-quality standards for the accreditation of educational programs in dentistry, postgraduate general and specialty dentistry, and the allied dental professions.

Advanced Endodontics Curriculum

Required Courses

- ADNT 701 Research Methodologies in Dentistry Units: 2
- ADNT 702 Physical Diagnosis Units: 2
- ADNT 704a Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each
- ADNT 704b Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each
- ADNT 710 Internship: Dental Education Units: 1, 2, 3, 4, 5
- AMED 750a Physical Evaluation and Anesthesia Units: 2
- AMED 750b Physical Evaluation and Anesthesia Units: 2
- AMED 750c Physical Evaluation and Anesthesia Units: 1
- ANAT 701 Advanced Head and Neck Anatomy Units: 1
- DHIS 701 Advanced Oral Histology Units: 2
- DPHR 701 Advanced Pharmacology Units: 1
- ENDO 521 Preclinical Endodontics Units: 3
- ENDO 701a Seminar: Biological Basis of Endodontic Therapy Units: 1
- ENDO 701b Seminar: Biological Basis of Endodontic Therapy Units: 1
- ENDO 701c Seminar: Biological Basis of Endodontic Therapy Units: 1
- ENDO 701d Seminar: Biological Basis of Endodontic Therapy Units: 1
- ENDO 702 Seminar: Advanced Clinical Endodontics Units: 2
- ENDO 703a Seminar: Review of Endodontic Literature Units: 1
- ENDO 703b Seminar: Review of Endodontic Literature Units: 1
- ENDO 703c Seminar: Review of Endodontic Literature Units: 1
- ENDO 703d Seminar: Review of Endodontic Literature Units: 1
- ENDO 704a Seminar: Surgical Endodontics Units: 2
- ENDO 704b Seminar: Surgical Endodontics Units: 2
- ENDO 705a Seminar: Endodontic Case Presentation Units: 4
- ENDO 705b Seminar: Endodontic Case Presentation Units: 4
- ENDO 710 Seminar: Endodontic Practice Management Units: 2
- ENDO 711 Alternatives in Endodontics Units: 4
- ENDO 761a Clinic: Advanced Endodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9 each
- ENDO 761b Clinic: Advanced Endodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9 each
- ENDO 761c Clinic: Advanced Endodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9 each
- ENDO 761d Clinic: Advanced Endodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9 each
- ENDO 761e Clinic: Advanced Endodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9 each
- ENDO 761f Clinic: Advanced Endodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9 each
- ENDO 790 Directed Research: Endodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- PTHL 601 Advanced Oral Pathology Seminar Units: 2

Advanced Operative and Adhesive Dentistry Certificate

The Ostrow School of Dentistry offers two programs in operative and adhesive dentistry: (1) a 26-month program leading to a Certificate in Advanced Operative and Adhesive Dentistry, and (2) a 26-month combined program leading to a Certificate in Advanced Operative and Adhesive Dentistry and Master of Science in Craniofacial Biology.

The programs provide students with in-depth scientific knowledge and clinical experience in operative and adhesive dentistry, including cutting-edge technologies in biomaterials, digital (CAD/CAM), and esthetic rehabilitation. In addition, the programs offer students teaching experience through assisting the learning activities of the Doctor of Dental Surgery Program.

Biomaterials research is an integral part of the curriculum for both programs. Students of the combined program of Certificate in Operative and Adhesive Dentistry/Master of Science in Craniofacial Biology must complete an original research project to fulfill a thesis requirement.

The combined program in Advanced Operative and Adhesive Dentistry Certificate/Master of Science in CBY requires grade point average (GPA) of 3.0 or higher, a minimum GRE verbal score of 40 percent rank and quantitative score of 50 percent rank. For non-native English speakers, a minimum combined TOEFL score of 90 is required with no less than 20 on each section (reading, listening, speaking and writing).

Most accepted students score higher than the minimum requirement. More information on the MS in CBY can be obtained at http://catalogue.usc.edu/schools/dentistry/graduate/

The clinical, research, and teaching experiences will prepare graduates for future academic careers in dental research and education, as well as career options in dental related public organizations and private corporations.

Advanced Operative and Adhesive Dentistry Certificate
Required Courses

- ADNT 702 Physical Diagnosis Units: 2
- ADNT 704a Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each
- ADNT 704b Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each
- ADNT 710 Internship: Dental Education Units: 1, 2, 3, 4, 5
- AMED 750a Physical Evaluation and Anesthesia Units: 2
- AMED 750b Physical Evaluation and Anesthesia Units: 2
- AMED 750c Physical Evaluation and Anesthesia Units: 1

Total units: 162

Advanced Oral and Maxillofacial Surgery

The advanced education program in oral and maxillofacial surgery is a continuous 48-month course of study that prepares the graduate for the practice of oral and maxillofacial surgery. The program in oral surgery is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. The program also meets the requirements of the American Association of Oral and Maxillofacial Surgeons.

The program is conducted at the Herman Ostrow School of Dentistry and at the LAC+USC Medical Center. The course provides graduates with the necessary background for certification by the American Board of Oral and Maxillofacial Surgery. Certificates are awarded upon successful completion of the 48-month course.

Advanced Oral and Maxillofacial Surgery Curriculum

Required Courses

• ADNT 702 Physical Diagnosis Units: 2
• ADNT 704c Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each
• ADNT 710 Internship: Dental Education Units: 1, 2, 3, 4, 5
• PTHL 601 Advanced Oral Pathology Seminar Units: 2
• PTHL 701 Clinicopathologic Conference Units: 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13
• SURG 701a Seminar: Advanced Oral Surgery Units: 2
• SURG 701b Seminar: Advanced Oral Surgery Units: 2
• SURG 702a Seminar: Review of the Oral Surgery Literature Units: 2
• SURG 702b Seminar: Review of the Oral Surgery Literature Units: 2
• SURG 708a Orthognathic Surgery Units: 2
• SURG 708b Orthognathic Surgery Units: 2
• SURG 761a Clinic: Advanced Oral Surgery Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
• SURG 761b Clinic: Advanced Oral Surgery Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each

542
• SURG 761c Clinic: Advanced Oral Surgery Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
• SURG 761d Clinic: Advanced Oral Surgery Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
• SURG 763a Clinic: Advanced Hospital Oral Surgery and Anesthesia Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
• SURG 763b Clinic: Advanced Hospital Oral Surgery and Anesthesia Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
• SURG 763c Clinic: Advanced Hospital Oral Surgery and Anesthesia Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
• SURG 763d Clinic: Advanced Hospital Oral Surgery and Anesthesia Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each

**Advanced Oral Medicine Certificate**
The Herman Ostrow School of Dentistry's 24-month certificate residency program in advanced oral medicine trains one to two residents per year to be expert clinicians in oral medicine with an emphasis on orofacial pain. The program is fully accredited by the Commission on Dental Accreditation (CODA) of the American Dental Association (ADA). The certificate curriculum is designed with a series of didactic courses where students will gain knowledge about the diagnosis, pathobiology and treatment of different oral diseases in the field of oral medicine. The field of oral medicine is concerned with the diagnosis and treatment of oral mucosal diseases and infections, burning mouth, immunopathologic diseases, neoplastic diseases, osseous diseases including bisphosphonate osteonecrosis, salivary gland disorders and dysfunction, pharmacologic-related and systemic disorders that cause oral disease. The courses and clinical experiences covered in the intensive two-year program are listed below.

**Required courses**

- ADNT 701 Research Methodologies in Dentistry Units: 2
- OFPM 701 CPR, Blood and Airborne Infections and Common Emergencies for Dental Residents Units: 1
- OFPM 702a Soft Tissue Disease for Dental Residents Units: 1
- OFPM 702b Soft Tissue Disease for Dental Residents Units: 2
- OFPM 703 Local Anesthesia, Minor Surgery and Biopsy Procedures for Dental Residents Units: 1
- OFPM 704 Bony Pathology, Radiology and Advanced Imaging for Dental Residents Units: 1
- OFPM 705 Neurogenic Based Oral and Facial Pains for Dental Residents Units: 2
- OFPM 706 TMD, Orthopedics, Rheumatology and Physical Therapy for Dental Residents Units: 2
- OFPM 707 Pharmacology Series for Dental Residents Units: 2
- OFPM 721 Neurosciences for Dental Residents Units: 2
- OFPM 722 Internal Medicine and Systemic Disease for Dental Residents Units: 2
- OFPM 723 Systems Physiology, Motor Disorders and Sleep Apnea for Dental Residents Units: 2
- OFPM 724 Psychological and Psychometric Assessment for Dental Residents Units: 2
- OFPM 725 Epidemiology, Nutrition and Aging for Dental Residents Units: 2
- OFPM 726 Immunology and Immunosuppression for Dental Residents Units: 2
- OFPM 727 Infectious Disease, Oral Microbiology and Virology for Dental Residents Units: 2
- OFPM 728 Case Presentations by OFP-OM Residents Units: 2

**Advanced Orofacial Pain Certificate**
The Herman Ostrow School of Dentistry's 24-month certificate residency program in advanced orofacial pain trains one to two residents per year to be expert clinicians in orofacial pain with an emphasis on oral medicine. The program has received initial accreditation from the Commission on Dental Accreditation (CODA) of the American Dental Association (ADA). The certificate curriculum is designed with a series of didactic courses where students will gain knowledge about the diagnosis, pathobiology and treatment of different oral diseases in the field of orofacial pain. The field of orofacial pain encompasses masticatory musculoskeletal pain, neurogenic orofacial pain, sleep disorders related to orofacial pain, temporomandibular disorders, headaches, orofacial motor disorders including orofacial dystonias and bruxism, intraoral, intracranial, extracranial and systemic disorders that cause orofacial pain. The courses and clinical experiences covered in the intensive two-year program are listed below.

**Required Courses**

- ADNT 701 Research Methodologies in Dentistry Units: 2
- OFPM 701 CPR, Blood and Airborne Infections and Common Emergencies for Dental Residents Units: 1
- OFPM 702a Soft Tissue Disease for Dental Residents Units: 1
- OFPM 702b Soft Tissue Disease for Dental Residents Units: 2
- OFPM 703 Local Anesthesia, Minor Surgery and Biopsy Procedures for Dental Residents Units: 1
- OFPM 704 Bony Pathology, Radiology and Advanced Imaging for Dental Residents Units: 1
- OFPM 705 Neurogenic Based Oral and Facial Pains for Dental Residents Units: 2
- OFPM 706 TMD, Orthopedics, Rheumatology and Physical Therapy for Dental Residents Units: 2
- OFPM 707 Pharmacology Series for Dental Residents Units: 2
Advanced Orthodontics Certificate

The advanced orthodontics certificate program is a 34-month course of study leading to a certificate in orthodontics and a Master of Science degree in craniofacial biology. The program in orthodontics is accredited by the Commission on Dental Accreditation of the American Dental Association, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. Upon completion of all requirements, the graduate is eligible for examination and certification by the American Board of Orthodontics. The program has as its primary mission the preparation and training of residents for clinical practice in the specialty of orthodontics. This is achieved through a broad, in-depth curriculum designed to develop proficiency in clinical orthodontics with a solid foundation in fundamental and advanced biological and mechanical principles. Graduate-level courses in the basic sciences are the core didactic component of the program. Research is also an integral part of the program, and each resident must complete an original research project to fulfill a thesis requirement.

Advanced Orthodontics/Craniofacial Biology Curriculum

Required Courses

- ADNT 710 Internship: Dental Education Units: 1, 2, 3, 4, 5
- CBY 574 Statistical Methods in Bioexperimentation Units: 3
- CBY 578 Pathological Conditions of the Craniofacial Complex Units: 3
- CBY 579L Craniofacial Molecular Genetics Units: 4
- CBY 585 Systematic Research Writing Units: 3
- CBY 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- CBY 594a Master's Thesis Units: 2 *
- CBY 594b Master's Thesis Units: 2 *
- CBY 594z Master's Thesis Units: 0 *
- CBY 671 Epistemology and Ethos of Bioscience Units: 2
- ORTH 701a Cephalometrics: Growth and Development Units: 2, 3, 4
- ORTH 701b Cephalometrics: Growth and Development Units: 2, 3, 4
- ORTH 702 Seminar: Review of the Orthodontic Literature Units: 5
- ORTH 703a Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 703b Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 703c Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 703d Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 703e Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 703f Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 703g Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 703h Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 703i Seminar: Advanced Orthodontics Units: 2, 3, 4, 5, 6, 7, 8 each
- ORTH 704a Seminar: Orthodontics in Theory and Practice Units: 2 **
- ORTH 704b Seminar: Orthodontics in Theory and Practice Units: 2 **
- ORTH 704c Seminar: Orthodontics in Theory and Practice Units: 2 **
- ORTH 705a Orthodontic Practice Management Units: 2
- ORTH 705b Orthodontic Practice Management Units: 2
- ORTH 705c Orthodontic Practice Management Units: 2
- ORTH 706 Surgical Orthodontics Units: 2
- ORTH 707 Interdisciplinary Aesthetic Treatment Units: 2
- ORTH 708 Information Technology in Orthodontic Practice Units: 2
- ORTH 709 Advanced Information Technology in Orthodontic Practice Units: 2
- ORTH 721 Biomechanics and Orthodontic Technic Units: 8
- ORTH 751a Clinic: Advanced Orthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- ORTH 751b Clinic: Advanced Orthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- ORTH 751c Clinic: Advanced Orthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
- ORTH 751d Clinic: Advanced Orthodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
The purpose of the combined pediatric dentistry/craniofacial biology program is to prepare highly qualified specialists in pediatric dentistry who can assume leadership positions in dental education, service to the community, dental research and oral health care of children with developmental disabilities and medically compromising conditions. The structured curriculum of this three-year program offers a strong didactic component in basic biological science and in clinical sciences as well as intensive clinical pediatric dentistry training.

An individual who elects to apply to the combined program in craniofacial biology and advanced pediatric dentistry would submit a simultaneous application to the Herman Ostrow School of Dentistry and the Graduate School. See the Craniofacial Biology section of this catalogue for further information. The first year of the program would be spent in craniofacial biology and the second and third years spent in the pediatric dentistry program. After successful completion of the craniofacial biology program the student would be reviewed by the Pediatric Dentistry Admissions Committee and admitted into the certificate program. The student must satisfactorily complete the Master of Science program to be eligible for the Pediatric Dentistry Certificate.

**Required Courses**

- ADNT 701 Research Methodologies in Dentistry Units: 2
- ADNT 706 Seminar: Diseases of Childhood Units: 2
- ADNT 707 Behavior of the Child Patient Units: 2
- ADNT 710 Internship: Dental Education Units: 1, 2, 3, 4, 5
- AMED 750a Physical Evaluation and Anesthesia Units: 2
- AMED 750b Physical Evaluation and Anesthesia Units: 2
- AMED 750c Physical Evaluation and Anesthesia Units: 1
- DMAT 701 Advanced Biomaterials Units: 2
- DPHR 701 Advanced Pharmacology Units: 1
- PEDO 701a Seminar: Advanced Pediatric Dentistry Units: 8, 9, 10, 11, 12, 13, 14, 15 each
- PEDO 701b Seminar: Advanced Pediatric Dentistry Units: 8, 9, 10, 11, 12, 13, 14, 15 each
- PEDO 702a Comprehensive Review of Pediatric Dentistry Units: 5, 6, 7 each
- PEDO 702b Comprehensive Review of Pediatric Dentistry Units: 5, 6, 7 each
- PEDO 703a Interceptive Orthodontics Units: 2, 3, 4, 5 each
- PEDO 703b Interceptive Orthodontics Units: 2, 3, 4, 5 each
- PEDO 703c Interceptive Orthodontics Units: 2, 3, 4, 5 each
- PEDO 703d Interceptive Orthodontics Units: 2, 3, 4, 5 each
- PEDO 703e Interceptive Orthodontics Units: 2, 3, 4, 5 each
- PEDO 704a Prevention in Pediatric Dentistry Units: 2
- PEDO 704b Prevention in Pediatric Dentistry Units: 2
- PEDO 705 Pediatric Dentistry Units: 2
- PEDO 706 Dental Care for Pediatric Patients with Disabilities Units: 2
**Admission Requirements**

Applicants for admission must have completed the following courses with grades of B or better:

- **Biology:**
  - Principles of Biology I
  - Principles of Biology II

- **Chemistry:**
  - General Chemistry I
  - General Chemistry II

- **Mathematics:**
  - College Algebra
  - Calculus I

- **Humanities:**
  - English Composition I
  - Speech Communication

- **Social Sciences:**
  - Introduction to Psychology
  - Introduction to Sociology

- **Additional Requirements:**
  - Minimum of 30 semester hours of college credit
  - Minimum of 12 semester hours of science

**Note:**

*In addition to the required courses, a combined minimum of 36 units of PEDO 761 and PEDO 771 must be satisfactorily completed, as directed by the program director.*

### **Advanced Periodontology Certificate**

The advanced periodontology program offers two options:

1. A 36-month, 183-unit course of study leading to the certificate of clinical training in periodontology, or
2. A dual 36-month, 183-unit program leading to both a certificate of clinical training in periodontology and a Master of Science in Craniofacial Biology.

The program in periodontology is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation, and the United States Department of Education. The program also meets the educational requirements of the American Board of Periodontology. Preparation for the certification process is an integral part of the curriculum, and all graduates are expected to achieve diplomate status of the American Board of Periodontology.

The curriculum provides a sound foundation in those basic sciences and medical sciences with direct application to clinical periodontology and implantology. Emphasis is placed on evidence-based clinical practice in order to select appropriate therapies rooted in scientific evidence in order to achieve predictable outcomes.

The USC Advanced Periodontology Program has a strong clinical component. Residents will acquire expertise in diagnosis and treatment of patients with periodontal diseases by controlling inflammation, regeneration of the periodontium where appropriate or replacement of hopeless teeth with dental implants. Residents receive extensive training in reconstruction of alveolar bone and soft tissues using advanced methods necessary for esthetic and functional periodontal and implant reconstruction. During the course of the study, periodontology residents work very closely with other disciplines in delivering complex interdisciplinary patient care. Clinical experience in pharmacosedation will also be provided.

### **Required Courses**

- **ADNT 702 Physical Diagnosis Units:** 2
- **ADNT 703a Seminar:** Combined Treatment Planning Units: 2 each
- **ADNT 703b Seminar:** Combined Treatment Planning Units: 2 each
- **ADNT 703c Seminar:** Combined Treatment Planning Units: 2 each
- **ADNT 703d Seminar:** Combined Treatment Planning Units: 2 each
- **ADNT 703e Seminar:** Combined Treatment Planning Units: 2 each
- **ADNT 703f Seminar:** Combined Treatment Planning Units: 2 each
- **ADNT 703i Seminar:** Combined Treatment Planning Units: 2 each
- **ADNT 703j Seminar:** Combined Treatment Planning Units: 2 each
- **ADNT 703k Seminar:** Combined Treatment Planning Units: 2 each
• ADNT 703j Seminar: Combined Treatment Planning Units: 2 each
• ADNT 704a Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each
• ADNT 704b Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each
• ADNT 710 Internship: Dental Education Units: 1, 2, 3, 4, 5
• AMED 750a Physical Evaluation and Anesthesia Units: 2
• AMED 750b Physical Evaluation and Anesthesia Units: 2
• AMED 750c Physical Evaluation and Anesthesia Units: 1
• ANAT 701 Advanced Head and Neck Anatomy Units: 1
• CBY 574 Statistical Methods in Bioexperimentation Units: 3
• CBY 575 Biologic Basis of Oral-facial Disease Units: 3
• CBY 576 Biochemical Aspects of Periodontal Disease Units: 3
• CBY 585 Systematic Research Writing Units: 3
• CBY 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
• CBY 674 Advanced Oral Microbiology Units: 2
• DHIS 701 Advanced Oral Histology Units: 2
• DPHR 701 Advanced Pharmacology Units: 1
• PERI 701a Seminar: Review of Current Periodontal Literature Units: 2, 3
• PERI 701b Seminar: Review of Current Periodontal Literature Units: 2, 3
• PERI 702a Seminar: Periodontal Treatment Procedures Units: 2
class
• PERI 702b Seminar: Periodontal Treatment Procedures Units: 2
• PERI 704a Seminar: Periodontal Therapy Units: 2 each
• PERI 704b Seminar: Periodontal Therapy Units: 2 each
• PERI 704c Seminar: Periodontal Therapy Units: 2 each
• PERI 704d Seminar: Periodontal Therapy Units: 2 each
• PERI 704e Seminar: Periodontal Therapy Units: 2 each
• PERI 704f Seminar: Periodontal Therapy Units: 2 each
• PERI 704h Seminar: Periodontal Therapy Units: 2 each
• PERI 704i Seminar: Periodontal Therapy Units: 2 each
• PERI 704j Seminar: Periodontal Therapy Units: 2 each
• PERI 708 Seminar: Clinical Basis of Periodontics Units: 4
• PERI 710 Clinical Periodontal Photography Units: 1
• PERI 711 Occlusal Therapy in Periodontics Units: 2
• PERI 713a Treatment Planning in Periodontics Units: 2 each
• PERI 713b Treatment Planning in Periodontics Units: 2 each
• PERI 713c Treatment Planning in Periodontics Units: 2 each
• PERI 713d Treatment Planning in Periodontics Units: 2 each

• PERI 713j Treatment Planning in Periodontics Units: 2 each
• PERI 716a Seminar: Special Topics in Periodontal Disease Units: 3
• PERI 716b Seminar: Special Topics in Periodontal Disease Units: 3
• PERI 750 Advanced Periodontal Instrumentation Units: 3
• PERI 752 Interdisciplinary Treatment: An Orthodontic Perspective Units: 2
• PERI 751a Seminar: Advanced Periodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
• PERI 751b Seminar: Advanced Periodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
• PERI 751c Seminar: Advanced Periodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
• PERI 751d Seminar: Advanced Periodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
• PERI 751e Seminar: Advanced Periodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
• PERI 751f Seminar: Advanced Periodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
• PERI 751g Seminar: Advanced Periodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
• PERI 751h Seminar: Advanced Periodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
• PTHL 601 Advanced Oral Pathology Seminar Units: 2
• REST 710a Implant Dentistry Units: 1
• REST 710b Implant Dentistry Units: 1
Total units: 183

Advanced Prosthodontics Certificate

The program in advanced prosthodontics is a 36-month course of study designed to teach didactic and clinical skills leading to competency in the specialized practice of prosthodontics. The program provides a basic science foundation, incorporating studies in physical diagnosis, anatomy, oral pathology, pharmacology and oral biology. Proficiency in fixed, removable and implant prosthodontics will be developed during the course of study from a practical and didactic aspect. There is a strong emphasis on applying principles of esthetics toward oral reconstructions and implant prosthodontics. Periodontally compromised patients are frequently encountered, so the program is closely allied with the advanced program in periodontology. Treatment planning and integrated care with allied specialties is a strength of the program.

In addition to developing clinical skills, the program requires a research methodology course and a research project. Clinical experience in implant placement and didactic study in maxillofacial prosthesis are offered: students who want more experience in clinical care may devote more time to treating these patients. The program in advanced prosthodontics is accredited by the Commission on Dental Accreditation, a special accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. The program also meets the requirements of the American Board of Prosthodontics. A certificate is awarded upon successful completion of the program.

Required Courses

- ADNT 701 Research Methodologies in Dentistry Units: 2
- ADNT 702 Physical Diagnosis Units: 2
- ADNT 703a Seminar: Combined Treatment Planning Units: 2 each
- ADNT 703b Seminar: Combined Treatment Planning Units: 2 each
- ADNT 703c Seminar: Combined Treatment Planning Units: 2 each
- ADNT 703d Seminar: Combined Treatment Planning Units: 2 each
- ADNT 703e Seminar: Combined Treatment Planning Units: 2 each
- ADNT 703f Seminar: Combined Treatment Planning Units: 2 each
- ADNT 703g Seminar: Combined Treatment Planning Units: 2 each
- ADNT 703h Seminar: Combined Treatment Planning Units: 2 each
- ADNT 703i Seminar: Combined Treatment Planning Units: 2 each
- ADNT 704a Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each
- ADNT 704b Oral Biology Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 each
- AMED 750a Physical Evaluation and Anesthesia Units: 2
- AMED 750b Physical Evaluation and Anesthesia Units: 2
- AMED 750c Physical Evaluation and Anesthesia Units: 1
- ANAT 701 Advanced Head and Neck Anatomy Units: 1
- CBY 575 Biologic Basis of Oral-facial Disease Units: 3
- DMAT 701 Advanced Biomaterials Units: 2
- DPHR 701 Advanced Pharmacology Units: 1
- PTHL 601 Advanced Oral Pathology Seminar Units: 2
- REST 701 Orientation to Advanced Prosthodontics Units: 5
- REST 702a Seminar: Treatment Planning Units: 2 each
- REST 702b Seminar: Treatment Planning Units: 2 each
- REST 702c Seminar: Treatment Planning Units: 2 each
- REST 702d Seminar: Treatment Planning Units: 2 each
- REST 702e Seminar: Treatment Planning Units: 2 each
- REST 702f Seminar: Treatment Planning Units: 2 each
- REST 702g Seminar: Treatment Planning Units: 2 each
- REST 702h Seminar: Treatment Planning Units: 2 each
- REST 702i Seminar: Treatment Planning Units: 2 each
- REST 702j Seminar: Review of the Prosthodontic Literature — Fixed Units: 1 each
- REST 703a Seminar: Review of the Prosthodontic Literature — Fixed Units: 1 each
- REST 703b Seminar: Review of the Prosthodontic Literature — Fixed Units: 1 each
- REST 703c Seminar: Review of the Prosthodontic Literature — Fixed Units: 1 each
- REST 703d Seminar: Review of the Prosthodontic Literature — Fixed Units: 1 each
- REST 703e Seminar: Review of the Prosthodontic Literature — Fixed Units: 1 each
- REST 703f Seminar: Review of the Prosthodontic Literature — Fixed Units: 1 each
The General Practice Residency program consists of a 12-month first-year, full-time residency program, which is designed in conformance with the guidelines of the Council on Dental Education and the Commission on Dental Accreditation of the American Dental Association. The program is structured to increase diagnostic acumen, general knowledge and clinical ability in dentistry. The program is conducted primarily at the Los Angeles County + USC Medical Center, one of the nation's largest teaching hospitals, and at the Veterans Administration Los Angeles Ambulatory Care facility in downtown Los Angeles. Some of the training is also conducted at Rancho Los Amigos Medical Center, West Los Angeles Veterans Administration Hospital, the Herman Ostrow School of Dentistry of USC and other community facilities. The program emphasizes the treatment of a wide range of oral health disorders, medical considerations related to dental care, the ability to treat medically compromised and disabled patients and teaches how to provide dental care in a hospital environment interacting with health care providers of various disciplines. Inherent in the year of training, a philosophy of practice addresses the medical psychosocial and oral health care needs of the patient.

The program in general practice is accredited by the American Dental Association's Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education.

Integrated MD Degree/Oral and Maxillofacial Surgery Certificate Program

The Herman Ostrow School of Dentistry of USC and the Keck School of Medicine of USC offer a continuous 72-month integrated course of study leading to a medical degree in addition to a certificate in oral and maxillofacial surgery that prepares the graduate for the practice of oral and maxillofacial surgery. The program is fully integrated and will include advanced placement into the established medical school curriculum.

During the first three years, the student will function in the capacity of a medical student as well as a resident in the oral and maxillofacial surgery program. After the completion of the medical school curriculum, the MD degree will be awarded. This is required before the student can continue in the general surgery internship portion of the program. At the completion of the surgical internship, the student is qualified for medical licensure. During the fourth through sixth year, all required rotations and surgical training will be completed to fulfill the educational requirements of the Commission of Dental Accreditation of the American Dental Association and the American Association of Oral and Maxillofacial Surgeons.

The program is conducted at the Schools of Dentistry and Medicine and at the LAC+USC Medical Center. The course of study provides the graduates with the necessary background for certification by the American Board of Oral and Maxillofacial Surgery. The oral and maxillofacial surgery certificates are awarded upon successful completion of the entire 72-month course.

Dual Degree Advanced Periodontology Certificate/Master of Science, Craniofacial Biology Required Courses

- ADNT 702 Physical Diagnosis Units: 2
- ADNT 703a Seminar: Combined Treatment Planning Units: 2 each
- ADNT 703b Seminar: Combined Treatment Planning Units: 2 each

• PERI 761h Clinic: Advanced Periodontics Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 each
One of the premier dramatic arts schools in the United States, the USC School of Dramatic Arts uniquely blends artistic training in a conservatory environment with outstanding faculty and the full academic experience found only within a major research university. This close-knit, supportive environment offers students the freedom to explore their artistic passions. Through programs of the highest caliber, as well as initiatives that provide access to professional experience, students are prepared for leadership in every facet of dramatic arts.

The school also attracts a wide range of guest speakers and lecturers, including some of the most distinguished talents from stage, screen and television. The location of the campus, literally in the center of the entertainment industry, makes the USC School of Dramatic Arts distinctive among colleges and universities in the United States. Graduates of the school work professionally in all aspects of the entertainment industry. The school's faculty are dynamic teachers who are also artists working at the highest level of their profession.

The breadth of learning opportunities offered at the school prepares students for the spectrum of careers in the dramatic arts. The School of Dramatic Arts strives to instill confidence, integrity, excellence and artistic sensitivity into each of its students — traits that are essential to success in any field.

**General Information**

**Degree Programs**

The School of Dramatic Arts offers professional and academic degrees at the Bachelor and Master of Fine Arts levels as well as a Master of Arts in Applied Theatre Arts. USC offers two degree programs to undergraduate students interested in the study of theatre arts. The professional degree programs, the Bachelor of Fine Arts (BFA) in Acting, Design/Technical Direction, Sound Design, and Stage Management, offer a conservatory approach to training for students committed to pursuing careers in the professional theatre, film and television industries. The Bachelor of Arts
degree program (BA) incorporates a broad, general education in addition to a thorough study of drama. The Bachelor of Arts in Visual and Performing Arts Studies provides students with a broad understanding of the various disciplines. The School of Dramatic Arts also offers minor programs in applied theatre arts, theatre, musical theatre, performing arts studies and playwriting.

**Bachelor of Arts**
The Bachelor of Arts (BA) degree is ideal for students who want a broad education in addition to production and performance experience. The degree is offered in cooperation with the USC Dornsife College of Letters, Arts and Sciences.

**Bachelor of Fine Arts**

**Acting:** The BFA acting degree is a four-year professional training program with opportunities for performances beginning with the sophomore year. The program comprises an integrated sequence of training in acting, voice and body movement, based on the belief that an actor's emotional and imaginative abilities cannot be released without control over vocal and physical resources. This training is combined with course work in critical and historical studies, stagecraft, technical theatre, scenic design, costume and lighting. An audition is required for admission. The BFA acting program is highly competitive.

**Design/Technical Direction:** The BFA program in design/technical production offers two areas of study: design — incorporating study in scenic, lighting and costume design; and technical production — incorporating the study of theatrical design with training in the professional skills needed to execute stage designs. An interview is required for admission.

**Sound Design:** The BFA program in sound design offers the student a combination of technical, management and design training in sound design. The student is also introduced to sound recording and mixing through a series of courses offered by the USC Thornton School of Music. Students begin using this training as early as the second semester of the second year of enrollment. The skills acquired in the classroom are further explored through sound design assignments on School of Dramatic Arts public productions in each subsequent semester of the student's program. Students in the sound design program build and design the sound component for the majority of the School of Dramatic Arts' productions under the supervision of a professional staff of designers and theatre technicians. An interview is required for admission.

**Stage Management:** The BFA program in stage management offers the student a combination of technical, management and design training. Students begin using this training as early as the first year of enrollment. The skills acquired in the classroom are further explored through stage management assignments in each year of the student's program. An interview is required for admission. Students in the design/technical production and stage management programs design, build and stage manage the majority of the School of Dramatic Arts' productions under the supervision of a professional staff of designers and theatre technicians.

**Bachelor of Arts in Visual and Performing Arts Studies**

The Bachelor of Arts in Visual and Performing Arts Studies is an interdisciplinary degree offered jointly by the School of Dramatic Arts, the School of Architecture, the School of Cinematic Arts, the Roski School of Art and Design, the Thornton School of Music, and the Dornsife College of Letters, Arts and Sciences.

**Minor Programs**

**Theatre:** This general minor in theatre invites students to explore the many facets of this exciting field. Students have the opportunity to take a variety of classes in acting, applied theatre arts, applied theatre arts/education, playwriting, literature, stage management, directing, costume design and production. The curriculum is very flexible and encourages students to develop a primary interest for upper-division coursework. All minor students are eligible to participate in performance and production projects.

**Applied Theatre Arts:** The minor in applied theatre arts addresses the theory and practice of applying theatre arts in non-traditional settings with emphases that include education, therapy and social change.

**Comedy:** The minor in comedy (performance) is a 20-unit minor that focuses on the theory and practice of comedy-making from the performer's perspective. Beginning with a foundation in the history of comic performance, and supplemented by courses in the fundamentals of acting and performance, the progression of the minor offers students a comprehensive theoretical and experiential education in the many differing disciplines of comedy.

**Musical Theatre:** The minor in musical theatre, interdisciplinary in nature, is a 27-unit program incorporating the study of acting, dance or movement, vocal arts and related musical subjects presented in association with the Thornton School of Music.

**Performing Arts Studies:** The minor in performing arts provides an interdisciplinary inquiry into the nature and aesthetics of the performing arts. It combines the disciplines of cinematic arts, dance, music and theatre. The minor is a unique course of study that looks at how the performing arts contribute to a culturally literate society.

**Playwriting:** The minor in playwriting presents undergraduate students who are not theatre majors with a concentration in the discipline of playwriting as a means for broadening and deepening expression using the literary and performing arts. This minor offers a foundation for extended expression in dramatic writing and creative writing genres in general.

**Master of Fine Arts**
The Master of Fine Arts with a major in theatre requires 48–64 units of course work at the 400 or 500 level. The areas of emphasis include acting, theatrical design, dramatic writing and directing. These programs provide a high level of practical experience. To ensure this, the number of students accepted in each area of emphasis is strictly limited. An interview is required for admission.

**Master of Arts, Applied Theatre Arts**
The Master of Arts in Applied Theatre Arts explores the intersection of theatre arts and cultural fieldwork, encompassing the fields of theatre and therapy, theatre in education and theatre for social change/community-based theatre. Practitioners of applied theatre arts supplement their
work as classroom teachers, therapists, social workers, case managers, community organizers and social activists.

**Auditions and Entrance to the Degree Programs**

Admission to the various degree programs is granted through the university's regular admission procedures in conjunction with the School of Dramatic Arts supplementary application procedure. See the Admission section of this catalogue, Undergraduate and Graduate.

Admission to the BA program is determined by academic record, experience in theatre, and information required on the USC application for admission and the School of Dramatic Arts supplementary application. Students applying for the BA program must contact the School of Dramatic Arts directly to obtain the supplementary application. In addition to submitting a USC application for admission, a dramatic arts supplementary application and an inperson audition are required for the BFA and MFA programs. Auditions are held during January and February. Applicants should contact the School of Dramatic Arts directly to obtain supplementary application materials and to arrange for their audition.

The acting audition requires two monologues: one contemporary and one classical (preferably verse). Auditions and interviews for all programs are held in major cities around the country including Los Angeles, Chicago and New York.

Students wishing to transfer from a community college or another four-year college or university into the Bachelor of Fine Arts curriculum must present training equivalent to their level of transfer or be prepared to take remedial work in acting, voice, movement, dramatic literature and stagecraft. Admission to the BFA and MFA Design/Technical Direction, Stage Management and Sound Design programs is based on a personal interview and/or review of a portfolio. In addition, the student must submit a USC application for admission and a dramatic arts supplementary application. Applicants for the design programs must present a portfolio of their work at the time of their interview with the design faculty.

Interviews are held beginning in January for the following fall semester. Admission to full graduate standing will be granted after the satisfactory completion of one semester. A satisfactory test score on the Graduate Record Examinations and a satisfactory grade point average are also required.

Application materials and details about audition dates and locations may be obtained from the Office of Admissions and Recruitment, School of Dramatic Arts, University of Southern California, Los Angeles, CA 90089-0791, (213) 740-1286.

**International Study**

In conjunction with Sarah Lawrence College and the British American Drama Academy, USC students have the opportunity to study theatre in London. For additional information, see International Study Options.

**Degree Requirements**

**Minor Programs**

**Minor in Musical Theatre**

The minor in musical theatre, interdisciplinary in nature, is a 27-unit program incorporating the study of acting, dance or movement, vocal arts and related musical subjects. Admission to the minor requires an audition for music but not for theatre. See the USC Thornton School of Music for requirements.

**Bachelor's Degree**

**Theatre (BA)**

The Bachelor of Arts with a major or minor in theatre is a comprehensive theatre degree offered in cooperation with the USC Dornsife College of Letters, Arts and Sciences. Candidates for the degree must complete the university general education requirements in addition to the courses in the major prescribed by the School of Dramatic Arts. A total of 128 units is required for completion of the degree.

**General Education Requirements**

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing, foreign language and diversity requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

**School Majors**

Students who choose the school major are required to complete a minimum of 52 units in theatre as specified:

**Required Courses**

- THTR 101 Introduction to Acting Units: 4
- THTR 125 Text Studies for Production Units: 4
- THTR 130 Introduction to Theatrical Production I Units: 4
- THTR 141 Theory and Practice of Classical Theatre Units: 3
- THTR 201 Introduction to Modern Drama Units: 2
- THTR 210 Theory and Practice of World Theatre I Units: 4
- THTR 211g Theory and Practice of World Theatre II Units: 4
- THTR 212 Theory and Practice of World Theatre III Units: 4
- THTR 305a Directing Units: 4

**Units: 28**

**One course (3 units) from:**

- THTR 230 Communicating Theatrical Design Concepts Units: 3
- THTR 231a Costume Construction Units: 3
- THTR 232 Stage Lighting Units: 3
- THTR 335 Scenic Construction Units: 3

**One course (4 units) from:**

- THTR 300 Introduction to Modern Drama Units: 4
- THTR 301 Greek and Roman Theatre Units: 4
- THTR 302 Shakespeare in His World Units: 4
- THTR 313 Comedy of Manners Units: 4
• THTR 314 Advanced Topics in Modern Drama Units: 4
• THTR 395m Drama as Human Relations Units: 4
• THTR 396 God, Drama and Entertainment Units: 4
• THTR 403 The Performing Arts Units: 4
• THTR 404 Acting Theory Units: 4
• THTR 405m Performing Identities Units: 4
• THTR 406 Theatre on the Edge Units: 4
• THTR 476mw African American Theatre, Dance, and Performance Units: 4

Select 6 units from the following:
• THTR 342b Basic Voice Units: 2
• THTR 352b Intermediate Acting II Units: 2
• THTR 354 Acting Shakespeare Units: 2
• THTR 454 Acting Shakespeare II Units: 2
• THTR 408a Dialects Units: 2
• THTR 408b Dialects Units: 2
• THTR 480a Performance for Camera Units: 2

Select 8 units from the following:
• THTR 316 Advanced Movement for Actors Units: 2
• THTR 343 Musical Theatre Audition Units: 3
• THTR 365 Playwriting I Units: 4
• THTR 397 Theatre Practicum Units: 1, 2, 3, 4 (2 Units Required)
• THTR 417 Stage Combat Units: 2
• THTR 419 Alexander Technique for Performers Units: 2
• THTR 442 Voice-over Acting Units: 2
• THTR 452a Advanced Acting Units: 4
• THTR 475 Acting on Camera: The Collaborative Process Units: 4
• THTR 472 Professional Preparation for Actors Units: 2
• THTR 480b Performance for Camera Units: 2
• THTR 495 Experimental Theatre Workshop I Units: 4
• THTR 497 Advanced Theatre Practicum Units: 2

Total required Theatre Units: 59
Total required General Education: 32
Total Elective Units: 37
Total Units: 128

Theatre, Acting Emphasis, (BFA) Bachelor of Fine Arts

The Bachelor of Fine Arts provides four years of intensive training at the undergraduate level in performance studies including acting, design, sound design, stage management and technical direction. A total of 128 units of course work is required for this degree, including a minimum range of 75–84 theatre units depending on the requirements of each program. All BFA Theatre majors are required to earn a grade point average of 2.75 (A = 4.0) in their theatre courses each semester. BFA students who fail to earn a GPA of 2.75 in their theatre courses will be placed on probation.
following semester. Students who remain on probation for a consecutive second semester will be disqualified from the BFA program.

A student disqualified from continued study in the BFA program for failing to meet the GPA standards outlined above will be given the option of transferring into the BA program.

**General Education Requirements**

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

**Required Courses for the Acting Emphasis (84 Units)**

- THTR 110 Dramatic Analysis Units: 2
- THTR 115 Movement I Units: 2
- THTR 120a Acting I Units: 2
- THTR 120b Acting I Units: 2
- THTR 130 Introduction to Theatrical Production Units: 2
- THTR 140a Voice I Units: 2
- THTR 140b Voice I Units: 2
- THTR 210 Theory and Practice of World Theatre I Units: 4
- THTR 211g Theory and Practice of World Theatre II Units: 4
- THTR 212 Theory and Practice of World Theatre III Units: 4
- THTR 215a Movement II Units: 2
- THTR 215b Movement II Units: 2
- THTR 220a Intermediate Acting I Units: 2
- THTR 220b Intermediate Acting I Units: 2
- THTR 240a Voice II Units: 2
- THTR 240b Voice II Units: 2
- THTR 315a Physical Theatre I Units: 2
- THTR 315b Physical Theatre I Units: 2
- THTR 320a Intermediate Acting II Units: 2
- THTR 320b Intermediate Acting II Units: 2
- THTR 340a Intermediate Voice Units: 2
- THTR 340b Intermediate Voice Units: 2
- THTR 397 Theatre Practicum Units: 1, 2, 3, 4 (2 Units Required)
- THTR 415a Physical Theatre II Units: 2
- THTR 415b Physical Theatre II Units: 2
- THTR 420a Advanced Acting Units: 2
- THTR 420b Advanced Acting Units: 2
- THTR 440a Advanced Voice Units: 2
- THTR 440b Advanced Voice Units: 2
- THTR 471 Senior Showcase Units: 2
- THTR 480a Performance for Camera Units: 2
- THTR 497 Advanced Theatre Practicum Units: 2

**One course from:**

- THTR 305a Directing Units: 4
- THTR 365 Playwriting I Units: 4

**One course from:**

- THTR 300 Introduction to Modern Drama Units: 4
- THTR 301 Greek and Roman Theatre Units: 4

**Visual and Performing Arts Studies (BA)**

The Bachelor of Arts in Visual and Performing Arts Studies is an interdisciplinary degree offered jointly by the Kaufman School of Dance, the School of Dramatic Arts, the School of Architecture, the School of Cinematic Arts, the Roski School of Art and Design, the Thornton School of Music, and the Dornsife College of Letters, Arts and Sciences. Candidates for the degree must complete the university general education requirements in addition to the courses in the major.

Students in this major complete a core of required courses that provides them with a broad understanding of the various disciplines. The work in the major is completed by choosing courses from a wide array of course offerings from all the participating schools. A total of 128 units is required for completion of the degree.

**General Education Requirements**

The university's General Education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. In addition, all entering freshmen are expected to complete a General Education Seminar during their first year at USC. These seminars satisfy one of the Core Literacy requirements above.

Note that courses within the major may also satisfy certain Core Literacy requirements. Please work with your major adviser to determine those courses.

**Required Core Courses (Survey of the Arts)**

- AHIS 120gp Foundations of Western Art Units: 4
- ARCH 304x Intensive Survey: Prehistory to the Present Units: 4
- CTCS 393 History of the American Film, 1946–1975 Units: 4
- DANC 280g Introduction to Dance as an Art Form Units: 4
- FACS 150gp Visual Culture and Literacy I Units: 4
- MUHL 315x Music and Culture Units: 4
- THTR 125 Text Studies for Production Units: 4

**Total: 28**

**Case Studies in the Arts:**

12 units of upper division course work from the following:

**Architecture:**

- ARCH 314 History of Architecture: Contemporary Issues Units: 3
- ARCH 432 People, Places and Culture: Architecture of the Public Realm Units: 4
- ARCH 440m Literature and the Urban Experience Units: 4
- ARCH 444 Great Houses of Los Angeles Units: 4
- ARCH 454 Contemporary Asian Architecture Units: 4

**Cinematic Arts:**

- CTAN 451 History of Animation Units: 2
- CTCS 392 History of the American Film, 1925–1950 Units: 4
- CTCS 394 History of the American Film, 1977–present Units: 4
- CTCS 406 History of American Television Units: 4
- CTCS 407 African American Cinema Units: 4

Other Courses:
• COLT 381 Psychoanalysis and the Arts Units: 4
• PHIL 445 Philosophy of the Arts Units: 4

Overseas Study Opportunities:
• FREN 432 French Theatre Units: 4 (Paris Semester)
• SPAN 464 Introduction to Contemporary Spanish Theatre Units: 4 (Madrid Center)

Minor
Applied Theatre Arts Minor
Applied theatre arts is a field of study addressing the theory and practice of applying theatre arts in nontraditional settings with emphases that include education, therapy and social change. The minor in applied theatre arts (ATA) addresses the theory and practice of applying theatre skills in these environments to promote engaged and enlivened interactive critical thinking and community development from a performative perspective. ATA minors learn how to turn passive spectators into more active participants through the process of theatre. Courses taken for this minor may not duplicate requirements for a student's major or other minor program requirements:

Foundation Skills Courses (8 Units)
It is recommended these be taken first:
• THTR 101 Introduction to Acting Units: 4
• THTR 305a Directing Units: 4

ATA Focus Courses (12 Units)
It is recommended these be taken after foundation skills courses:
• THTR 468 Theatre in Education Units: 4
• THTR 477 Theatre and Therapy Units: 4
• THTR 488mw Theatre in the Community Units: 4

Comedy (Performance) Minor
The minor in comedy (performance) is a 20-unit minor that focuses on the theory and practice of comedymaking from the performer's perspective. Beginning with a foundation in the history of comic performance, and supplemented by courses in the fundamentals of acting and performance, the progression of the minor offers students a comprehensive theoretical and experiential education in the many differing disciplines of comedy.

Required Courses (12 units)
• THTR 122 Improvisation and Theatre Games Units: 2
• THTR 197g Comedy and Performance Units: 4
• THTR 316 Advanced Movement for Actors Units: 2
• THTR 474 Introduction to Stand Up Comedy Units: 2

Required Elective Courses (8 units)
• THTR 313 Comedy of Manners Units: 4
• THTR 422 Improv 3: Long Form Improvisation Units: 2
• THTR 423 Magic Units: 2
• THTR 442 Voice-over Acting Units: 2
• THTR 467 Going Viral: Performance for New Media Units: 3
• THTR 469 Satire and Parody in Performance Units: 2
• THTR 470 Sketch Comedy for Theatre Units: 2
• THTR 473 Sketch Comedy in Performance Units: 2
• THTR 482 Stand Up 2: Honing Your Act Units: 2
• THTR 483 Characters of Comedy Units: 2
• THTR 484 Acting in Television Commercials Units: 2

Performing Arts Studies Minor
The minor in performing arts provides an interdisciplinary inquiry into the nature and aesthetics of the performing arts. It combines the disciplines of cinematic arts, dance, music and theatre. The minor is a unique course of study that looks at how the performing arts contribute to a culturally literate
society. The minor in performing arts studies is a 20-unit program.

**Required Courses**

Required capstone course:
- THTR 403 The Performing Arts Units: 4

**Plus a minimum of four courses (16 units) from the following list**

Three courses (12 units) must be upper division. One course (4 units) must be selected from each school.
- CTCS 190g Introduction to Cinema Units: 4
- CTCS 200g History of the International Cinema I Units: 4
- CTCS 201 History of the International Cinema II Units: 4
- CTCS 392 History of the American Film, 1925–1950 Units: 4
- CTCS 393 History of the American Film, 1946–1975 Units: 4
- CTCS 404 Television Criticism and Theory Units: 4
- CTCS 464 Film and/or Television Genres Units: 4
- CTCS 469 Film and/or Television Style Analysis Units: 4
- DANC 280g Introduction to Dance as an Art Form Units: 4
- DANC 385 Choreography and Performance Units: 2
- MUHL 302 Musical Cultures of the World Units: 4
- MUJZ 100mx Jazz: America's Music Units: 4
- MUSC 400m The Broadway Musical: Reflection of American Diversity, Issues, and Experiences Units: 4
- THTR 201 Introduction to the Theatre Units: 4
- THTR 300 Introduction to Modern Drama Units: 4
- THTR 301 Greek and Roman Theatre Units: 4
- THTR 302 Shakespeare in His World Units: 4
- THTR 404 Acting Theory Units: 4
- THTR 493a Periods and Styles Units: 2
- THTR 493b Periods and Styles Units: 2

**Total units required: 20**

Note for cinematic arts, music and theatre majors: cinema majors take 8 units of music and 8 units of theatre; music majors take 8 units of cinema and 8 units of theatre; theatre majors take 8 units of cinema and 8 units of music.

**Playwriting Minor**

The minor in playwriting presents undergraduate students who are not theatre majors with a concentration in the discipline of playwriting as a means for broadening and deepening expression using the literary and performing arts. This minor offers a foundation for extended expression in dramatic writing and creative writing genres in general; fostering skills in research, development, communication, collaboration and craftsmanship in the process of preparing a play for its realization on stage. The minor in playwriting is a 20-unit program.

**Required Courses**

- THTR 101 Introduction to Acting Units: 4 or
- THTR 125 Text Studies for Production Units: 4
- THTR 305a Directing Units: 4
- THTR 365 Playwriting I Units: 4
- THTR 366 Playwriting II Units: 4
- THTR 479 Solo Performance Units: 4

**Theatre Minor**

This general minor in theatre invites students to explore the many facets of this exciting field. Students have the opportunity to take a variety of classes in acting, playwriting, literature, stage management, directing, costume design and production. The curriculum is very flexible and encourages students to develop a primary interest for upper-division course work. All minor students are eligible to participate in performance and production projects.

**Required Courses**

- THTR 101 Introduction to Acting Units: 4 or
- THTR 125 Text Studies for Production Units: 4
- THTR 130 Introduction to Theatrical Production Units: 2

**One of the following:**

- THTR 301 Greek and Roman Theatre Units: 4
- THTR 302 Shakespeare in His World Units: 4
- THTR 313 Comedy of Manners Units: 4
- THTR 314 Advanced Topics in Modern Drama Units: 4
- THTR 476mw African American Theatre, Dance, and Performance Units: 4

**Required upper-division THTR electives: 14**

**Required theatre units: 24**

**Master's Degree**

**Applied Theatre Arts (MA)**

The Master of Arts in Applied Theatre Arts explores the intersection of theatre and cultural fieldwork, encompassing the fields of theatre and therapy, theatre in education and theatre for social change/community based theatre. This combined area of study weaves all three disciplines together under the aegis of training practitioners in the art of popular theatre with primarily marginalized communities. Practitioners of applied theatre arts supplement their work as classroom teachers, therapists, social workers, case managers, community organizers and social activists to engage public groups to obtain their goals and desires by using the tools of theatre to expedite dialogue and foster an atmosphere of greater critical consciousness and increased...
agency. A written and oral examination is required upon completion of course work.

International Study
All students will participate in an international externship during the summer following their academic year. This externship takes place in an approved overseas site where the practice of applied theatre arts is well established, with whom the university has a contractual agreement for supervised observation. This externship intends to provide a supervisory, logistical and theoretical container for students to explore cultural fieldwork in the international arena.

Curricula for the Master of Arts Degree

Applied Theatre Arts
- THTR 505 Staging Community-based Theatre Units: 3
- THTR 521 Engaging Community Narratives Units: 3
- THTR 544 Embodied Poetics Units: 2
- THTR 568 Popular Theatre for Education and Development Units: 3
- THTR 577 Theatre and Therapy for Cultural Fieldwork Units: 3
- THTR 578 Theatre of the Oppressed: Theory, Games, and Techniques Units: 4
- THTR 579 Writing Culture Units: 3
- THTR 586a Applied Theatre Arts: Los Angeles Residency Units: 2
- THTR 586b Applied Theatre Arts: Los Angeles Residency Units: 2
- THTR 587 Liberation Arts and Community Engagement — Theory Units: 4
- THTR 588 Liberation Arts and Community Engagement — Praxis Units: 3
- THTR 592a Participatory Action Research for Community-based Theatre Units: 2
- THTR 592b Participatory Action Research for Community-based Theatre Units: 2
- THTR 598 Applied Theatre Arts: International Externship Units: 2

Total Required Units: 38

Theatre (MFA)
The Master of Fine Arts in theatre allows the choice of an area of emphasis in theatre performance studies including acting, directing, dramatic writing or theatrical design. Seventy-two units of study at the 400- or 500-level are required for the acting emphasis, 72 units for the dramatic writing emphasis and 48 units for the directing and theatrical design emphases. Regardless of the emphasis, at least two-thirds of the units must be at the 500 level or higher. In design, instead of a conventional thesis, the MFA student completes a final project in the area of design and defends it orally before the design faculty. A grade point average of 3.0 must be achieved in all graduate work taken in the School of Dramatic Arts. Graduate candidates whose undergraduate degrees are in disciplines other than theatre may be required to satisfy undergraduate prerequisites in theatre as determined by School of Dramatic Arts faculty.

Curricula for the Master of Fine Arts Degree

Acting Emphasis
- THTR 480a Performance for Camera Units: 2
- THTR 480b Performance for Camera Units: 2
- THTR 504 The Art of Collaboration and Ensemble Units: 2
- THTR 515a Advanced Movement Units: 2
- THTR 515b Advanced Movement Units: 2
- THTR 515c Advanced Movement Units: 2
- THTR 515d Advanced Movement Units: 2
- THTR 515e Advanced Movement Units: 2
- THTR 520a Advanced Acting Units: 4
- THTR 520b Advanced Acting Units: 4
- THTR 520c Advanced Acting Units: 2
- THTR 520d Advanced Acting Units: 4
- THTR 520e Advanced Acting Units: 2
- THTR 529a Textual Studies for Performance Units: 4
- THTR 529b Textual Studies for Performance Units: 4
- THTR 540a Advanced Voice Diction Units: 2
- THTR 540b Advanced Voice Diction Units: 2
- THTR 540c Advanced Voice Diction Units: 2
- THTR 540d Advanced Voice Diction Units: 2
- THTR 540e Advanced Voice Diction Units: 2
- THTR 540f Advanced Voice Diction Units: 2
- THTR 541 Diction and Dialects Units: 2
- THTR 542 Singing for Actors Units: 2
- THTR 554 Seminar in Contemporary Theatre Units: 2
- THTR 555 Directing Fundamentals Units: 2
- THTR 556a Directing Units: 2
- THTR 556b Directing Units: 2
- THTR 567a Studies in Playwriting Units: 4
- THTR 591 Seminar in Producing Theatre Units: 4

Total units: 72

Directing Emphasis
- THTR 520a Advanced Acting Units: 4
- THTR 520b Advanced Acting Units: 4
- THTR 525 Seminar in Contemporary Theatre Units: 4
- THTR 528 Seminar in Dramatic Analysis Units: 4
- THTR 555 Directing Fundamentals Units: 2
- THTR 556a Directing Units: 2
- THTR 556b Directing Units: 2
- THTR 558a Design for Directors Units: 2
- THTR 558b Design for Directors Units: 2
- THTR 567a Studies in Playwriting Units: 4
- THTR 591 Seminar in Producing Theatre Units: 4

563
• THTR 593 MFA Project Units: 2
• Electives by advisement Units: 10

Total units: 48

Theatrical Design Emphasis

Two courses from:
• THTR 550a Seminar in Scene Design Units: 3
• THTR 552a Seminar in Costume Design Units: 3
• THTR 553a Seminar in Lighting Design Units: 3

Two continuing courses from:
• THTR 550b Seminar in Scene Design Units: 3
• THTR 552b Seminar in Costume Design Units: 3
• THTR 553b Seminar in Lighting Design Units: 3

One remaining course from:
• THTR 550a Seminar in Scene Design Units: 3
• THTR 552a Seminar in Costume Design Units: 3
• THTR 553a Seminar in Lighting Design Units: 3

All of the following:
• THTR 407a Drawing and Rendering for the Theatre Units: 2
• THTR 407b Drawing and Rendering for the Theatre Units: 2
• THTR 435 Advanced Theatrical Drafting Units: 3
• THTR 493a Seminar in Scene Design Units: 3
• THTR 500 Advanced Creating Characters Units: 2
• THTR 506 Advanced Creating Characters Units: 2
• THTR 507 Writing the Pacific Rim: Global and Western Dramatic Writing Units: 4
• THTR 527 Seminar in Dramatic Analysis Units: 4 (8 Units Required)

400- or 500-level electives
• 400- or 500-level electives by advisement, 5 units of which must be at the 500 level Units: 10

Total units: 48

Dramatic Writing Emphasis

• CTWR 513 Writing the Short Script Units: 2
• CTWR 514a Basic Dramatic Screenwriting Units: 2
• CTWR 514b Basic Dramatic Screenwriting Units: 2
• THTR 500 Dramaturgical Perspectives and Approaches Units: 2, max 10
• THTR 501 Poetry and Prose into Drama Units: 4
• THTR 506 Advanced Creating Characters Units: 2
• THTR 527 Writing the Pacific Rim: Global and Western Dramatic Writing Units: 4
• THTR 529a Textual Studies for Performance Units: 4
• THTR 566 Dramatic Writing Studio Units: 4 (4 Units Required), max 20
• THTR 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 (2 Units Required), max 4
• THTR 596 Thesis Development and Attainment Units: 2, max 10

Electives Units: 10

Total units: 72

A minimum of 72 units of graduate course work must be completed prior to the degree being granted. Thesis Requirement: The student is required to complete a thesis portfolio consisting of four theatre projects: (1) a full-length original play, (2) a full-length original play or an adaptation, (3) a full-length screenplay, (4) a project that is either a play of any length, or a short subject or feature length script, a set of television speculative scripts (either in three half-hour short form of drama from the same TV program or a set of characters; or one-hour long form) or an interdisciplinary/multimedia project (approved in advance by the dramatic writing faculty.) An oral defense and review by program faculty and the developing portfolio is required when the student has completed two-thirds of the program, generally in the fall term of the student's third year.

USC Rossier School of Education

The USC Rossier School of Education is one of the world's premier centers for the study of urban education. The school is committed to preparing teachers, researchers, counselors, administrators and curricular specialists for leadership positions. The mission of the USC Rossier School of Education is to improve learning in urban education locally, nationally and globally. Urban areas often face challenges associated with equity and access, poverty, density, mobility and immigration, environmental degradation and strained social conditions around housing, health care and crime. Urban education takes place in many contexts including pre-kindergarten through high school, human services, higher education and workplace settings.

We seek to transform urban education by:

• Leading the search for innovative, efficacious and just solutions by engaging in collaborative translational research.
• Preparing and developing educational leaders who are change agents committed to urban education and who possess the competencies needed to address complex educational and social issues.
• Creating mutually beneficial partnerships to ensure our work is field-based and incorporates a diversity of perspectives and experiences.

Our vision is a world where every student, regardless of personal circumstance, is able to learn and succeed. We believe that USC Rossier, as a top-tier research institution,
has the responsibility and the ability to train the education leaders and to develop the innovative practices inclusive of equity and access that will help realize this vision.

The Rossier School of Education is committed to our four academic themes of leadership, diversity, learning and accountability that guide all academic, research and service efforts within our school.

The USC Rossier Commitment
At USC Rossier, we stand by our students and graduates. From our classrooms to your career, our commitment to your success is unwavering. We prepare our graduates to be change agents, and equip them with the critical thinking and problem-solving skills necessary to assess challenges and implement creative solutions. If at any point in your career you’re faced with an issue in which you could benefit from the professional guidance of our expert faculty, we encourage you to take advantage of the USC Rossier Commitment. A dedicated team of faculty members will work with you to identify the issue and develop a strategic plan of action to facilitate your success.

Associate Professors of Clinical Education: Shafiqa Ahmadi, JD; Paula Carbone, PhD; Ruth Gim Chung, PhD; Jennifer Crawford, PhD; Robert Filback, PhD; Frederick W. Freking, PhD; Alan G. Green, PhD; Angela Hasan, PhD; Kimberly Hribayashi, PhD; Emmy Min, PhD; John Pascarella, PhD; Helena Seli, PhD; Tracy Poon Tambascia, EdD
Assistant Professors of Clinical Education: Lynne Goldfarb, PhD; Briana Hinga, PhD; Jamie Hoffmann, EdD; Artineh Samkian, EdD
Associate (Teaching) Professors of Clinical Education: Michael Genuzuk, PhD; Kimberly Ferrario, PhD; Corrine Hyde, EdD
Assistant (Teaching) Professor of Clinical Education: Monique Datta, EdD
Associate Research Professors: Zoe Corwin, PhD; Lindsey Malcom-Ray-Friaux, PhD
Research Assistant Professor: Yasemin Copur-Gencturk, PhD
Senior Lecturer: Kate O’Connor
Senior Fellow: Douglas Lynch, PhD
Emeritus Professors: Earl Carnes, PhD; Richard Clark, EdD; Myron H. Dembo, PhD; Mike Diamond, PhD (Marshall); Robert Ferris, EdD; Mabel E. Hayes, PhD; Edward J. Kazlauskas, PhD; Frederick Knirk, EdD; Steven Krashen, PhD; Johanna K. Lemlech, EdD; James Magary, PhD; Merle Marks, EdD; William G. Millington, EdD; William F. O’Neill, PhD; Donald E. Polkinghorn, PhD; William M. Rideout, Jr., PhD; Robert Rueda, PhD; Audrey J. Schwartz, EdD; Robert A. Smith, PhD; Eddie Williams, EdD; Kathleen Wulf, PhD
Emeritus Professor of Clinical Education: Stuart E. Gotthold, EdD; Dennis Hocevar, PhD
Emeritus Professor of Clinical Psychology: Rodney K. Goodyear, PhD
Stoops Dean and Cooper Chair Emeritus: Guilbert C. Hentschke, PhD
Emeritus Associate Professor of Clinical Education: William Maxwell, PhD
Research Professor Emeritus of Education: Allen Munro, PhD

Minor and Degree Programs
The Rossier School of Education offers the following degree programs: Master of Arts, Teaching; Master of Arts, Teaching: Teaching English to Speakers of Other Languages; Master of Education, Teacher Leadership; Master of Education, Educational Counseling; Master of Education, Learning Design and Technology; Master of Education, Postsecondary Administration and Student Affairs; Master of Education, School Counseling; Master of Education, School Leadership; Master of Marriage and Family Therapy; Doctor of Education/Master of Business Administration (EdD/MB); Doctor of Education (EdD); Organizational Change and Leadership (EdD); Global Executive (EdD); and Doctor of Philosophy (PhD) in Urban Education Policy.
The Rossier School of Education also offers minors in Education and Society, The Dynamics of Early Childhood, and Teaching English to Speakers of Other Languages (TESOL).

**Graduate Degrees**

**Admission**

Applicants for admission to graduate degree programs must have a bachelor's degree or its equivalent from an accredited institution. Admission to graduate programs in the Rossier School of Education is highly selective and competitive. A grade point average of 3.0 (A = 4.0) is usually expected as well as satisfactory scores on the Graduate Record Examinations (GRE) General Test for select programs as well as letters of recommendation. Specific prior degree, testing, and recommendation requirements vary by program. For specific information on admission and application procedures, contact the Office of Admissions and Scholarship, (213) 740-0224 or info@rossier.usc.edu. For more details on how to apply, please visit: rossier.usc.edu/admissions/

**Satisfactory Academic Progress**

Students must maintain a grade point average of 3.0 (A = 4.0) or better to stay in good academic standing. Consistent with USC's overall policies for graduate students, factors other than satisfactory grades may also be taken into consideration in decisions regarding a student's continuation in a graduate degree program. These factors include satisfactory performance in fieldwork or credentialing requirements, or meeting program-defined professional standards, which are communicated to students at the beginning of the program.

Students who do not earn or maintain a 3.0 (A = 4.0) grade point average in an academic term will be given an academic warning in the following term. Students may also be given an academic warning if they have not fulfilled non-GPA related requirements, as defined by their degree program. The academic warning provides notification that the student is subject to dismissal. A student who is not in good academic standing is subject to dismissal, and may be dismissed from a program whenever, in the judgment of the associate dean for academic programs and the program director of the program in question, it is unlikely that the student will successfully complete his or her program.

**Time Limit for Degree Completion**

The time limit for completing a master's degree is five years. The time limit for completing a doctoral degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the doctorate, the time limit for completion is six years. The time limit begins with the first course at USC applied toward a specified degree and ends the semester during which all requirements are met.

A primary consideration of the setting of time limits is the currency of the course work and research with respect to the date the degree is to be conferred. Equally important is the concern that the faculty members serving as advisers or committee members be available to the student for the duration of graduate studies at USC. Occasionally a student finds it impossible to comply with prescribed time limits for completion of a degree. If a significant delay is likely to occur, the student must make arrangements in advance by petitioning for an extension of time. Such petitions will be considered when there is clear justification based on sound academic or critical personal reasons. An academic department may grant an extension of up to one year at a time for a maximum of two years.

**Doctoral Degrees**

The Rossier School of Education offers the Doctor of Philosophy in Urban Education Policy (PhD) and the Doctor of Education (EdD). Both doctoral programs place strong emphasis on the acquisition of inquiry skills and on the collaborative and interdisciplinary study of issues mutually engaging to both students and the Rossier School of Education faculty members. Both degrees emphasize the acquisition of appropriate research and inquiry skills, but the application of these skills is expected to differ. The EdD student is trained to use inquiry skills to solve contemporary problems, while the PhD student is trained to contribute to the general and theoretical knowledge about educational issues. The EdD is administered by the Rossier School of Education; the PhD is administered by the Graduate School. PhD students must also consult The Graduate School section of this catalogue for regulations and requirements pertaining to the degree.

**Credential Programs**

A credential is a license issued by the California Commission on Teacher Credentialing (CCTC) to persons wishing to legally teach or perform certain other professional services in California's public schools. USC is one of several institutions authorized to recommend qualified persons to the CCTC for receipt of credentials. There are two categories of credentials offered in the Rossier School: teaching and service. Requirements for these credentials may be obtained by calling the appropriate phone number listed below. Credential requirements may change due to state law. Students are advised to consult periodically with the Rossier School of Education for current credential requirements.

**Teaching Credentials**

California has a two-tier credential structure. A five-year preliminary credential is the first credential issued after an individual meets basic credential requirements. A clear credential is issued when all credential requirements have been completed. Upon successful completion of the MAT program candidates are recommended for a Preliminary credential. Internships and Induction programs that lead to clear credentials are currently satisfied under the purview of your district of employment. Multiple Subject Teaching (MST) authorizes the holder to teach in a self-contained classroom such as the classrooms in most elementary schools. A teacher authorized for multiple subject instruction may be assigned to teach in any self-contained classroom (preschool, grades K–12 or many subjects within a self-contained classroom). This classroom situation is generally found in preschool and elementary grades or in classes organized primarily for adults. In addition, the holder of a Multiple Subject Teaching Credential may serve in a core or team teaching setting. Single Subject Teaching (SST) authorizes the holder to teach a specific subject(s) named on the credential in...
Prospective Washington state students are advised to contact the Office of the Superintendent of Public Instruction at (360) 725-6320 or profed@k12.wa.us to determine whether this education program is approved for teacher certification or endorsements in Washington state. In addition, teachers are advised to contact their individual school district as to whether this program may qualify for salary advancement.

**Missouri**

USC is approved by the Missouri Coordinating Board for Higher Education to deliver its online program to residents.

**Tennessee**

USC is authorized by the Tennessee Higher Education Commission. This authorization must be renewed each year and is based on an evaluation by minimum standards concerning quality of education, ethical business practices, health and safety, and fiscal responsibility.

If a complaint is not settled at the institutional level, the student may contact the Tennessee Higher Education Commission, Nashville, TN 37243-0830, (615) 741-5293. If the institution uses a mediation clause in its enrollment agreement, the catalogue must describe the steps required of the student and/or the institution to initiate the mediation process.

For inquiries, contact the MAT@USC office at (213) 743-2127.

**Services Credentials**

The Administrative Services Credential authorizes the holder to provide a variety of services in grades 12 and below, including preschool, and in classes organized primarily for adults. USC recommends candidates for the Preliminary Administrative Services Credential. This credential is offered through the School Leadership Academy. For more information please contact professional.development@rossier.usc.edu.

The Clear Pupil Personnel Services Credential: Candidates in the Master's Degree in Social Work program have the option to earn a Clear Pupil Personnel Services Credential, which authorizes the holder to provide both of the following services:

- **School Child Welfare and Attendance** in grades 12 and below, including preschool, and in programs organized primarily for adults: access appropriate services from both public and private providers, including law enforcement and social services; provide staff development to school personnel regarding state and federal laws pertaining to due process and child welfare and attendance laws; address school policies and procedures that inhibit academic success; implement strategies to improve student attendance; participate in school-wide reform efforts; and promote understanding and appreciation of those factors that affect the attendance of culturally diverse student populations.

- **School Social Work** in grades 12 and below, including preschool, and in programs organized primarily for adults: assess home, school, personal and community factors that may affect a student's learning; identify and provide intervention
strategies for children and their families, including counseling, case management, and crisis intervention; consult with teachers, administrators and other school staff regarding social and emotional needs of students; and coordinate family, school and community resources on behalf of students.

For inquiries, contact the USC School of Social Work at 1.877.700.4MSW (1.877.700.4679)

Special Programs
Professional Development
The Office for Professional Development offers a variety of non-degree and certificate programs for aspiring and current professional educators in both fully customized and open enrollment programs.

Areas of expertise include English Language Development; Literacy; Differentiated Curriculum; Gifted Education; School District Leadership Development; and School Business Management.

Certificate programs are offered in online, face to face and blended formats and include: The Reading Certificate, Differentiated Curriculum for Gifted and High-Ability Learners, Differentiating the Common Core State Standards, School Business Management, and an Equity Educators Certificate. In addition we offer two credential programs: Induction for New Teachers and Preliminary Administrative Credential.

Professional Development also offers the in-person Summer Gifted Institute and Teacher Demonstration School and the Secondary Writing Instruction Institute.

The office also offers national programs customized specifically for districts, including coaching, classroom demonstration, curriculum instruction and consultation responding to standards (Common Core, NGSS, ELD, VAPA) and International Teacher Training Institutes customized for student teachers, faculty, administrators and scholars seeking immersion in an American education environment.

For further information, contact the Office of Professional Development at (213) 740-8536.

Minor
Education and Society Minor
The education and society minor seeks to examine education and its role in society. The minor is intended to help students develop broad perspectives on the purposes and forms of education and schooling, including the purpose and history of schooling; the provision of equitable opportunities for all; the factors impacting teaching, learning and achievement; and the development of engaged citizenship for more just societies through education. Students enrolled in this minor will gain multiple perspectives on education locally, nationally and internationally, including technology's role in educational outcomes. The minor provides resources for students who may want to pursue careers in education after graduation — teaching, educational advocacy through nonprofits or non-governmental organizations, university research, policymaking or educational entrepreneurship.

Upper-Division Requirements

- EDUC 421 Global Issues: Impact on Educational Outcomes Units: 4
- EDUC 422 Social Change, Difference and Access to Schooling Units: 4
- EDUC 423 Unrealized Promise and Hope for Education in 21st Century Units: 4
- EDUC 426 Educational Inquiry Units: 4

Teaching English to Speakers of Other Languages (TESOL) Minor
The Rossier School of Education offers an interdisciplinary minor in Teaching English to Speakers of Other Languages (TESOL). This minor is targeted to those undergraduates who wish to gain expertise in the field of English as a Second Language (ESL) or English as a Foreign Language (EFL) teaching. The minor in TESOL also prepares students for short- and long-term careers in ESL and EFL teaching in both U.S. and international contexts.

While students can combine the TESOL courses with any major, the curriculum will particularly benefit students in linguistics, English, foreign languages, communication, international studies and other related fields. However, with its emphasis on language and culture, as well as its focus on effective teaching and inquiry, the minor in TESOL will complement almost any field of study.

Units required to complete minor: 16

Upper-Division Requirements (12 Units)

- EDUC 411 Foundation of TESOL Units: 4
- EDUC 412 Instructional Methods in TESOL Units: 4
- EDUC 426 Educational Inquiry Units: 4

Required Elective Course (4 Units)
At least one of the following upper-division courses needs to be completed:

- LING 375 Sociolinguistics Units: 4 *
- LING 405 Child Language Acquisition Units: 4
- LING 410 Second Language Acquisition Units: 4 *

- EDUC 421 Global Issues: Impact on Educational Outcomes Units: 4
- EDUC 422 Social Change, Difference and Access to Schooling Units: 4
- EDUC 423 Unrealized Promise and Hope for Education in 21st Century Units: 4

Note:

*LING 210 is a prerequisite for LING 375 and LING 410 .

Please contact the program office with any questions at nelsonmm@rossier.usc.edu.
The Dynamics of Early Childhood Minor

The Dynamics of Early Childhood minor is intended to facilitate students' understanding of the historical implications that guide what we know and how we use the information we know related to the development of young children. The noted ideologies of theorists such as Dewey, Froebel, Pestalozzi and others will be examined from the perspectives of professions such as journalist, cinematographer, sociologist and psychologist. The effects of sources of entertainment such as children's books, films and television programs as well as consumer products such as toys will be studied in order to determine the "power" and effects they have on our developmental understandings and designs of educational needs for young children. Students will be encouraged to pursue a self-selected investigation of early childhood in order to be able to contribute as a professional, a family member, and an educator to address the roles and importance of young children in our society.

Four-Course Program:

- EDUC 427 Vectors that Influence Early Childhood Development Units: 4
- EDUC 428 The Effects of Curriculum and Institution on Early Childhood Units: 4
- EDUC 429 Early Childhood and Contemporary Society Units: 4
- EDUC 430 Early Childhood: Action Research Focus Units: 4

Master's Degree

Alternative Certification Master of Arts in Teaching, Single Subject

The Alternative Certification Master of Arts in Teaching is designed for individuals who wish to complete requirements for a California preliminary teaching credential while teaching full-time in an approved K-12 school district. Two programs are available: Multiple Subject and Single Subject. The Multiple Subject and Single Subject emphases are available online.

Required Courses

Core Courses

- EDUC 501 Instruction for Teaching English as a New Language Units: 3
- EDUC 518 Application of Theories of Learning to Classroom Practice Units: 3
- EDUC 519 Human Differences Units: 3
- EDUC 550 Multimedia Literacy Units: 3
- EDUC 597 K-12 Teaching and Learning in Context Units: 2
- EDUC 598a Coached Practice Units: 2
- EDUC 598b Coached Practice Units: 2
- EDUC 598c Coached Practice Units: 3

Concentration Courses (Select one from the following):

- EDUC 502a Teaching Science in Secondary Classrooms Units: 3, 4
- EDUC 502b Teaching Science in Secondary Classrooms Units: 3, 4
- EDUC 509a Teaching Mathematics in Secondary Classrooms Units: 3, 4
- EDUC 509b Teaching Mathematics in Secondary Classrooms Units: 3, 4
- EDUC 513a Teaching English Language Arts in Secondary Classrooms Units: 3, 4
- EDUC 513b Teaching English Language Arts in Secondary Classrooms Units: 3, 4
- EDUC 541a Teaching Social Studies in Secondary Classrooms Units: 3
- EDUC 541b Teaching Social Studies in Secondary Classrooms Units: 3

Single Subject Elective (Select one of the following):

- EDUC 504 Foundations of Literacy Development and Instruction Units: 2
EDUC 505 Integrating Literacy in Secondary Content Instruction Units: 2

Educational Counseling (MEd)
The Master of Education degree in Educational Counseling is designed for individuals seeking a career or advancement opportunities in postsecondary education as an academic or outreach counselor. The degree includes a theoretical and practical background in student affairs and counseling. The program meets current requirements for postsecondary counseling positions in the California state system, particularly for those who wish to work in the public community college system. A minimum of 48 units is required.

Required Courses
- EDCO 503 Ethical and Legal Issues in Counseling Units: 3
- EDCO 541 Theories in Counseling Units: 3
- EDHP 500 Foundations of Higher, Adult, and Professional Education Units: 3
- EDHP 552 The Politics of Difference Units: 3
- EDHP 563 Student Affairs Work in College Units: 3
- EDHP 580 The Community College Units: 3
- EDHP 587 Fieldwork in Higher, Adult, and Professional Education Units: 1, 2, 3, 4, 5, 6, 7, 8 (3 Units Required)
- EDHP 593a Master's Seminar Units: 2 and
- EDHP 593b Master's Seminar Units: 2 or
- EDHP 594a Master's Thesis Units: 2 and
- EDHP 594b Master's Thesis Units: 2
- EDHP 687 Student Development in Higher Education Units: 3
- EDPT 502 Learning and Individual Differences Units: 3
- EDUC 500 The Counseling Process Units: 3
- EDUC 508 Creating Communities of Interest Units: 2
- EDUC 547 Career Development: Theory and Process Units: 3
- EDUC 570 Research Methods and Data Analysis Units: 3
- EDUC 609 Academic Advising in Postsecondary Education Units: 3
- EDUC 637 Group Counseling: Theory and Process Units: 3

Learning Design and Technology (MEd)
The Master's in Learning Design and Technology program is designed for people who want to significantly improve learning and performance outcomes within their organization. Graduates will be prepared to design, implement, and evaluate learning environments and outcomes for various formal (e.g., K-12 and higher education), non-formal (e.g., corporate, military and government organizations) and informal settings (e.g., museums, science centers and public spaces). The program draws from learning and motivation research, as well as knowledge of how to leverage technology, to design face-to-face, technology-enabled, and blended learning experiences. Through the project-based capstone, students will gain practical experience by designing a learning experience or evaluating an existing learning design. The program consists of 30 units and is delivered online only.

Required Courses
- EDUC 508 Creating Communities of Interest Units: 2
- EDUC 503 Learning and Motivation Units: 3
- EDUC 589 Human Lifespan Development Units: 3
- EDUC 591 Diversity: Power, Equity and Inclusion Units: 3
- EDUC 570 Research Methods and Data Analysis Units: 3
- EDUC 582 Assessment and Evaluation Units: 2
- EDUC 595 Instructional Design Units: 3
- EDUC 579 Media Selection and Evaluation Units: 2
- EDUC 586 Design of Learning Environments Units: 3
- EDUC 587 Master's Studio A Units: 2
- EDUC 588 Master's Studio B Units: 4

Marriage and Family Therapy (MMFT)
The program for the Master of Marriage and Family Therapy is offered for those students seeking to prepare for the practice of marriage and family therapy. Students who complete this specialized professional degree program and who fulfill the additional state-mandated requirements are eligible for the State of California's Marriage and Family Therapy license. A minimum of 60 units is required.

Required Courses
- EDCO 541 Theories in Counseling Units: 3
- EDUC 500 The Counseling Process Units: 3
- EDUC 507 Professional Identity, Law and Ethics for Counselors Units: 3
- EDUC 508 Creating Communities of Interest Units: 2
- EDUC 515 Theories of Marriage and Family Therapy Units: 3
- EDUC 544 Measurement Procedures for Counselors Units: 3
- EDUC 546 Psychopathology for Marriage and Family Therapy Units: 3
- EDUC 547 Career Development: Theory and Process Units: 3
• EDUC 553 Psychopharmacology and the Effects of Substance Abuse Units: 3
• EDUC 570 Research Methods and Data Analysis Units: 3
• EDUC 583 Counseling through the Lifespan Units: 3
• EDUC 633 Child and Elder Abuse and Domestic Violence Units: 2
• EDUC 634 Couples Counseling Units: 3
• EDUC 635 Psychotherapy with Children and Adolescents Units: 3
• EDUC 636 Perspectives on Human Sexuality Units: 3
• EDUC 637 Group Counseling: Theory and Process Units: 3
• EDUC 638 Cross-Cultural Counseling: Research and Practice Units: 3
• EDUC 644 Practicum in Counseling Units: 3
• EDUC 645a Fieldwork in Counseling Units: 3
• EDUC 645b Fieldwork in Counseling Units: 3
• EDUC 646a Marriage and Family Therapy Capstone: Leadership Project Units: 1
• EDUC 646b Marriage and Family Therapy Capstone: Leadership Project Units: 1

Additional course work for the Bilingual Authorization:
• EDUC 558 Culture Learning in Schools: Latino Units: 3

Multiple Subject
• EDUC 504 Foundations of Literacy Development and Instruction Units: 2
• EDUC 551 Teaching Physical Education Units: 1
• EDUC 554 Visual and Performing Arts in Elementary Subjects Units: 2
• EDUC 556 Integrating English Language Arts and Social Studies Units: 5
• EDUC 566 Teaching Mathematics and Science Units: 4

Single Subject
• EDUC 505 Integrating Literacy in Secondary Content Instruction Units: 2
• EDUC 506 New Media Literacies in High Needs Schools Units: 2
• Additional course work in the subject matter area to be approved by the subject area faculty lead Units: 3

Select one of the following:
• EDUC 502a Teaching Science in Secondary Classrooms Units: 3, 4
• EDUC 502b Teaching Science in Secondary Classrooms Units: 3, 4
• EDUC 509a Teaching Mathematics in Secondary Classrooms Units: 3, 4
• EDUC 509b Teaching Mathematics in Secondary Classrooms Units: 3, 4
• EDUC 513a Teaching English Language Arts in Secondary Classrooms Units: 3, 4
• EDUC 513b Teaching English Language Arts in Secondary Classrooms Units: 3, 4
• EDUC 541a Teaching Social Studies in Secondary Classrooms Units: 3

Multiple Subject, Single Subject and Single Subject (Music Education) (MAT)
The Master of Arts in Teaching is designed for individuals who wish to complete requirements for a California preliminary teaching credential or to strengthen their ability to facilitate learning for all students in a K–12 environment (non-credential). Three programs are available: Multiple Subject, Single Subject and Single Subject (Music Education).

Multiple Subject
The MAT Multiple Subject is designed for those interested in teaching at the elementary level. The non-credential option requires a minimum of 30 units; the credential option requires a minimum of 32 units.

Single Subject
The MAT Single Subject is designed for those interested in teaching at the secondary level. The emphasis offers specializations in English, science (biological sciences, chemistry, geoscience or physics), mathematics and social science. The non-credential option requires a minimum of 30 units; the credential option requires a minimum of 32 units.

Single Subject (Music Education)
The MAT Single Subject (Music Education) offers two tracks: choral/general and instrumental. A minimum of 35 units is required. The Multiple Subject and Single Subject emphases are available online.

Core Courses
• EDUC 541b Teaching Social Studies in Secondary Classrooms Units: 3

Credential Track
• EDUC 568a Guided Practice Units: 3
• EDUC 568b Guided Practice Units: 3

Non-Credential Track
• EDUC 569a Capstone Portfolio in Learning and Instruction Units: 2
• EDUC 569b Capstone Portfolio in Learning and Instruction Units: 2

Single Subject (Music Education)
• EDUC 512 Reading and Writing Methods for Secondary Teaching Units: 2

Additional course work for Instrumental Track

Additional course work for Choral/General Track

Postsecondary Administration and Student Affairs (MEd)
The Master of Education, Postsecondary Administration and Student Affairs provides current and prospective professionals working in various capacities within two-year, four-year and professional postsecondary institutions with the theoretical foundation and practical applications to excel in a variety of higher education administrative and students services positions (academic advising and support services). Students will have an opportunity to develop an area of proficiency such as student affairs, athletic administration or academic advising. A minimum of 41 units of graduate-level course work is required.

Required Courses
• EDHP 500 Foundations of Higher, Adult, and Professional Education Units: 3
• EDHP 551 Applied Educational Ethnography Units: 3
• EDHP 552 The Politics of Difference Units: 3
• EDHP 563 Student Affairs Work in College Units: 3
• EDHP 587 Fieldwork in Higher, Adult, and Professional Education Units: 1, 2, 3, 4, 5, 6, 7, 8 (3 Units Required)
• EDHP 594a Master’s Thesis Units: 2 and
• EDHP 594b Master's Thesis Units: 2
or
• EDUC 616 Higher Education Seminar Units: 3
• EDHP 657 Management of Student Services in Higher Education Units: 3
• EDHP 679 Legal Issues in the Administration of Higher Education Units: 3
• EDHP 687 Student Development in Higher Education Units: 3
• EDUC 508 Creating Communities of Interest Units: 2
• EDUC 570 Research Methods and Data Analysis Units: 3
• Approved electives Units: 9

School Counseling (MED)
The Master of Education, School Counseling is geared toward socially responsible individuals who are aware that many of the issues pupils confront have societal origins. Designed to prepare educators interested in becoming school counselors in grades pre-K through grade 12, successful candidates will obtain the Master of Education, School Counseling degree along with USC recommendation for the Pupil Personnel Services School Counseling Credential. Forty-nine units of course work, 100 clock hours in a practicum experience and 600 clock hours of supervised field experience are required.

Required Courses
• EDCO 503 Ethical and Legal Issues in Counseling Units: 3
• EDCO 505 Counseling and Collaborative Consultation in the School Setting Units: 3
• EDCO 541 Theories in Counseling Units: 3
• EDCO 574 School Counseling Practicum Units: 1, 2 (2 Units Required)
• EDCO 575 School Counseling Field Experience Units: 1, 2, 3, 4 (4 Units Required)
• EDUC 500 The Counseling Process Units: 3
• EDUC 508 Creating Communities of Interest Units: 2
• EDUC 511 Introduction to Counseling Units: 3
• EDUC 520 Counseling for College and Career Readiness I Units: 2
• EDUC 570 Research Methods and Data Analysis Units: 3
• EDUC 600 Counseling for College and Career Readiness II Units: 2
• EDUC 607 Role of School Counselors in Student Learning and Motivation Units: 3
• EDUC 608 School Connectedness, Climate, and Classroom Management Units: 2
• EDUC 612 Application of Human Development Theory in School Counseling Units: 3
• EDUC 618 School Counseling Professional Portfolio Units: 2
• EDUC 621 Measurement and Evaluation for School Counselors Units: 3
• EDUC 637 Group Counseling: Theory and Process Units: 3
• EDUC 638 Cross-Cultural Counseling: Research and Practice Units: 3

School Leadership (MEd)
School leadership matters. The Master of Education in School Leadership will prepare educational leaders with the knowledge and skills to lead effectively in urban school settings and to accelerate student achievement. Graduates will demonstrate that they can create a high achievement school culture and solve complex performance problems in K–12 schools by being able to advocate for a shared community-driven vision; create a high performance school culture and educational goals; collect data to diagnose causes of achievement gaps; plan appropriate research-based solutions; gather and manage resources; effectively communicate the plan to school administration, faculty, staff and community; and provide support for implementing, monitoring and evaluating progress toward achieving school improvement. All courses are taught through field-based experiences where problems are solved in real work settings, applying research to practice. Students who graduate from the program will be ready to work within the constantly evolving educational landscape of California and other states. A national trip is integrated into the program's curriculum. The program is open to teachers, counselors, psychologists and other school-based personnel who have worked for a minimum of two years in such positions. Two letters of recommendation are required. The program is only available online.

**Required Courses**

- EDUC 508 Creating Communities of Interest Units: 2
- EDUC 533 School Leadership: Theory and Practice Units: 3
- EDUC 537 Leading with the Community and Culture in Context Units: 3
- EDUC 538 Entrepreneurial School Leadership Units: 2
- EDUC 548 Data-Driven Leadership for Schools Units: 3
- EDUC 549 Supervising Instruction for Optimal Learning Units: 3
- EDUC 570 Research Methods and Data Analysis Units: 3
- EDUC 604 National Perspective on School Leadership Units: 1
- EDUC 641 Human Capital and School Organization Units: 3
- EDUC 643 Advancing Community Support through Social Media Units: 2
- EDUC 647 School Leadership Seminar Units: 2
- EDUC 648a Apprenticeship in School Administration and Leadership Units: 2
- EDUC 648b Apprenticeship in School Administration and Leadership Units: 2

**Teacher Leadership (MED)**

The Master of Education in Teacher Leadership provides current teachers with an in-depth exposure to pedagogy and teacher leadership development. The curriculum is designed to challenge experienced teachers to utilize technology in student-centered ways to improve learning outcomes, provide access to advanced interdisciplinary pedagogical practice, develop their capacity to initiate leadership with peers around improving instruction, and increase their understanding of successful instruction for learners with diverse needs. Applicants to the program should have significant teaching experience. Public school teachers must hold a current teaching credential; private school teachers without a credential must be able to demonstrate at least three years of full-time teaching experience. Two letters of recommendation are required.

There are four areas of concentration in the Teacher Leadership program:

1. Differing Abilities, which focuses on understanding the range of learner needs in today's classroom;
2. Education Specialist Credential, for graduates of the Rossier MAT program seeking to add a Mild/Moderate Disabilities authorization;
3. Secondary Curriculum concentration provides Social Studies and English teachers with methods for integrating the arts, literacy and civics; and
4. Teaching Science, Technology, Engineering, and Mathematics (STEM) provides an opportunity for teachers to foster and engage in an advanced, interdisciplinary study of instruction in STEM.

**Degree Requirements**

The Teacher Leadership program requires a minimum of 32 units including required core courses and completion of a concentration area.

**Required Core**

- EDUC 506 New Media Literacies in High Needs Schools Units: 2
- EDUC 516 Framing the Social Context of High Needs Schools Units: 3
- EDUC 518 Application of Theories of Learning to Classroom Practice Units: 3
- EDUC 529 Political and Academic Issues Affecting Gifted Students Units: 3
- EDUC 550 Multimedia Literacy Units: 3
- EDUC 564 Teacher Leadership Units: 2
- EDUC 569a Capstone Portfolio in Learning and Instruction Units: 2
- EDUC 569b Capstone Portfolio in Learning and Instruction Units: 2
- EDUC 573 Introduction to Special Education Units: 3

**Concentration Areas**

Students select a concentration area from one of the following:

**Differing Abilities**

- EDUC 530 Differentiated Curriculum and Pedagogy for Gifted Students Units: 3
- EDUC 575 Assessment and Curriculum for Students with Disabilities Units: 3
- EDUC 576 Establishing and Maintaining an Effective Classroom Ecology Units: 3

**Education Specialist Credential**

- EDUC 530 Differentiated Curriculum and Pedagogy for Gifted Students Units: 3
• EDUC 574 Collaboration, Families and Case Management Units: 3
• EDUC 575 Assessment and Curriculum for Students with Disabilities Units: 3
• EDUC 576 Establishing and Maintaining an Effective Classroom Ecology Units: 3
• EDUC 577 Guided Practice: Mild/Moderate Disabilities Units: 3

The Secondary Curriculum
• EDUC 552 Literacies in the Content Area Units: 3
• EDUC 557 Civics Education Units: 3
• EDUC 578 Integrating the Arts into the Secondary Curriculum Units: 3

Teaching Science, Technology, Engineering, and Mathematics (STEM)
• EDUC 555 STEM Education in Secondary Classrooms Units: 3
• EDUC 559 Discourse Analysis and Technology in STEM Classrooms Units: 3
• EDUC 580 Transforming STEM Education into Teaching Science Units: 3

Teaching, Teaching English to Speakers of Other Languages (MAT)
The MAT, Teaching English to Speakers of Other Languages is designed to prepare aspiring English language teachers, domestic and international, to successfully provide instruction for children, youth or adults in the United States or abroad. This is a non-credential option. A minimum of 30 units is required. The program may be completed on campus or online.

Required Courses
• EDUC 510 Theories of Language Learning and Teaching Units: 3
• EDUC 521 Assessment and Instruction for Diverse English Learners Units: 3
• EDUC 534 TESOL Capstone Units: 4
• EDUC 561 TESOL Instruction and Methods of Teaching A Units: 3
• EDUC 562 Teaching English to Speakers of Other Languages Pedagogy II Units: 3
• EDUC 565a Social Foundations of TESOL Units: 2
• EDUC 565b Social Foundations of TESOL Units: 3
• EDUC 592a Applied Linguistics for TESOL Units: 3
• EDUC 592b Applied Linguistics for TESOL Units: 3
• EDUC 596 English Language Learning Design, Teaching and Technology Units: 3

University Certificate
Gifted Education Certificate

Aligned with USC Rossier’s mission to serve high-need students in urban centers, the Certificate in Gifted Education provides graduates of the Master of Arts in Teaching program with the competencies to respond to the needs, interests and abilities of gifted students in either heterogeneous regular classrooms or specific magnet school classrooms defined for gifted and high-ability students. The Certificate in Gifted Education enables graduates to recognize the manifestations of giftedness among cultural, linguistic and economically diverse students in urban schools, to facilitate the identification of underrepresented students as gifted and to provide differentially appropriate curriculum for them.

Internal Applicants Credential Track*

Required Courses
• EDUC 529 Political and Academic Issues Affecting Gifted Students Units: 3
• EDUC 530 Differentiated Curriculum and Pedagogy for Gifted Students Units: 3

Credential Track
• EDUC 568a Guided Practice Units: 3
• EDUC 568b Guided Practice Units: 3

Internal Applicants Non-Credential Track*

Required Courses
• EDUC 529 Political and Academic Issues Affecting Gifted Students Units: 3
• EDUC 530 Differentiated Curriculum and Pedagogy for Gifted Students Units: 3

Non-Credential Track
• EDUC 550 Multimedia Literacy Units: 3
• EDUC 569a Capstone Portfolio in Learning and Instruction Units: 2
• EDUC 569b Capstone Portfolio in Learning and Instruction Units: 2

External Applicants**

Required Courses
• EDUC 529 Political and Academic Issues Affecting Gifted Students Units: 3
• EDUC 530 Differentiated Curriculum and Pedagogy for Gifted Students Units: 3
• EDUC 550 Multimedia Literacy Units: 3
• EDUC 569a Capstone Portfolio in Learning and Instruction Units: 2
• EDUC 569b Capstone Portfolio in Learning and Instruction Units: 2
• EDUC 574 Collaboration, Families and Case Management Units: 3

Note:
*Internal Applicants are students enrolled in the MAT Program
**External Applicants are students not admitted to USC or enrolled in the MAT Program who wish to complete the certificate.**

**School Counseling Certificate**
The School Counseling Certificate program is designed for students enrolled in the Master of Marriage and Family Therapy (MMFT) program who wish to complete additional requirements to earn USC recommendation for a Pupil Personnel Services: School Counseling Credential.

Application information is available in the Master's Program Office.

**Required Courses**
- EDCO 505 Counseling and Collaborative Consultation in the School Setting Units: 3
- EDCO 574 School Counseling Practicum Units: 1, 2
- EDCO 575 School Counseling Field Experience Units: 1, 2, 3, 4 (4 Units Required)
- EDUC 511 Introduction to Counseling Units: 3
- EDUC 520 Counseling for College and Career Readiness I Units: 2
- EDUC 600 Counseling for College and Career Readiness II Units: 2
- EDUC 607 Role of School Counselors in Student Learning and Motivation Units: 3
- EDUC 608 School Connectedness, Climate, and Classroom Management Units: 2
- EDUC 618 School Counseling Professional Portfolio Units: 2
- EDUC 621 Measurement and Evaluation for School Counselors Units: 3

**Special Education Certificate**
The Certificate in Special Education provides graduates of the Rossier School of Education with the competencies to respond to the needs, interests and abilities of special needs students in either regular classrooms or specific school classrooms defined for students with documented learning differences. It widens the range of the graduates’ knowledge about teaching and learning allowing them to compete in the contemporary professional marketplace. A certificate in special education is mandatory in some states, and in other states, it is a criterion for consideration to teach special needs students in any type of learning environment. The certificate may be completed concurrently with requirements for the MAT or the ME in Teacher Leadership. It is also available online.

**Required Courses**
- EDUC 537 Introduction to Special Education Units: 3
- EDUC 574 Collaboration, Families and Case Management Units: 3
- EDUC 575 Assessment and Curriculum for Students with Disabilities Units: 3
- EDUC 576 Establishing and Maintaining an Effective Classroom Ecology Units: 3
- EDUC 577 Guided Practice: Mild/Moderate Disabilities Units: 3

**STEM Education Certificate**
Aligned with the Rossier School of Education mission to serve the changing landscape of high needs and urban school districts, two STEM certificate programs are available to strengthen the instructional skills of novice and current teachers at the elementary or secondary level, so that they can have a positive impact on student learning in mathematics and the sciences. Both certificates widen graduates’ knowledge about teaching and learning in order to compete in the contemporary professional marketplace.

Applicants must be currently enrolled in the MAT, M.E. in Teacher Leadership or capstone option of the MAT, or have a prior Master of Teaching degree and demonstrate three years of teaching experience.

**Certificate in Elementary STEM Education (Internal Applicants)**

**Required Courses**
- EDUC 550 Multimedia Literacy Units: 3
- EDUC 581 STEM Education from a Project-Based Learning Approach Units: 3
- EDUC 584 Facilitating Creativity and Innovation in STEM Classrooms Units: 3
- EDUC 585 Action Research Project Units: 3

**Certificate in Elementary STEM Education (External Applicants)**

**Required Courses**
- EDUC 550 Multimedia Literacy Units: 3
- EDUC 569a Capstone Portfolio in Learning and Instruction Units: 2
- EDUC 569b Capstone Portfolio in Learning and Instruction Units: 2
- EDUC 581 STEM Education from a Project-Based Learning Approach Units: 3
- EDUC 584 Facilitating Creativity and Innovation in STEM Classrooms Units: 3
- EDUC 585 Action Research Project Units: 3

**Certificate in Secondary STEM Education (Internal Applicants)**

**Required Courses**
- EDUC 550 Multimedia Literacy Units: 3
- EDUC 555 STEM Education in Secondary Classrooms Units: 3
- EDUC 559 Discourse Analysis and Technology in STEM Classrooms Units: 3
- EDUC 580 Transforming STEM Education into Teaching Science Units: 3

**Certificate in Secondary STEM Education (External Applicants)**

**Required Courses**
The Doctor of Education (EdD) is a three-year degree program that equips practitioner-scholars with the skills needed to lead high-performing organizations, connect research with practice and help all students to learn. The program is geared toward working professionals who aspire to be leaders in urban education. Admission requires a master's degree and a minimum of three years of work experience in a related field.

**Preliminary Review**

The EdD preliminary review must be passed before the student has completed more than 21 units. Passing the preliminary review is prerequisite to continuing in the program.

**Advisement Committee**

The student selects a three-member advisement committee in consultation with the adviser upon applying to take the qualifying examination. The committee chair must have a full-time appointment in the Rossier School of Education. One member of the committee may be a faculty member elsewhere or a full-time professional educator holding a doctorate and with strength in the area of the dissertation topic, if nominated by the committee chair and approved by the director of the EdD program.

**Areas of Concentration**

There are four areas from which students must select a specialization: K–12 Leadership in Urban School Settings, Educational Psychology, Higher Education Administration and Teacher Education in Multicultural Societies.

**Unit Requirement**

The EdD requires completion of 60 units of course work. A maximum of 4 dissertation units (794 Doctoral Dissertation) may be applied toward the degree. Students admitted with Advanced Standing complete a minimum of 43 units.

**Core Program**

EdD students are required to complete 13 units of core course work:

- EDUC 605 Framing Educational Leadership
  Units: 1
- EDUC 522 Challenges in Urban Education: Accountability
  Units: 3
- EDUC 523 Challenges in Urban Education: Diversity
  Units: 3
- EDUC 524 Challenges in Urban Education: Leadership
  Units: 3
- EDUC 525 Challenges in Urban Education: Learning
  Units: 3

**Additional Information**

**Methods**

All EdD students must complete EDUC 532 Inquiry Methods I and EDUC 536 Inquiry Methods II for a total of 6 units.

**Research**

Students must complete 6 units of research course work (EDUC 792 Critique of Research in Education and EDUC 790 Research).

**Electives**

In consultation with assigned advisers, students take 14 units of elective course work.

**Admission to Candidacy**

Admission to candidacy is a formal action taken by the faculty of the Rossier School of Education. That action is based upon passing the qualifying examination.

**Doctoral Dissertation**

A dissertation based upon original research is required. An acceptable dissertation must show technical mastery of a special field, capacity for independent research and scholarly ability. The student must be enrolled in 794 Doctoral Dissertation each fall and spring semester after admission to candidacy until the dissertation has been approved. A minimum of two semesters (4 units) is required. Enrollment...
in 794 prior to admission to candidacy is not permitted and such registration is invalid.

**Global Executive (EdD)**

The Global Executive EdD prepares tomorrow's transformational educational leaders, policy makers, administrators and change agents for their challenging task of improving individual and national educational outcomes. The curriculum is designed to enhance the professional experience of senior educational leaders and policy makers by:

- Increasing their understanding of global trends and the implications of those trends for their work;
- Challenging them to utilize evidence and theory-based approaches in problem solving;
- Developing their capacity to effectively use complex data in decision making; and
- Providing access to key leaders and leading education scholars.

The program will focus on achieving large-scale improvements across educational systems through strategic use of policy, innovative practice and assessment. The curriculum stresses the examination of educational solutions from around the world as participants work with their own, local challenges.

Classes are delivered in Los Angeles and international locations. The total units required for the degree is 60. A maximum of 4 project units (EDUC 764a, EDUC 764b, EDUC 764c, EDUC 764d, EDUC 764e) may be applied toward the degree. Students admitted with advanced standing complete a minimum of 50 units.

**Preliminary Review:**
The Global Executive EdD preliminary review must be passed before the student has completed more than 18 units. Passing the preliminary review is prerequisite to continuing in the program.

**Required Courses**

- EDUC 619 Framing Educational Leadership in a Global Context Units: 4
- EDUC 620 Fundamentals of Creativity, Innovation, and Entrepreneurship Units: 2
- EDUC 623 Understanding Research That Informs Leadership Units: 3
- EDUC 624 Educational Organizations: Governance and Finance I Units: 2
- EDUC 626 Fostering Entrepreneurship in Educational Systems Units: 2
- EDUC 627 Education Performance Problems: Role of Learning Units: 3
- EDUC 628 Educational Organizations: Governance and Finance II Units: 2
- EDUC 629 Consulting Practicum Context Analysis Units: 3
- EDUC 631 Locating Educational Performance Problems Units: 3
- EDUC 723 Evaluating and Assessing Educational System Outcomes Units: 3
- EDUC 724 Creating Policy Alternatives for Educational Settings Units: 3
- EDUC 725 Analyzing Organizational Change and Its Effectiveness Units: 3
- EDUC 726 Making Choices: Deciding Among Policy Alternatives Units: 3
- EDUC 727 Implementing Policy in Educational Systems Units: 3
- EDUC 728 Global Trends: Emerging Ideas, Emerging Markets Units: 3
- EDUC 729 Assessing Policy Impact in Educational Settings Units: 3
- EDUC 764a Consulting Project Units: 1
- EDUC 764b Consulting Project Units: 1
- EDUC 764c Consulting Project Units: 1
- EDUC 764d Consulting Project Units: 1
- EDUC 764e Consulting Project Units: 0
- EDUC 790 Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 (1 Unit Required)
- Additional course work to be approved by program faculty Units: 10

**Organizational Change and Leadership (EdD)**

The Education Doctorate in Organizational Change and Leadership is a three-year degree program that prepares current and future leaders to create conditions that foster continuous improvement in themselves and their organizations. It emphasizes how learning occurs informally and formally in workplaces and serves as a mechanism for change and innovation in organizations and systems. Arranged by four topical streams – problem solving, leadership, dispositions of leaders and reflection – the program seeks to attract a diverse student body of current and emerging leaders who are interested in fostering learning that leads to systemic improvement in their workplaces. The primary emphasis will be on those individuals who currently hold or are seeking leadership positions within colleges/universities, traditional and non-traditional K-12 environments, chief learning officers and their related human resources staff, non-profits and governmental organizations. The degree is not linked to the credentials typically needed to become an administrator in a K-12 environment, including becoming a principal or superintendent. The degree requires a minimum of 60 units. Students with a prior master's may enter with Advanced Standing, reducing their units to 43. It is delivered only online.

**Required Courses**

- EDUC 522 Challenges in Urban Education: Accountability Units: 3
- EDUC 523 Challenges in Urban Education: Diversity Units: 3
- EDUC 524 Challenges in Urban Education: Leadership Units: 3
that complex educational problems require a variety of systematic, programmatic, empirical investigation. Courses in this block provide the basic tools to pursue research in collaboration with students in other programs. Courses in this block permit students to consider applied available in the Rossier School of Education PhD program. Courses in this block are linked to two of the concentrations Concentration B Required Courses in the first year.

The core represents the essential knowledge that serves as the groundwork for later course work and for other research and scholarly activities within the program and beyond with a particular focus on urban education. This work is completed in the first year.

The PhD program requires a minimum of 63 units of course work, comprising the following elements: Core Block (16 units), Concentration Block (15 units), Research Block (15 units), Cognate Block (12 units) and Dissertation Proposal and Dissertation Block (5 units).

Core Block
The core represents the essential knowledge that serves as the groundwork for later course work and for other research and scholarly activities within the program and beyond with a particular focus on urban education. This work is completed in the first year.

Required Courses
- EDUC 630 Organizations and Policy: Current Issues Units: 4
- EDUC 640 The Research University in the 21st Century Units: 4
- EDUC 642 Controversies in Learning and Instruction Units: 4
- EDUC 650 Globalization and the Nation-State: Theories of Change Units: 4

Additional Requirements
Concentration Block
Courses in this block are linked to two of the concentrations available in the Rossier School of Education PhD program. Courses in this block permit students to consider applied problems in collaboration with students in other programs.

Research Block
Courses in this block provide the basic tools to pursue systematic, programmatic, empirical investigation. It includes qualitative and quantitative elements with the understanding that complex educational problems require a variety of investigative approaches. Areas include research design, analysis of variance/multiple regression, qualitative methods, measurement, advanced qualitative or quantitative analysis, or other related areas. Courses may be taken inside or outside the Rossier School of Education.

Cognate Block
This block is designed for students to pursue interdisciplinary approaches to educational issues, and may consist of courses inside or outside the Rossier School of Education. The specific courses are determined in conjunction with the adviser.

Dissertation Block
This block includes preparation for the qualifying examination and initial dissertation proposal. It is taken during the semester of the qualifying examination and EDUC 794a Doctoral Dissertation, EDUC 794b Doctoral Dissertation (minimum of 4 units taken after a student passes the qualifying examination and has advanced to candidacy). The dissertation block is designed to prepare students for their dissertation research and continues through the writing and defense of the dissertation. The process involves intensive collaboration with the adviser and the qualifying exam committee.

Transfer of Course Work
The maximum number of transfer credits that can be applied toward the degree is 20 units. The faculty of the student's degree program determines whether transfer credit is applicable toward a specific graduate degree.

Faculty Adviser
A designated faculty member provides the academic advisement for entering graduate students at the point of admission. A faculty member is appointed to serve as the adviser until an approved qualifying exam committee is established.

Screening Process
When students have completed the core course work, the doctoral screening committee assesses their performance and makes a decision about their readiness to continue in the program. Students are notified of the results by the PhD program chair and director.

Qualifying Exam Committee
The qualifying exam committee is composed of at least five members. A minimum of three, including the chair, must be from the Rossier School; one must be a faculty member from outside the Rossier School. Normally, all members of the qualifying exam committee are regular faculty with the rank of assistant professor or above in departments offering the PhD.

Qualifying Examinations
As a prerequisite to candidacy for the PhD, students must pass written and oral qualifying examinations. The written qualifying examination is designed to assess a student's readiness to undertake dissertation research and to assess the student's ability to critically analyze and synthesize theoretical and methodological knowledge. The oral portion consists, in part, of a teaching and research portfolio. The teaching portfolio documents and reflects the student's development and productivity in thinking about course content and instructional delivery. The research portfolio
documents and reflects the student's development and productivity in research and writing from the point of entry into the program.

Admission to Candidacy
Admission to candidacy is a formal action taken by the faculty that is based upon passing the qualifying examination and completing all PhD course requirements (with the exception of EDUC 794a, EDUC 794b, EDUC 794d, EDUC 794z Doctoral Dissertation). Notification of admission or denial of admission to candidacy is by letter from the associate vice provost for graduate programs.

Dissertation Committee
After admission to candidacy and approval of the dissertation proposal, the PhD qualifying exam committee is known as the dissertation committee and is usually reduced to three members. The committee will include one faculty member from outside the Rossier School of Education but within USC, and will be chaired by a tenure track faculty member.

USC Viterbi School of Engineering
The USC Viterbi School of Engineering is innovative, elite, and internationally recognized for creating new models of education, research and commercialization that are firmly rooted in real world needs. The school's first priorities are the education of outstanding students and the pursuit and publication of new research.

As the school's faculty and students extend the frontiers of engineering knowledge through their research, they also apply engineering and technology to address societal challenges. The school stimulates and encourages qualities of scholarship, leadership, ambition and character that mark the true academic and professional engineer — to serve California, the nation and the world. At USC Viterbi, we call this the enabling power of Engineering+.

Courses in engineering were first offered at USC in the 1905–06 academic year in the basement of one of the oldest buildings on campus. Today, 210 full-time, tenure track faculty (and more than 340 total full-time faculty) serve over 2,700 undergraduate majors; 500 students in minor programs; and almost 5,400 graduate students, utilizing extensive and technically advanced laboratories, classrooms and live interactive high-speed Internet broadcast systems.

Government and industry annually fund nearly $189 million worth of research.

Viterbi undergraduate support programs complement and strengthen the academic experience, enhancing both depth and scope. Viterbi graduate education is outstanding preparation for advanced research and professional careers. The PhD program is built around fellowships, teaching assistantships and research appointments, and produces a steadily growing core of doctoral graduates across the disciplines. The master's and professional programs are national and global leaders in advanced training for professional engineers.

Administration
Yannis C. Yortsos, PhD, Dean
John O'Brien, PhD, Executive Vice Dean

Doctoral Dissertation
After the qualifying examination is passed, students must enroll in EDUC 794a, EDUC 794b, EDUC 794d, EDUC 794z Doctoral Dissertation each semester, except summer session, after admission to candidacy until all degree requirements have been completed. A minimum of two semesters (4 units) is required. A maximum of 4 dissertation units may be applied to satisfy the degree requirement. While enrolled in EDUC 794a, students will develop a dissertation proposal in collaboration with the adviser. The dissertation committee grants final approval for the proposal. Credit for EDUC 794a and permission to enroll in EDUC 794b will only be given after the dissertation proposal is approved. IRB (Human Subjects Institutional Review Board) approval is required for all dissertation studies.

Degrees and Accreditation
The Viterbi School of Engineering offers the following undergraduate curricula leading to the Bachelor of Science in: Aerospace Engineering; Applied Mechanics; Astronautical Engineering; Biomedical Engineering; Chemical Engineering; Civil Engineering; Computer Engineering and Computer Science; Computer Science; Computer Science/Business Administration (with the Marshall School of Business); Computer Science (Games); Electrical Engineering; Environmental Engineering; Industrial and Systems Engineering; Mechanical Engineering; and Physics/Computer Science (with the Dornsife College of Letters, Arts and Sciences).

Minor programs are offered in: 3-D Computer Graphics and Modeling; Applied Computer Security; Astronautical Engineering; Computer and Digital Forensics; Computer Programming; Computer Science; Construction Planning and Management (with the Price School of Public Policy); Craniofacial and Dental Technology (with the Herman Ostrow School of Dentistry and the Dornsife College of Letters, Arts and Sciences); Engineering Management; Enterprise Information Systems; Environmental Engineering; Innovation: The Digital Entrepreneur (with the Marshall School of Business); Mobile App Development; Petroleum Engineering; Technology Commercialization (with the Marshall School of Business); Video Game Design and
Management; Video Game Programming; and Web Technologies and Applications.

Graduate curricula leading to the Master of Science in: Aerospace Engineering; Aerospace and Mechanical Engineering (Computational Fluid and Solid Mechanics); Aerospace and Mechanical Engineering (Dynamics and Control); Analytics; Astronautical Engineering; Biomedical Engineering; Biomedical Engineering (Medical Imaging and Imaging Informatics); Chemical Engineering; Civil Engineering; Civil Engineering (Construction Engineering); Civil Engineering (Structural Engineering); Civil Engineering (Transportation Engineering); Civil Engineering (Transportation Systems); Civil Engineering (Water and Waste Management); Computer Engineering; Computer Science; Computer Science (Computer Networks); Computer Science (Computer Security); Computer Science (Data Science); Computer Science (Game Development); Computer Science (High Performance Computing and Simulations); Computer Science (Intelligent Robotics); Computer Science (Multimedia and Creative Technologies); Computer Science (Scientists and Engineers); Computer Science (Software Engineering); Cyber Security Engineering; Data Informatics; Electrical Engineering; Electrical Engineering (Computer Networks); Electrical Engineering (Electric Power); Electrical Engineering (Multimedia and Creative Technologies); Electrical Engineering (VLSI Design); Electrical Engineering (Wireless Health Technology); Electrical Engineering (Wireless Networks); Engineering Management; Environmental Engineering; Financial Engineering; Global Supply Chain Management (with the Marshall School of Business); Green Technologies; Health Systems Management Engineering (with the Price School of Public Policy, not currently accepting applications); Industrial and Systems Engineering; Manufacturing Engineering; Materials Engineering; Materials Science; Mechanical Engineering; Mechanical Engineering (Energy Conversion); Mechanical Engineering (Nuclear Power: not currently accepting applications); Medical Device and Diagnostic Engineering; Operations Research Engineering; Petroleum Engineering; Petroleum Engineering (Geoscience Technologies); Petroleum Engineering (Smart Oilfield Technologies); Product Development Engineering; Spatial Informatics; and Systems Architecting and Engineering.

Graduate curricula leading to the Master of Construction Architecting and Engineering.

Graduate curricula leading to dual degrees in: Aerospace Engineering / Master of Science Engineering Management; Master of Science Electrical Engineering / Master of Science Engineering Management; Master of Science Industrial and Systems Engineering / Master of Business Administration; Master of Science Mechanical Engineering / Master of Science Engineering Management; and Master of Science Petroleum Engineering / Master of Science Engineering Management.

Graduate curricula leading to the Engineer degree in: Aerospace Engineering; Astronautical Engineering; Chemical Engineering; Civil Engineering; Electrical Engineering; Environmental Engineering; Industrial and Systems Engineering; Materials Science (not currently accepting applications); Mechanical Engineering; and Petroleum Engineering.

Through the Graduate School, graduate curricula leading to the Doctor of Philosophy in: Aerospace Engineering; Astronautical Engineering; Biomedical Engineering; Chemical Engineering; Civil Engineering; Computer Engineering; Computer Science; Electrical Engineering; Engineering (Environmental Engineering); Industrial and Systems Engineering; Materials Science; Mechanical Engineering; and Petroleum Engineering.

Graduate certificates in: Astronautical Engineering; Health Systems Operations (with the Price School of Public Policy); Health, Technology and Engineering (with the Keck School of Medicine); Network Centric Systems; Smart Oilfield Technologies; Software Architecture; Systems Architecting and Engineering; and Transportation Systems (with the Price School of Public Policy).

**Undergraduate Program Accreditation**

The Bachelor of Science degrees in aerospace engineering, astronautical engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering and computer science, electrical engineering, environmental engineering, industrial and systems engineering, and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET, abet.org. The Bachelor of Science degrees in computer engineering and computer science and in computer science are accredited by the Computing Accreditation Commission of ABET, abet.org.

**Undergraduate Program Student Outcomes**

By the time of graduation from Bachelor of Science degree programs accredited by the Engineering Accreditation Commission of ABET, students will develop at least the following abilities and knowledge:

- an ability to apply knowledge of mathematics, science and engineering
- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multidisciplinary teams
- an ability to identify, formulate and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context
- a recognition of the need for, and an ability to engage in life-long learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills and modern engineering tools necessary for engineering practice
By the time of graduation from Bachelor of Science degree programs accredited by the Computing Accreditation Commission of ABET, students will develop at least the following abilities and knowledge:

- an ability to apply knowledge of mathematics appropriate to the program's student outcomes and to the discipline
- an ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
- an ability to design, implement and evaluate a computer-based system, process, component or program to meet desired needs
- ability to function effectively on teams to accomplish a common goal
- an understanding of professional, ethical, legal, security and social issues and responsibilities
- an ability to communicate effectively with a range of audiences
- ability to analyze the local and global impact of computing on individuals, organizations and society
- recognition of the need for and an ability to engage in continuing professional development
- an ability to use current techniques, skills and tools necessary for computing practice
- an ability to apply mathematical foundations, algorithmic principles and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the trade-offs involved in design choices
- an ability to apply design and development principles in the construction of software systems of varying complexity

**Undergraduate Degrees and Requirements**

**Change of Major to Engineering**

USC undergraduate students who have not been admitted to the Viterbi School of Engineering may apply to add an engineering major with the approval of the Associate Dean for Admission for the Viterbi School. Students seeking approval to add an engineering major must complete required prerequisite courses and submit a Request to Change Major to Engineering form to the Admission and Student Affairs Office in Ronald Tutor Hall 110. Approval is granted on the basis of academic performance at USC and in the required prerequisite courses in the Viterbi School within a maximum of two semesters. Non-engineering students may complete a maximum of four engineering courses. No further engineering courses may be taken unless admission has been approved.

**Common Requirements**

Certain general requirements are common to all undergraduate curricula for Bachelor of Science degrees in Engineering. These are as follows:

**Total Units**

A minimum total of 128 acceptable units is required to earn the Bachelor of Science in Engineering. Exceptions are:

- aerospace engineering, 130 units; biomedical engineering with an emphasis in electrical engineering, 133 units; biomedical engineering with an emphasis in mechanical engineering, 132 units; chemical engineering, 133 units; chemical engineering with an emphasis in biochemical engineering, 133 units; chemical engineering with an emphasis in environmental engineering, 136 units; chemical engineering with an emphasis in nanotechnology, 132 units; chemical engineering with an emphasis in petroleum engineering, 137 units; chemical engineering with an emphasis in polymer/materials science engineering, 137 units; civil engineering, 131 units; civil engineering with an emphasis in building science, 135–36 units; civil engineering with an emphasis in environmental engineering, 129-130 units; civil engineering with an emphasis in structural engineering, 131 units; electrical engineering, 131 units; environmental engineering, 131–134 units.

Not more than 4 units may be physical education activity courses, provided the department allows it in the program.

**General Education Requirements**

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires eight courses in six Core Literacies, plus writing and two courses in Global Perspectives (which may double-count with courses in the Core Literacies). See the General Education Program for more information.

Students in the Viterbi School of Engineering must satisfy the general education requirements. Students satisfy Core Literacy requirements in life sciences, physical sciences, and quantitative reasoning with the basic science and mathematics elements of their undergraduate engineering programs.

Students in the engineering "3-2" program are not required to satisfy general education requirements or the lower-division writing requirement for USC; these students are understood to have satisfied USC's general education requirements when they have satisfied the general education requirements and lower level writing requirement at their previous institution.

All students must, however, complete the WRIT 340 requirement.

**Mathematics (16 units minimum)**

Sixteen units or more, including three semesters of calculus, are required.

**Basic Sciences (12 units minimum)**

Twelve units or more of biology, chemistry or physics are required.

**Residence Requirement**

All students must complete a minimum of 64 units at USC in order to receive a USC degree. In addition, the Viterbi School of Engineering requires that students complete all upper-division units required for the major in residence.

For students in the Viterbi School of Engineering "3-2" Program, at least 48 units must be earned in courses taken at USC.
Scholarship Requirement in Major Subject
For graduation with a bachelor's degree, a grade point average of C (2.0) or higher is required in all upper division courses applied toward the major including any approved substitutes for these courses taken at USC. Additional scholarship requirements for the various majors are listed under the departmental headings.

Grade Point Requirement
A grade point average of at least 2.0 is required on all course work attempted at USC. Transfer students must meet these averages, both on residence work attempted and on combined transferred and residence courses attempted.

Probation/Disqualification
A student whose overall GPA falls below 2.0 is placed on academic probation. Continued enrollment requires clearance from an academic review counselor. Each semester, students on academic probation are required to receive academic advisement. Proof of advisement must be filed with the Academic Review Department before any registration requests will be processed. The only acceptable proof of advisement is an official academic review advisement record signed by the student's academic advisor and a representative from the Viterbi Admission and Student Affairs Division. Academic review advisement forms may be obtained from Tutor Hall of Engineering (RTH) 110 or John Hubbard Hall 113.

Students on probation are encouraged to utilize the academic services (advisement and free tutoring) provided by the Viterbi Admission and Student Affairs Division. Students on academic probation who do not raise their overall GPA to 2.0 after two semesters of enrollment (excluding summers) will be academically disqualified from the university. However, if a student earns a minimum semester GPA of 2.3 in the second or any subsequent probation semester but has not yet reached an overall 2.0 GPA, the student will not be disqualified and will be allowed to enroll an additional semester.

Petitions for readmission after academic disqualification are initiated by the student through the Academic Review Department. All grade issues (IN, MG, etc.) must be resolved prior to the submission of such a petition. Before petitioning for readmission, a student must complete a minimum of 12 semester units of transferable course work (applicable to USC degree requirements) with a minimum 3.0 GPA. University residency requirements will determine whether these units are accepted as transfer credit.

As readmission to the university is never guaranteed, any indication of strong academic performance beyond the 12 unit minimum would strengthen a readmission petition. Students must petition for readmission by December 30 for the spring semester, by May 1 for the summer session and by August 15 for the fall semester. Late petitions will not be accepted. A non-refundable fee determined by the Academic Review Office must accompany all readmission petitions.

Special Educational Opportunities
Viterbi Admission and Student Affairs Division

The Viterbi Admission and Student Affairs Division, located in Ronald Tutor Hall of Engineering (RTH) 110, begins to assist students as soon as they express an interest in engineering and continues working with them until, and in some cases after, they graduate. The office is not only responsible for working with prospective students, but also with continuing students as well. It directs special services and programs, provides a variety of support services, sponsors student organizations, is involved with student government and acts as a liaison with other university offices. The Viterbi Admission and Student Affairs Division enables engineering students to have maximize their potential at USC.

Center for Engineering Diversity and Women in Engineering Program (WIE)
The Center for Engineering Diversity (CED) provides a variety of services for historically underrepresented students in engineering (African-American, Hispanic and Native American students, including women). Prior to their first semester in Viterbi, freshmen can participate in a four-week summer residential program (Summer Institute). Contact the Center for Engineering Diversity at (213) 740-1999 for more information.

The Women in Engineering Program (WIE) offers professional, academic and co-curricular support to the women of the Viterbi School. The goal of the Viterbi Women in Engineering Program is to recognize the unique challenges that female engineering students will face, provide resources and overall support to address these challenges, and allow our female students to find academic and personal success during their Viterbi career and beyond.

Klein Institute for Undergraduate Engineering Life
The Klein Institute for Undergraduate Engineering Life (KIUEL) was established to provide Viterbi undergraduates with a variety of personal and professional activities designed to enhance undergraduate engineering student life experiences outside the classroom. The KIUEL Programming Board implements programs around leadership, service learning and globalization, and cross-disciplinary learning. Past KIUEL events have included the KIUEL Weekend for Leaders, the KIUEL Showcase and the Senior Design Expo. For more information, visit viterbi.usc.edu/kiuel.

Viterbi Fellows Program
Every year, a select group of promising incoming freshmen are invited by faculty to work on projects in their research laboratories as part of the Viterbi Fellows Program. These student researchers actively participate in the development of new technology throughout their undergraduate careers. In addition to giving students excellent first-hand experience, this program can help offset the cost of education since each participant earns wages for his or her work. This renewable award is separate from other financial assistance offered by the university.

The student must apply for renewal of his or her award by March 1 of each year. Continuing students can use the same application form to apply for the award starting in their sophomore year.
Grand Challenges Scholars Program
The Viterbi School encourages students to pursue their academic and co-curricular involvement keeping the "Grand Challenges" in mind. The USC Viterbi Grand Challenges Scholars Program (GCSP) helps students organize their time spent focused on exploring results that benefit society. Each year, the top 25 students who successfully complete the USC Viterbi GCSP areas will be named National Academy of Engineering Grand Challenges Scholars, recognized both by USC at graduation and the National Academy of Engineering.

Students interested in being designated as Grand Challenge Scholars should demonstrate involvement related to a specific Grand Challenge topic in each of the five areas below. Successful students must carry their involvement related to the challenge across five dimensions:
- Hands-on Project or Research Experience
- Interdisciplinary Curriculum
- Entrepreneurship
- Global Dimension
- Service Learning

For more information, contact the Viterbi Admission and Student Affairs Division office in RTH 110.

First Year Excellence
The First Year Excellence (FYE) program helps first-year students develop strong connections to the university and the Viterbi School of Engineering. FYE promotes academic exploration and success through its co-curricular programs, support services and resources during students' first year. Freshman academies, introductory courses and the Viterbi Spotlight Series help guide students as they explore engineering. Academic advisers work with all freshman students to ensure they are on track academically and to assist with acclimating to college life and USC. Free tutoring, group-led supplemental instruction sessions, workshops and seminars on time management and networking with faculty are available to students to assist them in accomplishing their goals.

Viterbi Career Connections
The Viterbi School of Engineering provides extensive career services to all students. Students are encouraged to register with Viterbi Career Connections during their first year at USC via the Viterbi Gateway portal. By doing so, they will be kept informed of all career-related events such as company information sessions, career preparation workshops, industry luncheons and career fairs. In addition, students are able to participate in the school's extensive on-campus interview program.

USC's Viterbi School of Engineering attracts employers not only from Southern California, but from across the country. A few of the many companies that have recently hired Co-ops, interns and permanent employees from the Viterbi school include: Accenture, Aon, Alcon Laboratories, Inc., The Boeing Company, Chevron Corporation, Cisco Systems, Inc., Clark Construction, Google, IBM, Intel, Jet Propulsion Laboratory, Kiewit Corporation, Lockheed Martin Corporation, Microsoft Corporation, Morley Builders, NASA, Northrop Grumman Corporation, Parsons Corporation, Raytheon, Turner Construction Company, Walt Disney Imagineering and Yahoo.

Cooperative Education
By participating in the Co-op Program, students can earn degree credit and industry work experience before they graduate. Co-op improves students' understanding of the relationship between theory and practice, helps them fine-tune their career goals and aids in the acquisition of important engineering skills. Students' work assignments are closely related to their specific degree program and are appropriate to their current academic level.

Participation in the program is open to all full-time undergraduate engineering majors. Students are eligible to apply for Co-op the second semester of their sophomore year. Though the sequence may vary, students typically have one summer work experience in addition to one semester immediately preceding or following one of the summer sessions. While on assignment, students enroll in a 1–2 unit course (ENGR 395a, ENGR 395b, ENGR 395c, ENGR 395d) that aids in the integration of both on-campus and off-campus learning. With departmental approval, credit toward a degree may be earned upon completion of this course.

3-2 Program
For those students wishing greater depth and breadth in the liberal arts, the Viterbi School of Engineering has developed agreements with more than 20 liberal arts colleges nationwide in which a student attends a liberal arts institution for his or her first three years of college, pursuing pre-engineering courses in addition to a solid program in the liberal arts. At the end of the three years, upon recommendation from the liberal arts college, the student applies to the Viterbi School of Engineering as a junior and, if admitted, completes the remaining requirements for a BS degree typically within two years. After degree requirements for both schools are complete, the student will receive two degrees — a BA from the liberal arts college and a BS from USC.

Engineering Overseas Programs
Every summer the Viterbi School of Engineering sponsors a seven-week academic program in either Florence, London, Paris, Madrid, Rome or another location that provides students with the opportunity to enroll in engineering and humanities courses, as well as participate in a directed studies project. This program is open to all engineering majors.

International Exchange Programs
The Viterbi School of Engineering International Exchange Program gives undergraduate students the opportunity to broaden their exposure to the global context of engineering theory and practice by spending a semester abroad in a challenging academic environment at an international host institution. The International Exchange Program allows students to satisfy technical electives and/or approved degree requirements by attending approved partner institutions. This program is open to students entering their junior or senior year. Students apply at the Viterbi Student Affairs Office. Candidates must meet all admission requirements of both the Viterbi School of Engineering as well as those of the international host institution. Contact the Admission and Student Affairs Office for a complete list of international exchange partners.
Honor Societies
The Viterbi School of Engineering has established a variety of honor societies to recognize academic excellence, creativity and service. These are: Alpha Pi Mu (industrial and systems engineering), Chi Epsilon (civil engineering), Eta Kappa Nu (electrical engineering), Omega Chi Epsilon (chemical engineering), Omega Rho (industrial and systems engineering), Pi Tau Sigma (mechanical engineering), Sigma Gamma Tau (aerospace engineering), Tau Beta Pi (nationwide honor society) and Upsilon Pi Epsilon (computer science).

Graduate Degrees and Requirements

General Requirements
The Viterbi School of Engineering recommends candidates for the Master of Science degree in: aerospace engineering, analytics, astronautical engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering, computer science, cyber security engineering, data informatics, electrical engineering, engineering management, environmental engineering, financial engineering, green technologies, health systems management engineering, industrial and systems engineering, manufacturing engineering, materials engineering, materials science, mechanical engineering, medical device and diagnostic engineering, operations research engineering, petroleum engineering, product development engineering, spatial informatics, and systems architecting and engineering; and the Master's degree in construction management. Several areas of emphasis and specialization are available within these disciplines.

All graduate work in the Viterbi School of Engineering is under the jurisdiction of the Viterbi School except the Doctor of Philosophy degree, which is under the jurisdiction of the USC Graduate School. All prospective graduate engineering students should apply to the USC Office of Graduate Admission.

Admission
Two classes of students are admitted to take courses for graduate credit: admitted and conditionally admitted students. These classifications are determined by the Office of Graduate Admission on the recommendations of the appropriate department in the Viterbi School of Engineering.

Admitted Students
This is the status of a graduate student pursuing work leading toward an advanced degree. The student has been accepted into the degree program without any conditions.

Conditionally Admitted
The chair of a major department in the Viterbi School of Engineering may recommend that a student be admitted under certain conditions. Conditional admission is granted when a student's admission records are incomplete or when deficiency courses must be taken but the student appears to be otherwise admissible. The conditions must be met before the completion of two semesters of enrollment or 12 units of course work, whichever comes first. If the conditions on admission are not met within the given time period, the student may not be allowed to register for course work in subsequent semesters. When the conditions have been met, the academic department will remove the restrictions that have been placed on the student's registration.

Criteria
To qualify for admission, applicants are expected to present strong academic records and show superior accomplishment in their engineering and related courses. Admission decisions will be based on Graduate Record Examinations test scores and transcripts of previous school work. Individual departments may set higher admission standards than the Graduate School. Some programs also require letters of recommendation and a statement of purpose. Doctor of Philosophy applicants who have published professional papers in their field may forward copies to the department, and they will be considered together with the other credentials submitted.

Procedure
Applicants to graduate programs must present credentials to the Office of Graduate Admission showing that they have completed an acceptable curriculum for the bachelor's degree. In some departments students with outstanding records will be admitted for the doctoral program without first receiving the Master of Science degree. If the previous degree is not in the field in which the student wishes to pursue graduate study, it may be necessary to make up undergraduate deficiencies in the area of the desired specialty. Applicants must take the Graduate Record Examinations. Satisfactory scores on the general test are required for admission to full graduate standing in most programs. Consult the department office for further information.

Once the application for admission has been sent, arrangements should be made immediately to have official transcripts of all previous undergraduate and graduate school work forwarded directly to the Office of Graduate Admission from the schools attended. If the Graduate Record Examinations general and subject tests, as well as the TOEFL or IELTS exams, have been taken the scores should be sent to the Office of Graduate Admission by the educational testing service. If the tests have not been taken, the applicant should register to take them on the earliest available date.

The departments will review the application files and select the students offering the greatest promise for completing graduate studies.

Progressive Degree Programs
The progressive degree program allows qualified undergraduate students the opportunity to complete an integrated program of study joining a bachelor's degree program and a master's degree program in the same or different departments. Applicants for a progressive degree program must have completed 64 units of course work applicable to their undergraduate degree since graduating from high school. (Credit by exam and course work taken prior to high school graduation are excluded). Applicants must submit their application prior to completion of 96 units of course work. Normally, the application is submitted in the fall semester of the third year of enrollment at USC. The application for admission to a progressive master's program must be accompanied by a departmentally approved course plan proposal and two letters of recommendation. All application materials can be obtained from the Viterbi
Admission and Student Affairs Office (RTH 110, viterbi.usc.edu/pdp).

Progressive degree program students must fulfill all the requirements for both the bachelor's degree and the master's degree. The total number of units for the master's degree, however, may be reduced by a maximum of one-third. A minimum of two-thirds of the units required for the master's degree must be at or above the 500 level, excluding any 590 courses. Students will be subject to undergraduate academic progress standards and policies while in undergraduate status and master's academic progress standards and policies while in graduate status. The degrees may be awarded separately, but the master's degree will not be awarded before the undergraduate degree. The time limit for completing a progressive degree program is 12 semesters. For more information, refer to the Requirements for Graduation page.

General Requirements for the Master of Science

Residence Requirements

Viterbi students are allowed up to five years to earn a master's degree. Depending on the specific degree, the typical time required varies from between one and one-half to two years for students in MS programs on campus to three years for MS students completing their degrees online via DEN@Viterbi. Master's degrees other than the Master of Science typically require more course work, and may take more time to complete. Students entering the Viterbi School of Engineering with course or credit deficiencies require a correspondingly longer period. A candidate must complete the last four semester units of course work at USC. Up to four transferred units will be accepted from another engineering school upon verification by the Office of Degree Progress and the approval of the major department.

Prerequisites

Prerequisite is a bachelor's degree in engineering, allied fields or science. If the graduate field is different from the field of the bachelor's degree, there may be undergraduate deficiencies assigned by the major department, and these must be made up by taking and passing the assigned courses before proceeding with the graduate courses.

Deficiency Courses

New students may be required to demonstrate satisfactory preparation for the graduate program with previously completed course work. In cases where preparation is not demonstrated, up to 9 units of deficiency course work may be required in addition to the normal degree requirements. Credit for required deficiency courses may not be applied toward a graduate degree. A deficiency course within the same discipline taken after the higher level course has been passed will not be available for unit or grade point credit.

Placement Examinations

Enrollment in certain 500- and 600-level courses in the disciplines of computer engineering and electrical engineering will require a student to either take and pass the corresponding 400-level prerequisite at USC, or pass a placement exam in the corresponding course. Not all 400-level prerequisite courses taken instead of a placement exam are available for degree credit. No unit or grade point credit is given for placement exams. Please consult with an academic adviser or refer to the department Website for information on specific courses and placement exam details.

Grade Point Average Requirements

A grade point average (GPA) of 3.0 (A = 4.0) is required for the master's degree in all engineering programs. The minimum GPA must be earned on all course work applied toward the master's degree and on all 400-level and above course work attempted at USC beyond the bachelor's degree. A minimum grade of C (2.0) is required in a course to receive graduate credit. Work graded C- or below is not acceptable for subject or unit credit toward any graduate degree. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average.

Course Selection

There are two program options for the master's degree, one with a thesis and the other without. Courses are selected to fit the special needs of individual students, must form an integrated program leading to a definite objective and must be approved in advance by the department. Only courses numbered 400 and above may be applied for degree credit.

Program without Thesis

The minimum requirement is 27 units; 18 of these units must be at the 500 level and at least 18 units must be in the major department and closely related departments. Prior department approval is required for all non-major courses. Specific requirements are listed under each department.

Program with Thesis

The minimum requirement is 27 units; 4 of these units are to be thesis. At least 16 units, not including thesis, must be at the 500 level or higher, and at least 18 units must be in the major department. Two units of 594a and 2 units of 594b are required. No more than 4 units of 590 Directed Research is permitted.

Master's Thesis

The thesis, when it is required, is regarded as an important part of the work of the candidate for a master's degree. It is not intended to be a piece of highly recondite research, but it must be a serious, considerable and publishable piece of work demonstrating the writer's power of original thought, thorough grasp of the subject matter and ability to present material in a scholarly manner and style. The thesis presents the results of an investigation of an approved subject in the major department. It is supervised throughout by a thesis committee, appointed by the chair of the student's major department. The committee is usually composed of two members of the major department and one other member of the faculty.

The student will register in courses 594a and b respectively during the final two semesters of the master's program as determined by discussion with an adviser. (Concurrent registration for 594a and b during the same semester is permitted when a student's progress makes completion of all requirements likely within one semester.) If the thesis has not been completed within these two semesters, the candidate must register for 594z each semester until the thesis has been accepted but no additional unit credit will be earned. Units of 594ab Master's Thesis may not be converted to units of 590 Directed Research.
A student readmitted to candidacy by petition to the Graduate School must reregister for 594a and 594b. Final acceptance of the thesis is based upon the recommendation of all members of the thesis committee. For requirements concerning format of master's thesis see The Graduate School section of this catalogue. Candidates who find it necessary to be excused from registration in 594a or 594b for a semester must formally report before the beginning of the semester to the Viterbi Office of Graduate and Professional Programs that they will be inactive during that semester and request a leave of absence. During a leave of absence a candidate will not be entitled to assistance from the thesis committee or to the use of university facilities. The granting of a leave of absence does not change the candidate's responsibility for meeting the time schedule for the completion of degree requirements. Leave will be granted only under exceptional circumstances.

**Progress Toward the Degree**

Graduate students are expected to make regular progress toward their degrees as defined by the faculty of their respective departments and within the time limits allowed. Graduate students' progress and performance are reviewed each semester. Students making unsatisfactory progress receive a formal written warning and are placed on a semester of academic warning with specific conditions to be met for continuation in the program. Please refer to catalogue sections Academic Warning and Dismissal of Graduate Students; Grade Point Average Requirements; and the Website of the Office of Graduate and Professional Programs (GAPP) at viterbi.usc.edu/gapp.

**Department Approval for Non-major Courses**

Prior departmental approval is required for non-major courses to be taken and applied toward a graduate degree. Students must consult with the faculty adviser for formal written permission to take courses outside the major department for degree credit. A copy of the faculty adviser’s written approval must be kept in the department file and retained by the student until graduation.

**Time Limit**

It is expected that work for a Master of Science in Engineering will be completed within a maximum of five calendar years. An academic department may grant an extension of up to one year at a time for a maximum of two years. Courses taken more than seven years prior to the date upon which the degree is to be awarded cannot be included for the degree.

**Admission to Candidacy**

Application for admission to candidacy for the Master of Science is a separate step from admission to graduate standing. The requirements for admission to candidacy are: (1) the applicant must be admitted to regular graduate standing and must have removed all undergraduate deficiencies, and (2) the applicant must submit a complete program approved by the major department showing the course work, research and thesis (if required). Application for graduation should be made at the beginning of the semester in which the requirements for the master's degree are to be completed. Students are strongly advised to file for graduation as soon as the registration process has been completed so that their names may appear in the printed Commencement program and so that any discrepancies in their records may be resolved. Late filing may delay conferral of the degree.

Application forms for graduation with the master's degree may be obtained from the student's academic department. This application should be returned to the student's academic department. Changes in the program after admission to candidacy are made by petition to the student's academic department.

**Second Master's Degree**

A graduate student who already holds a master's degree from USC may apply a limited number of previously earned units toward the second master's degree. The maximum number of units allowed for transfer is: 4 units in degree programs requiring 24–32 units; 8 units in programs requiring 33–40 units; 12 units in programs requiring 41 or more units. In all cases, permission of the chair of the major department is required. All credit, including the units from the first master's degree, must be earned within seven calendar years.

For students who earned their first master's degree at another institution, no course work may be repeated from the first program of study and no unit credit from the first program of study may be counted toward the second master's degree.

**General Requirements for the Master of Engineering Degree**

The Viterbi School does not currently offer degree programs with the Master of Engineering designation.

**General Requirements for the Engineer Degree**

The Engineer degree is awarded under the jurisdiction of the Viterbi School of Engineering. This degree is granted upon completion of a comprehensive curriculum beyond the general course requirements for the Master of Science and after successfully passing an engineer's qualifying examination. The required curriculum is intended to give students broad preparation in two areas of engineering, together with a minimum number of units in these areas to prepare them for the interdisciplinary nature of the many complex problems they will encounter in practice today. The degree is also intended to fulfill a growing need in industry for students with comprehensive advanced engineering training, but not necessarily with the research orientation developed by the PhD student.

The Engineer degree is a terminal degree. Students who complete the Engineer degree will not be considered for admission to the PhD program.

The Engineer degree is offered in aerospace engineering, astronautical engineering, chemical engineering, civil engineering, electrical engineering, environmental engineering, industrial and systems engineering, materials science, mechanical engineering and petroleum engineering.

**Prerequisites**

There are three basic prerequisites for the Engineer Degree Program: a Master of Science degree or completion of 27 units of acceptable course work, application for admission to the Viterbi School of Engineering and acceptance to the program by the appropriate department.
Course Requirements
The Engineer degree requires a minimum of 30 units of graduate course work beyond the Master of Science degree; up to 6 units at the 400 level may be counted at the discretion of the student's qualifying exam committee if the committee finds them necessary for the student's program. The course work must form a balanced program of study leading to a definite concentration in two fields of engineering, a minimum of 12 units in one field, nine in another; nine units are elective and may be taken outside the Viterbi School of Engineering, but must be acceptable for graduate credit. The distribution of course work will be governed by the student's qualifying exam committee and should be considered in conjunction with the course work done for the Master of Science degree. A candidate for the Engineer degree may substitute a project under the supervision of a faculty member for 6 units of course work. To have the project credited toward the degree, the student must register in 690 Directed Research during the course of the project; total 690 Directed Research registration should not exceed 6 units. A student wishing to work on a project must make arrangements with a member of the faculty to supervise and evaluate work, and obtain the approval of the committee chair prior to completing more than 15 units of course work. In many cases the project may be related to the candidate's work outside the university but must still be supervised by a faculty member. Distribution of the course work should take into account the nature of the project.

Grade Point Average Requirement
A minimum grade point average of 3.0 must be earned on all course work applied toward the Engineer degree. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree. A minimum grade of C (2.0) is required in a course to receive graduate credit. Work graded C- or below is not acceptable for subject or unit credit toward any graduate degree. Transfer units count as credit (CR) toward the Engineer degree and are not computed in the grade point average.

Residence Requirements
A candidate must complete the last four units of course work at USC. At least 26 units must be taken in residency at USC. A maximum of four transfer units not counted toward a previous degree may be allowed with adviser approval.

Guidance Committee
After being granted graduate standing the student must form a guidance committee. The committee is made up of three full-time faculty members who are specialists in the student's areas of concentration, with at least two from the major department. Forms for appointment of the committee are available from the student's academic department. The student is responsible for finding a faculty member from one area of concentration who will act as the chair of the guidance committee. The chair will assist in selection of the other members. Advisement of the student after formation of the committee will be by the committee chair.

Qualifying Examination
The student must satisfactorily complete an engineer's qualifying examination administered by his or her guidance committee. This examination will cover both areas of concentration and will consist of at least one written and one oral examination. This examination is normally taken during the last semester of course work toward the degree. Students who choose to take the examination in the semester following the completion of course requirements may do so up until the end of the third week of classes without registering. After that date they must register for GRSC 810 to maintain continuous enrollment in the program. Results of the examination are reported to the Viterbi Office of Graduate and Professional Programs and forwarded to the Office of Academic Records and Registrar.

Transfer Credits
Up to four units of graduate course work may be transferred from an accredited institution to be applied toward the Engineer degree. Transfer work must have been done after receipt of the Master of Science degree and must be approved by the qualifying exam committee.

Reserving Course Credit
A student who receives the Master of Science degree at USC may reserve a limited number of units taken prior to the receipt of the Master of Science degree for credit toward the Engineer degree. To reserve credit, the course must have been taken during the last semester as a Master of Science candidate, not used toward the Master of Science degree, be acceptable to the student's committee, and approved by the Office of Degree Progress.

Time Limit
The student must complete all requirements within five calendar years.

Admission to Candidacy
After satisfactorily completing the qualifying examination, and no later than the beginning of the last semester of course work, the student must file for candidacy. This is a separate and distinct step which sets forth the entire academic program fulfilling the degree requirements and is used as a working basis for awarding the degree.

General Requirements for the Doctor of Philosophy
This degree is granted under the jurisdiction of the USC Graduate School. Students should also refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School.

Thirteen Doctor of Philosophy (PhD) programs are offered: aerospace engineering, astronautical engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering, computer science, electrical engineering, engineering (environmental engineering), industrial and systems engineering, materials science, mechanical engineering and petroleum engineering.

Deficiency Courses
New students may be required to demonstrate satisfactory preparation for the graduate program with previously completed course work. In cases where preparation is not demonstrated, up to 9 units of deficiency course work may be required in addition to the normal degree requirements. Credit for required deficiency courses may not be applied toward a graduate degree. A deficiency course within the same discipline taken after the higher level course has been passed will not be available for unit or grade point credit.
Placement Examinations
Enrollment in certain 500- and 600-level courses in the disciplines of computer engineering and electrical engineering will require a student to either take and pass the corresponding 400-level prerequisite at USC, or pass a placement exam in the corresponding course. Not all 400-level prerequisite courses taken instead of a placement exam are available for degree credit. No unit or grade point credit is given for placement exams. Please consult with an academic adviser or refer to the department Website for information on specific courses and placement exam details.

Foreign Language Requirements
There is no foreign language requirement for engineering majors.

Course Requirements
Satisfactory completion of at least 60 units of approved graduate level course work with a cumulative grade point average of at least 3.0 is required of all PhD students in engineering. A minimum grade of C (2.0) is required in a course to receive graduate credit. Work graded C- or below is not acceptable for subject or unit credit toward any graduate degree. Undergraduate prerequisites and graduate course work will be required in accordance with the regulations of the major department or program and the recommendations of the student's qualifying exam committee. Transfer units are subject to approval by the Office of Degree Progress (for course work taken at institutions in the United States) or by the Office of Graduate Admission (for course work taken at institutions outside the United States) and by the qualifying exam committee.

Screening Procedure
The original admission decision admitting a student to the PhD program is based on the student's previous academic records, Graduate Record Examinations scores and other evidence of scholastic abilities indicating promise for completing graduate studies. It is also a prerequisite that all PhD students successfully complete the screening procedures designated by the department. These usually consist of a written and an oral examination administered by the faculty. Students who fail the screening procedure will be advised that they are not recommended to continue in the PhD program and that any additional work may not be counted toward the degree.

Qualifying Exam Committee
The PhD student's program of study is supervised by the qualifying exam committee, which is formed immediately after passing the screening examination. The committee consists of five tenure-track faculty members, four from the major department and one from outside the department. Reporting the screening procedures and forming the qualifying exam committee are accomplished by filing the appropriate forms obtainable from the Graduate School Website, usc.edu/schools/GraduateSchool.

Qualifying Examinations
The qualifying examinations are taken during the last semester of the second year of graduate study or, at the latest, in the fifth semester or equivalent. The Request to take the Qualifying Examinations must be filed in the semester prior to taking the examinations and at least 30 days before beginning the examinations. The examinations are intended to determine the extent of the student's knowledge in basic science and engineering areas as well as the ability to do original and scholarly research. The qualifying exam committee decides the nature of the qualifying examinations (both oral and written portions) according to the policies applicable in each department.

If not otherwise enrolled, a student must enroll in GRSC 800 during the semester in which the qualifying examination is to be taken. Students are strongly encouraged to take the qualifying examination during the first semester in which they are enrolled in GRSC 800, and may not enroll in more than two semesters of GRSC 800 before taking the qualifying examination.

The examinations may be scheduled at any time during the semester provided that all members of the committee are available to administer them. All portions of the examinations must be completed within 60 days. After passing the qualifying examinations the PhD student is admitted to candidacy by the Graduate School and the dissertation committee is established. After this step students will normally engage in at least one year of fulltime graduate study and research on campus.

Doctoral Dissertation
An acceptable dissertation based on original investigation and supervised directly by the dissertation committee is required. The dissertation must show mastery of a special field, capacity for independent research and a scholarly result. Candidates are expected to keep all members of the dissertation committee informed of their progress at all stages of the dissertation.

Defense of the Dissertation
After satisfactorily meeting all other requirements and after the research and writing of the dissertation are substantially complete, the PhD candidate must pass a general final oral examination devoted to the major field and to the topic of the dissertation. The examination will be conducted in such a manner as to determine to the satisfaction of the dissertation committee that the candidate has attained the stage of scholarly advancement and power of investigation demanded by the university for final recommendation to the doctorate. The faculty are invited to attend and to participate in the final oral examination. However, only the dissertation committee may vote. Unanimous approval of the committee is required for the student to upload the dissertation to the Graduate School.

Departmental Requirements
The requirements and regulations set forth in this portion of the catalogue are to be construed as the minimal requirements only as established by the Graduate School. In addition, students must meet all the requirements established by their department.

Progress Toward the Degree
Graduate students are expected to make regular progress toward their degrees as defined by the faculty of their respective departments and within the time limits allowed. Graduate students' progress and performance are reviewed each semester. Students making unsatisfactory progress receive a formal written warning and are placed on a semester of academic warning with specific conditions to be
met for continuation in the program. Please refer to catalogue sections Academic Warning and Dismissal of Graduate Students; Grade Point Average Requirements; and the Website of the Office of Graduate and Professional Programs (GAPP) at viterbi.usc.edu/gapp.

Special Educational Opportunities

DEN@Viterbi

Established in 1972, DEN@Viterbi, the USC Viterbi School of Engineering's online delivery system is a pioneer in the distance learning arena, using cutting-edge technology to enable professional engineers to take USC engineering courses for graduate degree credit without coming to the campus. DEN@Viterbi students enrolled around the world are pursuing over 40 graduate degree programs online — more choices than at any other research university.

Engineering

The courses listed in the following section have been designed for specific groups of students for various purposes as indicated in the course descriptions. Certain courses have restrictions related to their applicability for degree credit. Students should consult the academic adviser in the major department for further information.

Engineering

ENGR 100a Engineering Honors Colloquium
Units: 1
Recent developments in a highly technological society with emphasis on selected topics. Enrollment limited to members of the Viterbi School of Engineering Honors Program.
Instruction Mode: Lecture
Grading Option: Credit/No Credit

ENGR 100d Engineering Honors Colloquium
Units: 1
Recent developments in a highly technological society with emphasis on selected topics. Enrollment limited to members of the Viterbi School of Engineering Honors Program.
Instruction Mode: Lecture
Grading Option: Credit/No Credit

ENGR 101 Introduction to Engineering
Units: 3 Terms Offered: Fa
Gateway to the majors and minors in engineering. Introduction to engineering disciplines. Historical and current trends in engineering; ethical and societal factors in engineering solutions. Hands-on design experiences; USC laboratory tours.
Instruction Mode: Lecture
Grading Option: Letter

ENGR 102 Engineering Freshman Academy
Units: 2
Introduction to the profession of engineering. Ethical, political and societal consequences of engineering innovations and the impact of engineering on everyday life. Team projects and guest lectures. Open to freshmen only.
Instruction Mode: Lecture
Grading Option: Letter

ENGR 150l Engineering Science and Systems: From Humans to Robots
Units: 3 Terms Offered: Fa
Hands-on multidisciplinary engineering course that uses robotics as a theme to cover material from all areas of engineering. Laboratory; programming; team projects; end-of-semester exhibition. Open only to freshmen.
Recommended Preparation: Basic programming experience (e.g., C, C++, C#, Java, Python).
Registration Restriction: Open only to freshmen.
Instruction Mode: Lecture, Lab Required
Grading Option: Letter

ENGR 301 Technical Entrepreneurship
Units: 3 (Enroll in BUAD 301)

ENGR 305 Engineering Biology Matters
Units: 3 Terms Offered: Fa
Engineering students will learn biological phenomena in the context of engineering principles and explore biological mechanisms and processes as analogies for designing engineered systems.
Recommended Preparation: CHEM 105a, MASC 110.
Instruction Mode: Lecture
Grading Option: Letter

ENGR 345 Principles and Practices of Global Innovation
Units: 3 Terms Offered: Sp
Learner-centered, cross-cultural, technology-enabled approaches to principles and industrial practices
leveraging cultural diversity to inspire innovations for competitive global markets. Requires an extended semester of 22 weeks, including 2-week overseas project in early summer.

Instruction Mode: Lecture
Grading Option: Letter

ENGR 395x Cooperative Education Work Experience
Units: 1 or 2 Max Units: 5.0
Supervised work experience in a professional environment related to a specific degree program, academic level, and career objective.
Acceptance into Cooperative Education Program required. Degree credit by departmental approval.
Instruction Mode: Lecture
Grading Option: In-progress & Credit/No Credit

ENGR 395b Cooperative Education Work Experience
Units: 1 or 2 Max Units: 5.0
Supervised work experience in a professional environment related to a specific degree program, academic level, and career objective.
Acceptance into Cooperative Education Program required. Degree credit by departmental approval.
Instruction Mode: Lecture
Grading Option: In-progress & Credit/No Credit

ENGR 400 Engineering Honors Project
Units: 1, 2, 3 Max Units: 12.0 Terms Offered: FaSpSm
Supervised interdisciplinary studies and projects. Enrollment limited to members of the Viterbi School of Engineering Honors Program.
Instruction Mode: Lecture
Grading Option: Credit/No Credit

ENGR 401x Communicating Science and Engineering to Children
Units: 3 Max Units: 6.0 Terms Offered: FaSp
Engineering students communicate their knowledge, collaborate constructively with peers, and inspire underserved children to develop a curiosity and persistence for science and engineering. Open only to junior and senior engineering students.
Registration Restriction: Open only to Occupational Therapy doctoral students.
Instruction Mode: Lecture
Grading Option: Letter

ENGR 493x Dean’s Seminar in Entrepreneurship
Units: 2 Terms Offered: Sp
Overview of starting and developing a new business. Discussions with successful business leaders and entrepreneurs. Not available for students admitted to the Entrepreneur Program. Open only to seniors or graduate students in business or engineering.
Duplicates Credit in former BUAD 493x.
Registration Restriction: Open only to seniors or graduate students in Business or Engineering.
Instruction Mode: Lecture
Grading Option: Credit/No Credit

ENGR 499x Special Topics
Units: 2, 3, 4 Max Units: 8.0
Current developments in the field of engineering.
Instruction Mode: Lecture
Grading Option: Letter

ENGR 501x Engineering Writing and Communication for Master's Students
Units: 3 Terms Offered: FaSp
Academic and discipline-specific writing skills. Emphasis on structure of discourse and writing process. Presentation and oral communication skills also addressed.
Credit Restriction: May be taken for degree credit only toward MS degrees in Industrial and Systems Engineering; Engineering Management; Manufacturing Engineering and Entrepreneurship; Operations Research Engineering; and the Master of Engineering in Environmental Quality Management.
Instruction Mode: Lecture
Grading Option: Credit/No Credit

ENGR 502x Writing Skills for Engineering PhD Students
Units: 2 Max Units: 4.0 Terms Offered: FaSpSm
Writing of engineering curriculum- and research-related projects for PhD students. Focus is on conference papers, dissertations and proposals, journal articles, and other forms. Not available for credit to master's students.
Instruction Mode: Lecture
Grading Option: Credit/No Credit

ENGR 503x Oral Communication Skills for Engineering PhD Students
Units: 2 Max Units: 4.0 Terms Offered: FaSpSm
Academic and professional presentation skills for PhD students. Preparation for qualifying exams, conference paper presentations, and other forms of oral communication. Use of visual aids and poster displays included.
Not available for degree credit to master's students.
Instruction Mode: Lecture
Grading Option: Credit/No Credit

ENGR 504x Fellowship Proposal Writing for Engineering PhD Students
Units: 2 Terms Offered: FaSp
Preparation of essays and other materials for research fellowship applications. Open only to PhD engineering students.
Not available for degree credit.
Instruction Mode: Lecture
Grading Option: Credit/No Credit

ENGR 509 Patent Law for Scientists and Engineers
Units: 3 Terms Offered: Sp
Tools for engineering and science graduate students to make informed decisions about obtaining and enforcing patent protection for their future inventions: validity,
Aerospace and Mechanical Engineering

Chair: Geoffrey R. Spedding, PhD*

Faculty

William E. Leonhard Professor of Engineering: Fokion Egolfopoulos, PhD
Gordon S. Marshall Professor of Engineering Technology: Roger Ghanem, PhD (Civil and Environmental Engineering)
Smith International Professor of Mechanical Engineering: Satyandra K. Gupta, PhD
Arthur B. Freeman Professorship in Engineering: Andrea Hodge, PhD
Zohrab A. Kaprielian Fellow in Engineering: Eva Kanso, PhD
Choong Hoon Cho Chair in Aerospace and Mechanical Engineering: Michael Kassner, PhD
WISE Gabilan Assistant Professor: Alejandra Uranga, PhD

Professors: Charles Campbell, PhD; Julian Domaradzki, PhD**; Fokion Egolfopoulos, PhD*; Henryk Flashner, PhD; Roger Ghanem, PhD (Civil and Environmental Engineering); Satyandra K. Gupta, PhD; Yan Jin, PhD; Paul K. Newton, PhD; Larry G. Redekopp, PhD*; Paul Ronney, PhD; Satwinder S. Sadhal, PhD; Geoffrey Spedding, PhD*; Firdaus E. Udwadia, PhD (Civil and Environmental Engineering, Data Science and Operations, Systems Architecture and Engineering and Mathematics); Bingen Yang, PhD
Associate Professors: Eva Kanso, PhD; Geoffrey R. Shiflett, PhD*
Assistant Professors: Ivan Bermejo-Moreno, PhD; Veronica Eliasson, PhD; Mitul Luhar, PhD; Nestor Perez-Arancibia, PhD; Alejandra Uranga, PhD
Professor of Engineering Practice: M. Oussama Safadi, PhD*

Senior Lecturers: Charles Radovich, PhD; Takahiro Sakai, PhD; Yann Staelens, PhD
Lecturers: Inna Abramova, PhD; Wilson Chan, PhD; Matthew Gilpin, PhD; Ang Liu, PhD
Research Associate Professor: Adam Fincham, PhD
Research Associate: Anita Penkova, PhD
Joint Appointments: Yong Chen, PhD (Industrial and Systems Engineering); Daniel Erwin, PhD* (Astronautics); Mike Gruntman, PhD (Astronautics); Andrea Hodge, PhD (Chemical Engineering and Materials Science); Petros Ioannou, PhD (Electrical Engineering — Systems); Michael Kassner, PhD (Chemical Engineering and Materials Science); Berok Khoshevis, PhD (Industrial and Systems Engineering); Peter Kuhn, PhD (Biological Sciences); Joseph Kunc, PhD (Astronautics, Physics); Stephen C-Y Lu, PhD (Industrial and Systems Engineering); Sami F. Masri, PhD (Civil and Environmental Engineering); Steven Nutt, PhD (Materials Science); Constantinos Sioutas, PhD (Civil and Environmental Engineering); Francisco Valero-Cuevas, PhD (Biomedical Engineering)
Emeritus Professors: Ron Blackwelder, PhD*; Fred Browand, PhD; Clarke Howatt, MS; S. Lampert, PhD; Terence Langdon, PhD; Robert Manne, MS, PE*; Donald E. Shemansky, PhD
*Recipient of university-wide or school teaching award.
**Recipient of university-wide or school research award.
Mechanical Engineering Honor Society: Pi Tau Sigma
Aerospace Engineering Honor Society: Sigma Gamma Tau

Degree Requirements

Educational Mission
The degree programs of the Department of Aerospace and Mechanical Engineering provide the educational foundation for success in all walks of life whether or not one's career path includes employment as a professional engineer, work in a field outside of engineering, or pursuit of further education.

Undergraduate Program Educational Objectives
Graduates of the undergraduate programs in Aerospace and Mechanical Engineering are expected to attain the following objectives within a few years after graduation:

- Work as professionals within engineering or a related area in both small- and large-scale businesses;
• Pursue further education through graduate school or professional development courses; and
• Become leaders within their chosen profession whether it be industry, academia or service.

Undergraduate Program Criteria
The program leading to a Bachelor of Science in Aerospace Engineering prepares graduates to have a knowledge of aerodynamics, aerospace materials, structures, propulsion, flight mechanics, and stability and control. The program also prepares graduates to have design competence that includes integration of aeronautical topics.

The program leading to a Bachelor of Science in Mechanical Engineering requires students to apply principles of engineering, basic science and mathematics (including multivariate calculus and differential equations); to model, analyze, design and realize physical systems, components or processes; and prepares students to work professionally in both thermal and mechanical systems areas.

Aerospace Engineering Degrees
Master of Science in Product Development Engineering
See the listing under Product Development Engineering.

Master of Science in Systems Architecting and Engineering
See the listing under Systems Architecting and Engineering Program.

Engineer in Aerospace Engineering
Requirements for the Engineer in Aerospace Engineering degree are the same as set forth in the general requirements. Also, 3 to 6 of the units required for the degree must be AME 690. Prior approval must be obtained from the committee before registration in AME 690.

Doctor of Philosophy in Aerospace Engineering
The Doctor of Philosophy in Aerospace Engineering is also offered. See general requirements for graduate degrees.

Mechanical Engineering Degrees
The department offers a Bachelor of Science degree in Mechanical Engineering. Additionally, petroleum engineering exists as an emphasis within the mechanical engineering program. An area of emphasis appears in parenthesis after the primary major name on the transcript.

Minor in Music Recording
A minor in music recording is offered through the USC Thornton School of Music to provide undergraduate students with the background necessary to enter the field of recording engineering and to familiarize them with the design needs of modern recording equipment. The minor is recommended to mechanical engineering majors with extensive musical training who would like to combine their technical and musical abilities while learning the engineering applications of physical and mathematical principles to the art of music recording. See the listing under the USC Thornton School of Music.

Master of Science in Mechanical Engineering (Energy Conversion)
See Sustainable Infrastructure Systems Program.

Master of Science in Aerospace and Mechanical Engineering (Computational Fluid and Solid Mechanics)

Engineer in Mechanical Engineering
Requirements for the Engineer in Mechanical Engineering degree are the same as set forth in the general requirements. Six of the units required for the degree must be AME 690. Prior approval must be obtained from the committee before registration in AME 690.

Doctor of Philosophy in Mechanical Engineering
The Doctor of Philosophy in Mechanical Engineering is also offered. See general requirements for graduate degrees.

Bachelor's Degree
Aerospace Engineering (BS)
The requirement for this degree is 129-130 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees section.

Composition/Writing Requirement
- WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4
- WRIT 340 Advanced Writing Units: 3, 4 (3 units required)

General Education
General education Units: 24 +

Pre-Major Requirements

Math Requirement
- MATH 125g Calculus I Units: 4
- MATH 126 Calculus II Units: 4 or
- MATH 127 Enhanced Calculus II Units: 4 or
- MATH 129 Calculus II for Engineers and Scientists Units: 4
- MATH 226 Calculus II Units: 4 or
- MATH 227 Enhanced Calculus III Units: 4 or
- MATH 229 Calculus III for Engineers and Scientists Units: 4 or
- MATH 229 Calculus III for Engineers and Scientists Units: 4 *
- MATH 245 Mathematics of Physics and Engineering I Units: 4
* The AME Department recommends that AME students enroll in the 129/229 sequence.

Physics Requirement
- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4 or
- PHYS 161Lg Advanced Principles of Physics I Units: 4
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4 or
The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees section.

Composition/Writing Requirement
• WRIT 150 Writing and Critical Reasoning—Thematic Approaches Units: 4
• WRIT 340 Advanced Writing Units: 3, 4 (3 Units Required)

Total units: 128

Master's Degree

Aerospace and Mechanical Engineering (Computational Fluid and Solid Mechanics) (MS)

The program prepares students for professional careers in engineering companies that develop products using computational tools of fluid and solid mechanics. The program also provides the necessary background for pursuing higher degrees, Engineer and PhD, in aerospace and mechanical engineering with specializations in computational fluid mechanics, computational solid mechanics and computational heat transfer. The degree course work provides a necessary background in basic aerospace and mechanical engineering disciplines (solid mechanics, fluid mechanics, heat transfer), engineering mathematics and numerical methods. The advanced computational technical electives provide practical examples using existing numerical programs to simulate structures, heat transfer and fluid flows as well as commercial mathematical packages for analyzing data and simulations.

Admission requirements follow the general admission rules for aerospace and mechanical engineering graduate programs. The program requires completion of a minimum of 27 units and a cumulative GPA of at least 3.0 for graduation. The program with thesis requires 28 units, four of which are thesis units.

Required Core Courses (21 Units)

- AME 404 Computational Solutions to Engineering Problems Units: 3
- AME 509 Applied Elasticity Units: 3 or CE 507 Mechanics of Solids 1 Units: 3
- AME 525 Engineering Analysis Units: 3
- AME 526 Engineering Analytical Methods Units: 3
- AME 530a Dynamics of Incompressible Fluids Units: 3
- AME 535a Introduction to Computational Fluid Mechanics Units: 3
- CE 529a Finite Element Analysis Units: 3

Computational Technical Elective (3 Units)

Select a computational technical elective from the following list or another approved by a graduate adviser: 3 units.

- AME 415 Turbine Design and Analysis Units: 3
- AME 535b Introduction to Computational Fluid Mechanics Units: 3
- ASTE 545 Computational Techniques in Rarefied Gas Dynamics Units: 3
- CE 529b Finite Element Analysis Units: 3
- CE 551 Computer-Aided Engineering Project Units: 3
- MASC 575 Basics of Atomistic Simulation of Materials Units: 3
- MASC 576 Molecular Dynamics Simulations of Materials and Processes Units: 3
- MATH 504a Numerical Solution of Ordinary and Partial Differential Equations Units: 3
- MATH 504b Numerical Solution of Ordinary and Partial Differential Equations Units: 3

Technical Electives (3 Units)

Select a technical elective from the following list or other electives approved by a graduate adviser: 3 units.

- AME 511 Compressible Gas Dynamics Units: 3
- AME 516 Convection Processes Units: 3
- AME 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- AME 599 Special Topics Units: 2, 3, 4, max 9
- CE 541a Dynamics of Structures Units: 3
- CE 542 Theory of Plates Units: 3

Note:
One core class requirement may be waived at the discretion of a graduate adviser if a student documents that he or she completed or is enrolled in an equivalent course. The waived class must be replaced by a technical elective. Credit for one course of not more than 4 units from another accredited institution may be approved by a graduate adviser. The Master's Thesis (4 units) may be substituted for a technical elective class (3 units).

Aerospace and Mechanical Engineering (Dynamics and Control) (MS)

The Master of Science in aerospace and mechanical engineering with emphasis in dynamics and control educates...
and trains multidisciplinary professionals in the modeling, analysis, simulation and control of complex time-evolutionary systems. It is a program of study that encompasses advanced analytical dynamics, nonlinear dynamical systems, linear and nonlinear dynamics and vibrations, and linear and nonlinear control. The program equips students to apply their knowledge to a variety of complex systems encountered in nature and society, especially those in civil, mechanical and aerospace engineering and applied mechanics.

Students will be given advisement in the first semester of their study. In addition to AME 525 and AME 526, students are required to take the following core courses: AME 521, AME 522, AME 524, AME 541, AME 552. Elective courses can be chosen in areas of specific interest to the student such as orbital dynamics, spacecraft control, aircraft dynamics and control, chaos and chaotic dynamics, random vibrations, computer control of mechanical systems and robotics. The program provides the graduate student with a broad, well-rounded, advanced education that can be applied to many specific, technologically advanced fields in which dynamics and control play a pivotal role.

Aerospace Engineering (MS)

In addition to the general requirements listed in this catalogue, the department has identified requirements in the following areas of specialization: aerodynamics/fluid dynamics; aerospace controls; aerospace design; aerospace structures; computational fluid dynamics; hypersonics/kinetics of gases and plasmas; propulsion; and space science. Core requirements and elective requirements are defined for each area of specialization. Information on the current approved courses that comprise these core and elective requirements is available from the department.

Aerospace Engineering/Engineering Management (MS)

The department of Aerospace and Mechanical Engineering in conjunction with the Daniel J. Epstein Department of Industrial and Systems Engineering offers programs leading to the degree of Master of Science in Aerospace Engineering/Master of Science in Engineering Management. This program is designed for graduate aerospace engineers whose career objectives lead to increasing technical management responsibilities.

In addition to the general requirements of the Viterbi School of Engineering, the dual degree of Master of Science in Aerospace Engineering/Master of Science in Engineering Management is also subject to the following requirements:

1. All applicants must meet the admission requirements of both the Department of Aerospace and Mechanical Engineering and the Department of Industrial and Systems Engineering;
2. A minimum of 48 units is required;
3. A minimum of 18 units must be graduate-level course work in AME, approved by an AME graduate student adviser;
4. A minimum of 18 units must be graduate level course work in ISE, approved by the ISE Engineering Management graduate student adviser and chosen from the course list under Master of Science in Engineering Management;
5. A minimum additional 12 units of acceptable course work must be chosen with the consent of the ISE Engineering Management graduate student adviser to form a coherent program.

Mechanical Engineering (MS)

Requirements for the Master of Science in mechanical engineering are the same as set forth in the general requirements. Six of the required units must be in AME 525 and AME 526 or courses in engineering analysis approved in advance in writing by the Department of Mechanical Engineering.

The specific sequence of courses that constitutes an acceptable program must be approved in advance.

Requirements for Graduation Without Thesis, 27 units total with 3.0 GPA: AME 525 and AME 526 or approved mathematics (6); 500 level courses in major department (12); approved 400 or 500 level courses (9).

With Thesis, 27 units total with 3.0 GPA: AME 525 and AME 526 or approved mathematics (6); 500 or 600 level courses in major department (12) not including thesis; maximum AME 594a, AME 594b — thesis (4); approved 400 or 500 level units (5) (a maximum total of 8 units combining AME 590 and AME 594a, AME 594b).

Recommended Programs of Study

The program of study depends upon the student's interest and background. During the first semester at USC, students must consult with a departmental adviser about an area of concentration and draw up a plan of study, which must be approved by the adviser. Besides the common requirements, listed below are several areas in mechanical engineering with specific courses identified as core and core electives. Groups of courses in other combinations and from other departments within the university may be approved if a particular coordinated interest can be demonstrated. In some instances students whose background is not in mechanical engineering may be required to take additional course work.

Common Requirements

Engineering Analysis (6 units):

- AME 525 Engineering Analysis Units: 3
- AME 526 Engineering Analytical Methods Units: 3

Engineering electives (3–6 units):

- Approved 400-, 500- or 600-level courses

Engineering Design

Core courses (9 units):

- AME 503 Advanced Mechanical Design Units: 3
- AME 505 Engineering Information Modeling Units: 3
- AME 509 Applied Elasticity Units: 3

Core electives (6 units):

Two courses from

- AME 404 Computational Solutions to Engineering Problems Units: 3
• AME 527 Elements of Vehicle and Energy Systems Design Units: 3
• AME 541 Linear Control Systems II Units: 3
• ASTE 520 Spacecraft System Design Units: 3
• ASTE 523 Design of Low Cost Space Missions Units: 3
• CE 529a Finite Element Analysis Units: 3
• CE 529b Finite Element Analysis Units: 3
• SAE 549 Systems Architecting Units: 3

Thermal and Fluid Sciences

Core courses (12 units):
Four courses from one of the selected areas:

Combustion:
• AME 436 Energy and Propulsion Units: 3
• AME 513 Principles of Combustion Units: 3
• AME 514 Applications of Combustion and Reacting Flows Units: 3
• AME 530a Dynamics of Incompressible Fluids Units: 3

Fluid Dynamics:
• AME 457 Engineering Fluid Dynamics Units: 3
• AME 511 Compressible Gas Dynamics Units: 3
• AME 530a Dynamics of Incompressible Fluids Units: 3
• AME 535a Introduction to Computational Fluid Mechanics Units: 3

Heat Transfer:
• AME 457 Engineering Fluid Dynamics Units: 3
• AME 515 Advanced Problems in Heat Conduction Units: 3
• AME 516 Convection Processes Units: 3
• AME 517 Radiation Heat Transfer Units: 3

Core electives (6 units):
Take two courses from the following list, not duplicating the above selection:
• AME 436 Energy and Propulsion Units: 3
• AME 457 Engineering Fluid Dynamics Units: 3
• AME 511 Compressible Gas Dynamics Units: 3
• AME 513 Principles of Combustion Units: 3
• AME 514 Applications of Combustion and Reacting Flows Units: 3
• AME 515 Advanced Problems in Heat Conduction Units: 3
• AME 516 Convection Processes Units: 3
• AME 517 Radiation Heat Transfer Units: 3
• AME 533 Multi-Phase Flows Units: 3
• AME 535a Introduction to Computational Fluid Mechanics Units: 3

• AME 535b Introduction to Computational Fluid Mechanics Units: 3
• AME 537 Microfluidics Units: 3

Mechanics and Materials

Core courses (12 units):
• AME 509 Applied Elasticity Units: 3
• AME 559 Creep Units: 3
• AME 560 Fatigue and Fracture Units: 3
• AME 584 Fracture Mechanics and Mechanisms Units: 3

Core elective (3 units):
One of
• AME 542 Theory of Plates Units: 3
• AME 588 Materials Selection Units: 3
• CE 529a Finite Element Analysis Units: 3

Microelectromechanical Systems (MEMS)

Core courses (12 units):
• AME 455 Introduction to MEMS Units: 3
• AME 537 Microfluidics Units: 3
• BME 551 Introduction to Bio-MEMS and Nanotechnology Units: 3
• EE 607 Microelectromechanical Systems Units: 3

Core elective (3 units):
One of
• AME 535a Introduction to Computational Fluid Mechanics Units: 3
• ASTE 501a Physical Gas Dynamics Units: 3
• ASTE 545 Computational Techniques in Rarefied Gas Dynamics Units: 3

Dynamics and Control

Students interested in this area may follow the M.S., Aerospace and Mechanical Engineering (Dynamics and Control) described below.

Mechanical Engineering (Nuclear Power) (MS)

Note: Applications for this degree are not currently being accepted.

The program offers the degree of Master of Science in mechanical engineering with specialization in nuclear power. It is structured so that students who have all the prerequisites can complete the entire program through distance education. It is intended for students with an undergraduate degree in engineering. However, students with a physics and/or chemistry background can be accommodated with the completion of certain prerequisites.

Fundamental
• AME 525 Engineering Analysis Units: 3
• AME 526 Engineering Analytical Methods Units: 3
Core

- AME 534 Nuclear Thermal-Hydraulics Units: 3
- AME 581 Introduction to Nuclear Engineering Units: 3
- AME 582 Nuclear Reactor Physics Units: 3
- AME 583 Effects of Radiation on Health Units: 3
- CE 571 Nuclear Safety and Security: Human Performance and Safety Culture Units: 3

Electives — Choose 6 Units

- AME 457 Engineering Fluid Dynamics Units: 3
- AME 515 Advanced Problems in Heat Conduction Units: 3
- AME 516 Convection Processes Units: 3
- AME 517 Radiation Heat Transfer Units: 3
- AME 530a Dynamics of Incompressible Fluids Units: 3
- AME 530b Dynamics of Incompressible Fluids Units: 3
- AME 533 Multi-Phase Flows Units: 3
- AME 535a Introduction to Computational Fluid Mechanics Units: 3
- AME 577 Survey of Energy and Power for a Sustainable Future Units: 3
- AME 578 Modern Alternative Energy Conversion Devices Units: 3
- CHE 502 Numerical Methods for Diffusive and Convective Transport Units: 3
- EE 526 Renewable Energy in Power Systems Units: 3
- ENE 516 Hazardous Waste Management Units: 3

Total units: 27

Mechanical Engineering/Engineering Management (MS)

The department of Aerospace and Mechanical Engineering in conjunction with the Daniel J. Epstein Department of Industrial and Systems Engineering offers programs leading to the degree of Master of Science in Mechanical Engineering/Master of Science in Engineering Management. This program is designed for graduate mechanical engineers whose career objectives lead to increasing technical management responsibilities.

In addition to the general requirements of the Viterbi School of Engineering, the dual degree of Master of Science in Mechanical Engineering/Master of Science in Engineering Management is also subject to the following requirements:

1. All applicants must meet the admission requirements of both the Department of Aerospace and Mechanical Engineering and the Department of Industrial and Systems Engineering;
2. A minimum of 48 units is required;
3. A minimum of 18 units must be graduate level course work in AME, approved by an AME graduate student adviser;
4. A minimum of 18 units must be graduate level course work in ISE, approved by the ISE Engineering Management graduate student adviser and chosen from the course list under Master of Science in Engineering Management;
5. A minimum additional 12 units of acceptable course work must be chosen with the consent of the ISE Engineering Management graduate student adviser to form a coherent program.

Professors: Daniel A. Erwin, PhD* (Aerospace Engineering), Mike Gruntman, PhD (Aerospace Engineering, Systems Architecting and Engineering), Joseph A. Kunc, PhD (Physics and Astronomy, Aerospace Engineering, Systems Architecting and Engineering), Azad Madni, PhD (Systems Architecting and Engineering)
Associate Professor: Joseph Wang, PhD
Professor of Engineering Practice: George Friedman, PhD (Systems Architecture and Engineering)
Adjunct Professors: Robert Brodsky, PhD; Gerald Hintz, PhD; William Tobiska, PhD; James Wertz, PhD
Adjunct Associate Professor: Michael Kezirian, PhD

Research Professor: Herbert Schorr, PhD (Computer Science), Vice Dean for Engineering, Executive Director Emeritus, Information Sciences Institute
Research Associate Professor: Sergey Gimelshein, PhD
Research Assistant Professors: Jo Ann Lane, PhD; Anita Sengupta, PhD; Marc Sparagen, PhD

Aerospace Engineering Honor Society: Sigma Gamma Tau

Degree Requirements

Undergraduate Program Educational Objectives

The Bachelor of Science degree program in Astronautical Engineering has the following objectives:

Within a few years of graduation, graduates will:

- Establish themselves as practicing professionals, or undertake advanced study, in astronautical engineering or a related field;
- Demonstrate their ability to perform successfully as members of a team and function effectively as responsible professionals.

*Recipient of university-wide or school teaching award.
Undergraduate Program Criteria
The program leading to a Bachelor of Science in Astronautical Engineering prepares graduates to have knowledge of orbital mechanics, space environment, attitude determination and control, telecommunications, space structures and rocket propulsion. The program also prepares graduates to have design competence that includes integration of astronautical topics.

Engineer in Astronautical Engineering
Requirements for the Engineer degree in Astronautical Engineering are the same as set forth in the general requirements. See the general requirements for Viterbi graduate degrees.

Credit for classes may be applied toward the MS, Engineer or PhD in Astronautical Engineering, should the student decide later to pursue an advanced degree. In order to be admitted to the MS program, the student should maintain a B average or higher in courses for the certificate and must satisfy all normal admission requirements. All courses for the certificate must be taken at USC. It is anticipated that other classes on emerging space technologies will be added to the list of the offered classes in the future.

Bachelor's Degree
Astronautical Engineering (BS)
The Bachelor of Science in Astronautical Engineering prepares students for engineering careers in the space industry, for research and development in industry and government centers and laboratories, and for graduate study. The program combines a core in the fundamentals of engineering, specialized work in astronautics and space technology, and technical electives to broaden and/or deepen the course work.

The requirement for this degree is 131 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken. See also the common requirements for undergraduate degrees section.

Elective-Technical elective Units: 9 **

Total units: 131

* Satisfies GE Category III requirement.
** Technical electives consist of (1) any upper division course in engineering except CE 404, CE 412 and ISE 440, or (2) an upper division course in chemistry, physics or mathematics and MATH 225. No more than 3 units of 490 course work can be used to satisfy the technical elective requirement.
+The university allows engineering majors to replace the GE Category IV with a second course in Categories I, II or VI.

Minor
Astronautical Engineering Minor
This program is for USC students who wish to work in the space industry and government space research and development centers and who are pursuing bachelor's degrees in science, mathematics or engineering with specializations other than in astronautical engineering.

The space industry employs a wide variety of engineers (electrical, mechanical, chemical, civil, etc.); scientists (physicists, astronomers, chemists); and mathematicians. These engineers participate in development of advanced space systems but they usually lack the understanding of basic fundamentals of astronautics and space systems. The minor in astronautical engineering will help overcome this deficiency and provide unique opportunities for USC engineering, science and mathematics students, by combining their basic education in their major field with the industry specific minor in astronautical engineering.

600
Required course work consists of a minimum of 18 units. Including prerequisites, the minor requires 46 units. Three courses, or 9 units, at the 400 level will be counted toward the minor degree. The course work is a balanced program of study providing the basic scientific fundamentals and engineering disciplines critically important for contributing to development of complex space systems.

**Prerequisite courses:**
- MATH 125g Calculus I Units: 4
- MATH 126 Calculus II Units: 4
- MATH 226 Calculus III Units: 4
- MATH 245 Mathematics of Physics and Engineering I Units: 4
- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4
- PHYS 153L Fundamentals of Physics III: Optics and Modern Physics Units: 4

**Required Courses**
- ASTE 280 Foundations of Astronautical Engineering Units: 3
- ASTE 301a Thermal and Statistical Systems Units: 3
- ASTE 330 Introduction to Spacecraft Systems and the Space Environment Units: 3
- ASTE 421x Space Mission Design Units: 3
- ASTE 470 Spacecraft Propulsion Units: 3
- ASTE 480 Spacecraft Dynamics Units: 3

**Total minimum units: 18**

**Master's Degree**

**Astronautical Engineering (MS)**

This degree is in the highly dynamic and technologically advanced area of astronautics and space technology. The program is designed for those with BS degrees in science and engineering who wish to work in the space sector of the defense/aerospace industry, government research and development centers, and laboratories and academia. The program is available through the USC Distance Education Network (DEN).

The general portion of the Graduate Record Examinations (GRE) and two letters of recommendation are required. Required courses: 27 units

**Core Requirement (12 Units)**
- ASTE 470 Spacecraft Propulsion Units: 3
- ASTE 520 Spacecraft System Design Units: 3
- ASTE 535 Space Environments and Spacecraft Interactions Units: 3
- ASTE 580 Orbital Mechanics I Units: 3

**Core Elective Requirement (9 Units — Choose Three Courses)**
- ASTE 501a Physical Gas Dynamics Units: 3
- ASTE 501b Physical Gas Dynamics Units: 3
- ASTE 523 Design of Low Cost Space Missions Units: 3
- ASTE 527 Space Studio Architecting Units: 3
- ASTE 529 Safety of Space Systems and Space Missions Units: 3
- ASTE 552 Spacecraft Thermal Control Units: 3
- ASTE 553 Systems for Remote Sensing from Space Units: 3
- ASTE 554 Spacecraft Sensors Units: 3
- ASTE 556 Spacecraft Structural Dynamics Units: 3
- ASTE 557 Spacecraft Structural Strength and Materials Units: 3
- ASTE 570 Liquid Rocket Propulsion Units: 3
- ASTE 572 Advanced Spacecraft Propulsion Units: 3
- ASTE 581 Orbital Mechanics II Units: 3
- ASTE 583 Space Navigation: Principles and Practice Units: 3
- ASTE 584 Spacecraft Power Systems Units: 3
- ASTE 585 Spacecraft Attitude Control Units: 3
- ASTE 586 Spacecraft Attitude Dynamics Units: 3

**Technical Elective Requirement (6 Units)**

Two 3-unit courses. Students are advised to select these two elective courses from the list of core electives or from other courses in astronautical engineering or from other science and engineering graduate courses, as approved by the faculty adviser. No more than 3 units of directed research (ASTE 590) can be applied to the 27-unit requirement. New courses on emerging space technologies are often offered; consult the current semester's course offerings, particularly for ASTE 599 Special Topics.

**Note:**
At least 21 units must be at the 500 or 600 level.

**Areas of Concentration:**

Students choose core elective and technical elective courses that best meet their educational objectives. Students can also concentrate their studies in the desired areas by selecting corresponding core elective courses. Presently, ASTE faculty suggest the following areas of concentration:

**Spacecraft Propulsion**
Choose two core electives from:
- ASTE 501a Physical Gas Dynamics Units: 3
- ASTE 501b Physical Gas Dynamics Units: 3
- ASTE 570 Liquid Rocket Propulsion Units: 3
- ASTE 572 Advanced Spacecraft Propulsion Units: 3
- ASTE 584 Spacecraft Power Systems Units: 3

**Spacecraft Dynamics**
Choose two core electives from:
- ASTE 556 Spacecraft Structural Dynamics Units: 3
- ASTE 557 Spacecraft Structural Strength and Materials Units: 3
- ASTE 581 Orbital Mechanics II Units: 3
- ASTE 583 Space Navigation: Principles and Practice Units: 3
- ASTE 585 Spacecraft Attitude Control Units: 3
- ASTE 586 Spacecraft Attitude Dynamics Units: 3

**Space Systems Design**
Choose two core electives from:
- ASTE 523 Design of Low Cost Space Missions Units: 3
- ASTE 527 Space Studio Architecting Units: 3
- ASTE 529 Safety of Space Systems and Space Missions Units: 3
ASTE 557 Spacecraft Structural Strength and Materials Units: 3

Spacecraft Systems
Choose two core electives from:
ASTE 552 Spacecraft Thermal Control Units: 3
ASTE 553 Systems for Remote Sensing from Space Units: 3
ASTE 554 Spacecraft Sensors Units: 3
ASTE 584 Spacecraft Power Systems Units: 3

Space Applications
Choose two core electives from:
ASTE 527 Space Studio Architecting Units: 3
ASTE 553 Systems for Remote Sensing from Space Units: 3
ASTE 554 Spacecraft Sensors Units: 3

University Certificate
Astronautical Engineering Certificate
The Certificate in Astronautical Engineering is designed for practicing engineers and scientists who enter space-related fields and/or want to obtain training in specific space-related areas. Students enroll at USC as limited status students; they must apply and be admitted to the certificate program after completion of no more than 9 units of required course work. The required course work consists of 12 units; students will choose four 3-unit courses from the following:

Required Courses (Choose Four)
ASTE 501a Physical Gas Dynamics Units: 3
ASTE 501b Physical Gas Dynamics Units: 3
ASTE 520 Spacecraft System Design Units: 3
ASTE 523 Design of Low Cost Space Missions Units: 3
ASTE 527 Space Studio Architecting Units: 3
ASTE 529 Safety of Space Systems and Space Missions Units: 3
ASTE 535 Space Environments and Spacecraft Interactions Units: 3

Note:
Most classes are available through the USC Distance Education Network (DEN).

Dwight C. and Hildagarde E. Baum Chair in Biomedical Engineering: Ellis F. Meng, PhD
Chonette Chair in Biomedical Technology: David Z. D'Argenio, PhD
David Packard Chair in Engineering: Theodore W. Berger, PhD
Cornellius J. Pings Chair in Biomedical Sciences: Mark Humayun, PhD (Ophthalmology)
Provost Professor of Biological Sciences, Biomedical Engineering, Physiology and Biophysics, Stem Cell Biology and Regenerative Medicine, Pediatrics, Radiology and Ophthalmology: Scott Fraser, PhD (Biological Sciences)

Doctoral Degree
Astronautical Engineering (PhD)
The PhD in Astronautical Engineering is awarded in strict conformity with the general requirements of the USC Graduate School. See general requirements for graduate degrees. The degree requires a concentrated program of study, research and a dissertation. Each student wishing to undertake a doctoral program must first be admitted to the program and then take the screening examination. This examination will emphasize comprehension of fundamental material in the graduate course work. Further guidance concerning admission, the screening exam and the full completion of courses, including those given outside the Department of Astronautical Engineering, can be obtained from the ASTE student adviser and program coordinators.
Adjunct Professors: Natasha Leporé, PhD (Pediatrics); Kwang Jin Kim, PhD (Medicine and Physiology); Peter Kuhn, PhD (Biological Sciences, Medicine, and Aerospace & Mechanical Engineering); Eu Meng Law (Radiology); Richard Leahy, PhD (Electrical Engineering and Radiology); Jay Lieberman, PhD (Orthopaedic Surgery); Charles Liu, MD, PhD (Neurological Surgery); Gerald E. Loeb, MD; Anupam Madhukar, PhD (Chemical Engineering and Materials Science, Physics); Vasilis Z. Marmarelis, PhD (Electrical Engineering); Jill McNitt-Gray, PhD (Biological Sciences); Ellis Meng, PhD (Electrical Engineering); Janet Moradian-Oldak (Biomedical Sciences – Dental); Krishna Nayak, PhD (Electrical Engineering); Chrysostomos Nikias, PhD (Electrical Engineering); Stefan Schaal, PhD (Computer Science); K. Kirk Shung, PhD; Armand R. Tanguay Jr., PhD (Electrical Engineering, Materials Science); Paul Thompson (KSOM/Ophthalmoology); Arthur W. Toga (KSOM/Ophthalmoology); Francisco Valero-Cuevas, PhD (Biokinesiology); Pin Wang, PhD, (Chemical Engineering and Materials Science); James D. Weiland, PhD (Ophthalmology); John C. Wood, MD, PhD (Medicine/Radiology); Stanley M. Yamashiro, PhD (Electrical Engineering) Associate Professors: Andrea Armani, PhD (Chemical Engineering and Materials Science); Robert H.-P. Chow, MD, PhD (Physiology and Biophysics); Christianne N. Heck (Clinical Neurology); Daniel P. Holschneider, MD (Psychiatry); Hossein Javadi, MD, PhD (Radiology); Noah Malmsdor, PhD (Chemical Engineering and Materials Science); Bartlett W. Mel, PhD; Nicolas Schweighofer, PhD (Biokinesiology); Travis Williams (Locker Hydrocarbon Research Institute); Jesse T. Yen, PhD Assistant Professors: Michael Bonaguidi, PhD (Stem Cell Biology and Regenerative Medicine); Eun Ji Chung, PhD; James Finley, PhD (Biokinesiology and Physical Therapy); Justin Haldar, PhD (Electrical Engineering); Stacey D. Finley, PhD; Radha Kalluri, PhD (Otolaryngology); Jason Kutch, PhD (Biokinesiology); J. Andrew MacKay, PhD (Pharmacology and Pharmaceutical Sciences); Megan McCain, PhD; Damien Rodger, MD, PhD (Clinical Ophthalmology); Keyye Shen, PhD; George Tolomiczenko (Neurology) Professor of Engineering Practice: Jean-Michel I. Maarek, Doc.Ing. Associate Professor of Engineering Practice: Brent Liu, PhD Research Professors: Cynthia Bir, PhD (Emergency Medicine); Jonathan G. Lasch, PhD (AMI-USC); Robert V. Shannon, PhD (Otolaryngology); Qifa Zhou, PhD Research Associate Professor: Dong Song, PhD Research Assistant Professor: Jean-Marie Bouteiller, PhD Associate Professors of Research: Stefan Bluml, PhD (Radiology); Tracy C. Grikscheit, MD (Surgery and Children’s Hospital); Eun Jin Lee, PhD (Ophthalmology); Rex A. Moats, PhD (Pathology, Radiology); Tishya A.L. Wren, MD, PhD (Orthopaedics/Pediatrics Children’s Hospital and Radiology) Assistant Professors of Research: Bo Han, PhD (Surgery); Natasha Leporé, PhD (Radiology and Children’s Hospital) Adjunct Professors: Sophia Chun, MD (VA Long Beach Healthcare System); Norberto Gryzwasz, PhD (Georgetown University); Konstantina S. Nikita (BME/KSOM) Adjunct Research Professor: Daniel Farkas, PhD (Spectral Molecular Imaging/The Brain Window) Adjunct Assistant Professors: Alireza Dibazar, PhD (General Electric, Global Research); Arkadiusz Gertych, PhD (Cedars-Sinai Medical Center); Leonid Litvak, PhD (Advanced Bionics Corp.); Philip Requejo, PhD (Ramón Los Amigos Medical Center and Kinesiology) Emeritus Professors: George A. Bekey, PhD (Electrical Engineering, Computer Science and Speech Science); H. K. Huang, DSc (Radiology) *Recipient of university-wide or school teaching award.

Degree Requirements
Undergraduate Program Educational Objectives
Graduates of the undergraduate program in Biomedical Engineering are expected to attain the following objectives within a few years after graduation:

- be engaged in a professional career in the biomedical or other related industries, or enrolled in advanced graduate studies including medical school;
- work in a technically competent manner to address challenges in engineering or their chosen profession, taking into consideration ethical and societal concerns;
- collaborate within their profession across technical disciplines;
- develop their technical knowledge and professional skills further by being active in professional societies, continuing their formal education, or attending professional workshops, meetings and seminars.

Undergraduate Program Criteria
The program leading to a Bachelor of Science in Biomedical Engineering provides both breadth and depth across the range of engineering topics implied by the title. The program prepares graduates to have an understanding of biology and physiology; and the capability to apply advanced mathematics (including differential equations and statistics), science and engineering to solve the problems at the interface of engineering and biology. The curriculum prepares graduates with the ability to make measurements on and interpret data from living systems, addressing the problems associated with the interaction between living and non-living materials and systems.

Minor in Craniofacial and Dental Technology
For a complete listing, see the Herman Ostrow School of Dentistry of USC.

Bachelor’s Degree
Biomedical Engineering (BS)
The Department of Biomedical Engineering offers a Bachelor of Science degree in Biomedical Engineering. Additionally, there are three possible areas of emphasis within this biomedical engineering program major. These are biochemical engineering, electrical engineering, and mechanical engineering. An area of emphasis appears in a special field on the transcript. The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the
major, regardless of the department in which the courses are taken. See common requirements for undergraduate degrees. Technical electives are to be selected from an approved list available in the department office.

Biomedical Engineering (MS)
The Master of Science in Biomedical Engineering is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. At least 28 approved units must be satisfactorily completed, of which at least 19 units must be at the 500 level or above. Four of these units may be thesis BME 594a, BME 594b, BME 594z, or Technical Elective Units: 4

The master's degree program provides students with a broad background, linking physiology with engineering science, necessary for entering interdisciplinary careers in medical technology or pursuing further graduate studies in a related field.

Required Courses
- BME 501 Advanced Topics in Biomedical Systems Units: 4
- BME 502 Advanced Studies of the Nervous System Units: 4
- BME 511 Physiological Control Systems Units: 3
- BME 513 Signal and Systems Analysis Units: 3 *
- BME 533 Seminar in Bioengineering Units: 1

Electives Technical Units: 9

Medical Device and Diagnostic Engineering (MS)
This program is designed to provide the knowledge and skills needed for the development of medical devices and diagnostic techniques, including aspects of medical product regulation and product development. The course of study requires successful completion of 28 units of course work and has been designed to be completed in three semesters of full-time study. Students in the program will complete a 19-unit core as well as selecting a 6-unit specialization (or "track") and one elective from a list provided by the department.

Required Courses
- BME 501 Advanced Topics in Biomedical Systems Units: 4 or
- BME 502 Advanced Studies of the Nervous System Units: 4
- BME 513 Signal and Systems Analysis Units: 3
- BME 650 Biomedical Measurement and Instrumentation Units: 3
- MPTX 511 Introduction to Medical Product Regulation Units: 3 or

BME 416 Development and Regulation of Medical Products Units: 3
MPTX 515 Quality Systems and Standards Units: 3 or
ISE 527 Quality Management for Engineers Units: 3
ISE 545 Technology Development and Implementation Units: 3
Technical elective Units: 3

Complete 6 units from one track from the following lists:

Regulation Track
- MPTX 513 Regulation of Medical Devices and Diagnostics Units: 3
- RSCI 527 Medical Product Safety Units: 3

Medical Technology and Device Science Track
- BME 535 Ultrasound Imaging Units: 3
- BME 551 Introduction to Bio-MEMS and Nanotechnology Units: 3
- BME 552 Neural Implant Engineering Units: 3
- BME 620L Applied Electrophysiology Units: 4

Product Development Track
- ISE 515 Engineering Project Management Units: 3
- ISE 555 Invention and Technology Development Units: 3

Total units: 28

Technical Elective (one course)
Applicable courses include: AME 503, BME 511, BME 535, BME 551, ISE 507, ISE 508, ISE 544, MPTX 517 and courses listed in alternate tracks to that chosen. Other courses may be applicable; please see an adviser for approval.

University Certificate
Health, Technology and Engineering Graduate Certificate

Academic Director: Terry Sanger, MD, PhD, Provost Associate Professor of Biomedical Engineering, Neurology, Biokinesiology, and Physical Therapy
Administrative Director: George Tolomiczenko, PhD, Assistant Professor, Neurology

This program offers current second-year USC PhD engineering students and first-year MD students an opportunity to learn about and gain experience in medical device and process innovation. Through project-based and interdisciplinary collaboration, students will augment their current programs with a set of courses and lab experiences linking medical and engineering research groups. By applying design-informed approaches toward problem identification and solution prototyping, students will be involved in all the steps of medical device or process innovation from conception to commercialization. The program aims to create interdisciplinary, boundary-spanning, inventive entrepreneurs seeking early practical experience with device and method innovation in health care. Program participants will form bonds with a group of like-minded
medical students and engineers who will be their mentors, colleagues and contacts as they advance in their careers. The courses unique to the program include a seminar sequence (Topics in Health, Technology and Engineering), which must be taken during the first two years of involvement with the HTE@USC program, a case studies sequence taken during the second year and a research course to earn project-related credits:

**Courses**

- BME 566a Topics in Health, Technology and Engineering Units: 2
- BME 566b Topics in Health, Technology and Engineering Units: 2
- BME 566c Topics in Health, Technology and Engineering Units: 2
- BME 566d Topics in Health, Technology and Engineering Units: 2
- BME 567a Case Studies in Health, Technology and Engineering Units: 1
- BME 567b Case Studies in Health, Technology and Engineering Units: 1
- 790 Research (in the student's major department) Units: 2-8

**Other required courses that are part of the MD curriculum**

(PhD students enroll in INTO course versions of the same courses open only to HTE students on CR/NC basis):
- INTO 621a Introduction to Clinical Medicine (ICM) for THE Units: 3
- INTO 621b Introduction to Clinical Medicine (ICM) for THE Units: 3
- INTO 622L Pre-clinical System Block for Health, Technology and Engineering Units: 3, 4, 5, 6, 7, 8, 9 (3-5 Units Required)

**Note:**
Candidates interested in applying should contact HTE@USC via email at hte@usc.edu.

**Doctoral Degree**

**Biomedical Engineering (PhD)**

The objective of the Doctor of Philosophy is to produce independent investigators who can make original scholarly contributions and apply advanced engineering concepts and techniques to the understanding and solution of biomedical problems. This program is intended to prepare the student for a career in academic research and teaching, or as an independent investigator in industrial or government laboratories. The requirements listed are special to this department and must be read in conjunction with the general requirements of the Graduate School.

This program is designed to be normally completed in four years of full-time work beyond the Bachelor of Science degree (including summers). The first two years are devoted primarily to formal course work and the last two to research. In view of the flexible program, each student is assigned an adviser who will guide him or her in the selection of courses. By the end of the third semester of graduate study the student must have completed the PhD screening examination. Subsequently, he or she is required to make a tentative major field selection (e.g., biomedical imaging, signal processing, neural engineering) and pass a qualifying examination. In accordance with the requirements of the Graduate School, at least 60 units of credit beyond the Bachelor of Science degree are required, with a minimum grade point average of 3.0. Students are required to take BME 533, the graduate biomedical engineering seminar course, for three semesters during their studies.

**Requirements for Admission**

Bachelor of Science degree in engineering or a natural science, and satisfactory scores on the Graduate Record Examinations. Undergraduate work should include a basic course in biology, physics, organic chemistry, biochemistry, differential equations and digital computation. Students lacking any of these will be required to make up the deficiency during the first two years of graduate work. Students who have completed all requirements for the Master of Science degree offered in this department may apply for admission to the PhD program. In this case, all courses taken in the MS program may be applied toward the requirements of the doctoral degree.

**Screening Examination Process**

By the end of the third semester of graduate study, all students must have completed the screening examination process to determine whether or not they will be allowed to continue in the Doctor of Philosophy program. Those who fail will be dropped from the program, although they may be permitted to complete the additional requirements necessary to obtain the Master of Science degree.

**Qualifying Exam Committee**

During the third semester, the student must make a tentative major field selection as described above and form a qualifying exam committee. The latter administers the qualifying examination.

**Qualifying Examination**

The qualifying examination will normally be taken during the fourth semester of full-time academic study. The examination requires the preparation of a comprehensive written research proposal that presents a research question, critically reviews the pertinent literature and outlines the proposed experimental, analytical and computational procedures required to answer the question. The proposal must be defended in an oral examination.

Chemical Engineering Honor Society: Omega Chi Epsilon

Degree Requirements
Undergraduate Program Educational Objectives
Chemical engineering is the only engineering discipline that makes extensive use of chemical transformations (reactions) in addition to physical transformations (refining, molding or machining) to achieve added value. Chemical engineers are employed in virtually all manufacturing industries, from the basic chemical, biochemical, materials, energy, food, pharmaceutical and microelectronics industries to the myriad consumer product industries. Our various curricula are designed to produce graduates who are broadly educated as well as highly adaptable.

Graduates of the undergraduate program in Chemical Engineering are expected to attain the following objectives within a few years after graduation:

- Apply their technical skills to model, analyze and design complex processes where physical, chemical or biochemical transformations are utilized to produce products and services that benefit society in an economically, environmentally and globally conscious manner.
- Be able to quickly respond to increasingly-rapid technological changes through continuous personal and professional development, and to pursue graduate or professional education in a variety of fields.
- Thrive in multidisciplinary and multicultural setting, and to assume leadership roles in their employment, organization or community.

Undergraduate Program Criteria
The program leading to a Bachelor of Science in Chemical Engineering provides a thorough grounding in the basic sciences including chemistry, physics and/or biology, with some content at an advanced level, as appropriate to the objectives of the program. The curriculum includes the engineering application of these basic sciences to the design, analysis and control of chemical, physical and/or biological processes, including the hazards associated with these processes.

Engineer in Chemical Engineering
Requirements for the Engineer in chemical engineering are the same as set forth in the general requirements. See general requirements for graduate degrees. Only available to graduate students currently enrolled.

Chemical Engineering Three-Two Plan
A special curriculum is available for obtaining a Bachelor of Science degree in chemical engineering and a Bachelor of Science or Bachelor of Arts degree in a letters, arts and sciences major in five years. For further information see departmental advisers.

Similar programs are available in cooperation with certain liberal arts colleges. Such programs are particularly suited for obtaining a Bachelor of Science in chemistry at the liberal arts college and a Bachelor of Science in chemical engineering at USC.

Bachelor's Degree
Chemical Engineering (BS)
Bachelor of Science in Chemical Engineering Degree
The Mork Family Department of Chemical Engineering offers a Bachelor of Science degree in Chemical Engineering. Additionally, there are six possible areas of emphasis within this chemical engineering program major. These are: biochemical engineering (133 units); environmental engineering (136 units); nanotechnology (132 units); petroleum engineering (137 units); polymer/materials science (137 units); and sustainable energy (128 units). An area of
emphasis appears in parentheses after the primary major name on the transcript.
Sample student schedules are located on the department Web page (chems.usc.edu).

Common Requirements for the BS Degree and All Areas of Emphasis (112 units)
See also common requirements for undergraduate degrees.

Composition/Writing Courses
WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4
WRIT 340 Advanced Writing Units: 3, 4 (3 Units Required)

General Education
General Education Units: 24

Chemistry Courses
CHEM 105aLg General Chemistry Units: 4 or
CHEM 115aLg Advanced General Chemistry Units: 4
CHEM 105bL General Chemistry Units: 4 or

CHE 444aL Chemical Engineering Laboratory Units: 3
CHE 444bL Chemical Engineering Laboratory Units: 3
CHE 445 Heat Transfer in Chemical Engineering Processes Units: 2
CHE 446 Mass Transfer in Chemical Engineering Processes Units: 2
CHE 460L Chemical Process Dynamics and Control Units: 3
CHE 480 Chemical Process and Plant Design Units: 3
CHE 485 Computer-Aided Chemical Process Design Units: 3

Additional Requirements for Individual Degrees

Bachelor of Science in Chemical Engineering
The requirement for the degree in the absence of an area of emphasis is 133 units. A cumulative grade point average of C (2.0) is required in all upper division courses applied toward the major, regardless of the department in which the courses are taken. In addition to the previously listed common requirements, students must also take the following courses:

Chemistry Technical Elective
CHEM 322bL Organic Chemistry Units: 4 or
CHEM 430b Physical Chemistry Units: 4

Chemical Engineering Courses
CHE 405 Applications of Probability and Statistics for Chemical Engineers Units: 3
CHE 476 Chemical Engineering Materials Units: 3
CHE Technical Elective
An upper division CHE course Units: 3

Additional Electives (8–9 Units)

Suggested Courses
CE 205 Statics Units: 2
EE 438L Processing for Microelectronics Units: 3
ISE 460 Engineering Economy Units: 3 or
BUAD 301 Technology Entrepreneurship Units: 3

Chemical Engineering, Biochemical Engineering Emphasis, (BS)

Bachelor of Science in Chemical Engineering Degree
The Mork Family Department of Chemical Engineering offers a Bachelor of Science degree in Chemical Engineering. Additional Requirements for Individual Degrees

Emphasis in Biochemical Engineering
The requirement for the degree with an emphasis in biochemical engineering is 133 units. A scholarship average of C (2.0) or higher is required for all upper division courses taken in chemical engineering, biomedical engineering and biological sciences. In addition to the previously listed common requirements, students must also take the following courses:

Biological Sciences Courses
BISC 300L Introduction to Microbiology Units: 4
BISC 320L Molecular Biology Units: 4
BISC 330L Biochemistry Units: 4

Bio-Electives
BISC 403 Advanced Molecular Biology Units: 4 or Approved bio-engineering elective Units: 3-4 **

BME 410 Introduction to Biomaterials and Tissue Engineering Units: 3
CHE 489 Biochemical Engineering Units: 3

Engineering Elective
CHE 405 Applications of Probability and Statistics for Chemical Engineers Units: 3 or
ISE 460 Engineering Economy Units: 3

Note:
*Students in the biochemical engineering option must take a minimum of 48 engineering units total to graduate.
**Student may combine a 3-unit approved bio-engineering elective with 1 unit of free elective.

or
EE 513 Solid State Energy Devices Units: 3

Hydrocarbons
Choose one:
CHE 486 Design of Environmentally Benign Process Plants Units: 3
or
PTE 519 Integrated Physical and Cyber Security for Oil and Gas Operations Units: 3

Note:
*Satisfies GE-D Life Science requirement

Other Electives
Choose one:
CHE 405 Applications of Probability and Statistics for Chemical Engineers Units: 3
or
ISE 460 Engineering Economy Units: 3
or
BUAD 301 Technology Entrepreneurship Units: 3*

Note:
*Must have 49 engineering units to be able to take BUAD 301.

Minor

Nanotechnology Minor
A minor in nanotechnology consisting of 17 required units is available to undergraduate majors in various fields. Nanotechnology involves the study of matter at length scales that are intermediate between the molecular and the bulk. In this minor, students will (1) learn in detail the properties of material structures on the nanometer scale, (2) examine a range of nanoscale materials, including metallic, ceramic, and polymeric particles as well as proteins, and (3) be exposed to a variety of specialized probes capable of visualizing matter on these length scales.

Prerequisite Courses
MATH 125g Calculus I Units: 4
MATH 126 Calculus II Units: 4
or
MATH 127 Enhanced Calculus II Units: 4
or
MATH 129 Calculus II for Engineers and Scientists Units: 4
PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4
CHEM 105aLg General Chemistry Units: 4
or
CHEM 115aLg Advanced General Chemistry Units: 4
CHEM 105bL General Chemistry Units: 4
or

Note:
*Must have 49 engineering units to be able to take BUAD 301.
CHEM 115bL Advanced General Chemistry Units: 4

**Required Courses**

Students can select either CHEM 322a or CHEM 325a. Both courses are not required.

CHEM 487 Nanotechnology and Nanoscale Engineering through Chemical Processes Units: 3
CHEM 322aL Organic Chemistry Units: 4

or
CHEM 325aL Organic Chemistry Units: 4
CHEM 455 Chemical Nanotechnology Units: 4
EE 337L Engineering Nano-Systems Units: 3
MASC 350L Nanostructured Materials: Design, Synthesis, and Processing Units: 3

**Minimum Units:** 17

**Master's Degree**

**Chemical Engineering (MS)**

The Master of Science in chemical engineering is awarded in strict conformity with the general requirements of the USC Viterbi School of Engineering with the exception that the minimum unit requirement is 28. Registration in either CHEM 550a, CHEM 550b or CHEM 590 is required.

**Doctoral Degree**

**Chemical Engineering (PhD)**

The Doctor of Philosophy (PhD) degree in chemical engineering is awarded in conformity with the general requirements of the Graduate School. See general requirements for graduate degrees.

**Departmental Policies and Requirements**

In addition to the general requirements for the PhD described in this catalogue, candidates in chemical engineering are required to demonstrate proficiency in the following fields: thermodynamics, fluid flow, heat and mass transfer and chemical engineering kinetics. Registration in CHEM 550a, CHEM 550b is required of all students. More detailed statements of the departmental requirements may be found in a brochure available upon request from the Mork Family Department of Chemical Engineering and Materials Science office.

*Recipient of university-wide or school teaching award.

**Engineer in Materials Science**

Requirements for the Engineer in materials science degree are the same as set forth in the general requirements for graduate degrees.

**Master of Science in Materials Engineering**

Students with an interest in the characterization, selection and processing of engineering materials, and in materials problems related to engineering design may work toward a Master of Science in materials engineering. This degree is awarded in conformity with the general requirements of the Viterbi School of Engineering. Students may elect to work for this degree in either the Materials Science or Aerospace
and Mechanical Engineering departments. The specific courses that constitute an acceptable program must be approved in advance by the administering department.

Master's Degree
Materials Science (MS)
In addition to the general requirements for the Master of Science degree, add the following required courses: CHE 501, EE 471, MASC 501, MASC 503, MASC 504, MASC 505 and MASC 551. The six remaining units for the degree may be electives chosen with departmental approval.

Doctoral Degree
Materials Science (PhD)
The Doctor of Philosophy with a major in materials science is awarded in strict conformity with the general requirements of the USC Graduate School. It includes the course requirements for the Master of Science degree, which are required courses CHE 501, EE 471, MASC 501, MASC 503, MASC 504, MASC 505 and MASC 551. See general requirements for graduate degrees.

Petroleum Engineering Honor Society: Pi Epsilon Tau

Degree Requirements
Bachelor of Science in Chemical Engineering
Emphasis in Petroleum Engineering
See the listing under Chemical Engineering.

Bachelor of Science in Mechanical Engineering
Emphasis in Petroleum Engineering
See the listing under Aerospace and Mechanical Engineering.

Engineer in Petroleum Engineering
Requirements for the Engineer degree in petroleum engineering are the same as set forth in the general requirements. See general requirements for graduate degrees.

Minor
Petroleum Engineering Minor
A minor in petroleum engineering consisting of 16 required units is available to undergraduate majors in various fields of engineering and applied science. Besides preparing for graduate study in petroleum engineering, the program will prepare students for careers in areas of national need such as the exploration, recovery and production of subterranean resources, and the underground disposal of hazardous wastes.

Prerequisite courses:
MATH 125g Calculus I Units: 4
MATH 126 Calculus II Units: 4
MATH 226 Calculus III Units: 4
MATH 245 Mathematics of Physics and Engineering I Units: 4
PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
CHEM 105aLg General Chemistry Units: 4

Required Courses
PTE 461 Formation Evaluation Units: 3
PTE 462 Economic, Risk and Formation Productivity Analysis Units: 4
PTE 463L Introduction to Transport Processes in Porous Media Units: 3
PTE 464L Petroleum Reservoir Engineering Units: 3
Petroleum Engineering (Geoscience Technologies) (MS)
The Master of Science in Petroleum Engineering (Geoscience Technologies) is a unique degree that emphasizes recent developments in the field of unconventional oil and gas resources and modern techniques for mapping and monitoring of subterranean resources. The program may be completed via the USC Viterbi School’s Distance Education Network (DEN). All courses for the degree must be taken at USC.

Students without a BS in Petroleum Engineering will normally be required to complete prerequisite courses before beginning the MS program. Specific prerequisite courses are decided upon consultation with the department adviser. Units from these courses cannot be applied toward the degree.

A minimum of 34 units is required to earn the MS in Petroleum Engineering (Geoscience Technologies). Core Required Courses (18 Units)
- PTE 507 Engineering and Economic Evaluation of Subsurface Reservoirs Units: 3
- PTE 508 Numerical Simulation of Subsurface Flow and Transport Processes Units: 3
- PTE 517 Testing of Wells and Aquifers Units: 3
- PTE 531 Enhanced Oil Recovery Units: 3, 2 years
- PTE 555 Well Completion, Stimulation, and Damage Control Units: 3
- PTE 582 Fluid Flow and Transport Processes in Porous Media Units: 3, 2 years

Take 4 Out of 5 Courses Shown Below (12 Units)
- PTE 502 Advanced Reservoir Characterization Units: 3
- PTE 503 Technology of Unconventional Oil and Gas Resources Development Units: 3
- PTE 504 Geophysics for Petroleum Engineers Units: 3
- PTE 505 Inverse Modeling for Dynamic Data Integration Units: 3
- PTE 572 Geostatistics Units: 3

Additional Requirements
Elective from a group of approved PTE courses: Units: 4

Petroleum Engineering (MS)
The Master of Science in petroleum engineering is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. Electives vary according to the area of interest. A student may be permitted to elect the program without thesis upon approval from the department.

Petroleum Engineering (Smart Oilfield Technologies) (MS)
The Master of Science in petroleum engineering (smart oilfield technologies) is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. A student may be permitted to elect the program without thesis upon approval from the department. Course requirements are similar to the existing MS degree in petroleum engineering in terms of core requirements.

Students without a BS in Petroleum Engineering will normally be required to complete prerequisite courses before beginning the MS program. Specific prerequisite courses are decided upon consultation with the department adviser. Units from these courses cannot be applied toward the degree.

University Certificate
Smart Oilfield Technologies Certificate
The certificate in smart oilfield techniques is designed for practicing engineers and scientists who enter petroleum engineering related fields and/or who wish to obtain training in the specific smart oilfields area. The applicants may enroll at USC as limited status students. They must apply and be admitted to the program before they complete 9 units of the required course work. The certificate program is open to applicants with an undergraduate degree in engineering or sciences who meet the admission criteria as limited students.

Students without a B.S. in Petroleum Engineering will normally be required to complete prerequisite courses before beginning the certificate program. Specific prerequisite courses are decided upon consultation with the department adviser. Units from these courses cannot be applied toward the certificate.

The required courses consist of the following 12 units:

Required Courses
- PTE 586 Intelligent and Collaborative Oilfield Systems Characterization and Management Units: 3
- PTE 587 Smart Completions, Oilfield Sensors and Sensor Technology Units: 3
- PTE 588 Smart Oilfield Data Mining Units: 3
- PTE 589 Advanced Oilfield Operations with Remote Immersive Visualization and Control Units: 3

Note:
These classes will be available through the USC Distance Education Network (DEN@Viterbi). The credit for classes may be applied toward the M.S. or Ph.D. in petroleum engineering should the student decide later to pursue an advanced degree. In order to be admitted to the M.S. program, the student should maintain a B average or higher in courses for the certificate program and must satisfy all normal admission requirements. All courses for the certificate must be taken at USC.

Dual Degree
Petroleum Engineering (MS)/Engineering Management (MS)
The Daniel J. Epstein Department of Industrial and Systems Engineering in conjunction with the department of Petroleum Engineering offers programs leading to the degree of MS Petroleum Engineering/MS Engineering Management. The program is designed for graduate petroleum engineers whose career objectives lead to increasing technical management responsibilities.
Required Courses
36 units of required courses from PTE and ISE combined
ISE 500 Engineering Management Decisions and Statistics Units: 3
ISE 514 Advanced Production Planning and Scheduling Units: 3
ISE 515 Engineering Project Management Units: 3
ISE 544 Management of Engineering Teams Units: 3
ISE 561 Economic Analysis of Engineering Projects Units: 3
ISE 566 Financial Accounting Analysis for Engineering Units: 3
PTE 507 Engineering and Economic Evaluation of Subsurface Reservoirs Units: 3
PTE 508 Numerical Simulation of Subsurface Flow and Transport Processes Units: 3
PTE 517 Testing of Wells and Aquifers Units: 3
PTE 531 Enhanced Oil Recovery Units: 3, 2 years
PTE 555 Well Completion, Stimulation, and Damage Control Units: 3
PTE 582 Fluid Flow and Transport Processes in Porous Media Units: 3, 2 years

Elective units
Student is to complete 9 units of PTE courses selected by student and PTE faculty adviser.

Doctoral Degree
Petroleum Engineering (PhD)
The Doctor of Philosophy with a major in petroleum engineering is also offered. See general requirements for graduate degrees.

Chi Epsilon Civil Engineering Honor Society
Chi Epsilon is dedicated to the purpose of maintaining and promoting the status of civil engineering as a profession. Chi Epsilon was organized to recognize the characteristics of the individual civil engineer deemed to be fundamental to the successful pursuit of an engineering career and to aid in the development of those characteristics in the civil engineering student. To contribute to the improvement of the profession, Chi Epsilon fosters the development and exercise of sound traits of character and technical ability among civil engineers.
Chi Epsilon is based on broad principles of scholarship, character, practicality and sociability. Civil engineering students who rank in the upper one-third of the junior or senior class are eligible for membership. These qualifications will make one eligible but not necessarily acceptable. Each member must be well skilled in all four of the basic principles.

**Degree Requirements**

**Undergraduate Program Educational Objectives**

Fulfilling the vision of the Sonny Astani Department of Civil and Environmental Engineering, the Viterbi School of Engineering and the University of Southern California, our graduates will:

- Be successful in their professional careers, become leaders in industry, academia, government or service, while adapting their technical, collaborative and managerial skills for the benefit of Society's built and natural environments.
- Support the advancement of the practice of science and engineering, while maintaining professional standards and moral and legal obligations to society, while being active in professional organizations and obtaining professional licensure when appropriate.
- Be prepared to pursue graduate studies in engineering or other disciplines, while continuously broadening their abilities and enhancing their technical skills to maintain their relevance with technological change.

**Undergraduate Program Criteria**

The program leading to a Bachelor of Science in Civil Engineering prepares graduates to apply knowledge of mathematics through differential equations, calculus-based physics, chemistry and at least one additional area of basic science, consistent with the program educational objectives; apply knowledge of four technical areas appropriate to civil engineering; conduct civil engineering experiments and analyze and interpret the resulting data; and design a system, component, or process in more than one civil engineering context. The program also explains basic concepts in management, business, public policy, and leadership; and explains the importance of professional licensure.

The program leading to a Bachelor of Science in Environmental Engineering prepares graduates to be proficient in mathematics through differential equations, probability and statistics, calculus-based physics, general chemistry; an earth science, e.g., geology, meteorology, soil science, relevant to the program of study; a biological science, e.g., microbiology, aquatic biology, toxicology, relevant to the program of study; fluid mechanics relevant to the program of study; and an introductory level knowledge of environmental issues associated with air, land, and water systems and associated environmental health impacts. The program prepares graduates to be proficient at conducting laboratory experiments and critically analyzing and interpreting data in more than one major environmental engineering focus area, e.g., air, water, land, environmental health; performing engineering design by means of design experiences integrated throughout the professional component of the curriculum; and to be proficient in advanced principles and practice relevant to the program objectives; including understanding of concepts of professional practice and the roles and responsibilities of public institutions and private organizations pertaining to environmental engineering.

**Graduate Programs**

**Master of Science in Civil Engineering**

(Transportation Systems)

See Sustainable Infrastructure Systems Program.

**Master of Science in Civil Engineering (Water and Waste Management)**

See Sustainable Infrastructure Systems Program.

**Engineer in Civil Engineering**

Requirements for the Engineer in Civil Engineering are the same as set forth in the general requirements.

**Bachelor's Degree**

**Applied Mechanics (BS)**

The requirement for this degree is 128 units. A cumulative grade point average of C (2.0) is required in all upper-division courses applied toward the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees section.

Civil Engineering (BS)
The department offers a Bachelor of Science degree in Civil Engineering. Additionally, there are three possible areas of emphases within this civil engineering program major. These are building science, environmental engineering and structural engineering. An area of emphasis appears in parentheses after the primary major name on the transcript.

Bachelor of Science in Civil Engineering
The requirement for the degree is 133 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper-division courses applied toward the major, regardless of the department in which the courses are taken. In addition, a minimum grade of C must be earned in each of the following courses: CE 205, CE 225, CE 309 and CE 235. See also common requirements for undergraduate degrees.

Design Kernel Civil Engineering Design Kernel Course Units: 6 **
Total units: 133
**Satisfies General Education requirement.

***Design kernel courses must be selected from the following list of design courses: CE 457, CE 465, CE 466, CE 476, CE 478, CE 482, CE 484 and CE 485.

Tracks
In addition to the core courses, students are required to select one of the following tracks: General, Construction or Water Resources.

General Track
Choose one of the following: CE 480 as the capstone course and CE 482 as a required design kernel course; or CE 465 as the capstone course and CE 466 or CE 476 as a required design kernel course.

The civil engineering electives may be chosen freely.

Construction Track
Select CE 480 as the capstone course and CE 482 as a required design kernel course. Replace CE 453 with CE 412. CE 460 is a required elective. The other civil engineering electives must be chosen from the following list: CE 461, CE 462, CE 469 and CE 470.

Water Resources Track
Select CE 465 as the capstone course and select one of the following as a required design kernel course: CE 466 or CE 476. The civil engineering electives must be selected from the following list: CE 466, CE 476 and CE 490.

All curricula leading to a degree must be approved by the Astani Department of Civil and Environmental Engineering; please note this includes transfer credit and units for courses waived for subject credit only, which have been approved through the Degree Progress department.

Civil Engineering, Building Science Emphasis (BS)
The requirement for the degree with an emphasis in building science is 137 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper-division courses applied toward the major, regardless of the department in which the courses are taken. In addition, a minimum grade of C must be earned in each of the following courses: CE 205, CE 225, CE 309 and CE 235. See also the common requirements for undergraduate degrees section.

623
and ARCH 405a, ARCH 405b in order to continue in the building science design sequence.

****The civil engineering elective must be selected from the following courses: CE 451, CE 453, CE 460 and CE 471.

All curricula leading to a degree must be approved by the Astani Department of Civil and Environmental Engineering; please note this includes transfer credit and units for courses waived for subject credit only, which have been approved through the Degree Progress department.

Civil Engineering, Environmental Engineering Emphasis (BS)

The requirement for the degree with an emphasis in environmental engineering is 130 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied toward the major, regardless of the department in which the courses are taken. In addition, a minimum grade of C must be earned in each of the following courses: CE 205, CE 225, CE 309 and CE 235. See also common requirements for undergraduate degrees.

Composition/Writing Requirement

WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4
WRIT 340 Advanced Writing Units: 3, 4 (3 Units Required)

General Education

General Education Units: 24

Pre-Major Requirements

Chemistry Requirement

CHEM 105aLg General Chemistry Units: 4 or
CHEM 115aLg Advanced General Chemistry Units: 4*

CHEM 105bL General Chemistry Units: 4 or

Minor

Construction Planning and Management Minor
This program covers the most current theories and practice of construction planning and management. The program provides a valuable adjunct credential to professional school students pursuing careers in business administration, public administration, architecture, environmental studies, and other areas; and a unique opportunity for professional focus to students in the USC Dornsife College of Letters, Arts and Sciences.

Construction activities are complex. In contemporary society, effective planning and management of these activities requires specialized knowledge of the technical, economic and policy environment. This program couples the knowledge of how construction activities are organized with a broader understanding of the urban system in which construction projects are embedded. With the exception of statistics, all of the required courses are within the Astani Department of Civil and Environmental Engineering and the USC Price School of Public Policy. Any USC undergraduate who has completed the equivalent of two full-time semesters in good standing is eligible to pursue the minor program. This minor program is rigorous enough to serve as an introductory credential for students subsequently electing to pursue advanced studies in development, urban planning, construction management, architecture or allied fields.

Courses Required
Seven courses consisting of at least 23 units are required for the minor.

Statistics
Students must complete an adviser-approved course in statistics. Candidate courses include ECON 317, EE 364, ISE 220, MATH 208, PPD 303, PSYC 274, SOCI 314 and similar courses. The statistics course must be at least 3 units.

Core Courses
CE 460 Construction Engineering Units: 3
CE 461 General Construction Estimating Units: 3
CE 462 Construction Methods and Equipment Units: 3

Capstone Courses
CE 469 Sustainable Design and Construction Units: 3  
or  
CE 470 Building Information Modeling and Integrated  
Practice Units: 3

**Theme Requirement: Two courses, both from Theme 1 or Theme 2 or Theme 3**

**Theme 1**
- PPD 358 Urban and Regional Economics Units: 4  
- RED 362 Real Estate Development Fundamentals Units: 4 *

**Theme 2**
- FBE 400x Introduction to Real Estate Finance and Development Units: 4  
- FBE 466 Management of Real Estate Development: Feasibility Studies Units: 4

**Theme 3**
- PPD 357 Government and Business Units: 4 *  
- RED 435 Analyzing Real Estate Markets Units: 4 *

**Total units: 17**

**Electives (Select One)**
- CE 404 Business and Intellectual Property Law for Engineers Units: 3  
- CE 412 Construction Law and the Property Development Process Units: 3  
- RED 437 Advanced Finance and Investment for Real Estate Development Units: 4 *

**Notes:**
*Prerequisite required.
Advisement is provided by the Astani Department of Civil and Environmental Engineering. Students will normally complete statistics before enrolling in CE 461 but can be permitted to complete statistics as a corequisite subject to adviser approval. Students are advised to take CE 460 and CE 461 before taking CE 462. Students electing RED courses from the themes or electives must satisfy the prerequisites. Please see the Price School section or schedule of classes for the prerequisites.

**Master's Degree**

**Civil Engineering (MS)**
The Master of Science in Civil Engineering is awarded in strict conformity with the general requirements of the USC Viterbi School of Engineering. A student may receive the Master of Science in Civil Engineering with a special option by specializing in one of the following courses of study: construction engineering; structural engineering; and transportation engineering. Students specializing in the transportation option and completing a thesis must include in their program 4 units of CE 594a and CE 594b.

A general Master of Science in Civil Engineering without special designation is also given. Students pursuing this program will choose between the following special options: general, earthquake engineering, structural mechanics, water resources or ocean and coastal engineering.

A student who wishes to pursue the Master of Science in Civil Engineering without special designation and who has an interest in public works may take a selected sequence of 12 units in the USC Price School of Public Policy. For further information, see the Public Administration Professional Sequence section in the USC Price School of Public Policy.

**Construction Management (MCM)**
Students possessing a bachelor's degree and with sufficient training in capital management and statistics may pursue the Master of Construction Management. The purpose of the Master of Construction Management program is to educate and train multidisciplinary professionals to understand and execute the broad array of technical and non-technical activities associated with construction management. The program provides special attention to the function of the constructor in real estate development. The program is drawn from the MS, Civil Engineering program in construction engineering and management, and from the USC Marshall School of Business.

Applicants to the program are expected to have completed undergraduate course work in engineering economy or business finance.

**Core Curriculum**
- ARCH 511L Building Systems: Materials and Construction Units: 4  
- CE 501 Functions of the Constructor Units: 3

CE 502 Construction Accounting and Finance Units: 3  
or  
ACCT 509 Concepts of Financial and Management Accounting Units: 4  
or  
ISE 566 Financial Accounting Analysis for Engineering Units: 3

CE 556 Project Controls — Budgeting and Estimating Units: 3  
CE 566 Project Controls — Planning and Scheduling Units: 3

**Track Requirement: Two Courses, Both From Track 1, Track 2, or Track 3**

**Track 1: Finance Track**
- FBE 400x Introduction to Real Estate Finance and Development Units: 4 *  
- FBE 489 Real Estate Capital Markets Units: 4  
- FBE 570 Advanced Topics in Real Estate Finance Units: 3 *  
- FBE 589 Mortgages and Mortgage-Backed Securities and Markets Units: 3 *  
- FBE 591 Real Estate Finance and Investment Units: 3 *

**Track 2: Real Estate Development Track**
- FBE 466 Management of Real Estate Development: Feasibility Studies Units: 4 *  
- FBE 470 Advanced Real Estate Analysis Units: 4 *  
- FBE 565 Economics of Urban Land Use: Feasibility Studies Units: 3  
- FBE 566 Real Estate Finance, Investments and Development Units: 3

**Track 3: Architecture, Engineering and Construction (AEC) Technology Track**
CE 470 Building Information Modeling and Integrated Practice Units: 3
CE 469 Sustainable Design and Construction Units: 3
CE 570 Building Information Modeling for Collaborative Construction Units: 3
Additional adviser-approved technical and advanced electives Units: 10-11

Total minimum units: 33
*Prerequisite required.

Additional Requirements
The minimum requirement for the Master of Construction Management degree is 33 units. At least three elective courses totaling at least 9 units are required for this degree. These may be taken from the USC Astani Department of Civil and Environmental Engineering, other engineering departments, the USC Price School of Public Policy, the USC School of Architecture, the USC Davis School of Gerontology, the USC Gould School of Law or the USC Marshall School of Business subject to adviser approval. Admission to some classes requires advanced prerequisites and is subject to availability and approval of the instructor.

General Requirements
Residence and Course Load
The normal time required for earning the Master of Construction Management is three semesters, including one summer semester beginning in June and continuing through the spring semester ending in May. Students are expected to participate in extracurricular activities associated with the Master of Construction Management program, including the speaker series and field trips. A candidate must complete the last four semester units of course work at USC. Students who wish to take a leave of absence for a semester or longer must request it from the chairman of the Astani Department in writing. Such leaves may be granted for up to one year.

University Certificate
Transportation Systems Graduate Certificate
The graduate certificate in Transportation Systems is an interdisciplinary program administered by the USC Astani Department of Civil and Environmental Engineering. The certificate program allows students to specialize in transportation applications, while simultaneously receiving a degree in their home department. The certificate in transportation systems combines elements of transportation engineering with transportation policy, planning and project management. The program is especially appropriate for students intending to pursue careers as developers of transportation technologies, or as implementors of technologies within government agencies. Students electing the certificate program apply to the USC Astani Department of Civil and Environmental Engineering. Course prerequisites for the program are:
- one course in statistics or uncertainty, equivalent to ISE 225, PPD 404x or CE 408;
- one course in engineering economy, equivalent to ISE 460;
- one course in microeconomics, equivalent to ECON 203; and
- one course in a contemporary high level programming language.
These prerequisites may be satisfied after enrollment in the certificate program by taking the indicated courses or their equivalent. Graduate students cannot receive credit for courses numbered below 400. Detailed admissions requirements are published by the USC Astani Department of Civil and Environmental Engineering.

The courses taken for the certificate may be applied later to the Master of Science in Civil Engineering, transportation option.
Qualified students holding a bachelor's degree also have the option of enrolling in the certificate program without receiving a separate graduate degree.
The curriculum consists of five graduate courses for a total of 17 units.

Doctoral Degree
Civil Engineering (PhD)
Doctor of Philosophy in Civil Engineering and Doctor of Philosophy in Environmental Engineering
The Doctor of Philosophy with a major in civil engineering and the Doctor of Philosophy with a major in engineering (environmental engineering) are also offered. See general requirements for graduate degrees.
Areas of specialization for Doctor of Philosophy level students are: structural engineering, structural mechanics, earthquake engineering, coastal engineering, water resources engineering, construction engineering and management, soil mechanics and foundation engineering, hydrology, hydrodynamics and transportation.

Stephen Schrank Early Career Chair in Civil and Environmental Engineering: Burcin Becerik-Gerber, DDes  
John and Dorothy Shea Early Career Chair in Civil Engineering: Ketan Savla, PhD  
Fred Champion Professor of Civil and Environmental Engineering: Constantinos Sioutas, ScD  
Gordon S. Marshall Professor of Engineering Technology: Roger Ghanem, PhD (Aerospace and Mechanical Engineering)

Professors: Amy Childress, PhD; Roger Ghanem, PhD (Aerospace and Mechanical Engineering); Erik A. Johnson, PhD; Jiin-Jen Lee, PhD, PE; Vincent W. Lee, PhD; Patrick Lynett, PhD; Sami F. Masri, PhD (Aerospace and Mechanical Engineering); Najmedin Meshkati, PhD, CPE (Industrial and Systems Engineering); Massoud Pirbazari, PhD; Constantinos Sioutas, ScD; Lucio Soibelman, PhD; Costas Synolakis, PhD (Aerospace Engineering); Mihailo Trifunac, PhD; L. Carter Wellford, PhD; Hung Leung Wong, PhD*

Associate Professor: Burcin Becerik-Gerber, DDes  
Assistant Professors: George Ban-Weiss, PhD; Felipe de Barros, PhD; Bora Gencaturk, PhD; Daniel McCurry, PhD; Kelly Sanders, PhD; Ketan Savla, PhD  
Professors of Engineering Practice: David Ashley, PhD; Gregg E. Brandow Jr., PhD, PE; Geraldine Knatz, PhD (Public Policy); Henry M. Koffman, PE  
Associate Professor of Engineering Practice: Amy Rechenmacher, PhD

Senior Lecturer: Dana Sherman, Esq.* (Industrial and Systems Engineering)  
Joint Appointments: David J. Gerber, DDes (Architecture); Genevieve Giuliano, PhD (Public Policy); Behrokh Khoshnevis, PhD (Industrial and Systems Engineering); James Moffett, PhD (Earth Sciences, Biological Sciences); James Moore, PhD (Industrial and Systems Engineering); Firdaus E. Udwadia, PhD (Aerospace and Mechanical Engineering); John P. Wilson, PhD (Sociology)

Research Associate Professor: Michael Orosz (Information Sciences Institute)

Research Assistant Professor: Scott Fruin, PhD (Environmental Health, Keck School of Medicine)  
Adjunct Associate Professor: Hanh Dan Le-Griffin, PhD

Adjunct Assistant Professor: Navid Nastar, PhD  
Adjunct Research Professors: Maria I. Todorovska, PhD; Yan Xiao, PhD, PE; Dongxiao Zhang, PhD  
Adjunct Research Assistant Professors: Jose C. Borroto, PhD; John Caffrey, PhD; Mohammad R. Jahanshahi, PhD; Mazen Wahbeh, PhD

Emeritus Professors: Mihran S. Agbabian, PhD, PE; George V. Chilingar, PhD; Joseph S. Devinny, PhD; Geoffrey Martin, PhD

*Recipient of university-wide or school teaching award.

Degree Requirements
Undergraduate Program Educational Objectives
Fulfilling the vision of the Sonny Astani Department of Civil and Environmental Engineering, the Viterbi School of Engineering and the University of Southern California, our graduates from the Bachelor of Science in Civil Engineering program or the Bachelor of Science in Environmental Engineering program will:

- Be successful in their professional careers, become leaders in industry, academia, government or service, while adapting their technical, collaborative and managerial skills for the benefit of Society's built and natural environments.

- Support the advancement of the practice of science and engineering, while maintaining professional standards and moral and legal obligations to society, while being active in professional organizations and obtaining professional licensure when appropriate.

- Be prepared to pursue graduate studies in engineering or other disciplines, while continuously broadening their abilities and enhancing their technical skills to maintain their relevance with technological change.

Undergraduate Program Criteria
The program leading to a Bachelor of Science in Civil Engineering prepares graduates to apply knowledge of mathematics through differential equations, calculus-based physics, chemistry and at least one additional area of basic science, consistent with the program educational objectives; apply knowledge of four technical areas appropriate to civil engineering; conduct civil engineering experiments and analyze and interpret the resulting data; and design a system, component, or process in more than one civil engineering context. The program also explains basic concepts in management, business, public policy, and leadership; and explains the importance of professional licensure.

The program leading to a Bachelor of Science in Environmental Engineering prepares graduates to apply knowledge of mathematics through differential equations, probability and statistics, calculus-based physics, chemistry (including stoichiometry, equilibrium and kinetics), an earth science, a biological science and fluid mechanics. The curriculum prepares graduates to formulate material and energy balances, and analyze the fate and transport of substances in and between air, water, and soil phases; conduct laboratory experiments, and analyze and interpret the resulting data in more than one major environmental engineering focus area, e.g., air, water, land, environmental health; design environmental engineering systems that include considerations of risk, uncertainty, sustainability, life-cycle principles and environmental impacts; and apply advanced principles and practice relevant to the program objectives. The curriculum prepares graduates to understand concepts of professional practice, project management, and...
the roles and responsibilities of public institutions and private organizations pertaining to environmental policy and regulations.

Bachelor of Science in Civil Engineering

Emphasis in Environmental Engineering

See Civil Engineering.

Engineer in Environmental Engineering

Requirements for the Engineer in Environmental Engineering are the same as set forth in the general requirements. See General Requirements for the Engineer Degree.

Sustainable Policy and Planning Graduate Certificate

See the listing in the USC Price School of Public Policy section.

Bachelor's Degree

Environmental Engineering (BS)

The program requires 132 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper-division courses applied toward the major, regardless of the department in which the courses are taken. In addition, a minimum grade of C must be earned in each of the following courses: CE 205 and CE 309 or ENE 410. See also common requirements for undergraduate degrees.

Minor

Environmental Engineering Minor

A minor in environmental engineering provides students with a basic knowledge of our environment, potential causes for its deterioration, methods to prevent or mitigate environmental hazards, and the means to improve its quality at reasonable costs. Students will learn how to control water pollution, maintain air quality, treat and properly dispose of wastes, and remediate sites contaminated due to improper
disposal of hazardous waste. This minor also enhances students' employment opportunities in the field of environmental engineering. The program provides the necessary infrastructure for the pursuit of graduate studies in environmental engineering. The minor in environmental engineering is offered to undergraduates in various fields of engineering and natural sciences.

Prerequisite Courses

- CHEM 105aLg General Chemistry Units: 4 and CHEM 105bL General Chemistry Units: 4 or CHEM 115aLg Advanced General Chemistry Units: 4 and CHEM 115bL Advanced General Chemistry Units: 4
- MATH 125g Calculus Units: 4
- MATH 126 Calculus II Units: 4
- MATH 226 Calculus III Units: 4
- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4

Required Courses

- CE 443 Environmental Chemistry Units: 3
- CE 453 Water Quality Control Units: 3
- CE 463L Water Chemistry and Analysis Units: 3
- ENE 201 Introduction to Applied Environmental Science and Engineering Units: 4
- ENE 410 Environmental Fluid Mechanics Units: 3
- ENE 428 Air Pollution Fundamentals Units: 3 or ENE 429 Air Pollution Control Units: 3
- ENE 495 Seminars in Environmental Engineering Units: 1

Total units: minimum 20

Master's Degree

Environmental Engineering (MS)

Students with a bachelor's degree in engineering or science may work toward the Master of Science in Environmental Engineering. Students with degrees in fields other than engineering or science may be admitted on the recommendation of a program adviser and program director. Selection of courses will be determined through consultation with a program adviser to provide a maximum of training in the student's area of interest in environmental problems.

Doctoral Degree

Engineering (Environmental Engineering) (PhD)

Doctor of Philosophy in Civil Engineering and Doctor of Philosophy in Engineering (Environmental Engineering)

The Doctor of Philosophy with a major in civil engineering and the Doctor of Philosophy with a major in engineering (environmental engineering) are also offered. See general requirements for graduate degrees.

Areas of specialization for Doctor of Philosophy level students are: structural engineering, structural mechanics, earthquake engineering, coastal engineering, water resources engineering, construction engineering and management, soil mechanics and foundation engineering, hydrology, hydrodynamics and transportation.

Computer Engineering

Computer Engineering Program

Undergraduate Degree

Undergraduate Program Educational Objectives

Graduates of the Computer Engineering and Computer Science program are expected to attain the following educational objectives within a few years of graduation:

- Graduates will apply analytical and critical thinking principles of both computer engineering and computer science to their chosen professions.
- Graduates will successfully engage in life-long learning to continue to be contributing members of their communities in fields within and outside the traditional scope of computer engineering.
- Graduates will exhibit high professional and ethical standards to become productive leaders in society.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Computer Engineering and Computer Science provides both breadth and depth across the range of engineering topics implied by the title. The curriculum includes probability and statistics, including appropriate applications; mathematics, including discrete mathematics through differential and integral calculus; sciences (defined as biological, chemical or physical science) to develop an understanding of the scientific method and provide students with an opportunity to experience this mode of inquiry in courses for science or engineering majors that provide some exposure to lab work; and engineering topics (including computing science) necessary to analyze and design complex electrical and electronic devices, software and systems containing hardware and software components.

The computer science portion of the curriculum covers the fundamentals of algorithms, data structures, software design, concepts of programming languages and computer organization and software; provides an exposure to a variety of programming languages and systems, including at least one higher-level language; and includes advanced course work that builds on the fundamental course work to provide depth.

Graduate Degrees
The graduate program in computer engineering, offered through the Department of Electrical Engineering, is designed to provide students with an intensive background in the analysis, structure, design and function of digital computers and information processing systems. In addition to giving each student a fundamental background in digital logic, computer architecture and operating systems, a wide variety of elective courses allows for study in the following specialized areas: artificial intelligence; computer architecture; computer networks; computer system performance; design automation; fault-tolerant computers; microprocessors; parallel processing; real-time systems; robotics; and VLSI design.

Bachelor's Degree

Computer Engineering and Computer Science (BS)

Students attaining the bachelor of science degree in computer engineering and computer science would possess the scientific and engineering skills and knowledge that would enable them to design and implement computer systems that effectively and efficiently integrate developing hardware and software technologies. This degree is administered jointly by the departments of Computer Science and Electrical Engineering.

A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper-division courses applied toward the major, regardless of the department in which the courses are taken.

The requirement for the degree is 128 units.

A grade of C (2.0) or better is required for each of the core courses CSCI 103, CSCI 170, CSCI 104 and CSCI 201. Courses with a grade of C- or below must be repeated; courses may only be retaken once.

Departmental approval is required in order to retake a course. Students who do not satisfy the degree requirement after repeating a class will be disqualified from the program.

CSCI 401 Capstone: Design and Construction of Large Software Systems Units: 4
or
CSCI 404 Capstone: Creating Your High-Tech Startup Units: 4
or
EE 459Lx Embedded Systems Design Laboratory Units: 3

Technical Electives (8 units)

Suggested courses include:

CSCI 300 Introduction to Intelligent Agents Using Science Fiction Units: 3
CSCI 310 Software Engineering Units: 4
CSCI 360L Introduction to Artificial Intelligence Units: 4
CSCI 420 Computer Graphics Units: 4
CSCI 445L Introduction to Robotics Units: 4

CSCI 459 Computer Systems and Applications Units: 3
CSCI 464 Foundations of Exotic Computation Units: 3
CSCI 476 Cryptography: Secure Communication and Computation Units: 4
CSCI 485 File and Database Management Units: 4
CSCI 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8
CSCI 491aL Final Game Project Units: 4
CSCI 491bL Final Game Project Units: 2
CSCI 499 Special Topics Units: 2, 3, 4
EE 454L Introduction to System-on-Chip Units: 4
EE 457 Computer Systems Organization Units: 4
EE 477L MOS VLSI Circuit Design Units: 4
EE 499 Special Topics Units: 2, 3, 4
EE 532 Wireless Internet and Pervasive Computing Units: 3
EE 536a Mixed-Signal Integrated Circuit Design Units: 4
EE 536b Mixed-Signal Integrated Circuit Design Units: 4
EE 550 Design and Analysis of Computer Communication Networks Units: 3
EE 552 Asynchronous VLSI Design Units: 3
EE 554 Real Time Computer Systems Units: 3
EE 555 Broadband Network Architectures Units: 3
EE 557 Computer Systems Architecture Unit: 3
EE 558 Optical Fiber Communication Systems Units: 3
EE 560L Digital System Design Units: 4

Note:
Students may choose one adviser-approved course from the 300- and 400-level ITP offerings. Other courses may be applicable; please see an adviser for approval.

Free Electives (4-7 units)
Total units: 128

"Satisfies GE requirement.

Master's Degree
Computer Engineering (MS)
The Master of Science in Computer Engineering is earned by completing an integrated program of at least 27 units of approved course work in computer engineering and computer science. No more than three courses (maximum 12 units) may be counted at the 400 level — at least 18 adviser-approved units must be taken at the 500 or 600 level.

All applicants must have taken the entrance requirement courses (or equivalent in other institutions) in order to be admitted to the program. Entrance requirement course credit cannot be applied toward the degree. A fundamental course may be waived by taking a placement exam. In case a placement exam is not offered, a fundamental course may be waived by a designated faculty member upon proof (in the form of prior course work or a placement examination, etc.) that the student already has equivalent knowledge of the course material. At least 18 units must be taken at the 500-level or above. At least 18 units must be taken in electrical engineering, 15 of which must be taken at USC. Units taken outside of electrical engineering or computer science must be approved in advance by a computer engineering adviser and must be substantive in content and related to the degree objective. Up to 3 units of EE 590 Directed Research with a computer engineering faculty member may be applied toward the degree.

Entrance Requirement Courses
CSCI 455x Introduction to Programming Systems Design Units: 4

Students must take or waive all four of the following fundamental courses (with the option of EE 450 or EE 503):

Fundamental Courses
CSCI 402 Operating Systems Units: 4
EE 450 Introduction to Computer Networks Units: 3 or EE 503 Probability for Electrical and Computer Engineers Units: 4
EE 457 Computer Systems Organization Units: 4
EE 477L MOS VLSI Circuit Design Units: 4

Students must take at least two of the following core courses (with the option of EE 550 or EE 555):

Core Courses
EE 550 Design and Analysis of Computer Communication Networks Units: 3
EE 552 Asynchronous VLSI Design Units: 3
EE 554 Real Time Computer Systems Units: 3
EE 557 Computer Systems Architecture Units: 3
EE 558 Optical Fiber Communication Systems Units: 3

Students must take at least 6 units from the following list of elective courses (cannot overlap with the core courses):

Computer Science:
CSCI 545 Robotics Units: 4
CSCI 551 Computer Networking Units: 4
CSCI 555L Advanced Operating Systems Units: 4
CSCI 558L Internetworking and Distributed Systems Laboratory Units: 3
CSCI 561 Foundations of Artificial Intelligence Units: 4
CSCI 565 Compiler Design Units: 4
CSCI 570 Analysis of Algorithms Units: 4
CSCI 584 Control and Learning in Mobile Robots and Multi-Robot Systems Units: 3
CSCI 585 Database Systems Units: 4
CSCI 595 Advanced Compiler Design Units: 4

Electrical Engineering:
EE 532 Wireless Internet and Pervasive Computing Units: 3
EE 536a Mixed-Signal Integrated Circuit Design Units: 4
EE 536b Mixed-Signal Integrated Circuit Design Units: 4
EE 550 Design and Analysis of Computer Communication Networks Units: 3
EE 552 Asynchronous VLSI Design Units: 3
EE 554 Real Time Computer Systems Units: 3
EE 555 Broadband Network Architectures Units: 3
EE 557 Computer Systems Architecture Units: 3
EE 558 Optical Fiber Communication Systems Units: 3
EE 560L Digital System Design Units: 4

632
EE 577a VLSI System Design Units: 3
EE 577b VLSI System Design Units: 3
EE 579 Wireless and Mobile Networks Design and Laboratory Units: 3
EE 650 Advanced Topics in Computer Networks Units: 3
EE 652 Low-Power Wireless Networks Units: 3
EE 653 Advanced Topics in Microarchitecture Units: 3
EE 657 Parallel and Distributed Computing Units: 3
EE 658 Diagnosis and Design of Reliable Digital Systems Units: 3
EE 659 Interconnection Networks Units: 3
EE 677 VLSI Architectures and Algorithms Units: 3
EE 680 Computer-Aided Design of Digital Systems I Units: 3
EE 681 Computer-Aided Design of Digital Systems II Units: 3

Note:
A minimum grade point average of 3.0 (A = 4.0) must be earned on all course work applied toward the master's degree in computer engineering. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree. Transfer units which count as credit (CR) toward the master's degree are not computed in the grade point average. All other Viterbi School of Engineering requirements for the Master of Science apply.

Doctoral Degree
Computer Engineering (PhD)
The requirements for the Doctor of Philosophy (PhD) in Computer Engineering are in strict conformity with the requirements of the Graduate School. Program requirements for the PhD in Computer Engineering are the same as those for the PhD in Electrical Engineering except that the major field is computer engineering. See general requirements for graduate degrees.
Screening and qualifying examinations are administered by the computer engineering faculty. Students should contact the Electrical Engineering Systems Department Office for further information.

Course Requirements
The following course work must be completed; these courses can be included in the 60-unit course work requirement:
Take two courses from theory area and four courses from the other three areas (hardware, software and systems), including at least one course from each area to total six courses.

Theory Area Courses
CSCI 570 Analysis of Algorithms Units: 4
EE 503 Probability for Electrical and Computer Engineers Units: 4 or
EE 562 Random Processes in Engineering Units: 3
EE 565 Information Theory and Compression Units: 3
MATH 410 Fundamental Concepts of Modern Algebra Units: 4 or
MATH 425a Fundamental Concepts of Analysis Units: 4
MATH 432 Applied Combinatorics Units: 4 or
MATH 533 Combinatorial Analysis and Algebra Units: 3

Hardware Area Courses
EE 536a Mixed-Signal Integrated Circuit Design Units: 4
EE 552 Asynchronous VLSI Design Units: 3
EE 557 Computer Systems Architecture Units: 3

Software Area Courses
CSCI 565 Compiler Design Units: 4 or
CSCI 595 Advanced Compiler Design Units: 4
CSCI 577a Software Engineering Units: 4
CSCI 585 Database Systems Units: 4

Systems Area Courses
CSCI 551 Computer Networking Units: 4
CSCI 555L Advanced Operating Systems Units: 4
CSCI 561 Foundations of Artificial Intelligence Units: 4
EE 543aL Digital Control Systems Units: 3
EE 554 Real Time Computer Systems Units: 3
EE 550 Design and Analysis of Computer Communication Networks Units: 3 or
EE 555 Broadband Network Architectures Units: 3
EE 569 Introduction to Digital Image Processing Units: 4

Chair: Gaurav Sukhatme, PhD

Faculty
Chan Soon-Shiong Chair: Maja Matarić, PhD (Neuroscience Center)
Dean's Chair in Chemical Engineering and Materials Science: Priya Vashishta, PhD (Computer Science, Physics)

Andrew and Erna Viterbi Early Career Chair: Jernej Barbic, PhD
Jack Munishian Early Career Chair: Fei Sha, PhD
Northrop Grumman Chair in Engineering: Ramesh Govindan, PhD
David Packard Chair in Manufacturing Engineering:
Stephen C-Y Lu, PhD (Mechanical Engineering, Industrial and Systems Engineering)
Charles Lee Powell Chair in Engineering: Viktor Prasanna, PhD (Electrical Engineering)
Graduates apply the computational and analytical approaches of computer science to their chosen professions. Graduates successfully engage in life-long learning to continue to be contributing members of their communities in fields within and outside the traditional scope of computer science. Graduates exhibit high professional and ethical standards to become productive leaders in society.

**Undergraduate Program Criteria**
The program leading to a Bachelor of Science in Computer Science includes at least one and one-third years of computer science that covers the fundamentals of algorithms, data structures, software design, concepts of programming languages and computer organization and software; provides an exposure to a variety of programming languages and systems, including at least one higher-level language; and includes advanced course work that builds on the fundamental course work to provide depth. The program includes at least one year of science and mathematics, including at least one-half year of mathematics, including discrete mathematics. Additional mathematics might consist of calculus, linear algebra, numerical methods, probability, statistics, number theory, geometry, or symbolic logic. The science component develops an understanding of the scientific method and provides an opportunity to experience this mode of inquiry in courses for science or engineering majors that provide some exposure to laboratory work.

**Physics/Computer Science Major**
Requirements for the Bachelor of Science This program is intended for students with dual interests in physics and computer science who wish to complete the essential courses for both majors within their normal four year career. See the Physics and Astronomy Department section for course requirements.

**Bachelor of Science in Computer Engineering and Computer Science**
See the listing under Computer Engineering Program.

**Minor in 2-D Art for Games**
This interdisciplinary minor integrates three major disciplines (fine arts, computer science and interactive media) to develop the 2-D visual skills necessary to conceptualize and illustrate images for games. For more information, see USC Roski School of Art and Design.

**Minor in 3-D Art for Games**
The focus of the 3-D Art for Games minor is a trans-disciplinary approach that incorporates the creative, technological and team-based communication skills necessary to develop 3-D art skills for video games. For more information, see USC Roski School of Art and Design.

**Graduate Degrees**
The requirements listed below are special to this department and must be read in conjunction with the general requirements of the USC Viterbi School of Engineering for master's degrees and the general requirements of the USC Graduate School for PhD degrees. The graduate program in computer science provides intensive preparation in the basic concepts and techniques related to the design, programming and application of digital computers. Both the Master of Science and Doctor of Philosophy degrees are offered. A Master of Science degree with specialization in software engineering is also offered. The program seeks to prepare students for an industrial leadership career in software engineering. It also serves as an introduction to this area for students who wish to pursue advanced studies and research leading to a PhD.

A Master of Science degree with specialization in intelligent robotics is also offered. This program seeks to prepare students for an industrial career in the development of computer systems for CAD/CAM (Computer-Aided Design and Manufacturing) and robotics. It also serves as an introduction to this area for students who wish to pursue advanced studies and research leading to a PhD.

The emphasis is on the domain of mechanical, electromechanical and mechatronic products. (CAD for digital systems is covered by a separate program offered by the Electrical Engineering-Systems department.)

A Master of Science degree with a specialization in computer networks is offered. This specialization prepares students in the areas of computer communications, networks and distributed processing.

A Master of Science in Computer Science (Multimedia and Creative Technologies) is also offered.

A Master of Science in Computer Science (High Performance Computing and Simulations) is also offered.

A Master of Science in Computer Science (Data Science) is also offered.

A Master of Science in Computer Science (Game Development) is also offered.

A Master of Science in Computer Science (Computer Security) is also offered.

A Master of Science in Computer Science (Technical Professionals) is also offered for students with three to five years of work experience.

A Master of Science in Computer Science Dual Degree with Tsinghua University School of Information Science and Technology – China is also offered.

A Master of Science in Computer Science (Scientists and Engineers) is also offered for students with limited background in computer science.

**Admission and Prerequisites**
Admission is determined by the Office of Admission and the Viterbi School of Engineering, in consultation with the Computer Science Department. The applicant is required to have a bachelor's degree or its equivalent from an accredited college or university; satisfactory scores on the verbal and quantitative portions of the aptitude test of the Graduate Record Examinations (one advanced test from computer science, mathematics or engineering is recommended); and a substantial background in computing constitutes a minimum requirement. Foreign students must earn a satisfactory score on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS).

**Bachelor's Degree**
**Computer Science (BS)**
The undergraduate program in computer science is an interdisciplinary program leading to the Bachelor of Science
in Computer Science. The program is designed to provide both an academic and professional orientation.

General admission requirements for the undergraduate program are the same as those of the university and the USC Viterbi School of Engineering and include 3 to 5 units of mathematics and one unit of science (biology, chemistry or physics) together with satisfactory scores on the Scholastic Aptitude Test and Achievement Tests. The minimum requirement for the degree is 128 units.

A grade of C (2.0) or better is required for each of the core courses CSCI 103, CSCI 170, CSCI 104 and CSCI 201. Courses with a grade of C- or below must be repeated; courses may only be retaken once.

Departmental approval is required in order to retake a course. Students who do not satisfy the degree requirement after repeating a class will be disqualified from the program. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper division courses applied toward the major, regardless of the department in which the courses are taken. Candidates must complete general education requirements; see the General Education Program.

**Composition/Writing Requirements (7 Units)**
- WRIT 150 Writing and Critical Reasoning—Thematic Approaches Units: 4
- WRIT 340 Advanced Writing Units: 3, 4

**General Education (24 Units)**
- General Education Units: 24

**Pre-Major Requirements (29-30 Units)**

**Engineering (2 units)**
- ENGR 102 Engineering Freshman Academy Units: 2

**Mathematics (16 units)**
- MATH 125g Calculus I Units: 4
- MATH 126 Calculus II Units: 4
- MATH 129 Calculus II for Engineers and Scientists Units: 4
- MATH 225 Linear Algebra and Linear Differential Equations Units: 4
- MATH 226 Calculus III Units: 4
- MATH 229 Calculus III for Engineers and Scientists Units: 4

**Statistics and Probability (3-4 units)**
- EE 364 Introduction to Probability and Statistics for Electrical Engineering and Computer Science Units: 3 or
- MATH 407 Probability Theory Units: 4

**Basic Science (8 units)**
- One of the following science area course sequences:
  - **Biology:**
    - BISC 120Lg General Biology: Organismal Biology and Evolution Units: 4
  - **Chemistry:**
    - CHEM 105aLg General Chemistry Units: 4
    - CHEM 115aLg Advanced General Chemistry Units: 4
  - **Physics:**
    - PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4
    - PHYS 161Lg Advanced Principles of Physics I Units: 4

**Major Requirements (68 Units)**

**Computer Science (38 units)**
- CSCI 103L Introduction to Programming Units: 4
- CSCI 104L Data Structures and Object Oriented Design Units: 4
- CSCI 109 Introduction to Computer Science Units: 2
- CSCI 170 Discrete Methods in Computer Science Units: 4
- CSCI 201L Principles of Software Development Units: 4
- CSCI 270 Introduction to Algorithms and Theory of Computing Units: 4
- CSCI 301L Introduction to Operating Systems Units: 4
- CSCI 306L Introduction to Artificial Intelligence Units: 4
- CSCI 401 Capstone: Design and Construction of Large Software Systems Units: 4 or
- CSCI 404 Capstone: Creating Your High-Tech Startup Units: 4

**Electrical Engineering (6 units)**
- EE 101 Introduction to Digital Logic Units: 3
- EE 352L Computer Organization and Architecture Units: 3

**Technical electives++ (14 units)**
(at least four courses for a minimum of 14 units) Units: 14

**++Applicable courses include:**
- CSCI 300 Introduction to Intelligent Agents Using Science Fiction Units: 3
- CSCI 351 Programming and Multimedia on the World Wide Web Units: 3
- CSCI 353 Introduction to Internetworking Units: 4
- CSCI 420 Computer Graphics Units: 4
- CSCI 445L Introduction to Robotics Units: 4
- CSCI 459 Computer Systems and Applications Modeling Fundamentals Units: 3
- CSCI 464 Foundations of Exotic Computation Units: 3
CSCI 485 File and Database Management Units: 4
CSCI 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8
CSCI 499 Special Topics Units: 2, 3, 4
EE 450 Introduction to Computer Networks Units: 3
EE 454L Introduction to System-on-Chip Units: 4
EE 459Lx Embedded Systems Design Laboratory Units: 3
EE 477L MOS VLSI Circuit Design Units: 4
EE 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8
EE 499 Special Topics Units: 2, 3, 4
ITP 466 Building the High Tech Startup Units: 4
MATH 458 Numerical Methods Units: 4

Note:
Students may also choose one adviser-approved course from the 300- and 400-level ITP offerings. Other courses may be applicable; please see an adviser for approval.

Free Electives (10 units)
Total units: 128

* WRIT 340 Advanced Writing (Communication for Engineers) is strongly recommended for CSCI majors
**Courses selected to meet the general education life science and physical science requirements must be approved by the CSCI department to ensure that students achieve the required level of basic science content in their programs.
***Satisfies General Education requirement.

Computer Science (Games) (BS)
The goal of the BS in Computer Science (Games) program is to graduate students with a solid grounding in computer science and a cross-disciplinary background in game development. Topics covered in the crossdisciplinary game development portion of the degree program include game production, visual design for games and interactives, computer animation, video game programming, game hardware architectures, game engine programming, serious game development, introductory and intermediate game design, and two semester-long final game projects. Students graduating from this program will be capable of engineering next-generation games and simulations and their technologies in the entertainment and serious game fields. Additionally, graduates from this program will be able to further their education in graduate programs in game development and computer science.

The requirement for the degree is 128 units.
A grade of C (2.0) or better is required for each of the core courses CSCI 103, CSCI 170, CSCI 104 and CSCI 201. Courses with a grade of C- or below must be repeated; courses may only be retaken once.
Departmental approval is required in order to retake a course. Students who do not satisfy the degree requirement after repeating a class will be disqualified from the program.
A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper-division courses applied toward the major, regardless of the department in which the courses are taken.

Composition/Writing Requirements (7 units)

- CSCI 310 Software Engineering Units: 4
- CSCI 301 Capstone: Design and Construction of Large Software Systems Units: 4
- or
- CSCI 404 Capstone: Creating Your High-Tech Startup Units: 4

Business Requirements (36 units)
- ACCT 410x Foundations of Accounting Units: 4
- BUAD 302 Communication Strategy in Business Units: 4
- BUAD 304 Organizational Behavior and Leadership Units: 4
- BUAD 306 Business Finance Units: 4
- BUAD 307 Marketing Fundamentals Units: 4
- BUAD 311 Operations Management Units: 4
- BUAD 497 Strategic Management Units: 4
- ECON 351x Microeconomics for Business Units: 4
- or
- ECON 352x Macroeconomics for Business Units: 4

Technical Electives (9-12 units)
Students must take one course from the Computer Science selection and one from the Business selection and a third course from either one.

Computer Science Electives
Take at least one from the following courses:
- CSCI 351 Programming and Multimedia on the World Wide Web Units: 3
CSCI 360L Introduction to Artificial Intelligence Units: 4
CSCI 430L Introduction to Computer and Network Security Units: 4
CSCI 485 File and Database Management Units: 4

**Business Electives**

Take at least one from the following courses:
- BAEP 452 Feasibility Analysis Units: 4
- BAEP 453 Venture Management Units: 4
- BUAD 301 Technology Entrepreneurship Units: 3
- DSO 431 Foundations of Digital Business Innovation Units: 4
- DSO 433 Business Process Design Units: 4
- DSO 443 The Business of Digital Entertainment Units: 4
- DSO 462 Managing a Small Business on the Internet Units: 2
- MKT 425 Marketing on the Internet Units: 4

**Free Electives (0-2 units)**

**Total units: 128-131**

*WRIT 340 Advanced Writing (Communication for Engineers) is strongly recommended for CSBA majors.*

**Minor**

**Computer Science Minor**

The computer science minor introduces the concepts, tools and techniques that are involved in the programming of computers. The minor prepares students to achieve mastery in several current programming languages. In addition, the student will learn about creating effective user interfaces and how to build applications that are available on the Internet.

**Required Courses**

Lower division (18 units)
- CSCI 103L Introduction to Programming Units: 4
- CSCI 104L Data Structures and Object Oriented Design Units: 4
- CSCI 109 Introduction to Computer Science Units: 2
- CSCI 170 Discrete Methods in Computer Science Units: 4

Choose one of the following:
- CSCI 201L Principles of Software Development Units: 4
- CSCI 270 Introduction to Algorithms and Theory of Computing Units: 4

**Electives**

12 units selected from the following courses:
- CSCI 351 Programming and Multimedia on the World Wide Web Units: 3
- CSCI 445L Introduction to Robotics Units: 4
- CSCI 360L Introduction to Artificial Intelligence Units: 4
- CSCI 485 File and Database Management Units: 4
- CSCI 499 Special Topics Units: 2, 3, 4
- CSCI 310 Software Engineering Units: 4
- CSCI 350 Introduction to Operating Systems Units: 4
- CSCI 353 Introduction to Internetworking Units: 4
- CSCI 401 Capstone: Design and Construction of Large Software Systems Units: 4
- CSCI 404 Capstone: Creating Your High-Tech Startup Units: 4
- CSCI 420 Computer Graphics Units: 4
- CSCI 430L Introduction to Computer and Network Security Units: 4
- CSCI 476 Cryptography: Secure Communication and Computation Units: 4
- EE 352L Computer Organization and Architecture Units: 3

**Total units: 30**

**Joint Degree**

**Master of Science in Computer Science Dual Degree with Tsinghua University School of Information Science and Technology – China**

The Master of Science in Computer Science Dual Degree with Tsinghua University School of Information Science and Technology (THU) leads to two Master of Science degrees in Computer Science, one from each institution. The dual degrees are subject to the following stipulations:

All required courses for each degree are required for the dual degree.

The program description for the Tsinghua University Master of Science in Computer Science and Technology is online at http://www.tsinghua.edu.cn/publish/csen/4906/index.html.

The general requirements for the MS in Computer Science at USC in this dual degree program are the same as those for the USC general MS in Computer Science without a thesis, except that at least 19 units (of the minimum total of 28) must be completed at USC, and 9 units of pre-approved course work transferred from THU may be counted toward the degree requirements at USC. This is due to:

a special partnership in this area established by a Memorandum of Understanding at the University level to amplify cooperation between USC and THU and between the United States and China in an intellectual and economic arena of great importance to both, where many shared interests exist;

the similarity of the USC and THU curricula, which allows expanded course substitution due to interchangeable content;

the desirability of providing students with a wider array of relevant courses than they can get at either institution;

the opportunity to provide students a unique transcultural experience that will position them to be global leaders in their field.

The two MS degrees must be earned at the same time, generally at the end of two and one-half to three years of study. The THU degree requirements must be completed for students to receive the USC MS in Computer Science as part of the dual degree program.
Students who elect to receive only the USC degree must change their degree objective from the USCTsinghua University dual degree to a different MS degree objective in Computer Science. In this case they will be allowed to transfer only the standard 4 adviser-approved units from Tsinghua University toward the USC degree.

The following required courses must generally be taken at USC: CSCI 570 and one course from each of the following two categories: I. CSCI 551, CSCI 555, CSCI 571, CSCI 577a, CSCI 585, EE 557; II. CSCI 545, CSCI 561, CSCI 564, CSCI 574, CSCI 580, CSCI 582. There must be justification for the omission of a required course in either degree, for example a certain course in one degree may provide comparable content to the omitted course in the other degree.

The USC Computer Science Department has identified a list of transferrable THU courses that can be considered USC equivalents but is also willing to entertain transfer, on a case by case basis, of unique THU CSCI courses for which no obvious mapping to a USC CSCI course exists.

Courses taken at Tsinghua University by students sent from USC will be taught in English.

Other requirements for the Master of Science in Computer Science are the same as set forth in the general requirements for Viterbi School of Engineering Master of Science degrees.

Master's Degree

Computer Science (Computer Networks) (MS)
You must take the following course (4 units):
CSCI 570 Analysis of Algorithms Units: 4
Choose two of the following courses (8 units):
CSCI 561 Foundations of Artificial Intelligence Units: 4
CSCI 571 Web Technologies Units: 4
CSCI 585 Database Systems Units: 4

Computer Networks - Required Core Courses (14 units)
CSCI 551 Computer Networking Units: 4
CSCI 555L Advanced Operating Systems Units: 4
CSCI 558L Internetworking and Distributed Systems Laboratory Units: 3
EE 450 Introduction to Computer Networks Units: 3
You must take one of the following courses (3-4 units):
CSCI 599 Special Topics Units: 2, 3, 4
CSCI 694a Topics in Computer Networks and Distributed Systems Units: 3
CSCI 694b Topics in Computer Networks and Distributed Systems Units: 3
EE 550 Design and Analysis of Computer Communication Networks Units: 3
EE 555 Broadband Network Architectures Units: 3

Remaining 2-3 units can be completed with the following:
CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
CSCI 591 Computer Science Research Colloquium Units: 1
CSCI 598 Professional Writing and Communication for Computer Scientists Units: 1
and
ENGR 596 Internship in Engineering Units: 1

Note:
* CSCI 402 is a prerequisite for CSCI 551, CSCI 555 and CSCI 558. CSCI 402 is automatically waived for graduate computer science students.

Computer Science (Computer Security) (MS)
Required Courses (20 units)
CSCI 530 Security Systems Units: 4
CSCI 531 Applied Cryptography Units: 4
CSCI 551 Computer Networking Units: 4
CSCI 555L Advanced Operating Systems Units: 4
CSCI 570 Analysis of Algorithms Units: 4

Choose two of the following courses (8 units)
CSCI 561 Foundations of Artificial Intelligence Units: 4
CSCI 571 Web Technologies Units: 4
CSCI 585 Database Systems Units: 4
Complete 4 units from the following courses:
CSCI 556 Introduction to Cryptography Units: 4
CSCI 558L Internetworking and Distributed Systems Laboratory Units: 3
CSCI 577a Software Engineering Units: 4
CSCI 578 Software Architectures Units: 4
CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 (1-4 units)
CSCI 591 Computer Science Research Colloquium Units: 1
CSCI 598 Professional Writing and Communication for Computer Scientists Units: 1
and
ENGR 596 Internship in Engineering Units: 1 (each internship = 1 unit, max 3)
CSCI 599 Special Topics Units: 2, 3, 4
CSCI 694a Topics in Computer Networks and Distributed Systems Units: 3

Total units: 32

*Topics must be pre-approved by an adviser.
Computer Science (Data Science) (MS)
The Master of Science in Computer Science (Data Science) provides students with a core background in computer science and specialized algorithmic, statistical and systems expertise in acquiring, storing, accessing, analyzing and visualizing large, heterogeneous and real-time data associated with diverse real-world domains including energy, the environment, health, media, medicine and transportation.

Required Courses (Three Courses)
- CSCI 561 Foundations of Artificial Intelligence Units: 4
- CSCI 570 Analysis of Algorithms Units: 4
- CSCI 585 Database Systems Units: 4

Group Electives (Must Take Three Courses with a Minimum of One Course From Each Group) (10-12 units):

Group 1 (Data Systems):
- CSCI 548 Information Integration on the Web Units: 4
- CSCI 572 Information Retrieval and Web Search Engines Units: 4
- CSCI 586 Database Systems Interoperability Units: 4
- CSCI 587 Geospatial Information Management Units: 4
- CSCI 653 High Performance Computing and Simulations Units: 4
- CSCI 685 Advanced Topics in Database Systems Units: 4

Group 2 (Data Analysis):
- CSCI 567 Machine Learning Units: 4
- CSCI 573 Probabilistic Reasoning Units: 3
- CSCI 686 Advanced Big Data Analytics Units: 4
- ISE 520 Optimization: Theory and Algorithms Units: 3
- MATH 467 Theory and Computational Methods for Optimization Units: 4
- MATH 574 Applied Matrix Analysis Units: 3

Additional Electives (8-10 units)
Any 500- or 600-level course in CSCI (including additional group electives or special topics)
- CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- CSCI 591 Computer Science Research Colloquium Units: 1
- CSCI 598 Professional Writing and Communication for Computer Scientists Units: 1 and
- ENGR 596 Internship in Engineering Units: 1
- MATH 458 Numerical Methods Units: 4
- MATH 501 Numerical Analysis and Computation Units: 3
- MATH 502a Numerical Analysis Units: 3
- MATH 502b Numerical Analysis Units: 3
- MATH 505a Applied Probability Units: 3
- MATH 601 Optimization Theory and Techniques Units: 3
- MATH 650 Seminar in Statistical Consulting Units: 3

Total units required for the degree is 32
No more than 4 units may be taken at the 400-level.

Computer Science (Game Development) (MS)
The goal of the MS in Computer Science (Game Development) program is to graduate students with a core in computer science, an engineering-oriented game development core and a concentration in one of the key research directions in game development infrastructure, cognition and games, immersion and serious games.

Infrastructure is researching and developing the software and hardware infrastructure necessary for the development of the future of interactive games and large-scale simulations; massively multiplayer online games (MMOGs) and simulation networks; game engines and tools; instant games; wireless and mobile games and infrastructures; and next generation consoles. Cognition and games is developing theories for modeling and simulating computer characters and story; developing methods for modeling, simulating and displaying human emotion; analyzing large-scale game play; and developing theories for infusing pedagogy with game play. Immersion is researching and developing the technologies to engage the mind of the game player via sensory stimulation; reading the human emotional state and providing that as an input to the game; and emotionally adaptive game software architectures. Serious games and simulations is developing a theory for the deployment of games and simulations for purposes of education and training, health, public policy and strategic communication; game evaluation; serious game development; and human performance engineering. Students graduating from this program will be capable of engineering next generation games and simulations and their required technologies immediately upon graduation in the entertainment and serious game fields. Additionally, graduates from this program will be able to further their education in graduate programs in game development and computer science. The long-term goal with this MS degree is to establish research and development directions that create a science of games and an accompanying archival literature that improves game development for both serious and entertainment purposes.

CSCI (8 Units)
- CSCI 570 Analysis of Algorithms Units: 4

One of the following courses (4 units):
- CSCI 561 Foundations of Artificial Intelligence Units: 4
- CSCI 571 Web Technologies Units: 4
- CSCI 585 Database Systems Units: 4

Game Development Core (12 Units)
- CSCI 423 Native Console Multiplayer Game Development Units: 4
- CSCI 522 Game Engine Development Units: 4
- CSCI 580 3-D Graphics and Rendering Units: 4

Project Classes (6 Units)
- CSCI 529a Advanced Game Projects Units: 4
- CSCI 529b Advanced Game Projects Units: 2
Game Development Electives
Complete 5 units from the following:
CSCI 424 Game Engine Tool Development Units: 4
CSCI 425 Immersive Game Development Units: 4
CSCI 499 Special Topics Units: 2, 3, 4 or CSCI 599 (adviser approval required)
CSCI 520 Computer Animation and Simulation Units: 4
CSCI 523L Networked Games Units: 4
CSCI 524 Networked Artificial Intelligence Units: 4
CSCI 526 Advanced Mobile Devices and Game Consoles Units: 4
CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
CSCI 591 Computer Science Research Colloquium Units: 1
CSCI 598 Professional Writing and Communication for Computer Scientists Units: 1
and ENGR 596 Internship in Engineering Units: 1
CTIN 401L Interface Design for Games Units: 2
CTIN 403L Advanced Visual Design for Games Units: 2
CTIN 404L Usability Testing for Games Units: 2
CTIN 405L Design and Technology for Mobile Experiences Units: 2
CTIN 406L Sound Design for Games Units: 2
CTIN 440L Usability Testing for Games Units: 2
CTIN 456 Game Design for Business Units: 2
CTIN 458 Business and Management of Games Units: 2
CTIN 459L Game Industry Workshop Units: 4
CTIN 462 Critical Theory and Analysis of Games Units: 4
CTIN 463 Anatomy of a Game Units: 4
CTIN 464 Game Studies Seminar Units: 2
CTIN 482 Designing Online Multiplayer Game Environments Units: 2
CTIN 486 Alternative Control Workshop Units: 2
CTIN 488 Game Design Workshop Units: 4
CTIN 492L Experimental Game Topics Units: 4

Total units: 32
Max 8 units approved for 400-level courses.

Computer Science (High Performance Computing and Simulations) (MS)

Required Courses
CSCI 570 Analysis of Algorithms Units: 4
CSCI 596 Scientific Computing and Visualization Units: 4

Choose two of the following courses (8 units):
CSCI 561 Foundations of Artificial Intelligence Units: 4
CSCI 571 Web Technologies Units: 4
CSCI 585 Database Systems Units: 4

Technical Elective Courses
Select either (option 1) two courses from Group A and one course from Group B, or (option 2) one course from Group A and two courses from Group B. Total group units will be 9-11 units. Three of the following courses — students must take courses from both the computer science track and the computational science/engineering application track.

A. Computer Science Track
CSCI 503 Parallel Programming Units: 3
CSCI 520 Computer Animation and Simulation Units: 4
CSCI 551 Computer Networking Units: 4
CSCI 558L Internetworking and Distributed Systems Laboratory Units: 3
CSCI 580 3-D Graphics and Rendering Units: 4
CSCI 595 Advanced Compiler Design Units: 4
CSCI 599 Special Topics Units: 2, 3, 4 *
CSCI 653 High Performance Computing and Simulations Units: 4

B. Computational Science/Engineering Application Track
AME 535a Introduction to Computational Fluid Mechanics Units: 3 or AME 535b Introduction to Computational Fluid Mechanics Units: 3
CE 529a Finite Element Analysis Units: 3
CHE 502 Numerical Methods for Diffusive and Convective Transport Units: 3
EE 553 Computational Solution of Optimization Problems Units: 3
EE 653 Advanced Topics in Microarchitecture Units: 3
EE 657 Parallel and Distributed Computing Units: 3
EE 659 Interconnection Networks Units: 3
MASC 575 Basics of Atomistic Simulation of Materials Units: 3
MATH 501 Numerical Analysis and Computation Units: 3
MATH 578a Computational Molecular Biology Units: 3
PHYS 516 Methods of Computational Physics Units: 3
PTE 582 Fluid Flow and Transport Processes in Porous Media Units: 3, 2 years

Complete 5 to 7 additional units from the following:
CSCI 500- or 600-level course Units: 4
CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 (variable units, max 4)
CSCI 591 Computer Science Research Colloquium Units: 1
CSCI 598 Professional Writing and Communication for Computer Scientists Units: 1 and ENGR 596 Internship in Engineering Units: 1 (each internship = 1 unit, max 3)

Note:
*Adviser approval required.

Total units: Minimum 32

Computer Science (Intelligent Robotics) (MS)
You must take the following course (4 units)
CSCI 570 Analysis of Algorithms Units: 4

Intelligent Robotics - Required Core Courses (8 units)
CSCI 545 Robotics Units: 4
CSCI 561 Foundations of Artificial Intelligence Units: 4

Choose one of the following courses (4 units)
CSCI 571 Web Technologies Units: 4
CSCI 585 Database Systems Units: 4

Complete 16 units from the following courses
CSCI 445L Introduction to Robotics Units: 4 *
CSCI 534 Affective Computing Units: 4
CSCI 540 Self-Organization Units: 4
CSCI 549 Nanorobotics Units: 3
CSCI 557 Machine Learning Units: 4
CSCI 573 Probabilistic Reasoning Units: 3
CSCI 574 Computer Vision Units: 3
CSCI 599 Special Topics Units: 2, 3, 4
CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
CSCI 591 Computer Science Research Colloquium Units: 1
CSCI 598 Professional Writing and Communication for Computer Scientists Units: 1
ENGR 596 Internship in Engineering Units: 1

Note:
*CSCI 445 must be taken before CSCI 545.
**Alternate Robotics/AI related courses may be substituted in the elective area.

Computer Science (MS)

Requirements for Graduation without a Thesis
A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in computer science. This average must also be earned on all graduate courses completed at USC (400-level and above). Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average. A maximum of 4 units may be taken at the 400 level from approved courses in either electrical engineering or computer science; the remaining units must be approved courses at the 500 or 600 level. M.S. students may complete a maximum of 8 units of 600-level courses for use in the degree program. Approval for enrollment in 600-level courses must come from the faculty instructor and department adviser. Total units required for the degree is 28. No examination is required for the degree. Other requirements for the Master of Science in Computer Science are the same as set forth in the general requirements for Viterbi School of Engineering master's degrees.
The required courses are as follows:

Required course (4 units):
CSCI 570 Analysis of Algorithms Units: 4

Choose two of the following courses (8 units):
CSCI 561 Foundations of Artificial Intelligence Units: 4
CSCI 571 Web Technologies Units: 4
CSCI 585 Database Systems Units: 4

Choose an additional 12 units of CSCI courses (only one course may be 400 level)*:
CSCI 400-599 Select any CSCI elective course from the department's offerings. Only one course may be 400 level. Units: 12
*Not from CSCI 590, CSCI591, CSCI594ABZ, OR CSCI598

Recommended Electives
Multiple combinations of options exist to complete the remaining units necessary to earn the degree.

Internship Experience:
Students interested in internships for degree credit are required to complete CSCI 598 Professional Writing and Communication for Computer Scientists (1 unit) as a prerequisite before enrolling in ENGR 596 Engineering Internship (each internship = 1 unit, max 3).

Research:
Students interested in computer science research can select from CSCI 591 Computer Science Research Colloquium (1 unit, max 2) and/or CSCI 590 Directed Research (variable units, max 4).

Additional Coursework:
Non Computer Science Course (such as EE, ISE, INF, etc. from approved list – see department website) (3-4 units)
600-level CSCI Course (faculty and department approval required) (4 units)
Additional 500-level CSCI course (4 units)
Other options may be available with department approval.

Thesis Option
With the approval of a supervising professor, qualified students may be allowed to pursue a thesis option. Students pursuing the thesis option must satisfy all of the policies and course requirements for the master's degree with the following exceptions: A maximum of 4 units from approved courses may be taken at the 400 level in either electrical engineering or computer science. In addition, these students must enroll in a minimum of two semesters of CSCI 594abc for a maximum of 4 units. Total units required for the degree is 28. The thesis must comply with all requirements set by the Graduate School. Students interested in a thesis while enrolled in a CS specialization should consult with their department advisor.
Computer Science (Multimedia and Creative Technologies) (MS)

You must take the following course (4 units):
CSCI 570 Analysis of Algorithms Units: 4

Choose two of the following courses (8 units):
CSCI 561 Foundations of Artificial Intelligence Units: 4
CSCI 571 Web Technologies Units: 4
CSCI 585 Database Systems Units: 4

You must take four of the following courses (13-16 units):
CSCI 420 Computer Graphics Units: 4
CSCI 520 Computer Animation and Simulation Units: 4
CSCI 574 Computer Vision Units: 3
CSCI 576 Multimedia Systems Design Units: 4
CSCI 580 3-D Graphics and Rendering Units: 4
CSCI 582 Geometric Modeling Units: 3
CSCI 599 Special Topics Units: 2, 3, 4
CSCI 674a Advanced Topics in Computer Vision Units: 3

Complete 4-7 units from one or more of the following options:
CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 (variable units, max 4)
CSCI 591 Computer Science Research Colloquium Units: 1
CSCI 594a Master's Thesis Units: 2
CSCI 594b Master's Thesis Units: 2
CSCI 598 Professional Writing and Communication for Computer Scientists Units: 1 and
ENGR 596 Internship in Engineering Units: 1 (each internship = 1 unit, max 3)
Non Computer Science Course (such as EE, ISE, etc. from approved list) Units: 3-4
600-level CSCI Course (adviser approval required) Units: 4
Additional 500-level CSCI course Units: 4

Total units: Minimum 32

Computer Science (Scientists and Engineers) (MS)

Designed for students with engineering or science bachelor's degree but limited background in computer science, this comprehensive, two-year, 37-unit program combines an introductory sequence of undergraduate preparatory and foundational course work with all the graduate breadth requirements necessary to satisfy the traditional master's degree. Note: The preparatory programming requirement and foundational requirements must be completed at USC and cannot be transferred in or waived. Applicants to this program must meet the admissions standards of the Viterbi School of Engineering.

Preparatory Programming Requirement
CSCI 455x Introduction to Programming Systems Design Units: 4

Foundational Requirements
CSCI 402 Operating Systems Units: 4

Breadth Requirements
You must take the following courses (16 units):
CSCI 420 Computer Graphics Units: 4
CSCI 520 Computer Animation and Simulation Units: 4
CSCI 574 Computer Vision Units: 3
CSCI 576 Multimedia Systems Design Units: 4
CSCI 580 3-D Graphics and Rendering Units: 4
CSCI 582 Geometric Modeling Units: 3
CSCI 599 Special Topics Units: 2, 3, 4
CSCI 674a Advanced Topics in Computer Vision Units: 3

Electives
Select two courses, 7-8 units, from approved 500- to 600-level course work from Computer Science. Units: 7-8

Recommended Elective Courses
CSCI 576 Multimedia Systems Design Units: 4
CSCI 577a Software Engineering Units: 4
CSCI 577b Software Engineering Units: 4
CSCI 580 3-D Graphics and Rendering Units: 4
CSCI 588 Specification and Design of User Interface Software Units: 3

Remaining 1-3 units can be completed with the following:
CSCI 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 (variable units, max 4)
CSCI 591 Computer Science Research Colloquium Units: 1
CSCI 598 Professional Writing and Communication for Computer Scientists Units: 1 and
ENGR 596 Internship in Engineering Units: 1 (each internship = 1 unit, max 3)

Total program units: 37
Total degree units: 33

*Note: CSCI 455 is a preparatory requirement for this program, but the units for this course do not count toward the 33 units required for the degree.

Computer Science (Software Engineering) (MS)

Students must satisfy all requirements for the Master of Science degree in Computer Science. In addition, they must take the following courses. Students may also include research for an optional master's thesis in their programs. This program seeks to prepare students for an industrial leadership career in software engineering. It also serves as an introduction to this area for students who wish to pursue advanced studies and research leading to a PhD.

You must take the following course (4 units):
approaches for modeling systems using SysML; applies architectures. This program introduces principles and concepts, and state-intensive systems. Students will be exposed to the design and architecting of large software systems; and guides the architect through every phase of the conception, implementation, deployment and finally retirement of software systems. It is expected that participants in the certificate program will have completed an undergraduate degree in computer science or a related field and will have several years of practical experience in software engineering and/or systems engineering. If students are later admitted to the Master of Science in Computer Science, the courses taken for the certificate may be applied to that program.

**Required Courses**

- CSCI 568 Requirements Engineering Units: 4
- CSCI 578 Software Architectures Units: 4
- SAE 547 Model-Based Systems Architecting and Engineering Units: 3
- SAE 549 Systems Architecting Units: 3

**Electives (Choose One)**

- CSCI 510 Software Management and Economics Units: 4
- CSCI 577a Software Engineering Units: 4
- CSCI 577b Software Engineering Units: 4
- CSCI 578 Software Architectures Units: 4

**Total units: 17-18**

*Prerequisite: CSCI 402
**Prerequisite: EE 457

**Doctoral Degree**

**Computer Science (PhD)**

The Doctor of Philosophy with a major in computer science is awarded in strict conformity with the general requirements of the USC Graduate School. See Requirements for Graduation - GRAD. Departmental requirements for this degree consist of a concentrated program of study and research and a dissertation. Consult a separately published guide, available from the department office and Website, for more information concerning course requirements, the screening procedure, the teaching requirement, the qualifying examination, the thesis proposal and other requirements.

**Course Requirements**

Each student is required to complete two semesters of CSCI 697 (1 unit each, 2 maximum) and CSCI 670 (4 units). In addition, students are required to pass two semesters of CSCI 698 (1-2 units each, no maximum) as part of a teaching requirement.

Elective courses: In addition to the mandatory courses, each student must complete five CSCI courses at the 500 level and above, 4 units each. No more than two of these courses (8 units total) may be at the 500 level; the remaining must be CSCI courses at the 600 level. Directed Research units or thesis credits do not satisfy this requirement. Students are strongly advised to take at least one of their elective courses in an area of computer science that is different from their areas of specialization.
proposed area of research. The PhD adviser is expected to provide guidance on this matter to the student. The CSCI 670 course requirement may be waived by examination only. Each course in the department has a faculty member who is designated as the course "owner." The owner of CSCI 670 is in charge of creating and grading the waiver examination. CSCI 697 and CSCI 698 may not be waived.

Course Requirements
Each PhD student is expected to demonstrate breadth of knowledge as well as depth in a chosen area of concentration. Hence, the required courses fall into two groups: (1) a common core, required of all doctoral students, and (2) additional required courses which depend on the student's area of concentration. The common core consists of five courses selected from the following five groups. Students must complete one class from each group:

Group 1
EE 557 Computer Systems Architecture Units: 3
CSCI 551 Computer Networking Units: 4
CSCI 555L Advanced Operating Systems Units: 4

Group 2
CSCI 577a Software Engineering Units: 4
CSCI 571 Web Technologies Units: 4
CSCI 585 Database Systems Units: 4

Group 3
CSCI 545 Robotics Units: 4
CSCI 561 Foundations of Artificial Intelligence Units: 4
CSCI 564 Brain Theory and Artificial Intelligence Units: 3

Group 4
CSCI 574 Computer Vision Units: 3
CSCI 580 3-D Graphics and Rendering Units: 4
CSCI 582 Geometric Modeling Units: 3

Group 5
CSCI 670x Advanced Analysis of Algorithms Units: 4
CSCI 581 Logic and its Applications Units: 3
MATH 501 Numerical Analysis and Computation Units: 3

Note:
A minimum GPA of 3.5 must be obtained in these five core courses.

Additional Requirements
In addition, all PhD students must register for two semesters of CSCI 597 Seminar in Computer Science Research for a maximum of 2 units during their first year. PhD programs in computer science are grouped into the following specializations: Network and Systems (Interaction); Databases (Interaction); Software Engineering (Interaction); Robotics (Autonomy); Intelligent Agents and Organizations (Autonomy); Natural Language Processing (Autonomy); Graphics and Multimedia (Immersion); Vision (Immersion); Theory of Computation: Genomic, Molecular and Quantum Computation (Computation); Brain Theory and Neural Networks (Computation); High Performance Computing and Parallel Computation (Computation).
Each student must select a specialization as his or her area of concentration. Each specialization requires a minimum of three additional courses. Specific specialization requirements (which may change as the fields change) will be provided to the students by the department. Required courses may be taken in any chronological order, with due attention to prerequisites, and may precede or follow the Screening Evaluation.
A total of 60 units, at least 40 at the 500 level or above, beyond the bachelor's degree is required (including the above required courses). A minimum grade point average of 3.5 must be maintained. Students with a Master of Science degree may transfer up to 27 units.

Qualifying Examination
All doctoral students must pass a qualifying examination in computer science within four years before being admitted to candidacy. The qualifying examination tests the student's broad knowledge of computer science and deep insight into a chosen area of research. Permission to take the qualifying examination must be obtained from the dean of graduate studies at least 60 days prior to its occurrence, and must be taken in the semester for which permission is granted. The qualifying exam committee administers the qualifying examination and evaluates the student's performance. If the examination is failed, the qualifying exam committee may recommend that the student repeat the examination 6–12 months later. The examination cannot be taken more than twice.

Dissertation
An acceptable dissertation based upon original research is required. The dissertation must show mastery of some special field, must be an original contribution to that field and must be presented in scholarly form.

Defense of the Dissertation
When all other requirements are satisfied, the candidate must pass a public final oral examination in defense of the dissertation.

Robert C. Packard President's Chair and Malcolm R. Currie Chair in Technology and the Humanities: C. L. Max Nikias, PhD
Colleen and Roberto Padovani Early Career Chair in Electrical Engineering: Mike Chen, PhD
George T. Pfleger Chair in Electrical Engineering: Robert W. Hellwarth, PhD
Charles Lee Powell Chair in Electrical Engineering and Computer Science: Melvin Breuer, PhD
Charles Lee Powell Chair in Engineering: Viktor Prasanna, PhD
Steven and Kathryn Sample Chair in Engineering: Alan E. Wildner, PhD
Leonard Silverman Chair: Alexander A. Sawchuk, PhD
Andrew and Erna Viterbi Early Career Chair: Maryam M. Sharan, PhD
WISE Junior Gabilan Chair: Michelle Povinelli, PhD
Fred H. Cole Professorship in Engineering: Robert A. Scholtz, PhD
Dean's Professor in Electrical Engineering: Chung-Chieh Kuo, PhD
Dean's Professor in Electrical Engineering: Urbashi Mitra, PhD
Stephen and Etta Varra Professor: Massoud Pedram, PhD
Viterbi Professor in Engineering: Shrikanth (Shri) Narayanan, PhD
Ming Hsieh Faculty Fellow in Electrical Engineering: Hossein Hashemi, PhD
Ming Hsieh Faculty Fellow in Electrical Engineering: Bhaskar Krishnamachari, PhD
Professors: Melvin Breuer, PhD* (Computer Science); Todd Brun, PhD (Computer Science, Physics and Astronomy); Keith M. Chugg, PhD; Stephen B. Cronin, PhD; P. Daniel Dapkus, PhD (Materials Science); Michel Dubois, PhD; Martin Gunderson, PhD (Materials Science, Physics); Sandeep Gupta, PhD; Robert W. Hellwarth, PhD (Physics); Hossein Hashemi, PhD; Kai Hwang, PhD (Computer Science); Petros Ioannou, PhD (Aerospace and Mechanical Engineering, Industrial and Systems Engineering); B. Keith Jenkins, PhD; Edmond Jonckheere, PhD (Mathematics); Eun Sok Kim, PhD; Bart Kosko, PhD (Law); Bhaskar Krishnamachari, PhD (Computer Science); Chung-Chieh Kuo, PhD (Computer Science); Richard Leahy, PhD* (Biomedical Engineering, Radiology); Anthony F. J. Levi, PhD (Physics); Daniel Lidar, PhD (Chemistry, Physics and Astronomy); William C. Lindsey, PhD; Jerry M. Mendel, PhD; Urbashi Mitra, PhD (Computer Science); Mahta Moghaddam, PhD; Andreas Molisch, PhD; Shrikanth (Shri) Narayanan, PhD (Computer Science, Linguistics, Pediatrics, Psychology); Krishna Nayak, PhD (Biomedical Engineering, Pediatrics, Radiology); C. L. Max Nikias, PhD; John O'Brien, PhD; Antonio Ortega, PhD; Alice C. Parker, PhD*; Massoud Pedram, PhD; Timothy Pinkston, PhD; Viktor Prasanna, PhD (Computer Science); C. Raghavendra, PhD (Computer Science); Simon Ramo, PhD; Steven B. Sample, PhD; Alexander A. Sawchuk, PhD*; Robert A. Scholtz, PhD; Leonard Silverman, PhD; John Silvester, PhD; John B. Slaughter, PhD (Education); Armand R. Tanguay Jr., PhD (Biomedical Engineering, Materials Science); Andrew J. Viterbi, PhD; Alan E. Willner, PhD*; Chongwu Zhou, PhD
Associate Professors: Murali Annavarapu, PhD (Computer Science); Salman Avetisian, PhD; Peter Beerel, PhD; Rahul Jain, PhD (Computer Science, Industrial and Systems Engineering); Christos Kyriakakis, PhD; Michael Neely, PhD; Michelle Povinelli, PhD; Aluizio Prata Jr., PhD*; Konstantinos Tsounis, PhD (Computer Science); Benjamin W. Rechard, PhD (Computer Science); Wei Wu, PhD
Assistant Professors: Paul Bogdan, PhD; Michael Shuo-Wei Chen, PhD; Dina El-Damak, PhD; Panayiotis Georgiou, PhD (Computer Science, Justin Haldar, PhD (Biomedical Engineering); Rehan Kapadia, PhD; Ashutosh Nayar, PhD; Pierluigi Nuzzo, PhD; Xuehai Qian, PhD (Computer Science); Maryam M. Sharan, PhD; Mahdi Soltanolkotabi, PhD; Han Wang, PhD; Insoon Yang, PhD
Adjunct Professors: Giuseppe Caire, PhD; Dan Goebel, PhD; P. Vijay Kumar, PhD; Patric Muggili, PhD
Adjunct Associate Professors: Serge Dubovitsky, PhD; Alexandros Potamianos, PhD; P. Thomas Vernier, PhD
Adjunct Assistant Professor: Binda Madhavan, PhD
Adjunct Research Assistant Professor: Matthew P. Black, PhD
Research Professor: Willie Ng, PhD
Research Associate Professors: Stephen Crigo, PhD; Jeffrey Draper, PhD
Research Assistant Professors: Anand Joshi, PhD; Sungbok Lee, PhD; Federico Spedalieri, PhD; John Stang, PhD; Alireza Tabatabaeinejad, PhD
Professors of Engineering Practice: Mary Eshaghian-Wilner, PhD; Edward W. Maby, PhD; Gandhi Puvvada, MS*
Associate Professors of Engineering Practice: Mohammed Beshir, PhD; Shahin Nazarian, PhD; Mark Redekopp, MS*
Senior Lecturer: Douglas Burke, PhD
Lecturer: Ali Zahid, PhD
Emeritus Professors: Alvin Despain, PhD; Hans H. Kuehl, PhD*; Michael J. Safonov, PhD; William H. Steier, PhD; Lloyd Welch, PhD (Mathematics)
Emeritus Instructor: Sidney A. Wielen, BS
Research Professor Emeritus of Electrical Engineering: Sanjit Mitra, PhD

Joint Faculty

Joint Professors: Stanley P. Azen, PhD (Preventive Medicine and Biomedical Engineering); Jack Feinberg, PhD (Physics); Leana Golubchik, PhD (Computer Science); Ramesh Govindan, PhD (Computer Science); Norberto Grzywacz, PhD (Biomedical Engineering); Ellis Horowitz, PhD

647
Citizenship in the Global Community

Graduates will have established the foundations for critical thinking that are needed to broaden or redirect their careers in diverse disciplines such as business, health care and the arts through graduate-level studies and/or the process of life-long leaning.

Students will adhere to highly ethical practices, and they will make exemplary engineering decisions that balance economic, environmental and societal factors for the betterment of the global community.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Electrical Engineering provides both breadth and depth across the range of engineering topics implied by the title. The curriculum includes probability and statistics, including appropriate applications; mathematics through differential and integral calculus, and advanced mathematics, such as differential equations, linear algebra, complex variables and discrete mathematics; sciences (defined as biological, chemical or physical science); and engineering topics (including computing science) necessary to analyze and design complex electrical and electronic devices, software and systems containing hardware and software components.

Bachelor of Science in Computer Engineering and Computer Science

See the listing under Computer Engineering Program.

Minor in Music Recording

A minor in music recording is offered through the USC Thornton School of Music to provide undergraduate students with the background necessary to enter the field of recording engineering and to familiarize them with the design needs of modern recording equipment. The minor is recommended to electrical engineering majors with extensive musical training who would like to combine their technical and musical abilities while learning the engineering applications of physical and mathematical principles to the art of music recording. See the listing under the USC Thornton School of Music.

Master of Science in Electrical Engineering (Electric Power)

See listing in the Sustainable Infrastructure Systems Program section.

Master of Science in Systems Architecting and Engineering

See the listing under Systems Architecting and Engineering Program.

Second Master's Degree

A graduate student who already holds a master's degree from USC may apply up to 4 units toward a second master's degree with the permission of the chair of the major department. All credit, including the transferred units, must be earned within seven calendar years.
For students who earned their first master's degree at another institution, no course work may be repeated from the first program of study and no unit credit from the first program of study may be counted toward the second master's degree.

**Engineer in Electrical Engineering**
Requirements for the Engineer in Electrical Engineering are the same as those listed under Engineer degree, except that both areas of concentration must be in electrical engineering.

**Bachelor's Degree**

**Electrical Engineering (BS)**
The requirement for the degree is 131 units. A cumulative grade point average of C (2.0) is required for all courses taken at USC as well as all upper-division courses applied toward the major, regardless of the department in which the courses are taken. See also the common requirements for undergraduate degrees section.

**Composition/Writing Requirements**
- WRIT 150 Writing and Critical Reasoning – Thematic Approaches Units: 4
- WRIT 340 Advanced Writing Units: 3, 4

**General Education**
General education Units: 24

**Pre-Major Requirements**

**Math Requirement**
- MATH 129 Calculus II for Engineers and Scientists Units: 4  
  or
- MATH 127 Enhanced Calculus II Units: 4  
  or
- MATH 126 Calculus II Units: 4 *
- MATH 229 Calculus III for Engineers and Scientists Units: 4  
  or
- MATH 227 Enhanced Calculus III Units: 4  
  or
- MATH 226 Calculus III Units: 4 *
- MATH 245 Mathematics of Physics and Engineering I Units: 4
- MATH 445 Mathematics of Physics and Engineering II Units: 4

**Physics Requirement**
- PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4 **
- PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4
- PHYS 153L Fundamentals of Physics III: Optics and Modern Physics Units: 4

**Biology Requirement**
Choose one:
- BISC 120Lg General Biology: Organismal Biology and Evolution Units: 4
- BISC 121Lg Advanced General Biology: Organismal Biology and Evolution Units: 4
- BISC 220Lg General Biology: Cell Biology and Physiology Units: 4
- BISC 221Lg Advanced General Biology: Cell Biology and Physiology Units: 4

**Chemistry Elective**
- CHEM 105aLg General Chemistry Units: 4  
  or
- CHEM 115aLg Advanced General Chemistry Units: 4
- MASC 110L Materials Science Units: 4

**Major Requirements**

**Engineering**
- ENGR 102 Engineering Freshman Academy Units: 2

**Electrical Engineering**
- EE 105 Introduction to Electrical Engineering Units: 3  
  or
- EE 109L Introduction to Embedded Systems Units: 3  
  or
- EE 155L Introduction to Computer Programming for Electrical Engineers Units: 4  
  or
- EE 202L Linear Circuits Units: 4  
  or
- EE 209 Foundations of Digital System Design Units: 4  
  or
- EE 301L Linear Systems Units: 4  
  or
- EE 330 Electromagnetics I Units: 3  
  or
- EE 355x Software Design for Electrical Engineers Units: 3  
  or
- EE 364 Introduction to Probability and Statistics for Electrical Engineering and Computer Science Units: 3 ***

**Industrial and Systems Engineering**
- ISE 460 Engineering Economy Units: 3  
  or
- BUAD 301 Technology Entrepreneurship Units: 3

**Major Electives**
See requirements for graduation Units: 28

**Total units: 131**
*MATH 129 and MATH 229 is the preferred calculus sequence for electrical engineering students. Students advised to begin with MATH 125 as a prerequisite to MATH 129 have 4 fewer units of free electives in their programs.
**Satisfies GE requirement.
***Students enrolled in the progressive degree program may take EE 503 (4) to satisfy this requirement.

**Requirements for Graduation:**

**Engineering Electives**

**Entry-Level Electives**
Students are required to take four entry-level electives from the following list:
- EE 241 Applied Linear Algebra for Engineering Units: 3  
  or
- EE 322 Introduction to Digital Audio Units: 3  
  or
- EE 337L Engineering Nano-Systems Units: 3  
  or
- EE 338 Physical Electronics Units: 3  
  or
- EE 348L Electronic Circuits Units: 4  
  or
- EE 354L Introduction to Digital Circuits Units: 4

**Advanced Electives**
Students must fulfill a minimum requirement of three 400-level elective courses in electrical engineering. Of these, one must be a capstone design course from the following list:
- EE 422x Electromagnetic Systems Design Units: 3
Suggested elective courses include:

- EE 423Lx Loudspeaker and Sound-System Design Units: 3
- EE 434Lx Digital Signal Processing Design Laboratory Units: 4
- EE 447Lx Mixed Signal Electronic Circuits Units: 4
- EE 459Lx Embedded Systems Design Laboratory Units: 3
- EE 484x Communication System Design Units: 3
- EE 494a Undergraduate Thesis Units: 2
- EE 494b Undergraduate Thesis Units: 2
  "Students may use EE 494ab Undergraduate Thesis 2+2 Units to satisfy the capstone design requirement."

Free Electives

Free elective courses that complete the 28-unit elective requirement are to be chosen in consultation with the student's academic adviser. Students are encouraged to pursue minor options when satisfying this requirement.

Master's Degree

Electrical Engineering (Computer Networks) (MS)

Under the computer networks option students must satisfy the MS, Electrical Engineering requirements with the exception that only 15 units of EE are required.

Fundamental Courses

It is expected that each student in this program will take or have taken the equivalent of three of the four following fundamental courses:

- CSCI 402 Operating Systems Units: 4
- EE 450 Introduction to Computer Networks Units: 3
- EE 457 Computer Systems Organization Units: 4
- EE 503 Probability for Electrical and Computer Engineers Units: 4

Note:

With the exception of EE 503, the fundamental courses may also be satisfied by having passed EE placement exams.

Three of the following courses are required:

- CSCI 551 Computer Networking Units: 4
- EE 550 Design and Analysis of Computer Communication Networks Units: 3
- EE 555 Broadband Network Architectures Units: 3
- EE 597 Wireless Networks Units: 3

Note:

If a fourth required course is taken it can be counted toward elective credit.

Suggested elective courses include:

- CSCI 530 Security Systems Units: 4
- CSCI 555L Advanced Operating Systems Units: 4
- CSCI 558L Internetworking and Distributed Systems Laboratory Units: 3
- CSCI 570 Analysis of Algorithms Units: 4
- CSCI 694a Topics in Computer Networks and Distributed Systems Units: 3
- CSCI 694b Topics in Computer Networks and Distributed Systems Units: 3
- EE 512 Stochastic Processes Units: 3
- EE 532 Wireless Internet and Pervasive Computing Units: 3
- EE 535 Mobile Communications Units: 3
- EE 554 Real Time Computer Systems Units: 3
- EE 557 Computer Systems Architecture Units: 3
- EE 558 Optical Fiber Communication Systems Units: 3
- EE 579 Wireless and Mobile Networks Design and Laboratory Units: 3
- EE 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- EE 649 Stochastic Network Optimization Units: 3
- EE 650 Advanced Topics in Computer Networks Units: 3
- EE 652 Low-Power Wireless Networks Units: 3
- EE 659 Interconnection Networks Units: 3

Note:

Any other course must be approved by a faculty adviser.

Total units required for the degree: 27

Electrical Engineering (MS)

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in electrical engineering. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree and through an accumulation of no more than 12 units beyond the minimum needed for the specific degree program. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average.

In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in electrical engineering is also subject to the following requirements: (1) a total of at least 27 units is required; (2) every non-EE course for graduate credit requires prior written adviser approval recorded each semester on a special request form in the student's department file; (3) no more than three courses (maximum 12 units) may be transferred — at least 18 adviser-approved units must be taken at the 500 or 600 level; (4) at least 18 units must be taken in electrical engineering, those not in EE require written adviser approval and must be technical in nature; (5) to achieve a degree of breadth in their program, students are encouraged to take two technical courses outside their area of specialization but within EE; (6) at least 21 of the 27 units must be taken in the Viterbi School of Engineering; (7) units to be transferred (maximum four with adviser approval) must have been taken prior to taking classes at USC — interruption of residency is not allowed.

Aerospace Controls Option

The aerospace controls option is available as an area of emphasis for MSEE students interested in learning to apply innovative control techniques to aerospace control problems. In addition to 18 approved units of electrical engineering courses, students in this option will take at least three of the following aerospace and mechanical engineering courses:

- AME 453 Engineering Dynamics Units: 3
- AME 531 Aerodynamics of Wings and Bodies Units: 3
Courses in Computer Science

- AME 532a Flight Vehicle Stability and Control Units: 3
- AME 532b Flight Vehicle Stability and Control Units: 3
- AME 525 Engineering Analysis Units: 3
- AME 526 Engineering Analytical Methods Units: 3
- ASTE 580 Orbital Mechanics I Units: 3

Courses from the School of Cinematic Arts

- CSCI 455x Introduction to Programming Systems Design Units: 4
- CSCI 485 File and Database Management Units: 4
- CSCI 551 Computer Networking Units: 4
- CSCI 571 Web Technologies Units: 4
- CSCI 574 Computer Vision Units: 3
- CSCI 576 Multimedia Systems Design Units: 4
- CSCI 580 3-D Graphics and Rendering Units: 4
- CSCI 582 Geometric Modeling Units: 3
- CSCI 585 Database Systems Units: 4

Electrical Engineering (Multimedia and Creative Technologies) (MS)

Students may earn a specialization in multimedia and creative technologies by completing the general requirements for the Master of Science in Electrical Engineering and the following additional requirements:

At most four units of electives can be taken outside of the Viterbi School of Engineering with adviser approval. Some examples are CTAN 452 Introduction to 3-D Computer Animation (2 units) and CTIN 483 Introduction to Game Development (4 units).

Computer science courses that are cross-listed with EE can (but do not have to) count toward the 18 EE units. Up to nine units of other CSCI courses that either are or are not cross-listed can also be used. Multimedia and creative technologies draws heavily on concepts and techniques from computer science.

Students must include the following three courses in their program:

- EE 483 Introduction to Digital Signal Processing Units: 3
- EE 519 Speech Recognition and Processing for Multimedia Units: 3
- EE 569 Introduction to Digital Image Processing Units: 3

A course can be waived if a student can demonstrate equivalent knowledge of the material and if the course instructor will certify it.

Students must include six courses from the following list of courses in their programs for a total of 18 units.

**Approved Courses for the Multimedia Specialization**

**Courses in Electrical Engineering**

- EE 450 Introduction to Computer Networks Units: 3
- EE 522 Immersive Audio Signal Processing Units: 3
- EE 555 Broadband Network Architectures Units: 3
- EE 577a VLSI System Design Units: 3
- EE 586L Advanced DSP Design Laboratory Units: 4
- EE 596 Wavelets Units: 3
- EE 619 Advanced Topics in Automatic Speech Recognition Units: 3
- EE 669 Multimedia Data Compression Units: 3

**Courses in Computer Science**

- CSCI 455x Introduction to Programming Systems Design Units: 4
- CSCI 485 File and Database Management Units: 4
- CSCI 551 Computer Networking Units: 4
- CSCI 576 Multimedia Systems Design Units: 4
- CSCI 580 3-D Graphics and Rendering Units: 4
- CSCI 582 Geometric Modeling Units: 3
- CSCI 585 Database Systems Units: 4

**Courses from the School of Cinematic Arts**

- CTAN 452 Introduction to 3-D Computer Animation Units: 2
- CTIN 483 Introduction to Game Development Units: 4

**Course in Information Technology**

- ITP 411 Multimedia and Video Production Units: 3

**Additional Requirements**

Students may replace courses in the above list with a combined maximum of multimedia-related EE 599 or CSCI 599 Special Topics courses in their programs. Every course requires prior approval from the faculty adviser, recorded each semester on the plan of study form.

Students may include a maximum of 6 units of EE 590 Directed Research in their programs. Before registering for these units, the faculty adviser must approve a written description of the intended multimedia research project signed by the faculty member who will supervise the student.

Students entering this program are expected to have already completed, either at USC or at another institution, formal course work equivalent to USC course EE 364 Introduction to Probability and Statistics for Electrical Engineering. If an approved course has either EE 441 or EE 464 as a prerequisite, then the student must first take and pass the placement examination that is given each semester for either EE 441 or EE 464 before taking the approved course. Information about placement exams can be found at ee.usc.edu.

Although not required, students should be proficient in C or C++ programming, at the level taught in CSCI 455.

Although not required, ITP 411 Multimedia and Video Production (3 units) will provide the student with hands-on experience in using multimedia application tools. This will help the student prepare a portfolio, which is expected by the industry from students who major in a multimedia program.

**Electrical Engineering (VLSI Design) (MS)**

The Master of Science in Electrical Engineering (VLSI design) is earned by successfully completing the normal requirements for the Master of Science in electrical engineering, with the following additional required courses: EE 536a; EE 577a; EE 577b or EE 536b; and EE 552. If a student chooses to take EE 536b as well as EE 577b, the student may either count EE 536b as one of the courses for Area 2 or EE 577b as one of the courses for Area 1 or Area 3. No more than three courses (maximum 12 units) may be
counted at the 400 level — at least 18 adviser-approved units must be taken at the 500 or 600 level.

The students must also take two courses from one of the following areas and one course from a second area:

**Area 1:**
- CSCI 455x Introduction to Programming Systems Design Units: 4
- EE 560L Digital System Design Units: 4
- EE 577b VLSI System Design Units: 3 (see above)
- EE 658 Diagnosis and Design of Reliable Digital Systems Units: 3
- EE 680 Computer-Aided Design of Digital Systems I Units: 3
- EE 681 Computer-Aided Design of Digital Systems II Units: 3

**Area 2:**
- EE 448L Communication Electronics Units: 4
- EE 504L Solid-State Processing and Integrated Circuits Laboratory Units: 3
- EE 536b Mixed-Signal Integrated Circuit Design Units: 4 (see above)
- EE 537 Modern Solid-State Devices Units: 3
- EE 632 Integrated Communication Systems Units: 3

**Area 3:**
- CSCI 455x Introduction to Programming Systems Design Units: 4
- CSCI 570 Analysis of Algorithms Units: 4
- EE 557 Computer Systems Architecture Units: 3
- EE 560L Digital System Design Units: 4
- EE 577b VLSI System Design Units: 3 (see above)
- EE 659 Interconnection Networks Units: 3
- EE 677 VLSI Architectures and Algorithms Units: 3

**Note:**
With explicit approval of a faculty adviser, EE 599 Special Topics and/or 3 units of EE 590 Directed Research may be used to meet requirements for any of the approved areas.

The remaining courses must be technical electives approved by the adviser, and can including the following:
- EE 457 Computer Systems Organization Units: 4
- EE 477L MOS VLSI Circuit Design Units: 4
- EE 479 Analog Integrated Circuit Design Units: 4
- EE 501 Solid State Units: 3
- EE 502 Advanced Solid State Units: 3
- EE 504L Solid-State Processing and Integrated Circuits Laboratory Units: 3
- EE 506 Semiconductor Physics Units: 3
- EE 540 Introduction to Quantum Electronics Units: 3
- EE 554 Real Time Computer Systems Units: 3
- EE 560L Digital System Design Units: 4
- EE 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- EE 601 Advanced Semiconductor Device Physics Units: 3
- EE 677 VLSI Architectures and Algorithms Units: 3

**Electrical Engineering (Wireless Health Technology) (MS)**

The Master of Science in Electrical Engineering (Wireless Health Technology) reflects a partnership between the Viterbi School of Engineering, the Keck School of Medicine, and other institutions engaged in health care research. The program of study features targeted engineering courses, a rigorous exposure to general medicine, and relevant internship practice (a total of 29-32 units).

**Required Courses (20 Units)**
- EE 450 Introduction to Computer Networks Units: 3
- EE 579 Wireless and Mobile Networks Design and Laboratory Units: 3
- MEDS 530a Foundation of Medicine: Anatomy, Physiology, and Pathology Units: 4
- MEDS 530b Foundation of Medicine: Anatomy, Physiology, and Pathology Units: 4
- MEDS 530c Foundation of Medicine: Anatomy, Physiology, and Pathology Units: 4
- MEDS 597a Health Technology Internship Units: 1
- MEDS 597b Health Technology Internship Units: 1

**Take three electives from the following list (9-12 units)**
- CSCI 545 Robotics Units: 4
- CSCI 561 Foundations of Artificial Intelligence Units: 4
- EE 403 Probability for Electrical and Computer Engineers Units: 4
- EE 519 Speech Recognition and Processing for Multimedia Units: 3
- EE 535 Mobile Communications Units: 3
- EE 550 Design and Analysis of Computer Communication Networks Units: 3
- EE 559 Mathematical Pattern Recognition Units: 3
- EE 564 Digital Communication and Coding Systems Units: 4
- EE 567 Communication Systems Units: 3
- MEDS 500 Basic Concepts in Global Health Units: 4
- MEDS 501 Critical Issues in Global Health Units: 4
- MEDS 502 Global Epidemiology of Diseases and Risk Factors Units: 4

**Total units: 29-32**

Students are expected to have a background in linear algebra equivalent to EE 441 and experience with a programming language such as C or C++. Admitted students who do not meet prerequisites by placement examination will be assigned courses to complete the deficiencies.

**Electrical Engineering (Wireless Networks) (MS)**

The Master of Science in Electrical Engineering (Wireless Networks) is a unique interdisciplinary degree program that prepares graduates for the design and improvement of future wireless networks such as the "Internet of Things." The program combines courses related to radio hardware, transmission techniques, the medium-access control layer, networking, applications and standards.
No more than three courses (maximum 12 units) may be counted at the 400 level — at least 18 adviser-approved units must be taken at the 500 or 600 level.

**Required Courses (15 Units)**
- CSCI 402 Operating Systems Units: 4
- EE 503 Probability for Electrical and Computer Engineers Units: 4
- EE 511 Simulation Methods for Stochastic Systems Units: 1
- EE 535 Mobile Communications Units: 3
- EE 597 Wireless Networks Units: 3

**Elective Courses (12-14 Units, at Least One Course from Two Areas)**

**Transmission Techniques and Signal Processing**
- EE 483 Introduction to Digital Signal Processing Units: 3
- EE 558 Optical Fiber Communication Systems Units: 3
- EE 564 Digital Communication and Coding Systems Units: 4
- EE 583 Statistical Signal Processing Units: 3
- EE 586L Advanced DSP Design Laboratory Units: 4

**Architectures, Protocols, and Applications**
- EE 519 Speech Recognition and Processing for Multimedia Units: 3
- EE 532 Wireless Internet and Pervasive Computing Units: 3
- EE 550 Design and Analysis of Computer Communication Networks Units: 3
- EE 555 Broadband Network Architectures Units: 3
- EE 579 Wireless and Mobile Networks Design and Laboratory Units: 3
- EE 652 Low-Power Wireless Networks Units: 3

**Communication Hardware and Design**
- EE 448L Communication Electronics Units: 4
- EE 541 Radio Frequency Filter Design Units: 3
- EE 544 Radio Frequency Systems and Hardware Units: 3

**Note:**
This program assumes prerequisite preparation in the area of computer networks. Students who do not meet this requirement or who do not pass a related placement exam will be required to take EE 450 Introduction to Computer Networks.

**Financial Engineering (MS)**
The objective of this program is the training of graduate students with engineering, applied mathematics or physics backgrounds in the application of mathematical and engineering tools to finance. Financial engineering is a multidisciplinary education program that involves the Viterbi School of Engineering, the USC Marshall School of Business and the USC Dornsife College of Letters, Arts and Sciences (Department of Economics). Financial engineering uses tools from finance and economics, engineering, applied mathematics and statistics to address problems such as derivative securities valuation, strategic planning and dynamic investment strategies, and risk management, which are of interest to investment and commercial banks, trading companies, hedge funds, insurance companies, corporate risk managers and regulatory agencies.

A minimum grade point average of 3.0 must be earned on all course work applied toward the master's degree in financial engineering. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average. In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in Financial Engineering is also subject to the following requirements: (1) a total of at least 30 units is required; (2) every plan of study requires prior written approval by the contact faculty of the program; (3) units to be transferred (maximum of four with adviser approval) must have been taken prior to taking classes at USC; interruption of residency is not allowed.

**Curriculum**
The degree requirements include six required courses and two courses from each of two lists of electives for a minimum total of 30 units.

**Required**
- GSBA 548 Corporate Finance Units: 2, 3
- FBE 559 Management of Financial Risk Units: 3 or ISE 563 Financial Engineering Units: 3
- EE 503 Probability for Electrical and Computer Engineers Units: 4
- EE 512 Stochastic Processes Units: 3
- EE 518 Mathematics and Tools for Financial Engineering Units: 4
- EE 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 (1) or ENGR 596 Internship in Engineering Units: 1

**Electives (Adviser Approved)**

**Finance, Business, Economics Area:**
Two courses (6-7 units) from the following:
- ECON 500 Microeconomic Analysis and Policy Units: 4
- ECON 501 Macroeconomic Analysis and Policy Units: 4
- ECON 613 Economic and Financial Time Series I Units: 4
- FBE 529 Financial Analysis and Valuation Units: 3
- FBE 535 Applied Finance in Fixed Income Securities Units: 1.5, 3
- FBE 540 Hedge Funds Units: 3
- FBE 543 Forecasting and Risk Analysis Units: 3
- FBE 554 Trading and Exchanges Units: 3
- FBE 555 Investment Analysis and Portfolio Management Units: 3
- FBE 589 Mortgages and Mortgage-Backed Securities and Markets Units: 3
- ISE 566 Financial Accounting Analysis for Engineering Units: 3
Optimization, Simulations, Stochastic Systems:
Two courses (6-7 units) from the following:
- CE 645 Uncertainty Modeling and Stochastic Optimization Units: 3
- CSCI 455 Introduction to Programming Systems Design Units: 4
- CSCI 570 Analysis of Algorithms Units: 4
- EE 500 Neural Learning and Computational Intelligence Units: 4
- EE 517 Statistics for Engineers Units: 3
- EE 553 Computational Solution of Optimization Problems Units: 3
- EE 556 Stochastic Systems Units: 3
- ISE 520 Optimization: Theory and Algorithms Units: 3
- ISE 536 Linear Programming and Extensions Units: 3
- ISE 539 Stochastic Elements of Simulation Units: 3

Note:
*Students cannot receive credit for both ISE 520 and EE 553

Dual Degree
Electrical Engineering/Engineering Management (MS)
The Ming Hsieh Department of Electrical Engineering in conjunction with the Daniel J. Epstein Department of Industrial and Systems Engineering offers a program leading to the degree of Master of Science in Electrical Engineering/Master of Science in Engineering Management. This program is designed for graduate electrical engineers whose career objectives lead to increasing technical management responsibilities.

In addition to the general requirements of the USC Viterbi School of Engineering, the dual degree of Master of Science in Electrical Engineering and Master of Science in Engineering Management is also subject to the following requirements:

(1) All applicants must meet the admissions requirements of both the Department of Electrical Engineering and the Department of Industrial and Systems Engineering; (2) a total of at least 48 units is required; (3) 24 of these must satisfy the requirements of the master's degree in electrical engineering; (4) 21 units must satisfy the required courses towards the master's degree in engineering management; (5) 3 units of electives approved by the program director or adviser; (6) all courses counted towards the dual degree must be at the 500 level, except those 400-level courses required by the master's degree in electrical engineering.

Doctoral Degree
Electrical Engineering (PhD)
The Doctor of Philosophy with a major in electrical engineering is awarded in strict conformity with the general requirements of the USC Graduate School. See general requirements for graduate degrees. Departmental requirements for this degree consist of a concentrated program of study and research and a dissertation. Each student wishing to undertake a doctoral program must first be admitted to the program and then take the screening examination. This examination will emphasize comprehension of fundamental material in one of the 13 specialized areas of electrical engineering listed below.

Listed under each area are courses offered by the Department of Electrical Engineering, which will provide basic background for the examination and partial preparation for the dissertation. Not all courses listed are required for preparation for the screening examination in any specific area. Consult a separately published guide, available from the department office, for more information concerning examination content and scheduling. Further guidance concerning the full completion of courses, including those given outside the department, which are recommended for preparation for the dissertation, can be obtained from the faculty in each technical area.

Professors: Jiun-Jen Lee, PhD, PE (Civil and Environmental Engineering)*; John Silvester, PhD (Electrical Engineering); James E. Moore, II, PhD (Industrial and Systems Engineering, Civil and Environmental Engineering, Public Policy); Priya Vashishta (Chemical Engineering and Materials Science, Computer Science)
Associate Professors: Burcin Becerik-Gerber, DDes (Civil and Environmental Engineering); Mansour Rahimi, PhD (Industrial and Systems Engineering); Geoffrey R. Shiflett, PhD (Aerospace and Mechanical Engineering)*
Professors of the Practice: Edward Maby, PhD (Electrical Engineering); Azad Madni, PhD (Astronautical Engineering, Systems Architecting and Engineering)
*Recipient of university-wide or school teaching award.

Master's Degree
Green Technologies (MS)
Green Technologies is a highly interdisciplinary degree program that emphasizes green systems and the environment, energy technology and efficiency, and sustainability and society. The discipline seeks opportunities for alternative sourcing, conservation, efficiency and repurposing through
an understanding of product life cycles from origins to recycling or inevitable disposal. Green technologists will design products, processes and complex infrastructure systems to promote sustainable attributes of importance to the environment and the global community.

The Green Technologies program requires a minimum of 27 units (typically nine courses). At least 18 units must be at the 500-level or above, and at least 18 units must be completed in the Viterbi School of Engineering. These 18 units may reflect courses offered by other schools if cross-listed in a department in the Viterbi School. Students with BS degrees in engineering and science disciplines can be accepted into the program.

Required Courses
Students are required to take two courses in each of three topical areas:

**Green Systems and the Environment (two courses)**
- ISE 576 Industrial Ecology: Technology-Environment Interaction Units: 3
- SAE 515 Sustainable Infrastructure Systems Units: 3

**Energy Technology and Efficiency (two courses)**
- CHE 510 Energy and Process Efficiency Units: 3 or AME 577 Survey of Energy and Power for a Sustainable Future Units: 3

**Electives (three courses): 9 Units**
Electives shall be chosen in consultation with an adviser to develop technical specialization in an area of interest to the student. This may include up to 3 units of directed research.

**Note:** Additional courses from this list may be used to fulfill the elective requirement.

- PPD 692 Transportation and the Environment Units: 4
- PPDE 632 Sustainable Cities Units: 4
Undergraduate Program Educational Objectives

Graduates of the Bachelor of Science in Industrial and Systems Engineering program are prepared to achieve any of the following accomplishments:

- Obtain employment in an organization that values people who demonstrate both technical competence and business awareness.
- Pursue graduate or professional education.
- Assume a leadership role in their employment organization or community.
- Utilize critical reasoning, collaboration and creativity to contribute to society.

Undergraduate Program Criteria

The program leading to a Bachelor of Science in Industrial and Systems Engineering prepares graduates to design, develop, implement, and improve integrated systems that include people, materials, information, equipment and energy. The curriculum includes in-depth instruction to accomplish the integration of systems using appropriate analytical, computational, and experimental practices. For additional information, visit use.edu/dept/ise.

Graduate Degree Requirements

Health Systems Management Engineering Program

This degree is in revision, and applications are not currently being accepted. Interested students should consider the Health Administration (MHA) program in the USC Price School of Public Policy.

Master of Science in Product Development Engineering

This interdisciplinary program is offered jointly with the Department of Aerospace and Mechanical Engineering. The program is available via distance education. See the listing under Product Development Engineering.

Master of Science in Systems Architecting and Engineering

See the listing under Systems Architecting and Engineering Program. The program is available via distance education.

Dual Degree Program (MS, Electrical Engineering / MS, Engineering Management)

See listing in the Electrical Engineering section.

Engineer in Industrial and Systems Engineering

Requirements for the Engineer in Industrial and Systems Engineering are the same as set forth in the general requirements.

Graduate Certificates

Graduate Certificate in Network Centric Systems

See listing under Systems Architecting and Engineering Program. The program is available via distance education.

Graduate Certificate in Optimization and Supply Chain Management

This abbreviated interdisciplinary program is offered jointly with the Department of Data Sciences and Operations in the
USC Marshall School of Business. See here for program requirements.

Graduate Certificate in Systems Architecting and Engineering
See listing under Systems Architecting and Engineering Program. The program is available via distance education.

Graduate Certificate in Transportation Systems
This abbreviated interdisciplinary program is offered jointly with the Astani Department of Civil and Environmental Engineering and the USC Price School of Public Policy. See listing under Civil Engineering.

Graduate Certificate in System Safety and Security
Applications for this program are not currently being accepted.

Bachelor's Degree

Industrial and Systems Engineering (BS)
The Epstein Department of Industrial and Systems Engineering offers a Bachelor of Science degree in Industrial and Systems Engineering. The requirement for the degree is 128 units. A cumulative grade point average of C (2.0) is required for all upper division courses applied towards the major, regardless of the department in which the courses are taken. See the common requirements for undergraduate degrees.

Composition/Writing Requirement
WRIT 150 Writing and Critical Reasoning--Thematic Approaches Units: 4 ’
WRIT 340 Advanced Writing Units: 3, 4 (3)

General Education
General Education* + Units: 24

Pre-Major Requirements
Math Requirement
MATH 125g Calculus I Units: 4
MATH 126 Calculus II Units: 4
MATH 225 Linear Algebra and Linear Differential Equations Units: 4
MATH 226 Calculus III Units: 4

Physics Requirement
PHYS 151Lg Fundamentals of Physics I: Mechanics and Thermodynamics Units: 4 ’
PHYS 152L Fundamentals of Physics II: Electricity and Magnetism Units: 4

Chemistry Elective
CHEM 105aLg General Chemistry Units: 4 or
CHEM 115aLg Advanced General Chemistry Units: 4 or
MASC 110L Materials Science Units: 4

Major Requirements

Engineering Requirement
ENGR 102 Engineering Freshman Academy Units: 2

Computer Science Elective
CSCI 101L Fundamentals of Computer Programming Units: 3 or
CSCI 103L Introduction to Programming Units: 4

Industrial and Systems Engineering Requirement
ISE 105 Introduction to Industrial and Systems Engineering Units: 2
ISE 220 Probability Concepts in Engineering Units: 3
ISE 225 Engineering Statistics I Units: 3
ISE 315L Engineering Project Management Units: 3
ISE 330 Introduction to Operations Research: Deterministic Models Units: 3
ISE 331 Introduction to Operations Research: Stochastic Models Units: 3
ISE 410 Planning and Scheduling Units: 3
ISE 435 Discrete Systems Simulation Units: 3
ISE 440 Work, Technology, and Organization Units: 3
ISE 460 Engineering Economy Units: 3
ISE 495ax Senior Design Project Units: 2
ISE 495bx Senior Design Project Units: 2

Database Design Elective
ISE 382 Database Systems: Concepts, Design and Implementation Units: 4 or
DSO 435 Enterprise Data Architecture Units: 4

Human Factors Elective
ISE 370L Human Factors in Work Design Units: 4 ** or
ISE 470 Human/Computer Interface Design Units: 3

Major Electives
Major Electives** 24 Units
At least 12 units must be from one of the approved Focus Groups
At least 9 units must be from the Approved Engineering Electives

Total units: 128

*GE Category Category E is fulfilled by PHYS 151 or CHEM 105a.
GE Category F is fulfilled by MATH 125.
**Students selecting ISE 370 are only required to complete 23 units of Major Electives.

Focus Groups
Students must select at least 12 units from one group; however, all courses in a group are recommended.

Operations Group
ISE 310L Facilities and Logistics Units: 4
ISE 327 Six Sigma and Lean Operations Units: 3
ISE 426 Statistical Quality Control Units: 3
Plus at least one course from among the following:
ACCT 410x Foundations of Accounting Units: 4
ISE 232L Manufacturing Processes Units: 3
ITP 488 Managing Supply Chains with Advanced Planning & Optimization Units: 3

Information Systems Group
ITP 320 Enterprise Wide Information Systems Units: 4
Plus at least 8 units from among the following:
DSO 431 Foundations of Digital Business Innovation Units: 4
DSO 433 Business Process Design Units: 4
The Master of Science in Analytics is designed to satisfy the growing demand for professionals equipped with significant technical and quantitative training in the fundamentals of analytics for solving engineering and management problems in today’s data-intensive digital world. Analytics is a multidisciplinary field that relates the application of engineering approaches and methods to the analysis and management of engineering and enterprise processes based on data. Learning objectives of this program involve data collection, cleansing, fusing and curating, for the purpose of analyzing trends, discovering patterns and building decision models for well-reasoned decision support. Rigorous mathematical modeling and computational methods tools are at the heart of the program. Graduates of this program will be prepared to convert data into meaningful information, embedded in decision support systems that can help organizations make important operational decisions and help set strategic direction and policy.

**Master's Degree**

**Analytics (MS)**

**Ethel Percy Andrus**

**Gerontology Center 240**

(213) 740-4893

**Program Director:** Geza Bottlik, Engineer, PE

This program is designed primarily, but not exclusively, for graduate engineers whose career objectives lead to increasing technical management responsibilities. Students interested in the engineering management objectives may also want to consider the MS, Industrial and Systems Engineering/MBA dual degree program.

**Master of Science in Engineering Management**

A total of 30 units is required for the degree. A minimum of 18 units must be taken in the Epstein Department of
Industrial and Systems Engineering. A total of 21 units must be at the 500 level or above. The program is available via distance education. Applicants to the program are expected to have a degree in engineering or the equivalent.

**Required Courses (6 Units)**
ISE 500 Engineering Management Decisions and Statistics Units: 3
ISE 561 Economic Analysis of Engineering Projects Units: 3

**At Least One Course From the Accounting Area is Required (3 Units)**
CE 502 Construction Accounting and Finance Units: 3
ISE 566 Financial Accounting Analysis for Engineering Units: 3

**At Least Two Courses from the Engineering Management Area are Required (6 Units)**
ISE 515 Engineering Project Management Units: 3
ISE 544 Management of Engineering Teams Units: 3
ISE 564 Performance Analysis Units: 3
ISE 565 Law and Finance for Engineering Innovation Units: 3

**At Least One Course from the Quantitative Methods Area is Required (3 Units)**
ISE 513 Inventory Systems Units: 3
ISE 514 Advanced Production Planning and Scheduling Units: 3
ISE 525 Design of Experiments Units: 3
ISE 527 Quality Management for Engineers Units: 3
ISE 530 Optimization Methods for Analytics Units: 3

**Electives (12 units):**
Four courses for at least 12 units chosen to form a coherent program with the consent of the adviser.

**Industrial and Systems Engineering (MS)**
The Master of Science in Industrial and Systems Engineering is awarded in strict conformity with the general requirements of the Viterbi School of Engineering. This program enhances the technical capabilities of the industrial engineer. The program is available via distance education. The MS program is for students who want to become technical leaders in the field of industrial and systems engineering. Applicants to the program are expected to have a bachelor's degree in an engineering discipline with undergraduate course work in computing, probability and statistics, and engineering economy. Admitted students who do not meet prerequisites will be assigned courses to complete the deficiencies. A total of 30 units is required for the degree, of which at least 18 units must be completed in the Epstein Department of Industrial and Systems Engineering. Of the 30 units, 20 must be at the 500 level or above.

**Required Courses**
ISE 514 Advanced Production Planning and Scheduling Units: 3
ISE 515 Engineering Project Management Units: 3

**ISE Electives (Choose One from Each Group)**

**Systems Design**
ISE 510 Advanced Computational Design and Manufacturing Units: 3
ISE 525 Design of Experiments Units: 3
ISE 527 Quality Management for Engineers Units: 3
ISE 576 Industrial Ecology: Technology-Environment Interaction Units: 3
SAE 541 Systems Engineering Theory and Practice Units: 3
SAE 549 Systems Architecting Units: 3

**Production**
ISE 511L Mechatronic Systems Engineering Units: 3
ISE 513 Inventory Systems Units: 3
ISE 517 Modern Enterprise Systems Units: 3

**Systems Performance**
ISE 544 Management of Engineering Teams Units: 3
ISE 564 Performance Analysis Units: 3
ISE 570 Human Factors in Engineering Units: 3

**Information Systems**
ISE 580 Performance Modeling and Simulation Units: 3
ISE 582 Web Technology for Industrial Engineering Units: 3
ISE 583 Enterprise Wide Information Systems Units: 3

**Quantitative Methods**
ISE 532 Network Flows Units: 3
ISE 563 Financial Engineering Units: 3
ISE 530 Optimization Methods for Analytics Units: 3
or
ISE 536 Linear Programming and Extensions Units: 3
ISE 538 Elements of Stochastic Processes Units: 3 or
ISE 580 Performance Modeling and Simulation Units: 3

**Adviser approved electives: 9 units**

**Total units: 30**

**Operations Research Engineering (MS)**
Ethel Percy Andrus
Gerontology Center 240
(213) 740-4891
Program Director: Maged Dessouky, Ph.D.

**Master of Science in Operations Research Engineering**
The Master of Science in Operations Research Engineering is conferred upon candidates who hold bachelor's degrees in engineering, mathematics, science or related fields who successfully complete an integrated program (with departmental approval in advance) of not less than 30 units. The program must include not less than 21 units of industrial
and systems engineering courses related to operations research and 9 units of approved electives. Students will be required to make up deficiencies in mathematics and statistics. Additional courses or examinations may be required at the discretion of the department before full admission to the program. The General Test of the Graduate Record Examinations (GRE) is required. Additional information is available from the department. This program is available via distance education.

**Required Courses**

- ISE 532 Network Flows Units: 3
- ISE 536 Linear Programming and Extensions Units: 3
- ISE 538 Elements of Stochastic Processes Units: 3
- ISE 580 Performance Modeling and Simulation Units: 3
- ISE 582 Web Technology for Industrial Engineering Units: 3
  or
- ISE 583 Enterprise Wide Information Systems Units: 3

Select at least two of the following 10 courses: 6 units

- CE 645 Uncertainty Modeling and Stochastic Optimization Units: 3
- ISE 513 Inventory Systems Units: 3
- ISE 514 Advanced Production Planning and Scheduling Units: 3
- ISE 520 Optimization: Theory and Algorithms Units: 3
- ISE 525 Design of Experiments Units: 3
- ISE 539 Stochastic Elements of Simulation Units: 3
- ISE 562 Value and Decision Theory Units: 3
- ISE 563 Financial Engineering Units: 3
- ISE 576 Industrial Ecology: Technology-Environment Interaction Units: 3
- SAE 541 Systems Engineering Theory and Practice Units: 3

400- or 500-level computer science course, approved by faculty adviser Units: 3

Two electives, approved by faculty adviser Units: 6

**Total units: 30**

**University Certificate**

**Health Systems Operations Graduate Certificate**

This 17-unit graduate certificate is jointly sponsored by the Epstein Industrial and Systems Engineering Department and the USC Price School of Public Policy (Master of Health Administration program), and administered by the Epstein ISE Department. This certificate is designed for students with bachelor's degrees in applied social science, engineering or the sciences, who are interested in operations management and health care applications. The courses taken for the certificate may be applied later to the Epstein ISE Department's Master of Science in Engineering Management degree, the USC Price School of Public Policy's Master of Health Administration degree or the jointly sponsored MS in Health Systems Management Engineering degree subject to approval of the appropriate academic unit. This program is available via distance education.

**Required Courses**

- ISE 507 Six-Sigma Methods and Applications Units: 3
- ISE 508 Health Care Operations Improvement Units: 3
- PPD 509 Problems and Issues in the Health Field Units: 4
- PPD 513 Legal Issues in Health Care Delivery Units: 2
- PPD 517 Concepts and Practices in Managing Health Care Organizations Units: 2 or
- PPD 514 Economic Concepts Applied to Health Units: 4
- PPD 557 Modeling and Operations Research Units: 4 or
- ISE 530 Optimization Methods for Analytics Units: 3
  or
- ISE 562 Value and Decision Theory Units: 3

**Total units: 17-18**

**Dual Degree**

**Industrial and Systems Engineering (MS/MBA)**

The USC Marshall School of Business in conjunction with the Epstein Department of Industrial and Systems Engineering offers a program leading to the degree of Master of Business Administration/Master of Science in Industrial and Systems Engineering. This alternative requires 66 units for graduates of industrial and systems engineering undergraduate curricula and leads to both a Master of Science in Industrial and Systems Engineering and the Master of Business Administration. The dual degree provides an education of great depth. The total number of units required for the MBA program is 48 including all required courses in an MBA program and graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students may not count courses taken outside the Marshall School of Business toward the 48 units.

**Required Courses (Minimum 18 Units)**

- ISE 514 Advanced Production Planning and Scheduling Units: 3
- ISE 515 Engineering Project Management Units: 3

**ISE Electives (Choose One from Each Group)**

**Systems Design (3 units)**

- ISE 525 Design of Experiments Units: 3
- ISE 527 Quality Management for Engineers Units: 3
- SAE 541 Systems Engineering Theory and Practice Units: 3

**Information Systems (3 units)**

- ISE 580 Performance Modeling and Simulation Units: 3
- ISE 582 Web Technology for Industrial Engineering Units: 3
- ISE 583 Enterprise Wide Information Systems Units: 3

**Quantitative Methods (3 units)**
Crowdsourcing, Big Data and data analytics, virtual and generated content, and others. The goal is to provide analysis and to help define a roadmap for the communication technologies of the future. Students work on projects where the fields of communication and engineering naturally converge, namely in the engineering of communication (e.g. the design and construction of mobile apps, online networks, social media tools, the use of technology in journalism, etc.) and the communication of engineering (e.g. public relations, public awareness, and public engagement of topics relating to science and technology).

There are many career opportunities for students completing the Master of Communication Informatics degree. Traditional media outlets ranging from newspapers to network/cable news are hungry for individuals who understand the new technology-enabled social communication paradigms and can help translate this knowledge into new products. An example is the coverage of natural disasters, where it is difficult for media to get on the ground, but where social media allows victims to relay experiences and provide accounts of these situations. How to collect, manage, distribute and capitalize from this news source is a major challenge in current media. There are also careers within these emerging communication platforms. Many technology companies realize the value in employing experts who understand the human factors aspects of their products. Communication is now so vital to the function of many products that success and failure are often determined by how well communication is performed, and how seamlessly it integrates into existing platforms. In the corporate world, the need to understand and capitalize on social media is pervasive, and the unique expertise this degree provides leaves graduates well positioned to become leaders in the space. Finally, as technology becomes ubiquitous in society, the role of the informed commentator becomes more meaningful. There is need for individuals who understand the basics of communication and have enough technology knowledge to provide analysis at a meaningful level to the public.

### Requirements for completion (32 units minimum)

#### Foundations (16 units, 4 Courses)

- **COMM 502 Theoretical Approaches to Multidisciplinary Design Projects** Units: 4
- **INF 510 Principles of Programming for Informatics** Units: 4

### Total units: 18
Students will understand the value of a technology in meeting information protection needs. They will learn the principles of information protection and the role application levels of information security, both from the standpoint of the skills necessary to administer technology decisions. Students will gain the knowledge and learn to develop a security policy and how policy drives privacy, use of cryptography and key management. They will understand why information security plans succeed or fail. Students will have hands-on experience simulating real-world scenarios with extensive laboratory work that is designed by current and former information security practitioners.

Requirements for completion (28 units minimum)

Required Courses (20 Units)

- CSCI 530 Security Systems Units: 4
- INF 519 Foundations and Policy for Information Security Units: 4
- INF 523 Computer Systems Assurance Units: 4
- INF 525 Trusted System Design, Analysis and Development Units: 4
- INF 529 Security and Privacy in Informatics Units: 4

At least one of the following:

- INF 521 Application of Cryptography to Information Security Problems Units: 3
- INF 526 Secure Systems Administration Units: 4
- INF 528 Computer Forensics Units: 4

Plus an additional 4-5 units that may be composed of items from the above list or

- ENGR 596 Internship in Engineering Units: 1
- INF 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- PTE 519 Integrated Physical and Cyber Security for Oil and Gas Operations Units: 3
- Other courses may be approved in consultation with department adviser.

Data Informatics (MS)

Associate Director of Informatics: Craig Knoblock, PhD

The social emergence of large data environments and infrastructures (Big Data) in diverse domains and uses has spawned a requirement for analysis of the information contained. Past experience has shown that extracting value from large information stores can often be difficult due to the intrinsic nature of data, and the limits on ability to intelligently mine the information to add value to the organization.

The USC Viterbi Master of Science in Data Informatics provides students with the knowledge and skill to: a) understand and contribute toward the significant technical challenges created by large data environments, including architecture, security, integrity, management, scalability, artificial intelligence topics and distribution; b) understand the principles and application of informatics, and the goals of enterprise intelligence; and c) utilize technical/engineering skills coupled with informatics capabilities to provide enterprise-centric solutions to stakeholders. The degree features application of knowledge and skill in hands-on type experiences, with the goal of having students leave the program having "lived in the data."
Students will understand the overall field of data analytics, the role of the analyst and/or data scientist, and the domains where informatics skills can be applied to critical organization missions. They will understand how data management, data visualization, data mining and artificial intelligence techniques (specifically machine learning) are critical to the analysis process, and how these can be applied to real world challenges. Through an extensive elective track, they can find the specializations that will help them better prepare themselves for the area(s) of analytics in which they hope to contribute.

**Required Courses (20 units)**

- INF 551 Foundations of Data Management Units: 4
- INF 552 Machine Learning for Data Informatics Units: 4
- INF 553 Foundations and Applications of Data Mining Units: 4
  
  One of the following user interface/visualization classes:
  - INF 554 Information Visualization Units: 4
  - INF 555 User Interface Design, Implementation, and Testing Units: 4
  - INF 556 User Experience Design and Strategy Units: 4
  
  One of the following capstone classes:
  - INF 558 Building Knowledge Graphs Units: 4
  - INF 560 Data Informatics Professional Practicum Units: 4

**Elective Courses (8 units)**

- CSCI 530 Security Systems Units: 4
- CSCI 544 Applied Natural Language Processing Units: 4
- CSCI 548 Information Integration on the Web Units: 4
- CSCI 550 Advanced Data Stores Units: 4
- CSCI 561 Foundations of Artificial Intelligence Units: 4
- CSCI 570 Analysis of Algorithms Units: 4
- CSCI 572 Information Retrieval and Web Search Engines Units: 4
- CSCI 587 Geospatial Information Management Units: 4
- ENGR 596 Internship in Engineering Units: 1
- INF 520 Foundations of Information Security Units: 3
- INF 528 Computer Forensics Units: 4
- INF 529 Security and Privacy in Informatics Units: 4
- INF 556 User Experience Design and Strategy Units: 4
- INF 557 Foresight for Engineers Units: 3
- INF 560 Data Informatics Professional Practicum Units: 4
- INF 561 Engineering Data Analytics Units: 3
- INF 562 Integration of Medical Imaging Systems Units: 3
- INF 563 Medical Diagnostics, Therapeutics and Informatics Application Units: 3
- INF 570 Foundations of Communication Informatics Units: 3
- INF 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- INF 599 Special Topics Units: 1, 1.5, 2, 2.5, 3, 3.5, 4, 4.5, 5, 5.5, 6, 6.5, 7, 7.5, 8

**Note:**

*Whichever courses (INF 554, INF 555, INF 556, INF 558, INF 560) are not taken as a required course may be taken as an elective*

**Spatial Informatics (MS)**

Viterbi School of Engineering, Department of Computer Science, Informatics Program

informatics.usc.edu

Program Director: Cyrus Shahabi, PhD
Program Associate Director: Craig Knoblock, PhD

Dornsife College of Letters, Arts and Sciences, Spatial Sciences Institute

spatial.usc.edu

Program Director: John P. Wilson, PhD
Program Associate Director: Susan H. Kamei, PhD

The Master of Science in Spatial Informatics is a cross-disciplinary joint degree program offered by the Viterbi School of Engineering and the Dornsife College of Letters, Arts and Sciences. Students must be admitted by both the Viterbi School of Engineering and the Dornsife College of Letters, Arts and Sciences.

Geospatial data accessibility, spatial decision support systems and geospatial problem solving environments are revolutionizing most industries and disciplines, including health care, marketing, social services, human security, education, environmental sustainability and transportation. Spatial informatics professionals draw upon engineering, computer science and spatial sciences principles to solve data-intensive, large-scale, location-based problems.

The USC Master of Science in Spatial Informatics provides students with the knowledge and skills to:

- Understand and contribute toward the significant technical and societal challenges created by large location-based data environments, including architecture, security, integrity, management, scalability, artificial intelligence topics and distribution;
- Understand the principles and application of informatics and geographic information science (GIS), and the goals of enterprise information intelligence and analytics; and
- Utilize technical, engineering and GIS skills coupled with informatics capabilities to intelligently mine data to provide enterprise-centric solutions for diverse societal issues.

Students complete a core set of courses to provide a foundation in information engineering, analysis and spatial thinking with their choice of electives to optimize preparation for their preferred career path and unique professional opportunities.

Students will understand the overall field of data analytics, the role of the analyst and/or data scientist and the domains where spatial informatics skills can be applied to critical organization missions. They will understand how data management, data visualization and artificial intelligence techniques (specifically data mining and machine learning) are critical to the spatial analysis process and how these can be applied to real world challenges. Throughout their course work, students will assemble a digital portfolio of work
product that is intended to help them demonstrate their capabilities and skills for the job market. Applicants to this program are expected to have a previous degree in science, technology, engineering, math or a related social science with at least a 3.0 overall GPA and satisfactory GRE Test results. Programming experience or at least a year of calculus is required for admission.

**Degree Requirements**
A minimum of 32 units with an overall cumulative GPA of at least 3.0 is required for the MS in Spatial Informatics. Students should consult with an academic adviser prior to registering for any classes.

**Required Courses (6 courses/24 units)**

- **Foundation (take both courses):**
  - INF 549 Introduction to Computational Thinking and Data Science Units: 4
  - SSCI 581 Concepts for Spatial Thinking Units: 4

- **Spatial core (take both courses):**
  - SSCI 580 Spatial Computing Units: 4
  - SSCI 583 Spatial Analysis Units: 4

- **Informatics core (take both courses):**
  - INF 510 Principles of Programming for Informatics Units: 4
  - INF 550 Overview of Data Informatics in Large Data Environments Units: 4

**Spatial and Informatics Elective Courses**

- **(2-3 courses/8 units)**
  - SSCI 596 and ENGR 596 are optional.

- **Spatial elective (4 units)**
  - SSCI 582 Spatial Databases Units: 4
  - SSCI 584 Spatial Modeling Units: 4
  - SSCI 588 Remote Sensing for GIS Units: 4
  - SSCI 589 Cartography and Visualization Units: 4
  - SSCI 596 Internship in Spatial Sciences Units: 1

- **Informatics elective (4 units)**
  - CSCI 587 Geospatial Information Management Units: 4

**Note:**
*SSCI 582 meets the CSCI 585 prerequisite for CSCI 587 and must be taken before it.

**University Certificate**

**Big Data Fundamentals Certificate**
This certificate program teaches students the fundamentals of data informatics, including data collection and management, data analytics, data visualization and data privacy. This certificate program is designed for students from nontechnical undergraduate backgrounds. Students who complete this certificate are eligible to be considered for admission to the program leading to the MS in Data Informatics.

**Must complete the following (4 courses, 15 units)**

- INF 510 Principles of Programming for Informatics Units: 4
- INF 549 Introduction to Computational Thinking and Data Science Units: 4
- INF 550 Overview of Data Informatics in Large Data Environments Units: 4
- INF 559 Introduction to Data Management Units: 3

**Information Technology Program**

**Olin Hall 412**
(213) 740-4542
Email: itp@usc.edu

**Director:** Michael Crowley, PhD

**Associate Directors:** Patrick Dent, MS; Nitin Kale, MS

**Associate Professors of Engineering Practice:** Joseph Greenfield, MS; Nitin Kale, MS; Ashish Soni, MS

**Senior Lecturers:** Patrick Dent, MS; Nathan Greenfield, MS; Trina Gregory, BA; Mike Lee, MS; Sanjay Madhav, BS; Rob Parke, MS; Tom Sloper, BA; Richard Vawter, MS, MBA; Lance Winkel, MFA

**Lecturers:** Raymond Kim, MS; Chi So, MS; Kendra Walther, MS

**Adviser:** Alexandra Garabedian, MEd

**Staff:** Lindsay Burglin, BS; Christine Gonzales

**ITP courses are open to all USC students.**

**Minors**

ITP minors are open to undergraduate students in all majors. To apply for a minor, students should meet the regular admissions standards and have a declared USC major. Students will complete an application for the minor with the Viterbi School of Engineering. For specific information on admission and application procedures, contact the Information Technology Program at (213) 740-4542.

**ITP Minors:**
3D Computer Graphics and Modeling
Applied Analytics
Applied Computer Security
Computer and Digital Forensics
Computer Programming
Enterprise Information Systems
Innovation: The Digital Entrepreneur
Mobile App Development
Video Game Design and Management
Video Game Programming
Web Technologies and Applications

**ITP Specializations**
Specializations are a great alternative for students who are interested in gaining experience but do not have space in their schedule to complete a full minor program. Certificate available upon completion of required course work. Please see the Website for more details: www.itp.usc.edu/specializations.

**Viterbi School of Engineering Students**
The "x" designation indicates that engineering students require prior departmental approval to count 100-level and above ITP courses for major credit.

**Minor**

### 3D Computer Graphics and Modeling
The 3D Computer Graphics and Modeling minor merges theoretical concepts with state-of-the-art techniques to prepare students to apply 3D computer graphics across a wide range of industry applications. Hands-on courses build from a core foundation throughout the spectrum of advanced cutting edge technologies as they are used in real-world application and culminate with the production of a portfolio of work commensurate with the needs of 3D industries. Total number of units required to complete minor: 16 units

#### Upper-division units of minor: 14

**Required Courses (14 units)**
- ITP 215L 3-D Modeling, Animation, and Special Effects Units: 2
- ITP 305 Advanced 3D Modeling, Animation, and Special Effects Units: 3 *
- ITP 315x 3D Character Animation Units: 3 *
- ITP 360 3D Compositing and Visual Effects Units: 3 *
- ITP 415 3-D Design and Prototyping Units: 2 *

**Elective Courses (3 units)**
- ITP 308 Computer-Aided Design for Bio-Mechanical Systems Units: 3
- ITP 450 Advanced 3D Texturing, Compositing, and Image Processing Units: 3 *
- ITP 470 Information Technology Practicum Units: 1, 2, 3, 4
  - (1-4 units)
- ITP 480 Information Technology Internship Units: 1, 2, 3, 4
  - (1-4 units)

**New Core**
*Prerequisite required

**Applied Analytics Minor**
The minor in Applied Analytics prepares undergraduate students in the field of data analytics as applied to real world situations. Applications vary from business to health care, social media to sports. The goal is to educate students to become data analysts, not data scientists.

Students in the minor will learn all aspects of analytics: technology infrastructure to stage data, techniques to analyze data, tools to visualize data, and systems to publish and share the results.

**Requirements for minor completion:** Minimum units 16

**Required Courses (12 units)**
- ITP 250x Database Systems for Analytics Units: 2
- ITP 251 Applied Statistics for Analytics Units: 2
- ITP 350x Technologies and Practices for Analytics Units: 4 *
- ITP 449x Data Mining: Descriptive and Predictive Units: 4

**Electives (Choose a minimum of 6 units)**
- ITP 470 Information Technology Practicum Units: 1, 2, 3, 4
- ITP 487 Data Warehouses Units: 3 *
- ITP 489 In-Memory Database Systems for Real Time Analytics Units: 3 *
- DSO 424 Business Forecasting Units: 4 *
- DSO 428 Data Warehousing and Data Mining Units: 4 *

**Applied Computer Security Minor**
The minor in applied computer security combines both theoretical concepts and technical skills to prepare students for a career in information security while incorporating their major field of work. Students will study various areas of computer security, including hacking, ethics, forensics, networking and security management. Electives are available depending on the students' academic and professional goals.

**Requirements for completion (five core courses plus one elective)**

Minimum units: 18

**Required Courses (14 Units)**
- ITP 125L From Hackers to CEOs: Introduction to Information Security Units: 2
- ITP 325 Ethical Hacking and Systems Defense Units: 3
- ITP 357 Enterprise Network Design Units: 3
- ITP 370 Information Security Management Units: 3
- ITP 375 Digital Forensics Units: 3

**Elective (4 Units)**
- ITP 425 Web Application Security Units: 4
- ITP 457 Network Security Units: 4
- ITP 475 Advanced Digital Forensics Units: 4

**Computer and Digital Forensics Minor**
The computer and digital forensics minor combines both theoretical concepts and technical skills to prepare students for a career as a digital forensics investigator. Students will study various areas of cyber-forensics, including forensic methodologies and processes, digital evidence-gathering and preservation, investigations and examinations, and court presentation. Electives are available depending on the students' academic and professional goals.

**Requirements for completion (core courses plus electives)**

Minimum units: 18
Required Courses (4 Courses, 12 Units)

- ITP 125L From Hackers to CEOs: Introduction to Information Security Units: 2
- ITP 375 Digital Forensics Units: 3 *
- ITP 475 Advanced Digital Forensics Units: 4 *
- ITP 479 Cyber Law and Privacy Units: 3

Forensic Electives (Choose Two, 6 Units)

- ITP 325 Ethical Hacking and Systems Defense Units: 3 *
- ITP 445 Macintosh, OSX, and iOS Forensics Units: 3 *
- ITP 446 Cyber Breach Investigations Units: 3 *
- ITP 447 Mobile Device Security and Forensics Units: 3 *
- ITP 448 Cyber Litigation Support Units: 3 *

Note:

*Prerequisite required

Computer Programming Minor

The minor in computer programming focuses on the practical programming skills necessary to solve problems in a variety of domains including on desktops, laptops, mobile devices, the Web, the cloud and for video games. Upon completion of the minor, students will have strong experience with the application of programming languages in several different contexts.

Students with a declared major in computer science, computer science and computer engineering, computer science (games), or computer science and business administration are not eligible for this minor. Students with a declared minor in computer science are likewise not eligible.

Requirements for completion (two core courses plus 12 units of electives)

Minimum units: 17

Core Courses (5 units)

- ITP 165 Introduction to C++ Programming Units: 2 *
- ITP 365 Managing Data in C++ Units: 3

Elective Courses (12 Units)

- ITP 341 App Development for Phones and Tablets Units: 3
- ITP 342 Mobile Application Development Units: 3
- ITP 368 Programming Graphical User Interfaces Units: 3
- ITP 380 Video Game Programming Units: 4
- ITP 404 Modern Technologies of Web Development Units: 3 **
- ITP 435 Professional C++ Units: 3
- ITP 437 Secure Programming Units: 3
- ITP 439 Compiler Development Units: 3

Note:

*ITP 109 or ITP 115 can be substituted for ITP 165, though ITP 165 is recommended.
**ITP 404 has additional prerequisites outside the minor, though these prerequisites can be waived for students in the minor (subject to faculty approval).

Enterprise Information Systems Minor

The 21st century has seen tremendous growth in global enterprises, which has required robust and integrated information systems to support streamlined business processes. These Enterprise Information Systems, also known as Enterprise Resource Planning (ERP) systems, have continued to mature and dominate the information systems of corporations. Most Fortune 500 companies have adopted ERP systems. This minor combines business process management and information technology to prepare students for technical careers as well as business consulting in the ERP domain. Students will study various areas of ERP implementation, configuration, business intelligence, security and supply chain management. Electives are available depending on the students' academic and professional goals.

Requirements for completion (three core courses plus minimum 7 units of electives)

Minimum units: 16

Required Courses (10 Units)

- ITP 320 Enterprise Wide Information Systems Units: 4
- ITP 422L Configuring Enterprise Resource Planning Systems Units: 3
- ITP 454x Enterprise Resource Planning, Design, and Implementation Units: 3

Electives (Choose Minimum 6 Units of Which Minimum 3 Units Should Have ITP Prefix)

- ACCT 371 Introduction to Accounting Systems Units: 4
- ACCT 410x Foundations of Accounting Units: 4
- ACCT 478 Accounting Systems Design Units: 4
- ACCT 479 Accounting Systems Development Units: 4
- BUAD 311 Operations Management Units: 4
- DSO 431 Foundations of Digital Business Innovation Units: 4
- DSO 433 Business Process Design Units: 4
- DSO 435 Enterprise Data Architecture Units: 4
- ISE 382 Database Systems: Concepts, Design and Implementation Units: 4
- ITP 421x Advanced Programming for Enterprise Information Systems Units: 4
- ITP 470 Information Technology Practicum Units: 1, 2, 3, 4
- ITP 486 Securing and Auditing Enterprise Resource Planning Systems Units: 3
- ITP 487 Data Warehouses Units: 3
- ITP 488 Managing Supply Chains with Advanced Planning & Optimization Units: 3
- PPD 318 Financial Accounting in Public and Nonprofit Organizations Units: 4

Innovation: The Digital Entrepreneur Minor

The Minor in Innovation: The Digital Entrepreneur is jointly sponsored by the Information Technology Program in the Viterbi School of Engineering and the Lloyd Greif Center for
Entrepreneurial Studies in the USC Marshall School of Business. The minor is designed for students from a wide range of backgrounds who are interested in starting their own digital ventures, working for start-up companies, or pursuing traditional jobs with large corporations and consulting firms that may involve launching new digital business units. Students will learn all major elements of launching a digital venture including digital disruption, ideation, high-tech product management, online customer acquisition, technology implementation, online business models, digital marketing and monetization. Students will work on launching a digital venture in a team-based environment in the capstone class.

A minimum of 21 units are required to complete the minor, with at least 16 unique units outside of the student’s major. The Information Technology Program in the Viterbi School of Engineering handles advising and admissions relating to the minor, consulting as needed with the Greif Center for Entrepreneurial Studies in the Marshall School of Business. See Information Technology Program for course requirements.

**Required Courses (19 Units)**

- BAEP 452 Feasibility Analysis Units: 4 *
- BUAD 301 Technology Entrepreneurship Units: 3
- ITP 466 Building the High Tech Startup Units: 4
- ITP 476 Technologies for Interactive Marketing Units: 4
- ITP 496 The Startup Launchpad Lab Units: 2 *(capstone course; Corequisite: BAEP 496)
- BAEP 496 The Digital Startup Launchpad Units: 2 *(capstone course; Corequisite: ITP 496)

**Elective Courses (Minimum of 2 units)**

- BAEP 460 Seminar in Entrepreneurship Units: 2
- BAEP 465 Digital Playbook for Entrepreneurs: Creating a Tech Startup Units: 2
- BAEP 470 The Entrepreneurial Mindset — Taking the Leap Units: 2
- BUAD 304 Organizational Behavior and Leadership Units: 4
- BUAD 307 Marketing Fundamentals Units: 4
- DSO 431 Foundations of Digital Business Innovation Units: 4
- ITP 310 Design for User Experience Units: 3
- ITP 402 Enterprise Wide Information Systems Units: 4
- ITP 411 Multimedia and Video Production Units: 3
- ITP 470 Information Technology Practicum Units: 1, 2, 3, 4
- ITP 479 Cyber Law and Privacy Units: 3

**Note:**

*Prerequisite required

+ITP 496 and BAEP 496 must be taken in the same semester.

**Mobile App Development Minor**

Students will study and gain experience with the technologies, tools, frameworks and languages that are most commonly used in developing apps for mobile devices such as smartphones and tablets. They will learn the basics of the programming languages, how to design mobile interfaces, how to use the libraries to build apps that have the proper look and feel, how to design and handle user input, and other aspects. Students will go through the process of building a mobile app from idea to product. Students will learn the fundamental principles of mobile apps, so that they will be prepared for the new technologies and frameworks that are constantly being developed.

Students should meet the regular admissions standards and have a declared USC major. Students will complete an application for the minor with the Viterbi School of Engineering. For specific information on admission and application procedures, contact the Information Technology Program at (213) 740-4542.

**Requirements for completion (five core courses plus two electives)**

Minimum units: 20

**Required Courses (14 Units)**

Choose one from the following (2 units):

- ITP 109 Introduction to Java Programming Units: 2
- ITP 115 Programming in Python Units: 2
- ITP 165 Introduction to C++ Programming Units: 2 *

Choose one from the following (3 units):

- ITP 341 App Development for Phones and Tablets Units: 3
- ITP 342 Mobile Application Development Units: 3

All of the following courses (9 units):

- ITP 442 Mobile App Project Units: 4
- ITP 444 Advanced Topics in Mobile App Development Units: 3
- ITP 382 Mobile Game Programming Units: 3
- ITP 435 Professional C++ Units: 3

**Electives (Choose Two Courses for a Minimum of 6 Units)**

- ITP 301 Design for User Experience Units: 3
- ITP 341 App Development for Phones and Tablets Units: 3
- ITP 342 Mobile Application Development Units: 3
- ITP 344 Advanced Topics in Mobile App Development Units: 3
- ITP 382 Mobile Game Programming Units: 3
- ITP 435 Professional C++ Units: 3

**Note:**

*ITP 165 and ITP 365 can be waived for students who have taken CSCI 103 and CSCI 104. However, these students must take an additional elective course in order to have the appropriate number of upper-division units.

**Video Game Design and Management Minor**

The video game design minor integrates theoretical concepts and practical skills to prepare students for a career in interactive entertainment, specifically the video game industry. Students will be exposed to a variety of design concepts related to creating video games including: level design, game-play control, user interface, multiplayer, game mechanics and storytelling. As opposed to the video game programming minor in which students will be writing code and programming game engines, students in the video game design and management minor will apply design concepts to different game genres and use game design software tools to
create a working demo of a video game during the course of the minor program.

**Requirements for completion**
Minimum units: 20

**Required Courses (16 Units)**

**Minimum**
- ITP 230x Video Game Quality Assurance Units: 4 or
- ITP 280 Video Game Production Units: 4
- ITP 391a Video Game Project Management Units: 4
  *ITP 280 is a prerequisite.
- CTIN 483 Introduction to Game Development Units: 4
  *It is recommended to take an introductory programming course before taking CTIN 483.
  Suggested courses: ITP 109, ITP 115, ITP 165.
- CTIN 488 Game Design Workshop Units: 4

And at least 4 elective units from the following:
- ITP 230x Video Game Quality Assurance Units: 4
- ITP 280 Video Game Production Units: 4
- ITP 393 Video Game Design Documents Units: 2
  *ITP 280 is a prerequisite.
- ITP 491 Level Design and Development for Video Games Units: 4
- CTIN 404L Usability Testing for Games Units: 2
- CTIN 458 Business and Management of Games Units: 2
- CTIN 484L Intermediate Game Development Units: 2
  *CTIN 483 and CTIN 488 are prerequisites.
  Concurrent enrollment with CTIN 489 required.
- CTIN 489 Intermediate Game Design Workshop Units: 2
  *CTIN 483 and CTIN 488 are prerequisites.
  Concurrent enrollment with CTIN 484L required.

**Video Game Programming Minor**
The video game programming minor integrates the theoretical concepts and practical skills to prepare students for a career in interactive entertainment, specifically the video game industry. Through integration of two major disciplines (computer science and information technology), students will be exposed to a variety of programming concepts related to creating video games including: 3-D graphics, artificial intelligence, particle systems, rendering, collision detection, game algorithms, physics concepts, and math formulas. In contrast to the video game design minor where the focus is applying design concepts and using software design tools, students in the video game programming minor will evaluate, write and debug code, in addition to creating a game engine during the course of the minor.

This minor features an optional capstone that is a team-based, year-long game development project. Students are only eligible for the capstone after having completed all the required courses as well as the required three ITP elective units. The capstone must be taken in both the fall and spring semesters of a single academic year.

**Requirements for completion (four core courses plus 6 units of electives)**
Minimum units: 19

**Core Courses (13 Units)**
- ITP 165 Introduction to C++ Programming Units: 2*
- ITP 365 Managing Data in C++ Units: 3
- ITP 380 Video Game Programming Units: 4
- ITP 485 Programming Game Engines Units: 4

**Elective Courses (6 Units - 3 Units)**
**Must be ITP**
- ITP 382 Mobile Game Programming Units: 3
- ITP 435 Professional C++ Units: 3
- ITP 438 Graphics Shader Programming Units: 3
- ITP 484 Multiplayer Game Programming Units: 3
- CSCI 491aL Final Game Project Units: 4**
- CSCI 491bL Final Game Project Units: 2**

**Note:**
*ITP 165 and ITP 365 can be waived for students who have taken CSCI 103 and CSCI 104. However, these students must take an additional elective course in order to have the appropriate number of upper-division units.

**Optional capstone. See details above for requirements.**

**Web Technologies and Applications Minor**
The Web technologies and application minor is designed to introduce students to the Web publishing and development fields. Upon completion of the minor, students will be able to design and develop Websites using major Web technologies, standards and applications. Students can use the theoretical concepts and practical applications of Web technologies not only in the Web industry, but also within a different major field of study. The broad areas of study include Web publishing, Web programming, databases and multimedia. Electives will be chosen based on the students' academic and professional goals.

Students should meet the regular admissions standards and have a declared USC major.

**Requirements for completion (four core courses plus two electives)**
Minimum units: 18

**Core Courses (13 Units)**
- ITP 104L Web Publishing Units: 2
- ITP 300 Database Web Development Units: 3
- ITP 301L Interactive Web Development Units: 4
- ITP 460 Web Application Project Units: 4

**Elective (Two Courses)**
- ITP 302 Advanced Web Publishing Units: 2
- ITP 310 Design for User Experience Units: 3
- ITP 404 Modern Technologies of Web Development Units: 3
- ITP 411 Multimedia and Video Production Units: 3
- ITP 425 Web Application Security Units: 4
- ITP 470 Information Technology Practicum Units: 1, 2, 3, 4 (3)

Master's Degree
Manufacturing Engineering (MS)
Manufacturing engineering at USC is a multidisciplinary program that confers the degree of Master of Science and is designed to produce graduates capable of responding to the needs of modern, up-to-date manufacturing. These graduates should be able to design, install and operate complex manufacturing systems made up of people, materials, automated machines and information systems. The Departments of Computer Science, Electrical Engineering, Industrial and Systems Engineering, Materials Science, Mechanical Engineering, and Entrepreneurship participate in the Manufacturing Engineering Program.

Course work in the program will train students in traditional manufacturing engineering topics, such as materials selection and process design. Additional courses will include modern technologies such as 3D printing and system-level concepts of integrated product and process design, applications of modern information technology to design and manufacturing, hands-on laboratories using advanced manufacturing equipment and commercial software, and innovation and entrepreneurship.

Curriculum
A total of 30 units is required beyond the BS degree. A minimum of 21 units must be at the 500 level or above. A maximum of 6 units of electives may be taken from non-engineering departments. At least three courses must be taken in the student's selected area of specialization.

Required Courses
- CSCI 585 Database Systems Units: 4 or
- ISE 510 Advanced Computational Design and Manufacturing Units: 3
- ISE 511L Mechatronic Systems Engineering Units: 3
- ISE 517 Modern Enterprise Systems Units: 3 or
- ISE 576 Industrial Ecology: Technology-Environment Interaction Units: 3
- ISE 525 Design of Experiments Units: 3 or
- AME 525 Engineering Analysis Units: 3

Approved electives Units: 18  

Total units: 30  

*A list of approved electives in specialization areas is available from the department. Departmental approval is required for courses not listed.

Master's Degree
Product Development Engineering (MS)
The Master of Science in product development engineering (MS PDE) is an interdisciplinary graduate degree program at USC jointly offered by the Aerospace and Mechanical Engineering and the Daniel J. Epstein Industrial and Systems Engineering (ISE) departments. The Daniel J. Epstein Industrial and Systems department manages this joint degree program. Students can enter this program in either the fall or spring semesters, and it is available to full-time and part-time students.

Admission
The program has the following admission requirements:
- A bachelor's degree in an area of engineering or science;
- An undergraduate cumulative GPA of 3.0 or above; and
- Satisfactory general GRE scores of at least 146 verbal and 151 quantitative.

The MS PDE program requires a minimum of 27 units to complete. Although it is mainly a course work-based program, students can choose to complete the program with or without a thesis requirement. For the thesis option, 4 of the 27 units are to be thesis. At least 16 units, not including thesis, must be at the 500 level or higher, and at least 18 units must be from the AME and ISE departments. For the non-thesis option, 18 of the 27 units must be at the 500 level or higher from the AME and ISE departments, and/or closely related departments. As well, students can choose to take up to 6 units of directed research (e.g., AME 590 or ISE 590). Students must maintain a minimal cumulative GPA of 3.0 in USC course work to graduate.

The program's prerequisite is a minimum of one 400 level course in either engineering design or engineering economy. Admitted students who do not meet this prerequisite will be assigned appropriate USC course(s) to complete the deficiencies. Deficiency courses, if taken at the 400 level, may be counted toward 27 units as general electives with adviser approval.

Depending on the academic background and career interests of students, the program offers two areas of specialization, product development technology and product development systems. The product development technology specialization
will prepare students for a career as future product development engineers, while the product development systems specialization will prepare students as future product development managers. Students entering this program must declare their choice of an area of specialization and follow the requirements of each area of specialization to graduate.

**Curriculum**
The required 27 units are grouped into four categories of courses for each area of specialization as follows:

### Required Courses (6 Units)

- **AME 503** Advanced Mechanical Design Units: 3
- **ISE 545** Technology Development and Implementation Units: 3

### Product Development Systems

#### Required Courses (6 Units)

- **ISE 515** Engineering Project Management Units: 3
- **ISE 544** Management of Engineering Teams Units: 3

### Technical Electives (6 Units)

- **ISE 460** Engineering Economy Units: 3
- **ISE 470** Human/Computer Interface Design Units: 3
- **ISE 511L** Mechatronic Systems Engineering Units: 3
- **ISE 517** Modern Enterprise Systems Units: 3
- **ISE 525** Design of Experiments Units: 3
- **ISE 527** Quality Management for Engineers Units: 3
- **ISE 528** Advanced Statistical Aspects of Engineering Reliability Units: 3
- **ISE 555** Invention and Technology Development Units: 3
- **ISE 561** Economic Analysis of Engineering Projects Units: 3
- **ISE 567** Collaborative Engineering Principles and Practice Units: 3
- **ISE 576** Industrial Ecology: Technology-Environment Interaction Units: 3
- **ISE 580** Performance Modeling and Simulation Units: 3
- **ISE 585** Strategic Management of Technology Units: 3
- **SAE 541** Systems Engineering Theory and Practice Units: 3

### General Electives (9 Units)

Adviser-approved electives
(Must be upper-division 400- or 500-level courses; up to 4 units can be transferred from other institutions)

**Total units required for degree: 27**

---

### Sustainable Infrastructure Systems

The Sustainable Infrastructure Systems program prepares students for immediate and effective participation in the modern infrastructure workforce through a common core that includes smart-system design for sustainable infrastructures, the societal and regulatory context of infrastructure engineering decisions, and construction management. Five plans of study for the Master of Science degree allow for specialization based on background and interest.

**Master's Degree**

#### Civil Engineering (Transportation Systems) (MS)

---

### Sustainable Infrastructure Systems

The Sustainable Infrastructure Systems program prepares students for immediate and effective participation in the modern infrastructure workforce through a common core that includes smart-system design for sustainable infrastructures, the societal and regulatory context of infrastructure engineering decisions, and construction management. Five plans of study for the Master of Science degree allow for specialization based on background and interest.

**Master of Science in Civil Engineering (Transportation Systems)**
**Required Courses**

CE 471 Principles of Transportation Engineering Units: 3  
CE 501 Functions of the Constructor Units: 3  
CE 579 Introduction to Transportation Planning Law Units: 3  
PPD 633 Urban Transportation Planning and Management Units: 4, 2 years  
SAE 515 Sustainable Infrastructure Systems Units: 3

**Electives Courses (Four Courses, Other Electives Upon Approval*)**

CE 583 Design of Transportation Facilities Units: 3  
CE 585 Traffic Engineering and Control Units: 3  
CE 588 Railroad Engineering Units: 3  
CE 589 Port Engineering: Planning and Operations Units: 3  
PPD 634 Institutional and Policy Issues in Transportation Units: 4  
PPD 692 Transportation and the Environment Units: 4

**Note:**
Students electing the Master of Science in Civil Engineering (Transportation Systems) degree option are expected to have a background in statistics and uncertainty equivalent to ISE 225 or CE 408, and engineering economy equivalent to ISE 460. Admitted students who do not meet these prerequisites can satisfy the requirements by taking appropriate, adviser-approved electives.

**Additional Requirements**

Students with MS degrees in engineering or science disciplines can be accepted in these programs. Students must satisfy all other departmental degree requirements.

**Civil Engineering (Water and Waste Management) (MS)**

**Sustainable Infrastructure Systems**

The Sustainable Infrastructure Systems program prepares students for immediate and effective participation in the modern infrastructure workforce through a common core that includes smart-system design for sustainable infrastructures, the societal and regulatory context of infrastructure engineering decisions, and construction management. Five plans of study for the Master of Science degree allow for specialization based on background and interest.

**Master of Science in Electrical Engineering (Electric Power) (MS)**

**Required Courses**

EE 443 Introduction to Power Systems Units: 3  
EE 444 Power Systems Technology Units: 3  
EE 521 Power Systems Analysis and Design Units: 3  
SAE 515 Sustainable Infrastructure Systems Units: 3

**Electives Courses (Five Courses, Take at Least One From Each Area)**

**Transmission, Distribution and Planning**

CE 501 Functions of the Constructor Units: 3  
EE 516 High-Voltage DC Transmission Systems Units: 3  
EE 524 Transients in Power Systems Units: 3  
EE 525 Power System Protection Units: 3  
EE 526 Renewable Energy in Power Systems Units: 3

**High-Voltage Equipment and Design**

EE 515 High-Voltage Technology Units: 3  
EE 528 Power Electronics Units: 3

**Power-System Control and the Smart Grid**

EE 482 Linear Control Systems Units: 3  
EE 527 Net-Centric Power-System Control Units: 3  
EE 543aL Digital Control Systems Units: 3  
EE 585 Linear System Theory Units: 3  
EE 593 Robust Multivariable Control Units: 3

**Additional Requirements**

Students with MS degrees in engineering or science disciplines can be accepted in these programs. Students must satisfy all other departmental degree requirements.
Mechanical Engineering (Energy Conversion) (MS)

Sustainable Infrastructure Systems
The Sustainable Infrastructure Systems program prepares students for immediate and effective participation in the modern infrastructure workforce through a common core that includes smart-system design for sustainable infrastructures, the societal and regulatory context of infrastructure engineering decisions, and construction management. Five plans of study for the Master of Science degree allow for specialization based on background and interest.

Master of Science in Mechanical Engineering (Energy Conversion)

Required Courses (7 Courses, 21 Units)

- AME 430 Thermal Systems Design Units: 3
- AME 525 Engineering Analysis Units: 3
- AME 526 Engineering Analytical Methods Units: 3
- AME 577 Survey of Energy and Power for a Sustainable Future Units: 3
- AME 578 Modern Alternative Energy Conversion Devices Units: 3
- CE 501 Functions of the Constructor Units: 3
- SAE 515 Sustainable Infrastructure Systems Units: 3

Elective Courses (Two Courses, 6 Units*)

- AME 513 Principles of Combustion Units: 3
- AME 514 Applications of Combustion and Reacting Flows Units: 3
- AME 579 Combustion Chemistry and Physics Units: 3
- AME 581 Introduction to Nuclear Engineering Units: 3
- AME 582 Nuclear Reactor Physics Units: 3
- ENE 505 Energy and the Environment Units: 3

Note:
*Students are encouraged to consider electives from other Sustainable Infrastructure Systems programs

Additional Requirements
Students with MS degrees in engineering or science disciplines can be accepted in these programs. Students must satisfy all other departmental degree requirements.

Honor Societies
Omega Alpha Association
Omega Alpha Association is the systems engineering honor society. The adviser is Professor Elliot Axelband, axelband@rand.org.

Master's Degree
Systems Architecting and Engineering (MS)

This program is recommended to graduate engineers and engineering managers responsible for the conception and implementation of complex systems. Emphasis is on the creative processes and methods by which complex systems are conceived, planned, designed, built, tested and certified.
The architecture experience can be applied to defense, space, aircraft, communications, navigation, sensors, computer software, computer hardware, and other aerospace and commercial systems and activities. A minimum grade point average of 3.0 must be earned on all course work attempted toward the master's degree in systems architecting and engineering. This average must also be achieved on all 400-level and above course work attempted at USC beyond the bachelor's degree. Transfer units count as credit (CR) toward the master's degree and are not computed in the grade point average.

In addition to the general requirements of the Viterbi School of Engineering, the Master of Science in Systems Architecting and Engineering is also subject to the following requirements:

- a total of at least 30 units is required, consisting of at least 3 units in the technical management area, 3 units in the general technical area, and 9 units in the technical specialization area;
- every plan of study requires prior written approval by the director of the systems architecting and engineering program recorded on the study plan in the student's file;
- no more than 9 units at the 400 level may be counted toward the degree — the remaining units must be taken at the 500 or 600 level;
- at least 24 of the 30 units must be taken in the Viterbi School of Engineering;
- units to be transferred (maximum of four with adviser approval) must have been taken prior to taking classes at USC; interruption of residency is not allowed;
- no more than 6 units of Special Topics courses (499 or 599) may be counted for this degree;
- thesis and directed research registrations may be allowed to individual students only by special permission of the supervising faculty member and the program director;
- a bachelor's degree in an engineering field and a minimum of three years systems experience are recommended prior to taking Systems Architecting and Design Experience courses. This program is not recommended for recent bachelor's degree graduates.

**Required Courses**

- ISE 460 Engineering Economy Units: 3 or
- SAE 560 Economic Considerations for Systems Engineering Units: 3

- SAE 541 Systems Engineering Theory and Practice Units: 3
- SAE 542 Advanced Topics in Systems Engineering Units: 3

- SAE 547 Model-Based Systems Architecting and Engineering Units: 3 or
- SAE 548 Systems/System-of-Systems Integration and Communication Units: 3

- SAE 549 Systems Architecting Units: 3

**Electives**

- Adviser-approved electives in technical management area Units: 3
- Adviser-approved electives in general technical area Units: 3
- Adviser-approved electives in technical specialization area Units: 9

**Technical Management Area: Take one course (3 units) from the following:**

- CE 556 Project Controls — Budgeting and Estimating Units: 3
- DSO 525 Quality Improvement Methods Units: 3
- DSO 527 Managerial Decision Analysis Units: 3
- DSO 537 Global Businesses and Markets: Strategies Enabled by Technology Units: 3
- DSO 580 Project Management Units: 3
- ISE 515 Engineering Project Management Units: 3
- ISE 517 Modern Enterprise Systems Units: 3
- ISE 544 Management of Engineering Teams Units: 3
- ISE 562 Value and Decision Theory Units: 3
- ISE 585 Strategic Management of Technology Units: 3
- MOR 561 Strategies in High-Tech Businesses Units: 3
- SAE 550 Systems Architecting and the Political Process Units: 3

**Note:**

*USC Marshall School of Business course. DSO 525 and DSO 527 are offered irregularly.

**General Technical Area: Take one course (3 units) from the following:**

- CSCI 510 Software Management and Economics Units: 4
- CSCI 577a Software Engineering Units: 4
- CSCI 577b Software Engineering Units: 4
- ISE 506 Lean Operations Units: 3
- ISE 580 Performance Modeling and Simulation Units: 3
- SAE 543 Case Studies in Systems Engineering and Management Units: 3
- SAE 550 Systems Architecting and the Political Process Units: 3

**Note:**

*USC Marshall School of Business course.

**Technical Specialization Area:**

Nine units are required, usually in the student's present or intended technical specialty. Courses are intended to complement the student's prior education and experience toward becoming a well-rounded systems architect-engineer or architect-manager. With a few exceptions, the courses should come from the recommended list, and usually all from a single specialization.

The student may choose from a large variety of technical specializations spanning all departments in the Viterbi School of Engineering. Flexibility is emphasized in this choice; the program director is expected to work closely with the student in choosing the best set of courses to meet the student's need. Several sample specializations are listed below but are not intended to be complete.

**Recommended Courses**
**Aerospace and Mechanical Systems:**
- AME 503 Advanced Mechanical Design Units: 3
- AME 521 Engineering Vibrations II Units: 3
- AME 532a Flight Vehicle Stability and Control Units: 3
- AME 544 Computer Control of Mechanical Systems Units: 3
- AME 548 Analytical Methods in Robotics Units: 3
- AME 560 Fatigue and Fracture Units: 3
- AME 588 Materials Selection Units: 3

**Artificial Intelligence/Neural Networks:**
- CSCI 460 Introduction to Artificial Intelligence Units: 3
- CSCI 545 Robotics Units: 4
- CSCI 561 Foundations of Artificial Intelligence Units: 4
- CSCI 564 Brain Theory and Artificial Intelligence Units: 3
- CSCI 567 Machine Learning Units: 4
- CSCI 574 Computer Vision Units: 3

**Automation and Control Systems:**
- EE 543aL Digital Control Systems Units: 3
- EE 547 Sensing and Planning in Robotics Units: 3
- EE 585 Linear System Theory Units: 3
- EE 587 Nonlinear and Adaptive Control Units: 3
- EE 593 Robust Multivariable Control Units: 3

**Communication and Signal Processing Systems:**
- EE 551 Principles of Radar Units: 3
- EE 563 Estimation Theory Units: 3
- EE 564 Digital Communication and Coding Systems Units: 4
- EE 567 Communication Systems Units: 3
- EE 583 Statistical Signal Processing Units: 3

**Computer and Information Systems:**
- CSCI 485 File and Database Management Units: 4
- CSCI 551 Computer Networking Units: 4
- CSCI 585 Database Systems Units: 4
- EE 552 Asynchronous VLSI Design Units: 3
- EE 554 Real Time Computer Systems Units: 3
- EE 561 Foundations of Artificial Intelligence Units: 3
- EE 574 Computer Vision Units: 3
- EE 658 Diagnosis and Design of Reliable Digital Systems Units: 3

**Construction:**
- CE 501 Functions of the Constructor Units: 3
- CE 519 Transportation Engineering Units: 3
- CE 525 Engineering Mathematical Analysis Units: 3
- CE 533 Geotechnical Earthquake Engineering Units: 3
- CE 536 Structural Design for Dynamic Loads Units: 3
- CE 556 Project Controls — Budgeting and Estimating Units: 3
- CE 583 Design of Transportation Facilities Units: 3

**Engineering Management Systems:**
- ISE 515 Engineering Project Management Units: 3
- ISE 530 Optimization Methods for Analytics Units: 3
- ISE 544 Management of Engineering Teams Units: 3
- ISE 562 Value and Decision Theory Units: 3
- ISE 580 Performance Modeling and Simulation Units: 3
- ISE 585 Strategic Management of Technology Units: 3

**SAE 550 Systems Architecting and the Political Process Units: 3

**Integrated Media Systems:**
- EE 450 Introduction to Computer Networks Units: 3
- EE 522 Immersive Audio Signal Processing Units: 3
- EE 555 Broadband Network Architectures Units: 3
- EE 569 Introduction to Digital Image Processing Units: 4
- EE 596 Wavelets Units: 3
- CSCI 551 Computer Networking Units: 4
- CSCI 574 Computer Vision Units: 3
- CSCI 576 Multimedia Systems Design Units: 4
- CSCI 585 Database Systems Units: 4
- CSCI 588 Specification and Design of User Interface Software Units: 3

**Manufacturing Systems:**
- AME 588 Materials Selection Units: 3
- EE 561 Foundations of Artificial Intelligence Units: 3
- ISE 511L Mechatronic Systems Engineering Units: 3
- ISE 514 Advanced Production Planning and Scheduling Units: 3
- ISE 517 Modern Enterprise Systems Units: 3
- ISE 544 Management of Engineering Teams Units: 3
- ISE 570 Human Factors in Engineering Units: 3

**Network-centric:**
- CSCI 402 Operating Systems Units: 4
- CSCI 530 Security Systems Units: 4
- CSCI 551 Computer Networking Units: 4
- CSCI 555L Advanced Operating Systems Units: 4
- CSCI 558L Internetworking and Distributed Systems Laboratory Units: 3
- CSCI 577a Software Engineering Units: 4
- CSCI 577b Software Engineering Units: 4
- EE 550 Design and Analysis of Computer Communication Networks Units: 3

**Software Process Architecture:**
- CSCI 510 Software Management and Economics Units: 4
- CSCI 577b Software Engineering Units: 4
- EE 554 Real Time Computer Systems Units: 3
- EE 557 Computer Systems Architecture Units: 3
- ISE 544 Management of Engineering Teams Units: 3
- ISE 562 Value and Decision Theory Units: 3
- ISE 564 Performance Analysis Units: 3

**Systems:**
- EE 598 Electrical Engineering Research Seminar Units: 1
- ISE 515 Engineering Project Management Units: 3
- ISE 520 Optimization: Theory and Algorithms Units: 3
- ISE 525 Design of Experiments Units: 3
- ISE 527 Quality Management for Engineers Units: 3
- ISE 528 Advanced Statistical Aspects of Engineering Reliability Units: 3
- ISE 532 Network Flows Units: 3
- ISE 536 Linear Programming and Extensions Units: 3
- ISE 538 Elements of Stochastic Processes Units: 3
- ISE 544 Management of Engineering Teams Units: 3
- ISE 562 Value and Decision Theory Units: 3
- ISE 580 Performance Modeling and Simulation Units: 3

674
ISE 585 Strategic Management of Technology Units: 3
SAE 541 Systems Engineering Theory and Practice Units: 3
SAE 542 Advanced Topics in Systems Engineering Units: 3

University Certificate
Network Centric Systems Graduate Certificate

This 15-19 unit graduate certificate is jointly sponsored by the Epstein Industrial and Systems Engineering, Hsieh Electrical Engineering and Computer Science departments, and administered by the Epstein ISE Department. The computer science emphasis requires at least 16 units to complete, and may require more depending on the combination of courses students select. This certificate is designed for practicing engineers engaged in the creation and design of complex innovative network centric systems in aerospace and commercial fields. Entering students are expected to have a bachelor's degree in engineering or a related field from an accredited institution. Three years of industry experience are recommended. Students are required to earn a cumulative B average or higher in courses taken for the certificate. The courses taken for the certificate may be applied later to the Master of Science in Computer Science, Electrical Engineering or Systems Architecting Engineering with departmental approval.

Required Courses
- SAE 574 Net-Centric Systems Architecting and Engineering Units: 3

Choose four courses from one area of emphasis (12-16 units):

Computer Science Emphasis

Required CSCI course
- CSCI 551 Computer Networking Units: 4

CSCI Electives (choose three courses, at least 9 units)
- CSCI 530 Security Systems Units: 4
- CSCI 531 Applied Cryptography Units: 4
- CSCI 555L Advanced Operating Systems Units: 4
- CSCI 556 Introduction to Cryptography Units: 4
- CSCI 558L Internetworking and Distributed Systems Laboratory Units: 3
- CSCI 561 Foundations of Artificial Intelligence Units: 4
- CSCI 573 Probabilistic Reasoning Units: 3
- CSCI 576 Multimedia Systems Design Units: 4
- CSCI 585 Database Systems Units: 4

Electrical Engineering Emphasis

Required EE course
- EE 535 Mobile Communications Units: 3

EE Electives (choose three courses, 9 units)
- EE 541 Radio Frequency Filter Design Units: 3
- EE 544 Radio Frequency Systems and Hardware Units: 3
- EE 550 Design and Analysis of Computer Communication Networks Units: 3
- EE 555 Broadband Network Architectures Units: 3
- EE 562 Random Processes in Engineering Units: 3
- EE 564 Digital Communication and Coding Systems Units: 4
- EE 567 Communication Systems Units: 3
- EE 579 Wireless and Mobile Networks Design and Laboratory Units: 3

Total units: 15-19

Systems Architecting and Engineering Graduate Certificate

The graduate certificate in systems architecting and engineering is designed for practicing engineers engaged in the creation and design of complex innovative systems, in aerospace and commercial fields. Entering students are expected to have a bachelor's degree in engineering or a related field from an accredited institution. Three years of industry experience are recommended. Students are required to earn a cumulative B average or higher in courses taken for the certificate. The courses taken for the certificate may be applied later to the Master of Science in Systems Architecting and Engineering.

Required Courses - Choose Five

- ISE 460 Engineering Economy Units: 3 or SAE 560 Economic Considerations for Systems Engineering Units: 3
- ISE 515 Engineering Project Management Units: 3
- ISE 544 Management of Engineering Teams Units: 3
- SAE 541 Systems Engineering Theory and Practice Units: 3
- SAE 542 Advanced Topics in Systems Engineering Units: 3
- SAE 547 Model-Based Systems Architecting and Engineering Units: 3
- SAE 548 System-of-Systems Integration and Communication Units: 3
- SAE 549 Systems Architecting Units: 3
- SAE 574 Net-Centric Systems Architecting and Engineering Units: 3

Note:
All programs of study will be approved by the technical director of the Systems Architecting and Engineering program.
USC Davis School of Gerontology

The USC Leonard Davis School of Gerontology explores all aspects of human development and aging. Course work and research opportunities in biology, psychology, sociology, policy and aging services make up its multidisciplinary curriculum. Founded in 1975, the USC Leonard Davis School is not only the nation's premier school of gerontology, it is also the first. Named in honor of Leonard Davis, a philanthropist and businessman who pioneered insurance plans for the elderly through his involvement in AARP and his own company Colonial Penn Life Insurance, the school provides ground-breaking solutions to issues facing an aging population. The Davis School is committed to providing students with a broad theoretical understanding of lifespan development as well as dynamic post-graduate career placement. Students on all levels often enroll in semester-long internship programs. Working with our internship director, students can apply their gerontological knowledge to an array of industries such as health, medicine, business, finance, policy, direct services, program development, counseling and many other fields.

The Davis School's Bachelor of Science degrees can be pursued with a health science, a social science or a global emphasis. The school also offers five master's degrees, seven dual master's programs, a graduate certificate, and PhD programs in gerontology and the biology of aging. The school is located in the Ethel Percy Andrus Gerontology Center and is home to the Center for Digital Aging, the Longevity Institute, the USC/UCLA Center on Health and the Los Angeles Caregiver Resource Center.

Emeritus Professor: Vern Bengtson, PhD

Emeritus Associate Professor: Phoebe Liebig, PhD

*Recipient of university-wide or college teaching award.

Programs

The USC Leonard Davis School of Gerontology offers a Bachelor of Science in Human Development and Aging, a Bachelor of Science in Lifespan Health, undergraduate classes through the health and humanity major in the USC Dornsife College of Letters, Arts and Sciences, two minors in gerontology and a progressive Master of Science in Gerontology open to all undergraduate students. The school offers several graduate degrees including a Master of Science in Gerontology; a Master of Aging Services Management; a Master of Arts in Gerontology; a Master of Long Term Care Administration (with the Marshall School of Business and the Price School of Public Policy) and a Master of Science in Nutrition, Healthspan and
Longevity. All master's degrees are offered online and onsite. The Davis School of Gerontology offers the premier PhD in Gerontology program in the nation and also offers a PhD in the Biology of Aging. The PhD programs are not offered online. Non-degree graduate students may complete 16 units of gerontology and be awarded a graduate level certificate in gerontology (also available online). Master's degree students may pursue one of several dual degrees, which are jointly offered with other professional schools. These are the Master of Science in Gerontology and the Master of Business Administration (MS/MBA) with the Marshall School of Business; the Master of Science in Gerontology and the Juris Doctor (MS/JD) with the Gould School of Law; the Master of Science in Gerontology and the Master of Public Administration (MS/MPA), the Master of Science in Gerontology and the Master of Health Administration (MS/MHA), and the Master of Science in Gerontology and the Master of Planning (MS/MPI) with the Price School of Public Policy; the Master of Science in Gerontology and the Master of Social Work (MS/MSW) with the School of Social Work; and the Master of Science in Gerontology and the Doctor of Pharmacy (MS/PharmD) with the School of Pharmacy. In addition to the degree and minor programs, overview courses in aging are offered for undergraduates enrolled in other units of the university. Many gerontology courses can be credited as elective units.

Honor Society
The student honor society is Sigma Phi Omega, the national honor society formed in 1980 to recognize the excellence of those who study gerontology. The organization seeks to promote scholarship and professionalism, and to recognize exemplary attainment in the field of aging. Undergraduates must have a GPA of at least 3.3 and graduate students a GPA of at least 3.5. Sigma Phi Omega is administered by the Association for Gerontology in Higher Education, an educational unit of the Gerontological Society of America.

Ethel Percy Andrus Gerontology Center
The Andrus Gerontology Center initiates, designs and executes basic and applied research on the many phases of development and aging and provides for graduate and post-graduate training in the biological, social, behavioral and policy sciences. Specific areas of study include neurobiology, cognitive science, biology, social organization behavior, human service delivery, biodemography and social policy. The Andrus Center offers a multidisciplinary research training program in gerontology. It is directed toward graduate students pursuing the PhD as well as a limited number of post-doctoral fellows who develop research and academic careers in specialized areas of gerontology. Research training is carried out within individual disciplines.

Undergraduate Programs

Minors in Gerontology
The undergraduate minor program gives students the option of combining their major with an emphasis in gerontology. The minors provide students with the opportunity to supplement their education with a life course perspective of aging processes. The minor programs, which are multidisciplinary in nature, allow the student to survey the sociological, political, psychological and biological aspects of aging; to gain an understanding of the current services available to older persons; and to examine the contemporary policy issues facing the field. The two minors include the social science-focused Individuals, Societies, and Aging and the health science-focused Health, Science, and Aging.

Bachelor of Science in Human Development and Aging
The Bachelor of Science in Human Development and Aging is an undergraduate degree offered at the USC Leonard Davis School of Gerontology that allows students to specialize within a social science or health science track. Students specializing in the social science track often pursue careers related to older adults in business, law, the nonprofit sector or government agencies, psychology and sociology. The health science track combines the core gerontology curriculum with the prerequisites for admission to medical school and other health-related fields including: dentistry, pharmacy, nursing and others. In addition, students will participate in a supervised practicum experience in which they will become directly involved with aging clients in a health care setting.

Bachelor of Science in Lifespan Health
The Bachelor of Science in Lifespan Health prepares students for admission to a graduate or professional school with an emphasis on the biomedical aspects of health including disease prevention, detection and treatment. This program is designed for students wishing to pursue graduate studies in an allied health field such as dental hygiene, occupational/physical therapy, physician assistant, nutrition and other related fields.

Bachelor of Arts in Health and Humanity
The USC Leonard Davis School of Gerontology offers undergraduate classes through the Health and Humanity major in the USC Dornsife College of Letters, Arts and Sciences (see the Health and Humanity page).

Progressive Degree in Gerontology/Master of Science in Gerontology
The progressive degree program allows high performing students to integrate their current undergraduate major with a Master of Science in Gerontology. Students with at least a 3.0 overall GPA may apply for admission to the degree program in their junior year. Students will meet with the gerontology student adviser to develop a course plan that must be approved by the School of Gerontology and the student's home department. Students admitted into the progressive degree program begin taking master's level courses in their senior year and will complete the master's degree in year five. For more information on the admission process, see the gerontology student adviser. For further details on progressive degree programs, see the Requirements for Graduation page.

Graduate Degrees

Master of Science in Gerontology
The Master of Science in Gerontology prepares graduates to assume major leadership roles in the field of aging, primarily in the planning, administration and evaluation of programs in the private and public sectors, as well as executive positions in the delivery of direct services to older people and their families and in the instruction of older adults and service providers. The Master of Science in Gerontology requires 44 units of course work. This includes 32 units of required courses and 12 units of electives. As part of this curriculum, a field practicum assures that these skills can be applied in agencies and institutional settings. This program is offered in both residential and online formats.

Master of Arts in Gerontology
The Master of Arts in Gerontology provides an opportunity to acquire skills and formal training in gerontology. This program is offered in both residential and online formats. Admission standards and prerequisites are the same as listed for the Master of Science in Gerontology with the exception that students in the online MA program are expected to have a significant amount of experience working in human services, health care, business or similar settings. The program consists of 28 units of course work.

Master of Aging Services Management
The Master of Aging Services Management provides an opportunity for those seeking careers in the aging services industries to acquire skills and knowledge related to management of services, products and programs for older persons. The program requires a minimum of 12 units of core courses (three courses) and 20 units of electives (five courses). This program is offered in both residential and online formats. Continuous registration in the program is required.

Master of Long Term Care Administration
The Master of Long Term Care Administration provides an opportunity for professionals who are currently working in a long term care profession to acquire skills and formal training in long term care administration. The online program requires 28 units of course work. This program is offered in both residential and online formats.

Master of Science in Nutrition, Healthspan and Longevity
This degree is for those who want to pursue a career in nutrition and dietetics. It can lead to working in health care facilities, long-term care and supported living environments, tertiary and community hospitals, university and school food service programs, a business involving personal wellness, private practice, scientific research on nutrition's role in health and longevity, or in policy and advocacy. The program promotes health and longevity based on scientific evidence, integrating academic study with professional practice experience. The program requires 46 units of coursework and 1,200 hours of supervised practice in hospital, community, and food service settings. Prerequisite courses are required as well as 40 hours of paid or volunteer work experience with a Registered Dietitian. The program is a candidate for accreditation by the Accreditation Council for Education in Nutrition and Dietetics. Graduates are eligible to take the Commission of Dietetics Registration's national registration examination and receive the Registered Dietitian Nutritionist (RDN) credential upon passing the examination.

Graduate Level Certificate in Gerontology
The graduate certificate in gerontology program provides an opportunity for those who have completed a bachelor's degree in another profession or discipline and are employed in the field of aging to acquire a greater understanding of gerontology theory and research. The program consists of 16 units of gerontology content designed to familiarize the student with several areas of the field that relate to professional practice. This program is offered in both residential and online formats.

Doctor of Philosophy in Gerontology
PhD in Gerontology students learn about the physiology of human development and aging, examining social policies related to aging as well as the psychological, behavioral and sociological impact on lifespan development. Working closely with a faculty mentor, they concentrate on a specific area of interest and begin the process of discovering and shaping their own academic specialization. They work closely with faculty on research and publications, participate in colloquia, attend and present at national organization meetings, acquire teaching experience and develop a rich academic, personal, and professional network. The program requires 60 units of course work and at least four additional dissertation units and is only available as a residential program.

Doctor of Philosophy in the Biology of Aging
The PhD in the Biology of Aging program is designed for students who want to become leaders in biogerontology. The focus is on molecular, cellular, and regenerative medicine as well as the integrative biology of aging. This unique doctoral program, the first of its kind in the field, brings together two world-renowned institutions: the USC Leonard Davis School and the Buck Institute for research on Aging in Northern California. Students can choose a mentor and Ph.D. faculty committee from either the Buck Institute or USC. Students’ academic and research activities take place on both the Southern and Northern California locations. Candidates take core courses on the molecular and cellular biology of aging and age-related diseases, and then select a track among neuroscience, molecular, and cellular biology, stem cell and regenerative sciences, and biomedical sciences. The program requires 60 units of work, including courses, seminars and research credit. At least 24 of the 60 units must be formal graduate course work (lectures or seminars). It is only available as a residential program.

Progressive Degree in Gerontology
A progressive degree program allows qualified undergraduate students the opportunity to complete an integrated program of study joining a bachelor's degree and a master's degree in the same or different departments. The progressive degree program in gerontology allows students in their junior year to apply for the Master of Science in Gerontology program and complete both degrees in five years. Students must fulfill all the requirements for both the bachelor's degree and the master's degree. The total number of units for the master's degree, however, may be reduced by a maximum of one third. Students must obtain permission from both the bachelor's degree granting program and the USC Leonard Davis School of Gerontology. This program may be particularly attractive to students majoring
in biology, psychology, policy and sociology. For more information on progressive degrees, see the entry under Undergraduate Programs or Graduate and Professional Education.

**Dual Degree Programs**

The USC Leonard Davis School of Gerontology cooperates with five other professional schools at USC in offering programs in which the student receives two master's degrees. These degrees provide the student with the knowledge and skills of gerontology as well as those of the other professional field. The dual degrees require more coursework than the MS alone but offer the graduate greater breadth of education and employment options.

Dual degrees currently available are the Master of Science in Gerontology and the Master of Business Administration (MS/MBA) with the Marshall School of Business; the Master of Science in Gerontology and the Juris Doctor (MS/JD) with the Gould School of Law; the Master of Science in Gerontology and the Master of Public Administration (MS/MPA), the Master of Science in Gerontology and the Master of Health Administration (MS/MHA), and the Master of Science in Gerontology and the Master of Planning (MS/MPA) with the Price School of Public Policy; the Master of Science in Gerontology and the Master of Social Work (MS/MSW) with the School of Social Work; and the Master of Science in Gerontology and the Doctor of Pharmacy (MS/PharmD) with the School of Pharmacy. Students must apply to both schools and if accepted to both, participate in specially designed programs combining the courses of each school.

Applicants to any of the dual degree programs must submit two separate applications to the Office of Admissions; one for the gerontology program and one indicating the other degree program. Each of the schools must accept the student for admission. Acceptance into one school's degree program does not imply acceptance into the dual degree program.

**Gerontology and Business Administration**

See USC Marshall School of Business for requirements.

**Gerontology and Public Administration**

The MS/MPA dual degree offers the student interested in management of agencies and institutions the opportunity to gain in-depth knowledge of the administrative and organizational processes and management skills necessary for the effective delivery of services to older persons. See the USC Price School of Public Policy for course requirements.

**Gerontology and Health Administration**

See USC Price School of Public Policy for course requirements.

**Gerontology and Planning**

The MS/MPA dual degree is one of few in the nation which combines the knowledge of the older population with the skills needed to plan services for older people. The MPI prepares the graduate for the responsibilities involved in development of public and private institutions and programs. The MS indicates a special focus on the older person and the skills to analyze and design programs for this growing population. See the USC Price School of Public Policy for course requirements.

**Gerontology and Social Work**

See Master of Social Work/Master of Science, Gerontology for requirements.

**Gerontology and Pharmacy**

See Doctor of Pharmacy/Master of Science, Gerontology for requirements.

**Gerontology and Law**

The MS/JD dual degree combines the knowledge of the older population with understanding of the legal system. The program prepares graduates for a number of roles in both public and private sector organizations. Students are required to complete 110 units of coursework, 74 from the Gould School of Law and 36 from the Davis School of Gerontology. The first year is devoted to required law courses, and the second, third and fourth years combine gerontology and law courses. To earn the JD, all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to the rule for students enrolled in the law school honors program. See the USC Gould School of Law for course requirements.

**Bachelor's Degree**

**Human Development and Aging (BS)**

The Bachelor of Science in Human Development and Aging is an undergraduate degree offered at the USC Davis School of Gerontology in the social sciences. Students in this program often pursue careers related to older adults in business, law, the nonprofit sector or government agencies. Students may also specialize in a health science track. The health science track combines the core gerontology curriculum with the prerequisites for admission to medical school and other health-related fields including: dentistry, pharmacy, occupational/physical therapy, physician assistant programs and others. In addition, students will participate in a supervised practicum experience in which they will become directly involved with aging clients in a health care setting. Students planning to pursue a BS are urged to notify the school of this intent as early as possible during their undergraduate study. This will help ensure that the student receives proper advisement and that the student is alerted to any special requirements or program modifications.

During the freshman and sophomore years, students enroll primarily in general education required courses as specified by the university and the Human Development and Aging course (GERO 200). During their junior and senior years, students enroll in required and elective courses in the School of Gerontology as well as other courses throughout the university. These courses are selected in consultation with an adviser and reflect the personal and professional interests of the students. The honors program is available to juniors who maintain a GPA of 3.5 in gerontology and a GPA of 3.3 in other USC course work. The honors program includes mentored training in research and course work relevant to research methodology and statistics.

A grade point average of at least C (2.0) on all units attempted at USC is required for undergraduate degrees. The
School of Gerontology requires a minimum 2.0 grade point average in upper division courses applied toward the major.

**General Education Requirements**
The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies). See [http://dornsife.usc.edu/2015ge](http://dornsife.usc.edu/2015ge) for more information.

**Foreign Language or Programming Skills (12 Units)**
Students must satisfy the skill level requirement in one language or complete ITP 101 and additional ITP 100-level programming courses to total 12 units. Students in the health science track are required to complete only ITP 101 and ITP 102.

**Degree Requirements**

**Required Courses**
- GERO 200 Gerontology: The Science of Adult Development Units: 4
- GERO 320g Psychology of Adult Development Units: 4
- GERO 330 Society and Adult Development Units: 4
- GERO 340 Policy, Values, and Power in an Aging Society Units: 4
- GERO 350 Administrative Problems in Aging Units: 2 or 4
- GERO 416 Health Issues in Adulthood Units: 4
- GERO 481 Case Management for Older Adults Units: 4
- GERO 491 Practicum Units: 2-8
- GERO 492 Senior Seminar Units: 4
- General Education Units: 24
- Writing Requirement Units: 8
- Foreign Language or Programming Units: 12
- Gerontology electives Units: 12
- One approved statistics course Units: 4
- General electives in gerontology or related disciplines (8 units upper division) Units: 32

**Total Units: 128**

**Recommended General Electives**
- ANTH 305 Childhood, Birth and Reproduction Units: 4
- HP 402 Maternal and Child Health Units: 4
- LING 405 Child Language Acquisition Units: 4
- PSYC 100Lg Introduction to Psychology Units: 4
- PSYC 336L Developmental Psychology Units: 4
- PSYC 437 Adolescent Development Units: 4
- SOCI 305m Sociology of Childhood Units: 4
- SOCI 369 The Family in a Changing Society Units: 4
- SOCI 385 Population, Society, and Aging Units: 4

**Note:**
- *Prerequisite required.

**Human Development and Aging, Health Science Track, (BS)**

**Requirements for Admission**

The listed requirements for admission to the health science track in human development and aging will not differ from existing requirements for admission to the Bachelor of Science in Human Development and Aging. However, because health professional schools are very competitive, USC students interested in this program will be expected to have achieved at least a 3.0 grade point average (A = 4.0). Students entering the program from high schools or transferring from community colleges will also be expected to meet the minimum admission standards.

**Degree Requirements**

**Science and Mathematics**
- BISC 120Lg General Biology: Organismal Biology and Evolution Units: 4
- BISC 220Lg General Biology: Cell Biology and Physiology Units: 4
- CHEM 105aLg General Chemistry Units: 4
- CHEM 105bL General Chemistry Units: 4
- CHEM 322aL Organic Chemistry Units: 4
- CHEM 322bL Organic Chemistry Units: 4
- MATH 125g Calculus I Units: 4
- PHYS 135ag Physics for the Life Sciences Units: 4
- PHYS 135bL Physics for the Life Sciences Units: 4

**Total units: 36**

**Gerontology Upper Division Core Courses**
- GERO 310 Physiology of Aging Units: 4
- GERO 320g Psychology of Adult Development Units: 4 or GERO 330 Society and Adult Development Units: 4
- GERO 340 Policy, Values, and Power in an Aging Society Units: 4
- GERO 414 Neurobiology of Aging Units: 4
- GERO 495 Practicum in Geriatric Care Units: 4

**Total units: 20**

**Additional Requirements**
- ITP 101 Introduction to Business Information Technologies Units: 2
- ITP 102 Introduction to Creative Information Technologies Units: 2
- General Education Units: 24
- Writing Requirement Units: 8
- Gerontology upper division electives Units: 12
- General electives in gerontology or related disciplines (8 units upper division) Units: 24

**Total units: 72**

**Total units: 128**

- PSYC 336L Developmental Psychology Units: 4
- PSYC 437 Adolescent Development Units: 4
SOCl 305m Sociology of Childhood Units: 4
SOCl 369 The Family in a Changing Society Units: 4
SOCl 385 Population, Society, and Aging Units: 4

Note:
*Prerequisite required.

Human Development and Aging,
Honors Programs, (BS)
USC Davis offers an honors program to outstanding students already pursuing studies for the BS in Human Development and Aging degree. This program offers students an opportunity to participate in mentored undergraduate research, taking course work in research methods and statistics in aging, and experience in writing an honors thesis that summarizes the research project. Honors students are required to complete GERO 497a, GERO 497b, GERO 497c for a total of 6–8 units, beginning in the fall or spring of the junior year. In the senior year, they must complete GERO 593 Research Methods with a minimum grade of B. GERO 593 is offered only in the fall semester. Completion of the program requires a minimum GPA of 3.5 in gerontology and 3.3 in other courses. The program leads to the designation on the transcript of Bachelor of Science in Human Development and Aging with Honors.

The student takes 2 units of GERO 497a in the fall or spring of the junior year as a mentored research course to begin the process of developing an honors thesis. This would be in lieu of elective units. In the fall of the junior or senior year the student would complete GERO 593 for 4 units and 2 units of GERO 497b, both in lieu of elective units. Also during the fall semester, the research design and methods for the honors thesis are finalized and the research project begun. In the spring, the student would register for 2–4 units of GERO 497c in lieu of elective units. The goal for that semester is to complete the research and write the honors thesis.

Degree Requirements

Required Courses
GERO 200 Gerontology: The Science of Adult Development Units: 4
GERO 320g Psychology of Adult Development Units: 4
GERO 330 Society and Adult Development Units: 4
GERO 340 Policy, Values, and Power in an Aging Society Units: 4
GERO 350 Administrative Problems in Aging Units: 2
or 4
GERO 416 Health Issues in Adulthood Units: 4
GERO 481 Case Management for Older Adults Units: 4
GERO 491 Practicum Units: 2–8
GERO 492 Senior Seminar Units: 4
General Education Units: 24
Writing Requirement Units: 8
Foreign Language or Programming Units: 12
Gerontology electives Units: 12
One approved statistics course Units: 4
Electives in gerontology and related disciplines Units: 20–22

Total units: 116–118

Gerontology Honors Courses
GERO 497a Honors Seminar Units: 2
GERO 497b Honors Seminar Units: 2
GERO 497c Honors Seminar Units: 2–4
GERO 593 Research Methods Units: 4

Total units: 10–12

Total units: 128
*Prerequisite required.

Total units: 10–12

Total units: 128
*Prerequisite required.
Lifespan Health (BS)
The Bachelor of Science in Lifespan Health prepares students for admission to a graduate or professional school with an emphasis on the biomedical aspects of health including disease prevention, detection and treatment. This program is designed for students wishing to pursue graduate studies in a health field such as medicine, pharmacy, occupational/physical therapy, psychology and other related fields. Admission to this program is granted through USC's admission process, described in the admission section of this catalogue. The same foreign language requirement for the BS in Human Development and Aging is required as well as the USC Core (see The USC Core and the General Education Program for more information). Students must enroll in the following courses:

Gerontology Required Courses
- GERO 200 Gerontology: The Science of Adult Development Units: 4
- GERO 310 Physiology of Aging Units: 4
- GERO 320g Psychology of Adult Development Units: 4
- GERO 416 Health Issues in Adulthood Units: 4
- GERO 483 Global Health and Aging Units: 4
- GERO 492 Senior Seminar Units: 4
- GERO 495 Practicum in Geriatric Care Units: 4

Choose three from the following four courses:
- GERO 414 Neurobiology of Aging Units: 4
- GERO 437 Social and Psychological Aspects of Death and Dying Units: 2 or 4
- GERO 475 Ethical Issues in Geriatric Health Care Units: 4
- GERO 481 Case Management for Older Adults Units: 4
- Electives Units: 32
- Gerontology electives Units: 12

Notes:
*Prerequisite required.
"GERO 437 must be taken for 4 units of credit

Minor
Individuals, Societies and Aging Minor
This minor is a fit for students in business, engineering, communication, cinematic arts, or arts and sciences interested in developing a broad knowledge of issues in aging. Based largely on disciplines in the behavioral and social sciences, students learn how aging will impact their lives, families and careers. Upon completion of 20 units and graduation, the minor is noted on the student's transcript.

Required Courses
- GERO 320g Psychology of Adult Development Units: 4
- GERO 330 Society and Adult Development Units: 4
- GERO 340 Policy, Values, and Power in an Aging Society Units: 4

Select two from the following:
- GERO 380m Diversity in Aging Units: 4
- GERO 416 Health Issues in Adulthood Units: 4
- GERO 435m Women and Aging: Psychological, Social and Political Implications Units: 4
- GERO 437 Social and Psychological Aspects of Death and Dying Units: 2 or 4
- GERO 481 Case Management for Older Adults Units: 4
- GERO 491 Practicum Units: 2-8

Total units: 20

Science, Health and Aging Minor
The science, health and aging minor is appropriate for students working toward careers in medicine, dentistry, pharmacy, biological sciences, public health or other health related fields. Admission to the minor is only available to students who have completed 4 units of prerequisites (BISC 220 or BISC 221) as part of their major requirements. Upon completion of 20 units and graduation, the minor is noted on the student's transcript.

Required Courses
- GERO 310 Physiology of Aging Units: 4
- GERO 414 Neurobiology of Aging Units: 4
- GERO 416 Health Issues in Adulthood Units: 4 or
- GERO 496 Introduction to Clinical Geriatrics Units: 4

Select two from the following:
- GERO 415 Neuroaffective Disorders of Aging Units: 4
- GERO 421 Managed Care for an Aging Society Units: 4
- GERO 437 Social and Psychological Aspects of Death and Dying Units: 2 or 4
- GERO 475 Ethical Issues in Geriatric Health Care Units: 4
- GERO 495 Practicum in Geriatric Care Units: 4

Total units: 20

Master's Degree
Advanced Placement Gerontology (MS)
The Advanced Placement MS program allows the outstanding student who has completed a Bachelor of Science in Gerontology to waive several courses in order to complete the master's degree in 36 units rather than the 44 units for the regular program.

Required Courses
- GERO 510 Physiology of Development and Aging Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4
- GERO 591 Field Practicum Units: 1-12
- GERO 593 Research Methods Units: 4
Gerontology skill requirements Units: 12
Gerontology electives Units: 4

Total units: 36

Program Adaptation
Three of the following courses, GERO 510, GERO 520, GERO 530 and GERO 540, will be waived for students in the advanced placement track. Advanced placement students admitted to dual degree programs must meet curriculum requirements for the respective programs.

Aging Services Management (MASM)
The Master of Aging Services Management provides an opportunity for those seeking careers in the aging services industries to acquire skills and knowledge related to management of services, products and programs for older persons. The program requires a minimum of 12 units of core courses (three courses) and 20 units of electives (five courses). All graduate level courses are offered on campus and via the Internet. Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time.

In order to participate in online courses, students will be required to have a computer with multimedia capability including a modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. Specific details regarding the computer requirements will be provided by the department. This program is available as a progressive degree (see Progressive Degree in Gerontology).

Students applying to the Master of Aging Services Management must have a bachelor's degree from an accredited college or university with a GPA of 3.0. If the applicant's GPA falls below 3.0 the GRE will be required. Students must choose a minimum of 12 units of core courses from the following:

Core Courses (Minimum of 12 Units)
- GERO 500 Perspectives on a Changing Society: An Introduction to Aging Units: 4
- GERO 501 Applied Legal and Regulatory Issues in Aging Units: 4
- GERO 502 Marketing and Shifts in Consumer Decision Making Units: 4
- GERO 504 Current Issues in Aging Services Management Units: 4
- GERO 589 Case Studies in Leadership and Change Management Units: 4

Total units: 12

Students must select up to five courses (for a total of 20 units) from the following courses or any other adviser approved elective:

Suggested Elective Courses (20 Units)
- GERO 505 Housing and Community Policies and Programs Units: 4
- GERO 506 Technological Innovations in Aging (Gerontechnology) Units: 4
- GERO 507 End of Life Care Units: 4
- GERO 508 The Mind and Body Connection through the Lifespan Units: 4

Total units: 20

Gerontology (MA)
The MA in Gerontology provides an opportunity to acquire skills and formal training in gerontology. The online program requires 28 units of course work. Most courses are offered online and on campus.

Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time limit.

In order to participate in the online courses, students will be required to have access to a multimedia computer with modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. Specific details regarding the computer requirements will be provided by the department. Admission standards and prerequisites are the same as listed for the Master of Science in Gerontology with the exception that students in the online MA program are expected to have a significant amount of experience working in human services, health care, business or similar settings. Students are not required to have taken an approved additional course.

Required Courses (20 Units)
- GERO 500 Perspectives on a Changing Society: An Introduction to Aging Units: 4
- GERO 508 The Mind and Body Connection through the Lifespan Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4

Total units: 32

Elective courses (8 units)
GERO 522 Counseling Older Adults and Their Families Units: 2 or 4
GERO 550 Administration and System Management in Programs for Older Adults Units: 4
GERO 560 Micronutrients, Health, and Longevity Units: 4
GERO 585 The Aging Family Units: 2 or 4
GERO 589 Case Studies in Leadership and Change Management Units: 4

Total units: 28

Gerontology (MS)

The Master of Science in Gerontology prepares graduates to assume major leadership roles in the field of aging, primarily in the private and public sectors, as well as executive positions in the delivery of direct services to older people and their families and in the instruction of older adults and service providers. The Master of Science in Gerontology requires 44 units of course work. This includes 32 units of required courses and 12 units of electives. As part of this curriculum, a field practicum assures that these skills can be applied in agencies and institutional settings. All students take core courses in physiological, psychological, sociological, social policy and professional issues relating to aging, as well as research methods and the capstone course.

The course work includes instruction on the processes of aging and professional courses designed to develop the skills needed for practice. The field practicum includes one or two semesters of practical experience working in an organizational setting. Continuous registration in the program is required. There is a five year completion time limit for the degree. Leaves of absence are available for limited times and are excluded from the total time limit. A maximum of two absences (one year each) is allowed. Most courses are offered on campus and online.

Prerequisites for Admission

Students applying for admission to the Master of Science in Gerontology program must have a bachelor's degree from an accredited college or university. In selecting applicants for admission, the School of Gerontology considers both academic potential (as reflected in undergraduate study or scores on the Graduate Record Examinations) and professional potential (as reflected in experience, references and career goals). The school requests information from applicants to supplement that supplied by the USC Application for Graduate Admission. Such supplemental information usually includes a resume, statement of interest in gerontology and letters of reference. Interviews may be required.

Probation and Disqualification

Probation and Warning: Any graduate student whose cumulative or semester grade point average in the university falls below B (3.0) will be placed on academic probation. A graduate student whose semester average falls below B (3.0) but whose cumulative grade point average in the university is 3.0 (A = 4.0) or higher will be placed on academic warning.

Disqualification: A graduate student on academic probation will be disqualified if his or her cumulative record accumulates more than 12 units of C work. A graduate student, whether on probation or not, will be subject to disqualification if the Student Affairs Committee of the USC Davis School at any time determines deficiency in academic achievement.

Common Requirements

All candidates for the Master of Science degree must complete the following common requirements:

Required Courses

- GERO 510 Physiology of Development and Aging Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 589 Case Studies in Leadership and Change Management Units: 4
- GERO 591 Field Practicum Units: 1-12
- GERO 593 Research Methods Units: 4

Total units: 28

Capstone Course

- GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4

Suggested Electives (12 Units)

- GERO 522 Counseling Older Adults and Their Families Units: 2 or 4
- GERO 543 Continuum of Care: Systems Perspective Units: 4
- GERO 550 Administration and System Management in Programs for Older Adults Units: 4
- GERO 551 Applied Policy Skills in Aging Units: 4
- GERO 554 Evaluation: Incorporating Evidence-Based Practices Units: 4
- GERO 591 Field Practicum Units: 1-12

Total units: 44

Additional Requirements

Common requirements for all programs include the 28 required units and GERO 555, totaling 32 units. In addition, each candidate must complete the 12 units of electives chosen from the complete list of electives approved by the student's adviser.

Field Practicum

The field practicum provides the opportunity for the student to gain valuable experience and develop needed skills by working in a community agency or institution. It involves a minimum of 240 hours of involvement. Students may elect to take an additional 4 units of GERO 591 Field Practicum as an elective.

Field placement assignments are made by the internship coordinator of the school in consultation with the student and in accordance with the resources available in the community. Every effort is made to secure placement which will reflect the student's capacity to assume the responsibilities of a professional in gerontology. Evaluations of the student's performance are sent to the school by the community agency;
the student receives a grade of credit/no credit in GERO 591 Field Practicum.

**Long Term Care Administration (MLTCA)**
The Master of Long Term Care Administration provides an opportunity for professionals who are currently working in a long term care profession to acquire skills and formal training in long term care administration. The online program requires 28 units of course work.
The required courses are in sequential order and are restricted by availability. Continuous registration in the program is required. Leaves of absence are available for limited times and are excluded from the total time limit.
In order to participate in the online courses, students will be required to have access to a multimedia computer with modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. Specific details regarding the computer requirements will be provided by the department.
Admission standards are the same as for the Master of Science in Gerontology.

**Transfer Credits**
An admission credit evaluation is prepared for graduate students with previous graduate level course work. This review indicates which courses the university will approve but it is the relevant school (Gerontology, Business, or Public Policy) that determines if any of these courses are appropriate for this degree. A maximum of 4 units may be used toward the master's degree.
Graduate transfer credit will not be granted for life experience, credit by examination, non-credit extension courses, correspondence courses or thesis supervision.
Graduate transfer credit will not be granted for any course work taken elsewhere after the student has been admitted and enrolled at USC unless the student receives prior written approval from the department.

**Required Courses (24 units)**
ACCT 509 Concepts of Financial and Management Accounting Units: 4
FBE 587 Legal and Regulatory Environment of Long Term Care Units: 4
GERO 500 Perspectives on a Changing Society: An Introduction to Aging Units: 4

GERO 508 The Mind and Body Connection through the Lifespan Units: 4 or
GERO 522 Counseling Older Adults and Their Families Units: 2 or 4

PPD 601 Management of Long-Term Care Organizations Units: 4
PPD 649 Concepts and Practices in Public Personnel Administration Units: 4

**Note:**
Students must select one course (for a total of 28 units) from the following courses.

**Elective Courses (4 units)**

**Nutrition, Healthspan and Longevity (MS)**
The Master of Science in Nutrition, Healthspan and Longevity, a Coordinated Program (CP) in Nutrition and Dietetics, prepares graduates for roles in the field of nutrition and dietetics promoting personalized nutrition through work in hospitals and health care facilities, long-term care or school food service programs, business, teaching, research or private practice. The program has been granted candidacy for accreditation by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) and integrates academic study with professional practice experience. Fifteen students are admitted each year in the fall. Students can complete the full-time degree program in two years, on-campus or online (for those living more than 100 miles from USC). Online students will be required to find and utilize facilities in their community to complete the required course laboratory activities and supervised practice (verification of facilities will be required after acceptance, and before enrollment, for first-year rotations). Successful completion of 46 units of course work is required for graduation and includes 28 units of required courses, 12 units of supervised practice and 6 units of research. The program summative experience will be an electronic portfolio, including research completed throughout the program. Students will be required to present their work at a local, state or national dietetics conference as a requirement of graduation.
Continuous registration in the program is required. Leaves of absence are available for limited times and may require the student to wait until the next year to re-enroll as some courses are offered annually, and must be taken sequentially. A maximum of two leaves of absence is allowed. Upon completion of the Master of Science degree, students are eligible to write for the Credentialing Examination for Registered Dietitian Nutritionists.
In order to participate online, students will be required to have access to a computer with multimedia capability including high-speed Internet access, audio and a digital video camera. Specific details regarding computer requirements will be provided by the program.

**Field Practicum**
The field practicum provides the opportunity for students to gain valuable experience and develop needed skills by working in an institutional or community environment where nutrition services are provided by registered dietitians or food services professionals. Field placement assignments begin in the second semester of the program and continue every semester until graduation. Students attending the program on campus are placed by the program coordinator in consultation with the student as resources are available in the community. Evaluations of students are sent to the school by the community agency; the student receives a grade of credit/no credit in GERO 591 Field Practicum.
Prerequisites for Admission

Students applying for admission to the Master of Science in Nutrition, Healthspan and Longevity program must have a bachelor's degree from an accredited college or university. In addition, the following prerequisites must be complete before starting the program: cellular biology with lab, microbiology with lab, general chemistry with lab, organic chemistry with lab, biochemistry with lab, human physiology with lab, general psychology or sociology, algebra or pre-calculus or calculus or statistics, speech or communications, introductory food science and human nutrition. All prerequisite courses cannot be more than 10 years old at the time of application. The exceptions are the general psychology course and the math course; there is no time limit on these two courses. In selecting applicants for admission, the Davis School of Gerontology considers both academic potential (as reflected in undergraduate study with a GPA greater than 3.0) and professional potential (as reflected in experience, references and career goals). The school requests information from applicants to supplement that supplied by the USC Application for Graduate Admission. Supplemental information includes a résumé, statement of interest in nutrition and longevity and two letters of reference. Applicants are required to document at least 40 hours of paid or volunteer work experience with a registered dietitian. Interviews may be required for highest ranking applicants.

Probation and Disqualification

Probation and Warning: Any graduate student with a cumulative or semester grade point average in the university falling below B (3.0) will be placed on academic probation. A graduate student whose semester average falls below B (3.0) but whose cumulative grade point average in the university is 3.0 (A = 4.0) or higher will be placed on academic warning. Students will not be allowed to begin supervised field practice in the second semester if any first semester grades fall below a B (3.0).

Disqualification: A graduate student on academic probation will be disqualified if his or her cumulative record accumulates more than 12 units of C work. A graduate student, whether on probation or not, will be subject to disqualification if the Student Affairs Committee of the USC Davis School at any time determines deficiency in academic achievement.

Course Requirements

All candidates for the Master of Science in Nutrition, Healthspan and Longevity degree must complete the following required courses.

University Certificate

Gerontology Graduate Level Certificate

The residential graduate certificate in gerontology program provides an opportunity for those who have completed a bachelor's degree in another profession or discipline and are employed in the field of aging to acquire a greater understanding of gerontology theory and research. The program consists of 16 units of gerontology content designed to familiarize the student with several areas of the field which relate to professional practice. In addition to three of the four required core course areas for the certificate program (GERO 510, GERO 520 or GERO 522, GERO 530 or GERO 585, GERO 540), each student will have the option to choose one elective course which meets his or her particular area of interest. Certificate students do not take a field practicum. Students admitted to the non-degree certificate program are expected to enroll each semester until the program is completed.

Gerontology Online Graduate Level Certificate

The online graduate certificate in gerontology program provides an opportunity for those with a bachelor's degree in another profession or discipline who are employed in the field of aging to acquire a greater understanding of gerontology theory and research. The program consists of 16 units of gerontology courses designed to familiarize the student with several areas of the field which relate to professional practice. Students complete the introductory course, GERO 500, two of the four required core course areas (GERO 508 or GERO 510 or, GERO 520 or GERO 522, GERO 530 or GERO 585, and GERO 540), and one elective course in a particular area of interest. The required courses are delivered via the Internet. The courses are offered in sequential order and are restricted by availability. Continuous registration in the non-degree program is required. Leaves of absence are available for limited times and are excluded from the total time limit. Entering students are encouraged to begin their course of study by taking GERO 500. In order to participate in the online courses, students will be required to have access to a multimedia computer with modem, printer and CD-ROM drive; an Internet provider with email and an Internet browser; and word processing software. The department will provide specific details regarding the computer requirements.

Dual Degree

Gerontology and Business Administration (MS/MBA)
The MS/MBA dual degree combines knowledge of the older population with the skills of business management. The program prepares graduates for a number of roles in both public and private sector organizations including the marketing of products or services to seniors, human resource development with older workers and retirement benefits.

**Gerontology Requirements**

The Master of Science in Gerontology requires 30 units of course and fieldwork which covers the core content of the MS program.

**Required Courses**

- GERO 510 Physiology of Development and Aging Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4
- GERO 591 Field Practicum Units: 1-12
- Gerontology Elective Units: 6

**Total units: 30**

**Additional Requirements**

**Business Administration Requirements**

The Master of Business Administration will require 48 units of credit. Required courses include: all required courses in an MBA program; MOR 548 Competitive Advantage Through People 3; one marketing elective chosen from among MKT 512 Customer Insights and Analysis 3, MKT 525 Consumer Behavior 3 and MKT 560 Marketing Strategy 3; and additional graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students may not count courses taken outside the School of Business toward the 48 units.

**Program Adaptation**

The USC Davis School of Gerontology will waive 18 units of electives, plus GERO 593 Research Methods (4 units) and GERO 589 Case Studies in Leadership and Change Management (4 units), which are required in the regular MS program. Students will be exposed to research and professional issues in business administration course work.

**Master of Science in Gerontology/Juris Doctor (MS/JD)**

The JD/MS dual degree combines knowledge of the older population with understanding of the legal system. The program prepares graduates for a number of roles in both public and private sector organizations. Students are required to complete 110 units of course work, 74 from the law school and 36 from the Davis School of Gerontology. The first year is devoted to required law courses, and the second, third and fourth years combine gerontology and law courses.

**Gerontology Requirements**

The Master of Science in Gerontology will require 36 units of course and fieldwork that cover the core content of the MS program.

**Gerontology Requirements**

- GERO 510 Physiology of Development and Aging Units: 4
- GERO 522 Counseling Older Adults and Their Families Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4
- GERO 591 Field Practicum Units: 1-12
- GERO 593 Research Methods Units: 4

**Notes:**

The Davis School of Gerontology will waive 16 units of electives, which are required in the regular MS program, as well as GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program have a primary professional focus in law.

**Law School Requirements**

The law school requires 74 units of credit.

**First Year Requirements**

- LAW 502 Procedure I Units: 4
- LAW 503 Contracts Units: 2, 3, 4
- LAW 504 Criminal Law Units: 3
- LAW 505 Legal Profession Units: 2, 3, 4
- LAW 507 Property Units: 4
- LAW 508 Constitutional Law: Structure Units: 2, 3, 4, 5
- LAW 509 Torts I Units: 4
- LAW 512 Law, Language and Values Units: 2, 3, 4
- LAW 515 Legal Research, Writing and Advocacy I Units: 2, 3
- LAW 516 Legal Research, Writing and Advocacy II Units: 2

**Elective Course Work**

The second and third year of law study are primarily elective with one requirement. Students must satisfy the upper division writing requirement, either by completing a major, faculty-supervised writing project such as a dissertation, or by taking a course with a substantial writing component.

The law school will waive 14 units of electives, which are required in the regular JD program.

**Master of Science in Gerontology/Master of Health Administration (MS/MHA)**

Gerontology and health administration students can specialize in health care administration (profit and nonprofit) through the dual degree with the USC Davis School of Gerontology and the USC Price School of Public Policy's Health Administration Program. Students in the dual degree must be admitted by both academic units and complete 78 units of post-graduate academic work.

**Gerontology Requirements**

- GERO 510 Physiology of Development and Aging Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
GERO 530 Life Span Developmental Sociology Units: 4
GERO 540 Social Policy and Aging Units: 4
GERO 550 Administration and System Management in Programs for Older Adults Units: 4
GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4
GERO 591 Field Practicum Units: 1-12
GERO 593 Research Methods Units: 4

Total units: 36

Health Administration Requirements
PPD 500 Intersectoral Leadership Units: 2
PPD 501a Economics for Policy, Planning and Development Units: 2
PPD 509 Problems and Issues in the Health Field Units: 4
PPD 510a Financial Management of Health Services Units: 4
PPD 513 Legal Issues in Health Care Delivery Units: 2
PPD 514 Economic Concepts Applied to Health Units: 4
PPD 515 Strategic Management of Health Organizations Units: 4
PPD 516 Financial Accounting for Health Care Organizations Units: 4
PPD 517 Concepts and Practices in Managing Health Care Organizations Units: 2
PPD 518 Quality of Care Concepts Units: 2
PPD 545 Human Behavior in Public Organizations Units: 4
PPD 558 Multivariate Statistical Analysis Units: 4
PPD 601 Management of Long-Term Care Organizations Units: 4

Total units: 42

Additional Requirements
Statistics: The statistics requirement for dual degree students is the same as those that apply to the Health Administration (MHA).
Program Adaptation: The USC Davis School of Gerontology will waive GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program will have a primary professional focus in health administration.

Students enrolled in the dual degree are not required to take PPD 511 (as opposed to the stand alone MHA degree students) because they develop the necessary proficiencies related to their career goals in long-term care administration through other courses such as GERO 550, GERO 591 and GERO 593. In addition, PPD 601 is required for the dual degree (and not the stand alone MHA program) because most of these students will work in long-term care facilities and this course is critical for success in that market.

Any course substitutions are done by petition on an individual basis and should be part of a carefully developed course of study. The USC Price School of Public Policy should be consulted concerning this program of study.

Master of Science in Gerontology/Master of Planning (MS/MPI)
The MS/MPI dual degree is one of a few in the nation which combines the knowledge of the older population with the skills needed to plan services for older people. The MPI prepares the graduate for the responsibilities involved in development of public and private institutions and programs. The MS indicates a special focus on the older person and the skills to analyze and design programs for this growing population. The MS is offered through the USC Davis School of Gerontology.

Requirements
Requirements for completion of the dual degree program are 66 units including 26 units in gerontology, 36 units in planning and a minimum of 4 units of thesis in either gerontology or planning, as follows:

Gerontology
GERO 510 Physiology of Development and Aging Units: 4
GERO 520 Life Span Developmental Psychology Units: 2 or 4
GERO 530 Life Span Developmental Sociology Units: 4
GERO 540 Social Policy and Aging Units: 4
GERO 591 Field Practicum Units: 1-12
Gerontology elective Units: 4

Planning
PPD 500 Intersectoral Leadership Units: 2
PPD 501a Economics for Policy, Planning and Development Units: 2
PPD 524 Planning Theory Units: 2
PPD 525 Statistics and Arguing from Data Units: 2
PPD 526 Comparative International Development Units: 2
PPD 527 The Social Context of Planning Units: 2
PPD 529 Legal Environment of Planning Units: 2
PPD 533 Planning History and Urban Form Units: 2

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

Master of Science in Gerontology/Master of Public Administration (MS/MPA)
The Master of Public Administration/Master of Science in Gerontology (MPA/MS) dual degree offers students interested in management of agencies and institutions the opportunity to gain in-depth knowledge of the administrative and organizational processes and management skills necessary for the effective delivery of services to older persons.

In the MPA/MS dual degree, students spend their first year taking the required courses in the USC Davis School of Gerontology. The research course, GERO 593 Research Methods and the capstone course GERO 555 Integrating Gerontology: A Multidisciplinary Approach, are taken in the
USC Davis School of Gerontology. The student begins courses in the Price School of Public Policy during the second semester of the first year. Two versions of this dual degree are available, one with a general orientation and one with an emphasis on health services administration. Students must apply to both schools and, if accepted to both, participate in a specially designed program combining course work from both schools. Curriculum requirements for the general focus dual degree are detailed in the USC Davis School of Gerontology section of this catalogue. Students are encouraged to seek advisement as they plan their actual programs, since curriculum changes may occur.

**Gerontology Requirements**
- GERO 510 Physiology of Development and Aging Units: 4
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
- GERO 550 Administration and System Management in Programs for Older Adults Units: 4
- GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4
- GERO 591 Field Practicum Units: 1-12
- GERO 593 Research Methods Units: 4
- Gerontology elective Units: 4

**Total units: 40**

**Public Administration Requirements**
- PPD 500 Intersectoral Leadership Units: 2
- PPD 501a Economics for Policy, Planning and Development Units: 2
- PPD 501b Economics for Policy, Planning and Development Units: 2
- PPD 540 Public Administration and Society Units: 4
- PPD 541 Public Financial Management and Budgeting Units: 4 or
- PPDE 645 Financial Management of Nonprofit Organizations Units: 4
- PPD 542 Policy and Program Evaluation Units: 4 or
- PPD 555 Modeling and Operations Research Units: 4
- PPD 545 Human Behavior in Public Organizations Units: 4
- PPD 546 Capstone in Public Administration Units: 4
- Elective Units: 2

**Total units: 28**

**Additional Requirements**

**Program Adaptation**
For the MS in Gerontology, 12 units of electives are waived as well as GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program have a primary professional focus in public administration. For the Master of Public Administration, 12 units of gerontology courses are used as the substantive specialization.

**Master of Science, Gerontology/Doctor of Pharmacy (PharmD/MS)**
The emerging impact of the elderly on the health care system has created a need for health care providers who understand the unique needs of the elderly. As drug therapy remains the primary therapeutic option for chronic disease, the demand for prescription drugs will continue to rise. There is a demand for pharmacists who are equipped to meet the pharmaceutical care needs of this population. Geriatric pharmacy is recognized as a specialty, with board certification through the Commission for Certification in Geriatric Pharmacy. The PharmD/MS, Gerontology program will provide extensive education and training in the unique health care needs of older adults. It will allow student pharmacists with a career interest in geriatrics or gerontology to work with health care planning or delivery organizations to develop and implement progressive pharmaceutical care programs for the elderly.

**Application and Admissions Requirements**
Students who intend to pursue the dual PharmD/MS degree must be accepted by both programs. This includes having completed a baccalaureate degree from an accredited college or university with a minimum G.P.A. of 3.0 and a minimum equivalent GRE score of 1000. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual PharmD/MS degree program in two ways. First, they may apply at the time they submit their PharmD application by concurrently submitting applications to both programs. Students, who elect this approach, must identify themselves on both applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the PharmD and will be offered admission to the dual degree program. Second, students can apply to the dual degree by submitting an application to the MS in Gerontology program during their first year of enrollment in the PharmD prior to the MS, Gerontology published application deadline. Students, who elect this approach, must apply through the School of Pharmacy. Students admitted to the MS program using this approach will be offered admission to the dual degree contingent on passing all courses in their first year of the PharmD with a minimum 3.0 G.P.A. Students accepted to the dual degree program must maintain a minimum 3.0 G.P.A. in their gerontology and PharmD courses.

**Graduation Requirements**
Students must complete all requirements for the PharmD and MS degrees as listed in the catalogue with a minimum cumulative 3.0 G.P.A. Students must complete 32 Gerontology units as indicated. The PharmD degree course requirements are listed in the School of Pharmacy section.

**Gerontology Requirements**
- GERO 520 Life Span Developmental Psychology Units: 2 or 4
- GERO 530 Life Span Developmental Sociology Units: 4
- GERO 540 Social Policy and Aging Units: 4
GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4
Gerontology electives Units: 16

*Choose four of the following (16 units):
GERO 475 Ethical Issues in Geriatric Health Care Units: 4
GERO 496 Introduction to Clinical Geriatrics Units: 4
GERO 508 The Mind and Body Connection through the Lifespan Units: 4
GERO 519 Recent Advances in Neurobiology and Endocrinology of Aging Units: 2 or 4
GERO 522 Counseling Older Adults and Their Families Units: 2 or 4
GERO 543 Continuum of Care: Systems Perspective Units: 4
GERO 550 Administration and System Management in Programs for Older Adults Units: 4
GERO 554 Evaluation: Incorporating Evidence-Based Practices Units: 4
GERO 591 Field Practicum Units: 1-12

Total units: 32

Social Work and Gerontology (MSW/MS)
The MS/MSW dual degree offers the student interested in direct service or community organization the credentials most valued in clinical and therapeutic practice. Taken in connection with the social work degree, the MS focuses course and fieldwork on the older person and prepares the student for social work with older persons and their families. In the MS/MSW dual degree program, the student enrolls primarily in the first year program of the USC School of Social Work. During the summer session, courses are taken in the USC Davis School of Gerontology. Second year courses are taken in both schools and fieldwork during the second year is taken in the School of Gerontology. The research course is taken through the School of Social Work in the student's concentration area. The School of Gerontology will waive GERO 589 Case Studies in Leadership and Change Management (4 units) and GERO 555 Integrating Gerontology: A Multidisciplinary Approach (4 units) because students enrolled in this program have a primary professional focus on social work.

Gerontology Requirements
GERO 510 Physiology of Development and Aging Units: 4
GERO 520 Life Span Developmental Psychology Units: 2 or 4
GERO 530 Life Span Developmental Sociology Units: 4
GERO 540 Social Policy and Aging Units: 4
GERO 591 Field Practicum Units: 1-12
Gerontology electives Units: 8

Total units: 32

Social Work Requirements
Contact the USC School of Social Work for Social Work requirements.

Note: Course selection is done only with an academic adviser's approval.

Program Adaptations
The School of Gerontology waives 12 units. The research course is taken through the School of Social Work in the student's concentration area, and GERO 593, the research course, and GERO 555 are waived as well as one elective.
The School of Social Work waives 12 units.

Doctoral Degree

Biology of Aging (PhD)
Application deadline: December 1
The purpose of the PhD in the Biology of Aging is to provide interdisciplinary research training in an age-centric environment. Students will focus on basic mechanisms of aging as well as translational research related to medical applications. Students will approach aging as a major risk factor for disease.

Admissions Requirements
Applicants must have a bachelor's degree from an accredited four-year college or university preferably in one of the biological sciences. Applicants are evaluated by their transcripts and GPA; scores on the GRE General Test, three letters of recommendation and a statement of interest.

Degree Requirements

Course Requirements
The PhD in the Biology of Aging will provide each student with detailed knowledge and expertise in the biology of aging. The PhD in the Biology of Aging requires the following courses (GERO 600, GERO 601, GERO 602a, GERO 602b, GERO 603, plus 8-10 units from the list of suggested electives or other department approved courses). A minimum of 60 units is required, consisting of formal courses, seminars and research credit. At least 24 of the minimum 60 total units required are to be formal graduate course work (lecture or seminar courses).

Screening Examination
After completion of the core Biology of Aging course work (GERO 600, GERO 601, GERO 602a GERO 602b and GERO 603) during the first year, the student's degree progress is discussed and evaluated by a screening committee composed of members of the gerontology faculty and the Buck Institute as well as the student's faculty adviser. The purpose of this written and oral evaluation is to determine competence to continue graduate study and identify areas to be strengthened prior to the qualifying examination.

Qualifying Examination
By the end of the third semester, students should choose a guidance committee consistent with the requirements of the graduate school composed of gerontology faculty, Buck Institute faculty and one outside member. This committee will conduct the qualifying exam and provide guidance during dissertation research. The chair of the committee will serve as the principal adviser. Students should consult extensively with each committee member regarding subjects to be covered in the exam.
The qualifying exam consists of written and oral parts. Both parts must be finished before the end of the fifth semester.
For the written exam, the adviser will consult with each of

Total units: 32
the members of the qualifying exam committee. The written part will incorporate evaluation and synthesis of existing knowledge related to the topic areas, creation of a set of experiments to test a relevant hypothesis, and interpretation of anticipated results. The oral exam consists of an oral defense of the written part and will be conducted with a month of the written part of the qualifying exam.

**Doctoral Dissertation**
The dissertation is based on original, publishable and significant research conducted independently by the student under the guidance of the dissertation committee. Upon admission to candidacy, a dissertation committee is established which consists of three members of the faculty, some of whom may be from the guidance committee, one of whom must hold his or her primary appointment outside of the Davis School of Gerontology. The dissertation committee is responsible for providing guidance and consultation during the research process, approving the dissertation, conducting the final oral examination, and recommending the candidate for the PhD degree.

**Foreign Language Requirements**
There are no foreign language requirements for the PhD in the Biology of Aging program.

**Transfer Credits**
Students with a master's degree of prior graduate course work in biology can petition to apply the credit toward required courses. Petition for credit will be based on the Graduate School's policies and requirements for transfer of credit and on approval by the doctoral advisory committee. Transfer credits toward the PhD requirements will be limited to 20 units and must be taken within 10 years of entering the program.

**Gerontology (PhD)**
The purpose of the PhD in Gerontology is to provide research training in the multidisciplinary field of aging. The program is designed to enhance the potential of able students to make scholarly and professional contributions to the field of gerontology through research and teaching. To obtain this goal, the PhD in Gerontology provides (1) high level rigorous research training, (2) the acquisition and application of scientific knowledge in the field of aging and (3) the development of leadership skills.

**Admission Requirements**
Applicants for admission to the doctoral program must meet the following requirements:
- Recipient of a bachelor's degree from an accredited college or university by anticipated enrollment date.
- Academic promise, as evidenced by above average achievement in previous undergraduate and graduate education. A minimum GPA of 3.5 on all prior graduate work is required. In addition, a 3.25 GPA in an appropriate undergraduate major and a baccalaureate degree are required.
- Personal qualities compatible with high level performance in gerontology and indicating a potential for leadership in the field. This includes a strong commitment to developing a scientific research program. Applicants to the PhD program must submit a resume of professional and academic experience, three letters of reference (academic and professional), a statement of objectives and examples of written work.
- Satisfactory performance on the Graduate Record Examinations — existing test scores may be submitted if the GRE has been completed no more than five years prior to the date of application. A satisfactory score on the Verbal and Quantitative GRE is required. Students should also provide scores from the Analytic exam.
- Submission of application materials as required.
- Instructions for application to the Doctor of Philosophy in Gerontology may be obtained by contacting the Davis School of Gerontology.

**Degree Requirements**

**Course Requirements**
Students must complete a minimum of 60 units of course work (with at least 24 of these units being completed in residency at USC), as well as additional dissertation units (at least 4 units) as required. All students will take courses in three areas: a set of required core courses, research courses and elective courses.

There are two tracks in the gerontology PhD program: the social, behavioral, and policy track and the biology of aging track. Students will be advised about course selection during the first year by the PhD committee. As soon as a student has selected a specialization (e.g., biology, psychology, sociology/demography, policy), an advisory committee of appropriate faculty will be appointed. The purpose of the advisory committee is to help the student in the selection of courses and a research agenda; to monitor the student's progress; and to insure preparation for the qualifying examination.

**Basic Scientific Core**
Each track has a basic scientific core. The core for the social, behavioral and policy track stresses the physiological, psychological, sociological and policy dimensions of individual and population aging. The scientific core for the biology of aging track emphasizes the understanding in the molecular, cellular and physiological mechanisms of aging and age-related disease. Special emphases include mechanisms associated with chronic disease such as cancer, heart disease, Alzheimer's and Parkinson's disease, and the interplay between genetic and environmental influences.

**Social, Behavioral and Policy Track Required Core Courses**
- GER0 610 The Aging Society Units: 4
- GER0 613 Health and Aging Units: 4
- GER0 620 Psychology of Aging Units: 4
- GER0 645 Politics and Policy Processes in an Aging Society Units: 4

**Biology of Aging Track Required Core Courses**
- BISC 502a Molecular Genetics and Biochemistry Units: 4 and
Transfer credits toward the PhD requirements will be limited to 20 units and must be credits taken within 10 years of entering the program.

**Time Limit**

The normal time for completing the PhD is four to five years (without a prior master's degree). The first two years will consist of required and elective courses. The third year will consist of electives, the PhD qualifying exams and completion of the dissertation proposal. The final year(s) will involve the completion of the dissertation. The maximum time to complete all requirements for the PhD degree is eight years from the first course at USC applied toward the degree. Students who have completed an applicable master's degree at USC or elsewhere within five years of the proposed enrollment in the PhD program must complete the PhD in six years.

**Screening Procedures**

When students have completed a minimum of 16 but not more than 24 units of doctoral course work, the doctoral advisory committee assesses their performance through a screening process and makes a decision regarding their ability to continue in the program. If the student is granted permission to continue, a guidance committee is established.

**Qualifying Exam Committee**

The qualifying exam committee is composed of five faculty members, at least three from the School of Gerontology. The function of the qualifying exam committee is to oversee the development of the student's academic progress through the qualifying examination, including the preliminary dissertation proposal.

**Qualifying Examination**

As a prerequisite for candidacy for the PhD, students must pass a qualifying examination, which is multidisciplinary and comprehensive in nature and that necessitates independent study beyond course requirements. Students must have completed at least 28 units of course work in the doctoral program with a GPA of at least 3.25 before attempting the qualifying exam. The exam is designed to test mastery of knowledge and scholarly skills and to test readiness to undertake independent research.

If the student fails this exam, it may be repeated one time. When the exam is successfully completed, the student then must develop and have a dissertation proposal approved before the student is officially admitted to candidacy for the PhD degree.

**Doctoral Dissertation**

Upon admission to candidacy, a dissertation committee is established which consists of three members of the faculty, some of whom may be from the qualifying committee. The dissertation committee has responsibility for providing guidance and consultation during the research process, approving the dissertation, conducting the final oral examination, and recommending the candidate for the PhD degree. The doctoral dissertation should make an original contribution to the development of knowledge and theory in gerontology.

**Final Oral Examination**

Upon approval of the final draft of the dissertation by all members of the dissertation committee, the candidate must pass a final oral examination. Upon successful completion of
USC Independent Health Professions at the Herman Ostrow School of Dentistry

The USC Division of Biokinesiology and Physical Therapy and the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy are administered by the Herman Ostrow School of Dentistry of USC. Both of these divisions offer outstanding education at the graduate level and the Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy offers an undergraduate program. The USC Division of Biokinesiology and Physical Therapy was established in 1944. For those entering the physical therapy profession, the division offers the Doctor of Physical Therapy, the top-ranked DPT program in the country. For practicing physical therapists, the division offers a Master of Science degree as well as clinical residency programs in neurology, orthopedics, pediatrics and sports. In addition, the division offers the nation's longest-standing PhD degree program in Physical Therapy, now a PhD in Biokinesiology. Experienced clinicians with a master's degree in physical therapy may be eligible for the Doctor of Physical Therapy in an Advanced Standing program. The division is headquartered on the Health Sciences Campus.

Faculty

Associate Dean and Chair: James Gordon, EdD, PT, FAPTA
Associate Chair: Cheryl Resnik, PT, DPT, FNAP

Professors: James Gordon, EdD, PT, FAPTA; Christopher Powers, PhD, PT, FAPTA; Carolee J. Winston, PhD, PT, FAPTA; Francisco Valero-Cuevas, PhD

Professors (Clinical Scholars): Linda Fetters, PhD, PT, FAPTA; Kornelia Kulig, PhD, PT, FAPTA

Professors of Clinical Physical Therapy: Beth Fisher, PT, PhD, FAPTA; Rob F. Landel, PT, DPT, OCS, CSCS, FAPTA; Lori Michener, PT, PhD, FAPTA

Associate Professors: Lucinda L. Baker, PhD, PT; Nina S. Bradley, PhD, PT; George J. Salem, PhD; Nicolas Schweighofer, PhD

Assistant Professors: Jason Kutch, PhD; James Finley, PhD; Sook-Lei Liew, PhD, OTR/L

Assistant Professors of Clinical Physical Therapy: Beth Fisher, PhD, PT; Cheryl Resnik, PT, DPT, FNAP; E. Todd Schroeder, PhD; Julie Tilson, PT, DPT, MS, NCS

Assistant Professors of Clinical Physical Therapy: Jesus Dominguez, PhD, PT; Jacquelyn Dylla, PT, DPT, OCS; Rose Hamm, DPT, CWS; Robbin Howard, PT, DPT, NCS; Yogi Matharu, PT, DPT, OCS; Michael O'Donnell, PT, DPT, OCS, FAAOMPT; Marisa Perdomo, PT, DPT; Amy Pomrantz, PT, DPT, OCS, ATC; Barbara Sargent, PhD, PT, PCS; Susan Sigward, PhD, PT, ATC; Michael S. Simpson, PT, DPT, CCS; Jonathan Sum, PT, DPT, OCS, SCS; Kimiko Yamada, PT, DPT, OCS, ATC, CSCS

Assistant Professors of Research: Christina Dieli-Conwright, PhD, CSCS, CET; Beth Smith, PT, DPT, PhD

Instructors of Clinical Physical Therapy: Elizabeth Acreman, PT, DPT; Geoffrey Cariker, PT, DPT, GCS; Jessica Curran, PT, DPT, OCS; Lauren Davis, PT, DPT; Aimee M. Diaz, PT, DPT, SCS, ATC; Ryan Frendewey, PT, DPT; Lori Ginoza, PT, DPT, NCS; Janelle Gilmer PT, DPT, GCS; Erin Hayden, PT, DPT, OCS; Lydia In, MPT; Nicole Iriarary, PT, DPT, CCS; Eileen V. Johnson, PT, DPT; Sean Johnson, DPT, OCS; Yasuyuki Kasayama, DPT, MHA, OCS; Kenneth Kim, PT, DPT, OCS, CSCS; Daniel Kirages, PT, DPT, OCS, FAAOMPT; Angela Kwan, MPT; Cherise Lathan, PT, DPT, NCS; Valerie Matthews, PT, DPT; Brian McNeill, PT, DPT; Jennifer Okuno, MPT; David Richards, PT, DPT, NCS; Terry Richardson, PT, DPT; Scott Russell, PT, DPT; Don Shimabukuro, MPT; Jennifer Tanaka, PT, DPT, NCS; Jeff Thompson, PT, DPT; Erica Sigman, DPT, OCS; Stephanie
Admission Requirements

Admission requirements include a superior grade point average in cumulative undergraduate and graduate course work (if applicable). Applicants should score at least 150 in each area of the Graduate Record Examinations. Applicants are to provide the department with three letters of recommendation. The faculty may request a personal interview before making a decision on admission. Admission will be considered for the fall semester only. The application deadline is November 1. All applicants should contact the Division of Biokinesiology and Physical Therapy for advisement.

Prerequisites

The prerequisite for applicants to the Master of Science program in biokinesiology is either: (a) a bachelor's degree or higher with a science major or equivalent; or (b) a bachelor's or master's degree in physical therapy with appropriate basic science content. Courses completed at the time of application must include work (with appropriate laboratory study) in chemistry, physics, calculus and biology. Highly recommended is coursework in anatomy, physiology, histology, kinesiology, neuroscience, analytical geometry, exercise physiology, biochemistry and computer programming. Applicants with no background in cellular or molecular biology may be required to take PT 509 in the entry-level DPT program. Candidates should have some degree of computer literacy. International applicants will be considered on a special evaluation of credentials. Students deficient in certain prerequisites may be admitted subject to completion of requirements within two years after admission. An additional year may be granted upon review of the student's program by a faculty committee. Work in any prerequisite subjects will not be part of the required units for the Master of Science.

Degree Requirements

Completion of the degree requires satisfactory completion of a minimum of 32 credits of course work at the 500 level or above, a research project (BKN 559 and BKN 590), and a summative experience.

Required Courses

- BKN 550 Neurobehavioral Basis of Movement Units: 4
- BKN 551 Musculoskeletal and Biomechanical Basis of Movement Units: 4
- BKN 552 Physiological Basis of Voluntary Movement Units: 4
- BKN 559 Readings in Biokinesiology Units: 1, 2, 3, 4 (max 8)
- BKN 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- PM 510L Principles of Biostatistics Units: 4

Additional Requirements

Students must complete the three biokinesiology core courses (BKN 550, BKN 551, BKN 552) before sitting for their comprehensive examination. Substituting a course for one of the core courses may be allowed after receiving approval from the Biokinesiology Program Committee prior to the beginning of the course. In order to fulfill the research project requirement, the following plan is suggested; however, each plan can be individualized based on the needs of the student and/or adviser:

- Select a research professor (from the department) whose work interests them. This should be done by the end of the first year of study.
- After receiving the professor's approval, sign up for BKN 559 (4 units) and complete a semester reading the literature pertinent to the professor's work.
The following semester, sign up for BKN 590 (4 units) and participate in an ongoing research project that is being conducted by the professor. The research paper must be completed within the semester for which BKN 590 units are being given. See the Doctor of Philosophy in Biokinesiology section for a list of courses available to MS students.

**University Certificate**

**Neurologic Physical Therapy**

**Certificate**

**Clinical Residency Program**

This program is directed at practicing clinicians who seek post-professional clinical residency education in neurologic physical therapy and wish to obtain an academic credential for its completion.

**Admission Requirements, Prerequisites and Degree Requirements**

Admission requirements such as grade point average, GRE scores and P.T. licensure are the same as those for the post-professional DPT. In addition to the above listed requirements, experience as evidenced by the years in practice and postgraduate course work taken will be assessed in the applicant's portfolio. The faculty may request a personal interview. Admission will be considered for fall semester only. Deadline for application is four months prior to the proposed starting date. All applicants should contact the Division of Biokinesiology and Physical Therapy for advisement. Completion of the certificate requires satisfactory completion of a minimum of 15 units.

**Required Courses for Certificate in Neurologic Physical Therapy**

- PT 595a Residency in Advanced Clinical Physical Therapy Units: 1, 2, 3, 4 each
- PT 595b Residency in Advanced Clinical Physical Therapy Units: 1, 2, 3, 4 each
- PT 595c Residency in Advanced Clinical Physical Therapy Units: 1, 2, 3, 4 each
- PT 595d Residency in Advanced Clinical Physical Therapy Units: 1, 2, 3, 4 each
- PT 624aL Neurological Differential Diagnosis and Therapeutic Interventions Units: 3
- PT 624bL Neurological Differential Diagnosis and Therapeutic Interventions Units: 3

**Dual Degree**

**Doctor of Physical Therapy and Master of Public Health (DPT/MPH)**

The Post Professional Doctor of Physical Therapy (DPT) and the Master of Public (MPH) dual degree program offers the opportunity for physical therapy clinicians to pursue a doctoral-level education in combination with an integrated approach to health care. The program spans four years. Students begin the first one to two years completing MPH core and elective course work in the Department of Preventive Medicine. The remaining years are devoted to program requirements in physical therapy.

**Doctoral Degree**

**Biokinesiology (PhD)**

The graduate program leading to the Doctor of Philosophy in Biokinesiology is designed to prepare candidates for research and teaching at the university level. Actual programs of study will be designed with a degree of flexibility directed toward individual students who seek to become independent scholars.

**Admission Requirements**

Applicants must meet all general admission requirements of the university. Admission requirements include a superior grade point average in cumulative undergraduate and graduate course work (if applicable). In addition, applicants should score at least 150 in each area of the Graduate Record Examinations (GRE) and have some research experience. Students admitted for the Master of Science degree are not automatically admitted to the Doctor of Philosophy program. The Master of Science is not required as a prerequisite to the PhD but may be advised.

Applicants must have a personal interview with the program faculty. A student can be considered for admission only when a member of the full-time PhD faculty has agreed to serve as the student's PhD adviser. Three letters of recommendation and duplicate transcripts must be sent to the division for preliminary evaluation, although final acceptance is based upon the official USC application procedure.

**Prerequisites (PhD Program)**

The prerequisite for applicants to the PhD program in biokinesiology is either: (a) a bachelor's degree or higher with a science major or equivalent; or (b) a bachelor's or master's degree in physical therapy with appropriate basic science content. Courses completed at the time of application must include work (with appropriate laboratory study) in chemistry, calculus, physics and biology. Highly recommended is course work in anatomy, physiology, histology, cell biology, exercise physiology, kinesiology, biochemistry, neuroscience, trigonometry, analytical geometry and computer programming.

Candidates should be computer literate. International applicants will be considered upon evaluation of credentials by the USC Office of Admission. Students deficient in certain prerequisites may be admitted subject to completion of requirements within two years after admission. An additional year may be granted upon review of the student's program by a faculty committee. Work in any prerequisite subject will not be part of the required 60 units for the Doctor of Philosophy.

**Screening Procedure**

A screening procedure will be offered twice each year for qualified students. It must be taken prior to the completion of 24 units at the 500-level or higher. The purpose of the screening procedure is to assess the progress of the PhD student and to determine whether that progress is sufficient to continue in the PhD program. Passing the procedure is a prerequisite for continuation in the PhD program.

**Course Requirements**

A minimum of 60 units is required for the Doctor of Philosophy degree.
Courses Available for MS/PhD Students

**Required Course Work**
- BKN 550 Neurobehavioral Basis of Movement Units: 4
- BKN 551 Musculoskeletal and Biomechanical Basis of Movement Units: 4
- BKN 552 Physiological Basis of Voluntary Movement Units: 4
- BKN 790 Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- BKN 794a Doctoral Dissertation Units: 2
- BKN 794b Doctoral Dissertation Units: 2
- BKN 794c Doctoral Dissertation Units: 2
- BKN 794d Doctoral Dissertation Units: 2
- INTD 500 Ethics and Accountability in Biomedical Research Units: 1
- PM 510L Principles of Biostatistics Units: 4
- PM 511L Data Analysis Units: 4

**Note:**
- "Or equivalent graduate ethics course.
- "Or equivalent graduate level statistics.

PhD students must complete three core courses (BKN 550, BKN 551, BKN 552) before participating in the screening procedure. Substituting a course for one of the core courses may be allowed after receiving approval from the Biokinesiology Program Committee prior to the beginning of the course. Other course requirements (to complete 60 units) will vary according to the specific needs of each student. Course work other than departmental offerings is encouraged and may be required by the student's qualifying exam committee.

**Courses Available for MS/PhD Students**
- BKN 559 Readings in Biokinesiology Units: 1, 2, 3, 4, max 8
- BKN 563 Biomechanics Units: 2, 2 years
- BKN 566 Neurobiology of Locomotion Units: 2
- BKN 567 Advanced Topics in Biomechanics Units: 2
- BKN 573a Advanced Dissection Anatomy Units: 2
- BKN 573b Advanced Dissection Anatomy Units: 2
- BKN 575 Principles of Musculoskeletal Imaging Units: 2
- BKN 585 Systematic Research Writing Units: 3
- BKN 587a Physiological Correlates of Therapeutic Exercise Units: 4
- BKN 587b Physiological Correlates of Therapeutic Exercise Units: 4
- BKN 588 Physiology and Biomechanics of Resistance Exercise Units: 2
- BKN 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- BKN 593 Behavioral Basis of Motor Control and Learning Units: 3
- BKN 594a Master's Thesis Units: 2
- BKN 594b Master's Thesis Units: 2
- BKN 594c Master's Thesis Units: 0
- BKN 599 Special Topics Units: 2, 3, 4, max 8
- BKN 615 Principles of Skeletal Adaptation Units: 4, 2 years
- BKN 617 Modeling the Motor System: An Introduction Units: 2, 2 years
- BKN 618L Modeling the Motor System: Laboratory Units: 1, 2 years
- BKN 621 Electromyography in Research and Practice Units: 3, 2 years
- BKN 623 Neuroplasticity and Neural Repair Units: 3, 2 years
- BKN 672 Advanced Independent Study in Biokinesiology Units: 1, 2, 3, 4, max 8
- BKN 790 Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- BKN 794a Doctoral Dissertation Units: 2
- BKN 794b Doctoral Dissertation Units: 2
- BKN 794c Doctoral Dissertation Units: 2
- BKN 794d Doctoral Dissertation Units: 2
- BKN 794z Doctoral Dissertation Units: 0

**Additional Requirements**

**Foreign Language Requirement**
There is no foreign language requirement.

**Qualifying Exam Committee**
Upon successful completion of the screening examination the student and the research adviser will select a qualifying exam committee for continuing course work and independent study. The qualifying exam committee comprises five full-time faculty members. The qualifying exam committee will recommend course work, independent study and readings in the major and cognate areas.

**Qualifying Examination**
The PhD qualifying examination is offered during the fall or spring semesters. The qualifying examination concentrates on the student's ability to demonstrate knowledge in the major academic area chosen and its relation to other areas of study offered in the department. The qualifying examination has both written and oral components. A student failing any part of the examination may be allowed one additional opportunity to pass that portion at the discretion of the qualifying exam committee, within the regulations of the Graduate School governing the repetition of qualifying examinations.

**Dissertation Committee**
After the qualifying examination has been passed and a dissertation topic approved, the qualifying exam committee shall be known as the dissertation committee and may be reduced to three members upon unanimous recommendation to the dean of graduate studies. One of the three members must be from outside the major division. The chair of the dissertation committee will be the principal research adviser.

**Dissertation and Oral Defense**
An acceptable dissertation based on original investigation is required. The dissertation must show technical mastery of a special field, capacity for independent research and scholarly ability. The dissertation and the defense or final oral must have the unanimous approval of the dissertation committee. The dissertation should be complete within three years of the date the proposal is approved.

**Biokinesiology and Physical Therapy (PhD)**
The graduate program leading to the Doctor of Philosophy in Biokinesiology and Physical Therapy offers an opportunity for highly qualified students to prepare for careers in academic health care. The curriculum is designed for individuals who envision a career that combines training for physical therapy practice and scholarly research.

**Admission Requirements**

Applicants must have earned a bachelor's degree with a superior grade point average as well as Graduate Record Examinations scores. A personal interview with program faculty is required. Prerequisite course work must include: four courses in the biological sciences with labs (including human anatomy, human physiology and cell or molecular biology); one year of college physics with lab; one year of college chemistry with lab; one semester of college mathematics; two courses in psychology; one course in composition and writing; one course in literature or history. Courses that are highly recommended include: biochemistry, calculus, kinesiology, exercise physiology, neuroscience, genetics and a cross-cultural course in sociology.

Application for admission to the Division of Biokinesiology and Physical Therapy requires submission of two sets of materials: special division application and university application forms. Students are admitted for study in the PhD in Biokinesiology and Physical Therapy program beginning in the fall semester of each academic year. Both sets of applications must be submitted by December 1 of the previous year. At the time of admission to the program, the student must identify a faculty member who will serve as an adviser throughout every phase of study.

**Degree Requirements**

This degree is under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations.

**Years 1, 2 - Required Courses**

- PM 510L Principles of Biostatistics Units: 4
- PM 511L Data Analysis Units: 4
- PT 507 Professional Practice: Therapist Perspective Units: 2
- PT 509 Cellular and Systems Physiology Units: 3
- PT 514L Musculoskeletal Anatomy Units: 4
- PT 516 Principles of Disease Units: 2
- PT 521L Basics of Patient Management Units: 4
- PT 529 Life Span Motor Control Units: 3
- PT 534L Neuroanatomy Units: 3
- PT 536 Pathology of Cardiopulmonary Disease and General Medical Conditions Units: 3
- PT 539 Clinical Pharmacology Units: 1
- PT 546 Neuropathology Units: 3
- PT 547 Professional Practice: System Perspective Units: 2
- PT 549L Clinical Exercise Physiology Units: 4
- PT 551L Therapeutic Application of Physical Agents Units: 2
- PT 554L Analytical Anatomy Units: 3
- PT 557 Professional Practice: Patient Perspective Units: 2
- PT 566 Disorders of the Musculoskeletal System Units: 3
- PT 569 Fundamentals of Neuroscience Units: 4
- PT 571L Clinical Management of Cardiopulmonary Dysfunction Units: 4
- PT 574 Clinical Biomechanics Units: 3
- PT 581L Clinical Management of the Patient with Neurological Dysfunction Units: 5
- PT 582 Mechanics of Human Gait Units: 2
- PT 583L Clinical Electrophysiology Units: 3
- PT 600a Clinical Clerkship Units: 1
- PT 600b Clinical Clerkship Units: 3
- PT 600c Clinical Clerkship Units: 1
- PT 600d Clinical Clerkship Units: 1
- PT 600e Clinical Clerkship Units: 3
- PT 600z Clinical Clerkship Units: 0
- PT 621L Clinical Management of the Patient with Musculoskeletal Dysfunction Units: 5

**Years 3, 4, 5 - Required Courses**

- BKN 790 Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- BKN 794a Doctoral Dissertation Units: 2
- BKN 794b Doctoral Dissertation Units: 2
- BKN 794c Doctoral Dissertation Units: 2
- BKN 794d Doctoral Dissertation Units: 2
- BKN 794z Doctoral Dissertation Units: 0

**Year 6 - Required Courses**

- PT 630 Integrated Management of the Upper and Lower Extremities Units: 3
- PT 631 Integrated Patient Management of the Axial Skeletal System and Related Movement Disorders Units: 3
- PT 632 Integrated Patient Management Seminar Units: 5
- PT 660 Advanced Clerkship with Academic Integration Units: 5
- PT 665 Advanced Clinical Clerkship Units: 8

**Note:**

A minimum of 116 units is required for completion of this program.

**Estimated Calendar of Study**

**Basic and Clinical Science Foundation Courses (Years 1, 2)**

The student will enroll in all required course work and clinical experiences *excluding* BKN 790, BKN 794a, BKN 794b, BKN 794d, BKN 794z, PT 630, PT 631, PT 632, PT 660 and PT 665.

**Qualifying Exam (Year 3)**

The student will select a qualifying exam committee and begin preparing a research proposal (register for BKN 790). During this time, the student is encouraged to enroll in key elective courses, both inside and outside the division, which will enhance research proposal development. The expectation is that the student will sit for the qualifying exam and achieve doctoral candidacy at the end of year three.

**Research and Dissertation Preparation (Years 4, 5)**

The student will complete the research project and prepare a dissertation (register for BKN 790 and BKN 794a, BKN 794b, BKN 794c, BKN 794d, BKN 794z). The expectation is
that the student will successfully defend the dissertation by the end of year five.

**Completion of Internship Requirement (Year 6)**
The student will complete the required internships to achieve clinical competency (register for PT 630, PT 631, PT 632, PT 660 and PT 665).

**Doctor of Physical Therapy (DPT)**

**Post-Professional Doctor of Physical Therapy Program**

Applicants must be experienced physical therapy clinicians licensed to practice in the United States. Alternatively, foreign trained therapists must be graduates of institutions recognized by the American Physical Therapy Association. Applicants must also hold a master's degree in physical therapy or a field related to physical therapy practice. Generally, a minimum grade point average of 3.0 on a 4.0 scale as well as a minimum score of 500 on each of the three components of the Graduate Record Examinations are required. The degree requirement includes successful completion of 30–31 units as described in the following three sections:

**Required Courses**

<table>

**Capstone Project (PT 592)**

This required project provides the student with the opportunity to synthesize the learning experiences of the DPT program. It can take the form of a case study, a learning module for students or patients, a business plan for a unique form of health care delivery or some other innovative concept. Work toward the completion of the project is done under the guidance of a single faculty member or a committee, depending on the magnitude and scope of the project. The primary faculty adviser will determine the unit value of the project. A clinical residency is also available as part of the post-professional DPT program.

**Professional Entry-Level Doctor of Physical Therapy Program (DPT)**

This program comprises six semesters and two summer sessions for completion of the required 115 units. Clinical experience (clerkship) is part of the curriculum during all three years. The Division of Biokinesiology and Physical Therapy awards the DPT to enrolled students who have satisfactorily completed the three-year curriculum. For successful completion, students must pass all course work with a minimum cumulative GPA of 2.75, meet all professional standards and pass all clinical clerkships.

**Admission Requirements (Entry-Level)**

Applicants are required to complete the equivalent of a U.S. baccalaureate degree at an accredited college or university prior to matriculation. Prerequisite course work must include:

- a minimum of four semesters/six quarters of course work in the mammalian biological sciences (and must include one course in human anatomy with laboratory and one course in human physiology with laboratory), two semesters/three
quarters of chemistry course work with laboratory (which may include general chemistry, organic chemistry or biochemistry), two semesters/three quarters of physics course work with laboratory, a minimum of two courses in psychology (which may include general psychology or abnormal psychology), and one college-level statistics course (generally from the biology, mathematics and psychology departments). A minimum of 150 hours of clinical experience in a variety of physical therapy settings is required. This can be in a volunteer or paid capacity. Applicants should be computer literate.

Students from foreign countries must have completed one year of study in the United States prior to application. Credits from foreign institutions must be approved by the USC Office of Admission.

Graduate Record Examinations (GRE)
The GRE is required of all applicants. In general, minimum scores of 150 are required on each of the general test measures of verbal and quantitative ability.

Applications
Applications are available beginning in July on the Physical Therapist Centralized Application Service (PTCAS) Website for the class entering in August of the following year. The deadline for receipt of applications is on or about December 1 of each year. Only one class is admitted each year. The Admissions Committee reviews all information submitted. Applicants may be requested to appear for a personal interview. It is highly recommended that all applicants make an appointment to visit the division's office located on the Health Sciences Campus and talk with students and members of the faculty.

Notice of Acceptance
Notice of acceptance will be sent to successful candidates no earlier than December of the year prior to the August program start date (with the exception of Early Decision applicants who are typically informed of a decision by late September) and continually thereafter until the class is filled. In no case will an acceptance be offered earlier than one year before anticipated enrollment.

Candidates should reply to an offer of acceptance within three weeks enclosing a $1,000 deposit (nonrefundable), which is credited to tuition at the time of registration. A second nonrefundable $500 deposit is required by mid-May of the program start year (also to be applied in its entirety as a tuition credit). A letter of withdrawal is required if applicants wish to relinquish their place in the class; release is granted automatically upon receipt of the letter.

Degree Requirements (Entry-Level)
The DPT is awarded to enrolled students who have satisfactorily completed the three-year curriculum of 115 credits (depending on electives chosen). The minimum number of credits required for graduation is 115. The minimum GPA required for graduation is 2.75. Clinical experience (clerkship) is part of the curriculum during all three years.

The Division of Biokinesiology and Physical Therapy uses a system of student evaluation and grading that is designed to encourage self-reliance, to stimulate the student's independent quest for knowledge and to promote excellence in clinical and academic achievement.

Faculty of the program are responsible for establishing evaluation criteria appropriate to the objectives of each course and for specifying the manner in which evaluative information is to be gathered. For clinical evaluation, descriptive comments based on the student's performance are submitted by faculty and clinical instructors to the student's permanent file.

Faculty
Mrs. T.H. Chan Professorship in Occupational Science and Occupational Therapy, Associate Dean and Chair: Florence A. Clark, PhD, OTR/L, FAOTA
Associate Chairs: Linda Fazio, PhD, OTR/L, FAOTA; Julie McLaughlin Gray, PhD, OTR/L, FAOTA; Katie Jordan, OTR/L
Professors: Sharon Cermak, EdD, OTR/L, FAOTA; Florence A. Clark, PhD, OTR/L, FAOTA; Gelya Frank, PhD; Mary Lawlor, ScD, OTR/L, FAOTA; Cheryl Mattingly, PhD; William Morgan, PhD
Associate Professor: Lisa Aziz-Zadeh, PhD
Assistant Professors: Natalie Leland, PhD, OTR/L, BCG (Gerontology), FAOTA; Sook-Lei Liew, PhD, OTR/L; Elizabeth Pytak, PhD, OTR/L; Shawna C. Roll, PhD, OTR/L; RMSKS (Sonography), FAOTA; Olga Solomon, PhD; Barbara Thompson, PhD
Professor of Clinical Occupational Therapy: Linda Fazio, PhD, OTR/L, FAOTA
Associate Professors of Clinical Occupational Therapy: Erna Blanche, PhD, OTR/L; Katie Jordan, OTR/L, Julie McLaughlin Gray, PhD, OTR/L, FAOTA
Assistant Professors of Clinical Occupational Therapy: Michael Ang, OTR/L; Amber Bennett, OTR/L; Sarah Bream, OTR/L, Elizabeth Carley, OTR/L, Adley Chan, OTR/L, Karen Crum, OTR/L, Carlin Daley, MAEd, OTR/L; Celso Delgado Jr., OTR/L; Camille Dieterle, OTR/L, Don Gordon, PhD, OTR/L; Ashley Halle, OTR/L; Marisa Hernandez, OTR/L, Jess Holguin, OTR/L, Michelle Hsai, OTR/L, Tracy Jalaba, OTR/L, Karrie Kingsley, OTR/L, John Margetis, OTR/L, Jenny Martinez, OTR/L, Michael McNulty, OTR/L, Jaynee Meyer, OTR/L, Helen Mirsaeidi, OTR/L, Stacey Morikawa, OTR/L, Phuong Nguyen, OTR/L, Kristin Nxumalo, OTR/L, Emily Ochi, OTR/L, Jazminne Orozco, OTR/L, Daniel Park, OTR/L, Joanne Park, OTR/L, Tara Perry, OTR/L, Elyse Peterson, OTR/L, Deborah Pitts, PhD, MBA, OTR/L, BCMH (Mental Health), Samia Rafeddie, OTR/L, BCPR (Physical Rehabilitation), CBIS (Brain Injury); Lindsey Reeves, OTR/L, OTR/L; Chantelle Rice, OTR/L, OTR/L; Kimberly Rice, OTR/L, Clarissa Saunders-Newton, PhD, OTR/L, Shelby Surfus, OTR/L, OTR/L; Bari Turetzky, OTR/L, Ashley Uyeshiro, OTR/L, Jamie Wilcox, OTR/L, Myka Winder, OTR/L, OTR/L
Instructors of Clinical Occupational Therapy: Majhabeen Afah, OTR/L; Aimee Aquilino, OTR/L; Catherine Crowley, OTR/L, OTR/L, Kim Eggleston, OTR/L, OTR/L, Stephanie Mielke, OTR/L, Scott Orr, OTR/L, Karen Park, OTR/L, OTR/L; Whitney Pike, BS, OTR/L, Janice Rocker, OTR/L, OTR/L; Carey Sokol, MA, OTR/L, Joan Vartanian, BS, OTR/L
Research Professor: Michael Carlson, PhD
Research Adjunct Professor: Barbara Gage, PhD
Research Associate Professor: Sarah Jeanne Salvy, PhD
Research Assistant Professors: Stefanie Bodison, OTR/L, OTR/L, Jesus Diaz, OTR/L, OTR/L, Leah Duker, Ph.D., OTR/L, Stacey Schepens Niemiec, PhD, OTR/L, Cheryl Vigen, PhD
Research Adjunct Assistant Professor: Nora Kashani, JD, OTR/L
Adjunct Associate Professor of Clinical Occupational Therapy: Linda Liang, MOT, OTR/L
Adjunct Assistant Professor of Clinical Occupational Therapy: Shawn Phipps, PhD, OTR/L
Adjunct Instructors of Clinical Occupational Therapy: Susan Bowles, OTR/L, Cynthia Burt, MA, OTR/L, Remy Chu, MHA, OTR/L, Lisa Deshaies, MA, OTR/L, Heidi Dombish, MS, OTR/L, Janet Gunter, OTR/L, OTR/L, Dawn Hironaka, BS, OTR/L, Tessa Milman, OTR/L, OTR/L, Pamela Roberts, PhD, OTR/L, FAOTA; Joan Surfus, MA, OTR/L, Distinguished Emeritus Professor: Elizabeth J. Yerxa, EdD, LHD (Hon.), ScD (Hon.), DMed (Hon.), FAOTA
Emeritus Professor: Ruth Zemke, PhD, FAOTA

Degrees Offered
The USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy offers a Bachelor of Science in Occupational Therapy, a minor in Occupational Science, and a Master of Arts in Occupational Therapy. The Master of Arts in Occupational Therapy is offered for students continuing their education following their undergraduate degree in occupational therapy, for students whose first degree is in another field and also for certified occupational therapists seeking a post-professional degree. The division also offers the Doctor of Occupational Therapy (OTD) and
the PhD in Occupational Science. The USC Chan Division of Occupational Science and Occupational Therapy master's-level professional degree program is fully accredited by the Accreditation Council for Occupational Therapy Education®, c/o Accreditation Department, American Occupational Therapy Association, Inc., 4720 Montgomery Lane, Suite 200, Bethesda, Maryland 20814-3449, (301) 652-6611 x2914, acoteonline.org.

Entry into occupational therapy practice is at the graduate degree level only. In order to practice, students in the bachelor's program must earn an MA degree in Occupational Therapy, successfully complete a minimum of 24 full-time weeks of clinical fieldwork, sit for the National Board for Certification in Occupational Therapy® (NBCOT) exam and apply for a license (in most states including California).

**Pi Theta Epsilon**

Pi Theta Epsilon is the national honor society for occupational therapy students and alumni. This society recognizes and encourages superior scholarship among students enrolled in entry-level graduate programs of occupational therapy across the United States. The Alpha Eta Chapter of Pi Theta Epsilon (PTE) at the University of Southern California selects candidates early in the spring semester of each year based on National PTE guidelines related to academic standing and students’ potential for leadership in the profession.

**Bachelor's Degree**

**Occupational Therapy (BS)**

The undergraduate curriculum leads to the Bachelor of Science with a major in Occupational Therapy. As of fall 2015, only incoming freshmen may apply to the five-year bachelor's to master's program in occupational therapy. Students may not change their major to occupational therapy once admitted to USC. Students majoring in occupational therapy begin professional study during their junior year. Students can earn a USC master's degree in occupational therapy with just one additional year instead of the traditional two years, substantially reducing their overall cost of education and preparing them sooner for the National Board for Certification in Occupational Therapy® (NBCOT) examination. Successful completion of the Master of Arts degree and successful completion of a minimum of 24 full-time weeks of clinical fieldwork are required for eligibility to sit for the NBCOT examination. Certification from the board and licensure (most states) are required to practice as an occupational therapist. (See here for a description of the MA degree program.)

**Admission Criteria and Application Procedures for Incoming Freshmen**

See the Undergraduate Admission section of this catalogue for admission criteria and application procedures for the university.

**Program Requirements**

A total of 128 units is required for the Bachelor of Science degree. An occupational therapy major cannot count any 300-level OT course toward the BS degree.

**General Education Requirements**

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge needed to become a well-educated person. This program requires six courses in different categories, plus writing, diversity and foreign language requirements, which together comprise the USC Core. See The USC Core and the General Education Program for more information.

**Required Pre-Professional Courses**

Students in the bachelor's to master's program are required to meet with their academic adviser within the division once each semester to ensure satisfactory completion of requirements outlined below. Students must successfully complete the pre-professional required courses prior to taking the advanced professional courses.

All pre-professional courses must be completed:

- Within the last five years
  - With a minimum GPA of 3.0 (pass/fail or grades below a C are not accepted)
  - From an accredited junior college, four-year college or university
  - Either in a classroom setting or online; however, anatomy must be completed in a classroom setting (refer to Course Work Taken Elsewhere)
  - For a total of three semester units each (with the exception of medical terminology, which may be 1 or 2 units)

Required Pre-Professional Courses (USC course numbers are noted)

- Students who wish to transfer credit for courses taken at another institution must gain university approval:

**Pre-Professional Courses**

- **OT 200 Medical Terminology for Health Professions** Units: 1

- **SOCI 200g* Introduction to Sociology** Units: 4 or **ANTH 201g Principles of Human Organization** Units: 4

- **OT 251x Across the Lifespan: Occupations, Health and Disability** Units: 4

- **OT 260 Human Functional Anatomy for the Occupational Therapist** Units: 3 (with laboratory) or **HBIO 301L Human Anatomy** Units: 4 (with laboratory)

- **OT 261 Human Physiology for Occupational Therapists** Units: 3 or **BISC 307L General Physiology** Units: 4

- **MATH 114x Foundations of Statistics** Units: 4 or **PSYC 274Lg Statistics** Units: 4 or **HP 340L Health Behavior Statistical Methods** Units: 4 or **HP 350L Health Behavior Research Methods** Units: 4 or **BUAD 310g Applied Business Statistics** Units: 4

- **PSYC 360 Abnormal Psychology** Units: 4

A course in Gerontology or adult development (recommended but not required)

**Notes:**
Four-week intensive courses are offered by the division in human anatomy (OT 260) and human physiology (OT 261) from mid-May to mid-June (just prior to the start of summer professional courses) for students unable to complete those courses earlier. These courses are also offered fall and spring semesters.

Students may take OT 405, OT 406, OT 440 and OT 441 in the junior year, after having completed Human Anatomy and Lifespan Development. Human Physiology must be completed by fall of the junior year. The remaining preprofessional courses must be completed by the start of the senior year.

**Required Professional Courses**

Enrollment in professional occupational therapy courses is limited to junior and senior occupational therapy majors only.

**Required Professional Courses**

- OT 405 Foundations: Occupation Units: 2
- OT 406L Foundations: Creativity, Craft and Activity Analysis Units: 2
- OT 440L Foundations: Kinesiology Units: 2
- OT 441L Foundations: Neuroscience Units: 2
- OT 511 Therapeutic Use of Self Units: 2
- OT 515 Neuroscience of Behavior Units: 4
- OT 518 Quantitative Research for Evidence-Based Practice Units: 4
- OT 521 Clinical Reasoning Units: 3
- OT 523 Communication Skills for Effective Practice Units: 3
- OT 525 Qualitative Research for Evidence-Based Practice Units: 4

**Two of the following:**

- OT 501L Practice Immersion: Adult Physical Rehabilitation Units: 8
- OT 502L Practice Immersion: Mental Health Units: 8
- OT 503L Practice Immersion: Pediatrics Units: 8

**Additional Requirements**

**Scholastic Standards**

Undergraduate occupational therapy students must maintain a GPA of at least 3.0 (A = 4.0) in all required OT courses and successfully complete the Graduate Record Examinations in order to continue into the master's (MA) program. If an undergraduate student's OT grade point average (GPA) falls below 3.0, or if the cumulative undergraduate GPA falls below 3.0 at the end of the fall semester of the senior year, continuance is not assured.

**Advising**

Students enrolled in the occupational therapy major are required to meet with an academic adviser within the Division each semester.

**Minor**

**Occupational Science Minor**

The division offers a minor in the discipline of occupational science. It is one of a select few programs in the world that offers undergraduates the opportunity to explore the fields of occupational science and occupational therapy.

Unlike other creatures, humans are innately driven to fill their time with interesting, meaningful activities, which scholars call "occupations." That is, humans need to be occupied. These occupations have a profound impact on physical and mental health, one's sense of well-being and the experience of quality of life. Occupational Science seeks to understand the precise nature and function of occupations and the critical effect of daily activity on human beings.

Scientists working in the field examine questions such as: what is the relationship between childhood occupations and adult competency and achievement; what constitutes a healthy balance of work, rest and leisure; and what factors contribute to a good fit between a particular individual and his or her occupations.

The minor in occupational science requires a total of 20 units: a gateway course (OT 250) for 4 units plus 16 units selected from 11 upper-division courses. It is open to all majors at USC. An occupational therapy major cannot count any 300-level OT course toward the BS degree.

**Required Gateway Course**

OT 250 Introduction to Occupational Science and Occupational Therapy Units: 4

**16 Elective Units**

- OT 251x Across the Lifespan: Occupations, Health and Disability Units: 4
- OT 300 Occupational Expressions of Diverse Identities and Lifestyles Units: 4
- OT 310 Creativity Workshop Units: 2
- OT 312 Creating a Sustainable Lifestyle Units: 2
- OT 320 The Nature of Human Occupation: Form, Function, and Meaning Units: 4
- OT 325 The Brain: Mind, Body, and Self Units: 4
- OT 330 Perspectives on the Daily Life of Families Units: 4
- OT 333 Sports Ethics Units: 4
- OT 340 Occupational Foundations of Human-Animal Interaction Units: 4
- OT 350 Disability, Occupations, and the Health Care System Units: 4
- OT 355x Occupational Reconstructions and Social Transformations Units: 2
- OT 360 Creating the Self through Narrative: Acts of Life Story Production Units: 4
- OT 375 The Narrative Structure of Social Action: Narrative, Healing and Occupation Units: 4

**Master's Degree**

**Occupational Therapy (MA)**

The Master of Arts program is open to students with or without an undergraduate degree in occupational therapy. Students without a prior degree in occupational therapy take both the foundation courses and the advanced courses listed below. Students with a degree in occupational therapy may apply for Advanced Standing, reducing the units required for the degree from 80 units to 32 units (or 76 units to 28 units for the thesis option). Students who have earned a BS, Occupational Therapy, from USC may apply for Advanced Standing, and follow the prescribed courses under Advanced Core Courses for the Bachelor to Master Program, reducing total units required for the degree from 80 units to 36 units (or 76 units to 32 units for the thesis option). All students...
must complete either the Thesis or Comprehensive Exam Option.

**Admission Requirements**

Applicants must have a bachelor's degree from an accredited college or university; a minimum grade point average of 3.0 (A = 4.0); a minimum score of 153 on the verbal section, 144 on the quantitative section and 3.5 on the analytical writing section of the Graduate Record Examinations taken within five years of application; three letters of recommendation and an autobiographical statement of purpose. A satisfactory score on the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) within two years of enrollment is a requirement for most international students.

Those with a baccalaureate degree in occupational therapy from an accredited college or university or a World Federation of Occupational Therapy (WFOT) approved program may apply for Advanced Standing. Those with a baccalaureate degree in a field other than occupational therapy also must have completed all of the following prerequisites:

Within five years of enrollment
Prior to the start of the program with a minimum GPA of 3.0 (pass/fail or grades below a C are not accepted)
From an accredited junior college, college or university
Either in a classroom setting or online; however anatomy must be completed in a classroom setting
With each course totaling the equivalent of at least three semester units (with exception of medical terminology which may be 1 or 2 units) as follows (course numbers refer to USC courses, but prerequisites can be taken at any accredited college or university):

### Prerequisites

- **OT 200 Medical Terminology for Health Professions** Units: 1
- **SOCI 200m Introduction to Sociology** Units: 4 or **ANTH 201 Principles of Human Organization** Units: 4
- **HBIO 301L Human Anatomy** Units: 4 * (with laboratory)
- **OT 261 Human Physiology for Occupational Therapists** Units: 3 * or **BISC 307L General Physiology** Units: 4
- **OT 251x Across the Lifespan: Occupations, Health and Disability** Units: 4
- **OT 260 Human Functional Anatomy for the Occupational Therapist** Units: 3 (with laboratory)
- **MATH 114x Foundations of Statistics** Units: 4 and **PSYC 274Lg Statistics** Units: 4 or **HP 340L Health Behavior Statistical Methods** Units: 4 and **HP 350L Health Behavior Research Methods** Units: 4 or **BUAD 310g Applied Business Statistics** Units: 4
- **PSYC 360 Abnormal Psychology** Units: 4

A course in Gerontology or adult development (recommended but not required)

### Notes:

*If anatomy and physiology are combined, students must take two sequential semesters with a laboratory each semester (6-8 units).*

Four-week intensive courses are offered by the division in human anatomy (OT 260) and human physiology (OT 261) from mid-May to mid-June (just prior to the start of summer professional courses) for students unable to complete those courses earlier. These courses are also offered fall and spring semesters.

**Application Procedures**

For those with a baccalaureate degree in occupational therapy: applications are accepted at any time, preferably by February 15 for fall admission.

For those with a baccalaureate degree in a field other than occupational therapy: applications for early decision are due by November 30; all other applications are due February 15 for summer admission.

Applications received after the February 15 deadline are considered on a space-available basis.

Application materials include: 1) USC Online Graduate Application with Division Supplemental Application (only required for those with a baccalaureate degree in occupational therapy); 2) OTCAS online application (only required for applicants with a baccalaureate degree in a field other than occupational therapy); 3) three letters of recommendation; 4) transcripts from all colleges/universities attended; 5) results of the aptitude test of the Graduate Record Examinations; and 6) TOEFL or IELTS scores if required. A personal interview may be requested. Please see the division Website for the most up-to-date application procedures.

**International Students**

Students educated outside the United States must have their credentials evaluated by the Office of Admission before their application to the division can be reviewed. See the Admission section of this catalogue. International students must demonstrate competency in English, as measured by the TOEFL or the IELTS.

**Degree Requirements**

The MA degree is under the jurisdiction of the USC Graduate School. Students should also refer to the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the Graduate School.

Requirements include: GPA of 3.0 in all course work attempted and all course work applied to the degree; at least two-thirds of units applied to the degree must be at the 500 level or higher.

Students without a prior degree in occupational therapy take both the foundation courses and the advanced courses listed below. OT 405, OT 406L, OT 440L and OT 441L are foundational courses that students are required to pass before they may advance to the advanced courses in the professional program. Students must complete all subsequent courses in the professional program on a full-time basis and in

---

703
sequence, except for students requiring disability accommodations.

Students with a degree in occupational therapy outside of USC may apply for Advanced Standing, reducing the units required for the degree from 80 units to 32 units (or from 76 units to 28 units for the thesis option). Students who have earned a BS, Occupational Therapy, from USC may apply for Advanced Standing, and follow the prescribed courses under Advanced Core Courses for the Bachelor to Master Program, reducing total units required for the degree from 80 units to 36 units (or 76 units to 32 units for the thesis option). All students must complete either the thesis or comprehensive exam option.

**Thesis Option**
In addition to the required courses, 4 units of electives at 500 level or above, and 4 units of OT 594a and OT 594b are required. Acceptance of the thesis by the master's committee and the university completes the degree.

**Comprehensive Examination Option**
In addition to the required courses, 4 units of electives and 8 units of occupational therapy electives are required. All electives must be 500 level or above. Successful performance on a written comprehensive examination administered on campus each fall and spring semester completes the degree.

**Required Courses**

**Foundation Core Courses**

- OT 405 Foundations: Occupation Units: 2
- OT 406L Foundations: Creativity, Craft and Activity Analysis Units: 2
- OT 440L Foundations: Kinesiology Units: 2
- OT 441L Foundations: Neuroscience Units: 2
- OT 501L Practice Immersion: Adult Physical Rehabilitation Units: 8
- OT 502L Practice Immersion: Mental Health Units: 8
- OT 503L Practice Immersion: Pediatrics Units: 8
- OT 511 Therapeutic Use of Self Units: 2

**Advanced Core Courses**

- OT 515 Neuroscience of Behavior Units: 4
- OT 518 Quantitative Research for Evidence-Based Practice Units: 4 or OT 581 Quantitative Research for the Practicing Clinician Units: 4
- OT 525 Qualitative Research for Evidence-Based Practice Units: 4
- OT 534 Health Promotion and Wellness Units: 2
- OT 538 Current Issues in Practice: Adulthood and Aging Units: 2
- OT 540 Leadership Capstone Units: 2
- OT 545 Advanced Seminar in Occupational Science Units: 2

**Comprehensive Examination Option (12 units)**
In addition to the required courses, 12 units of elective are required, 4 units of electives may be taken from outside the Chan Division. All electives must be 500 level or above. Successful performance on a written comprehensive examination, administered on campus each fall and spring semester, completes the degree.

**Thesis Option (8 units)**
In addition to the required courses, 4 units of electives at 500 level or above, and 4 units of OT 594a and OT 594b Master's Thesis are required. Acceptance of the thesis by the master's committee and the university completes the degree.

**Advanced Core Courses (Required for Advanced Standing Students with a BS, Occupational Therapy, outside of USC)**

- OT 515 Neuroscience of Behavior Units: 4
- OT 518 Quantitative Research for Evidence-Based Practice Units: 4 or OT 581 Quantitative Research for the Practicing Clinician Units: 4
- OT 525 Qualitative Research for Evidence-Based Practice Units: 4
- OT 534 Health Promotion and Wellness Units: 2
- OT 538 Current Issues in Practice: Adulthood and Aging Units: 2
- OT 540 Leadership Capstone Units: 2
- OT 545 Advanced Seminar in Occupational Science Units: 2

**Comprehensive Examination Option (12 units)**
In addition to the required courses, 12 units of elective are required, 4 units of electives may be taken from outside the Chan Division. All electives must be 500 level or above. Successful performance on a written comprehensive examination, administered on campus each fall and spring semester, completes the degree.

**Thesis Option (8 units)**
In addition to the required courses, 4 units of electives at 500 level or above, and 4 units of OT 594a and OT 594b Master's Thesis are required. Acceptance of the thesis by the master's committee and the university completes the degree.

**Advanced Core Courses for the USC Bachelor to Master Program**

**Bachelor to Master Program**

- OT 501L Practice Immersion: Adult Physical Rehabilitation Units: 8 or OT 502L Practice Immersion: Mental Health Units: 8 or OT 503L Practice Immersion: Pediatrics Units: 8

- OT 534 Health Promotion and Wellness Units: 2

---

*Students are expected to take two 2-unit sections of this course.*
**Online MA in Occupational Science and Occupational Therapy**

The Online Master of Arts program is open to occupational therapists with a bachelor's degree in occupational therapy from outside USC. All students must complete either the Thesis or Comprehensive Exam Option. This online program requires a total of 32 units for the Comprehensive Exam Option, or a total of 28 units plus OT 594a and OT 594b for the Thesis Option.

**Online MA in Occupational Therapy**

The Online Master of Arts program is open to occupational therapists with a bachelor's degree in occupational therapy from outside USC. All students must complete either the Thesis or Comprehensive Exam Option. This online program requires a total of 32 units for the Comprehensive Exam Option, or a total of 28 units plus OT 594a and OT 594b for the Thesis Option.

**Admission Requirements**

Applicants must have a bachelor's degree in occupational therapy from an accredited college or university outside USC; a minimum grade point average of 3.0 (A = 4.0); a minimum score of 153 on the verbal section, 144 on the quantitative section and a 3.5 on the analytical writing section of the Graduate Record Examinations taken within five years of application; three letters of recommendation and an autobiographical statement of purpose. A satisfactory score on the TOEFL or IELTS within two years of enrollment is a requirement for most international students.

**Required Core Courses**

- OT 515 Neuroscience of Behavior Units: 4
- OT 518 Quantitative Research for Evidence-Based Practice Units: 4
- OT 525 Qualitative Research for Evidence-Based Practice Units: 4
- OT 538 Current Issues in Practice: Adulthood and Aging Units: 2
- OT 540 Leadership Capstone Units: 2
- OT 545 Advanced Seminar in Occupational Science Units: 2
- OT 586 Clinical Internship with Seminar Units: 1, 2 (2 units required)*

*Students are expected to take one 2-unit section of this course.

**Comprehensive Examination Option (12 units)**

In addition to the required courses, 12 units of elective are required, 4 units of electives may be taken from outside the Chan Division. All electives must be 500 level or above. Successful performance on a written comprehensive examination, administered on campus each fall and spring semester, completes the degree.

**Thesis Option (8 units)**

In addition to the required courses, 4 units of electives at 500 level or above, and 4 units of OT 594a and OT 594b Master's Thesis are required. Acceptance of the thesis by the master's committee and the university completes the degree.

**Required Elective Courses**

- OT 578 Therapeutic Communication: Facilitating Change in Clients Units: 4
- OT 582 Occupational Science Foundations of Lifestyle Redesign Units: 4
- OT 583 Current Applications of Lifestyle Redesign Units: 4

**Comprehensive Exam Option (12 units)**

In addition to the required core courses, all required elective courses (12 units) must be successfully completed prior to taking the comprehensive exam. Successful performance on a written comprehensive examination administered each fall and spring semester completes the degree.

**Thesis Option (8 units)**

In addition to the required core courses, students are required to take 4 units of OT 594a and OT 594b Master's Thesis for a total of 28 units.

**University Certificate**

**Lifestyle Redesign® Graduate Certificate (online)**

The Graduate Certificate in Lifestyle Redesign® is designed for occupational therapists who wish to obtain an advanced certificate in the area of Lifestyle Redesign®. Certificate courses prepare the occupational therapist to be able to design and implement Lifestyle Redesign® interventions with diverse client populations.

**Admission Requirements**

Applicants must be working professional occupational therapists with a baccalaureate or higher degree from an accredited college or university; a minimum grade point average of 3.0 (A = 4.0); a minimum score of 153 on the verbal section, 144 on the quantitative section and a 3.5 on the analytical writing section of the Graduate Record Examinations taken within five years of application; three letters of recommendation and an autobiographical statement of purpose. A satisfactory score on the TOEFL or IELTS within two years of enrollment is a requirement for most international students.

**Required Courses**

- OT 578 Therapeutic Communication: Facilitating Change in Clients Units: 4
- OT 582 Occupational Science Foundations of Lifestyle Redesign Units: 4
- OT 583 Current Applications of Lifestyle Redesign Units: 4

*Students are expected to take one 2-unit section of this course.*
**Doctoral Degree**

**Occupational Science (PhD)**

The PhD in Occupational Science educates individuals to engage in the scientific study of human occupation, the purposeful activities that constitute our life experiences. This evolving science is chiefly concerned with the unique capacity of humans to develop adaptive skills, such as tool use and related occupational behaviors, and to choose and orchestrate daily occupations. It also seeks to understand the function, structure and interrelationship of these occupations and their impact on individuals and institutions.

The focus on occupation distinguishes this program from closely related disciplines such as psychology, sociology and anthropology. The program emphasizes the development of research skills and encourages students to organize and synthesize knowledge to contribute to occupational science theory and interdisciplinary understandings of occupation, health and social participation.

**Admission Requirements**

Applicants for admission to the PhD program are expected to have a baccalaureate degree in an appropriate field, such as one of the biological or social sciences or occupational therapy, with a minimum GPA of 3.0 (A = 4.0) and a minimum score of 156 on the Verbal section, a minimum score of 146 on the Quantitative section and a minimum score of 3.5 on the Analytical Writing section of the Graduate Record Examinations (GRE) within five years of application. At least three academic letters of reference must also be submitted. Other considerations include evidence of academic potential based on master's level study (if relevant), research skills and interest, and a statement of purpose.

International students must demonstrate competency in English, as measured by the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination.

**Degree Requirements**

This degree is awarded under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue for general regulations. All courses applied toward the degree must be courses accepted by the USC Graduate School.

**Course Requirements**

Satisfactory completion of 60 units beyond the baccalaureate degree is required, including the following courses:

**Required Courses**

Satisfactory completion of 60 units beyond the baccalaureate degree is required. Students with an earned masters and/or doctoral degree at the time of admission may apply for Advanced Standing, reducing the units required for the degree from 60 units to 40 units. All students must complete the required core courses and successfully complete an independent dissertation. Program requirements include the following courses:

- OT 640 Conceptual Foundations of Occupational Science Units: 4
- OT 641 The Nature of Occupation Units: 4
- OT 648 Researching Occupation: Engagement, Meaning, and Society Units: 4
- OT 649 Researching Occupation: Function, Participation, and Health Units: 4
- OT 660 Research Practicum Units: 2 (2 units — Four Semesters)
- OT 661 Grant Writing for Occupational Science Units: 2

**Required Core Electives**

Completion of a minimum of 26 units in a topic area such as one of the following is required: quantitative research approaches, qualitative research approaches, occupational science and/or therapy, neuroscience, social development, life span development or gerontology.

**Additional Requirements**

Those students who also wish to participate in clinical practice in occupational therapy may opt to complete a master's degree in occupational therapy. Such students are required to complete the requirements for that degree, as well as the occupational therapy undergraduate major courses if they are not registered occupational therapists or eligible for registration prior to study.

**Cognate Courses**

Completion of a minimum of 26 units in a topic area approved by the student's faculty mentor is required. Examples of cognate areas include: research methodologies related to dissertation research, neuroscience, health disparities, gerontology and health promotion.

**Research Practicum**

Each student will enroll in 2 units of OT 660 Research Practicum per semester for four consecutive semesters, for a total of 8 units. Students are required to begin enrolling in OT 660 in their first semester of doctoral study. In this practicum the student will develop research skills by working as part of a research team under the direction of a faculty member.

**Screening Procedures**

Passing the screening is prerequisite to continuation in the doctoral program. Directions for obtaining and filing the Report on PhD Screening Procedures are found in the The Graduate School section of this catalogue.

**Dissertation Enrollment**

Doctoral students must submit a dissertation according to the policies and procedures described in The Graduate School section of this catalogue. Registration in OT 794a Doctoral Dissertation, OT 794b Doctoral Dissertation, OT 794c Doctoral Dissertation, OT 794d Doctoral Dissertation, OT 794z Doctoral Dissertation for a minimum of 4 units in a topic area is required.

**Summary of All Course Requirements**

Required core courses are OT 640, OT 641, OT 648, OT 649, OT 660, OT 661 for a total of 26 units.

Required cognate courses for a minimum total of 26 units. Dissertation requires 2 units per semester for at least two semesters for a minimum total of 4 units.

Additional 4 units can include 4 further units of dissertation, OT 660 or cognate courses.

**Total: 60 units**

**Foreign Language or Research Skills**
The PhD in Occupational Science does not require the demonstration of competence in a foreign language. However, each student is expected to achieve expertise, as defined by the student's qualifying exam committee, in research methods through participation in course work and the research practicum.

**Qualifying Exam Committee**
The qualifying exam committee is composed of five faculty members. Three members of the committee must be regular faculty from the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy. One member must be from outside the division. Complete regulations for establishing a qualifying exam committee are found in The Graduate School section of this catalogue.

**Qualifying Examination**
The qualifying examination is comprehensive in nature and requires the student to demonstrate a grasp of content from the core courses and the cognate area. The examination is both written and oral and is set and administered by the student's qualifying exam committee. Refer to The Graduate School section of the catalogue for additional information about the qualifying exam.

**Dissertation Committee**
The dissertation committee is composed of at least three faculty members. The chair of the committee and at least one additional member of the committee must be regular faculty from the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy. One member must be from outside the division. Complete regulations for establishing a dissertation committee are found in The Graduate School section of this catalogue.

**Dissertation**
Doctoral students must submit a dissertation based on students' original research according to the policies and procedures of The Graduate School section of this catalogue. Upon approval of the preliminary copy of the dissertation by all members of the dissertation committee, the candidate must pass an oral defense of the dissertation. Upon successful completion of the oral defense and revisions, the manuscript is approved and the committee recommends the candidate to the Graduate School for the PhD.

**Teaching**
To prepare students for anticipated roles as faculty members, a teaching component is incorporated into the program. Students work with their faculty advisor for their research immersion (OT 660) experience to identify an appropriate course or courses, arrange mentoring experience, and ensure that the timing of the teaching experience complements research lab participation and dissertation plans. If students are not assigned a full course, they are required to present a minimum of four lectures or seminars.

**Additional Information**
Further information about the baccalaureate, master's and doctoral programs can be obtained by writing or calling the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy, 1540 Alcazar Street (CHP 133), Los Angeles, CA 90089-9003; (323) 442-2850, toll free (866) 385-4250, or by sending email to info@chan.usc.edu.

Information regarding the USC Chan Division of Occupational Science and Occupational Therapy is available at chan.usc.edu.

**Required Courses (Students with Advanced Standing)**
Students with an earned masters and/or doctoral degree at the time of admission may apply for Advanced Standing, reducing the units required for the degree from 60 units to 40 units. All students must complete the required core courses and successfully complete an independent dissertation. Program requirements include the following courses:

- OT 640 Conceptual Foundations of Occupational Science Units: 4
- OT 641 The Nature of Occupation Units: 4
- OT 648 Researching Occupation: Engagement, Meaning, and Society Units: 4
- OT 649 Researching Occupation: Function, Participation, and Health Units: 4
- OT 660 Research Practicum Units: 2 (2 Units - Four Semesters)
- OT 661 Grant Writing for Occupational Science Units: 2

**Cognate Courses (Students with Advanced Standing)**
Completion of a minimum of 10 units in a topic area such as one of the following is required: quantitative research approaches, qualitative research approaches, occupational science and/or therapy, neuroscience, social development, life span development or gerontology.

**Research Practicum (Students with Advanced Standing)**
Each student will enroll in 2 units of OT 660 per semester for four consecutive semesters, for a total of 8 units. Students are required to begin enrolling in OT 660 in their first semester of doctoral study. In this practicum the student will develop research skills by working as part of a research team under the direction of a faculty member.

**Summary of all Course Requirements (Students with Advanced Standing)**
Required core courses are OT 640, OT 641, OT 648, OT 649, OT 660, OT 661 for a total of 26 units.

Required cognate courses for a minimum total of 10 units.

Dissertation requires 2 units per semester for at least two semesters for a minimum total of 4 units.

Total: 40 units for students with advanced standing

**Occupational Therapy (OTD)**
The Doctor of Occupational Therapy (OTD) is a post-professional degree program that provides graduates with advanced knowledge and skills in one of four leadership concentrations: 1) advanced clinical practice; 2) policy and administrative leadership; 3) educational leadership; and 4) research expertise. OTD students graduate from the program with a strong foundation in occupational science as well as in-depth mentored residency experience. The OTD prepares graduates to secure positions as expert clinicians in specialty or emerging practice areas, as administrative leaders within health care organizations, as non-tenure track faculty in...
institutions of higher education, and as contributors to clinical research teams.

**Admission Requirements**

Applicants for admission to the OTD program are expected to have at least a baccalaureate degree from an accredited college or university and must be certified or licensed as an occupational therapist or be eligible to sit for the National Board for Certification in Occupational Therapy® (NBCOT) examination at time of matriculation. Domestic students not certified upon matriculation must pass the NBCOT examination by the end of the first semester of the program to maintain enrollment. At the discretion of the OTD Program Director, some international students may not be required to obtain NBCOT certification. A minimum GPA of 3.0 (A = 4.0) and a minimum score of 153 on the Verbal section, a minimum score of 144 on the Quantitative section, and a minimum of 3.5 on the Analytical Writing section of the Graduate Record Examination (GRE) must be achieved within 5 years of application. Applicants must have earned a minimum cumulative 3.0 GPA in the 400- and 500-level required courses. At least three letters of reference, an autobiographical statement of purpose and a current resume are required. Applicants’ leadership potential, previous academic record, clinical experiences and professional accomplishments will also be considered.

**International Students**

Students educated outside the United States must have graduated from a program approved by the World Federation of Occupational Therapists (WFOT). USC maintains additional admissions requirements for international students (see the Admission section of this catalogue), including English language competence as measured by the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination.

**Application Procedures**

Applications are accepted on a continuous basis. For consideration for fall semester admission, applications must be received by October 15 for maximum funding consideration. Applications received after October 15 will be considered on a space-available basis. Application requirements include: 1) USC Online Graduate Application; 2) USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy online supplemental application for graduate admission; 3) three letters of reference; 4) autobiographical statement of purpose; 5) transcripts from all colleges/universities attended; and 6) GRE General Test scores.

**Degree Requirements**

Satisfactory completion of 60 units beyond the baccalaureate degree is required. Students with a Master's degree in Occupational Therapy may apply for Advanced Standing, which requires 36 units beyond the first graduate degree. These students do not take the 24 units of foundation courses listed below. If not admitted with advanced standing, a student may receive partial credit for course work taken for a previous graduate degree. The degree is awarded under the jurisdiction of the Graduate School. Refer to the Requirements for Graduation section and the Graduate School section of this catalogue, for general regulations. All courses applied toward the degree must be accepted by the USC Graduate School.

**Course Requirements (60 Units)**

**Required Occupational Therapy**

**Foundation Courses (20 Units Required)**

- OT 515 Neuroscience of Behavior Units: 4
- OT 518 Quantitative Research for Evidence-Based Practice Units: 4 or
- OT 581 Quantitative Research for the Practicing Clinician Units: 4
- OT 525 Qualitative Research for Evidence-Based Practice Units: 4
- OT 534 Health Promotion and Wellness Units: 2
- OT 538 Current Issues in Practice: Adulthood and Aging Units: 2
- OT 540 Leadership Capstone Units: 2
- OT 545 Advanced Seminar in Occupational Science Units: 2

**Electives (8 Units Required)**

- 500-level course within the Division Units: 4
- 500-level course or outside the Division Units: 4

**Required Occupational Science Advanced Courses (8 Units Required)**

- OT 620 Current Issues in Occupational Science and Occupational Therapy Units: 4
- OT 621 Occupational Therapy Leadership: Contemporary Issues Units: 4

**Residency (24 Units Required)**

- OT 686 Residency Units: 6 or 12

**Additional Requirements**

**Elective Courses (4 units required)**

Students will complete a minimum of 4 course units at the 500-level or higher selected from courses within or outside the USC Mrs. T.H. Chan Division of Occupational Science and Occupational Therapy.

**Residency Requirement (24 units required)**

Students will complete 24 units of OT 686 residency. The residency ensures that graduates of the OTD program demonstrate competence in one of the following leadership concentrations: 1) advanced clinical practice; 2) clinical research; 3) policy and administration; and 4) pedagogy. At least 20 units applied toward the OTD must be successfully completed before enrolling in OT 686 unless advanced standing has been granted. Students may complete their residency over three consecutive semesters (6 units, 6 units and 12 units) or over four consecutive semesters. It is highly recommended that one semester of OT 686 be enrolled full-time (12 units without any other simultaneous course enrollment). Full-time residency ensures the opportunity for full immersion in residency. Faculty must approve each student's residency plan prior to enrollment. OTD residency provides students the opportunity for mentorship by experts in their OTD leadership concentration (e.g., a master clinician, a world-class occupational science researcher, a leader in professional policy or administration,
or a faculty member with at least three years of academic experience).

**Portfolio Requirement**
In the final semester of enrollment, each student will submit a portfolio demonstrating competence in his or her chosen leadership concentration. The final portfolio will include documentation of both written and oral presentation skills and expertise as designated in the residency plan.

**Clinical Experience Criterion**
If the student has less than three years of clinical experience as a registered and/or licensed occupational therapist at time of admission, he or she may be required to complete at least 8 units of clinical occupational therapy courses, which may include:

- **OT 500a Clinical Problems in Occupational Therapy**
  Units: 2, 3, 4
- **OT 500b Clinical Problems in Occupational Therapy**
  Units: 2, 3, 4
- **OT 500c Clinical Problems in Occupational Therapy**
  Units: 2, 3, 4
- **OT 560 Contemporary Issues in School-Based Practice**
  Units: 4
- **OT 564 Sensory Integration**
  Units: 4

**Course Requirements – Advanced Standing (36 units)**

**Required Occupational Science Advanced Courses (8 Units Required)**

- **OT 620 Current Issues in Occupational Science and Occupational Therapy**
  Units: 4
- **OT 621 Occupational Therapy Leadership: Contemporary Issues**
  Units: 4

**Electives (4 Units Required)**
500-level course within or outside the division

**Residency (24 Units Required)**
OT 686 Residency Units: 6 or 12

---

**USC Gould School of Law**

The USC Gould School of Law provides a forward-looking, interdisciplinary and inter-professional legal education guided by nationally renowned professors and energized by an engaged and collegial student body. As one of the most diverse of the nation's top law schools, USC Gould is made up of students from throughout the country and around the world whose ideas and experiences enrich the learning process and provide new perspectives on the law. Through close collaboration, interdisciplinary academic training and hands-on application of skills, students acquire the experiences and knowledge necessary to succeed as leaders in a global environment.

USC Gould alumni are partners in the world's largest law firms, CEOs and presidents of multimillion-dollar companies, and leaders in government and public service organizations. Since its founding in 1900, the school has produced hundreds of judges on state and federal courts and elected officials ranging from mayor of cities large and small to a United States senator.

Provost Professor of Philosophy and Law: Gary Watson, PhD (Philosophy)

Professors: Jonathan M. Barnett, M.Phil., JD; David B. Cruz, MS, JD*, Sofia Macy Gruskin, JD, MIA (Preventive Medicine); Bart A. Kosko, JD, PhD (Electrical Engineering); Sharon A. Lloyd, PhD (Philosophy); John G. Matsusaka, PhD (Finance and Business Economics); Claudia Moatti, PhD, HDR (Classics); Kevin J. Murphy, PhD (Finance and Business Economics); Alison Dundes Renteln, JD, PhD (Political Science); Camille Gear Rich, JD; Wayne Sandholtz, PhD (International Relations); Hilary M. Schor, PhD (English); Simon J. Wilkie, MSIA, PhD (Economics)

Associate Professors: Sam Erman, JD, PhD; Yoon-Ho Alex Lee, JD, PhD; Jonathan Quong, PhD (Philosophy)*; Stephen Rich, MA, JD*; Emily Ryo, JD, PhD; Mark I. Weinstein, MSIA, MBA, PhD (Finance and Business Economics)

Assistant Professors: Diana I. Williams, PhD (History); Abby K. Wood, MALD, JD, PhD

Adjunct Professor: Pauline M. Aranas, JD, MLIS

Adjunct Assistant Professors: Judy K. Davis, MD, JD; Leeanne Izel, JD, LLM; Diana C. Jaque, MLIS, JD; Paul Moorman, MLIS, JD; Cynthia Gayer, MLIS, JD; Brian M. Raphael, MLS, JD*; Karen Skinner, MS, MLS, JD

Clinical Professors: Michael J. Brennan, LLB; Michael Chasalow, JD, MBA*; Niels W. Frenzen, JD; Hannary R. Garry, MA, JD; Heidi L. Rummel, JD

Clinical Associate Professor: Lisa Klerman, JD

Professors of Lawyering Skills: Elizabeth A. Carroll, JD; Rebecca S. Loneragan, JD

Associate Professor of Lawyering Skills and Director of Academic Support: Catherine Coleman, JD

Associate Professors of Lawyering Skills: Julie A. Ryan, JD; Susan C. Wright, JD

Professors of the Practice of Law: Clare Pastore, JD; Donald Scotten, JD, LLM (in progress)

Emeritus Professors: Marshall Cohen, MA, MA (Oxon.) (Philoosophy); Edward J. Finegan, PhD (Linguistics); Larry G. Simon, LLB (Herbert W. Armstrong Professor of Constitutional Law, Emeritus); W. David Slawson, MA, LLB* (Torrey H. Webb Professor of Law, Emeritus); Christopher D. Stone, JD, LLD (Hon.)* (J. Thomas McCarthy Trustee Chair in Law, Emeritus)

Clinical Emeritus Professors: Lee W. Campbell, JD; Noel M. Ragdale, JD*

Emeritus Professor of Lawyering Skills: Robert M. Saltzman, JD

*Recipient of university-wide or school teaching award.

**Degree Programs**

**Juris Doctor**

The Juris Doctor (JD) is the basic law degree. To obtain the degree, full-time attendance for six semesters is required. During the first year, the student takes a curriculum of basic courses that examines fundamental legal institutions and addresses legal problems relevant to today's society and the modern practice of law. During the second and third years the student must complete a writing requirement and at least six units in experiential courses. The remainder of the courses taken in the last two years are primarily elective.

**Dual Degrees**

USC Gould maintains dual degree programs with the graduate programs in accounting, business administration, economics, gerontology, pharmacy, philosophy, public administration, public policy, social work, politics and international relations, real estate development and communication. These programs enable qualified students to earn a law degree (JD) and the appropriate master's degree. If the master's degree normally requires one year of study, a student in a dual degree program earns both degrees in only three years. If the master's normally requires two years of post-baccalaureate courses, a total of four years is required. To earn the JD, all students (including dual degree students) must complete 35 numerically graded law units at USC beyond the first year curriculum.

The goal of these programs is to encourage law students to gain a recognized competence in another discipline that has a direct relevance to the roles lawyers play in society. The dual degree programs are based on the premise that some topics covered in the law school are also covered in the programs of the cooperating departments, so that some credit toward the law degree may appropriately be given for specified graduate work taken in the cooperating department. Similarly, the cooperating departments have recognized that some credit toward the master's degree may appropriately be awarded for certain work completed in the law school.

**LLM Degree**

The residential LLM program is a master's degree program for foreign graduate students trained in law. This two-
semester, full-time program introduces foreign lawyers to American law and the U.S. legal system and prepares them for leadership roles in the global market. After successfully completing the program, students will be awarded the Master of Laws degree.

The online LLM program is a master's degree program for foreign graduate students trained in law. This program is offered on a part-time or full-time basis in an online modality and introduces foreign lawyers to American law and the U.S. legal system and prepares them for leadership roles in the global market. After successfully completing the program, students will be awarded the Master of Laws degree.

**MCL Degree**

The MCL program is a master's degree program for foreign graduate students. This two-semester, full-time program is focused on the study of comparative law. Students are provided with the opportunity to study the differences, similarities and interrelationships of different systems of law around the world. After successfully completing the program, students will be awarded the Master of Comparative Law degree.

**MSL Degree**

The online MSL program is designed for new graduates as well as seasoned professionals from varying fields of studies and careers, who seek an understanding of how the U.S. legal system functions. The USC MSL degree gives non-lawyers an expertise in legal issues related to their specific professional fields and academic interests. After successfully completing the program, students will be awarded the Online Master of Studies in Law degree.

**Honor Society**

Order of the Coif: Order of the Coif is a national honorary scholastic society that encourages excellence in legal education.

Qualifications: Membership will be extended to a graduating law student whose cumulative grade point average ranks in the top 10 percent of all graduating students, provided that he or she has completed at least 75 percent (66 units) of law studies in graded courses.

Adviser: Scott Altman, Vice Dean, Gould School of Law, (213) 740-2544, saltman@law.usc.edu

Applications: Students are nominated by the law school.

**Continuing Legal Education**

USC Gould does not require applicants to take any specific college courses, and discourages pre-law students from enrolling in college courses that duplicate the law school curriculum. The faculty recommends college courses that are intellectually challenging and require disciplined study. Training in careful reading and skilled writing is most valuable, as are courses involving seminar discussion and sustained research. The student will find that a broad exposure to such fields as economics, philosophy, history, political science, anthropology, mathematics and psychology is more useful than narrow exposure to vocationally oriented courses.

All applicants are required to take the Law School Admission Test (LSAT) administered by the Law School Admissions Council. Applicants must take the test no later than February if they seek to start law school the following August. Like most law schools, the USC Gould School of Law requires students to apply online through the Law School Admission Council and register for the Credential Assembly Service (CAS). The CAS assembles an applicant's transcripts, LSAT scores and letters of recommendation and forwards copies of them to law schools of the applicant's choosing. Further information about the LSAT and the CAS may be obtained from the Law School Admission Council, 662 Penn St., Box 40, Newtown, PA 18940 and online at lsac.org. Detailed information regarding admission application procedures is available from the Dean of Admissions, University of Southern California Gould School of Law, University Park, Los Angeles, CA 90089-0074 and on the school's Website (gould.usc.edu).

**Accelerated BA/JD Program (3+3)**

For detailed program and registration information, visit gould.usc.edu/cle. For additional questions, call (213) 821-3580 or email cle@law.usc.edu.

**Tuition and Fees (Estimated)**

Students in the law school's JD program pay tuition of $59,576 per year (two semesters) (26–34 units). For less than 13 units the tuition is $2,303 per unit, and tuition is an additional $2,303 for each unit over 17.

Students in the law school's residential LLM and MCL programs pay tuition of $59,576 per year (two semesters). Students in the law school's online LLM program pay tuition on a per unit basis.

The university reserves the right to assess new fees or charges as it may determine. The rates listed are subject to change without notice by action of the Board of Trustees. These fees are based upon current information available at the time of publication and are subject to possible later change.

In addition to the mandatory fees charged to all USC students, law students must also join the Student Bar Association. In 2015–2016, this membership fee was $25 per semester.

**Admission Requirements — JD and Dual Degrees**

First-year students must have earned a bachelor's degree from a regionally accredited college or university and be able to provide an official transcript denoting the degree conferred by the beginning of their law school classes. USC Gould does not require applicants to take any specific college courses, and discourages pre-law students from enrolling in college courses that duplicate the law school curriculum. The faculty recommends college courses that are intellectually challenging and require disciplined study. Training in careful reading and skilled writing is most valuable, as are courses involving seminar discussion and sustained research. The student will find that a broad exposure to such fields as economics, philosophy, history, political science, anthropology, mathematics and psychology is more useful than narrow exposure to vocationally oriented courses.

Applicants must take the test no later than February if they seek to start law school the following August. Like most law schools, the USC Gould School of Law requires students to apply online through the Law School Admission Council and register for the Credential Assembly Service (CAS). The CAS assembles an applicant's transcripts, LSAT scores and letters of recommendation and forwards copies of them to law schools of the applicant's choosing. Further information about the LSAT and the CAS may be obtained from the Law School Admission Council, 662 Penn St., Box 40, Newtown, PA 18940 and online at lsac.org. Detailed information regarding admission application procedures is available from the Dean of Admissions, University of Southern California Gould School of Law, University Park, Los Angeles, CA 90089-0074 and on the school's Website (gould.usc.edu).
The program is open only to USC undergraduate students who can complete their required bachelor's major course work by the end of their junior year (or only have minimal units of upper division elective courses remaining). Admitted students complete their undergraduate and law school studies in a total of six years. After year one of law school (at the latest), students must have all necessary course work completed to earn their bachelor's degree and after year three, their law degree. However, the preference is that the bachelor's degree requirements be completed prior to beginning law school course work.

Students are not required to take the LSAT for admittance. The LSAT requirement is mandated by the American Bar Association and USC Gould plans on viewing the score in a highly holistic manner. Students must have a minimum cumulative undergraduate GPA of 3.80 both at the time an application is submitted and at enrollment. Additionally, strong faculty letters of recommendation, a personal statement, and an interview are required components of the application. The program is open to all participating majors.

**Transfer Students and Visiting Students**

A student in good standing at a law school that is approved by the American Bar Association may apply for admission with advanced standing either as a transfer student or as a visiting student. Transfer students enter USC Gould after one year at another law school; they then spend two years at the law school and earn the JD degree from USC. Visiting students spend one or two semesters at the law school during their third year of law school; they are not eligible for a USC degree. For further information, please request Transfer/Visitor Information from the Admissions Office at USC Gould.

USC Gould also admits a small number of highly qualified transfer students with LLM degrees from an American Bar Association accredited law school. These students will have taken a large number of JD courses in their LLM course of study and received strong grades in those courses. For further information, please contact the Graduate & International Programs Office at USC Gould.

**Transfer LLM Students**

USC Gould School of Law offers an LLM to JD Transfer Program to non-U.S. law school graduates who have received an LLM degree from an ABA-accredited law school. USC Gould School of Law students enrolled in our LLM Program may apply to our JD Program as Transfer LLM students during the transfer application period in the spring semester. In addition, current LLM students of other ABA-accredited law schools may submit applications during the spring semester. Only a limited number of outstanding students from USC Gould and other ABA-accredited law schools will be offered admission each year.

For further information, request LLM transfer information from the Graduate and International Programs Office at USC Gould.

**Admission Requirements — LLM Degree**

Students submitting an application must have earned a basic law degree, a Bachelor of Laws (LLB) degree or the foreign equivalent. Some experience following the completion of the first professional degree is preferred. For further information, contact the law school at (213) 821-5916 or visit the school's Website (gould.usc.edu).

**Admission Requirements — MCL Degree**

Students submitting an application must have earned a basic law degree, a Bachelor of Laws (LLB) degree or the foreign equivalent and will have previously earned their LLM degree. Some experience following the completion of the first professional degree is preferred. For further information, contact the law school at (213) 821-5916 or visit the school's Website (gould.usc.edu).

**Admission Requirements — MSL Degree**

Students submitting an application must have earned an undergraduate degree in some field of study by the time they begin the Online MSL degree. Prior exposure to or experience in law is not required. For further information, contact the law school at (213) 821-5916 or visit the school's Website (gould.usc.edu).

**Registration**

Registration is handled by the USC Gould School of Law Office of the Registrar. First-year students will automatically be registered in their fall semester courses approximately two to three weeks prior to the beginning of the school year and for their spring semester courses approximately two to three weeks prior to the dates listed in the law school calendar for upper-division student registration.

**Grading and Attendance Policies**

**Grading**

The grading system uses both numbers and letters in a range from 1.9 to 4.4 with letter-grade equivalents ranging from F to A+. The grade equivalents are: A+ (4.1–4.4); A (3.8–4.0); A- (3.5–3.7); B+ (3.3–3.4); B (3.0–3.2); B- (2.7–2.9); C+ (2.5–2.6); C (2.4); C- (2.1–2.3); D (2.0); and F (1.9).

Students receiving a grade of 1.9 will not be given credit for the course toward graduation. A student who fails a first-year course must repeat the course, but both grades will be included in computing student's general average. Other courses may not be repeated except on petition to the associate dean. A student with a weighted cumulative average of less than 3.0 at the end of the year will be placed on restricted enrollment. A student with a weighted cumulative average of less than 2.7 at the end of any year will not be permitted to continue.

**Credit/D/F**

After the first year, a student may take up to a total of 8 units on an elected CR/D/F basis, chosen from among courses otherwise graded in a normal manner. No more than 4 such units may be taken in a semester. The student must elect to take a course CR/D/F during the first two weeks of the semester. Courses or seminars may, at the instructor's option, be designated prior to registration as not available for CR/D/F grading. To earn the JD, all students (including dual degree students) must complete 35 numerically graded law units at USC beyond the first year curriculum.

Students may also take such courses regularly offered only on a CR/D/F basis, in addition to courses taken under this rule.

**Withdrawals from Courses**
A student may not withdraw from a course later than two weeks after the first day of classes of any semester without the permission of both the associate dean and the instructor.

Attendance
Class attendance is an important part of law school education. It assists both the individual and fellow students in making the most of the educational opportunity offered. Students should, therefore, attend class regularly and participate in the discussion. Professors may require attendance and may take attendance into account in evaluating student performance.

Degree Programs

Dual Degrees

Admission
Students may be accepted for a dual degree program when they are accepted to the law school, although most students do not apply until near the end of the first year. All programs require that students successfully complete the required first year of law school before beginning work toward the master's degree. Credit toward the law degree may not be given for graduate work completed prior to the completion of the first year of law school, although some credit toward the master's degree may be allowed by the faculty of the cooperating department of approved work completed prior to the first year of law school. Students are not eligible for either of their dual degrees until they complete the requirements for both degrees. All students (including dual degree students) must complete at least 35 numerically graded USC Gould units beyond the first year curriculum.

Following are general descriptions of the dual degree programs. Students interested in further information should consult the USC Gould Admissions Office.

Juris Doctor/Master of Business Administration

In addition to the LSAT, applicants to this dual degree program are required to take the Graduate Management Aptitude Test. Requirements for the dual degree program are listed in the USC Marshall School of Business section of this catalogue.

Juris Doctor/Master of Business Taxation

The Leventhal School of Accounting offers a specialized program in taxation leading to the Master in Business Taxation (MBT). Requirements for this dual degree program are listed in the USC Leventhal School of Accounting section of this catalogue.

Juris Doctor/Master of Public Administration

Students are required to complete 97 units of course work. Candidates for the dual degree must fulfill the statistics requirement of the MPA degree. See the Master of Public Administration section. Requirements for this dual degree program are listed in the USC Price School of Public Policy section of this catalogue.

Juris Doctor/Master of Public Policy

The USC Price School of Public Policy and the law school offer a dual degree that enables qualified students to earn both a Juris Doctor and a Master of Public Policy in approximately four years of study.

The dual degree allows students to acquire a blend of the analytic skills of public policy and an understanding of legal institutions and processes. This combination of knowledge is well suited for law students who want to affect the policy-making process and craft legislation to aid in achievement of public policy goals. It is equally appropriate for prospective policy analysts who are interested in law and public policy. Students must apply to, and be accepted by, both schools. They may be accepted to the dual degree at the time of their acceptance to the law school or at the beginning of their second year of law school. Dual degree students spend the first year of the program completing the required first year of law school. The remaining units of law school courses and the required 36 units of core MPP courses are taken by students in the second through fourth years.

Requirements for this dual degree are listed in the USC Price School of Public Policy section.

Other Graduate Courses

Students interested in combining an expertise in another discipline with the law degree may arrange individually to take approved graduate courses for limited credit toward the law degree.

Students may receive up to 12 units for graduate work taken outside the law school with the prior permission of the administration. These units may be concentrated in a single appropriate discipline; they may not, however, be applied to another graduate degree in progress unless it is a certificate program offered by another department.

JD Study Abroad Programs

USC Gould offers five study abroad programs for JD students that provide opportunities to learn about foreign legal systems and to experience different cultures. Qualified second- and third-year JD candidates are exposed to international law as they take part in exchange programs with leading partner institutions worldwide.

University of Hong Kong: The semester exchange program at the University of Hong Kong (HKU) allows USC Gould JD students to experience Hong Kong and its legal culture and business in the Pacific Rim. HKU was established in 1911 and is a leading university in Asia. It is linked with over 80 partner institutions in 15 countries and has exchange programs with prominent universities worldwide. The language of teaching at HKU for its law courses is English.

Bocconi University: USC Gould JD students have the opportunity to learn about law and business in Milan, Italy, in this semester exchange program with Bocconi University. An Italian course is available to interested exchange students who wish to study the language before the law program begins.

Bocconi University, a private institution in Milan, Italy, has a global reputation as a research university in business, economics and law. Bocconi offers its exchange students law courses in English. These include courses in international and European law, international trade law, and comparative business and corporate law.
University Jean Moulin Lyon 3: The semester abroad program at the University Jean Moulin Lyon 3 allows USC Gould JD students the chance to study in English at a leading law school in Lyon, France. After earning the JD degree, graduates may elect to return to Lyon for a semester to complete an LLM in international and European law. The University Jean Moulin Lyon 3 is a public university ranked among the top in France. Lyon 3 is one of three universities in Lyon with a combined population of 100,000 students. Lyon is the second-largest city in France with a great selection of cultural and professional opportunities.

Bond University: USC Gould JD students have the opportunity to live in Queensland, on the Gold Coast of Australia, for a semester while studying at Bond University. Bond University has a distinctly global perspective, aspiring to a 50:50 ratio of Australian to international students, who come from 80 countries worldwide. Under the guidance of Australia’s most eminent legal professionals, internationally renowned criminologists and specialists, students benefit from the mentoring relationship fostered at Bond where professors take an active role in charting student success.

Fundação Getulio Vargas University: The semester exchange with Direito GV, the law school of FGV, allows JD students to study at their campus in São Paulo, Brazil. Direito GV has one of the top law faculties in Brazil. They offer law courses in English for their exchange students. Fundação Getulio Vargas has developed a highly innovative curriculum. The Brazilian Ministry of Education and Culture and the Brazilian Bar Association have granted FGV their highest classification of academic rigor. This exchange introduces JD students to the Brazilian legal system and promotes a broad debate on the issues of global relevance within a South American perspective.

Degree Programs

Graduate Degree Programs
USC Gould's graduate degree programs include an LLM program, an online LLM program and an MCL program for foreign law graduates. USC Gould also offers an Online Master of Studies in Law which does not require a law background. Through the graduate degree programs, students have opportunities to meet and interact with faculty and JD students and also with practicing lawyers from around the world.

Course Requirements
The LLM for foreign lawyers, online LLM and MCL programs are intended for individuals who are trained in law abroad and wish to gain a basic knowledge of U.S. law and our legal system and/or who wish to engage in comparative legal study. The Online Master of Studies in Law program is designed for new graduates as well as seasoned professionals from varying fields of studies and careers, who seek an understanding of how the U.S. legal system functions.

Undergraduate Programs
BA Philosophy, Politics and Law
This interdisciplinary program consists of nine courses chosen from philosophy, political science, law and anthropology courses. See Philosophy for degree requirements.

Minor in Law and Public Policy

The minor in law and public policy draws upon four fields of study: public policy and management, law, economics and political science. It provides students with an understanding of the political and economic contexts in which laws are made, as well as how legal institutions shape policy formulation. Students learn to analyze the consequences of policy and alternatives; the roles played by government, business and nonprofit organizations in public decision-making; and the legal bases for various areas of public policy. See USC Price School of Public Policy for requirements.

Minor in Law and Society
This interdisciplinary program focuses on the effect of law on society and the way in which social forces influence the legal system. The idea is that students will understand the law if they look beyond "law in books" to "law in action." See Political Science for requirements.

Minor in Psychology and Law
This interdisciplinary minor brings together courses in psychology that focus on the social, ethical, cognitive and societal aspects of psychology and how it relates to law. This knowledge is augmented with law courses that identify the relationship between mental health, social psychology and law. See Psychology for requirements.

Master's Degree
Dispute Resolution (MDR)
The Master of Dispute Resolution (MDR) is designed to prepare high caliber students who are planning to practice Alternative Dispute Resolution (ADR) in the context of the U.S. legal system. The program's track in Management of ADR Organizations provides an opportunity for top current and future leaders within the field to further their understanding of the complexities of ADR law and explore many areas of law and business practice with which they may be involved. The program offers both part-time and full-time options for students, and those who wish to carry full academic loads may complete the program within one academic year.

To obtain a Master of Dispute Resolution (MDR), students must take a total of at least 27 units of the core curriculum and elective courses listed below. Twelve units are required core curriculum and the remaining units may be electives, unless the student has earned a U.S. JD from an ABA-accredited law school and has received a waiver for LAW 570 ADR Legal Principles. Students who have received a waiver from LAW 570 ADR Legal Principles will be required to complete 10 units of the core curriculum, and must satisfy the remaining 17 units required for the degree with elective courses. Students choose electives according to their interests; however, those desiring a designated track in Management of ADR Organizations must take at least 9 units from those listed in the Management of ADR Organizations Tracking, including GSBA 520.

Students can apply four (4) credits of graduate-level courses taken at another accredited educational institution toward the MDR course requirements, subject to the approval of the director of the MDR Program.

Core Curriculum
Students must successfully complete, or receive a waiver for, the following courses to receive the MDR degree.

- LAW 570 ADR Legal Principles Units: 2
- LAW 573 ADR Specialized Study Units: 1, 2, 3
- LAW 715 ADR Law and Policy: Mediation and Arbitration Units: 2, 3, 4
- LAW 819 ADR Ethics Units: 1, 2
- LAW 829 Cross-Cultural Dispute Resolution Units: 2

**Elective Courses**

Students may select among the following elective courses as part of the MDR degree.

- LAW 572 Practical Mediation Skills Clinic Units: 3
- LAW 626 International Investment Law and Arbitration Units: 2
- LAW 712 Negotiation Theory and Application Units: 2, 3
- LAW 813 Arbitration in the United States Units: 3
- LAW 817 International Arbitration Units: 3
- LAW 824 Arbitration Advocacy Units: 1, 2

**Management of ADR Organizations Track**

Students pursuing this track must complete a minimum of nine units of the following courses, including GSBA 520. Courses taken to complete the track may apply to overall elective units required for the MDR degree.

- BAEP 591 Social Entrepreneurship Units: 2, 3
- CMGT 510 Communication, Values, Attitudes and Behavior Units: 4
- GSBA 520 Business Fundamentals for Non-Business Professionals Units: 3, 4
- LAW 571 Organizational Conflict Units: 3
- PPD 685 Human Resources Management in Public and Non-Profit Sectors Units: 2

**Master of Laws (LLM) in Alternative Dispute Resolution**

The Master of Laws (LLM) in Alternative Dispute Resolution (ADR) degree, is designed to prepare high caliber U.S. and foreign law graduates who are interested in the specialized and advanced knowledge in ADR. The program will offer emphasis tracks in arbitration practice and mediation practice. It will reside within the new Judge Judith O. Hollinger Alternative Dispute Resolution Program. The Hollinger ADR Program's mission is to design, develop, and implement a world class educational program in dispute resolution that will rival and ultimately surpass the quality of similar programs offered by other institutions of higher education. The goal is to have USC Gould emerge as a preeminent leader in dispute resolution and ADR education.

**Core Curriculum Requirements**

Students must complete the following courses to earn the LLM degree in ADR Law.

- LAW 715 ADR Law and Policy: Mediation and Arbitration Units: 2, 3, 4
- LAW 819 ADR Ethics Units: 1, 2

**International Student Core Requirements**

Students who have not previously earned a JD degree must also complete the following courses to earn the LLM degree in ADR Law.

- LAW 520 Introduction to U.S. Legal System Units: 2
- LAW 570 ADR Legal Principles Units: 2

**Elective Courses**

Students may select among the following electives to complete the 24 units required for the LLM in ADR Law degree.

- LAW 571 Organizational Conflict Units: 3
- LAW 572 Practical Mediation Skills Clinic Units: 3
- LAW 626 International Investment Law and Arbitration Units: 2
- LAW 712 Negotiation Theory and Application Units: 2, 3
- LAW 813 Arbitration in the United States Units: 3
- LAW 817 International Arbitration Units: 3
- LAW 822 Alternative Dispute Resolution Clause Drafting Units: 1
- LAW 824 Arbitration Advocacy Units: 1, 2
- LAW 825 International Arbitration Competition Units: 1, 2, 3
- LAW 829 Cross-Cultural Dispute Resolution Units: 2
- LAW 833 Labor Arbitration Units: 2
- LAW 869 Family Law Mediation Clinic Units: 4

**Master of Studies in Law (MSL) Program**

The Master of Studies in Law (MSL) Program is a legal education program designed for non-lawyers and will provide legal training in various areas of legal specialization. This program is designed for mid-career professionals, including corporate executives, government officials, and others from the U.S. and from around the globe, whose employment or whose area of research would benefit from the study of our legal system. It will appeal also to those who would like to pursue current trends in law and an in-depth understanding in their areas of legal interest.

**Mandatory MSL Courses**

All MSL students must successfully complete the following two courses as part of the MSL degree.

- LAW 510 Legal Research Units: 0 or 1
- LAW 520 Introduction to U.S. Legal System Units: 2

**Elective MSL Courses**

Students must complete 18 units of the following elective courses to receive the MSL degree.

- LAW 505 Legal Profession Units: 2, 3, 4
- LAW 521 Topics in American Law Units: 1, 2, 3, 4
- LAW 528 Constitutional Law Units: 2
- LAW 603 Business Organizations Units: 3, 4, 5
- LAW 632 Business for Lawyers Units: 2, 3, 4
- LAW 658 Mergers and Acquisitions Units: 1, 2, 3, 4
- LAW 710 Contract Drafting and Strategy Units: 2, 3
- LAW 749 Securities Regulation Units: 2, 3, 4

**University Certificate Alternative Dispute Resolution Certificate**
JD students must complete at least 12 units of arbitration and mediation-related classes to receive this certificate. Interested JD students must submit their applications for this certificate program after completing the first year of law school. JD students complete the certificate requirements during their second and third years of law school, and courses may count both toward the JD degree and the certificate.

LLM students must complete at least 12 units of arbitration and mediation-related classes to receive this certificate. LLM students complete the certificate requirements during the year they are taking their LLM course work, and courses may count both toward the LLM degree and the certificate. All students are required to take both mandatory business law courses (Survey of ADR Law and Policy And Domestic Ethics in ADR) and a selection of elective courses (such as ADR Clause Drafting and Business Mediation).

**Business Law Certificate (Online)**

USC Gould School of Law Online LLM and Business Law Certificate students will enroll in the Online Business Law Certificate program and will take each of their courses in the online modality.

USC Gould School of Law JD and LLM residential students will enroll in the residential Business Law Certificate program and will take each of their courses in residence. The Online Business Law Certificate program requires Business Organizations (4 units) as a core, mandatory course. Students are required to complete an additional 10 business law units online to earn the certificate. Electives include Securities Regulation (3 units), Business for Lawyers (2 units), Contract Drafting and Strategy (2 units) and Mergers and Acquisitions (3 units and for which Business Organizations is a prerequisite). Students must complete a minimum of 12 units to receive this online certificate. The program is structured especially for working professionals who wish to take one or two courses per term in an online format. Students are expected to enroll each semester until the program is completed.

**Business Law Certificate (Residential)**

JD students must complete at least 27 units of business-related classes to receive this certificate. Interested JD students must submit their applications for this certificate program after completing the first year of law school. JD students complete the certificate requirements during their second and third years of law school, and courses may count both toward the JD degree and the certificate.

LLM students must complete at least 12 units of business-related classes to receive this certificate. LLM students complete the certificate requirements during the year they are taking their LLM course work, and courses may count both toward the LLM degree and the certificate. All students are required to take both mandatory business law courses (such as business organizations) and a selection of elective business law courses (such as mergers and acquisitions, advanced contracts and bankruptcy).

**Certificate in U.S. Legal Studies**

This is a two-year program designed to introduce students to core doctrines of American law. During the first year, students will enroll in courses that explore the fundamental principles underlying the U.S. legal system and prepare them for the Master of Laws program. Students may also enroll in courses designed to improve their English fluency. During the second year, students will enroll in courses to complete our Master of Laws degree.

**ALI Language Courses**

Students will be required to take an English placement exam at the beginning of the program. Students must complete 2 units of English language course work each semester, for a total of 4 units, unless they receive a waiver. Students may elect the ALI courses identified below that best suit their skill level.

- ALI 224 Low Intermediate Oral Skills Units: 2
- ALI 225 Low Intermediate Writing Skills Units: 2
- ALI 234 Intermediate Oral Skills Units: 2
- ALI 235 Intermediate Writing Skills Units: 2
- ALI 244 High Intermediate Oral Skills Units: 2
- ALI 245 High Intermediate Writing Skills Units: 2
- ALI 254 Advanced Oral Skills Units: 2
- ALI 255 Advanced Writing Skills Units: 2

**Introduction to U.S. Legal Studies**

Students will enroll in the following 16 units of LAW courses during the first year of this program. These courses will explore the fundamental principles underlying the U.S. legal system.

- LAW 560 Academic and Professional Skills for U.S. Law Studies I Units: 2
- LAW 561 Fundamentals of Legal Writing Skills Units: 2
- LAW 562 Introduction to U.S. Legal Culture and Practice Units: 2
- LAW 563 Presentation Skills for International Lawyers Units: 2
- LAW 564 Persuasive Advocacy Units: 2
- LAW 565 U.S. Common Law Analysis and Skills Units: 3
- LAW 566 Academic and Professional Skills for U.S. Law Studies II Units: 1
- LAW 890 Directed Research Units: 1, 2, 3, 4

**Entertainment Law (Residential) Certificate**

JD students must complete at least 21 units of entertainment-related classes to receive this certificate. JD students must submit their applications for this certificate program after completing the first year of law school. JD students complete the certificate requirements during their second and third years of law school, and courses may count both toward the JD degree and the certificate.

LLM students must complete at least 12 units of entertainment-related classes to receive this certificate. LLM students complete the certificate requirements during the year they are taking their LLM course work, and courses may count both toward the LLM degree and the certificate. All students are required to take both mandatory entertainment law courses (such as intellectual property) and a selection of elective entertainment law courses (such as copyright, legal issues in music and sports law).
Public Interest Certificate

The Public Interest Certificate is intended for students who plan to spend a significant part of their careers in the nonprofit or government (including criminal) sectors. It serves at least three functions. First, it signals to future employers that the student has made a significant commitment to acquiring the substantive knowledge, practical skills and familiarity with the landscape of nonprofit and government law, which will prepare him or her for a successful career in these sectors. Second, the certificate assists students in discerning and following a law school path that will provide the fundamentals they need for a career in nonprofit or government law, and exposes them to a range of substantive law areas, practitioners and experiences in the public interest sector. Third, the certificate allows the Law School to affirm and showcase its support for public interest law and its offerings for students and potential students interested in this career path.

Clinical and Practicum Units

Students must complete at least one semester of work in one of the following Gould clinics or practicums. In the event a student is unable to gain entrance into one of the listed clinics or practicums, an externship for at least 3 units with a qualifying organization shall fulfill this requirement.

- LAW 630 Mediation Clinic I Units: 2, 3, 4
- LAW 631 Mediation Clinic II Units: 2, 3, 4
- LAW 711 Access to Justice Practicum Units: 2, 3, 4
- LAW 776 Immigration Clinic I Units: 2, 3, 4, 5
- LAW 781 Clinical Internship/Externship I Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13
- LAW 782 Clinical Internship/Externship II Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13
- LAW 796 Immigration Clinic II Units: 2, 3, 4, 5
- LAW 808 Medical-Legal Community Partnership Seminar and Practicum Units: 1, 2, 3, 4
- LAW 849 International Human Rights Clinic I Units: 4, 5
- LAW 850 International Human Rights Clinic II Units: 4 or 5
- LAW 865 Legislative Policy Practicum Units: 3
- LAW 891 Post-Conviction Justice Seminar I Units: 1, 2, 3, 4, 5
- LAW 892 Post-Conviction Justice Seminar II Units: 1, 2, 3, 4, 5
- LAW 893 Advanced Clinical Training Units: 1, 2, 3, 4, 5

A student may only satisfy this requirement with LAW 781 or LAW 782 if he or she is unable to enroll in one of the other listed courses.

Required Courses

A student must complete both of the following courses:

- LAW 531 Ethical Issues for Public Interest, Government and Criminal Lawyers Units: 3
- LAW 777 Administrative Law and Regulatory Policy Units: 1, 2, 3, 4

Core Courses

A student must complete at least one of the following courses for a numerical grade:

- LAW 602 Criminal Procedure Units: 2, 3, 4
- LAW 635 Employment Discrimination Law Units: 2, 3, 4
- LAW 686 Civil Rights: The Enforcement of the Constitution Units: 3
- LAW 704 Poverty Law Units: 2, 3, 4
- LAW 713 International Human Rights Units: 2, 3, 4
- LAW 775 Immigration Law Units: 2, 3, 4, 5

Substantive Courses

A student must complete at least 6 units from the following list of courses.

- LAW 602 Criminal Procedure Units: 2, 3, 4
- LAW 611 Advanced Topics in Constitutional Law Units: 1, 2, 3, 4
- LAW 619 Employment Law Units: 2, 3, 4
- LAW 623 Family Law Units: 3 or 4
- LAW 635 Employment Discrimination Law Units: 2, 3, 4
- LAW 636 Labor Law Units: 3 or 4
- LAW 646 Advanced Topics in Employment Discrimination Units: 1, 2, 3
- LAW 655 Environmental Law Units: 2, 3, 4
- LAW 661 National Security Law Units: 2, 3, 4
- LAW 662 Public International Law Units: 3, 4
- LAW 675 Mental Health Law Units: 2, 3, 4
- LAW 684 Suing the Government Units: 2, 3, 4
- LAW 686 Civil Rights: The Enforcement of the Constitution Units: 3
- LAW 697 Foreign Relations and National Security Law Units: 2, 3, 4
- LAW 700 Health Care Regulations Units: 1, 2, 3, 4
- LAW 702 Children, Sexuality and the Law Units: 2, 3, 4
- LAW 703a Children's Legal Issues Units: 1, 2, 3, 4
- LAW 704 Poverty Law Units: 2, 3, 4
- LAW 706 Public Health Law Units: 2, 3, 4
- LAW 707 Global Health, Law and Human Rights Units: 1, 2, 3
- LAW 713 International Human Rights Units: 2, 3, 4
- LAW 714 U.S. Foreign Policy and International Law Units: 1, 2, 3, 4
- LAW 716 Race and Gender in the Law Units: 1, 2, 3, 4
- LAW 725 Bioethics and Law Units: 3
- LAW 726 Stereotypes, Prejudice, and the Rule of Law Units: 2, 3, 4
- LAW 734 Local Government Law Units: 3 or 4
- LAW 743 Federal Criminal Law Units: 2, 3, 4
- LAW 746 Critical Race Theory Units: 2, 3, 4
- LAW 751 Sexual Orientation and the Law Units: 2, 3, 4
- LAW 757 Sex, Gender and the Law Units: 1, 2, 3, 4
- LAW 758 Identity Categories Units: 2, 3, 4
- LAW 763 Federal Courts: The Federal System II Units: 3, 4, 5
- LAW 775 Immigration Law Units: 2, 3, 4, 5
- LAW 791 Law and Society Units: 2, 3, 4
- LAW 798 Law, Mental Health and Ethics Units: 2, 3, 4
- LAW 813 Health Law and Policy Units: 2, 3, 4
- LAW 829 Cross-Cultural Dispute Resolution Units: 2
- LAW 847 Refugee and Forced Migration Law Units: 2, 3, 4
LAW 851 Topics in Criminal Law and Criminology Units: 1, 2, 3, 4
LAW 860 International Criminal Law Units: 4
LAW 866 Counterterrorism, Privacy and Civil Liberties Units: 2, 3, 4
LAW 871 First Amendment Units: 2, 3, 4
LAW 875 Constitutional Theory Seminar Units: 1, 2, 3, 4
LAW 880 Treating Difference Equally Units: 2, 3, 4
LAW 886 Counterterrorism, Privacy and Civil Liberties Units: 2, 3, 4
LAW 888 First Amendment: Law and Religion Units: 1, 2, 3

**Summer Master of Laws**

The Summer Master of Laws (LLM) program is a graduate-level law degree program designed for international attorneys, judges, government officials, prosecutors, corporate legal counsel, bankers and recent law graduates who are interested in receiving a degree in American law and the U.S. legal system, and will help to prepare them for leadership roles in the global market. This particular LLM program will be offered on-campus over the course of one or two summers, with the option of completing a few courses online.

**Summer LLM Mandatory Courses**

Students must enroll in Intro to U.S. Legal Systems and Legal Research to complete this degree.
- LAW 510 Legal Research Units: 0 or 1
- LAW 520 Introduction to U.S. Legal System Units: 2

**Summer LLM Elective Courses**

Students must complete 18 units of the following elective courses to complete this degree.
- LAW 503 Contracts Units: 2, 3, 4
- LAW 505 Legal Profession Units: 2, 3, 4
- LAW 511a Legal Writing Units: 1, 2
- LAW 521 Topics in American Law Units: 1, 2, 3, 4
- LAW 528 Constitutional Law Units: 2
- LAW 603 Business Organizations Units: 3, 4, 5
- LAW 632 Business for Lawyers Units: 2, 3, 4
- LAW 642 Secured Transactions Units: 2, 3, 4
- LAW 650 Entertainment Law Units: 2, 3, 4
- LAW 772 Intellectual Property Units: 2 or 3
- LAW 816 Dealmaking in the Entertainment Industry Units: 1, 2

**Technology and Entrepreneurship**

**Law Certificate**

The Technology and Entrepreneurship Certificate program provides a rigorous course sequence for students who have an interest in legal practice areas involving the intersection of technology and business law issues. The program features a combination of traditional doctrinal courses taught principally in a lecture format, skills-based courses taught principally in a workshop format, and experiential field-based opportunities outside the classroom. The program emphasizes the importance of acquiring strong legal skills and business awareness to prepare for legal practice.

**Mandatory Courses (JD Students and LLM Students)**

Students must complete both of the following courses:
- LAW 603 Business Organizations Units: 3, 4
- LAW 810 Patent Law Units: 3, 4

**Core Optional Courses (JD Students)**

Select at least three credits from the following courses:
- LAW 627 Business Planning Units: 3, 4
- LAW 673 Deal Strategy, Structure and Negotiation Units: 4
- LAW 770 Technology Transactions Units: 2, 3
- LAW 801 Venture Capital Law and Finance Units: 2, 3
- LAW 812 Patent Litigation Units: 3
- LAW 815 Deals Units: 3, 4
- LAW 827 Counseling the Startup Company Units: 2, 3, 4
- LAW 838 Patent Drafting and Prosecution Units: 3

**Non-Core Optional Courses (JD Students)**

Select sufficient units to reach the required number of total credits.
- LAW 648 Topics in Entertainment Law Units: 1, 2, 3, 4
- LAW 719 Corporate Finance Units: 2, 3, 4
- LAW 736 Small Business Clinic I Units: 2, 3, 4
- LAW 737 Small Business Clinic II Units: 2, 3, 4
- LAW 753 Antitrust Law I Units: 3 or 4
- LAW 765 Topics in Intellectual Property Law Units: 1, 2, 3, 4
- LAW 771 Intellectual Property and Technology Law Clinic I Units: 2, 3, 4, 5
- LAW 772 Intellectual Property Units: 2 or 3
- LAW 773 Internet Law Units: 2, 3, 4
- LAW 780 Intellectual Property and Technology Law Clinic II Units: 2, 3, 4, 5
- LAW 783 General Counsel Practicum Units: 1, 2
- LAW 841 Copyright, Trademark and Related Rights Units: 3
- LAW 859 Communications Law: Internet, Television and Other Media Units: 2, 3, 4

**Optional Courses (LLM Students)**

Select sufficient courses to reach required total credits.
- LAW 648 Topics in Entertainment Law Units: 1, 2, 3, 4
- LAW 719 Corporate Finance Units: 2, 3, 4
- LAW 753 Antitrust Law I Units: 3 or 4
- LAW 765 Topics in Intellectual Property Law Units: 1, 2, 3, 4
- LAW 770 Technology Transactions Units: 2, 3
- LAW 772 Intellectual Property Units: 2 or 3
- LAW 773 Internet Law Units: 2, 3, 4
- LAW 801 Venture Capital Law and Finance Units: 2, 3
- LAW 812 Patent Litigation Units: 3
- LAW 815 Deals Units: 3, 4
- LAW 827 Counseling the Startup Company Units: 2, 3, 4
- LAW 838 Patent Drafting and Prosecution Units: 3
- LAW 841 Copyright, Trademark and Related Rights Units: 3
- LAW 859 Communications Law: Internet, Television and Other Media Units: 2, 3, 4
Dual Degree
Juris Doctor/Doctor of Philosophy in Political Science and International Relations (JD/PhD)
The Department of Political Science and the Gould School of Law offer a dual degree program leading to the JD and PhD degrees. Applicants must apply to the Department of Political Science, the School of International Relations and the law school, and meet requirements for admission to all. In addition to the LSAT, students interested in this program are required to take the Graduate Record Examinations (GRE).
In the first year, students take their course work in the law school exclusively. To earn the JD, all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in the law school honors programs. The second and third years include 40 units of courses in political science and 40 units of law. Students must take two methodology courses, POSC 500 and POSC 600, and three core courses to be selected from POSC 510, POSC 512, POSC 520, POSC 530 and POSC 540.
To obtain a PhD in Political Science and International Relations, students must pass the screening process. After the completion of additional course work, students must take a PhD qualifying examination in three fields. Students will be examined in two of their three fields of concentration. The third ("write-off") field will be completed by taking at least three courses and passing them with a grade of B or better. The final requirement, following successful completion of the qualifying examination, is a doctoral dissertation.

Juris Doctor/Master of Arts in Economics (JD/MA)
Students are required to complete 92 units of law and economics course work, 4 units of which must constitute a thesis acceptable to the faculties of the law school and the Department of Economics. Before enrolling in economics courses, students must have completed an undergraduate course in probability and statistical inference (e.g., BUAD 310). Students with undergraduate degrees in such disciplines as business, economics, mathematics and psychology will usually have taken such a course as part of their undergraduate program.

First Year:
Required law school courses.

Second and Third Years:
ECON 500 Microeconomic Analysis and Policy Units: 4
ECON 513 Practice of Econometrics Units: 4 or
ECON 602 Macroeconomic Theory I Units: 4

Additional Requirements
Two Additional Graduate Level Courses in Economics (8 units): ECON 680 Industrial Organization and ECON 681 Economics of Regulated Industries are recommended, but the student is free to choose any graduate level courses other than ECON 590 or ECON 790 in consultation with the program adviser. ECON 401 Mathematical Methods in Economics may be substituted for one of these courses, and ECON 419 Advanced Econometrics may be substituted for the other. (These three courses are applicable toward graduate credit.)

Four Units of Thesis:
The thesis must be acceptable to both the faculty of the law school and the faculty of the Department of Economics.

Thirty-nine Units of Law Courses:
including one course in a subject matter related to economics (including but not necessarily limited to Taxation, International Business Transactions, Antitrust Law I, Regulated Industries, Labor Law, Administrative Law and Regulatory Policy, Corporate Taxation or Land Use). In addition to the LSAT, students interested in this dual degree program are required to take the aptitude and advanced economic portions of the Graduate Record Examinations (GRE).

Juris Doctor/Master of Arts, International Relations
The USC Gould School of Law and the USC School of International Relations jointly offer a three-year program leading to the JD and MA degrees. (Students may extend the dual degree program to four years.) Applicants must apply to both the law school and the School of International Relations and meet requirements for admission to both. In addition to the LSAT, students interested in this program are required to take the Graduate Record Examinations (GRE). Law students may apply to the School of International Relations during their first year at the law school.
In the first year, students take their course work in the law school exclusively. The second and third years include 24 units of courses in international relations and 40 units in law. Students pursuing the dual degree must complete 24 units of courses in international relations and 40 units in law. Students pursuing the dual degree must complete 24 units within the School of International Relations at the 500 level or above. These students are required to successfully complete IR 500 International Relations Theory, either IR 513 Social Science and Historical Research Methods: Introduction to Research Design or IR 517 International Policy Analysis, and two domain courses selected from among IR 502 Conflict and Cooperation, IR 509 Culture, Gender, and Global Society, IR 521 Introduction to Foreign Policy Analysis, and IR 541 Politics of the World Economy. Like all other master's students, students in the dual degree program must complete a substantive paper or alternative project. The requirements, standards and evaluation procedure for the substantive paper are identical to those listed for all MA students except that one member of the examining committee must come from the law school.

Juris Doctor/Master of Arts, Philosophy
Students must complete 24 units in the USC School of Philosophy and 69 units in the Gould School of Law.
First Year:
Required law school curriculum.
Second and Third Years:
The School of Philosophy prefers that students take at least one philosophy course each semester. During the four semesters, students must take at least 16 units at the 500 level, including PHIL 450
Intermediate Symbolic Logic and PHIL 500 Introduction to Contemporary Philosophical Literature; one 400- or 500-level course in ethics or social/political philosophy or aesthetics or philosophy of law; one 400- or 500-level course in metaphysics or epistemology or philosophy of language or philosophy of science or philosophy of mind; one 400- or 500-level course in the history of ancient or early modern philosophy; passage of the second year review, which shall include a research paper based on a completed seminar paper and completion of a publishable research paper. Students must also complete 36 additional law units.

**Juris Doctor/Master of Arts, Political Science**

The Department of Political Science and the Gould School of Law jointly offer a dual degree program leading to the JD and MA degrees. Applicants must apply to both the Department of Political Science and the law school and meet the requirements for admission to both. In addition to the LSAT, students interested in this program are required to take the Graduate Record Examinations (GRE).

In the first year, students take their course work in the law school exclusively. The second and third years include 24 units in political science and 40 units in law. Like all other students in the political science MA program, students pursuing the dual degree must pass a master's screening examination in their field of choice. If they wish to write a master's thesis, they may do so in lieu of two courses.

**Juris Doctor/Master of Communication Management (JD/MCG)**

Students must complete 20 units (five courses) of communication courses at the School of Communication: one core class from the student's preferred track; one method course; CMGT 597a, CMGT 597b; and the remaining two courses may be from either core or elective offerings.

**First Year:** Required law school courses.

**Second and Third Years:** 20 units of communications courses and 38 units of law courses, of which 8 units must be approved as appropriate for acceptance by the Annenberg School for Communication and Journalism toward its degree. All students take CMGT 597a, CMGT 597b in the third year. Application to pursue the dual degree should be made before completion of 15 units of work on law or 8 units toward the MA Admission by the law school to its JD degree will be evaluated as a substitute for GRE scores.

**Juris Doctor/Master of Public Policy (JD/MPP)**

The Price School of Public Policy and the USC Gould School of Law offer a dual degree that enables qualified students to earn both a Juris Doctor and a Master of Public Policy in approximately four years of study. The dual degree allows students to acquire a blend of the analytic skills of public policy and an understanding of legal institutions and processes. This combination of knowledge is well suited for law students who want to affect the policy-making process and craft legislation to aid in the achievement of public policy goals. It is equally appropriate for prospective policy analysts who are interested in law and public policy.

Students must apply to, and be accepted by, both schools. They may be accepted to the dual degree at the time of their acceptance to the law school or at the beginning of their second year of law school. Dual degree students spend the first year of the program completing the required first year of law school. The remaining units of law school courses and the required 36 units of core MPP courses are taken by students in the second through fourth years.

Students are required to complete 114 units of course work, 78 units in the law school and 36 units in the Price School of Public Policy. To earn the JD, all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honor programs. In addition, the MPP program has a statistics prerequisite. Please see the MPP degree in the Price School of Public Policy section of the catalogue for the requirements.

**Required MPP Courses**

The required MPP courses are

- PPD 500 Intersectoral Leadership Units: 2
- PPD 501a Economics for Policy, Planning and Development Units: 2
- PPD 501b Economics for Policy, Planning and Development Units: 2
- PPD 554 Foundations of Public Policy Analysis Units: 2
- PPD 555 Public Policy Formulation and Implementation Units: 4
- PPD 558 Multivariate Statistical Analysis Units: 4
- PPD 560 Methods for Policy Analysis Units: 4
- PPD 561a Policy Analysis Practicum Units: 1, 3
- PPD 561b Policy Analysis Practicum Units: 1, 3

**Management Elective**

4 units of a management elective

- PPD 541 Public Financial Management and Budgeting Units: 4
- PPD 545 Human Behavior in Public Organizations Units: 4
- PPD 654 Information Technology Management in the Public Sector Units: 4
- PPD 656 Political Management: Theory and Applied Techniques Units: 4
- PPD 662 Intergovernmental Management: State Perspective Units: 4
- PPD 673 Strategic Planning in the Public Sector Units: 4
- PPD 675 Nonprofit Management and Leadership Units: 4
- PPD 690 Alternative Dispute Resolution Units: 4
- PFDE 645 Financial Management of Nonprofit Organizations Units: 4

**Analytic Elective**

and 8 units of an analytic elective

- COMM 650 Survey Construction and Validation Units: 4
- PM 542 Social Network Analysis Units: 4
Gerontology Requirements

The Master of Science in Gerontology will require 36 units
fourth years combine gerontology and law courses.

is devoted to required law courses, and the second, third and

and 36 from the law school to complete 110 units of course work, 74 from the law school

program prepares graduates for a number of roles in both
population with understanding of the legal system. The

The JD/MRRED dual degree program provides the opportunity for in-depth study of legal issues and real estate development. The increasingly regulatory environment developers work within demands that professionals in the real estate industry have a strong understanding of the legal system. Lawyers who plan to specialize in real estate law will benefit from a thorough understanding of the development process, including financial, planning, marketing and design issues.

Application must be made to both the Gould School of Law and the USC Price School of Public Policy. This program normally requires three years (including one summer) of full-time study in residence to complete.

Students must have use of an approved laptop computer as required by instructors and must demonstrate calculator and spreadsheet skills; a calculator and/or spreadsheet class is offered online via the Internet. Requirements for completion of the dual degree program are 112 units, including 78 units in law and 34 units in planning. For a complete listing, see USC Price School of Public Policy.

Juris Doctor/Master of Science in Gerontology (JD/MS)
The JD/MS dual degree combines the knowledge of the older population with understanding of the legal system. The program prepares graduates for a number of roles in both public and private sector organizations. Students are required to complete 110 units of course work, 74 from the law school and 36 from the Davis School of Gerontology. The first year is devoted to required law courses, and the second, third and fourth years combine gerontology and law courses.

Gerontology Requirements
The Master of Science in Gerontology will require 36 units of course and fieldwork that cover the core content of the MS program.

Gerontology Requirements

GERO 510 Physiology of Development and Aging
Units: 4
GERO 520 Life Span Developmental Psychology
Units: 2 or 4
GERO 530 Life Span Developmental Sociology Units:
4
GERO 540 Social Policy and Aging Units: 4
GERO 555 Integrating Gerontology: A Multidisciplinary Approach Units: 4
GERO 591 Field Practicum Units: 1-12
GERO 593 Research Methods Units: 4
Gerontology elective Units: 4

Notes:
The Davis School of Gerontology will waive 16 units of electives, which are required in the regular MS program, as well as GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program have a primary professional focus in law.

Law School Requirements

The law school requires 74 units of credit.

First Year Requirements

LAW 502 Procedure I Units: 4
LAW 503 Contracts Units: 2, 3, 4
LAW 504 Criminal Law Units: 3
LAW 505 Legal Profession Units: 2, 3, 4
LAW 507 Property Units: 4
LAW 508 Constitutional Law: Structure Units: 2, 3, 4,
5
LAW 509 Torts I Units: 4
LAW 512 Law, Language and Values Units: 2, 3, 4
LAW 515 Legal Research, Writing and Advocacy I Units: 2, 3
LAW 516 Legal Research, Writing and Advocacy II Units: 2

Elective Course Work
The second and third year of law study are primarily elective with one requirement. Students must satisfy the upper division writing requirement, either by completing a major, faculty-supervised writing project such as a dissertation, or by taking a course with a substantial writing component. The law school will waive 14 units of electives which are required in the regular JD program.

Juris Doctor/Master of Social Work (JD/MSW)
The Juris Doctor and Master of Social Work (JD/MSW) dual degree program is a four-year program. Students are required to complete 121 units of course work, including 76 units in the Gould School of Law and 45 units in the USC School of Social Work.

To earn the JD, all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honors programs. Students must apply to both programs prior to matriculation.

The program of study is as follows:

First and Second Years: Complete both the first year JD program of study and MSW course work in foundation, field and core courses specific to the AHA, COBI or CYF departments.

Third Year: Complete the second year JD program and field courses and one semester of field instruction and the final semester of the J.D. program in the spring.

The law school gives credit for the third semester in the School of Social Work, while the latter recognizes law courses as substitutions for a one-semester practice course, special topics courses, a third semester of social policy and one semester of field instruction (for which a clinical law semester is substituted).
Juris Doctor/PharmD (JD/PharmD)

Admission Requirements

Admission to the dual PharmD/JD program is competitive, and involves meeting admission requirements and gaining acceptance to both the School of Pharmacy and the law school. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students that have a baccalaureate degree may apply to the dual PharmD/JD degree program in two ways. First, they may apply at the time they submit their PharmD application by concurrently submitting applications to both schools. Students who elect this approach must identify themselves on their PharmD applications as potential dual PharmD/JD degree students. Students who are admitted to both schools will be offered admission to the dual degree contingent on passing all courses in their first year of the PharmD with a minimum 3.0 GPA. Students pursuing the dual PharmD/JD degree must notify the law school in a timely fashion that they will be enrolling in the dual PharmD/JD degree program and will not matriculate at the law school until the following year. Students who are accepted only by one school may choose to attend that school but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the law school during their first year of enrollment in the PharmD program prior to the law school’s published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students admitted to the law school using this approach would be offered admission to the dual degree contingent on passing all courses in their first year of the PharmD with a minimum 3.0 GPA. See the admissions section of the School of Pharmacy and the law school for specific requirements.

Degree Requirements

The professions of pharmacy and law are distinctly different, yet pharmacists are often involved in legal issues and lawyers frequently deal with pharmacy, drug, health care, product development and toxin-related matters. This dual degree program provides qualified students with an efficient mechanism for obtaining the expertise and professional credentials that will enable them to develop professional practices that bring together expertise in both areas.

Overall Requirements

A student is required to complete all work for both degrees within six years of the date of matriculation at the School of Pharmacy (PharmD) and five years of matriculation at the law school (JD). The entire dual degree program will take six years to complete. Dual degree students will be allowed to use 12 units of approved JD course work (elective or required) to meet 12 units of PharmD electives and 12 units of approved PharmD course work (elective or required) to meet 12 units of JD electives. A faculty qualifying exam committee will determine the exact program for each student, including the appropriateness of courses in one program used to meet elective requirements for the other program. A total of 208 units is required for the dual degree.

PharmD Requirements

Dual degree students must successfully complete 144 units of PharmD and acceptable JD units to receive the PharmD degree. The 144 units must include 132 units of required and elective pharmacy course work plus 12 units of JD course work deemed acceptable to meet PharmD elective requirements. Dual degree students should graduate with their PharmD degrees at the completion of the first semester of the sixth academic year of the dual degree program. Students will be eligible to sit for the Pharmacy Board Exams after completion of the PharmD degree requirements. However, dual degree students will not actually be awarded their PharmD degrees until they complete requirements for both degrees.

Juris Doctor Requirements

Dual degree students must successfully complete 88 units of JD and acceptable PharmD course work during the second to sixth years of the dual degree program to receive the JD degree. The 88 units must be composed of 76 units of JD course work, including satisfaction of the upper-division writing requirement and any other substantive requirements, plus 12 units of PharmD course work deemed acceptable to meet JD elective requirements. No JD credit will be awarded for PharmD course work completed prior to matriculation in the law school. Students cannot receive the JD degree under requirements for the dual degree program without prior or simultaneous completion of the PharmD degree. Both professions require passing a state board or bar exam to practice the respective professions. Neither of these degrees requires a thesis or comprehensive final exam.

Recommended Program

PharmD/JD dual degree students will begin with the first year of the PharmD curriculum (36 units). During the second year, students will take the first year law core (33 units), plus 3–5 PharmD units. Due to the rigor of the law school core, pharmacy courses during the first year of law school are limited to non-science courses. The third through fifth years of the program focus on PharmD courses with sufficient law courses to maintain students’ educational momentum in law. Students should complete their PharmD requirements during the fall of their sixth year of the program and their law course work also during the sixth year. Students must complete both degree requirements by the end of the sixth year of the program.

Doctoral Degree

Law (JD)

The Juris Doctor is the basic law degree. To obtain the degree, a student must satisfactorily complete 88 units, be in full-time attendance for six semesters and complete all required courses. Several options are available through which students may, with appropriate permission, take courses outside the law school. Except with special permission, however, each student (including a dual degree student) must successfully complete at least 35 units beyond the first year curriculum, in law courses, taken at this law school, and graded in the normal manner. Each student must also complete a minimum of 65 of the required 88 units by attendance in regularly scheduled class sessions at the law school. A law student is expected to devote the major portion of his or her time to law studies; any outside employment must therefore be restricted. First-year students are not
permitted to hold jobs, and second- and third-year students may not hold outside employment requiring more than 20 hours of work per week.

First-year students are required to carry the full load of courses prescribed for that year, and second- and third year students are required to carry between 13 and 17 units each semester, unless special permission to carry a reduced or enlarged schedule is granted by the dean of students. All students must complete six full-time semesters.

Requirements for degrees, as well as the courses offered, may be changed by the faculty at any time. The dean of students may waive some requirements for individual students.

The First Year
During the first year, the student takes a required curriculum of basic courses that examines fundamental legal institutions and addresses legal problems relevant to today's society and the modern practice of law.

In the fall semester, Law, Language, and Values introduces students to foundational concepts in legal reasoning, including theories of interpretation, the rule of law and normative reasoning.

Torts I explores the individual's obligation to refrain from harming others and studies the bases for compensating persons who suffer injuries — either by holding responsible whomever is at fault for the harm, or by invoking other principles of liability including the efficiency of resource allocation and spreading of losses. Procedure introduces students to the issues of what constitutes fair, adequate and efficient procedures in resolving legal disputes. Study focuses on the procedures outlined in Federal Rules of Civil Procedure.

Contracts studies the law regulating consensual arrangements entered into for commercial purposes. It concerns such questions as what promises do and should the state enforce and what remedies are available when enforceable promises are breached.

In the spring semester, students take Criminal Law, which studies issues relating to the decision, by legislature or court, to designate behavior as a "crime." Significant attention is given to the moral, psychological and philosophical issues involved in ascribing criminal responsibility.

Constitutional Law focuses on fundamental structure provisions and relationships under the U.S. Constitution with an emphasis on separation of powers and federalism.

Property analyzes the development of rules dealing with land, water and other natural resources, frequently from historical and economic perspectives.

In addition to these required spring courses, first-year students will be able to choose an elective course. Elective topics may include (among other topics) a Business Basics course, a course on constitutional rights, and a course in Legal Profession with an orientation toward public interest.

All students take a year-long course, Legal Research, Writing and Advocacy. The course is coordinated with other first-year courses, and provides students an opportunity to draft pleadings and to prepare legal memoranda and briefs.

Toward the end of the second semester, each student participates in a moot court argument based on work previously prepared for the course.

Students study basic sources of the law — case reports, constitutions, statutes and interdisciplinary materials. There is no uniform method of teaching, but Socratic dialogue and class discussion are primarily employed to help the students analyze issues, reasons and arguments. Moreover, law school faculty have traditionally employed interdisciplinary approaches in analyzing legal problems. First-year classes meet in sections of 60 to 100 students, about half the class size of many law schools.

The Second and Third Years
Requirements
The upper two years of law study are primarily elective, with only four requirements. First, students must satisfy the upper division writing requirement, either by completing a major faculty-supervised writing project or by taking a course with a substantial writing component.

Second, students must enroll in course work that offers substantial instruction in professional skills generally regarded as necessary for the effective and responsible participation in the legal profession. Such course work includes simulation courses (including Trial Advocacy and Pretrial Advocacy), live-client clinical offerings and courses involving the drafting of legal documents (including Contract Drafting and Negotiation).

Third, students who did not take the Constitutional Rights class as a first-year elective must take it during the second or third year of law school.

Finally, students who did not take the Legal Profession class as a first-year elective must take it during the second or third year of law school.

Course Offerings
The basic courses that most students elect to take — for example: Business Organizations, Evidence, Taxation, and Gifts, Wills and Trusts — are offered every year and usually twice a year. Other courses listed are offered once a year, or in some cases, once every several years. Each year the law school attempts to provide upper-division students with a wide variety of optional specialized courses. Often these reflect the research interests of the faculty. Some examples in recent years have been Biotechnology and the Law, Global Warming, Counterterrorism and Homeland Security, Wrongful Convictions, Reproductive Rights, Special Education and Disability Law, and a seminar on Corporate Fraud. Because there are specialty courses in nearly every major area of the law, upper-division students are able to concentrate in a particular area, or, if they prefer, pursue a broad, basic legal education.

Clinical Offerings
The upper-division curriculum includes a variety of opportunities for clinical legal education. "Clinical" courses are of two kinds. First, clinical refers to courses in which the learning of legal principles occurs through actual work on cases in particular subject matter areas. For example, the law of prisoners' rights and post-conviction remedies is taught in the Post-Conviction Justice Project, a course in which students represent inmates in the California Institution for Women. This representation is under the direct supervision of full-time law school faculty members. About 20 students participate each semester, traveling to the prison to meet with their clients on a regular basis, attending seminars at the law
school, preparing briefs and papers, drafting habeas petitions, and negotiating and dealing with prosecutors and prison and court personnel. In addition, students make court appearances on behalf of clients in state and federal courts, as well as courts of appeals.

The second type of clinical course concentrates on specific lawyering skills taught in a classroom setting through the use of hypothetical case materials, with actors playing the roles of clients. The best illustration of this form of clinical teaching is the three-course sequence of Pretrial, Trial and Appellate Advocacy, which covers the stages in the litigation process suggested by the course titles. In these courses, students actually perform, in a simulated courtroom or law office environment, the multiple tasks required of lawyers. Most work is done in small groups; students are videotaped and intensively reviewed by the instructors. A student can take part or all of this sequence. The three courses together require the student to do at least the following: client interviewing and counseling; legal research; fact-finding, drafting of legal documents, negotiation with opposing counsel, arguing pretrial motions to a judge, preparing witnesses to testify, selecting a jury, conducting direct and cross-examination, proposing and opposing exhibits and testimonial evidence, arguing to a jury, and drafting and arguing an appellate brief.

The Post-Conviction Justice Project and the advocacy courses are not the only clinical courses in the curriculum, but they are useful examples of the variety of clinical teaching. A course in a specific area of law, like the Post-Conviction Justice Project, necessarily requires students to acquire basic courtroom, negotiation and client interviewing skills. The skills-oriented advocacy courses require students to be familiar with substantive areas like evidence, procedure and the law in the area of the hypothetical client's problems. These two kinds of clinical courses supplement each other, just as substantive knowledge and expert skills do in the practice of law. Considered as a whole, USC's clinical courses provide the foundation of knowledge and skill necessary to begin the practice of law.

Judicial Externships and Clinical Internships

The clinical opportunities listed previously are focused primarily within the law school. In addition, there are two categories of clinical options for students to pursue outside the law school in the actual environments of courts and law offices.

The first of these, the judicial externship, allows students to receive credit for full- or part-time work as an extern to a judge of the state or federal court. Students are selected by the judges themselves. USC students have served as externs in the California Supreme Court, U.S. Court of Appeals, U.S. District Court, U.S. Bankruptcy Court, California Court of Appeal and Superior Court. During the externship, each student is supervised by the assistant dean and the placement supervisor.

The second program, the clinical internship option, allows USC Gould students to work part-time in government agencies, legal services programs or other nonprofit organizations under the supervision of practicing attorneys and faculty members. Students earn academic credit while providing representation to actual clients, learning important government processes or participating in large-scale impact litigation. Since the program includes more than 50 pre-approved agencies, students may choose from a wide range of clinical internships.

Neither program is considered a regularly scheduled class session for purposes of graduation requirements.

Individual Research Projects

A wide variety of courses and institutes offers opportunities for upper-division students to engage in individual research under faculty supervision and often in conjunction with course offerings, as well as to participate in large research projects. Projects presently underway include the uses of ocean and sea resources, the development and regulation of geothermal energy, sentencing practices in felony cases, the effects of real estate taxation, the delivery of legal service to low- and middle-income persons, the civil commitment of elderly persons, the relationships between corporate law and actual corporate practices, and theoretical studies in law and economics. Such research projects are financed by grants from the Brookings Institution, the U.S. Commission on Civil Rights, the National Science Foundation, the Ford Foundation, the Lincoln Institute of Land Policy, the National Institute of Mental Health, and the Energy Research and Development Administration.

Independent research completed for academic credit is not considered a regularly scheduled class session for purposes of graduation requirements.

Courses Outside the Law School

With the concurrence of the dean of students, a student may receive up to 12 units of J.D. credit for courses taken outside the law school. These courses must be on the graduate level and may be taken only at USC. Taking graduate level courses outside the law school is an alternative to the dual degree program; a student may not pursue both approaches. With the approval of the dean of students, a student may receive a limited number of JD credits for undergraduate language courses taken at USC. For purposes of meeting the 35-graded-units rule, all non-law courses are counted as CR/D/F units.

A student may, with permission of the dean of students, enroll in and transfer the credit from a law course taken at another school that is a member of the Association of American Law Schools, if the course is equivalent to one included in the USC Gould curriculum that will not be offered here during the semester the student takes the course. Credit will be granted only for courses graded "C" or better. A maximum of 5 such units may be counted toward the JD. Courses taken outside of the law school are not considered regularly scheduled class sessions for purposes of graduation requirements.

Course Selection in the Upper Division

With such a variety of courses available, how do second- and third-year students go about selecting the program that will be best suited to their individual interests and ambitions? There are no precise rules or proven methods for selecting second- and third-year courses. To a large extent, these choices reflect each student's personal assessment at the end of the first year — strengths and weaknesses, developing intellectual interests and first tentative career plans. For this reason, the combination of courses most desirable for one person will not necessarily be best for anyone else. Students
are urged to be wary of the notion that there is a specific, recommended curriculum to follow. But reluctance to impose a model course of study does not mean that no guidance is available, for there are at least four ways of thinking about these choices that, in combination, will help each student choose the best array of courses.

One recommended approach to course selection is to choose courses taught by professors the student admires, without regard to subject matter. For each student there are teachers who are particularly able to create intellectual excitement and whose approach to analysis and teaching strikes a responsive note. Students will benefit as much from exposure to a specific professor's analytic skills and approach to legal issues as from specific course content.

A second approach is to choose courses that look exciting, without worrying about whether such courses are directly related to the student's current career plans or to some idea of traditional curriculum. If it appears that a course will be intellectually interesting, will expose students to a new area of the law, or provide needed variety, there is already more than enough reason to enroll. Courses taken because of enthusiasm for either the instructor or the subject matter often lead to the richest academic experience of law school.

The third way to make decisions about taking courses is to classify them according to clusters that emphasize similar issues or themes and then select from each area. For example, a student interested in ideas about family relationships will find them discussed in different contexts in Gifts, Wills, and Trusts; Family Law; Community Property; Taxation; Estate Planning; Real Estate Transactions; and Gifts, Wills and Trusts. This kind of course planning requires some thought and investigation, since a casual examination might omit such courses as Community Property (which may affect one's legal ability to transfer property by will), and Real Estate Transactions (since various forms of property ownership may dictate a specific will or create planning considerations).

These approaches to course selection describe only some of the ways in which students might make reasoned choices about their academic programs. Formal and informal academic counseling are available from the associate dean, the assistant deans and other faculty. In addition, students are encouraged to follow the written recommendations available in the online Student Handbook available via the Student Portal on the USC Gould School of Law Website.

Keck School of Medicine of USC

Founded in 1885, the Keck School of Medicine of USC is part of Keck Medicine of USC, a major center of medical research, education and patient care with more than 1,500 full-time faculty members and a voluntary faculty of more than 4,000 physicians. Faculty includes national leaders in each of its 25 clinical and basic science departments. Located on the university's 30.8-acre Health Sciences Campus three miles northeast of downtown Los Angeles, the Keck School is adjacent to the Los Angeles County+USC Medical Center, one of the largest teaching hospitals in the United States. The Keck School's faculty, students and residents serve more than one million patients each year through the Los Angeles County+USC Medical Center, the USC Norris Cancer Hospital, the Keck Hospital of USC, Children's Hospital Los Angeles, USC Verdugo Hills and a network of USC-affiliated hospitals throughout Southern California. More than 500 faculty physicians care for patients with complex medical needs as well as provide primary care.

The Eli and Eddyhe Broad CIRM Center for Regenerative Medicine and Stem Cell Research of USC, which opened in the fall of 2010, joins the Harlyne J. Norris Cancer Research Tower and USC Zilkha Neurogenetic Institute in providing state-of-the-art facilities for important scientific discovery. With more than $248 million in total federal research support, the Keck School ranks among the top U.S. medical schools in federal funding.

The Keck School of Medicine of USC is at the forefront of medical education and was among the first medical schools to adopt Introduction to Clinical Medicine courses for first-year students, providing direct experience in patient care from the start.

Administration

Rohit Varma, MD, MPH, Interim Dean; Grace and Emery Beardsley Professor and Chair in Ophthalmology; Director, USC Roski Eye Institute

Ted J. Budge, MS, Senior Associate Dean, Chief Operating Officer

Thomas A. Buchanan, MD, Vice Dean, Research

Henri R. Ford, MD, MHA, Vice Dean, Medical Education

Judy Garner, PhD, Vice Dean, Faculty Affairs

D. Brent Polk, MD, Vice Dean, Clinical Affairs (CHLA)

The Keck School of Medicine of USC Committee on
Admissions is responsible for selecting members of the
entering class. The committee comprises both faculty and
students. The committee reviews candidates whose academic
achievement, commitment to service and personal qualities
distinguish them from the many thousands of applicants who
apply.
The applicant's undergraduate major may be in any subject
area from an accredited college or university. Although
sound preparation in the basic sciences is essential, a
background in the humanities, and depth and breadth of
personal experience are also important.

General Admissions Information
The Keck School of Medicine of USC participates in the
centralized American Medical College Application Service
(AMCAS) and also requires the submission of the Keck
School of Medicine supplemental application. Approximately
7,500 applications are received per year and 750 applicants
receive interview invitations. Interviews begin in late August
and end in early March. Students receive acceptance letters
beginning in October.

Requirements
All applicants to the Keck School of Medicine of USC MD
degree program must have completed a baccalaureate degree,
or its equivalent, from an accredited college or university
prior to matriculation. The school has no specific course
requirements. Strong applicants will have distinguished
themselves in their chosen field of study and have
demonstrated competency in the sciences at the time of their
application. The Medical School Admission Requirement
(MSAR) guide may be referenced for recommended course
work. The Medical College Admissions Test (MCAT) is
required, and scores must be from within the previous three
years of the date of matriculation.
International applicants must hold a degree considered
equivalent to a U.S. bachelor's degree as evaluated by the
USC Office of Graduate and International Admissions.
Individuals who have discontinued studies in medical school
for academic reasons are not eligible to apply to the Keck
School of Medicine of USC.

Medical College Admission Test (MCAT)
The MCAT is required of all applicants. Applicants to the
entering class are required to take the MCAT within the
previous three years of the date of matriculation and no later
than August in the year that the application becomes
available. Scores from administrations of the examination
taken outside of this time period will not be accepted.

Applications
The Keck School of Medicine of USC participates in the
American Medical College Application Service (AMCAS).
AMCAS reproduces and distributes an application and
standardized academic record to participating medical
schools designated by the student. Applications are submitted
electronically at students/applying/amcas.
Applications are available after June 1 for the class entering
in August of the following year. Applications to USC must
be returned to AMCAS by November 1, but earlier
application is encouraged.
The Committee on Admissions reviews all information
submitted on the AMCAS application as well as the school's
supplemental application. The nonrefundable supplemental
application fee is $100.

Personal Interviews
Personal interviews are a required aspect of the application
process. Interviews are conducted at the Keck School of
Medicine on the Health Sciences Campus of the University
of Southern California.

Notice of Acceptance

an application. does not, however, require GRE scores in order to consider encouraged to provide recent GRE scores. The committee does not, however, require GRE scores in order to consider an application.

Applications

MD/PhD Program

The Keck School of Medicine has developed an MD/PhD program designed for individuals who aspire to a career in academic medicine or a leadership role within the biomedical industry. Students are expected to acquire the modern skills that are required for physician competence. Additionally, the MD/PhD program provides an opportunity for the development of research expertise and academic excellence while fulfilling the requirements for a PhD degree. A joint program between the Keck School of Medicine and the California Institute of Technology (Caltech) was established in fall 1997 for the granting of the MD/PhD degree. PhD studies may be carried out at Caltech or through collaboration between two laboratories at both institutions. The MD will be awarded from the Keck School of Medicine and the PhD will be awarded from Caltech. The MD/PhD executive committee is responsible for selecting students for the MD/PhD program. Members of the committee review the qualifications of each applicant, including MCAT scores, academic performance, letters of recommendation and research experience. The committee interviews candidates and then selects students for admission to the program. All applicants to the joint program interview at Keck School of Medicine and the California Institute of Technology.

General Information

The MD/PhD program enrolls a maximum of four students annually. Students have the option of doing the PhD at USC or Caltech. Each student accepted to the program must also be accepted to the Keck School of Medicine. All positions are fully funded.

Requirements

Admission requirements for the MD/PhD program are those of one of the graduate programs at Caltech, the Keck School of Medicine and USC. Students select the program of their choice during the first two years of the medical curriculum; descriptions of these programs are available from each department or program and Caltech.

Graduate Record Examinations (GRE)

To assist the MD/PhD Committee in its evaluation of candidates, applicants to the MD/PhD program are encouraged to provide recent GRE scores. The committee does not, however, require GRE scores in order to consider an application.

Applications

Applicants to the Keck School of Medicine are advised to request information about the MD/PhD program at the time of application. In addition to completing the medical school application, applicants should indicate their interest in the MD/PhD program.

Students who are currently pursuing the medical curriculum at the Keck School of Medicine may apply to the MD/PhD program by contacting: MD/PhD Program, Keck School of Medicine, 1975 Zonal Avenue (KAM 200), Los Angeles, CA 90089-9023; (323) 442-2965; FAX: (323) 442-2318.

Personal Interviews

All applicants are screened by members of the MD/PhD Executive Committee; candidates who meet the basic criteria of the program are then invited to be interviewed by members of the committee and faculty at USC and Caltech.

Notice of Acceptance

Students selected for acceptance to the MD/PhD program are notified between November and May of each year. Students begin their program in the fall semester and register for courses in the medical curriculum at that time. Further information about the MD/PhD program at the Keck School of Medicine may be obtained by contacting: MD/PhD Program, Keck School of Medicine, 1975 Zonal Avenue (KAM 200), Los Angeles, CA 90089-9023; (323) 442-2965, FAX: (323) 442-2318; email: med.mdphdpgm@med.usc.edu.

Graduate Degree Programs

Admission standards for these curricula are established jointly by the Keck School of Medicine, its participating programs and the Graduate School. Applicants to graduate degree programs offered at the Keck School of Medicine must meet the general criteria for acceptance to the Graduate School. Each participating program may have additional requirements for application. The programmatic requirements for the Keck School of Medicine's graduate programs are detailed in the Graduate Degree Programs section.

Further information about graduate degree programs at the Keck School of Medicine may be obtained by contacting: Office of the Associate Dean for Graduate Studies, Keck School of Medicine, 1975 Zonal Avenue (KAM 409), Los Angeles, CA 90089-9023; (323) 442-1607, FAX: (323) 442-1199.

Tuition and Fees

The tuition and fees listed below are estimated for fall semester, 2016. All fees are subject to change without notice by action of the University of Southern California Board of Trustees. The university reserves the right to assess new fees or charges. Tuition is not refundable; late registration fees are mandatory and cannot be waived.

Tuition for each semester of the medical school curriculum is due and payable at the beginning of the semester. Registration is not permitted after the third week of instruction. Late payment of tuition is subject to a mandatory late fee. Average budgets for medical students will vary according to their year in the curriculum. Sample budgets for Year I, Year II and the Junior/Senior Continuum may be requested from the Office of Financial Aid. Tuition, mandatory fees and parking are the same for all years.
Tuition for courses of the graduate curriculum is based upon the number of units assigned to each course. The Graduate Degree Programs section provides a department-by-department list of graduate course titles; the number following each title indicates the number of units for which tuition is charged. Late payment of tuition is subject to a mandatory late fee.

### Required Fees (Estimated)
- Academic Year Tuition (two semesters) $59,122
- Graduate Tuition (per unit) 1,733
- Student Health Service Fee (annual) 589
- Student Programming Fee (graduate) 80
- Student Services Fee 28
- Norman Topping Scholarship Fee 16
- Health Insurance
- Annual Dental Rate
- Malpractice Insurance 25 (per academic year)
- Disability Insurance 41 (per academic year)

### Optional Fees
Parking fee, per semester (see Tuition and Fees).

### Grading and Evaluation
The Keck School of Medicine employs a system of evaluation and grading designed to encourage student self-reliance, to stimulate the student's independent quest for knowledge and to promote excellence in academic achievement.

For courses of the medical curriculum, the Keck School of Medicine does not award numerical or letter grades. The evaluation process leading to a pass or fail grade is based on performance of the student in relation to announced course criteria. Throughout medical school, students will be evaluated on their fund of knowledge, problem-solving ability, professional behavior, relevant personality traits and clinical and interpersonal skills. Additional information on grading and evaluation is contained in the handbook provided to every enrolled medical student.

Faculty instructors are responsible for establishing evaluation criteria appropriate to the objectives of each course, discipline and clerkship, and for specifying the manner in which evaluative information is to be gathered. Instructor comments on student performance form an integral part of a student's total evaluation. For each evaluation, descriptive comments based on the student's overall performance in relation to course criteria are submitted for permanent file to the office of the senior associate dean for student affairs and educational affairs, together with performance reports. The student's permanent file is used to prepare a letter from the office of the senior associate dean for student affairs and educational affairs of the Keck School of Medicine, which accompanies student applications for internships and residencies. These records are maintained by the Office of Student Affairs; students may review their records during regular office hours by scheduling an appointment. During the lifetime of the physician, the permanent student record may be consulted as evidence of completion of the required curriculum and as certification for licensure.

Grading and evaluation policies for graduate degree programs and for joint MD/PhD degrees are established in conjunction with the Graduate School. In general, courses taken in partial fulfillment of graduate degree requirements receive letter grades that are recorded by the university.

### Degrees and Requirements
The Keck School of Medicine and its departments offer types of curricula leading to award of: the Doctor of Medicine; joint MD/PhD; joint MD/MBA; joint MD/MPH; MD/MS, Global Medicine; a Master of Academic Medicine, MAM; Global Medicine, MS; PharmD/MS, Global Medicine; Global Health, BS; Health Promotion and Disease Prevention Studies, BS; graduate degrees in conjunction with the Graduate School in Applied Biostatistics/Epidemiology, MS; Biochemistry and Molecular Biology, MS; Biostatistics, MS, PhD; Cancer Biology and Genomics, PhD; Cell and Neurobiology, MS; Clinical, Biomedical and Translational Investigations, MS; Development, Stem Cells, and Regenerative Medicine, PhD; Epidemiology, PhD; Experimental and Molecular Pathology, MS; Medical Biology, PhD; Molecular Epidemiology, MS, PhD; Molecular Microbiology and Immunology, MS; Molecular Structure and Signaling, PhD; Nurse Anesthesia, MS; Physiology and Biophysics, MS; Psychology and Public Health, PhD/MPH; Stem Cell Biology and Regenerative Medicine, MS; Integrative Biology of Disease, PhD.

The Department of Family Medicine has one academic division: the Division of Physician Assistant Studies, which offers the Master of Physician Assistant Practice. The Department of Preventive Medicine has two academic divisions: the Health Behavior Research Division, which offers a BS, Global Health; BS, Health Promotion and Disease Prevention Studies; BS, Global Health/Master of Public Health; BS, Health Promotion and Disease Prevention Studies/Master of Public Health; Master of Public Health; PharmD/Master of Public Health; PhD, Physical Therapy/Master of Public Health; PhD, Preventive Medicine (Health Behavior Research); and the Biostatistics Division, which offers MS programs in Biostatistics, Molecular Epidemiology, and Applied and Biostatistics/Epidemiology. The division also offers PhD programs in Biostatistics, Epidemiology, and Molecular Epidemiology. In addition, departments of the school have certificate programs in certain medical specialties. The Medical Education Committee (MEC) is responsible for overall planning of the medical school curriculum. Separate curriculum committees plan and supervise the instructional programs for each year of medical school. Each of the committees includes student representatives and faculty members from the departments involved in each year's teaching program.

The curriculum of medical education at USC continues to emphasize preparation of the student to give optimal patient care. Students are progressively involved in patient care beginning with their first semester. The curriculum is patient-oriented, and students are expected to assume increasing responsibility for patient care as they acquire sufficient knowledge and skills. During the clinical experiences of the
Junior/Senior Continuum students eventually attain a level equivalent to that of an intern. At the same time, the school recognizes that the explosion of knowledge and techniques brought about by the current "biotechnology revolution" is rapidly altering the practice of medicine. During the four years of medical school, students cannot be taught all that will be needed for the practice of medicine — either now or in the years ahead. To a far greater degree than in the past, the present curriculum encourages students to acquire skills and habits of self-education and self-instruction that will prepare them for lifelong learning. The faculty of the school recognize that while most students will eventually practice medicine, some will choose an academic research career. The plan of medical education fosters the development of individuals whose careers may be directed along this path. Faculty are available to counsel and encourage research participation by students during their medical school training.

The curricula of the Keck School of Medicine and its departments acknowledge the crucial place of basic medical science in the advance of modern clinical practice. Both basic and clinical science are taught throughout the four years of the undergraduate medical curriculum. Basic science is taught both as pure basic science and in correlation with clinical science. In addition, a number of the school's departments cooperate with the USC Graduate School to offer degree courses leading to the award of the Master of Science and Doctor of Philosophy. Most of these graduate courses may also be taken as part of the school's joint MD/PhD program.

**Minor**

**Health Care Studies Minor**

The USC Dornsife College of Letters, Arts and Sciences and the Keck School of Medicine offer an interdisciplinary minor in health care studies. This minor is targeted to those undergraduates who wish to pursue a postgraduate career in health care or health care related fields. The minor brings together a background in fundamental science necessary to understand the biological basis of medicine with course work that explores health care both in classroom and clinical settings. The minor requires a minimum of 28 units, at least 16 of which must be at the upper-division level. If the core required courses listed below are already included in a student's major, then other lower division courses may be selected from the electives list.

Students should consult their advisers in selecting courses. Depending on the major, prerequisites may increase total units required to complete this minor.

**Required Courses (12 Units)**

- BISC 220Lg General Biology: Cell Biology and Physiology Units: 4 or
- BISC 221Lg Advanced General Biology: Cell Biology and Physiology Units: 4
- CHEM 103Lgx General Chemistry for the Environment and Life Units: 4 or
- CHEM 105aLg General Chemistry Units: 4
- MDA 110 Contemporary Issues and Cases in Health Care Units: 2
- MEDS 220 Preparation for the Clinical Experience Units: 2

**Electives**

Students must choose a minimum of 16 upper division units from the following lists.

**Introduction to Human Health I**

- ANTH 101g Illness and Healing: The Cross-Cultural Perspective Units: 4
- BISC 150Lgx The Nature of Human Health and Disease Units: 4
- PSYC 100Lg Introduction to Psychology Units: 4
- PSYC 360 Abnormal Psychology Units: 4

**Introduction to Human Health II**

- BISC 320L Molecular Biology Units: 4
- BISC 421 Neurobiology Units: 4
- BISC 450L Principles of Immunology Units: 4
- MEDS 260 Challenges in the Forefront of Biomedical Ethics Units: 2
- MEDS 280 The History of Medicine: a Doctor's Perspective Units: 2
- MEDS 300g Statistical Methods for Biomedical Research Units: 4
- PSYC 336L Developmental Psychology Units: 4

**The Biological Bases for Disease Processes**

- BISC 300L Introduction to Microbiology Units: 4
- BISC 307L General Physiology Units: 4
- BISC 330L Biochemistry Units: 4
- HBIO 301L Human Anatomy Units: 4 or
- MEDS 320 Human Cadaveric Anatomy Units: 4
- MEDS 335 Human Development: From Stem to Sternal Units: 2
- MEDS 340 The Brain in Health and Disease Units: 4
- MEDS 350 Drugs and the Brain Units: 2
- MEDS 360 From Bench to Bedside: New Frontiers in Biomedical Research Units: 2
- MEDS 370 Organ Failure: Non-Communicable Chronic Disease Units: 2
- MEDS 380 Stem Cells: Fact and Fiction Units: 2

**Clinical and Biomedical Experience**

- BISC 423 Epilepsy to Ectasy: Biological Basis of Neurological Disorders Units: 4
- MEDS 425 Medical Examiner-Coroner: Investigating Death Units: 2
- MEDS 440 Introduction to Surgical Principles Units: 2
- MEDS 445 Cancer: Introduction to Oncology in the Modern Era Units: 2
- MEDS 450 OB/GYN: The Medicine and Surgery of Reproduction Units: 2
- MEDS 460 Emergency Health Care Units: 2
- MEDS 465 Wilderness and Survival Medicine Units: 4
- MEDS 490 Directed Research in Biomedical Science Units: 2, 3, 4, 5, 6, 7, 8
Note:
*Prerequisite required

Master's Degree

Academic Medicine (MAM)
Keith Administration Building 211
1975 Zonal Avenue
Los Angeles, CA 90033
(323) 442-2372
FAX: (323) 442-2051
Email: nyquist@usc.edu
Program Director: Julie G. Nyquist, PhD

Faculty

Professors: Donna Elliott, MD, EdD (Pediatrics); Jerry Gates, PhD (Family Medicine); Win May, MD, PhD (Medical Education); Julie G. Nyquist, PhD (Medical Education); Beverly Wood, MD, PhD (Medical Education)
Associate Professors: Kathleen Besnine, PharmD, MSED (Pharmacy); Cha-Chi Fung, PhD (Medical Education)
Assistant Professors: Dixie Fisher, PhD (Medical Education); Lori Marshall, PhD, MSN (Pediatrics); Niurka Rivero, MD (Pediatrics); Samuel Yanofsky, MD, MSED (Anesthesiology)
The Master of Academic Medicine is offered by the Keck School of Medicine in collaboration with the Schools of Dentistry and Pharmacy. The goal is to develop leaders who will create and enhance academic and training programs for health care professions globally. Academic medicine is defined in broad terms as relating to those who lead training worldwide in medicine or in other health care related fields. Enacting this vision is possible due to the flexible delivery model selected. The program employs a hybrid model, combining on-campus face-to-face sessions, blended with online course work. During the 32-unit program, the majority of sessions will be delivered using interactive online delivery methods. All students will also be on campus for one-week intensive sessions in the spring of each year, which focus on community building and the development and evaluation of skills.
The program addresses the unique population of medical and health professions faculty who are focused on leading the academic enterprise for health professionals at the undergraduate, graduate and continuing education levels. Our graduates will be positioned to guide future generations of health professionals around the world toward better meeting the health needs of our global society. For those with a clear focus on the academic enterprise, a complementary degree in academic medicine offers the specialized skills needed to lead worldwide development of enhanced training for health professionals, increases professional capacity and provides new opportunity for promotion. The audiences for this degree will typically have primary professional degrees in health fields (e.g., MD, DDS, DPT, RN, MSN, PA, DVM, DO, PharmD, DC, DOM). The Master of Academic Medicine will provide the needed complementary training for clinician educators.

Admission

Applicants for admission to the Master of Academic Medicine program are generally expected to have an advanced degree in a health profession. Proof of graduation is required. For applicants who do not have a degree in a health profession, a bachelor's degree or its equivalent from an accredited institution is required, a grade point average of 3.0 (A = 4.0) is usually expected as well as satisfactory scores on the Graduate Record Examinations (GRE) General Test and three letters of recommendation. For specific information on admission and application procedures, contact the Office of Medical Education, (323) 442-2372.

Students are admitted for the academic year beginning in the fall, although those admitted prior to March 15 may enroll in summer courses. Although there is no formal application deadline, complete applications received before March 1 will be given priority. Application inquiries should be made to: Master of Academic Medicine Program, University of Southern California, Office of Medical Education, 1975 Zonal Avenue, KAM 211, Los Angeles, CA 90033, telephone (323) 442-2372.

Satisfactory Academic Progress

A graduate GPA of at least 3.0 is required at all times. Any student whose graduate GPA falls below 3.0 will be placed on academic probation. Students on academic probation who do not raise their GPA to 3.0 after two semesters of written notification of academic probation will be academically disqualified. A minimum of 32 units of graduate-level course work is required.

Applicants must apply to the Graduate School and meet the minimum requirements for admission to the Graduate School. The Departments of Preventive Medicine, Cell and Neurobiology, Family Medicine, and the Center for Education, Training and Career Development (CETCD) jointly administer the program through the MS Program Office.

The program will consider applicants who satisfy all requirements for admission to the Graduate School. For the MS program in Clinical and Biomedical Investigations, MCAT scores may be substituted for the GREs. Applicants not meeting Graduate School requirements for regular standing may, with approval of the Graduate School, be conditionally admitted. Regular standing is contingent upon maintaining a GPA of 3.0 in the first 12 units of graduate studies. All graduate students must maintain a GPA of 3.0 throughout their graduate studies.

General Requirements

Graduation requires the completion of a minimum of 29 units, of which a minimum of 15 units are didactic course credits taken in the first year (including summer sessions), with the remaining units being directed to: a) PM 590 Directed Research (1–12 units) and PM 594a Master's Thesis, PM 594b Master's Thesis (4 units) taken in the second year. The equivalent of one year of full-time effort must be devoted to research leading to a master's thesis. The thesis provides a structure for the development of a plan to address a research problem and a suitable approach to the analysis and presentation of the results.

Because the background and interests of applicants varies widely, one of the co-directors will consult with each student prior to the first year in order to design an individualized schedule of recommended courses, or this may be negotiated with a student's faculty sponsor. At the end of the first year, the trainee must submit a final program plan to the co-directors. This will summarize the courses taken, the proposed thesis title, and the names and credentials of the MS thesis committee. One of the members of the MS thesis committee will be the trainee's research adviser and will serve as the chair of the committee. At least one member of the thesis committee must be from outside the student's department. For faculty, at least two members of the thesis committee must be from outside the student's department.

For those trainees or SC CTSI's CETCD K and T awardees who do not wish to pursue an MS degree, the school offers a certificate in clinical, biomedical, and translational investigations (CBTI). The certificate program requires completion of 12 credits, and a minimum of six months of practical research experience working on a research project (PM 590) approved by either an Oversight Committee or the CETCD's K and T Award Committee Review Process. Students are expected to attend the three day workshop on NIH proposal development if offered by Thomas Ogden, MD, PhD, and a workshop on the principles of scientific manuscript preparation.

Clinical Translational Research (13-16 Units)

PM 510L Principles of Biostatistics Units: 4
PM 512 Principles of Epidemiology Units: 4
PM 523 Design of Clinical Studies Units: 3 or
PM 612a Clinical Translational Research (CTR) Units: 4
PM 612b Clinical Translational Research (CTR) Units: 4
PM 612c Clinical Translational Research (CTR) Units: 4

Electives (Pick one course)
- BIOC 543 Human Molecular Genetics Units: 4
- MPTX 511 Introduction to Medical Product Regulation Units: 3
- MPTX 602 Science, Research and Ethics Units: 2
- PM 511bL Data Analysis Units: 4
- PM 512 Principles of Epidemiology Units: 4
- PM 518a Statistical Methods for Epidemiological Studies I, II Units: 3
- PM 570 Statistical Methods in Human Genetics Units: 4
- RSCI 530 Translational Medicine: An Overview Units: 2

Community-Based Intervention Trials (16 Units)
- PM 512 Principles of Epidemiology Units: 4
- PM 528 Program Design and Evaluation Units: 4
- PM 563 Organizing and Mobilizing Communities for Public Health Units: 4

Electives (Pick one course)
- PM 526 Communications in Public Health Units: 4
- PM 562 Intervention Approaches for Health Promotion and Disease Prevention Units: 4

Design, Conduct and Analysis of Clinical Studies (18 Units)
- PM 510L Principles of Biostatistics Units: 4
- PM 51aL Data Analysis Units: 4
- PM 523 Design of Clinical Studies Units: 3
- PM 538 Introduction to Biomedical Informatics Units: 3
- PM 570 Statistical Methods in Human Genetics Units: 4

Epidemiology and Disease Etiology (14-15 Units)
- PM 510L Principles of Biostatistics Units: 4
- PM 512 Principles of Epidemiology Units: 4
- PM 517a Research Methods in Epidemiology Units: 3

Electives (Pick one course)
- PM 518a Statistical Methods for Epidemiological Studies I, II Units: 3
- PM 527 Epidemiology of Infectious Disease Units: 4
- PM 529 Environmental Health: An Epidemiological Approach Units: 4
- PM 533 Genetic and Molecular Epidemiology Units: 3, 2 years
- PM 570 Statistical Methods in Human Genetics Units: 4
- PM 599 Special Topics Units: 2, 3, 4

Molecular Biology (16 Units)
- INTD 531 Cell Biology Units: 4
- INTD 561 Molecular Biology Units: 4
- INTD 571 Biochemistry Units: 4

Electives (Pick one course)
- BIOC 543 Human Molecular Genetics Units: 4
- INTD 504 Molecular Biology of Cancer Units: 4, 2 years
- INTD 555 Biochemical and Molecular Bases of Disease Units: 4
- MICB 551 Procaryotic Molecular Genetics Units: 4

Cell Biology (15 Units)
- INTD 531 Cell Biology Units: 4
- INTD 571 Biochemistry Units: 4
- PATH 553 Methods in Cellular and Clinical Pathology Units: 3

Electives (Pick one course)
- INTD 504 Molecular Biology of Cancer Units: 4, 2 years
- INTD 555 Biochemical and Molecular Bases of Disease Units: 4

Vision Science (13-18 Units)
- INTD 501 Recent Advances in Vision Science Units: 1
- INTD 531 Cell Biology Units: 4
- INTD 571 Biochemistry Units: 4
- INTD 573 Systems Physiology and Disease II Units: 4
- PSCI 667 Intracellular Drug Delivery and Targeting Units: 2, 2 years

Alternative Options Track (Minimum 16 Units)
Courses are determined by mentor and student, based on research interests, with approval from the oversight committee.

Seminars/Workshops
Participation is required in a Recent Advances Journal Club to learn how to read papers critically and develop the speaking skills necessary to explain a research paper. Faculty members in the program rotate as course directors in order to emphasize new topics. Students are expected to attend the three-day workshop on NIH Proposal Development if offered by Thomas Ogden, PhD, and a workshop on the principles of scientific manuscript preparation.

**Global Biotechnology (MS)**

The MS in Global Biotechnology program is offered by the Keck School of Medicine. The Global Biotechnology program will combine a unique curriculum and distinctive practical training that exposes students to biotechnology and its specific applications in various fields. Drawing strength from the Keck School of Medicine faculty's education, research, practice expertise, and global connections, this program educates students on approaches used in the academic research, biotechnology, and medical sciences industries in the US and internationally. Students in this program will gain an understanding of the science and technology underlying diseases and interventions, the role of biotechnology in developing new therapies, the regulatory framework that will impact the use of new interventions, and an understanding of the private and public capital that will develop the growing biotechnology and biomedical markets. Career options for graduates include, but are not limited to: field applications scientists, research scientists, outcomes research directors, technology licensing officers, clinical research scientists, analysts, consultants, managers, managing directors, operations directors, director of investment, business development, investor relations, COO, and founders of biotechnology companies, biomedical companies, and other entities that interact with these companies.

**Admission**

Admission requirements include a minimum GPA of 3.3 and an undergraduate major in biological sciences, or at least 6 bioscience courses in the molecular, cellular, genetics and biochemistry topics. All applicants considered for admission will be interviewed (in person or via video conferencing) with program director and/or other faculty.

All applicants are required to have taken the Graduate Record Examinations (GRE) General Test, the Dental Admission Test (DAT) or the Medical College Admission Test (MCAT). A minimum score of 300 on the GRE, 18 on the DAT or 28 on the MCAT is required. Applicants must be graduated prior to registration.

**Satisfactory Academic Progress**

A graduate GPA of at least 3.0 is required at all times. Students whose graduate GPA falls below 3.0 will be placed on academic probation. Students on academic probation who do not raise their GPA to 3.0 after two semesters of written notification of academic probation will be academically disqualified. A minimum of 30 units of graduate level coursework is required for graduation.

**Degree Requirements**

General requirements include at least 30 units of required courses as follows:

(Note: Students, who take 15 units of the required core courses, must take two additional units of electives to satisfy the 30 total unit requirements.)

**Core Courses (15-17 units)**

**Global Biotechnology (MS)**

**Program Director:** Elahe Nezami, PhD

The Master of Science in Global Medicine (MSGM) is offered by the Department of Educational Affairs of the Keck School of Medicine. The program aims to train medical, dental and pharmacy students; current physicians and allied health professionals; and those planning to pursue degrees in the allied health professions to analyze and address critical issues in global medicine. The program provides a solid
Applicants must also supply three letters of recommendation their USMLE results in lieu of GRE, DAT or MCAT scores. Graduates program staff for advisement. International Medical standardized test score requirements are asked to consult with the MCAT is required. Applicants beneath these a minimum score of 300 on the GRE, 18 on the DAT or 28 Test (DAT) or the Medical Examinations (GRE) General Test, the Dental Admission Tracks must be bypassed two options. The advanced standing option allows students to By providing the knowledge and training necessary to address current and future global medical challenges, the MS in Global Medicine program responds to the Institute of Medicine's recommendation that the education of health professionals include core course work that promotes literacy in global medicine. In addition to gaining a strong medical science foundation, students are immersed in coursework that examines methods used to create innovative programming, solutions and responses to global health challenges, thereby furnishing them with the problem-solving skills and analytical frameworks essential to their future career paths. Through partnerships with the Marshall School of Business and the Viterbi School of Engineering, the MS in Global Medicine also includes a Management Track for students who intend to pursue international health management, and an Entrepreneurship Track for students interested in applying business acumen to the challenges of global health in innovative ways. Upon completion of the MS in Global Medicine, students will be equipped to serve as leaders within the allied health field, including, but not limited to: medicine, pharmacy, dentistry and nursing. In addition, graduates will be prepared to collaborate with, or seek employment from, a variety of international aid, nonprofit, and global health organizations such as: the United Nations, the International Red Cross, United Nations Joint Programme on HIV/AIDS, United Nations Children's Fund, World Health Organization, World Bank and the Centers for Disease Control and Prevention.

Admission
Applicants for admission to the program must have a bachelor's degree or its equivalent from an accredited institution and have earned a GPA of 3.0 (A = 4.0) in undergraduate work. Prerequisite undergraduate course work for Clinical Track applicants must include one year of general biology, one year of general chemistry, one year of organic chemistry and one semester of calculus. Applicants to the Management and Entrepreneurship Tracks should consult with advisers for prerequisite exceptions. All applicants are required to have taken the Graduate Record Examinations (GRE) General Test, the Dental Admission Test (DAT) or the Medical College Admission Test (MCAT). A minimum score of 300 on the GRE, 18 on the DAT or 28 on the MCAT is required. Applicants beneath these standardized test score requirements are asked to consult with program staff for advisement. International Medical Graduates (IMGs) from accredited institutions can submit their USMLE results in lieu of GRE, DAT or MCAT scores. Applicants must also supply three letters of recommendation from evaluators qualified to assess their potential for graduate work. If applying for the advanced standing option, U.S. applicants must have successfully completed their first year of an MD (Doctor of Medicine) or DDS (Doctor of Dental Surgery) program or earned a PharmD degree from a U.S.-accredited institute; international applicants must have earned a bachelor's degree in medicine and surgery or a degree equivalent of DDS (Doctor of Dental Surgery) or a PharmD degree from an accredited institute. Applicants must supply a completed application for graduate studies including: transcripts from all institutions previously attended, standardized test scores and three letters of recommendation. Applications are considered for enrollment in both fall and spring semesters. For further information contact: Master of Science in Global Medicine Program, 1333 San Pablo Street, MCA 144, Los Angeles, CA 90033, Tel: (323) 442-3141, email: msgm@med.usc.edu.

Advisement
The program recommends that students meet with an academic adviser of the program each semester prior to registration.

Satisfactory Academic Progress
A graduate GPA of at least 3.0 is required at all times. Any student whose graduate GPA falls below 3.0 will be placed on academic probation. Students on academic probation who do not raise their GPA to 3.0 after two semesters of written notification of academic probation will be academically disqualified. A minimum of 32 units of graduate level course work is required for graduation from the clinical, management and entrepreneurship tracks. A minimum of 24 units of graduate-level course work is required for graduation with the advanced standing option.

Degree Requirements
Global Medicine students in the Clinical, Entrepreneurship and Management Tracks must complete a minimum of 32 total units to earn the degree. (The Clinical Track offers an Advanced Standing Track option for qualified students that requires a minimum of 24 units). Students are required to take the core and elective courses specified for the track in which they are matriculating and must complete enough courses to complete 32 or more total units overall.

Core Courses
GM Clinical Track Core
Clinical Track students must complete the following 12 units of core course work:

MEDS 500 Basic Concepts in Global Health Units: 4
MEDS 503L Core Principles System I Units: 4
MEDS 504L Core Principles System II Units: 4

GM Advanced Standing Track Core
The Clinical Track offers an Advanced Standing Track to those deemed eligible for the track, including: physicians, dentists, pharmacists, and current medical and dental students who have previously taken course work that is equivalent to MEDS 503 and MEDS 504. Advanced Standing Track students must complete the following 8 units of core course work and must select 16 units of Clinical Track electives.

MEDS 500 Basic Concepts in Global Health Units: 4
MEDS 502 Global Epidemiology of Diseases and Risk Factors Units: 4

**GM Entrepreneurship Track Core**
Entrepreneurship Track students must select from BAEP 550 or BAEP 551 to complete 13 total units when combined with the other core courses below:
- BAEP 550 Entrepreneurship and Venture Management Units: 1.5
- BAEP 551 Introduction to New Ventures Units: 3
- BAEP 552 Cases in Feasibility Analysis Units: 3
- BAEP 553 Cases in New Venture Management Units: 1.5, 3
- MEDS 500 Basic Concepts in Global Health Units: 4

**GM Management Track Core**
Management Track students must complete the following 14 units of core course work:
- DSO 582 Service Management: Economics and Operations Units: 3
- GSBA 520 Business Fundamentals for Non-Business Professionals Units: 3, 4
- MEDS 500 Basic Concepts in Global Health Units: 4
- MEDS 502 Global Epidemiology of Diseases and Risk Factors Units: 4

**Elective Courses**

**GM Clinical Track Electives**
Clinical Track students must complete a minimum of 20 units of elective courses from among the following MEDS electives:
- MEDS 501 Critical Issues in Global Health Units: 4
- MEDS 502 Global Epidemiology of Diseases and Risk Factors Units: 4
- MEDS 510 Global Health Modules, Malaria Units: 2
- MEDS 511 Global Health Modules, Tuberculosis Units: 2
- MEDS 512 Global Health Modules, Maternal and Child Health I Units: 2
- MEDS 513 Global Health Modules, Maternal and Child Health II Units: 2
- MEDS 514 Global Health Modules, Tropical Disease Units: 2
- MEDS 515 Global Health Modules, HIV/AIDS Units: 2
- MEDS 516 Cultural Competence in Health and Medicine Units: 2
- MEDS 517 Health and Human Rights Units: 2
- MEDS 518 Children in Emergency Situations: Global Policies and Programs Units: 2
- MEDS 519 Global Oral Health Units: 2
- MEDS 520 Medical Spanish for the Health Professions Units: 2
- MEDS 521 Emerging and Re-emerging Infectious Diseases Units: 2
- MEDS 522 Human Hepatitis Viruses Units: 2
- MEDS 523 Global Toxicity and Carcinogenesis Units: 2
- MEDS 524 Grantwriting for Non-Government Organizations Units: 2
- MEDS 525 Global Mental Health Units: 2
- MEDS 526 Alternative and Eastern Medicine: A Biomedical Approach Units: 2
- MEDS 527 Zoonotic Infectious Diseases Units: 2
- MEDS 528 Global Health Modules, Sexually Transmitted Infections Units: 2
- MEDS 529 Refugee Health Care Units: 2
- MEDS 530a Foundation of Medicine: Anatomy, Physiology, and Pathology Units: 4
- MEDS 530b Foundation of Medicine: Anatomy, Physiology, and Pathology Units: 4
- MEDS 530c Foundation of Medicine: Anatomy, Physiology, and Pathology Units: 4
- MEDS 531 The Politics of Global Health Units: 2
- MEDS 532 Non-communicable Diseases Units: 2
- MEDS 533 Emerging Cell-based Therapeutics Units: 2
- MEDS 534 Global Biotechnology Entrepreneurship Units: 2
- MEDS 535 Culture, Lifestyle, and Health Units: 2
- MEDS 550 Clinical Medicine and Health Care Reform in Taiwan Units: 2
- MEDS 551 Clinical Medicine and Socioeconomic Factors in Uganda Units: 2
- MEDS 552 Clinical Medicine and Health Care Reform in Jordan Units: 2
- MEDS 553 Clinical Medicine and Health Care Challenges in India Units: 2
- MEDS 554 Clinical Medicine and Healthcare Delivery in Panama Units: 2
- MEDS 555 Clinical Medicine and Healthcare Access in Honduras Units: 2
- MEDS 556 Global Health Field Study, New York Units: 2
- MEDS 557 Clinical Medicine and Healthcare Dynamics in Denmark Units: 2
- MEDS 558 Clinical Medicine and Translational Research in Argentina Units: 2
- MEDS 559 Clinical Medicine and Healthcare Determinants in China Units: 2
- MEDS 560 Innovating in Healthcare in Malaysia Units: 2
- MEDS 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- MEDS 562 Healthcare in Thailand Units: 2
- MEDS 563 Global Healthcare Development and Social Justice in Italy Units: 2
- MEDS 564 Health Behavior and Healthcare in Germany Units: 2
- MEDS 566 Healthcare in Fiji Units: 2
- MEDS 599 Special Topics Units: 2, 3, 4

**GM Entrepreneurship Track Electives**
Entrepreneurship Track students must complete a minimum of 15 units of MEDS electives and 3 units (1 course) from the following:
- BAEP 559 Investing in New Ventures Units: 3
- BAEP 563 Corporate Entrepreneurship Units: 3
- BAEP 591 Social Entrepreneurship Units: 2, 3
- DSO 586 Global Healthcare Operations Management Units: 3
Focused on preparation for leadership roles, the graduate certificate program in global medicine is for students who do not wish to pursue an MS degree in global medicine, but hope to pursue or expand careers in global health care. Students will study current topics in global health and health care, and will have a strong grounding in cultural competence, specific diseases, and creating and implementing health interventions in developing countries. Students take 16 units of graduate course work that may not be used or have been used for any other degree or certificate program. These units include two core classes and eight units of electives, as follows:

**Core Courses**
- MEDS 500 Basic Concepts in Global Health Units: 4
- MEDS 502 Global Epidemiology of Diseases and Risk Factors Units: 4

**Elective Courses:**
Students will take 8 units of electives, chosen in consultation with their adviser, from among all MEDS courses numbered 510 or above. For example, there are groups of courses relevant to women's and family health; infectious diseases; health care in developing countries; working with diverse populations in the United States, etc.

**Global Medicine Graduate Certificate**

**Recommended Core Courses for Each Research Track**

**Academic Medicine Certificate (all learners)**

- ACMD 501 Introduction to Academic Medicine Worldwide: 3

**Teaching/Learning Track**
Students in the Teaching/Learning track must select two of the three courses below (6 units).

- ACMD 511 Competencies in Academic Medicine and Health I Units: 3
- ACMD 512 Competencies in Academic Medicine and Health II Units: 3
- ACMD 513 Professionalism in Academic Medicine and Health Units: 3

**Leadership Track**
Students in the Leadership track must take the two courses listed below to provide core skills in leadership (6 units).

- ACMD 502 Becoming a Leader in Academic Medicine Worldwide Units: 3
- ACMD 503 Leading Change in Academic Medical Centers Units: 3

**Elective**
All certificate students are required to take 3 units of elective course work from the courses available within the Master of Academic Medicine program. All courses should be selected with the approval of the learner's adviser.

**Notes:**
- On a case-by-case basis and with pre-approval, GM students may take classes outside their particular group.

**University Certificate**

**Academic Medicine Certificate**

**University Certificate Programs**

**Academic Medicine Certificate**
Students who do not wish to pursue a Master of Academic Medicine degree at this point may earn a university certificate in Academic Medicine. The certificate requires 12 units of course work. Each learner may only seek a single certificate. There are two options available, the Teaching/Learning Track and the Leadership Track. The teaching learning track provides graduates with the essential principles of teaching and learning needed to integrate learning principles, teaching techniques and assessment methods within the health professions to effectively teach health professions' learners at all levels: undergraduate, graduate and continuing education. The leadership track is designed to prepare those in academic medicine for leadership positions, for example assistant/associate dean, program director (including assistant or associate), designated institutional officer and associate or vice chair for education. After completion of the certificate, if a learner decides to go on to pursue a Master of Academic Medicine (MACM) degree all 12 units of the certificate can be applied to the MACM degree.

All students begin with the core course: ACMD 501 (Introduction to Academic Medicine Worldwide, 3 units). Students then take two required courses (6 units) related to their selected track. Each student completes the 12-unit certificate with 3 units of elective course work from the courses available within the Master of Academic Medicine program. All courses should be selected with the approval of the learner's adviser.

**Academic Medicine Certificate (all learners)**

- ACMD 501 Introduction to Academic Medicine Worldwide: 3

**Teaching/Learning Track**
Students in the Teaching/Learning track must select two of the three courses below (6 units).

- ACMD 542 Strategic Issues for Global Business Units: 3
- MKT 565 Global Marketing Units: 3
- MOR 569 Negotiation and Deal Making Units: 3

**GM Management Track Electives**
Management Track students must complete a minimum of 12 units of MEDS electives and 6 units (2 courses) from the following:

- ISE 507 Six-Sigma Methods and Applications Units: 3
- ISE 508 Health Care Operations Improvement Units: 3
- MKT 565 Global Marketing Units: 3
- MOR 542 Strategic Issues for Global Business Units: 3
- MOR 569 Negotiation and Deal-Making Units: 3
Doctor of Medicine/Master of Business Administration (MD/MBA)

In response to the ongoing reorganization of health care delivery systems, and the growing awareness of the impact of business decisions on health care, the Keck School of Medicine and the USC Marshall School of Business jointly offer an innovative program for individuals seeking knowledge in both medicine and business administration. The program is designed to prepare its graduates to assume leadership in the design and management of health care systems.

The MD/MBA program spans five years. Interested students apply during their second or third year of medical school, and begin required MBA courses following successful completion of the first two or first three years of medical school. The remaining time is devoted to the clinical clerkships of the Keck School of Medicine and completion of graduate business elective courses. At the conclusion of the program, students will have completed 48 units in the Marshall School of Business, including required and elective courses, and four years of courses in the Keck School of Medicine. Dual degree students may not count courses taken outside the Marshall School of Business toward the 48 units.

First and Second Years: Required medicine courses.

Third or Fourth Year: Required MBA courses and graduate business electives.

Remaining Years: Required MBA courses and graduate business electives.

Admission Requirements

Students who have a baccalaureate degree from an accredited college or university and have successfully completed at least two years in the Keck School of Medicine will be considered for admission to the Marshall School of Business.

Requirements for admission to the regular MBA Program (with the exception of the GMAT) must be fulfilled by the medical student for admission to the Marshall School. The MD and the MBA degrees are awarded simultaneously upon completion of their requirements by the Keck School of Medicine and the Marshall School of Business.

Doctor of Medicine/Master of Public Health (MD/MPH)

The joint MD/MPH program at the Keck School of Medicine is designed for individuals who envision a medical career that combines public health and medical disciplines. Many individuals entering careers as medical doctors or public health practitioners wish to acquire not only medical practice competencies, but also an understanding of the history, organization, goals and philosophy of public health. The joint MD/MPH program offers a broad-based orientation to public health while the student completes medical school requirements. The Master of Public Health degree provides increased knowledge of and sensitivity to the political, historical, economic and social environments of health promotion and health services delivery.

The MD/MPH program can be completed in four or five years. In the four-year curriculum, students begin the core MPH courses in the summer prior to beginning the first year of the medical school curriculum. Additional MPH
coursework is taken in the summer between the first and second years of medical school and during the summer before the beginning of the fourth year of medical school. In the five-year curriculum, students begin the core MPH courses following the successful completion of the first two years of medical school. The last two years of the program are devoted to clinical clerkships of the School of Medicine and to the completion of the elective courses and practicum (field experience) of the MPH program. At the conclusion of the joint degree program, students will have completed 42–46 units in the Master of Public Health program and four years of courses in the Keck School of Medicine.

Applicants must choose the four-year MD/MPH option in the AMCAS primary application. A separate statement of purpose will be required as part of the Keck Secondary Application. For the five-year MD/MPH, students who are enrolled in the Keck School of Medicine must apply to the Master of Public Health program no later than January of their third year. All requirements for admission to the regular MPH program must also be fulfilled by dual degree applicants.

All students in the MD/MPH program must meet course requirements, grade point average requirements and program proficiency requirements of both programs. Students must have a grade point average of 3.0 in the MPH curriculum to meet graduation requirements. The MD and the MPH degrees are awarded simultaneously upon completion of the Keck School of Medicine and the Master of Public Health program requirements. For more information, contact the MPH Program Office at (323) 442-7257.

**Doctor of Medicine/Master of Science, Global Medicine**

The dual degree in Doctor of Medicine and Master of Science in Global Medicine will provide medical students with formal education in the field of global health. Students will benefit from a curriculum that supplements and strengthens their medical knowledge with additional expertise in cultural competence, the specific diseases that affect various populations worldwide, and the unique issues respective to practicing medicine in a developing country or in vulnerable, underserved populations domestically.

**Requirements**

Current enrollment in the Keck School of Medicine MD program and successful completion of at least the first two years of the MD curriculum are required prior to submitting an application to the MS in Global Medicine program for admission to the dual degree program. Students must gain admission to and fulfill the degree requirements for both programs, which include four years of course work for the Doctor of Medicine and 24 units of the MS in Global Medicine (Clinical track only).

For the dual degree with Global Medicine Clinical Track, 24 GM elective units should be successfully completed. The MD and the MS in Global Medicine degrees are awarded simultaneously upon successful completion of both degree requirements.

**Program Adaptation**

For the dual degree with Global Medicine Clinical Track, there are no Global Medicine core unit requirements. Students enrolled in MD/MSGM dual degree will be eligible to apply 2 GM study-abroad elective units and 2 other GM elective units (except MEDS 503, MEDS 504, MEDS 520, MEDS 524 and MEDS 530a, MEDS 530b, MEDS 530c) toward their MD program elective requirements. GM Management Track electives cannot be applied toward either degree requirements.

**Master of Science, Global Medicine/Doctor of Pharmacy (PharmD/MS)**

The dual degree in Pharmacy and Global Medicine is designed for students who are interested in providing pharmaceutical care to underserved populations around the world. Students enrolled in this dual degree program will benefit from an advanced understanding of the role of, and issues surrounding, modern medicine in developing countries.

**Requirements**

Students must gain admission to and fulfill the degree requirements for both programs, which include 138 units for the Doctor of Pharmacy and 24 units for the MS in Global Medicine. Six units of MEDS elective units can be used toward the PharmD elective requirement, and PHRD 503 and PHRD 504 substitute for MEDS 503 and MEDS 504.

**Program Adaptation**

Because MEDS 503 and MEDS 504, core requirements for the MS in Global Medicine program, cover the same material as PHRD 503 and PHRD 504, the PharmD/Global Medicine dual degree program substitutes PHRD 503 and PHRD 504 for MEDS 503 and MEDS 504 as core requirements for the dual degree.

**Medicine (MD/PhD)**

Departments and programs of the University of Southern California and the California Institute of Technology participate in the joint MD/PhD degree program administrated by the USC Graduate School, the Keck School of Medicine and the California Institute of Technology. This program integrates the medical school curriculum with graduate curricula in the basic sciences, to provide a unified course of study leading to both the MD and PhD degrees. This program is especially designed to prepare highly qualified students for careers in academic medicine and medical research. Formal course work and dissertation research provide the student with in-depth scientific preparation and research experience which enhances the application of basic science information to the diagnosis, treatment and prevention of disease. Conversely, the PhD education becomes more meaningful because of its disease-oriented emphasis.

The curriculum for MD/PhD students differs from that of PhD graduate students in the basic sciences in that the former take medical school courses as well as selected graduate level basic science courses and specific courses designed for MD/PhD students. The integrated training of the MD/PhD program enables students to compress their total academic effort by applying some course work toward the requirements
of both degrees. On average, completion of the combined program requires a total of eight years. The following graduate programs from the Keck School of Medicine participate in the MD/PhD program:

- Cancer Biology and Genomics
- Development, Stem Cells and Regenerative Medicine
- Medical Biology
- Molecular Structure and Signaling
- Biological Sciences/Neurosciences, Molecular and Computational Biology
- Engineering
- Preventive Medicine (Biostatistics, Epidemiology, IPR/Health Behavior, Molecular Epidemiology)

Selected graduate programs from the USC Viterbi School of Engineering and the USC Dornsife College of Letters, Arts and Sciences also participate in the combined degree program.

Time limits for qualifying examinations and other procedures are determined by considering MD/PhD students as medical students for the periods when they are following the medical curriculum and as full-time graduate students during their years of graduate research prior to advancement to the Junior/Senior Continuum.

MD/PhD candidates have the option of pursuing a laboratory experience before beginning the Year I medical curriculum through a laboratory rotation at either USC or the California Institute of Technology. This laboratory experience is strongly encouraged although not required. During the first two years of their program, MD/PhD students follow the medical school curriculum and gain added exposure to research faculty through a special survey course. Students are guided by the MD/PhD executive committee, which outlines the integration of the graduate program with the medical school curriculum and serves as the students' liaison until they have selected a graduate program and graduate research adviser. The graduate programs vary widely in the extent to which they allow credit toward the PhD for courses taken during the first two years of medical school. MD/PhD students are encouraged to select a graduate program by early spring of the second year of medical school. Students are required to apply for admission to the PhD program of their choice by the recommended deadline on the graduate application.

Prior to entering PhD studies, the Keck School of Medicine allows MD/PhD candidates the option of beginning their clinical training by taking one six-week required clerkship in either Family Medicine or Pediatrics. This can provide an early introduction to clinical medicine and a context for integration with the basic sciences of the thesis years. Beginning with the third year of the MD/PhD program, students enter their selected program as full-time graduate students. Although the content of graduate courses required of MD/PhD students is generally identical to that required of PhD students in the same graduate program, MD/PhD students are permitted greater latitude in the scheduling of their graduate courses. Four years are commonly necessary to fulfill requirements for the PhD, including course work, qualifying examinations, independent dissertation research, and writing of the dissertation.

After completion of the graduate program, the student is advanced to the Junior/Senior Continuum and completes the final two years of clinical training required by the medical school curriculum. No portion of clinical training is deleted from the joint program. Prior to entering the clinical component of the joint degree, students will be expected to participate in a clinical shadowing experience, which could be done throughout the PhD studies or as part of an intensive program prior to entering the clinic. Students will also be required to participate in the Medical Scholars Program clinical tutoring skills program held in the spring of each year and re-take the Year II Objective Structured Clinical Examination at the end of May with the second year medical students.

Keck School of Medicine-Caltech MD/PhD Program

A joint program between the Keck School of Medicine and the California Institute of Technology (Caltech) was established for the granting of the MD/PhD degree. Students do their preclinical and clinical work at the Keck School of Medicine and their PhD work with any member of the Caltech faculty, including the biology, chemistry, engineering, applied sciences divisions and interdisciplinary programs divisions. Admission to this joint program is made through the usual Keck/USC MD/PhD process. All applicants are interviewed at Keck School of Medicine and Caltech. Matriculated students in this program have the option of doing their PhD at USC or Caltech. The MD degree will be awarded from the Keck School of Medicine and the PhD from Caltech.

Further information about the MD/PhD program at the Keck School of Medicine may be obtained by contacting: MD/PhD Program, Keck School of Medicine, 1975 Zonal Avenue (KAM 200), Los Angeles, CA 90089-9023; (323) 442-2965, FAX: (323) 442-2318; email mdphdpgm@med.usc.edu.

Doctoral Degree

Medicine (MD)

The Keck School of Medicine awards the Doctor of Medicine to enrolled students who have satisfactorily completed the four-year curriculum of the school. This curriculum integrates instruction in all departments of the school:

- Department of Anesthesiology
- Department of Biochemistry and Molecular Biology
- Department of Cell and Neurobiology
- Department of Dermatology
- Department of Emergency Medicine
- Department of Family Medicine
- Department of Medical Education
- Department of Medical Microbiology and Immunology
- Department of Neurological Surgery
- Department of Neurology
- Department of Obstetrics and Gynecology
- Department of Ophthalmology
- Department of Orthopaedics
- Department of Otolaryngology — Head and Neck Surgery
- Department of Pathology
- Department of Pediatrics
- Department of Physiology and Biophysics
- Department of Preventive Medicine
- Department of Psychiatry and the Behavioral Sciences
- Department of Radiation Oncology
- Department of Radiology
- Department of Stem Cell Biology
- Department of Surgery
- Department of Urology.

The sections that follow provide a synopsis of the emphases and organization of this four-year curriculum.

Years I–II (two academic years)
The curriculum is designed to enhance the students' understanding of the basic sciences and their relevance to clinical medicine. The methodology used will improve students' problem-solving and independent study skills. Curriculum themes are delivered in a case-centered format with the integration of small-group learning sessions, directed independent study and newer instructional technologies emphasized.

Year I–II begins in the first semester with Foundations of Medical Sciences followed by organ system review ending with Integrated Case Study section. There is an eight-week summer break between the first and second years. Students also take Clinical Translational Research (CTR), Evidence Based Medicine (EBM), Introduction to Clinical Medicine (ICM) and Professionalism and the Practice of Medicine (PPM).

Each week of the academic year is composed of approximately 20 hours of lecture and small group sessions with an additional 20 hours of independent directed study, CTR, EBM, ICM and PPM. Examinations in all systems throughout the first two years are graded Pass/Fail.

**Foundations of Medical Sciences (FMS)**

This 19-week introductory system provides the student with the fundamental knowledge necessary for the integrated study of the basic and clinical sciences in the human organ systems. Foundations of Medical Sciences is divided into three sections: FMS I, II and III. The overarching goal for these sections is the use of knowledge of medical science to describe basic concepts relating to the structure and function of the human body in normal and diseased states, and thus, provide a foundation for comprehending the disease-specific content required to achieve the case-based objectives in subsequent organ systems.

**Gross Anatomy**

Cadaver dissection remains a unique teaching tool by which the three dimensional organization of the human body is studied. Gross Anatomy will begin in the Core Principles of health and disease system with the dissection of the body wall and major body cavities followed by head and neck dissection in the neurosciences system, limbs, dissection during the musculoskeletal system and pelvic cavity dissection in reproduction system. Continued study of gross anatomy by use of prospected anatomical specimens as well as computer programs, selected review lectures, and so on, continues throughout the integrated organ systems.

**Introduction to Clinical Medicine (ICM)**

ICM expresses the strongly patient-centered orientation of the medical school curriculum. The student is introduced to patients and is involved in patient care activities from day one. Students are introduced to the principles of patient care and management and examine what it means to be a physician and how one becomes a physician.

The major content areas of the course include communication in the setting of illness, the unified concept of health and disease (the biopsychosocial model), basic clinical skills and the correlation of basic science with clinical medicine. ICM emphasizes the systematic acquisition of the clinical skills of interviewing, history taking, physical examination, elementary clinical problem solving and medical record keeping. Throughout the Year I–II continuum, the ICM clinical skills curriculum is integrated with basic science instruction. Students can therefore learn and apply basic science knowledge in the clinical setting. By encouraging a thorough understanding of the direct applications of basic science research to modern clinical medicine, instructors motivate the student to learn, use and retain more of the content and concepts presented in the basic science portions of the curriculum.

A group of five or six students spends from four to eight hours each week with an instructor from the clinical faculty who remains with the group for one to two years. As the group deals with basic medical themes (death, pain and helplessness) and issues (patient responsibility, learning to live with ambiguity and uncertainty), instructors help students to cope with their own feelings. This format opens the door for student-faculty interaction and improvement of student-faculty communication.

Instructors encourage students to take advantage of the learning experiences provided by their roles as helping and therapeutic persons. Students develop their ability to communicate with patients in the setting of illness and are guided by patient concerns to enhance their own growing knowledge, skills, abilities and responsibilities. Students are expected to acquire skills and habits of self-education and self-instruction that will prepare them for lifelong learning. The unified concept of health and disease presented in this course enables students to comprehend the human organism in all its complexity. Using their clinical experiences as a teaching model, students are taught to consider the patient as an integrated whole and to view the patient's illness or disease as more than simply a disruption of physiologic processes or a collection of physical findings.

Additional learning experiences occur through workshops and focus experiences. ICM workshops provide standardized instruction in history taking and physical examination, as well as integrated instruction in areas that cross disciplines. These include physician well-being, substance abuse, domestic violence, and ethics. Through focus experiences, students are encouraged to explore a variety of practice environments as well as community-based health and social services. For example, students may visit outpatient clinical settings, a geriatrics long term care facility, a hospice care facility or homeless services organizations.

**Professionalism and the Practice of Medicine (PPM)**

The purpose of the PPM course is to create a community and social context to provide, identify and facilitate learning from professional role models for students throughout the first two years of the medical school curriculum, as well as to help students gain skills and competence in the areas of communication, the social and community context of health care, ethical judgment, self-awareness and reflection, self-care and personal growth, professionalism, cultural competence, and lifelong learning. The curriculum is dynamic and interactive, allowing for much small-group discussion and participation. Students are encouraged to work collaboratively and enhance small-group skills, in order to improve their participation in Introduction to Clinical Medicine (ICM), Gross Anatomy, MDL laboratories and
large-group sessions, as well as to prepare them for the team work of their clinical years. 

The PPM course sessions meet on Monday afternoons, typically for two hours per session. The students meet in groups with two faculty members, who serve as their mentors throughout the first year of their pre-clinical education; at least one mentor is a clinician. The clinical faculty comes from multiple disciplines within Keck and the local community. While the course features large lectures, there is a great emphasis on small-group learning acquired from community leaders, faculty-mentored small-group discussions, student presentations and student-led sessions. The students participate in a core curriculum in Year I, which includes general topics such as cultural competence, ethics, health care policy and finance, professionalism, and empathy. In Year II, the students are allowed to select from nine different areas of interest (selectives), and meet in groups with faculty having expertise in the given area. Examples of selectives presented include advanced ethics, medicine and the mind, spirituality and medicine, medical arts and humanities, global health, complementary and alternative medicine, medicine's intersection with technology, physicians operating outside their comfort zones, and the future of health care. 

The PPM course provides students with an opportunity to build a professional identity, develop relationships with faculty mentors, and increase team-building and community-building skills. Students receive an introduction to the concepts of professionalism and ethics, with a better understanding of their real-world implications. The PPM course encourages leadership while engaging in the process of learning, characterized by presentations within both small and large groups, as well as professional development through exposure to multiple professional, ethical, and cross-cultural scenarios, cases, and providers. Evaluation is provided through student submission of portfolios containing written self-reflections, responses to faculty and peer feedback, and evaluations completed over the course of a two-year longitudinal curriculum. Finally, PPM hones sensitivity and skills relevant to medical professionalism to better prepare students for their transition into the clinical years of the medical school curriculum.

Clinical Translational Research

This course, a series of on-line lectures accompanied by small group discussion sessions, is intended to introduce students to the methods of clinical and translation research (CTR) and prepare them for carrying out research as medical students. Students are required to complete a Required Scholarly Project (RSP) and this course will provide students with the basic skills and competencies needed to plan, conduct, and complete their RSP. Regardless of a student's future career path, the practice of medicine will be driven by the findings of CTR. Rapid advances in basic sciences, driven to new technologies such as genomics, have brought exciting new possibilities for identifying people at risk for disease, for identifying disease in its earliest stages, and in targeting therapies on an individual basis. On the verge of a new era of "personalized medicine", healthcare provision is driven by what is known about the characteristics of each individual and of the diseases that they may have. CTR represents the research approach for moving from basic discovery in the laboratory to application in individual patients and in making populations healthier. Medical researchers have long carried out patient-oriented or clinical research. The term CTR is more recent, coming into use over the last decade in recognition of the research continuum from basic discovery in the laboratory to application in patients and on to populations. One problem in bringing discoveries into practice has been a gap between the work of laboratory researchers and clinical investigators; CTR bridges that gap.

Evidence Based Medicine (EBM)

Evidence-based medicine (EBM) is the clear, conscientious, and prudent use of current best evidence in making patient care decisions. Evidence-based guidelines are considered to be the basis for decision-making in clinical practice, guiding screening, diagnosis and treatment. In a new era of health care reform, EBM will likely be given even greater weight and outcomes are tracked carefully in order to evaluate the effectiveness of guideline-driven care. Evidence-based practice is primarily based on five well defined steps: 1) Asking Focused Questions: translation of uncertainty to an answerable question; 2) Finding the Evidence: systematic retrieval of best evidence available; 3) Critical Appraisal: testing evidence for validity, clinical relevance, and applicability; 4) Making a Decision: application of results in practice; and, 5) Evaluating Performance: auditing evidence-based decisions.

EBM foundational material is taught during Foundations of Medical Sciences I as part of the biostatistics and epidemiology curriculum. Along with the clinical and translational research series during the first year of medical school, this information lays the foundation for the EBM curriculum during the remaining years of instruction.

Organ System Review

A sequence of study presenting integrated basic and clinical science instruction involving human organ systems — skin, hematology and clinical immunology, neurosciences, musculoskeletal, cardiovascular, renal, respiratory, endocrine/metabolism, reproduction, gastrointestinal/liver — follows Foundations of Medical Sciences.

Integrated Case Study

This section completes the second year of the Year I–II continuum and emphasizes patient-centered problems that integrate the basic and clinical science presented in the preceding organ systems. Students will explore the multi-organ effects of disease processes and reinforce diagnostic reasoning skills. In addition, concepts of pathophysiology, evaluation and management that can be applied to any organ system will be included. This section will also reinforce the appropriate use of medical information resources, effective self-directed learning skills, and interpersonal and group communication skills.

Separate review sessions of the important basic science and clinical concepts covered during the previous two years also occur during this seven-week section. These sessions will assist students in preparing to take Step I of the United States Medical Licensing Examination (USMLE).

By early spring of the second year of the Year I–II continuum, students are expected to select their academic clinical advisers and to begin arranging the schedule of
clerkships to be taken during Year III–IV. By the end of the fall semester, Year II, each student receives information that describes the curriculum requirements of Year III–IV. Students choose the area of medical practice that they are most likely to pursue and an adviser is assigned from that discipline. The adviser counsels the student on clerkships and opportunities in graduate medical education.

**Required Scholarly Project**
The Required Scholarly Project (RSP) is designed to provide medical students with the opportunity to become engaged in hypothesis-driven research to promote analytical thinking skills and ultimately, physician leaders. The aim of the RSP is to expose students to the process of scientific inquiry, teaching them how to formulate an answerable question and the requisite methodology in seeking appropriate answers. Each student undertakes a faculty mentored research project in a discipline of his or her choice. Viable disciplines encompass a wide spectrum to include: biomedical research, from discovery to application, and health care, i.e., basic science, clinical, educational, behavioral science, health services, community and epidemiological activities. The RSP is interwoven with the curriculum, which includes didactic instruction on topics such as study design and biostatistics. The RSP is a longitudinal experience throughout all four years of medical school, with successful completion being required for graduation. Students with projects deemed meritorious by the RSP steering committee will receive "Distinction in Research" recognition at graduation.

**Year III–IV (two academic years)**
The final two years of medical school are designed as a continuum of two calendar years, beginning in July at the end of Year II. During the spring of their second year, students schedule clerkship rotations to be taken during the two years. Each student's program is designed with the assistance of faculty advisers and includes 50 weeks of required clerkships, 16 weeks of selective clerkships and 16 weeks of elective clerkships.

All degree candidates are required to take Step I of the United States Medical Licensing Examination (USMLE) prior to entering Year III or within six months of completion of Year II (whichever comes first). Students must pass Step I, II CK and CS of the USMLE as a graduation requirement. During Year III–IV, each student may schedule up to 14 weeks of discretionary time for personal convenience, remedial work, funded research work and other non-curricular activities, such as investigating postgraduate training programs. Although every effort is made to provide flexibility in the scheduling of each student's program, some inherent limitations are imposed by the maximum enrollment permitted for each clerkship. Students are a vital part of the university's medical team, which provides health care for patients throughout the year. Vacations are therefore subject to some scheduling adjustments.

**Required Clerkships**
- Family Medicine 6 weeks
- General Surgery 6 weeks
- Surgical Subspecialty 4 weeks
- Internal Medicine 6 weeks
- Internal Medicine Sub-internship 4 weeks
- Neurology 4 weeks
- Obstetrics and Gynecology 6 weeks
- Pediatrics 6 weeks
- Psychiatry 6 weeks
- Inter session 2 weeks (two, one-week sessions)

**Intersession I and II**
The Intersession curriculum is two, one-week sessions established for Year III students that will enable learners to pause, reflect and consolidate the many and varied clinical experiences that they encounter in their third year of medical school; to promote advanced clinical skills, professional development, health policy formulation and ethical decision-making, and patient safety; and to further prepare for the residency application process.

This individualized curriculum will allow students to revisit and focus basic-science topics through the prism of newly learned clinical material and to foster capacity for the analysis and formulation of health care policy in light of the political, economic, legal and social, and ethical dimensions of health care.

Students will be instructed in a systems-based approach to patient safety by stimulating the imagination, curiosity and skills of close observation and careful interpretation through engagement with the arts and humanities. Developing and building advanced clinical skills by acquiring, appraising and applying evidence in the context of individual patient decision-making, (i.e., Evidence Based Medicine) are two important goals of the Intersession curriculum.

Providing comprehensive, coordinated and consistent career advising along with fostering the continuing professional development of the learners in the frame of clinical practice are key components. Finally, the curriculum will provide ongoing instruction in the provision of culturally competent care and prepare learners for their required community project.

**Selective Clerkships**
Students are required to schedule 16 weeks of selective clerkships, chosen from a list of four-week clerkships approved by the Clinical Curriculum Committee. Selective clerkships are carried out at USC-affiliated hospitals and encompass virtually all specialty areas. Information is available at medweb.usc.edu.

**Elective Clerkship**
The elective period consists of 16 weeks, during which electives may be taken on campus, at USC-affiliated hospitals or at more distant medical schools or medical centers. Approved on-campus electives that are offered regularly are listed in the elective catalogue.

Proposals for other on-campus and off-campus electives are reviewed individually by a faculty adviser. All petitions must be submitted at least six weeks before the beginning of the rotation. Off-campus electives require documentation from the off-campus preceptor, endorsement of the student's medical school adviser, and prior approval and review by the Clinical Curriculum Committee. Credit is not given for electives until an evaluation has been received from the preceptor. Students with an academic deficiency may not schedule off-campus electives.

**Business of Medicine (BOM)**
This course, designed for Year III medical students, will introduce students to the fundamentals of the business of
Students practice applying the micro-level (individual/clinical) decisions to the ethical dilemmas and policy issues that face physicians at the mezzo-level (health care organizations), and to the macro-level (profession as a whole, state and nation). Topics include issues of professionalism; allocation of resources; the economics, organization and societal oversight of health care; and the care of dying patients.

Fifth-year Research Option and Dean's Scholars

USC offers students the opportunity to take a full year of research experience with either a Keck School of Medicine faculty mentor or an approved faculty mentor at another institution. This program is open to any student in good academic standing who has completed his or her first year of medical school. Students interested in the option should identify a faculty preceptor and present a description of the proposed research program and funds available in support of the program to the director of the fifth-year research option.

Application for this program is made through the Office for Student Affairs (KAM 100B) and will be supervised through the Office of the Senior Associate Dean for Student Affairs and Educational Affairs (KAM 100D). A stipend, comparable to that received by a graduate student at the postgraduate level, is available for selected dean's research scholars pursuing this option.

PhD Programs in Biomedical and Biological Sciences (PIBBS)

pibbs.usc.edu

Program Director: William DePaolo, PhD

The USC PhD Programs in Biomedical and Biological Sciences (PIBBS) is a gateway program into graduate studies at the USC Health Sciences Campus, leading to a PhD degree in a broad range of biological and biomedical disciplines. PIBBS students experience a common first-year curriculum that will build a solid foundation in biomedical and biological sciences. Students are required to complete 25 units of core classes during the fall, spring and summer semesters of the PIBBS year, including courses in cell biology, molecular biology, human genetics and genomics, biostatistics, bioethics and scientific writing. Students will also complete three research rotations during the first year.

At the end of the spring semester of the first year, students will select a faculty adviser and a specific PhD program from among the four participating programs listed. In the second year, students will take classes that will differ depending on the PhD program they join; second year classes may include, but are not limited to, topics such as biochemistry, epidemiology, stem cell biology, molecular genetics, cancer, human genomics, immunology, and physiology. In addition, each student will complete qualifying examinations for the chosen PhD program and will develop and complete an original research project that will serve as the basis for a doctoral dissertation.

PhD Graduate Programs
Cancer Biology and Genomics
Development, Stem Cells, and Regenerative Medicine
Medical Biology
Molecular Structure and Signaling

PIBBS Admission Requirements

Application Deadline (priority review): December 1

Applicants to PIBBS should have a baccalaureate degree in natural sciences, or sufficient courses in mathematics and the life sciences. This is required to provide a strong background for studies in biomedical and biological research. Appropriate undergraduate degrees include biology, physiology, engineering, chemistry or computer science. Applicants should have a strong record of academic achievement and satisfactory performance on the general and advanced portions of the GRE. Other requirements for admission include: a detailed statement of purpose as well as three letters of recommendation, one of which should be from a wet laboratory or computational research mentor. Previous research experience is expected. Students are admitted for the academic year in the fall semester.
Applicants who are accepted with minor deficiencies are expected to correct these during the first year following enrollment. Although there is no formal application deadline, complete applications received by December 1 will be given priority.

**Financial Support**
Admitted students are supported by research assistantships or fellowships during their graduate career. Tuition, health insurance and health fees are also covered.

**Lab Rotations**
During the first year, students register for INTD 790 Research (4 units in the fall semester and 3 units in the spring semester) and rotate through the labs of three faculty members of the program (potential research advisers). By the first summer of graduate study, but no later than after 12 months in the program, each student is expected to have selected a faculty mentor/research adviser.

**PIBBS Required Core Curriculum and Research**
See PIBBS Required Core Curriculum and Research

**Admission Requirements for PhD Programs**
Admission to the Keck School of Medicine PhD program is open to all incoming PIBBS students provided all PIBBS admission requirements are met and all first year course and lab rotation requirements have been satisfactorily completed. Students from other sources, such as MD/PhD students and clinician scientists, may also be eligible on a case-by-case basis.

In general, new graduate students apply for admission to USC through the PhD programs in Biomedical and Biological Sciences (PIBBS), and become enrolled in one of four PhD programs at the Keck School of Medicine after the successful completion of the PIBBS year. During the PIBBS year, students must complete the core curriculum of 25 units, maintain a 3.0 grade point average with no grade lower than a C on all courses and must complete three laboratory rotations in order to continue into a PhD program.

Application information is available by contacting the PIBBS Program at pibbs@usc.edu.

**Unit/Course Requirements**
A minimum of 60 units of graduate course credits is required for the PhD, including course work, seminars, research and dissertation units. No more than 8 units of 794 may be applied toward the PhD degree. Students must complete the first year PIBBS core curriculum as well as course requirements for their specific PhD program. Thirty units of course work, including the PIBBS core curriculum, must be completed before they are considered for the qualifying examination. Additional course work relevant to the research interests of the student may be required by the student's qualifying exam committee or by the student's faculty adviser.

**Guidance Committee**
After 30 units of course work, which includes the PIBBS core curriculum and course requirements for one of the four PhD programs, the student, in consultation with his/her faculty adviser, will nominate five faculty members to serve on the guidance committee for the qualifying examination. A minimum of three of the faculty must be from the student's PhD program, and one must be a faculty member from outside the PhD program. The chair of the guidance committee must be a member of the student's PhD program and the faculty adviser is not allowed to be on the committee (but may be a silent presence during the exam). These nominations are submitted to the chair of the program for formal appointment.

**Qualifying Examination**
Students in the PhD program must pass both the written screening and the oral portions of the qualifying examination administered by their guidance committee during the second year of graduate study.

The written screening exam involves writing a research grant proposal. The deadline for completion of the written screening is January 5 of the second year. Students who receive a failing score will be allowed one resubmission, with a deadline of April 5 of the same year. The written portion must be passed before the oral portion can be taken.

The oral examination must be completed no later than September 1 of the beginning of the third year and only after successful completion of the written screening exam. The oral examination consists of two parts. The first part consists of a presentation of the proposed thesis research. The second part consists of an open forum in which the guidance committee asks general questions on any topic related to the student's research.

Final evaluation of the examination is determined by a consensus of the guidance committee. If a student fails, it is at the discretion of the committee to allow the student to repeat the oral examination within 60 days. A second failure will be grounds for dismissal from the program.

**Advancement to Candidacy**
Recommendation for advancement to candidacy for the PhD degree is made on the basis of the successful completion of the qualifying examination, course requirements and the student's maintenance of at least a 3.0 GPA. A student who has not been recommended for advancement to candidacy at the end of the first semester of the third year will be dismissed from the program.

**Annual Research Appraisal (ARA)**
After advancing to candidacy, each graduate student presents a progress report to his or her dissertation research committee. Prior to the meeting, the student prepares a short written document describing significant experiments, problems and projected studies. This document is distributed to the committee and is included in the student's file. The ARA meeting is intended to be a working session between the student and his or her committee; experimental results and problems are discussed with this context. In addition the student presents a research plan for the next year of work. A satisfactory ARA is required of every student for each year of residence after the completion of the qualifying exam. A final ARA is required the semester before the student is permitted to defend the dissertation.

**Dissertation Committee**
After advancement to candidacy, the student must form a dissertation committee, in consultation with their faculty adviser. A minimum of three committee members must be selected, one of which is the faculty adviser, and at least one of which must be a tenured or tenure-track faculty member of
the student's PhD program. One committee member may be non-tenure track. The chair of the dissertation committee must be a member of the student's PhD program and may not be the faculty adviser. The dissertation committee is responsible for counseling the student during preparation of the dissertation and conducting the final oral examination during the dissertation defense. Students are expected to meet with the dissertation committee once per year to discuss progress. Dissertation committee members are expected to read and comment on a dissertation within two weeks from its submission. The student and faculty will coordinate a timeline for the student to present the thesis to the dissertation committee. This timeline must allow all dissertation committee members enough time to fulfill their responsibilities within the four-week deadline.

**Dissertation and Oral Defense**

The student's research is reported in a dissertation written under the guidance of the dissertation committee. The dissertation must demonstrate the student's capacity for independent research, scholarly achievement and technical mastery of a special field. Students should have at least one first author publication accepted in a peerreviewed journal before the defense. When the final draft of the dissertation is ready, the student will take the final oral defense. Students must submit their dissertation to the dissertation committee at least one month before the student expects to make final revisions; committee members are expected to respond within two weeks. The dissertation defense is a formal public presentation of the student's research before the program faculty and students. Dissertation defenses must be publicized at least two weeks prior to the oral defense. All doctoral candidates must be registered in 794 Doctoral Dissertation each semester (excluding summer sessions) from the time of their advancement to candidacy until their dissertation is approved and submitted to the Graduate School.

**Doctoral Degree**

**Cancer Biology and Genomics (PhD)**

The PhD program in Cancer Biology and Genomics (CBG) focuses on training investigators in strategies to understand the mechanisms of cancer development and progression which includes cell biological and genomic approaches. The ultimate objective is to translate basic findings into diagnostics, treatments and ultimate cures. The program applies a multidisciplinary approach toward these goals, with the full realization that cancers in different organs represent different diseases. However all cancers relate to uncontrolled cell proliferation with many cancers having a strong genetic predisposition. Consequently, major features of this program include the breadth of medically related interests and training and faculty characterized by wide and varied skills in many cancer-related research areas. To facilitate the application of multidisciplinary approaches to make cancer a disease of the past, close and regular contact between participating faculty of different disciplines and students is a major theme of this PhD program.

Cancer Biology and Genomics students are required to take CBG 580 and CBG 504 and must complete a total of 4 units from the following: INTD 549, INTD 685, MPTX 500, PM 512, PM 517a, PM 517b, PM 533*, PM 534*, PM 570*, PM 579, PM 599 or other courses approved by the academic adviser. In the second year, students are required to register for CBG 580 in the fall and spring semesters. In the third and subsequent years, students should register for INTD 600 every fall and spring semester. In addition, students are required to complete at least 4 units of CBG 794a Doctoral Dissertation, CBG 794b Doctoral Dissertation.

PhD students must supplement course work by registering for CBG 790 Research during the fall, spring, and summer semesters as needed to complete the minimum 60 units required for the PhD program.

As part of the requirements for the PhD degree in Cancer Biology and Genomics, students must adhere to the unit/course requirements, guidance committee and dissertation committee guidelines and must complete the qualifying examination, annual research appraisal, and dissertation and oral defense as outlined in the sections following the descriptions of the PhD programs.

*Course requires prerequisite.

**Development, Stem Cells, and Regenerative Medicine (PhD)**

The goal of the PhD program in Development, Stem Cells, and Regenerative Medicine is to train the next generation of investigators in the history and practice of developmental and stem cell biology. The ultimate aim is to understand how the genomes of animals are translated into complex morphological forms, and to apply this basic knowledge to the emerging field of regenerative medicine. Close and regular contact between participating faculty of different disciplines and students is expected to facilitate the application of multidisciplinary approaches toward regenerative medicine.

Development, Stem Cells, and Regenerative Medicine students are required to complete DSR 542 and at least 2 units from the following: DSR 610, DSR 620, INTD 504 or other courses approved by the faculty adviser. In the second and subsequent years, students are required to register in DSR 574 every fall and spring semester. In addition, students are required to complete at least 4 units of DSR 794a Doctoral Dissertation, DSR 794b Doctoral Dissertation.

PhD students must supplement course work by registering for DSR 790 Research during the fall, spring and summer semesters as needed to complete the minimum 60 units required for the PhD program.

As part of the requirements for the PhD degree in Development, Stem Cells, and Regenerative Medicine, students must adhere to the unit/course requirements, guidance committee and dissertation committee guidelines and must complete the qualifying examination, annual research appraisal, and dissertation and oral defense as outlined in the sections following the descriptions of the PhD programs.

**Medical Biology (PhD)**

The objective of the PhD program in Medical Biology (MEDB) is to educate investigators to develop strategies to translate and implement knowledge from cellular, molecular and genetic advances into studies of normal human organ
system function as well as mechanisms of human organ system dysfunction in disease and how to reverse this dysfunction by medical treatment. Animal disease models as well as clinical trials in patients are frequently used to advance this field.

The program applies multidisciplinary approaches to understanding the human organism as a whole. Breadth of medically related interests and training are major features of this track and wide and varied skills in many research areas characterize the faculty. To facilitate application of multidisciplinary approaches, close and regular contact between participating faculty and students is a major theme of this PhD program.

The MEDB program caters to MD/PhD students, clinician scientists and PIBBS students interested in but not limited to the following fields: immunology (including cancer immunology), virology (including cancer virology), microbiology, physiology and pathology (for example: diabetes, obesity, autoimmunity, infectious diseases, gastrointestinal and liver diseases, heart and lung diseases, hypertension, central nervous system diseases, etc.)

Medical Biology students are required to complete 8 units from the following courses: INTD 504, INTD 522, INTD 549, INTD 550, INTD 551, INTD 572, INTD 573 or other courses approved by the faculty adviser. In the second and subsequent years, students are required to register in INTD 574 every fall and spring semester. In addition, students are required to complete at least 4 units of MEDB 794a Doctoral Dissertation, MEDB 794b Doctoral Dissertation.

PhD students must supplement course work by registering for MEDB 790 Research during the fall, spring and summer semesters as needed to complete the minimum 60 units required for the PhD program.

As part of the requirements for the PhD degree in Medical Biology, students must adhere to the unit/course requirements, guidance committee and dissertation committee guidelines and must complete the qualifying examination, annual research appraisal, and dissertation and oral defense as outlined in the sections following the descriptions of the PhD programs.

Molecular Structure and Signaling (PhD)

The goal of the PhD program in Molecular Structure and Signaling is to train students to become future leaders in biomedical and related fields. The Molecular Structure and Signaling program includes structural biology of proteins, lipids and nucleotides and signaling mechanisms by these molecules. The program encourages students to tackle important molecular problems with a high degree of difficulty and learn about creative thinking, experimental design and problem-solving skills. The Molecular Structure and Signaling program emphasizes elucidation of novel mechanisms and insights into important biomedical problems. In addition, the program promotes its students to become master communicators in science. Prior to graduation, PhD students must demonstrate their understanding of the research, elucidation of a novel structure and/or signaling mechanism and a clear interpretation of its potential for developing novel diagnostics and therapeutics.

Molecular Structure and Signaling students are required to complete: INTD 549, INTD 571, INTD 575 and INTD 600. Other courses may be substituted with the approval of the Molecular Structure and Signaling executive committee. In the second and subsequent years, students are required to register in INTD 575 every fall and spring semester. INTD 600 must be taken every fall and spring semester in years two through four. In addition, students are required to complete at least 4 units of MSS 794a Doctoral Dissertation, MSS 794b Doctoral Dissertation.

PhD students must supplement course work by registering for MSS 790 Research during the fall, spring and summer semesters as needed to complete the minimum 60 units required for the PhD program.

As part of the requirements for the PhD degree in Molecular Structure and Signaling, students must adhere to the unit/course requirements, guidance committee and dissertation committee guidelines and must complete the qualifying examination, annual research appraisal, and dissertation and oral defense as outlined in the sections following the descriptions of the PhD programs.

Department of Anesthesiology
Nurse Anesthesia Program

Program Director: Michele E. Gold, PhD
Associate Program Director: Teresa Norris, EdD
Assistant Program Director of Clinical Services: Kären Embrey, EdD
Administrative Faculty: Jeffrey Darna DNP, Judith Franco EdD, Sarah Giron, PhD, Eleanor Rawson, DNP

Faculty
Chair and Professor: Philip Lumb
Professor of Pediatrics and Anesthesiology: Randall Wetzel
Professors of Clinical Anesthesiology: Jack Berger; Mary Joseph; Ronald Katz; Duraiyah Thangathurai; Vladimir Zelman
Associate Professors of Clinical Anesthesiology: Steven Haddy, Jeffrey Lee; Michele Gold; Rajesh Patel; Steven Richeimer; Earl Strun
Assistant Professors of Clinical Anesthesiology: Rudolf Amaya; Dimiter Arnaudov; Tawfik Ayoub; Armin Azad; Jason Bang; Maxim Benbassat; Martin Bohorquez; Kari Cole; Ahmed Darwish; James Daniel; Kären Embrey; Gligor Gucev; Wayne Kaufman; Rodney McKeever; Rana Movahedi; Ali Nemat; Teresa Norris; Ashraf Sedra; Fayez Takla; Candace Tay; Puja Trivedi; Chelsea Varner; Samuel Yanofsky
Instructors of Clinical Anesthesiology: Roberta Ashley; Deborah Avnet; Gina Basehore; Brindusa Bauer; Paula Belson; Douglas Branman; James Carey; Jennilyn Casalme; Adrian Castro; Johnny Cheng; Rebecca Darnell; Geoff Edwards; Judith Franco; Jessica Frazier; Charlotte Garcia; Katharine Getz; Dolores Gibbs; Amy Gilb; Sarah Girion; Elizabeth Bangbose; David Godden; Jennifer Hogan; Dina Hunt; Monique Jabbour; Kelsey Johnson; Kim Jones-Tang; Rory Keenan; Vadim Kuraev; Benjamin Lindsey; Jennifer Loshonkohl; Victoria McKinzie; Cameron Meyer; Cathy Ngo; Aileen Nguyen; Arthur Norcliffe; Michelle Olivares; Margaret Oliveto; Robert Olsen; Patricia Onoto; Nilu Patel; Nancy Perez; Erin Peters; Gabriel Punsalan; Eleanor Rawson, Dhanya Renjith; Sara Rondinone; Joseph Sammut; Susan Shenkosky; Michelle Smith; Tahira Smith; Helen Stepan; Crystal Trinoozon; Regalado Valerio; Rhona Wang; Annie Wiley; Kelly Zhou

The nurse anesthesia program prepares qualified nurses in the specialty of nurse anesthesia and qualifies the graduate to sit for the certification examination given by the National Board of Certification and Recertification of Nurse Anesthetists. The graduate attains a high level of clinical competence with an extensive body of didactic knowledge relevant to the specialty and advanced practice nursing. The mission of the USC Program of Nurse Anesthesia is scholarly education and professional development of future nurse anesthetists with the academic strength and leadership skills to advance our profession.

Students enrolling in the MS, Nurse Anesthesia course of study must complete the nurse anesthesia core curriculum and specialty practicum. The program consists of 47 units and is completed in 28 months of continuous enrollment (seven semesters; the first semester 2-unit course is provided in a hybrid online platform).

The program is based in the Department of Anesthesiology, and classroom instruction is provided by nurse anesthesia program faculty and faculty from the Department of Anesthesiology, the Department of Physiology and Biophysics, and the Department of Cell and Neurobiology within the Keck School of Medicine, as well as clinical faculty from the program clinical sites. Clinical training occurs at Los Angeles County + USC Medical Center, Keck Hospital of USC, Harbor-UCLA Medical Center, Long Beach Veterans' Administration Medical Center and West Los Angeles Veterans' Administration Medical Center for the primary rotations. Advanced rotations occur at those sites, as well as Cedars-Sinai Medical Center, Children's Hospital of Los Angeles, Northridge/Hallmark Pain Management and Surgery Center, UCLA Medical Center and Arrowhead Regional Medical Center.

Master's Degree

Nurse Anesthesia (MS)

General requirements for admission include a minimum 3.0 undergraduate grade point average, a minimum score on the verbal and quantitative sections of the Graduate Record Examination of 300 (or a score of 1000 on the GRE prior to September 2011), completion of the university and Program supplemental application, current licensure as a Registered Nurse, a bachelor's degree in nursing or a related field from an accredited university or college, submission of an essay describing the applicant's career goals, professional resume and three letters of reference.

Competitive applicants will be interviewed and must demonstrate an acceptable understanding of the role and responsibilities of certified nurse anesthetists. Shadowing experience of CRNAs must be demonstrated. Selections are made on the basis of the formal interview and consideration of a variety of factors that include academic record, type and amount of clinical experience and professionalism.

Academic and Scientific Prerequisites

The admission requirements also include appropriate undergraduate course work in biology, anatomy, physiology, chemistry, biochemistry, physics and statistics (or nursing research). A minimum of one year of experience in critical care nursing as a registered nurse is required. Licensure as an RN in California and current BCLS, ACLS and PALS certifications are required prior to enrollment. Conversational Spanish is strongly recommended.

Computer Skill Requirements

During the program, students must have a personal computer or notebook with Internet. The primary mode of program communication is email. Computer accounts are provided by the university to all students and can be activated online.

Advisement

Prospective students should contact the program's admission office, (323) 442-2037 or uscnap@usc.edu for evaluation of previous course work and clinical background.

Admission

Admission procedures follow the information in the USC Graduate School section of this catalogue. Admission standards for the USC nurse anesthesia program are established jointly by the Keck School of Medicine, the USC Graduate School and the Department of Anesthesiology. Interested students should apply online at usc.edu/admission/graduate/apply. Additional admissions requirements and the supplemental application must be obtained from the nurse anesthesia program and can be requested through email at uscnap@usc.edu or accessed at keck.usc.edu/nurse-anesthesia.

Degree Requirements

Academic Courses

- ANST 500 Human Anatomy Units: 3
- ANST 501 Advanced Pharmacology of Anesthesia Practice I Units: 4
- ANST 502 Principles of Nurse Anesthesia Practice Units: 4
- ANST 503 Advanced Pharmacology of Anesthesia Practice II Units: 4
- ANST 504 Advanced Pathophysiology Related to Anesthesia Practice Units: 4
- ANST 506 Advanced Principles of Nurse Anesthesia Practice Units: 4
- ANST 508 Research: Investigative Inquiry Units: 3
- ANST 510 Leadership and Professional Aspects of Nurse Anesthesia Units: 3
- ANST 512 Research Integration: Capstone Experience Units: 2
- ANST 607 Advanced Health Assessment Units: 2
**Residency Courses**

- ANST 505 Clinical Residency in Nurse Anesthesia I Units: 2
- ANST 507 Clinical Residency in Nurse Anesthesia II Units: 2
- ANST 509 Advanced Clinical Residency in Nurse Anesthesia I Units: 2
- ANST 511 Advanced Clinical Residency in Nurse Anesthesia II Units: 2
- ANST 513 Advanced Clinical Residency in Nurse Anesthesia III Units: 2

**Total units: 47**

**Optional Course**

- ANST 514 Specialty Fellowship Units: 2

**Note:**

All students will take the Self-Evaluation Examination (SEE) administered by the National Board of Certification and Recertification of Nurse Anesthetists twice while in the program. Student scores must be above the national mean for advancement into the research capstone experience.

Assistant Professors of Research: T. Miki; S. Swenson; D. Weisenberger; S. Zhong

The USC Department of Biochemistry and Molecular Biology prides itself on maintaining a broad-based approach to various aspects of biochemical and molecular biological research. In 2010, the department received more than $10 million in research funding for its primary faculty members. Altogether, the department numbers 49 primary and joint-appointment faculty members, who conduct research in a variety of areas including: molecular biology and genetics of development and cell differentiation; mammalian and human genetics; DNA methylation, replication, recombination and repair; membrane transport; kinetics and mechanism of enzyme action; protein structure-function interrelationships; carcinogenesis and cancer chemotherapy; and stem-cell biology.

The department also has major research programs in the molecular basis of control and regulation of gene expression, epigenetics, molecular mechanisms of signal processing and transduction, developmental and stem cell biology, detailed analysis of macromolecular structure and function, the biochemistry and molecular biology of the brain, and genetic medicine including gene therapy. The department's exceptionally strong research into various aspects of the biochemistry and cell biology of cancer is internationally recognized. Ongoing research programs in this area include mechanism of action of cancer chemotherapeutic agents, tumor cell invasion and metastasis, and cancer cell epigenetics and gene regulation.

Many members of the department are members of the USC Norris Comprehensive Cancer Center, USC Institute for Genetic Medicine (IGM), USC Zilkha Neurogenetic Institute (ZNI), Eli and Edythe Broad CIMR Center for Regenerative Medicine and Stem Cell Research at USC, and Children's Hospital Los Angeles (CHLA).

The USC Norris Comprehensive Cancer Center maintains a microchemical core facility that includes capabilities for gas phase protein sequencing, amino acid analysis, peptide synthesis, DNA synthesis and sequencing. The Institute for Genetic Medicine maintains a customized microarray core facility. Other facilities available to support the research of members of the department include mass spectroscopy, transgenic mice, flow-cytometry, biostatistics, microchemical...
resource for DNA, and protein sequencing and synthesis core facilities.
The primary offices and laboratories of the department are located on the Health Sciences Campus.

Graduate Programs
Admissions
The prerequisite for applicants to the graduate program in biochemistry and molecular biology is a bachelor's degree with an undergraduate major in one of the natural sciences. Undergraduate course work should have included organic chemistry, the physics and mathematics required of a chemistry major and some courses in the biological sciences. A course in general biochemistry is also required, but may be taken during the period of graduate study. Previous course work in physical chemistry is strongly recommended. A minimum GPA of 3.0 in the natural sciences (including mathematics) is normally required.
Applicants must pass satisfactorily the general portions of the Graduate Record Examinations. In addition, the department requires at least three letters of recommendation from faculty members who can evaluate the applicant's potential for graduate work and independent research. Faculty members of the Department of Biochemistry and Molecular Biology participate in a variety of interdisciplinary PhD programs. Students interested in pursuing a PhD degree in the fields related to biochemistry, molecular and cellular biology, and genetics should apply to USC's Programs in Biomedical and Biological Sciences (PIBBS). Applications for the PhD Programs in Biomedical and Biological Sciences should be submitted online through the PIBBS Website (usc.edu/pibbs).
Applications should be submitted before the application due date specified on the PIBBS Website. Applications for the MS program in biochemistry and molecular biology can be obtained from the department at the address listed below. In addition to the university application, a supplemental departmental application must be completed and returned with transcripts, GRE scores and letters of recommendation to: Graduate Admissions Committee, Department of Biochemistry and Molecular Biology, 1333 San Pablo Street, Los Angeles, CA 90089-9151.
Fellowships
Students admitted to PIBBS are awarded fellowships that pay for tuition and provide a stipend. No fellowships are available for master's degree students.

Master's Degree
Biochemistry and Molecular Biology (MS)
The Department of Biochemistry and Molecular Biology offers a program for the Master of Science degree. The primary objectives of this program are to provide the necessary theoretical preparation for biochemical careers and to expose students to biochemistry and molecular biology related research activities culminating with the Master of Science degree. Goals of the program are to train students in preparation for (1) further doctoral study, (2) advanced biochemical research positions in industry and academia and (3) teaching positions at the community college level.
In general, admission requirements are the same as for the Doctor of Philosophy degree. The prerequisite for applicants to the graduate program in biochemistry is a bachelor's degree with an undergraduate major in one of the natural sciences. A minimum GPA of 3.0 in the natural sciences (including mathematics) is normally required. Applicants must satisfactorily pass the general and advanced (chemistry, or biology or molecular biology) portions of the Graduate Record Examinations. In addition, the department requires at least three letters of recommendation from faculty members who can evaluate the applicant's potential for graduate work and independent research. Demonstrated proficiency in the English language is required. Special circumstances may provide consideration for conditional admission.
The master's degree in biochemistry and molecular biology requires 34 units of elective graduate study to be determined by the student's advisory committee. Fourteen or more course units must be taken in biochemistry and molecular biology; eight units may be pursued outside the department. Students interested in the commercial aspects of biotechnology may take courses focusing on business entrepreneurship, finance, management and marketing in the USC Marshall School of Business. Master's students have the option of completing a research thesis allowing state-of-the-art laboratory-based investigation or a non-research-based theoretical thesis. Upon approval, a maximum of 10 units of directed research in biochemistry will be applied to the degree. Up to six units of graduate course work taken outside of USC may be applied toward the MS degree. Flexibility exists to plan each student's program to suit individual needs, ambitions and background.

Emeritus Professors: G. Albrecht*; Dwight Warren III
*Recipient of university-wide or school teaching award.
The Department of Cell and Neurobiology provides training in the basic medical sciences to health professional students, and prepares graduate students as future teachers and researchers in the human anatomical sciences and functional morphology.

**Cell and Neurobiology Graduate Program**

The graduate-level course of study includes in-depth training in core anatomical disciplines: gross anatomy, histology and neuroanatomy, including cadaveric dissection and microscopic study of tissues. In addition, students receive an intensive introduction to fundamentals of bone and dental biology, human anatomical variation, and clinical anatomical correlations. Interested students can receive training in functional, evolutionary and virtual morphology. Professional and intellectual development is fostered through a hands-on curriculum designed to prepare the student for a lifetime of learning, exploring the limits of research, teaching and creative activities.

**Goals of the program are to train students in preparation for:**

Teaching positions in the core anatomical sciences (gross anatomy, histology, neuroanatomy). Instructors in the anatomical sciences contribute to teaching at medical and dental schools, in allied health programs (nursing, physical and occupational therapy, physician assistants, dental hygiene), and in pre-health undergraduate majors at colleges and universities. In recent years, the number of faculty trained to teach in these subject areas has steadily decreased. As a result, finding qualified individuals capable to teach in the anatomical sciences has become increasingly problematic. The CNB master's program is advantageously poised to address this problem.

Research positions and further doctoral training in functional and evolutionary morphology. While the anatomical sciences are among the oldest (and most fundamental) of the biological and medical sciences, the modern incarnation of morphology is a relatively young and fast-moving field of endeavor. Modern areas of focus in morphology include: mapping the anatomical biodiversity of the planet; understanding the relationships between form (e.g., skeleton) and function (i.e., locomotion; mastication) in living animals; reconstructing the behavior, performance and life history of extinct organisms; elucidating the origin of major groups of animals (including our own branch of the evolutionary tree); and investigating the fundamental properties of biomaterials (e.g., bone). The movement toward quantitative methods in the anatomical sciences and integration of new disciplines to morphology research has also made this field of endeavor more translational. For example, synthetic material design, robotics, aeronautics, cinema, graphic arts, conservation biology and other fields now make consistent use of the data generated by morphologists.

**Admissions**

The Department of Cell and Neurobiology selects highly qualified students for admission into its Master of Science program in Cell and Neurobiology. The prerequisite for applicants to the MS program is a bachelor's degree with a science major or equivalent. Applicants should have a superior undergraduate record at an accredited college or university, with a minimum undergraduate grade point average of 3.0. Generally required courses include at least one year of college-level biology, one year of college-level physics and mathematics through calculus. College-level courses in cell biology, developmental biology, organismal biology and physiology are recommended.

Applicants must demonstrate satisfactory performance on the general portion of the Graduate Record Examinations (GRE). A minimum score of 1000 is expected. GRE Subject (advanced) examination is desirable but optional.

Alternatively, Medical College Admission Test (MCAT) scores may be provided and will be considered in place of the GRE if they are a minimum of 28.

Demonstrated proficiency in the English language is required. Foreign applicants are expected to provide results from the Test of English as a Foreign Language (TOEFL). Results from Internet-based, computer-based or paper-based tests are acceptable. However, candidates with special circumstances may be considered for conditional admission. Applicants will need to submit the following for consideration:

- Three letters of recommendation from faculty members who can evaluate the applicant's potential for graduate work and independent research.
- Complete undergraduate transcripts.
- Official copies of GRE scores.
- TOEFL scores (if applicable).
- Statement of Purpose (should describe your reasons for seeking a MS degree in the anatomical sciences and describe your career goals).

**Special Admission Considerations:** Special considerations may be given to students with extensive prior training in human anatomy with cadaver dissection, to students who experienced extenuating circumstances, and to applicants with limited English proficiency that could be corrected by language courses offered by the university's American Language Institute.

**Doctor of Philosophy**

No longer accepting applications.

**Application deadlines:**

- MS Program - January 1.

**Master's Degree**

**Cell and Neurobiology (MS)**

The Master of Science (MS) degree is awarded for demonstrated competence in the anatomical sciences. This is a 12-month program that begins with intensive training in human gross anatomy in the summer term. Students must complete a minimum of 32 units of graduate-level courses (500 or higher) beyond the baccalaureate degree, and maintain a minimum GPA of 3.0.

Students complete 16 units from courses in Human Gross Anatomy (CNB 501a, CNB 501b), Microscopic Anatomy (CNB 511a, CNB 511b) and Neuroanatomy (CNB 521), equivalent to medical school instruction. They receive 7 units
of additional specialized training in Human Skeletal Anatomy (CNB 504) and participate in the Cell and Neurobiology Seminar (CNB 550). Students must take 9 additional units from the following list of courses: Advanced Regional Anatomy (CNB 502 / CNB 503), Systems Physiology and Disease I and II (CNB 572 /CNB 573), Directed Research (CNB 590), Special Topics (CNB 599). Relevant courses in other departments and schools can also be selected, but all course work must be approved by the chair of the graduate program.

Department of Family Medicine

Division of Physician Assistant Studies
Primary Care Physician Assistant Program
1000 South Fremont Avenue
Unit 7, Building A11, Room 11-150
Alhambra, CA 91803
(626) 457-4240
FAX: (626) 457-4245
Email: uscpa@usc.edu
usc.edu/pa

Program Director: Kevin Lohenry, PhD, PA-C
Medical Directors: Ignacio DeArtola, MD; Raymond Waliany, MD

Faculty
Professor of Clinical Family Medicine: D. Lie, MEd, MD
Associate Professor of Clinical Family Medicine: C. Feifer, DrPH
Assistant Professors of Clinical Family Medicine: I. DeArtola, MD; C. Forest, MSHS, PA-C; L. Landry-Taylor, MA, PA; K. Lohenry, PhD, PA-C; A. Vallejo, PhD; R. Waliany, MD; Emily WhiteHorse, MA Ed, PA-C
Instructors of Clinical Family Medicine: M. D’Aquila, MACM, PA-C; M. Maldonado, MPH, PA-C; D. Mayo, MPAS, PA; J. Tramel, MS-HPE, PA-C; A. Walsh, MMSc, PA-C; J. Wegler, MMS, PA-C

The faculty listed above are faculty with the Primary Care Physician Assistant Program at USC. The Primary Care Physician Assistant Program at USC prepares students to practice medicine under the supervision of a physician. Students earn a Master of Physician Assistant Practice (MPAP) degree upon completion of the program. The MPAP degree program offered by the Division of Physician Assistant Studies is part of the Department of Family Medicine. Preclinical instruction is provided by physician assistant program faculty and faculty from other departments within the Keck School of Medicine, the USC School of Pharmacy, other divisions within the Health Sciences Campus, as well as clinicians from the surrounding communities. Emphasis is placed on primary care medicine and caring for medically underserved populations. Clinical training occurs at various clinical sites throughout the greater Los Angeles region, including the Los Angeles County+USC Medical Center, Arrowhead Regional Medical Center, Long Beach Memorial Family Practice Residency, private offices and managed-care settings, community-based clinics, VA facilities and specialty settings.

Students complete eight, six-week clinical clerkships in emergency medicine, family medicine, internal medicine, orthopedics, pediatrics, general surgery, women's health, and a one-week mental health/behavioral medicine clerkship. These clerkships emphasize the development of necessary clinical skills as well as learning how to work as part of a health care team. The Primary Care Physician Assistant Program at USC is committed to recruiting diverse applicants and preparing graduates to practice in medically underserved communities.

The Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) has granted Accreditation-Continued status to the Primary Care Physician Assistant Program at USC sponsored by the University of Southern California. Accreditation-Continued is an accreditation status granted when a currently accredited program is in compliance with the ARC-PA Standards. Accreditation remains in effect until the program closes or withdraws from the accreditation process or until accreditation is withdrawn for failure to comply with the Standards. The approximate date for the next validation review of the program by the ARC-PA will be September 2018. The review date is contingent upon continued compliance with the Accreditation Standards and ARC-PA policy.

The program is approved by the Physician Assistant Committee (PAC) of the Medical Board of California. Graduates must pass the National Commission on Certification of Physician Assistants (NCCPA) Physician Assistant National Certifying Exam to qualify for licensure throughout the United States.

Pi Alpha Honor Society
The program participates in the Pi Alpha Honor Society, which is the national Physician Assistant honor society organized for the promotion and recognition of both PA students and graduates. Membership signifies the inductees' significant academic achievement and honors them for their leadership, research, community/professional service and other related activities. The society also encourages a high standard of character and conduct among students and graduates. Students are encouraged to apply for this honor during their final semester in the program, but selection is done via an application process and review by current members of the society.

Master's Degree

Physician Assistant Practice (MPAP)
Admission Requirements and Procedures
Application to the Physician Assistant Program requires completion of a bachelor's degree (in any discipline) from a regionally accredited four-year institution and completion of academic prerequisite requirements. Admission to the program is for the fall semester only. Admission is granted by the physician assistant admissions committee after careful review of all applications. Selections
are made on the basis of a formal interview (for competitive applicants) and consideration of a variety of factors which include: academic record, type and amount of clinical experience, multicultural sensitivity, community service experience and professional experience. Applicants are required to submit an application through the Central Application Service for Physician Assistants (CASPA) as well as a USC Supplemental Application by November 1 of each year. Further details regarding admission procedures including those for international student applicants are provided online at usc.edu/pa.

Transfer Students or Advanced Placement
The Physician Assistant Program does not accept transfer students, nor do we allow advanced placement based on prior education or clinical experience. Each applicant who is admitted is required to complete the full Master of Physician Assistant Practice curriculum in residence at USC. No waivers or substitutions are permitted.

Registration
Students receive information regarding registration procedures during an orientation program held the week before classes begin.

Advisement
Information sessions are available for prospective students who would like to receive more information regarding the program. Applicants are encouraged to attend one of the program's information sessions where PA faculty and staff describe the program, the application process and answer general questions. Information sessions are held on the Alhambra Campus, Building A11. Contact the PA Program for further details and RSVP at uscpa@usc.edu or call (626) 457-4240. The information session schedule may be viewed at usc.edu/pa.

Degree Prerequisites
A bachelor's degree from a regionally accredited institution and completion of all prerequisite course work are required for admission to the Physician Assistant Program.

Science Prerequisites
A one-year general biology sequence with lab and a one-year general chemistry sequence with lab, each course designed for science majors. All science prerequisites must be completed within 10 years of application to the program. Three semester units or 4 quarter units of each of the following: human anatomy with lab; human physiology with lab; and microbiology with lab.

Distance learning courses are acceptable provided they are equivalent in all dimensions (including laboratory requirements) to courses taught in "traditional" educational settings (e.g., hybrid courses). All distance learning course credit must be provided by regionally accredited institutions of higher education. Students are expected to have a strong competency in medical terminology.

All science prerequisites should be completed within 10 years of application to the program. Exceptions to the 10-year science prerequisite time frame may be granted on an individual basis to those individuals who have completed one of the following: 1) at least 8 semester units of graduate credit in a medically related natural science discipline with an overall grade point average of 3.0 or better, completed within seven years of the application deadline, or 2) received an advanced degree in the natural or clinical sciences (e.g., MS, DVM, PharmD, PhD, MD) within 10 years of the application deadline. In either case, all course work completed and degrees conferred must be from institutions of higher education accredited by an accrediting agency recognized by the Secretary of the U.S. Department of Education. Requests for this 10-year exemption should be directed to the chair of Admissions.

Non-science Prerequisites
Three semester units or 4 quarter units of each of the following: general psychology and statistics. Two semesters of beginning college level Spanish language earned through course work or by placement examination. There are no language substitutions or waivers. Two semester units or three quarter units of English composition are required for international applicants only. AP course work is acceptable.

Students who intend to apply to the Physician Assistant Program should contact the admission office for evaluation of previous baccalaureate and/or post-baccalaureate course work.

Standardized Tests
Applicants are required to take either the GRE or MCAT examination. The examination must be taken within five years of the application deadline of November 1. Official scores of the general and analytical sections of the GRE must be submitted to USC by using the Institutional Code 4852 (departmental code is not necessary). Applicants with MCAT scores must provide their AAMC verification code to the USC PA Program. GRE or MCAT scores must be submitted by November 1. The PA Program expects that all applicants earn a combined quantitative and verbal GRE score of no less than 1,000 (on the older version of the exam) and 295 (on the newer version of the exam).

Clinical Experience Prerequisite
"Hands-on" patient care experience is preferred. Most successful applicants typically have 2,000 hours or more of paid clinical hours and have worked as one of the following: emergency medical technician, licensed vocational nurse, medical assistant, medical scribe, medical technologist, military medical corpsman, paramedic, psychiatric technician, physical therapy aide, radiological technician, respiratory therapist or registered nurse. Other health care experience is equally acceptable as long as the experience is "hands-on" in nature.

Physician Assistant Shadowing Experience
Shadowing a physician assistant in a clinical setting is expected. This activity provides the applicant with the upclose experience needed to understand the role and responsibilities of the PA and may help the applicant make a better informed decision in choosing a career as a physician assistant.

Community Service Prerequisite
Community service activities/projects are expected of all applicants. Service which benefits medically underserved or disadvantaged populations is preferred.

Curriculum Requirements
The completion of the 33-month professional curriculum is required to earn the Master of Physician Assistant Practice degree. Students do not have choices of courses to take nor are they permitted to drop any course or courses during the semester. Progress is permitted only when the prior semester is successfully completed. Students should view the curriculum outlined here as advisory only and subject to modification.

**Summative Evaluation**
A summative evaluation is conducted on each student during the sixth and final semester of the program to verify that each student is prepared to enter clinical practice.

**Health Requirements and Technical Standards**
All accepted candidates are required to meet the PA program's technical standards (physical and psychological competencies of performance) prior to entering the program and throughout training. Upon acceptance, students will be required to submit and maintain evidence of current health status and immunizations. Specific details outlining these technical standards are located at usc.edu/pa.

**Employment**
The Primary Care Physician Assistant Program at USC is a full-time program. Students are strongly discouraged to accept or continue outside employment while enrolled in the program. Students are not permitted to work for the program.

**Background Check**
All USC Physician Assistant students are required to pass a background check prior to admission to the Master of Physician Assistant Practice (MPAP) Program.

**Degree Requirements**
All students in the Master of Physician Assistant Practice degree program must meet course and grade point average requirements. All course requirements must be completed with a grade of "B" or better. The degree will not be conferred until the student has successfully completed all degree requirements. Students are subject to the degree requirements in the catalogue current for the semester of their admission into the program.

Physician assistant students are enrolled in a standard curriculum during their 33 months in the program. The following courses must be successfully completed in order to earn the Master of Physician Assistant Practice degree. Only physician assistant students may enroll in these courses. Departmental clearance is required to enroll.

### Year I, Fall Semester
- PCPA 503 Behavioral Sciences I Units: 4
- PCPA 523 Clinical Skills I Units: 4

### Year I, Spring Semester
- PCPA 506 Behavioral Sciences II Units: 4
- PCPA 526 Clinical Skills II Units: 6
- PCPA 546 Topics in Medicine II Units: 6

### Total units: 16

### Year II, Fall Semester

**Email:** mmidept@usc.edu
keck.usc.edu/molecular-microbiology-and-immunology/

**Faculty**

*Distinguished Professor and Chair:* Jae U. Jung, PhD
Admission Requirements

An applicant to the graduate program in molecular microbiology and immunology must have a bachelor's degree from an accredited college or university with a major in science — usually biology, chemistry or physics. The applicant must have demonstrated strength in science or mathematics. Undergraduate course work should have included at least one year of biology, chemistry through organic chemistry, mathematics through calculus, physics and physical chemistry. Deficiencies may be made up early in the predoctoral program.

The department encourages applicants to contact its office prior to making formal application. Each applicant must pass satisfactorily the general and advanced (biochemistry, cell and molecular biology or biology, chemistry or physics) portions of the Graduate Record Examinations, and must also arrange for three letters of recommendation to be written. In addition, the applicant must provide a one-page statement of career objectives, including the general area of research interest. This statement is intended to facilitate selection of those students who will most benefit from the department's graduate program. A personal interview is strongly recommended but not required.

Applicants who have attended graduate school at another university may be admitted to advanced standing upon recommendation of the department.

Training Grants and Fellowships

Incoming domestic students may be supported by a departmental training grant or by a research grant to a specific faculty mentor during their first year; subsequently, students are supported by research grants awarded to individual faculty members. International students are supported by research assistantships.

Master's Degree

Molecular Microbiology and Immunology (MS)

The primary objective of the Master of Science program is to prepare students for a career in the broad field of biomedical sciences with focus on, but not limited to, microbiology, virology, immunology and cancer research. This program provides extensive theoretical preparation in combination with hands-on research, where students are trained in research laboratories located on the Health Sciences Campus (HSC), comprising the Keck Medical School, the School of Pharmacy and the USC Norris Comprehensive Cancer Center, or located at Children's Hospital Los Angeles (CHLA).

Goals of the program are to prepare students for employment opportunities in: academic research or teaching at universities, institutes or not-for-profit research centers; research and development in industry (biotech, pharma, petrol, dairies, breweries); health care (hospitals and health care providers, medical technology, diagnostic laboratories); law firms (patents, intellectual property rights, technology transfer, toxic torts); environmental organizations (advisory, management, planning); government (public health, waste management, EPA, FDA, NIH, etc.); publishing (journalism, journal editor).

Admission Requirements

Applicants are expected to have a bachelor's degree in science (usually biology, chemistry or physics) from an accredited college or university. Generally required courses include: at least one year of college-level biology, chemistry through organic chemistry, mathematics through calculus, and one year of college-level physics. Students who do not meet all requirements may still apply, and admission will be decided on a case-by-case basis. In general, a minimum undergraduate GPA of 3.0 is expected. Additionally, a student must take the Graduate Record Examinations (GRE), and a minimum score of 1000 is expected. International applicants are expected to provide results from the International English Language Testing System (IELTS) or the Test of English as a Foreign Language (TOEFL; results from Internet-based, computer-based or paper-based tests are acceptable).

Course Requirements

A total of 34 units is required. Students may pursue a thesis option, which requires completion of MICB 594a, MICB 594b, MICB 594c (2-2-0) plus 30 units of approved course work, no more than 8 of which can be MICB 590 Directed Research. Students pursuing a non-thesis option must complete 34 units of...
approved course work. Students must choose one of these options by the end of the first year of study. Fourteen or more course units must be taken in the Department of Molecular Microbiology and Immunology; 8 units may be pursued outside the department and, upon approval, a maximum of 8 units of directed research in molecular microbiology and immunology may be applied to the degree. No more than 4 units of course work taken outside of USC can be applied toward the MS degree requirements. Students considering such an action should submit a petition to the department and document a rigorous academic standard for the course (reading materials, tests and other performance criteria, lecture content, etc.). The graduate advisory committee will review the petition and inform the student of its decision.

USC Mark and Mary Stevens Neuroimaging and Informatics Institute

2001 N. Soto Street
Suite 102
Los Angeles, CA 90032
(323) 44-BRAIN
Email: NIN@ini.usc.edu
niin.usc.edu

NIIN Core Faculty
Associate Professors of Neurology: Hongwei Dong, PhD; John Darrell Van Horn, PhD (NIIN Program Director)
Assistant Professors of Neurology: Kristi Clark, PhD; Neda Jahanshad, PhD; Judy Pa, PhD; Yonggang Shi, PhD
Assistant Professors of Research: Meredith Braskie, PhD; Houri Hintiryan, PhD; Andrei Irimia, PhD; Junning Li, PhD

Introduction
The Master of Science (MS) in Neuroimaging and Informatics (NIIN) program provides students with an understanding of the scientific and clinical underpinnings of neuroimaging science and how to leverage that knowledge to make new and important discoveries in biomedicine. Students who successfully complete the program will be ideally positioned to apply to formalized medical training programs, join PhD research training programs, obtain laboratory or administrative employment in the growing field of brain imaging neuroscience, or engage in public policy or regulatory administration of academic, clinical or business efforts in this expanding discipline. The program comprises 10 courses (eight 3-unit and two 1-unit) to be taken in one academic year. Didactic lectures address the technology of neuroimaging, a detailed examination of brain anatomy and function, and the variety of data-type dependent as well as integrative computational processing approaches. Laboratory modules (1) provide guided, hands-on experience with neuroimaging data collection approaches for examining anatomy, connectivity, and functional activity; and (2) examine and develop optimized data processing strategies. Finally, scholarship is enriched by several distinct faculty-guided, discussion-based courses that allow detailed examination of specific aspects of neuroimaging of elemental neurological processes and carefully selected applications in neurological and psychiatric medicine. Graduation requires completion of 26 course units.

Admissions Requirements
Applicants must supply a completed application for graduate studies including: transcripts from all institutions previously attended, standardized test scores, a personal statement describing scientific and career interests, and two letters of recommendation. Applications are generally anticipated for fall enrollment. Applicants to the program must apply to the USC Graduate School and must meet the minimum requirements for admission to the Graduate School. Students are required to have an overall undergraduate GPA of 3.0 or better (or equivalent) and have achieved graduation with a BS or BA degree (or equivalent) prior to matriculation. Students are expected to have taken the general portion of the GRE exam before application and to have met or exceeded university score requirements. Applicants not meeting Graduate School requirements for regular standing may, with the approval of the Graduate School, be conditionally admitted. International students from non-English speaking home countries are expected to demonstrate English language proficiency or take remedial English language courses, according to Graduate School policy. Specific prerequisites for this program include completed course work with a B or better grade (or equivalent) in neuroscience, computer science, mathematics, biology or a related field.

Advisement
The program recommends that students meet with the program director each semester prior to registration for courses.

Satisfactory Academic Progress
A graduate GPA of at least 3.0 in the program is required at all times. Any student whose graduate GPA falls below 3.0 will be given written notification that they have been placed on academic probation. Students who do not raise their GPA to 3.0 in the second semester are academically disqualified.

Master's Degree
Neuroimaging and Informatics (MS)
Degree Requirements
Graduation requires completion of 26 units, according to the required course schedule outlined below. None of the NIIN courses may be waived or substituted for other courses in the USC Catalogue. This program is intended to be completed within one academic year, and, while optional, does not include a requirement for independent laboratory research or a thesis. Students may request approval to undertake laboratory research and continuing course work during a second year research option; students must already be matriculated into the program before making this request, and not all students will be granted this opportunity (selection
must be based on academic performance and student research interests, and on availability of laboratory space).

Verity

Clinical Associate Professors: C. J. Cobb; M.M. Cosgrove; T.E. Howard; G. Pezeshkpour; M. Pietruszka; A.S.S. Raza; J.S. Wollman

Clinical Assistant Professors: J.D Augustine; A. Baltayan; E. Carpenter, Jr.; J.A. Chan; W. Chick; O. Chinwah; P.D. Colman; E.C. Dinovo; R. Djabourian; R. Gellibolian; K.E. Grimm; M.D. Hainowitz; J. Iqbal; M. Kennedy; M.T. Kiyabu; B. Kwok; B.J. Le Berthon; M.S. Lewis; K. Matsuda; V. Nelson; S.D. Oh; L.A. Pena; R. Phan; G. Pinsky; S. Prabhau; S.T. Pullarkat; L.A. Scheinin; R.A. Soni; J.P. Tovar; K.J. Young; S.K. Young

Adjunct Clinical Assistant Professors: F. Antelo; N.M. Green; M.A. Fajardo; C. Lwin; Z. Pavlova

Professors of Clinical: R.K. Brynes; P. Carpenter; D.L. Commins; J.F. Emerson; D.B. Endres; J.C. Felix (Obstetrics and Gynecology); A.L. Hiti; Y. Iwaki (Urology, Surgery); P. Mhawech-Fauceglia (Obstetrics and Gynecology); W.Y. Naritoku; A.E. Sherron; H. Shimada; S. Wu (Pediatrics)
Adjunct Professor of Clinical: L.A. Baxter-Lowe
Professors of Research: J. Groffen (Pediatrics); E. Heisterkamp (Pediatrics)
Associate Professors of Clinical: M. Aron; S. M. Butler-Wu; D.B. Casebolt; A.N. Fedenko (Orthopaedic Surgery); X. Gai; D. Hawes; S. He (Ophthalmology); G.H. Kim (Dermatology); Y. Ma; G. Raca; S. Saïta; I. Siddiqi; L.L. Wang (Surgery); P.M. Ward; G.D. Zeger
Assistant Professors of Clinical: R.C. (She) Bender; M. Blasini; M. Burnett (Neurology); S. Chopra; A.J. Correa; J. Cotter; B.K. DeClerck (Dermatology); J. Dien Bard; W.A. Elatte; X. Fu; H.T. Hardy; J.P. Hudgins; K.M. Hurth; J. Ji; K. Lai; L. Li; F. Medeiros; K.A. Nash*; M.J. Oberley; L. O'Brien; A.C. Perumbeti; P. Sanchez (Pediatrics); N.M. Shillingford; M.E. Sibug Sabet (Ophthalmology); S. Tattishev; M. Vegara-Iuri; M. Warren; Y. Wang; S. Zhou
Associate Professors of Research: K. Asahina; R.B. Widelitz
Assistant Professors of Research: D.E. Feldman; T. Jiang; R.A. Moats (Radiology); P. Tongaonkar; P. Wu; Jun Xu; D. Zhu
Research Assistant Professors: P. Hu; N.W. Marten; Y. Ouyang
Adjunct Research Associate Professor: S.A. Imam
Resident Clinical Instructors: Z. Ashraf; L. Aye; M. Boonyasampant; C. Chang; T. Chong; C. Costales; K. Dunham; A. Fong; J. Friedman; V. Garza; M. Goebel; W. Guo; S. Hamidi; T. Jenkins; T. Jong; B. Kay; T.H. Kim; X. Li; V. Martin; A. Mehta; R. O'Connell; N. Plaza; S. Walia; C. Wei; D. Yao; E. Yung; H. Zhang
Resident Clinical Instructors – Fellows: A. Garcia; A. Hagiya; C. Magana; W. Pasch; O. Press; K. Qidwai; B. Song; L. Szymanski; S. Vadat; Y. Zhao
Emeritus Professors: S.B. Chandor; P.T. Chandrasoma; B.N. Nathwani; J.W. Parker; P. Roy-Burman; N.E. Warner; E.T. Wong
Emeritus Associate Professor: A.D. Cramer
Emeritus Clinical Professors: M. Greenblatt; G.G. Hadley; W.H. Kern; D.S. Shillam; R.J. Schroeder
Emeritus Clinical Associate Professor: W.C. Smith
Emeritus Clinical Assistant Professors: R.L. McClure; J.K. Waken
Emeritus Professors of Clinical: K.-M. Chan; J.F.P. Dixon; C.B. Inderlied; T.T. Noguchi (Emergency Medicine, Surgery)
Emeritus Associate Professor of Clinical: W.P. Lewis
Emeritus Assistant Professor of Clinical: R.B. Hopper
Emeritus Professor of Research: T.L. Lincoln
*Recipient of university-wide or school teaching award.

The Department of Pathology provides training for both medical and graduate students. Medical students are trained in general, systemic and cellular pathology, providing them with an understanding and visualization of the basic processes underlying symptoms and clinical courses, as well as the ability to evaluate laboratory findings. This department also contributes to the training of residents and fellows at the LAC+USC Medical Center, Keck Hospital of USC and the USC Norris Cancer Hospital, Childrens Hospital Los Angeles and Los Angeles County Coroner/Medical Examiner's Office, providing these residents and fellows with an intensive residency program in anatomic and clinical pathology and offering subspecialty fellowship training in surgical pathology, cytopathology, hematopathology, neuropathology and forensic pathology.

The Department of Pathology has a Master of Science program. The tw-year MS program provides training in the latest technologies and concepts of biomedical research and provides the graduate with enhanced opportunities for positions in biotechnology companies, teaching colleges and various health department/governmental positions.

With 96 full-time faculty and 52 residents and fellows in training, the USC Department of Pathology is one of the largest pathology departments in the United States. The department has strong and diverse research programs in basic, clinical and translational pathology. Basic research includes programs in stem cell biology and organogenesis, molecular mechanisms of cancer, mechanisms of neurodegeneration and ocular disease, and pathogenesis of liver injury and disease. Clinical research is particularly strong in surgical pathology, cytopathology, hematopathology, immunohistochemistry, molecular pathology, microbiology, neuropathology, ophthalmology and pediatric pathology. Investigators in the department are leading programs developing novel therapeutics utilizing peptides, immunotherapies and stem cells. Residency training has added months in dermatopathology and molecular pathology at Keck Hospital of USC and in cytogenetics at CHLA. The hematopathology fellowship has increased fellowship items from two to three fellows and added Norris Cancer Hospital and CHLA as affiliated institutions, making this one of the leading hematopathology fellowships in the nation. CHLA has also provided funding for a second neuropathology fellow, and rotations at CHLA have been added in surgical and autopsy neuropathology, molecular genetics and research. The forensic pathology fellowship training program at the Los Angeles County Medical Examiner/Coroner's Office has administrative affiliation with the LAC+USC Medical Center.

The department provides diagnostic laboratory services for the LAC+USC Medical Center, the USC Norris Comprehensive Cancer Center and Hospital, Keck Hospital of USC, the USC Clinical Laboratories Group, and all USC Clinics. Approximately 30 of the department's full-time faculty members work in service laboratories throughout the LAC+USC Medical Center, where they are supported by 40 residents and fellows and a technical and clerical staff numbering in excess of 300. The USC Norris Comprehensive Cancer Center and Hospital and Keck Hospital of USC, as well as the USC clinics, are served by 34 full-time pathologists, two fellows, three residents and approximately 200 technical and support staff.

Graduate Programs
General Admissions

Applicants to the graduate program in pathology must have a bachelor's degree from an accredited college or university with an undergraduate major in one of the natural sciences; a minimum cumulative GPA of 3.0 for undergraduate work is required. Applicants must submit undergraduate transcripts and letters of recommendation from two undergraduate teachers with their application. All applicants must take the general portion of the Graduate Record Examinations (GRE). A combined score of at least 315 for the verbal and
quantitative scores is required. International students whose native language is not English must submit scores from the IELTS (International English Language Testing System) or the TOEFL (Test of English as a Foreign Language) examination. Personal interviews by members of the department's graduate committee may be requested. Original application materials, except letters of recommendation, should be sent to the Office of Admission, University of Southern California. To expedite consideration of the application, applicants should also send photocopies of the application, transcripts and GRE scores to the Pathology Department's graduate committee secretary, Lisa Doumak. Letters of recommendation should be addressed directly to the secretary, graduate committee. Applications are considered for admission to both the fall and spring semesters.

Residency and Fellowship Programs
The Department of Pathology offers six first-year residency positions and 24 residency positions in its fully ACGME-accredited four-year training program in anatomic and clinical pathology at the LAC/USC Medical Center. Training is offered in autopsy and surgical pathology, neuropathology, cytology, microbiology, hematopathology, immunohematology, clinical chemistry, toxicology, immunopathology, cytogenetics, cytogenomics, instrumentation, laboratory management, clinical informatics, electron microscopy, molecular pathology and other specialty areas. The Department of Pathology also offers the Accreditation Council on Graduate Medical Education (ACGME) fully accredited fellowship training in cytopathology (four positions), hematopathology (three positions), neuropathology (two positions), surgical pathology (seven positions) and forensic pathology (six approved positions). Admissions to residency is exclusively through ERAS (Electronic Residency Application Service) and the NRMP (National Resident Matching Program). Applicants to fellowship should contact the fellowship program director and program coordinator directly; the CAP (College of American Pathologists) Universal Fellowship Application Form is accepted by all USC fellowships.

Master's Degree
Experimental and Molecular Pathology (MS)
The Department of Pathology offers a program for the master of science degree with a major in experimental and molecular pathology. The primary objectives of this program are to provide the necessary theoretical and practical training in experimental pathology that culminates with the master of science degree. Goals of the program are to train students in preparation for senior research staff or senior technician positions in academic or industrial institutes, further MD or PhD study, consultantships requiring multidisciplinary backgrounds or advanced teaching positions in community colleges.

Admissions
The prerequisite for applicants to this program in pathology is a bachelor's degree with an undergraduate major in one of the natural sciences. A minimum GPA of 3.0 in the natural sciences (including mathematics) is usually required. Applicants must achieve a competitive score on the general portions of the Graduate Record Examinations (GRE). In addition, the department requires at least two letters of recommendation from faculty members who can evaluate the applicant's potential for graduate work. Demonstrated proficiency in the English language is required. International students whose native language is not English must submit scores from the IELTS (International English Language Testing System) or the TOEFL (Test of English as a Foreign Language) examination. Special circumstances may provide consideration for conditional admission.

Course Requirements
At least 34 units of graduate study are required. The required courses include INTD 522 Infection and Host Responses 4, INTD 531 Cell Biology 4, INTD 550 Introduction to Pathology 4, INTD 551 Pathobiology of Disease 4, INTD 571 Biochemistry 4, PATH 553 Methods in Cellular and Clinical Pathology 3, PATH 554 Methods in Molecular Pathology 2 and PATH 570a Seminar in Pathology 1, PATH 570b Seminar in Pathology 1. Fourteen or more course units must be taken in the Department of Pathology, 8 units may be pursued outside the department, and a maximum of 8 units of directed research in pathology may be applied to the degree. No more than 4 units of course work taken outside of USC should be applied toward the MS degree requirements. Students considering such an action should submit a petition to the pathology graduate committee and document a rigorous academic standard for the course (reading materials, texts and other performance criteria, lecture content, etc.). The pathology graduate committee reviews the petition and informs the student of its decision.

Master's Examinations/Master's Thesis
The Master of Science has the option of either an experiment-based thesis or theory-based thesis course of study. Each student's program will be tailored to suit individual needs and background. Students who require training mainly in the knowledge of pathology may opt for the theory-based thesis course of study. Students also have an opportunity to register for directed research (PATH 590). For the experiment-based thesis option, the student must take PATH 594a Master's Thesis 2, PATH 594b Master's Thesis 2. For the theory-based thesis option, the student must take GRSC 810 Studies for Master's Examination during the semester they plan to graduate if not otherwise enrolled.

Master's Degree

Medical Physiology (MS)
Keith Administration Building 409  
1975 Zonal Avenue  
Los Angeles, CA 90089-9031  
(323) 442-0230  
FAX: (323) 442-9031

Program Director: H. Kaslow, PhD, hrkaslow@usc.edu

Physiology is the study of the functions and activities of life and living matter at all levels of organization within an organism. While physiology research is frequently at the molecular level, the tradition of the discipline challenges the researcher to consider all homeostatic and developmental functions of an organism. This tradition can guide research efforts seeking to identify causes of disease and critical physiological functions possessing therapeutic and health-promoting opportunities. The Medical Physiology program focuses on the research experience of the thesis track but in special circumstances will consider applications to the non-thesis track.

Admission: Applicants to the Master of Science in Medical Physiology (MPHY) program will have earned a bachelor's degree and completed course work in mathematics (including calculus), physics, chemistry and biological sciences. To be considered, applicants must complete a USC Graduate Admissions application and submit either GRE or MCAT test scores, a brief personal statement explaining the reasons for applying to the program, official transcripts from all academic institutions previously attended and three letters of recommendation. Foreign applicants are required to submit results from a TOEFL or IELTS examination. Potential applicants are encouraged to submit questions regarding the program and application process to the Medical Physiology Graduate Program Office prior to submitting the formal application (physiology@usc.edu). In the personal statement, applicants must specify whether they are applying to the thesis- or non-thesis track and the rationale for that decision. Normally, admission will be in the thesis track and a recommendation to admit an applicant will require MPHY graduate committee approval of an agreement between an applicant and a faculty member who will serve as mentor of the thesis project. The agreement shall specify the general research area of the thesis. The Medical Physiology graduate program participates in the USC Progressive Master's Degree Program and seeks applications from qualified students (usc.edu/programs/ugprograms/progressive).

Course Requirements: The master's degree in Medical Physiology requires the completion of at least 32 graduate-level units with a grade point average of 3.0. All students are required to take the following: INTD 531, INTD 561, INTD 574, MPHY 572, MPHY 573, MPHY 590, PM 510. Elective courses must be approved by the director of the MPHY Graduate Program. Students may pursue a thesis option, which requires completion of MPHY 594a 2, MPHY 594b 2, MPHY 594c 2, MPHY 594d 2. The thesis track is required when students take less than 26 units of non-research units (i.e., more than 6 research units out of the 32 units required for graduation). Students pursuing a non-thesis option must complete 32 units of approved course work.

Continued enrollment: Continued enrollment in the program requires an average GPA of at least 3.0, a grade of at least B in MPHY 572 and MPHY 573, a grade of at least B, "Pass" or "Credit" in INTD 574 or equivalent, and a "Pass" or "Credit" in all non-graded courses. At any time, after evaluating a student's progress, the MPHY Graduate Committee, at its discretion, may require a student pass a screening examination to be eligible to progress to the third or later semester of graduate study. If a student fails to achieve these metrics or pass a screening examination, the MPHY Graduate Committee will make a recommendation as to whether or not to place the student on probationary enrollment with a defined remediation sufficient to remedy the deficiency or to recommend the student withdraw or be dismissed from the program.

Thesis track: The thesis work of a student in the thesis track will be conducted under the guidance of a Master's Student Thesis Committee, which shall consist of at least:

- The student's adviser who shall chair the committee and be a tenure-track member of the MPHY Graduate Committee.
- The student's thesis mentor if not the same faculty member as the adviser.
- One additional tenure-track faculty member of the Department of Physiology and Biophysics.
- One additional tenure-track faculty member.

Final Examination: Passing the examination requires: 1) submission of a thesis document describing the work of the thesis, and 2) an oral defense of the thesis both to the satisfaction of the Thesis Committee. The thesis document shall be distributed to the student's Master's Thesis Committee and a copy provided to the Medical Physiology Graduate Program Office at least two weeks prior to the oral examination. If the document is not provided by that date, then the oral examination shall be rescheduled to accommodate this requirement. Final acceptance of the document and passage of the oral examination requires the unanimous recommendation of all members of the thesis committee. If the student does not pass the examination on the first attempt, at its discretion the MPHY Graduate Committee may grant a second opportunity to pass the examination according to policies in the USC Catalogue.

Non-thesis track: Final Examination. A comprehensive examination replaces the thesis defense. The MPHY Graduate Committee shall appoint a member of the MPHY Graduate Committee to supervise the final examination process (the "Examination Supervisor"). The examination shall be on a topic approved by the Examination Supervisor and consist of: 1) a document sufficiently discussing the topic, and 2) passing an oral examination on the substance of the topic. The document shall be submitted to the Examination Supervisor at least two weeks prior to the oral examination. If the document is not provided by that date, then the oral examination shall be rescheduled to accommodate this requirement. To qualify as the final examination, all the faculty of the MPHY Graduate Committee shall be invited to attend the presentation with notice given at least two weeks in advance and at least three members of the MPHY Graduate Committee or alternates selected by the program director shall attend. During and following the presentation, faculty members may pose questions relevant to the presentation to determine if the
student has mastered an appropriate breadth and depth of knowledge of physiology. The Examination Supervisor shall then receive reports from faculty attending the presentation, usually within a week, and make a recommendation to the MPH Graduate Committee as to whether or not the student passed the examination. Unless a member of the Graduate Committee objects, the recommendation shall be considered accepted. If an objection is received a decision shall be made by a secret ballot vote with two thirds of those voting in favor of passage required for passage of the examination. If the student does not pass the examination on the first attempt, at its discretion the MPH Graduate Committee may grant a second opportunity to pass the examination according to policies in the USC Catalogue.

Undergraduate Degrees

Progressive Degree Programs in Preventive Medicine

The Department of Preventive Medicine is responsible for training medical, graduate and undergraduate students in the areas of biostatistics, epidemiology, health behavior research, public health, and preventive medicine. Faculty from the statistical genetics and molecular epidemiology department also perform research in the areas of biostatistics, epidemiology of acute and chronic diseases, and environmental health. The undergraduate and graduate programs offered by the department are noteworthy for the extensive opportunities offered to the students for involvement in faculty research. It is not uncommon for students to begin working closely with faculty members on research projects as early as their first or second year of study.

Degree Programs

The Department of Preventive Medicine offers the following degree programs:

- BS in Global Health
- BS in Health Promotion and Disease Prevention Studies
- BS in Health Promotion and Disease Prevention/Master of Public Health
- BS in Health Promotion and Disease Prevention/MS in Biostatistics
- BS in Health Promotion and Disease Prevention/MS in Molecular Epidemiology
- BS in Dental Hygiene/Master of Public Health
- MS in Applied Biostatistics/Epidemiology
- MS in Clinical and Biomedical Investigations
- MS in Molecular Epidemiology
- MS in Biostatistics
- Master of Public Health
- Master of Public Health (online)
- Master of Public Health/Doctor of Medicine
- Master of Public Health (Health Promotion)/PhD in Psychology (Clinical)
- Master of Public Health/PharmD
- Master of Public Health/ Master of Planning
- Master of Public Health/Master of Social Work
- PhD in Biostatistics
- PhD in Epidemiology
- PhD in Molecular Epidemiology
- PhD in Preventive Medicine (Health Behavior Research)

The Department of Preventive Medicine also offers the following undergraduate minor programs:

- Minor in Cinema-Television for the Health Professions
- Minor in Cultural Competence in Medicine
- Minor in Environmental Health
- Minor in Global Health
- Minor in Health Communication
- Minor in Nutrition and Health Promotion
- Minor in Public Health

Minor in Substance Abuse Prevention

Graduate Programs

Doctor of Philosophy in Psychology (Clinical)/Master of Public Health (Health Promotion)

The PhD/MPH dual degree combines knowledge of clinical psychology research and practice with an understanding of health from a population perspective. The student enrolls primarily in the clinical psychology doctoral program and may apply to the MPH program during the first year. During the second and subsequent years, coursework is taken in both programs. The dissertation is undertaken through the Department of Psychology.

PharmD/Master of Public Health

The School of Pharmacy and the Master of Public Health program, in recognition of the rapidly changing health care environment and in response to the growing demand for pharmacists who are knowledgeable in both pharmacy and population-based health care issues, have developed a dual degree program. The joint PharmD-MPH degree will enable graduates to be more responsive to today’s health care needs and will provide training for pharmacists who seek to be agents of change within the profession and to assume leadership roles in the pharmacy field and in public health at the local, state and national levels.

The PharmD/MPH program spans five years (four years of pharmacy school courses and one year of public health courses). Students begin the core MPH courses following the successful completion of the first year of pharmacy school. The last three years of the program are devoted to the clinical rotations of the School of Pharmacy and to the completion of the elective courses and practicum (field experience) of the MPH program.

All students in the PharmD/MPH program must meet course requirements, grade point average requirements and program residency requirements of both programs. Students must have a cumulative GPA of 3.0 in the PharmD curriculum and a 3.0 in the MPH curriculum to meet graduation requirements.
The Bachelor of Science in Global Health is awarded after students successfully complete 128 units, consisting of 66 units for the major and fulfillment of USC general education requirements including third semester equivalency in a foreign language.

**General Education Requirements**

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. For more information about USC's general education requirements, see General Education.

**Requirements for the Major (66 units)**

The program is divided into core and elective components. As part of the core research requirements, students must complete a directed research requirement, HP 490, with a specific international research focus. The core component (42–46 units) is required for all students.

**Core Courses (32 Units)**

Health Promotion and Disease Prevention Studies (BS)
837 Downey Way
Stoner Hall, Suite 101
Los Angeles, CA 90089-1149
Director: Elahe Nezami, Ph.D.
(213) 740-1060
Email: bhealthy@usc.edu
hpdp.usc.edu

The undergraduate program in Health Promotion and Disease Prevention Studies (HP) provides a well-rounded, professionally focused education leading to the Bachelor of Science degree. The program is concerned with the sociocultural, behavioral, psychological, and biological factors contributing to wellness and disease. It is an ideal major for students interested in medicine, pharmacy, dentistry, public health, epidemiology, health psychology and health behavior research. Areas of study include: global health; cultural diversity in medicine; substance abuse prevention and program planning; nutrition and fitness; health promotion of minority and underserved populations; and general public health issues (e.g., HIV/AIDS, violence, health promotion in the workplace and behavioral medicine).

Program Requirements
The Bachelor of Science degree is awarded after students successfully complete 128 units, consisting of 66 units for the major and fulfillment of USC general education requirements including third semester equivalency in a foreign language.

General Education Requirements
The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. For more information about USC's general education requirements, see General Education

Requirements for the Major (66 units)
The program is divided into core and elective components. The following core component (42 units) is required of all students.

Non-HP Courses (20 Units)
BISC 120Lg General Biology: Organismal Biology and Evolution Units: 4 or
BISC 121Lg Advanced General Biology: Organismal Biology and Evolution Units: 4
BISC 220Lg General Biology: Cell Biology and Physiology Units: 4 or
BISC 221Lg Advanced General Biology: Cell Biology and Physiology Units: 4
CHEM 105aLg General Chemistry Units: 4 or
CHEM 115aLg Advanced General Chemistry Units: 4

MATH 116 Mathematics for the Social Sciences Units: 4 or
MATH 125g Calculus I Units: 4

PSYC 100Lg Introduction to Psychology Units: 4

Note:
*MATH 125 allows students who have placed out of MATH 116 to take a higher-level math class; it also satisfies the math requirement for premedical students.

HP Courses (22 Units)
HP 200 Introduction to Health Promotion and Disease Prevention Units: 4
HP 300 Theoretical Principles of Health Behavior Units: 4
HP 320 Biological and Behavioral Basis of Disease Units: 4
HP 340L Health Behavior Statistical Methods Units: 4
HP 350L Health Behavior Research Methods Units: 4
HP 480 Internship in Health Promotion and Disease Prevention Units: 2, 3, 4 or
HP 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8 max 12

Advanced HP and Health Profession Preparatory Courses
A total of 24 units of electives are required of all students (at least 12 of the 24 must be HP courses).

Electives (24 Units)
BISC 320L Molecular Biology Units: 4
BISC 330L Biochemistry Units: 4
CHEM 105bL General Chemistry Units: 4 or
CHEM 115bL Advanced General Chemistry Units: 4
CHEM 322aL Organic Chemistry Units: 4
CHEM 322bL Organic Chemistry Units: 4
EXSC 300L Physiology of Exercise Units: 4
EXSC 407aL Advanced Exercise Physiology Units: 4
HBIO 301L Human Anatomy Units: 4
HP 365gmw Culture, Lifestyle, and Health Units: 4
HP 370g Introduction to Epidemiology: Methods and Applications Units: 4
HP 401 Cultural Competence in Medicine Units: 4

PSYC 437 Adolescent Development Units: 4
SOCI 350 Social Exclusion, Social Power, and Deviance Units: 4
SOCI 475 Medical Sociology Units: 4

Minor
Cinema-Television for the Health Professions Minor
This minor introduces pre-health students to the theory and techniques of the cinematic arts and to a set of media practices useful for the implementation of health promotion strategies. This minor is designed for students who plan to enter careers or professional programs in medicine after graduation and are interested in working with film and television producers to disseminate accurate health information to the public. It complements major programs such as biological sciences, chemistry, kinesiology, health promotion and disease prevention studies, and environmental studies.

Required Courses (24 Units)
CTCS 190g Introduction to Cinema Units: 4
HP 345 Health Issues in Entertainment Media Units: 4

Two of the following:
environmental health and its challenges. Curriculum will provide students with a basic understanding of environmental health. This minor is designed for students who plan to enter careers in medicine after graduation and are interested in using cultural knowledge to provide more effective health care. The minor focuses on global health, epidemiology (as it relates to environmental exposures), toxicology and exposure science. Students will be prepared to address and prevent environmental health hazards, promote public health and contribute to the resolution of various environmental health challenges. This minor is ideal for pre-health majors across the university.

**Required Courses (20 Units)**
- HP 200 Introduction to Health Promotion and Disease Prevention Units: 4
- HP 320 Biological and Behavioral Basis of Disease Units: 4
- HP 408 Environmental Health in the Community Units: 4
- HP 446 Poisons, People, and Politics Units: 4
- HP 448 Global Environmental Changes and Health Units: 4

*Note: Prerequisite required*

**Global Health Minor**
This minor provides students with a basic understanding of the factors that determine the health of populations around the globe. Curriculum focuses on the cultural, environmental and clinical aspects of various health topics such as maternal and child health, aging, obesity, infectious disease and others. By studying these issues, students from majors across the university will be prepared to assess and contribute to the resolution of emerging global health challenges. This minor will appeal to a wide variety of majors, particularly majors centered on international affairs, business and health care.

**Required Courses (20 Units)**
- HP 270 Introduction to Global Health Units: 4
- HP 470 Case Studies in Global Health Units: 4

**Three of the following:**
- GER 483 Global Health and Aging Units: 4
- HP 365gmw Culture, Lifestyle, and Health Units: 4
- HP 401 Cultural Competence in Medicine Units: 4
- HP 402 Maternal and Child Health Units: 4
- HP 422 AIDS in Society Units: 4

**Health Communication Minor**
This minor is designed to appeal to students with a wide range of interests, including those with a general interest in promoting healthy lifestyle practices through effective communication. These students will be prepared to seek jobs in areas such as the managed care industry, hospitals, wellness programs, broadcast and cable companies, and private and governmental agencies, as well as other organizations looking for experts with demonstrated knowledge in health-related fields.

**Required Courses (20 Units)**
- COMM 302 Persuasion Units: 4
- COMM 385 Survey of Organizational Communication Units: 4
- COMM 443 Communicating Health Messages and Medical Issues Units: 4
- HP 200 Introduction to Health Promotion and Disease Prevention Units: 4

**Cultural Competence in Medicine Minor**
This minor is designed for students who plan to enter careers or professional programs in medicine after graduation and are interested in using cultural knowledge to provide more effective health care. The minor focuses on global health, epidemiology (as it relates to environmental exposures), toxicology and exposure science. Students will be prepared to address and prevent environmental health hazards, promote public health and contribute to the resolution of various environmental health challenges. This minor is ideal for pre-health majors across the university.

**Required Courses (20 Units)**
- HP 200 Introduction to Health Promotion and Disease Prevention Units: 4
- HP 401 Cultural Competence in Medicine Units: 4
- HP 420m Gender and Minority Health Issues Units: 4

**Eight additional units from the following:**
- CTAN 451 History of Animation Units: 2
- CTCS 400 Non-Fiction Film and Television Units: 4
- CTPR 301 Creating the Non-Fiction Film Units: 4
- CTPR 375 Functions of a Director Units: 4
- CTPR 385 Colloquium: Motion Picture Production Techniques Units: 4
- CTPR 474 Documentary Production Units: 4
- CTRW 315x Filmwriting Units: 3
- CTRW 412 Introduction to Screenwriting Units: 2
- CTRW 416 Motion Picture Script Analysis Units: 2

**Environmental Health Minor**
This minor provides students with a basic understanding of environmental health and its challenges. Curriculum will focus on global health, epidemiology (as it relates to environmental exposures), toxicology and exposure science. Students will be prepared to address and prevent environmental health hazards, promote public health and contribute to the resolution of various environmental health challenges. This minor is ideal for pre-health majors across the university.

**Required Courses (20 Units)**
- HP 365gmw Culture, Lifestyle, and Health Units: 4
- HP 370g Introduction to Epidemiology: Methods and Applications Units: 4
- HP 402 Maternal and Child Health Units: 4
- HP 408 Environmental Health in the Community Units: 4
- HP 410 Issues in Prevention and Cessation of Drug Abuse Units: 4
- HP 421 Violence as a Public Health Issue Units: 4
- HP 422 AIDS in Society Units: 4
- HP 442 Chronic Disease Epidemiology Units: 4
- HP 450 Traditional Eastern Medicine and Modern Health Units: 4
- HP 460 Adolescent Health Units: 4
- PSYC 462m Culture and Mental Health Units: 4
One of the following:
COMM 304 Interpersonal Communication Units: 4
COMM 308 Communication and Conflict Units: 4
COMM 315 Health Communication Units: 4
COMM 324m Intercultural Communication Units: 4
COMM 375 Business and Professional Communication Units: 4
COMM 402 Public Communication Campaigns Units: 4
COMM 480 Nonverbal Communication Units: 4
COMM 486 Human and Technological Systems in Organizations Units: 4
HP 365gmw Culture, Lifestyle, and Health Units: 4
HP 370g Introduction to Epidemiology: Methods and Applications Units: 4
HP 401 Cultural Competence in Medicine Units: 4
HP 402 Maternal and Child Health Units: 4
HP 403 Behavioral Medicine Units: 4
HP 408 Environmental Health in the Community Units: 4
HP 412 Health Promotion and Prevention Policy Units: 4
HP 420m Gender and Minority Health Issues Units: 4
HP 421 Violence as a Public Health Issue Units: 4
HP 422 AIDS in Society Units: 4
HP 430 Obesity and Health Units: 4
HP 442 Chronic Disease Epidemiology Units: 4
Nutrition and Health Promotion Minor
This minor is designed to appeal to students interested in nutrition, especially in preparation for graduate study in health-related fields (e.g., medicine, public health) or to enter health-related fields of employment. The focus of the minor is on assessing, planning and evaluating dietary intake of individuals or groups under various conditions of health and disease based upon principles of nutrition and behavioral science. Students in this minor will study factors associated with dietary habits and the development of effective individual and group interventions. It complements majors including psychology, gerontology, biological sciences, chemistry, kinesiology and environmental studies.

Required Courses (20 Units)
HP 230 Nutrition and Health Units: 4
HP 430 Obesity and Health Units: 4
HP 431 Behavior and Education Strategies for Nutrition and Fitness Units: 4
Two of the following:
HP 365gmw Culture, Lifestyle, and Health Units: 4
HP 370g Introduction to Epidemiology: Methods and Applications Units: 4
HP 401 Cultural Competence in Medicine Units: 4
HP 402 Maternal and Child Health Units: 4
HP 403 Behavioral Medicine Units: 4
HP 412 Health Promotion and Prevention Policy Units: 4
HP 420m Gender and Minority Health Issues Units: 4
HP 432 Clinical Nutrition Units: 4
HP 433 Advanced Topics in Nutrition Units: 4
HP 460 Adolescent Health Units: 4
HP 480 Internship in Health Promotion and Disease Prevention Units: 2, 3, 4, max 4
HP 490x Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, max 12

Public Health Minor
This minor is designed for students interested in a broad array of health issues. The focus of the minor is on reducing disability and mortality from avoidable injuries and chronic disease, educating the community about healthy lifestyles, assuring access to health care, and measuring changes using various indicators over time. This minor teaches students to meet the challenges of the changing environment of the health care system. It complements a number of majors including psychology, sociology, American studies and ethnicity, biological sciences, economics, environmental studies, kinesiology, gender studies, international relations, philosophy, religion, gerontology and political science.

Required Courses (20-24 Units)
HP 200 Introduction to Health Promotion and Disease Prevention Units: 4
PPD 330 Introduction to Health Care Systems Units: 4
Three of the following:
HP 365gmw Culture, Lifestyle, and Health Units: 4
HP 370g Introduction to Epidemiology: Methods and Applications Units: 4
HP 401 Cultural Competence in Medicine Units: 4
HP 402 Maternal and Child Health Units: 4
HP 403 Behavioral Medicine Units: 4
HP 408 Environmental Health in the Community Units: 4
HP 410 Issues in Prevention and Cessation of Drug Abuse Units: 4
HP 412 Health Promotion and Prevention Policy Units: 4
HP 420m Gender and Minority Health Issues Units: 4
HP 421 Violence as a Public Health Issue Units: 4
HP 422 AIDS in Society Units: 4
HP 430 Obesity and Health Units: 4
HP 441 Health Promotion in the Workplace Units: 4
HP 442 Chronic Disease Epidemiology Units: 4
HP 460 Adolescent Health Units: 4

Substance Abuse Prevention Minor
This minor offers students an opportunity to gain an overall understanding of substance abuse as a major modifiable risk factor for illness. It allows students to learn theories of behavior change, to understand the issues in prevention and cessation of drug abuse, and to develop, implement, and evaluate intervention strategies. It complements a number of majors including psychology, sociology, American studies and ethnicity, biological science and gerontology.

Required Courses (24 Units*)
HP 200 Introduction to Health Promotion and Disease Prevention Units: 4
HP 300 Theoretical Principles of Health Behavior Units: 4
HP 410 Issues in Prevention and Cessation of Drug Abuse Units: 4

767
Elective Core Courses (25 Units)

Course Requirements

General requirements include at least 38 units of required courses as follows: 25 units of core courses and at least 9 units of elective courses. In addition, each student must register for four units of PM 594a Master's Thesis, PM 594b Master's Thesis and write a master's thesis.

Core Courses (25 Units)

- PM 510L Principles of Biostatistics Units: 4
- PM 511aL Data Analysis Units: 4
- PM 512 Principles of Epidemiology Units: 4
- PM 517a Research Methods in Epidemiology Units: 3
- PM 518a Statistical Methods for Epidemiological Studies I, II Units: 3
- PM 523 Design of Clinical Studies Units: 3
- PM 527 Epidemiology of Infectious Disease Units: 4

Electives (At Least 9 Units)

- PM 511bL Data Analysis Units: 4
- PM 511cL Data Analysis Units: 4
- PM 515 Multivariate Statistics in Health Behavior Research Units: 4
- PM 516a Statistical Problem Solving Units: 1
- PM 516b Statistical Problem Solving Units: 1
- PM 517b Research Methods in Epidemiology Units: 3
- PM 529 Environmental Health: An Epidemiological Approach Units: 4
- PM 530 Biological Basis of Disease Units: 4, 2 years
- PM 533 Genetic and Molecular Epidemiology Units: 3, 2 years

PM 551 Statistical Methods in Genome-Wide Association Studies Units: 3
PM 560 Statistical Programming With R Units: 2
PM 569 Spatial Statistics Units: 3
PM 574 Programming In Modern Statistical Software Units: 2
PM 575 Statistical Methods in Environmental Epidemiology Units: 3
PM 579 Statistical Analysis of High-Dimensional Data Units: 4
PM 588 The Practice of Epidemiology Units: 4
PM 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
PM 611 Advanced Topics in Epidemiology Units: 3

Thesis (4 Units)

PM 594a Master's Thesis Units: 2
PM 594b Master's Thesis Units: 2

Additional Requirements

Electives will be determined by the student's needs and interests and will be approved by the student's adviser. When appropriate, courses not listed above may be chosen with approval of the student's adviser. Sufficient familiarity in computer languages to operate major software packages for data management and analysis is required.

Thesis Requirement

A master's thesis is required of all students. This thesis consists of a research project approved by the faculty and chosen from problems encountered within the department, in other departments of the Keck School of Medicine or university or elsewhere in the community.

Biostatistics (MS)

The department encourages applicants with undergraduate degrees in mathematics, statistics or biostatistics, computer science or related fields. Undergraduate preparation should have included courses in calculus and basic computer programming. Applicants should also meet the minimum requirements for admission to the Graduate School. Demonstrated proficiency in the English language is essential. With approval of the Graduate School, applicants not meeting these requirements may be conditionally admitted contingent upon maintaining a GPA of 3.0 for the first 12 units of graduate study.

Note:

*Including prerequisite
PM 522a Introduction to the Theory of Statistics Units: 3
PM 522b Introduction to the Theory of Statistics Units: 3

Electives (At Least 7 Units)
PM 511cL Data Analysis Units: 4
PM 516a Statistical Problem Solving Units: 1
PM 516b Statistical Problem Solving Units: 1
PM 518b Statistical Methods for Epidemiological Studies I, II Units: 3
PM 520L Advanced Statistical Computing Units: 3
PM 523 Design of Clinical Studies Units: 3
PM 534 Statistical Genetics Units: 4
PM 544L Multivariate Analysis Units: 3, 2 years
PM 551 Statistical Methods in Genome-Wide Association Studies Units: 3
PM 552 Statistical Methods in Clinical Trials Units: 3, 2 years
PM 560 Statistical Programming With R Units: 2
PM 569 Spatial Statistics Units: 3
PM 574 Programming In Modern Statistical Software Units: 2
PM 575 Statistical Methods in Environmental Epidemiology Units: 3
PM 579 Statistical Analysis of High-Dimensional Data Units: 4
PM 588 The Practice of Epidemiology Units: 4
PM 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
PM 603 Structural Equation Modeling Units: 4, 2 years
PM 604 Health Behavior Research Methods Units: 4

OR
MATH 542L Analysis of Variance and Design Units: 3
MATH 543L Nonparametric Statistics Units: 3
MATH 545L Introduction to Time Series Units: 3
MATH 547 Methods of Statistical Inference Units: 3
MATH 548 Sequential Analysis Units: 3
MATH 550 Sample Surveys Units: 3

Thesis (4 Units)
PM 594a Master's Thesis Units: 2
PM 594b Master's Thesis Units: 2

Additional Requirements
The student's choice of elective courses will be directed by needs and interests and must be approved by the student's graduate adviser. When appropriate, elective courses not listed above may be substituted with approval of the adviser. Sufficient familiarity in computer languages to operate major software packages for data management and analysis is required.

Molecular Epidemiology (MS)
Students with a bachelor's degree in quantitative biological sciences will be eligible for admission. In addition, the BA students must have completed at least one year of general biology, one semester of biochemistry and one semester of statistics to be admitted into the Graduate School. Under unusual circumstances, conditional acceptance will be offered to students who do not meet these requirements — allowing them to complete the missing undergraduate courses prior to their full admission into the Graduate School. An introductory biochemistry class is also available in the School of Pharmacy, which may satisfy the biochemistry prerequisite.

Course Requirements
The MS program requires 37 graduate-level units with a minimum grade point average of 3.0 including epidemiology core courses, 14 units; molecular biology core courses, 12 units; at least 3 elective units; laboratory research plus thesis, 8 units. Students must also complete a master's thesis.

Prerequisite: PM 510 L Principles of Biostatistics

Epidemiology Core Courses (14 Units)
PM 511aL Data Analysis Units: 4
PM 512 Principles of Epidemiology Units: 4
PM 518a Statistical Methods for Epidemiological Studies I, II Units: 3
PM 533 Genetic and Molecular Epidemiology Units: 3, 2 years

Molecular Biology Core Courses (12 Units)
BIOC 543 Human Molecular Genetics Units: 4
INTD 504 Molecular Biology of Cancer Units: 4, 2 years
or
INTD 555 Biochemical and Molecular Bases of Disease Units: 4
INTD 571 Biochemistry Units: 4

Electives (At Least 3 Units)
INTD 561 Molecular Biology Units: 4
PM 517a Research Methods in Epidemiology Units: 3
PM 523 Design of Clinical Studies Units: 3

Laboratory Research + Thesis (8 Units)
DPT 590a-Directed Research Units: 1
DPT 590b-Directed Research Units: 1
DPT 590c-Directed Research Units: 1
DPT 590d-Directed Research Units: 1
DPT 594a-Thesis Units: 2
DPT 594b-Thesis Units: 2

Note:
DPT refers to the department offering the laboratory/directed research experience and thesis supervision. DPT is one of the following departments (but not restricted to): PM, BIOC, PATH.
Laboratories should expose students to: statistical and epidemiological methods, molecular techniques, human genetics, population-based studies.

Public Health (MPH)
The MPH program is offered in two formats: the traditional format (on-campus) and via distance learning (online). The traditional MPH program allows students to choose from seven tracks: Health Education and Health Promotion, Biostatistics/Epidemiology, Health Communication, Child and Family Health, Global Health Leadership, Public Health Policy and Environmental Health. The distance-learning
program allows students to choose from four tracks: Health Education and Promotion, Biostatistics/Epidemiology, Global Health Leadership, and GeoHealth. The curriculum includes a set of core courses for each track and electives. The program also includes a capstone course and an internship placement that integrates academic and practical experiences and prepares individuals to work in governmental and non-governmental organizations in health-related fields.

**Course Requirements**
The master's degree program in public health (MPH) requires a minimum of 47 semester units of required and elective graduate study. The MPH is also available online.

**Core Requirements**
- PM 501 Foundations in Health Education and Promotion Units: 4
- PM 508 Health Service Delivery in the U.S. Units: 4 or
  PM 509 Comparative Health Care Systems Units: 4
- PM 510L Principles of Biostatistics Units: 4
- PM 512 Principles of Epidemiology Units: 4
- PM 529 Environmental Health: An Epidemiological Approach Units: 4
- PM 564 Public Health Leadership and Management Units: 3

**Additional Requirements**
- At least 4 units from any 500- or 600-level course**
- 2 units of a practicum (PM 596) and 2 units of the capstone (PM 597), ending in a final report.
- "May not receive credit for both track core and track elective category.
- "Distance learning track elective and elective options are limited. Students should consult their adviser for guidance about available options.

**Track 2: Biostatistics/Epidemiology**

**Required Courses (At Least 12 Units)**
- PM 511aL Data Analysis Units: 4
- PM 511bL Data Analysis Units: 4
- Select one course from the following:
  - PM 527 Epidemiology of Infectious Disease Units: 4
  - PM 536 Program Evaluation and Research Units: 4
  - PM 537 Chronic Disease Epidemiology Units: 4
- At least 4 units from the following**:
  - PM 514 Sexually Transmitted Infections: a Systems Approach Units: 4
  - PM 517a Research Methods in Epidemiology Units: 3
  - PM 517b Research Methods in Epidemiology Units: 3
  - PM 518a Statistical Methods for Epidemiological Studies I, II Units: 3
  - PM 518b Statistical Methods for Epidemiological Studies I, II Units: 3
  - PM 527 Epidemiology of Infectious Disease Units: 4
  - PM 530 Biological Basis of Disease Units: 4, 2 years
  - PM 532 Genetics in Public Health and Preventive Medicine Units: 4
  - PM 536 Program Evaluation and Research Units: 4
  - PM 537 Chronic Disease Epidemiology Units: 4
  - PM 542 Social Network Analysis Units: 4
  - PM 546 Biological Threats and Terrorism Units: 4
  - PM 558 Environmental Epidemiology: Concepts, Methods, and Practice Units: 4
  - PM 587 Qualitative Research Methods in Public Health Units: 4
- **Additional Requirements**
- At least 4 units from any 500- or 600-level course**
- 2 units of a practicum (PM 596) and 2 units of the capstone (PM 597), ending in a final report.
- "May not receive credit for both track core and track elective category.
- "Distance learning track elective and elective options are limited. Students should consult their adviser for guidance about available options.

The elective courses will be directed by the student's needs and interests and must be approved by the student's graduate adviser. Sufficient familiarity in computer languages to operate major software packages for data management and analysis is required.

**Track 3: Health Communication**
Required Courses (8 Units)
PM 526 Communications in Public Health Units: 4
PM 536 Program Evaluation and Research Units: 4
At least 8 units from:
CMGT 510 Communication, Values, Attitudes and Behavior Units: 4
CMGT 511 Health Communication Units: 4
CMGT 528 Web Designs for Organizations Units: 4
CMGT 583 Social Marketing and Entertainment Education Units: 4
CMGT 587 Audience Analysis Units: 4
PM 530 Biological Basis of Disease Units: 4, 2 years
PM 542 Social Network Analysis Units: 4
PM 562 Intervention Approaches for Health Promotion and Disease Prevention Units: 4
PM 587 Qualitative Research Methods in Public Health Units: 4
Additional Requirements
At least 4 units from any 500- or 600-level course
2 units of a practicum (PM 596) and 2 units of the capstone (PM 597), ending in a final report.

Track 4: Child and Family Health
Required Courses (12 Units)
PM 528 Program Design and Evaluation Units: 4
PM 580 Foundations of Child Health Units: 4
PM 585 Child Health Policy Units: 4
At least 4 units from:
PM 530 Biological Basis of Disease Units: 4, 2 years
PM 540 Maternal and Child Nutrition: Practice and Policy Units: 4
PM 581 Quality and Inequality in Health Care: Examination of Health Services Units: 4
PM 582 Epidemiology and Prevention of Pediatric Injuries Units: 4
PM 584 Foundations of Early Childhood Mental Health Units: 4
PM 585 Systems of Care for Children with Special Needs Units: 4
PM 585 Child Health Policy Units: 4
PM 587 Qualitative Research Methods in Public Health Units: 4
Additional Requirements
At least 4 units from any 500- or 600-level course
2 units of a practicum (PM 596) and 2 units of the capstone (PM 597), ending in a final report.

Track 5: Global Health Leadership
Required Courses (12 Units)
PM 525 Culture and Health: Global Perspectives Units: 4
PM 565 Introduction to Global Health Units: 4
PM 576 Global Health Research and Programs Units: 4
At least 4 units from the following**:
PM 530 Biological Basis of Disease Units: 4, 2 years
PM 555 Environmental Health, Policy and Practice Units: 4
PM 557 Global Health, Law and Human Rights Units: 1, 2, 3, 4
PM 577 Global Health, Law and Human Rights Units: 1, 2, 3, 4
PM 578 Global Health Governance and Diplomacy Units: 4
PM 587 Qualitative Research Methods in Public Health Units: 4
Additional Requirements
At least 4 units from any 500- or 600-level course**
2 units of a practicum (PM 596) and 2 units of the capstone (PM 597), ending in a final report.
**Distance learning track elective and elective options are limited. Students should consult their adviser for guidance about available options.

Track 6: Public Health Policy
Required Courses (12 Units)
PM 547 Public Health Policy and Politics Units: 4
PPD 501a Economics for Policy, Planning and Development Units: 2
PPD 501b Economics for Policy, Planning and Development Units: 2
PPD 560 Methods for Policy Analysis Units: 4
At least 4 units from:
PM 514 Sexually Transmitted Infections: a Systems Approach Units: 4
PM 528 Program Design and Evaluation Units: 4
PM 530 Biological Basis of Disease Units: 4, 2 years
PM 536 Program Evaluation and Research Units: 4
PM 542 Social Network Analysis Units: 4
PM 548 Prevention and Public Policy Units: 2
PM 555 Environmental Health, Policy and Practice Units: 4
PM 577 Global Health, Law and Human Rights Units: 1, 2, 3, 4
PM 578 Global Health Governance and Diplomacy Units: 4
PM 585 Child Health Policy Units: 4
PPD 513 Legal Issues in Health Care Delivery Units: 2
PPD 514 Economic Concepts Applied to Health Units: 4
PPD 542 Policy and Program Evaluation Units: 4
PPD 560 Methods for Policy Analysis Units: 4
Additional Requirements
At least 4 units from any 500- or 600-level course
2 units of a practicum (PM 596) and 2 units of the capstone (PM 597), ending in a final report.

Track 7: Environmental Health
Required Courses (12 Units)
PM 553 Human Exposure Assessment for Public Health Units: 4
PM 554 Biological Effects of Environmental Toxins Units: 4
PM 555 Environmental Health, Policy and Practice Units: 4
At least 4 units from:
PM 530 Biological Basis of Disease Units: 4, 2 years
PM 556 Environment and the Brain Units: 4
PM 557 Global Environmental Health Units: 4
PM 558 Environmental Epidemiology: Concepts, Methods, and Practice Units: 4
Additional Requirements
At least 4 units from any 500- or 600-level course
2 units of a practicum (PM 596) and 2 units of the capstone (PM 597), ending in a final report.

Track 8: GeoHealth (Online Option Only)
Required Courses (8 Units)
SSCI 581 Concepts for Spatial Thinking Units: 4
SSCI 583 Spatial Analysis Units: 4
At least 8 units from:
SSCI 584 Spatial Modeling Units: 4
SSCI 588 Remote Sensing for GIS Units: 4
SSCI 589 Cartography and Visualization Units: 4

Additional Requirements
At least 4 units from any 500- or 600-level course
And, 2 units of a practicum (PM 596) and 2 units of Capstone (PM 597), ending in a final report.
The elective courses will be directed by the student's needs and interests and must be approved by the student's graduate adviser.

Additional Requirements
Practicum Requirement
A practicum (PM 596) is required of all students. The practicum is provided by an internship rotation through an area of public health practice in a county, state, federal or community-based agency. The practicum offers students the opportunity to observe as well as participate in applying their newly acquired skills and tools. All students are expected to participate in at least one internship and attend a corresponding seminar. An electronic portfolio describing the project and evaluating the outcomes completes the course requirement.

Capstone Requirement
Completion of the capstone course (PM 597) is required of all MPH students during their last semester prior to graduation and is the culminating experience for the master's program. The course draws on students' prior training in the five core areas of public health; their additional required course work in their selected track of study; and their "real world" experience gained in the field prior to their graduation. The capstone class is closely linked to the MPH practicum and is designed to challenge students to reflect and integrate their training and experience with the goal of developing their own individual point of view regarding the role of public health in contributing to the improvement of the health and well-being of populations in the United States, as well as abroad.

Criteria
Students enrolled in one of the MPH professional dual degree programs (e.g., M.D./MPH, Pharm.D./MPH, DPT/MPH, and Ph.D. (Clinical Psychology)/MPH, MPI/MPH) may waive 4 units of the elective requirement and thus are required a minimum of 43 units to graduate. All other students must complete a minimum of 47 units to graduate.

Dual Degree
Master of Planning/Master of Public Health (MPI/MPH)
The Master of Planning/Master of Public Health (MPI/MPH) dual degree is designed for individuals who envision a career that combines urban planning and public health disciplines. This dual degree combines the knowledge of urban planning with an understanding of health from a population perspective. It will provide training for planning, evaluating and guiding healthy community and urban development, and will enable graduates who seek to be agents of change within the profession to assume leadership roles in planning and in public health at the local, state and national levels. A total of 79 units are required for the dual degree. For further information about dual degree requirements, see the Master of Planning/Master of Public Health (MPI/MPH).

Master of Public Health/Doctor of Pharmacy (PharmD/MPH)
The School of Pharmacy and the Master of Public Health program, in recognition of the rapidly changing health care environment and in response to the growing demand for pharmacists who are knowledgeable in both pharmacy and population-based health care issues, have developed a dual degree program. The joint PharmD/MPH degree will enable graduates to be more responsive to today's health care needs and will provide training for pharmacists who seek to be agents of change within the profession and to assume leadership roles in the pharmacy field and in public health at the local, state and national levels.
The PharmD/MPH program spans five years (four years of pharmacy school courses and one year of public health courses). Students begin the core PharmD courses following the successful completion of the first year of pharmacy school. The last three years of the program are devoted to the clinical rotations of the School of Pharmacy and to the completion of the elective courses and practicum (field experience) of the MPH program. All students in the PharmD/MPH program must meet course requirements, grade point average requirements and program residency requirements of both programs. Students must have a cumulative GPA of 3.0 in the PharmD curriculum and a 3.0 in the MPH curriculum to meet graduation requirements. The PharmD and the MPH degrees are awarded simultaneously upon completion of the School of Pharmacy and the Master of Public Health requirements.

Application and Admissions Requirements
Students may apply to the dual PharmD/MPH degree program in two ways. First, they may apply at the time they submit their PharmD application by concurrently submitting applications to both programs. Students who elect this approach must identify themselves on both applications as potential dual degree students. Students admitted to both programs will be offered admission to the PharmD and will be offered admission to the dual degree program contingent on passing all courses in their first year of the PharmD with a minimum 3.0 G.P.A. Students who are accepted only by one program may choose to attend that program but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the MPH program during their first year of enrollment in the PharmD prior to the MPH published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students admitted to the MPH program using this
approach will be offered admission to the dual degree contingent on passing all courses in their first year of the Pharm.D. with a minimum 3.0 G.P.A. Students accepted to the dual degree program must maintain a minimum 3.0 G.P.A. in Public Health and PharmD courses.

**Master of Social Work/Master of Public Health (MSW/MPH)**

The Master of Social Work/Master of Public Health (MSW/MPH) dual degree offers the student interdisciplinary preparation in the fields of public health and social work leading to the Master of Social Work (MSW) and Master of Public Health (MPH) degrees.

The dual degree program is a collaborative effort between the USC School of Social Work and the Department of Preventive Medicine in the Keck School of Medicine. The objectives of the program are to provide students with the knowledge and skills necessary to promote health, prevent disease, and enhance the delivery of health and social services in the community. Students will build interdisciplinary skills and an interdisciplinary professional identity by developing an understanding of the breadth of each field and their interface, while permitting concentration in particular specialization areas. The program prepares graduates for work in a variety of interdisciplinary settings; and for some, it will provide the basis for doctoral study.

Students must complete a minimum of 81 units, 34 of which fulfill unique requirements of the MSW, 27 which fulfill the unique requirements of the MPH, and 20 which fulfill the requirements of both degrees. Most students complete both program requirements over three years for full-time students; however, the program may be completed in less time if the student takes a full course load during the two summer sessions (MPH coursework only; MSW is not available during the summer).

Dual degree students must complete MSW course work in foundation, field and core courses specific to the AHA, COBI, or CYF departments. Students will take MPH course work specific to the following public health tracks: health education and promotion; public health policy; or child and family health. MPH track will be determined by the MSW department chosen by the student.

**Public Health (MPH)/Social Entrepreneurship (MS)**

The Master of Public Health/Master of Science in Social Entrepreneurship (MPH/MSSE) dual degree program is designed for individuals who wish to create sustainable solutions to public health challenges through the creation of innovative enterprises and organizations. This program combines the business aspects of social entrepreneurship with the knowledge and understanding of public health challenges and how to improve the health of individuals, communities, and populations, locally and globally. It will enable graduates to become agents of change by equipping them with the tools to build innovative enterprises that balance financial sustainability with public health impact, preparing them uniquely to become leaders in the field.

**Application and Admission**

Applicants to the MSSE/MPH should apply for admission to both schools simultaneously.

Information about the application process and admission requirements for the MPH degree is available on the MPH Website at http://mph.usc.edu.

Information about the application process and admission requirements for the MSSE degree is available on the MSSE Website at https://www.marshall.usc.edu/msse/admission

**Degree Requirements**

The total unit requirement for the MPH/MSSE dual degree is 64 units - 40 units for the MPH degree and 24 units for the MSSE degree.

Students are required to complete 40 units of MPH specific course work, including 24 units of MPH core course work and 16 units of track specific course work. Students may choose from any track within the MPH program.

Students are required to complete 24 units, including all "Required Courses," in the Master of Science in Social Entrepreneurship curriculum. Dual degree program students may not count courses taken outside the USC Marshall School of Business toward the MSSE degree. Visit the Master of Science in Social Entrepreneurship section of this Catalogue for MSSE degree requirements.

The MSSE and the MPH degrees are awarded simultaneously upon completion of all program requirements.

**Doctoral Degree**

**Biostatistics (PhD)**

The department offers a degree program leading to the PhD in biostatistics. The program is designed to produce biostatisticians who will have in-depth knowledge of statistical theory and methodology and the ability to apply this knowledge creatively to statistical problems in the biological and health sciences. All students will enroll in a set of core courses that cover both biostatistical theory and applications. Students will then choose from one of four tracks that will allow them to develop expertise in a specific area. The available tracks are: (1) biostatistics theory; (2) statistical genetics; (3) environmental statistics; (4) clinical trials.

**Course Requirements**

A minimum of 60 units of graduate study is required for the PhD degree; a maximum of 19 of these units may be from research and dissertation. In preparation for the qualifying examination, students are required to take all remaining core and track-specific courses.

**Screening Procedure**

In preparation for the screening examination, all students must take four core courses: PM 511a, PM 511b and PM 522a, PM 522b. A student failing the screening examination will either terminate or will terminate with the MS degree upon completion of an acceptable thesis.

**Qualifying Exam Committee**

A formal qualifying exam committee will consist of at least five faculty members. The committee chair and at least two additional members must be affiliated with the student's program. At least three members of the committee must be tenured or tenure track.

**Qualifying Examination**
The written portion of the qualifying examination will comprise testing on track-specific course content and focus on the student's dissertation topic. An oral examination will ascertain the student's competence in orally communicating this knowledge. Students must pass the written portions and the oral portions in order to pass the qualifying examination.

**Annual Research Appraisal (ARA)**

Beginning in the second year, each student must register for PM 610 (1 unit) and present an annual progress report to the program oversight committee. Once a dissertation topic has been selected, the annual progress report is presented to the student's qualifying exam committee. Once the student has passed the qualifying examination and is appointed to candidacy, the annual progress report is presented to the student's dissertation committee. The student will meet annually with the dissertation committee, until he or she graduates from the program. The oral portion of the screening examination as well as the qualifying examination and the defense examination will count as ARAs.

**Dissertation and Oral Defense**

Upon passing the qualifying examination the PhD candidate and his or her chair will recommend a three-member dissertation committee. The dissertation should be completed within two years and should be oriented toward a theoretical-methodological application to a problem area in the biological or health sciences. The oral defense is based on a rough draft or final version of the dissertation. The defense is administered by the dissertation committee, with other faculty invited to attend.

**Prerequisite**

PM 510L Principles of Biostatistics Units: 4

**Required Courses For All Tracks**

*(Screening Exam Courses)*

PM 511aL Data Analysis Units: 4
PM 511bL Data Analysis Units: 4
PM 522a Introduction to the Theory of Statistics Units: 3
PM 522b Introduction to the Theory of Statistics Units: 3

**Recommended Courses: All Tracks**

PM 511cL Data Analysis Units: 4
PM 520L Advanced Statistical Computing Units: 3
PM 610 Seminar in Biostatistics and Epidemiology Units: 1

**Recommended Courses: Biostatistics**

**Theory Track**

PM 513 Experimental Designs Units: 3
PM 518a Statistical Methods for Epidemiological Studies I, II Units: 3
PM 518b Statistical Methods for Epidemiological Studies I, II Units: 3

**Genetics Track**

PM 534 Statistical Genetics Units: 4
PM 570 Statistical Methods in Human Genetics Units: 4

**Recommended Courses: Statistics**

**Recommended Courses: Environmental Statistics Track**

PM 518a Statistical Methods for Epidemiological Studies I, II Units: 3
PM 518b Statistical Methods for Epidemiological Studies I, II Units: 3
PM 558 Environmental Epidemiology: Concepts, Methods, and Practice Units: 4
PM 575 Statistical Methods in Environmental Epidemiology Units: 3

**Recommended Courses: Clinical Trials Track**

PM 513 Experimental Designs Units: 3
PM 518a Statistical Methods for Epidemiological Studies I, II Units: 3
PM 523 Design of Clinical Studies Units: 3
PM 552 Statistical Methods in Clinical Trials Units: 3, 2 years

**Elective Courses**

BIOC 543 Human Molecular Genetics Units: 4
BISC 478 Computational Genome Analysis Units: 4
BISC 502a Molecular Genetics and Biochemistry Units: 4
BISC 502b Molecular Genetics and Biochemistry Units: 4
BISC 505 Genomics and Molecular Genetics Units: 4
BISC 577a Computational Molecular Biology Laboratory Units: 2
BISC 577b Computational Molecular Biology Laboratory Units: 2
CSCI 570 Analysis of Algorithms Units: 4
CSCI 653 High Performance Computing and Simulations Units: 4
INTD 561 Molecular Biology Units: 4
INTD 572 Systems Physiology and Disease I Units: 4
INTD 573 Systems Physiology and Disease II Units: 4

MATH 543L Nonparametric Statistics Units: 3
MATH 545L Introduction to Time Series Units: 3
MATH 547 Methods of Statistical Inference Units: 3
MATH 548 Sequential Analysis Units: 3
MATH 550 Sample Surveys Units: 3
MATH 578a Computational Molecular Biology Units: 3
MATH 578b Computational Molecular Biology Units: 3
PM 511cL Data Analysis Units: 4
PM 513 Experimental Designs Units: 3
Epidemiology (PhD)
The department offers a degree leading to the PhD in epidemiology. This program may be an extension of the applied biostatistics and epidemiology MS program and is especially aimed at persons with a strong background in medicine: in particular, students enrolled in the MD program of the Keck School of Medicine who wish to interrupt their MD studies after two years to complete a PhD degree. This program is designed to produce an epidemiologist with in-depth statistical skills. The program requires a solid core of courses in methodological aspects of statistics and in statistical thinking as applied to medicine, as well as a solid grounding in epidemiological methods and in certain medical disciplines.

Course Requirements
A minimum of 60 course units with a maximum of 20 units of research and dissertation; passing of screening and qualifying examinations; and completion of dissertation and final oral are required. In preparation for the screening examination the student must take the required core course and elective 33 units of master's level applied biostatistics and epidemiology courses. A student failing the screening examination will either terminate or terminate with the MS degree upon satisfactory completion of a master's thesis. In preparation for the qualifying examination, the student is required to join an on-going research project under the direction of the chair of the qualifying exam committee and directly participate in the conduct of that project. Credit will be given as PM 790 (4 units, two semesters). In addition, it is recommended that the student take PM 610 (at least two semesters). Electives may be selected with the approval of the chair of the qualifying exam committee from courses in the biological sciences or from the medical school. For students in the MD/PhD program in epidemiology, satisfactory completion of the first two years of the MD program will be considered to provide 20 units toward the PhD degree.

Qualifying Exam Committee
A formal qualifying exam committee will consist of at least five faculty members. The committee chair and at least two additional members must be affiliated with student's program. At least three members of the committee must be tenured or tenure track.

Qualifying Examination
The written portion of the qualifying examination will test the student's integration of knowledge in biostatistics and medicine. In general, the qualifying examination will present plans for implementation and completion of three components: an independent and complete data analysis arising from ongoing epidemiological study, a "review" paper on an area of epidemiological research, and a grant application for a new epidemiological study.

Dissertation
Upon passing the qualifying examination, the PhD candidate and his or her chair will recommend a three-member dissertation committee. The dissertation should be completed within two years and should be oriented toward a methodological application to a problem area in the biological or health sciences.

The Oral Defense
This examination is based on a draft or final version of the dissertation and will be administered by the dissertation committee with other faculty invited to attend.

Language and Other Requirements
Proficiency in the English language is essential.

Course Requirements
Students must complete a minimum of 60 units, with a maximum of 20 units of research and dissertation; pass screening and qualifying examinations; complete the dissertation and the dissertation defense examination. In addition the student is required to join a research project under the direction of one or both of the chairs of the qualifying exam committee and directly participate in the conduct of that project. Credit will be given by the department (DPT) conducting the research project DPT 790 Research (4 units, 2 semesters). In addition, at least two semesters of PM 610 is recommended.

Prerequisites:
PM 510L Principles of Biostatistics Units: 4 (or the equivalent)
INTD 571 Biochemistry Units: 4 (or the equivalent)

Biochemistry and Molecular Biology

Core Courses (16 units):
Preventive Medicine Core Courses (17 units):
- PM 522a Introduction to the Theory of Statistics Units: 3
- PM 512 Principles of Epidemiology Units: 4
- PM 517a Research Methods in Epidemiology Units: 3
- PM 518a Statistical Methods for Epidemiological Studies I, II Units: 3
- PM 533 Genetic and Molecular Epidemiology Units: 3, 2 years

Suggested Electives (at least 7 units)
from:
- MICB 551 Procaryotic Molecular Genetics Units: 4
- PM 511bL Data Analysis Units: 4
- PM 517b Research Methods in Epidemiology Units: 3
- PM 523 Design of Clinical Studies Units: 3
- PM 527 Epidemiology of Infectious Disease Units: 4
- PM 529 Environmental Health: An Epidemiological Approach Units: 4
- PM 534 Statistical Genetics Units: 4

Additional Requirements
Preparation for Screening Examination
The screening examination will be taken after two years in the program. Prior to the screening examination a mentor who will serve on the qualifying exam committee must be identified. The screening examination will consist of a written component and an oral component. The written component will be drawn from the core courses. A student failing the screening examination may be given a second opportunity to retake either one or both portions. Students failing the examination for the second time will terminate with the MS degree upon satisfactory completion of 37 units and an acceptable master's thesis.

Annual Research Appraisal (ARA)
Beginning in the second year, each student must register for PM 610 (1 unit) and present an annual progress report to the program oversight committee. Once a dissertation topic has been selected, the annual progress report is presented to the student's qualifying exam committee. Once the student has passed the qualifying examination and is appointed to candidacy, the annual progress report is presented to the student's dissertation committee. The student will meet annually with the dissertation committee, until he or she graduates from the program. The oral portion of the screening examination as well as the qualifying examination and the defense examination will count as ARAs.

Preventive Medicine (Health Behavior Research) (PhD)
The Department of Preventive Medicine, Division of Health Behavior Research, offers a degree program in preventive medicine (health behavior), leading to attainment of the PhD. The program is designed to train exceptional researchers and scholars in the multidisciplinary field of health behavior research. Students receive a thorough grounding in academic and research experience, encompassing theoretical and methodological training in such allied fields as communication, psychology, preventive medicine, biostatistics, public health and epidemiology. Students receive research experience by participating in projects conducted through the USC Institute for Health Promotion and Disease Prevention Research (IPR). The doctoral program is full-time: students are expected to enroll for fall, spring and summer semesters.

Assistantships
Financial and educational support is provided to qualified doctoral students in health behavior research. Graduate (research and/or teaching) assistantships are half-time (20 hours per week) and provide tuition remission as well as a monthly stipend.

Computer Language Requirement
Sufficient familiarity in computer languages to operate major software packages for data management and analysis is required.

Course Requirements
The doctoral program in health behavior research is structured as a four to five year course of study for students entering with a bachelor's degree. Time requirements are subject to review and approval by the division's Graduate Program Committee and the Graduate School.
A total of 60 units of graduate study is required for the PhD in health behavior research. Students are required to complete nine core courses: PM 500, PM 511a, PM 511b, PM 515, PM 530, PM 601, PM 610, PM 604 and PM 576 (total of 37 units). Other requirements include: two elective PM courses, one not offered by health behavior faculty (minimum of 7 units); and a minimum of 4 units each in PM 590, PM 690a, PM 690b, PM 690c, PM 690d, PM 690z, PM 790 and PM 794a, PM 794b, PM 794c, PM 794d, PM 794z.
For students entering with a bachelor's degree, one of the directed research projects will be equivalent in scope to a master's thesis. All research experiences/projects must be completed before registering for PM 794a Doctoral Dissertation, PM 794b Doctoral Dissertation, PM 794c Doctoral Dissertation, PM 794d Doctoral Dissertation, and PM 794z Doctoral Dissertation.

Screening Procedure
The progress of each student is reviewed at the end of every academic year. At the end of the second year of study, students who have not made satisfactory progress are advised that they will be dropped from the program unless their progress improves during their second year.

Qualifying Exam Committee
Each student's qualifying exam committee consists of five members, including: no more than three health behavior faculty members; one other member from the Department of
Admissions Requirements

In addition to the qualifying examination, each student is expected to produce the following as evidence of qualification to conduct dissertation research: an academic dossier consisting of a summary of the student's academic record, teaching and research experience, and professional presentations and publications; at least one original empirical research paper of publishable quality, produced in connection with one of the student's courses or research experiences or developed independently; a dissertation proposal; and an oral defense of all the preceding materials.

Chair: Andrew P. McMahon, PhD
Program Director: Henry Sucov, PhD

Master of Science in Stem Cell Biology and Regenerative Medicine

Stem cell biology is one of the newest and most powerful approaches in biomedical science; it offers the opportunity to experimentally approach previously intractable biological questions, create models of human disease and develop cell-based therapeutics. This intensive one-year program (with an optional second year) will give students a deep understanding of the scientific and clinical underpinnings of stem cell biology and regenerative medicine. The program includes three didactic lecture courses that address developmental cell biology and human embryology, stem cell biology and regenerative medicine, and translational and therapeutic aspects of stem cell technology; the program also includes two laboratory modules that provide guided hands-on experience with stem cells and stem cell laboratory approaches, and several different faculty-led discussion-based courses that allow detailed investigation of specific aspects of stem cell biology and regenerative medicine. Students completing this program will be well-positioned to proceed to medical or PhD programs, find laboratory or administrative employment in the growing stem cell pharmaceutical domain, or engage in public policy or regulatory administration of academic, clinical or business efforts in this expanding discipline.

California is globally recognized as the worldwide center of stem cell science, and USC has invested significantly in building the new Department of Stem Cell Biology and Regenerative Medicine at the Keck School of Medicine of USC, within which this MS program is based and administered.

Admissions Requirements

Applicants must supply a completed application for graduate studies including: transcripts from all institutions previously attended, standardized test scores, a personal statement describing scientific and career interests, and two letters of recommendation. Applications are generally anticipated for fall enrollment, but applications for spring enrollment may also be considered. Applicants to the program must apply to the USC Graduate School and must meet the minimum requirements for admission to the Graduate School. Students are required to have a 3.0 or better overall GPA (or equivalent) and have achieved graduation with a BS or BA degree (or equivalent) before matriculation. Students are expected to have taken the general portion of the GRE exam before application and to have met or exceeded university score requirements. (MCAT scores that are less than five years old may be submitted in lieu of GRE scores by physicians and MD students with a 3.0 LCME-accredited medical school GPA or higher, or by medical school-bound students with a 3.0 undergraduate GPA or higher. DAT scores that are no more than three years old and that reflect a minimum score of 15 in each area may also be submitted in lieu of GRE scores.) Applicants not meeting Graduate School requirements for regular standing may, with the approval of the Graduate School, be conditionally admitted. International students from non-English speaking home countries are expected to demonstrate English language proficiency or take remedial English language courses, according to Graduate School policy. Specific prerequisites for this program include completed course work with a B or better grade (or equivalent) in Cell Biology and in Molecular Biology.

Advisement

The program recommends that students meet with the student services adviser each semester prior to registration.

Satisfactory Academic Progress

A graduate GPA of at least 3.0 is required at all times. Any student whose graduate GPA falls below 3.0 will be given written notification that they have been placed on academic probation. Students who do not raise their GPA to 3.0 after two semesters on academic probation will be academically disqualified.

Master's Degree

Stem Cell Biology and Regenerative Medicine (MS)
Degree Requirements
Graduation requires completion of 25 units, according to the required Year 1 course schedule outlined below. None of these courses may be substituted or waived. This program is intended to be completed within one academic year, and does not include a requirement for independent laboratory research or a thesis. Students may request approval to undertake laboratory research and continuing course work during a second year research option; students must already be matriculated into the program before making this request, and not all students will be granted this opportunity (selection will be based on academic performance and student research interests, and on availability of laboratory space). During this optional second year, students must enroll in the required Year 2 courses listed below; none of these courses may be substituted or waived.

Required Courses - Year 1, Fall Semester
- DSR 574 Stem Cell and Developmental Biology Seminar Series Units: 1
- DSR 620 Current Topics in Stem Cell Biology and Organogenesis Units: 1
- SCRM 511 Developmental Biology and Human Embryology Units: 4
- SCRM 513 Stem Cells and Regenerative Medicine Units: 4
- SCRM 580 SCRM External Speaker Seminar Series Units: 2

Required Courses - Year 1, Spring Semester
- DSR 574 Stem Cell and Developmental Biology Seminar Series Units: 1
- DSR 610 Current Topics in Regenerative Medicine Units: 1
- SCRM 515 Bringing Stem Cells to the Clinic Units: 4
- SCRM 522L Biological Imaging in Stem Cell Research Units: 2
- SCRM 524L Culture and Differentiation of Human Pluripotent Stem Cells Units: 2
- SCRM 555 Writing About Stem Cell Biology and Regenerative Medicine Units: 1
- SCRM 580 SCRM External Speaker Seminar Series Units: 2

Required Courses - Optional Research
- Year 2, Fall Semester
  - DSR 574 Stem Cell and Developmental Biology Seminar Series Units: 1
  - DSR 620 Current Topics in Stem Cell Biology and Organogenesis Units: 1
  - SCRM 580 SCRM External Speaker Seminar Series Units: 2
  - SCRM 590 Independent Research Units: 1, 2, 3, 4

- Year 2, Spring Semester
  - DSR 574 Stem Cell and Developmental Biology Seminar Series Units: 1
  - DSR 610 Current Topics in Regenerative Medicine Units: 1

University Certificate
Stem Cell Biology and Regenerative Medicine Certificate
The certificate program is designed for current students in the Master of Science in Stem Cell Biology and Regenerative Medicine program at USC, who have completed the requirements for the MS degree and wish to complete a second year of study including an independent research project. Graduates from other programs and other institutions both inside and outside the U.S., who desire advanced training in this field may also be considered for admission. A smaller number of students may come from nontraditional backgrounds (business, legal, etc.) and seek specific training in this discipline in order to advance specific career paths in which they are already employed. All students are expected to already have completed undergraduate courses in cell and molecular biology.

Stem cell biology is one of the newest and most powerful approaches in biomedical science; it offers the opportunity to experimentally approach previously intractable biological questions, create models of human disease and develop cell-based therapeutics. This one-year program will give students a solid understanding of the scientific and clinical underpinnings of stem cell biology and regenerative medicine.

Students completing this program will be well positioned to proceed to medical or PhD programs, find laboratory or administrative employment in the growing stem cell pharmaceutical domain, or engage in public policy or regulatory administration of academic, clinical or business efforts in this expanding discipline.

California is globally recognized as the worldwide center of stem cell science, and USC has invested significantly in building the new Department of Stem Cell Biology and Regenerative Medicine at the Keck School of Medicine of USC, within which this certificate program is based and administered.

Degree Requirements
Graduation requires completion of 16 units according to the course schedule outlined below. None of these courses may be substituted or waived. This program is intended to be completed within one academic year, and does not include a requirement for a thesis.

- DSR 574 Stem Cell and Developmental Biology Seminar Series Units: 1
- DSR 610 Current Topics in Regenerative Medicine Units: 1
USC Thornton School of Music

Since its founding in 1884, the USC Thornton School of Music has become the center of higher education in music in the western United States and is among the top schools of music in the nation. Situated in the heart of the vital musical life of Los Angeles, USC Thornton brings together a distinguished faculty and gifted students from around the world. It is in this wonderfully diverse cultural milieu that students are offered instruction in virtually all professional and scholarly branches of music, including instrumental and vocal performance, jazz, popular music performance, music production, early music, composition, screen scoring, music industry, musicology, music teaching and learning, arts leadership, pedagogy, choral and sacred music, conducting and opera. In addition to its major programs, USC Thornton also offers a wide array of music minors and general interest courses for students majoring in other disciplines.

The USC Thornton Symphony, Chamber Choir, Concert Choir, Opera, Wind Ensemble, Popular Music Ensembles, Songwriter Showcases, Jazz Orchestra, Contemporary Music Ensemble, Early Music Ensemble and a wide variety of large and small choral and instrumental ensembles offer students a broad performing experience. More than 500 formal and informal concerts and recitals are presented on campus each year and the school regularly presents eminent visiting artists and scholars in master classes, workshops, lectures, seminars and in performance.

Los Angeles is the home of numerous musical organizations whose performances contribute immeasurably to the cultural life of the region, and is also the home of the nation's major recording, radio, film and television industries. All offer abundant opportunities to the serious young music professional.

Phillip Placenti, EdD, Assistant Dean for Admission and Student Affairs

**Faculty**  
Jascha Heifetz Chair in Music and Distinguished Professor of Strings: Midori Goto, MA*  
Robert Mann Chair in Strings and Chamber Music: Glenn Dicterow, BA  
Bowen H. ”Buzz” McCoy and Barbara M. McCoy Endowed Chair in Jazz at the Flora L. Thornton School of Music, Honoring President Steven B. Sample, 10th President of the University of Southern California: Bob Mintzer, BA*  
Gregor Piatigorsky Chair in Violoncello: Ralph Kirshbaum, BA  
H. Robert Reynolds Chair in Wind Conducting: H. Robert Reynolds, MM  
Alice and Eleonore Schoenfeld Endowed Chair in String Instruction: Alice Schoenfeld, Dipl*  
Judge Widney Professor of Poetry and Public Culture: Dana Gioia, MA, MBA  
Distinguished Professor of Composition: Morton Lauridsen, DMA*  
Professors: Arthur C. Bartner, EdD*; Bruce Brown, PhD*; Ken Cazan, BFA*; Terry Cravens, DMA*; Donald Crockett, PhD*; Robert A. Cutietta, DEd; Kevin Fitz-Gerald, Art. Dipl; Stewart Gordon, DMA*; Jeffrey Kahane, MA; Norman Krieger, Dipl*; Larry Livingston, MM; Ronald McCurdy, PhD; Richard McIver, MM;Erica Muhl, DMA*; Tim Page, BA; Alan Pasqua, BM*; Daniel Pollack, MS*; Frank Potenza, MM*; Jo-Michael Scheibe, DMA; Alan Smith, DMA*; Richard Smith, MM; John Thomas, MM; Ladd Thomas, DMus; Frank Ticheli, DMA*  
Associate Professors: Joanna Demers, PhD; Yehuda Gilad, Dipl*; Adam Gilbert, PhD; Rod Gilfry, MM; Cristian Grases, DMA; Elizabeth Hynes, BM; David Moore, BM; Robert Moore, PhD  
Assistant Professors: Lina Bahn, DM; Andrew Cashner, PhD; Ted Hearne, MM; Beatriz Ilari, PhD; Andrew Norman, Art Dipl; Lisa Vest, PhD  
Professors of Practice: Daniel Carlin, MM; Lucinda Carver, DMA*; Peter Erskine; Boyde Hood, MM; Joel Timm, DMA; James Walker, BME  
Associate Professors of Practice: Bernadene Blaha, MM; Karen Dreyfus, BM; Kenneth Foster, MA; Rotem Gilbert, DMA*; Mark Goldstein, JD; Brian Head, MM*; Lynn Helding, MM; Susan Helfter, DMA*, William Kanengiser, MM*; Veronika Krausas, DMA; Sharon Lavery, MM; Ken Lopez, BA; Brent McMunn, MM; Kristy Morrell, DMA*; Christopher Sampson, MM; Richard Schmunk, DMA; Nick Stoubis, MM; Nick Strimple, DMA; Scott Tennant, MM  
Assistant Professors of Practice: Jeffrey Allen, BA; Russell Ferrante, Dipl; Andrew Garver, BS*; Jason Goldman, MM; Sean Holt, MA; Antoinette Perry, MM; Stephen Pierce, DMA; Patrice Rushen; Lisa Sylvester, DMA; Mark Weiser, MM; Paul Young, DMA  
Lecturers and Senior Lecturers (Full-time): David Arny, MM; William Biersach, BA; Sean Friar, PhD; Patrick Kelley, BM; Christopher Roze, DMA; Aaron Serfaty, BFA; Stephen Trovato, BS  
Adjunct Professors: Jeff Brabec; Todd Brabec; Bruce Broughton; Martin Chalifour; Suzi Digby; Douglas Frank; Donald Green; Gimel Keaton; Melissa Manchester; Vincent Mendoza; Norman Pearson; H. Robert Reynolds; Cherry Rhodes; Pepe Romero; Carl St. Clair; James Self; Jo Ann Turovsky; Allan Vogel; Peter Webster; Richard Wolf; Michele Zukovsky  
Associate Associate Professors: Margaret Batjer; Che-Yen Chen; Judith Farmer; David Howard; Andrew Shulman; Tram Sparks; Bing Wang  
Adjunct Assistant Professors: James Babor; Jon Burlingame; Leon Ndugu Chancelor; Neal Desby; Susan Feldman; Bruce Forman; Parmer Fuller; Adam Koifer; Leah Morrison; Darek Oleszkiewicz; Joseph Pereira; Robert Sheppard; Andrea Stolpe; Robert Young

780
Degree Programs

The Thornton School of Music offers professional and academic degrees at the bachelor's, master's and doctoral levels. These degrees are summarized below.

Bachelor of Music: Students working toward this professional degree have a wide choice of specializations: composition, music industry, instrumental performance, jazz studies, popular music performance, music production and vocal arts. Students can take either a single major program or double majors in several combinations such as piano and composition, string, or percussion instrument. The two majors must be offered by different departments but lead to the same degree (for example, Bachelor of Music). Double majors consisting of two majors in the same department are not permitted. The degree is granted by the Thornton School of Music.

Bachelor of Arts: These degrees are designed for students with a strong music background who wish to combine professional music training with substantial study in other disciplines.

Bachelor of Science: Offered by the Thornton School of Music in the specialized area of music industry.

Minors in Music: Seven different minors in music are offered, each approaching the discipline from a unique perspective and with a distinct curriculum: Jazz Studies, Musical Studies (Performance), Musical Theatre, Music Industry, Music Production, Popular Music Studies and Songwriting.

Master of Music: This is a professional degree that represents proficiency in one area of musical practice and relevant knowledge in musical literature, performance and technique. It requires a minimum of 30 graduate units, of which 15 must be at the 500 level or higher. Students complete either a thesis or recital(s) as part of the degree requirements. The degree can be earned in choral music, composition, conducting, jazz studies, keyboard collaborative arts, guitar, organ, piano, voice or instrumental performance, or sacred music. The degree is granted by the Thornton School of Music.

Master of Arts: This degree, offered through the Graduate School in conjunction with the Thornton School of Music, stresses music history or early music performance, with emphasis on scholarly research.

Doctor of Musical Arts: This is a professional degree that represents the highest level of expertise in a major field of musical practice and competence in several additional areas. Students may specialize in choral music, composition, jazz studies, vocal or instrumental performance, or sacred music.

Doctor of Philosophy: Conferrable by the Graduate School, this is an academic degree in the field of historical musicology. A substantial background in music, research and languages is required.

Entrance to the Degree Programs

Admission to a degree program is granted through USC's admission process, described in the Admission section of this catalogue. Supplementary materials are also required for students seeking admission to the Thornton School of Music, which are described online at usc.edu/music. Applicants to a program within the school are screened by appropriate faculty selection committees that hold auditions, interviews and examine supporting materials. Letters of acceptance are issued by the USC Office of Admission.

Audition

A performance audition is required of applicants to most degree and certificate programs in the Thornton School of Music. Detailed information regarding audition requirements for specific Thornton programs is available online at usc.edu/music.

Graduate Record Examinations

Scores from the general test of the Graduate Record Examinations (GRE) are required for application and admission to the Master of Arts, Doctor of Philosophy and certain Doctor of Musical Arts degrees. (The music subject test is not required.) Test scores on the GRE that are more than five years old at the time of application are not accepted.

Placement Tests

Undergraduate transfer students who have had formal study in any of the following areas must take the appropriate placement examination prior to their first registration: aural skills, theory, music history, conducting, analysis, orchestration and performance. The results of these examinations determine placement in appropriate sequential courses.

Admission to Graduate Standing

All students entering a graduate-level degree program (MA, MM, DMA, PhD) at USC Thornton, who have not previously completed a degree at USC Thornton, must take a series of entrance exams in core music subjects. These exams are called Music Graduate Entrance Exams (MGEs). Information regarding which exams are required for specific majors is available from the Thornton Student Affairs office. MGEs are administered during the week prior to the first week of classes each fall and spring semester. Entering students must take all required exams at the scheduled exam time prior to the beginning of their first semester in the program. If any given exam is not passed on the first attempt, that exam can be retaken at the scheduled exam time prior to
the beginning of the second semester in the program. If the exam is not passed on the second attempt, the corresponding review course must be successfully completed with a grade of B minus or better before the beginning of the third semester in the program. No MGEE can be attempted after the second semester in the program, regardless of whether the exam has previously been attempted. If students complete any MGEE after their second semester in the program, the score earned on said exam will be invalid. Failure to fulfill all MGEE requirements by the beginning of the third semester – either through exams or review courses – may delay permission to fulfill degree requirements such as recitals, comprehensive or qualifying examinations, thesis projects, and dissertations, and may also have a negative impact on financial aid eligibility.

If a student is not able to take an exam at the scheduled exam time, the exam administrator may choose to administer a similar exam at another scheduled time during the first week of the semester. This alternate exam time will be arranged in rare cases and at the sole discretion of the exam administrator.

**Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS)**

The Thornton School of Music adheres to the USC Admission policies regarding TOEFL and IELTS scores. With some exceptions, international applicants from non-English-speaking countries are required to submit these scores by the application deadline. Test scores that are more than two years old at the time of application are not accepted. For any applicant whose first language is not English, regardless of educational background or immigration status, the Thornton School may require as a condition of admission that she or he take the International Student English (ISE) exam, administered by the USC American Language Institute, as well as complete any English language course work that may be prescribed from the results of that exam.

**Advanced Standing Credit for Music Courses Taken at Accredited Institutions**

Music courses completed with satisfactory grades at a regionally accredited institution of higher education may be acceptable for transfer. A review of transcripts and course syllabi will be required in order to determine transferability of course work. The Thornton School may also require a student to take a placement test (at no cost) to determine the extent of his or her knowledge in a given area of musical study before a final determination is made regarding transferability of course work.

**Advanced Standing Credit for Music Courses Not Taken at Accredited Institutions**

Music courses completed at an institution that is not regionally accredited will generally not be transferable. In exceptional cases, the Thornton School may consider petitions for transfer credit for these courses. The petition review process will include evaluation of transcripts with letter grades, course syllabi for each course for which transfer credit is being requested, and examples of work completed for a grade in those courses. Additional information may also be required in order for the Thornton School to complete a full transfer credit evaluation.

**Curriculum Requirements**

The curriculum requirements for each major are listed under each degree. The USC course classification and numbering system is explained in the Registration section of this catalogue. In addition, music courses sometimes carry the following abbreviations: CD = Conducting; CG = Classical Guitar; HC = Harpsichord; OR = Organ; P = Piano; SG = Studio Guitar; VA = Viola; VC = Voice Coaching; VO = Voice.

**Change of Curriculum**

To change from one curriculum to another, a student must apply and be approved for the new curriculum by the appropriate department chair and declare the intent to change curriculum through his or her academic adviser in the Thornton School.

**Non-Degree Programs**

Students who have highly specialized interests that may not be met through degree programs may apply for admission to one of the following non-degree programs.

**Artist Diploma Program**

This program is designed for young artists of exceptional ability and musical sensitivity who plan careers as solo performers. The Artist Diploma Program provides young artists the opportunity to devote their full time to concentrated study and practice for the duration of their assigned programs. This program typically requires two to three consecutive years of study for completion.

**Graduate Certificate in Arts Leadership**

The graduate program in arts leadership is a two-semester certificate program for artists, arts administrators and cultural workers of all types to develop the skills necessary to become successful leaders in the arts and arts organizations in a rapidly changing and radically altered contemporary world.

**Graduate Certificate Program in Performance**

This two-year graduate-level program is designed for students who have completed their undergraduate education in music, or its equivalent, and intend to concentrate their energies on the full-time development of their discipline.

**Honor Society**

Pi Kappa Lambda

Pi Kappa Lambda is a national honor society established in 1918 for the promotion and recognition of scholarship and performance in music. Students of the Thornton School of Music are eligible for election to Eta chapter at the University of Southern California, established in 1923, according to guidelines established by the board of the Eta chapter.

**Undergraduate Degrees**

**Minors in Music**

**Minor in Performing Arts Studies**

The minor in performing arts provides an interdisciplinary inquiry into the nature and aesthetics of the performing arts. It combines the disciplines of cinematic arts, dance, music and theatre. The minor is a unique course of study that looks at how the performing arts contribute to a culturally literate society. See the USC School of Dramatic Arts section of this catalogue.

**Graduate Degrees**
Admission-Audition Requirements

Applicants to graduate programs in the Thornton School of Music must fulfill all music admission requirements described at usc.edu/music, in addition to fulfilling all USC graduate admission requirements. See Thornton School of Music Degree Programs and Entrance to the Degree Programs sections of this catalogue for further information.

Bachelor's Degree

Choral Music (BA)

Overview

The Bachelor of Arts in Choral Music combines the flexibility of a Bachelor of Arts program with an in-depth education in choral music that includes an introduction to choral music and course work in choral conducting, choral development, choral arranging, diction and choral ensemble.

Entrance Requirements

Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

General Education Requirements

The university's General Education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. In addition, all entering freshmen are expected to complete a General Education Seminar during their first year at USC. These seminars satisfy one of the Core Literacy requirements above.

Note that courses within the major will also satisfy certain Core Literacy requirements. Please work with your major adviser to determine those courses.

Curriculum Requirements

General Education *

WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4

Core Literacies

GE-A: The Arts (one course)
GE-B: Humanistic Inquiry (two courses)
GE-C: Social Analysis (two courses)
GE-D: Life Sciences (one course)
GE-E: Physical Sciences (one course)
GE-F: Quantitative Reasoning (one course)

Global Perspectives

GE-G: Citizenship in a Global Era (one course)
GE-H: Traditions and Historical Foundations (one course)

Writing

WRIT 340 Advanced Writing Units: 3, 4

Lessons (6 units)

MPVA 301 Individual Instruction Units: 1, 2

6 units total of MPVA 301 (Choral)

Music Ensembles (8 units)

Choral Music Ensemble at the 300-level: eight 1-unit courses

Program Intensive Courses (12 units)

MPVA 442 Introduction to the International Phonetic Alphabet Units: 2
MUCL 340 Choral Conducting I Units: 2
MUCL 441 Choral Conducting II Units: 2
MUCL 320 Introduction to Choral Music Units: 2
MUCL 440 Choral Development Units: 2
MUCL 441 Choral Arranging Units: 1, 2 (2 units total of MUCL 441)

Core Thornton Academic Courses (38 units)

MPKS 250a Keyboard Instruction I Units: 2
MPKS 250b Keyboard Instruction I Units: 2
MUCL 132a Aural Skills I Units: 2
MUCL 132b Aural Skills I Units: 2
MUCL 133a Theory I Units: 3
MUCL 133b Theory I Units: 3
MUCL 232a Aural Skills II Units: 2
MUCL 232b Aural Skills II Units: 2
MUCL 233a Theory II Units: 3
MUCL 233b Theory II Units: 3
MUCL 338x Elementary Orchestration Units: 2
MUCL 250g Music and Ideas Units: 4
MUCL 350g Western Art Music History I Units: 4
MUCL 351 Western Art Music History II Units: 4

Foreign Language (12 units)

Three 4-unit courses in the same language

Electives (20 units)

Total required for degree: 128

*With correct planning, only 32 units (6 GE and 2 Writing courses) will be needed outside of your major requirements.

Composition (BM)

Overview

The Bachelor of Music in Composition consists of course work in the major, core music studies (theory, aural skills, music history, keyboard instruction, conducting, ensemble) and USC's general education and writing program.

Entrance Requirements

Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

General Education Requirements

The university's General Education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. In addition, all
entering freshmen are expected to complete a General Education Seminar during their first year at USC. These seminars satisfy one of the Core Literacy requirements above.

Note that courses within the major will also satisfy certain Core Literacy requirements. Please work with your major adviser to determine those courses.

**Capstone Project**
A senior recital must be completed under approved faculty supervision and guidance. The faculty of the department of the student's major program determines the detailed requirements of the recital, including content, length, format and other specifications. In cases in which a performance venue is required in order to present the recital, reservations must be made according to the current guidelines of the Music Operations office.

**Electives (6 units)**

**Capstone Project**

Senior Recital: 0 units

**Total Required For Degree: 132**

*With correct planning, only 32 units (6 GE and 2 Writing courses) will be needed outside of your major requirements.**

**Requirement may be fulfilled with MPKS 301 Piano if proficiency level equivalent to MPKS 350b is demonstrated by examination.**

***Transfer credit may not fulfill the large ensemble requirement.***

**Jazz Studies (BM)**

**Overview**
The Bachelor of Music in Jazz Studies consists of course work in the major, core music studies (theory, aural skills, music history, conducting, large ensemble) and USC's general education and writing program.

**Entrance Requirements**
Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

**General Education Requirements**
The university's General Education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. In addition, all entering freshmen are expected to complete a General Education Seminar during their first year at USC. These
seminars satisfy one of the Core Literacy requirements above. Note that courses within the major will also satisfy certain Core Literacy requirements. Please work with your major adviser to determine those courses.

Capstone Projects

A comprehensive exam and senior recital must be completed under approved faculty supervision and guidance. The faculty of the department of the student's major program determines the detailed requirements of the recital, including content, length, format and other specifications. In cases in which a performance venue is required in order to present the recital, reservations must be made according to the current guidelines of the Music Operations office.

Curriculum Requirements

General Education *

WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4

Core Literacies

GE-A: The Arts (one course)
GE-B: Humanistic Inquiry (two courses)
GE-C: Social Analysis (two courses)
GE-D: Life Sciences (one course)
GE-E: Physical Sciences (one course)
GE-F: Quantitative Reasoning (one course)

Global Perspectives

GE-G: Citizenship in a Global Era (one course)
GE-H: Traditions and Historical Foundations (one course)

Writing

WRIT 340 Advanced Writing Units: 3, 4

Lessons (16 units)

MUJZ 153 Individual Instruction Units: 1, 2
4 units total of MUJZ 153 in your primary instrument

MUJZ 253 Individual Instruction Units: 1, 2
4 units total of MUJZ 253 in your primary instrument

MUJZ 353 Individual Instruction Units: 1, 2
4 units total of MUJZ 353 in your primary instrument

MUJZ 453 Individual Instruction Units: 1, 2
4 units total of MUJZ 453 in your primary instrument

Music Ensembles (14 units)

MUEN 329 Jazz Ensemble Units: 1
6 units total of MUEN 329

MUEN 332 Jazz Chamber Music Units: 1
8 units total of MUEN 332

Program Intensive Courses (28 units)

MUJZ 141a Basic Keyboard Skills for the Improviser Units: 2

MUJZ 141b Basic Keyboard Skills for the Improviser Units: 2

MUJZ 195L Jazz Elements I Units: 2
8 units total of MUJZ 195

MUJZ 305a Advanced Jazz Theory Units: 2

MUJZ 305b Advanced Jazz Theory Units: 2

MUJZ 395 Jazz Elements II Units: 2
8 units total of MUJZ 395

MUJZ 400 Arranging for Jazz Ensemble Units: 2

MUJZ 443 Jazz Pedagogy Units: 2

Core Thornton Academic Courses (24 units)

MUCO 132a Aural Skills I Units: 2

MUCO 132b Aural Skills I Units: 2

MUCO 133a Theory I Units: 3

MUCO 133b Theory I Units: 3

MUSC 496 Careers in Music Units: 2

MUHL 250g Music and Ideas Units: 4

MUJZ 350g A History of Jazz Music Units: 4

One course from the following:

MPPM 350g A History of Popular Music Units: 4

MUHL 350 Western Art Music History I Units: 4

MUHL 351 Western Art Music History II Units: 4

MUSC 371g Musical Genre Bending Units: 4

MUSC 372g Music, Turmoil and Nationalism Units: 4

MUSC 400m The Broadway Musical: Reflection of American Diversity, Issues, and Experiences Units: 4

MUSC 410 Electronic Dance Music Units: 4

MUSC 420m Hip-Hop Music and Culture Units: 4

MUSC 450m The Music of Black Americans Units: 4

MUSC 460 Film Music: History and Function from 1930 to the Present Units: 4

MUSC 465 Music, Television and American Culture Units: 4

Electives (18 units)

Capstone Projects

Comprehensive Exam: 0 units **

Senior Recital: 0 units

Total required for degree: 132

* With correct planning, only 32 units (6 GE and 2 Writing courses) will be needed outside of your major requirements.

** Students must pass a comprehensive performance exam prior to the senior recital, which entails performance and improvisation, from memory, of songs selected from the "Jazz Studies Department Required Tune List."

Music (BA)

Overview

The Bachelor of Arts in Music combines the flexibility of a Bachelor of Arts program with an in-depth education in music that includes theory, aural skills, music history and keyboard instruction.

Entrance Requirements

Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

General Education Requirements

The university’s General Education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight
courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. In addition, all entering freshmen are expected to complete a General Education Seminar during their first year at USC. These seminars satisfy one of the Core Literacy requirements above. Note that courses within the major will also satisfy certain Core Literacy requirements. Please work with your major adviser to determine those courses.

Curriculum Requirements

MUHL 351 Western Art Music History II Units: 4

Foreign Language (12 units)
Three 4-unit courses in the same language

Music Electives at the 300 or 400 Level (16 units)

Electives (20 units)

Total required for degree: 128

*With correct planning, only 32 units (6 GE and 2 Writing courses) will be needed outside of your major requirements.

Curriculum Areas of Study

Within the curriculum for the BA, students may wish to focus in a particular area of music that suits their interest and the faculty's expertise. Students may specialize in one area or may design individual programs of study by choosing various combinations of electives that best meet their needs and career objectives. Relevant courses for each area are posted at usc.edu/music. One such option is listed below.

Vocal Jazz Option: This option is designed for students with a strong interest in the performance of solo and ensemble vocal jazz music. Students should take two semesters of Vocal Jazz Techniques, as well as individual instruction in jazz voice. Students may also perform in vocal ensembles and with instrumental combos.

Music Industry (BM)

Bachelor of Music

The Bachelor of Music (BM) is a professional degree granted by the Thornton School of Music. The various majors for the degree are listed below, along with specified requirements for each.

Senior Recital/Culminative Project

All performance majors are required, as indicated in the specific curriculum listings below, to either present a senior recital or complete a culminating project. Both must be completed under approved faculty supervision and guidance. The faculty of the department of the student's major program determine the detailed requirements of these recitals and projects, including content, length, format, and other specifications. In cases in which a performance venue is required in order to present the recital or complete the project, reservations must be made according to the current guidelines of the Music Operations office.

General Education Requirements

The university's general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing.

The provost has allowed an exception to the rules governing the new general education requirements for certain groups of students pursuing performance degrees in music. Students pursuing the Bachelor of Music in Jazz Studies or the Bachelor of Music in Performance (in all tracks except organ) may satisfy their social issues and first writing requirement separately by taking WRIT 130 (instead of WRIT 150) in the spring of their freshman year. In addition, those pursuing the Bachelor of Music in Performance (vocal arts) may satisfy Category I of the new program with MUHL 331 and MUHL 332.

In all other respects, students in the Thornton School of Music must satisfy the general education requirements as described on the General Education Program page.

Individual Instruction Limitations

Music majors may accumulate a maximum of 16 units of individual instruction at the 300 level toward an undergraduate degree program.

**Entrance Requirements**

Applicants must submit the Thornton School of Music Supplementary Application, a statement of objectives, resume and repertoire list. A performance audition according to the requirements of the department of the applicant's primary instrument or voice is also required.

**Curriculum Requirements**

General education 6 courses
Writing 2 courses
MPxx 153 Units: 4 units total of individual instruction in primary instrument/voice
MPxx 253 Units: 4 units total of individual instruction in primary instrument/voice
MPxx 353 Units: 4 units total individual instruction in primary instrument/voice
MPKS 250a Keyboard Instruction I Units: 2
MPKS 250b Keyboard Instruction I Units: 2
MUCD 340 Choral Conducting I Units: 2 or
MUCD 343 Instrumental Conducting I Units: 2

Ensemble electives Units: 2 units total
MUCO 132a Aural Skills I Units: 2
MUCO 132b Aural Skills I Units: 2
MUCO 133a Theory I Units: 3
MUCO 133b Theory I Units: 3
MUCO 232a Aural Skills II Units: 2
MUCO 232b Aural Skills II Units: 2
MUCO 233a Theory II Units: 3
MUCO 233b Theory II Units: 3

MUIN 476b Advanced Sound Reinforcement Units: 2
MTEC 477 Remote Recording Techniques Units: 2
MTEC 478 Advanced Multichannel Remix Units: 2
MTEC 479 Audio Mastering Units: 2
MUIN 494 Classical Music Recording Units: 4
MUIN 496 Music Media Solutions Units: 4

**Electives: 6 units**

Junior Recital: 0 units

**Total required for degree: 132**

*All individual instruction units must be taken in the same area in which the students auditioned.*

**Music Industry (BS)**

**Overview**

The Bachelor of Science in the Music Industry is a professional degree that prepares students to enter a variety of careers in the music industry of today. Students must fulfill a series of core requirements for the degree.

**Entrance Requirements**

Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

**General Education Requirements**

The university's General Education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in Fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. In addition, all entering freshmen are expected to complete a General Education Seminar during their first year at USC. These seminars satisfy one of the Core Literacy requirements above.

Note that courses within the major will also satisfy certain Core Literacy requirements. Please work with your major adviser to determine those courses.

**Business-related Requirements**
In addition to the above general education requirements, the following courses offered through the USC Marshall School of Business, the USC Leventhal School of Accounting and the USC Dornsife College of Letters, Arts and Sciences are required.

**Capstone Project**
A capstone project must be completed under approved faculty supervision and guidance. The faculty of the department of the student's major program determines the detailed requirements of the project, including content, length, format and other specifications. In cases in which a performance venue is required in order to present the project, reservations must be made according to the current guidelines of the Music Operations office.

**Curriculum Requirements**

**General Education** *
- WRIT 150 Writing and Critical Reasoning–Thematic Approaches Units: 4

### Total units: 128

With correct planning, only 32 units (6 GE and 2 Writing courses) will be needed outside of your major requirements.
One course from the following:

MTEC 337a Music Production II Units: 2
MTEC 337b Music Production II Units: 2
MTEC 445 Advanced Desktop Music Production Units: 2
MTEC 446a Computer Assisted Recording and Editing Units: 2
MTEC 446b Computer Assisted Recording and Editing Units: 2
MTEC 474a Electronic Synthesizer Techniques Units: 2, 3, 4
  2 units total of MTEC 474a
MTEC 478 Advanced Multichannel Remix Units: 2
MUIN 270 Introduction to the Music Industry Units: 4
MUSC 255 Songwriting I Units: 2

One course from the following:

MTEC 443 Desktop Music Production Units: 2
MTEC 444 Non-Linear MIDI Sequencing Units: 2

8-units from the following**:

MPPM 240 Drumming Proficiency for the Popular Musician Units: 2
MTEC 240 Introduction to Music Notation Units: 1
MTEC 249 Introduction to Web Design for Musicians Units: 1
MTEC 389 Digital Equipment and Recording Units: 2
MTEC 392a Acoustics and Speaker Design Units: 2
MTEC 474b Electronic Synthesizer Techniques Units: 2, 3, 4
MTEC 479 Audio Mastering Units: 2
MTEC 491 The Recording Console Units: 4
MTEC 493 Audio Signal Processing Equipment Units: 2
MUIN 340 Introduction to Sound Reinforcement Units: 4
MUIN 370 Music Publishing and Licensing Units: 2
MUIN 425 Live Music Production and Promotion Units: 4
MUIN 440 Arts Management Units: 4
MUIN 450 Practicum in Music Industry Issues (Internship) Units: 2, 3, 4 ***
MUIN 495 Web Design for the Music Industry Units: 4

Core Thornton Academic Courses (34 units)

MUCO 131a Harmony in Popular Music Units: 2
MUCO 131b Harmony in Popular Music Units: 2
MUCO 132a Aural Skills I Units: 2
MUCO 132b Aural Skills I Units: 2

MUSC 420m Hip-Hop Music and Culture Units: 4
MUSC 450m The Music of Black Americans Units: 4
MUSC 460 Film Music: History and Function from 1930 to the Present Units: 4
MUSC 465 Music, Television and American Culture Units: 4

4-units from the following***:

MPPM 325a Arranging in Popular Music Units: 2 ***
MPPM 325b Arranging in Popular Music Units: 2 ***
MUCO 338x Elementary Orchestration Units: 2
MUJZ 400 Arranging for Jazz Ensemble Units: 2
MUSC 355 Songwriting II Units: 2

Electives (14 units)

Capstone Projects (2 units)

MTEC 498a Senior Project Units: 1
MTEC 498b Senior Project Units: 1

Total required for degree: 132

With correct planning, only 32 units (6 GE and 2 Writing courses) will be needed outside of your major requirements.

**Courses may be chosen from the list or in consultation with the chair of Music Technology.

***Prerequisite required.

***Keyboardists will substitute a class in drums, guitar or voice.

Performance (Classical Guitar) (BM)

Overview

The Bachelor of Music in Classical Guitar consists of course work in the major, core music studies (theory, aural skills, music history, keyboard instruction, conducting and large ensemble) and USC's general education and writing program.

Entrance Requirements

Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

General Education Requirements

The university's General Education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. In addition, all entering freshmen are expected to complete a General Education Seminar during their first year at USC. These seminars satisfy one of the Core Literacy requirements above.

Note that courses within the major will also satisfy certain Core Literacy requirements. Please work with your major adviser to determine those courses.

Capstone Projects
A junior and senior recital must be completed under approved faculty supervision and guidance. The faculty of the department of the student's major program determines the detailed requirements of the recitals, including content, length, format, and other specifications. In cases in which a performance venue is required in order to present the recitals, reservations must be made according to the current guidelines of the Music Operations office.

Curriculum Requirements

General Education *

WRIT 150 Writing and Critical Reasoning—Thematic Approaches Units: 4

Core Literacies
GE-A: The Arts (one course)
GE-B: Humanistic Inquiry (two courses)
GE-C: Social Analysis (two courses)
GE-D: Life Sciences (one course)
GE-E: Physical Sciences (one course)
GE-F: Quantitative Reasoning (one course)

Global Perspectives
GE-G: Citizenship in a Global Era (one course)
GE-H: Traditions and Historical Foundations (one course)

Writing
WRIT 340 Advanced Writing Units: 3, 4

Lessons and Performance Classes (30 units)

MPGU 153 Individual Instruction Units: 1 or 2
4 units total of MPGU 153 (Classical Guitar)

MPGU 253 Individual Instruction Units: 1 or 2
4 units total of MPGU 253 (Classical Guitar)

MPGU 353 Individual Instruction Units: 1 or 2
4 units total of MPGU 353 (Classical Guitar)

Performance (Popular Music) (BM)

Overview
The Bachelor of Music in Popular Music is designed for students interested in pursuing a career in the performance of popular music. This program consists of course work in the major performance area, core music classes, USC’s general education and writing, as well as electives to take advantage of the offerings of the Thornton School and of the entire university.

Entrance Requirements
Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

General Education Requirements
The university's General Education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. In addition, all entering freshmen are expected to complete a General Education Seminar during their first year at USC. These seminars satisfy one of the Core Literacy requirements above.

Note that courses within the major will also satisfy certain Core Literacy requirements. Please work with your major adviser to determine those courses.

Capstone Project
A capstone project must be completed under approved faculty supervision and guidance. The faculty of the department of the student's major program determines the detailed requirements of the project, including content, length, format and other specifications. In cases in which a performance venue is required in order to present the project, reservations must be made according to the current guidelines of the Music Operations office.

MPPM 320 Popular Music Performance II Units: 2

Music Ensembles (2 units)
Music Ensemble at the 300-level: two 1-unit courses

Program Intensive Courses (20 units)
MPPM 240 Drumming Proficiency for the Popular Musician Units: 2 **
MPPM 250 Keyboard Proficiency for the Popular Musician Units: 2 ***
MPPM 325a Arranging in Popular Music Units: 2
MPPM 325b Arranging in Popular Music Units: 2
MTEC 310 Computer Recording for the Performing Musician Units: 2
MTEC 311 MIDI Music Production for the Performing Musician Units: 2
MUIN 270 Introduction to the Music Industry Units: 4
MUSC 255 Songwriting I Units: 2
MUSC 496 Careers in Music Units: 2

Core Thornton Academic Courses (30 units)
MPPM 350g A History of Popular Music Units: 4
MUFO 131a Harmony in Popular Music Units: 2
MUFO 131b Harmony in Popular Music Units: 2
MUFO 132a Aural Skills I Units: 2
MUFO 132b Aural Skills I Units: 2
MUFO 133a Theory I Units: 3
MUFO 133b Theory I Units: 3
MUFO 232a Aural Skills II Units: 2
MUFO 232b Aural Skills II Units: 2
MUHL 250g Music and Ideas Units: 4

One course from the following:
MUHL 350g Western Art Music History I Units: 4
MUHL 351 Western Art Music History II Units: 4
MUCI 350g A History of Jazz Music Units: 4
MUSC 371g Musical Genre Bending Units: 4
MUSC 372g Music, Turmoil and Nationalism Units: 4
MUSC 400m The Broadway Musical: Reflection of American Diversity, Issues, and Experiences Units: 4
MUSC 410 Electronic Dance Music Units: 4
MUSC 420m Hip-Hop Music and Culture Units: 4
MUSC 450m The Music of Black Americans Units: 4
MUSC 460 Film Music: History and Function from 1930 to the Present Units: 4
MUSC 465 Music, Television and American Culture Units: 4

Electives (22 units)

Capstone Projects (2 units)
MPPM 350a Final Project Units: 1
MPPM 450b Final Project Units: 1

Total required for degree: 132

**With correct planning, only 32 units (6 GE and 2 Writing courses) will be needed outside of your major requirements.
***Drummers will substitute a class in guitar or voice.
**Keyboardists will substitute a class in guitar or voice.

Performance (Studio Guitar) (BM)
Overview
The Bachelor of Music in Studio Guitar consists of course work in the major, core music studies (theory, aural skills, music history, conducting, large ensemble) and USC's general education and writing program.

Entrance Requirements
Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

General Education Requirements
The university's General Education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. In addition, all entering freshmen are expected to complete a General Education Seminar during their first year at USC. These seminars satisfy one of the Core Literacy requirements above.

Note that courses within the major will also satisfy certain Core Literacy requirements. Please work with your major adviser to determine those courses.

Capstone Projects
A junior and senior recital must be completed under approved faculty supervision and guidance. The faculty of the department of the student's major program determines the detailed requirements of the recitals, including content, length, format and other specifications. In cases in which a performance venue is required in order to present the recitals, reservations must be made according to the current guidelines of the Music Operations office.
Curriculum Requirements for Traditional Emphasis

General Education *

WRIT 150 Writing and Critical Reasoning—Thematic Approaches Units: 4

Core Literacies

GE-A: The Arts (one course)
GE-B: Humanistic Inquiry (two courses)
GE-C: Social Analysis (two courses)
GE-D: Life Sciences (one course)
GE-E: Physical Sciences (one course)
GE-F: Quantitative Reasoning (one course)

Global Perspectives

GE-G: Citizenship in a Global Era (one course)
GE-H: Traditions and Historical Foundations (one course)

Writing

WRIT 340 Advanced Writing Units: 3, 4

Lessons (16 units)

Performance (Vocal Arts) (BM)
Overview
The Bachelor of Music in Vocal Arts performance consists of course work in the major, core music studies (theory, aural skills, music history, conducting, ensembles) and USC's general education and writing program.

Entrance Requirements
Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

General Education Requirements
The university's General Education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program is effective for all students entering USC in fall 2015 or later, or transfer students beginning college elsewhere at that time and subsequently transferring to USC. It requires eight courses in six Core Literacies, plus two courses in Global Perspectives (which may double-count with courses in the Core Literacies) and two courses in writing. In addition, all entering freshmen are expected to complete a General Education Seminar during their first year at USC. These seminars satisfy one of the Core Literacy requirements above.

Note that courses within the major will also satisfy certain Core Literacy requirements. Please work with your major adviser to determine those courses.

Capstone Projects
A junior and senior recital must be completed under approved faculty supervision and guidance. The faculty of the department of the student's major program determines the detailed requirements of the recitals, including content, length, format, and other specifications. In cases in which a performance venue is required in order to present the recitals, reservations must be made according to the current guidelines of the Music Operations office.

Music courses numbered 300–499

Total units: 21

Music Industry Minor
A minor in the music industry is offered for undergraduate students to provide them with the background necessary to enter varied fields in the music business and to familiarize them with standard practices and procedures. A minimum of 20 units is required for completion of this minor. The minor is not available to music industry majors.

Prerequisite
Acceptance into the program might require a personal interview by the Thornton School of Music. Students admitted to this minor will be expected to have a minimum GPA of 2.0 and to maintain that average with no grade lower than a "C" for all courses taken in the minor.

Required Courses
MUIN 272x Basics of the Music Industry Units: 4
MUIN 372x Business and Legal Aspects of the Music Industry Units: 4

Select 4 units from the following:
MUHL 315x Music and Culture Units: 4
MUSC 410 Electronic Dance Music Units: 4
MUSC 420m Hip-Hop Music and Culture Units: 4
MUSC 422 The Beatles: Their Music and Their Times Units: 4
MUSC 423 Classic Rock: Popular Music of the Sixties and Seventies Units: 2
MUSC 424 Iconic Figures of Popular Music Units: 4
MUSC 450m The Music of Black Americans Units: 4
MUSC 460 Film Music: History and Function from 1930 to the Present Units: 4
MUSC 465 Music, Television and American Culture Units: 4

Select 8 units from the following:
MTEC 245 Introduction to MIDI Sequencing Units: 1
MTEC 246 Introduction to Audio Recording and Editing Units: 1
MTEC 277x Introduction to Music Technology Units: 4
MTEC 446a Computer Assisted Recording and Editing Units: 2
MTEC 446b Computer Assisted Recording and Editing Units: 2
MUCO 130ax Basics of Music Theory Units: 3
MUSC 255 Songwriting I Units: 2
MUSC 355 Songwriting II Units: 2
MUCO 338x Elementary Orchestration Units: 2

Note:
*Music Industry majors can substitute MTEC 175 and MTEC 176 for MTEC 277.
**Course has prerequisites

Total Units: 19

Music Recording Minor
A minor in music recording is offered for undergraduate students to provide them with the background necessary to enter the field of audio engineering and to familiarize them with the standards and techniques used in audio recording, editing, mixing and mastering.

Prerequisite
Acceptance into the program might require a personal interview by the Thornton School of Music to assure that the student has sufficient musical background and skill. Students admitted to this minor will be expected to have a minimum GPA of 2.0 and to maintain that average with no grade lower than a "C" for all courses taken in the minor.

Required Courses
MTEC 275 Fundamentals of Audio Engineering Units: 4
MTEC 277x Introduction to Music Technology Units: 4
MTEC 446a Computer Assisted Recording and Editing Units: 2
* Music Industry majors can substitute MTEC 175 and MTEC 176 for MTEC 277x.

8 units from the following:
MTEC 389 Digital Equipment and Recording Units: 2
MTEC 392a Acoustics and Speaker Design Units: 2
MTEC 446b Computer Assisted Recording and Editing Units: 2
MTEC 477 Remote Recording Techniques Units: 2
MTEC 478 Advanced Multichannel Remix Units: 2
MTEC 479 Audio Mastering Units: 2
MTEC 491 The Recording Console Units: 4
MTEC 493 Audio Signal Processing Equipment Units: 2
MUIN 340 Introduction to Sound Reinforcement Units: 4
Total units: 18

Musical Studies Minor
This 26-unit program in musical studies, with an emphasis in performance, incorporates the study of music theory, music history, performance, ensembles and electives. Students may enter the program in their freshman year. An audition is required for this minor, which is not available to music majors.

Required Courses
- MUEN 300–499
- MUHL 315x Music and Culture Units: 4
- MPKS 250a Keyboard Instruction I Units: 2
  Individual Instruction at the 301 level
- MUCO 130ax Basics of Music Theory Units: 3
- MUCO 130bx Basics of Music Theory Units: 3
- Music electives
Total Units: 26
*Must include 4 upper-division units.

Musical Theatre Minor
The minor in musical theatre, interdisciplinary in nature, is a 27-unit program incorporating the study of acting, dance or movement, vocal arts and related musical subjects. Admission to the minor requires an audition for music but not for theatre.

For students majoring in music or another non-music discipline:

Required Courses
- MUSC 400m The Broadway Musical: Reflection of American Diversity, Issues, and Experiences Units: 4
- MPGU 125 Beginning Fingerstyle/Chord Guitar Units: 2 and
- MPGU 126 Easy Fingerstyle Beatles Units: 2 or

Popular Music Studies Minor
This minor consists of four upper division courses, to be chosen from courses that examine different aspects of
Choose one of the following courses:

Course Requirements
Choose four courses (16 units) from the following:

- MUSC 400m The Broadway Musical: Reflection of American Diversity, Issues, and Experiences Units: 4
- MUSC 420m Hip-Hop Music and Culture Units: 4
- MUSC 422 The Beatles: Their Music and Their Times Units: 4
- MUSC 444 American Roots Music: History and Culture Units: 4
- MUSC 450m The Music of Black Americans Units: 4
- MUSC 460 Film Music: History and Function from 1930 to the Present Units: 4
- MUSC 465 Music, Television and American Culture Units: 4
- MUJZ 419m The Jazz Experience: Myths and Culture Units: 4

Songwriting Minor
The minor in songwriting incorporates practical instruction in the craft of songwriting and in performance skills, instruction in the technology relevant to songwriting, and critical studies in the relevant repertories.

Requirements for admission: Successful completion of MUSC 255 Songwriting I and an interview with the admission coordinator.

Required Courses
- MTEC 310 Computer Recording for the Performing Musician Units: 2
- MTEC 311 MIDI Music Production for the Performing Musician Units: 2
- MUCO 130ax Basics of Music Theory Units: 3
- MUCO 130bx Basics of Music Theory Units: 3
- MUSC 255 Songwriting I Units: 2
- MUSC 355 Songwriting II Units: 2
- MUSC 455 Songwriting III: The Performing Songwriter Units: 2

Choose one of the following courses:
- COMM 306 Innovation, Entertainment, and the Arts Units: 4
- COMM 307 Sound Clash: Popular Music and American Culture Units: 4
- COMM 384 Interpreting Popular Culture Units: 4
- COMM 440 Music as Communication Units: 4

Choose one of the following courses:
- MUSC 400m The Broadway Musical: Reflection of American Diversity, Issues, and Experiences Units: 4
- MUSC 420m Hip-Hop Music and Culture Units: 4
- MUSC 422 The Beatles: Their Music and Their Times Units: 4
- MUSC 444 American Roots Music: History and Culture Units: 4
- MUSC 450m The Music of Black Americans Units: 4
- MUSC 460 Film Music: History and Function from 1930 to the Present Units: 4

Total units: 24

Diploma

Artist Diploma Program
This program is designed for young artists of exceptional ability and musical sensitivity who plan careers as solo performers. The Artist Diploma Program provides young artists with the opportunity to devote their full time to concentrated study and practice for the duration of their assigned programs.

Entrance Requirements
Following the recommendation of the student's major department, a performance audition, consisting of a full-length recital before the Artist Diploma Committee, is required.

Curriculum Requirements
A minimum of 16 units at the 754 level (from MPEM, MPGU, MPKS, MPST, MPVA or MPWP) and four full-length recitals are required. This program requires four consecutive semesters of study for completion.

Master's Degree

Choral Music (MM)

Master of Music

Unit and Grade Requirements
Thirty units of graduate work are required; a minimum of 15 units (excluding thesis or project) must be at the 500 level or higher. All students must satisfy the specified requirements of their major department (see department chair or academic adviser). Students must complete at least 26 semester units at USC, including the thesis or recital. A grade point average of not less than 3.0 (A = 4.0) is required for all graduate courses in music, and a grade of B or higher is required for all courses in the major department. Students who transfer credits must achieve this average on all combined transferred and residence units.

Transferred Credits
All credits transferred must be the equivalent of corresponding current work at USC. Course work completed at another institution that has been approved by the Thornton School for transfer credit must have been completed within seven years from the date of admission to a master's degree program to be applied toward that degree. Transfer credit petitions must be filed with the appropriate Thornton adviser during the first semester in residence.

Time Limit
The time limit for completing the Master of Music degree is five years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

Thesis/Project/Portfolio Requirements and Qualifying Exam Committees
A composition portfolio is required of candidates for the Master of Music degree in composition; a thesis or final project is required of candidates for the Master of Music degree in music education. For music education majors, the thesis will consist of a research document written on a topic
approved by the music teaching and learning department; the final project will consist of a creative project that will present the arrangement, production or design of innovative ideas, materials or curricula for specific applications in teaching music. Before registering for 594a Thesis, or a similarly required course for a capstone project or portfolio, a student must establish a qualifying exam committee composed of three members of the faculty, approved by the department chair, of which at least two are from the home department. The chair of the qualifying exam committee directly supervises the preparation of the thesis, the final acceptance of which is based upon the unanimous recommendation of all three members of the committee.

**Master's Recital**

One or more public recitals are required of all candidates for the Master of Music degree, as indicated below. Candidates must apply for recital dates, according to the current guidelines of the Music Operations office. Some departments require that a candidate be prepared to play or conduct the recital program for the approval of a faculty committee in advance.

**Comprehensive Review**

Candidates for the Master of Music must pass a comprehensive review toward the end of their course of study, usually in the final semester. This review, which is administered by the faculty of the major department, consists of an oral or written examination, covering relevant aspects of musical performance, literature, and/or technique.

**Master of Music in Choral Music**

**Prerequisite**

Applicants must hold a Bachelor of Music degree or its equivalent. Completed course work must include at least the following: Conducting MUCD 340, MUCD 343 and MUCD 441; Music History and Literature MUHL 331 and MUHL 332; Theory and Composition MUCO 232b, MUCO 233b and MUCO 338. One year of German or French is strongly recommended. Applicants must have attained senior standing in a principal performance medium.

**Keyboard Proficiency**

A keyboard proficiency test will be given by the choral faculty during the student's first semester in residence to determine if additional study in keyboard is required.

**Comprehensive Review**

A final oral examination in choral literature, conducting and rehearsal techniques will be administered by the choral music faculty.

Early Music Performance Emphasis (MA)

Master of Arts
This degree is under the jurisdiction of the Graduate School. Students should also refer to The Graduate School section of this catalogue for general regulations.

Departmental Requirements
Applicants will be evaluated on the basis of scores on the Graduate Record Examinations, transcripts of previous college courses, a research paper and letters of reference. Regular (classified) standing is achieved when the general test of the Graduate Record Examinations has been taken, and when the Music Graduate Entrance Examinations have been completed satisfactorily. Remedial course work, if recommended, may be substituted for repetition of examinations.

Language Requirement
Students are required to demonstrate a reading knowledge by passing an examination in one foreign language chosen by the student from among French, German, Italian or Latin. This requirement must be passed prior to the comprehensive examination.

Prerequisites
Applicants should have an undergraduate degree with a major in music or the equivalent, and a substantial background in languages, arts and letters.

Elective in music
Electives in letters, arts and sciences

Total units: 32

The thesis will include the planning, research, preparation and leadership of a full-length program in early music. This practical work will be supported by a written essay that deals, as appropriate, with historical data sources, authentic performance practices and a stylistic assessment of the repertoire that is performed. In lieu of a comprehensive examination, candidates for the Early Music Performance Emphasis will be required to pass periodic reviews to demonstrate progress.

Jazz Studies (MM)

Master of Music

Unit and Grade Requirements
Thirty units of graduate work are required; a minimum of 15 units (excluding thesis or project) must be at the 500 level or higher. **Performance (Flute), (Oboe), (Clarinet), (Bassoon), (Saxophone), (French Horn), (Trumpet), (Trombone), (Tuba) or (Percussion) (MM)**

**Master of Music**

**Unit and Grade Requirements**
Thirty units of graduate work are required; a minimum of 15 units (excluding thesis or project) must be at the 500 level or higher. All students must satisfy the specified requirements of their major department (see department chair or academic adviser). Students must complete at least 26 semester units at USC, including the thesis or recital. A grade point average of not less than 3.0 (A = 4.0) is required for all graduate courses in music, and a grade of B or higher is required for all courses in the major department. Students who transfer credits must achieve this average on all combined transferred and residence units.

**Transferred Credits**
All credits transferred must be the equivalent of corresponding current work at USC. Course work completed at another institution that has been approved by the Thornton School for transfer credit must have been completed within seven years from the date of admission to a master's degree program to be applied toward that degree. Transfer credit petitions must be filed with the appropriate Thornton adviser during the first semester in residence.

**Time Limit**
The time limit for completing the Master of Music degree is five years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

**Thesis/Project/Portfolio Requirements and Qualifying Exam Committees**
A composition portfolio is required of candidates for the Master of Music degree in composition; a thesis or final project is required of candidates for the Master of Music degree in music education. For music education majors, the thesis will consist of a research document written on a topic approved by the music teaching and learning department; the final project will consist of a creative project that will present the arrangement, production or design of innovative ideas, materials or curricula for specific applications in teaching music.
music. Before registering for 594a Thesis, or a similarly required course for a capstone project or portfolio, a student must establish a qualifying exam committee composed of three members of the faculty, approved by the department chair, of which at least two are from the home department. The chair of the qualifying exam committee directly supervises the preparation of the thesis, the final acceptance of which is based upon the unanimous recommendation of all three members of the committee.

**Master's Recital**

One or more public recitals are required of all candidates for the Master of Music degree, as indicated below. Candidates must apply for recital dates, according to the current guidelines of the Music Operations office. Some departments require that a candidate be prepared to play or conduct the recital program for the approval of a faculty committee in advance.

**Comprehensive Review**

Candidates for the Master of Music must pass a comprehensive review toward the end of their course of study, usually in the final semester. This review, which is administered by the faculty of the major department, consists of an oral or written examination, covering relevant aspects of musical performance, literature, and/or technique.

**Master of Music in Performance (Flute), (Oboe), (Clarinet), (Bassoon), (Saxophone), (French Horn), (Trumpet), (Trombone), (Tuba) or (Percussion)**

**Prerequisite**

The applicant must hold a Bachelor of Music degree with a major in a wind instrument or percussion or equivalent.

**Curriculum Requirements**

- **MUEN 523 University Wind Ensemble Units:** 1 (4 units total)
- **MUEN 525 Wind and Percussion Chamber Music Units:** 1 (4 units total)
- **MUHL 570 Research Materials and Techniques Units:** 2
- **MUHL 578 Music since 1900 Units:** 2
- **MUHL electives at the 500 level**

**Performance (Vocal Arts) (MM)**

**Overview**
The MM in vocal arts performance is a two-year, 30-unit program consisting of individual instruction, ensembles, cantata and oratorio, pedagogy, vocal literature, music history and electives. A graduate recital is required.

**Admission**
Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

**Unit and Grade Requirements**
Thirty units of graduate work are required; a minimum of 15 units (excluding thesis or project) must be at the 500 level or higher. All students must satisfy the specified requirements of their major department (see department chair or academic adviser). Students must complete at least 26 semester units at USC, including the thesis or recital. A grade point average of not less than 3.0 (A = 4.0) is required for all graduate courses in music, and a grade of B or higher is required for all courses in the major department. Students who transfer credits must achieve this average on all combined transferred and residence units.

**Transferred Credits**
All credits transferred must be the equivalent of corresponding current work at USC. Course work completed at another institution that has been approved by the Thornton School for transfer credit must have been completed within seven years from the date of admission to a master's degree program to be applied toward that degree. Transfer credit petitions must be filed with the appropriate Thornton adviser during the first semester in residence.

**Time Limit**
The time limit for completing the Master of Music degree is five years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

**Music Graduate Entrance Exams**
All students entering a graduate-level degree program (MA, MM, DMA, PhD) at USC Thornton, who have not previously completed a degree at USC Thornton, must take a series of entrance exams in core music subjects. These exams are called Music Graduate Entrance Exams (MGEES).

Information regarding which exams are required for specific majors is available from the Thornton Student Affairs office.

Also see the Thornton School of Music Admission to Graduate Standing section of this catalogue for specific policies relating to these exams.

**Master’s Recital**
One public recital is required of all candidates for the Master of Music degree (Vocal Arts), as indicated below. Candidates must apply for recital dates, according to the current guidelines of the Music Operations office. Some departments require that a candidate be prepared to play or conduct the recital program for the approval of a faculty committee in advance.

**Comprehensive Review**
Candidates for the Master of Music must pass a comprehensive review toward the end of their course of study, usually in the final semester. This review, which is administered by the faculty of the major department, consists of an oral or written examination, covering relevant aspects of musical performance, literature, and/or technique.

**Master of Music in Performance (Vocal Arts)**

**Prerequisite**
The applicant must hold a Bachelor of Music degree with a major in vocal arts. Students who have not had formal training in foreign language, diction, vocal pedagogy, acting for singers, song literature and in Italian, French or German languages must show competency in these areas through appropriate course work with a grade of B or higher.

**Curriculum Requirements**
- Lessons (8 units)
  - MPVA 553 Individual Instruction Units: 1 or 2
  - 8 units total of MPVA 553 (Voice)
- Music Ensembles (2 units)
  - 500 level Music Ensemble (two 1-unit courses)
- Program Intensive Courses (6 units)
  - MPVA 443 Cantata and Oratorio Units: 2, 2 years
  - MPVA 540 Special Studies in Vocal Literature Units: 2
The time limit for completing the Master of Music degree is five years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

**Thesis/Project/Portfolio Requirements and Qualifying Exam Committees**

A composition portfolio is required of candidates for the Master of Music degree in composition; a thesis or final project is required of candidates for the Master of Music degree in music education. For music education majors, the thesis will consist of a research document written on a topic approved by the music teaching and learning department; the final project will consist of a creative project that will present the arrangement, production or design of innovative ideas, materials or curricula for specific applications in teaching music. Before registering for 594a Thesis, or a similarly required course for a capstone project or portfolio, a student must establish a qualifying exam committee composed of three members of the faculty, approved by the department chair, of which at least two are from the home department. The chair of the qualifying exam committee directly supervises the preparation of the thesis, the final acceptance of which is based upon the unanimous recommendation of all three members of the committee.

**Master's Recital**

One or more public recitals are required of all candidates for the Master of Music degree, as indicated below. Candidates must apply for recital dates, according to the current guidelines of the Music Operations office. Some departments require that a candidate be prepared to play or conduct the recital program for the approval of a faculty committee in advance.

**Comprehensive Review**

Candidates for the Master of Music must pass a comprehensive review toward the end of their course of study, usually in the final semester. This review, which is administered by the faculty of the major department, consists of an oral or written examination, covering relevant aspects of musical performance, literature, and/or technique.

**Master of Music in Sacred Music**

**Prerequisite**

Applicants must hold a Bachelor of Music degree or its equivalent. Completed course work must include at least the following or their equivalent: Conducting MUCD 340, MUCD 343 and MUCD 441; Music History and Literature MUHL 331 and MUHL 332; Theory and Composition MUCO 232b, MUCO 233b and MUCO 338. One year of German or French is strongly recommended. Applicants must have attained senior standing in a principal performance medium.

**Keyboard and Voice Proficiency**

Proficiency tests in keyboard and voice will be given by the choral and sacred music faculty during the student's first semester in residence to determine if additional study in either medium is required.

**Comprehensive Review**

A final oral examination in sacred music and related areas will be administered by the sacred and choral music faculty.

**Curriculum Requirements**

MUCM 440 Choral Development Units: 2 **
Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

Unit and Grade Requirements
Students must complete at least 26 semester units at USC, including the portfolio. A grade point average of not less than 3.0 (A = 4.0) is required for all graduate courses in music, and a grade of B or higher is required for all courses in the major department. Students who transfer credits must achieve this average on all combined transferred and residence units.

Portfolio Requirement
A portfolio of multiple original manuscript scores for films and/or games, along with screening copies containing audio tracks, is required for graduation. The scoring faculty will provide students with additional details for this requirement.

Teaching and Learning (MM)
Overview
The goal of this professional degree is to prepare the student for an advanced level of pre-college teaching and leadership in the music education profession by developing core knowledge and expertise in pedagogical skills and scholarship. It provides a seamless transition into the DMA in Teaching and Learning, with most units being transferable to the DMA requirements.

Admission
Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.
are reviewed on an annual basis and published online at music.usc.edu.

**Graduate Record Examinations**
Scores from the General Test of the Graduate Record Examinations (GRE) are required for application and admission to the MM in Teaching and Learning. Detailed requirements are available at the Thornton Website, music.usc.edu. Test scores on the GRE that are more than five years old at the time of application are not accepted.

**Unit and Grade Requirements**
Students must complete at least 26 semester units at USC, including the capstone. A grade point average of not less than 3.0 (A = 4.0) is required for all graduate courses in music, and a grade of B or higher is required for all courses in the major department. Students who transfer credits must achieve this average on all combined transferred and residence units.

**Transferred Credits**
All credits transferred must be the equivalent of corresponding current work at USC. Course work completed at another institution that has been approved by the Thornton School for transfer credit must have been completed within seven years from the date of admission to a master's degree program to be applied toward that degree. Transfer credit petitions must be filed with the appropriate Thornton adviser during the first semester in residence.

**Time Limit**
The time limit for completing the Master of Music degree is five years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

**Music Graduate Entrance Exams**
All students entering a graduate-level degree program (MA, MM, DMA, PhD) at USC Thornton, who have not previously completed a degree at USC Thornton, must take a series of entrance exams in core music subjects. These exams are called Music Graduate Entrance Exams (MGEEs). Information regarding which exams are required for specific majors is available from the Thornton Student Affairs office. Also see the Thornton School of Music Admission to Graduate Standing section of this catalogue for specific policies relating to these exams.

**Capstone and Guidance Committee**
A thesis or final project is required for candidates as a capstone for the Master of Music in Teaching and Learning. The thesis will consist of a research document written on a topic approved by the Music Teaching and Learning department; the final project will consist of a creative project that will present the arrangement, production or design of innovative ideas, materials or curricula for specific applications in teaching music. Before registering for 594a Thesis or 590 and 592 (for the project option), a student must establish a guidance committee composed of three members of the faculty, approved by the department chair, of which at least two are from the home department. The chair of the guidance committee directly supervises the preparation of the thesis, the final acceptance of which is based upon the unanimous recommendation of all three members of the committee.

**Comprehensive Review**
Candidates for the Master of Music must pass a comprehensive review toward the end of their course of study, usually in the final semester. This review, which is administered by the faculty of the major department, consists of an oral or written examination, covering relevant aspects of musical performance, literature, and/or technique.

**Curriculum Requirements**

**Applied Music (4 units)**
4-units total are to be earned by choosing from the following:
Individual Instruction (lessons); courses in conducting, composition or arranging; or ensemble. Individual instruction and ensembles must be at the 500 level. Conducting, composition and arranging courses must be at the 400 or 500 level.

**Program Intensive Courses (11 units)**
- MTAL 500 Research Foundations in Music Teaching and Learning Units: 3
- MTAL 505 Teaching and Learning Music Units: 2

**Two courses from the following:**
- MTAL 501 Historical Foundations of Music Education Units: 3
- MTAL 502 Sociological Foundations of Music Teaching and Learning Units: 3
- MTAL 503 Philosophical and Advocacy Issues in Music Teaching and Learning Units: 3
- MTAL 504 Psychological Foundations of Music Units: 3

**Core Thornton Academic Courses (8 units)**
- MUHL electives at the 500 level: two 2-unit courses

**One course from the following:**
- MUCD 441 Choral Conducting II Units: 2
- MUCD 443 Instrumental Conducting II Units: 2

**One course from the following:**
- MUCO 501 Introduction to the Analysis of Tonal Music Units: 2
- MUCO 502 Introduction to the Analysis of Post-Tonal Music Units: 2

**Electives in music at the 400 or 500 level (3 units)**

**Comprehensive Review (0 units)**

**Capstone Project (4 units)**
Choose one group from the following:
- MTAL 594a Master's Thesis Units: 2
- MTAL 594b Master's Thesis Units: 2

Or
- MTAL 590 Directed Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
- MTAL 592 Final Project Units: 2
**Total units: 30**

**University Certificate**

**Arts Leadership Graduate Certificate**

**Certificate in Arts Leadership (ARTL)**

The graduate program in arts leadership is a two-semester certificate program for artists, arts administrators and cultural workers of all types to develop the skills necessary to become successful leaders in the arts and arts organizations in a rapidly changing and radically altered contemporary world. The program is based in the Thornton School of Music, but it is designed to be applicable for artists/students engaged in any of the arts disciplines who want to develop their leadership skills in the hybrid and holistic environment of the contemporary arts. The program is highly individualized and deeply student centered in its approach, with simultaneous emphases on research, discovery, theory and current practice. With strong faculty mentorship and guidance from the director of the program and other working professionals in the field, students explore the dimensions of the most current issues and ideas while developing specific real-world applications of these ideas to their own practice as artists and leaders.

The program consists of a minimum of 18 units which can be completed in two semesters. The program begins with a 2-unit gateway course (ARTL 500) which introduces the students to the varied, complex and contentious issues in the arts and arts leadership that currently exist in the contemporary arts world. From this experience, students will develop a life plan that examines their own career and life trajectory for the next several years, providing a guidepost for their own personal development in arts leadership.

Students will take four core courses including ARTL 501, which focuses on a deep understanding and application of the challenges of executive leadership in the arts and ARTL 502, which looks at major environmental trends affecting the arts and how that impacts the student's leadership role in the arts. Essential to all of these courses is developing the ability to think, speak and write critically about the arts in the contemporary world, key components of strong arts leadership. There is also a two semester practicum, ARTL 510, in which the student creates, develops and completes an actual arts leadership project of his or her own choosing, supported by faculty mentorship and the cohort of other practicum students.

Admission to the program is by application, reviewed and approved by the director of the program. Admission to the practicum requires a project proposal to be created by the student and approved by the director of the program.

**Core Courses**

- ARTL 500 Arts Leadership and Arts Entrepreneurship Units: 2
- ARTL 501 Executive Leadership in the Arts Units: 2
- ARTL 502 Issues in the Arts and the Contemporary World Units: 2
- ARTL 503 Arts Organizations: Innovation and New Models Units: 2
- ARTL 504 Arts and the Community: Current Practice and New Visions Units: 2
- ARTL 510 Arts Leadership Practicum Units: 2 (2 semesters) (4 units total)

**Total units: 14**

**Select a Minimum of 4 Units From the Following Courses***

- MUIN 570 The Music Industry Units: 4
- PAS 561 Curatorial/Organizational Models Units: 2
- PAS 571 Histories of Art in the Public Sphere Units: 3
- PAS 572 Contemporary Art in the Public Sphere Units: 3
- PAS 585 Theorizing the Public Realm Units: 3
- PPD 675 Nonprofit Management and Leadership Units: 4
- PPD 687 Strategic Management in the Nonprofit Sector Units: 4 **
- PPD 689 The Nonprofit Sector and Philanthropy Units: 4
- PPDE 645 Financial Management of Nonprofit Organizations Units: 4

**Total units: 4**

*Courses may be chosen from this list or in consultation with the Director of Arts Leadership.

**Prerequisite: PPD 675 and PPD 689**

**Minimum total units: 18**

**Performance Graduate Certificate**

This two-year graduate-level program is designed for students who have completed their undergraduate education in music, or its equivalent, and intend to concentrate their energies on the full-time development of their discipline.

**Entrance Requirements**

A performance audition is required with repertory to be determined by the student's primary department.

**Curriculum Requirements**

The requirements for this program consist of 16 units of Graduate Certificate Performance (4 units per semester of MPEM 554, MPGU 554, MPKS 554, MPST 554, MPVA 554, MPWP 554 or MUJZ 554). Graduate Certificate Performance encompasses individual instruction, studio class and two ensembles or the equivalent as appropriate to the discipline.

**Doctoral Degree**

**Choral Music (DMA)**

**Overview**

The DMA in Choral Music consists of the following areas of study: the basic DMA curriculum, course work in the major, an academic field and two elective fields.

**Degree Prerequisites**

DMA applicants must complete the appropriate master of music degree program or its equivalent.

**Admission**

Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

**Graduate Record Examinations**
Scores from the General Test of the Graduate Record Examinations (GRE) are required for application and admission to the DMA in Choral Music. Detailed requirements are available at the Thornton Website, music.usc.edu. Test scores on the GRE that are more than five years old at the time of application are not accepted.

**Grade Point Average Requirements**

A minimum grade point average of 3.0 (A = 4.0) is required for all graduate course units in music. A grade of B or higher is required for all courses in the major field. For courses in academic and elective fields, the minimum passing grade is C.

**Transfer Credit**

The Degree Progress Department in the Office of Academic Records and Registrar determines whether course work taken elsewhere is available for transfer credit. A maximum of 30 units of transfer credit may be applied toward a doctoral degree in music. Whether such credit is applicable toward a specific requirement in a major or minor field is determined by the Thornton School department in which the subject is taught, pending approval by the dean of the Thornton School. Transfer credit petitions must be filed with the Thornton doctoral adviser during the first semester in residence.

Transfer work must have been completed within 10 years of admission to the DMA program to be applied toward that degree.

**Residence Requirement**

A minimum of two years of full-time study beyond the Master of Music degree is required for the Doctor of Musical Arts. At least one year of full-time study beyond the master's degree (6 units or more per semester) must be in residence at USC.

**Time Schedule**

The time limit for completing the Doctor of Musical Arts degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the doctoral program, the time limit for completing the Doctor of Musical Arts degree is six years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

**Music Graduate Entrance Exams**

All students entering a graduate-level degree program (MA, MM, DMA and PhD) at USC Thornton, who have not previously completed a degree at USC Thornton, must take a series of entrance exams in core music subjects. These exams are called Music Graduate Entrance Exams (MGEEs). Information regarding which exams are required for specific majors is available from the Thornton Student Affairs office. Also see the Thornton School of Music Admission to Graduate Standing section of this catalogue for specific policies relating to these exams.

**Foreign Language**

An academic reading knowledge of French, German, Italian or Spanish is required of all students, either by taking a course approved by the Thornton School or by written examination approved by the Thornton School. Departments within the Thornton School may require additional language skills. All language requirements must be fulfilled one semester before entering the third semester in the program.

Students with an academic reading knowledge of a language other than English, French, German, Italian or Spanish, may make a written request to the Thornton doctoral adviser to meet this requirement with a different language. In these cases, students must propose and gain the permission of a member of the USC faculty who will agree to create and grade the examination that would ultimately determine fulfillment of the requirement.

**Course Requirements**

Each student is required to complete four areas of concentration: the major field, an academic field and two elective fields.

Required courses for each major curriculum are listed in the description of major programs below. Required courses for any academic or elective field are determined for their respective fields by the faculty advisers of a student's DMA guidance committee.

A minimum of 65 graduate units beyond the bachelor's degree are required to complete a DMA degree. Fifty-five or more units must be in music, 12 of these beyond the master's level must be in the major. At least 40 of these must be at the 500 level or higher. All course work earned under these requirements for a doctoral degree is considered to be obsolete after 10 years from the date of completion of such work and may not be used to fulfill degree requirements.

**Academic and Elective Fields**

For the academic field students must choose one from Musicology, Theory and Analysis, Music Teaching and Learning, Choral Music or Sacred Music. For the elective fields students will choose two fields from among 50 possible areas, including Composition, Performance, Early Music, Jazz Studies, Music Teaching and Learning, Choral Music, Sacred Music, Conducting, Pedagogy, Electroacoustic Media, Music Industry, as well as areas outside of music. The fields comprise courses that are determined by the department in which they are administered. Eight to 10 units are taken in the academic field. Six to 8 units are taken in each elective field. The academic field may not duplicate a major or an elective field. No more than two of the four fields of concentration may be under the guidance of the same department within the Thornton School of Music, and at least one of the elective fields must culminate in a substantial written paper or examination. Students must apply to their chosen fields. Admission to academic and elective fields is determined by the appropriate department, prior to the Graduate Committee Interview. Individualized programs of study will be created in each field in consultation with a faculty advisor in each area.

**Graduate Committee Interview**

Before the completion of 16 units beyond the master's degree and before permission to present the second doctoral recital is requested, doctoral students must meet with the Graduate Advisory Committee of the Thornton School of Music to discuss their progress in the program and their goals for the future. In preparation for this interview, students must prepare a dossier according to specific instructions available from the Thornton doctoral adviser. The committee determines the student's continuation in the program, and approves both the student's individualized curriculum (including all fields of concentration) and the members of his or her DMA guidance committee.
DMA Guidance Committee
The DMA guidance committee is composed of at least five members: two faculty members from the major department, one of whom will serve as chair, and a faculty member from each of the three other areas of concentration. At least three members of a committee must be full-time faculty of rank in the Thornton School. The composition of the DMA Guidance Committee is proposed and approved as part of the Graduate Committee Interview. The guidance committee administers the written and oral parts of the comprehensive examination. The committee continues to serve until the comprehensive examination has been passed, the dissertation topic approved (if applicable) and the student is admitted to candidacy (if applicable). For students in curricula that require recital, the two major field advisers serve as the recital committee and are responsible for determining the approved format, content, scheduling, and presentation of these performances for credit toward the requirements of the degree.

Comprehensive Examination
The comprehensive examination for the DMA is administered by the student's guidance committee. This examination consists of written and oral components and is designed to assess the student's mastery of his or her fields of concentration and readiness for professional independence as a performer, composer, teacher, researcher and/or scholar. The student must obtain permission from the guidance committee to take the comprehensive examination and schedule it at least two months in advance to ensure the committee's availability. The examination must be taken after completion of all required course work for all fields of concentration, except (in some cases) a limited number of the required units of Individual Instruction in the major field. In degree programs that require the presentation of four major recitals, at least two major recitals must be presented prior to the administration of the comprehensive examination. Up to two required recitals may be presented after the comprehensive examination. The dissertation (if required) must be written after the comprehensive examination. Comprehensive examinations will not be scheduled during summer sessions except under extraordinary circumstances and only with the written approval of members of the guidance committee. All portions of the examination must be completed within one month.

The comprehensive examination is comprised of a substantial culminating work for each field of concentration, as well as an oral examination with the student's guidance committee. The culminating work for each field may be a written examination, paper, project or recital, as appropriate for the particular field. For the academic field and at least one elective field, this culminating requirement must be a substantial written examination or paper. Following the successful completion of all culminating requirements and the approval of each by the corresponding faculty adviser, the student will sit for a two-hour oral examination with the guidance committee. This oral examination covers in greater depth the topics discussed in the written examinations and other requirements for the fields of concentration. The oral examination may also cover new material as determined by the guidance committee.

The two major field advisers and the academic field adviser must be present at the oral examination and render a judgment on the acceptability of the comprehensive examinations as a whole. It is highly preferable that the faculty advisers for the two elective fields participate in the oral examination with the other members of the guidance committee. If, however, there are challenges with scheduling or other issues that are reasonably unresolvable, the participation of the faculty advisers for elective fields is not required for the oral examination if they feel that the candidate has demonstrated knowledge and mastery of material that is appropriate for an elective field in their disciplines.

The examinations will be reported as passing if there is no more than one dissenting vote on the committee. A student must pass both the written and oral portions to pass the comprehensive examination. A pass on the examination cannot be made contingent upon any form of additional work. If a student fails the comprehensive examination, the guidance committee may permit the student to repeat it once at a mutually satisfactory time within a period of not less than six months nor more than one year from the date of the first oral examination. A student may not take the comprehensive examination more than twice.

The comprehensive examination serves as the qualifying examination for programs that require a dissertation.

Admission to Candidacy
For the DMA in Choral Music, admission to candidacy occurs after the student has passed the comprehensive examination, upon formal action of the dean of the Thornton School. The dissertation must be completed after admission to candidacy.

Doctoral Dissertation
A dissertation based on original investigation and/or creative work is required of candidates in Composition, Music Teaching and Learning and Choral Music. The dissertation must reveal scholarly ability, technical mastery, capacity for independent research and originality in creative thought.

Dissertation Committee
After the guidance committee recommends admission to candidacy and approves the dissertation topic, the committee is reduced to three members. This smaller committee shall be the dissertation committee and will guide the student through the completion of the dissertation. Additional members may be added at the discretion of the chair of the committee if the topic requires special expertise.

Registration for Dissertation
The student must register in 794 Dissertation each semester after admission to candidacy until degree requirements (including the dissertation) are completed. Registration for 794 in no less than two regular semesters following admission to candidacy entitles the candidate to supervision by the dissertation committee. If the dissertation is not completed and accepted within two semesters, the candidate must register for 794 each semester thereafter until the document has been accepted. No more than 8 units of credit in 794 may be accumulated regardless of the number of semesters the candidate may be required to register.
A candidate who must withdraw temporarily from registration in 794 for a semester must report this in writing to the Thornton doctoral adviser before the beginning of that semester. As part of that report, the candidate must also petition for a formal leave of absence. During a leave of absence the candidate will not be entitled to assistance from his or her dissertation committee or to the use of university services and facilities. A leave of absence will be granted only under exceptional circumstances.

**Format for Theses and Dissertations**

All dissertations submitted for requirements for graduate degrees must conform to university regulations in format and method of preparation. See the USC Graduate School's guidelines for Theses and Dissertations.

**Abstract of Dissertation**

Since the abstract of the dissertation is published in Dissertation Abstracts International, it should be written with care and be representative of the final draft of the dissertation.

**Defense of the Dissertation**

After meeting all requirements including the comprehensive examination, the candidate must defend the dissertation. This defense takes place in order for the committee to determine whether the dissertation should be approved or rejected. While this oral defense is open to the general university community, only the members of the dissertation committee have the authority to recommend its acceptance or rejection. The recommendation must be unanimous in order for the dissertation to be approved.

At least seven weeks before the scheduled date of the defense of the dissertation, written approval by all members of the candidate's dissertation committee, along with a typed copy of the dissertation abstract, must be filed with the doctoral adviser of the Thornton School of Music. A candidate may defend the dissertation on the basis of an approved preliminary copy. If the defense is satisfactory and the committee is satisfied with the manuscript as presented, the committee then signs the Approval to Submit Defended and Final Copy of the Doctoral Work form. If additional work is required, the form is left unsigned until the work has been approved.

The final electronic PDF copy of the dissertation, together with signed signature sheet and approval forms, must be presented to the Thesis Editor in the USC Graduate School by the Graduate School's submission date and times. Approval of format and acceptance by the Graduate School's submission date and times.

The recommendation must be unanimous in order for the dissertation to be approved. If the defense is satisfactory and the committee is satisfied with the manuscript as presented, the committee then signs the Approval to Submit Defended and Final Copy of the Doctoral Work form. If additional work is required, the form is left unsigned until the work has been approved.

The final electronic PDF copy of the dissertation, together with signed signature sheet and approval forms, must be presented to the Thesis Editor in the USC Graduate School by the Graduate School's submission date and times. Approval of format and acceptance by the Graduate School must be presented to the doctoral adviser of the Thornton School of Music at least one week before the end of the semester.

**Curriculum Requirements for Choral Music Major**

A keyboard proficiency test will be given by the choral faculty during the student's first semester in residence to determine if additional study in keyboard is required.

**Basic DMA Curriculum (20 units) - Required for All DMA Candidates**

- MUCD 441 Choral Conducting II Units: 2 *
- MUCO 501 Introduction to the Analysis of Tonal Music Units: 2
- MUCO 502 Introduction to the Analysis of Post-Tonal Music Units: 2
- MTAL 505 Teaching and Learning Music Units: 2
- MUHL 570 Research Materials and Techniques Units: 2
- MUHL electives numbered 500 through 695: 6 units total
- Ensemble Units: 2 units total

**Note:**

Courses with similar content taken for graduate credit at another accredited institution may be substituted, subject to departmental approval. Master's degree credit for ensemble taken at USC may fulfill this requirement, subject to departmental approval.

**Lessons, Ensemble and Performance Classes (10 units)**

- MUCD 541 Choral Conducting III Units: 2
- Ensemble (500 level; choral music majors must participate in a choral ensemble each semester if enrolled for 4 or more units) Units: 2 units total
- 4 units total of MUCD 541
- MUCD 641 Choral Conducting IV Units: 2
- MUCD 653 Performance Units: 1 or 2
- 2 units total of MUCD 653

**Program Intensive Courses (12 units)**

- MSCR 571 Music of the Great Liturgies Units: 2
- MUCM 440 Choral Development Units: 2 **
- MUCM 541 Choral Literature I Units: 2 **
- MUCM 542 Choral Literature II Units: 2 **
- MUCM 641 Choral Literature III Units: 2
- MUCO 441 Choral Arranging Units: 1, 2
- 2 units total of MUCO 441

**Electives to Fulfill the Academic Field and Two Elective Fields (19 units)**

Conduct two principal choral concerts; at least one of which will include instrumental ensemble (0 units)

**Comprehensive Examinations (0 units)**

Examinations that include the major area, one academic field and two elective fields.

**Capstone Project (4 units)**

- MUCM 794a Doctoral Dissertation Units: 2
- MUCM 794b Doctoral Dissertation Units: 2

**Total units: 65**

*Choral music majors are not required to take MUCD 441.
**May be taken as part of the master's degree.

**Composition (DMA)**

**Overview**

The DMA in Composition consists of the following areas of study: the basic DMA curriculum, course work in the major, an academic field and two elective fields.

**Degree Prerequisites**
DMA applicants must complete the appropriate master of music degree program or its equivalent.

**Admission**

Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

**Grade Point Average Requirements**

A minimum grade point average of 3.0 (A = 4.0) is required for all graduate course units in music. A grade of B or higher is required for all courses in the major field. For courses in academic and elective fields, the minimum passing grade is C.

**Transfer Credit**

The Degree Progress Department in the Office of Academic Records and Registrar determines whether course work taken elsewhere is available for transfer credit. A maximum of 30 units of transfer credit may be applied toward a doctoral degree in music. Whether such credit is applicable toward a specific requirement in a major or minor field is determined by the Thornton School department in which the subject is taught, pending approval by the dean of the Thornton School.

Transfer credit petitions must be filed with the Thornton School prior to the student's first semester in residence. Transfer work must have been completed within 10 years of admission to the DMA program to be applied toward the degree.

**Residence Requirement**

A minimum of two years of full-time study beyond the Master of Music degree is required for the Doctor of Musical Arts. At least one year of full-time study beyond the master's degree (6 units or more per semester) must be in residence at USC.

**Time Schedule**

The time limit for completing the Doctor of Musical Arts degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the doctoral program, the time limit for completing the Doctor of Musical Arts degree is six years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

**Music Graduate Entrance Exams**

All students entering a graduate-level degree program (MA, MM, DMA and PhD) at USC Thornton, who have not previously completed a degree at USC Thornton, must take a series of entrance exams in core music subjects. These exams are called Music Graduate Entrance Exams (MGEEs).

Information regarding which exams are required for specific majors is available from the Thornton Student Affairs office. Also see the Thornton School of Music Admission to Graduate Standing section of this catalogue for specific policies relating to these exams.

**Foreign Language**

An academic reading knowledge of French, German, Italian or Spanish is required of all students, either by taking a course approved by the Thornton School or by written examination approved by the Thornton School. Departments within the Thornton School may require additional language skills. All language requirements must be fulfilled one semester before entering the third semester in the program.

Students with an academic reading knowledge of a language other than English, French, German, Italian or Spanish, may make a written request to the Thornton doctoral adviser to meet this requirement with a different language. In these cases, students must propose and gain the permission of a member of the USC faculty who will agree to create and grade the examination that would ultimately determine fulfillment of the requirement.

**Course Requirements**

Each student is required to complete four areas of concentration: the major field, an academic field and two elective fields.

Required courses for each major curriculum are listed in the description of major programs below. Required courses for any academic or elective field are determined for their respective fields by the faculty advisers on a student's DMA guidance committee.

A minimum of 65 graduate units beyond the bachelor's degree are required to complete a DMA degree. Fifty-five or more units must be in music. 12 of these beyond the master's level must be in the major. At least 40 of these must be at the 500 level or higher. All course work earned under these requirements for a doctoral degree is considered to be obsolete after 10 years from the date of completion of such work and may not be used to fulfill degree requirements.

**Academic and Elective Fields**

For the academic field students must choose one from Musicology, Theory and Analysis, Music Teaching and Learning, Choral Music or Sacred Music. For the elective fields students will choose two fields from among 50 possible areas, including Composition, Performance, Early Music, Jazz Studies, Music Teaching and Learning, Choral Music, Sacred Music, Conducting, Pedagogy, Electroacoustic Media, Music Industry, as well as areas outside of music. The fields comprise courses that are determined by the department in which they are administered. Eight to 10 units are taken in the academic field. Six to 8 units are taken in each elective field. The academic field may not duplicate a major or an elective field. No more than two of the four fields of concentration may be under the guidance of the same department within the Thornton School of Music, and at least one of the elective fields must culminate in a substantial written paper or examination. Students must apply to their chosen fields. Admission to academic and elective fields is determined by the appropriate department, prior to the Graduate Committee Interview. Individualized programs of study will be created in each field in consultation with a faculty adviser in each area.

**Graduate Committee Interview**

Before the completion of 16 units beyond the master's degree and before permission to present the second doctoral recital is requested, doctoral students must meet with the Graduate Advisory Committee of the Thornton School of Music to discuss their progress in the program and their goals for the future. In preparation for this interview, students must prepare a dossier according to specific instructions available from the Thornton doctoral adviser. The committee determines the student's continuation in the program, and approves both the student's individualized curriculum
The topics discussed in the written examinations and the comprehensive examination is comprised of at least five members: two faculty members from the major department, one of whom will serve as chair, and a faculty member from each of the three other areas of concentration. At least three members of a committee must be full-time faculty of rank in the Thornton School. The composition of the DMA Guidance Committee is proposed and approved as part of the Graduate Committee Interview.

The guidance committee administers the written and oral parts of the comprehensive examination. The committee continues to serve until the comprehensive examination has been passed, the dissertation topic approved (if applicable) and the student is admitted to candidacy (if applicable). For students in curricula that require recitals, the two major field advisers serve as the recital committee and are responsible for determining the approved format, content, scheduling and presentation of these performances for credit toward the requirements of the degree.

The comprehensive examination for the DMA is administered by the student's guidance committee. This examination consists of written and oral components and is designed to assess the student's mastery of his or her fields of concentration and readiness for professional independence as a performer, composer, teacher, researcher and/or scholar. The student must obtain permission from the guidance committee to take the comprehensive examination and schedule it at least two months in advance to ensure the committee's availability. The examination must be taken after completion of all required course work for all fields of concentration, except (in some cases) a limited number of the required units of Individual Instruction in the major field. In degree programs that require the presentation of four major recitals, at least two major recitals must be presented prior to the administration of the comprehensive examination. Up to two required recitals may be presented after the comprehensive examination. The dissertation (if required) must be written after the comprehensive examination.

Comprehensive examinations will not be scheduled during summer sessions except under extraordinary circumstances and only with the written approval of members of the guidance committee. All portions of the examination must be completed within one month.

The comprehensive examination is comprised of a substantial culminating work for each field of concentration, as well as an oral examination with the student's guidance committee. The culminating work for each field may be written examination, paper, project or recital, as appropriate for the particular field. For the academic field and at least one elective field, the culminating requirement must be a substantial written examination or paper. Following the successful completion of all culminating requirements and the approval of each by the corresponding faculty adviser, the student will sit for a two-hour oral examination with the guidance committee. This oral examination covers in greater depth the topics discussed in the written examinations and other requirements for the fields of concentration. The oral examination may also cover new material as determined by the guidance committee.

The two major field advisers and the academic field adviser must be present at the oral examination and render a judgment on the acceptability of the comprehensive examinations as a whole. It is highly preferable that the faculty advisers for the two elective fields participate in the oral examination with the other members of the guidance committee. If, however, there are challenges with scheduling or other issues that are reasonably unsolvable, the participation of the faculty advisers for elective fields is not required for the oral examination if they feel that the candidate has demonstrated knowledge and mastery of material that is appropriate for an elective field in their disciplines.

The examinations will be reported as passing if there is no more than one dissenting vote on the committee. A student must pass both the written and oral portions to pass the comprehensive examination. A pass on the examination cannot be made contingent upon any form of additional work.

If a student fails the comprehensive examination, the guidance committee may permit the student to repeat it once at a mutually satisfactory time within a period of not less than six months nor more than one year from the date of the first oral examination. A student may not take the comprehensive examination more than twice.

The comprehensive examination serves as the qualifying examination for programs that require a dissertation.

Admission to Candidacy
For the DMA in Composition, admission to candidacy occurs after the student has passed the comprehensive examination, upon formal action of the dean of the Thornton School. The dissertation must be completed after admission to candidacy.

Doctoral Dissertation
A dissertation based on original investigation and/or creative work is required of candidates in Composition, Music Teaching and Learning and Choral Music. The dissertation must reveal scholarly ability, technical mastery, capacity for independent research and originality in creative thought.

Dissertation Committee
After the guidance committee recommends admission to candidacy and approves the dissertation topic, the committee is reduced to three members. This smaller committee shall be the dissertation committee and will guide the student through the completion of the dissertation. Additional members may be added at the discretion of the chair of the committee if the topic requires special expertise.

Registration for Dissertation
The student must register in 794 Dissertation each semester after admission to candidacy until degree requirements (including the dissertation) are completed. Registration for 794 in no less than two regular semesters following admission to candidacy entitles the candidate to supervision by the dissertation committee. If the dissertation is not completed and accepted within two semesters, the candidate must register for 794 each semester thereafter until the document has been accepted. No more than 8 units of credit in 794 may be accumulated regardless of the number of semesters the candidate may be required to register.
A candidate who must withdraw temporarily from registration in 794 for a semester must report this in writing to the Thornton doctoral adviser before the beginning of that semester. As part of that report, the candidate must also petition for a formal leave of absence. During a leave of absence the candidate will not be entitled to assistance from his or her dissertation committee or to the use of university services and facilities. A leave of absence will be granted only under exceptional circumstances.

**Format for Theses and Dissertations**

All dissertations submitted for requirements for graduate degrees must conform to university regulations in format and method of preparation. See the USC Graduate School’s guidelines for Theses and Dissertations.

**Abstract of Dissertation**

Since the abstract of the dissertation is published in Dissertation Abstracts International, it should be written with care and be representative of the final draft of the dissertation.

**Defense of the Dissertation**

After meeting all requirements including the comprehensive examination, the candidate must defend the dissertation. This defense takes place in order for the committee to determine whether the dissertation should be approved or rejected. While this oral defense is open to the general university community, only the members of the dissertation committee have the authority to recommend its acceptance or rejection. The recommendation must be unanimous in order for the dissertation to be approved.

At least seven weeks before the scheduled date of the defense of the dissertation, written approval by all members of the candidate's dissertation committee, along with a typed copy of the dissertation abstract, must be filed with the doctoral adviser of the Thornton School of Music. A candidate may defend the dissertation on the basis of an approved preliminary copy. If the defense is satisfactory and the committee is satisfied with the manuscript as presented, the committee then signs the Approval to Submit Defended and Final Copy of the Doctoral Work form. If additional work is required, the form is left unsigned until the work has been approved.

The final electronic PDF copy of the dissertation, together with signed signature sheet and approval forms, must be presented to the Thesis Editor in the USC Graduate School by the Graduate School's submission date and times. Approval of format and acceptance by the Graduate School must be presented to the doctoral adviser of the Thornton School of Music at least one week before the end of the semester.

**Curriculum Requirements for Composition Major**

**Basic DMA Curriculum (20 units) - Required for All DMA Candidates**

- MTAL 505 Teaching and Learning Music Units: 2
- MUCD 441 Choral Conducting II Units: 2
- MUCD 443 Instrumental Conducting II Units: 2
- MUCO 636 Advanced Orchestration II Units: 1 or 2
- MUCO 737 Advanced Composition III Units: 1 or 2
- MUCO 794a Doctoral Dissertation Units: 2
- MUCO 794b Doctoral Dissertation Units: 2
- MUHL 570 Research Materials and Techniques Units: 2
- MUHL electives numbered 500 through 695: 6 units total
- Ensemble Units: 2 units total

**Note:**

Courses with similar content taken for graduate credit at another accredited institution may be substituted, subject to departmental approval. Master's degree credit for ensemble taken at USC may fulfill this requirement, subject to departmental approval.

**Lessons, Ensemble and Performance Classes (8 units)**

- MUCO 637 Advanced Composition II Units: 1, 2
  4 units total of MUCO 637
- MUCO 737 Advanced Composition III Units: 1 or 2
  4 units total of MUCO 737

**Program Intensive Courses (8 units)**

- MUCO 536 Advanced Orchestration I Units: 1, 2, 3, 4
  2 units total of MUCO 536
- MUCO 592 Selected Topics in Graduate Composition Units: 2
  4 units total of MUCO 592
- MUCO 636 Advanced Orchestration II Units: 1 or 2
  2 units total of MUCO 636

**Electives to Fulfill the Academic Field and Two Elective Fields (25 units)**

**Comprehensive Examinations (0 units)**

Examinations that include the major area, one academic field and two elective fields.

**Graduate Recital (0 units)**

**Capstone Project (4 units)**

- MUCO 794a Doctoral Dissertation Units: 2
- MUCO 794b Doctoral Dissertation Units: 2

**Total units: 65**

**Jazz Studies (DMA)**

**Overview**

The DMA in Jazz Studies consists of the following areas of study: the basic DMA curriculum, course work in the major, an academic field and two elective fields.

**Degree Prerequisites**

DMA applicants must complete the appropriate master of music degree program or its equivalent.

**Admission**

Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

**Grade Point Average Requirements**

A minimum grade point average of 3.0 (A = 4.0) is required for all graduate course units in music. A grade of B or higher is required for all courses in the major field. For courses in
academic and elective fields, the minimum passing grade is C.

**Transfer Credit**
The Degree Progress Department in the Office of Academic Records and Registrar determines whether course work taken elsewhere is available for transfer credit. A maximum of 30 units of transfer credit may be applied toward a doctoral degree in music. Whether such credit is applicable toward a specific requirement in a major or minor field is determined by the Thornton School department in which the subject is taught, pending approval by the dean of the Thornton School. Transfer credit petitions must be filed with the Thornton doctoral adviser during the first semester in residence. Transfer work must have been completed within 10 years of admission to the DMA program to be applied toward that degree.

**Residence Requirement**
A minimum of two years of full-time study beyond the Master of Music degree is required for the Doctor of Musical Arts. At least one year of full-time study beyond the master's degree (6 units or more per semester) must be in residence at USC.

**Time Schedule**
The time limit for completing the Doctor of Musical Arts degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the doctoral program, the time limit for completing the Doctor of Musical Arts degree is six years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

**Music Graduate Entrance Exams**
All students entering a graduate-level degree program (MA, MM, DMA and PhD) at USC Thornton, who have not previously completed a degree at USC Thornton, must take a series of entrance exams in core music subjects. These exams are called Music Graduate Entrance Exams (MGEEs). Information regarding which exams are required for specific majors is available from the Thornton Student Affairs office. Also see the Thornton School of Music Admission to Graduate Standing section of this catalogue for specific policies relating to these exams.

**Foreign Language**
An academic reading knowledge of French, German, Italian or Spanish is required of all students, either by taking a course approved by the Thornton School or by written examination approved by the Thornton School. Departments within the Thornton School may require additional language skills. All language requirements must be fulfilled one semester before entering the third semester in the program. Students with an academic reading knowledge of a language other than English, French, German, Italian or Spanish, may make a written request to the Thornton doctoral adviser to meet this requirement with a different language. In these cases, students must propose and gain the permission of a member of the USC faculty who will agree to create and grade the examination that would ultimately determine fulfillment of the requirement.

**Course Requirements**
Each student is required to complete four areas of concentration: the major field, an academic field and two elective fields. Required courses for each major curriculum are listed in the description of major programs below. Required courses for any academic or elective field are determined for their respective fields by the faculty advisers on a student's DMA guidance committee. A minimum of 65 graduate units beyond the bachelor's degree are required to complete a DMA degree. Fifty-five or more units must be in music, 12 of these beyond the master's level must be in the major. At least 40 of these must be at the 500 level or higher. All course work earned under these requirements for a doctoral degree is considered to be obsolete after 10 years from the date of completion of such work and may not be used to fulfill degree requirements.

**Academic and Elective Fields**
For the academic field students must choose one from Musicology, Theory and Analysis, Music Teaching and Learning, Choral Music or Sacred Music. For the elective fields students will choose two fields from among 50 possible areas, including Composition, Performance, Early Music, Jazz Studies, Music Teaching and Learning, Choral Music, Sacred Music, Conducting, Pedagogy, Electroacoustic Media, Music Industry, as well as areas outside of music. The fields comprise courses that are determined by the department in which they are administered. Eight to 10 units are taken in the academic field. Six to 8 units are taken in each elective field. The academic field may not duplicate a major or an elective field. No more than two of the four fields of concentration may be under the guidance of the same department within the Thornton School of Music, and at least one of the elective fields must culminate in a substantial written paper or examination. Students must apply to their chosen fields. Admission to academic and elective fields is determined by the appropriate department, prior to the Graduate Committee Interview. Individualized programs of study will be created in each field in consultation with a faculty adviser in each area.

**Graduate Committee Interview**
Before the completion of 16 units beyond the master's degree and before permission to present the second doctoral recital is requested, doctoral students must meet with the Graduate Advisory Committee of the Thornton School of Music to discuss their progress in the program and their goals for the future. In preparation for this interview, students must prepare a dossier according to specific instructions available from the Thornton doctoral adviser. The committee determines the student's continuation in the program, and approves both the student's individualized curriculum (including all fields of concentration) and the members of his or her DMA guidance committee.

**DMA Guidance Committee**
The DMA guidance committee is composed of at least five members: two faculty members from the major department, one of whom will serve as chair, and a faculty member from each of the three other areas of concentration. At least three members of a committee must be full-time faculty of rank in the Thornton School. The composition of the DMA Guidance Committee is proposed and approved as part of the Graduate Committee Interview.
The guidance committee administers the written and oral parts of the comprehensive examination. The committee continues to serve until the comprehensive examination has been passed, the dissertation topic approved (if applicable) and the student is admitted to candidacy (if applicable). For students in curricula that require recitals, the two major field advisers serve as the recital committee and are responsible for determining the approved format, content, scheduling, and presentation of these performances for credit toward the requirements of the degree.

Comprehensive Examination
The comprehensive examination for the DMA is administered by the student's guidance committee. This examination consists of written and oral components and is designed to assess the student's mastery of his or her fields of concentration and readiness for professional independence as a performer, composer, teacher, researcher and/or scholar. The student must obtain permission from the guidance committee to take the comprehensive examination and schedule it at least two months in advance to ensure the committee's availability. The examination must be taken after completion of all required course work for all fields of concentration, except (in some cases) a limited number of the required units of Individual Instruction in the major field. In degree programs that require the presentation of four major recitals, at least two major recitals must be presented prior to the administration of the comprehensive examination. Up to two required recitals may be presented after the comprehensive examination. The dissertation (if required) must be written after the comprehensive examination. Comprehensive examinations will not be scheduled during summer sessions except under extraordinary circumstances and only with the written approval of members of the guidance committee. All portions of the examination must be completed within one month.

The comprehensive examination is comprised of a substantial culminating work for each field of concentration, as well as an oral examination with the student's guidance committee. The culminating work for each field may be a written examination, paper, project or recital, as appropriate for the particular field. For the academic field and at least one elective field, this culminating requirement must be a substantial written examination or paper. Following the successful completion of all culminating requirements and the approval of each by the corresponding faculty adviser, the student will sit for a two-hour oral examination with the guidance committee. This oral examination covers in greater depth the topics discussed in the written examinations and other requirements for the fields of concentration. The oral examination may also cover new material as determined by the guidance committee.

The two major field advisers and the academic field adviser must be present at the oral examination and render a judgment on the acceptability of the comprehensive examinations as a whole. It is highly preferable that the faculty advisers for the two elective fields participate in the oral examination with the other members of the guidance committee. If, however, there are challenges with scheduling or other issues that are reasonably unresolvable, the participation of the faculty advisers for elective fields is not required for the oral examination if they feel that the candidate has demonstrated knowledge and mastery of material that is appropriate for an elective field in their disciplines.

The examinations will be reported as passing if there is no more than one dissenting vote on the committee. A student must pass both the written and oral portions to pass the comprehensive examination. A pass on the examination cannot be made contingent upon any form of additional work.

If a student fails the comprehensive examination, the guidance committee may permit the student to repeat it once at a mutually satisfactory time within a period of not less than six months nor more than one year from the date of the first oral examination. A student may not take the comprehensive examination more than twice.

The comprehensive examination serves as the qualifying examination for programs that require a dissertation.

Curriculum Requirements for Jazz Studies Major

Basic DMA Curriculum (20 units) - Required for All DMA Candidates

MTAL 505 Teaching and Learning Music Units: 2
MUCD 441 Choral Conducting II Units: 2
MUCD 443 Instrumental Conducting II Units: 2
MUHO 501 Introduction to the Analysis of Tonal Music Units: 2
MUHO 502 Introduction to the Analysis of Post-Tonal Music Units: 2
MUHL 570 Research Materials and Techniques Units: 2
MUHL electives numbered 500 through 695: 6 units total
Ensemble Units: 2 units total

Note:
Courses with similar content taken for graduate credit at another accredited institution may be substituted, subject to departmental approval. Master's degree credit for ensemble taken at USC may fulfill this requirement, subject to departmental approval.

Lessons, Ensemble and Performance Classes (12 units)

MUEN 532 Jazz Chamber Music Units: 1
4 units total of MUEN 532
MUJZ 653 Performance Units: 1 or 2
8 units total of MUJZ 653

Program Intensive Courses (12 units)

MUJZ 443 Jazz Pedagogy Units: 2
MUJZ 545 Jazz Ensemble Development Units: 2, 2 years
MUJZ 547 Jazz Composition Units: 2
4 units total of MUJZ 547
MUJZ 688 Special Topics in Jazz Performance Units: 2
4 units total of MUJZ 688

Electives to Fulfill the Academic Field and Two Elective Fields (21 units)

Comprehensive Examinations (0 units)
Examinations that include the major area, one academic field and two elective fields.

**Recitals (0 units)**
- Two recitals of original compositions and arrangements written while in the DMA program
- Lecture-recital in conjunction with an appropriate research project

**Total units: 65**

**Music, Historical Musicology Emphasis, (PhD)**
- The Doctor of Philosophy degree with a major in music is granted by the Graduate School. Candidates for the PhD in music should also refer to the Graduate School section of this catalogue for general regulations. A substantial background in music and liberal arts is required. Graduate course requirements for the PhD are adapted to the needs and research interests of the individual student. A minimum of 60 post-baccalaureate units is required.

**Foreign Language Requirements**
- Students are required to demonstrate a reading knowledge by passing an examination in German and one other foreign language chosen by the student from among French, Italian or Latin. With the permission of the chair of the qualifying exam committee, a foreign language relevant to the dissertation may be chosen in place of French, Italian or Latin. The language requirement for the MA degree may be applied toward the PhD Doctoral language requirements should be passed as early as possible, but, at latest, during the fourth semester of course work.

**Screening Procedure**
- Before the completion of 24 units of graduate work at USC and with the approval of the department chair, students must be interviewed by the curriculum committee of the School of Music. Continuance in course work will be contingent upon approval of the committee. PhD candidates in musicology who did not receive an MA degree from USC must take the MA comprehensive examination in historical musicology prior to the interview. Continuance in course work will be contingent upon passing these examinations.

**Historical Musicology Emphasis Requirements**
- **MUHL 570 Research Materials and Techniques** Units: 2
- **Courses selected from:**
  - **MUHL 579 Studies in Music History** Units: 4
  - **MUHL 600–699**
- **Total units: 12**

**Electives in history, language, literature or arts other than music**
- **Total units: 8**
- **Courses drawn from:**
  - **MUHL 500–699**
  - **MUCO 501 Introduction to the Analysis of Tonal Music** Units: 2

**MUCO 502 Introduction to the Analysis of Post-Tonal Music** Units: 2

**Total units: 10**

**Electives in music, letters, arts and sciences**
- **Total units: 24**

**Dissertation**
- **MUHL 794a Doctoral Dissertation** Units: 2
- **MUHL 794b Doctoral Dissertation** Units: 2
- **Total units: 4**

**Performance - Organ, Percussion, Strings, Vocal Arts, or Winds (DMA)**
- **Overview**
  - The DMA in Performance - Organ, Percussion, Strings, Vocal Arts, or Winds consists of the following areas of study: the basic DMA curriculum, course work in the major, an academic field and two elective fields.

**Degree Prerequisites**
- DMA applicants must complete the appropriate master of music degree program or its equivalent.

**Admission**
- Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

**Grade Point Average Requirements**
- A minimum grade point average of 3.0 (A = 4.0) is required for all graduate course units in music. A grade of B or higher is required for all courses in the major field. For courses in academic and elective fields, the minimum passing grade is C.

**Transfer Credit**
- The Degree Progress Department in the Office of Academic Records and Registrar determines whether course work taken elsewhere is available for transfer credit. A maximum of 30 units of transfer credit may be applied toward a doctoral degree in music. Whether such credit is applicable toward a specific requirement in a major or minor field is determined by the Thornton School department in which the subject is taught, pending approval by the dean of the Thornton School. Transfer credit petitions must be filed with the Thornton doctoral adviser during the first semester in residence. Transfer work must have been completed within 10 years of admission to the DMA program to be applied toward that degree.

**Residence Requirement**
- A minimum of two years of full-time study beyond the Master of Music degree is required for the Doctor of Musical Arts. At least one year of full-time study beyond the master's degree (6 units or more per semester) must be in residence at USC.

**Time Schedule**
- The time limit for completing the Doctor of Musical Arts degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the doctoral program, the time limit for completing the Doctor of Musical Arts degree is six years. Progress is measured from the beginning of the first course at USC applied toward the
degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

Music Graduate Entrance Exams
All students entering a graduate-level degree program (MA, MM, DMA and PhD) at USC Thornton, who have not previously completed a degree at USC Thornton, must take a series of entrance exams in core music subjects. These exams are called Music Graduate Entrance Exams (MGEEs). Information regarding which exams are required for specific majors is available from the Thornton Student Affairs office. Also see the Thornton School of Music Admission to Graduate Standing section of this catalogue for specific policies relating to these exams.

Foreign Language
An academic reading knowledge of French, German, Italian or Spanish is required of all students, either by taking a course approved by the Thornton School or by written examination approved by the Thornton School. Departments within the Thornton School may require additional language skills. All language requirements must be fulfilled one semester before entering the third semester in the program. Students with an academic reading knowledge of a language other than English, French, German, Italian or Spanish, may make a written request to the Thornton doctoral adviser to meet this requirement with a different language. In these cases, students must propose and gain the permission of a member of the USC faculty who will agree to create and grade the examination that would ultimately determine fulfillment of the requirement.

Course Requirements
Each student is required to complete four areas of concentration: the major field, an academic field and two elective fields. Required courses for each major curriculum are listed in the description of major programs below. Required courses for any academic or elective field are determined for their respective fields by the faculty advisers on a student's DMA guidance committee.

A minimum of 65 graduate units beyond the bachelor's degree are required to complete a DMA degree. Fifty-five or more units must be in music, 12 of these beyond the master's level must be in the major. At least 40 of these must be at the 500 level or higher. All course work earned under these requirements for a doctoral degree is considered to be obsolete after 10 years from the date of completion of such work and may not be used to fulfill degree requirements.

Academic and Elective Fields
For the academic field students must choose one from Musicology, Theory and Analysis, Music Teaching and Learning, Choral Music or Sacred Music. For the elective fields students will choose two fields from among 50 possible areas, including Composition, Performance, Early Music, Jazz Studies, Music Teaching and Learning, Choral Music, Sacred Music, Conducting, Pedagogy, Electroacoustic Media, Music Industry, as well as areas outside of music. The fields comprise courses that are determined by the department in which they are administered. Eight to 10 units are taken in the academic field. Six to 8 units are taken in each elective field. The academic field may not duplicate a major or an elective field. No more than two of the four fields of concentration may be under the guidance of the same department within the Thornton School of Music, and at least one of the elective fields must culminate in a substantial written paper or examination. Students must apply to their chosen fields. Admission to academic and elective fields is determined by the appropriate department, prior to the Graduate Committee Interview. Individualized programs of study will be created in each field in consultation with a faculty advisor in each area.

Graduate Committee Interview
Before the completion of 16 units beyond the master's degree and before permission to present the second doctoral recital is requested, doctoral students must meet with the Graduate Advisory Committee of the Thornton School of Music to discuss their progress in the program and their goals for the future. In preparation for this interview, students must prepare a dossier according to specific instructions available from the Thornton doctoral adviser. The committee determines the student's continuation in the program, and approves both the student's individualized curriculum (including all fields of concentration) and the members of his or her DMA guidance committee.

DMA Guidance Committee
The DMA guidance committee is composed of at least five members: two faculty members from the major department, one of whom will serve as chair, and a faculty member from each of the three other areas of concentration. At least three members of a committee must be full-time faculty of rank in the Thornton School. The composition of the DMA Guidance Committee is proposed and approved as part of the Graduate Committee Interview. The guidance committee administers the written and oral parts of the comprehensive examination. The committee continues to serve until the comprehensive examination has been passed, the dissertation topic approved (if applicable) and the student is admitted to candidacy (if applicable). For students in curricula that require recitals, the two major field advisers serve as the recital committee and are responsible for determining the approved format, content, scheduling, and presentation of these performances for credit toward the requirements of the degree.

Comprehensive Examination
The comprehensive examination for the DMA is administered by the student's guidance committee. This examination consists of written and oral components and is designed to assess the student's mastery of his or her fields of concentration and readiness for professional independence as a performer, composer, teacher, researcher and/or scholar. The student must obtain permission from the guidance committee to take the comprehensive examination and schedule it at least two months in advance to ensure the committee's availability. The examination must be taken after completion of all required course work for all fields of concentration, except (in some cases) a limited number of the required units of Individual Instruction in the major field. In degree programs that require the presentation of four major recitals, at least two major recitals must be presented prior to the administration of the comprehensive examination. Up to two required recitals may be presented after the comprehensive examination. The dissertation (if required) must be written after the comprehensive examination. Comprehensive examinations will not be scheduled during
summer sessions except under extraordinary circumstances and only with the written approval of members of the guidance committee. All portions of the examination must be completed within one month.

The comprehensive examination is comprised of a substantial culminating work for each field of concentration, as well as an oral examination with the student's guidance committee. The culminating work for each field may be a written examination, paper, project or recital, as appropriate for the particular field. For the academic field and at least one elective field, this culminating requirement must be a substantial written examination or paper. Following the successful completion of all culminating requirements and the approval of each by the corresponding faculty adviser, the student will sit for a two-hour oral examination with the guidance committee. This oral examination covers in greater depth the topics discussed in the written examinations and other requirements for the fields of concentration. The oral examination may also cover new material as determined by the guidance committee.

The two major field advisers and the academic field adviser must be present at the oral examination and render a judgment on the acceptability of the comprehensive examinations as a whole. It is highly preferable that the faculty advisers for the two elective fields participate in the oral examination with the other members of the guidance committee. If, however, there are challenges with scheduling or other issues that are reasonably unresolvable, the participation of the faculty advisers for elective fields is not required for the oral examination if they feel that the candidate has demonstrated knowledge and mastery of material that is appropriate for an elective field in their disciplines.

The examinations will be reported as passing if there is no more than one dissenting vote on the committee. A student must pass both the written and oral portions to pass the comprehensive examination. A pass on the examination cannot be made contingent upon any form of additional work.

If a student fails the comprehensive examination, the guidance committee may permit the student to repeat it once at a mutually satisfactory time within a period of not less than six months nor more than one year from the date of the first oral examination. A student may not take the comprehensive examination more than twice.

The comprehensive examination serves as the qualifying examination for programs that require a dissertation.

**Curriculum Requirements for Performance Major - Organ, Percussion, Strings, Vocal Arts, or Winds**

It is the objective of the performance curriculum to combine high standards of performance with intellectual accomplishments appropriate to a university degree. Candidates electing this major must present at least four major public appearances: two solo recitals and two other appropriate appearances. The exact format, content and scheduling of the four appearances are the responsibility of the candidate's faculty advisers for the major field of study.

**Basic DMA Curriculum (20 units) - Required for All DMA Candidates**

- MTAL 505 Teaching and Learning Music Units: 2
- MUCD 441 Choral Conducting II Units: 2
- MUCD 443 Instrumental Conducting II Units: 2
- MUCO 501 Introduction to the Analysis of Tonal Music Units: 2
- MUCO 502 Introduction to the Analysis of Post-Tonal Music Units: 2
- MUHL 570 Research Materials and Techniques Units: 2
- MUHL electives numbered 500 through 695: 6 units total
- Ensemble Units: 2 units total

**Note:**

Courses with similar content taken for graduate credit at another accredited institution may be substituted, subject to departmental approval. Master's degree credit for ensemble taken at USC may fulfill this requirement, subject to departmental approval.

**Lessons (12 units)**

- Individual instruction 653 (take organ, percussion, strings, vocal arts or winds for a maximum of 12 units): 12 units total in your primary instrument

**Electives to Fulfill the Academic Field and Two Elective Fields (33 units)**

**Recitals (0 units)**

- Two solo recitals and two other appropriate performances Units: 0

**Comprehensive Examinations (0 units)**

Examinations which include the major area, one academic field, and two elective fields.

**Total units: 65**

 Majors in percussion, strings and winds must participate in a large ensemble each semester if enrolled in four or more units.

**Performance — Classical Guitar (DMA)**

**Overview**

The DMA in Classical Guitar consists of the following areas of study: the basic DMA curriculum, course work in the major, an academic field and two elective fields.

**Degree Prerequisites**

DMA applicants must complete the appropriate master of music degree program or its equivalent.

**Admission**

Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

**Grade Point Average Requirements**

A minimum grade point average of 3.0 (A = 4.0) is required for all graduate course units in music. A grade of B or higher
is required for all courses in the major field. For courses in academic and elective fields, the minimum passing grade is C.

Transfer Credit
The Degree Progress Department in the Office of Academic Records and Registrar determines whether course work taken elsewhere is available for transfer credit. A maximum of 30 units of transfer credit may be applied toward a doctoral degree in music. Whether such credit is applicable toward a specific requirement in a major or minor field is determined by the Thornton School department in which the subject is taught, pending approval by the dean of the Thornton School. Transfer credit petitions must be filed with the Thornton doctoral adviser during the first semester in residence. Transfer work must have been completed within 10 years of admission to the DMA program to be applied toward that degree.

Residence Requirement
A minimum of two years of full-time study beyond the Master of Music degree is required for the Doctor of Musical Arts. At least one year of full-time study beyond the master's degree (6 units or more per semester) must be in residence at USC.

Time Schedule
The time limit for completing the Doctor of Musical Arts degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the doctoral program, the time limit for completing the Doctor of Musical Arts degree is six years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

Music Graduate Entrance Exams
All students entering a graduate-level degree program (MA, MM, DMA and PhD) at USC Thornton, who have not previously completed a degree at USC Thornton, must take a series of entrance exams in core music subjects. These exams are called Music Graduate Entrance Exams (MGEEs). Information regarding which exams are required for specific majors is available from the Thornton Student Affairs office. Also see the Thornton School of Music Admission to Graduate Standing section of this catalogue for specific policies relating to these exams.

Foreign Language
An academic reading knowledge of French, German, Italian or Spanish is required of all students, either by taking a course approved by the Thornton School or by written examination approved by the Thornton School. Departments within the Thornton School may require additional language skills. All language requirements must be fulfilled one semester before entering the third semester in the program. Students with an academic reading knowledge of a language other than English, French, German, Italian or Spanish, may make a written request to the Thornton doctoral adviser to meet this requirement with a different language. In these cases, students must propose and gain the permission of a member of the USC faculty who will agree to create and grade the examination that would ultimately determine fulfillment of the requirement.

Course Requirements
Each student is required to complete four areas of concentration: the major field, an academic field and two elective fields. Required courses for each major curriculum are listed in the description of major programs below. Required courses for any academic or elective field are determined for their respective fields by the faculty advisers on a student's DMA guidance committee. A minimum of 65 graduate units beyond the bachelor's degree are required to complete a DMA degree. Fifty-five or more units must be in music. If any of these beyond the master's level must be in the major. At least 40 of these must be at the 500 level or higher. All course work earned under these requirements for a doctoral degree is considered to be obsolete after 10 years from the date of completion of such work and may not be used to fulfill degree requirements.

Academic and Elective Fields
For the academic field students must choose one from Musicology, Theory and Analysis, Music Teaching and Learning, Choral Music or Sacred Music. For the elective fields students will choose two fields from among 50 possible areas, including Composition, Performance, Early Music, Jazz Studies, Music Teaching and Learning, Choral Music, Sacred Music, Conducting, Pedagogy, Electroacoustic Media, Music Industry, as well as areas outside of music. The fields comprise courses that are determined by the department in which they are administered. Eight to 10 units are taken in the academic field. Six to 8 units are taken in each elective field. The academic field may not duplicate a major or an elective field. No more than two of the four fields of concentration may be under the guidance of the same department within the Thornton School of Music, and at least one of the elective fields must culminate in a substantial written paper or examination. Students must apply to their chosen fields. Admission to academic and elective fields is determined by the appropriate department, prior to the Graduate Committee Interview. Individualized programs of study will be created in each field in consultation with a faculty advisor in each area.

Graduate Committee Interview
Before the completion of 16 units beyond the master's degree and before permission to present the second doctoral recital is requested, doctoral students must meet with the Graduate Advisory Committee of the Thornton School of Music to discuss their progress in the program and their goals for the future. In preparation for this interview, students must prepare a dossier according to specific instructions available from the Thornton doctoral adviser. The committee determines the student's continuation in the program, and approves both the student's individualized curriculum (including all fields of concentration) and the members of his or her DMA guidance committee.

DMA Guidance Committee
The DMA guidance committee is composed of at least five members: two faculty members from the major department, one of whom will serve as chair, and a faculty member from each of the three other areas of concentration. At least three members of a committee must be full-time faculty of rank in the Thornton School. The composition of the DMA Guidance Committee is proposed and approved as part of the Graduate Committee Interview.
The guidance committee administers the written and oral parts of the comprehensive examination. The committee continues to serve until the comprehensive examination has been passed, the dissertation topic approved (if applicable) and the student is admitted to candidacy (if applicable). For students in curricula that require recitals, the two major field advisers serve as the recital committee and are responsible for determining the approved format, content, scheduling, and presentation of these performances for credit toward the requirements of the degree.

**Comprehensive Examination**

The comprehensive examination for the DMA is administered by the student’s guidance committee. This examination consists of written and oral components and is designed to assess the student’s mastery of his or her fields of concentration and readiness for professional independence as a performer, composer, teacher, researcher and/or scholar. The student must obtain permission from the guidance committee to take the comprehensive examination and schedule it at least two months in advance to ensure the committee’s availability. The examination must be taken after completion of all required course work for all fields of concentration, except (in some cases) a limited number of the required units of Individual Instruction in the major field. In degree programs that require the presentation of four major recitals, at least two major recitals must be presented prior to the administration of the comprehensive examination. Up to two required recitals may be presented after the comprehensive examination. The dissertation (if required) must be written after the comprehensive examination.

Comprehensive examinations will not be scheduled during summer sessions except under extraordinary circumstances and only with the written approval of members of the guidance committee. All portions of the examination must be completed within one month. The comprehensive examination is comprised of a substantial culminating work for each field of concentration, as well as an oral examination with the student’s guidance committee. The culminating work for each field may be a written examination, paper, project or recital, as appropriate for the particular field. For the academic field and at least one elective field, this culminating requirement must be a substantial written examination or paper. Following the successful completion of all culminating requirements and the approval of each by the corresponding faculty adviser, the student will sit for a two-hour oral examination with the guidance committee. This oral examination covers in greater depth the topics discussed in the written examinations and other requirements for the fields of concentration. The oral examination may also cover new material as determined by the guidance committee.

The two major field advisers and the academic field adviser must be present at the oral examination and render a judgment on the acceptability of the comprehensive examinations as a whole. It is highly preferable that the faculty advisers for the two elective fields participate in the oral examination with the other members of the guidance committee. If, however, there are challenges with scheduling or other issues that are reasonably unresolvable, the participation of the faculty advisers for elective fields is not required for the oral examination if they feel that the candidate has demonstrated knowledge and mastery of material that is appropriate for an elective field in their disciplines.

The examinations will be reported as passing if there is no more than one dissenting vote on the committee. A student must pass both the written and oral portions to pass the comprehensive examination. A pass on the examination cannot be made contingent upon any form of additional work.

If a student fails the comprehensive examination, the guidance committee may permit the student to repeat it once at a mutually satisfactory time within a period of not less than six months nor more than one year from the date of the first oral examination. A student may not take the comprehensive examination more than twice.

The comprehensive examination serves as the qualifying examination for programs that require a dissertation.

Performance — Early Music (DMA)

Overview
The DMA in Early Music consists of the following areas of study: the basic DMA curriculum, course work in the major, an academic field and two elective fields.

Degree Prerequisites
DMA applicants must complete the appropriate master of music degree program or its equivalent.

Admission
Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

Graduate Record Examinations
Scores from the General Test of the Graduate Record Examinations (GRE) are required for application and admission to the DMA in Early Music. Detailed requirements are available at the Thornton Website, music.usc.edu. Test scores on the GRE that are more than five years old at the time of application are not accepted.

Grade Point Average Requirements
A minimum grade point average of 3.0 (A = 4.0) is required for all graduate course units in music. A grade of B or higher is required for all courses in the major field. For courses in academic and elective fields, the minimum passing grade is C.

Transfer Credit
The Degree Progress Department in the Office of Academic Records and Registrar determines whether course work taken elsewhere is available for transfer credit. A maximum of 30 units of transfer credit may be applied toward a doctoral degree in music. Whether such credit is applicable toward a specific requirement in a major or minor field is determined by the Thornton School department in which the subject is taught, pending approval by the dean of the Thornton School. Transfer credit petitions must be filed with the Thornton doctoral adviser during the first semester in residence. Transfer work must have been completed within 10 years of admission to the DMA program to be applied toward that degree.

Residence Requirement
A minimum of two years of full-time study beyond the Master of Music degree is required for the Doctor of Musical Arts. At least one year of full-time study beyond the master's degree (6 units or more per semester) must be in residence at USC.

Time Schedule
The time limit for completing the Doctor of Musical Arts degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the doctoral program, the time limit for completing the Doctor of Musical Arts degree is six years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

Music Graduate Entrance Exams
All students entering a graduate-level degree program (MA, MM, DMA and PhD) at USC Thornton, who have not previously completed a degree at USC Thornton, must take a series of entrance exams in core music subjects. These exams are called Music Graduate Entrance Exams (MGEEs). Information regarding which exams are required for specific majors is available from the Thornton Student Affairs office. Also see the Thornton School of Music Admission to Graduate Standing section of this catalogue for specific policies relating to these exams.

Foreign Language
An academic reading knowledge of French, German, Italian or Spanish is required of all students, either by taking a course approved by the Thornton School or by written examination approved by the Thornton School. Departments within the Thornton School may require additional language skills. All language requirements must be fulfilled one semester before entering the third semester in the program. Students with an academic reading knowledge of a language other than English, French, German, Italian or Spanish, may make a written request to the Thornton doctoral adviser to meet this requirement with a different language. In these cases, students must propose and gain the permission of a member of the USC faculty who will agree to create and grade the examination that would ultimately determine fulfillment of the requirement.

Course Requirements
Each student is required to complete four areas of concentration: the major field, an academic field and two elective fields. Required courses for each major curriculum are listed in the description of major programs below. Required courses for any academic or elective field are determined for their respective fields by the faculty advisers on a student's DMA guidance committee. A minimum of 65 graduate units beyond the bachelor's degree are required to complete a DMA degree. Fifty-five or more units must be in music, 12 of these beyond the master's level must be in the major. At least 40 of these must be at the 500 level or higher. All course work earned under these requirements for a doctoral degree is considered to be obsolete after 10 years from the date of completion of such work and may not be used to fulfill degree requirements.

Academic and Elective Fields
For the academic field students must choose one from Musicology, Theory and Analysis, Music Teaching and Learning, Choral Music or Sacred Music. For the elective fields students will choose two fields from among 50 possible areas, including Composition, Performance, Early Music, Jazz Studies, Music Teaching and Learning, Choral Music, Sacred Music, Conducting, Pedagogy, Electroacoustic Media, Music Industry, as well as areas outside of music. The fields comprise courses that are determined by the department in which they are administered. Eight to 10 units are taken in the academic field. Six to 8 units are taken in each elective field. The academic field may not duplicate a major or an elective field. No more than two of the four fields of concentration may be under the guidance of the same department within the Thornton School of Music, and at least one of the elective fields must culminate in a substantial written paper or examination. Students must apply to their chosen fields. Admission to academic and elective fields is determined by the appropriate department, prior to the
Graduate Committee Interview. Individualized programs of study will be created in each field in consultation with a faculty advisor in each area.

Graduate Committee Interview
Before the completion of 16 units beyond the master's degree and before permission to present the second doctoral recital is requested, doctoral students must meet with the Graduate Advisory Committee of the Thornton School of Music to discuss their progress in the program and their goals for the future. In preparation for this interview, students must prepare a dossier according to specific instructions available from the Thornton doctoral adviser. The committee determines the student's continuation in the program, and approves both the student's individualized curriculum (including all fields of concentration) and the members of his or her DMA guidance committee.

DMA Guidance Committee
The DMA guidance committee is composed of at least five members: two faculty members from the major department, one of whom will serve as chair, and a faculty member from each of the three other areas of concentration. At least three members of a committee must be full-time faculty of rank in the Thornton School. The composition of the DMA Guidance Committee is proposed and approved as part of the Graduate Committee Interview.

The guidance committee administers the written and oral parts of the comprehensive examination. The committee continues to serve until the comprehensive examination has been passed, the dissertation topic approved (if applicable) and the student is admitted to candidacy (if applicable). For students in curricula that require recitals, the two major field advisers serve as the recital committee and are responsible for determining the approved format, content, scheduling, and presentation of these performances for credit toward the requirements of the degree.

Comprehensive Examination
The comprehensive examination for the DMA is administered by the student's guidance committee. This examination consists of written and oral components and is designed to assess the student's mastery of his or her fields of concentration and readiness for professional independence as a performer, composer, teacher, researcher and/or scholar. The student must obtain permission from the guidance committee to take the comprehensive examination and schedule it at least two months in advance to ensure the committee's availability. The examination must be taken after completion of all required course work for all fields of concentration, except (in some cases) a limited number of the required units of Individual Instruction in the major field. In degree programs that require the presentation of four major recitals, at least two major recitals must be presented prior to the administration of the comprehensive examination. Up to two required recitals may be presented after the comprehensive examination. The dissertation (if required) must be written after the comprehensive examination. Comprehensive examinations will not be scheduled during summer sessions except under extraordinary circumstances and only with the written approval of members of the guidance committee. All portions of the examination must be completed within one month.

The comprehensive examination is comprised of a substantial culminative work for each field of concentration, as well as an oral examination with the student's guidance committee. The culminative work for each field may be a written examination, paper, project or recital, as appropriate for the particular field. For the academic field and at least one elective field, this culminative requirement must be a substantial written examination or paper. Following the successful completion of all culminative requirements and the approval of each by the corresponding faculty adviser, the student will sit for a two-hour oral examination with the guidance committee. This oral examination covers in greater depth the topics discussed in the written examinations and other requirements for the fields of concentration. The oral examination may also cover new material as determined by the guidance committee.

The two major field advisers and the academic field adviser must be present at the oral examination and render a judgment on the acceptability of the comprehensive examinations as a whole. It is highly preferable that the faculty advisers for the two elective fields participate in the oral examination with the other members of the guidance committee. If, however, there are challenges with scheduling or other issues that are reasonably unsolvable, the participation of the faculty advisers for elective fields is not required for the oral examination if they feel that the candidate has demonstrated knowledge and mastery of material that is appropriate for an elective field in their disciplines.

The examinations will be reported as passing if there is no more than one dissenting vote on the committee. A student must pass both the written and oral portions to pass the comprehensive examination. A pass on the examination cannot be made contingent upon any form of additional work.

If a student fails the comprehensive examination, the guidance committee may permit the student to repeat it once at a mutually satisfactory time within a period of not less than six months nor more than one year from the date of the first oral examination. A student may not take the comprehensive examination more than twice.

The comprehensive examination serves as the qualifying examination for programs that require a dissertation.

This oral examination covers in greater depth the topics discussed in the written examinations and other requirements for the fields of concentration. The oral examination may also cover new material as determined by the guidance committee. The two major field advisors and the academic field advisor must be present at the oral examination and render a judgment on the acceptability of the comprehensive examinations as a whole. It is highly preferable that the faculty advisors for the two elective fields participate in the oral examination with the other members of the guidance committee. If, however, there are challenges with scheduling or other issues that are reasonably unsolvable, the participation of the faculty advisors for elective fields is not required for the oral examination if they feel that the candidate has demonstrated knowledge and mastery of material that is appropriate for an elective field in their disciplines.

The examinations will be reported as passing if there is no more than one dissenting vote on the committee. A student must pass both the written and oral portions to pass the
comprehensive examination. A pass on the examination cannot be made contingent upon any form of additional work. If a student fails the comprehensive examination, the guidance committee may permit the student to repeat it once at a mutually satisfactory time within a period of not less than six months nor more than one year from the date of the first oral examination. A student may not take the comprehensive examination more than twice. The comprehensive examination serves as the qualifying examination for programs that require a dissertation.

Curriculum Requirements for Performance Major — Keyboard Collaborative Arts

Basic DMA Curriculum (20 units) - Required for All DMA Candidates
- MTAL 505 Teaching and Learning Music Units: 2
- MUCD 441 Choral Conducting II Units: 2
- MUCD 443 Instrumental Conducting II Units: 2
- MUCO 501 Introduction to the Analysis of Tonal Music Units: 2
- MUCO 502 Introduction to the Analysis of Post-Tonal Music Units: 2
- MUHL 570 Research Materials and Techniques Units: 2
- MUHL electives numbered 500 through 695: 6 units total
- Ensemble Units: 2 units total

Note: Courses with similar content taken for graduate credit at another accredited institution may be substituted, subject to departmental approval. Master's degree credit for ensemble taken at USC may fulfill this requirement, subject to departmental approval.

Lessons (12 units)
- MPKS 653 Performance Units: 1 or 2
- 12 units total of MPKS 653

Program Intensive Courses (6 units)
- MPKS 481 Interpretation of Baroque Music Units: 2
- MPKS 560 Song Interpretation Master Class Units: 2
- MPKS 561 Chamber Music Interpretation Master Class Units: 2

Electives to Fulfill the Academic Field and Two Elective Fields (27 units)

Comprehensive Examinations (0 units) Examinations, which include the major area, one academic field and two elective fields.

Recitals (0 units)
Four doctoral level recitals; one with voice(s), one with instrument(s), one lecture recital, and other recital as approved Units: 0

Total units: 65
The exact format, content and scheduling of the four graduate recitals are the responsibility of the candidate's major professor.

Performance — Piano (DMA)

Overview
The DMA in Piano consists of the following areas of study: the basic DMA curriculum, course work in the major, an academic field and two elective fields.

Degree Prerequisites
DMA applicants must complete the appropriate master of music degree program or its equivalent.

Admission
Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

Grade Point Average Requirements
A minimum grade point average of 3.0 (A = 4.0) is required for all graduate course units in music. A grade of B or higher is required for all courses in the major field. For courses in academic and elective fields, the minimum passing grade is C.

Transfer Credit
The Degree Progress Department in the Office of Academic Records and Registrar determines whether course work taken elsewhere is available for transfer credit. A maximum of 30 units of transfer credit may be applied toward a doctoral degree in music. Whether such credit is applicable toward a specific requirement in a major or minor field is determined by the Thornton School department in which the subject is taught, pending approval by the dean of the Thornton School. Transfer credit petitions must be filed with the Thornton doctoral adviser during the first semester in residence. Transfer work must have been completed within 10 years of admission to the DMA program to be applied toward that degree.

Residence Requirement
A minimum of two years of full-time study beyond the Master of Music degree is required for the Doctor of Musical Arts. At least one year of full-time study beyond the master's degree (6 units or more per semester) must be in residence at USC.

Time Schedule
The time limit for completing the Doctor of Musical Arts degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the doctoral program, the time limit for completing the Doctor of Musical Arts degree is six years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

Music Graduate Entrance Exams
All students entering a graduate-level degree program (MA, MM, DMA and PhD) at USC Thornton, who have not previously completed a degree at USC Thornton, must take a series of entrance exams in core music subjects. These exams are called Music Graduate Entrance Exams (MGEEs). Information regarding which exams are required for specific majors is available from the Thornton Student Affairs office. Also see the Thornton School of Music Admission to Graduate Standing section of this catalogue for specific policies relating to these exams.
Advisory Committee of the Thornton School of Music to requested, doctoral students must meet with the Graduate Committee Interview faculty adviser in each area. study will be created in each field in consultation with a determined by the appropriate department, prior to the chosen fields. Admission to academic one of the elective fields must culminate in a substantial department within the Thornton School of Music, and at least major or an elective field. No more than two of the four fields are taken in the academic field. Six to 8 units are taken in the depa fields comprise courses that are determined by the Media, Music Industry, as well as areas outside of music. The Sacred Music, Conducting, Pedagogy, Electroacoustic Jazz Studies, Music Teaching and Learning, Choral Music, areas, including Compositi. fields students will choose two fields from among 50 possible Musicology, Theory and Analysis, Music Teaching and Learning, Choral Music or Sacred Music. For the elective Music Teaching and Learning, Choral Music, Pedagogy, Electroacoustic Media, Music Industry, as well as areas outside of music. The fields comprise courses that are determined by the department in which they are administered. Eight to 10 units are taken in the academic field. Six to 8 units are taken in each elective field. The academic field may not duplicate a major or an elective field. No more than two of the four fields of concentration may be under the guidance of the same department within the Thornton School of Music, and at least one of the elective fields must culminate in a substantial written paper or examination. Students must apply to their chosen fields. Admission to academic and elective fields is determined by the appropriate department, prior to the Graduate Committee Interview. Individualized programs of study will be created in each field in consultation with a faculty adviser in each area. 

Graduate Committee Interview
Before the completion of 16 units beyond the master's degree and before permission to present the second doctoral recital is requested, doctoral students must meet with the Graduate Advisory Committee of the Thornton School of Music to discuss their progress in the program and their goals for the future. In preparation for this interview, students must prepare a dossier according to specific instructions available from the Thornton doctoral adviser. The committee determines the student's continuation in the program, and approves both the student's individualized curriculum (including all fields of concentration) and the members of his or her DMA guidance committee. 

DMA Guidance Committee
The DMA guidance committee is composed of at least five members: two faculty members from the major department, one of whom will serve as chair, and a faculty member from each of the three other areas of concentration. At least three members of a committee must be full-time faculty of rank in the Thornton School. The composition of the DMA Guidance Committee is proposed and approved as part of the Graduate Committee Interview. The guidance committee administers the written and oral parts of the comprehensive examination. The committee continues to serve until the comprehensive examination has been passed, the dissertation topic approved (if applicable) and the student is admitted to candidacy (if applicable). For students in curricula that require recitals, the two major field advisers serve as the recital committee and are responsible for determining the approved format, content, scheduling, and presentation of these performances for credit toward the requirements of the degree. 

Comprehensive Examination
The comprehensive examination for the DMA is administered by the student's guidance committee. This examination consists of written and oral components and is designed to assess the student's mastery of his or her fields of concentration and readiness for professional independence as a performer, composer, teacher, researcher and/or scholar. The student must obtain permission from the guidance committee to take the comprehensive examination and schedule it at least two months in advance to ensure the committee's availability. The examination must be taken after completion of all required course work for all fields of concentration, except (in some cases) a limited number of the required units of Individual Instruction in the major field. In degree programs that require the presentation of four major recitals, at least two major recitals must be presented prior to the administration of the comprehensive examination. Up to two required recitals may be presented after the comprehensive examination. The dissertation (if required) must be written after the comprehensive examination. Comprehensive examinations will not be scheduled during summer sessions except under extraordinary circumstances and only with the written approval of members of the guidance committee. All portions of the examination must be completed within one month. The comprehensive examination is comprised of a substantial culminating work for each field of concentration, as well as an oral examination with the student's guidance committee. The culminating work for each field may be a written examination, paper, project or recital, as appropriate for the particular field. For the academic field and at least one elective field, this culminating requirement must be a substantial written examination or paper. Following the successful completion of all culminating requirements and
Lessons (12 units)

Performance — Studio Guitar (DMA)

Overview

The DMA in Studio Guitar consists of the following areas of study: the basic DMA curriculum, course work in the major, an academic field and two elective fields.

Degree Prerequisites

DMA applicants must complete the appropriate master of music degree program or its equivalent.

Admission

Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

Grade Point Average Requirements

A minimum grade point average of 3.0 (A = 4.0) is required for all graduate course units in music. A grade of B or higher is required for all courses in the major field. For courses in academic and elective fields, the minimum passing grade is C.

Transfer Credit

The Degree Progress Department in the Office of Academic Records and Registrar determines whether course work taken elsewhere is available for transfer credit. A maximum of 30 units of transfer credit may be applied toward a doctoral degree in music. Whether such credit is applicable toward a specific requirement in a major or minor field is determined by the Thornton School department in which the subject is taught, pending approval by the dean of the Thornton School. Transfer credit petitions must be filed with the Thornton doctoral adviser during the first semester in residence. Transfer work must have been completed within 10 years of admission to the DMA program to be applied toward that degree.

Residence Requirement

A minimum of two years of full-time study beyond the Master of Music degree is required for the Doctor of Musical Arts. At least one year of full-time study beyond the master's degree (6 units or more per semester) must be in residence at USC.

Time Schedule

The time limit for completing the Doctor of Musical Arts degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the
doctoral program, the time limit for completing the Doctor of Musical Arts degree is six years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

Music Graduate Entrance Exams
All students entering a graduate-level degree program (MA, MM, DMA and PhD) at USC Thornton, who have not previously completed a degree at USC Thornton, must take a series of entrance exams in core music subjects. These exams are called Music Graduate Entrance Exams (MGEEs). Information regarding which exams are required for specific majors is available from the Thornton Student Affairs office. Also see the Thornton School of Music Admission to Graduate Standing section of this catalogue for specific policies relating to these exams.

Foreign Language
An academic reading knowledge of French, German, Italian or Spanish is required of all students, either by taking a course approved by the Thornton School or by written examination approved by the Thornton School. Departments within the Thornton School may require additional language skills. All language requirements must be fulfilled one semester before entering the third semester in the program. Students with an academic reading knowledge of a language other than English, French, German, Italian or Spanish, may make a written request to the Thornton doctoral adviser to meet this requirement with a different language. In these cases, students must propose and gain the permission of a member of the USC faculty who will agree to create and grade the examination that would ultimately determine fulfillment of the requirement.

Course Requirements
Each student is required to complete four areas of concentration: the major field, an academic field and two elective fields. Required courses for each major curriculum are listed in the description of major programs below. Required courses for any academic or elective field are determined for their respective fields by the faculty advisers on a student's DMA guidance committee.

A minimum of 65 graduate units beyond the bachelor's degree are required to complete a DMA degree. Fifty-five or more units must be in music, 12 of these beyond the master's level must be in the major. At least 40 of these must be at the 500 level or higher. All course work earned under these requirements for a doctoral degree is considered to be obsolete after 10 years from the date of completion of such work and may not be used to fulfill degree requirements.

Academic and Elective Fields
For the academic field students must choose one from Musicology, Theory and Analysis, Music Teaching and Learning, Choral Music or Sacred Music. For the elective fields students will choose two fields from among 50 possible areas, including Composition, Performance, Early Music, Jazz Studies, Music Teaching and Learning, Choral Music, Sacred Music, Conducting, Pedagogy, Electroacoustic Media, Music Industry, as well as areas outside of music. The fields comprise courses that are determined by the department in which they are administered. Eight to 10 units are taken in the academic field. Six to 8 units are taken in each elective field. The academic field may not duplicate a major or an elective field. No more than two of the four fields of concentration may be under the guidance of the same department within the Thornton School of Music, and at least one of the elective fields must culminate in a substantial written paper or examination. Students must apply to their chosen fields. Admission to academic and elective fields is determined by the appropriate department, prior to the Graduate Committee Interview. Individualized programs of study will be created in each field in consultation with a faculty adviser in each area.

Graduate Committee Interview
Before the completion of 16 units beyond the master's degree and before permission to present the second doctoral recital is requested, doctoral students must meet with the Graduate Advisory Committee of the Thornton School of Music to discuss their progress in the program and their goals for the future. In preparation for this interview, students must prepare a dossier according to specific instructions available from the Thornton doctoral adviser. The committee determines the student's continuation in the program, and approves both the student's individualized curriculum (including all fields of concentration) and the members of his or her DMA guidance committee.

DMA Guidance Committee
The DMA guidance committee is composed of at least five members: two faculty members from the major department, one of whom will serve as chair, and a faculty member from each of the three other areas of concentration. At least three members of a committee must be full-time faculty of rank in the Thornton School. The composition of the DMA Guidance Committee is proposed and approved as part of the Graduate Committee Interview. The guidance committee administers the written and oral parts of the comprehensive examination. The committee continues to serve until the comprehensive examination has been passed, the dissertation topic approved (if applicable) and the student is admitted to candidacy (if applicable). For students in curricula that require recitals, the two major field advisers serve as the recital committee and are responsible for determining the approved format, content, scheduling and presentation of these performances for credit toward the requirements of the degree.

Comprehensive Examination
The comprehensive examination for the DMA is administered by the student's guidance committee. This examination consists of written and oral components and is designed to assess the student's mastery of his or her fields of concentration and readiness for professional independence as a performer, composer, teacher, researcher and/or scholar. The student must obtain permission from the guidance committee to take the comprehensive examination and schedule it at least two months in advance to ensure the committee's availability. The examination must be taken after completion of all required course work for all fields of concentration, except (in some cases) a limited number of the required units of Individual Instruction in the major field. In degree programs that require the presentation of four major recitals, at least two major recitals must be presented prior to the administration of the comprehensive examination. Up to two required recitals may be presented after the
comprehensive examination. The dissertation (if required) must be written after the comprehensive examination. Comprehensive examinations will not be scheduled during summer sessions except under extraordinary circumstances and only with the written approval of members of the guidance committee. All portions of the examination must be completed within one month.

The comprehensive examination is comprised of a substantial culminating work for each field of concentration, as well as an oral examination with the student's guidance committee. The culminating work for each field may be a written examination, paper, project or recital, as appropriate for the particular field. For the academic field and at least one elective field, this culminating requirement must be a substantial written examination or paper. Following the successful completion of all culminating requirements and the approval of each by the corresponding faculty adviser, the student will sit for a two-hour oral examination with the guidance committee. This oral examination covers in greater depth the topics discussed in the written examinations and other requirements for the fields of concentration. The oral examination may also cover new material as determined by the guidance committee.

The two major field advisers and the academic field adviser must be present at the oral examination and render a judgment on the acceptability of the comprehensive examinations as a whole. It is highly preferable that the faculty advisers for the two elective fields participate in the oral examination with the other members of the guidance committee. If, however, there are challenges with scheduling or other issues that are reasonably unresolvable, the participation of the faculty advisers for elective fields is not required for the oral examination if they feel that the candidate has demonstrated knowledge and mastery of material that is appropriate for an elective field in their disciplines.

The examinations will be reported as passing if there is no more than one dissenting vote on the committee. A student must pass both the written and oral portions to pass the comprehensive examination. A pass on the oral examination cannot be made contingent upon any form of additional work.

If a student fails the comprehensive examination, the guidance committee may permit the student to repeat it once at a mutually satisfactory time within a period of not less than six months nor more than one year from the date of the first oral examination. A student may not take the comprehensive examination more than twice.

The comprehensive examination serves as the qualifying examination for programs that require a dissertation.

**Curriculum Requirements for Performance Major — Studio Guitar**

**Basic DMA Curriculum (20 units)**

- **MTAL 505 Teaching and Learning Music Units: 2**
- **MUCD 441 Choral Conducting II Units: 2**
- **MUCD 443 Instrumental Conducting II Units: 2**
- **MUOC 501 Introduction to the Analysis of Tonal Music Units: 2**

**Required for All DMA Candidates**

- **MUO 502 Introduction to the Analysis of Post-Tonal Music Units: 2**
- **MUHL 570 Research Materials and Techniques Units: 2**
- **MUHL electives numbered 500 through 695: 6 units total**

**Ensemble Units: 2 units total**

**Note:**
Courses with similar content taken for graduate credit at another accredited institution may be substituted, subject to departmental approval. Master's degree credit for ensemble taken at USC may fulfill this requirement, subject to departmental approval.

**Lessons, Ensemble and Performance Classes (20 units)**

- **MPGU 558 Advanced Studio Guitar Performance Class Units: 1**
  4 units total of MPGU 558
- **MPGU 653 Performance Units: 1 or 2**
  12 units total of MPGU 653
- **MUEN 526 Guitar Ensemble Units: 1**
  4 units total of MUEN 526

**Electives to Fulfill the Academic Field and Two Elective Fields (25 units)**

- **Comprehensive Examinations (0 units)**
  - Examinations which include the major area, one academic field, and two elective fields.

- **Recitals (0 units)**
  - Four doctoral recitals, one of which must be a lecture recital in conjunction with an appropriate research project Units: 0

**Total units: 65**

**Sacred Music (DMA)**

**Overview**

The DMA in Sacred Music consists of the following areas of study: the basic DMA curriculum, course work in the major, an academic field and two elective fields.

**Degree Prerequisites**

DMA applicants must complete the appropriate master of music degree program or its equivalent.

**Admission**

Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

**Graduate Record Examinations**

Scores from the General Test of the Graduate Record Examinations (GRE) are required for application and admission to the DMA in Sacred Music. Detailed requirements are available at the Thornton Website, music.usc.edu. Test scores on the GRE that are more than five years old at the time of application are not accepted.

**Grade Point Average Requirements**

A minimum grade point average of 3.0 (A = 4.0) is required for all graduate course units in music. A grade of B or higher
is required for all courses in the major field. For courses in academic and elective fields, the minimum passing grade is C.  

Transfer Credit  
The Degree Progress Department in the Office of Academic Records and Registrar determines whether course work taken elsewhere is available for transfer credit. A maximum of 30 units of transfer credit may be applied toward a doctoral degree in music. Whether such credit is applicable toward a specific requirement in a major or minor field is determined by the Thornton School department in which the subject is taught, pending approval by the dean of the Thornton School. Transfer credit petitions must be filed with the Thornton doctoral adviser during the first semester in residence. Transfer work must have been completed within 10 years of admission to the DMA program to be applied toward that degree.  

Residence Requirement  
A minimum of two years of full-time study beyond the Master of Music degree is required for the Doctor of Musical Arts. At least one year of full-time study beyond the master's degree (6 units or more per semester) must be in residence at USC.  

Time Schedule  
The time limit for completing the Doctor of Musical Arts degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the doctoral program, the time limit for completing the Doctor of Musical Arts degree is six years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.  

Music Graduate Entrance Exams  
All students entering a graduate-level degree program (MA, MM, DMA and PhD) at USC Thornton, who have not previously completed a degree at USC Thornton, must take a series of entrance exams in core music subjects. These exams are called Music Graduate Entrance Exams (MGEEs). Information regarding which exams are required for specific majors is available from the Thornton Student Affairs office. Also see the Thornton School of Music Admission to Graduate Standing section of this catalogue for specific policies relating to these exams.  

Foreign Language  
An academic reading knowledge of French, German, Italian or Spanish is required of all students, either by taking a course approved by the Thornton School or by written examination approved by the Thornton School. Departments within the Thornton School may require additional language skills. All language requirements must be fulfilled one semester before entering the third semester in the program. Students with an academic reading knowledge of a language other than English, French, German, Italian or Spanish, may make a written request to the Thornton doctoral adviser to meet this requirement with a different language. In these cases, students must propose and gain the permission of a member of the USC faculty who will agree to create and grade the examination that would ultimately determine fulfillment of the requirement.  

Course Requirements  
Each student is required to complete four areas of concentration: the major field, an academic field and two elective fields. Required courses for each major curriculum are listed in the description of major programs below. Required courses for any academic or elective field are determined for their respective fields by the faculty advisers on a student's DMA guidance committee. A minimum of 65 graduate units beyond the bachelor's degree are required to complete a DMA degree. Fifty-five or more units must be in music, 12 of these beyond the master's level must be in the major. At least 40 of these must be at the 500 level or higher. All course work earned under these requirements for a doctoral degree is considered to be obsolete after 10 years from the date of completion of such work and may not be used to fulfill degree requirements.  

Academic and Elective Fields  
For the academic field students must choose one from Musicology, Theory and Analysis, Music Teaching and Learning, Choral Music or Sacred Music. For the elective fields students will choose two fields from among 50 possible areas, including Composition, Performance, Early Music, Jazz Studies, Music Teaching and Learning, Choral Music, Sacred Music, Conducting, Pedagogy, Electroacoustic Media, Music Industry, as well as areas outside of music. The fields comprise courses that are determined by the department in which they are administered. Eight to 10 units are taken in the academic field. Six to 8 units are taken in each elective field. The academic field may not duplicate a major or an elective field. No more than two of the four fields of concentration may be under the guidance of the same department within the Thornton School of Music, and at least one of the elective fields must culminate in a substantial written paper or examination. Students must apply to their chosen fields. Admission to academic and elective fields is determined by the appropriate department, prior to the Graduate Committee Interview. Individualized programs of study will be created in each field in consultation with a faculty adviser in each area.  

Graduate Committee Interview  
Before the completion of 16 units beyond the master's degree and before permission to present the second doctoral recital is requested, doctoral students must meet with the Graduate Advisory Committee of the Thornton School of Music to discuss their progress in the program and their goals for the future. In preparation for this interview, students must prepare a dossier according to specific instructions available from the Thornton doctoral adviser. The committee determines the student's continuation in the program, and approves both the student's individualized curriculum (including all fields of concentration) and the members of his or her DMA guidance committee.  

DMA Guidance Committee  
The DMA guidance committee is composed of at least five members: two faculty members from the major department, one of whom will serve as chair, and a faculty member from each of the three other areas of concentration. At least three members of a committee must be full-time faculty of rank in the Thornton School. The composition of the DMA Guidance Committee is proposed and approved as part of the Graduate Committee Interview.
The guidance committee administers the written and oral parts of the comprehensive examination. The committee continues to serve until the comprehensive examination has been passed, the dissertation topic approved (if applicable) and the student is admitted to candidacy (if applicable). For students in curricula that require recitals, the two major field advisers serve as the recital committee and are responsible for determining the approved format, content, scheduling, and presentation of these performances for credit toward the requirements of the degree.

Comprehensive Examination
The comprehensive examination for the DMA is administered by the student's guidance committee. This examination consists of written and oral components and is designed to assess the student's mastery of his or her fields of concentration and readiness for professional independence as a performer, composer, teacher, researcher and/or scholar. The student must obtain permission from the guidance committee to take the comprehensive examination and schedule it at least two months in advance to ensure the committee's availability. The examination must be taken after completion of all required course work for all fields of concentration, except (in some cases) a limited number of the required units of Individual Instruction in the major field. In degree programs that require the presentation of four major recitals, at least two major recitals must be presented prior to the administration of the comprehensive examination. Up to two required recitals may be presented after the comprehensive examination. The dissertation (if required) must be written after the comprehensive examination.

Comprehensive examinations will not be scheduled during summer sessions except under extraordinary circumstances and only with the written approval of members of the guidance committee. All portions of the examination must be completed within one month. The comprehensive examination is comprised of a substantial culminating work for each field of concentration, as well as an oral examination with the student's guidance committee. The culminating work for each field may be a written examination, paper, project or recital, as appropriate for the particular field. For the academic field and at least one elective field, this culminating requirement must be a substantial written examination or paper. Following the successful completion of all culminating requirements and the approval of each by the corresponding faculty adviser, the student will sit for a two-hour oral examination with the guidance committee. This oral examination covers in greater depth the topics discussed in the written examinations and other requirements for the fields of concentration. The oral examination may also cover new material as determined by the guidance committee.

The two major field advisers and the academic field adviser must be present at the oral examination and render a judgment on the acceptability of the comprehensive examinations as a whole. It is highly preferable that the faculty advisers for the two elective fields participate in the oral examination with the other members of the guidance committee. If, however, there are challenges with scheduling or other issues that are reasonably unresolvable, the participation of the faculty advisers for elective fields is not required for the oral examination if they feel that the candidate has demonstrated knowledge and mastery of material that is appropriate for an elective field in their disciplines. The examinations will be reported as passing if there is no more than one dissenting vote on the committee. A student must pass both the written and oral portions to pass the comprehensive examination. A pass on the examination cannot be made contingent upon any form of additional work.

If a student fails the comprehensive examination, the guidance committee may permit the student to repeat it once at a mutually satisfactory time within a period of not less than six months nor more than one year from the date of the first oral examination. A student may not take the comprehensive examination more than twice. The comprehensive examination serves as the qualifying examination for programs that require a dissertation.

Admission to Candidacy
For the DMA in Sacred Music, admission to candidacy occurs after the student has passed the comprehensive examination, upon formal action of the dean of the Thornton School. The dissertation must be completed after admission to candidacy.

Doctoral Dissertation
A dissertation based on original investigation and/or creative work is required of candidates in Composition, Music Teaching and Learning and Choral Music. The dissertation must reveal scholarly ability, technical mastery, capacity for independent research and originality in creative thought.

Dissertation Committee
After the guidance committee recommends admission to candidacy and approves the dissertation topic, the committee is reduced to three members. This smaller committee shall be the dissertation committee and will guide the student through the completion of the dissertation. Additional members may be added at the discretion of the chair of the committee if the topic requires special expertise.

Registration for Dissertation
The student must register in 794 Dissertation each semester after admission to candidacy until degree requirements (including the dissertation) are completed. Registration for 794 in no less than two regular semesters following admission to candidacy entitles the candidate to supervision by the dissertation committee. If the dissertation is not completed and accepted within two semesters, the candidate must register for 794 each semester thereafter until the document has been accepted. No more than 8 units of credit in 794 may be accumulated regardless of the number of semesters the candidate may be required to register. A candidate who must withdraw temporarily from registration in 794 for a semester must report this in writing to the Thornton doctoral adviser before the beginning of that semester. As part of that report, the candidate must also petition for a formal leave of absence. During a leave of absence the candidate will not be entitled to assistance from his or her dissertation committee or to the use of university services and facilities. A leave of absence will be granted only under exceptional circumstances.

Format for Theses and Dissertations
All dissertations submitted for requirements for graduate degrees must conform to university regulations in format and method of preparation. See the USC Graduate School’s guidelines for Theses and Dissertations.

Abstract of Dissertation
Since the abstract of the dissertation is published in Dissertation Abstracts International, it should be written with care and be representative of the final draft of the dissertation.

Defense of the Dissertation
After meeting all requirements including the comprehensive examination, the candidate must defend the dissertation. This defense takes place in order for the committee to determine whether the dissertation should be approved or rejected. While this oral defense is open to the general university community, only the members of the dissertation committee have the authority to recommend its acceptance or rejection. The recommendation must be unanimous in order for the dissertation to be approved. At least seven weeks before the scheduled date of the defense of the dissertation, written approval by all members of the candidate's dissertation committee, along with a typed copy of the dissertation abstract, must be filed with the doctoral adviser of the Thornton School of Music. A candidate may defend the dissertation on the basis of an approved preliminary copy. If the defense is satisfactory and the committee is satisfied with the manuscript as presented, the committee then signs the Approval to Submit Defended and Final Copy of the Doctoral Work form. If additional work is required, the form is left unsigned until the work has been approved. The final electronic PDF copy of the dissertation, together with signed signature sheet and approval forms, must be presented to the Thesis Editor in the USC Graduate School by the Graduate School's submission date and times. Approval of format and acceptance by the Graduate School must be presented to the doctoral adviser of the Thornton School of Music at least one week before the end of the semester.

Curriculum Requirements for Sacred Music Major
Proficiency tests in both keyboard and voice will be given by the choral and sacred music faculty during the student's first semester in residence to determine if additional study in either area is required.

Basic DMA Curriculum (20 units) - Required for All DMA Candidates
MTAL 505 Teaching and Learning Music Units: 2
MUCD 441 Choral Conducting II Units: 2
MUCD 443 Instrumental Conducting II Units: 2
MUOC 501 Introduction to the Analysis of Tonal Music Units: 2
MUOC 502 Introduction to the Analysis of Post-Tonal Music Units: 2
MUHL 570 Research Materials and Techniques Units: 2
MUHL electives numbered 500 through 695: 6 units total
Ensemble Units: 2 units total

Note:
Courses with similar content taken for graduate credit at another accredited institution may be substituted, subject to departmental approval. Master's degree credit for ensemble taken at USC may fulfill this requirement, subject to departmental approval.

Music Ensembles (2 units)
Music Ensemble at the 500-level: 2 units total*

Program Intensive Courses (10 units)
MSCR 571 Music of the Great Liturgies Units: 2 ***
MSCR 572 Sacred Music Administration Units: 2 ***

One course from the following:
MSCR 474 The Organ in Worship and Congregational Life Units: 2
MPVA 439 Vocal Pedagogy Practicum Units: 2 ****

4 units from the following:
MSCR 790 Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
Individual Instruction at the 501 level

Choose 4 units from the following:
MSCR 473 Hymnology Units: 2
MSCR 475 Introduction to Jewish Music Units: 2
MUHL 588 Special Studies in Music since 1900 Units: 2

Electives to Fulfill the Academic Field and Two Elective Fields (25 units)**

Comprehensive Examinations (0 units)
Examinations, which include the major area, one academic field and two elective fields.

Recital (0 units)
Lecture/Recital Units: 0

Capstone Project (4 units)
MSCR 794a Doctoral Dissertation Units: 2
MSCR 794b Doctoral Dissertation Units: 2
/Final Project

Total required for degree: 65
*Sacred music majors must participate in a choral ensemble chosen from MUEN 508, MUEN 510, MUEN 511 or MUEN 512 each semester if enrolled for 4 or more units.
**Requires one elective field in a performance area.
***If these courses have already been taken toward a Master of Music degree at USC, then 500-level MUHL courses or 500-level MUOC analysis courses should be substituted, on consultation with the Sacred Music faculty.
****MPVA 439 has a prerequisite of MPVA 438. Waiver of MPVA 438 will be determined by the department, pending students' knowledge and background in vocal pedagogy.

Teaching and Learning (DMA)
Overview
The DMA in Teaching and Learning consists of the following areas of study: the basic DMA curriculum, course work in the major, an academic field and two elective fields. The DMA curriculum has been designed to extend beyond the public school setting and prepare students for collegiate teaching in both traditional and alternative settings (such as
community-based and on-line programs). Further, the degree offers innovative courses on teaching at the college level. Students have the opportunity to intern with university professors in music education methodology classes. The program also includes core scholarly subjects, such as research, sociology, philosophy, psychology and history of music education. The focus goes beyond the traditional band/orchestra/choir model and extends to additional areas especially relevant to the current diverse and technologically proficient student population. The professional degree stresses teaching with cutting-edge technological tools while developing core knowledge and expertise in pedagogical skills and scholarship. Students will acquire writing and design skills for a wide range of multimedia publications, while being able to pursue a choice of research activities or advanced creative work that will enable them to lead our profession to new heights. USC is one of the few universities that equally values students being able to declare elective fields in areas outside of music education, while also achieving rigorous scholarship, writing and multimedia design skills, and gaining pedagogical experience that prepares them for collegiate teaching in a rapidly changing society.

Degree Prerequisites

DMA applicants must complete the appropriate master of music degree program or its equivalent.

Admission

Admission to Thornton programs is granted through the USC admission process. Applicants are screened by appropriate faculty selection committees. Specific entrance requirements are reviewed on an annual basis and published online at music.usc.edu.

Graduate Record Examinations

Scores from the General Test of the Graduate Record Examinations (GRE) are required for application and admission to the DMA in Teaching and Learning. Detailed requirements are available at the Thornton Website, music.usc.edu. Test scores on the GRE that are more than five years old at the time of application are not accepted.

Grade Point Average Requirements

A minimum grade point average of 3.0 (A = 4.0) is required for all graduate course units in music. A grade of B or higher is required for all courses in the major field. For courses in academic and elective fields, the minimum passing grade is C.

Transfer Credit

The Degree Progress Department in the Office of Academic Records and Registrar determines whether course work taken elsewhere is available for transfer credit. A maximum of 30 units of transfer credit may be applied toward a doctoral degree in music. Whether such credit is applicable toward a specific requirement in a major or minor field is determined by the Thornton School department in which the subject is taught, pending approval by the dean of the Thornton School. Transfer credit petitions must be filed with the Thornton doctoral adviser during the first semester in residence. Transfer work must have been completed within 10 years of admission to the DMA program to be applied toward that degree.

Residence Requirement

A minimum of two years of full-time study beyond the Master of Music degree is required for the Doctor of Musical Arts. At least one year of full-time study beyond the master's degree (6 units or more per semester) must be in residence at USC.

Time Schedule

The time limit for completing the Doctor of Musical Arts degree is eight years. For students who earned an applicable master's degree within five years prior to admission to the doctoral program, the time limit for completing the Doctor of Musical Arts degree is six years. Progress is measured from the beginning of the first course at USC applied toward the degree. Extensions will be granted by petition to the Thornton School for only the most compelling reasons.

Music Graduate Entrance Exams

All students entering a graduate-level degree program (MA, MM, DMA and PhD) at USC Thornton, who have not previously completed a degree at USC Thornton, must take a series of entrance exams in core music subjects. These exams are called Music Graduate Entrance Exams (MGEEs). Information regarding which exams are required for specific majors is available from the Thornton Student Affairs office. Also see the Thornton School of Music Admission to Graduate Standing section of this catalogue for specific policies relating to these exams.

Foreign Language

An academic reading knowledge of French, German, Italian or Spanish is required of all students, either by taking a course approved by the Thornton School or by written examination approved by the Thornton School. Departments within the Thornton School may require additional language skills. All language requirements must be fulfilled one semester before entering the third semester in the program. Students with an academic reading knowledge of a language other than English, French, German, Italian or Spanish, may make a written request to the Thornton doctoral adviser to meet this requirement with a different language. In these cases, students must propose and gain the permission of a member of the USC faculty who will agree to create and grade the examination that would ultimately determine fulfillment of the requirement.

Course Requirements

Each student is required to complete four areas of concentration: the major field, an academic field and two elective fields.

Required courses for each major curriculum are listed in the description of major programs below. Required courses for any academic or elective field are determined for their respective fields by the faculty advisers on a student's DMA guidance committee.

A minimum of 65 graduate units beyond the bachelor's degree are required to complete a DMA degree. Fifty-five or more units must be in music, 12 of these beyond the master's level must be in the major. At least 40 of these must be at the 500 level or higher. All course work earned under these requirements for a doctoral degree is considered to be obsolete after 10 years from the date of completion of such work and may not be used to fulfill degree requirements.

Academic and Elective Fields

For the academic field students must choose one from Musicology, Theory and Analysis, Music Teaching and
Learning, Choral Music or Sacred Music. For the elective fields students will choose two fields from among 50 possible areas, including Composition, Performance, Early Music, Jazz Studies, Music Teaching and Learning, Choral Music, Sacred Music, Conducting, Pedagogy, Electroacoustic Media, Music Industry, as well as areas outside of music. The fields comprise courses that are determined by the department in which they are administered. Eight to 10 units are taken in the academic field. Six to 8 units are taken in each elective field. The academic field may not duplicate a major or an elective field. No more than two of the four fields of concentration may be under the guidance of the same department within the Thornton School of Music, and at least one of the elective fields must culminate in a substantial written paper or examination. Students must apply to their chosen fields. Admission to academic and elective fields is determined by the appropriate department, prior to the Graduate Committee Interview. Individualized programs of study will be created in each field in consultation with a faculty advisor in each area.

Graduate Committee Interview
Before the completion of 16 units beyond the master's degree and before permission to present the second doctoral recital is requested, doctoral students must meet with the Graduate Advisory Committee of the Thornton School of Music to discuss their progress in the program and their goals for the future. In preparation for this interview, students must prepare a dossier according to specific instructions available from the Thornton doctoral adviser. The committee determines the student's continuation in the program, and approves both the student's individualized curriculum (including all fields of concentration) and the members of his or her DMA guidance committee.

DMA Guidance Committee
The DMA guidance committee is composed of at least five members: two faculty members from the major department, one of whom will serve as chair, and a faculty member from each of the three other areas of concentration. At least three members of a committee must be full-time faculty of rank in the Thornton School. The composition of the DMA Guidance Committee is proposed and approved as part of the Graduate Committee Interview.

The guidance committee administers the written and oral parts of the comprehensive examination. The committee continues to serve until the comprehensive examination has been passed, the dissertation topic approved (if applicable) and the student is admitted to candidacy (if applicable). For students in curricula that require recitals, the two major field advisers serve as the recital committee and are responsible for determining the approved format, content, scheduling, and presentation of these performances for credit toward the requirements of the degree.

Comprehensive Examination
The comprehensive examination for the DMA is administered by the student's guidance committee. This examination consists of written and oral components and is designed to assess the student's mastery of his or her fields of concentration and readiness for professional independence as a performer, composer, teacher, researcher and/or scholar. The student must obtain permission from the guidance committee to take the comprehensive examination and schedule it at least two months in advance to ensure the committee's availability. The examination must be taken after completion of all required course work for all fields of concentration, except (in some cases) a limited number of the required units of Individual Instruction in the major field. In degree programs that require the presentation of four major recitals, at least two major recitals must be presented prior to the administration of the comprehensive examination. Up to two required recitals may be presented after the comprehensive examination. The dissertation (if required) must be written after the comprehensive examination.

Comprehensive examinations will not be scheduled during summer sessions except under extraordinary circumstances and only with the written approval of members of the guidance committee. All portions of the examination must be completed within one month.

The comprehensive examination comprises a substantial culminating work for each field of concentration, as well as an oral examination with the student's guidance committee. The culminating work for each field may be a written examination, paper, project or recital, as appropriate for the particular field. For the academic field and at least one elective field, this culminating requirement must be a substantial written examination or paper. Following the successful completion of all culminating requirements and the approval of each by the corresponding faculty adviser, the student will sit for a two-hour oral examination with the guidance committee. This oral examination covers in greater depth the topics discussed in the written examinations and other requirements for the fields of concentration. The oral examination may also cover new material as determined by the guidance committee.

The two major field advisers and the academic field adviser must be present at the oral examination and render a judgment on the acceptability of the comprehensive examinations as a whole. It is highly preferable that the faculty advisers for the two elective fields participate in the oral examination with the other members of the guidance committee. If, however, there are challenges with scheduling or other issues that are reasonably unsolvable, the participation of the faculty advisers for elective fields is not required for the oral examination if they feel that the candidate has demonstrated knowledge and mastery of material that is appropriate for an elective field in their disciplines.

The examinations will be reported as passing if there is no more than one dissenting vote on the committee. A student must pass both the written and oral portions to pass the comprehensive examination. A pass on the examination cannot be made contingent upon any form of additional work.

If a student fails the comprehensive examination, the guidance committee may permit the student to repeat it once at a mutually satisfactory time within a period of not less than six months nor more than one year from the date of the first oral examination. A student may not take the comprehensive examination more than twice.

The comprehensive examination serves as the qualifying examination for programs that require a dissertation.

Admission to Candidacy
For the DMA in Teaching and Learning, admission to candidacy occurs after the student has passed the comprehensive examination, upon formal action of the dean of the Thornton School. The dissertation must be completed after admission to candidacy. **Doctoral Dissertation**

A dissertation based on original investigation and/or creative work is required of candidates in Composition, Music Teaching and Learning and Choral Music. The dissertation must reveal scholarly ability, technical mastery, capacity for independent research and originality in creative thought. **Dissertation Committee**

After the guidance committee recommends admission to candidacy and approves the dissertation topic, the committee is reduced to three members. This smaller committee shall be the dissertation committee and will guide the student through the completion of the dissertation. Additional members may be added at the discretion of the chair of the committee if the topic requires special expertise. **Registration for Dissertation**

The student must register in 794 Dissertation each semester after admission to candidacy until degree requirements (including the dissertation) are completed. Registration for 794 in no less than two regular semesters following admission to candidacy entitles the candidate to supervision by the dissertation committee. If the dissertation is not completed and accepted within two semesters, the candidate must register for 794 each semester thereafter until the document has been accepted. No more than 8 units of credit in 794 may be accumulated regardless of the number of semesters the candidate may be required to register. A candidate who must withdraw temporarily from registration in 794 for a semester must report this in writing to the Thornton doctoral adviser before the beginning of that semester. As part of that report, the candidate must also petition for a formal leave of absence. During a leave of absence the candidate will not be entitled to assistance from his or her dissertation committee or to the use of university services and facilities. A leave of absence will be granted only under exceptional circumstances. **Format for Theses and Dissertations**

All dissertations submitted for requirements for graduate degrees must conform to university regulations in format and method of preparation. See the USC Graduate School's guidelines for Theses and Dissertations. **Abstract of Dissertation**

Since the abstract of the dissertation is published in Dissertation Abstracts International, it should be written with care and be representative of the final draft of the dissertation. **Defense of the Dissertation**

After meeting all requirements including the comprehensive examination, the candidate must defend the dissertation. This defense takes place in order for the committee to determine whether the dissertation should be approved or rejected. While this oral defense is open to the general university community, only the members of the dissertation committee have the authority to recommend its acceptance or rejection. The recommendation must be unanimous in order for the dissertation to be approved. At least seven weeks before the scheduled date of the defense of the dissertation, written approval by all members of the candidate's dissertation committee, along with a typed copy of the dissertation abstract, must be filed with the doctoral advisor of the Thornton School of Music. A candidate may defend the dissertation on the basis of an approved preliminary copy. If the defense is satisfactory and the committee is satisfied with the manuscript as presented, the committee then signs the Approval to Submit Defended and Final Copy of the Doctoral Work form. If additional work is required, the form is left unsigned until the work has been approved. The final electronic PDF copy of the dissertation, together with signed signature sheet and approval forms, must be presented to the Thesis Editor in the USC Graduate School by the Graduate School's submission date and times. Approval of format and acceptance by the Graduate School must be presented to the doctoral adviser of the Thornton School of Music at least one week before the end of the semester. **Curriculum Requirements for Teaching and Learning Major**

**Basic DMA Curriculum (20 units) - Required for All DMA Candidates**

- MUCD 441 Choral Conducting II Units: 2
- MUCD 443 Instrumental Conducting II Units: 2
- MUCO 501 Introduction to the Analysis of Tonal Music Units: 2
- MUCO 502 Introduction to the Analysis of Post-Tonal Music Units: 2
- MTAL 505 Teaching and Learning Music Units: 2
- MUHL 570 Research Materials and Techniques Units: 2
- MUHL electives numbered 500 through 695: 6 units total

**Ensemble Units: 2 units total**

**Note:** Courses with similar content taken for graduate credit at another accredited institution may be substituted, subject to departmental approval. Master's degree credit for ensemble taken at USC may fulfill this requirement, subject to departmental approval.

**Program Intensive Courses (20 units)**

- MTAL 500 Research Foundations in Music Teaching and Learning Units: 3
- MTAL 502 Sociological Foundations of Music Teaching and Learning Units: 3
- MTAL 503 Philosophical and Advocacy Issues in Music Teaching and Learning Units: 3
- MTAL 607 Alternative Models in Music Teaching and Learning Units: 2
- MTAL 615 Assessment and Reflective Practice Units: 2
- MTAL 720 Quantitative Research in Music Teaching and Learning Units: 3
- MTAL 721 Qualitative Research in Music Teaching and Learning Units: 3
MTAL 790 Research Units: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12
1 unit total of MTAL 790

**Electives within MTAL Department (6 units)**
**Electives to Fulfill the Academic Field and Two Elective Fields (20 units minimum)**

Comprehensive Examinations (0 units)
Examinations include the major area, one academic field and two elective fields.

Capstone Project (4 units)
- MTAL 794a Doctoral Dissertation Units: 2
- MTAL 794b Doctoral Dissertation Units: 2

Total units: 68**
*Music Teaching and Learning students are required to take MTAL 605 instead of MTAL 505 in the basic DMA curriculum.
**MTAL 500 satisfies the requirement of MUHL 570 in the basic DMA curriculum.
***Electives within MTAL will be chosen in consultation with the department.
****It is possible for Music Teaching and Learning students to elect either the academic field or one of the elective field options from outside of the Thornton School. Possible options might include psychology, sociology, education, social work or statistics. These options must be approved by the Graduate Advisory Committee.

USC School of Pharmacy

Founded in 1905, the USC School of Pharmacy is the oldest and foremost pharmacy school in Southern California. The school is a national leader known for its progressive curriculum and research excellence. Approximately 50 percent of the practicing pharmacists in Southern California are graduates of USC. The school has an average student body of 730 full-time students in the PharmD program and 250 students pursuing MS, PhD, and DRSc degrees in pharmacology and toxicology, pharmaceutical sciences, health economics, regulatory science and healthcare decision analysis. There are 72 full-time faculty and more than 300 part-time and volunteer faculty at the school.

The school occupies state-of-the-art facilities on the USC Health Sciences Campus in metropolitan Los Angeles, adjacent to the Los Angeles County+USC Medical Center (one of the largest teaching hospitals in the country), the USC Norris Cancer Hospital and the Keck Hospital of USC. USC pharmacy students receive clinical training at these facilities and many other affiliated hospitals, health care clinics, skilled nursing facilities, home health care agencies and pharmacies in the Southern California region.

Recognized as one of the most innovative schools of pharmacy, the USC School of Pharmacy serves as a model for other progressive schools. In 1950, USC was the first to establish a Doctor of Pharmacy program. Additional national “firsts” that distinguish the school include: first clinical pharmacy program and first MS in radiopharmacy (both in 1968); first PharmD/MBA dual degree program (1988); first MS and PhD programs in pharmaceutical economics and policy (1994) and first professional doctorate in regulatory science (2008).

Consistently the top private pharmacy school nationwide, the school is a member of the American Association of Colleges of Pharmacy, and the PharmD program is accredited by the Accreditation Council for Pharmacy Education.

Administration
Glen L. Stimmel, PharmD, Interim Dean
Fred G. Weissman, PharmD, JD, Associate Dean, Student/Faculty Affairs and Admission
Azar Shahabi, Associate Dean, Administrative Affairs
Michael Z. Wincor, PharmD, Associate Dean, Global Initiatives and Technology
Annie Wong-Beringer, PharmD, Associate Dean for Graduate Affairs & Interdisciplinary Graduate Programs
Steven Chen, PharmD, Chair, Titus Family Department of Clinical Pharmacy
Geoffrey Joyce, PhD, Chair, Pharmaceutical and Health Economics
Curtis Okamoto, PhD, Chair, Department of Pharmacology and Pharmaceutical Sciences

Faculty
John Stauffer Dean’s Chair in Pharmaceutical Sciences:
Glen L. Stimmel, PharmD
University Professor and Boyd P. and Elsie D. Welin Professor in Pharmaceutical Sciences: Jean Chen Shih, PhD
Distinguished Professor of Pharmacy, Public Policy, and Economics and Leonard D. Schaeffer Director’s Chair: Dana Goldman, PhD
Hegyesi Centennial Chair in Clinical Pharmacy: Steven Chen, PharmD
Quintiles Chair in Pharmaceutical Development and Regulatory Innovation: Darius Lakdawalla, PhD
John A. Biles Professor in Pharmaceutical Sciences: Wei-Chiang Shen, PhD
Gavin Herbert Professorship in Pharmaceutical Sciences: Andrew MacKay, PhD
Charles Krown/Pharmacy Alumni Professor in Pharmaceutical Sciences: Enrique Cadenas, MD, PhD
University Professor: Jean Chen Shih, PhD
Distinguished Professor of Pharmacy: Dana Goldman, PhD
Professors: Enrique Cadenas, MD, PhD; Dana Goldman, PhD; Sarah F. Hamm-Alvarez, PhD; Joel W. Hay, PhD; Darius N. Lakdawalla, PhD; Wei-Chiang Shen, PhD; Jean C. Shih, PhD; Pete Vanderween, PhD; Clay C.C. Wang, PhD
Associate Professors: James D. Adams, Jr., PhD; Julio A. Camarero, PhD; Jason N. Doctor, PhD; Roger F. Duncan, PhD; Ian S. Haworth, PhD; Geoffrey Joyce, PhD; Jeffrey S. McCombs, PhD; Curtis T. Okamoto, PhD; Kathleen Rodgers, PhD; John Romley, PhD; Bangyan Stiles, PhD
Assistant Professors: Houda Alachkar, PharmD, PhD; Jianming Xie, PhD; Yong (Tiger) Zhang, PhD
Lecturer: Rebecca Romero, PhD; Angel Tabancay, PhD
Research Assistant Professors: Liana Asatryan, PhD; Julianna Hwang, PharmD, PhD; Jennica Zaro, PhD
Professors of Clinical Pharmacy: Melvin F. Baron, PharmD, MPA; Daryl Davies, PhD; Julie A. Dopheide, PharmD; Frances Richmond, PhD; Glen L. Stimmel, PharmD; Bradley R. Williams, PharmD; Annie Wong-Berenger, PharmD
Associate Professors of Clinical Pharmacy: Paul M. Beringer, PharmD; Steven Chen, PharmD; Naomi Florea, PharmD; Kevin L. Forrester, PharmD; William C. Gong, PharmD; Grant D. Lawless, MD, RPh; Cynthia L. L. Lieu, PharmD; Stanley G. Louie, PharmD; Tien Ng, PharmD; Susie H. Park, PharmD; Irving Steinberg, PharmD; Fred G. Weissman, PharmD, JD; Michael Z. Wincor, PharmD
Assistant Professors of Clinical Pharmacy: Betty Chan, PharmD; Vivian Chow, PharmD; Michelle Chu, PharmD; Marc Cosep, PharmD; Jennifer H. Cupo-Abbott, PharmD; Richard Dang, PharmD; Melissa Durham, PharmD; Emily Han, PharmD; Michael Jameson, DRSc; C. Benson Kuo, PhD; Kum Ja K. Lee, PharmD; May C. Mak, PharmD; Emi Minejima, PharmD; Edith Mirzaian, PharmD; Rory O’Callaghan, PharmD; Eunjoo Pacifici, PharmD, PhD; Paula Phongsamron, PharmD; Nancy Pire-Smerkanich, DRSc; Florence H. Wong-Yu, PharmD
Emeritus Professor and Dean: Timothy M. Chan, PhD
Emeritus Professor: Eric J. Lien, PhD

Programs

The School of Pharmacy offers curricula leading to the Doctor of Pharmacy (PharmD) and Doctor of Regulatory Science (DRSc) degrees and graduate degrees through the Graduate School including: Master of Science (MS) and Doctor of Philosophy (PhD) in pharmaceutical sciences, Master of Science (MS) and Doctor of Philosophy (PhD) in molecular pharmacology and toxicology, Doctor of Philosophy (PhD) in clinical and experimental therapeutics, Master of Science (MS) in pharmaceutical economics and policy, Doctor of Philosophy (PhD) in health economics, Master of Science (MS) in Healthcare Decision Analysis, Master of Science (MS) in regulatory science, and Master of Science (MS) in management of drug development and Master of Science (MS) in Medical Product Quality. The PhD Programs in Pharmaceutical and Translational Sciences is a new one-year umbrella program after which students select a particular track to complete their degree with a PhD in pharmaceutical sciences, molecular pharmacology and toxicology, or clinical and experimental therapeutics. Seven dual degree programs, one joint program and numerous certificate programs are also offered, including: PharmD/JD, PharmD/MBA, PharmD/MPH, PharmD/MS in regulatory science, PharmD/MS in gerontology, PharmD/MS in global medicine, PharmD/PhD, PharmD/graduate certificate in gerontology, PharmD/MS in healthcare decision analysis, and graduate certificates in clinical research design and management, food safety, preclinical drug development, and patient and product safety.

The USC School of Pharmacy Doctor of Pharmacy program is accredited by Accreditation Council for Pharmacy Education, 135 S. LaSalle Street, Suite 4100, Chicago, IL 60603-4810, phone: (312) 664-3575, Fax (312) 664-4652 or (312) 664-7008.

Tuition and Fees (Estimated)

Tuition for School of Pharmacy degree programs (PharmD, MS and PhD in pharmaceutical sciences; MS and PhD in molecular pharmacology and toxicology; MS and PhD in health economics) is charged at a flat rate (which differs from standard USC tuition). See the Tuition and Fees section for fee information. These fees are subject to change. Doctor of Pharmacy students must pay a $500 non-refundable acceptance deposit that is applicable toward tuition. For deposit information in other degree programs in the School of Pharmacy, please consult appropriate offices.

Honor Societies

Rho Chi
Theta chapter of Rho Chi, the academic honor society in pharmacy, was established at USC in 1925. charters for chapters of this organization are granted only to student groups in those colleges that are members in good standing of the American Association of Colleges of Pharmacy. Eligibility for membership is based on high attainment in scholarship, character, personality and leadership. All candidates selected for membership must have completed three semesters of the pharmacy program, and they must be approved by the Dean of the School of Pharmacy.

Phi Lambda Sigma
The Phi Lambda Sigma chapter was established at USC in 1988. This national pharmacy leadership society is devoted to identifying, supporting and recognizing the contribution of pharmacy students to their colleges, their classmates, their campuses, their communities and to their chosen profession.

Student Housing and Service Facility, Health Sciences Campus
There are limited university-managed accommodations on the Health Sciences Campus. The Blanche and Frank R. Seaver Student Residence, adjacent to the John Stauffer Pharmaceutical Sciences Center, provides dining facilities and a bookstore. For residence information, call (323) 442-1576; for bookstore information, call (323) 442-2674. Students may also live in student housing on the University Park Campus, located about eight miles from the Health Sciences Campus.

**Student Health Services, Health Sciences Campus**

Services of the Student Health Center, covered by the mandatory student health fee, include the ambulatory care health services provided by the Student Health Center nursing staff. The Student Health Center is located in the USC Health Care Consultation Center, 1500 San Pablo Street, Suite 104, adjacent to the USC University Hospital, one block northeast of the School of Pharmacy. The telephone number is (323) 442-5980. In addition to the student health fee, all PharmD students must have major medical insurance coverage from the USC Student Health Plan. A student may request a waiver of the USC Student Health Plan if covered by a personal medical plan that meets criteria established by the Health Insurance Office.

**Graduate Degrees**

The School of Pharmacy, through the Graduate School, offers curricula leading to the MS and PhD degrees in pharmaceutical sciences, in molecular pharmacology and toxicology, and in health economics, as well as a PhD in clinical and experimental therapeutics and a doctorate in Regulatory Sciences (DRSc). The PhD Programs in Pharmaceutical and Translational Sciences is a new one-year umbrella program after which students select a particular track to complete their degree with a PhD in pharmaceutical sciences, molecular pharmacology and toxicology, or clinical and experimental therapeutics. The school also offers interdisciplinary MS degrees in regulatory science, in the management of drug development, in healthcare decision analysis and in medical product quality. The MS degree in pharmaceutical economics and policy is offered jointly with the USC Price School of Public Policy and the Department of Economics. In addition, the school offers dual degrees with the schools of law, business, gerontology and medicine as well as other programs. Instructions given in the Admission section of this catalogue are to be followed, but the application and the supplemental information requested should first be submitted to: Graduate Programs Office, USC School of Pharmacy, 1985 Zonal Avenue, Los Angeles, CA 90033. Additional information may be obtained by calling (323) 442-1474 or sending email to pharmgrd@usc.edu.

**Admission Requirements for the Master of Science in Molecular Pharmacology and Toxicology and Master of Science in Pharmaceutical Sciences**

Applicants should possess a bachelor's or master's degree in pharmacy, chemistry, biology or other related disciplines from an accredited college or university. A minimum grade point average of 3.0 and qualifying scores on the GRE in the verbal and quantitative tests are required. Special attention is given to the grades achieved in science courses relevant to the program (e.g., chemistry, biology, biochemistry, pharmacology and mathematics). Applicants must have demonstrated proficiency in verbal and written English and in fundamental scientific areas such as organic and physical chemistry, biochemistry, biology, mathematics, statistics and computer science. Three letters from faculty knowledgeable about the student's ability and capability are required. These letters should provide a thorough assessment of the student's experience in laboratory research, ability to communicate in verbal and written English, motivation and creativity, and other qualities in the student's academic performance.

Applications for admission are reviewed by the Pharmacology and Pharmaceutical Sciences Graduate Admissions Committee of the School of Pharmacy and are evaluated primarily on the basis of academic excellence.

**Admission Requirements for Programs in Pharmaceutical and Translational Sciences: Doctor of Philosophy in Clinical and Experimental Therapeutics, Doctor of Philosophy in Molecular Pharmacology and Toxicology and Doctor of Philosophy in Pharmaceutical Sciences**

All prospective students will apply through the single umbrella program Pharmaceutical and Translational Sciences and become enrolled in one of the three participating PhD programs after having successfully completed the first year's course work and rotations. Application materials will be reviewed by a joint admission committee, with equal representation of faculty from each track, evaluating applications on the basis of academic excellence and scientific research commitment.

Applicants should have a baccalaureate degree in natural sciences, or sufficient courses in mathematics and the life sciences. This is required to provide a strong background for studies in biomedical and biological research. Appropriate undergraduate degrees include biology, physiology, engineering, chemistry or computer science. For those interested in pursuing PhD training in the Clinical and Experimental Therapeutics track, special emphasis will be given to applicants with an advanced professional degree (e.g. PharmD, MD, DDS). A student currently enrolled in the PharmD program may pursue a PharmD/PhD dual degree by following the admission procedure in the Catalogue. Applicants should have a strong record of academic achievement and satisfactory performance on the general and advanced portions of the GRE. A minimum grade point average of 3.0 is required and previous research experience is expected.

In addition to the application for admission, three letters of recommendation from faculty knowledgeable of the student's ability and capability are required. These letters should provide a thorough assessment of the student's experience in laboratory research, ability to communicate in verbal and written English, motivation, creativity and other qualities in the student's academic performance. The student's research and professional experience should be well described within
the application and include a personal statement summarizing career objectives and research interests.

**Admission Requirements for the Master of Science in Pharmaceutical Economics and Policy**

Applicants for admission must have achieved a minimum 3.0 GPA in an undergraduate or professional school and adequate scores on the GRE. In addition, applicants will be required to have completed upper-division courses in statistical methods, calculus and microeconomics.

**Admission Requirements for the Doctor of Philosophy in Health Economics**

Candidates with a bachelor's, master's or PharmD degree are invited to apply. Applicants must have demonstrated proficiency in verbal and written English and aptitude in economics, mathematics, statistics and computer science. Deficiencies in economics and statistical background can be addressed through preliminary course work after admission to the program.

A minimum grade point average of at least 3.0 (A = 4.0) is required. Special attention is given to the grades achieved in economics, statistics and mathematics courses relevant to the program. A qualifying score on the GRE in verbal and quantitative areas is required. Students with GRE scores of 1200 or better will be given priority for financial aid support.

**Admission Requirements for the Master of Science in Healthcare Decision Analysis**

Applicants should possess a bachelor's degree or equivalent from an accredited college or university. Applicants with graduate or professional degrees are encouraged to apply. A minimum grade point average of 3.0 and qualifying scores on the GRE examination are required. The program encourages the participation of part-time students with work experience. Acceptance criteria for those individuals will be assessed on a case-by-case basis. English proficiency is essential.

Additional requirements for international students are outlined by university regulations under Admission of International Students.

**Admission Requirements for the Doctorate of Science in Regulatory Science**

The program is designed for individuals with strong professional experience and demonstrated intellectual and leadership capabilities. Applicants are expected to have a GPA of 3.0 on university-level course work and five or more years of professional experience. Admission requirements include university transcripts, a résumé, at least three letters of reference, and a one-page personal statement that outlines the background and goals of the applicant. Students are encouraged even at this early stage to identify areas in which they are interested in conducting research. Additional requirements for international students are outlined by university regulations under Admission of International Students. (See Admission and Orientation.) Students are not required to provide GRE scores unless indicated by the program director.

Students with an appropriate graduate or professional degree may use some previous graduate courses as transfer units toward the overall credit requirements of the Doctor of Regulatory Science program with the approval of the program director and under the normal rules of the university. Students who have graduated from the MS program in Regulatory Science can apply all of the previously taken course work toward the doctoral degree. Students with graduate degrees from outside of the regulatory science program are required to take a minimum of 32 units of course work and 4 units of dissertation research to complete the requirements for graduation. The course work requirements will be determined on an individual basis in consultation with the program director and participant's advisers.

**Admission Requirements for the Master of Science in Regulatory Science**

Applicants should possess a bachelor's degree or equivalent from an accredited college or university. Applicants with graduate or professional degrees are encouraged to apply. A minimum grade point average of 3.0 or qualifying scores on the GRE or equivalent examination are required. The program encourages the participation of part-time students with work experience.

Acceptance criteria for those individuals will be assessed on a case-by-case basis. English proficiency is essential.

Students will be selected for admission, whenever possible, after interviews with one or more members of faculty.

**Admission Requirements for the Master of Science in Management of Drug Development**

Applicants should possess a bachelor's degree or equivalent from an accredited college or university. Applicants with graduate or professional degrees are encouraged to apply. A minimum grade point average of 3.0 or equivalent and qualifying scores on the GRE or equivalent examination are required. The program encourages the participation of part-time students with work experience. Acceptance criteria for those individuals will be assessed on a case-by-case basis. English proficiency is essential.

**Admission Requirements for the Master of Science in Medical Product Quality**

Applicants should possess a bachelor's degree or equivalent from an accredited college or university. Applicants with graduate or professional degrees are encouraged to apply. A minimum grade point average of 3.0 and qualifying scores on the GRE or equivalent examination are normally required. The program encourages the participation of part-time students who are already working in the industry as well as students who have recently completed or are about to complete an undergraduate program.

Acceptance criteria will be assessed on a case-by-case basis. English proficiency is essential. Applicants who do not meet all the specific requirements indicated above, but who show unique potential, may be considered for admission with conditions, which may be fulfilled during the first semester of enrollment.

**Admission of International Students to Graduate Degree Programs**

All requirements described in this section are also applicable to the admission of international students. In addition, special application and admission procedures are required of international students. Refer to the section on Admission of International Students in this catalogue.
International. For other health professionals and pharmacists, nationally and pharmacists in California and as a supplementary resource.

The school serves as a primary educational resource for United States Board of Pharmacy and throughout the United States.

Pharmacy Education (ACPE) and recognized by the Accreditation Council for Pharmacy Education accredited by the Accreditation Council for Pharmacy Education (ACPE) and recognized by the California State Board of Pharmacy and throughout the United States.

Continuing education programs are held at the School of Pharmacy and other locations.

For information concerning continuing education programs contact: Office of Continuing Professional Development.

### Minor

**Science and Management of Biomedical Therapeutics Minor**

The minor in Science and Management of Biomedical Therapeutics consists of a minimum of 20 units of course work, 16 of which must be at the 400 level, and which are unique to this minor and do not overlap with the major, another minor or general education requirements of the undergraduate students. A maximum of 4 units can be met by taking Directed Research (RXRS 490). Only students with a declared major are eligible to apply. Students must be in sophomore standing and have completed a minimum of 32 USC units as an entering freshman or 16 units as an entering transfer student. Course work within the minor will focus on domains of pharmacology, pharmaceutical sciences, toxicology, nutritional sciences, medical product development and drug use and abuse. Students will select course work in consultation with an academic adviser.

#### Required Courses

To gain a solid foundation for the minor, two core courses (selected from the four below) are required:

- **RXRS 402 Human Pharmacology: Challenge of Therapeutics in Society** Units: 4
- **RXRS 403 Neuropharmacology in Health and Disease** Units: 4
- **RXRS 407 The Discovery, Development and Marketing of Medicines** Units: 4
- **RXRS 416 Medical Products: From Idea to Market** Units: 4

#### Master's Degree

**Healthcare Decision Analysis (MS)**

#### Curriculum Requirements

A Master of Science degree in healthcare decision analysis will be granted upon completion of at least 33 units of formal course work. Students with experience in industry or government can substitute an equivalent amount of formal course work with a research project, subject to the approval from program administrators.

Course requirements normally include a minimum of eight courses (24 units) with emphasis on applied health care policy, business intelligence and technical analysis. Recommended course work and electives include some courses available in other departments of the university and will be selected in consultation with the program advisers according to the areas of intended specialization of the participant in order to meet the credit requirements of the program. Students should develop a specific plan of study in consultation with the graduate advisers before beginning the program.

#### Grade Point Average

### Non-Degree Programs

Office of Continuing Professional Development

#### Continuing Education

The School of Pharmacy, Office of Continuing Professional Development, is a recognized provider of continuing pharmacy education accredited by the Accreditation Council for Pharmacy Education (ACPE) and recognized by the California State Board of Pharmacy and throughout the United States.

The school serves as a primary educational resource for pharmacists in California and as a supplementary resource for other health professionals and pharmacists, nationally and internationally.
A grade point average of at least 3.0 (A = 4.0) must be achieved on graduate course work at USC.

Management of Drug Development (MS)
A Master of Science degree in the management of drug development will be granted upon completion of at least 32 units of course and research project work. The program is offered on both a full-time and part-time basis, and courses are also available in distance formats. Most students will take six units of directed research as part of this program. Students with appropriate industry or laboratory experience can substitute an equivalent amount of formal course work for the research project with the permission of the program director.

Course requirements normally include a minimum of three courses concerned with translational aspects of medical product development. Recommended courses to satisfy this core requirement include RSCI 530, RSCI 531, RSCI 532, PSCI 664 or CXPT 609. The program must also include a minimum of one course in each of: regulatory science, quality assurance, clinical research, business and statistics. Students should develop a specific plan of study in consultation with graduate advisers before beginning the program.

Medical Product Quality (MS)
To keep medical products safe and effective, a strong system of quality management is required. Quality is assured through compliance with strict regulations and is assessed by regulatory agencies through audits and inspections. A Master of Science degree in Medical Product Quality is a specialized program designed to prepare individuals to function effectively as quality specialists in pharmaceutical and medical device sectors. The degree will be granted upon completion of at least 32 units of course work, which can include an optional research project in an internship setting. Students with experience in industry or government can substitute an equivalent amount of formal course work for the research project with the permission of the program director.

Course requirements normally include a minimum of four courses concerned with the quality aspects of medical product development and manufacturing and a minimum of one course each in regulatory science, risk management, statistics and project management. The program is offered on both a full-time and part-time basis, and courses are also available in distance formats. Students should develop a specific plan of study in consultation with their graduate adviser before beginning the program.

Molecular Pharmacology and Toxicology (MS)
A Master of Science in molecular pharmacology and toxicology will be granted on the basis of completion of at least 24 units of formal course work and presentation of an acceptable thesis (MPTX 594a, MPTX 594b, 4 units) based on the results of an original investigation.

The 24 units of course work must be at the 500-level or above, exclusive of directed research. At least 16 of the 24 required units must be taken from courses offered within the Department of Pharmacology and Pharmaceutical Sciences (courses within the department have designations of either PSCI or MPTX). The remaining units can be taken from courses offered within the Department of Pharmacology and Pharmaceutical Sciences or in various related disciplines outside the department if approved by the Department of Pharmacology and Pharmaceutical Sciences Graduate Affairs Committee.

Pharmaceutical Economics and Policy (MS)
The Department of Pharmaceutical Economics and Policy (School of Pharmacy) offers a program of study leading to the MS degree. Applicants must apply to the Graduate School and meet the admissions requirements of the program. This program requires students to demonstrate skills in the analysis of pharmaceutical and health technology innovations, as well as an understanding of contemporary health policy issues. A minimum of 36 units of graduate level courses is required.

Grade Point Average
A grade point average of at least 3.0 (A = 4.0) must be achieved on graduate course work at USC.

Recommended Courses
It is recommended that the student complete the following 36 units of graduate level course work:

- ECON 611 Probability and Statistics for Economists Units: 4
- ECON 500 Microeconomic Analysis and Policy Units: 4 or
- PPD 501a Economics for Policy, Planning and Development Units: 2 and
- PPD 501b Economics for Policy, Planning and Development Units: 2
- PM 511aL Data Analysis Units: 4
- PM 512 Principles of Epidemiology Units: 4 or approved elective
- PMEP 509 Research Design Units: 4
- PMEP 519 Survey Research and Quality of Life Assessment Units: 4
- PMEP 529 Risk, Probabilities and Preferences Units: 4
- PMEP 538 Pharmaceutical Economics Units: 4
- PMEP 539 Economic Assessment of Medical Care Units: 4

Note:
Students must complete all recommended courses for the degree within five years of entry into the program.

Additional Degree Requirements
The student must satisfactorily complete the recommended courses in economics, preventive medicine and public administration prior to enrolling in PMEP 538. The student is also required to complete an empirical research project on a topic relevant to pharmaceutical economics and policy.

Pharmaceutical Sciences (MS)
A Master of Science in the pharmaceutical sciences will be granted on the basis of completion of at least 24 units of formal course work and presentation of an acceptable thesis (PSCI 594a PSCI 594b, 4 units) based on the results of an original investigation.
The 24 units of course work must be at the 500-level or above, exclusive of directed research. At least 16 of the 24 required units must be taken from courses offered within the Department of Pharmacology and Pharmaceutical Sciences (courses within the department have designations of either PSCI or MPTX). The remaining units can be taken from courses offered within the Department of Pharmacology and Pharmaceutical Sciences or in various related disciplines outside the department if approved by the Department of Pharmacology and Pharmaceutical Sciences Graduate Affairs Committee.

Regulatory Science (MS)
Regulatory science relates the regulatory and legal requirements of biomedical product development to the scientific study needed to establish product safety and efficacy. A Master of Science degree in regulatory science will be granted upon completion of at least 36 units of formal course work, which can include an optional research project in an internship setting. Students with experience in industry or government can substitute an equivalent amount of formal course work for the research project with the permission of the program director. Course requirements normally include a minimum of three courses concerned with regulatory aspects of medical product development and a minimum of one course each in quality assurance, clinical research, business, statistics and law. Recommended course work includes some courses available in other departments of the university. Students should develop a specific plan of study in consultation with the graduate advisers before beginning the program.

University Certificate
Clinical Research Design and Management Certificate
The graduate certificate in clinical research design and management is designed to strengthen the statistical, research and project management skills of clinical researchers and their associated clinical team members. Students must complete at least 12 units of course work including at least two courses in clinical design and trial management, one course in ethics and one course in a specialized aspect of design, management or statistics, subject to the approval of the program director. The program will include course work delivered in nontraditional formats such as intensive weekend sessions and will use distance learning tools, Webcast lectures and study materials. Courses can be taken on site, by distance or as a blended combination. Students should confirm their specific course work plan in consultation with the graduate advisers before beginning the program. Students who have bachelor's degrees from accredited colleges or universities must submit an application for graduate study through the regulatory science program of the School of Pharmacy. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed.

Requirements

Introduction to Clinical Trials
MPTX 517 Structure and Management of Clinical Trials Units: 4

Clinical Design/Statistics (choose one)
MPTX 510L Principles of Biostatistics Units: 4
MPTX 522 Introduction to Clinical Trial Design and Statistics Units: 3

Biomedical Ethics
MPTX 602 Science, Research and Ethics Units: 2

Additional options in specialized aspect of design or management (choose one):
MPTX 511 Introduction to Medical Product Regulation Units: 3
RSCI 520 Introduction to Risk Management for Health Care Products Units: 2
PM 510L Principles of Biostatistics Units: 4
PM 511aL Data Analysis Units: 4
PM 512 Principles of Epidemiology Units: 4
PM 523 Design of Clinical Studies Units: 3
RSCI 527 Medical Product Safety Units: 3

Food Safety Certificate
The graduate certificate in food safety is a 12-unit program of course work designed to strengthen the knowledge base and functional "toolkit" of individuals who deal with the production and management of food in industry and government. Students are required to take an entry level course that focuses on regulatory requirements for foods and dietary supplements and two additional courses that focus on food science and food/drug toxicology respectively. Final course work will be selected from a small grouping of electives that deal with quality systems or risk management. The program will include course work delivered in nontraditional formats, such as intensive weekend sessions, and will use distance learning tools, Webcast lectures and study materials. Courses can be taken on site, by distance or as a blended combination. Students should confirm their specific course work plan in consultation with the graduate advisers before beginning the program. Students who have bachelor's degrees from accredited colleges or universities must submit an application for graduate study through the regulatory science program of the School of Pharmacy. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed.

Requirements
MPTX 514 Regulation of Food and Dietary Supplements Units: 3
MPTX 524 Introduction to Food Science and Technology Units: 3
RSCI 525 Introduction to Drug and Food Toxicology Units: 3

Quality/Risk Management Option:
MPTX 515 Quality Systems and Standards Units: 3
MPTX 526 Chemistry Manufacturing and Controls Units: 3
RSCI 520 Introduction to Risk Management for Health Care Products Units: 2
RSCI 529 Application of Risk Management Tools and Techniques Units: 2
Healthcare Decision Analysis Certificate
The Healthcare Decision Analysis (HCDA) Certificate program gives students the tools and knowledge to succeed in the complex world of healthcare data analytics, international access and reimbursement, product pricing and value assessment, insurance operations and design, along with competitive business intelligence. Course work is typically delivered in nontraditional formats such as intensive weekend sessions, Webcast lectures, and distance learning tools. Courses must be taken on-site. Students should confirm their specific course work plan in consultation with the graduate adviser before beginning the program. Students who have bachelor's degrees from accredited colleges or universities must submit an application for graduate study through the Healthcare Decision Analysis program. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed.

Students must complete at least 12 units of specified course work, which normally will include two introductory courses on healthcare insurance and access, and product development and commercialization, along with two additional elective courses. The certificate can be completed on a part-time basis but must be finished within five years.

Required Courses

HCDA 506 Foundations of Insurance and Global Access Units: 3
HCDA 507 Foundations of Product Development and Commercialization Units: 3

Electives (select two):

HCDA 501 Fundamentals of Health Care Insurance Design Units: 3
HCDA 502 Comparative International Health Care Systems Units: 3
HCDA 503 Competitive Health Care Intelligence and Pricing Units: 3
HCDA 510 Business Implications of Health Care Reform Units: 3
HCDA 515 Medical Decision Analysis and Modeling Units: 3
HCDA 520 Health Economic and Outcomes Methodology Units: 3
HCDA 525 Healthcare Literature Analysis and Applications Units: 3
HCDA 530 Total Product Development: Benchtop to Launch Units: 3
HCDA 550 Healthcare Innovation: Creativity to Value Units: 3
HCDA 553 Advanced Pricing Strategies Units: 3
HCDA 560 Managing Effective Partnerships and Mergers Units: 3
HCDA 570 Asia Pacific: Access, Delivery and Reimbursement Units: 3

Medical Product Quality Graduate Certificate

The graduate certificate in Medical Product Quality is a 12-unit program designed for students with a background in biological, pharmaceutical and biomedical sciences and biomedical engineering. Quality assurance and quality control are the two functions in the biomedical industry that are responsible for the testing and oversight required to ensure the safety of the health care products that are manufactured. An essential tenet of regulatory oversight is the assurance of quality through guidelines, audits and inspections. In this program the regulations and guidelines to ensure the quality of drugs, biologics and medical devices, both in the United States and internationally, will be studied to develop an understanding of the basic principles important for the interpretation and implementation of quality practices and quality systems. Course work is typically delivered in nontraditional formats such as intensive weekend sessions and will use distance learning tools, Webcast lectures and study materials. Courses can be taken on site, by distance or as a blended combination. Students should confirm their specific course work plan in consultation with the graduate advisers before beginning the program. Students who have bachelor's degrees from accredited colleges or universities must submit an application for graduate study through the regulatory science program of the School of Pharmacy. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed.

Students must complete 12 units of specified course work (four course minimum), that normally will include an introductory course in the basic principles of quality systems, a course in project management, a course in quality tools and one elective chosen from the quality or regulatory offerings. The certificate can be completed on a part-time basis but must be finished within five years.

Choose at least one Quality Systems course from:

MPTX 515 Quality Systems and Standards Units: 3
RSCI 508 Quality Assurance for Drugs and Biologics Units: 3
RSCI 509 Quality Assurance, Medical Devices and Combination Products Units: 3

Choose at least one Quality Tools course from:

RSCI 506 Auditing Principles Units: 3
RSCI 507 Quality Systems and Statistical Process Control Units: 2
RSCI 535 Methods Development and Validation Units: 3

Project Management

RSCI 603 Managing Complex Projects Units: 3

Choose an elective from the Quality or Regulatory offerings (minimum 3 units)

Elective course selected in consultation with academic adviser

Patient and Product Safety Certificate
The graduate certificate in patient and product safety is a 12-unit program that educates students in the emerging field of safety and risk management in the health care environment. It is designed to produce graduates who have a particular expertise in the evaluation and mitigation of medical errors and health-care product problems. Course work is typically delivered in nontraditional formats such as intensive weekend sessions and will use distance learning tools, Webcast lectures and study materials. Courses can be taken on site, by distance or as a blended combination. Students should confirm their specific course work plan in consultation with the graduate advisers before beginning the program. Students who have bachelor’s degrees from accredited colleges or universities must submit an application for graduate study through the regulatory science program of the School of Pharmacy. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed. Students must complete 12 units of specified course work, that normally will include an introductory course in the basic principles of risk management, a second course in the use of risk management tools, and two additional courses in patient and product safety respectively as listed below. In addition, a course in medical ethics is recommended. Most students will take the courses that are listed in the sample student program below, but if students have already strong previous experience in risk management or safety, other statistical or quality courses taught in graduate programs at USC may be substituted with the permission of the program director. The certificate can be completed on a part-time basis but must be finished within five years. Courses may be selected from the following recommended course list.

**Recommended Course List**

MPTX 515 Quality Systems and Standards Units: 3  
MPTX 517 Structure and Management of Clinical Trials Units: 4  
MPTX 602 Science, Research and Ethics Units: 2  
RSCI 520 Introduction to Risk Management for Health Care Products Units: 2  
RSCI 527 Medical Product Safety Units: 3  
RSCI 529 Application of Risk Management Tools and Techniques Units: 2  
RSCI 603 Managing Complex Projects Units: 3  

**Preclinical Drug Development Certificate**

The graduate certificate in preclinical drug development provides advanced foundational training in preclinical aspects of drug development, translational research and regulatory control. Students must complete at least 12 units of course work including at least three courses in preclinical design and development (typically, RSCI 530 Translational Medicine: An Overview, RSCI 531 Industrial Approaches to Drug Discovery, RSCI 532 Early Stage Drug Development) and one course in a related aspect of research design, regulation or ethics, subject to the approval of the program director. The program will include course work delivered in nontraditional formats such as intensive weekend sessions and will use distance capabilities, Webcast lectures and study materials. Courses can be taken on site, by distance or as a blended combination. Students should confirm their specific course work plan in consultation with graduate advisers before beginning the program. Students who have baccalaureate degrees from accredited colleges or universities must submit an application for graduate study through the regulatory science program of the School of Pharmacy. GRE scores are not required for admission to the certificate program. Students are expected to enroll each semester until the program is completed.

**Regulatory and Clinical Affairs Certificate**

The graduate certificate in regulatory and clinical affairs is designed to provide specialized education for individuals interested in developing a systematic understanding of the U.S. regulatory system for medical products. Students must complete at least 12 units of course work including an introductory course in regulatory affairs:

**Requirements**

**One introductory course in regulatory affairs**

- MPTX 511 Introduction to Medical Product Regulation Units: 3  
- RSCI 530 Translational Medicine: An Overview Units: 2  
- RSCI 532 Early Stage Drug Development Units: 3  

**At least one specialized course in regulatory management of a particular product type**

- MPTX 512 Regulation of Pharmaceutical and Biological Products Units: 3  
- MPTX 513 Regulation of Medical Devices and Diagnostics Units: 3  
- MPTX 514 Regulation of Food and Dietary Supplements Units: 3  

**At least one course in clinical design**

- MPTX 517 Structure and Management of Clinical Trials Units: 4  
- MPTX 522 Introduction to Clinical Trial Design and Statistics Units: 3  

**One course in quality systems or risk management**

- MPTX 515 Quality Systems and Standards Units: 3  
- MPTX 526 Chemistry Manufacturing and Controls Units: 3  
- RSCI 520 Introduction to Risk Management for Health Care Products Units: 2  
- RSCI 525 Introduction to Drug and Food Toxicology Units: 3  

**Additional Requirements**

Other courses may be substituted with the approval of the program director. The program will include course work delivered in nontraditional formats such as intensive weekend sessions and will use distance capabilities to capture and Webcast lectures and study materials. Courses can be taken on site, by distance or as a blended combination. Students
Admission to the dual Doctor of Pharmacy/Juris Doctor (PharmD/JD) program is competitive, and involves meeting admission requirements and gaining acceptance to both the School of Pharmacy and the USC Gould School of Law. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students who have a baccalaureate degree may apply to the dual PharmD/JD degree program in two ways. First, they may apply at the time they submit their PharmD application by concurrently submitting applications to both schools. Students who elect this approach must identify themselves on their PharmD applications as potential dual PharmD/JD degree students. Students who are admitted to both schools will be offered admission to the dual degree contingent on passing all courses in their first year of the PharmD with a minimum 3.0 GPA. Students pursuing the dual PharmD/JD degree must notify the law school in a timely fashion that they will be enrolling in the dual PharmD/JD degree program and will not matriculate at the law school until the following year. Students who are accepted by only one school may choose to attend that school but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the Gould School of Law during their first year of enrollment in the PharmD program prior to the law school’s published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students who are admitted to the law school using this approach would be offered admission to the dual degree contingent on passing all courses in their first year of the PharmD with a minimum 3.0 GPA. See the admissions section of the School of Pharmacy and the Gould School of Law for specific requirements.

PharmD Requirements
Dual degree students must successfully complete 144 units of PharmD and acceptable JD units to receive the PharmD degree. The 144 units must include 132 units of required and elective pharmacy course work plus 12 units of JD course work deemed acceptable to meet PharmD elective requirements. Dual degree students should graduate with their PharmD degrees at the completion of the first semester of the sixth academic year of the dual degree program. Students will be eligible to sit for the Pharmacy Board Exams after completion of the PharmD degree requirements. However, dual degree students will not actually be awarded their PharmD degrees until they complete requirements for both degrees.

Juris Doctor Requirements
Dual degree students must successfully complete 88 units of JD and acceptable PharmD course work during the second to sixth years of the dual degree program to receive the JD degree. The 88 units must include 76 units of JD course work, including satisfaction of the upper-division writing requirement and any other substantive requirements, plus 12 units of PharmD course work deemed acceptable to meet JD elective requirements. No JD credit will be awarded for PharmD course work completed prior to matriculation in the law school. Students cannot receive the JD degree under requirements for the dual degree program without prior or simultaneous completion of the PharmD degree.
Both professions require passing a state board or bar exam to practice the respective professions. Neither of these professional doctoral degrees requires a thesis or comprehensive final exam.

**Doctor of Pharmacy/Master of Business Administration (PharmD/MBA)**

Responding to the growing demand on pharmacists to be knowledgeable in both science and business administration, the USC School of Pharmacy in 1988 helped pioneer an innovation in pharmaceutical education by offering this unique five-year dual degree program. The Doctor of Pharmacy/Master of Business Administration (PharmD/MBA) dual degree program is offered cooperatively by the School of Pharmacy and the USC Marshall School of Business. Students must complete concurrently all requirements established by both schools for their respective degrees.

The program involves completion of the first year in the School of Pharmacy, the second in the Marshall School of Business, and then completion of the balance of both degrees during the third through fifth years. A total of 48 units must be completed in the Marshall School of Business.

**First Year:** Required Pharmacy School courses.

**Second Year:** Required MBA courses and graduate business electives.

**Third to Fifth Years:** remaining Pharmacy courses and graduate business electives sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students may not count courses taken outside the Marshall School of Business toward the 48 units. The PharmD and the MBA are awarded simultaneously upon completion of the School of Pharmacy and the Marshall School of Business requirements.

**MBA Admission Requirements**

Applicants to this program must have a baccalaureate degree from an accredited college or university and should apply during their first year of pharmacy studies. Only students who have successfully completed one year in the School of Pharmacy will be considered for admission to the Marshall School of Business. See the Marshall School of Business for admission requirements.

**Doctor of Pharmacy/Master of Public Health (PharmD/MPH)**

The School of Pharmacy and the Master of Public Health program, in recognition of the rapidly changing health care environment, and in response to the growing demand for pharmacists who are knowledgeable in both pharmacy and population-based health care issues, have developed a dual degree program. The joint PharmD/MPH degree will enable graduates to be more responsive to today's health care needs and will provide training for pharmacists who seek to be agents of change within the profession and to assume leadership roles in the pharmacy field and in public health at the local, state and national levels.

Students who are enrolled in the School of Pharmacy must apply to the Master of Public Health program no later than January of their first year. All requirements for admission to the regular MPH program must also be fulfilled by dual degree applicants.

The PharmD/MPH program spans five years (four years of pharmacy school courses and one year of public health courses). Students begin the core MPH courses following the successful completion of the first year of pharmacy school. The last three years of the program are devoted to course work and the clinical rotations of the School of Pharmacy and to the completion of the elective courses and practicum (field experience) of the MPH program.

All students in the PharmD/MPH program must meet course requirements, grade point average requirements and program residency requirements of both programs. Students must have a cumulative GPA of 3.0 in the PharmD curriculum and a 3.0 in the MPH curriculum to meet graduation requirements. The PharmD and the MPH degrees are awarded simultaneously upon completion of the School of Pharmacy and the Master of Public Health requirements.

**Admission Requirements and Procedures**

Students applying for the dual degree program must meet the respective admission requirements for each program. This includes having completed a baccalaureate degree from an accredited college or university with a minimum GPA of 3.0 and having acceptable GRE and TOEFL or IELTS scores as applicable. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual PharmD/MPH degree program in two ways. First, they may apply at the time they submit their PharmD application by concurrently submitting applications to both programs.

Students who elect this approach must identify themselves on both applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the PharmD and will be offered admission to the dual degree program contingent on passing all courses in their first year of the PharmD with a minimum 3.0 GPA. Students who are accepted by only one program may choose to attend that program, but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the MPH program during their first year of enrollment in the PharmD prior to the MPH published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students admitted to the MPH program using this approach will be offered admission to the dual degree contingent on passing all courses in their first year of the PharmD with a minimum 3.0 GPA.

**Doctor of Pharmacy/Master of Science, Gerontology**

The emerging impact of the elderly on the health care system has created a need for health care providers who understand the unique needs of the elderly. As drug therapy remains the primary therapeutic option for chronic disease, the demand for prescription drugs will continue to rise. There is a demand for pharmacists who are equipped to meet the pharmaceutical care needs of this population. Geriatric pharmacy is recognized as a specialty, with board certification through the Commission for Certification in Geriatric Pharmacy. The PharmD/MS, Gerontology program will provide extensive education and training in the unique health care needs of...
older adults. It will allow student pharmacists with a career interest in geriatrics or gerontology to work with health care planning or delivery organizations to develop and implement progressive pharmaceutical care programs for the elderly.

**Application and Admission Requirements**

Students who intend to pursue the dual PharmD/MSG degree must be accepted by both programs. This includes having completed a baccalaureate degree from an accredited college or university with a minimum GPA of 3.0 and a minimum equivalent GRE score of 1000. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual PharmD/MS degree program in two ways. First, they may apply at the time they submit their PharmD application by concurrently submitting applications to both programs. Students who elect this approach must identify themselves on both applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the PharmD and will be offered admission to the dual degree program. Second, students can apply to the dual degree by submitting an application to the MS program during their first year of enrollment in the PharmD prior to the MS published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students admitted to the MS program using this approach will be offered admission to the dual degree program contingent on passing all courses in their first year of the PharmD with a minimum 3.0 GPA. Students accepted to the dual degree program must maintain a minimum 3.0 GPA in their Gerontology and PharmD courses.

**Recommended Program**

**First year:** Required Year I PharmD course work  
**Second year:** Required Gerontology course work  
**Third year:** Required Year II PharmD course work  
**Fourth year:** Required Year III PharmD course work  
**Fifth year:** Required Year IV PharmD course work

**Graduation Requirements**

Students must complete all requirements for the PharmD (see the Professional Degrees page) and MS, Gerontology degrees as listed in the current catalogue with a minimum cumulative 3.0 GPA. The specific MS course requirements for the dual PharmD/MS degree are listed on the School of Gerontology Dual Degree Programs page.

**Doctor of Pharmacy/Master of Science, Global Medicine**

The dual degree in Pharmacy and Global Medicine is designed for students who are interested in providing pharmaceutical care to underserved populations around the world. Students enrolled in this dual degree program will benefit from an advanced understanding of the role of, and issues surrounding, modern medicine in developing countries.

**Requirements**

Students must gain admission to and fulfill the degree requirements for both programs, which include 138 units for the Doctor of Pharmacy and 24 units for the MS in Global Medicine. Six units of GM elective units can be used towards the PharmD elective requirement, and PHRD 503 and PHRD 504 substitute for MEDS 503 and MEDS 504.

**Program Adaptation**

Because MEDS 503 and MEDS 504, core requirements for the MS in Global Medicine program, cover the same material as PHRD 503 and PHRD 504, the PharmD/Global Medicine dual degree program substitutes PHRD 503 and PHRD 504 for MEDS 503 and MEDS 504 as core requirements for the dual degree.

**Doctor of Pharmacy/Master of Science, Regulatory Science**

Regulatory science is that branch of knowledge which relates the regulatory and legal requirements of biomedical product development to the scientific testing and oversight needed to ensure product safety and efficacy. The program provides an opportunity for advanced preparation in the fields of regulatory affairs, quality assurance and clinical research. Students must complete concurrently all of the requirements established for the respective degrees. The program alternates the courses required for the PharmD program during the fall and spring terms with courses required in summer terms for the MS program. Students will typically take courses in the summers of years two-four. Up to 12 appropriate units of course work from the PharmD program can be applied toward the MS degree. The PharmD and the MS, Regulatory Science degrees will be awarded simultaneously upon completion of requirements for the two programs.

**Admission Requirements and Procedures**

Students applying for the dual degree program must meet the respective admission requirements for each program and must have a baccalaureate degree. Students will not be given special consideration for admission to either program because they are applying for the dual degree. Students may apply to the dual PharmD/MS, Regulatory Science degree program in two ways. First, they may apply at the time they submit their PharmD application by concurrently submitting applications to both programs. Students who elect this approach must identify themselves on both applications as potential dual degree students. Students who are admitted to both programs will be offered admission to the PharmD and will be offered admission to the dual degree program contingent on passing all courses in their first year of the PharmD with a minimum 3.0 GPA. Students who are accepted by only one program may choose to attend that program but will not be eligible for the dual degree. Second, students can apply to the dual degree by submitting an application to the MS in Regulatory Science program during their first or second year of enrollment in the PharmD prior to the MS in Regulatory Science published application deadline. Students who elect this approach must apply through the School of Pharmacy. Students admitted to the MS in Regulatory Science using this approach will be offered admission to the dual degree program contingent on passing all courses in their PharmD studies with a minimum 3.0 GPA.

**Healthcare Decision Analysis (PharmD/MS)**

The Healthcare Decision Analysis (HCDA) program gives students the tools and knowledge to succeed in the complex world of healthcare data analytics, international access and reimbursement, product pricing and value assessment, insurance operations and design, along with competitive
business intelligence. A dual degree of Doctor of Pharmacy and Master of Science in Healthcare Decision Analysis will be granted upon the completion of the course work required for the PharmD degree, and the HCDA core and elective units. Dual degree students will be credited up to 9 units of appropriate PharmD course work toward the MS, HCDA. Dual degree students will select from a series of HCDA core courses and required electives to meet the MS, HCDA degree requirements. Electives will be considered from the disciplines: applied healthcare policy, business intelligence, regulatory science, and healthcare economics, along with all required clerkships and rotations offered through the USC School of Pharmacy. Students should develop a specific plan of study in consultation with program administrators before beginning the program.

**Doctoral Degree**

**Clinical and Experimental Therapeutics (PhD)**

The goal of the PhD program in Clinical and Experimental Therapeutics is to develop a scientist who is engaged in team science through interdisciplinary education; competent in conducting research across clinical and basic science disciplines; and integrates basic investigations and clinical observations in applied research to better understand disease process, advance drug development and evaluate efficacy and toxicity of therapeutic regimens with the goal of improving the safe, effective and economical use of therapeutic modalities by patients. The program applies an interdisciplinary approach that focuses the graduate studies directly toward translational, rather than basic science, aiming to educate students with the perspective and skill set to identify important connections between fundamental biomedical research and human disease. This program emphasizes cross-training between clinical and basic sciences focusing on the investigation of disease processes, drug development and the efficacy and toxicity of therapeutic regimens. Course requirements and research opportunities for graduate students enrolled in the program provide both experimental (basic) and disease-focused experiences that complement the graduate's research focus. The program applies an interdisciplinary approach that focuses the graduate studies directly toward translational, rather than basic science, aiming to educate students with the perspective and skill set to identify important connections between fundamental biomedical research and human disease. This program emphasizes cross-training between clinical and basic sciences focusing on the investigation of disease processes, drug development and the efficacy and toxicity of therapeutic regimens. Course requirements and research opportunities for graduate students enrolled in the program provide both experimental (basic) and disease-focused experiences that complement the graduate's research focus.

**Course Requirements**

A minimum of 60 units is required. At least 26 of the 60 units are to be formal graduate course work at the 500-level or above, exclusive of seminars and directed research. Students must complete 14 units of course work before they are eligible for the screening procedure. Additional course work relevant to the research interests of the student may be required by the student's advisers or the student's qualifying exam committee, with an emphasis on cross-training and taking into account the amount and level of previous scientific preparation and the nature of the research dissertation that will be the major endpoint of the program. Specifically, recommended course work differs between students who have an advanced professional degree (Track I) and those who do not (Track II). A maximum of 12 units may be transferred from graduate studies elsewhere. In the first year, all students (Tracks I and II) are recommended to take 14 units of course work in translational medicine (RSCI 530, 2 units), research design (CXPT 609, 4 units), biostatistics (PM 510, 4 units), and clinical trial design (MPTX 517, 4 units). In the second year, Track I students will take the remaining 12 units of course work as electives based on the background of the student and the proposed research focus of the student. Track II students who do not have an advanced professional degree are recommended to select from the following courses as part of their electives: systems physiology and disease (INTD 572 and INTD 573, 4 units each) or pathology (INTD 550, INTD 551, 4 units each). Other electives that can be chosen are INTD 531, INTD 561, PM 533, PM 538, PM 570, PSCI 661 and PSCI 665.

The remaining 34 of the 60 units required for the PhD degree may be fulfilled with other courses including ethics, interdisciplinary seminar, directed research and dissertation. Note that to become eligible to take the qualifying exam, Track II students must fulfill the prescribed clinical experiences that match the disease-related topic of the student's thesis work as approved by the student's advisers and advisory committee. Students with a bachelor's degree in a health care subject area (e.g., nursing, pharmacy, medicine) will be evaluated on a case basis and may be required to meet the therapeutic course work or clinical experience component described above, as determined by their background and previous experiences.

**Foreign Language Requirement**

There is no formal language requirement. However, an individual qualifying exam committee can require competency in a foreign language or a computer language if it is relevant for the student's area of research.

**Qualifying Exam Committee**

Upon admission, the student will be assigned to a member of the graduate faculty who will serve as his or her temporary adviser until a permanent adviser has been identified. The student's program of study will be under the direction of the qualifying exam committee composed of at least five members, one of whom must be from outside the department. Because of the centrality of research in the PhD program, the student is encouraged to get acquainted with the participating faculty mentors from the day they enter the program, and have selected a research direction, paired graduate advisers (clinical and basic scientists), and qualifying exam committee no later than the third semester of study. The graduate affairs committee will serve as the qualifying exam committee until one is selected.

**Screening Procedure**

The performance of each student will be evaluated no later than the end of the second semester of enrollment in the graduate program. This screening procedure is conducted by the student's qualifying exam committee or, if a student has not yet selected a qualifying exam committee, by the graduate affairs committee. The committee reviews the student's progress to date in various areas including course work, research interests, and laboratory performance on his or her research project or laboratory rotations. If a performance deficiency is determined, specific goals will be established that the student must fulfill to continue in the program. Passing this screening procedure is prerequisite to continuation in the PhD program.
Qualifying Examination
Students will be required to pass a comprehensive written and oral examination on the chosen disease-focused area of research emphasis. The examination will encompass basic scientific concepts relevant to the disease under study and the laboratory techniques in that discipline, fundamental principles of clinical research and design, biostatistics, and therapeutics in the chosen disease-focused area of research. The examination is administered by the qualifying exam committee and consists of two parts: a written examination administered to all students at the end of their second year of study and a detailed written proposal and its oral presentation and defense by the student to the qualifying exam committee. The examination process is conducted by the student's advisory committee with oversight by the graduate affairs committee. All course and qualifying examination requirements for the Doctor of Philosophy must be completed within two-and-a-half years after admission. After passing these examinations, the student is admitted to candidacy for the PhD degree.

Dissertation
A dissertation based on original investigation in a relevant scientific area is required for the PhD. The dissertation research must represent a significant contribution to science and should demonstrate the candidate's scholarly advancement and competence to undertake independent research. An oral defense of the dissertation will be held after the candidate submits the final draft of the dissertation to the dissertation committee. (See Theses and Dissertations in the Graduate School section.)

Student Teaching
Teaching experience is considered an integral part of the training of graduate students. As part of the general requirements for the PhD degree, each student is required to participate in the teaching program of the School of Pharmacy.

Health Economics, Microeconomics Track, (PhD)

Doctor of Philosophy in Health Economics
The Titus Family Department of Clinical Pharmacy and Pharmaceutical Economics and Policy (School of Pharmacy) offers a program of study leading to the PhD degree in Health Economics. The program focuses on microeconomics; econometrics; health economics and policy; public finance; pharmaceutical economics and policy. The program offers one track in microeconomics and a second track in pharmaceutical economics and policy.

Microeconomics Track
Students in the microeconomics track will complete the microeconomic theory and econometric sequence and course work in health economics. They will receive focused training and mentoring in health economics through collaboration on research projects.

Foreign Language Requirement
There is no formal foreign language requirement. However, competence in the use of one computer programming language is required for the graduate degrees. Such competence can be demonstrated either by course work or examination.

Grade Point Average
A grade point average (GPA) of at least 3.0 and typically considerably higher (on a scale of 4.0) must be achieved on all graduate work at USC for the passing of the screening procedure. The Graduate School requires a minimum GPA of 3.0 on all course work taken as a graduate student at USC.

Unit Requirements and Recommended Courses
The PhD in Health Economics requires a minimum of 64 units of graduate-level courses numbered 500 or higher (excluding 794) and a minimum of 4 units of 794. A maximum of two full courses (eight units) or their equivalent may be PMEP 790 Research since directed research will generally be incorporated into most 500- and 600-level courses. Exceptions will be considered on an individual basis. Normally, a full-time graduate student course load is three full courses or their equivalent per semester, with a four-course maximum.

Satisfactory completion of the economic theory sequence with a grade point average of B or higher.

At least one of the econometrics courses must be completed with a grade of B or higher:
- ECON 601 Microeconomic Theory I Units: 4 or GSBA 602 Selected Issues in Economic Theory I Units: 3
- ECON 603 Microeconomic Theory II Units: 4
- ECON 609 Econometric Methods Units: 4
- ECON 611 Probability and Statistics for Economists Units: 4
- ECON 615 Applied Econometrics Units: 4

Satisfactory completion of the health economics sequence with a grade point average of B or higher:
- ECON 636 Health Economics I Units: 4
- PM 511aL Data Analysis Units: 4
- PM 511bL Data Analysis Units: 4
- PMEP 509 Research Design Units: 4
- PMEP 519 Survey Research and Quality of Life Assessment Units: 4
- PMEP 529 Risk, Probabilities and Preferences Units: 4
- PMEP 544 Health Economics II Units: 4
- ECON 693 Seminar in Applied Economics and Public Policy Units: 2, max 4 or PMEP 698 Seminar in Pharmaceutical Economics and Policy Units: 1, max 4

Additional Requirements
Three electives at the 500 level or higher from the School of Pharmacy's Health Economics Program and from the departments of economics, mathematical statistics, biometry,
epidemiology, public administration, computer science or other relevant fields are required.

Qualifying Exam
The student will be assigned to a member of the graduate faculty who will serve as his or her temporary adviser until the formation of a qualifying exam committee. The student should consult the health economics director of graduate studies on the appointment of a PhD qualifying exam committee after taking the written screening examinations. The chairman of the student's PhD qualifying exam committee advises the student on matters of curriculum and graduate opportunities. The qualifying exam committee comprises three to five members, at least one of whom can be from outside the department; at least two members must specialize in the student's area of emphasis; and at least three of the members must be suitable for service on the student's dissertation committee. The composition of all PhD qualifying exam committees must be approved by the health economics director of graduate studies. The student must form his or her qualifying exam committee soon after passing the departmental screening procedure.

Screening Procedure
The student's progress will be reviewed after each semester and before registration for any additional course work to determine if progress has been satisfactory. The screening procedure will include satisfactory performance on written screening exams covering the major topics covered in the recommended course work for each track.

Seminar Requirements
Every student is recommended to take and satisfactorily complete 4 units of research seminars chosen from ECON 693, PMEP 698 or the equivalent. At least one of these seminars must be related to the student's major field, and the same seminar may be taken more than once. Before completing the dissertation, it is recommended that the student present at least one original research paper in a seminar of his or her choice. This paper should typically consist of original results contained in the student's dissertation.

Dissertation Proposal Preparation
The student is required to register for two units of PMEP 790 and write a research paper on a topic suitable for a dissertation. Typically, the chair of the student's guidance committee directs this work. The resulting essay becomes part of the student's written dissertation proposal which is presented and critiqued during the oral portion of the qualifying examination.

Qualifying Examination
Upon successful completion of the first two years of course and grade requirements, and following passing of required screening procedures, the student takes a general written and oral examination on the chosen area of research emphasis after presenting a detailed written dissertation proposal. After passing these examinations, the student is admitted to candidacy for the PhD degree.

Dissertation
After admission to candidacy, the student forms a dissertation committee comprising three faculty members, one of whom can be from an outside department. The chair of this committee is the dissertation supervisor. The student must register for PMEP 794a, PMEP 794b, PMEP 794c, PMEP 794d, PMEP 794z each semester, excluding summer sessions, until the dissertation and all other degree requirements are completed. The student is expected to complete a dissertation based on an original investigation. The dissertation must represent a significant contribution to knowledge and must be defended in an oral examination administered by the dissertation committee (see the section on Theses and Dissertations).

Student Teaching
Teaching experience is considered an integral part of the training of graduate students. As part of the general requirements for the PhD, all students are required to undergo training as an educator. This will include participating in seminars on educational techniques and hands-on teaching experiences through participation in didactic and small group teaching in the School of Pharmacy or the USC Price School of Public Policy.

Health Economics, Pharmaceutical Economics and Policy Track, (PhD)
Doctor of Philosophy in Health Economics
The Titus Family Department of Clinical Pharmacy and Pharmaceutical Economics and Policy (School of Pharmacy) offers a program of study leading to the PhD degree in Health Economics. The program focuses on microeconomics; econometrics; health economics and policy; public finance; pharmaceutical economics and policy. The program offers one track in microeconomics and a second track in pharmaceutical economics and policy.

Pharmaceutical Economics and Policy Track
Students in the pharmaceutical economics and policy track will specialize in areas such as cost-effectiveness, comparative effectiveness, drug therapy outcomes and organization of pharmaceutical markets. They will receive focused training and mentoring in pharmaceutical economics and policy through collaboration on research projects.

Foreign Language Requirement
There is no formal foreign language requirement. However, competence in the use of one computer programming language is required for the graduate degrees. Such competence can be demonstrated either by course work or examination.

Grade Point Average
A grade point average of at least 3.0 (A = 4.0) must have been achieved on graduate course work at USC. ECON 615 or a higher level course in econometrics must be completed with a grade of B or higher.

Unit Requirements and Recommended Courses
Students are required to complete a minimum of 64 units of graduate level course work. The following courses are recommended towards fulfilling the 64-unit requirement: ECON 401, ECON 500, ECON 513, ECON 514, ECON 609, ECON 615, PM 511a, PMEP 509, PMEP 519, PMEP 529,
Satisfactory completion of the economic theory sequence with a grade point average of B or higher.

At least one of the econometrics courses must be completed with a grade of B or higher:
- ECON 401 Mathematical Methods in Economics Units: 4
- ECON 500 Microeconomic Analysis and Policy Units: 4
- ECON 609 Econometric Methods Units: 4
- ECON 611 Probability and Statistics for Economists Units: 4
- ECON 615 Applied Econometrics Units: 4

Satisfactory completion of the pharmaceutical economics and policy sequence with an average grade of B or higher:
- PMEP 509 Research Design Units: 4
- PMEP 519 Survey Research and Quality of Life Assessment Units: 4
- PMEP 529 Risk, Probabilities and Preferences Units: 4
- PMEP 538 Pharmaceutical Economics Units: 4
- PMEP 539 Economic Assessment of Medical Care Units: 4
- PMEP 549 Applied Pharmacoecometrics II Units: 4
- PMEP 698 Seminar in Pharmaceutical Economics and Policy Units: 1 , max 4

Additional Requirements
A minimum of three electives at the 500 level or higher from the School of Pharmacy's Pharmaceutical Economics and Policy Program and from the departments of economics, mathematical statistics, biometry, epidemiology, public administration, computer science or other relevant fields are required.

Qualifying Exam Committee
The student will be assigned to a member of the graduate faculty who will serve as his or her temporary adviser until the formation of a qualifying exam committee. The student should consult the pharmaceutical economics and policy director of graduate studies on the appointment of a PhD qualifying exam committee after taking the written qualifying examination. The chairman of the student's PhD qualifying exam committee advises the student on matters of curriculum and graduate opportunities. The qualifying exam committee comprises three to five members, at least one of whom can be from outside the department; at least two members must specialize in the student's area of emphasis; and at least three of the members must be suitable for service on the student's dissertation committee. The composition of all PhD qualifying exam committees must be approved by the pharmaceutical economics and policy director of graduate studies. The student must form his or her qualifying exam committee soon after passing the departmental screening procedure.

Screening Procedure
The student's progress will be reviewed after each semester and before registration for any additional course work to determine if progress has been satisfactory. The screening procedure may include satisfactory performance on written screening exams covering the major topics covered in the recommended course work for each track.

Seminar Requirements
Every student is recommended to take and satisfactorily complete 4 units of research seminars chosen from PMEP 698 or the equivalent. At least one of these seminars must be related to the student's major field and the same seminar may be taken more than once. Before completing the dissertation, it is recommended that the student present at least one original research paper in a seminar of his or her choice. This paper should typically consist of original results contained in the student's dissertation.

Dissertation Proposal Preparation
The student is required to register for two units of PMEP 790 and write a research paper on a topic suitable for a dissertation. Typically, the chair of the student's guidance committee directs this work. The resulting essay becomes part of the student's written dissertation proposal which is presented and critiqued during the oral portion of the qualifying examination.

Qualifying Examination
Upon successful completion of the first two years of course work and grade requirements, including the passing of required screening procedures, the student takes a general written and oral examination on the chosen area of research emphasis after presenting a detailed written dissertation proposal. After passing these examinations, the student is admitted to candidacy for the PhD degree.

Dissertation
After admission to candidacy, the student forms a dissertation committee comprising three faculty members, one of whom can be from an outside department. The chair of this committee is the dissertation supervisor. The student must register for PMEP 794a, PMEP 794b, PMEP 794c, PMEP 794d, PMEP 794z each semester, excluding summer sessions, until the dissertation and all other degree requirements are completed.

The student is expected to complete a dissertation based on original investigation. The dissertation must represent a significant contribution to knowledge and must be defended in an oral examination administered by the dissertation committee (see the section on Theses and Dissertations).

Student Teaching
Teaching experience is considered an integral part of the training of graduate students. As part of the general requirements for the PhD, all students are required to undergo training as an educator. This will include participating in seminars on educational techniques and hands-on teaching experiences through participation in didactic and small group teaching in the School of Pharmacy.
Molecular Pharmacology and Toxicology (PhD)

This program emphasizes basic as well as applied research in various aspects of drug discovery and molecular and behavioral mechanisms of action. Research opportunities span investigations of fundamental molecular and cellular physiological mechanisms, including receptor activity, intracellular signaling and the regulation of gene expression, to the molecular bases of disease and aging, including avenues of pharmacological intervention.

A minimum of 60 units is required for the Doctor of Philosophy degree. At least 24 units of course work are required at the 500-level or above, exclusive of seminar and directed research. The Doctor of Philosophy candidate must select a minimum of 12 units from courses offered in the Department of Pharmacology and Pharmaceutical Sciences (PPSI), eight of which must be selected from the core 4-unit courses. The remainder of the 24 units may be taken from PPSI courses or from courses offered in other departments that are approved by the PPSI graduate affairs committee. The qualifying exam committee may require more than 24 units of course work. A maximum of 12 units can be transferred from graduate studies elsewhere.

Foreign Language Requirement

There is no formal language requirement. However, an individual qualifying exam committee can require competency in a foreign language or a computer language if it is relevant for the student's area of research.

Qualifying Exam Committee

Upon admission, the student will be assigned to a member of the graduate faculty who will serve as his or her temporary adviser until a permanent adviser has been identified. The student's program of study will be under the direction of a qualifying exam committee composed of at least five members, one of whom must be from outside the department. The student should select a graduate adviser and qualifying exam committee no later than the third semester in residence. The graduate affairs committee will serve as the qualifying exam committee until one is selected.

Screening Procedure

The performance of each student will be evaluated no later than the end of the second semester of enrollment in the graduate program. This screening procedure is conducted by the student's qualifying exam committee or, if a student has not yet selected a qualifying exam committee, by the graduate affairs committee. The committee reviews the student's progress to date in various areas including course work, research interests and laboratory performance on his or her research project or laboratory rotations. If a performance deficiency is determined, specific goals will be established that the student must fulfill to continue in the program. Passing this screening procedure is prerequisite to continuation in the PhD program.

Qualifying Examination

Students will be required to pass a comprehensive qualifying examination in major areas of molecular pharmacology, including fundamental principals of molecular and cellular biology. The examination is administered by the qualifying exam committee and consists of two parts: a written examination administered to all students at the end of their second year of study and a written proposal outlining the dissertation goals, and its oral presentation and defense by the student to the qualifying exam committee. The examination process is conducted by the student's advisory committee with oversight by the graduate affairs committee. The qualifying examination must be completed within three years after admission, unless an extension is obtained from the qualifying exam committee.

Annual Research Appraisal (ARA)

Beginning in the third year, each graduate student will meet with the qualifying exam committee and present a progress report on his or her research. Prior to the meeting the student will present a short written document describing significant experiments during the past year, problems and projected studies. This document is distributed to the committee members and is included in the student's file. The oral ARA meeting is intended to be a working session between the student and the qualifying exam committee. Experimental results and problems are discussed in this context, as well as a research plan for the next year of work. A satisfactory ARA is required for each year in the graduate program.

Dissertation

A dissertation based on original investigation in a relevant scientific area is required for the PhD. The dissertation research should demonstrate the student's ability to undertake independent research through planning, conducting and evaluating experiments. The dissertation research must represent a significant contribution to knowledge. A public oral defense of the dissertation will be held after the candidate submits the final draft of the dissertation to the dissertation committee, and it is approved by the graduate adviser and dissertation committee. For additional details, see Theses and Dissertations.

Student Teaching

Teaching experience is considered an integral part of the training of graduate students. As part of the general requirements for the PhD degree, each student is required to participate in the teaching program of the School of Pharmacy.

Pharmaceutical Economics and Policy (PhD)

Application deadline: December 1

The Department of Economics and the Department of Pharmaceutical Economics and Policy (USC School of Pharmacy) jointly offer a program of study leading to the PhD degree and to the MA degree in the process of work toward the PhD degree.

Required courses include both core requirements and area requirements. Core requirements include courses in economic theory, econometrics, and research methods. Area requirements include courses in health economics, pharmaceutical economics, welfare theory and applied econometrics.

For a detailed description of this program, see the School of Pharmacy section of this catalogue.

Pharmaceutical Sciences (PhD)

This program emphasizes basic as well as applied research in drug delivery and targeting, utilizing medicinal chemistry,
computational chemistry, pharmaceutics, pharmacodynamics, molecular pharmacology, immunology and cell biology.

A minimum of 60 units is required for the Doctor of Philosophy degree. At least 24 units of course work are required at the 500-level or above, exclusive of seminar and directed research. The Doctor of Philosophy candidate must select a minimum of 12 units from courses offered in the Department of Pharmacology and Pharmaceutical Sciences (PPSI), eight of which must be selected from the core 4-unit courses. The remainder of the 24 units may be taken from PPSI courses or from courses offered in other departments that are approved by the PPSI graduate affairs committee. The qualifying exam committee may require more than 24 units of course work. A maximum of 12 units can be transferred from graduate studies elsewhere.

Foreign Language Requirement
There is no formal foreign language requirement. However, an individual qualifying exam committee can require competency in a foreign language or some other research tool such as computer language, if this is relevant for the student's area of research.

Qualifying Exam Committee
Upon admission, the student will be assigned to a member of the graduate faculty who will serve as his or her temporary adviser until a permanent adviser has been identified. The student's program of study will be under the direction of a qualifying exam committee composed of at least five members, one of whom must be from outside the department granting the degree. The student should select a graduate adviser and qualifying exam committee no later than the third semester in residence.

Screening Procedure
The performance of each student will be evaluated no later than the end of the second semester of enrollment in the graduate program. This screening procedure is conducted by the student's qualifying exam committee or, if a student has not selected his or her research adviser at that time, by the Graduate Review Committee of the department. The committee reviews thoroughly the student's progress up to that point in various areas including course work, research interests and laboratory performance on his or her research project or laboratory rotations. If a performance deficiency is detected at that point by the committee, the student will be recommended to either take additional course work or transfer to the Master of Science program. Passing this screening procedure is prerequisite to continuation in the PhD program.

Qualifying Examination
Students will be required to pass a comprehensive qualifying examination in major areas of the pharmaceutical sciences. The examination is administered by the qualifying exam committee and consists of two parts: a written examination and a written proposition outlining a research project, followed by an oral examination based on the proposition and questions dealing with the written examination. All course and qualifying examination requirements for the Doctor of Philosophy must be completed within two and one half years after admission.

Dissertation
A dissertation based on original investigation is required. The research should make a contribution to science and should demonstrate the candidate's scholarly advancement and competence to undertake independent research. An oral defense of the dissertation will be held after the candidate submits the final draft of the dissertation to the dissertation committee (see Theses and Dissertations).

Student Teaching
Teaching experience is considered an integral part of the training of graduate students. Thus, as part of the general requirements for the PhD, each student is required to participate in the teaching program of the School of Pharmacy.

Pharmacy (PharmD)
The USC School of Pharmacy offers a full-time, four-year course of study leading to the Doctor of Pharmacy (PharmD). An undergraduate BA or BS degree is required for admission to the program. A description of the curriculum is listed in the following pages. The degree will be conferred only upon successful completion of all Doctor of Pharmacy degree requirements. The USC School of Pharmacy Doctor of Pharmacy program is accredited by the Accreditation Council for Pharmacy Education, which is the sole agency providing accreditation for professional degree programs in pharmacy.

Application Procedure
The School of Pharmacy requires applicants to complete both the Pharmacy College Application Service (PharmCAS) and a supplemental application for admission. The supplemental application is available at pharmcas.usc.edu. Both the PharmCAS and the supplemental applications deadlines are November 1. Applicants are encouraged to follow the instructions carefully for both the PharmCAS and supplemental applications. Applications will not be reviewed until both applications have been received by the Office of Admission and Student Affairs. An on-campus interview is required for admission. Only applicants with complete application files are evaluated for an on-site interview and only highly qualified applicants will be granted interviews. Not all applicants will be invited for an interview. Applicants are encouraged to apply well before the November 1 deadline to allow time for file review.

All documents mailed directly to the School of Pharmacy and received from PharmCAS by the Office of Admission become the property of the university and cannot be returned or duplicated for other than USC's purposes.

Admission Guidelines
The Admission Committee considers several factors in making admissions decisions including: previous academic performance; the on-site interview including a writing component; letters of recommendation; and other components of the completed application. The committee also considers a candidate's motivation to pursue pharmacy, interpersonal skills, oral and written communication skills, and leadership abilities. While the School of Pharmacy gives equal consideration to every qualified applicant, the school cannot accommodate all qualified candidates who apply for admission.

International Students
Because the Doctor of Pharmacy is consistently oversubscribed, the University of Southern California, School of Pharmacy does not admit holders of international visas to the program.

Entrance Requirements
Admission to the School of Pharmacy requires completion of a baccalaureate degree; completion of the specified prerequisite college courses, with a grade of C or better; and a minimum 3.0 (A = 4.0) grade point average, both in the prerequisite courses and cumulative grade point average.

Pre-pharmacy Requirements*
*Courses for science majors are required to meet the Pre-Pharmacy Requirements
To be eligible for admission to the School of Pharmacy, applicants must take required prerequisite college courses, including general biology (one-year course with laboratory, excluding human anatomy and physiology), general chemistry (one-year course with laboratory, including inorganic and qualitative analysis), organic chemistry (one-year course with laboratory), biochemistry (one course upper division), microbiology (one course), calculus (one semester or two quarters), statistics (one course) and human physiology (one course for science majors). The science requirements should be completed at an accredited four-year university.

Prerequisite courses are subject to change, and applicants are encouraged to check with the school prior to submitting an application.

Recommended Courses:
Upper-division molecular biology, physics (thermodynamics and electromagnetism), microeconomics, statistics (non-business), human behavior in either general psychology, introductory sociology, or cultural anthropology
Grades of pass/no pass or credit/no credit will not be accepted (unless a course is only offered on a pass/no pass basis). Online courses are not accepted for science courses with a laboratory requirement.

Mathematics and Sciences
Courses must include calculus, general biology, microbiology, human physiology, general chemistry, biochemistry, and organic chemistry. Only courses for science majors are acceptable. It is highly recommended that math and science courses be completed during the regular academic year and not during a summer term.

Advanced Placement and International Baccalaureate Examinations
Applicants may use AP and IB courses to meet certain USC School of Pharmacy prerequisites with the following provisos. AP results are acceptable only with scores of 4 or 5. Results for IB courses are acceptable with a score of 5. Credit for AP or IB courses is limited to a maximum of two courses (total). In addition, the AP or IB courses taken may be applied to a maximum of one semester/one quarter of general chemistry or general biology; they may not be used to satisfy the laboratory requirement. Note: AP/IB courses used to meet prerequisites will be for course credit only (i.e., they will not count toward the GPA). The Admission Committee recommends that applicants enroll in all of the required pre-pharmacy courses. Please contact the School of Pharmacy Office of Admission for specific information.

Entrance Examination
An in-person interview is required for admission. The PCAT is not required at this time; however, the examination may be required beginning in 2017.

Special Admission Program for Entering Freshmen
The Trojan Admission Prepharmacy (TAP) program provides priority consideration for admission to the USC School of Pharmacy's four-year Doctor of Pharmacy (PharmD) program for USC undergraduates who are accepted to the program. The TAP program is designed to attract highly qualified, mature high school seniors applying to USC. Students accepted into the TAP program apply to the Doctor of Pharmacy program during their final year of undergraduate education. Students must meet all regular admission criteria to the School of Pharmacy, including a BA/BS degree from USC, specific academic performance standards (GPA) and complete an on-site interview. Students in the TAP program are required to complete all prerequisite courses at USC and meet regularly with a TAP program adviser. A specific listing of USC courses and a recommended program for TAP participants may be obtained from the School of Pharmacy Office of Admission or online at pharmacyschool.usc.edu/programs/pre/tap.

PharmD Curriculum Requirements
The completion of the four-year professional curriculum is required for the Doctor of Pharmacy (PharmD) degree. The PharmD curriculum is a "block" program, meaning all students enroll for specified courses each semester and progress as a "class" through the curriculum. Students do not have a choice in the course sequence and must remain full-time students throughout the program. Students have a limited number of elective course choices and a list of electives offered is available to students prior to registration each semester. Student progress is permitted only when the prior semester has been successfully completed. Students should view the curriculum outlined here as advisory only and subject to modification. A minimum of 138 units is required for graduation.

Students enrolled in the Doctor of Pharmacy program are required to hold an Intern Pharmacist license in good standing (clear of restrictions) issued by the California Board of Pharmacy as an intern pharmacist for the entire length of the program. Licensure is required because completion of the pharmacy program requires placement in health care settings for experiential learning during each academic year. The School of Pharmacy has developed technical standards to inform students of the non-academic requirements of the program. Placement in health care settings requires the applicants pass criminal background screening and/or drug screening tests.
The School of Pharmacy has developed technical standards to inform students of specific non-academic requirements of the program.
The pharmacist of tomorrow will provide preventive and therapeutic pharmaceutical care, provide drugs to patients, communicate in health care matters, meet the ethical and
legal requirements of the practice of pharmacy and maintain professional expertise.
The curriculum committee of the School of Pharmacy has developed guidelines and patient care competencies consistent with interpretations of this new role. An appropriate and dynamic educational program is needed to develop these competencies. Therefore curriculum changes may be necessary in order to meet scientific advances, population profile changes, increasing health expectations, technological advances, or changes in health services.

Core Curriculum
Foundation courses in the biomedical, pharmaceutical, social-administrative and clinical sciences comprise the first three years of the program. Students complete Introductory Pharmacy Practice Experiences (IPPE) along with classroom-based courses. The final (fourth) year of the program includes the Advanced Pharmacy Practice Experiences (APPE), which are set in health care setting throughout the greater Los Angeles area, and a capstone course leading to a final paper/project.

Year I (P1) Curriculum
- PHRD 501 Pharmaceutics I Units: 4
- PHRD 502 Pharmaceutics II Units: 2
- PHRD 503 Biological Systems I Units: 5
- PHRD 504 Biological Systems II Units: 5
- PHRD 511 Pharmacy Practice and Professionalism 1 Units: 2
- PHRD 512 Pharmacy Practice and Professionalism 2 Units: 2
- PHRD 514 Case Conference 1 Units: 2
- PHRD 515 Biochemistry for Pharmacy Practice Units: 2
- PHRD 516 Non-Prescription Therapies Units: 3
- PHRD 517 Pharmacogenetics Units: 2
- PHRD 519 Introduction to Pharmacy Practice Units: 2
- PHRD 559 Therapeutics: Pharmacokinetics Units: 3
Various Electives* 0-1 units

Year II (P2) Curriculum
- PHRD 508 Pharmacy Literature Analysis and Drug Information Units: 3
- PHRD 552 Pharmaceutics III Units: 3
- PHRD 557 Introduction to Therapeutics Units: 4
- PHRD 559 Therapeutics: Pharmacokinetics Units: 3
- PHRD 563 Case Conference 2 Units: 2
- PHRD 564 Case Conference 3 Units: 2
- PHRD 565 Pharmacy Practice and Professionalism 3 Units: 2
- PHRD 566 Pharmacy Practice and Professionalism 4 Units: 2
- PHRD 567 Pharmacy Law Units: 2
- PHRD 570 Therapeutics: Central Nervous System Units: 5
- PHRD 572 Therapeutics: General Medicine and Inflammatory Disorders Units: 5
- PHRD 603 Therapeutics: Endocrine System Units: 3
Various Electives* 0-3 units

Year III (P3) Curriculum
- PHRD 611 Therapeutics: Infectious Diseases Units: 5
- PHRD 619 Therapeutics: Cardiovascular System Units: 5
- PHRD 620 Pharmacy Practice and Professionalism 5 Units: 2
- PHRD 621 Pharmacy Practice and Professionalism 6 Units: 2
- PHRD 622 Case Conference 4 Units: 2
- PHRD 623 Case Conference 5 Units: 2
- PHRD 630 Therapeutics: Special Populations and Specialty Practice Units: 6
- PHRD 633 Management, Health Care Systems and Pharmacoeconomics Units: 2
Various One APPE course from list below** 6 units
Electives* 0-4 units

Note:
*Elective courses: Students choose elective courses from courses approved by the School of Pharmacy Curriculum Committee and available during that semester. Students will be provided a list of courses approved each year. Students MUST complete a minimum of 3 units of elective courses for the degree.

**APPE courses are described below. Students begin their APPE series during the end of the P3 academic year. Students may be assigned to any of APPE listed below during the P3 year.

Required APPE Courses
All APPE courses must be taken.
- PHRD 701 Acute Care Clinical APPE Units: 6
- PHRD 704 Primary Care APPE Units: 6
- PHRD 705 Community Pharmacy APPE Units: 6
- PHRD 718 Hospital Pharmacy Practice APPE Units: 6
- PHRD 750 Advanced Pharmacy Practice Elective (APPE) Units: 6
- PHRD 796a Doctor of Pharmacy Capstone Units: 0
- PHRD 796b Doctor of Pharmacy Capstone Units: 0, 3

Elective APPE Course
Students must take one course from list below.
- PHRD 714 Nuclear Pharmacy APPE Units: 6
- PHRD 725 International Pharmacy Practice Experience Units: 6
- PHRD 726 Directed Clinical Project I APPE Units: 6
- PHRD 727 Directed Clinical Clerkship Project II Units: 6
- PHRD 731 Advanced Geriatrics APPE Units: 6
- PHRD 735 Clinical Pharmacy Research APPE Units: 6
- PHRD 738 Pharmaceutical Industry APPE Units: 6
- PHRD 750 Advanced Pharmacy Practice Elective (APPE) Units: 6 (second time)
- PHRD 751 Non-traditional Advanced Pharmacy Elective (APPE) Units: 6

Degree Requirements
All students in the Doctor of Pharmacy degree program must meet course requirements, grade point average requirements, licensure requirements, competency assessment requirements
strategy, product lifecycle and project/personnel management. After students have completed foundational course work, they will participate as a cohort that typically has a two-year cycle of classes and an additional year of dissertation research. The program has been designed to meet the needs of individuals who are already working full-time outside of the university. The doctoral degree will be administered by the School of Pharmacy.

**Admission**
The program is designed for individuals with strong professional experience and demonstrated intellectual and leadership capabilities. Applicants are expected to have a GPA of 3.0 on university-level course work and five or more years of professional experience. Admission requirements include university transcripts, a resume, at least three letters of reference, and a one-page personal statement that outlines the background and goals of the applicant. Students are encouraged even at this early stage to identify areas in which they are interested in conducting research. Additional requirements for international students are outlined by university regulations under Admission of International Students. Students are not required to provide GRE scores unless indicated by the program director. Students with an appropriate graduate or professional degree may use some previous graduate courses as transfer units toward the overall credit requirements of the Doctor of Regulatory Science program with the approval of the program director and under the normal rules of the university. Students who have graduated from the MS program in Regulatory Science can apply all of the previously taken course work toward the doctoral degree. Students with graduate degrees from outside of the regulatory science program are required to take a minimum of 32 units of course work and 4 units of dissertation research to complete the requirements for graduation. The course work requirements will be determined on an individual basis in consultation with the program director and participant's advisors.

**Curriculum Requirements**
The Doctor of Regulatory Science is administered by the School of Pharmacy. It requires participants to complete 64 units that include the following elements:

**Requirements**
- Foundation courses 15 Units
- Product lifecycle strategy 8 Units
- Global strategy 8 Units
- Project/personnel management 8 Units
- Research methods 4 Units
- Dissertation 4 Units

**Additional Requirements**
Additional elective course work will be selected in consultation with the program advisers according to the areas of intended specialization of the participant in order to meet the credit requirements of the program. Typically foundational courses and some electives will be taken in the first two years of the program. Advanced courses in product lifecycle strategy, global strategy and project/personnel management will normally be taken by the doctoral cohort of students during the third and fourth years of the program. Dissertation planning and research will typically commence.
in the third year of the program, and extend until the successful completion of the dissertation.

**Foundation Courses**

Fifteen or more units of foundation courses may be taken as part of the master's program in regulatory science, or with prior approval, from another graduate program with similar objectives. Required foundational courses normally include: MPTX 511 Introduction to Medical Product Regulation; two from MPTX 512 Regulation of Pharmaceutical and Biological Products, MPTX 513 Regulation of Medical Devices and Diagnostics, MPTX 514 Regulation of Food and Dietary Supplements; MPTX 515 Quality Systems and Standards, MPTX 516 Medical Products and the Law; MPTX 517 Structure and Management of Clinical Trials. Other courses may be substituted after the participant's background preparation has been considered.

**Product Lifecycle Strategy**

Eight or more units of course work related to product lifecycle management, from discovery to commercialization, will be drawn from a broad list of courses offered in regulatory science or through the Titus Family Department of Clinical Pharmacy and Pharmaceutical Economics and Policy. Included in this list are: PMEP 538 Pharmaceutical Economics; PMEP 539 Economic Assessment of Medical Care; RSCI 601 Biomedical Commerce. Other courses may also be considered in consultation with the supervisors and program director. Students are also encouraged to take courses outside the School of Pharmacy when more specialized courses fit their professional research or development plans.

**Global Regulatory Strategy and Policy**

Eight or more units of course work related to global regulatory strategy could include some of the following courses: MPTX 519 Global Regulation of Medical Products; PPD 571 International Public Policy and Management Seminar; RSCI 604 Regulatory Strategy in Asia; RSCI 608 Regulatory Strategy in Europe and the Americas.

**Project and Personnel Management**

Eight or more units of relevant course work should typically include: MPTX 602 Science, Research and Ethics; RSCI 603 Managing Complex Projects; RSCI 605 Managing Organizations and Human Resources. Graduate courses in other university departments or schools can be substituted with the approval of the program director.

**PhD Programs in Pharmaceutical and Translational Sciences (PHTS)**

The training encompasses a unique scientific framework from drug discovery, delivery and development to application of genetics and genomics to experimental and clinical/translational research. The umbrella structure is intended to bring together students during their first year to attend foundation core courses and seminars. The goal of the shared experiences is to introduce them to a broad range of pharmaceutical sciences research methods and build a solid foundation in scientific writing, biostatistics, literature evaluation and ethical conduct in research. Complementing their foundation course work, the students will choose from laboratories across the three PhD
program tracks (MPTX, PSCI, CXPT) to do rotations during their first year. This fosters interdisciplinary cross-training among students, collaborations among faculty, and assists students in finding the ideal laboratory and faculty mentor in line with the specialized track of study they want to pursue. At the end of the spring semester of the first year, students will select a faculty adviser and a specific PhD program track from among the three participating programs listed below. In subsequent years, students will take classes that will differ depending on the PhD program they join. In addition, each student will complete qualifying examinations for the chosen PhD program and will develop and complete an original research project that will serve as the basis for a doctoral dissertation.

**PhD Graduate Programs: Three Tracks**

Molecular Pharmacology and Toxicology (MPTX)
Pharmaceutical Sciences (PSCI)
Clinical and Experimental Therapeutics (CXPT)

**PHTS Admission Requirements**

*Application Deadline (priority review): December 1*

All prospective students will apply through the single umbrella program Pharmaceutical and Translational Sciences (PHTS). Application materials will be reviewed by a joint admission committee, with equal representation of faculty from each track, evaluating applications on the basis of academic excellence and scientific research commitment. Applicants should have a baccalaureate degree in natural sciences, or sufficient courses in mathematics and the life sciences. This is required to provide a strong background for studies in biomedical and biological research. Appropriate undergraduate degrees include biology, physiology, engineering, chemistry or computer science. Applicants should have a strong record of academic achievement and satisfactory performance on the general and advanced portions of the GRE. Other requirements for admission include: a detailed statement of purpose as well as three letters of recommendation, one of which should be from a wet laboratory or computational research mentor. Previous research experience is expected. Students are admitted for the academic year in the fall semester. Applicants who are accepted with minor deficiencies are expected to correct these during the first year following enrollment.

**Admission Criteria**

The Admission Committee will consider applications based on the following factors:

1. **Overall Grade Point Average (GPA)**
   
   A minimum GPA of 3.0 is required. Special attention is given to grades achieved in science courses relevant to the program (e.g., chemistry, biology, biochemistry, pharmacology and physiology).

2. **Graduate Record Examinations (GRE) Score**
   
   GRE scores of 153 Quantitative and 144 Verbal (new exam) or a combined Verbal and Quantitative GRE score of 1000 (old exam) are required. However, priority for financial support is given to applicants with GRE scores of at least 308 (new exam) or 1200 (old exam).

3. **Letters of Recommendation**
   
   Three letters from faculty knowledgeable of the student’s ability and capability are required. These letters should provide a thorough assessment of the student’s experience in laboratory research, ability to communicate in verbal and written English, motivation, creativity and other qualities in the student's academic performance.

4. **TOEFL Scores for International Applicants**
   
   A minimum TOEFL (computer based) score of 100 is required. A score of 100 is highly competitive for admission and financial support. An IELTS score of 7 is competitive; and an IBT minimum score of 100, with at least 20 in each section, is required.

5. **Research and Professional Experience**

   The student’s research and professional experience should be well described within the application. Also, a résumé (if provided), and/or a personal statement summarizing career objectives and research interests, published manuscripts and letters of reference should be included. These documents will help the Admissions Committee in their evaluation of the candidate’s background preparation for success in the PhD program. For those interested in pursuing PhD training in the Clinical and Experimental Therapeutics (CXPT) track, special emphasis will be given to applicants with an advanced professional degree (e.g. PharmD, MD, DDS).

**Application Deadline**

Applications may be submitted anytime between September 1 and January 15 — the deadline for consideration for admission for the following fall semester. Applications will be reviewed as they are received, beginning in the Fall. Early acceptance will be offered to outstanding applicants. Consideration for certain USC Scholarships and Fellowships begins in December. Applications must be received by December 1 to receive full consideration for these opportunities.

Admission decisions will continue to be made until the class is filled, usually by mid to late spring. Applications are only considered for admission beginning in the fall term, except under exceptional circumstances.

**Financial Support**

Admitted students are supported by research and teaching assistantships or fellowships during their graduate training. Tuition, health insurance, dental insurance and health center fees are also covered.

**Lab Rotations**

During the first year, students rotate through the labs of at least two faculty members of the program (potential research advisors). By the first summer of graduate study, but no later than after 12 months in the program, each student is expected to have selected a faculty mentor/research adviser.

**Admission Requirements for PhD Programs in PHTS**

All prospective students will apply through the single umbrella program Pharmaceutical and Translational Sciences (PHTS) and become enrolled in the MPTX, PSCI or CXPT PhD programs after having successfully completed the first year’s course work and rotations. During the PHTS year, students must complete the foundation core curriculum of 24 units, maintain a 3.0 grade point average with no grade lower...
than a C on all courses and must complete at least two laboratory rotations in order to continue on to one of the three PhD program tracks below.

**Doctor of Philosophy in Molecular Pharmacology and Toxicology (MPTX)**

*Program Director:* Roger Duncan, PhD

This track provides training in molecular mechanisms of disease as well as disease and drug interaction. Course work emphasizes cell biology and molecular pharmacology. Research areas are laboratory based and include molecular and neuro-pharmacology, receptor pharmacology, cancer biology and pharmacology, metabolism and biochemistry, and oxidant toxicology.

MPTX students are recommended to take PSCI 664 (4, Fa) Drug Design and Discovery; MPTX 500 (4, Sp) Cell Signaling; and PSCI 665 (4, Sp) Drug Transport and Delivery.

PhD students must supplement course work by registering for 790 Research /794 Doctoral Dissertation (a-d & z) during the fall, spring and summer semesters as needed to complete the minimum 60 units required for the PhD program.

As part of the requirements for the PhD degree in Molecular Pharmacology and Toxicology, students must adhere to the unit/course requirements, guidance committee and dissertation committee guidelines and must complete the qualifying examination, annual research appraisal, and dissertation and oral defense as outlined in the sections following the descriptions of the PhD programs.

**Doctor of Philosophy in Pharmaceutical Sciences (PSCI)**

*Program Director:* Roger Duncan, PhD

This track provides training that emphasizes basic as well as applied research through advanced course work in contemporary pharmaceutical sciences. Independent laboratory research areas include drug design, development, targeting, and delivery, medicinal chemistry, computational chemistry, pharmacetics, pharmacokinetics, pharmacodynamics, immunology, and molecular and cell biology.

PSCI students are recommended to take MPTX 500 (4, Sp) Cell Signaling and PSCI 665 (4, Sp) Drug Transport and Delivery.

PhD students must supplement course work by registering for 790 Research /794 Doctoral Dissertation (a-d & z) during the fall, spring and summer semesters as needed to complete the minimum 60 units required for the PhD program.

As part of the requirements for the PhD degree in Pharmaceutical Sciences students must adhere to the unit/course requirements, guidance committee and dissertation committee guidelines and must complete the qualifying examination, annual research appraisal, and dissertation and oral defense as outlined in the sections following the descriptions of the PhD programs.

**Doctor of Philosophy in Clinical and Experimental Therapeutics (CXPT)**

*Program Director:* Stan Louie, PharmD

This track provides cross-training between clinical and basic sciences — focusing on the investigation of disease processes, drug development and the efficacy and toxicity of therapeutic regimens. Course requirements and research opportunities for graduate students enrolled in the track provide both experimental (basic) and disease-focused experiences that complement the graduate's respective research focus. The emphasis in this track is clinical translational, rather than basic science research.

CXPT students are recommended to take CXPT 609 (4, Sp) Preclinical Experimental Therapeutic Drug Development, RSCI 550 (2, Fa) Translational Medicine, an Overview, MPTX 517 (4, FaSpSm) Clinical Trial Design, PHRD 664 (3, Sp) Clinical Problem Solving (for students without an advanced professional degree).

PhD students must supplement course work by registering for 790 Research /794 Doctoral Dissertation (a-d & z) during the fall, spring and summer semesters as needed to complete the minimum 60 units required for the PhD program.

As part of the requirements for the PhD degree in Clinical and Experimental Therapeutics, students must adhere to the unit/course requirements, guidance committee and dissertation committee guidelines and must complete the qualifying examination, annual research appraisal, and dissertation and oral defense as outlined in the sections following the descriptions of the PhD programs.

**Unit/Course Requirements**

A minimum of 60 units of graduate course credits is required for the PhD, including course work, and research and dissertation units. At least 24 units of formal course work are required at the 500 level or above (see Course Offerings below), exclusive of directed research. No more than 8 units of 794 Doctoral Dissertation may be applied toward the PhD degree. Students must complete the first year PHTS foundation curriculum as well as course requirements for their specific PhD program track. Additional course work relevant to the research interests of the student may be required by the student's guidance committee or by the student's faculty advisor. A minimum of 12 of the 24 units is to be taken in courses in the student's chosen track. Of the total 60 units, 36 units may be fulfilled with other courses, directed research and dissertation.

**Graduate Seminar**

All first-year PhD candidate students are required to attend departmental and other scheduled school-wide seminars. Students in their second year and above are required to present at least one departmental seminar each year.

**Individual Development Plan (IDP)**

All PhD students regardless of their chosen tracks/PhD programs are required to complete an Individual Development Plan (IDP) annually at the end of each year of matriculation. IDPs are intended to serve as a tool to facilitate communication between trainees and their advisers. The student will meet with his/her adviser and IDP committee to systematically identify training needs and competencies, establish goals and take stock of year-by-year progress during the PhD years; and to plan and prepare for their post-PhD future while they are in graduate school. The IDP committee is composed of the student's primary adviser (or
program chair if the student does not yet have an adviser at the end of the first year) along with two other members from the student's qualifying or dissertation committee (see below), with the option of substituting one of the committee members with a professional from the student's career of interest.

Guidance Committee
After 24 units of course work, which includes the PHTS core curriculum and course requirements for one of the three PhD program tracks, the student, in consultation with his/her faculty adviser, will nominate five faculty members to serve on the guidance committee for the qualifying examination. A minimum of three of the faculty must be from the student's PhD program track. The chair of the guidance committee must be a member of the student's PhD program track and the faculty adviser is expected to be on the committee as the chair. These nominations are submitted to the Graduate Affairs Office. The appointment form is signed by the committee members, the chair of the program and the dean or dean designate for formal appointment.

Qualifying Examination
Students will be required to pass a qualifying exam by the end of the first semester of their third academic year. Before permission is granted to sit for the qualifying examination, all students must complete the 24 required units as stated above, with no grades lower than "C" and with an overall GPA of 3.0 or better. Final evaluation of the examination is determined by a consensus of the guidance committee. If a student fails, it is at the discretion of the committee to allow the student to repeat the examination within 60 days. The program has the option to dismiss the student from the program with or without the option of a terminal master's degree after the first or second failure.

Dissertation Committee
After advancement to candidacy, the student must form a dissertation committee, in consultation with his or her faculty adviser. A minimum of three committee members must be selected, one of which is the faculty adviser, and at least one of which must be a tenured or tenured-track faculty member of the student's PhD program track. One committee member may be nontenure track. The chair of the dissertation committee is usually the faculty adviser. The dissertation committee is responsible for counseling the student during preparation of the dissertation and conducting the final oral examination during the dissertation defense. Students are expected to meet with the dissertation committee once per year to discuss progress. Dissertations committee members are expected to read and comment on a dissertation within two weeks from its submission. The student and faculty will coordinate a timeline for the student to present the thesis to the dissertation committee. This timeline must allow all dissertation committee members enough time to fulfill their responsibilities within the four-week deadline.

Dissertation and Oral Defense
A dissertation based on original investigation in a relevant scientific area is required for the PhD. The dissertation research must represent a significant contribution to science and should demonstrate the candidate's scholarly advancement and competence to undertake independent research through planning, conducting and evaluating experiments. Students should have at least one first author publication accepted in a peer-reviewed journal before the defense. A public oral defense of the dissertation will be held after the candidate submits the final draft of the dissertation to the dissertation committee, and it is approved by the graduate adviser and dissertation committee. All doctoral candidates must be registered in 794 Doctoral Dissertation each semester (excluding summer sessions) from the time of their advancement to candidacy until their dissertation is approved and submitted to the Graduate School.

Student Teaching
Teaching experience is considered an integral part of the training of graduate students. Thus, each PhD student is given the opportunity to participate in the teaching program of the School of Pharmacy.

PHTS Foundation Core Curriculum
- MPTX 502 Pharmacology Units: 4
- MPTX 602 Science, Research and Ethics Units: 2
- PM 510 Principles of Biostatistics Principles of Biostatistics Units: 4
- PSCI 556 Principal Research Approaches and Scientific Writing Units: 4

Additional Core Curriculum for MPTX, PSCI and CXPT Tracks
At least one of the following three courses, from the MPTX, PSCI and CXPT tracks should be selected:
- CXPT 609 Preclinical Experimental Drug Therapeutic Development Units: 4
- MPTX 500 Molecular Pharmacology and Toxicology I Units: 4
- PSCI 665 Drug Transport and Delivery Units: 4

Additional graduate courses offered in the School of Pharmacy
To reach the required 24 units of course work, the student can take more than one of the track courses, and any of the approved courses listed below, as well as other individualized program selected offerings approved by PHTS and the student's adviser.
- CXPT 664 Clinical Problem Solving Units: 3
- MPTX 517 Structure and Management of Clinical Trials Units: 4
- PHTS 654 Computation in Drug Discovery and Development Units: 2
- PSCI 557 Introduction to Tools and Techniques for Chemical Biology Units: 2
- PSCI 599 Special Topics Units: 2, 3, 4
- PSCI 655 Immunopharmaceutics Immunopharmaceutics Units: 2, 2 years
- PSCI 667 Intracellular Drug Delivery and Targeting Units: 2, 2 years
- RSCI 530 Translational Medicine: An Overview Units: 2
Additional campus-wide general courses
To reach the required 24 units of course work, the student can take more than one of the track courses, and any of the approved courses listed below, as well as other individualized program selected offerings approved by PHTS and the student's adviser.

INTD 531 Cell Biology Units: 4
INTD 549 Protein Chemistry — Structure and Function Units: 4

INTD 561 Molecular Biology Units: 4
INTD 572 Systems Physiology and Disease I Units: 4
PATH 575 Frontiers of Pathology Units: 2

PhD Programs in Pharmaceutical and Translational Sciences (PHTS)
- Clinical and Experimental Therapeutics (PhD)
- Molecular Pharmacology and Toxicology (PhD)
- Pharmaceutical Sciences (PhD)

USC Price School of Public Policy

The USC Price School of Public Policy provides a dynamic learning environment where interdisciplinary education abounds. At USC Price, students choose a program of study from the independent yet related fields of public administration and leadership, public policy, nonprofits and philanthropy, health management and policy, urban planning, real estate development and executive leadership. Students are supported by a committed faculty who contribute to the strong sense of community present in the school.

The school's mission is to improve the quality of life for people and their communities. Faculty engage in solving some of society's most pressing issues — and challenge students to do the same. USC Price is renowned for its expertise in areas such as: sustainability and the environment, health care policy, nonprofit management, housing and real estate, transportation, infrastructure, urban development and land use, social policy, governance, civic engagement, community development, immigration and risk analysis, among others.

Defining characteristics of USC Price are the depth of its academic classroom experience and connecting classroom theory to professional practice through practicums, internships and laboratory work locally, nationally and around the globe. Students graduate with the knowledge, skills and experiences to lead in their chosen field of practice.

Today's complex challenges call for leaders who are able to work across disciplines and across the public, private and nonprofit sectors to find solutions. It is for this multidisciplinary reality that USC Price prepares its students. USC Price students go on to hold high-ranking appointments in our nation's capital, analyze and determine public policy, design new transportation systems, and redesign city, county, state and federal governance structures — in the United States and abroad.
